PHIL 464 **Augustine** (3 per semester, maximum of 6) Examines Augustine's philosophy and religious thought regarding God, friendship, evil, free will, community, creation, memory and time, meaning and truth.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy includingPHIL 201 or 6 credits of philosophy at the 200 level

PHIL 465 **Aquinas** (3 per semester, maximum of 6) Examines Aquinas' philosophy, political and moral theory regarding knowledge and existence of God, faith, truth, nature, logic, and the soul.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy includingPHIL 201 or 6 credits of philosophy at the 200 level

PHIL 468 (J ST 468) **Modern Jewish Philosophy** (3) Explores the major figures in modern Jewish philosophy and their influences on contemporary philosophy.
Effective: Summer 2004
Prerequisite: one course in Philosophy and/or Jewish Studies

PHIL 470 **Rationalism** (3 per semester, maximum of 6) Examines the epistemological emphasis on reason over experience in rationalist philosophers such as Descartes, Leibniz, and Spinoza.
Effective: Fall 1998
Prerequisite: 9 credits in philosophy includingPHIL 202 and 3 other credits of philosophy at the 200 level

PHIL 471 **Empiricism** (3 per semester, maximum of 6) Examines the epistemological emphasis on experience over reason in empiricist philosophers such as Locke, Hume, Berkeley, and contemporary philosophers.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy includingPHIL 202 or 6 credits of philosophy at the 200 level

PHIL 472 **Enlightenment** (3 per semester, maximum of 6) Examines Enlightenment views on reason, history, individuals, belief, and science through study of Locke, Voltaire, Diderot, Kant, and their critics.
Effective: Fall 1998
Prerequisite: 9 credits in philosophy includingPHIL 202 or 6 credits of philosophy at the 200 level

PHIL 473 **German Idealism** (3 per semester, maximum of 6) Critically examines the philosophy of central German idealists, including Kant, Fichte, Schelling, and Hegel, and its impact on later philosophy.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including eitherPHIL 202 orPHIL 203 or 6 credits of philosophy at the 200 level

PHIL 474 **Kant** (3 per semester, maximum of 6) Critical examination of the metaphysics, epistemology, aesthetics, legal and moral philosophy, and influence of Immanuel Kant.
Effective: Fall 1998
Prerequisite: 9 credits in philosophy includingPHIL 202 or 6 credits of philosophy at the 200 level

PHIL 475 **Fichte and Schelling** (3 per semester, maximum of 6) The transformation of post-Kantian idealism before Hegel through Fichte's and Schelling's works on nature, history, reason, morality, and spirit.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy includingPHIL 202 or 6 credits of philosophy at the 200 level

PHIL 476 **Hegel** (3 per semester, maximum of 6) Critical examination of the metaphysics, moral theory, epistemology, and philosophy of history of this central figure of 19th-century philosophy.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy includingPHIL 203 or 6 credits of philosophy at the 200 level

PHIL 477 **Kierkegaard** (3 per semester, maximum of 6) Studies this 19th-century thinker's ideas on ethical and aesthetic values, despair and selfhood, institutions and individuals, reality, and faith.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including eitherPHIL 203 or 6 credits of philosophy at the 200 level

PHIL 478 (J ST 478, RL ST 478) **Ethics After the Holocaust** (3) Explores the philosophical effects of the Holocaust for thinking about the primary question: Is ethics possible?
Effective: Spring 2005
Prerequisite: one course in Jewish Studies or Philosophy

PHIL 479 **Critical Theory** (3 per semester, maximum of 6) Examines the ontology, political and social thought of the Frankfurt School from Horkheimer and Adorno to Marcuse and Habermas.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy including eitherPHIL 203 or 6 credits of philosophy at the 200 level

PHIL 480 **Marx** (3 per semester, maximum of 6) Examines the evolution of Marx's economic, social, and political thought, and metaphysics, and their transformations by later Marxist thinkers.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy includingPHIL 203 or 6 credits of philosophy at the 200 level

PHIL 481 **Nietzsche** (3 per semester, maximum of 6) Friedrich Nietzsche's basic ideas, including master and slave morality, the will to power, eternal recurrence, genealogical inquiry, and naturalism.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy includingPHIL 203 or 6 credits of philosophy at the 200 level

PHIL 482 **Peirce** (3 per semester, maximum of 6) Examination of Peirce's system of the sciences, with an emphasis on his categories, pragmatism and pragmaticism, semiotic, and cosmology.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy includingPHIL 401 or 6 credits of philosophy at the 200 level

PHIL 483 **James** (3 per semester, maximum of 6) James' psychology, pluralistic metaphysics, theories of truth and meaning, radical empiricism, and idea of religious experience.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy includingPHIL 401 or 6 credits of philosophy at the 200 level

PHIL 484 **Husserl** (3 per semester, maximum of 6) Examines Husserl's phenomenology from the early to later works including his studies of essences, intentionality, intersubjectivity, and the life-world.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy includingPHIL 202, PHIL 203 or 6 credits of philosophy at the 200 level

PHIL 485 **Heidegger** (3 per semester, maximum of 6) Studies Heidegger's metaphysical thought from his early to later works regarding being, history, subjectivity, aesthetics, language, and his influence.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy includingPHIL 402 or 6 credits of philosophy at the 200 level

PHIL 486 **Wittgenstein** (3 per semester, maximum of 6) Examines Wittgenstein's early and late work, including logical atomism, meaning, language games, forms of life, and the private-language argument.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy includingPHIL 204 or 6 credits of philosophy at the 200 level

PHIL 487 **Analytic Philosophy** (3 per semester, maximum of 6) Analytic philosophy's founding by Frege, Russell, Moore, Wittgenstein; and its contemporary development by Quine, Kripke, Dummett, and Davidson.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy includingPHIL 202 orPHIL 204 along with 3 credits of philosophy at the 200 level

PHIL 488 **Post-Structuralism** (3 per semester, maximum of 6) Studies concepts of power, desire, subjectivity, and difference through the work of thinkers including Lacan, Foucault, Derrida, Deleuze, and Lyotard.
Effective: Fall 1998
Prerequisite: 9 credits of philosophy including eitherPHIL 203 orPHIL 204 and 6 credits of philosophy at the 200 level

PHIL 490 **Dewey** (3 per semester, maximum of 6) Critically examines the metaphysics, epistemology, ethics, logic, aesthetics, education theory, and social and political philosophy of this major American pragmatist.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy includingPHIL 401 or 6 credits of philosophy at the 200-level

PHIL 491 **Merleau-Ponty** (3 per semester, maximum of 6) Merleau-Ponty's phenomenological anti-dualism through his studies on the body and the flesh, aesthetics, political philosophy, and late ontology.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy includingPHIL 402 or 6 credits of philosophy at the 200-level

PHIL 492 **Foucault** (3 per semester, maximum of 6) Foucault's critique of history, methodological archaeology and genealogy, studies of madness and sexuality, and theory of knowledge, power, and subjectivity.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy includingPHIL 402 or 6 credits of philosophy at the 200-level

PHIL 493 **Phenomenology and Hermeneutics** (3 per semester, maximum of 6) Studies major figures and issues in phenomenology and hermeneutics, focussing on the work of Husserl, Gadamer, Heidegger, Merleau-Ponty, and Levinas.
Effective: Summer 1998
Prerequisite: 9 credits of philosophy includingPHIL 202 andPHIL 204

PHIL 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

PHIL 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

PHIL 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PHIL 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PHIL 497A **Critical Philosophy of Race** (3) This course is specifically to be offered in conjunction with the conference, "Critical Philosophy of Race: Intersections with Culture, Ethnicity, and Nationality Beyond the Black/White Binary", November 11-13, 2010, University Park, PA, to bring together established and emerging scholars to explore new dimensions in the critical philosopy of race.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PHIL 498 **Special topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2001

PHIL 499 (IL) **Foreign Study--Philosophy** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

PHIL 501 **American Philosophy Seminar** (3 per semester/maximum of 6) Critically examines central figures in American philosophy including Emerson, Thoreau, Pierce, James, Royce, Dewey, Santayana, Mead, Quine, Davidson, and Rorty.
Effective: Spring 2000

PHIL 502 **European Philosophy Seminar** (3 per semester/maximum of 6) Critically examines central European philosophers including Husserl, Heidegger, Sartre, Merleau-Ponty, Gadamer, Levinas, Foucault, and Derrida; course content varies with instructor.
Effective: Summer 2000

PHIL 503 **Ethics Seminar** (3 per semester/maximum of 6) Critical investigation of philosophical problems in ethics, and viability of historical and contemporary ethical positions; course content varies with instructor.
Effective: Summer 2000

PHIL 508 **Social and Political Philosophy Seminar** (3 per semester, maximum of 6) Critical examination of social and political philosophies, their historical context and relation to philosophic method; course content varies with instructor.
Effective: Summer 2000

PHIL 510 **Philosophy of Science Seminar** (3 per semester, maximum of 6) Critical examination of specific problems in philosophy of science including, theory, method, and practice; course content varies with instructor.
Effective: Summer 2000

PHIL 512 **Seminar in Logic** (3) This course covers topics in first-order symbolic logic with identity and advanced special topics in metatheory.
Effective: Summer 2009

PHIL 513 (B A 513, PSY 513) **Philosophy of Social Science** (3) Study of major methodological, normative, and theoretical issues in the social sciences, emphasizing the development of positivism and critical alternatives.
Effective: Fall 2004

PHIL 516 **Aesthetic Seminar** (3 per semester, maximum of 6) Critical examination of problems in philosophy of art including beauty, taste, value, politics, culture, interpretation; course content varies with instructor.
Effective: Summer 2000

PHIL 517 **Philosophy of Mathematics Seminar** (3 per semester/maximum of 6) Examines central philosophies of mathematics including logicalism, formalism, intuitionism, and non-foundationalist positions; content varies with instructor.
Effective: Spring 2000

PHIL 525 **Epistemology Seminar** (3 per semester/maximum of 6) Studies problems, figures, and movements in epistemology from the ancient philosophers to contemporary thinkers; course content varies with instructor.
Effective: Spring 2000

PHIL 526 **Metaphysics Seminar** (3 per semester, maximum of 6) Problems, figures, and movements in metaphysics and anti-metaphysics from ancient philosophers to contemporary thinkers; course content varies with instructor.
Effective: Summer 2000

PHIL 527 **Philosophy of Mind Seminar** (3 per semester/maximum of 6) Examines central topics in philosophy of mind: causation, personhood, consciousness, intentionality, artificial intelligence, neuroscientific explanations; course content varies with instructor.
Effective: Spring 2000

PHIL 529 (LING 529) **Philosophy of Language Seminar** (3 per semester/maximum of 6) Examines topics in the philosophy of language including the nature of meaning, and semantic theories, pragmatics, interpretation, and poetic language.
Effective: Spring 2002

PHIL 538 (WMNST 538) **Feminist Philosophy Seminar** (3) Critically examines feminist approaches to ethics, epistemology, philosophy of science, metaphysics, social/political philosophy, and the history of philosophy.
Effective: Summer 2005

PHIL 553 **Ancient Philosophy Seminar** (3 per semester/maximum of 6) Analyzes specific concerns and texts of ancient philosophy including those of Plato and Aristotle; course content varies with instructor.
Effective: Summer 2000

PHIL 554 **Medieval Philosophy Seminar** (3 per semester/maximum of 6) Critical examination of medieval texts and philosophers, including Augustine, Anselm, Aquinas, Duns Scotus, and Ockham; course content varies with instructor.
Effective: Summer 2000

PHIL 555 **Modern Philosophy Seminar** (3 per semester/maximum of 6) Examines rationalism, empiricism, and other philosophical movements from Bacon and Descartes to Kant and Mill; course content varies with instructor.
Effective: Summer 2000

PHIL 556 **19th-Century Philosophy Seminar** (3 per semester, maximum of 6) Examination of philosophy from Hegel to Nietzsche on history, dialectic, ideology, existence, science, and art; course content varies with instructor.
Effective: Summer 2000

PHIL 557 **20th Century Philosophy Seminar** (3 per semester/maximum of 6) Central problems in works of twentieth-century philosophers including Russell, Dewey, Wittgenstein, Heidegger, Foucault, Levinas; course content varies with instructor.
Effective: Spring 2000

PHIL 558 **Contemporary Philosophy Seminar** (3 per semester, maximum of 6) Critically investigates diverse recent figures and problems of continental, pragmatic, and analytic philosophy; course content varies with instructor.
Effective: Summer 2000

PHIL 580 **Phenomenology** (3 per semester/maximum of 6) A critical study of one or more thinkers, ideas, or movements in modern phenomenology.
Effective: Fall 1983

PHIL 581 **Hermeneutics** (3 per semester/maximum of 6) Hermeneutic philosophy and aspects of its methodological significance for human studies, philology, history, sociology and psychology, and philosophy of science.
Effective: Fall 1983

PHIL 589 **Philosophical Translation Seminar** (2) Studies philosophical works in their original (non-English) languages; course content varies with instructor.
Effective: Spring 2001
Prerequisite: appropriate language proficiency demonstrated by satisfactory completion of departmental translation exam in given language

PHIL 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

PHIL 594 **Research Technique** (1) A course utilizing research sources and techniques relevant to philosophical studies. Taken in the first semester of graduate study.
Effective: Spring 1987

PHIL 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

PHIL 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

PHIL 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

PHIL 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

PHIL 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Students will teach introductory logic course--i.e., Phil 1--and other introductory level courses as required by staffing.
Effective: Fall 1983

PHIL 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2000

PHIL 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

PHIL 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

PHIL 803 (HLS 803) **Homeland Security: Social and Ethical Issues** (3) This course will examine the social, political, legal, and ethical issues that arise in the context of homeland security.
Effective: Summer 2010

1 Students may take only one course for General Education credit from PHIL 001 GH or 004 GH.

Last Import from UCM: July 10, 2010 3:00 AM

Photography (PHOTO)

PHOTO 400 **Digital Photography in the Studio** (4) Concepts and technology of the digital photography studio; large format digital cameras, electronic studio lighting and digital printing.
Effective: Fall 2006
Prerequisite: PHOTO 200

PHOTO 401 **New Materials and Methods in Applied Digital Imaging** (4 per semester) Advanced course where student teams use digital photography, video, and scanning to present story ideas using World Wide Web and gallery exhibition.
Effective: Fall 2006
Prerequisite: PHOTO 200

PHOTO 402 **Photographic Narratives** (4 per semester/maximum of 8) The development of a photographic project that leads to the creation of a handmade book.
Effective: Fall 2006
Prerequisite: PHOTO 200

PHOTO 403 **Photo Assemblage** (4) Collage making through collecting and assembling found materials, including photography; origins of photographic manipulation and contemporary uses.
Effective: Fall 2006

PHOTO 405 **Creative Projects in Photography** (4 per semester/maximum of 8) Special individual problems related to photographic vision.
Effective: Fall 2006
Prerequisite: PHOTO 201, PHOTO 300

PHOTO 410 **Photographing Motion and Athletic Events** (2) A practicum course in photographing sports and athletic events.
Effective: Summer 2007
Prerequisite: PHOTO 200

PHOTO 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2006

PHOTO 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2006

PHOTO 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2006

Last Import from UCM: July 10, 2010 3:00 AM

Physical Science (PH SC)

PH SC 410 **Quantum Mechanics of Atoms, Molecules, and Solids** (3) The physical concepts underlying the properties of materials are covered. Quantum mechanics is applied to problems in atomic, molecular, and solid- state physics.
Effective: Summer 2003
Prerequisite: PHYS 237

PH SC 440 **Applied Solid State and Optical Processes** (3) This course covers the solid state physics and material science prerequisite to understand today microelectronic and optoelectronic devices.
Effective: Summer 2003
Prerequisite: PHYS 237, PH SC 410 orPHYS 410

PH SC 450 **Micro-and Nanodevices** (3) This course provides a overview of the microelectronic, optoelectronic and micro mechanical devices and operating principles behind today's micro and nanoscale technology.
Effective: Summer 2003
Prerequisite: PH SC 440 permission of the program

Last Import from UCM: July 10, 2010 3:00 AM

Physical Therapy (P T)

No courses for department code **P T** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Physics (PHYS)

PHYS 400 **Intermediate Electricity and Magnetism I** (3) Electrostatics, steady-state magnetic field; electrical and magnetic properties of matter; Maxwell's equations, boundary-value problems, and wave propagation.
Effective: Spring 2007
Prerequisite: MATH 250 orMATH 251;MATH 230 orMATH 231;PHYS 212, PHYS 213 andPHYS 214 Concurrent: MATH 230 OR MATH 231 ; PHYS 204

PHYS 401 **Intermediate Electricity and Magnetism II** (3) Electromagnetic wave propagation in media, wave guides, dipole radiation, electrodynamics of charged particles, special theory of relativity, special topics.
Effective: Spring 1994
Prerequisite: PHYS 400

PHYS 402 **Electronics for Scientists** (4) Circuit and network theory; active devices; amplifiers; introduction to digital electronics; noise theory.
Effective: Spring 2007
Prerequisite: MATH 250 orMATH 251;PHYS 212, PHYS 213 andPHYS 214

PHYS 406 **Subatomic Physics** (3) Introductory treatment of elementary particles, fundamental strong and electroweak interactions, nuclear structure, accelerators, particle detection, nuclear astrophysics.
Effective: Spring 1995
Prerequisite: PHYS 410

PHYS 410 **Introduction to Quantum Mechanics I** (3-4) Basic postulates; Schrodinger wave equation; stationary states; variational method; scattering in one dimension; orbital angular momentum; hydrogen atom; numerical methods.
Effective: Spring 2007
Prerequisite: MATH 250 orMATH 251;MATH 230 orMATH 231;PHYS 237

PHYS 411 **Introduction to Quantum Mechanics II** (3) General theory of angular momentum; approximation methods; scattering theory; radiation theory; applications to atomic, molecular, condensed matter, nuclear and particle physics.
Effective: Spring 1994
Prerequisite: PHYS 410

PHYS 412 **Solid State Physics I** (3) Crystal symmetry, x-ray structure analysis, lattice vibrations, thermal properties, free electron transport theory, elementary one-electron quantum theory of solids.
Effective: Fall 1986
Prerequisite: MATH 230 orMATH 231 Concurrent: PHYS 410

PHYS 413 **Solid State Physics II** (3) Quantum theory of electronic and optical properties of solids, semiconductors, dielectrics, magnetic properties, crystal imperfections, low- temperature effects, and superconductivity.
Effective: Fall 1986
Prerequisite: PHYS 412

PHYS 414 **Solid State Physics** (3) Crystal structure; reciprocal lattice; X-ray diffraction; lattice vibrations; thermal properties; free electron gas model; energy bands; semiconductors; magnetism.
Effective: Spring 2007
Prerequisite: MATH 230, PHYS 237

PHYS 419 (MATH 419) **Theoretical Mechanics** (3) Principles of Newtonian, Lagrangian, and Hamiltonian mechanics of particles with applications to vibrations, rotations, orbital motion, and collisions.
Effective: Spring 2007
Prerequisite: MATH 230 orMATH 231;MATH 250 orMATH 251;PHYS 212, PHYS 213 andPHYS 214

PHYS 420 **Thermal Physics** (3) Basic postulates of statistical mechanics and thermodynamics, microscopic quantum states and macroscopic parameters; partition functions; Maxwell- Boltzmann and quantum statistics.
Effective: Spring 2007
Prerequisite: MATH 230 orMATH 231;MATH 250 orMATH 251;PHYS 237

PHYS 421W **Research Methods in Physics** (3) Methodology focusing on the theory of measurement and experiment design.
Effective: Spring 2007
Prerequisite: PHYS 237

PHYS 443 **Intermediate Acoustics** (3) Vibration and simple vibrating systems, sound wave propagation, acoustic instruments, recent developments.
Effective: Fall 1999
Prerequisite: MATH 251, PHYS 212, PHYS 213 andPHYS 214 ; orPHYS 203 orPHYS 204

PHYS 444 **Topics in Contemporary Physics** (2) Modern research topics and career opportunities in physics; employment, graduate education, and tailoring the physics curriculum to meet career goals.
Effective: Spring 2007
Prerequisite: PHYS 237 and 3 credits of physics at the 400 level

PHYS 445 **Nanoscience Seminar** (1) Advanced nanoscience seminar required of Behrend College students for completion of the nanoscience minor.
Effective: Summer 2007
Prerequisite: CHEM 112, E SC 211, E SC 212, E SC 213, E SC 214, E SC 215, E SC 216, MATH 140, PHYS 211 orPHYS 250

PHYS 446 **The Year in Physics: A Seminar on the Latest Research** (1) Discussion recent research in physics.
Effective: Spring 2007
Prerequisite: PHYS 211

PHYS 457 **Experimental Physics** (1-3) Selected experiments in various fields of physics.
Effective: Spring 2007
Prerequisite: PHYS 212 rPHYS 213, PHYS 214 andPHYS 237

PHYS 457W **Experimental Physics** (3) Selected experiments in various fields in physics.
Effective: Spring 2007
Prerequisite: PHYS 212, PHYS 213, PHYS 214 andPHYS 237

PHYS 458 **Intermediate Optics** (4) Geometrical and physical optics: theory of lens systems, aberrations, apertures, interference, diffraction, polarization.
Effective: Spring 2007
Prerequisite: PHYS 212, PHYS 213, PHYS 214;MATH 250 orMATH 251;MATH 230 orMATH 231

PHYS 461 (MATH 461) **Theoretical Mechanics** (3) Continuation of Math.(Phys.) 419. Theoretical treatment of dynamics of a rigid body, theory of elasticity, aggregates of particles, wave motion, mechanics of fluids.
Effective: Fall 1986
Prerequisite: MATH 419

PHYS 462 **Applications of Physics in Medicine** (3) Applications of physics in human physiology and in instrumentation for medical diagnosis and treatment.
Effective: Summer 2002
Prerequisite: PHYS 211, PHYS 212, PHYS 213 andPHYS 214 ; orPHYS 250, PHYS 251

PHYS 479 (MATH 479) **Special and General Relativity** (3) Mathematical description, physical concepts, and experimental tests of special and general relativity.
Effective: Spring 2007
Prerequisite: PHYS 237, PHYS 400, PHYS 419;MATH 250 orMATH 251;MATH 230 orMATH 231

PHYS 494 **Physics Research Project** (1-12) Investigation of an original research problem, including a literature search. Preparation of a formal thesis is optional.
Effective: Spring 2007

PHYS 494H **Physics Research Project** (1-12) Investigation of an original research problem, including a literature search. Preparation of a formal thesis is optional.
Effective: Fall 2007

PHYS 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2007
Prerequisite: prior approval of proposed assignment by instructor

PHYS 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PHYS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PHYS 497A **Applications of Modern Physics in Medicine** (3) This course is an overview of the applications of nuclear physics in medicine. Methods of diagnostics using X-rays, radioisotopes and nuclear magnetic resonance are reviewed. Various radiation therapy applications are reviewed and compared. (This course is appropriate for students interested in nuclear and medical physics as well as for premed student).
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

PHYS 497B **Systems Biology and Networks** (3) Introduce elements of network theory used to describe and model complex networks; focus on biological networks and systems biology.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

PHYS 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

PHYS 510 **General Relativity I** (3) Foundations of general relativity, elements of differential geometry, Einstein's equation, Newtonian limit, gravity waves, Friedmann cosmologies and Schwarzschild solution.
Effective: Spring 1996
Prerequisite: PHYS 557

PHYS 511 **Topics in General Relativity** (3) Selected topics from: Cauchy problem, Hamiltonian formulation, positive energy theorems, asymptotics, gravitational radiation, singularity theorems, black-holes, cosmology, observational tests.

Effective: Spring 1996
Prerequisite: PHYS 510

PHYS 512 **Quantum Theory of Solids I** (3) Electrons in periodic potentials; single electron approximations; lattice dynamics; electrical, optical, and magnetic properties of solids; transport theory.
Effective: Spring 1996
Prerequisite: PHYS 412 Concurrent: PHYS 517

PHYS 513 **Quantum Theory of Solids II** (3) Electron-phonon interaction, BCS theory; Landau Fermi-liquid theory; disorder and localized states; spin-wave theroy; many-body theory.
Effective: Spring 1996
Prerequisite: PHYS 512

PHYS 514 **Physics of Surfaces, Interfaces, and Thin Films** (3) This course focuses on interfacial and surface phenomena; structural, electronic, vibrational and thermodynamic properties; physisorption and chemisorption; phase transitions and ultrathin film nucleation; and growth phenomena.
Effective: Summer 1995
Prerequisite: PHYS 412

PHYS 517 **Statistical Mechanics** (3) Thermodynamics, classical and quantum statistics; Bose and Fermi gases; Boltzmann transport equation; phase transitions, critical phenomena; Ising model.
Effective: Spring 1996
Prerequisite: PHYS 561

PHYS 518 **Critical Phenomena and Field Theory** (3) Critical phenomena using field theoretical and renormalization group techni- ques; solvable statistical models and conformal field study; fluctuations and random processes.
Effective: Spring 1996
Prerequisite: PHYS 517, PHYS 563

PHYS 524 **Physics of Semiconductors and Devices** (3) Electronic structure, optical and transport properties of crystalline and amorphous semiconductors, quantum wells, superlattices; quantum devices; quantum Hall effect.
Effective: Spring 1996
Prerequisite: PHYS 412

PHYS 525 **Methods of Theoretical Physics I** (3) Complex variables, Hilbert spaces, linear operators, calculus of variations, Fourier analysis, Green's functions, distributions, differential equations, and special functions.
Effective: Spring 1996

PHYS 526 **Methods of Theoretical Physics II** (3) Finite and Lie groups, representations and application to condensed matter and particle physics; selected topics from differential geometry.
Effective: Spring 1996
Prerequisite: PHYS 525

PHYS 527 (ASTRO 527) **Computational Physics and Astrophysics** (3) Introduction to numerical methods for modeling physical phenomena in condensed matter, atomic and high energy physics, gravitation, cosmology and astrophy.
Effective: Fall 2008

PHYS 530 **Theoretical Mechanics** (3) Newtonian mechanics, noninertial coordinate system, Lagrangian mechanics, small oscillations, Hamiltonian formulation, canonical transformations, Hamilton-Jacobi theroy, dynamical systems.
Effective: Spring 1996
Prerequisite: PHYS 419

PHYS 532 **Theoretical Continuum Mechanics** (3) Wave phenomena, hydrodynamics, heat conduction, elastic continua.
Effective: Fall 1983
Prerequisite: PHYS 530

PHYS 533 **Theoretical Acoustics** (3) Wave propagation in complex systems and materials: viscoelastic fluids, superfluids, elastic solids, periodic and random media, nonlinear media.
Effective: Spring 1996

PHYS 537 **Vacuum Physics** (3) An introduction to physical phenomena occurring at low pressures and their applications to the production and measurement of high vacuum.
Effective: Summer 1987

PHYS 541 **Elementary Particle Phenomenology** (3) Baryons and mesons; leptons and quarks; electromagnetic and weak inter- actions and their unification; quantum chromodynamics; experimental techni- ques.
Effective: Spring 1996
Prerequisite: PHYS 562

PHYS 542 **Standard Model of Elementary Particles Physics** (3) Weinberg-Salam model of electroweak interactions, spontaneous symmetry breaking, quantum chromodynamics; selected topics from grand unified theories and superstring theory.
Effective: Summer 1995
Prerequisite: PHYS 564

PHYS 545 (ASTRO 545) **Cosmology** (3) Modern cosmology of the early universe, including inflation, the cosmic microwave background, nucleosynthesis, dark matter and energy.

Effective: Spring 2009

PHYS 555 (MATSE 555) **Polymer Physics I** (3) Introduction to the fundamental concepts needed to understand the physics applicable to polymer melts, solutions and gels.
Effective: Spring 2006

PHYS 557 **Electrodynamics I** (3) Electro- and magnetostatics, boundary value problems, Maxwell's equations, field energy-momentum, wave propagation in free space and wave guides.
Effective: Summer 2000
Prerequisite: PHYS 400

PHYS 558 **Electrodynamics II** (3) Covariant formulation of electrodynamics, radiation theory, scattering theory, electrodynamics of relativistic charges, special topics on contemporary applications of electrodynamics.
Effective: Summer 2000
Prerequisite: PHYS 557

PHYS 559 **Graduate Laboratory** (2) Study and applications of techniques and instrumentation used in modern physics laboratories.
Effective: Spring 1996

PHYS 561 **Quantum Mechanics I** (3) Postulates of quantum mechanics, Hilbert space methods, one dimensional potentials, spin systems, Harmonic oscillator, angular momentum, Hydrogen atom.
Effective: Spring 1996
Prerequisite: PHYS 410

PHYS 562 **Quantum Mechanics II** (3) Addition of angular momenta, perturbation theory, variational principle, scattering theory, density matrices, identical particles, interpretations of quantum mechanics, Dirac theory.
Effective: Spring 1996
Prerequisite: PHYS 561

PHYS 563 **Quantum Field Theory I** (3) Canonical and functional integral quantization of relativistic and non- relativistic field theories; Feynman diagrams; spontaneous symmetry breaking; renormalization group.
Effective: Spring 1996
Prerequisite: PHYS 562

PHYS 564 **Quantum Field Theory II** (3) Abelian and non-Abelian gauge theories; renormalization group and operator product expansions; BRST quantization; scattering theory, other related topics.
Effective: Spring 1996
Prerequisite: PHYS 563

PHYS 565 **Interface of General Relativity and Quantum Physics** (3) Limitations of perturbative methods, conceptual problems; selected topics from black hole thermodynamics, canonical quantum gravity, loop space methods and string-theory.
Effective: Summer 1995
Prerequisite: PHYS 510, PHYS 563

PHYS 571 **Atomic, Molecular and Optical Physics** (3) Atomic and molecular states: mixed perturbations; radiative processes; internal state coherence effects; coherent relaxation, Doppler-free spectro- scopies; atom trapping and coding.

Effective: Spring 1996
Prerequisite: PHYS 561

PHYS 572 **Laser Physics and Quantum Electronics** (3) Theory of lasers; Guassian optics; nonlinear optics: frequency conversions, nonlinear Raman-type effects, superradiance, photon ecohes, phase conjugation; quantum optics.
Effective: Spring 1996
Prerequisite: PHYS 562

PHYS 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1997

PHYS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

PHYS 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

PHYS 597A **Topics in Advanced Cosmology** (1) Inflation, CMB, Topological defects and quantum cosmology.
Effective: Summer 2010 Ending: Summer 2010
Prerequisite: PHYS 510

PHYS 597A **Particle Astrophysics** (3) This course will use neutrinos as a common thread for discussing a wide range of particle physics and astrophyics phenomena.

Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PHYS 597A **Introduction to Computational Neuroscience** (3) The course will focus on the computational approaches to studying the behavior of neurons and neural circuits.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

PHYS 597B **Systems Biology and Networks** (3) Introduce elements of network theory used to describe and model complex networks; focus on biological networks and systems biology.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PHYS 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

PHYS 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

PHYS 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

PHYS 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

PHYS 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2007

Last Import from UCM: July 10, 2010 3:00 AM

Plant Pathology (PPATH)

PPATH 405 **Microbe-Plant Interactions: Plant Disease and Biological Control** (3) Survey of microbe-plant interactions causing plant disease, mechanisms of pathogenesis, disease control, and microbial and molecular biological control strategies.
Effective: Spring 1999
Prerequisite: BIOL 110

PPATH 412 **Turfgrass Disease Management** (3) Introduction to biology of turfgrass pathogens and management of cool- and warn-season turfgrass disease.
Effective: Spring 2008
Prerequisite: TURF 230, TURF 235, CHEM 101 orCHEM 110, BIOL 127

PPATH 416 **Plant Virology: Molecules to Populations** (3) A exploration of the molecular biology and population dynamics of the virus-plant interaction.
Effective: Fall 2005
Prerequisite: BIOL 110, BIOL 120

PPATH 417 **Phytobacteriology** (3) Lecture and lab coverage of how bacteria cause plant diseases.
Effective: Fall 2009
Prerequisite: BIOL 110;BIOL 222 orBIOL 322;B M B 211 orMICRB 201 orMICRB 251 orB M B 251

PPATH 419 **Plant Nematology** (2) The biology of plant pathogenic nematodes, the diseases they cause, and their control.
Effective: Fall 2009
Prerequisite: BIOL 110, BIOL 120

PPATH 425 (BIOL 425) **Biology of Fungi** (4) A survey of the biological diversity of fungi, stressing evolution, ecology, disease, morphology, life histories, and importance to humans.
Effective: Spring 2002
Prerequisite: fifth-semester or graduate standing in a biological sciences major with six credits completed in the major

PPATH 427 **Mycotoxins: Effects of Fungal Toxins on Human and Animal Health** (3) Description and history of mycotoxicoses. Mycotoxin formation, occurrence, control, economic and social impacts, and regulatory issues.
Effective: Summer 2007
Prerequisite: BIOL 110 orBIOL 011 andBIOL 012;CHEM 112, CHEM 113 ; course can also be taken with approval of the department

PPATH 430 (E R M 430) **Air Pollution Impacts to Terrestrial Ecosystems** (3) An overview of direct and indirect effects of air pollution on terrestrial plants and ecosystems.
Effective: Summer 2004
Prerequisite: BIOL 220W, FOR 308

PPATH 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PPATH 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PPATH 502 **Plant Disease Diagnosis** (3) Field and laboratory techniques used in diagnosing plant diseases caused by various types of pathogens with emphasis on fungi.
Effective: Summer 2005
Prerequisite: PPATH 401

PPATH 505 **Fundamentals of Phytopathology** (2) An in-depth tutorial of the fundamental theories and concepts of plant pathology.
Effective: Spring 2004
Prerequisite: PPATH 405 or equivalent

PPATH 533 **Molecular Genetics of Plant-Pathogen Interactions** (3) In depth discussion/review of the primary literature on the mechanisms of plant-pathogen interactions at the molecular and cellular levels.
Effective: Summer 2003
Prerequisite: PPATH 405 or equivalent andB M B 400 or equivalent

PPATH 540 **Plant Disease Control** (3) Principles of plant disease control, including theoretical considerations involved in control by chemical and nonchemical means.
Effective: Winter 1978

PPATH 542 **Epidemiology of Plant Diseases** (3) Disease development in populations of plants, with emphasis on the impact of environment and control practices on rate of development.
Effective: Spring 1984
Prerequisite: PPATH 401;MATH 111 orMATH 141 or 3 credits in statistics

PPATH 543 **Pathogen Variation and Host Resistance** (3) Mechanisms and implications of genetic variation in plant pathogens related to breeding for disease resistance in plants by genetic means.
Effective: Fall 1983
Prerequisite: PPATH 401 orAGRO 411 orHORT 407

PPATH 544 **Fungal Genetics** (4) Fungal breeding systems, mating types, asexual restrictions and recombination, tetrad analysis, gene conversion and extra genetic elements.
Effective: Summer 2003
Prerequisite: 3 credits of mycology and introductory genetics

PPATH 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2008

PPATH 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PPATH 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

PPATH 597A (US) **Diagnosis of Tropical Plant Diseases in Costa Rica** (3) Diagnosis of tropical plant diseases in Costa Rica.
Effective: Summer 2010 Ending: Summer 2010
Prerequisite: PPATH 425, PPATH 405 or the equivalent and permission of the program

PPATH 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

PPATH 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

PPATH 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised preparation and presentation of materials in lectures and laboratories, preparation and supervision of exams and student consultation and evaluation.
Effective: Fall 1983

PPATH 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

PPATH 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

PPATH 802 (AGBIO 802) **Plant Protection: Responding to Introductions of Threatening Pests and Pathogens** (3) This course provides knowledge of plant biosecurity, plant disease, regulations, and technologies using case study examples.
Effective: Summer 2010
Prerequisite: AGBIO 520

PPATH 853 (TURF 853) **Interpreting Turfgrass Science Literature** (3) Introduction to turfgrass research publications, interpretation of the data, and discussion of the significance of the results.
Effective: Summer 2010

Last Import from UCM: July 10, 2010 3:00 AM

Plastics Engineering Technology (PL ET)

PL ET 400 **Plastics Management Issues** (3) Study of business management topics as they relate to the plastics industry.
Effective: Summer 1996
Prerequisite: PL ET 350, PL ET 370

PL ET 400W **Plastics Management Issues** (3) Study of business management topics as they relate to the plastics industry. Writing intensive.
Effective: Summer 1996
Prerequisite: PL ET 350, PL ET 370

PL ET 429 **Plastics Packaging** (3) Introduction to plastics packaging including production methods, economic concerns, aesthetics, color and transparency, environmental concerns, and package lifetimes.
Effective: Summer 1996
Prerequisite: PL ET 350

PL ET 430 **Packaging Design & Materials** (2) Study of design and materials for plastic packaging including blow molded, thermoformed and extruded products.
Effective: Summer 2005
Prerequisite: Prerequisite or concurrent:PL ET 304, PL ET 330

PL ET 440 **Advanced Mold Design Technologies** (4) This is the second course in mold design; focuses on mechanical aspects of designing and building a mold; includes CAD, CAM, and CAE technologies.
Effective: Spring 2007
Prerequisite: MCH T 213, MET 306, METBD 366, PL ET 340

PL ET 460 **Advanced Computer Applications in Plastics Design** (3) Advanced applications of computer-aided design, computer-aided manufacturing, computer-aided engineering, and finite element analysis to plastic product development.
Effective: Summer 1996
Prerequisite: PL ET 350 . Prerequisite or concurrent:PL ET 440

PL ET 462 **Advanced Injection Molding** (3) New and advanced injection molding technoliges, implementing statistical methods such as design of experiments.
Effective: Summer 2005
Prerequisite: PL ET 225, PL ET 227, PL ET 330

PL ET 464 **Plastics Failure Analysis** (3) Fundamentals of Plastics Materials Process and Design Failure Analysis.
Effective: Summer 2005
Prerequisite: PL ET 304

PL ET 465 **Advanced CAE for Plastics II** (3) Advanced Computer-Aided Engineering techniques for plastic part design.
Effective: Spring 2007
Prerequisite: PL ET 345, PL ET 350, MET 418

PL ET 467 **Secondary Operations** (3) Fundamentals of decoration and assembly methods used in the plastics industry.
Effective: Summer 2005
Prerequisite: Seventh semester standing

PL ET 468 **Rapid Commercialization** (3) Techniques to help get plastic products to market quicker and to build solids and surface modeling skills.
Effective: Summer 2005
Prerequisite: PL ET 350

PL ET 475 **Survey of New Plastics Processing Technologies** (3) Study of the latest trends and advances in plastics processing.
Effective: Summer 1996
Prerequisite: PL ET 370, PL ET 440

PL ET 494A **Plastics Projects** (1-12) Supervised student activities on research and/or design projects identified on an individual or small group basis. A specific title may be used in each instance and will be entered on the student's transcript.
Effective: Spring 2007
Prerequisite: or concurrent:MET 418, PL ET 350, PL ET 370

PL ET 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica or internships. Written and oral critique of activity required.
Effective: Summer 1992
Prerequisite: prior approval of proposed assignment by instructor

PL ET 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1992

PL ET 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1992

PL ET 497A **Plastics Product Development** (3) Covers product/business development process, including writing specifications, testing requirements, concept creation and selection, working with industrial design, marketing, and finance.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010
Prerequisite: PL ET 350

PL ET 497B (IL) **Plastics International Experience** (1-6) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PL ET 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2010

Last Import from UCM: July 10, 2010 3:00 AM

Polish (POL)

POL 499 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: July 10, 2010 3:00 AM

Political Science (PL SC)

PL SC 403 **The Legislative Process** (3) Analysis of the policy process within the legislative system; the effects of environmental factors on policy alternatives and legislative decision making.
Effective: Spring 2001
Prerequisite: PL SC 001 orPL SC 003

PL SC 404 **Topics in International Politics** (3) An examination of the geographical factors underlying and affecting the relationships between states.
Effective: Fall 2007

PL SC 405 **The American Presidency** (3) An examination of the selection methods for, and powers of, the American presidency, as well as other chief executives.
Effective: Fall 1983
Prerequisite: PL SC 001

PL SC 410 **Game Theory in International Relations** (3) Game theoretic approaches to the study of international relations.
Effective: Spring 2005
Prerequisite: PL SC 014

PL SC 411W **Principles of International Cooperation** (3) An exploration of the forces that make conflict, or cooperation, more likely in international relations.
Effective: Summer 2006
Prerequisite: PL SC 014

PL SC 412 **International Political Economy** (3) The transnational politics of trade, investment, aid, raw materials, and the environment; nation-states, multinational corporations, and the U.N.
Effective: Fall 2007
Prerequisite: ECON 002, ECON 004, ECON 014, I B 303 orBUS 364

PL SC 413 **The Rise and Fall of the Soviet Union** (3) Background, organization, and operation of the Communist Party and the government of the Soviet Union.
Effective: Spring 2001
Prerequisite: 3 credits from:PL SC 003, PL SC 014, PL SC 155 orRUS 100

PL SC 415 **International Organization: Political and Security Functions** (3) Theory and evolution of international organization; political and security functions of the United Nations and regional organizations.
Effective: Spring 2003
Prerequisite: PL SC 014

PL SC 416 **International Negotiations** (3) The study of international negotiations from a strategic perspective.
Effective: Summer 2005
Prerequisite: PL SC 014

PL SC 417 **American Local Government and Administration** (3) Organization, powers, functions, and problems of American cities and metropolitan areas; modern trends and developments.
Effective: Winter 1978
Prerequisite: PL SC 001

PL SC 418 **International Relations Theory** (3) A survey of traditional and contemporary conceptual frameworks and theoretical approaches for the analysis of international relations.
Effective: Winter 1978
Prerequisite: PL SC 014

PL SC 418W **International Relations Theory** (3) A survey of traditional and contemporary conceptual frameworks and theoretical approaches for the analysis of international relations.
Effective: Spring 1999
Prerequisite: PL SC 014

PL SC 419 **The Bureaucratic State** (3) Overview of structural, technological, decision-making, behavioral, and political subsystems of bureaucracy; emphasis on bureaucratic dynamics within larger environmental, interorganizational contexts.
Effective: Fall 2007
Prerequisite: PL SC 001, PL SC 002 orPUBPL 304W

PL SC 422 **Comparative Urban Politics** (3) Relationships between structure and evolution of city systems and patterns of political behavior.
Effective: Spring 2001
Prerequisite: PL SC 003, PL SC 020, PL SC 022 orPL SC 417

PL SC 423 **Post-Soviet Politics** (3) Aspects of political transition and institutions of the fifteen Soviet successor republics; emphasis on Russia and republican confederation.
Effective: Fall 2007
Prerequisite: PL SC 003, PL SC 155 orRUS 100

PL SC 424 **Topics in Comparative Government and Institutions** (3) Topics in the comparative analysis of representative contemporary Western and non-Western governmental institutions.

Effective: Fall 2007
Prerequisite: 3 credits fromPL SC 003, PL SC 020, PL SC 022

PL SC 425 **Government and Politics of the American States** (3) Comparative analysis of political processes; executive, legislative, and judicial decision making and behavior; examination of systems functioning; selected public policies.
Effective: Winter 1978
Prerequisite: PL SC 001

PL SC 426 **Political Parties and Interest Groups** (3) Interest group basis of American politics, analysis of party and group behavior in electoral politics and the policy process.
Effective: Fall 1983
Prerequisite: PL SC 001

PL SC 427 **Political Opinion** (3) Nature and development of mass attitudes and opinions; political socialization; voting behavior; relation between opinions and public policy.
Effective: Spring 2001
Prerequisite: PL SC 001

PL SC 428 (US;IL) (WMNST 428) **Gender and Politics** (3) Gender in politics in the United States and around the world; major areas of women and politics research.
Effective: Fall 2007
Prerequisite: 3 credits in political science or women's studies

PL SC 429 **Analysis of Electoral Politics** (3) The new politics, its technology, and the strategic perspectives that underlie it.
Effective: Spring 2007
Prerequisite: PL SC 001

PL SC 430 **Selected Works in the History of Political Theory** (3) Detailed examination and analysis of a selected major work, thinker, or tradition in the history of political theory.
Effective: Spring 1998
Prerequisite: PL SC 017 orPL SC 007

PL SC 430W **Selected Works in the History of Political Theory** (3) Detailed examination and analysis of a selected major work, thinker, or tradition in the history of political theory.
Effective: Spring 2008
Prerequisite: PL SC 017 orPL SC 007

PL SC 431 **Ancient, Medieval, and Renaissance Political Theories** (3) Political theories of Plato and Aristotle; selected Greek, Roman, medieval, and Renaissance theorists through Machiavelli.
Effective: Spring 2003
Prerequisite: PL SC 017 orPL SC 007

PL SC 432 **Modern and Contemporary Political Theories** (3) Political theories of the seventeenth through the twentieth centuries, including Hobbes, Locke, Rousseau, Marx, Mill, Mosca, Weber, and selected theorists.
Effective: Spring 2003
Prerequisite: PL SC 017 orPL SC 007

PL SC 433 **Political Foundations of the Early American Republic** (3) The course introduces students to the major political and philosophical movements that influenced the founders of the early American republic.
Effective: Summer 2008
Prerequisite: PL SC 001 orHIST 020 orPL SC 017

PL SC 434 (IL) (AAA S 434) **War and Development in Africa** (3) This course will examine the relationship between war and development in sub-Saharan Africa in the post colonial era.
Effective: Spring 2008
Prerequisite: PL SC 114, PL SC 003, AAA S 110

PL SC 435 **Foundations of American Political Theory** (3) Political theories of colonial, revolutionary, and constitutional periods presented through works of selected thinkers and analysis of particular political problems.
Effective: Spring 2001
Prerequisite: PL SC 001, PL SC 017 orPL SC 007

PL SC 435W **Foundations of American Political Theory** (3) Political theories of the revolutionary and constitutional periods presented through works of selected political thinkers and political issues.
Effective: Spring 2001
Prerequisite: PL SC 001, PL SC 017 orPL SC 007

PL SC 437 **War in World Politics** (3) Causes, resolution, and consequences of crises and wars; testing theories of conflict using both case and statistical studies.
Effective: Summer 1997
Prerequisite: PL SC 014

PL SC 438 **National Security Policies** (3) Impact of national security on U.S. government and foreign policy; roles and interaction of President, Congress, government agencies, interest groups.
Effective: Spring 2001
Prerequisite: PL SC 001 orPL SC 014

PL SC 439 (CRIMJ 439) **The Politics of Terrorism** (3) Analysis of political terrorism as a violent alternative for peaceful change and traditional warfare in the nuclear age.
Effective: Spring 2008

Prerequisite: CRIMJ 100 orPL SC 014 or permission of program

PL SC 440 (US;IL) (AAA S 440, I B 440) **Globalization and Its Implications** (3) This course explores the socioeconomic implications of globalization.
Effective: Spring 2008
Prerequisite: AAA S 100 orAAA S 110 orPL SC 003 orPL SC 014 orPL SC 020 orPL SC 022

PL SC 441 **Transnational Corporations and Other Organizations in International Relations** (3) Analysis of the effects of transnational actor behavior on international relations.
Effective: Fall 2007
Prerequisite: ECON 333, I B 303, PL SC 014 orBUS 364

PL SC 442 **American Foreign Policy** (3) Principles of American foreign policy; processes of policy formulation; roles of the President, Congress, the State Department, and other government agencies.
Effective: Spring 2001
Prerequisite: PL SC 014

PL SC 443 (IL) (AAA S 443) **Ethnic Conflict in Africa** (3) This course explores the various causes and impacts of ethnic conflicts in the African context.
Effective: Spring 2008
Prerequisite: AAA S 100, AAA S 110, PL SC 001, PL SC 003, PL SC 007, PL SC 014, PL SC 017, PL SC 020 orAFRAS 301

PL SC 444 **Government and the Economy** (3) Interactions of governmental and economic activity in American life. Survey of governmental (national, state, local) promotional, regulatory, and ownership policies.
Effective: Winter 1978
Prerequisite: 3 credits in political science or economics

PL SC 445Y (US) (AAA S 445Y, LER 445Y) **Politics of Affirmative Action** (3) Examines history, politics, and economics of the use of special programs to advance racial interests in the U.S.
Effective: Spring 2008
Prerequisite: AAA S 100 level course andPL SC 001 orPL SC 007

PL SC 452 **Government and Politics of Central Europe** (3) Politics and society in the Communist Era, the revolutions of 1989, and problems of adjustment to democracy and market.
Effective: Fall 2007
Prerequisite: PL SC 003, PL SC 020, PL SC 022 orPL SC 155

PL SC 453 (IL) **Political Processes in Underdeveloped Systems** (3) Comparative analysis of the political, social, and economic problems characteristic of underdeveloped systems.
Effective: Fall 2007
Prerequisite: PL SC 003, PL SC 020 orPL SC 022

PL SC 454 (IL) (AAA S 454) **Government and Politics of Africa** (3) Contemporary African politics, institutions, and ideologies; patterns of change, social forces, and nation building in selected African states.
Effective: Summer 2005
Prerequisite: 3 credits from:AAA S 110, PL SC 003, PL SC 020 orPL SC 022

PL SC 455 **Governments and Politics of Western Europe** (3) Comparative analysis of political and governmental structures of major West European nations; main functions and processes of such structures.
Effective: Spring 2001
Prerequisite: PL SC 003 orPL SC 020

PL SC 456 **Politics and Institutions of Latin-American Nations** (3) Social forces and processes, governmental institutions, foreign policies of major states of Latin America.
Effective: Spring 2001
Prerequisite: HIST 179, PL SC 003, PL SC 020 orPL SC 022

PL SC 457 **International Politics of Latin America** (3-6) Relationships among the nations of Latin America and the social forces which determine and shape their direction.
Effective: Spring 2001
Prerequisite: HIST 179, PL SC 003, PL SC 014, PL SC 020 orPL SC 022

PL SC 458 **Government and Politics of East Asia** (3-6) Examination of political institutions, democratic and communist revolution, political leadership, political processes of major states of East Asia.
Effective: Summer 1996
Prerequisite: 3 credits fromPL SC 003, PL SC 020, PL SC 022

PL SC 459 (IL) (AAA S 459) **Culture and World Politics** (3) Role of culture in world politics.
Effective: Summer 2006

PL SC 460 (S T S 460) **Science, Technology, and Public Policy** (3) The all-pervasive importance of science and technology policy in modern societies and mechanisms and processes by which it is made.
Effective: Spring 1995
Prerequisite: 3 credits in natural sciences or engineering 3 credits in social and behavioral sciences

PL SC 462 **Marxist and Socialist Political Theory** (3) Analysis of major problems and key works in the Marxist and Socialist tradition; dialectical materialism, alienation, class warfare, etc.
Effective: Spring 2001
Prerequisite: PL SC 017, PL SC 007, PL SC 413 orPL SC 452

PL SC 464 (IL) (AAA S 464) **Globalization, Extractive Industries, and Conflict in Africa** (3) Socioeconomic and environmental impacts of extractive industries in Africa.
Effective: Summer 2008
Prerequisite: AAA S 110 or at least one of the following:PL SC 003 orPL SC 014 orPL SC 022

PL SC 467 **International Relations of the Middle East** (3) The international relations of the Middle East, stressing national security policies of regional and outside actors, and major contemporary conflicts.
Effective: Spring 1985
Prerequisite: PL SC 014 orHIST 181

PL SC 470W **Legal Brief Writing** (3) Writing of legal briefs as practiced in American courts.
Effective: Spring 1998
Prerequisite: PL SC 001

PL SC 471 **American Constitutional Law** (3) The origins of judicial review, landmark decisions of the Supreme Court, and their impact on the American form of government.
Effective: Fall 2007
Prerequisite: PL SC 001

PL SC 472 **The American Legal Process** (3) Analysis of the roles, procedures, and policies characterizing the American legal system.
Effective: Spring 2001
Prerequisite: PL SC 001

PL SC 473 **American Judicial Behavior** (3) Analyzes behavior of judges and other participants in the legal process; examines how and why courts function as policymaking bodies.
Effective: Fall 2007
Prerequisite: PL SC 001

PL SC 474 **Civil Liberties and Due Process** (3) Fundamental problems relating to civil liberities and due process.
Effective: Fall 2007
Prerequisite: PL SC 001

PL SC 480W **Congress and the Presidency** (3) Basic characteristics and processes of the national legislature and executive; roles and interaction of these institutions in the policy process.
Effective: Fall 2007
Prerequisite: PL SC 001

PL SC 481 **Global Political Economy** (3) This course examines states, markets, power, production, and the relations between the various transnational agents who act in these areas. Students may not receive credit for PL SC 481 and PL SC 412.
Effective: Spring 2007
Prerequisite: PL SC 014 orINTST 100

PL SC 482 **American State and Urban Politics** (3) Explores basic characteristics and processes of American state and urban politics; nature of intergovernmental relations involving these governmental levels.
Effective: Fall 2007
Prerequisite: PL SC 001

PL SC 484W **The Foreign Policy of Soviet Successor States** (3) Relations between Russia and The Newly Independent States (NIS); Russia's relations with selected foreign states and political Institutions; regional impact of the NIS in Baltic, Asian, and Central Asian areas.
Effective: Fall 2007
Prerequisite: PL SC 003

PL SC 487 **International Law and Organizations** (3) Major topics and issues of international law with special attention to institutional arrangements (international organizations) through which that law operates.
Effective: Fall 2007
Prerequisite: PL SC 003 orPL SC 014

PL SC 488 **Comparative Public Policy** (3) Comparative methodology and public policy implementation in postindustrial societies; selected case studies of policy output.
Effective: Fall 2007
Prerequisite: PL SC 003

PL SC 489 **Public Administration** (3) A survey of the major approaches to the management of most governmental agencies.
Effective: Fall 2007
Prerequisite: PL SC 001

PL SC 490 **Policy Making and Evaluation** (3) Advanced analysis of public policy, emphasizing policy evaluation and the factors that determine policy success and failure.
Effective: Fall 2007
Prerequisite: PL SC 001, PL SC 002 orPUBPL 304W

PL SC 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

PL SC 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or

small-group basis.
Effective: Fall 2007

PL SC 495 **Political Science Internship** (1-6) Combining experience in government offices, related agencies, or law firms, with appropriate readings and a research paper/report.
Effective: Fall 2007
Prerequisite: prior consent of supervisor adviser or department head; applicable departmental internship requirements such as satisfactory completion of required 300- or 400-level courses appropriate for the internship program selected

PL SC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PL SC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PL SC 497A **International Relations of Africa** (3) This course will discuss the role of Africa in the intellectual development of world politics beginning in the 20th century.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PL SC 497A **International Relations of Africa - Advanced** (3) Throughout this course, we examine both the impact of Africa on world politics, as well as the impact of world politics on Africa.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

PL SC 497B **Politics of the European Union** (3) The aim of this course is to introduce students to the history, institutions, and politics of the European Union.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PL SC 497B **Japanese and Korean Politics** (3) This course provides an overview of the major political actors and institutions in Japan and Korea.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

PL SC 497C **Nationalism, Ethnicity & Immigration** (3) The course examines the concepts of ethnicity and nationalism and explores their connections to immigration and immigration policy.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PL SC 497D **Territoriality & Group Conflict in International Relations** (3) This course will explore the central theoretical role territory plays in international relations and focus on perspectives that suggest causes.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PL SC 497E **Democratization in Asia** (3) This course address the literature on democracy and democratization and then applies it to Asia.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PL SC 497F **Political Economy of Civil Wars** (3) This course examines the recent research about the factors that lead to the onset, duration, and termination of civil wars.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PL SC 497G **Dictators and Their Demise** (3) This course examines the political economy of authoritarian rule.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PL SC 497I (PUBPL 497A) **Public Affairs Capstone Course** (3) This course examines how to objectively examine contentious public policy controversies by relying on essential principles of scientific research.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PL SC 497K (IL) **South Asian Politics** (3) This course will present an overview of the politics of modern South Asia focusing on Afghanistan, India and Pakistan.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PL SC 499 (IL) **Foreign Study--Government** (1-12) Study, in selected foreign countries, of political institutions.
Effective: Summer 2005
Prerequisite: PL SC 003 3 credits in economics history political science or sociology

PL SC 501 **Methods of Political Analysis** (3) Survey of important methods and approaches to the study of politics; introduction to research design.
Effective: Fall 1995

PL SC 502 **Statistical Methods for Political Research** (3) Basic concepts of statistics and their use in political research; data analysis, casual inference, regression analysis, computer applications.
Effective: Spring 1995

PL SC 503 **Multivariate Analysis for Political Research** (3) Analysis of selected issues in quantitative political analysis; introduction to advanced multivariate analysis techniques.
Effective: Spring 2003
Prerequisite: PL SC 501, PL SC 502

PL SC 511 **Professional Norms in Political Science** (1.5) An introduction to professional norms, the fundamentals of good research, and the basic skills necessary for good teaching.
Effective: Spring 2007

PL SC 513 **Writing and Professional Development in Political Science** (1.5) Professional development focusing on publishing research, writing dissertatins dissertations, and professional issues of advanced graduate students.
Effective: Fall 2007
Prerequisite: 3rd year standing in Political Science Ph.D. program

PL SC 518 (SOC 518) **Survey Methods I: Survey Design** (3) Research design of social, behaviorial and health surveys.
Effective: Fall 2007

PL SC 519 (SOC 519) **Survey Methods II: Analysis of Survey Data** (3) Intermediate course on the statistical analysis of survey data: topics include weighting, complex surveys, missing data, and contextual analysis.
Effective: Spring 2008
Prerequisite: PL SC 503 orSOC 575

PL SC 540 **American Government and Politics** (3) Survey of basic literature in major fields of U.S. government: public opinion, parties, voting, interest groups, presidency, congress, judiciary.
Effective: Fall 1995

PL SC 541 **American Political Institutions** (3-9) Research on a selected topic in United States political institutions such as the presidency, the courts, congress, bureaucracy, state governments.
Effective: Spring 1995

PL SC 542 **American Political Behavior** (3 per semester/maximum of 9) Research on a selected topic in United States political behavior such as public opinion, voting, parties, socialization, judicial behavior.
Effective: Spring 1995

PL SC 543 **American Public Policy** (3 per semester/maximum of 9) Research on topics in United States public policy and public law, such as environmental policy, development policy, individual and minority rights.
Effective: Spring 1995

PL SC 550 **Comparative Politics: Theory and Methodology** (3) Survey of basic literature and major research efforts in comparative political analysis.
Effective: Fall 1995

PL SC 551 **Comparative Political Institutions** (3 per semester/maximum of 9) Comparative study of the institutional structures of different political systems: the state, party systems, administrative structures.
Effective: Spring 1995

PL SC 552 **Comparative Political Behavior** (3 per semester, maximum of 9) Research on aspects of comparative political behavior, such as political culture, political change and development, interest groups, public opinion.
Effective: Spring 2003

PL SC 553 **Studies in Regional Politics** (3 per semester/maximum of 9) Research on political systems in selected regions of the world, such as Europe, Latin America, East and South Asia.
Effective: Spring 1995

PL SC 554 **The Politics of Development** (3) The course explores the origins of modernity, its proliferation globally, and problems associated with initiating and sustaining development.
Effective: Summer 2005

PL SC 560 **International Relations: Theory and Methodology** (3) Survey of major traditional and contemporary theory-building efforts and contemporary research techniques and orientations in international relations.
Effective: Summer 1995

PL SC 561 **American Foreign Policy** (3 per semester/maximum of 9) Research on the institutions, dynamics, and major themes of United States foreign policy.
Effective: Spring 2003

PL SC 562 **National Security Studies** (3 per semester/maximum of 6) Research on classical and modern conventional strategy, nuclear strategy, arms control, conflict management, and non-traditional security problems.
Effective: Spring 1995

PL SC 563 **International Political Economy** (3 per semester, maximum of 9) Research on international political economy with a focus on theory building; analysis of political causes and consequences of economic behavior.
Effective: Spring 2003

PL SC 564 **International Organization** (3 per semester/maximum of 6) Research on international governmental and non-governmental organizations in the international system, emphasizing the United Nations and collective security.
Effective: Spring 1995
Prerequisite: PL SC 415

PL SC 565 **International Conflict** (3) Research into the causes and consequences of international crises and wars, using various methodologies for theory assessment.
Effective: Spring 1996
Prerequisite: PL SC 560

PL SC 566 **Conflict Management, Termination, and Bargaining** (3) Research on termination and resolution of international conflicts, focusing on theory building and empirical assessment of theories of conflict resolution.
Effective: Fall 2008
Prerequisite: PL SC 560

PL SC 580 **Modern Democratic Political Theory** (3) Survey of major themes and problems in modern theories of democratic politics.
Effective: Spring 2003

PL SC 581 **History of Political Theory** (3 per semester/maximum of 9) Research on selected political theorists or historical traditions of political thought.
Effective: Spring 2003

PL SC 582 **Analytic Political Theory** (3 per semester/maximum of 6) Research on problems in contemporary theory construction.
Effective: Spring 1995
Prerequisite: PL SC 431 orPL SC 432

PL SC 583 **Modern Political and Social Theory** (3 per semester/maximum of 9) Research on major developments and issues in modern political and social theory, such as critical theory, modernism, and postmodernism.
Effective: Spring 2003

PL SC 586 **Theory of Bureaucratic and Administrative Politics** (3 per semester/maximum of 6) The role of the executive in government and politics; theories of administrative organization, organization behavior, and decision-making processes.
Effective: Spring 1998

PL SC 594 **Research in Political Science** (1-6) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Summer 1988

PL SC 595 **Internship in Political Science** (1-9) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 1987
Prerequisite: Prior consent of supervisor advisor or department head; applicable departmental internship requirements such as satisfactory completion of required upper level courses appropriate for the internship program selected.

PL SC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. A specific title may used in each instance and will be entered on the student's transcript.
Effective: Spring 1987

PL SC 596A **Maximum Likelihood Estimation for Generalized Linear Models** (3) This course introduces students to a number of useful statistical models that move beyond standard linear regression.
Effective: Summer 2010 Ending: Summer 2010

PL SC 596B **Regression Analysis III: Advanced Methods** (3) This course will extend the basic linear model framework in a number of directions in an attempt to fix potential problems in the analysis before they arise.
Effective: Summer 2010 Ending: Summer 2010

PL SC 596C **Time Series Analysis** (3) This course begins by focusing on the autoregressive and moving average components of time series, and then turns to estimation of univariate time series models using the Box-Jenkins approach.
Effective: Summer 2010 Ending: Summer 2010

PL SC 596D **Simultaneous Equation Models** (3) This course centers on simultaneous equation models -- models of more than one equation, to account for more than one dependent variable -- formerly called "causal models."
Effective: Summer 2010 Ending: Summer 2010

PL SC 596E **Longitudinal Analysis** (3) This course treats the statistical basis and practical application of linear models for longitudinal normal data and generalized linear models for longitudinal binary, count, and ordinal data.
Effective: Summer 2010 Ending: Summer 2010

PL SC 596F **Advanced Multivariate Statistical Models** (3) The purpose of this workshop is to discuss linear models that are useful for analyzing multivariate data.
Effective: Summer 2010 Ending: Summer 2010

PL SC 596G **Structural Equation Models w/Latent Variables** (3) This course will introduce participants to latent variable structural equation models (SEMs).
Effective: Summer 2010 Ending: Summer 2010

PL SC 596I **Complex System Models in Social Sciences** (3) This workshop will give an introduction to bottom-up approaches to computer modeling and compare them to more traditional mathematical (analytical) approaches.
Effective: Summer 2010 Ending: Summer 2010

PL SC 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

PL SC 597A **Judicial Politics** (3) This is a course on judicial politics, taught from both an American and comparative politics perspective.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PL SC 597A **Civil Conflict** (3) This course will compare across types of civil conflict.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

PL SC 597B **Mathematics for Political Science** (1.5) This course is an introduction to mathematical concepts and techniques used in statistical and formal approaches to political science.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PL SC 597B **Game Theory** (3) This course aims to give students an entry-level understanding of the basic concepts of game theory.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

PL SC 597C **Quantitative Methods** (3) This course introduces a range of statistical models that generalize from linear-normal regression.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010
Prerequisite: PL SC 503 or its equivalent

PL SC 597C **Territoriality and Group Conflict in International Relations** (3) This course will focus on the central theoretical role territory plays in international relations.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

PL SC 597D **Topics in Game Theory** (3) The course aims to give students and entry-level understanding of the basic concepts of game theory.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PL SC 597D **Robust Models, Exploratory Models and Machine Learning** (3) The course focuses on automated techniques for determining the robustness of a statistical model.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

PL SC 597E **Seminar on Macro Polity** (3) This course will focus on aspects of American politics that can be studied at the macro level.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

PL SC 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1995

PL SC 599 (IL) **Foreign Studies** (1-12 per semester/maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

PL SC 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

PL SC 601 **Ph.D. Disseration Full-Time** (0) No description.
Effective: Fall 1983

PL SC 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description.
Effective: Spring 1995

PL SC 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2000

PL SC 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

PL SC 611 **Ph.D. Dossertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: July 10, 2010 3:00 AM

Portuguese (PORT)

PORT 405 **Advanced Composition and Conversation** (3) Intended to strengthen the advanced student's ability to speak, read, and write in modern Brazilian Portuguese.
Effective: Summer 1981
Prerequisite: PORT 003

PORT 456 **Brazilian Literature in English Translation** (3) Selected topics in the history of Brazilian literature, supplemented by readings, discussion, and lectures on cultural or literary questions.
Effective: Winter 1978

PORT 466 **Brazilian Literature, The Colonial Era Through Romanticism** (3) A survey of the major texts of Brazilian literature from its origins (1500) through its romantic period.
Effective: Summer 1991
Prerequisite: PORT 003

PORT 476 **Brazilian Literature, The Modern Era (1880 to the Present)** (3) A survey of the major texts of Brazilian literature from romanticism to the present.
Effective: Summer 1991
Prerequisite: PORT 003

PORT 480 **The Brazilian Novel** (3) A survey of the Brazilian novel from its origins to the present.
Effective: Spring 1993
Prerequisite: PORT 003, PORT 405

PORT 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

PORT 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

PORT 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PORT 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PORT 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

PORT 588 **Seminar in Portuguese and Brazilian Literature** (3-12) Common and individual research in special problems.
Effective: Winter 1978

PORT 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

PORT 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1988

PORT 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

PORT 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

Last Import from UCM: July 10, 2010 3:00 AM

Psychology (PSYCH)

PSYCH 400 **Intermediate Experimental Design** (3) Design and analysis of experiments on human and animal behavior, including application of the t, F, chi-square, and binomial distributions.
Effective: Spring 2007
Prerequisite: PSYCH 200 orSTAT 200

PSYCH 403 **Measurement and Decision Making** (3) Introduction to axiomatic measurement theory, scale construction, and behavioral decision theory. Algebraic and stochastic models; iterative scaling methods.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 404 (EDPSY 450) **Principles of Measurement** (3) Scale transformation, norms, standardization, validation procedures, estimation of reliability.
Effective: Spring 2007
Prerequisite: EDPSY 400, PSYCH 100 orPSYCH 200;STAT 200

PSYCH 405 **Mathematical Psychology** (3) Formalized psychological theories including models of social, biological, cognitive, and learning phenomena.
Effective: Spring 2007
Prerequisite: MATH 040 or equivalentPSYCH 200 orSTAT 200

PSYCH 406W **Advanced Research Projects in Psychology** (4) Advanced methodology focusing on the logic and practice of research culminating in the completion of a student designed research project.
Effective: Spring 2007
Prerequisite: PSYCH 301W

PSYCH 407 **Advanced Research Methods in Psychology** (3) Advanced methodology focusing on the logic and practice of research in a selected content area of psychology.
Effective: Spring 2007
Prerequisite: PSYCH 100;PSYCH 200 orSTAT 200;PSYCH 301W

PSYCH 408 **Program Evaluation** (3) Examination of the theories and practice of program evaluation; emphasis on applied work utilizing a wide range of evaluation approaches.
Effective: Spring 2007
Prerequisite: PSYCH 100 orSOC 001;PSYCH 200 orSTAT 200;PSYCH 301W

PSYCH 410 **Child Development** (3) Study of the psychology of the growing person from conception through adolescence, focusing more on periods up to middle childhood.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 412 **Adolescence** (3) Physical, cognitive, and personality development during adolescence.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 413 **Cognitive Development** (3) Development of reasoning and related cognitive skills, such as perception and language.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 212

PSYCH 414 **Social and Personality Development** (3) Development of social and personality attributes.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 212

PSYCH 415 **Topics in Developmental Psychology** (3) Special topics in developmental psychology.
Effective: Spring 2007
Prerequisite: PSYCH 413 orPSYCH 414

PSYCH 416 (HD FS 445) **Development Throughout Adulthood** (3) Processes of development and change of behavior from early adulthood through old age, emphasizing theory, method, and empirical research.
Effective: Spring 2007
Prerequisite: HD FS 249 orPSYCH 100;HD FS 312W orPSYCH 301W;PSYCH 200, STAT 200 or 3 credits of statistics ; 6 credtis in HD FS PSYCH or SOC.

PSYCH 420 **Advanced Social Psychology** (3) In depth study of selected research areas in human social behavior.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 421 **Self and Social Judgment** (3) Individual's perceptions, evaluations, and decision-making strategies about themselves, others, and social situations or issues.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 221

PSYCH 422 **Human Sexuality** (3) Psychological influences on human sexual behavior such as love, sexual orientation, gender, intercourse, contraception, sexually transmitted diseases, dysfunctions, and paraphilias.
Effective: Spring 2007

Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 423 **Social Psychology of Interpersonal/Intergroup Relationships** (3) In-depth study of relationships among individuals (e.g., intimate relationships) or groups (e.g., prejudice, cooperation, competition, aggression, and negotiation).
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 221

PSYCH 424 **Applied Social Psychology** (3) Application of social psychological theories and research methods to field settings and to the study of social issues.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 221

PSYCH 425 **Psychology of Human Emotion** (3) Reviews, critiques, and applies major historical and contemporary psychological theories of emotion experience, understanding, and expression.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 426 (LING 429) **Language and Thought** (3) Relations between language and cognition; cognitive implications of normal and impaired language development; cognition and bilingualism.
Effective: Spring 2007
Prerequisite: PSYCH 100 orLING 001 orLING 100

PSYCH 427 (LING 446) **L1 Acquisition** (3) How children learn their first language; psycholinguistic aspects of lexical, syntactic, semantic, and phonological development.
Effective: Spring 2010
Prerequisite: LING 100 orPSYCH 002 or permission of program

PSYCH 432 (US) **Multicultural Psychology in America** (3) This course focuses on the central role of culture, race, and ethnicity in the human condition.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 436 (RL ST 414) **Humanistic, Existential, and Religious Approaches to Psychology** (3) Existential, humanistic, and religious approaches to the psychology of experience, consciousness and will.
Effective: Spring 2007
Prerequisite: PSYCH 100 orRL ST 001

PSYCH 438 **Personality Theory** (3) Personality theories and their application to social and personality development and personality dynamics.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits PSYCH

PSYCH 439 **History and Systems of Psychology** (3) Historical antecedents to scientific psychology; development of contemporary psychological theories and research areas from the formal establishment of psychology.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 441 **Health Psychology** (3) Overview of the field with an emphasis on how psychological research contributes to an understanding of health and behavior.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 443 **Treatment and Education in Developmental Disabilities** (3) Covers etiology, classification, intervention (treatment and education), ethical and legal issues related to individuals with developmental disabilities.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 444 **Engineering Psychology** (3) Methods and results of experimental psychology pertinent to problems which involve man-machine relationships.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of GQ or PSYCH

PSYCH 445 **Forensic Psychology** (3) Relations between psychological theory and research and the law, legal processes, and social policy.
Effective: Spring 2007
Prerequisite: PSYCH 100;PSYCH 238, PSYCH 243 orPSYCH 270

PSYCH 447 **Psychology of Discipline** (3) Provides theory and practice for effective discipline of children in a variety of situations.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits PSYCH

PSYCH 450 **Psychology of Consciousness** (3) Introduction to psychological and physiological aspects of consciousness as related to brain function and clinical psychology.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 451 **Psychology of Action** (3) Basic and applied science of action, from psychological, computational, and physiological perspectives.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 256

PSYCH 452 **Learning and Memory** (3) General survey of learning and memory processes as revealed in experimental work with animals and humans.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 256

PSYCH 453 **Sensation and Perception** (3) Fundamental processes and variables involved in the sensory and perceptual experiences of animals and humans.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 253

PSYCH 456 **Advanced Cognitive Psychology** (3) In depth study of complex mental processes: thinking, problem-solving, imagery, symbolic behavior, information-processing, attention, artificial intelligence, and language.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 457 **Psychology of Language** (3) Overview of psychological research and theory on language processes, including speech perception, word recognition, meaning representation, comprehension, and language acquisition.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 458 **Visual Cognition** (3) Overview of concepts and methods in cognitive visual-spatial processing.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 459 **Attention and Information Processing** (3) An examination of attentional processes. Contemporary informational processing approaches will be emphasized.
Effective: Spring 2007
Prerequisite: PSYCH 100;PSYCH 200 orSTAT 200 ; 3 credits 400-level PSYCH

PSYCH 460 **Comparative Psychology** (3) Behavior from standpoint of phylogenetic growth and development; biological implications; comparison of different types of animals, including man.
Effective: Spring 2007
Prerequisite: PSYCH 100;PSYCH 260

PSYCH 461 **Advanced Conditioning and Learning** (3) An examination of basic learning processes that have been determined within the context of classical, instrumental, and operant learning situations.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 462 **Physiological Psychology** (3) Study of the biological bases of behavior and experience, including the anatomy and physiology of the brain and nervous system.
Effective: Spring 2007
Prerequisite: PSYCH 100;PSYCH 260 or 3 credits of BIOL

PSYCH 463 **Developmental Biopsychology** (3) Developmental neuroanatomy and neurophysiology of vertebrates as they relate to behavior; emphasis on early postnatal development of birds and mammals.
Effective: Spring 2007
Prerequisite: PSYCH 260

PSYCH 464 **Behavior Genetics** (3) Survey of gene mechanisms and gene-environment interactions in the determination of behavior; emphasis on deviant human behavior.
Effective: Spring 2008
Prerequisite: PSYCH 100;ANTH 021, BI SC 002, BIOL 133 orBIOL 222

PSYCH 470 **Abnormal Psychology** (3) Causes, dynamics, symptoms, and treatment of neuroses, psychoses, personality disorders, and other psychological disorders of adulthood.
Effective: Spring 2007
Prerequisite: PSYCH 100;PSYCH 238, PSYCH 243 orPSYCH 270

PSYCH 471 **Psychology of Adjustment and Social Relationships** (3) Theory and application of psychological principles to problems in personal and social adjustment.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 473 **Behavior Modification** (3) Principles of advanced behavior modification techniques.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 474 **Psychological Intervention in Childhood** (3) Psychology of personal relationships in school situations.
Effective: Spring 2007
Prerequisite: PSYCH 100;PSYCH 212, PSYCH 238, PSYCH 243 orPSYCH 270

PSYCH 475 **Psychology of Fear and Stress** (3) Description and evaluation of major trends in research on stress and fear in humans and other animals.
Effective: Spring 2007
Prerequisite: PSYCH 100 3 credits of BIOL statisticsPSYCH 200 orSTAT 200

PSYCH 476 **Child Psychopathology** (3) Etiology, diagnosis, and facilitation of adjustment of the mentally retarded, gifted, physically handicapped, and emotionally disturbed child.
Effective: Spring 2007

Prerequisite: PSYCH 100;PSYCH 212, PSYCH 238, PSYCH 243 orPSYCH 270

PSYCH 477 **Mental Health Practicum with Children** (3) Overview of interventions for children at risk for mental health disorders; emphasis on intervention strategies, program evaluation, and applied skills.
Effective: Spring 2007
Prerequisite: PSYCH 100 permission of program

PSYCH 478 **Clinical Neuropsychology** (3) Overview of functional human neuroanatomy and clinical neuropsychology, with emphasis on origin, assessment, and treatment of human brain damage.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 260

PSYCH 479 (US) (WMNST 471) **The Psychology of Gender** (3) Theories and research on gender differences and gender roles. Emphasis on women's and men's current positions in society.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 221

PSYCH 481 **Introduction to Clinical Psychology** (3) Diagnostic precedures, treatment approaches, occupational settings, and ethical considerations relevant to the profession of the clinical psychologist.
Effective: Spring 2007
Prerequisite: PSYCH 100;PSYCH 238, PSYCH 243 orPSYCH 270

PSYCH 482 **Selection and Assessment in Organizations** (3) Background in personnel testing, performance measurement, selection strategies, with emphasis on validity and measurement reliability.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 200 orSTAT 200, PSYCH 281

PSYCH 484 **Work Attitudes and Motivation** (3) Survey of theory and research with respect to attitudes, morale, and motivation of employees and management.
Effective: Spring 2007
Prerequisite: PSYCH 100;PSYCH 200 orSTAT 200 or 6 credits of GQ

PSYCH 485 **Leadership in Work Settings** (3) Review of research and application of behavior principles in the areas of management and supervision.
Effective: Spring 2007
Prerequisite: PSYCH 100;PSYCH 281 or 3 credits MGMT

PSYCH 490 **Senior Seminar in Psychology** (3) Capstone experience for senior psychology majors; review of current research literature; topics vary.
Effective: Spring 2007
Prerequisite: PSYCH 301W 6 credits 400-level PSY senior Psychology major

PSYCH 491H **Honors Thesis** (3) An opportunity to pursue an advanced research thesis or project to integrate studies within psychology.
Effective: Spring 2007
Prerequisite: HONOR 301H senior standing and permission of the program

PSYCH 492 **Current Topics in Psychology** (3) Current topics addressing significant contemporary developments in psychology.
Effective: Spring 2007
Prerequisite: PSYCH 100

PSYCH 493 **Senior Thesis** (3-6) Supervised senior thesis research in psychology.
Effective: Spring 2007
Prerequisite: approval of a thesis adviser in the department seventh-semester standing

PSYCH 494 **Research Projects** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2007

PSYCH 494H **Research Projects** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

PSYCH 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1998
Prerequisite: prior approval of proposed assignment by instructor

PSYCH 495K **Practicum with Hi-Risk Youth and Children** (2-3) Overview of interventions for children at risk for mental health disorders; emphasis on intervention strategies, program evalution, and applied skills. Continuation of PSYCH 477 held in Fall semester.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011
Prerequisite: prior approval of proposed assignment by instructor

PSYCH 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1985

PSYCH 496A **Applications of Survey Research** (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2010 Ending: Summer 2010

PSYCH 496A **Undergraduate Teaching Assistant** (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

PSYCH 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1991

PSYCH 497A **Biopsychology** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

PSYCH 497B **Advanced Experimental Psychology** (3) This is an advanced survey course, providing a broad overview of the methods used in a variety of research areas in psychology.
Effective: Summer 2010 Ending: Summer 2010

PSYCH 497D (CRIMJ 497D, WMNST 497D, SOC 497D) **Family and Justice** (3) Examination of the relationship between the family and the criminal justice system in which the family operates.
Effective: Summer 2010 Ending: Summer 2010

PSYCH 499 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

Last Import from UCM: July 10, 2010 3:00 AM

Public Administration (P ADM)

P ADM 401 **Introduction to Homeland Security** (3) This course provides foundational knowledge about homeland security, including policy, organization, and legal issues in the American context.
Effective: Summer 2008

P ADM 404 **Homeland Security and Defense in Practice** (3) This course analyzes, evaluates, and critiques homeland security plans in practice.
Effective: Summer 2008
Prerequisite: P ADM 401

P ADM 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1993

P ADM 500 **Public Organization and Management** (3) Development of basic concepts and issues in public administration; administra- tive theory and public policy processes.
Effective: Spring 2003

P ADM 502 **Governmental Fiscal Decision Making** (3) Nature, function, and technique of governmental budgeting viewed as mechanism for allocating resources among alternative public uses.
Effective: Spring 2003
Prerequisite: P ADM 500

P ADM 503 (H ADM 503) **Research Methods** (1-3) Examination of research methodologies relevant to administration, planning, and public policy.
Effective: Spring 2006
Prerequisite: 3 credits statistics or permission of program and a demonstrated working knowledge of SPSS

P ADM 505 **Human Resources in the Public and Nonprofit Sectors** (3) Concepts and approaches contributing to effective use of human resources in public and non-profit organizations; legal issues and requirements.
Effective: Spring 2002
Prerequisite: P ADM 500

P ADM 506 (H ADM 506) **Management Information Systems for Public and Health Administration** (3) The design, implementation, and purpose of computerized management information systems in public and non-profit organizations.
Effective: Spring 2003

P ADM 507 **Introduction to Public Policy Analysis** (3) Introduction to the analysis of public policy within its organizational and political contexts, including an emphasis on an economic perspective.
Effective: Summer 2004
Prerequisite: 3 credits of American government and 3 credits of basic economics

P ADM 510 (H ADM 510) **Organizational Behavior** (3) Examination of concepts of human behavior in formal organizations, systems analysis, conceptual models, and decision processes.
Effective: Spring 2003

P ADM 511 **Organizational Change and Development** (3) Theory of organizational change and development; case analysis of applications in actual situations.
Effective: Spring 2003
Prerequisite: H ADM 510 orP ADM 510

P ADM 512 **Issues in Human Resources** (3) A survey of major human resource issues such as job stress, burnout, and the many forms of discrimination in organizations.
Effective: Spring 2003
Prerequisite: P ADM 505 ; andH ADM 510 orP ADM 510

P ADM 514 **Public Organization and Managerial Consultation** (3) This course will review the theories, approaches, methods, and expected outcomes of organization and management consultation.
Effective: Spring 2003
Prerequisite: P ADM 500 and eitherH ADM 510 orP ADM 510

P ADM 515 (MNGMT 515) **Labor Management Relations** (3) Labor relations issues; collective bargaining agreement, negotiations, and administration; legal framework of collective bargaining; labor relations in larger social context.
Effective: Spring 2003
Prerequisite: P ADM 505

P ADM 516 **Strategic Planning** (3) A survey of strategic planning purposes, approaches and methods, and expected outcomes in small and large organizations.
Effective: Summer 1999
Prerequisite: P ADM 500

P ADM 517 **Nonprofit Organizations: History and Evolution** (3) A study of the history, development and current role of nonprofit organizations as a distinguishing feature of American society.
Effective: Spring 2003
Prerequisite: Permission of Program.

P ADM 518 **Nonprofit Organizations: Management and Leadership** (3) A study of the theoretical and practical issues involved in management and leadership of nonprofit organizations.
Effective: Spring 2003
Prerequisite: Permission of Program.

P ADM 519 **Nonprofit Organizations: Resource Development and Management** (3) Process by which nonprofit organizations assure that resources are obtained and used effectively and efficiently toward the achievement of objectives.
Effective: Summer 2003

P ADM 522 **Government Financial Management** (3) Theories and techniques of financial planning and control, with emphasis on their application in government and nonprofit agencies.
Effective: Spring 2003
Prerequisite: P ADM 502

P ADM 523 **Governmental and Nonprofit Accounting** (3) Accounting, reporting, and auditing principles and procedures for public sector agencies and nonprofit organizations.
Effective: Summer 1998
Prerequisite: P ADM 502

P ADM 524 **Administrative Law** (3) Statutory and judicial controls upon administrative discretion. Administration of rule making, rate setting, licensing, adjudication. Judicial review and citizen advocacy.
Effective: Spring 2003
Prerequisite: P ADM 500

P ADM 531 **Environmental Policy** (3) The course examines contemporary environmental and natural resources policies at every level within the United States government and at the global level.
Effective: Spring 2003

P ADM 532 **Urban Government** (3) Administrative processes and policy problems associated with managing urban communities; political, intergovernmental, fiscal, structural, and analytical concepts in urban government.
Effective: Winter 1978

P ADM 533 **Local Planning Law and Administration** (3) Structure and function of local and regional government from perspective of local planning law and its administration.
Effective: Spring 2003
Prerequisite: P ADM 500

P ADM 534 **Managing Economic Development** (3) Theoretical and operational aspects of economic development emphasizing the role of local and regional government.
Effective: Spring 2003
Prerequisite: permission of program

P ADM 535 **Policy Analysis and Planning** (3) The course will cover the theoretical issues in and basic methods of policy analysis and planning (prospective policy analysis).
Effective: Summer 2004
Prerequisite: P ADM 503

P ADM 550 **Policy and Program Evaluation** (3) The course will cover the theoretical issues in and basic methods of policy and program evaluation (retrospective policy analysis).
Effective: Spring 2005
Prerequisite: P ADM 503

P ADM 554 **Master's Project** (1-3) Student independently executes an applied professional or research project involving the analysis of a management or a public policy problem.
Effective: Winter 1981
Prerequisite: P ADM 503

P ADM 556 **State Government Administration** (3) Study of structures, systems, processes, problems, and issues affecting state government administration; case studies, field observations, and research.
Effective: Spring 2003
Prerequisite: P ADM 500

P ADM 557 **Federalism and Intergovernmental Relations** (3) Study of the impact of a federal system of government on the administration of public functions. National-state-local dimensions.
Effective: Spring 2003
Prerequisite: P ADM 500

P ADM 558 **Legislative Processes** (3) Legislatures in American government, emphasizing comparative state legislatures: constitutional patterns; organization, administration; interaction with bureaucracy, constituencies, and organized interests.
Effective: Spring 2003
Prerequisite: P ADM 500

P ADM 570 **Scope and Methods of Public Administration** (3) Examination of theoretical approaches to public administration and the role of theory in the field.
Effective: Spring 2005
Prerequisite: P ADM 500, P ADM 503, P ADM 507, P ADM 510

P ADM 571 **Seminar in Organizational Theory** (3) Selected theories of organizations and their applications to the study of public organizations.
Effective: Spring 1988
Prerequisite: P ADM 570

P ADM 572 **Research and Theory in Political Institutions** (3) Selected research paradigms and their application in the study of political institutions.
Effective: Spring 1988
Prerequisite: P ADM 570

P ADM 573 **Research and Theory in Public Policy and Governance** (3) An introduction to policy analysis, the stages of the policy process, and key theoretical issues. applications to real world problems.
Effective: Spring 2005
Prerequisite: P ADM 570 or permission of program

P ADM 574 **Research and Theory in Public Management** (3) Theoretical and empirical bases for selected functions of public managers.
Effective: Spring 1988
Prerequisite: P ADM 570

P ADM 575 **Advanced Research Design** (3) Experimental, quasi-experimental, survey, aggregate, and other research designs applied to organizational, managerial, and policy analysis research problems.
Effective: Spring 1988
Prerequisite: P ADM 570

P ADM 576 **Multivariate Statistical Methods** (3) Multivariate statistical methods, with special emphasis on their use in organizational, managerial, and policy analysis research settings.
Effective: Spring 1988
Prerequisite: P ADM 575

P ADM 577 **Design for Effective Public/Nonprofit Organizations: Seminar in Advanced Organization Theory** (3) Theories, research, and process of designing effective organizations.
Effective: Spring 2005
Prerequisite: P ADM 570 andP ADM 571 or permission of program

P ADM 578 **Topics in Policy Analysis and Governance** (3) Topics in policy analysis and governance, culminating in a substantial research paper.
Effective: Summer 2004
Prerequisite: P ADM 570 andP ADM 573

P ADM 579 **Public Leadership and Ethics** (3) Examination of theory and research in leadership and public ethics, and their application to the field of Public Management.
Effective: Summer 2004
Prerequisite: P ADM 570 andP ADM 574 or permission of program

P ADM 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

P ADM 591 **Readings in Public Administration** (3) Directed readings in selected areas of public administration.
Effective: Spring 1999
Prerequisite: P ADM 570 and permission of program

P ADM 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1996

P ADM 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 1995

P ADM 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

P ADM 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

P ADM 597A **Performance Management and Analysius** (3) This course will address basic issues, concepts and practices

in the measurement and analysis of performance in the public sector.
Effective: Summer 2010 Ending: Summer 2010

P ADM 600 **Thesis Research** (1-15) No description.
Effective: Spring 1990

P ADM 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 2000

P ADM 801 (HLS 801) **Homeland Security Administration: Policies and Programs** (3) Foundation for understanding homeland security history, the development of homeland security policies and organizations, and current management approaches.
Effective: Summer 2010

P ADM 802 **Multifaceted Approaches to Homeland Security** (3) Examination of the roles of the public and private sectors and the military in preparing, mitigating, and responding to disasters.
Effective: Fall 2008
Prerequisite: P ADM 401

P ADM 803 **Strategic Planning and Organizational Imperatives in Homeland Defense and Security** (3) The Homeland Security framework depends on strategic planning and organization. This course examines the key issues associated with these.
Effective: Fall 2008
Prerequisite: P ADM 401

P ADM 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2007

P ADM 897B **Security and Intelligence Communities** (3) Introduction to national and homeland security and intelligence communities. Examines structure of these communities and career opportunities.
Effective: Summer 2010 Ending: Summer 2010

Last Import from UCM: July 10, 2010 3:00 AM

Public Hlth Prepared (PHP)

PHP 410 (HLS 410) **Public Health Preparedness for Disaster and Terrorist Emergencies I** (3) Analyzes the history of terrorism and explores the preparation and response to specific terrorist threats, natural disasters, and conventional catastrophes.
Effective: Fall 2010 Future: Fall 2010
Prerequisite: Undergraduate StudentsBIOL 011 andBIOL 012 orCHEM 110 andCHEM 111 orMICRB 106 andMICRB 107 ; Graduate Students - Enrollment in the MHS program the Post- Baccalaureate Credit Certificate in Homeland Security or permission from the instructor.

PHP 510 (HLS 510) **Public Health Preparedness for Disaster and Terrorist Emergencies II** (3) A public health perspective on the preparation necessary to develop a coordinated response to a disaster or terrorist emergency.
Effective: Fall 2010 Future: Fall 2010
Prerequisite: permission of the instructor

PHP 527 (HLS 527) **Public Health Evaluation of Disasters and Bioterrorism** (3) Introduces students to the design of exposure assessment and health effect studies applicable to disasters and terrorism.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010
Prerequisite: HLS 510 or permission of the instructor

PHP 527 (HLS 527) **Public Health Evaluation of Disasters and Bioterrorism** (3) Introduces students to the design of exposure assessment and health effect studies applicable to disasters and terrorism.
Effective: Spring 2011 Future: Spring 2011
Prerequisite: HLS 510 or permission of the instructor

PHP 530 (HLS 530) **Critical Infrastructure Protection of Health Care Delivery Systems** (3) Investigates the impact that terrorist incidents may have on healthcare facilities or their ability to deliver healthcare services.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010
Prerequisite: HLS 510 permission of the instructor

PHP 530 (HLS 530) **Critical Infrastructure Protection of Health Care Delivery Systems** (3) Investigates the impact that terrorist incidents may have on healthcare facilities or their ability to deliver healthcare services.
Effective: Spring 2011 Future: Spring 2011
Prerequisite: HLS 510 permission of the instructor

PHP 553 (CAS 553, HLS 553) **Disaster Communication** (3) This seminar provides students with a comprehensive understanding of the multifaceted nature of disaster communication across phases of a disaster.
Effective: Fall 2010 Future: Fall 2010

PHP 558 (PSY 558, HLS 558) **Disaster Psychology** (3) Explores psychological impact of disasters and terrorist attacks on victims, families, rescuers, and society and methods of reducing negative effects.
Effective: Fall 2010 Future: Fall 2010
Prerequisite: HLS 510 or permission of the instructor

PHP 594 (HLS 594) **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010
Prerequisite: Completion of at least 15 credits in the program includingHLS 510 andHLS 527 or permission of the instructor

PHP 594 (HLS 594) **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2011 Future: Spring 2011
Prerequisite: Completion of at least 15 credits in the program includingHLS 510 andHLS 527 or permission of the instructor

Last Import from UCM: July 10, 2010 3:00 AM

Public Policy (PUBPL)

PUBPL 415 (CRIMJ 415) **Drug Control Policy in Comparative Perspective** (3) Examines the history of drug control policy in the United States; comparisons and contrasts with other countries' experiences.
Effective: Summer 2004
Prerequisite: CRIMJ 200 orPL SC 001 orPL SC 014 orSOC 001

PUBPL 419 **Western Constitutional Traditions** (3) This course reviews the major political, economic and social movements that shaped the development of the US Constitution.
Effective: Spring 2005
Prerequisite: HIST 001, HIST 002, I HUM 311, I HUM 312, PL SC 001, PUBPL 420 orPUBPL 421

PUBPL 480 **Seminar in Urban Policy** (3) Work in this course will focus upon governmental institutions and public policy problems in metropolitan areas.
Effective: Fall 1998
Prerequisite: seventh-semester standing

PUBPL 481 **Seminar in Environmental Policy** (3) Fundamentals of evolution; impacts on natural resources; interaction of environmental issues, current decision-making process policy, enforcement mechanisms; future actions.
Effective: Fall 1983
Prerequisite: seventh-semester standing

PUBPL 482 **Seminar in Health Policy** (3) Introduction to policy analysis of issues of current interest and importance to public administrators in the health industry.
Effective: Fall 1983
Prerequisite: seventh-semester standing

PUBPL 483 **Seminar in National Security Policy** (3) Course will examine the inter-relationship of foreign, military and economic policy.
Effective: Fall 1983
Prerequisite: seventh-semester standing

PUBPL 484 **Seminar in Transportation Policy** (3) Transportation policy; a consideration of its formulation and application in the Federal system.
Effective: Fall 1983
Prerequisite: seventh-semester standing

PUBPL 485 **Seminar in Welfare Policy** (3) Course examines the origins, development, and impact of welfare programs.
Effective: Fall 1998
Prerequisite: seventh-semester standing

PUBPL 490 **Seminar in Public Policy** (3) A survey of the major policy issues, actors and institutions involved in the policy-making system of contemporary society. (May be repeated for credit.)
Effective: Fall 1983
Prerequisite: seventh-semester standing

PUBPL 495 **Internship** (3-12) Experience in a public service agency related to knowledge gained through academic course work, reading, and discussion.
Effective: Fall 1983
Prerequisite: seventh-semester standing

PUBPL 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 1983

PUBPL 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2010

PUBPL 497A (PL SC 497I) **Public Affairs Capstone Course** (3) This course examines how to objectively examine contentious public policy controversies by relying on essential principles of scientific research.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

Last Import from UCM: July 10, 2010 3:00 AM

Quality Control (Q C)

Q C 450 **Quality Control and Quality Improvement** (3) Review of quality control and improvement methods including SPC applications, acceptance sampling, regression analysis, and design of experiments.
Effective: Spring 2007
Prerequisite: MATH 141 orMATH 210

Q C 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

Last Import from UCM: July 10, 2010 3:00 AM

Quality and Manufacturing Management (QMM)

QMM 491 **Introduction to Business Concepts for Manufacturing** (3) Introduction to business, topics in marketing, accounting, and finance for nonbusiness students in manufacturing management.
Effective: Fall 2001
Prerequisite: students taking this course CAN NOT be a Business major and must be in their senior year

QMM 492 **Introduction to Engineering Design Principles** (3) Engineering principles including different engineering fields, graphics, design, solid modeling and failure analysis.
Effective: Fall 2001
Prerequisite: students taking this course CAN NOT be an Engineering major and must be in their senior year

QMM 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2008

QMM 552 **Applied Statistical Process Control and Experimental Design** (3) Concepts and techniques of statistical process control and the design of experiments.
Effective: Fall 2008
Prerequisite: QMM 851

QMM 561 **Manufacturing Systems Planning and Control I** (3) Systems, components and configurations, flow of material and information in a manufacturing system.
Effective: Spring 1996
Prerequisite: admission to the QMM program

QMM 562 **Manufacturing Systems Planning and Control II** (3) Flow of material and information in a manufacturing system; emphasis on systems integration.
Effective: Spring 1996
Prerequisite: QMM 561

QMM 581 **Manufacturing Processes of Materials** (3) Characteristics of materials with respect to their properties and associated choices of processing to create a range of products.
Effective: Spring 1996
Prerequisite: admission to the QMM program

QMM 582 **Manufacturing and Supply Chain Strategy** (3) Strategic decision context of manufacturing and its supply chains with linkage to corporate and business strategy.
Effective: Fall 2001
Prerequisite: enrollment in the QMM program

QMM 593 **Field Experience in Manufacturing** (1-2) Experiential learning through the firsthand study of manufacturing plants and by interacting with manufacturing leaders.
Effective: Spring 2001
Prerequisite: admission to the Quality and Manufacturing Management (QMM) Program

QMM 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1997

QMM 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1997

QMM 851 **Quality Management** (3) Concepts of design, assessment, and improvement of quality systems; customer needs analysis, identification of opportunities for application of measurement techniques.
Effective: Fall 2008
Prerequisite: admission to the QMM program

QMM 871 **Design Practice for Manufacturing I** (3) Contemporary concepts in design and design practice with emphasis on engineering, business, and human strategic issues.
Effective: Fall 2008
Prerequisite: or concurrent:QMM 491 orQMM 492

QMM 872 **Design Practice for Manufacturing II** (3) Contemporary concepts in design and design practice with emphasis on logistics, risk, design and manufacturing readiness, and production.
Effective: Spring 2009
Prerequisite: QMM 871

QMM 891 **Communication and Leadership Skills for Manufacturing Managers** (1-3) Applied principles of managerial, visual, and written communication that support the needs of manufacturing leaders.
Effective: Fall 2008
Prerequisite: admission to the QMM Program

QMM 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2007

Last Import from UCM: July 10, 2010 3:00 AM

Radiological Sciences (RADSC)

No courses for department code **RADSC** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Real Estate (R EST)

R EST 409 (FIN 409) **Real Estate Finance and Investment** (3) The sources and uses of credit; instruments and methods of financing; the theory and practice of real estate investment analysis.
Effective: Spring 2004
Prerequisite: B A 301

R EST 420 **Analysis of Real Estate Markets** (3) Historical performance, land use issues, market valuation, real estate development, public policy issues.
Effective: Summer 2005
Prerequisite: R EST 301 orR EST 460 orR EST 470

R EST 424 (B LAW 424) **Real Estate Law** (3) Analysis of contemporary law applicable to various types of ownership interests and rights, methods of transferring ownership, and use of real property.
Effective: Spring 2005
Prerequisite: B LAW 346

R EST 425 (B LAW 425) **Environmental Law, Property, and Commerce** (3) Examines the impacts of major federal environmental laws on business relations and property interests.
Effective: Summer 1995
Prerequisite: B A 243, B LAW 243 orE R M 151

R EST 440 **Advanced Techniques in Real Estate Analysis** (3) Theories and methods of modern financial analysis including specialized computer applications, valuation of mortgage securities, portfolio applications, and option pricing.
Effective: Spring 2004
Prerequisite: B A 301

R EST 450 **Urban Property Rights and Land Use Issues** (3) International perspectives on real estate as property, evaluation of land use regulations, and differences in real estate markets across countries.
Effective: Spring 2005 Ending: Fall 2010
Prerequisite: B A 301

R EST 450 **Urban Property Rights and Land Use Issues** (3) International perspectives on real estate as property, evaluation of land use regulations, and differences in real estate markets across countries.
Effective: Spring 2011 Future: Spring 2011
Prerequisite: B A 301 orFIN 301

R EST 460 (FIN 460) **Real Estate Financial Analysis** (3) Debt and equity financing capital structure, "creative financing," risk analysis, corporate asset management.
Effective: Summer 2005
Prerequisite: FIN 305W

R EST 470 (FIN 470) **Real Estate and Capital Markets** (3) Analysis of publicly-traded real estate of both the equity, (REITs) and debt (MBSs) sides. The course also provides international perspectives.
Effective: Summer 2005
Prerequisite: FIN 305W

R EST 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2003

R EST 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

R EST 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

R EST 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

R EST 497A **Real Estate Case Competitions** (2) This course provides skills and expertise in analyzing actual real estate cases in preparation for national case competitions.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

R EST 497A **Real Estate Case Competitions** (2) This course provides skills and expertise in analyzing actual real estate cases in preparation for national case competitions.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

R EST 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

R EST 510 **Real Estate Financial Analysis** (3) Real estate finance and investment analysis. Topics include housing; demand and supply of credit, and real estate investment strategies.
Effective: Fall 1983

R EST 515 (I B 515) **Property Rights in a Global Economy** (2) Analysis of economic, financial, legal, and political factors affecting international real estate decision making.
Effective: Spring 2009

R EST 525 **Environmental Law** (3) Analysis of legal, economic, and social factors affecting the environmental quality of real property and its associated rights.
Effective: Spring 1998

R EST 540 **Real Estate Financial Analysis II** (3) Theories and methods of advanced real estate financial analysis.
Effective: Summer 1995

R EST 560 **Real Estate Financial Analysis** (2) This course provides a modern framework for the valuation and analysis of real property using both theoretical and empirical approaches.
Effective: Summer 2002
Prerequisite: B A 531

R EST 570 **Institutional Real Estate Investment** (2) A survey of the latest developments of real estate as an institutional investment.
Effective: Summer 2002
Prerequisite: B A 531

R EST 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall ouside the scope of formal courses.
Effective: Spring 1987

R EST 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

R EST 597B **Real Estate Research** (3) This will be an advanced course in Real Estate for Ph D students.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

R EST 599 (IL) **Foreign Study--Real Estate** (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite: acceptance in establsihed exchange program

R EST 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

R EST 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Spring 2005

R EST 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description.
Effective: Summer 1985

R EST 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

Last Import from UCM: July 10, 2010 3:00 AM

Recreation, Park and Tourism Management (RPTM)

RPTM 410 **Marketing of Recreation Services** (3) Theoretical/practical application of marketing/advertising strategies in the development/delivery of recreation services.
Effective: Spring 2005
Prerequisite: fifth-semester standing or above

RPTM 415 **Commercial Recreation Management** (3) Planning, developing, and managing profit-oriented recreation opportunities.
Effective: Spring 2005
Prerequisite: RPTM 210 andRPTM 410

RPTM 420 **Outdoor Recreation Behavior** (3) Overview of participation patterns in outdoor recreatino activities; factors affecting outdoor recreation participation; identification of implications for planning and management.
Effective: Spring 2005
Prerequisite: RPTM 120

RPTM 425 **Principles of Interpretive Materials** (3) Principles, practices, application of non-personal interpretive activities common to natural/cultural history, including exhibits, audio-visual and illustrative materials.
Effective: Spring 2005
Prerequisite: RPTM 325

RPTM 430 (AEE 430) **Environmental Education Methods and Materials** (3) Methods and materials for developing, implementing, and evaluating environmental education programs within formal and non-formal educational settings.
Effective: Spring 2005
Prerequisite: AEE 100 orRPTM 325

RPTM 433W **Program Evaluation and Research in Recreation Services** (3) Systematic, structured problem-solving process for decision making in recreation and parks. Research techniques/evaluation procedures; quantitative, qualitative methodologies; deductive, inductive reasoning.
Effective: Spring 2005
Prerequisite: RPTM 356 3 credits in statistics

RPTM 434 **Recreational Facility Development** (3) Park planning as a role of recreation professionals, emphasizing physical support provisions and elimination of architectural barriers.
Effective: Spring 2005
Prerequisite: RPTM 320

RPTM 435 **Recreation Facilities Planning and Management** (3) Planning and management of selected facilities with empahsis upon maintenance, activity, and support provisions.
Effective: Spring 2005
Prerequisite: fifth-semester standing or above

RPTM 440 **Adventure-based Programming and Administration** (3) Utilization of wilderness/backcountry environments and participant challenge; history, models, theories; survey of organizations; program design, administration; and issues.
Effective: Spring 2005
Prerequisite: or concurrent:RPTM 330 orRPTM 356

RPTM 460 **Political and Legal Aspects of Recreation Services** (3) Role of local, state, federal government in provision of recreation services. Legislative and judicial systems.
Effective: Spring 2005
Prerequisite: RPTM 101

RPTM 470 **Recreation and Park Management** (3 Management of recreation and park services in public/non-profit settings; planning, budgeting fiscal development, resources allocation, decision- , making, computer applications.
Effective: Spring 2005
Prerequisite: RPTM 320

RPTM 476 **Leisure Education in Therapeutic Recreation** (3) Theoretical and practical application of leisure education in the therapeutic recreation process.
Effective: Spring 2005
Prerequisite: RPTM 277 andRPTM 386

RPTM 480 **Senior Management Seminar** (1) Current management issues will be examined relative to professional management strategies, ethics, and leadership in leisure services.
Effective: Spring 2005
Prerequisite: sixth-semester standing in RPTM

RPTM 486 **Facilitation Techniques in Therapeutic Recreation** (3) Intervention strategies, therapeutic approaches, and group facilitation techniques in therapeutic recreation.
Effective: Spring 2005
Prerequisite: RPTM 376 andRPTM 386

RPTM 490 **Management and Issues in Therapeutic Recreation Services** (3) Topics related to management and professional issues in therapeutic recreation services in both clinical and community settings.
Effective: Summer 2004
Prerequisite: RPTM 376 andRPTM 386

RPTM 495A **Internship in Recreation Services** (12) Meet educational objectives through participation in organized practical experience; direct observation and professional supervision in full-time work experience.
Effective: Spring 2005
Prerequisite: RPTM 394 ; seventh-semester standing; 300 hours practical experience; and a 2.0 grade-point average; current and valid certification in advanced first aid and cardiopulmonary resuscitation

RPTM 495B **Internship in Golf Management** (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings.
Effective: Spring 2005
Prerequisite: RPTM 395B ; 2.00 cumulative grade point average; current and valid certification in advanced first aid and cardiopulmonary resuscitation

RPTM 495C **Internship in Golf Management** (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings.
Effective: Spring 2005
Prerequisite: RPTM 495B ; 2.00 cumulative grade point average

RPTM 495D **Internship in Golf Management** (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings.
Effective: Spring 2005
Prerequisite: RPTM 495C ; 2.00 cumulative grade point average

RPTM 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2005

RPTM 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2005

RPTM 497A **International Tourism Field Study - Australia** (4) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 497B **Introduction to Arena Management** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

RPTM 497B **Introduction to Arena Management** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

RPTM 497B **Introduction to Arena Management** (4) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 497C **Outdoor Consortium** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 497D **Ecological Investigations** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

RPTM 497D **Peer Mentoring** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 497E **Outdoor & Experiential Education** (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

RPTM 497E **Outdoor and Experiential Education** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 497F **National Curricular Workshop** (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

RPTM 497F **National Curricula** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 497G **Golf Operations** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 497I **Canoeing Leadership** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

RPTM 497I **Canoe Leadership** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 497J **Peer Mentoring** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

RPTM 497K **Administrative Golf Operation III** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

RPTM 497K **Discovery Trip** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2006

RPTM 498B **Wilderness First Responder Certification** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 498C **National Association of Interpretation Certification Class** (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 498D **Backpacking Leadership** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

RPTM 498D **Backpacking Leadership** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 498F **Rock Climbing Leadership** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

RPTM 498F **Rock Climbing Leadership** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 498G **Player Development/Tournament Golf** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

RPTM 498G **Player Development/Tournament Golf** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 498K **Administration of Golf Operations IV** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 501 **Leisure Studies Foundations** (3) This course provides general background knowledge about the literature and research methods central to the field of leisure studies.
Effective: Spring 2008

RPTM 510 **Tourism Behavior: An interdisciplinary Approach** (3) An exploration of the various approaches that have been taken in the social sciences to understand tourism behavior.
Effective: Spring 2008
Prerequisite: 3 credits in statistics; 3 credits in behavioral science

RPTM 515 **Program Development and Evaluation** (3) Critical analysis of political and social determinants of recreation program development; research and evaluation procedures.
Effective: Spring 2008

RPTM 525 **Behavioral Patterns of the Outdoor Recreationist** (3) Patterns of time and space use; user characteristics; meaning of participation; facilitation of environment-use enhancement.
Effective: Spring 2008

RPTM 527 **Social Psychology of Leisure** (3) Application of the methods, constructs, and theory of social psychology to the study of leisure, outdoor recreation, and therapeutic recreation.
Effective: Spring 2008
Prerequisite: PSYCH 420, SOC 403

RPTM 530 **Research Methods in Leisure Studies** (3) Research techniques, including methods, research design, techniques for data collection, as applied to relevant problems in the leisure studies field.
Effective: Spring 2008

RPTM 533 **Leisure Studies, Surveys, and Appraisals** (3) Advanced procedures related to leisure, recreation, and park research.
Effective: Spring 2008
Prerequisite: RPTM 530 ; 3 credits in statistics

RPTM 540 **Public and Private Recreation Lands and Waters** (3) Public and private roles and interactions, allocation of resources, use policies, open space concepts, private enterprise developments, legal controls.
Effective: Spring 2008

RPTM 545 **Philosophical and Social Bases of Leisure** (3) Philosophical and social bases of leisure; analysis of critical issues of leisure for philosophical and social implications.
Effective: Spring 2008

RPTM 550 **Seminar in Leisure Studies** (1-6) No description.
Effective: Spring 2008

RPTM 560 **Administrative Problems of Leisure Service Organizations** (3) Special problems of recreation and park departments; legal powers and liability; departmental organization, financing, personnel policies, and staff development.
Effective: Spring 2008

RPTM 570 **Conceptual Bases for Therapeutic Recreation** (3) Issues in the application of concepts in therapeutic recreation from a multidisciplinary perspective; evaluation and research.
Effective: Spring 2008
Prerequisite: R P M 477

RPTM 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2008

RPTM 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2008

RPTM 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2008

RPTM 597A **Foundations of Tourism** (3) Formal courses given on a topical or special interest subject which may be

offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

RPTM 597A **Leisure, Health and Wellness** (3) Addresses the role of leisure on physical, cognitive, mental, social, and spiritual health.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 597B **Scholarly Writing in RPTM** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 597D **World Views, Sustainability and Environmental Education** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

RPTM 600 **Thesis Research** (1-15) No description.
Effective: Spring 2008

RPTM 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Spring 2008

RPTM 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Spring 2010

RPTM 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Spring 2008

RPTM 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Spring 2008

Last Import from UCM: July 10, 2010 3:00 AM

Rehab & Human Servic (RHS)

RHS 400W **Case Management and Communication Skills** (3) Principles and practices of obtaining, recording, evaluating, and utilizing case data in rehabilitation planning; implementation of rehabilitation plans.
Effective: Spring 2009
Prerequisite: RHS 300

RHS 401 **Community Mental Health Practice and Services** (3) Community mental health roles, historical points, current trends, and ethical standards; funding and impact on service provision.
Effective: Spring 2009
Prerequisite: 6 credits in psychology and/or sociology

RHS 402 **Children and Families in Rehabilitation Settings and Human Services** (3) Contemporary family issues, child development, legal considerations, cultural and familial factors within rehabilitation and human services practice will be addressed.
Effective: Summer 2008
Prerequisite: RHS 301

RHS 403 **Medical Aspects of Disability** (3) Common disabling illnesses, injuries, and congenital defects; their symptomatology, prognosis, and treatment; implications for personal, social, and vocational adjustment.
Effective: Spring 2009
Prerequisite: 6 credits in psychology and/or sociology

RHS 495A **Rehabilitation and Human Services Internship** (15) Full-time practicum in rehabilitation and related human services agencies and institutions providing psychosocial, vocational, educational, and/or residential services to people with disabilities.
Effective: Spring 2009
Prerequisite: students must have successfully completed all other required coursework for the major (grade of "C" or higher) as well as fulfilled general education requirements.

RHS 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2008

RHS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical of of special interest.
Effective: Summer 2008

RHS 497A **Foundations of Addictions Counseling** (3) Study of the fundamental principles of counseling individuals with a wide variety of addictions.
Effective: Summer 2010 Ending: Summer 2010

RHS 497A **Rehabilitation in Corrections** (3) An overview of rehabilitation in different correctional settings focusing on the history, classification, risk assessment, intervention strategies and community reentry.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

Last Import from UCM: July 10, 2010 3:00 AM

Rehabilitation (REHAB)

REHAB 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2003

Last Import from UCM: July 10, 2010 3:00 AM

Religious Studies (RL ST)

RL ST 400 **Theories of Religion** (3) Comparative and interdisciplinary study of two or more systematic theories of religion: anthropological, psychological, sociological, philosophical/theological.
Effective: Fall 1983
Prerequisite: 6 credits in religious studies or seventh-semester standing

RL ST 401 (IL) **Studies in Comparative Religion** (3) An intensive study of comparable phenomena from two or more religious traditions.
Effective: Spring 2006
Prerequisite: 6 credits in religious studies

RL ST 402 **Contemporary Religious Thought** (3) Writings of outstanding contemporary religious thinkers in the Jewish, Protestant, and Roman Catholic traditions and their impact on our culture.
Effective: Fall 1983
Prerequisite: 6 credits in humanities

RL ST 407Y (IL) (HIST 409Y, J ST 409Y) **European Anti-Semitism from Antiquity to the Present** (3) Surveys the history of anti-Semitism in Europe from antiquity through the Middle Ages to the present.
Effective: Summer 2005

RL ST 408 (US;IL) **Hindu Studies** (3) Special topics in Hindu studies.
Effective: Summer 2005
Prerequisite: 3 credits in religious studies

RL ST 409 (US;IL) **Buddhist Studies** (3) Special topics in Buddhist studies.
Effective: Spring 2006
Prerequisite: 3 credits in religious studies

RL ST 410 (US;IL) (HIST 410, J ST 410) **Jews in the Medieval World** (3) Trends in medieval Jewish society under Islam and Western Christendom.
Effective: Spring 2006

RL ST 411 (US;IL) (J ST 411) **Jewish Studies** (3) Study of the life and thought of a particular period or movement in the history of Judaism.
Effective: Spring 2006
Prerequisite: 3 credits in religious studies

RL ST 412 (J ST 412) **American Judaism** (3) The development of Jewish religion and culture in America from the colonial era to the present.
Effective: Summer 1999
Prerequisite: HEBR 010 orJ ST 010

RL ST 414 (PSYCH 436) **Humanistic, Existential, and Religious Approaches to Psychology** (3) Existential, humanistic, and religious approaches to the psychology of experience, consciousness, and will.
Effective: Spring 2007
Prerequisite: PSYCH 100 orRL ST 001

RL ST 420 **Major Christian Thinkers** (3) Systematic inquiry into the religious thought of one or more Christian thinkers, such as Paul, Augustine, Luther, Calvin, Kierkegaard, or Tillich.
Effective: Fall 1983
Prerequisite: 3 credits in religious studies

RL ST 422 (AM ST 422) **Religion and American Culture** (3 per semester/maximum of 6) Selected topics, problems, or historical movements in American religion. Relation between religion and American culture.
Effective: Summer 1996

RL ST 424H (HIST 424H, J ST 424H, PHIL 434H) **Monotheism and the Birth of the West** (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.
Effective: Spring 2002
Prerequisite: RL ST 004, RL ST 102, RL ST 110 orRL ST 120

RL ST 440Y (US;IL) (RUS 440Y) **The Orthodox Christian Tradition** (3) History, culture, and beliefs of the Eastern Orthodox religious tradition with special reference to Russia.
Effective: Spring 2006
Prerequisite: RL ST 004, RL ST 124, RL ST 125, RUS 100 orRUS 110

RL ST 461 (US;IL) (SOC 461) **Sociology of Religion** (3) Contemporary religion in the United States: beliefs, structure, and function of major denominations and religious cults.
Effective: Spring 2006
Prerequisite: 3 credits of sociology or religious studies

RL ST 471Y (IL) (HIST 471Y) **Classical Islamic Civilization, 600-1258** (3) Pre-Islamic Arabia; Muhammad; Arab conquest; Islamic beliefs and institutions; literary, artistic, and scientific achievements; relations with Europe; breakdown of unity.

Effective: Spring 2006

RL ST 478 (J ST 478, PHIL 478) **Ethics After the Holocaust** (3) Explores the philosophical effects of the Holocaust for thinking about the primary question: Is ethics possible?
Effective: Spring 2005
Prerequisite: one course in Jewish Studies or Philosophy

RL ST 479 **Religion and Culture in Freudian Thought** (3) Readings, lectures, and discussion on major psychoanalytic claims about individual and cultural mental life, focusing on the theory of religion.
Effective: Spring 2007
Prerequisite: PSYCH 100

RL ST 481 (IL) **Religion and Japanese Culture** (3) A study of the impact of the traditional religions, Shinto and Buddhism, on the intellectual and cultural history of Japan.
Effective: Spring 2006
Prerequisite: 3 credits fromHIST 172, HIST 173, HIST 174, HIST 175, PHIL 111, RL ST 003, RL ST 104 orRL ST 181

RL ST 483 (IL) **Zen Buddhism** (3) The development and current state of Zen Buddhist thought and practice.
Effective: Spring 2006
Prerequisite: HIST 172, HIST 173, HIST 174, HIST 175, PHIL 111, RL ST 003, RL ST 104 orRL ST 181

RL ST 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

RL ST 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

RL ST 495 **Internship** (1-18) Supervised off-campus, non-group instruction, including field experience, practica, or internships.
Effective: Summer 2004
Prerequisite: prior approval of proposed assignment by instructor

RL ST 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

RL ST 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

RL ST 497B (J ST 497B) **Cultural History of Food From Biblical Times to the Modern Era** (3) Historical exploration of the Jewish food traditions in the Bible as they now find expression in modern "food movements."
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

RL ST 499 (IL) **Foreign Study--Religious Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

RL ST 499E (IL) (HIST 499E, CAMS 499E) **Petra, the Spice Route, and the Decapolis Cities in Roman Palestine** (3) Study tour of Roman Palestine and the Nabateans in Jordan and Israel.
Effective: Summer 2010 Ending: Summer 2010

RL ST 510 (HIST 510) **Topics in Medieval Church History** (3 per semester, maximum of 6) Institutional and doctrinal development of the Christian Church in medieval Europe.
Effective: Spring 1995

RL ST 560 (HIST 560) **Topics in American Religion** (3 per semester, maximum of 6) The social, political, and intellectual contexts of American religious thought.
Effective: Spring 1995

RL ST 561 (HIST 561) **Topics in Western Religion** (3 per semester, maximum of 6) Major issues and themes in the historical development of Christianity and Judaism.
Effective: Spring 1995

RL ST 562 (HIST 562) **Topics in Comparative Religions** (3 per semester, maximum of 6) Comparative studies of world religions.
Effective: Spring 1995

RL ST 563 (HIST 563) **Religion and Society** (3 per semester, maximum of 6) Social and political implications of religious belief and practice.
Effective: Summer 1994

RL ST 564 (HIST 564) **Topics in Asian Religions** (3 per semester, maximum of 6) Topics in Asian religions.
Effective: Spring 1995

RL ST 565 (HIST 565) **Research in Religious Studies** (3) Approaches and methodologies in the critical study of religion.
Effective: Summer 1995

RL ST 566 (HIST 566) **Islamic Studies** (3) Studies in Islamic history, historiography, theology, law, and religious life.
Effective: Spring 1997

RL ST 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

RL ST 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

RL ST 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

RL ST 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2002

RL ST 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Rural Sociology (R SOC)

R SOC 402 **Consumer Behavior and Agricultural Business** (3) The principles of consumer behavior applied to the marketing of agricultural products and farm supplies.
Effective: Winter 1980
Prerequisite: 3 credits in agricultural economics or economics and 3 credits in rural sociology sociology or psychology

R SOC 417 (CED 417) **Power, Conflict, and Community Decision Making** (3) Impact of institutions on human interdependence and behavior, the structure of power, and community decision making and public policy.
Effective: Spring 2010
Prerequisite: R SOC 011 orSOC 001

R SOC 420 (US;IL) (CED 420, WMNST 420) **Women in Developing Countries** (3) Analysis of women's work, experiences, and development policies and practices in Africa, Asia, and Latin America.
Effective: Fall 2009

R SOC 422 (US) **Family in Rural Society** (3) The relationship between the family and rural society, including critical review of theories, research and problems, issues, and trends.
Effective: Spring 2006
Prerequisite: 6 credits in the social sciences

R SOC 425 **Poverty Analysis: People and Programs** (3) Social and economic situations contributing to deprivation in rural society; intervention programs and policy development.
Effective: Winter 1978
Prerequisite: 6 credits in sociology economics or related areas

R SOC 444 **Social Change in Rural America** (3) Analysis of causes of social change and its consequences for individuals, families, and organizations in rural communities.
Effective: Fall 1984
Prerequisite: R SOC 011 or 3 credits in related social science

R SOC 452 (CEDEV 452) **Rural Organization** (3) Social organization and change in rural communities; use of sociological principles in analysis of rural problems and rural development.
Effective: Fall 2000
Prerequisite: 6 credits in rural sociology sociology or psychology

R SOC 470 (CEDEV 470) **Comparative Community Development** (3) Crosscultural community development projects and the problems encountered in each of the different cultural contexts.
Effective: Spring 2001 Ending: Summer 2010
Prerequisite: 6 credits in social or behavioral science

R SOC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

R SOC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

R SOC 499 (IL) **Foreign Study--Rural Sociology** (1-12) Study in selected countries of rural social institutions and current rural sociological problems.
Effective: Summer 2005

R SOC 501 **Development of Rural Sociology** (3) Historical development with emphasis on American rural sociology. Odd years.
Effective: Fall 1985

R SOC 502 **Use of Theory in Rural Sociology** (3) Examine and evaluate metasociology of alternative theoretical systems applicable to rural society, with emphasis on American society.
Effective: Fall 1983
Prerequisite: 24 credits in sociology including 6 in rural sociology and 3 in sociological theory

R SOC 505 (CEDEV 505, AEE 505) **Leadership Development** (3) Exploration, understanding, and application of leadership roles, strategies, and principles in group and community settings.
Effective: Spring 2010

R SOC 508 **Sociology of Agriculture** (3) Sociological analysis of changes in the organization of agriculture and food systems in the United States and developing countries.
Effective: Summer 1992

R SOC 515 (AEE 515) **Engagement Through Outreach Scholarship in Higher Education** (3) To develop an understanding of outreach scholarship as a nonformal educational system and its relationship to relevant social systems.
Effective: Summer 2002
Prerequisite: 9 credits in education communication and/or social sciences

R SOC 516 (CEDEV 516) **Change in Rural Society** (3) Social change in rural society, emphasizing prediction and control of the change process. Even years.
Effective: Fall 2000

R SOC 517 (CEDEV 517) **International Rural Social Change** (3) Implications of planned change for international rural societies, considering basic structural constraints, known institutional linkages, and potential synergetic consequences.
Effective: Fall 2000

R SOC 520 (SOC 520) **Applied Sociological and Policy Research** (3) A survey of the conceptual and methodological issues in applied sociology and policy research conducted by sociologists.
Effective: Fall 2001
Prerequisite: SOC 573

R SOC 522 **Data Analysis in Rural Sociology** (1) Analysis of research data in rural sociology using computer library programs.
Effective: Fall 1987
Prerequisite: or concurrent:AG 400

R SOC 525 **Fertility, Population Change, and Development** (3) Fertility and population growth in less-developed countries; theories of fertility change, agricultural development, and population policies.
Effective: Summer 1987
Prerequisite: SOC 423 or prior work in population

R SOC 530 **Sociology and Demography of Poverty in the United States** (3) An in-depth treatment of sociological and demographic dimensions of poverty in rural and urban areas of the United States.
Effective: Spring 1998

R SOC 552 **Theoretical Frameworks for Rural Community Research** (3) Application of community theories to the study of communities in rural areas.
Effective: Summer 2000
Prerequisite: R SOC 452

R SOC 555 (S T S 555) **Human Dimensions of Natural Resources** (3) Identification of the interrelationships and influence of human behavior and natural resources.
Effective: Spring 1999

R SOC 573 **Methods of Survey Data Analysis** (3) Use of multivariate procedures in the analysis of survey data in the rural social sciences.
Effective: Spring 1988
Prerequisite: AG 400

R SOC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

R SOC 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

R SOC 597A **Data Analysis** (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2010 Ending: Summer 2010

R SOC 597A **Issues in Data Analysis** (1-3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

R SOC 597C **Qualitative Methods** (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

R SOC 597E **Contemporary Social Theory** (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

R SOC 600 **Thesis Research** (1-15) No description.

Effective: Fall 1983

R SOC 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

R SOC 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Provides advanced standing graduate students from a research oriented curriculum the opportunity to receive experience/supervision in resident instruction in higher education.
Effective: Fall 1983

R SOC 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

R SOC 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

1 Students may take only one course for General Education credit from R SOC 011 GS or SOC 001 GS.

Last Import from UCM: July 10, 2010 3:00 AM

Russian (RUS)

RUS 400 (IL) **Senior Seminar in Russian Culture** (3) Senior seminar devoted to topics in Russian culture; conducted in Russian.
Effective: Spring 2006
Prerequisite: RUS 204, RUS 214, RUS 304

RUS 412 (IL) **Russian Translation** (3 per semester/maximum of 6) Translation from Russian into English of complex texts from the humanities, social sciences, and technical fields.
Effective: Spring 2006
Prerequisite: 9 credits of Russian at the 200 level or higher

RUS 426 (IL) **Dostoevsky** (3) Study of representative works by Dostoevsky in the original Russian.
Effective: Spring 2006
Prerequisite: 9 credits of Russian at the 200 level or higher

RUS 427 (IL) **Tolstoy** (3) Study of representative works by Tolstoy in the original Russian.
Effective: Spring 2006
Prerequisite: 9 credits of Russian at the 200 level or higher

RUS 430 **Methods and Materials for Teaching Russian** (3) Research, analysis, and demonstration of pedagogical problems in the teaching of Russian.
Effective: Fall 1987
Prerequisite: LING 100, 9 credits of Russian at the 200 level or higher

RUS 440Y (US;IL) (RL ST 440Y) **The Orthodox Christian Tradition** (3) History, culture, and beliefs of the Eastern Orthodox religious tradition with special reference to Russia.
Effective: Spring 2006
Prerequisite: RL ST 004, RL ST 124, RL ST 125, RUS 100 orRUS 110

RUS 450 (IL) **History of the Russian Language** (3) Relationship of Russian to other Indo-European languages and changes within Russian from the time of the earliest records to the present.
Effective: Spring 2006
Prerequisite: 9 credits of Russian at the 200 level or higher

RUS 460 (IL) **Linguistic Analysis of Contemporary Russian** (3) Detailed study of the phonology, morphology, and syntax of Modern Standard Russian and the major dialects.
Effective: Spring 2006
Prerequisite: 9 credits of Russian at the 200 level or higher

RUS 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

RUS 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

RUS 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

RUS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

RUS 497A (IL) **Great Works of Short Russian Fiction** (3) A survey of great short works of Russian fiction from the 18th century to the present day, read in Russian.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

RUS 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

RUS 501 **Readings in Russian Literature** (3-6) No description.
Effective: Spring 1987
Prerequisite: RUS 204

RUS 525 **Pushkin** (3) Pushkin's significance in Russian literature; his relation to other European literatures; Eugene Onegin and selected shorter works.
Effective: Winter 1978

RUS 530 **Seminar in Nineteenth-Century Russian Literature and Culture** (3 per semester/maximum of 6) Major issues in nineteenth-century literature and culture (novel and social thought, the short story, drama before Chekhov, and others).
Effective: Spring 1998
Prerequisite: RUS 304, RUS 400

RUS 540 **Eighteenth-Century Russian Literature** (3) Study of the major writers and literary developments in this period of the secularization and modernization of Russian literature.
Effective: Winter 1978

RUS 542 **Seminar in Twentieth-Century Russian Literature** (3-6) Major works and issues in Twentieth-century Russian literature and culture.
Effective: Fall 1997
Prerequisite: RUS 304 orRUS 440

RUS 560 **History of the Russian Literary Language** (3) Historical development of the Russian literary language and tradition.
Effective: Spring 1998
Prerequisite: RUS 304, RUS 360

RUS 570 **Old Russian Literature** (3) Analysis of Russian literary monuments in the original, 1100-1700.
Effective: Winter 1978
Prerequisite: SLAV 550

RUS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2001

RUS 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

RUS 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching RUS 001, 002, or 003 under the supervision of a full-time faculty member.
Effective: Fall 1983

RUS 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

Last Import from UCM: July 10, 2010 3:00 AM

School Psychology (S PSY)

S PSY 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1990

S PSY 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1990

S PSY 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

S PSY 500 **Professional Issues in School Psychology** (1-3) Orientation to the field through study of unique problems, current issues, ethical and legal matters, unique cases, and research projects.
Effective: Summer 1990

S PSY 510 **Supervision of Pupil Service Personnel** (1-10) Program supervision and professional leadership in university clinics and school systems.
Effective: Summer 1990
Prerequisite: S PSY 595A

S PSY 530 **Psychoeducational Interventions** (3) Development of empirically validated psychoeducational interventions for academic and behavioral problems experienced in school by children and adolescents.
Effective: Fall 2003

S PSY 535 **School-Based Psychological Interventions for Children and Youth** (3) Development of empirically supported psychological and psychoeducational interventions for behavioral and emotional concerns among school-aged children.
Effective: Spring 2007
Prerequisite: EDPSY 450, EDPSY 475, PSYCH 461

S PSY 543 (CN ED 543) **Prevention** (3) Addresses prevention program development, implementation, and evaluation, along with theoretical and empirical underpinnings, ethical, and multicultural issues related to prevention.
Effective: Spring 2003

S PSY 554 **Psychological and Educational Evaluation of Exceptional Children** (3) Administration and interpretation of individual tests other than the Stanford- Binet, WISC, WAIS.
Effective: Summer 1990
Prerequisite: S PSY 559

S PSY 556 **Psychological Assessment of Preschool and School-Aged Children** (2) Study of cognitive/affective tests; use of systems--analytic, multivariate statistical, actuarial methods of data combination in decision-making processes.
Effective: Summer 1990
Prerequisite: EDPSY 400, EDPSY 450;EDPSY 554 orS PSY 559

S PSY 559 (PSY 559) **The Individual Psychological Examination** (3) Demonstrations and practice in widely used ability and aptitude tests; psychological report writing.
Effective: Summer 1990
Prerequisite: 15 credits in psychology and a course in measurement

S PSY 561 **Consultation in Educational Settings** (3) Prepares students to consult with teachers, administrators, parents, and other professionals about academic, behavioral, social-emotional, and programmatic issues.
Effective: Spring 2000
Prerequisite: EDPSY 450, SPLED 401

S PSY 595A **Practicum in School Psychology** (1-6) Clinical experience with children under supervision in a variety of settings requiring service, including practice in synthesizing data and observations.
Effective: Spring 1997
Prerequisite: PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check. (Forms: 228 Chambers)

S PSY 595B **Internship in School Psychology** (1-10) Long-term placement in settings providing work for school psychologists with children, parents, teachers, administrators, and service agencies, under supervision.
Effective: Spring 1997
Prerequisite: PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check. (Forms: 228 Chambers)

S PSY 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1990

S PSY 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject that may be offered infrequently; several different topics may be taught in one year or semester. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes, A, B, etc.
Effective: Fall 2003

S PSY 597C **Special Education Law & School Change** (3) This course will provide a basic framework of how school systems operate in order to help school psychologists and other potential school leaders effect change.
Effective: Summer 2010 Ending: Summer 2010

S PSY 600 **Thesis Research** (1-15) No description.
Effective: Summer 1990

S PSY 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 1990

S PSY 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 1990

S PSY 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Summer 1990

Last Import from UCM: July 10, 2010 3:00 AM

School of Science, Engineering, and Technology (SSET)

SSET 495 **Internship** (1-18) Supervised off-campus, individual training including practical field experiences of internships where written and oral critique of the activity is required.
Effective: Summer 2003
Prerequisite: prior approval of the proposed assignement by the program

Last Import from UCM: July 10, 2010 3:00 AM

Science (SC)

SC 400 **Consequences of Science** (1) A series of lecture/discussions in which science faculty members show the social implications of their research specialty.
Effective: Winter 1978

SC 401 **Basic Science and Disease** (1) Clinical aspects of various disease and how basic scientific information contributes towards understanding and treating disease.
Effective: Summer 2008
Prerequisite: 4th semester standing or higher standing plus 3 credits in biology and 3 credits in chemistry

SC 494 **Research Project Courses** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1994

SC 494H **Research Project Courses** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

SC 495 **Science Co-op Work Experience III** (1-3) A supervised work experience where the student is employed in a scientific position. To be offered for SA/UN grading.
Effective: Spring 2007
Prerequisite: SC 395

SC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1996

SC 497C **Corporate Organizations, Opportunities, and Expectations** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

SC 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 1997

SC 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1996

Last Import from UCM: July 10, 2010 3:00 AM

Science Education (SCIED)

SCIED 410 **Using Technology to Enhance Science Teaching** (3) This course explores contemporary practice and research associated with applications of technology to enhance science learning and teaching.
Effective: Summer 2000
Prerequisite: admission to one of the science teaching options in SECED

SCIED 411 **Teaching Secondary Science I** (3) Introduction to teaching secondary school science, including curriculum, learning theory, media, evaluation as they relate to student progress.
Effective: Spring 1994
Prerequisite: C I 295 ; appropriate courses for certification option and approval of department

SCIED 412 **Teaching Secondary Science II** (3) Implementation of science instruction using a variety of modern approaches.
Effective: Spring 2001
Prerequisite: SCIED 410, SCIED 411 Concurrent: C I 412W

SCIED 454 **Science in Early Childhood Education** (3) Philosophy, techniques, materials, and evaluation in teaching science to young children (N-3); a briefing of science concepts for young children.
Effective: Winter 1978

SCIED 455 **Field Natural History for Teachers** (3) Ecologically oriented field study course to provide teachers with basic knowledge of natural science resources in school environments.
Effective: Winter 1978
Prerequisite: 3 credits in biological science

SCIED 457 **Environmental Science Education** (3) Philosophy, techniqus, and skills for teaching environmental science, including curriculum development, fieldwork, and the use of appropriate technologies.
Effective: Fall 2003
Prerequisite: 3 credits of calculus 9 credits of sciences 400-level teaching methods course

SCIED 458 **Teaching Science in the Elementary School** (3) Interpreting children's science experiences and guiding development of their scientific concepts; a briefing of science content material and its use.
Effective: Spring 2007
Prerequisite: LL ED 400, LL ED 401, LL ED 402, PSYCH 212 three credits each in biological earth and physical sciences
Concurrent: C I 495A OR C I 495B ; MTHED 420 SS ED 430W

SCIED 470 **Selected Studies in Science Education** (1-6) Intensive work on particular issues, trends, or developments in science education for elementary and secondary school teachers.
Effective: Winter 1978
Prerequisite: Instructional I certification and teaching experience

SCIED 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

SCIED 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

SCIED 497A **Global Climate Change for Educators** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SCIED 497C **Robotics for Elementary Teachers** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SCIED 497D **Insect Connections for Educators** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SCIED 497F (ENGR 497F) **Fundamentals of Science, Technology & Engineering** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SCIED 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

SCIED 498A **School of Fish - Fish Biology Concepts and Aquatic Wildlife Ecosystems (K-12)** (1) Participants will learn about the affect of human interaction on the environment.
Effective: Summer 2010 Ending: Summer 2010

SCIED 498B **Developing Natural Gas in the Classroom** (1) Students will learn the affect of human interaction (i.e., natural gas development) on the environment, especially our water resources and ways to preserve and protect our natural resources.
Effective: Summer 2010 Ending: Summer 2010

SCIED 551 **History, Philosophy, & Sociology of Science and Science Teaching** (3) Examination of the implications of history, philosophy, and sociology of science for science teaching.
Effective: Summer 2006
Prerequisite: graduate standing

SCIED 552 **Science Teaching and Learning** (3) Exploration of the theoretical and empirical foundations of the teaching and learning of science.
Effective: Summer 2009

SCIED 556 **The Supervision of Science Curriculum** (3) Supervision of elementary and secondary science teachers as they develop K-12 programs in the public schools.
Effective: Winter 1978
Prerequisite: 6 credits in science methods 20 credits in science or equivalent and teaching experience

SCIED 558 **Research Problems in Science Teaching** (3) Problems and research dealing with curriculum, materials, evaluation, and supervision of science teaching and learning.
Effective: Fall 1983
Prerequisite: SCIED 412 orSCIED 458 ; teaching experience

SCIED 559 **Analysis of Instruction in Elementary Science Education** (3) Analysis of the history, issues, trends, and research in elementary science education.
Effective: Winter 1978
Prerequisite: teaching experience 3 credits in elementary science methods and 18 credits of science courses

SCIED 590 **Colloquium** (1-3) continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1992

SCIED 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

SCIED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

SCIED 597A **Readings in SCIED** (1-3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2010 Ending: Summer 2010

SCIED 597B **SCIED Projects** (3-6) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2010 Ending: Summer 2010

SCIED 597C **Computer Tools for Inquiry-based Science Teaching** (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2010 Ending: Summer 2010

SCIED 597C **Science Education Curriculum** (3) An overview of history and research on curriculum in science education. Includes curriculum development and analysis, current research on inquiry- based curriculum, influence of state and national standards, learning progressions and diversity perspectives.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

Last Import from UCM: July 10, 2010 3:00 AM

Science, Engineering, and Technology (SE&T)

SE&T 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1992

Last Import from UCM: July 10, 2010 3:00 AM

Science, Technology, and Society (S T S)

S T S 407 (PHIL 407) **Technology and Human Values** (3) Interrelationships of twentieth-century technological change and human values. Emphasis on the social and ethical aspects of technological progress.
Effective: Spring 1999
Prerequisite: 9 credits in philosophy includingPHIL 107 or 6 credits of philosophy at the 200 level

S T S 408 (COMM 408) **Cultural Foundations of Communications** (3) Examination of oral, scribal, print, industrial and electronic cultures; analysis of impact of technology on communications and social structure.
Effective: Spring 2009
Prerequisite: select 3 credits fromCOMM 100, COMM 110, COMM 118, COMM 150, COMM 180, COMM 251, COMM 260W, COMM 320, COMM 370 ; or 3 credits of S T S

S T S 416 (US;IL) (AAA S 416, WMNST 416) **Race, Gender and Science** (3) The class will focus on race and gender as products of science, and how societal values shape scientific activity.
Effective: Summer 2008
Prerequisite: 6 credits in S T S WMNST or AAA S

S T S 420 (EM SC 420, SOC 420) **Energy and Modern Society** (3) Technology and economics of energy resources, production, and consumption; environmental factors, exhaustion, new technology.
Effective: Spring 1991

S T S 427W (CED 427W, SOC 427W) **Society and Natural Resources** (3) Analysis of the relationship between societal development and enhancement and natural resources.
Effective: Summer 2008
Prerequisite: R SOC 011 orSOC 001

S T S 428 (IL) (HIST 428) **The Darwinian Revolution** (3) The origins and implications of evolutionary theory.
Effective: Spring 2006
Prerequisite: An introductory Science course and a history course.

S T S 430 (IL) (NUTR 430) **Global Food Strategies: Problems and Prospects for Reducing World Hunger** (3) Technological, social, and political solutions to providing basic food needs; food resources, population, and the environment; current issues.
Effective: Summer 2005

S T S 432 (PHIL 432) **Medical and Health Care Ethics** (3) Examines ethical, political, and social issues in the research, implementation, and practice of medicine, medical technologies, and healthcare.
Effective: Fall 1998
Prerequisite: fifth-semester standing

S T S 433 (PHIL 433) **Ethics in Science and Engineering** (3) Ethical issues arising in the practice of science and engineering and their philosophical analysis.
Effective: Fall 1995

S T S 435 (PHIL 435) **The Interrelation of Science, Philosophy, and Religion** (3) The historical and transformative interactions between science and Western philosophical and religious views of nature, humanity, and God.
Effective: Spring 1996

S T S 457 (US;IL) (HIST 457, WMNST 457) **The History of Women in Science** (3) Critical analysis of the role women, gender, and minorities have played in the natural sciences.
Effective: Spring 2006
Prerequisite: HIST 116, HIST 117, WMNST 001, WMNST 003 orWMNST 005

S T S 460 (PL SC 460) **Science, Technology, and Public Policy** (3) The all-pervasive importance of science and technology policy in modern societies and mechanisms and processes by which it is made.
Effective: Spring 1995
Prerequisite: three credits in Natural Sciences or Engineering three credits in Social and Behavioral Sciences

S T S 470 **Technology Assessment and Transfer** (3) Nature of technology assessment and technology transfer in product design and development process from federal and university labs, and internationally.
Effective: Summer 1996

S T S 471 **Radiation, Reactors, and Society** (3) Societal problems and benefits associated with nuclear power, including energy needs, radiation effects, safety, and thermal effects.
Effective: Spring 1991

S T S 476 **Technology and War** (3) A survey and analysis of the interaction of technology, ethics, and warfare in the past and present society.
Effective: Summer 2007

S T S 490 **Peace and Conflict Studies Seminar** (3) Advanced study of major contemporary issues of peace and conflict; includes anthropological, technological, psychological, and economic perspectives.
Effective: Fall 1994
Prerequisite: PL SC 014, S T S 090

S T S 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1992

S T S 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

S T S 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1991

S T S 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1991

S T S 497A **Representing Nanotechnology** (3) This is an advanced rhetoric of science and technology course with an emphasis on nanotechnology, with the nanofab facility serving as our field site.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

S T S 497G (NUTR 497G) **Community Food Security** (3) Through active learning, students explore how communities can reshape food systems, increasing access to wholesome food while increasing economic opportunities.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

S T S 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

S T S 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

S T S 500 **Integrating Science and Technology Into Society** (3) Interdisciplinary analysis of critical issues for science, technology, and society.
Effective: Spring 1991
Prerequisite: Graduate standing at Penn State

S T S 555 (R SOC 555) **Human Dimensions of Natural Resources** (3) Identification of the interrelationships and influence of human behavior and natural resources.
Effective: Summer 1998

S T S 589 **Ethics and Values in Science and Technology** (3) Study interrelationships of 20th century technological change and human values with emphasis on social and ethical aspects of technological progress.
Effective: Summer 1994

S T S 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1991
Prerequisite: Graduate standing at Penn State

S T S 591 **Research and Writing in Science, Technology, and Society** (3) Overview of current research in STS with training on doing STS research and preparing research reports for publication.
Effective: Summer 1994
Prerequisite: second-semester graduate standing

S T S 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Spring 1991

S T S 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1994

S T S 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered

infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1991
Prerequisite: Graduate standing at Penn State

Last Import from UCM: July 10, 2010 3:00 AM

Security & Rsk Analy (SRA)

SRA 468 **Visual Analytics for Security Intelligence** (3) Introduce visual analytic techniques for security informatics and intelligence. It covers analytical techniques on visualizing threats, risk, and vulnerability.
Effective: Spring 2008
Prerequisite: IST 110, SRA 111

SRA 471 **Informatics, Risk, and the Post-Modern World** (3) Provides in-depth study of how security informatics is influenced by the risk and post-modern culture.
Effective: Spring 2008
Prerequisite: IST 110, SRA 231

SRA 472 **Integration of Privacy and Security** (3) Exploration of technological, operational, organizational and regulatory issues related to maintenance of individual privacy, confidentiality of organizations, and information protection.
Effective: Spring 2008
Prerequisite: SRA 211 orSRA 221 or equivalent

SRA 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2007

SRA 497A **Statistical Analysis for Information Sciences** (3) Intermediate-level statistics course emphasizing understanding hypothesis testing and experimental design, a broad array of statistical techniques applied to data analysis, and computer tools to support testing and analysis; specifically applied to information sciences and technology applications.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

Last Import from UCM: July 10, 2010 3:00 AM

Serbo-Croatian (S CR)

S CR 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

S CR 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

S CR 499 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: July 10, 2010 3:00 AM

Slavic (SLAV)

SLAV 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

SLAV 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

SLAV 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998

SLAV 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

SLAV 500 **Bibliography and Research Techniques** (3) Tools and methods of research, designed for students preparing to do independent investigation of problems in Slavic languages and literatures.
Effective: Winter 1978

SLAV 510 **Structure of the South Slavic and West Slavic Languages** (3-12; 3 credits per language) Linguistic analysis of a particular South Slavic (Bulgarian, Macedonian, Serbo-Croatian, Slovenian) or West Slavic (Czech, Lusatian, Polish, Slovak) language.
Effective: Spring 1987
Prerequisite: RUS 460 or one graduate course in linguistics

SLAV 550 **Old Church Slavic** (3) Reading and study of that corpus of religious and liturgical documents representing the first written records of a Slavic tongue.
Effective: Winter 1978

Last Import from UCM: July 10, 2010 3:00 AM

Social Science (SO SC)

SO SC 480W **Quantitative Methods in the Social Sciences** (4) Students will learn to conduct, analyze and write up quantitative social scientific research according to appropriate professional standards.
Effective: Spring 2008
Prerequisite: permission of program

SO SC 481 **Qualitative Research Methods in the Social Sciences** (4) Students will learn how to conduct, analyze and write up qualitative social research according to appropriate professional standards.
Effective: Spring 2008
Prerequisite: permission of program

SO SC 492 **Current Topics in the Social Sciences** (3) This course allows for various current topics to be offered as suitable to the needs of the program.
Effective: Spring 2008
Prerequisite: permission of program

SO SC 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2008

SO SC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2008

Last Import from UCM: July 10, 2010 3:00 AM

Social Studies Education (SS ED)

SS ED 411 **Teaching Secondary Social Studies I** (3) Teaching social studies, including individual differences, curricular overview, application of learning theories, identification and measurement of learning outcomes.
Effective: Spring 1996
Prerequisite: ANTH 045, C I 295, HIST 020, HIST 021, PL SC 001 ; 12 credits from history and/or geography and/or sociology and/or economics

SS ED 412W **Teaching Secondary Social Studies II** (3) Writing-intensive course focusing on study of the social studies teacher's role in planning instruction; strategies for teaching.
Effective: Summer 2010
Prerequisite: SS ED 411 Concurrent: C I 412W

SS ED 430W **Teaching Social Studies in the Elementary Grades** (3) Principles underlying use of social studies in the elementary school; practical demonstration of desirable methods.
Effective: Spring 2007
Prerequisite: LL ED 400, LL ED 401, LL ED 402, PSYCH 212 nine credits in history and the social sciences Concurrent: C I 495A OR SCIED 458 MTHED 420 C I 495B ;

SS ED 470 **Issues in Social Studies Education** (1-6) Concentration on particular issues, trends, and developments in the social studies.
Effective: Winter 1978
Prerequisite: Instructional I certificate and teaching experience

SS ED 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

SS ED 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

SS ED 497A **Heritage Interpretation Education** (3) Principles of interpretation for natural and cultural sites; earn Certified Interpretative Guide certification offered by National Association for Interpretation.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SS ED 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

SS ED 498A **AP World History** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

SS ED 498B **Ap US History** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

SS ED 498C **AP US Government & Politics** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

SS ED 530 **Instructional Practices in the Social Studies** (3) Social studies innovations in the classroom, new programs, new materials, new methods, and evaluation.
Effective: Winter 1978
Prerequisite: one year of teaching experience

SS ED 532 **Curriculum Models in Social Studies Education** (3) Study of past and proposed curricula in elementary and secondary social studies. Various means of judging curricula will be offered.
Effective: Spring 1985
Prerequisite: C I 495D

SS ED 533 **Research in the Teaching of Social Studies** (3) Procedures and methods of research for the teaching of social studies, strategies of investigation, and review of research literature.
Effective: Fall 1983
Prerequisite: 12 credits in the social sciences at the 400 or 500 level and teaching experience

SS ED 590 **Colloquium** (1-3) Graduate seminar for new doctoral students in social studies education.
Effective: Summer 1998
Prerequisite: graduate standing in social studies education

SS ED 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

SS ED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

SS ED 597A **Readings in Social Studies Education** (1-3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2010 Ending: Summer 2010

Last Import from UCM: July 10, 2010 3:00 AM

Sociology (SOC)

SOC 400W **Senior Research Seminar** (3) Major concepts and principles of sociology through reading, data analysis, and writing. Capstone course for senior Sociology majors.
Effective: Fall 2001
Prerequisite: SOC 470

SOC 401 **Social Institutions** (3) Development, nature, and function of major social institutions and their impact on individual life in modern society.
Effective: Spring 2001
Prerequisite: 6 credits in Sociology

SOC 403 **Advanced Social Psychology** (3) Analysis of the major theoretical approaches and research findings of contemporary social psychology.
Effective: Fall 1983
Prerequisite: SOC 003

SOC 404 **Social Influence and Small Groups** (3) The study of social influence, leadership and status, and social cohesion and commitment processes in small groups.
Effective: Spring 2007
Prerequisite: SOC 003 orPSYCH 420

SOC 405 **Sociological Theory** (3) Overview of the development of sociological theory; current issues and controversies.
Effective: Spring 2001
Prerequisite: 3 credits in the Sociology

SOC 406 (CRIMJ 406, CRIM 406) **Sociology of Deviance** (3) Theory and research concerning deviant behaviors and lifestyles viewed as significant departures from a group's normative expectations.
Effective: Spring 2008
Prerequisite: SOC 012, SOC 013 orSOC 005 or permission of program

SOC 408 **Urban Ecology** (3) Spatial and temporal aspects of urban structure; urban growth, neighborhoods, racial and ethnic groups, mental illness; cross-cultural perspectives.
Effective: Fall 1983
Prerequisite: 3 credits in sociology

SOC 409 (US) (AAA S 409) **Racial and Ethnic Inequality in America** (3) The impact of inequality and discrimination on individual and group identity among various racial and ethnic groups.
Effective: Summer 2005
Prerequisite: 3 credits in Sociology

SOC 409U (US) (AAA S 409U) **Racial and Ethnic Inequality in America** (3) The impact of inequality and discrimination on individual and group identity among various racial and ethnic groups.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010
Prerequisite: 3 credits in Sociology

SOC 411 (US) (HD FS 416) **Racial and Ethnic Diversity and the American Family** (3) This course will explore the nature and determinants of racial and ethnic variation in family processes in the United States.
Effective: Spring 2005
Prerequisite: 3 credits in sociology

SOC 412 (CRIMJ 412, CRIM 412) **Crime, Social Control, and the Legal System** (3) Legal and extralegal control; public opinion on crime; criminal justice and correctional processes; legal sanctions; control strategies. Field trip.
Effective: Spring 2008
Prerequisite: SOC 012, SOC 013 orSOC 005

SOC 413 (CRIM 413, CRIMJ 413) **Advanced Criminological Theory** (3) This course provides an in-depth look at theories of crime and examines influential empirical studies designed to these theories.
Effective: Spring 2008
Prerequisite: SOC 012, CRIMJ 250W

SOC 414 (CRIMJ 414, CRIM 414) **Criminal Careers and the Organization of Crime** (3) Research on and theory of criminal careers and crime organizations, emphasizing recruitment and disengagement; offender characteristics and life- styles; policy implications.
Effective: Spring 2008
Prerequisite: SOC 012, SOC 013 orSOC 005

SOC 416 (US) (EDTHP 416) **Sociology of Education** (3) The theoretical, conceptual, and descriptive contributions of sociology to education.
Effective: Spring 2006
Prerequisite: 3 credits in Sociology

SOC 419 (US) **Race and Public Policy** (3) Seminar format course in which sociological theory and research are applied to current race policy issues.
Effective: Spring 2006
Prerequisite: 3 credits in Sociology

SOC 420 (EM SC 420, S T S 420) **Energy and Modern Society** (3) Technology and economics of energy resources, production, and consumption; environmental factors, exhaustion, new technology.
Effective: Spring 2001
Prerequisite: 3 credits in Sociology

SOC 422 **World Population Diversity** (3) Survey of world diversity in national population growth/composition; the impacts of demographic change on the economic/social life of nations/people.
Effective: Spring 2001
Prerequisite: 3 credits in Sociology

SOC 423 **Social Demography** (3) Social demographic perspectives on fertility, mortality, morbidity, migration, population density, demographic transitions, social mobility, family, the aged, and minorities.
Effective: Spring 2001
Prerequisite: SOC 023 orSOC 422

SOC 424 **Social Change** (3) Critical review of classical and recent theories of social change, emphasizing the transformations occurring in the modern world.
Effective: Fall 1983
Prerequisite: 3 credits in sociology

SOC 425 **Social Conflict** (3) An analysis of the variables affecting intergroup and international conflict and cooperation.
Effective: Fall 2007
Prerequisite: general behavioral science general psychology or general sociology

SOC 427W (CED 427W, S T S 427W) **Society and Natural Resources** (3) Analysis of the relationships between societal development and enhancement and natural resources.
Effective: Summer 2008
Prerequisite: R SOC 011 orSOC 001

SOC 428 **Homelessness in America** (3) Survey of social science research on homelessness in the contemporary United States.
Effective: Spring 2001
Prerequisite: 3 credits in Sociology

SOC 429 **Social Stratification** (3) Structure and dynamics of class, caste, and status systems; class differentials and social mobility; current theoretical and methodological issues.
Effective: Winter 1978
Prerequisite: 3 credits in sociology

SOC 430 **Family in Cross-Cultural Perspective** (3) Sociological analysis of family systems in various cultures and subcultures.
Effective: Spring 2001
Prerequisite: 3 credits in Sociology

SOC 431 (HD FS 431) **Family Disorganization: Stress Points in the Contemporary Family** (3) Focuses on divorce, remarriage, incest, family violence as well as problems associated with family formation and parent-child relations.
Effective: Spring 1994
Prerequisite: 6 credits of human development and family studies psychology or sociology

SOC 432 **Social Movements** (3) Why and how people mobilize to promote or retard social change. Factors predicting success or failure of social movements.
Effective: Fall 1983
Prerequisite: 3 credits in sociology

SOC 435 (HD FS 434) **Perspectives on Aging** (3) An analysis of the demographic, social, and cultural factors affecting the aged population in American society.
Effective: Fall 2007
Prerequisite: 3 credits in Sociology

SOC 436 **Polling and Public Opinion** (4) Methods of public opinion polling; attitude theory and research.
Effective: Spring 2001
Prerequisite: 3 credits in Sociology

SOC 437 **Biosocial Perspectives on the Family** (3) The implications of knowledge from behavioral endocrinology, behavior genetics, and evolutionary psychology for understanding family relationships and child development.
Effective: Fall 2001
Prerequisite: six credits of SOC or HD FS

SOC 440 (HD FS 440) **Family Policy** (3) An in-depth examination of family policy.
Effective: Spring 2007
Prerequisite: 3 credits of SOC or HD FS

SOC 444 **Complex Organizations** (3) Analysis of the nature and types of complex organizations and their impact on the social life of modern nations.
Effective: Fall 1983
Prerequisite: 3 credits in sociology

SOC 446 **Political Sociology** (3) Sociological analysis of types of political organization and their relations with other elements of social life.
Effective: Winter 1978
Prerequisite: 3 credits in sociology

SOC 447 **Environment, Energy, and Society** (3) Sociological perspectives on causes and consequences of natural resource scarcity and pollution, with emphasis on environmental policies in industrial societies.
Effective: Spring 2001
Prerequisite: 3 credits in Sociology

SOC 448 **Environmental Sociology** (3) Examination of the relationship between the physical environment and society.
Effective: Fall 2007
Prerequisite: 60 credits at least 9 of which are in the social sciences graduate status or permission of the program

SOC 449 **Environmental Movements** (3) Comparative exploration of environmental movements within the context of classical and new social movement theory.
Effective: Fall 2007
Prerequisite: 90 credits at least 9 of which are in the social sciences or which include SOCIO/CMPSY 470 graduate status or permission of the program

SOC 450 **Justice and the Environment** (3) Considers notions of justice in relation to environmental philosophy, environmental movements, and general environmental concerns.
Effective: Fall 2007
Prerequisite: 90 credits graduate status or permission of the program

SOC 454 (US) **The City in Postindustrial Society** (3) Postindustrial social organization in the United States and Europe; consequences for metropolitan social stratification, community power, and environmental quality.
Effective: Spring 2006
Prerequisite: 3 credits in Sociology

SOC 455 **Work and Occupations** (3) Work and occupational life in modern society; work in the past, present, and future.
Effective: Fall 1983
Prerequisite: 3 credits in sociology

SOC 456 (WMNST 456) **Gender, Occupations, and Professions** (3) The role of gender in shaping contemporary North American patterns of employment, occupational roles, and statuses.
Effective: Spring 2001
Prerequisite: WMNST 001 or 3 credits in Sociology

SOC 457 (US;IL) (ANTH 457, J ST 457) **Jewish Communities: Identity, Survival, and Transformation in Unexpected Places** (3) Examines the global array of smaller Jewish communities that have flourished outside the main urban centers of Jewish settlement.
Effective: Summer 2006
Prerequisite: ANTH 001 orANTH 045, HEBR 010, J ST 010, SOC 001, SOC 005, SOC 007, SOC 015

SOC 461 (US;IL) (RL ST 461) **Sociology of Religion** (3) Contemporary religion in the United States: beliefs, structure, and function of major denominations and religious cults.
Effective: Spring 2006
Prerequisite: 3 credits in sociology or religious studies

SOC 467 (CRIM 467, CRIMJ 467) **Law and Society** (3) Law and society studies the social origins of law and legal systems; occupational careers, and decision-making of legal officials.
Effective: Spring 2008
Prerequisite: CRIMJ 100 orCRIMJ 113 or permission of program

SOC 468 **Mood-Altering Substances in Society** (3) Perspectives of cultures throughout the world toward mood-altering substances are reviewed in light of public policy, benefits, and problems.
Effective: Fall 2007

SOC 469 **Techniques in Small Group Facilitation** (1-4 per semester/maximum of 12) This course is the training course for students working as facilitators with the Race Relations Project.
Effective: Summer 2010
Prerequisite: SOC 119 andSOC 300

SOC 470 **Intermediate Social Statistics** (4) Descriptive and inferential statistics in social research: central tendency and variation, normal distribution, measures of association, confidence intervals, hypothesis testing.
Effective: Fall 2001
Prerequisite: SOC 207

SOC 471 **Qualitative Research Methods in Sociology** (3) Theory, methods, and practice of qualitative data collection, including observation, participant observation, interviewing; supervised projects in natural settings.
Effective: Spring 2001
Prerequisite: 3 credits in Sociology

SOC 481H **Senior Honors Seminar in Sociology** (1) Supervised experience in planning and writing the honors thesis.
Effective: Spring 1999
Prerequisite: sociology major senior standing and admission to the Schreyer Honors College

SOC 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

SOC 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or

small-group basis.
Effective: Fall 2007

SOC 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2000
Prerequisite: prior approval of proposed assignment by instructor

SOC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

SOC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

SOC 497A **Immigration** (3) This class examines theories of immigration and immigrant adaptation, effects, and policy.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SOC 497B **Facilitation Training** (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SOC 497D **Family and Justice** (3) Examination of the relationship between the family and the criminal justice system in which the family operates.
Effective: Summer 2010 Ending: Summer 2010

SOC 499 (IL) **Foreign Study--Sociology** (2-6) Study, in selected foreign countries, of groups, institutions, and social problems.
Effective: Summer 2005
Prerequisite: 3 credits in Sociology

SOC 500 **Introduction to Graduate Study in Sociology** (1) Required of all incoming graduate students in sociology.
Effective: Fall 1983

SOC 501 **Proseminar in Sociology** (3 per semester/maximum of 6) An in-depth introduction to the major specialty areas of Sociology.
Effective: Summer 1998
Prerequisite: admission to the graduate program

SOC 502 **Theories of Society I** (3) Review and analysis of trends and controversies in sociological theory from late eighteenth-century beginnings through the nineteenth century.
Effective: Fall 1983

SOC 503 **Theories of Society II** (3) Review and analysis of trends and controversies in sociological theory in the twentieth century.
Effective: Fall 1983

SOC 504 **Issues in Sociological Theory** (3) Seminar in the sociology of sociology, sociology of knowledge, and the philosophy of science, focused on current theory and methodology.
Effective: Fall 1983

SOC 512 (CLJ 512) **Criminological Theories** (3) Survey of theoretical and substantive issues in deviance and criminology, with emphasis on critical review of theories.
Effective: Fall 2005

SOC 513 **Sociological Research Methods** (3) Critical review of methodological issues; research designs; analysis and interpretation of findings.
Effective: Fall 1983

SOC 514 **Research Design and Data Collection Methods** (3) Chief techniques for collecting data in social research: interviews and questionnaires, laboratory and field observation, unobtrusive measures.
Effective: Fall 1998
Prerequisite: SOC 513 or equivalent course in research methods.

SOC 515 (CLJ 515) **Research Methods in Criminology and Deviance** (3) Review of methodological issues; design and conduct of research; analysis and interpretation of findings; ethical and policy issues.
Effective: Spring 1996

SOC 518 (PL SC 518) **Survey Methods I: Survey Design** (3) Research design for social, behavioral and health surveys.
Effective: Fall 2007

SOC 519 (PL SC 519) **Survey Methods II: Analysis of Survey Data** (3) Intermediate course on the statistical analysis of survey data: topics include weighting, complex surveys, missing data, and contextual analysis.
Effective: Spring 2008
Prerequisite: PL SC 503 orSOC 575

SOC 520 (R SOC 520) **Applied Sociological and Policy Research** (3) A survey of the conceptual and methodological issues in applied sociology and policy research conducted by sociologists.
Effective: Fall 2001
Prerequisite: SOC 573

SOC 521 **Family Demography** (3) Current family demographic research on nuptiality, divorce, household composition, female employment, migration, and fertility.
Effective: Spring 1985

SOC 522 **Demography of the Life Course** (3) The theoretical bases, critical concepts, and methods of life course analysis in the study of demographic transitions.
Effective: Spring 1994
Prerequisite: SOC 423, SOC 473

SOC 523 **Internal and International Migration** (3) Examination of theories, frameworks, and policies related to internal and international migration causes and consequences in developed and developing nations.
Effective: Spring 1997
Prerequisite: SOC 423 or prior work in population or human ecology

SOC 524 **The Demography of Human Fertility** (3) Overview of major issues and methodological approaches in the demographic study of human fertility in developing and developed countries.
Effective: Fall 2000

SOC 528 **Homelessness in America** (3) Survey of social science research on homelessness in the contemporary United States.
Effective: Fall 2000

SOC 530 **Sociology of Family** (3) An in-depth introduction to the sociological study of the family.
Effective: Spring 2002

SOC 531 (HD FS 531) **Family Disorganization: Stress Points in the Contemporary Family** (3) Focuses on divorce, remarriage, incest, family violence as well as problems associated with family formation and parent-child relations.
Effective: Summer 1994

SOC 535 **Sociology of Aging** (3) Current research and methodological issues in the sociological study of aging.
Effective: Fall 1983

SOC 537 (HD FS 537) **Biosocial Perspectives on the Family** (3) The implications of knowledge from behavioral endocrinology, behavior genetics, and evolutionary psychology for understanding family relationships and child development.
Effective: Summer 2002

SOC 538 (EDTHP 538) **Sociology of Education** (3) Provides students with an overview of dominant sociological theoretical perspectives on schools, schooling, and education in modern society.
Effective: Summer 2007

SOC 544 **Current Issues in Complex Organizations** (3) Critical survey of recent developments in sociological study of organizations and the theory of bureaucracy, including reciprocal effects on environments.
Effective: Fall 1983
Prerequisite: SOC 444

SOC 545 **Economy and Society** (3) Major social theorists' views on relationship of economy and society; competing sociological and economic models in contemporary social research.
Effective: Spring 1989

SOC 546 **Seminar in Political Sociology** (3) Analysis of issues and problems in political sociology. Topical emphasis varies.
Effective: Fall 1983
Prerequisite: SOC 446

SOC 547 **Environmental Sociology** (3) The development of environmental sociology; research issues in the study of social organization, natural resources, and social change.

Effective: Fall 1983

SOC 551 **Social Stratification and Social Change** (3) Origin and development of stratification systems and inequality among and within societies; social mobility; change in stratification systems.
Effective: Fall 1983

SOC 553 (CI ED 553, EDTHP 553, HI ED 553) **Education Mobility in Comparative Perspective** (3) Role of education in social mobility, using quantitative, qualitative, and historical methods; focuses comparatively on Britian, East Asia, South America.
Effective: Summer 2002

SOC 554 **Small Community Population Growth, Human Ecology, and Social Change** (3) Small-town population growth and ecology; images and realities of small-town life.
Effective: Fall 1983

SOC 555 **Current Research in Work and Occupation** (3) Topical seminar on nature and trends of research in the sociology of work, occupations, and professions.
Effective: Fall 1983

SOC 557 (EDTHP 557, HI ED 557) **Sociology of Higher Education** (3) Reviews theory and current sociology research on student access, achievement, and governance in postsecondary education, with applications to policy analysis.
Effective: Fall 2000
Prerequisite: graduate students only except with permission of instructor; EDTHP/SOC 416 is recommended

SOC 560 **Urban Sociology** (3) Examination of the structure and dynamics of North American cities and of residents' experiences in such settings.
Effective: Fall 2000

SOC 573 **Demographic Techniques** (3) Models and measures of vital processes (fertility, mortality, migration) and their effects on growth and age structure of human populations.
Effective: Fall 2001
Prerequisite: STAT 200

SOC 574 **Statistical Methods for Social Research** (3) Basic concepts of statistics; linear regression; computer software; analysis of social surveys; causal inferences from nonexperimental data.
Effective: Fall 1983
Prerequisite: 3 credits in statistics and 3 credits in research methods.

SOC 575 **Statistical Models for Nonexperimental Research** (3) Causal models for quantitative and qualitative data; path analysis and structural equations; logistic regression; duration models.
Effective: Spring 1989
Prerequisite: SOC 574

SOC 576 **Applied Mathematical Demography** (3) Survey of mathematical models used in the study of population: models of growth, suvivorship, fertility, migration, stability, kinship, projection.
Effective: Fall 1986
Prerequisite: ANTH 408 orSOC 473 ; calculus

SOC 577 **Techniques of Event History Modeling** (3) Survival analysis theory and methods for discrete dependent variables.
Effective: Summer 1998
Prerequisite: SOC 575

SOC 578 **Multilevel Regression Models** (3) Covers multilevel regression models for the analysis of nested or hierarchical data, including both contextual and longitudinal applications.
Effective: Summer 2006
Prerequisite: SOC 575

SOC 579 (ANTH 579) **Spatial Demography** (3) This graduate course will expose students to spatial analysis tools and analytical methods applied to demographic research.
Effective: Spring 2008
Prerequisite: Graduate course in statistics e.g. SOC 574 or ANTH 509

SOC 583 **Research Seminar in Social Psychology** (3) Design and conduct of research in areas of contemporary social psychology.
Effective: Fall 1983

SOC 584 (PSY 584) **Attitude Formation and Change** (3) Theory and method in research on attitude formation and change with emphasis on critical analysis.
Effective: Spring 2007
Prerequisite: PSYCH 420 orSOC 403 ; 3 credits in statistics

SOC 585 (PSY 585) **Interaction Processes Within and Between Groups** (3) Interactions in personal, group, and intergroup relations; theory and observational methods.

Effective: Spring 2007
Prerequisite: SOC 403 orPSYCH 420

SOC 587 (PSY 587) **Socialization** (3) Behavioral, cognitive, developmental, symbolic, interactionist, and role theories of socialization; emphasis on current theory and research.
Effective: Spring 2007
Prerequisite: SOC 403 orPSYCH 420

SOC 588 (PSY 588) **The Social Organization of Attribution** (3) Principles of attribution and their relevance to such topics as power relations, authority, equity, injustice, and social movements.
Effective: Spring 2007
Prerequisite: SOC 403 orPSYCH 420

SOC 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

SOC 591 (CLJ 591) **Teaching Sociology/Crime, Law, and Justice** (1) Preparation for teaching sociology and/or crime, law, and justice at the college level.
Effective: Fall 2000

SOC 592 **Writing for Publication in the Social Sciences** (3) Systematic, collective review of unpublished student manuscripts with an eye toward revision for publication.
Effective: Spring 2007
Prerequisite: Master's thesis or permission of program

SOC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

SOC 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

SOC 597A **Assimilation** (3) This course will examine theories and research of the assimilation of immigrants and their descendants.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SOC 597A **Race, Ethnicity, and Residence** (3) Comparative analysis of the residential experiences of racial and ethnic groups in contemporary U.S.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

SOC 597B **Advanced SEM Methods** (4) This is an advanced course on measurement and modeling in the social sciences using modern structural equation models and methods.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SOC 597B (EDTHP 597B, CI ED 597B) **Children and Childhood in Sociological Perspective** (3) This course investigates social, cultural, political, and economic forces that shape childhood around the world, viewed through an educational lens.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

SOC 597C **Sociology of Religion** (3) This seminar uses classical and contemporary perspectives to develop social scientific tools for analyzing religion in the contemporary world. .
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SOC 597C **Race, Ethnicity and Family Processes** (3) This course will explore the nature and determinants of racial and ethnic variation in family processes in the contemporary U.S.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

SOC 597D **A Seminar in the Sociology of Religion** (3) An introductory, graduate-level survey of the sociology of religion designed to help participants conduct and critique social and scientific research.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

SOC 597E **Health Disparities** (3) This course studies cross-national health disparities and roles that socioeconomic status and race/ethnicity play in indicators of health status.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SOC 597E **Health Disparities** (3) This course studies cross-national health disparities and roles that socioeconomic status and race/ethnicity play in indicators of health status.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

SOC 597F **Work, Family, and Policy** (3) Theory and evidence on the interrelationships between gender, family, employment, and earnings; work-family conflict; and potential policy solutions.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SOC 597F **U.S. Inequality, Family Demography and Immigration** (3) This course explores the consequences of social stratification for demographic processes and social and economic inequality.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

SOC 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

SOC 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

SOC 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Students will teach introductory level courses as required by staffing and students' needs.
Effective: Fall 1983

SOC 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Summer 2005

SOC 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

SOC 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

1 Students may take only one course for General Education credit from SOC 001 GS or R SOC 011 GS.

2 Students may take only one course for General Education credit from SOC 030 or HD FS 129 GS.

Last Import from UCM: July 10, 2010 3:00 AM

Sociology-CI (SOCIO)

SOCIO 476 **Sociology of Science and Technology** (3) Examines the constitutive relationship between society, science and technology and ethical concerns arising from these relationships.
Effective: Spring 2003
Prerequisite: 60 credits at least 6 of which are in the social sciences or graduate status or permission of the program

Last Import from UCM: July 10, 2010 3:00 AM

Software Engineering (SWENG)

SWENG 400 **Introduction to Software Engineering Studio** (3) Provides an introduction to the principles of software engineering and includes complementary instruction in one programming language.
Effective: Summer 1999
Prerequisite: senior standing or above

SWENG 411 **Software Engineering** (3) Software engineering principles including life cycle, dependability, process modeling, project management, requires specification, design analysis, implementation, testing, and maintenance.
Effective: Spring 2008
Prerequisite: CMPSC 122 Concurrent: SWENG 311

SWENG 421 **Software Architecture** (3) The analysis and design of software systems using canonical design patterns.
Effective: Summer 2008
Prerequisite: SWENG 411

SWENG 431 **Software Verification, Validation, and Testing** (3) Introduction to methods of software verification, validation, and testing; mathematical foundations of testing, reliability models; statistical testing.
Effective: Spring 2008
Prerequisite: SWENG 411;STAT 301

SWENG 452W **Embedded Real Time Systems** (3) The design and implementation of real time systems.
Effective: Summer 2008
Prerequisite: CMPSC 472 orCMPSC 473 orCMPEN 441

SWENG 480 **Software Engineering Design** (3) Concepts of engineering ethics, economy, and project management, senior capstone project selection, and technical communication skills.
Effective: Spring 2009
Prerequisite: SWENG 431

SWENG 481 **Software Engineering Project** (3) Capstone group design projects in software engineering.
Effective: Spring 2008
Prerequisite: SWENG 480

SWENG 494 **Research Project** (1-12) Supervised student activites on research projects identified on an individual or small-group basis.
Effective: Summer 2010

SWENG 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008
Prerequisite: prior approval of proposed assignment by instructor

SWENG 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2010

SWENG 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1999

SWENG 497A **Software Integration** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

SWENG 497A **Human Computer Interface** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SWENG 497B **Software Documentation** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SWENG 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2010

SWENG 500 **Software Engineering Studio** (3) The 500-level studio provides an opportunity for students to undertake a substantial software project.
Effective: Summer 1999

SWENG 505 **Software Project Management** (3) Analysis and construction of project plans for the development of complex software products; how to manage change and cost control.
Effective: Fall 2003

SWENG 537 **Software System Design** (3) Best practices in the requirements, analysis, and design of large software systems including the Unified Modeling language and the Unified Process.
Effective: Spring 2008
Prerequisite: CMPSC 483W or equivalent knowledge with instructor's permission

SWENG 541 **Advanced Database Design Concepts** (3) Practical benefits of a Database Management System; three-stage process to create and implement a relational database to meet defined requirements.
Effective: Summer 2002
Prerequisite: IN SC 521 or approval of instructor or department

SWENG 545 **Data Mining** (3) Practical benefits of data mining will be presented; data warehousing, data cubes, and underlying algorithms used by data mining software.
Effective: Summer 2002
Prerequisite: IN SC 521 or approval of instructor or department

SWENG 552 **Bioinformatics** (3) Introduction to information processing problems in computational biology and a unified treatment of machine learning methods for solving these problems.
Effective: Summer 2002
Prerequisite: MATH 451

SWENG 560 **Web Based Systems** (3) Autonomous intelligent software agent mechanisms, Java's database connectivity, and the emerging architectures for the development of Web based information systems.
Effective: Spring 2001
Prerequisite: students should have completed the core curriculum of the Master of Software Engineering degree prior to scheduling this course or have instructor's permission

SWENG 564 **Electronic Commerce** (3) Web languages, platforms, browsers, host standards, communications, database interfaces and the reliability, responsiveness, and security of E-Commerce Systems.
Effective: Spring 2001

SWENG 566 **Enterprise Resource Planning** (3) Examination of enterprise-wide integrated software solutions; application planning, business process re-engineering, vendor provided ERP solutions, testing and migration issues.
Effective: Spring 2001

SWENG 568 **Enterprise Integration** (3) Advances in design, development, and deployment of control and management software for enterprise and production information systems.
Effective: Fall 2003

SWENG 569 **Service Oriented Architecture** (3) The principles of service oriented architecture; modeling, design and implementation of services; mapping business processes to services.
Effective: Spring 2009

SWENG 580 **Advanced Software Engineering** (3) Description of tools and techniques in the software development lifecycle; Mitigation and managing time-to-market and quality of large software systems.
Effective: Spring 2001
Prerequisite: SWENG 537 or equivalent knowledge with instructor's permission

SWENG 581 **Software Testing** (3) This course provides a rigorous formal framework and practical information on this the testing of software throughout its life cycle.
Effective: Summer 2005
Prerequisite: SWENG 537 or instructor's permission

SWENG 582 **Real-Time Software Design and Analysis** (3) A holistic, systems-based approach to design and analysis of real-time systems; design and implementation of a small real-time system.
Effective: Summer 2002
Prerequisite: completion of all IN SC or SWENG core courses or with instructor or division approval

SWENG 584 **Genetic Algorithms** (3) Application of genetic algorithms to problems in engineering and science including combinatorial optimization, multi-criteria optimization, biology, chemistry, and neural networks.
Effective: Summer 2002
Prerequisite: completion of a course in data structures and algorithms or on approval of department

SWENG 585 **Pattern Oriented Design** (3) This class examines well-known heuristics, principles and patterns in the design and construction of reusable frameworks, packages and components.
Effective: Spring 2006
Prerequisite: SWENG 537

SWENG 586 **Requirements Engineering** (3) Theory and applications of requirements elicitation, analysis, modeling, validation, testing, and writing for hardware and software systems.
Effective: Summer 2008

SWENG 587 **Software Systems Architecture** (3) Software systems architecture; architectural design principles/patterns; documentation/evaluation of software architectures; reuse of architectural assets through frameworks/software product lines.
Effective: Summer 2008

SWENG 588 **Program Understanding** (3) Techniques for the analysis and visualization of large software systems to assess the quality of the design and architecture.
Effective: Spring 2009

SWENG 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1999

SWENG 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1999

SWENG 594A **Masters Research Paper** (3) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2010 Ending: Summer 2010

SWENG 594A **Masters Research Paper** (3) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SWENG 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1999

SWENG 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1999

SWENG 597A **Formal Methods** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

Last Import from UCM: July 10, 2010 3:00 AM

Soil Science (SOILS)

SOILS 401 **Soil Composition and Physical Properties** (3) Advanced study of mineralogical and physical properties of soils which affect soil-plant-water relationships.
Effective: Spring 2001
Prerequisite: SOILS 101

SOILS 402 **Soil Nutrient Behavior and Management** (3) Chemical and biological behavior of soil nutrients; management for plant availability and fate in the environment. Laboratory emphasizes soil testing and soil-plant relationships.
Effective: Spring 2009
Prerequisite: CHEM 112, SOILS 101

SOILS 404 **Urban Soils** (3) This course introduces the student to natural and human-influenced soils.
Effective: Summer 2010
Prerequisite: SOILS 101

SOILS 405 (GEOSC 405) **Hydropedology** (3) Soil and water interactions across scales, integrated studies of landscape-soil-water relationships, fundamental processes of water flow and chemical transport.
Effective: Spring 2008
Prerequisite: SOILS 101

SOILS 412W **Soil Ecology** (3) Introduction to soil organisms; includes interactions between organisms, their processes, and metabolism with a major focus on microorganisms.
Effective: Spring 2008
Prerequisite: BIOL 011, BIOL 127 orBIOL 110

SOILS 415 **Soil Morphology, Mapping, and Land Use** (3) Soil profile, soil mapping, application of principles of soil morphology and mapping to land use; remote sensing.
Effective: Spring 2001
Prerequisite: GEOSC 001, GEOSC 020, GEOSC 071 orSOILS 101

SOILS 416 **Soil Genesis and Classification** (3) Pedological evolution, classification, and world distribution of soils.
Effective: Spring 2001
Prerequisite: SOILS 101

SOILS 418 (AGECO 418, AN SC 418) **Nutrient Management in Agricultural Systems** (3) Comprehensive review of nutrient flow in animal agricultural systems, environmental regulations, and environmental stewardship practices.
Effective: Summer 2003

SOILS 419 (GEOSC 418) **Soil Environmental Chemistry** (3) Introduction to chemical constituents and processes occurring in soils. Topics include mineral weathering, soil solution chemistry and adsorption of solutes.
Effective: Summer 2007
Prerequisite: CHEM 112

SOILS 420 **Remediation of Contaminated Soils** (3) Basic principles and technical aspects of remediation of contaminated soils.
Effective: Summer 2007
Prerequisite: CHEM 112

SOILS 422 **Natural Resources Conservation and Community Sustainability** (3) Conservation, land-use, and community (soil, water, air, plants, animals, and humans) impacting quality of life and sense of place.
Effective: Spring 2006
Prerequisite: SOILS 101

SOILS 450 **Environmental Geographic Information Systems** (3) Use of geographic information systems (GIS) and digital spatial databases to characterize landscapes for environmental assessment and management.
Effective: Summer 1999
Prerequisite: SOILS 101

SOILS 489 **Supervised Experience in College Teaching** (1-3) Participate with instructors in teaching an undergraduate soil science course; assist with teaching and evaluation and with development of instrucitonal materials.
Effective: Summer 1993
Prerequisite: SOILS 101 approval of instructor

SOILS 490 (AGRO 490) **Colloquium** (1) Continuing written and oral presentations developed by students in consultation with the course instructor.
Effective: Fall 1993
Prerequisite: seventh-semester standing

SOILS 494 **Senior Thesis** (1-6) Supervised data collection and analysis on a topic of interest to the student culminating in a formal thesis.
Effective: Spring 2000
Prerequisite: permission of the course coordinator

SOILS 494H **Senior Thesis** (1-6) Supervised data collection and analysis on a topic of interest to the student culminating in a formal thesis.

Effective: Fall 2007
Prerequisite: permission of the course coordinator

SOILS 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1990
Prerequisite: prior approval of proposed assignment by instructor

SOILS 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1990

SOILS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1990

SOILS 497A **Soil Genesis, Classification, and Mapping** (4) Lecture and laboratory course on the genesis of soils, their classification, mapping, and interpretation for land use.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010
Prerequisite: SOILS 101 or permission of program

SOILS 502 **Soils Properties and Functions** (3) Introduction to soil science for graduate students including fundamentals of and applications to plant production and environmental sustainability.
Effective: Summer 2008

SOILS 506 (GEOSC 513) **Soil Processes: Chemical and Biogeochemical** (3) Colloid chemistry of soils; (a)biotic aspects of mineral formation/dissolution and redox reactions in soils; biogeochemical processes affecting elemental cycles.
Effective: Summer 2007 Ending: Summer 2010
Prerequisite: SOILS 419, CHEM 450

SOILS 507 **Soil Physics** (3-4) Soil physical properties emphasizing water, heat, gas, and ion movement in unsaturated soils. Laboratory included with 4 credits.
Effective: Summer 1992
Prerequisite: 6 credits each of calculus physics and soils

SOILS 510 **Geographic Information System Applications** (3) Soil data bases, image processing, and geographic information systems will be used to model and understand land and water resources.
Effective: Spring 1993
Prerequisite: GEOG 457

SOILS 512 **Environmental Soil Microbiology** (3) Biology and ecology of microorganisms in terrestrial environments; microbiological and molecular analysis methods; microbial processes in carbon and nitrogen cycling.
Effective: Spring 2008
Prerequisite: two years of chemistry andMICRB 400, B M B 401, A B E 308 or equivalent

SOILS 513 (GEOSC 513) **Soil Environmental Chemistry** (3) Chemical constituents and processes occurring in soils. Discussion of soil components, reactions at the solid-solution interface, and soil chemical processes.
Effective: Fall 2010 Future: Fall 2010
Prerequisite: CHEM 450

SOILS 516 **Soil Genesis** (1 per semester, maximum of 4) Field trip to study the genesis, classification, and geomorphology of the major soils of the northeastern United States.
Effective: Summer 1992
Prerequisite: SOILS 416 or 6 credits in geology or physical geography

SOILS 519 **Nature of Soil Minerals** (3) Constituent minerals of soils: modern methods for identification; relations to soil formation and agricultural practices.
Effective: Fall 2001

SOILS 571 **Ecosystem Nutrient Cycles** (3) Ecological theory and applications related to water, carbon, nitrogen, phosphorus, and cation cycling in managed and unmanaged terrestrial ecosystems.
Effective: Fall 2008

SOILS 590 (AGRO 590) **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1993

SOILS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1992

SOILS 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1992

SOILS 597A **Vadose Zone Transport** (3) Lecture and literature discussion course covering water and contaimnant transport through the unsaturated zone with an emphasis on soils.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011
Prerequisite: SOILS 101 or permission of program

SOILS 600 **THESIS RESEARCH** (1-15) NO DESCRIPTION.
Effective: Summer 1992

SOILS 601 **PH.D. DISSERTATION FULL-TIME** (0) NO DESCRIPTION.
Effective: Summer 1992

SOILS 602 **SUPERVISED EXPERIENCE IN COLLEGE TEACHING** (1-3 PER SEMESTER, MAXIMUM OF 6) GRADUATE STUDENT INVOLVEMENT IN PREPARATION, PRESENTATION, AND EVALUATION OF COURSE MATERIALS FOR UNDERGRADUATE FORMAL COURSES.
Effective: Spring 1992

SOILS 610 **Thesis Research Off-Campus** (1-15) No description.
Effective: Summer 1992

SOILS 611 **PH.D. DISSERTATION PART-TIME** (0) NO DESCRIPTION.
Effective: Summer 1992

Last Import from UCM: July 10, 2010 3:00 AM

Spanish (SPAN)

SPAN 410 **Advanced Oral Expression and Communication** (3) Emphasis on achieving practical command of spoken Spanish and the comprehension of native speech. Use of journalistic materials.
Effective: Fall 1995
Prerequisite: SPAN 200

SPAN 412 **Translation** (3) Techniques of oral and written translation from Spanish to English and vice versa, particularly for business, literature, and social work.
Effective: Spring 2008
Prerequisite: SPAN 300

SPAN 414 **Spanish Phonology** (3) Spanish phonetics and phonemics; systematic means of correcting pronunciation defects; other audio-lingual applications.
Effective: Spring 2001
Prerequisite: SPAN 200

SPAN 415 **Spanish Morphology and Syntax** (3) The Spanish grammatical system; analysis of morphemic units and their organization into syntactic structures.
Effective: Spring 2001
Prerequisite: SPAN 200

SPAN 418 **The Evolution of Spanish** (3) The emergence and development of the sounds and forms of Spanish.
Effective: Spring 1995
Prerequisite: SPAN 414

SPAN 420 **Spanish for Business and International Trade** (3) Introduction to the Spanish of international business and to the social and cultural norms of negotiation in Spanish-speaking countries.
Effective: Spring 2008
Prerequisite: SPAN 300

SPAN 439 **Don Quijote** (3) Thorough study of the masterpiece, including its sources, genesis, language, style, success, and influence.
Effective: Spring 2008
Prerequisite: SPAN 300

SPAN 440 **Teaching of Romance Languages** (3) Theories of second language acquisition. Current classroom practices in the teaching of Romance languages.
Effective: Spring 2001
Prerequisite: SPAN 200

SPAN 472 **The Contemporary Spanish American Novel** (3) The regionalist and social novel since 1910, together with the social background.
Effective: Spring 2008
Prerequisite: SPAN 300, SPAN 354

SPAN 476 **Masterpieces of Spanish American Literature** (3) Reading, analysis, and discussion of selected major works representative of Spanish American prose and poetry.
Effective: Spring 2008
Prerequisite: SPAN 253W, SPAN 300

SPAN 490 **Masterpieces of Spanish Prose** (3) Reading, analysis, and discussion of selected masterpieces of Spanish novels, short stories, etc.
Effective: Spring 2008
Prerequisite: SPAN 253W, SPAN 300

SPAN 491 **Masterpieces of Spanish Drama and Poetry** (3) Reading, analysis, and discussion of selected masterpieces of Spanish drama and poetry.
Effective: Spring 2008
Prerequisite: SPAN 253W, SPAN 300

SPAN 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

SPAN 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

SPAN 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

SPAN 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject

which may be topical or of special interest.
Effective: Fall 1983

SPAN 497A **Mexico: History, Culture, and Contemporary Social Trends** (3) An intensive, on-site study of the history, culture, and contemporary issues in Mexico, particularly Guanajuato and central Mexico.
Effective: Summer 2010 Ending: Summer 2010

SPAN 497A **1492: Spanish Language at the Crossroads** (3) External factors (social history, contact w/other languages and ethnic groups, territorial expansion) and effect on development of Spanish language.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010
Prerequisite: SPAN 215 orSPAN 414 orSPAN 418

SPAN 497C **Destination Barcelona: Literary, Artistic and Cultural Represenations of the City** (3) Acquaint students with textual, visual and musical representations of one of the world's most fashionable cities.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SPAN 497D **Voices From the Margin: The Poetry and Drama of Federico Garcia Lorca** (3) Focus on poetry and drama of Frederico Garcia Lorca, placed within historical, political, and social contexts.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SPAN 499 (IL) **Foreign Study--Spanish** (1-12) Contemporary Spanish life and civilization. Emphasis on post-Civil War period: literature, arts, and sociopolitical problems.
Effective: Summer 2005
Prerequisite: SPAN 100, SPAN 110 orSPAN 120

SPAN 502 **Theory and Techniques of Teaching Spanish** (1-3) Audio-lingual orientation.
Effective: Winter 1978

SPAN 507 **Hispano-Romance Linguistics** (3 per semester/maximum of 9) History, development, and linguistic description of Old Spanish and related Romance languages of the Iberian Peninsula.
Effective: Fall 1983

SPAN 510 **Spanish Descriptive Linguistics: Phonology** (3) No description.
Effective: Winter 1978

SPAN 511 **Spanish Transformational-Generative Linguistics** (3) No description.
Effective: Winter 1978

SPAN 513 **Acquisition of Spanish as a Second Language** (3) Analysis of research on the acquisition of syntax, phonology, lexicon, discourse.
Effective: Spring 2002
Prerequisite: introduction to Hispanic linguistics

SPAN 514 **Hispanic Dialectology** (3 per semester/maximum of 6) Early fragmentation among the peninsular dialects; their status today, Judeo- Spanish; descriptive analysis of modern Spanish American dialects.
Effective: Fall 1983

SPAN 516 **Medieval Spanish Literature** (3 per semester/maximum of 9) Topics vary: juglaria and clerecia, emergence of lyric and brief narrative; history and didacticism; origins of novel; balladry; fifteenth-century innovations.
Effective: Fall 1983

SPAN 521 **The Celestina and the Literature of the Spanish Pre-Renaissance** (3) Chief trends and works of the period of the Catholic monarchs, with special emphasis on Fernando de Rojas's masterpiece La Celestina.
Effective: Fall 1983

SPAN 526 **Sixteenth-Century Spanish Literature** (3 per semester/maximum of 9) Prose and poetry of major authors: works and trends of the Renaissance and the early Golden Age.
Effective: Fall 1983

SPAN 528 **Seventeenth-Century Spanish Literature** (3 per semester/maximum of 9) Prose and poetry of major authors: works and trends of the late Golden Age and Baroque period.
Effective: Fall 1983

SPAN 537 **Golden Age Theatre** (3 per semester/maximum of 6) Major works of Lope de Vega, Tirso de Molina, Calderon, and others.
Effective: Fall 1983

SPAN 540 **Cervantes** (3 per semester/maximum of 9) The literary works of Cervantes: Don Quijote, other novels, dramatic works, and poetry.
Effective: Fall 1983

SPAN 544 **Spanish Romanticism** (3 per semester, maximum of 9) The major authors and works of peninsular romanticism, including poetry, drama, and prose.
Effective: Spring 2001

SPAN 550 **Spanish Realism** (3 per semester, maximum of 9) The major figures of the period.
Effective: Spring 2001

SPAN 553 **Writings of the "Generation of 1898"** (3 per semester/maximum of 6) Novels, plays, short stories, essays, poetry of Valle-Inclan, Azorin, Benavente, Unamuno, Machado, Maeztu, and Baroja in the context of generation concept.
Effective: Fall 1983

SPAN 560 **The Contemporary Novel in Spain** (3 per semester, maximum of 9) The novel since 1941: Cela, Laforet, Zunzunegui, Suarez Carreno, Matute, and others.
Effective: Spring 2001

SPAN 563 **Contemporary Drama in Spain** (3) Contemporary drama: Garcia Lorca, Casona, Beuro Vallejo, Sastre, Olmo, Muniz, Recuerda, Rodriguez Mendez, Nieva, Riaza, Arrabal, Pedrera, and others.
Effective: Summer 1992

SPAN 566 **Contemporary Spanish Poetry** (3) Various currents in Spanish poetry from the generation of 1927: Lorca, Aleixandre, Salinas, Guillen, Alonso, Alberti, Hernandez, Otero, and others.
Effective: Fall 1983

SPAN 568 **Early Spanish American Literature** (3 per semester/maximum of 9) Content varies; selected topics from colonial period, romanticism, and the nineteenth century before modernism.
Effective: Fall 1983

SPAN 570 **Modernismo** (3) The movement, its antecedents, and its followers, with special emphasis on Ruben Dario.
Effective: Winter 1978

SPAN 574 **The Spanish American Novel** (3 per semester/maximum of 9) Content varies; selected works from the late nineteenth century through the contemporary period.
Effective: Fall 1983

SPAN 575 **The Spanish American Essay** (3) Tracing the history of ideas in Spanish America through major essayists.
Effective: Winter 1978

SPAN 576 **Twentieth-Century Spanish American Poetry** (3) Influential poets and literary movements after Modernismo.
Effective: Winter 1978

SPAN 577 **Spanish American Drama** (3) Dramatic literature in Spanish America from colonial times to the present.
Effective: Winter 1978

SPAN 581 **The Spanish American Short Story** (3) Critical analysis of the major writers and movements from Echeverria to the present.
Effective: Winter 1978

SPAN 587 **Stylistic and Literary Criticism** (3) Major theories of literary criticism applied to Hispanic literature.
Effective: Winter 1978

SPAN 588 **Seminar in Hispanic Literature** (3-12) Common and individual research in special problems in Spanish or Spanish American literature.
Effective: Summer 1988

SPAN 589 (CMLIT 589, FR 589, GER 589) **Technology in Foreign Language Education: An Overview** (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with APLNG 589)
Effective: Spring 2004

SPAN 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual

basis and which fall outside the scope of formal courses.
Effective: Spring 1987

SPAN 596A **Syntax and Variation** (3) Survey of problems in Hispanic Linguistics, particularly in Syntax.
Effective: Summer 2010 Ending: Summer 2010

SPAN 596B **Women of the Golen Age** (3) Theater and prose of the Golden Age, written by women or featureing women protagonists.
Effective: Summer 2010 Ending: Summer 2010

SPAN 596C **Field Methodologies** (3) Explore the basics of sociolinguistic fieldwork through hands-on experience in the community of San Basilio de Palenque.
Effective: Summer 2010 Ending: Summer 2010

SPAN 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1988

SPAN 597A **The City as Text: Theorizing Urban Landscape** (3) Using several Spanish and European authors from 19th and 20th century, explore questions concerning the city as text.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SPAN 597C (LING 597C) **Pidgin and Creole Languages** (3) Study of pidgins (reduced vehicular languages) and creole languages (restructured native languages), principally derived from Spanish and Portuguese, and also from French and English.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SPAN 597D **Advanced Studies in Child Language Acquisition** (3) Focus on children's native language acquisition with special attention to: research methods, crosslinguistic data and explanations from linguistic theory.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SPAN 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

SPAN 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

SPAN 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 1999

SPAN 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2001

SPAN 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

SPAN 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: July 10, 2010 3:00 AM

Special Education (SPLED)

SPLED 400 **Inclusive Special Ed Foundations: Legal, Characteristics, Collaboration, Assessment, and Management** (4) Legal issues, learner characteristics, collaboration skills, assessment, and behavior management related to educating students with disability in inclusive settings.
Effective: Spring 2010
Prerequisite: EDPSY 014 andEDPSY 010 or relevant child development course (e.g. HD FS 229 HD FS 239). Fifth semester standing or higher

SPLED 401 **Motivating Exceptional Learners** (4) Group and individual techniques to promote student task engagement and prosocial behavior.
Effective: Spring 2001
Prerequisite: or concurrent: a grade of C or better required inSPLED 395W

SPLED 402 **Human Rights: Historical and Current Issues in Special Education** (3) Litigation, legislation, regulation, and advocacy issues impacting on educational and related services for individuals with academic and/or physical disabilities.
Effective: Fall 2001
Prerequisite: or concurrent:SPLED 400 orSPLED 425

SPLED 403A **Evidence-Based Instruction for Elementary Students with Disabilities in Reading, Math, and Writing** (3) Evidence-based methods for design, delivery, and adaption of instruction for elementary students with disabilities in reading, mathematics, and writing.
Effective: Summer 2009
Prerequisite: SPLED 400

SPLED 403B **Evidence-Based Methods for Teaching Secondary Students with Disabilities in Inclusive Settings** (3) Evidence-based methods for designing, delivering, and adapting instruction for students with disabilites in inclusive secondary education settings.
Effective: Summer 2009
Prerequisite: SPLED 400

SPLED 404 **Working with Families and Professionals in Special Education** (3) Strategies for productive interactions between special educators and others such as colleagues, employers, parents, service providers, professionals, and students.
Effective: Spring 1997
Prerequisite: or concurrent: a grade of C or better required inSPLED 425

SPLED 409A **Fundamental Literacy Skills for Students with Special Needs** (3) Effective reading curriculum and teaching methods to teach students with special needs.
Effective: Summer 2006
Prerequisite: A grade of C or better required inSPLED 425, SPLED 395W, SPLED 401, SPLED 412, SPLED 454, SPLED 495E
Concurrent: SPLED 495G

SPLED 409B **Writing and Content Literacy for Students with Special Needs** (3) Effective curriculum and materials for teaching writing and content literacy to students with special needs.
Effective: Summer 2006
Prerequisite: a grade of C or better required inSPLED 425, SPLED 395W, SPLED 401, SPLED 409A, SPLED 412, SPLED 454, SPLED 495E Concurrent: SPLED 495G

SPLED 409C **Mathematics Instruction for Students with Special Needs** (3) Research-based practices for teaching mathematics skills to students with special needs.
Effective: Summer 2006
Prerequisite: a grade of C or better required inSPLED 425, SPLED 395W, SPLED 401, SPLED 409A, SPLED 412, SPLED 454, SPLED 495E Concurrent: SPLED 495G

SPLED 411 **Intervention for Students with Severe Disabilities** (3) Assessment, teaching strategies, curricula, materials, and assistive techniques for use with individuals having severe disabilities (mental and physical).
Effective: Spring 1997
Prerequisite: a grade of C or better required inSPLED 395W, SPLED 401, SPLED 425 Concurrent: a grade of C or better in SPLED 495E

SPLED 412 **Instruction for Students with Mild Disabilities** (4) Appropriate teaching strategies, curriculum sequences, and materials selection and evaluation for children with mild special needs.
Effective: Spring 2007
Prerequisite: a grade of C or better required inSPLED 395W, SPLED 401, SPLED 425, SPLED 454 Concurrent: a grade of C or better required in SPLED 454

SPLED 415 **Early Special Education** (3-4) Includes early identification methods, assessment, curricula, parent involvement, and program evaluation for exceptional preschoolers in mainstreamed or segregated settings.
Effective: Summer 1994
Prerequisite: a grade of C or better required in the following coursesC & S 401 orSPLED 454 ; a course in child development

SPLED 418 **Technologies for Persons with Disabilities** (2) Sensory aids, communication systems, computer systems, expert systems, simulations, and other technologies for students who are academically or physically challenged.
Effective: Spring 2001

Prerequisite: SPLED 400 orSPLED 425

SPLED 425 **Orientation to Human Variation and Special Education Services** (3) An intensive overview of exceptional individuals being served in special education programs across their life-spans, from infancy through adulthood.
Effective: Spring 2007
Prerequisite: declaration of major or minor in Special Education

SPLED 430 **Foundational Skills for Working with Students with Special Education Needs in General Education Classrooms** (1) Introduction to working with students with special education needs in the general education classroom, including history and legal foundation.
Effective: Spring 2009
Prerequisite: teacher certification or permission of instructor

SPLED 431 **Evidenced-Based Methods for Monitoring Student Progress and Making Instructional Decisions** (2) Evidence-based methods for assessing student progress and making data-based instructional decisions.
Effective: Spring 2009
Prerequisite: SPLED 430

SPLED 432 **Evidence-Based Practices for Inclusive Behavior Management** (2) Managing and motivating learners with special needs in general education settings based upon principles of Applied Behavior Analysis.
Effective: Spring 2009
Prerequisite: SPLED 430, SPLED 431

SPLED 433 **Effective and Explicit Instruction for Students with Learning Difficulties** (2) Evidence-based methods for designing, delivering, and adapting academic instruction for students with mild, moderate, and severe learning difficulties.
Effective: Spring 2009
Prerequisite: SPLED 430

SPLED 434A **Evidence-Based Practices for Inclusive Elementary Classrooms** (2) Evidence-based methods to effectively serve special needs students in elementary general education settings, including reading, writing, and mathematics instruction.
Effective: Spring 2009
Prerequisite: SPLED 430, SPLED 431, SPLED 432, SPLED 433

SPLED 434B **Evidenced-Based Practices for Inclusive Secondary Classrooms** (2) Evidence-based methods to effectively serve special needs students in secondary general education settings.
Effective: Spring 2009
Prerequisite: SPLED 430, SPLED 431, SPLED 432, SPLED 433

SPLED 444 **Inclusive Education and Assessment** (6) Knowledge and skills needed to educate students with special needs in urban schools.
Effective: Summer 1994
Prerequisite: ELEDM 400 Concurrent: URBED 395W

SPLED 454 **Assessment for Instruction** (4) Orientation to evaluation of special students with emphasis on the creation, use, and interpretation of teacher-made assessment procedures.
Effective: Spring 2007
Prerequisite: a grade of C or better required inEDPSY 101 Concurrent: a grade of C or better in SPLED 412

SPLED 460A **Fundamentals of Reading Instruction in Special Education** (3) Topics include the interactive nature of reading, recent findings of the National Reading Panel, explicit instruction principles and reading assessments.
Effective: Summer 2006

SPLED 460B **Teaching and Assessing Reading Skills of Students with Special Needs** (3) Topics include methods for assessing and teaching reading skills including fluency, word level decoding and comprehension.
Effective: Summer 2006
Prerequisite: SPLED 460A

SPLED 460C **Specialized Reading Applications in Special Education** (3) Topics include methods for assessing and teaching reading skills in vocational competence, functional reading, reading for students with sensory impairment.
Effective: Summer 2006
Prerequisite: SPLED 460A andSPLED 460B

SPLED 461 **Autism: Issues and Concerns** (1) Overview of issues, characteristics, and evidenced-based assessment strategies, and approaches for individuals with autism/PDD.
Effective: Summer 2006

SPLED 462 **Autism and Applied Behavior Analysis** (4) Basic principles of applied behavior analysis (ABA) and empiricism. Emphasis will be given to ABA principles in educational settings.
Effective: Summer 2006
Prerequisite: SPLED 461

SPLED 463 **Communication and Social Competence** (3) Overview of deficits and strategies in speech, language, and communication across the Autism Spectrum Disorder.
Effective: Summer 2006
Prerequisite: SPLED 461

SPLED 464 **Assessment and Curriculum** (3) Overview of screening, diagnosis, and identification of skills in developmental

domains and curricula for individuals with autism.
Effective: Summer 2006
Prerequisite: SPLED 461

SPLED 465 **Asperger Syndrome** (1) Characteristics, assessment, intervention, and curricula for individuals with Asperger syndrome. Emphasis will be given to social skill development.
Effective: Summer 2006

SPLED 495E **Experience with Exceptional Children** (3) Supervised activities with exceptional children in a variety of possible settings, e.g., schools, institutions, day care centers, vocational settings.
Effective: Spring 2001
Prerequisite: a grade of C or better required inSPLED 395W, SPLED 401, SPLED 425, SPLED 454 . PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check. (Forms: 228 Chambers) Concurrent: a grade of C or better in SPLED 411 SPLED 412

SPLED 495F **Practicum in Special Education** (15) Teaching experience with mildly/moderately disabled children in age appropriate settings, e.g., infant/preschools, schools, vocational/job sites.
Effective: Summer 1997
Prerequisite: a grade of C or better required inSPLED 495G . PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check. (Forms: 228 Chambers)

SPLED 495G **Experience with an Integrated Inclusion Classroom** (4) Supervised teaching in integrated general classrooms with activities in assessment, diagnosis, and direct intervention with students in need or with disabilities.
Effective: Spring 2004
Prerequisite: a grade of C or better required inSPLED 425, SPLED 395W, SPLED 401, SPLED 412, SPLED 454, SPLED 495E . PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check (Forms: 228 Chambers). Concurrent: a grade of C or better required in SPLED 409

SPLED 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1990

SPLED 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1990

SPLED 497A **Teaching Exceptional Students in General Education Settings** (3) Instruction and foundational skills (assessment and management) and knowledge (laws, etiologies, collaboration) for those working with students with special education needs in general education classrooms.
Effective: Summer 2010 Ending: Summer 2010

SPLED 497B **Special Topics in Autism** (1) This course, associated with the Autism Conference is designed to provide practitioners with information about effective instructional and behavior management techniques.
Effective: Summer 2010 Ending: Summer 2010

SPLED 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

SPLED 498A **Teaching Students with Autism in Inclusive Settings** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

SPLED 498A **Autism and Applied Behavior Analysis** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SPLED 498B **Inclusion in the Classroom** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

SPLED 498B **Teaching Students with Autism and Inclusive Settings** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SPLED 498C **Autism and Applied Behavior Analysis** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

SPLED 498C **Inclusion in the Classroom** (2) Formal courses given infrequently to explore, in depth, a comparatively

narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SPLED 498D **Introduction to Autism Spectrum Disorders** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

SPLED 498D **Practicum in Applied Behavior Analysis** (4) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SPLED 498E **A Focus on Improving Student Achievement Through Effective Practices** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

SPLED 498F **Understanding Deafblindness: Student-Centered Assessment for Severe and Sensory Impairment** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

SPLED 498G **Practicum in Applied Behavior Analysis** (4) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

SPLED 500 **Seminar in Special Education** (1-9) Continuing series of professional seminars designed to provide a forum for discussion of current and classical research concerning exceptional children.
Effective: Summer 1990
Prerequisite: EDPSY 400 ; 6 credits in special education

SPLED 501 **Administration and Supervision of Educational Programs for Exceptional Children** (2-3) Problems connected with the instituting and organizing of classes for atypical children; the legal phases, finances, teaching personnel, pupil personnel, housing, equipment, courses of study, curriculum, etc.
Effective: Summer 1990
Prerequisite: SPLED 401 andEDLDR 480 or teaching or administrative or supervisory experience

SPLED 503A **Applied Behavior Analysis for Special Education: Basic Principles I** (4) Topics include a history of applied behavior analysis; underlying assumptions; dimensions and characteristics of ABA; ethics; basic terminology and principles.
Effective: Summer 2007

SPLED 503B **Applied Behavior Analysis for Special Education: Basic Principles II** (4) Topics include functional assessment of behavior, ethics, methods to increase and decrease behavior, and generalization.
Effective: Summer 2007
Prerequisite: SPLED 503A

SPLED 503C **Applied Behavior Analysis for Special Education: Extended Applications I** (4) Topics include assessment and intervention for challenging behavior, systems support, classroom applications of ABA, and review of ABA Certification Exam.
Effective: Summer 2007
Prerequisite: SPLED 503A, SPLED 503B

SPLED 505 **Single-Case Research** (3) Overview of research methods associated with collecting and evaluating repeated measures on single cases.
Effective: Summer 2008

SPLED 510 **Problems in the Education of the Mentally Retarded** (2-4) Study of existing curriculums, instructional practices, educational programs; experimentation in curriculum building and materials construction.
Effective: Fall 1994
Prerequisite: SPLED 305;SPLED 401 orSPLED 411

SPLED 515 **Infants and Toddlers with Special Needs** (3) Comparison of typical and atypical development of infants and toddlers; applicable instructional strategies in education.
Effective: Spring 1997
Prerequisite: at least one year teaching experience with elementary-age children

SPLED 516 **Assessment in Early Educational Intervention** (2-3) Describes and illustrates models, methods, and materials for assessing infants and preschoolers with developmental delays and disabilities.
Effective: Summer 1994
Prerequisite: SPLED 415

SPLED 530 **Problems in the Education of the Learning Disabled** (2-4) Review of the research and theoretical implications in the educational and behavioral management of learning disabled children.
Effective: Summer 1994

Prerequisite: SPLED 305

SPLED 540 **Orientation to PhD Study in Special Education** (3) Information and skills needed for successful completion of Ph.D. study in Special Education for those targeting academic careers.
Effective: Spring 2007
Prerequisite: admission to Ph.D. study in Special Education

SPLED 550 **Professional Seminar in Special Education** (1) Professional competencies and ethical issues related to obtaining and retaining positions in higher education.
Effective: Spring 1993
Prerequisite: successful completion of candidacy in special education

SPLED 555 **Curriculum-Based Assessment for Handicapped Learners** (2) Development and use of diagnostic procedures for planning and evaluating instructional programs for handicapped pupils.
Effective: Summer 1990
Prerequisite: SPLED 305 orSPLED 400;SPLED 454

SPLED 570 **Problems in the Education of the Emotionally Disturbed** (2-4) Current issues, methods, and problems associated with the education of the emotionally/behaviorally disturbed.
Effective: Summer 1994
Concurrent: SPLED 305 SPLED 401

SPLED 573 **Introduction to Research in Special Education** (3) A seminar to review and design research in special education.
Effective: Spring 2007
Prerequisite: SPLED 454

SPLED 575 **Grant-Proposal Development in Special Education** (3) Designed to facilitate development of grants and proposal writing techniques for submission and funding by student researchers.
Effective: Spring 1998
Prerequisite: EDPSY 400, SPLED 573

SPLED 594 **Reserach Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1991

SPLED 595 **Internship** (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.
Effective: Spring 2004

SPLED 595A **Practicum** (1-6) Supervised clinical experience on campus in University-managed diagnostic and remedial settings.
Effective: Spring 1998
Prerequisite: SPLED 412 . PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check. (Forms: 228 Chambers)

SPLED 595B **Field Experiences in Off-Campus Laboratories** (1-10) Supervised off-campus field experiences in selected laboratory settings with exceptional children.
Effective: Fall 2001
Prerequisite: SPLED 412, SPLED 595A . PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check. (Forms: 228 Chambers)

SPLED 595C **Internship in Special Education Supervision** (1-6) Internship in day/residential school setting under supervision of field supervisor and University faculty.
Effective: Summer 1990
Prerequisite: SPLED 595B

SPLED 595D **Internship in Special Education** (2-10) Internship to take place in schools or educational situations where student is not regularly employed, under supervision of graduate faculty.
Effective: Spring 1992
Prerequisite: SPLED 495F or teaching experience

SPLED 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1990

SPLED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1990

SPLED 597A **Evidence-Based Practices in Management of Special Education** (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2010 Ending: Summer 2010

SPLED 597A **Evidence-Based Practices in Management of Special Education** (3) Formal courses given on a topical or

special interest subject which may be offered infrequently.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SPLED 597B **Practices for Teaching Adolescents with Learning Disabilities in General Education Classrooms** (3) Evidence-based Practices for Teaching Adolescents with Learning Disabilities in General Education Classrooms.
Effective: Summer 2010 Ending: Summer 2010

SPLED 597C **Evidence-based Instruction for Students with Learning Difficulties: The Strategic Intervention Model** (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2010 Ending: Summer 2010

SPLED 597G **Applied Behavior Analysis for Special Education: Extended Applications II** (3) Applied Behavior Analysis for Special Education application of behavior principles in classroom and community settings.
Effective: Summer 2010 Ending: Summer 2010

SPLED 600 **Thesis Research** (1-15) No description.
Effective: Summer 1990

SPLED 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 1990

SPLED 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Experience in structuring and teaching a college course supervised by a graduate faculty member.
Effective: Summer 1990

SPLED 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 1990

SPLED 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Summer 1990

Last Import from UCM: July 10, 2010 3:00 AM

Statistics (STAT)

STAT 401 **Experimental Methods** (3) Random variables; probability density functions; estimation; statistical tests, t-tests; correlation; simple linear regression; one-way analysis of variance; randomized blocks.
Effective: Spring 1988
Prerequisite: MATH 111 orMATH 141

STAT 402 **Statistical Analysis II** (3) Two-sample problems, single and multifactor ANOVA, simple and multiple regression, categorical data.
Effective: Fall 2007
Prerequisite: STAT 301 . 400 level needed for honors program

STAT 414 (MATH 414) **Introduction to Probability Theory** (3) Probability spaces, discrete and continuous random variables, transformations, expectations, generating functions, conditional distributions, law of large numbers, central limit theorems. Students may take only one course from STAT(MATH) 414 and 418.
Effective: Fall 2001
Prerequisite: MATH 230 orMATH 231

STAT 415 (MATH 415) **Introduction to Mathematical Statistics** (3) A theoretical treatment of statistical inference, including sufficiency, estimation, testing, regression, analysis of variance, and chi-square tests.
Effective: Fall 1989
Prerequisite: MATH 414

STAT 416 (MATH 416) **Stochastic Modeling** (3) Review of distribution models, probability generating functions, transforms, convolutions, Markov chains, equilibrium distributions, Poisson process, birth and death processes, estimation.
Effective: Spring 1984
Prerequisite: STAT 318 orSTAT 414;MATH 230

STAT 418 (MATH 418) **Probability** (3) Fundamentals and axioms, combinatorial probability, conditional probability and independence, probability laws, random variables, expectation; Chebyshev's inequality. Students may take only one course from STAT(MATH) 414 and 418 for credit.
Effective: Fall 2001
Prerequisite: MATH 230 orMATH 231

STAT 440 **Computational Statistics** (3) Topics related to computing in statistics, including numerical linear algebra, optimization, simulation, numerical integration, and bootstrapping.
Effective: Spring 2006
Prerequisite: STAT 200 or equivalentSTAT 415, MATH 220

STAT 460 **Intermediate Applied Statistics** (3) Review of hypothesis testing, goodness-of-fit tests, regression, correlation analysis, completely randomized designs, randomized complete block designs, latin squares.
Effective: Fall 2006
Prerequisite: STAT 200, STAT 220, STAT 240, STAT 250, STAT 301 orSTAT 401

STAT 461 **Analysis of Variance** (3) Analysis of variance for single and multifactor designs; response surface methodology.
Effective: Fall 2007
Prerequisite: STAT 200, STAT 220, STAT 240, STAT 250, STAT 301 orSTAT 401

STAT 462 **Applied Regression Analysis** (3) Introduction to linear and multiple regression; correlation; choice of models, stepwise regression, nonlinear regression.
Effective: Fall 2006
Prerequisite: STAT 200, STAT 220, STAT 240, STAT 250, STAT 301 orSTAT 401

STAT 463 **Applied Time Series Analysis** (3) Identification of models for empirical data collected over time; use of models in forecasting.
Effective: Spring 2006
Prerequisite: STAT 462

STAT 464 **Applied Nonparametric Statistics** (3) Tests based on nominal and ordinal data for both related and independent samples. Chi-square tests, correlation.
Effective: Fall 2006
Prerequisite: STAT 200, STAT 220, STAT 240, STAT 250, STAT 301 orSTAT 401

STAT 466 **Survey Sampling** (3) Introduction to design and analysis of sample surveys, including questionnaire design, data collection, sampling methods, and ratio and regression estimation.
Effective: Spring 2006
Prerequisite: STAT 200, STAT 220, STAT 240, STAT 250, STAT 301 orSTAT 401

STAT 470W **Problem Solving and Communication in Applied Statistics** (3) Provide problem solving and communication skills through development of writing ability, interaction with peers and the SCC, and oral presentations.
Effective: Spring 2000
Prerequisite: STAT 460, STAT 462, STAT 480

STAT 480 **Introduction to SAS** (1) Introduction to SAS with emphasis on reading, manipulating and summarizing data.
Effective: Spring 2008
Prerequisite: 3 credits in statistics

STAT 481 **Intermediate SAS for Data Management** (1) Intermediate SAS for data management.
Effective: Summer 2007
Prerequisite: STAT 480

STAT 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2007
Prerequisite: 6 credits in statistics

STAT 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2007
Prerequisite: 6 CREDITS IN STATISTICS

STAT 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships.
Effective: Fall 2007
Prerequisite: 6 credits in statistics

STAT 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

STAT 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

STAT 497A **Advanced Topics in SAS** (1) Advanced statistical procedures in SAS, including ANOVA, GIM, CORR, REG, MANOVA, FACTOR, DISCRIM, LOGISTIC, MIXED, GRAPH, EXPORT, and SQL.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010
Prerequisite: STAT 480, STAT 481

STAT 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

STAT 500 **Applied Statistics** (3) Descriptive statistics, hypothesis testing, power, estimation, confidence intervals, regression, one- and 2-way ANOVA, Chi-square tests, diagnostics.
Effective: Spring 1999
Prerequisite: one undergraduate course in statistics

STAT 501 **Regression Methods** (3) Analysis of research data through simple and multiple regression and correlation; polynomial models; indicator variables; step-wise, piece-wise, and logistic regression.
Effective: Fall 2006
Prerequisite: STAT 500 or equivalent; matrix algebra

STAT 502 **Analysis of Variance and Design of Experiments** (3) Analysis of variance and design concepts; factorial, nested, and unbalanced data; ANCOVA; blocked, Latin square, split-plot, repeated measures designs.
Effective: Fall 1995
Prerequisite: STAT 462 orSTAT 501

STAT 503 **Design of Experiments** (3) Design principles; optimality; confounding in split-plot, repeated measures, fractional factorial, response surface, and balanced/partially balanced incomplete block designs.
Effective: Fall 1983
Prerequisite: STAT 462 orSTAT 501;STAT 502

STAT 504 **Analysis of Discrete Data** (3) Models for frequency arrays; goodness-of-fit tests; two-, three-, and higher-way tables; latent and logistic models.
Effective: Fall 1983
Prerequisite: STAT 460 orSTAT 502 orSTAT 516 ; matrix algebra

STAT 505 **Applied Multivariate Statistical Analysis** (3) Analysis of multivariate data; T2-tests; particle correlation; discrimination; MANOVA; cluster analysis; regression; growth curves; factor analysis; principal components; canonical correlations.
Effective: Spring 2003
Prerequisite: MATH 441, STAT 501, STAT 502

STAT 506 **Sampling Theory and Methods** (3) Theory and application of sampling from finite populations.
Effective: Fall 1983
Prerequisite: calculus; 3 credits in statistics

STAT 507 **Epidemiologic Research Methods** (3) Research and quantitative methods for analysis of epidemiologic observational studies. Non-randomized, intervention studies for human health, and disease treatment.
Effective: Spring 2005
Prerequisite: STAT 250 or equivalent

STAT 508 **Applied Statistical Distribution Theory** (3) Analysis of data involving non-normal families of distributions; model building and selection, parameterizations, inferential algorithms, transformations, simulations, displays,

interpretations.
Effective: Spring 1988
Prerequisite: STAT 401 orSTAT 409

STAT 509 **Design and Analysis of Clinical Trials** (3) An introduction to the design and statistical analysis of randomized and observational studies in biomedical research.
Effective: Fall 2004
Prerequisite: STAT 500

STAT 510 **Applied Time Series Analysis** (3) Identification of models for empirical data collected over time. Use of models in forecasting.
Effective: Fall 1983
Prerequisite: STAT 462 orSTAT 501 orSTAT 511

STAT 511 **Regression Analysis and Modeling** (3) Multiple regression methodology using matrix notation; linear, polynomial, and nonlinear models; indicator variables; AOV models; piece-wise regression, autocorrelation; residual analyses.
Effective: Fall 2006
Prerequisite: STAT 500 or equivalent; matrix algebra; calculus

STAT 512 **Design and Analysis of Experiments** (3) AOV, unbalanced, nested factors; CRD, RCBD, Latin squares, split-plot, and repeatd measures; incomplete block, fractional factorial, response surface designs; confounding.
Effective: Spring 1984
Prerequisite: STAT 511

STAT 513 **Theory of Statistics I** (3) Probability models, random variables, expectation, generating functions, distribution theory, limit theorems, parametric families, exponential families, sampling distributions.
Effective: Summer 1986
Prerequisite: MATH 230

STAT 514 **Theory of Statistics II** (3) Sufficiency, completeness, likelihood, estimation, testing, decision theory, Bayesian inference, sequential procedures, multivariate distributions and inference, nonparametric inference.
Effective: Summer 1986
Prerequisite: STAT 513

STAT 515 **Stochastic Processes I** (3) Conditional probability and expectation, Markov chains, the exponential distribution and Poisson processes.
Effective: Summer 1986
Prerequisite: MATH 414, STAT 414 orSTAT 513

STAT 517 (MATH 517) **Probability Theory** (3) Measure theoretic foundation of probability, distribution functions and laws, types of convergence, central limit problem, conditional probability, special topics.
Effective: Summer 2000
Prerequisite: MATH 403

STAT 518 (MATH 518) **Probability Theory** (3) Measure theoretic foundation of probability, distribution functions and laws, types of convergence, central limit problem, conditional probability, special topics.
Effective: Fall 1983
Prerequisite: STAT 517

STAT 519 (MATH 519) **Topics in Stochastic Processes** (3) Selected topics in stochastic processes, including Markov and Wiener processes; stochastic integrals, optimization, and control; optimal filtering.
Effective: Fall 1984
Prerequisite: STAT 516, STAT 517

STAT 524 **Ecometrics** (3) Stochastic models and statistical methods in ecological problems; population dynamics, spatial patterns in populations of one, two, or more species.
Effective: Winter 1978
Prerequisite: STAT 414 orSTAT 418

STAT 525 **Survival Analysis I** (3) Location estimation, 2- and K- sample problems, matched pairs, tests for association and covariance analysis when the data are censored.
Effective: Summer 1992
Prerequisite: STAT 512, STAT 514

STAT 526 **Survival Analysis II** (3) Asymptotic theory for Kaplan-Meier estimator, 2- and K- sample rank tests, rank regression, proportional hazards regression.
Effective: Spring 1992
Prerequisite: STAT 525

STAT 527 **Quantitative Ecology** (3) Introduction to quantitative population and community ecology, with emphasis on problems, concepts, and methods using mathematical, statistical, and computational analysis.
Effective: Spring 1988
Prerequisite: STAT 409, BIOL 210

STAT 528 **Statistical Ecology Spectrum** (3) Overview of research and instruction of particular interest to quantitative ecology faculty in the Ecology program.
Effective: Fall 1983
Prerequisite: STAT 527

STAT 540 **Statistical Computing** (3) Computational foundations of statistics; algorithms for linear and nonlinear models,

discrete algorithms in statistics, graphics, missing data, Monte Carlo techniques.
Effective: Fall 1983
Prerequisite: STAT 501 orSTAT 511;STAT 415 ; matrix algebra

STAT 544 **Categorical Data Analysis I** (3) Two-way tables; generalized linear models; logistic and conditional logistic models; loglinear models; fitting strategies; model selection; residual analysis.
Effective: Summer 1992
Prerequisite: STAT 512, STAT 514

STAT 545 **Categorical Data Analysis II** (3) Generalized logit models; symmetry and agreement models; repeated measures; longitudinal data; delta method; asymptotic distributions; ML/WLS; advanced special topics.
Effective: Spring 1992
Prerequisite: STAT 544

STAT 548 **Statistical Distribution Theory** (3) Analytical study of nonnormal models and methods in reliability theory, survival analysis, records evaluation, scale/scale-free analysis, and directional statistics.
Effective: Spring 1984
Prerequisite: MATH 410 orMATH 414 orMATH 416

STAT 551 **Linear Models I** (3) A coordinate-free treatment of the theory of univariate linear models, including multiple regression and analysis of variance models.
Effective: Spring 1987
Prerequisite: MATH 415 orSTAT 415 orSTAT 514;STAT 512;MATH 436 orMATH 441

STAT 552 **Linear Models II** (3) Treatment of other normal models, including generalized linear, repeated measures, random effects, mixed, correlation, and some multivariate models.
Effective: Spring 1987
Prerequisite: STAT 551

STAT 553 **Asymptotic Tools** (3) A rigorous but non-measure-theoretic introduction to statistical large-sample theory for Ph.D. students.
Effective: Summer 2004
Prerequisite: STAT 513 andSTAT 514

STAT 557 (IST 557) **Data Mining I** (3) This course introduces data mining and statistical/machine learning, and their applications in information retrieval, database management, and image analysis.
Effective: Summer 2009
Prerequisite: STAT 318 orSTAT 416 and basic programming skills

STAT 558 (IST 558) **Data Mining II** (3) Advanced data mining techniques: temporal pattern mining, network mining, boosting, discriminative models, generative models, data warehouse, and choosing mining algorithms.
Effective: Summer 2010
Prerequisite: STAT 557 orIST 557

STAT 561 **Statistical Inference I** (3) Classical optimal hypothesis test and confidence regions, Bayesian inference, Bayesian computation, large sample relationship between Bayesian and classical procedures.
Effective: Spring 2003
Prerequisite: STAT 514 Concurrent: STAT 517

STAT 562 **Statistical Inference II** (3) Basic limit theorems; asymptotically efficient estimators and tests; local asymptotic analysis; estimating equations and generalized linear models.
Effective: Spring 2003
Prerequisite: STAT 561

STAT 564 **Theory of Nonparametric Statistics** (3) Estimation and testing based on nonparametric procedures for location and regression models. Distribution theory and asymptotic efficiency.
Effective: Spring 1987
Prerequisite: MATH 415, STAT 415 orSTAT 514

STAT 565 **Multivariate Analysis** (3) Theoretical treatment of methods for analyzing multivariate data, including Hotelling's T2, MANOVA, discrimination, principal components, and canonical analysis.
Effective: Spring 1987
Prerequisite: STAT 505, STAT 551

STAT 572 **Statistical Decision Theory I** (3) Structure of statistical games, optimal strategies, fixed sample-size games.
Effective: Spring 1987
Prerequisite: MATH 415, STAT 415 orSTAT 514

STAT 580 **Statistical Consulting Practicum I** (2) General principles of statistical consulting and statistical consulting experience. Preparation of reports, presentations, and communication aspects of consulting are discussed.
Effective: Spring 2005
Prerequisite: STAT 502;STAT 503, STAT 504, STAT 506

STAT 581 **Statistical Consulting Practicum II** (1 per semester/maximum of 2) Statistical consulting experience including client meetings, development of recommendation reports, and discussion of consulting solutions.
Effective: Summer 2004
Prerequisite: STAT 580

STAT 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

STAT 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

STAT 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

STAT 597I **Communication Basic Statistics Concepts** (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

STAT 598B (CSE 598B, BIOL 598B) **Bioinformatics I** (3) AR and MA processes, spectrum analysis, regression models, multivariate models.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

STAT 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

STAT 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

STAT 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

STAT 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

STAT 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2008

STAT 897A **Introduction to Applied Statistics** (3) Descriptive statistics, hypothesis testing, power, estimation, confidence intervals, regression, one- and two-way ANOVA, chi-square tests, diagnostics.
Effective: Summer 2010 Ending: Summer 2010

STAT 897A **Introduction to Applied Statistics** (3) Descriptive statistics, hypothesis testing, power, estimation, confidence intervals, regression, one- and two-way ANOVA, chi-square tests, diagnostics.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

Last Import from UCM: July 10, 2010 3:00 AM

Supply Chain Mgmt (SCM)

SCM 400 **Transport Planning** (3) Advanced study of transport systems in supply chain networks.
Effective: Spring 2007
Prerequisite: B A 302 andSCM 404

SCM 404 **Demand Fulfillment** (3) Analysis of demand fulfillment and the role of distribution operations management in the supply chain.
Effective: Spring 2007 Ending: Fall 2010
Prerequisite: B A 302

SCM 404 **Demand Fulfillment** (3) Analysis of demand fulfillment and the role of distribution operations management in the supply chain.
Effective: Spring 2011 Future: Spring 2011
Prerequisite: B A 302 orSCM 301

SCM 405 **Manufacturing and Services Strategies** (3) Investigates operations strategy and its relationship to other functions in the supply chain and presents quantitative tools for decision-making.
Effective: Spring 2007 Ending: Fall 2010
Prerequisite: B A 302

SCM 405 **Manufacturing and Services Strategies** (3) Investigates manufacturing and services strategies in supply chain networks.
Effective: Spring 2011 Future: Spring 2011
Prerequisite: SCM 301 orB A 302

SCM 406 **Strategic Procurement** (3) Analysis of strategic procurement in the supply chain.
Effective: Spring 2011 Future: Spring 2011
Prerequisite: B A 302 orSCM 301

SCM 406W **Strategic Procurement** (3) Analysis of strategic procurement in the supply chain.
Effective: Spring 2007 Ending: Fall 2010
Prerequisite: B A 302

SCM 416 **Warehousing and Terminal Management** (3) Administration of warehouse and terminal functions in logistics systems, with analysis of customer service, forecasting, inventory, investment, design, and operation. Not available to baccalaureate business students in Smeal.
Effective: Spring 2007
Prerequisite: SCM 301

SCM 418 **Logistics Analysis** (3) Design, develop, and use computer decision models for analysis of logistics problems; computer intensive coursework emphasizing spreadsheet applications. Not available to baccalaureate business students in Smeal.
Effective: Spring 2007
Prerequisite: SCM 301, SCM 320 andCMPSC 203

SCM 421 **Supply Chain Modeling and Analysis** (3) Problem solving and modeling methods for analyzing supply chains management.
Effective: Spring 2007 Ending: Fall 2010
Prerequisite: SCM 404 orSCM 405 orSCM 406W

SCM 421 **Supply Chain Analytics** (3) Models and Methodologies for supply chain analysis.
Effective: Spring 2011 Future: Spring 2011
Prerequisite: SCM 404 orSCM 405 orSCM 406

SCM 423 **Information Technology in Supply Chains** (3) Appropriate and effective use of information technology in supply chain.
Effective: Spring 2007
Prerequisite: SCM 404 orSCM 405 orSCM 406W

SCM 430 **Transport Problems** (3) Selected problems in transport systems and transport management. Not available to baccalaureate business students in Smeal.
Effective: Spring 2007
Prerequisite: SCM 301 orSCM 320

SCM 432 **Service Supply Chains** (3) Supply chain management in the services sector.
Effective: Spring 2007
Prerequisite: B A 302

SCM 435 **International Logistics** (3) Design and operation of global supply chain networks. Not available to baccalaureate business students in Smeal.
Effective: Spring 2007
Prerequisite: SCM 301 andSCM 320

SCM 445 **Operations Planning and Control** (3) Aggregate production planning procedures, disaggregation methods in hierarchical production planning, master production scheduling, material requirements planning, lot-sizing, and capacity planning. Not available to baccalaureate business students in Smeal.

Effective: Spring 2007
Prerequisite: SCM 310

SCM 450 **Strategic Design and Management of Supply Chains** (3) Strategic design and management of supply chains.
Effective: Spring 2007
Prerequisite: SCM 421

SCM 455 **Logistics Systems Analysis and Design** (3) Customer service, inventory management, transportation, warehousing, purchasing, international logistics, site location planning and analysis, and total cost analysis.
Effective: Spring 2007
Prerequisite: SCM 301 orSCM 310

SCM 456 **Supply Chain Risk Analysis** (3) Business processes are modeled as a network of queues using discrete-event simulation and analyzed model outcomes using statistical methods.
Effective: Spring 2007
Prerequisite: SCM 200 andB A 302

SCM 460 **Purchasing and Materials Management** (3) Purchasing policies, procedures, order specifications and agreements, supplier selection, and the role of purchasing in production planning and inventory management. Not available to baccalaureate business students in Smeal.
Effective: Spring 2007
Prerequisite: SCM 301 orSCM 310

SCM 465 **Electronic Business Management** (3) A problem-based exploration of the various electronic business tools and technologies required to efficiently manage a supply chain. Not available to baccalaureate business students in Smeal.
Effective: Spring 2007
Prerequisite: SCM 301 orSCM 310

SCM 466 **Managerial Forecasting** (3) The use of time series models for business and economic forecasting. Topics include exponential smoothing and Box-Jenkins (ARIMA) models.
Effective: Spring 2007
Prerequisite: B A 302 orSCM 310

SCM 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2007

SCM 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

SCM 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2007

SCM 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2007

SCM 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2007

SCM 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

SCM 530 **Supply Chain Analysis** (3) Methods and tools to support supply chain decision making with emphasis on forecasting, inventory analysis, and demand planning.
Effective: Summer 2007
Prerequisite: SCM 800, SCM 810 andSCM 820

SCM 540 **Transportation in Supply Chains** (2) Strategies and processes for design and implementation of transportation service links in supply chain networks.
Effective: Summer 2002
Prerequisite: B A 510 or permission of program

SCM 546 **Strategic Procurement** (2) Development of procurement and supply management strategies to support synchronized supply chains.
Effective: Summer 2002
Prerequisite: B A 510 or permission of program

SCM 556 **Manufacturing Strategy** (2) Development of service-sensitive manufacturing strategies to support synchronized supply chains.
Effective: Summer 2002
Prerequisite: B A 510 or permission of program

SCM 566 **Demand Fulfillment** (2) Demand fulfillment strategies, operations, and methods in supply chain networks.
Effective: Summer 2002
Prerequisite: B A 510 or permission of program

SCM 570 **Supply Chain Modeling** (2) Explore current modeling methods and software for design, analysis, execution and integration of supply chains.
Effective: Summer 2002
Prerequisite: SCM 556

SCM 576 **Logistics and Supply Chain Leadership** (2) Current issues and best practices for selected supply chain leadership topics.
Effective: Summer 2002
Prerequisite: SCM 546, SCM 556, SCM 566

SCM 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2007

SCM 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2004

SCM 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be tuaght in one year or semester.
Effective: Spring 2002

SCM 800 **Supply Chain Management** (4) Introduction to the strategic framework, issues, and methods for integrating supply and demand management within and across companies.
Effective: Summer 2007

SCM 810 **Transportation and Distribution** (4) Role of transportation and distribution operations in matching supply with demand; principles of transport industry analysis and competitive positioning.
Effective: Summer 2007
Prerequisite: SCM 800

SCM 820 **Strategic Procurement** (4) Strategic planning for the source/buy process, including developing and managing supplier relationships, global issues, and e-procurement.
Effective: Summer 2007
Prerequisite: SCM 800

SCM 830 **Supply Chain Analysis** (2) Methods and tools to support supply chain decision making with emphasis on forecasting, inventory analysis, and demand planning.
Effective: Summer 2007
Prerequisite: SCM 800, SCM 810 andSCM 820

SCM 840 **Supply Chain Project Management** (4) The fundamentals and tools of managing supply chain projects, with special emphasis given to related information technology projects.
Effective: Summer 2007
Prerequisite: SCM 800, SCM 810 andSCM 820

SCM 850 **Supply Chain Design and Strategy** (4) Design and management of supply chain networks, emphasizing the alignment of supply chain networks with corporate competitive strategy.
Effective: Summer 2007
Prerequisite: SCM 800, SCM 810, SCM 820

SCM 860 **Supply Chain Transformation and Innovation** (4) Strategic supply chain transformation and innovation with emphasis on (re)configuration of key capabilities to achieve competitive advantages.
Effective: Summer 2007
Prerequisite: SCM 800, SCM 810, SCM 820, SCM 830, SCM 840 andSCM 850

SCM 894 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2007

SCM 896 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2007

SCM 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2007

SCM 898 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered

infrequently; several different topics may be taught in one year or term.
Effective: Summer 2007

Last Import from UCM: July 10, 2010 3:00 AM

Surveying (SUR)

SUR 441 **Data Analysis and Project Design** (3) Post least squares adjustment analysis of control networks, statistical testing, blunder detection, network design considerations, and computer optimization techniques.
Effective: Summer 1994
Prerequisite: STAT 401 orSTAT 451, SUR 341

SUR 445 **Numerical Methods in Adjustment Computations** (3) Computer optimization techniques used in adjustment of large, sparse, positive-definite matrices with emphasis on efficient storage and solution routines. Lab.
Effective: Spring 2001
Prerequisite: SUR 341

SUR 455 **Precise Positioning Systems** (3) Stellar coordinate systems; geodetic reference coordinate systems; satellite orbital theory; global positioning systems; pseudo-ranging; GPS vector adjustments.
Effective: Summer 1994
Prerequisite: SUR 351 . Prerequisite or concurrent:SUR 441

SUR 465 **Multipurpose Land Information Systems Applications** (3) Using a GIS as a decision tool; spatial modeling; data structure and management issues; legal issues; case studies; application projects.
Effective: Spring 2001
Prerequisite: SUR 362

SUR 471 **Professional Aspects of Land Surveying** (3) Ethical issues and legal limits of practice; surveyor as an expert witness; surveyor-client relationship; responsibilities to the profession.
Effective: Summer 1994
Prerequisite: SUR 372W

SUR 482 **Land Development Design** (3) The land development process; geometric, environmental, aesthetic aspects of development; local regulatory requirements; preparation of final plat and report.
Effective: Summer 1994
Prerequisite: SUR 313, SUR 471

SUR 485 **Stormwater Management Design** (2) Regulations, design storms, runoff volumes, hydrographs, routing methods, detention, BMPs, innovative design, groudwater recharge.
Effective: Spring 2008
Prerequisite: SUR 285 fifth-semester standing

SUR 490 **Seminar in Surveying** (1) Individual or group work in surveying.
Effective: Summer 1994
Prerequisite: senior standing

SUR 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an indiviudal basis and that fall outside the scope of formal courses.
Effective: Summer 1993

SUR 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1993

Last Import from UCM: July 10, 2010 3:00 AM

Swahili (SWA)

SWA 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

SWA 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

SWA 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 1995

SWA 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

SWA 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: July 10, 2010 3:00 AM

Systems Engineering (SYSEN)

SYSEN 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1999

SYSEN 497A **Wireless Positioning** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

SYSEN 505 **Technical Project Management** (3) Analysis and construction of project plans for the development of complex engineering products taken from a variety of problem domains.
Effective: Fall 2003

SYSEN 507 **Systems Thinking** (3) The theory and practice of systems thinking. General systems theory; system dynamics, emergent properties, structure, feedback and leverage.
Effective: Spring 2009

SYSEN 509 **Biostatistics** (3) Multivariate Statistical methodology arising in the health care and biological sciences.
Effective: Summer 2005
Prerequisite: Students should have completedSTAT 500 or have instructor's permission.

SYSEN 510 **Engineering Analysis I** (3) The course includes applications of advanced engineering mathematics; the study of systems are described by ordinary/partial differential equations and methods of solutions.
Effective: Spring 2001
Prerequisite: students should have completed calculus at the undergraduate level or have instructor's permission

SYSEN 511 **Engineering Analysis II** (3) The course includes applications of advanced engineering mathematics; study numerical solutions, linear algebra, scalar/vector field theory, Fourier methods, and partial differential equations.
Effective: Spring 2001
Prerequisite: SYSEN 510 or instructor's permission

SYSEN 520 **Systems Engineering** (3) Fundamentals of Systems Engineering with focus on System methodology, design, and management; includes life cycle analysis, human factors, maintainability, serviceability/reliability.
Effective: Spring 2001
Prerequisite: SYSEN 510 orSYSEN 511 or instructor's permission

SYSEN 530 **Systems Optimization** (3) Theory/practice of linear programming will be developed including determination of optimum mix of products, levels of staffing, blending, network analysis, multi-period planning.
Effective: Spring 2001
Prerequisite: SYSEN 520 or instructor's permission

SYSEN 531 **Probability Models and Simulation** (3) Provides background in modeling problems containing random components that must be accounted for in a reasonable solution.
Effective: Summer 2007

SYSEN 533 **Deterministic Models and Simulation** (3) Provides a background in simulation and the modeling of problems that contain differential equations as part of the system.
Effective: Summer 2007

SYSEN 535 **Statistical Methods in Research** (3) Multiple Linear Regression methods including logistic regression will be introduced and specialized to include the experimental designs useful in research.
Effective: Summer 2005
Prerequisite: Students should have completedSTAT 500 or have instructor's permission

SYSEN 536 **Decision and Risk Analysis in Engineering** (3) Analysis of engineering decisions under uncertainty; problem identification, formulation, judgment, resolution; mitigation, risk analysis, quantification and management.
Effective: Summer 2008

SYSEN 540 **Intelligent System Applications** (3) Mathematical foundations of intelligent control and systems; linear quadratic self-tuning regulation and model reference adaptive control.
Effective: Summer 2002
Prerequisite: approval of instructor or department

SYSEN 545 **Neural Networks** (3) Artificial neural network architectures; perceptrons including training algorithms; extensive use of applications and simulations.
Effective: Summer 2002
Prerequisite: approval of instructor or department

SYSEN 550 **Creativity and Problem Solving I** (3) Foundations of individual problem solving, including creativity, cognitive

style and level, problem solving processes and techniques, the paradox of structure.
Effective: Spring 2006

SYSEN 552 **Creativity and Problem Solving II** (3) Theory and practical applications of group problem solving, including cognitive gap, coping behavior, agents of change, and managing cognitive diversity.
Effective: Summer 2005
Prerequisite: SYSEN 550

SYSEN 554 **Problem Solving Leadership** (3) Models, processes, and techniques for solving complex problems, managing problem solving diversity, and facilitating change through problem solving in socio-technical systems.
Effective: Summer 2007
Prerequisite: SYSEN 550, SYSEN 552

SYSEN 555 **Invention and Creative Design** (3) This course focuses on the creative design process which leads to the development of new products, processes, and systems (i.e. invention).
Effective: Spring 2001

SYSEN 566 **Advanced Telecommunications** (3) Review of digital communications and in-depth discussions on the latest communication architectures, protocols, and applications.
Effective: Summer 2002
Prerequisite: prior coursework in Data Communications or Introduction to Telecommunications or IT Network Management I and IT Network Management II

SYSEN 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1999

SYSEN 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1999

SYSEN 594A **Masters Research Paper** (3) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2010 Ending: Summer 2010

SYSEN 594C **Advanced Systems Engineering Studio** (3) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SYSEN 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

SYSEN 596A **Exercising Problem Solving Leadership in an Engineering Team** (3) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2010 Ending: Summer 2010

SYSEN 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1999

SYSEN 597A **Fundamentals of Continuous Improvement** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2010 Ending: Summer 2010

SYSEN 597A **Fundamentals of Continuous Improvement** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

SYSEN 597B **Fundamentals of Continuous Improvement II** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

Last Import from UCM: July 10, 2010 3:00 AM

Telecommunications (TELCM)

No courses for department code **TELCM** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Theatre (THEA)

THEA 400 **Advanced Theatre Projects** (1-6 per semester) Individual and group-directed study of in-depth projects involving reading, discussion, performance, and critical analysis by faculty.
Effective: Spring 1991
Prerequisite: seventh-semester standing or 12 credits in theatre or related areas

THEA 401Y (IL) **Theatre History I: Ancient to 1700** (3) Survey of drama and theatre from primitive rites through the Renaissance.
Effective: Spring 2008
Prerequisite: THEA 100 orTHEA 105

THEA 402W **Theatre History II: From 1700 to Present** (3) Survey of European drama and theatre from the eighteenth century through the modern period.
Effective: Spring 2008
Prerequisite: THEA 100 orTHEA 105

THEA 405 (US) **Theatre History: American Theatre** (3) Survey of American drama and theatre from the colonial period to the present.
Effective: Spring 2008
Prerequisite: THEA 100 orTHEA 105

THEA 406 (IL) **Theatre in Asia** (3) A survey of major theatre forms and traditions in Asia.
Effective: Spring 2008
Prerequisite: THEA 100 orTHEA 105

THEA 407 (US) (WMNST 407) **Women and Theatre** (3) A study of theatre practice and dramatic literature as informed by issues of gender, race, and ethnic background.
Effective: Spring 2008
Prerequisite: THEA 100 orTHEA 105

THEA 408 (US) **History of American Musical Theatre** (3) A survey of the history of American musical theatre presented in a social, cultural, and aesthetic prospective.
Effective: Spring 2008
Prerequisite: THEA 100 orTHEA 105

THEA 410 **Play Analysis** (3) Advanced skills in textual analysis of plays and screenplays.
Effective: Spring 2008
Prerequisite: THEA 100 orTHEA 105

THEA 412 (US;IL) (AAA S 412) **African American Theatre** (3) Exploration of the development of African American theatre from its roots in Africa through the diaspora, to the present time.
Effective: Spring 2008
Prerequisite: THEA 100 orTHEA 105

THEA 423 **Musical Theatre Performance III** (2) Studio training in the unique performance skills, repertoire and business of professional musical theatre.
Effective: Spring 2006
Prerequisite: THEA 224 seventh-semester standing in the Musical Theatre Option

THEA 424 **Musical Theatre Performance IV** (2) Studio training in the unique performance skills, repertoire and business of professional musical theatre.
Effective: Spring 2006
Prerequisite: THEA 423

THEA 425A **B.F.A. Acting Studio II** (2) Scene Study
Effective: Summer 2005
Prerequisite: THEA 115, THEA 225A Concurrent: THEA 425C

THEA 425C **B.F.A. Voice/Speech Studio II** (2) Advanced voice and speech training for BFA Musical Theatre students.
Effective: Summer 2005
Prerequisite: THEA 225C Concurrent: THEA 425A

THEA 426 **Children's Theatre** (3) Theories and practice of theatre for children.
Effective: Spring 2001
Prerequisite: THEA 150, THEA 220

THEA 427A **B.F.A. Acting Studio III** (2) Continuation of THEA 425A
Effective: Summer 2005
Prerequisite: THEA 425A Concurrent: THEA 427C

THEA 427C **B.F.A. Voice/Speech Studio III** (2) Stage Dialect Studies
Effective: Summer 2005
Prerequisite: THEA 425C Concurrent: THEA 427A

THEA 428 **Creative Drama** (3) Exercises and techniques for creative growth of children and adults, creative interaction for classroom, recreational, social, or therapeutic environments.
Effective: Spring 1991

Prerequisite: fifth-semester standing

THEA 429 **Theatre Performance Practicum** (1-3 per semester) Supervised experience in rehearsal and performance of significant roles.
Effective: Fall 1983
Prerequisite: admission by audition only

THEA 434 **Introduction to Directing** (3) Introduction to principles and procedures of play direction.
Effective: Spring 2001
Prerequisite: THEA 114 orTHEA 410;THEA 160, THEA 170 orTHEA 180

THEA 436 **Directorial Processes** (3) Preparing a play for production including the scoring of thescript, developing ground plan, casting, and staging projects in American realism.
Effective: Spring 1991
Prerequisite: THEA 434 and approval of instructor prior to registration

THEA 437 **Artistic Staff for Production** (1-6) To provide students with experience in choreography, dramaturgy, combat, staging, voice/speech, musical direction, assisting in direction, for major productions.
Effective: Summer 1989
Prerequisite: approval of the proposed assignment by the instructor prior to registration

THEA 439 **Projects in Directing** (1) Projects in directing for analysis and critique.
Effective: Spring 1991
Prerequisite: THEA 436 and approval of proposed project by instructor prior to registration

THEA 440 **Principles of Playwriting** (3) Structure, dramatic effect, characterization, and dialogue; the writing, reading, and criticism of original one-act plays.
Effective: Spring 2008
Prerequisite: THEA 100 orTHEA 105

THEA 447 **Make-Up Design for Production** (1-6) Materials, research, preparation, design, execution of make-up for major University Theatre productions.
Effective: Summer 1989
Prerequisite: approval of proposed assignment by the instructor prior to registration

THEA 450 **Advanced Topics in Scene Design** (3 per semester/maximum of 6) Design emphasis on a variety of production techniques, genre, and styles.
Effective: Spring 2006
Prerequisite: THEA 250 or portfolio review

THEA 451 **Drafting, Drawing, and Painting for the Theatre** (1) Drafting, freehand drawing including perspective methods and property development, rendering techniques, and painters' elevations.
Effective: Summer 1993
Prerequisite: THEA 251, THEA 252 and prior approval of instructor; first-year MFA theatre candidacy

THEA 452 **Advanced Presentation Techniques** (1) Advanced drafting, freehand drawing, rendering techniques, model building, and reproduction techniques.
Effective: Summer 1993
Prerequisite: THEA 451

THEA 453 **Advanced Scene Painting** (1 per semester, maximum of 12) Practicum study in painting techniques currently in professional use. Exploration of tools, available paints, and texturing materials.
Effective: Spring 1991
Prerequisite: THEA 253

THEA 454 **Period Research for the Theatre** (3) History of decor, styles, and movements in art and architecture.
Effective: Summer 1993
Prerequisite: BFA theatre arts candidacy or permission of instructor

THEA 455 **Twentieth Century Design** (3) Seminar study of movements, practices, methods, and designers in the modern theatre.
Effective: Summer 1993
Prerequisite: BFA theatre arts candidacy and prior approval of faculty

THEA 456 **Scenic Projects for Production** (1 per semester, maximum of 6) Special projects for production; painting, properties, design assistance.
Effective: Summer 1993
Prerequisite: approval of proposed projects by instructor prior to registration

THEA 457 **Scene Design for Production** (1 per semester/maximum of 6) Design and execution of production projects.
Effective: Fall 1983
Prerequisite: approval of proposed project by instructor prior to registration

THEA 458 **Digital Imaging for the Theatre** (1) Introduction to imaging software and its application in theatrical design and production.
Effective: Summer 2005
Prerequisite: Design or Visual Arts major or permission of program

THEA 459 **Theatre Portfolio & Business Practices** (2) Life as a professional theatre designer. Contracts, taxes, record-keeping, resumes, portfolios, interviewing, job hunting, and legal considerations.
Effective: Spring 2006

Prerequisite: B.F.A. Theatre candidacy

THEA 460 **Advanced Topics in Costume Design** (3 per semester/maximum of 6) Developing and executing a design concept in a variety of the performing arts.
Effective: Spring 2006
Prerequisite: THEA 260, THEA 464

THEA 461 **Advanced Topics in Costume Construction and Technology** (3 per semester/maximum of 6) A specialized course in advanced costume construction techniques and theatrical costume technologies.
Effective: Spring 2006
Prerequisite: THEA 261

THEA 464 **History of Fashion** (3) Survey of dress from Egyptian period to contemporary fashion.
Effective: Spring 2008
Prerequisite: THEA 100 orTHEA 105

THEA 465 **History of Fashion II** (3) Survey of dress from 1800 to contemporary fashion.
Effective: Summer 2004
Prerequisite: THEA 100 orTHEA 105

THEA 466 **Costume Construction for Production** (1 per semester/maximum of 6) Execution of production projects in construction and shop management.
Effective: Fall 1983
Prerequisite: approval of proposed project by instructor prior to registration

THEA 467 **Costume Design for Production** (1 per semester/maximum of 6) Design and execution of production design projects.
Effective: Fall 1983
Prerequisite: approval of proposed project by instructor prior to registration

THEA 470 **Advanced Topics in Lighting Design** (3 per semester/maximum of 6) Advanced Topics in Lighting Design will rotate through opera, dance, non-traditional spaces, architecture, advanced technology, and color theory.
Effective: Spring 2006
Prerequisite: THEA 270

THEA 471 **Stagelighting Design II** (3) Advanced training through lectures and laboratory experience with color, shape, and form as it relates to the specifics of illumination.
Effective: Summer 1993
Prerequisite: THEA 470

THEA 472 **Lighting Technology** (3) An introduction to the basics of electricity, dimmer protocols, lightboard programming, lighting paperwork, and master electrician & assistant lighting design practices.
Effective: Summer 2005
Prerequisite: THEA 270 or equivalent

THEA 473 **The History of Stage Lighting Technology** (3) An exploration of the history of stage lighting from the development of electric light to the present.
Effective: Summer 1993
Prerequisite: THEA 270

THEA 475 **Creative Lighting in the Entertainment Arts** (3) Survey/analysis of the growth of creative lighting in venues other than theatre; advances in design for the entertainment world.
Effective: Summer 1993
Prerequisite: THEA 270 and consent of instructor

THEA 477 **Lighting Design for Production** (1 per semester/maximum of 6) Design and execution of design projects.
Effective: Fall 1983
Prerequisite: approval of proposed project by instructor prior to registration

THEA 480 **Advanced Topics in Technical Direction for the Theatre** (3 per semester/maximum of 6) Advanced study of the methods, materials, equipment, facilities, concepts and processes associated with Technical Direction for the Theatre.
Effective: Summer 2005
Prerequisite: THEA 280

THEA 480A **Technical Production III** (3) Technical draftings; focus on the creation of packages of drawings based on designer elevations from actual productions; drafting intensive.
Effective: Spring 2001
Prerequisite: THEA 150, THEA 251, THEA 381

THEA 480B **Technical Production IV** (3) Discussion of problems of the technical director: personnel management, time management, scheduling, budgeting, purchasing, and the technical drawing of production.
Effective: Spring 1995
Prerequisite: THEA 381

THEA 481 **Stage and Production Management** (3) Production planning, scheduling, assignment of personnel, rehearsal procedures, and budgeting.
Effective: Fall 1983
Prerequisite: THEA 170, THEA 180

THEA 483A **Technical Production V** (3) Calculation for, and specification of advanced wood structures and rigging for theatrical production.

Effective: Summer 1993
Prerequisite: THEA 480A

THEA 483B **Technical Production VI** (3) Tool maintenance necessary in the scene shop and the procedures, tracking, and repair information necessary for the technical director.
Effective: Summer 1993
Prerequisite: THEA 480B

THEA 484 **Sound Recording Techniques** (3) Multi-track audio recording and post production techniques.
Effective: Summer 2005
Prerequisite: INART 258 orTHEA 285

THEA 485 **Sound for Theatre Production** (3) Aesthetics of live and recorded sound; recording and editing techniques for the stage.
Effective: Spring 2001
Prerequisite: THEA 100, THEA 150

THEA 486 **Stage Management for Production** (1-9) Stage manager for University Theatre production.
Effective: Summer 1996
Prerequisite: approval of proposed assignment by instructor prior to registration

THEA 487 **Technical Projects for Production** (1 per semester/maximum of 6) Execution of practical production projects.
Effective: Fall 1983
Prerequisite: approval of proposed project by instructor prior to registration

THEA 489 **Theatre Production Practicum** (1 per semester) Supervised experience in production techniques. For theatre majors only.
Effective: Spring 2001
Prerequisite: THEA 160, THEA 170 orTHEA 180

THEA 495 **Internship Practicum** (1-6 per semester/maximum of 12) Professional field experience in theatre performance, production, and management assignments.
Effective: Fall 1983
Prerequisite: approval of internship by instructor prior to registration

THEA 496 **Independent Studies** (1-18) Creative projects, including research and design, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

THEA 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

THEA 497A **Theatre Professional Preparation** (3) Profession Preparation for undergraduate theatre students.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

THEA 497B **Musical Theatre Studio V** (2) Senior Musical Theatre Studio for Musical Theatre Majors.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

THEA 497C **Camera Acting** (3) Acting for the camera techniques.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

THEA 497D **Writer's Room** (3) Writing workshop for theatre productions.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

THEA 497E **Properties Design and Construction** (3) Design and Construction of props for production.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

THEA 497F **Comedy Writing** (3) Comedy writing for performance.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

THEA 497G **The Social History of the Theater** (3) We will explore plays and cultures that reflect and comment upon the ills and triumphs of society over 2,500 years.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

THEA 497H **Honors London Theatre Study** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

THEA 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1994

THEA 498A **Theatre Capstone Experience** (3) The culminating course for majors concentrating on reflective analyses and a practical laboratory experience in the mounting of a production.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

THEA 499 (IL) **Foreign Studies--Theatre Arts** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005
Prerequisite: approval by department

THEA 500 **Theatre Research: Sources and Procedure** (3) Source materials and techniques as applied to theatre research; the form and content of theses and monographs.
Effective: Winter 1978

THEA 501 **Production Process** (3) Exploration and development of the creative processes which lead to realized production.
Effective: Summer 1993
Prerequisite: MFA theatre design and technology students

THEA 502 **Creative Collaboration** (3) Theory and process of creative collaboration between the theatre artistic and production staffs.
Effective: Summer 1993
Prerequisite: MFA theatre candidate

THEA 503 **Theatre Criticism and Theory I** (3) Examining significant documents of theory/criticism from Greek theatre to Collier. Theory applied to specific plays within that period.
Effective: Summer 1990
Prerequisite: THEA 500

THEA 504 **Theatre Criticism and Theory II** (3) Examining sifnificant documents of theory/criticism from collier controversy to the present. Theory applied to specific plays within that period.
Effective: Summer 1990
Prerequisite: THEA 500

THEA 505 **Masterpieces in Production I** (3) Dramatic structure, theatrical validity, production viability of great plays from Greek to eighteenth-century. Drama as blueprint for production.
Effective: Summer 1990

THEA 506 **Masterpieces in Production II** (3) Dramatic structure, theatrical validity, production viability of masterworks of theatre. Drama as the blueprint for production. Offered in London, England.
Effective: Fall 2004
Prerequisite: THEA 500, THEA 505

THEA 507 **Masterpieces in Production III** (3) Dramatic structure, theatrical validity, production viability of major American plays from Tyler to the present. Drama as blueprint for production.
Effective: Spring 1990

THEA 508 **Experiential Analysis of Italian Design Styles** (3) Applications of Historical and Cultural Perspectives in Dramatic Production. Offered in Italy.
Effective: Fall 2009

THEA 509 **Experiential Analysis of Eastern European Styles** (3) Applications of Historical and Cultural Perspectives in Dramatic Production. Offered in Prague and Budapest.
Effective: Fall 2009

THEA 510 **Experiential Analysis of Period Style** (3) Applications of Visual/Spatial History in Dramatic Production. Offered in London, England.
Effective: Spring 2004

THEA 524 **Acting V** (2) Advanced scene study and class projects; development of individual student repertoires.
Effective: Spring 1996
Prerequisite: THEA 523A

THEA 526 **Acting for the Camera** (2) Development of techniques and skills necessary for media performance: commercials, soap operas, television drama, etc.
Effective: Spring 1996
Prerequisite: THEA 524, THEA 525

THEA 529 **Performance Monograph** (1-2 per semester, maximum of 4) The development and presentation of M.F.A. monographs in acting, design/ production, or directing.
Effective: Spring 1996
Prerequisite: permission of graduate supervisor

THEA 530 (THEA 222) **Rehearsal Methods for the Director** (3) Theory and practice in approaches, procedures, and techniques in mounting a play.
Effective: Fall 1985
Prerequisite: THEA 410, THEA 434, permission of instructor prior to registration

THEA 531 **Directorial Styles and Approaches** (2) Seminar in advanced theory and directorial practice. Designed for the advanced student of directing.
Effective: Fall 1999
Prerequisite: THEA 530

THEA 532 **Directing Seminar** (2) Career orientation: resume preparation, interviewing, unions, survey of directorial opportunities, and review of major contemporary directors and practices.
Effective: Fall 1999
Prerequisite: THEA 531

THEA 536 **Directing for the Camera** (2) Development of techniques and skills necessary for media directing: commercials, soap operas, television drama, etc.
Effective: Summer 1999
Prerequisite: THEA 531, THEA 532

THEA 537 **Artistic Staff for Performance in Production** (1 per semester/maximum of 6) Practical experience in choreography, dramaturgy, combat, special staging, voice/speech work, musical direction, or assisting in stage direction for university theatre productions.
Effective: Spring 1990
Prerequisite: approval of the assignment by the produced (Chair) prior to registration

THEA 539 **Projects in Directing** (1-2) Approved directing projects for the M.F.A. directing student.
Effective: Spring 1990
Prerequisite: THEA 410 ; admission to the M.F.A. directing program

THEA 543 **Projects in Playwriting** (1-9) Preparation of the script for revision during and following production of the student's original play.
Effective: Fall 1983
Prerequisite: production approval

THEA 550 **Scenic Design III** (3 per semester/maximum of 9) Advanced design, concentration on conceptualization, visual communication skills, portfolio production.
Effective: Fall 1983
Prerequisite: THEA 450 portfolio review

THEA 551 **Scenic Design IV** (1-6) Advanced projects in scenic design.
Effective: Fall 1983
Prerequisite: THEA 550 or protfolio review

THEA 552 **Scene Design III** (3) Design and project execution of plays and industrial installations.
Effective: Summer 1994
Prerequisite: THEA 551 MFA theatre design candidacy

THEA 553 **Scene Design IV** (3) Design of plays for proper theatre and mass media.
Effective: Summer 1994
Prerequisite: THEA 552 MFA theatre design candidacy

THEA 554 **Period Research for the Theatre** (3) History of decor, styles, and movements in art and architecture.
Effective: Spring 1994
Prerequisite: MFA candidacy

THEA 555 **Twentieth Century Design** (3) Seminar study of movements, practices, methods, and designers in the modern theatre.
Effective: Spring 1994
Prerequisite: MFA camdidacy or approval of the theatre arts department

THEA 559 **Portfolio Presentation** (1 per semester, maximum of 2) Current practice in portfolio development and presentation to client and employer.
Effective: Spring 1994
Prerequisite: prior approval of faculty

THEA 560 **Costume Design III** (3 per semester/maximum of 9) Advanced costume design with emphasis on total production concept.
Effective: Fall 1983
Prerequisite: THEA 460 or portfolio review

THEA 562 **Costume Design: Rendering Techniques** (3) Exploration and development of various rendering techniques with application to costume design.
Effective: Spring 1994
Prerequisite: MFA candidacy

THEA 564 **History of Costume** (3) Exploration of dress from Egyptian to modern.
Effective: Fall 1983
Prerequisite: permission of instructor prior to registration

THEA 568A **Costume Design for Related Performance Arts** (3) Exploration and development of costume design with

application to the other arts (opera/dance/film).
Effective: Spring 1994
Prerequisite: MFA candidacy

THEA 568B **Costume Design: Production Concepts** (3) Exploration and development of costume design for specific production concepts.
Effective: Spring 1994
Prerequisite: MFA candidacy

THEA 569 **Costume Construction: Crafts** (3) Exploration and development of various crafts techniques with application to costume construction (i.e. masks, jewelry, armor, millinery, footwear, wigs).
Effective: Spring 2010

THEA 570 **Stage Lighting Design III** (3) Advanced techniques in the art of theatrical lighting design.
Effective: Fall 1983
Prerequisite: THEA 470

THEA 571 **Stage Lighting Design IV** (3) Course addresses individual problems in the stage lighting design process concentrating on the development of skills necessary for processional examination.
Effective: Spring 1994
Prerequisite: THEA 570

THEA 580 **Technical Production III** (3) Design consultation and specification of equipment, systems, and movable structures for new theatres; structures and projection devices for production.
Effective: Fall 1983
Prerequisite: THEA 480B

THEA 580A **Technical Production VII** (3) Mechanical design for the theater; calculation for and specification of, DC motors and controls, sprockets, chain drives, gearboxes, gearing, shafts for the movement of scenery.
Effective: Spring 1994
Prerequisite: THEA 480A, THEA 483A

THEA 580B **Technical production VIII** (3) Planning of the theater shop; emphasis on space design, renovation, upgrade, planning, outfitting, and safety; selection of tools and tool support systems.
Effective: Spring 1994
Prerequisite: THEA 480B

THEA 581 **Theatre Administration I** (3) Organizational structure and personnel; contracts; unions; budget preparation and control; administrative styles in theatre, opera, and dance.
Effective: Fall 1983
Prerequisite: THEA 481

THEA 582 **Theatre Administration II** (3) Fund raising; promotion; audience development; audience survey technique; program development and startegies.
Effective: Fall 1983
Prerequisite: THEA 581

THEA 583 **Projects in Theatre Administration, Management, and Operations** (1-6) No description.
Effective: Winter 1978

THEA 585 **Theatre Planning** (3) Processes and problems in planning and designing theatres: performance, audience, and technical requirements.
Effective: Winter 1978

THEA 586 **Stage Management for Production** (1 per semester/maximum of 6) Practical experience in production stage management for mainstage university theatre productions.
Effective: Spring 1990
Prerequisite: approval of the proposed assignment by the instructor prior to registration

THEA 589 **Design/Production Monograph** (1-4) The development and presentation of M.F.A. monographs in design/production.
Effective: Summer 1995

THEA 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

THEA 595 **Internship** (1-3) Professional field experience in theatre performance, production, and management assignments.
Effective: Spring 1987
Prerequisite: approval of internship by instructor prior to registration

THEA 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

THEA 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

THEA 597A **Director/Design Collaboration** (3) Director and Designer Collaboration for MFA students.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010
Prerequisite: admittance to MFA Program

THEA 597B **Design Collaboration for Directors** (2) Design course for MFA Directing Candidates.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010
Prerequisite: admittance to MFA in Directing

THEA 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

THEA 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching of theatre and film classes under senior faculty supervision.
Effective: Fall 1983

THEA 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

THEA 811 **International Studio Intensive** (1-9) The course enhances the ability of the actor to meet the voice and speech demands for the performance of Shakespeare.
Effective: Fall 2007

THEA 811A **International Production Studio Intensive** (1 per semester/maxium of 9) Intensive studio application of processes and procedures within specific theatre disciplines as influenced by the work of international professionals.
Effective: Summer 2009
Prerequisite: THEA 500, THEA 505

THEA 820A **Acting I** (4) Exercises, monologue, and scene study. Principal focus on realism.
Effective: Spring 2009
Prerequisite: admission to the MFA performance acting program

THEA 820B **Movement for Actors I** (2) Techniques and skills in physical expression, awareness, control, and stage movement.
Effective: Fall 2007
Prerequisite: admission to MFA performance acting program

THEA 820C **Voice and Speech I** (2) Vocal techniques for the actor: articulation, voice control, support, and projection.
Effective: Fall 2007
Prerequisite: admission to the MFA performance acting program

THEA 821A **Acting II** (3) A continuation of THEA 520A.
Effective: Fall 2007
Prerequisite: THEA 820A

THEA 821B **Movement for Actors II** (2) A continuation of THEA 520B.
Effective: Fall 2007
Prerequisite: THEA 820B

THEA 821C **Voice and Speech II** (2) A continuation of THEA 520C.
Effective: Fall 2007
Prerequisite: THEA 820C

THEA 822A **Acting III** (3) This course will focus on the research and development of skills necessary to perform the plays of Shakespeare and his contemporaries.
Effective: Fall 2007
Prerequisite: THEA 821A

THEA 822B **Movement for Actors III** (2) Advanced techniques and skills in physical expression.
Effective: Fall 2007
Prerequisite: THEA 821B

THEA 822C **Voice and Speech III** (2) Advanced voice and speech training for the actor: articulation, resonance, and vocal technique related to verse and heightened language drama.
Effective: Fall 2007
Prerequisite: THEA 821C

THEA 823A **Acting IV** (3) Students prepare audition material for their New York Showcase for theatrical agents.
Effective: Fall 2007
Prerequisite: THEA 822A

THEA 823B **Movement for Actors IV** (2) Fundamentals of unarmed and armed stage combat with emphasis on enactment of safe and effective stage fights.

Effective: Fall 2007
Prerequisite: THEA 822B

THEA 823C **Voice and Speech IV** (2) A study of stage dialects.
Effective: Fall 2007
Prerequisite: THEA 822C

THEA 824 **Acting for the Camera** (6) This course introduces the actor to the skills necessary for successful performance in television, film, video and commercial venues.
Effective: Summer 2009
Prerequisite: THEA 823A, THEA 823B, THEA 823C

THEA 825A **Acting Professionally/NYC Showcase** (3) Development of audition repertoire; study of business topics; development, rehearsal and performance of NYC showcase.
Effective: Spring 2009
Prerequisite: THEA 823A, THEA 823B, THEA 823C

THEA 825C **Professional Repertory Performance** (3) Rehearsal and performance of theatre productions at Penn State featuring third year MFA actors and professional guest artists.
Effective: Summer 2007
Prerequisite: THEA 823A, THEA 823B, THEA 823C

THEA 830 **Interdisciplinary Theatrical Design Studio** (3-6 per semester/maximum of 36) Advanced analysis, graphic, and presentation techniques for evolving and communicating design for the stage.
Effective: Fall 2009

THEA 847 **Makeup Design for Production** (1 per semester/maximum of 6) Makeup design and execution for major university theatre production.
Effective: Spring 2010

THEA 857 **Scenic Design for Production** (1 per semester/maximum of 6) Design and execution of production design projects.
Effective: Summer 2010

THEA 861 **Costume Design and Construction** (1-6 per semester/maximum of 18) Advanced special projects for the graduate designer and costumer.
Effective: Spring 2010
Prerequisite: THEA 461 orTHEA 560

THEA 863 **Costume Construction: Draping** (3) Exploration and development of various draping techniques with application to costume construction.
Effective: Spring 2010

THEA 865 **Costume Construction: Period Reconstruction** (3) Exploration and development of reproduction techniques relating to period clothing, and their application to costume construction.
Effective: Spring 2010

THEA 866 **Costume Construction for Production** (1 per semester/maximum of 6) Execution of production in construction and shop management.
Effective: Summer 2010

THEA 867 **Costume Design for Production** (1 per semester/maximum of 6) Design and execution of production design projects.
Effective: Summer 2010

THEA 877 **Lighting Design for Production** (1 per semester/maximum of 6) Design and execution of production design projects.
Effective: Spring 2010

THEA 887 **Technical Projects for Production** (1 per semester/maximum of 6) Execution of assigned technical projects for theatre production.
Effective: Summer 2010

Last Import from UCM: July 10, 2010 3:00 AM

Training and Development (TRDEV)

TRDEV 418 **Instructional Methods in Training and Development** (3) Emphasis on teaching techniques and learning principles used by trainers and supervisors in business, health care, and government.
Effective: Spring 1986

TRDEV 421 **Presentation Skills for New Trainers** (3) The effective use of platform skills for training, including the use of voice, audio-visual aids, group facilitation, and personal presence.
Effective: Summer 1993
Prerequisite: admission to M.ED. program in Training and Development

TRDEV 431 **Basic Technology Skills in Training** (3) Introduces basic training technology skills: electronic communications, word processing, spreadsheets, databases; provides skills to create and maintain electronic presentations and programs.
Effective: Spring 1999
Prerequisite: admission to the Training and Development Program Training and Development Certificate Program or permission of the Program

TRDEV 432 **Video Production in Training** (3) Introduces learners to the equipment, design, and production of video instruction for the workplace.
Effective: Spring 2002
Prerequisite: TRDEV 418, TRDEV 431 or permission of program

TRDEV 460 **Foundations in Training and Development** (3) Roles in training and development, relationships between training and development and other organizational structures, and the principles of training design.
Effective: Spring 1986

TRDEV 465 **Performance Analysis** (3) This course involves the systematic analysis of employee performance in organizations to identify performance problems, diagnose causes, and specify solutions.
Effective: Spring 2005
Prerequisite: TRDEV 460, TRDEV 418 or permission of the program

TRDEV 470 **Human Resource Development Tools and Techniques** (3) Examination of contemporary strategies, tools, and techniques for designing human resource functions to promote employee learning and performance within organizations.
Effective: Spring 2005
Prerequisite: TRDEV 460, TRDEV 418 or permission of the program

TRDEV 475 **Career and Succession Management** (3) This course involves the study of a systematic approach for integrating career planning and succession planning programs in organizations.
Effective: Spring 2005
Prerequisite: TRDEV 460, TRDEV 418 or permission of the program

TRDEV 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1986

TRDEV 505 **Project Management in Training and Development** (3) Introduces skills for managing complex training and development projects, such as developing timelines, creating budgets, and allocating resources.
Effective: Spring 2006
Prerequisite: TRDEV 418, TRDEV 460 or permission of the program

TRDEV 507 **Program Evaluation** (3) Evaluation of educational and other human services programs; preparation and presentation of the evaluation proposal.
Effective: Summer 2002
Prerequisite: TRDEV 418 andTRDEV 460 or permission of program

TRDEV 518 **Systematic Instructional Design in Training** (3) Study of theory and practice of systematic instructional design. Application of instructional design principles to training problems in local organizations.
Effective: Summer 2002
Prerequisite: TRDEV 418 andTRDEV 460 or permission of program

TRDEV 520 **Learning Styles and Learning Theory in Training** (3) Adult learning theory and its application to training and development.
Effective: Spring 2001
Prerequisite: TRDEV 418, TRDEV 460

TRDEV 531 **Technology in Training** (3) Applications of various new instructional technologies to training problems.
Effective: Summer 2002
Prerequisite: TRDEV 431 or permission of the program

TRDEV 532 **Web-Based Training** (3) Introduction to the design and development of websites for computer-based instruction in the workplace.
Effective: Fall 2001

Prerequisite: TRDEV 418, TRDEV 431 or permission of the program

TRDEV 533 **Distance Learning for Trainers** (3) This course will explore a variety of instructional technologies which have direct applications in training adult learners at a distance.
Effective: Summer 2002
Prerequisite: TRDEV 418 andTRDEV 431 or permission of program

TRDEV 565 **Implementing Training and Development Programs** (3) The critical analysis of theories, strategies, and techniques for planning and implementing TRDEV programs to enhance employee learning and performance.
Effective: Spring 2006
Prerequisite: TRDEV 460, TRDEV 465 or permission of the program

TRDEV 583 **Issues in Training** (3) An issue seminar addressing topics such as an unprepared work force, diversity, recession, and issues generated by the class.
Effective: Summer 2002
Prerequisite: TRDEV 418 andTRDEV 460 or permission of the program

TRDEV 587 **Master's Paper** (1-6) The development of an original master's project (paper, production, or practicum) supervised and judged by an appropriate faculty committee.
Effective: Spring 1986

TRDEV 588 **Research Designs Applied in Training** (3) Planning experimental, observation, survey and qualitative research designs for training setting needs such as needs assessments and evaluations.
Effective: Spring 1995
Prerequisite: EDUC 586, TRDEV 418, TRDEV 460

TRDEV 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Fall 2001
Prerequisite: prior approval of proposed assignment by instructor

TRDEV 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1988

TRDEV 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be tuaght in one year or semester.
Effective: Spring 1987

Last Import from UCM: July 10, 2010 3:00 AM

Turfgrass (TURF)

TURF 425 **Turfgrass Cultural Systems** (3) A study of turfgrass maintenance practices and how their interrelationships can be utilized to develop meanagement systems.
Effective: Fall 2001
Prerequisite: SOILS 101, TURF 235

TURF 434 **Turfgrass Edaphology** (3) Characterization of soil physical properties for the establishment and maintenance of sports turf; includes root-zone construction.
Effective: Fall 2007
Prerequisite: SOILS 101, TURF 235

TURF 435 **Turfgrass Nutrition** (4) Study of turfgrass nutrition and growth; emphasizing constructed and mineral soil fertility, nutrient uptake and function, and fertilizer use efficiency.
Effective: Spring 2004
Prerequisite: SOILS 101, TURF 235

TURF 436W **Turfgrass Management Systems** (3) Case study and discussion considering integrated management of selected turfgrass sites; emphasis on problem analysis, principle application, and decision making.
Effective: Fall 1995
Prerequisite: TURF 235, TURF 236, TURF 425

TURF 489 **Supervised Experience in College Teaching** (1-3) Participate with instructors in teaching and undergraduate turfgrass course. Assist with teaching an evaluation and with development of instructional materials.
Effective: Spring 1998
Prerequisite: TURF 235

TURF 490 **Colloquium** (1) Oral presentations developed by students in consultation with the course instructor.
Effective: Summer 1997
Prerequisite: seventh semester standing

TURF 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1992
Prerequisite: prior approval of proposed assignment by instructor

TURF 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2000

TURF 850 **Turfgrass Physiology** (3) Lectures, reading assignments, and problems designed to develop student competency in plant physiology as it relates to turfgrass management strategies.
Effective: Summer 2010

TURF 852 **Turfgrass Health Management** (3) Lectures and exercises designed to develop student competency in solving turfgrass pest problems, as well as disease resistance in turfgrass.
Effective: Spring 2010

TURF 853 (PPATH 853) **Interpreting Turfgrass Science Literature** (3) Introduction to turfgrass research publications, interpretation of the data, and discussion of the significance of the results.
Effective: Summer 2010

Last Import from UCM: July 10, 2010 3:00 AM

Ukrainian (UKR)

UKR 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Summer 1994

UKR 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2007

UKR 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: July 10, 2010 3:00 AM

Vet & Biomed Sci (VB SC)

VB SC 402W (ENT 402) **Biology of Animal Parasites** (3) An intorduction to animal parasitology. Emphasis placed on host/parasite interactions, parasites of zoonotic importance, control programs and taxonomy.
Effective: Spring 2010
Prerequisite: BIOL 110

VB SC 405 **Laboratory Animal Science** (3) Principles involved in maintaining laboratory animals. Emphasis is on management, preventive medicine, and surgical considerations used in laboratory animal colonies.
Effective: Spring 2009
Prerequisite: AN SC 201, AN SC 301, BIOL 110

VB SC 407 **Dairy Herd Health Programs** (2) A discussion of health programs for dairy herds to assist in the control of infectious and metabolic diseases of dairy animals.
Effective: Fall 2007
Prerequisite: AN SC 301, AN SC 310, AN SC 427, AN SC 431W

VB SC 418 **Bacterial Pathogenesis** (2) Study of molecular interactions between bacterial pathogens and their hosts.
Effective: Fall 2007
Prerequisite: MICRB 201, MICRB 410

VB SC 420 **General Animal Pathology** (3) Nature and mechanisms of the disease process including degenerations, growth disturbances, inflammation, host-parasite relationships and neoplasia.
Effective: Fall 2007
Prerequisite: AN SC 423 orBIOL 472, MICRB 201, AN SC 301

VB SC 421 (BIOL 421) **Comparative Anatomy of Vertebrates** (4) The comparative anatomy of representative vertebrate animals, discussed from a descriptive and an evolutionary viewpoint.
Effective: Spring 2008
Prerequisite: BIOL 240W

VB SC 423W **Pathology of Nutritional and Metabolic Diseases** (3) Overview of nutritional and metabolic diseases of animals integrating concepts from biochemical and physiologic abberrations to clinical applications.
Effective: Spring 2008
Prerequisite: B M B 211 orB M B 401, AN SC 301 or equivalent nutrition course

VB SC 425 (AN SC 425) **Principles of Avian Diseases** (3) Principles of pathogenesis and control of diseases in poultry and other avian populations. Case material used where appropriate.
Effective: Spring 2009
Prerequisite: AN SC 201, BIOL 110, MICRB 201

VB SC 430 **Principles of Toxicology** (3) Introduction to the biomedical aspects of toxicology with emphasis on the mechanisms and fate of chemical interaction with biological systems.
Effective: Fall 2007
Prerequisite: BIOL 110, BIOL 240W;B M B 211 orB M B 401

VB SC 431 (E R M 431) **Environmental Toxicology** (3) Effects of pollutants on animal health at the chemical, physical, and cellular level.
Effective: Spring 2011 Future: Spring 2011
Prerequisite: BIOL 110, CHEM 110, CHEM 112

VB SC 432 (MICRB 432, B M B 432) **Advanced Immunology: Signaling in the Immune System** (3) The study of signaling pathways that regulate the immune response.
Effective: Fall 2007
Prerequisite: B M B 400, MICRB 410

VB SC 433 (B M B 433) **Molecular and Cellular Toxicology** (3) In-depth coverage of processes by which drugs/chemicals interact with biological systems and the experimental approaches used to study these interactions.
Effective: Fall 2007
Prerequisite: B M B 401

VB SC 435 (B M B 435, MICRB 435) **Viral Pathogensis** (2) A study of the molecular, immunological, and pathological aspects of viral diseases as well as laboratory methods of diagnosis.
Effective: Fall 2007
Prerequisite: MICRB 201;B M B 251 andB M B 252 orBIOL 110 andBIOL 230W

VB SC 444 **Epidemiology of Infectious Diseases** (3) An introduction to epidemiology of infectious diseases with emphasis on unders tanding epidemiologic concepts for identifying, preventing and controlling infectious diseases.
Effective: Fall 2007
Prerequisite: BIOL 220, STAT 200 orSTAT 250

VB SC 445 **Molecular Epidemiology of Infectious Diseases** (3) A discussion and practicum of the molecular laboratory techniques used to study molecular epidemiology of infectious diseases.
Effective: Fall 2007
Prerequisite: BIOL 220, STAT 200 orSTAT 250 andVB SC 444

VB SC 448W **Current Topics in Immunology** (3) Study of current approaches and questions driving research in

immunology and infectious diseases.
Effective: Fall 2007
Prerequisite: MICRB 410, B M B 400

VB SC 451 **Immunotoxicology of Drugs and Chemicals** (3) An in depth discussion of the effect of xenobiotics and drugs on host immune mechanisms.
Effective: Spring 2008
Prerequisite: VB SC 433 andMICRB 410

VB SC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2007

VB SC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2007

VB SC 511 (BMMB 511, IBIOS 511) **Molecular Immunology** (2) The study of molecular and biochemical events that influence immune responses and define current questions in immunology.
Effective: Spring 2008
Prerequisite: B M B 400, MICRB 410

VB SC 514 (NUTRN 514) **Prostaglandins and Leukotrienes** (3) Biochemical, physiological, and nutritional aspects of arachidonic acid and related essential fatty acid metabolism. Structure-activity relationships of prostaglandins, prostacyclins, thromboxanes, and leukotrienes.
Effective: Fall 2009
Prerequisite: BIOCH 402 orBIOCH 437

VB SC 515 (BMMB 515) **Macrophage Biology** (2) The role of macrophages at the interface between innate and adaptive immunity.
Effective: Spring 2008
Prerequisite: B M B 400, MICRB 410, VB SC 432

VB SC 516 (BMMB 516) **Viral Evasion of Immune Responses** (2) An in-depth study of the interaction of viruses and cells and mechanisms that permit viruses to escape immunity.
Effective: Spring 2008
Prerequisite: B M B 400, MICRB 410

VB SC 518 (BMMB 518) **T Cell Recognition and Development** (2) An in-depth analysis of the mechanisms of T cell recognition, activation and development, and the acquired immune response.
Effective: Spring 2008
Prerequisite: B M B 400, MICRB 410, VB SC 432

VB SC 519 (BMMB 519) **Development of the Hematopoietic/Vascular System** (2) An in-depth analysis of current research in the development of the hematopoietic and vascular system during embryogenesis and fetal development.
Effective: Spring 2008
Prerequisite: B M B 400, MICRB 410, VB SC 432

VB SC 520 **Pathobiology** (3) The course deals with the mechanism of disease. Topics are: homeostasis, vascular injury, inflammation, neoplasia, genetic disorders, and biochemical toxicology.
Effective: Fall 2009
Prerequisite: V SC 420;BIOCH 401 orBIOCH 437

VB SC 530 (IBIOS 530) **Regulation of Gene Expression by Xenobiotics** (3) The mechanisms by which foreign chemicals alter gene expression and the techniques used to examine this effect are examined.
Effective: Spring 2008
Prerequisite: B M B 401 or equivalent vb sc 433/b m b 433 recommended

VB SC 532 (IBIOS 532) **Developmental and Reproductive Toxicology** (3) Effects of environmental chemicals, nutrients and drugs on embryo/fetal development and maternal/paternal toxicity.
Effective: Spring 2008
Prerequisite: B M B 402

VB SC 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2007

VB SC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2007

VB SC 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject whihc may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2008

VB SC 600 **Thesis Research** (1-15) No description.

Effective: Fall 2007

VB SC 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 2007

VB SC 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Experience in preparing and conducting lectures/laboratories and assembling materials for laboratories.
Effective: Fall 2007

Last Import from UCM: July 10, 2010 3:00 AM

Veterinary Science (V SC)

V SC 489 (BIOTC 489) **Animal Cell Culture Methods** (3) AN OVERVIEW OF ANIMAL CELL CULTURE METHODOLOGY, AND ITS PRACTICAL APPLICATION IN BIOPROCESS TECHNOLOGY.
Effective: Spring 1996
Prerequisite: MICRB 201, MICRB 202;BIOL 230W ORB M B 251

V SC 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1995

V SC 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Spring 1992

V SC 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Spring 1992

Last Import from UCM: July 10, 2010 3:00 AM

Wildlife (WILDL)

No courses for department code **WILDL** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Wildlife and Fisheries Science (W F S)

W F S 406 **Ornithology Laboratory** (1) Laboratory and field identification of Pennsylvania birds, avian ecology and behavior, field survey techniques.
Effective: Fall 2006
Prerequisite: or concurrent:W F S 209, W F S 407

W F S 407 **Ornithology** (3) Introduction to the biology, ecology, adaptations, and conservation of birds.
Effective: Fall 1996
Prerequisite: BIOL 110, W F S 209

W F S 408 **Mammalogy** (3) Identification, systematics, characteristics, adaptations, ecology, behavior, natural history and conservation, and socio-economic aspects of mammals.
Effective: Spring 1995
Prerequisite: BIOL 110

W F S 409 **Mammalogy Laboratory** (1) Laboratory and field identification of mammals, ecology and behavior of mammals, field survey techniques.
Effective: Fall 2006
Prerequisite: or concurrent:W F S 209, W F S 408

W F S 410 **General Fishery Science** (3) Introduction to the study, management, and uses of fish populations; methods of investigation, culture, and harvest of fishes.
Effective: Fall 2001
Prerequisite: BIOL 210 orW F S 209

W F S 422 **Ecology of Fishes** (3) Role of fishes in aquatic communities and general ecosystems. Environmental factors influencing fish as individuals, populations, and communities.
Effective: Spring 1995
Prerequisite: BIOL 220W orW F S 209

W F S 424 **Aquaculture** (2) Scientific basis of aquaculture. Fundamental management skills for hatchery managers.
Effective: Summer 1988
Prerequisite: one course in biology

W F S 430 (FOR 430) **Conservation Biology** (3) The application of biological principles to issues in the conservation of biodiversity.
Effective: Spring 1995
Prerequisite: BIOL 220W orFOR 308

W F S 435 (E R M 435) **Limnology** (3) Biogeochemistry and natural history of freshwater ecosystems.
Effective: Summer 2007
Prerequisite: BIOL 110, BIOL 220W, CHEM 110

W F S 436 (E R M 436) **Limnological Methods** (3) Application of current methodologies to evaluate the biological, chemical, and physical characteristics of aquatic ecosystems.
Effective: Spring 2010
Prerequisite: BIOL 110 andCHEM 110

W F S 440 **Natural Resources Public Relations** (3) The course prepares students to integrate public relations concepts with principles of natural resources management at the community level.
Effective: Fall 2001
Prerequisite: SPCOM 100 seventh-semester standing and 6 credits of W F S FOR or R P M

W F S 446 **Wildlife and Fisheries Population Dynamics** (3) Concepts and estimation of mammalian, avian, and fish populations; processes of mortality, natality, growth, and regulation.
Effective: Summer 1994
Prerequisite: W F S 209

W F S 447W **Wildlife Management** (3) Management of renewable wildlife resources by applying ecological concepts, habitat evaluation, and decision-making; writing and editing reports are emphasized.
Effective: Fall 2001
Prerequisite: W F S 209 orW F S 309

W F S 450 (E R M 450) **Wetland Conservation** (3) Wetland types, classification, functions and values; hydrology, soils, and plants; introduction to wetland identification and delineation; wetland regulations.
Effective: Fall 2001
Prerequisite: E R M 300 orW F S 209

W F S 452 **Ichthyology** (2) Study of the structure, taxonomy, systematics, and natural history of freshwater and marine fishes.
Effective: Spring 1995
Prerequisite: BIOL 110, BIOL 240W

W F S 453 **Ichthyology Laboratory** (2) Identification of fishes, major fish families, use of keys.
Effective: Spring 2001
Prerequisite: BIOL 110, BIOL 240W . Prerequisite or concurrent:W F S 452

W F S 460 **Wildlife Behavior** (3) Scholarly discussion and critique of history, concepts, and application of wildlife behavioral concepts to conservation issues.
Effective: Spring 2007
Prerequisite: at least 6 credits in general wildlife or biology

W F S 462 **Amphibians and Reptiles** (3) Critique of global evolution and conservation of amphibians and reptiles, focusing on Northeastern U.S. natural history and ecology.
Effective: Spring 2009
Prerequisite: 5th semester standing or higher and 6 credits of general biology

W F S 463W **Fishery Management** (3) Management of sport and commercial fisheries, including biological, political, social, and economic factors; regulations and other management techniques.
Effective: Spring 2001
Prerequisite: W F S 209, W F S 300, W F S 301, W F S 310

W F S 495 **Wildlife/Fisheries Internship** (1-6) Supervised field experience related to the student's major.
Effective: Spring 1994
Prerequisite: approval of proposed assignment by instructor prior to registration

W F S 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1989

W F S 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1989

W F S 497A **Field Ichthyology** (3) One-week field course at Tom Ridge Environmental Center in Eric, Pennsylvania. Field collection techniques, identification and behavior of Pennsylvania fishes.
Effective: Summer 2010 Ending: Summer 2010

W F S 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

W F S 500 **Professionalism in Natural Resources** (3) Scholarly discussion and critique of skills important to professionalism of students in natural resources, wood products, and related science-based disciplines.
Effective: Summer 2005
Prerequisite: graduate student standing or permission of program

W F S 525 **Communications in Natural Resources** (3) Communications of research results through manuscripts for peer reviewed journals, presentations at professional meetings, and articles for the general public.
Effective: Summer 2003
Prerequisite: graduate-level research experience (M.S. or Ph.D. enrollment) or permission of program

W F S 529 **Fish Population Dynamics** (3) Methods for analyzing fish population dynamics and their application to fisheries management.
Effective: Spring 1989
Prerequisite: A calculus course

W F S 530 **Conservation Ecology** (3) Discussion of the application of ecological principles to conservation and management of biological diversity, landscapes, and ecosystems.
Effective: Spring 2005
Prerequisite: Graduate Student standing

W F S 536 **Freshwater Field Ecology** (3) Organisms and physical/chemical factors that affect them in the aquatic environment; basic water chemistry; identification of aquatic organisms.
Effective: Spring 1989
Prerequisite: BIOL 435

W F S 542 (BIOL 542, ENT 542) **Systematics** (3) Principles and methods of classification, phylogeny, and speciation; taxonomic techniques; analysis of species; causal interpretation of animal diversity.
Effective: Summer 1990

W F S 550 **Wetland Ecology and Management** (3) Discussions of the ecological, hydrologic, and cultural functions and values of freshwater and coastal wetlands.
Effective: Spring 1989
Prerequisite: 3 credits in ecological or hydrologic sciences

W F S 551 **Wildlife Biometrics and Population Analysis** (3) Application of biometrics and mathematics to concepts and problems in wildlife ecology with emphasis on population analysis.
Effective: Spring 1989
Prerequisite: 3 credits in animal ecology and 6 credits in biometrics or statistics

W F S 552 **Systematics and Evolution of Fishes** (3) Detailed study of the systematics, evolution, identification, and natural history of fishes.
Effective: Spring 1989

Prerequisite: BIOL 421, WILDL 452

W F S 560 **Estimation of Fish and Wildlife Population Parameters** (4) Application of statistical models to estimate population parameters such as survival rates and population size.
Effective: Spring 2003
Prerequisite: MATH 141, STAT 501, STAT 502 or permission of program

W F S 590 (FOR 590) **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2007

W F S 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1989

W F S 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1989

W F S 597B **Design of Ecological Field Studies** (2) Application of the scientific method and general principles of designing ecological field studies through discussion and critique of the primary literature.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010
Prerequisite: one course in statistics that covers ANOVA

W F S 600 **Thesis Research** (1-15) No description.
Effective: Spring 1989

W F S 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 1988

W F S 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Provides an opportunity for supervised and graded teaching experience in wildlife courses.
Effective: Spring 1989

W F S 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Spring 1989

W F S 611 **Ph.D. Dissertation Part-Time** (0) No Description.
Effective: Summer 1988

Last Import from UCM: July 10, 2010 3:00 AM

Women's Studies (WMNST)

WMNST 400 (US;IL) **Feminist Theory** (3) Consideration of feminist theories of women's experience in transforming understanding, reconceptualizing old problems, raising new ones, and expanding traditional disciplines.
Effective: Summer 2005
Prerequisite: WMNST 301

WMNST 401 **Feminist Perspectives on Research and Teaching** (3) Feminist approaches to methodological issues in research and teaching in the social sciences and the humanities.
Effective: Fall 2009
Prerequisite: WMNST 001 orWMNST 003 orWMNST 301

WMNST 407 (US) (THEA 407) **Women and Theatre** (3) A study of theatre practice and dramatic literature as informed by issues of gender, race, and ethnic background.
Effective: Summer 2005
Prerequisite: THEA 100

WMNST 410 (AAA S 410) **Spirit, Space, Survival: Contemporary Black Women** (3) How recent Black women have used spirit and space to survive.
Effective: Spring 1995
Prerequisite: WMNST 101

WMNST 412 (EDTHP 412) **Education and the Status of Women** (3) An examination of the relationship of education to the status of women in American society.
Effective: Spring 2005

WMNST 416 (US;IL) (AAA S 416, S T S 416) **Race, Gender and Science** (3) The class will focus on race and gender as products of science, and how societal values shape scientific activity.
Effective: Summer 2008
Prerequisite: 6 credits in S T S WMNST or AAA S

WMNST 419 (US;IL) (HIST 419) **The History of Feminist Thought** (3) A critical analysis of European and United States feminist thought from the Renaissance to the present.
Effective: Spring 2006
Prerequisite: WMNST 001, WMNST 003, WMNST 116 orWMNST 117

WMNST 420 (US;IL) (CED 420, R SOC 420) **Women in Developing Countries** (3) Analysis of women's work, experiences, and development policies and practices in Africa, Asia, and Latin America.
Effective: Fall 2009

WMNST 421 (IL) (HIST 421) **The History of European Women** (3) European women's lives from the Middle Ages to the present.
Effective: Spring 2006
Prerequisite: WMNST 001, WMNST 003, WMNST 116 orWMNST 117

WMNST 423 (US) (CRIMJ 423, CRIM 423) **Sexual and Domestic Violence** (3) Legal, sociological, and psychological perspectives of sexual and domestic violence.
Effective: Spring 2008
Prerequisite: CRIM 100

WMNST 424 (US) (KINES 424) **Women and Sport** (3) An interdisciplinary approach to contemporary issues related to women and sport from historical, physiological, psychological, and sociological perspectives.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 231, PSYCH 479, SOC 001 orWMNST 001

WMNST 426Y (US;IL) (GEOG 426Y) **Gender and Geography** (3) Description and explanation of the links between gender relations and spatial structures; gender and work, social services, and neighborhood activism.
Effective: Spring 2007
Prerequisite: GEOG 020, GEOG 126, GEOG 120, WMNST 001 orWMNST 187

WMNST 428 (US;IL) (PL SC 428) **Gender and Politics** (3) Gender in politics in the United States and around the world; major areas of women and politics research.
Effective: Fall 2007
Prerequisite: 3 credits in political science or women's studies

WMNST 430 (US) (AM ST 430) **Women in American Society** (3) A historical study of women's roles and experiences in the United States.
Effective: Spring 2008
Prerequisite: 6 credits of American Studies Sociology or Women's Studies

WMNST 432 (US) **Women in Politics in the U.S.** (3) Course examines the U.S. women's movements, the participation of women in politics, and selected areas of public policy.
Effective: Spring 2008
Prerequisite: 3 credits in political science or women's studies

WMNST 438 (PHIL 438) **Feminist Philosophy** (3) Examines the central currents of feminist philosophy, selected problems and concepts regarding difference, gender and sex, identity, and political culture.
Effective: Fall 2007
Prerequisite: 9 credits of philosophy including 6 credits of philosophy of the 200-level or 5th semester standing

WMNST 452 (BB H 452, NURS 452) **Women's Health Issues** (3) Exploration of major health issues concerning women today, with an emphasis on social, cultural, and medical influences.
Effective: Spring 2007
Prerequisite: BIOL 141 orPSYCH 100

WMNST 453 (US) (CRIMJ 453, CRIM 453) **Women and the Criminal Justice System** (3) This course focuses on the experiences of women as offenders, victims, and professionals in the criminal justice system.
Effective: Spring 2008
Prerequisite: CRIMJ 100 orWMNST 001

WMNST 455 (US) (CAS 455) **Gender Roles in Communication** (3) Explores the literature on gender research in the discipline of human communication.
Effective: Summer 2005
Prerequisite: CAS 202

WMNST 456 (SOC 456) **Gender, Occupations, and Professions** (3) The role of gender in shaping contemporary North American patterns of employment, occupational roles, and statuses.
Effective: Spring 1991
Prerequisite: WMNST 001 or 3 credits in Sociology

WMNST 457 (US;IL) (HIST 457, S T S 457) **The History of Women in Science** (3) Critical analysis of the roles women, gender, and minorities have played in the natural sciences.
Effective: Spring 2006
Prerequisite: WMNST 001, WMNST 003, WMNST 005, WMNST 116 orWMNST 117

WMNST 458 (BB H 458) **Critical Issues in Reproduction** (3) Examination and analysis of the new reproductive technologies from the standpoint of medical ethics, feminism, and sociocultural influences.
Effective: Spring 2007
Prerequisite: BIOL 141 orPSYCH 100

WMNST 462 (US) (ENGL 462) **Reading Black, Reading Feminist** (3) Female identity and its construction in textual representations of gender, class, color, and cultural difference in English-language literatures.
Effective: Summer 2005
Prerequisite: ENGL 015 orENGL 030

WMNST 464 (US) (BE SC 464) **Feminine/Masculine** (3) Study of sex role learning; investigating feminine/masculine labeling; implications for contemporary society.
Effective: Spring 2008
Prerequisite: general psychology or general sociology

WMNST 466 (US;IL) (HIST 466) **Lesbian and Gay History** (3) Critical exploration of the history of sexuality, focusing especially on the emergence of modern lesbian and gay identities.
Effective: Summer 2005
Prerequisite: WMNST 001, WMNST 117

WMNST 471 (US) (PSYCH 479) **The Psychology of Gender** (3) Theories and research on gender differences and gender roles. Emphasis on women's and men's current positions in society.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 221

WMNST 472 (LER 472) **Work-Life Practices and Policies** (3) Explore the causes and consequences of conflicts between work, family, and other life commitments, and how these may be resolved.
Effective: Spring 2008
Prerequisite: 3 credits of LER

WMNST 476W (ANTH 476W) **Anthropology of Gender** (3) Cross-cultural construction of gender and sex roles; theories of gender construction; case studies and practical effects.
Effective: Spring 2001
Prerequisite: 3 credits in women's studies or anthropology

WMNST 489 (ENGL 489) **British Women Writers** (3) A study of selected British women writers.
Effective: Spring 2008
Prerequisite: 6 credits of ENGL

WMNST 490 (US;IL) (ENGL 490) **Women Writers and Their Worlds** (3) American and British literature written from the perspective of women.
Effective: Summer 2005
Prerequisite: ENGL 015 orENGL 030

WMNST 491 (AM ST 476, ENGL 492) **American Women Writers** (3) A study of selected American women writers.
Effective: Spring 2008
Prerequisite: 6 credits of ENGL

WMNST 492W **Current Feminist Issues** (3) Critical analysis of major contemporary feminist research and writing in the arts, humanities, social and natural sciences.
Effective: Spring 2002

Prerequisite: WMNST 301, WMNST 302

WMNST 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

WMNST 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

WMNST 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 1998
Prerequisite: prior approval of proposed assignment by instructor

WMNST 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside scope of formal courses.
Effective: Fall 1983

WMNST 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1984

WMNST 497D (CRIMJ 497D, PSYCH 497D, SOC 497D) **Family and Justice** (3) Examination of the relationship between the family and the criminal justice system in which the family operates.
Effective: Summer 2010 Ending: Summer 2010

WMNST 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

WMNST 501 **Feminist Perspectives on Research and Teaching Across the Disciplines** (3) Feminist approaches to methodological issues in research and teaching in the social sciences, humanities, and natural sciences.
Effective: Spring 2002

WMNST 502 **Global Perspectives on Feminism** (3) Exploration of feminist issues in a global perspective, including debates in history, ethics, and political feminism.
Effective: Fall 2001

WMNST 507 **Feminist Theory** (3) Development of feminist theory and its relationship to history in terms of critique of family, sexuality, and gender stratification.
Effective: Spring 2002

WMNST 515 (GEOG 515) **Gender and Geography** (3) Explanations of links between gender relations and spatial structures.
Effective: Summer 1994

WMNST 516 (HIST 516) **Topics in Gender History** (3) A critical analysis of gender and theories of gender in selected historical contexts.
Effective: Summer 1992

WMNST 520 **Gender and Nationalism** (3) Impact of Western nationalism and colonialism on the organization of gender roles from the 18th century to the present.
Effective: Fall 2001

WMNST 538 (PHIL 538) **Feminist Philosophy Seminar** (3) Critically examines feminist approaches to ethics, epistemology, philosophy of science, metaphysics, social/political philosophy, and the history of philosophy.
Effective: Summer 2005

WMNST 541 (ADTED 541) **Women and Minorities in Adult Education** (3) Seminar on women and minority adults as learners and leaders in various contexts of adult education.
Effective: Spring 1998
Prerequisite: ADTED 460

WMNST 565 (ANTH 565) **Women and Development** (3) Interaction of women and development.
Effective: Spring 1994

WMNST 572 (PSY 572) **Psychology of Gender** (3) Theory and research on the psychology of gender, emphasizing gender in social interaction and in individual identity.

Effective: Spring 2002
Prerequisite: graduate standing in psychology women's studies or allied field

WMNST 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1998

WMNST 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 1998

WMNST 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1987

WMNST 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1992

WMNST 597A **Girls and Popular Culture: From Nancy Drew to Webkinz** (3) Explores girls and popular culture from books, media, and toys through a historical approach and theories of feminist cultural studies.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

WMNST 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Fall 1996

Last Import from UCM: July 10, 2010 3:00 AM

Wood Products (W P)

W P 400 **Properties of Wood** (2) Chemical Structure and Mechanical Properties of Wood Composites.
Effective: Summer 2003
Prerequisite: W P 200W

W P 411 **Wood-Environmental Relationships** (4) Material composition and structure; basic and derived physical properties; moisture movement in wood; methods and techniques of drying wood.
Effective: Spring 2001
Prerequisite: or concurrent:W P 200W, W P 203

W P 412 **Wood in Structures** (3) Behavior and design of solid, laminated, and plywood wood beams, trusses, columns, and foundations. Wood construction details.
Effective: Summer 1997
Prerequisite: W P 200W, W P 203

W P 413 **The Chemistry of Wood** (3) Chemical composition, reactions, and properties in relation to products and the uses of wood.
Effective: Summer 1997
Prerequisite: W P 200W, W P 203

W P 416 **Wood Industries Management Development** (3) Managerial concepts and issues important to forest products organizations will help prepare students to assume management-level positions.
Effective: Spring 2004
Prerequisite: W P 200W

W P 417 **Wood Products Manufacturing Systems and Processes** (4) Description of systems and processes used in the manufacture of wood products.
Effective: Summer 1997
Prerequisite: W P 200W, W P 203 and sixth-semester standing

W P 418 **Chemical Processing of Wood** (4) Principles and practices of basic operations in converting wood and wood waste into useful chemicals and modified cellulose products.
Effective: Summer 1997
Prerequisite: W P 200W, W P 203

W P 423 **Deterioration and Protection of Wood Products** (2) Timber and wood deterioration from fungi, insects, fire; treatment of wood products for protection.
Effective: Fall 1996
Prerequisite: W P 203

W P 435 **Wood Products Production and Sales Management** (3) Wood products production management with emphasis on investment decision- making, personal selling, and sales management.
Effective: Fall 1996
Prerequisite: W P 200W

W P 437W **Wood Industries Marketing Management** (4) Examination of major international wood products market segments in terms of products, distribution, industry structure, and strategic management issues.
Effective: Summer 1997
Prerequisite: W P 200W, W P 203

W P 438 **Business Concepts for Wood Manufacturing** (4) The course will cover manufacturing strategies and related financial measures in a wood production environment.
Effective: Summer 2003
Prerequisite: W P 200W

W P 460 **Wood Products Industrial Environmental Control** (3) Wood products industrial environmental control technologies and strategies for pollution abatement.
Effective: Summer 1995
Prerequisite: fifth semester standing

W P 490 **Wood Products Colloquium** (1) Presentations and discussions of solutions to problems within the forest products industry.
Effective: Spring 1993
Prerequisite: seventh-semester standing

W P 495 **Wood Products Internship** (1-6) Supervised field experience related to the student's major.
Effective: Spring 1993
Prerequisite: approval of proposed assignment by instructor prior to registration.

W P 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1993

W P 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 1993

W P 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

W P 502 **Wood Fibers** (3) Identification and measurement of physical and chemical characteristics of wood fibers used in paper or dissolving pulps.
Effective: Spring 1993

W P 511 **Physical Properties of Wood and Fibers** (3) Theories of moisture, diffusion, permeability, and heat transport; ultrastructure and thermal properties of wood and fibers.
Effective: Spring 1993
Prerequisite: W P 411

W P 513 **Wood Chemistry** (3) Treatment of the chemical components of wood, their distribution and reactions.
Effective: Spring 1993
Prerequisite: W P 413

W P 515 **Wood Composite Processing Parameters** (3) Wood composite manufacture in theory and practice including various synthesis parameters in relation to physical and mechanical properties.
Effective: Fall 1993
Prerequisite: F P 415

W P 530 **Case Studies in Forest Products** (3) Manufacturing, marketing, and management issue analysis from a global perspective in the forest products industries.
Effective: Spring 1997

W P 531 **Mechanical Behavior of Wood** (3) Time-dependent properties, theory of failure, rheologic properties, and theory of the mechanical behavior of wood and structural composites.
Effective: Spring 1993

W P 532 **Theory of Adhesion** (3) Theory of adhesion as it pertains to bonding of wood, paper-based laminates, fibers, and bonding of wood to dissimilar materials.
Effective: Spring 1993

W P 537 **International Wood Products Marketing and Trade** (3) Strategic analysis, environmental scanning, international trade policy implications, determinants of competitive strategy for firms, industries, and nations.
Effective: Spring 1993
Prerequisite: W P 437W

W P 560 **Wood Products Industrial Environmental Control** (3) Legislation, impacts, and management of air, water, and solid waste pollution in the wood products industry.
Effective: Summer 2002
Prerequisite: W P 401

W P 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1993

W P 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1993

W P 596A **Wood Composite Processing Parameters** (3) Wood composite manufacture in theory and practice including various synthesis parameters in relation to physical and mechanical properties.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

W P 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1993

W P 600 **Thesis Research** (1-15) No description.
Effective: Spring 1993

W P 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Provides an opportunity for supervised and graded teaching experience in forest products courses.
Effective: Spring 1993

W P 610 **Thesis Research Off Campus** (1-15) No description.

Graduate Bulletin Archive - July 2010

Effective: Spring 1993

Last Import from UCM: July 10, 2010 3:00 AM

Workforce Education and Development (WF ED)

WF ED 402 **Supervision of Vocational Education** (3) For administrators, supervisors, and teachers responsible for improvement of instruction through supervision or for students preparing for supervisory work.
Effective: Fall 2001

WF ED 413 **Vocational Education for Special-Needs Learners** (3) Introduction to program modifications, supplementary services, and resources required for special-needs learners in vocational and practical arts education programs.
Effective: Fall 2001

WF ED 422 **Integrating Communication Skills into the Vocational Classroom** (3) Students completing this course will demonstrate their ability to integrate oral, written, visual communication skills into their occupational classroom.
Effective: Summer 1996

WF ED 441 **Conceptual and Legal Bases for Cooperative Vocational Education** (2) History, conceptual and legal bases for a cooperative vocational education program.
Effective: Summer 1996
Prerequisite: WF ED 445

WF ED 442 **Operating Cooperative Vocational Education Programs** (2) Student and training station selection, training plan and related subject development, records and reporting systems, school-industry coordination.
Effective: Summer 1996
Prerequisite: WF ED 441

WF ED 445 **Vocational Guidance** (3) Problems and possibilities of vocational guidance; the field of guidance and guidance literature; methods of field work; school guidance techniques.
Effective: Summer 1996
Prerequisite: WF ED 105 ; fourth-semester standing

WF ED 450 (US;IL) **Cultural Diversity in the Workplace** (3) Provides opportunities for students to explore different cultures and mores that are changing the dynamics of the workplace.
Effective: Fall 2006

WF ED 471 **Training in Industry and Business** (3) Appraisal of training functions and development of competencies in work analysis, design, development, delivery, and evaluation of training.
Effective: Spring 2001
Prerequisite: seventh-semester standing or higher

WF ED 495 **Internship** (1-6) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 1996
Prerequisite: prior approval of proposed assignment by instructor

WF ED 495A **Cooperative Education Practicum** (2) Validation of competencies learned in prerequisite courses during interaction with professional staff while functioning under the supervision of a certified cooperative coordinator.
Effective: Summer 1996
Prerequisite: WF ED 445

WF ED 495C **Student Teaching** (10) Supervised observation and practice teaching in approved vocational industrial schools/health occupations education settings.
Effective: Spring 1997
Prerequisite: successfull completion of occupational competency evaluation. PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check. (Forms: 228 Chambers)

WF ED 495D **Instructional Internship in Industrial Training** (5) Supervised internship in industrial training. Interns will be expected to perform instructional duties in industrial environments.
Effective: Summer 1996
Prerequisite: WF ED 105, WF ED 106, WF ED 207W, WF ED 270, WF ED 471 ; successful completion of occupational competency examination

WF ED 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1996

WF ED 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1996

WF ED 497A **The Science and Art of Healing: Sustaining Healthy Living** (3) Critically and scientifically evaluate complementary and alternative healing therapies, current research, and prospects for revised health care policies.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

WF ED 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1996

WF ED 498A **Project Management for Professionals** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

WF ED 498A **Project Management for Professionals** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

WF ED 498A (CN ED 498A) **Facilitating Career Development** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

WF ED 498B **Child Development** (3) Teaching the Family & Consumer Sciences Academic Standards: Child Development and Balancing Family, Work and Community Responsibility.
Effective: Summer 2010 Ending: Summer 2010

WF ED 498B (CN ED 498A) **Facilitating Career Development** (3) Students acquire relevant competencies to assist others in planning and managing careers. Upon successful completion, students may aply for the GCDF certification.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

WF ED 498C **Mastering Supervision** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2010 Ending: Summer 2010

WF ED 498D (CN ED 498A) **Facilitating Career Development** (3) Students acquire relevant competencies to assist others in planning and managing careers. Upon successful completion, students may apply for the GCDF certification.
Effective: Summer 2010 Ending: Summer 2010

WF ED 501 **Seminar in Workforce Education** (1-3) Conferences, colloquiums, discussions, and investigations of various topics and issues related to workforce education in the public and private sector.
Effective: Summer 1996

WF ED 508 **Workforce Education Management** (3) Introduction to theories and concepts of managing workforce education programs in the public and private sector.
Effective: Summer 1996

WF ED 518 **Curriculum and Instructional Leadership for Workforce Education** (3) Study of topics related to curriculum and instructional leadership in workforce education in the public and private sectors.
Effective: Summer 1996
Prerequisite: 3 years of professional experience in vocational education

WF ED 528 **Fiscal and Facilities Management for Vocational Administrators** (3) Sources of revenue, budget preparation, purchasing, and the management of physical facilities in vocational education.
Effective: Summer 1996
Prerequisite: 3 years of professional experience in vocational education

WF ED 530 **College Teaching for Workforce Education** (3) Structure and organization of collegiate programs in workforce education including faculty requirements, curricula, funded projects and program evaluation.
Effective: Summer 1996
Prerequisite: acceptance as a graduate student in vocational industrial education

WF ED 538 **Administering Personnel Services in Vocational Education** (3) Planning and implementing staff development activities, student guidance services, admissions, student organizations, and placement.
Effective: Summer 1996
Prerequisite: 3 years of professional experience in vocational education

WF ED 540 **Data Analysis in Workforce Education and Development** (3) Provides opportunities to acquire and practice skills in descriptive and inferential statistics.
Effective: Spring 1996

WF ED 541 **Program Evaluation in Workforce Education** (3) Exploring positivistic and constructionist approaches to program evaluation, with emphasis on planning and management, accreditation, certification, licensure, criteria and standards.
Effective: Summer 1996

WF ED 542 **Social and Economic Foundations of Workforce Education and Development** (3) Review of labor force, demographic and economic concepts, measures, and models.
Effective: Summer 1996

WF ED 543 **Evaluation of Investments in Workforce Education and Development** (3) Use of labor supply models to evaluate investments in workforce education and development.
Effective: Summer 1996 Ending: Fall 2010
Prerequisite: I ED 540, WF ED 542, WF ED 550

WF ED 543 **Evaluation of Investments in Workforce Education and Development** (3) Use of labor supply models to evaluate investments in workforce education and development.
Effective: Spring 2011 Future: Spring 2011

WF ED 544 **Analysis of Policies for Workforce Education and Development** (3) Explores models and methods for analyzing policies for workforce education.
Effective: Summer 1996
Prerequisite: I ED 540, WF ED 550

WF ED 545 **Economic and Demographic Modeling of Policies for Workforce Education and Development** (3) Use of economic and demographic models to plan and evaluate workforce education and development.
Effective: Summer 1996
Prerequisite: I ED 540, WF ED 542, WF ED 550

WF ED 546 **Work Based Education** (3) Discussion of legislation and educational requirements for education based at the worksite including cooperative education, youth apprenticeship, and apprenticeship programs.
Effective: Summer 1996
Prerequisite: WF ED 441

WF ED 550 **Research in Workforce Education** (3) Research techniques in workforce education.
Effective: Summer 1996

WF ED 557 **Present-Day Local, Personnel, and Curriculum Problems** (2-3) Various plans, techniques, and practices.
Effective: Summer 1996

WF ED 559 **Managing Technical Education** (2-3) Concepts and issues pertinent to the effective administration and supervision of technical education at the secondary and post secondary level.
Effective: Summer 1996
Prerequisite: 6 credits in industrial education valid director's certificate or equivalent training and experience

WF ED 560 **Historical and Philosophical Foundations of Workforce Education** (3) An investigation of historical, philosophical, and professional foundations of workforce education.
Effective: Summer 1996

WF ED 572 **Organization Development For Industrial Trainers** (3) An introduction to major concepts, skills and techniques required by industrial trainers to support and facilitate organization change.
Effective: Summer 1996
Prerequisite: WF ED 471

WF ED 573 **Needs Assessment for Industrial Trainers** (3) Acquire skills to identify training and development needs, distinguish problems with management versus training solutions, develop and evaluate training solutions.
Effective: Fall 2001

WF ED 574 **Strategic Planning For Education For Work** (3) Study of human capital as a component of education, industrial and business training strategic planning at economy, and organizational levels.
Effective: Summer 1996
Prerequisite: WF ED 471, WF ED 572, WF ED 573

WF ED 575 **Current Policy and Practices in Industrial Training** (3) Analysis of training and development practices and their articulation with business practices.
Effective: Summer 1996
Prerequisite: WF ED 471, WF ED 572

WF ED 576 **International, Multicultural, and Diversity Training** (3) Study of concepts, models, and techniques of multicultural and diversity training for industrial trainers.
Effective: Summer 1996
Prerequisite: WF ED 471, WF ED 572, WF ED 574

WF ED 590 **Industrial Training Professional Seminars** (1) Study of special topics relating to problems, practices, methodologies and special competency needs in industrial training.
Effective: Fall 2001

WF ED 595A **Field Based Project in Industrial Training** (2-5) Students identify a training and/or organization

development problem in industry and/or business and carry out contract problem analysis and resolutions.
Effective: Fall 2001

WF ED 595B **Workforce Education Administrative Internship** (2-15) Supervised study with an administrator or researcher at a cooperating school, state governmental agency, or research institution.
Effective: Summer 1996

WF ED 595C **Internship in Cooperative Vocational Education** (1-10) Validation of teaching and co-op coordinator competencies learned in prerequisite courses during interaction with professional staff while functioning under the supervision of a certified cooperative coordinator.
Effective: Fall 1997
Prerequisite: WF ED 441, WF ED 442

WF ED 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1996

WF ED 597 **Special Topics** (1-9) Formal courses given on a topic or special interest subject which may be offered infrequently.
Effective: Summer 1996

WF ED 597A **Scholarly Inquiry** (3) Exploration of personal research and career interests to stimulate thinking about work in the field of practice of workforce education and development.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

WF ED 597A **Organization Leadership in the Public and Private Sectors** (3) Provides opportunities for students to explore different styles of leadership that are changing the dynamics of the workplace.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

WF ED 597B **Process Consultation** (3) Focuses on interpersonal relationships, that is, how consultants and trainers watch groups and help group members work together more effectively.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

WF ED 597B **Ethics in Workforce Education** (3) Ethics in Workforce Education will explore decision making in workforce education contexts and how leaders solve ethical dilemmas.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

WF ED 597C **Integrated Instructions** (3) Occupational analysis for instructional planning; emphasis on instructional methods to deliver a competency based program in an integrated learning environment.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

WF ED 597C **Develop and Delivering Training Programs** (3) Each student develops a half-day training program and presents one module from the program to the class.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

WF ED 597D **Working Close Apart** (3) Technology for Communication & Collaboration in WF ED (3) Asynchronous communications; RSS feeds; social networks, and media; calendaring; voice- and video-over-IP; Creative Commons licensing; web-based surveys; webinars; technology mash-ups.
Effective: Fall 2010 Ending: Fall 2010 Future: Fall 2010

WF ED 597E **Appreciative Inquiry** (3) Students will build practical competencies necessary to carry out various Appreciative Inquiry interventions based on the theories and techniques of organization development and change management.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

WF ED 597F **Marketing Organization Development and Consulting for Trainers** (3) Familiarize students with approaches to marketing organization development 572. Helps students to develop the specialized competencies essential to market OD both internally and externally.
Effective: Spring 2011 Ending: Spring 2011 Future: Spring 2011

WF ED 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2001

WF ED 600 **Thesis Research** (1-15) No description.
Effective: Summer 1996

WF ED 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 1996

WF ED 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) An opportunity for graduate students to teach a college level course under the supervision of an experience professor.
Effective: Summer 1996

WF ED 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 1996

WF ED 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Summer 1996

Last Import from UCM: July 10, 2010 3:00 AM

World Languages Education (WL ED)

WL ED 400 **Foundations of Language in Second Language Teaching** (3) Critical understanding of basic concepts and principles in second language acquisition and teaching.
Effective: Summer 2004
Prerequisite: PA Instructional I or II teaching certificate

WL ED 411 **Methods of Teaching World Languages in Grades 1-5** (3) Exploration of the complexity of teaching World Languages and development of curricular designs for teaching in grades 1-5 schools.
Effective: Summer 2004
Prerequisite: EDPSY 014, EDTHP 115, WL ED 295A, WL ED 300 Concurrent: WL ED 495B

WL ED 412W **Methods of Teaching World Languages in Grades 6-12** (3) Exploring the complexity of teaching World Languages and development of curricular designs for teaching World Languages in grades 6-12.
Effective: Spring 2010
Prerequisite: WL ED 411, WL ED 495B Concurrent: WL ED 495C

WL ED 414 **Methods of Teaching in Bilingual Education** (3) Methods, techniques, materials, and language laboratory in dual-language instruction.
Effective: Spring 2005
Prerequisite: EDPSY 014, EDTHP 115, WL ED 295A, WL ED 300 Concurrent: WL ED 495B or WL ED 495C

WL ED 422 **Issues in Bilingual Education** (3) Contemporary issues in foreign language and bilingual education for prospective and practicing teachers of foreign languages and bilingual education.
Effective: Fall 2004
Prerequisite: 12 credits or 12-credit level proficiency in the target languageEDPSY 014, EDTHP 115, WL ED 295A, WL ED 300

WL ED 444 (CI ED 444) **Language, Culture and the Classroom: Issues for Practitioners** (3) Critical understanding of cultural linguistic diversity to facilitate the inclusion of English Language Learners in a globalized classroom.
Effective: Fall 2007
Prerequisite: WL ED 300 orWL ED 400

WL ED 483 **Evaluating Schools Performances and Programs with English Language Learners (ELLs)** (3) Using/adapting multiple techniques to asses English Language Learners (ELLs) language and other school subjects.
Effective: Summer 2004
Prerequisite: WL ED 300 orWL ED 400

WL ED 495B **Field Experience for World Languages Teacher Preparation in Grades 1-5** (3) Practicum. Prospective World Language teachers demonstrate knowledge on second language learning/teaching and educational theories (Grades 1-5).
Effective: Spring 2009
Prerequisite: EDPSY 014, EDTHP 115, WL ED 295A, WL ED 300 ; PA Act 34 and Act 151 Clearances required; FBI background information check; and Professional Liability insurance. Concurrent: WL ED 411

WL ED 495C **Field Experience for World Languages Teacher Preparation in Grades 6-12** (3) Practicum. Prospective World Language teachers demonstrate knowledge on second language learning/teaching and educational theories (Grades 6-12).
Effective: Spring 2009
Prerequisite: WL ED 411;WL ED 495B ; PA Act 34 and Act 151 Clearances required; FBI background information check; and Professional Liability insurance. Concurrent: WL ED 412

Last Import from UCM: July 10, 2010 3:00 AM

Youth and Family Education (YFE)

YFE 438 (US) **Living in an Increasingly Diverse Society** (1-3) Students in this course will explore selected dimensions of diversity through lecture, discussion, speakers, active participation, and experiential learning.
Effective: Summer 2005 Ending: Fall 2010

YFE 439 **Contemporary Youth Issues** (3) This course focuses on empirically-supported interventions that promote resiliency and reduce risk for problem behaviors among youth in community settings.
Effective: Summer 2000 Ending: Fall 2010
Prerequisite: a minimum of six credits in courses that focus on youth and/or families

YFE 455 **Extension Youth Development Programs and Volunteer Management** (3) A study of 4-H/Extension youth programs and the variety of roles played by volunteer leaders.
Effective: Summer 1999 Ending: Fall 2010
Prerequisite: 6 credits of social or behavioral sciences

YFE 470 **Consumer and Financial Skills** (3) Consumer and financial issues formal and non formal educators need to be informed about to function in today's society.
Effective: Spring 2008 Ending: Fall 2010
Prerequisite: Six credits of social and behavioral sciences and six credits of quantification (math)

YFE 495 **Internship in Youth and Family Education Programs** (6-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships.
Effective: Summer 1999 Ending: Fall 2010
Prerequisite: prior approval of proposed assignment by instructor

YFE 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2000 Ending: Fall 2010

YFE 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2000 Ending: Fall 2010

YFE 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2000 Ending: Fall 2010

YFE 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005 Ending: Fall 2010

YFE 535 **Youth Civic Development** (3) This course critically examines processes enabling youth to become members of local communities and "citizens" of nations and global societies.
Effective: Spring 2001 Ending: Fall 2010

YFE 550 **Program Development and Evaluation in Youth, Families and Communities** (3) Examination of concepts, theories, models, and procedures relative to program development and evaluation in youth, families and communities.
Effective: Spring 2004 Ending: Fall 2010
Prerequisite: AEE 450;AEE 520

YFE 555 **Volunteer Program Management** (3) The study and application of concepts and principles of volunteerism and administration relevant to volunteer program management.
Effective: Fall 2001 Ending: Fall 2010

YFE 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2001 Ending: Fall 2010

YFE 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2007 Ending: Fall 2010
Prerequisite: prior approval of proposed assignment by instructor

YFE 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2000 Ending: Fall 2010

YFE 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered

infrequently.
Effective: Spring 2001 Ending: Fall 2010

YFE 597B **Theory to Practice** (1) Applying course content to personal and professional life, including personal financial information, identity theft, nutrition, and food safety.
Effective: Summer 2010 Ending: Summer 2010

YFE 600 **Thesis Research** (1-15) No description.
Effective: Summer 2002 Ending: Fall 2010

YFE 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 2002 Ending: Fall 2010

YFE 840 **Applied Youth Development** (3) Background and current issues related to youth development programs in their application to actual youth programs in community settings.
Effective: Fall 2008 Ending: Fall 2010

YFE 845 **Intergenerational Programs and Practices** (3) Background, intervention strategies, and issues related to developing intergenerational programs and practices aimed at addressing vital social and community issues.
Effective: Summer 2009 Ending: Fall 2010

Last Import from UCM: July 10, 2010 3:00 AM

GRADUATE PROGRAMS, FACULTY, AND COURSES

A course abbreviation, a number, and a title designate each course. Course designations and official abbreviations are listed above the first course in each group. The figures in parentheses following the course title show the number of credits that may be granted for that course. In the case of courses with variable credits, the number of credits that may be earned in a single semester is determined by the department or program offering the course.

A department or major program may schedule an entire section of a course below the 400 level for fewer credits than the maximum authorized. In 400-level courses, a student may schedule fewer credits than the maximum number but in no case more than the maximum number authorized. No 600-level courses (supervised college teaching; on- and off-campus research; and full- and part-time dissertation work) are listed with individual programs. All courses listed under graduate majors may not be required in the particular major.

COMMON COURSE NUMBERS

The following courses for which students may register have been set up for common use by major programs to encourage innovation and provide flexibility in designing graduate programs. For courses 594, 595, 596, 597, 598, and 599, special titles may be requested by a graduate program for a given semester, through the Senate Curriculum Coordinator, 101 Kern Building, University Park campus.

590. COLLOQUIUM--Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

594. RESEARCH TOPICS--Supervised student activities on research projects identified on an individual or small-group basis. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

595. INTERNSHIP--Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc. Prerequisite: prior approval of proposed assignment by instructor.

596. INDIVIDUAL STUDIES--Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

597, 598. SPECIAL TOPICS--Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

599. FOREIGN STUDIES (1-2 per semester, maximum of 4) Courses offered in foreign countries by individual or group instruction. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

600, 610. THESIS RESEARCH--In registering for thesis research a student uses the appropriate number (600, 610) preceded by the abbreviation designating the major field. The numbers 600 (on campus) and 610 (off campus) are available for credit in thesis research in all graduate major programs. The bursar assesses charges for these courses at the current rate of tuition, according to the student's status at the time of registration.

601, 611. THESIS PREPARATION--The numbers 601 and 611, with associated special fees, are available to Ph.D. degree candidates who have passed the comprehensive examination and met the two-semester residence requirement. They may be used for thesis preparation work during its later stages, when the academic activity of the candidate consists partly (611) or solely (601) of work on the completion of research and writing of the dissertation.

SUBJ 601 and SUBJ 611 do not carry academic credit. They are entered on the academic transcript to indicate the registration and the nature of the candidate's academic activity. A candidate registered for SUBJ 601 is classified as a full-time student, while one registered for SUBJ 611 is classified as a part-time student. Students may take 601 plus up to 3 additional credits of course work for audit by paying only the dissertation fee. Students wishing to take up to 3 additional credits of course work for credit, i.e., 590, 602, etc., with 601 may do so by paying the dissertation fee and an additional flat fee. Enrolling for 3 credits for either audit or credit will be the maximum a student may take with SUBJ 601 without special approval by the Graduate School. (NOTE: Registration for additional credits above this will incur an additional charge at the appropriate tuition per-credit rate [in-state or out-of-state].) Students wishing to take more than 3 additional credits of course work must register for 600 or 611 (i.e., not for 601, which is full-time thesis preparation). (See also Thesis Preparation, in the General Information section of this bulletin.)

The numbers 600, 601, 610, and 611 may not appear in the *Schedule of Courses* for each semester.

602. SUPERVISED EXPERIENCE IN COLLEGE TEACHING--May be offered by any graduate program in a department that also offers undergraduate courses. A graduate program with no counterpart undergraduate program may offer SUBJ 602 when cooperative arrangements are made with an admin-istrative unit that does not offer graduate degrees but that uses graduate assistants in its teaching. SUBJ 602 may be offered in any semester and is subject to the following restrictions:

1. SUBJ 602 will not be counted in fulfilling any specific credit requirement for an advanced degree.
2. SUBJ 602 will be graded (A, B, C, D, F). The grade will appear on the student's transcript.
3. SUBJ 602 will not be used in calculating grade-point averages.
4. SUBJ 602 shall be offered only in those graduate programs that want to provide opportunity for supervised and

graded teaching experience. Enrollment will be restricted to students for whom the major program is prepared to provide such experience.

5. SUBJ 602 will be counted as a part of the student's credit load unless the program specifies otherwise.

SUBJ 603. FOREIGN ACADEMIC EXPERIENCE (1-12)--Foreign study and/or research approved by the graduate program for students enrolled in a foreign university constituting progress toward the degree.

PAUL E. FISCHER, *Chair*
Department of Accounting, Smeal College of Business
354 Business Building
814-865-0041
pef5@psu.edu

Degrees Conferred:

Master of Accounting in Accounting (M.Acc.)
Integrated B.S. in Accounting and Master of Accounting in Accounting Program

The Graduate Faculty

Orie E, Barron, Ph.D. (University of Oregon) Professor of Accounting
Robert P. Crum, D.B.A. (Kentucky) Associate Professor of Accounting
Mark W. Dirsmith, Ph.D. (Northwestern) Deloitte & Touche Professor of Accounting
Charles R. Enis, D.B.A. (Maryland) Associate Professor of Accounting
Paul E. Fischer, Ph.D., (Rochester) Professor of Accounting
Dan Givoly, Ph.D. (NYU) Ernst & Young Professor of Accounting
Guojin Gong, Ph.D. (Iowa) Assistant Professor of Accounting
Steven J. Huddart, Ph.D. (Yale) Professor of Accounting
Bin Ke, Ph.D. (Michigan State) Associate Professor of Accounting
J. Edward Ketz, Ph.D. (Virginian Tech) Associate Professor of Accounting
Michelle Liu, Ph.D. (MIT Sloan) Assistant Professor of Accounting
Henock Louis, Ph.D. (Ohio State)Associate Professor of Accounting
Jmaes McKeown, Ph.D. (Michigan State) Mary Jean and Frank P. Smeal Professor of Accounting
Karl Muller, Ph.D. (Illinois) Associate Professor of Accounting
Charles H. Smith, Ph.D. (Penn State) KPMG Professor Emeritus of Accounting
Amy Xue Sun, Ph.D. (Carnegie Mellon) Assistant Professor of Accounting

The Department of Accounting offers a Master of Accounting that is designed to allow students to complete the educational requirements for becoming a certified public accountant in Pennsylvania as well as most other states. Certified public accountants conduct independent audits and provide accounting, tax, and management advisory services. The program prepares students to enter into careers in public accounting, corporate accounting, management accounting, governmental accounting, financial analysis, and law enforcement.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements state in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Entry to the program is competitive and subject to available space. Criteria for evaluating applicants include: professional and academic accomplishments, GMAT scores, personal Data from application forms and, possibly, interviews or examinations. Work on the M.Acc. degree generally begins in the fall semester.

Typically, student who meet the admissions requirements can complete the program in one full year.

Students who apply to the program should have an undergraduate educational background equivalent to a Bachelor Science degree from the Penn State University Smeal College of Business. Students who apply to the program should have completed the equivalent of the following Penn State University accounting courses: ACCTG 211, ACCTG 403W, ACCTG 404, ACCTG 405, ACCTG 471, and ACCTG 472. Applicants to the program from outside Penn State may be required to take an entry exam to demonstrate mastery of the material covered in theses courses prior to beginning coursework in the master's program.

Although the program has no fixed minimum grade-point requirement, an applicant is generally expected to have maintained a junior-senior grade-point average of at least 3.00 on Penn State's grading scale of A (4.00) to D (1.00). In addition, an applicant is expected to have maintained a grade-point average of 3.00 for the required accounting courses.

Applicant to the program are generally required to take the Graduate Management Admission Test (GMAT). For dates, locations, and other information about the test, write for the Bulletin of Information, Graduate Management Admission Test, Educational Testing Services, Princeton, NJ 08540; www.gmat.org; 800-982-6740.

Applicants whose first language is not English or who have received a baccalaureate or master's degree from an institution in which the language of instruction is not English must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) module and submit the results of that test with the application for admission. The TOEFL test is offered in different formats depending on location. A score of at least 600 on the paper-based TOEFL or 250 on the computer-based TOEFL must be attained. A minimum total score of 100, along with a minimum score of 23 on the speaking portion, is required for the Internet-based test (iBT). Information about the TOEFL can be obtained by writing to the Educational Testing Service, Box 6155, Princeton, NJ 08541-6155 or visiting their Web site at www.toefl.org. Alternatively, a minimum composite score of 7.0 on the IELTS test is required for admission. Information about the IELTS can be obtained by contacting IELTS International, 100 E Corson St, Suite 200, Pasadena, CA 91103 or by visiting its Web site at www.ielts.org.

Additionally, the program requires: (1) a completed Smeal College of Business application for graduate study including Graduate School application fee, and (2) official transcripts from all completed graduate and undergraduate course work.

Degree Requirements

Students must complete a minimum of 30 credit hours of graduate instruction. All of the 30 credit hours must be earned in 400-level,

500-level, or 800-level courses. At least 18 of the 30 credit hours must be earned in 500-level and 800-level courses, and at least 6 of the 30 credit hours must be earned in 500-level courses.

Students must complete the following required courses as part of the 30 credit hours of graduate instruction:

ACCOUNTING (ACCTG)

- 432. Accounting Information Systems (3)
- 440. Advanced Managerial Accounting (3)
- 803. Forensic Accounting (3)
- 806. Advanced Topics in Taxation (3)
- 873. Advanced Topics in Financial Reporting (3)
- 881. Financial Statement Analysis (3)

BUSINESS ADMINISTRATION (B A)

- 517. Leadership Communications (3)

BUSINESS LAW (B LAW)

- 444. Advanced UCC and Commercial Transactions (3)

FINANCE

- 531. Financial Management (3)

ACCTG 803 will be the capstone course for the program, with the final project integrating material learned in the other program courses. Student must also take an additional 3 credit (elective) course selected in consultation with their adviser.

Integrated B.S. in Accounting and Master of Accounting in Accounting Program

The Department of Accounting offers an integrated program allowing students to receive a B.S. in Accounting and Master of Accounting (M.Acc.) degrees within a five-year period. Students typically are admitted into the integrated program in the spring of the second year of the undergraduate program and the program is completed in the subsequent three years. The program is designed to meet the educational requirements for becoming a certified public accountant in Pennsylvania as well as most other states. Certified public accountants conduct independent audits and provide accounting, tax, and management advisory services. The program prepares students to enter into careers in public accounting, corporate accounting, management accounting, governmental accounting, financial analysis, and law enforcement. In addition, the program is appropriate for students having an interest in entering law school and graduate programs in business, such as M.B.A. programs or doctoral programs.

Admission Requirements

Students will generally apply for the program in the spring of their second year of undergraduate study. To apply for the program students must:

(1) be enrolled in the Smeal College of Business or Division of Undergraduate Studies and intend to complete the entrance-to-major requirements by the end of the spring semester in which they apply

and

(2) complete a Graduate School application for graduate study.

Although the program has no fixed minimum grade-point requirement, an applicant is generally expected to have grade-point average of at least 3.20 on Penn State's grading scale of A (4.00) to D (1.00).

In addition, the Department may request an interview with an applicant, or require a GMAT exam or other exam. Admissions decisions will be based upon the student's application, undergraduate record, SAT scores and, if applicable, interviews and examination results.

Admitted students must have completed ACCTG 211 with superior performance by the end of the spring semester in which they apply for admission to the program. A student who has not satisfied this requirement by the admissions deadline may be provisionally admitted pending completion of ACCTG 211 with a superior performance.

Degree Requirements

Students must complete the requirements for a B.S. in accounting with the following alterations:

Some of prescribed courses for the B.S. must be taken in sections that are available only to students enrolled in the program. These prescribed courses, which all count toward the undergraduate degree in accounting, are: ACCTG 403W, ACCTG 404, ACCTG 405, ACCTG 471, and ACCTG 472.

The student need not satisfy the requirement that 6 credit hours be completed from the following list of courses: ACCTG 406, ACCTG 432, ACCTG 473, and ACCTG 481.

The following courses cannot be used to satisfy the degree requirements of the integrated program: ACCTG 406, ACCTG 410, ACCTG 411, ACCTG 422, ACCTG 450, ACCTG 473, and ACCTG 481.

Students must complete the Master of Accounting Requirements, which total 30 credit hours of graduate instruction, in addition to completing 120 credit hours of undergraduate instruction.

The following courses, totaling 9 credits hours, will double-count towards both the B.S. and Master of Accounting degrees: B LAW 444(3), FIN 531(3), and ACCTG 881(3).

Courses

Graduate courses carry numbers from 500 to 599 or 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may

be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Last Revised by the Department: Spring Semester 2010

Degrees Conferred:

Ph.D., M.S., M.Eng.

The Graduate Faculty

- Anthony A. Atchley, Ph.D. (U of Mississippi) Professor of Acoustics; Program Head
- Ingrid M. Blood, Ph.D. (Bowling Green) Professor of Communication Sciences and Disorders
- David L. Bradley, Ph.D. (Penn State) Senior Scientist; Professor of Acoustics
- Kenneth Brentner, Ph.D. (Cambridge) Professor of Aerospace Engineering
- Timothy Brungart, Ph.D. (Penn State) Senior Research Associate; Associate Professor of Acoustics
- Russell C. Burkhardt, Ph.D. (Penn State) Research Associate; Assistant Professor of Acoustics
- Dean Capone, Ph.D. (Penn State) Research Associate; Assistant Professor of Acoustics
- R. Lee Culver, Ph.D. (California, San Diego) Assistant Professor of Acoustics
- John Fahnline, Ph.D. (Penn State) Research Associate; Assistant Professor of Acoustics
- Thomas A. Frank, Ph.D. (Wisconsin) Professor of Communication Sciences and Disorders
- Thomas B. Gabrielson, Ph.D. (Penn State) Senior Research Associate; Associate Professor of Acoustics
- Steven L. Garrett, Ph.D. (UCLA) United Technologies Professor of Acoustics
- Stephen A. Hambric, D.Sc. (George Washington) Senior Research Associate; Associate Professor of Acoustics
- W. Jack Hughes, Ph.D. (Penn State) Senior Scientist; Professor of Acoustics
- Yu-Fan Hwang, Ph.D. (Penn State) Senior Research Associate; Associate Professor of Acoustics
- Robert M. Keolian, Ph.D. (U of California) Senior Research Associate; Associate Professor of Acoustics
- Gary H. Koopmann, Ph.D. (Catholic) Distinguished Professor of Mechanical Engineering
- John S. Lamancusa, Ph.D. (Wisconsin, Madison) Professor of Mechanical Engineering
- Gerald C. Lauchle, Ph.D. (Penn State) Professor of Acoustics
- George Lesieutre, Ph.D. (California, Los Angeles) Professor of Aerospace Engineering
- Lyle Long, Ph.D. (George Washington) Professor of Aerospace Engineering
- Anthony Lyons, Ph.D. (Texas A&M) Senior Research Associate; Associate Professor of Acoustics
- William Mark, Ph.D. (MIT) Senior Scientist; Professor of Acoustics
- Julian D. Maynard, Ph.D. (Princeton) Professor of Physics
- Timothy McDevitt, Ph.D. Senior Research Associate; Associate Professor of Acoustics
- Dennis K. McLaughlin, Ph.D. (MIT) Professor of Aerospace Engineering
- Philip J. Morris, Ph.D. (Southampton) Boeing Professor of Aerospace Engineering
- John Reeves, Ph.D. (Western Washington State) Senior Research Associate; Associate Professor of Acoustics
- Karl M. Reichard, Ph.D. (Virginia Polytech) Research Associate; Assistant Professor of Acoustics
- Michael Roan, Ph.D. (Penn State) Research Associate; Assistant Professor of Acoustics
- Victor W. Sparrow, Ph.D. (Illinois, Urbana-Champaign) Professor of Acoustics
- Richard Stern, Ph.D. (UCLA) Associate Director, ARL; Professor of Engineering Science and Mechanics
- David C. Swanson, Ph.D. (Penn State) Senior Research Associate; Associate Professor of Acoustics
- Dennis W. Thomson, Ph.D. (Wisconsin) Professor of Meteorology
- Bernhard R. Tittmann, Ph.D. (UCLA) Schell Professor of Engineering Science and Mechanics
- Martin W. Trethewey, Ph.D. (Michigan Tech) Professor of Mechanical Engineering
- Richard Tutweiler, Ph.D. (Penn State) Senior Research Associate; Associate Professor of Acoustics
- Lora G. Weiss, Ph.D. (Penn State) Senior Research Associate; Associate Professor of Acoustics

The aim of this program is to enable the student interested in acoustics to obtain an integrated program covering acoustical science and engineering applications of acoustics.

Student curricula are individually tailored and integrated through a selection of core and elective courses in areas such as basic acoustics, physical acoustics, underwater acoustics, signal processing, optics, architectural acoustics, medical ultrasonics, aeroacoustics, vibrations, wave propagation, speech, physiological acoustics, psychoacoustics, thermoacoustics, hydroacoustics, and computational acoustics. The courses are offered by the Graduate Program in Acoustics and by other participating University departments, including Aerospace Engineering, Architectural Engineering, Bioengineering, Electrical Engineering, Engineering Science and Mechanics, Mechanical Engineering, Meteorology, Geosciences, Physics, Speech Communication, and Communication Disorders.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

Entering students should hold a bachelor's degree in physics, engineering, mathematics, or a closely related field that would provide substantial preparation in mathematics (a minimum of two semesters of calculus-based physics and mathematics to include complex variables and differential equations). In addition, an undergraduate knowledge of statics and dynamics, linear algebra, and electronic circuit analysis, and the ability to use mathematical analysis software is expected. Students with a 3.00 junior/senior average (on a 4.00 scale), appropriate course backgrounds, and a B+ or better average in mathematics, physical science, and engineering courses will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. An individual with nontechnical background may also apply, but acceptance into the program will depend significantly on the applicant's undergraduate background and motives to pursue advanced study in acoustics. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds and abilities.

Scores from the Graduate Record Examinations (GRE) are required. For applicants required by the Office of Graduate Enrollment to take the TOEFL, minimum require TOEFL scores are 237 (computer-based test) or 580 (paper-based test).

Other Relevant Information

In addition to the acoustics courses listed here, the following courses on acoustics and closely related areas are available: AERSP 511, 524, 525; A E 458, 520; BIOE 506, 516; CMPEN 485; E E 460, 530, 557, 560, 561, 562; E SC 536, 537; E MCH 412, 516, 521, 524A,B,C, 525, 527, 528, 560, 562, 570; GEOSC 504, 507A,B; 551; M E 471, 554; PHYS 443, 533. This list may change as other departments continue to add new courses relevant to acoustics.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin.*

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Joan S. Thomson, Ph.D. (Wisconsin) *Professor of Agricultural Communications; Affiliate Professor of Education*
- Elizabeth J. Tisdell, Ed.D. (Georgia) *Professor of Education*

Adult Education extends through the life span from late adolescence to advanced age and takes place in a rich diversity of organizational as well as informal settings. The purpose of the Adult Education program is to increase the knowledge and competence of those who work with adult learners. Coursework, reading assignments, research projects, internships, informal discussions, and the dissertation all provide opportunities for in-depth and challenging learning experiences. The programs are interdisciplinary, and students are advised to seek learning in supporting fields within the University.

The Ph.D., D.Ed., and M.Ed. degrees are offered only at University Park. The M.Ed. is also offered through the World Campus. Harrisburg offers the D.Ed. degree.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from the Miller Analogies Test (MAT), are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in the program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Applicants with a total Verbal and Quantitative score above 1100 on the GRE, a junior/senior average of 3.00 (on a 4.00 scale), and a graduate average of 3.50 are usually admitted to the Ph.D. or D.Ed. program. Applicants with a junior/senior average of 2.70, a graduate average of 3.20, and a GRE total score of 1000 but with special backgrounds, abilities, and interests also may be admitted to the doctoral programs with only the baccalaureate degree, but they will earn the master's degree en route. The Miller Analogies Test may be accepted in place of the GRE for admission to the graduate program in Adult Education. A sample of student writing and a "career letter" in which applicants explain how the proposed studies in adult education relate to their careers are required for each degree. A proctored writing sample is required of doctoral students. Three letters of reference (at least two from faculty members for Ph.D. applicants) that evaluate the candidate's aptitude for graduate study are required.

Applicants who exhibit exceptional qualities without meeting all of the stated requirements for admission may be considered for provisional admission while removing identified deficiencies. Deficiencies must be rectified within the first two semesters in the program; courses taken to remove deficiencies are considered to be prerequisites and do not earn credit toward the doctoral degree.

Master's Degree Requirements

M.Ed. students are required to write a master's paper, in lieu of a thesis, as part of the required 33 credits of course work. A minimum of 18 credits out of the 33 must be taken at the 500 level and a minimum of 18 credits must be in ADTED prefix courses.

Doctoral Degree Requirements

Ph.D. students are required to take 12 core credits in Adult Education, 12 credits in an emphasis area that is composed of Adult Education and supporting courses outside Adult Education, and 18 research credits, in addition to the residency requirement, candidacy and comprehensive examinations, and continuous registration during the dissertation research. All students are required to be computer literate as determined by their doctoral committee and will be assessed for communication skills during core adult education courses. Students with a knowledge of a second language (as demonstrated by having lived in a foreign country for at least one year, speaking a native language other than English, or having studied another language in post-secondary education for at least two years) will be given preference in admission to the Ph.D. program.

D.Ed. students who do not have previous experience in adult education are expected to acquire the equivalent of one year of experience in one or more fields of adult education practice prior to receiving their D.Ed. degree. A candidacy examination is administered after students complete 9-15 credits. During the comprehensive examination, in addition to being examined in their area of specialization, all D.Ed. students will be examined in the core adult education areas. A minimum of 24 credits in coursework must be taken in Adult Education. A minimum of 15 credits must be taken outside Adult Education as a minor or General Studies option. A minimum of 6 research credits is required.

Students in the Ph.D. program focus on research in Globalization and Lifelong Learning selecting one emphasis area (Distance Education, Literacy for Culturally and Linguistically Diverse Populations, Comparative Lifelong Learning, or Learning in Work and Communities). Research credits develop the background knowledge and tools to enable them to engage in original research. D.Ed. students conduct applied research with the goal of improving practice in the general adult education field.

Prerequisites for the Ph.D. Program: ADTED 460, Introduction to Adult Education, and ADTED 507, Research and Evaluation in Adult Education, or their equivalents, are prerequisites to admission to the Ph.D. program. Another prerequisite is a basic statistics course, such as EDPSY 400 or AEE 521, required as part of the Penn State master's degree program in Adult Education. As prerequisites they do not count toward the requirements of the Ph.D. program although they may be completed while taking required Ph.D. courses.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin.*

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

ADULT EDUCATION (ADTED) course list

Last Revised by the Department: Fall Semester 2004

Review Date: 6/15/04

Last updated by Publications: 7/16/10

Aerospace Engineering (AERSP)

Program Home Page (Opens New Window)

GEORGE A. LESIEUTRE, Head of the Department
229 Hammond Building
814-865-2569; Fax: 814-865-7092; gradaero@engr.psu.edu

Degrees Conferred:

Ph.D., M.S., M.Eng.

The Graduate Faculty

- Sven G. Bilén, Ph.D. (Michigan) Associate Professor of Engineering Design and Electrical Engineering, and Aerospace Engineering
- Kenneth S. Brentner, Ph.D. (Cambridge) Professor of Aerospace Engineering
- Cengiz Camci, Ph.D. (Von Karman Institute) Professor of Aerospace Engineering
- Stephen C. Conlon, Ph.D. (Penn State) Research Associate; Assistant Professor of Aerospace Engineering
- Farhan S. Gandhi, Ph.D. (Maryland) Professor of Aerospace Engineering
- Joseph F. Horn, Ph.D. (Georgia Tech) Associate Professor of Aerospace Engineering
- Robert F. Kunz, Ph.D. (Penn State) Senior Research Associate; Associate Professor of Aerospace Engineering
- Jack W. Langelaan, Ph.D. (Stanford) Assistant Professor of Aerospace Engineering
- George A. Lesieutre, Ph.D. (California, Los Angeles) Professor of Aerospace Engineering
- Deborah A. Levin, Ph.D. (Caltech) Professor of Aerospace Engineering
- Lyle N. Long, D.Sc. (George Washington) Distinguished Professor of Aerospace Engineering and Mathematics
- Mark D. Maughmer, Ph.D. (Illinois) Professor of Aerospace Engineering
- Dennis K. McLaughlin, Ph.D. (MIT) Professor of Aerospace Engineering
- Robert G. Melton, Ph.D. (Virginia) Professor of Aerospace Engineering
- Michael M. Micci, Ph.D. (Princeton) Professor of Aerospace Engineering; Director of Graduate Studies
- Philip J. Morris, Ph.D. (Southampton) Boeing/A. D. Welliver Professor of Aerospace Engineering
- Edward C. Smith, Ph.D. (Maryland) Professor of Aerospace Engineering
- David B. Spencer, Ph.D. (Colorado) Associate Professor of Aerospace Engineering

Opportunities for graduate study are available in the following areas: low-speed aerodynamics, airplane and helicopter aerodynamics; V/STOL aircraft, turbulence, astrodynamics, turbomachinery, air breathing propulsion, aeroacoustics, gas dynamics, stability and control of aerospace vehicles, aerospace structures, structural dynamics, aeroelasticity, rotorcraft engineering, computational fluid dynamics, experimental fluid dynamics, space propulsion, space vehicle dynamics, and high-performance computing.

Admission Requirements

Applicants must submit official scores from the Graduate Record Examinations (GRE) for admission to the graduate program and consideration for financial assistance. In addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin, the department poses a number of specific requirements. The entering M.Eng. or M.S. student must hold a bachelor's degree in engineering, physical science, or mathematics, and may be required to complete (without degree credit) undergraduate course work in fluid and solid mechanics and intermediate mathematical analysis, if not already completed. The department will consider students with a 3.0 junior/senior grade-point average (GPA) on a 4.0 scale; students with special backgrounds, abilities, or interests may request a waiver to this GPA requirement. The best-qualified applicants will be accepted up to the number of spaces that are available. Admission to the Ph.D. program requires satisfactory completion of a master's program in engineering, physical science, or mathematics. Admission to the Ph.D. program prior to completion of a master's degree may be considered upon the student passing the Ph.D. candidacy exam. A student must have completed at least 18 course credits beyond the baccalaureate degree in order to take the Ph.D. candidacy exam, and is not granted official status as a doctoral candidate until the master's degree is complete and the candidacy exam has been passed. Application materials are available at: www.aero.psu.edu.

M.Eng., M.S., and Ph.D. Core Requirements

1. Basic field theories. Complete two courses for 6 credits, one from a prescribed list in each of two of the following categories: fluid mechanics, solid mechanics, or system dynamics.
2. Numerical/computational methods. Complete one 3-credit course that addresses the numerical analysis of differential equations, from a prescribed list.
3. Applied mathematics. Complete one 3-credit, 500-level course from a prescribed list.
4. Teaching assistants and teaching aides who have classroom or laboratory instructional responsibilities must satisfactorily complete ENGR 588. Those with responsibilities limited to grading, holding office hours, and offering problem sessions must take ENGR 588 or a grading seminar.

Master of Engineering Degree Requirements

The M.Eng. degree is a nonthesis professional master's degree. A total of 30 credits is required, including courses in the core requirements. Twenty-one credits must be in Aerospace Engineering courses with at least 18 credits at the 500 level. A student may count a maximum of 6 credits of 400-level course work toward the degree. Each student must complete a scholarly paper (for 2 credits of AERSP 596), which includes a literature review and some additional experiment or analysis, and must complete the graduate colloquium (for 1 credit of AERSP 590).

Master of Science Degree Requirements

A total of 30 credits is required, including courses in the core requirements. Twelve credits must be in Aerospace Engineering courses with at least 6 credits at the 500 level. A student may count a maximum of 6 credits of 400-level course work toward the degree. Six credits of thesis research are also required. A completed M.S. thesis and its public presentation are required for graduation.

Doctoral Degree Requirements

There is no foreign language requirement for the Ph.D. degree; however, students must demonstrate proficiency in reading, writing, and speaking English through an examination administered by the department. This must be completed to satisfy the Graduate School's requirement before taking the comprehensive exam. The candidate's doctoral committee decides which, if any, courses are required in addition to those specified in the core requirements; this typically involves 24 course credits beyond the M.S. degree. Ph.D. candidates must also demonstrate evidence of experimental experience.

Over the course of a Ph.D. program, the department and doctoral committee administer three examinations: The candidacy examination is given as a preliminary aptitude test before the end of the second semester following admission to the program. A comprehensive examination, which covers the major and minor fields of study, is administered after the candidate has substantially completed the required course work. The final oral examination, which is related mainly to the dissertation, is given after the candidate has satisfied all other degree requirements. All Ph.D. students must maintain continuous registration until the thesis is approved. A completed Ph.D. dissertation and its public defense are required for graduation.

Student Aid

Graduate assistantships and other forms of financial aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

AEROSPACE ENGINEERING (AERSP) course list

Agricultural and Biological Engineering (A B E)

Program Home Page

PAUL H. HEINEMANN, *Head of the Department of Agricultural and Biological Engineering*
250 Agricultural Engineering Building
814-865-7792

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- Dennis E. Buffington, Ph.D. (Minnesota), P.E. Professor of Agricultural Engineering
- Jeff Catchmark, Ph.D. (Lehigh) Assistant Professor of Agricultural Engineering
- Ali Demirci, Ph.D. (Iowa State) Associate Professor of Agricultural Engineering
- Herschel A. Elliott, Ph.D. (Delaware) P.E. Professor of Agricultural Engineering
- Robert E. Graves, Ph.D. (Massachusetts) P.E. Professor of Agricultural Engineering
- James M. Hamlett, Ph.D. (Iowa State) P.E. Associate Professor of Agricultural Engineering
- Paul H. Heinemann, Ph.D. (Florida) Professor of Agricultural Engineering
- James W. Hilton, Ph.D. (Iowa State) Associate Professor of Agricultural Engineering
- Joseph Irudayaraj, Ph.D. (Purdue) Associate Professor of Agricultural Engineering
- Albert R. Jarrett, Ph.D. (Penn State) P.E. Professor of Agricultural Engineering
- Jude Liu, Ph.D. (Manitoba, Canada) Assistant Professor of Agricultural Engineering
- Kenneth M. Lomax, Ph.D. (Maryland) Adjunct Associate Professor of Agricultural Engineering
- Harvey B. Manbeck, Ph.D. (Oklahoma State) P.E. Distinguished Professor Emeritus of Agricultural Engineering
- Dennis J. Murphy, Ph.D. (Penn State) C.S.P. Distinguished Professor of Agricultural Engineering
- Virendra M. Puri, Ph.D. (Delaware) Distinguished Professor of Agricultural Engineering
- Thomas L. Richard, Ph.D. (Cornell) Associate Professor of Agricultural Engineering
- Robert D. Shannon, Ph.D. (Indiana) Associate Professor of Agricultural Engineering
- Paul N. Walker, Ph.D. (Massachusetts) P.E. Professor of Agricultural Engineering
- Eileen F. Wheeler, Ph.D. (Cornell) Professor of Agricultural Engineering
- Roy E. Young, Ph.D. (N Carolina State) P.E. Professor of Agricultural Engineering

Agricultural and Biological Engineering offers students the opportunity to gain expertise in areas of engineering for biological/agricultural systems corresponding to their professional interests. Graduate students select research projects (and supporting course work) from a wide range of interest areas that match faculty research expertise. Research projects are available in physical properties of biological materials, plant and animal production systems, food engineering, wood engineering, agricultural structures, agricultural safety, food safety, bulk solids handling and storage, agricultural systems engineering, agricultural by-product utilization, forage processing and handling systems, electronics instrumentation, online computer control systems, erosion and sedimentation control, waste management, water quality, and natural resources management and conservation.

Excellent facilities, including equipment and instrumentation, are available for research in the designated areas. Among the special facilities are field plot areas; a full-scale sedimentation basin test facility; hydraulic flumes; sedigraph; gas and ion chromatography units; atomic absorption unit; rainfall simulators; food properties lab; food equipment and processing lab; microbiological engineering lab; computer vision systems; hydraulic and pneumatic test stands; fabrication shop; electronics instrumentation; microcomputer laboratory; controlled environment chambers; wood structures lab; and wood mechanics lab. Collaborative arrangements allow access to a large variety of other resources: Penn State Institutes of the Environment; Particulate Materials Center; Housing Research Center; Center for Food Manufacturing; USDA Pasture Systems and Watershed Management Research Lab; a mushroom research and demonstration facility and a 1,500-acre agricultural research center for cooperative work with agronomic and horticultural production systems as well as animal production systems.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin.*

An undergraduate major in engineering is normally a prerequisite to work in the major. Students without an undergraduate engineering degree will be considered for admission on a provisional basis pending the completion of a number of additional credits to be specified on an individual basis.

All students must submit scores from the General Aptitude Test of the Graduate Record Examinations (GRE) prior to admission (except those who have an ABET-accredited engineering degree). There is no minimum GRE score required for admission, as this is only one of several qualifications considered in the admission review process. However, financial assistance is often influenced by the degree of success exhibited by GRE scores and grade-point averages (GPAs) from previous engineering programs. International applicants must submit OFFICIAL transcripts, degree, and diploma certificates in both English and the native language.

Photocopies will not be accepted. All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test or a score of 213 on the computer-based test is required for admission. The TOEFL exam must be taken within three years of the application date.

All applicants must provide the department with official transcripts of all their previous course work (in duplicate), a statement of purpose written by the applicant, and at least three letters of recommendation. Admission into the A B E Graduate Program is based upon a thorough review of all applicant qualifications, and the best-qualified applicants will be accepted up to the number of students for which department resources are available.

Entrance to Master of Science Program

Completion of an undergraduate degree in agricultural or biological engineering or in another related engineering discipline is required

for direct admission to the A B E graduate program. Students need at least a 2.50 (4.00 base) junior/senior grade-point average to be considered for admission.

A student with an undergraduate degree in a non-engineering field can be admitted to the M.S. program on a provisional basis, which continues until completing the engineering undergraduate requirements in mathematics, physics, engineering sciences (thermodynamics, statics, dynamics, strength of materials, fluid-mechanics and electrical circuitry), and 6 credits of 400-level Agricultural and Biological Engineering courses. Upon completion of these preparatory courses with a minimum grade-point average of 2.75, the student will be admitted to the graduate program.

Entrance to Doctor of Philosophy Program

The requirement for direct acceptance is an M.S. degree with a research thesis in an engineering or science discipline and a B.S. degree from an engineering program. Only very highly qualified students will be accepted into the Ph.D. program directly from a B.S. engineering program.

A student with an undergraduate degree in a non-engineering field can be admitted to the Ph.D. program on a provisional basis, which continues until completing the engineering undergraduate requirements in mathematics, physics, engineering sciences (thermodynamics, statics, dynamics, strength of materials, fluid mechanics and electrical circuitry), and 6 credits of 400-level Agricultural and Biological Engineering courses.

Master's Degree Requirements

All candidates for the M.S. degree must prepare a thesis, complete a minimum of 30 graduate credits (including a minimum of 6 credits of research), and obtain a minimum grade-point average of 3.00. Only grades of C or better are accepted for graduate credit. Each program should include at least one course each from the areas of agricultural and biological engineering, agricultural/biological science, mathematics or statistics, and A B E 500 Research Methods. A total of at least 12 credits of course work must be at the 500 level. All courses must be approved by the student's advisory committee as having significance and value for the degree program. All requirements for a master of science degree, whether satisfied at Penn State or elsewhere, must be met within five years from the first semester of graduate study.

Additional program details are contained in a graduate syllabus, available from the department.

Doctoral Degree Requirements

Official entrance into a Ph.D. program occurs upon successful completion of the Ph.D. Candidacy Exam. Ph.D. degree requirements include successful completion of the following: approved graduate course work, Ph.D. language and communication requirements, a comprehensive examination, and defense and approval of a dissertation.

No specified number of courses completed or credits earned are required by the department. However, the candidate must complete at least 9 credits of Agricultural and Biological Engineering (A B E) course work beyond the baccalaureate degree. Six credits must be 500-level A B E courses (excluding A B E 500, 590, 594, 595, 596); the remaining 3 credits must be in any A B E 460 course or higher. Unless previously taken, all Ph.D. students must complete A B E 500. The student's doctoral advisory committee will recommend the minimum requirements in such supporting areas as mathematics, engineering, agricultural/biological sciences, and physical sciences. The candidate is expected to develop a program of study and submit it to the appointed doctoral advisory committee for consideration and approval. All Ph.D. students are required to participate in resident education or extension teaching activities for the equivalent of at least one semester during their graduate program. A typical plan of study consists of about 90 credits beyond the baccalaureate degree with about 30 of the total credits for research. All requirements for a Ph.D. degree, whether satisfied on this campus or elsewhere, must be completed within seven years after passing the candidacy examination.

PH.D. LANGUAGE AND COMMUNICATION REQUIREMENT--The purpose of the communication requirement is to strengthen the student's professional communication skills. The candidate must take a minimum of two courses (a minimum total of 5 credits) and receive a grade of B or better in each course taken. Course selections must be approved by the academic adviser prior to registration. Courses used to satisfy this requirement must include the substantial practice of writing and/or speaking.

Other Relevant Information

Continuous fall and spring registration is required for all graduate students until the thesis is approved.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin.*

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Agricultural and Extension Education (AEE)

Program Home Page (Opens New Window)

TRACY S. HOOVER, *Head of the Department*
323 Agricultural Administration Building
814-865-1688

Degrees Conferred:

Ph.D., M.S., M.Ed.

The Graduate Faculty

- Connie D. Baggett, Ph.D. (Penn State) Associate Professor of Agricultural and Extension Education
- Blannie E. Bowen, Ph.D. (Ohio State) Professor of Agricultural and Extension Education
- Cathy F. Bowen, Ph.D. (Ohio State) Associate Professor of Agricultural and Extension Education
- Jacklyn A. Bruce, Ph.D. (Texas A&M) Assistant Professor of Agricultural and Extension Education
- Thomas H. Bruening, Ph.D. (Iowa State) Associate Professor of Agricultural and Extension Education
- Ann H. Dodd, Ph.D. (Penn State) Associate Professor of Agricultural and Extension Education
- John C. Ewing, Ph.D. (Ohio State) Assistant Professor of Agricultural and Extension Education
- Constance A. Flanagan, Ph.D. (Michigan) Professor of Agricultural and Extension Education
- James W. Hilton, Ph.D. (Iowa State) Associate Professor of Agricultural and Extension Education
- Tracy S. Hoover, Ph.D. (Penn State) Associate Professor of Agricultural and Extention Education
- Patreese D. Ingram, Ed.D. (Western Michigan) Associate Professor of Agricultural and Extension Education
- Matthew S. Kaplan, Ph.D. (CUNY) Associate Professor of Agricultural and Extension Education
- Claudia C. Mincemoyer, Ph.D. (Penn State) Associate Professor of Agricultural and Extension Education
- James H. Mortensen, Ph.D. (Penn State) Professor of Agricultural Education
- Daniel F. Perkins, Ph.D. (Michigan State) Professor of Agricultural and Extension Education
- Rama B. Radhakrishna, Ph.D. (Penn State) Associate Professor of Agricultural and Extension Education
- Kristina G. Ricketts, Ph.D. (Florida) Assistant Professor of Agricultural and Extension Education
- Dennis C. Scanlon, Ph.D. (Ohio State) Professor of Agricultural and Extension Education
- Jan F. Scholl, Ph.D. (Iowa State) Associate Professor of Agricultural and Extension Education
- Tena L. St. Pierre, Ph.D. (Penn State) Associate Professor of Agricultural and Extension Education
- Joan S. Thomson, Ph.D. (Wisconsin-Madison) Professor of Agricultural Communications
- Barbara K. Wade, Ph.D. (Penn State) Affiliate Assistant Professor of Agricultural and Extension Education
- Nicole S. Webster, Ph.D. (Michigan State) Assistant Professor of Agricultural and Extension Education
- Edgar P. Yoder, Ph.D. (Ohio State) Professor of Agricultural and Extension Education

Graduate programs emphasize agricultural or extension education (including preparation for employment in college or university programs), youth and family programming, state-level administration, local-level administration, private industry and international education. A minor may be taken in an area of the student's choice or in general studies. Programs may include courses needed for certification in other fields of education.

Admission Requirements

All applicants must submit a letter of application, two or three typewritten pages in length, describing their professional experience, education, career goals, and reasons for pursuing the degree. Applicants must ensure that three departmental recommendation and evaluation forms from individuals knowledgeable about the applicant are forwarded to the department. Only the most qualified applicants will be admitted to the graduate program. The graduate program may provisionally admit selected applicants pending resolution of the requirements listed here or applicants with special skills and experiences. Requirements listed here are in addition to the general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Master's Degrees

Prerequisite for admission to a master's program is a demonstrated professional interest in agricultural and extension education and/or applied youth and family education. Applicants whose junior-senior grade-point average (GPA) is under 3.00 on a 4.00 scale for their baccalaureate degree are required to submit Graduate Record Examinations (GRE) scores.

Master of science: This program is intended for those who are interested in defining, developing, or evaluating educational programs, both formal or nonformal, through public and private agencies and organizations serving youth, families or the agriculture community.

Master of education: Prerequisite for admission to this program is a minimum of 18 credits in professional education courses (including educational psychology and teaching and/or professional internship) or certification as a teacher of agriculture, or equivalent professional experience, including extension.

Doctoral Degree

An applicant should have a minimum average of 3.40 on a 4.00 scale on all previous graduate work or a minimum combined score of 1000 on the verbal and quantitative sections of the GRE. Two years of appropriate professional experience is required either prior to admission or before the degree is awarded. An interview with the graduate faculty is recommended of all applicants prior to admission into a doctoral program. Applicants to the doctoral program must submit evidence of ability to write a scholarly paper or thesis and demonstrate a teaching-level competence of English.

Master's Degree Requirements

A program of study agreement between adviser and student, including planned course work (approved by the student's committee) and time frame, should be completed before beginning the second semester of study. Successful performance on a four-hour written essay exam, plus a one-hour oral exam, is required of all M.S. and M.Ed. candidates near the completion of their course work for the degree. The master's candidate is required to successfully complete an oral defense of a paper or thesis.

Doctoral Degree Requirements

Two years of appropriate professional experience is required either prior to admission or before the doctoral degree is completed.

Other Relevant Information

Selection and appointment of a thesis adviser and doctoral committee follows admission to candidacy. The candidate consults the department head or graduate officer in selecting an adviser. The candidate, in cooperation with an adviser, selects the doctoral committee. The chair of the committee is not necessarily the thesis adviser, but the thesis adviser is a member of the committee.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

AGRICULTURAL AND EXTENSION EDUCATION (AEE) course list

Review Date: 1/16/07

Last updated by Publications: 10/25/06

Agricultural, Environmental, and Regional Economics (AEREC)

Program Home Page (Opens New Window)

STEPHEN M. SMITH, Head of the Department of Agricultural Economics and Rural Sociology
103 Armsby Building
814-865-5461

Degrees Conferred:

Ph.D., M.S.

The graduate program emphasizes economic theory and quantitative methods as applied to the food and agricultural system, natural resources and the environment, and regional economics and economic development.

Graduate Option in Watershed Stewardship

M.S. students in this program may elect the Graduate Option in Watershed Stewardship. This option provides enhanced educational opportunities for students with an interest in water resources management. The Watershed Stewardship Option attracts students from several graduate programs and educates them to facilitate team-oriented, community-based watershed management planning directed at water resource problems. The Watershed Stewardship Option is coordinated with similar options in other graduate programs through the Center for Watershed Stewardship. The Graduate Option in Watershed Stewardship requires 18 credits of graduate course work when taken with the M.S. degree in Agricultural, Environmental and Regional Economics: 6 credits of breadth courses, 3 credits of environmental economics, 1 credit of Watershed Stewardship Seminar (AEREC 591), and 8 credits of Watershed Stewardship Practicum I and II (AEREC 570 and AEREC 571). Breadth courses consist of 3 credits of graduate course work from water resources science and 3 credits from either humanities or communications/design. For M.S. students, the 3 credits in environmental economics consist of Resource and Environmental Economics I (AEREC 519). In the watershed stewardship practicum courses, students work in multidisciplinary teams with community, government and business leaders to analyze and understand natural resource problems and creatively synthesize appropriate solutions in a written watershed management plan.

Lists of acceptable water resources science, humanities, and communication/design courses are maintained by the Center for Watershed Stewardship. Students may petition the Agricultural, Environmental and Regional Economics Graduate Program Committee and the Center for Watershed Stewardship to substitute higher level or equivalent courses to suit their specific backgrounds and goals. Courses taken for the Graduate Option in Watershed Stewardship may be used to satisfy other equivalent (400- or 500-level) degree requirements in the Agricultural, Environmental and Regional Economics graduate program with the concurrence of their adviser and the Agricultural, Environmental and Regional Economics Graduate Program Committee. The graduate committee for a student enrolled in the Option in Watershed Stewardship must include a faculty representative from the Center for Watershed Stewardship.

Admission Requirements

Scores from the Graduate Record examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Students entering the master's program should have a total of 9 credits in agricultural economics and/or economics. Students entering the doctoral program should have successfully completed courses in intermediate micro- and macroeconomic theory, in differential and integral calculus and linear algebra, and in intermediate statistics. Students are permitted to enter the master's and doctoral programs with deficiencies but must pass courses to eliminate deficiencies as soon as possible.

Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Doctoral Degree Requirements

There is no foreign language requirement for the Ph.D. degree; rather, the student must satisfactorily complete courses in economic theory and quantitative methods.

Other Relevant Information

Students in this program may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees.

Students may qualify for admission to the dual-title degree program option in Demography consisting of interdisciplinary course work, with special emphasis on the economic, social, and geographic issues arising from the dynamics of population change.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin.*

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Heather D. Karsten, Ph.D. (Cornell) Associate Professor of Crop Production/Ecology
- Daniel P. Knievel, Ph.D. (Wisconsin) Associate Professor of Crop Physiology
- Peter J. Landschoot, Ph.D. (Rhode Island) Professor of Turfgrass Science
- Andrew S. McNitt, Ph.D. (Penn State) Assistant Professor of Soil Science
- David A. Mortensen, Ph.D. (North Carolina State) Professor of Weed Ecology/Biology
- Barbara Pennypacker, Ph.D. (Penn State) Senior Scientist; Professor of Agronomy; Assistant Dean of the Graduate School
- Gregory W. Roth, Ph.D. (Penn State) Professor of Agronomy
- Matt A. Sanderson, Ph.D. (Iowa State) Adjunct Associate Professor of Agronomy
- Robert H. Skinner, Ph.D. (Missouri) Adjunct Assistant Professor of Agronomy
- A. J. Turgeon, Ph.D. (Michigan State) Professor of Turfgrass Management
- Thomas L. Watschke, Ph.D. (Virginia Tech) Professor of Turfgrass Science

Agronomy graduate programs emphasize research that increases the efficiency of production of agronomic crops, improves the quality of food, feed, and fiber available for humans and animals, assists in the use and development of land resources, develops an understanding of the basic soil-plant-animal climate complex of which humans are a part, and improves the overall quality of the human environment. Within this framework, students may specialize in soil science, crop science, or soil and crop management, including turfgrass management. Areas of specialization in soil science include chemistry, fertility, genesis and morphology, microbiology, mineralogy, and physics. Crop science specialties include breeding and genetics, ecology and management, physiology, and weed science.

Research facilities include a 340-acre experimental farm with irrigation facilities, a 22-acre turfgrass research center, and 18-acre landscape management research center, greenhouses, service areas, and a number of well-equipped experimental laboratories. The department enjoys close collaboration with the USDA Pasture Systems and Watershed Management Research Laboratory, which adds substantial strength to the research and graduate education capabilities of the department.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination, are required for admission. At the discretion of the graduate standards committee, a student may be admitted provisionally for graduate study in the program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin.*

Prerequisites for major work in agronomy vary with the area of specialization and the degree sought, but courses in chemistry, mathematics, physics, geology, basic and applied biological sciences, and English communication skills are required. A baccalaureate degree in basic or applied natural sciences is preferred for M.S. degree applicants.

A minimum junior/senior grade-point average 3.00 (on a 4.00 scale) is required in all courses in the biological and physical sciences regardless of when taken. Exceptions to these requirements may be made for students with special backgrounds, abilities, and interests.

For admission to the Ph.D. program, an M.S. or equivalent degree with an emphasis on basic and applied natural sciences is preferred. Applicants for the Ph.D. program will be evaluated on the quality of work completed in all previous degree programs.

Students who lack some of the prerequisite courses may be admitted but are required to take these courses without degree credit. The best-qualified applicants will be accepted up to the number of spaces available for new students.

Master's Degree Requirements

In addition to the general requirements for the M.S. degree as defined by the Graduate School, the department requires 6 credits of 400- or 500-level formal courses in a minor or general studies area. Participation in at least one Agronomy seminar course each semester is required, and students must register for at least 1 credit of AGRO 602 Teaching Experience. An advisory committee will be appointed for each student, and additional courses and requirements may be determined by this advisory committee.

A thesis based on field and/or laboratory research is required for the M.S. degree.

Both M.S. and M.Agr. candidates must pass a final examination.

Doctoral Degree Requirements

Beyond the general requirements for the Ph.D. defined by the Graduate School, the department has a number of specific requirements regarding course level and distribution that are defined in the departmental publication "Graduate Degrees in Agronomy." While a minimum number of courses for the degree is not specified, the doctoral advisory committee has the responsibility of specifying courses and credits essential for the education and development of the candidate. Students are expected to be educated in depth in a specific

subfield of agronomy and to have a perspective of the general field. Normally, 55 to 60 credits in formal course work beyond the B.S. degree are required. Doctoral candidates are required to participate regularly in a departmental seminar and to register for at least 2 credits of the seminar during the Ph.D. program. A teaching experience, consisting of two separate semesters, is also required of all Ph.D. students.

The communication and foreign language requirement for the Ph.D. degree may be met either by demonstrating a knowledge of at least one foreign language or by completing at least 6 credits of course work in an area of English communications approved by the student's advisory committee.

Other Relevant Information

Every student has a close professional relationship with his or her faculty adviser. While research that is done for the thesis will be on subjects that fall within the ongoing research program of the adviser, students are encouraged to propose research projects that are of interest to them. For the most part, all costs relative to the research program will be covered by the department. The department encourages professional development of students through participation in meetings of relevant professional societies and organizations.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin.*

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

M.A., Ph.D.

The Graduate Faculty

- Michael L. Barton, Ph.D. (Pennsylvania) Professor of American Studies and Social Science
- Simon J. Bronner, Ph.D. (Indiana) Distinguished Professor of American Studies and Folklore
- John R. Haddad, Ph.D. (Texas) Associate Professor of American Studies and Literature
- Charles Kupfer, Ph.D. (Texas) Associate Professor of American Studies and History
- Yvonne D. Sims, Ph.D. (Bowling Green) Assistant Professor of American Studies and Ethnic Studies

The M.A. Degree Program

The M.A. degree program, offered at Penn State Harrisburg, emphasizes the interdisciplinary study of American society and culture. It serves students who want to investigate the American experience and apply their studies in a variety of professions, including education, government, communications, and museums. It is the distinguishing characteristic of the program that the large majority of its course offerings are taught by faculty trained in the discipline of American Studies and bearing the "American Studies" title. The program offers a number of concentrations including folklore, cultural history (politics, popular culture, media studies), international American Studies, material and visual culture (art, architecture, craft, landscape, food, clothing, medicine), public heritage (museums, historic preservation, archiving, cultural resource management), race and ethnicity, and regional studies.

The campus is located in a rich cultural region, surrounded by Amish Farmlands, Gettysburg, Hershey, Steelton, Ephrata, Carlisle, York, and Harrisburg. Additionally, proximity to the major cities of Philadelphia, Pittsburgh, Baltimore, Washington, D.C., and New York offer a host of research options for students. Strong ties with local educational and cultural institutions, including the Pennsylvania Historical and Museum Commission, State Museum of Pennsylvania, Pennsylvania Farm Museum of Landis Valley, Hershey Museum, National Civil War Museum, and the Dauphin County Historical Society, Cumberland County Historical Society, and other Public Heritage resources provide excellent learning opportunities for students.

The M.A. degree can be earned by full- or part-time study. Most 500-level courses are offered in the evening as the program strives to meet students' needs.

Admission Requirements

The M.A. degree program in American Studies accepts students from a wide array of disciplines--particularly art, history, English, sociology, and anthropology--but recommends educational preparation related to the interdisciplinary study of American culture. This program accepts baccalaureate degrees earned from accredited institutions. Conditions of the degree must be equivalent to the conditions required for a degree from Penn State. All applicants must submit: a completed application form with the application fee; two official transcripts of all colleges and universities attended (minimum of 2.75 junior/senior grade-point average on a 4.00 scale); two letters of recommendation from individuals who can attest to the student's ability to handle graduate study; a statement of intent (approximately 500 to 1,000 words outlining their preparation for study, proposed fields of study, and career goals; and a sample of written work (seminar paper or equivalent research paper) as evidence of their American research and writing skills.

An application is available on the Web at www.hbg.psu.edu or by calling 717-948-6250. Submit materials for fall admission before February 15 and for spring admission before October 15. Students applying for scholarships and assistantships are requested to submit general examination scores of the Graduate Record Examination (GRE) taken within five years previous to the date of application. The GRE is recommended, but not required, for admission.

All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language: www.toefl.org) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the new speaking portion is required for admission; or an International English Language Testing System (IELTS) minimum composite score of 6.5. The IELTS exam tests four mandatory skill areas: listening, reading, writing, and speaking.

Completed international application material must be submitted by the following deadlines. Applications received after the deadlines will be processed for the following semester: fall semester, February 15; spring semester, October 15. Applications received after these deadlines will be processed for the following semester.

Degree Requirements

The student is required to take a minimum of 30 credits in American Studies, including at least 18 credits in the 500 series; AM ST 500, 591, and AM ST 580 or 600 are required. AM ST 500 should be taken within the first two semesters of study; AM ST 591 should be taken in the last two semesters of study. Usually in the last semester of study, students are required to complete their program with a major paper by taking AM ST 580 or thesis, in which case AM ST 600 is taken. The choice of AM ST 580 to fulfill graduation requirements is for an original scholarly master's paper or project. One to 6 credits in AM ST 580 can be earned; the typical number of credits for the culminating project is 3. The choice of AM ST 600 is for a thesis and is taken for 6 credits. The thesis must follow the guidelines established by the Thesis Office of the Graduate School (see http://www.gradsch.psu.edu/current/thesis.html).

Advanced undergraduate courses (400-level) that have not counted toward a student's undergraduate degree may be considered for

transfer into the graduate student's requirement of 30 credits of American Studies with permission of the program and approval of the Graduate School. At least 20 of the 30 credits must be earned at the Harrisburg location where the program is offered. Courses not having an American Studies designation but which are relevant to American Studies may be considered for inclusion in the student's requirement of 30 credits of American Studies with permission of the program.

The Ph.D. Program

The Doctor of Philosophy Program in American Studies represents the study of the United States as an academic field with its own developed theories, methods, and applications. Taking advantage of its location in a capital region with internationally known heritage sites and American Studies resources such as the Gettysburg Battlefield, Three-Mile Island, Hershey, Steelton, Anthracite Coal Region, and Amish Country, it emphasizes critical cultural inquiry and the application of American Studies to public heritage, public policy, and cultural resource management--including governmental work, museums, cultural agencies, education, archives and records management, public policy, and communications. A foundation for this application is an understanding of the American experience developed within the intellectual legacy of American Studies.

Graduates of the program are typically oriented toward public practice as well as scholarship in American Studies--integrating perspectives on United States history, culture, and society. Students have opportunities for internships and field experiences outside the classroom. In addition to preparation for academic teaching and writing, the program is distinctively concerned among other doctoral departments of American Studies with the production of public scholars and leadership careers outside of academe. The program strives to cover America broadly in its national and international contexts, work with local resources and institutions, and to develop a focus on cultural expression and identity, including areas of material and visual culture; folk and popular culture; race, ethnicity, and gender; and literature, performance, and media.

The program requires enrollment as a full-time student for at least two consecutive semesters--9 credits per semester (summer sessions not included). A doctoral student is required to complete the program, including defense and acceptance of the doctoral thesis, within eight years after admission to candidacy.

Admission Requirements

Students may apply for admission only in the fall semester. All materials should be submitted before January 15.

Applicants for the Doctor of Philosophy in American Studies must hold a master's degree in American Studies, or a related field emphasizing American cultural scholarship and public heritage work such as history, English, sociology, political science, folklore, cultural studies, performance studies, ethnic studies, gender studies, communications, art history, museum and library studies, education, and cultural resource management.

Students are required to submit the following:

- a completed online application with the application fee;
- two transcripts of all undergraduate and graduate course work;
- scores from the Graduate Record Examination (GRE);
- three letters of reference attesting to both academic and professional capabilities. (At least two of these letters should be from academic sources, such as professors or academic advisers);
- a letter of 500 to 1000 words outlining significant scholarly and applied experience, career goals, commitment to American Studies as a field, and academic objectives;
- a recent personal vita;
- a paper from a graduate course taken previously or publication demonstrating research and compositional skills.

Admission is highly competitive and the best-qualified students will be admitted subject to space availability and compatibility of the student with the program's research mission. Successful applicants with an M.A. typically have a GPA of 3.5 or above (on a 4.0 scale) in their graduate work.

International Students

International applicants must hold the equivalent of an American master's degree. They must submit official or attested university records, with certified translations if the records are not in English. Notarized copies are not sufficient. The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the Internet-based test. Applicants with iBT speaking scores between 15 and 19 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States and Wales.

Information about the TOEFL can be obtained by writing to the Educational Testing Service, Box 6155 , Princeton , NJ 08541-6155 or visiting their Web site at www.toefl.org (Opens New Window). Local administration at University Park campus of the TOEFL is handled by the IECP. Information about the IELTS can be obtained by contacting IELTS International, 100 East Corson Street, Suite 200 , Pasadena , CA 91103 or visiting its Web site at www.ielts.org(Opens New Window) .

Residency

Over some twelve-month period during the interval between admission to the Ph.D. program and completion of the Ph.D. program, the candidate must spend at least two semesters (summer sessions are not included) as a registered full-time student (9 credits per semester) engaged in academic work at Penn State Harrisburg.

The Curriculum

Students progress through the following phases and take courses designated by their doctoral committee as part of their study for the Ph.D.

Candidacy

In this initial phase, the student must (1) make up any deficiencies in graduate courses in American Studies noted in the letter of acceptance, and (2) complete with a grade of B or better the following courses--AM ST 500 (Theory and Method), AM ST 502 (Problems in American Studies), AM ST 591 (Seminar), and at least one course from the subfield seminars (AM ST 510 to 570)--and (3) pass a candidacy examination. Admitted students who have met all course prerequisites begin the core courses with AM ST 500 (Theory and Method). Students who have already taken AM ST 500 within three years of admission may begin their program of study with the AM ST 502 (Problems in American Studies).

The candidacy examination is administered by a special committee appointed by the director of the doctoral program. After the exam is passed, a student is advanced to doctoral candidacy. General guidance of a doctoral candidate is the responsibility of a doctoral committee consisting of four or more active members of the Graduate Faculty, which includes at least two faculty members in the major field, and one outside member. The primary responsibilities of the outside member are (1) to maintain the academic standards of the Graduate School and (2) to assure that all procedures are carried out fairly. The outside member represents the Graduate School ; and, as such, the outside member shall be a member of the Graduate Faculty but need not have direct expertise in the research area of the candidate. The outside member may contribute technical expertise, but this role is subordinate to the aforementioned primary responsibilities . The dissertation adviser must be a member of the doctoral committee and usually (but is not required to) serves as chair. If the candidate has a minor, that field must be represented on the committee. This committee is appointed by the graduate dean through the Office of Graduate Enrollment Services, upon recommendation of the head of the major program, soon after the student is admitted to candidacy. A person not affiliated with Penn State who has particular expertise in the candidate's research area may be added as a special member, upon recommendation by the head of the program and approval of the graduate dean (via the Office of Graduate Enrollment Services). A special member is expected to participate fully in the functions of the doctoral committee. If the special member is asked only to read and approve the doctoral dissertation, that person is designated a special signatory of the thesis. Occasionally, special signatories may be drawn from within the Penn State faculty in particular situations.

The Comprehensive Examination

Students must be registered as a full-time or part-time degree student for the semester (excluding summer session) in which the comprehensive examination is taken. The examination consists of three parts and is administered by the student's doctoral committee. One is in the area of Theory and Method and an additional two subfields of study from a list of five areas covered in the program. The five subfields of specialization are:

1. Public Heritage, Cultural Resource Management, and Museum Studies;
2. Folk and Popular Culture (material and visual culture, literature and media, language, performance, media, and music);
3. Interdisciplinary History and Politics (history of ideas, philosophy, and politics; biography and oral history; everyday life and socioeconomic studies; government, public policy, and diplomacy);
4. Society and Ethnography (race, ethnicity, class, gender, age; religion and belief; comparative culture and transnationalism);
5. Regional, Environmental, Urban, and Local Studies.

Additional subfields of study within American Studies may be selected with the approval of the student's doctoral committee.

Although the exact number of courses required in each subfield may vary among students, typically four per subfield are required. Doctoral committees meet with students at least once each academic year. Written and oral comprehensive examinations in the three areas are given at the end of the study period.

The Dissertation

Under guidance from the doctoral committee, the candidate prepares a detailed research proposal that serves as the basis for the written dissertation covering an aspect of American Studies. The dissertation should represent a significant contribution to knowledge, show familiarity with the intellectual heritage of American Studies, be presented in a scholarly manner, reveal an ability on the part of the candidate to do independent research of high quality, and indicate considerable experience in using a variety of research techniques and forms of primary evidence. The contents and conclusions of the dissertation must be defended at the time of the final oral examination. Once approved, the student can enroll in AM ST 600 Thesis for on-campus work or AM ST 610 Ph.D. Dissertation Research Off-Campus. The writing and defense of this original contribution to the theory and practice of American Studies is the capstone to the Ph.D. program. A student must be registered continuously for each Fall and Spring semester, beginning with the first semester after the comprehensive examination requirement and residency requirement have been met, until the dissertation is accepted and approved by the dissertation committee. To maintain continuous registration, candidates may register for noncredit AM ST 601 or 611, with payment of the special thesis preparation fee; students who want to combine course work with thesis preparation must register for AM ST 600 or 611 (not 601 which is full-time thesis preparation) plus course registration at the regular per-credit fee. For more information on academic procedures, see http://bulletins.psu.edu/bulletins/whitebook/academic_procedures.cfm

The final examination of the doctoral candidate is an oral examination (defense) administered and evaluated by the entire doctoral committee. This oral defense is open to the public and related in large part to the dissertation, but it may cover the candidate's whole program of study. The Committee may restrict part of the defense to its members and the candidate. The candidate must be registered as a full-time or part-time degree student for the semester in which the oral defense is held.

Grade-Point Average and Time Limit

A minimum grade-point average of 3.0 (on a 4.0 scale) for work done in the American Studies doctoral program at the University is required for doctoral candidacy, for admission to the comprehensive examination, the final oral examination, and for graduation.

A doctoral student is required to complete the program, including acceptance of the doctoral thesis, within eight years from the date of successful completion of the candidacy examination. Extensions may be granted by the Director of Graduate Enrollment Services in appropriate circumstances.

Financial Aid

A limited number of scholarships, loans, and grants are available from the University. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To find available options from the University, contact the Financial Aid Office at 717-948-6307. For more information, see php.scripts.psu.edu/dept/iit/hbg/academics/gradaid.php

Graduate School Funding Programs

Full-time incoming doctoral students starting in the fall semester with a record of scholarly excellence may qualify for a University Graduate Fellowship, Bunton-Waller Graduate Scholar Awards, and other programs. Interested students should contact the program director, who is responsible for nominating students. For more information, see www.gradsch.psu.edu/prospective/funding/programs.html

Capital College Funding Programs

Full-time incoming graduate students may qualify for a Capital College Assistantship and other programs. Students must be nominated for an assistantship by the program director. For more information, see php.scripts.psu.edu/dept/iit/hbg/academics/gradaid.php

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Ph.D., M.S.

The Graduate Faculty

- David A. Antonetti, Ph.D. (Penn State) Associate Professor of Cellular and Molecular Physiology
- Alistair J. Barber, Ph.D. Assistant Professor of Ophthalmology
- Colin J. Barnstable, D.Phil., Professor and Chair of Neural and Behavioral Sciences
- Cheston M. Berlin, M.D. (Harvard) Professor of Pediatrics
- James R. Connor, Ph.D. (California, Berkeley) Professor and Vice Chair of Neurosurgery
- Henry J. Donahue, Ph.D., (California, Santa Barbara), Professor of Orthopaedics and Rehabilitation, and Vice Chair of Basic Science Research
- H. Paul Ehrlich, Ph.D. Professor of Surgery
- Loren A. Evey, Ph.D. Assistant Professor of Neural and Behavioral Sciences
- Ronald R. Gomes Jr., Ph.D., Assistant Professor of Orthopaedics and Rehabilitation
- Charles H. Lang, Ph.D., (Hahneman) Professor and Vice Chair of Cell and Molecular Physiology
- Alphonse E. Leure-duPree, Ph.D. (London) Professor of Neural and Behavioral Sciences
- David X. Liu, Ph.D. (CUNY) Assistant Professor of Neural and Behavioral Sciences
- Patricia McLaughlin, D.Ed. (Penn State) Professor of Neural and Behavioral Sciences
- Christopher Niyibizi, Ph.D. (McGill, Montreal) Associate Professor of Orthopaedics and Rehabilitation
- David S. Phelps, Ph.D. (Temple) Professor of Pediatrics
- Joseph W. Sassani, M.D. (Thomas Jefferson) Professor of Ophthalmology
- Joyce Tombran-Tink, Ph.D., Professor of Neual and Behavioral Sciences
- Thomas C. Vary, Ph.D. (Penn State) Distinguished Professor of Cell and Moleular Physiology
- Ian S. Zagon, Ph.D. (Colorado) Distinguished Professor of Neural and Behavioral Sciences
- Shaomin Zhang, M.D., Ph.D. (Tokyo) Assistant Professor of Neural and Behavioral Sciences

The graduate program emphasizes the general areas of gross anatomy, history, histology/cytology, neuroanatomy/neurophysiology, or appropriate combinations of these areas. Approaches offered include morphological (descriptive, comparative, developmental), functional (physiological, chemical), and experimental.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin.*

A bachelor's degree reflecting a reasonable background in zoology, biology, mathematics, or chemistry is required. Students with a 3.00 junior/senior average and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Applicants must provide complete transcripts and three letters of recommendation. A personal interview is desirable.

Doctoral Degree Requirements

Students must earn a total of at least 35 didactic credits; there are ten required courses, including ANAT 503, ANAT 505, ANAT 506, ANAT 512, ANAT 590, ANAT 602, BMS 501, BMS 502, HES 515 (or equivalent course), IBIOS 591, NEURO 511, and NEURO 530 plus an additional 6 credits in elective courses. Course work must be completed with an overall grade-point average of 3.0 or better. A grade of B(-) or better is required in ANAT 503, ANAT 505, ANAT 506, ANAT 512, and NEURO 511. Each student also must serve as a teaching assistant in SBMP 715 for one semester. In addition, a student must satisfactorily complete the following: (a) candidacy examination, (b) comprehensive examination, and (c) written and oral defense of thesis. Students must demonstrate competency in the English language. Attendance and participation in college-wide seminars, colloquium, and/or journal clubs is highly recommended.

Other Relevant Information

This program is offered only through the College of Medicine at the Penn State Milton S. Hershey Medical Center.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin.*

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. - Gabriella A. Varga, Ph.D. (Maryland) Distinguished Professor of Animal Science
- Regina Vasilatos-Younken, Ph.D. (Penn State) Professor of Poultry Science

Students may specialize in animal care and management, breeding and genetics, growth and development, lactational biology, nutrition, or reproductive biology. Well-equipped research laboratories and various agricultural animals, as well as small-animal models and wildlife species, are available.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin.* Prerequisite to graduate work is the completion of an undergraduate major in animal science, dairy science, poultry science, or a related biological science.

Scores from the Graduate Record Examinations (GRE) are required for admission (average percentile at least 50 percent in verbal, quantitative, and analytical components). The quantitative reasoning component is recommended, but the program will accept scores from the mathematical reasoning component. Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission on a competitive basis.

Exceptions to admission requirements may be made for students with special backgrounds, abilities, and interests.

Degree Requirements

The M.P.S. is a professional program designed to prepare individuals for specialist and management positions in county agricultural extension, government, or industry and does not require a thesis. The academic M.S. and Ph.D. programs require a thesis and are designed for those primarily interested in education and research. The requirements of these programs are detailed in the departmental publication "Graduate Student Handbook in Animal Science." The communication or foreign language requirement for the Ph.D. degree may be satisfied by competence in either one foreign language or communication skills.

Student Aid

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Nina G. Jablonski, *Head*
Department of Anthropology
409 Carpenter Building
814-865-2509
814-863-1474 (fax)
anthropology@psu.edu

Degrees Conferred:

Ph.D., M.A.

The Graduate Faculty

- Stephen J. Beckerman, Ph.D. (New Mexico) Associate Professor of Anthropology
- Anne Buchanan, Ph.D. (Texas) Research Associate for Biological Anthropology
- Nathan Craig, Ph.D. (California, Santa Barbara) Assistant Professor of Anthropology
- E. Paul Durrenberger, Ph.D. (Illinois, Urbana-Champaign) Professor of Anthropology
- Kenneth G. Hirth, Ph.D. (Wisconsin-Milwaukee) Professor of Archaeological Anthropology
- Carrie Hritz, Ph.D. (Chicago) Assistant Professor of Anthropology
- Nina G. Jablonski, Ph.D. (Washington) Professor and Head of Department of Anthropology
- Patricia L. Johnson, Ph.D. (Michigan) Associate Professor of Anthropology, Demography, and Women's Studies
- Jeffrey A. Kurland, Ph.D. (Harvard) Associate Professor Emeritus of Anthropology and Human Development
- Stephen A. Matthews, Ph.D. (U Wales, College of Cardiff) Associate Professor of Sociology and Anthropology
- Joseph W. Michels, Ph.D. (California, Los Angeles) Professor Emeritus of Anthropology
- George R. Milner, Ph.D. (Northwestern) Professor of Anthropology
- Warren T. Morrill, Ph.D. (Chicago) Professor Emeritus of Anthropology
- Lee A. Newsom, Ph.D. (Florida) Associate Professor of Anthropology
- David Puts, Ph.D. (Pittsburgh) Assistant Professor of Anthropology
- Joan T. Richtsmeier, Ph.D. (Northwestern) Professor of Biological Anthropology
- Timothy M. Ryan, Ph.D. (Texas, Austin) Assistant Professor of Anthropology, Geosciences, and Information Sciences and Technology
- Pat Shipman, Ph.D. (NYU) Adjunct Professor of Anthropology
- Mark D. Shriver, Ph.D. (Texas) Associate Professor of Anthropology
- Dean R. Snow, Ph.D. (Oregon) Professor of Anthropology
- Alan Walker, Ph.D. (U London) Evan Pugh Professor of Anthropology and Biology
- David L. Webster, Ph.D. (Minnesota) Professor of Anthropology
- Kenneth M. Weiss, Ph.D. (Michigan) Evan Pugh Professor of Anthropology
- James W. Wood, Ph.D. (Michigan) Professor of Anthropology and Demography

The master's program is designed to train students in general anthropology. The doctoral program is structured to train students in the following areas of specialization: ethnology (with subspecialization in social anthropology, demographic anthropology, cultural evolution, and ecology); archaeology (with subspecialization in cultural ecology, analytical approaches, technological methods, and culture areas); biological anthropology (with subspecialization in human adaptability, genetics, biological demography, human evolution, and the behavioral biology of human and non-human primates).

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Undergraduate preparation must include 12 credits in anthropology and archaeology or their equivalent. A student with an excellent record but who does not meet these requirements may be admitted provided course deficiencies are made up without graduate credit. Students with a 3.00 or higher junior/senior average (on a 4.00 scale) and with appropriate course backgrounds who have research interests directly related to the special anthropological competencies within the department will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Master's Degree Requirements

M.A. candidates may submit either a thesis or a term paper. If the latter is chosen, 6 credits in 500-level courses in the major field must be scheduled in lieu of thesis credits. The M.A. degree may be bypassed by exceptional candidates for the Ph.D. degree.

Doctoral Degree Requirements

The communication and foreign language requirement for the Ph.D. degree includes a reading knowledge of a foreign language plus an option from among additional foreign languages, field languages, linguistics, or statistics.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following award typically has been available to post-comprehensive graduate students in this program:

HILL FELLOWSHIPS FOR STUDY IN ANTHROPOLOGY

Details available from Professor Nina G. Jablonski, Department of Anthropology, 409 Carpenter Building, University Park campus.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Applied Behavior Analysis (ABA)

KIMBERLY A. SCHRECK, *Coordinator*
Penn State Harrisburg
777 West Harrisburg Pike
Middletown, PA 17057
717-948-6048
kas24@psu.edu
www.hbg.psu.edu

Degree Conferred:

M.A.

The Graduate Faculty

Richard M. Foxx, Ph.D. (Southern Illinois) *Professor of Psychology*
Kimberly A. Schreck, Ph.D. (Ohio State) *Associate Professor of Psychology*

The program, offered at Penn State Harrisburg, helps master's level graduates prepare to function in community settings as applied behavior analysts, and to provide the academic training necessary for graduates to apply for national board certification in behavior analysis. The overall model emphasizes the core areas of the discipline including the scientific basis of behavior analysis, as well as how biological, social, and individual differences affect human behavior. Training will emphasize the development of both assessment and intervention skills.

The program helps prepare graduates to work in hospitals, medical schools, mental health centers, health maintenance organizations, a wide variety of educational settings, forensic settings, research facilities, and in center- and home-based programs for individuals with autism and developmental disabilities.

The program is intended for both part- and full-time students. Courses will be scheduled for fall and spring semesters. Admission is in the fall and spring semesters only.

Admission Requirements

Students will be admitted on a competitive basis and must submit the following:

- a completed application form
- two official transcripts of all colleges and universities attended
- three letters of recommendation
- a brief (two-page) interest statement

The applicant must have a bachelor's degree from a regionally accredited academic institution, with at least 18 credits in education, psychology, or related disciplines with a cumulative grade-point average of 3.0 or above in the last 60 credits. Scores from the Graduate Record Examinations are required in the verbal, quantitative, and analytic portions.

The language of instruction at Penn State is English. All international applicants who have not received a baccalaureate or masters degree from a college/university/institution in a country where English is both the language of instruction and the only official or native language must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. a TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the speaking portion is required for admission; or a minimum composite score of 6.5 on the IELTS test is required for admission.

A personal interview may be required.

Transfer Credits

Subject to the limitations given below, a maximum of 10 credits of high-quality graduate work done at a regionally accredited institution may be applied toward the requirements for the master's degree. Transferred academic work must have been completed within five years prior to the date of the first degree registration at the Graduate School of Penn State, must be of at least B quality (grades of B- are not transferable), and must appear on an official graduate transcript of a regionally accredited university. Pass-fail grades are not transferable to an advanced degree program unless the "Pass" can be substantiated by the former institution as having at least B quality.

Degree Requirements

Requirements for the M.A. in Applied Behavior Analysis include 27 credits in required course work, including the master's project paper, supervised internship experience, and 6 elective credits for a total of 33 credits.

ABA Core Courses (to be offered annually) are required for all students in the program.

APPLIED BEHAVIOR ANALYSIS (ABA)
500. Experimental Analysis of Behavior (3)
511. Behavior Modification (3)
522. Single Subject Research (3)
533. Applied Analysis of Behavior (3)
588. Ethics and Legal issues in ABA (3)
594A. A Research Project (3)
595. Internship (9)

Elective Courses (6 credits)

APPLIED BEHAVIOR ANALYSIS (ABA)
555. Behavioral Interventions in Autism (3)
566. Behavioral Pediatrics (3)
577. Behavioral Assessment & Treatment (3)
597. Special Topics (1-3)

PSYCHOLOGY-CI (PSYC)
592. Current Topics (3)

PSYCHOLOGY (PSYCH)
443. Treatment and Education in Developmental Disabilities (3)
476. Child Behavior Disorders (3)

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Applied Clinical Psychology (ACPSY)

THOMAS G. BOWERS, *Graduate Program Coordinator*
Penn State Harrisburg
W-311 Olmsted Building
777 West Harrisburg Pike
Middletown, PA 17057
717-948-6063
dvo@psu.edu
www.hbg.psu.edu

Degree Conferred:

M.A.

The Graduate Faculty

- John Steven Backels, Ph.D. (Ball State) Affiliate Assistant Professor of Psychology
- Michael A. Becker, Ph.D. (SUNY, Albany) Associate Professor of Psychology
- Thomas G. Bowers, Ph.D. (Virginia Tech) Associate Professor of Psychology
- Gina M. Breisford, Ph.D. (Bowling Green) Assistant Professor of Psychology
- Barbara A. Bremer, Ph.D. (Bryn Mawr) Associate Professor of Psychology
- Richard Fiene, Ph.D. (Newport) Associate Professor of Human Development and Family Studies
- Marissa Harrison, Ph.D. (SUNY, Albany) Assistant Professor of Psychology
- Senel Poyrazli, Ph.D. (Houston) Assistant Professor of Counseling Psychology
- Maria A. Turkson, Ph.D. (Maryland) Assistant Professor of Psychology
- Xu Xu, Ph.D. (Northern Illinois) Assistant Professor of Psychology

The Master of Arts in Applied Clinical Psychology program helps students prepare to work as mental health professionals in a variety of settings and is intended to provide a broad training program in empirically validated clinical psychology which, when accompanied by an additional 12 credits in advanced graduate studies in psychology and/or counseling, can provide the academic training necessary for graduates to apply for master's level licensing as a professional counselor in the Commonwealth of Pennsylvania. The M.A. program requires 48 credits of course work. An optional 12-credit certificate program is available in the area of clinical health psychology through the School of Behavioral Sciences and Education for students seeking licensure.

The overall model emphasizes the scientific bases of behavior, including biological, social, and individual difference factors. The training model is health-oriented rather than pathology-oriented and emphasizes the development of helping skills, including both assessment and intervention.

The degree program is intended for both part-time and full-time students. Admission is possible for the fall or spring semesters. The deadline for fall admission is May 1 and the deadline for spring admission is November 1.

Admission Requirements

Students will be admitted on a competitive basis and must submit the following:

- completed application form with the application fee
- two official transcripts of all colleges and universities attended
- three professional letters of recommendation
- a brief (two-page) interest statement
- verbal, quantitative, and analytical scores on the Graduate Record Examinations

The applicant must have a bachelor's degree from a regionally accredited academic institution or the equivalent, must have completed at least 18 credits in psychology, and must have a cumulative grade-point average of 3.0 or above in the last 60 credits of course work. The undergraduate work must include a statistics course and a psychology research methods course with grades of B or higher. A personal interview is required.

International Students

All applicants whose first language is not English or who have not received a baccalaureate degree from an institution in which the language of instruction is English must take the Test of English as a Foreign Language (TOEFL), www.toefl.org. The test must be passed with a score of 550 (paper-based test) or 213 (computer-based test) or higher.

All students with international credentials must submit transcripts to Educational Credential Evaluators, Inc. (ECE) for a "Course by Course" academic evaluation of transcripts and degree. An ECE application can be obtained on the Web at www.ece.org.

Transfer Credits

Penn State allows for the approval of up to 10 transfer credits to graduate programs.

Grade-Point Average

Students must have a 3.00 grade-point average to graduate from the program.

Financial Aid

There is a limited number of scholarships and research grants available, as well as graduate assistantships. Many students work full-time and take classes part-time. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To find other options available to you, contact the Financial Aid Office at 717-948-6307.

Degree Requirements

The M.A. in Applied Clinical Psychology requires 48 credits of coursework. Included in the core courses are 100 hours of clinical practicum, 600 hours of supervised internship experience, and a master's research paper.

Psychology Core Courses (23 credits) provide a foundation in professional ethics, individual differences and cultural diversity, the scientific bases of behavior, and scientific research skills. These courses are intended to facilitate the development of an awareness of the context in which clients live and in which interventions must work.

PSYCHOLOGY (PSYC)

- 500. Ethics and Professional Practice in Psychology and Counseling (3)
- 501. Cultural Competency in Psychology (3)
- 502. Applied Social Psychology (3)
- 520. Research Methods (4)
- 521. Statistics (4)
- 524. Biological Basis of Behavior (3)
- 530. Research Paper (3)

Clinical Core Courses (25 credits) provide a general background in clinical diagnosis, assessment, and interventions with appropriate supervised experience to allow students to develop the clinical skills appropriate for master's level practitioners.

PSYCHOLOGY (PSYC)

- 510. Human Growth and Development (3)
- 517. Psychopathology (3)
- 518. Interviewing and Counseling (3)
- 519. Theories and Models of Psychotherapy (3)
- 540. Group Interventions (3)
- 571. Tests and Measurement (3)
- 595A. Clinical Practicum (1)
- 595B. Clinical Internship (6)

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Applied Linguistics (APLNG)

Program Home Page

JOAN KELLY HALL, *Department Head*
Linguistics and Applied Language Studies
305 Sparks Building
814-865-7365

Degree Conferred:

Ph.D.
Dual-Title Ph.D. Degree in Applied Linguistics and Asian Studies

The Graduate Faculty

- Gabriela Appel-Lantolf, Ph.D. (Delaware) Senior Lecturer in German and Applied Linguistics
- Joan Kelly Hall, Ph.D. (SUNY Albany) Professor of Applied Linguistics
- Karen E. Johnson, Ph.D. (Syracuse) Professor of Applied Linguistics
- Celeste Kinginger, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of Applied Linguistics
- James Lantolf, Ph.D. (Penn State) Professor of Applied Linguistics
- Xiaofei Lu, Ph.D. (Ohio State) Assistant Professor of Applied Linguistics
- Sinfree Makoni, Ph.D. (Edinburgh, Scotland) Associate Professor of Applied Linguistics and African American Studies
- Sandra J. Savignon, Ph.D. (Illinois,Urbana-Champaign) Professor of Applied Linguistics
- Robert Schrauf, Ph.D. (Case Western) Associate Professor of Applied Linguistics
- Susan Strauss, Ph.D. (California, Los Angeles) Associate Professor of Applied Linguistics
- Steve Thorne, Ph.D. (California, Berkeley) Assistant Professor of Applied Linguistics

The Ph.D. in Applied Linguistics helps prepare scholars who will conduct systematic examinations of individual and societal multilingualism in order to build and test theories of how linguistic systems develop, are acquired, used, and taught in global contexts. The Ph.D. degree program includes the foundational theory and research of linguistics, applied linguistics, second language acquisition, psycholinguistics, and sociolinguistics. It will prepare doctoral candidates to utilize a range of research perspectives, both qualitative and quantitative, e.g., sociocultural, historical, linguistic, stylistic, discourse analytical. Overall, the purpose of the research undertaken in graduate study in Applied Linguistics will be to illuminate, in all its complexity, the multiple dimensions of the study of language as a mode of social existence, communication, and cognition.

Admission Requirements

Applicants are required to submit transcripts of all previous course work from institutions of higher learning. In addition, scores from the Graduate Record Examinations (GRE) are required for applicants who have received a degree from an institution of higher education in the United States or abroad in which the medium of instruction is English. GRE scores are optional for applicants who have received a degree from an institution of higher education in which the medium of instruction is a language other than English. All applicants are required to submit three letters of reference (at least two from faculty with whom the applicant has studied) evaluating aptitude for doctoral study. Applicants must submit at least one sample of scholarly writing (published or unpublished research paper, thesis, etc.) and an academic statement describing their teaching and research experience and their specific professional goals and interests.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 600 for the paper-based test, 250 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. In addition, international applicants are encouraged to submit a cassette tape recording on which they describe their career goals and the reasons for wanting to pursue doctoral studies at Penn State.

Candidacy Evaluation

In the third semester (a minimum of 18 credits) of graduate study, all candidates must satisfactorily complete a candidacy evaluation in which they are required to present a portfolio of work completed in their program of study. The portfolio will include a transcript of the candidate's academic record, a program plan, samples of scholarly work in Applied Linguistics and related areas, and a brief description of the proposed dissertation research, showing relevant course work completed and projected. Following submission of this portfolio, the candidate will meet with the members of his/her doctoral committee for an oral candidacy evaluation. The purpose of this evaluation is threefold: (a) to determine whether the candidate has achieved a level of learning and understanding sufficient to justify acceptance as a doctoral candidate, (b) to discover what further study is required to bring the candidate to the competence required for the research being proposed, and (c) to secure approval of a program of course work and independent study to achieve the requisite competence. The particulars of each candidate's program of study and research are defined on the basis of the candidacy evaluation.

English Language Competence

During course work prior to the candidacy examination, candidates will be assessed for communicative competence in reading, writing, and speaking English. Should a higher level of competence be required, the candidate will be directed to the appropriate resources. International candidates will be advised that the passage of the minimal TOEFL requirement does not demonstrate the level of competence required for completion of the Ph.D. program.

English Language Competence

During course work prior to the candidacy examination, candidates will be assessed for communicative competence in reading, writing, and speaking English. Should a higher level of competence be required, the candidate will be directed to the appropriate resources. International candidates will be advised that the passage of the minimal TOEFL requirement does not demonstrate the level of competence required for completion of the Ph.D. program.

Additional Language Competence

All candidates must demonstrate competence in reading relevant research literature in one language other than English and intermediate speaking competence in an additional language. The additional language competence requirements may be demonstrated in a variety of ways.

Committee Composition

The doctoral committee will consist of four or more active members of the Graduate Faculty and must include at least two faculty in the major field. One member of the doctoral committee must be from outside of the candidate's field of study. Members of the Graduate Faculty with courtesy appointments in LALS who are members of the Applied Linguistics Graduate Faculty may serve as the chair of the doctoral committee with approval of the Director of LALS.

Comprehensive Examination

All doctoral candidates must pass a comprehensive examination designed to assess mastery of and ability to synthesize and integrate theoretical issues in Applied Linguistics. This examination is taken upon completion of all course work and the fulfillment of all degree requirements. The content and format of the comprehensive exam will be established by the members of the candidate's doctoral committee in accordance with degree requirements of LALS and consist of two course papers that are of publishable quality and two or three research papers based on questions developed by members of the doctoral committee. The original papers must be submitted by end of semester prior to that in which the student plans to take the comprehensive exam. The student will be given two months' time in which to complete and submit these exam papers. Within three weeks of submission of the exam papers, the student will take an oral exam based on the original research papers and the exam papers. Candidates who fail the examination on the first attempt may repeat it once. Candidates who fail the examination the second time will not be permitted to continue in the program.

Dissertation

Each doctoral candidate is required to conduct an original and independent research project representing a significant contribution to knowledge in the field of study. The project should be presented in a scholarly manner, show an ability on the part of the candidate to do independent research of high quality, and demonstrate considerable experience in using appropriate research techniques. The content and conclusions of the dissertation will be defended at the time of the final oral examination. A written dissertation proposal is required and must be approved at a proposal hearing by a majority vote of the candidate's dissertation committee. A majority vote is also required for approval of the completed written dissertation at the final oral defense.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Dual-Title Graduate Degree in Applied Linguistics and Asian Studies

Graduate students with research and educational interests in international education may apply to the Applied Linguistics/Asian Studies Degree Program. The goal of the dual-title degree Applied Linguistics and Asian Studies is to enable graduate students from Applied Linguistics to acquire the knowledge and skills of their major area of specialization in Applied Linguistics while at the same time gaining the perspective of Asian Studies.

In order to prepare graduate students for the competitive job market, this program provides them with a solid disciplinary foundation that will allow them to compete for the best jobs in their field. For such students the dual-title Ph.D. in Asian Studies will add value to their degree and their status as candidates. It will produce excellent linguists who are experts in Asian Studies as well.The dual-title degree in Applied Linguistics and Asian Studies will build curricular bridges beyond the student’s major field so as to provide a unique training regime for the global scholar.

Additional details of the dual degree program are available in separate documentation and from the Asian Studies Program (see http://asian.la.psu.edu/graduate.shtml).

Admission Requirements

For admission to the dual-title Ph.D. degree under this program, a student must first apply and be admitted to the Applied Linguistics graduate program. Once accepted into the Applied Linguistics program, the student can apply to the Admissions Committee of the Asian Studies. The Asian Studies Admissions Committee reviews applications and recommends students for admission to the Asian Studies program to the Graduate School. Students already in their first and second years of the Applied Linguistics graduate program may also apply to the dual-title program.

Applicants are required to submit transcripts of all previous course work from institutions of higher learning. In addition, scores from the Graduate Record Examinations (GRE) are required for applicants who have received a degree from an institution of higher education in the United States or abroad in which the medium of instruction is English. GRE scores are optional for applicants who have received a degree from an institution of higher education in which the medium of instruction is a language other than English.

There are no specific requirements for admissions into the dual-title program beyond the requirements of the Graduate School and Applied Linguistics, though applicants interested in the program should also make their interest in the dual-degree program known clearly on their applications and include remarks in their essays that explain their training, interests, and career goals in an area of Asian Studies.

General Graduate School requirements are stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Degree Requirements

To qualify for an Asian Studies degree, students must satisfy the requirements of the Applied Linguistics program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, as established by the Asian Studies committee. Within this framework, final course selection is determined by the student, their Asian Studies advisor, and their Applied Linguistics program

advisor.

Upon a student's acceptance by the Asian Studies Admissions Committee, the student will be assigned an Asian Studies academic advisor in consultation with the Asian Studies chair. As students develop specific scholarly interests, they may request that a different Asian Studies faculty member serve as their advisor. The student and advisor will discuss a program of study that is appropriate for the student's professional objectives and that is in accord with the policies of The Graduate School, the Applied Linguistics department and the Asian Studies program.

Requirements for the Applied Linguistics/Asian Studies Ph.D.

The doctoral degree in Applied Linguistics and Asian Studies is awarded only to students who are admitted to the Applied Linguistics doctoral program and admitted to the dual-title degree in Asian Studies. The minimum course requirements for the dual-title Ph.D. degree in Applied Linguistics and Asian Studies are as follows:
60 credits beyond the master's degree, INCLUDING

- 1 credit of APLNG 580
- 6 credits in foundations courses, which may include but need not be limited to the following: APLNG 591, APLNG 597 (Special Topics)
- 6 credits in research methods, which may include but need not be limited to the following: APLNG 593, APLNG 597 (Language Analysis), APLNG 581, APLNG 586.
- 6 credits in Applied Linguistics electives, to be selected in consultation with the applied linguistics advisor
- 15 credits of Asia-related coursework at the 400 or 500 level. At least 6 of these 15 credits will be from ASIA 501 and 502. As many as 6 may come from Applied Linguistics, as approved by the student's doctoral advisor and the Asian Studies Program director of graduate studies. The remaining credits can be taken in ASIA or in any department other than Applied Linguistics.
- All-skills proficiency in one Asian language AND intermediate speaking competence in an additional language other than English

Particular courses may satisfy both the Applied Linguistics requirements and those of the Asian Studies program. Final course selection is determined by the student in consultation with their dual-title program advisors and their major program advisors.

- Senel Poyrazli, Ph.D. (Houston) Assistant Professor of Counseling Psychology
- Maria A. Turkson, Ph.D. (Maryland) Assistant Professor of Psychology
- Xu Xu, Ph.D. (Northern Illinois) Assistant Professor of Psychology

The Master of Arts program in Applied Psychological Research focuses on the development of research skills within the context of scientific training in psychology. The program requires 35 credits of course work (29 credits of core courses and 6 credits of electives).

The program is designed to meet the needs of students who plan careers in research or administration within human service or similar organizations, who plan to conduct research in other settings, or who plan to pursue doctoral study. Students can select electives and research experiences to reflect their individual interests in consultation with their adviser.

The program is intended for both part-time and full-time students. Admission is possible for the fall or spring semesters. The deadline for fall admission is May 1 and for spring admission, November 1.

Admission Requirements

Students will be admitted on a competitive basis and must submit the following:

- a completed application form with the application fee
- two official transcripts of all colleges and universities attended
- three professional letters of recommendation
- a brief (two-page) interest statement
- verbal, quantitative, and analytical scores on the Graduate Record Examinations

The applicant must have a bachelor's degree from a regionally accredited academic institution, must have completed at least 18 credits in psychology, and must have a cumulative grade-point average of 3.0 or above in the last 60 credits of coursework. The undergraduate work must include a statistics course and a psychology research methods course with grades of B or higher. A personal interview is required.

Transfer Credits

Penn State allows for the approval of up to 10 transfer credits to graduate programs.

Degree Requirements

The M.A. in Applied Psychological Research requires 35 credits of course work, including 6 credits of supervised research experience and a master's research paper.

Psychology Core Courses(29 credits) (provide a foundation in professional ethics, individual differences and cultural diversity, the scientific bases of behavior, and scientific research skills)

PSYCHOLOGY (PSYC)

- 500. Ethics and Professional Practice in Psychology (3)
- 501. Cultural Competency in Psychology (3)
- 502. Applied Social Psychology (3)
- 520. Research Methods (4)
- 521. Statistics (4)
- 524. Biological Basis of Behavior (3)
- 530. Research Paper (3)
- 594. Applied Psychological Research (6)

Elective Courses (6 credits) (should be selected in consultation with the student's adviser in support of the student's research focus) Possible elective courses include:

PSYCHOLOGY (PSYC)

- 400. Health Psychology (3)
- 403. Adult Development (3)
- 405. Child Development (3)
- 406. Adolescence (3)
- 409. Child Behavior Disorders (3)
- 410. Psychology of the Differently-Abled (3)
- 415. Abnormal Psychology (3)
- 421. Behavior Modification (3)
- 425. Cognition and Perception (3)
- 427. Learning Theory (3)
- 465. Psychology of Women (3)
- 482. Personality Theory (3)
- 514. Preventive Psychology (3)
- 515. Clinical Health Psychology (3)
- 516. Child Health Psychology (3)
- 525. Forensic Psychology (3)
- 526. Behavioral Systems in Criminal Justice (3)
- 535. Behavioral Management (3)

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

PSYCHOLOGY (PSYC) course list

Degrees Conferred:

- M.A.S.
- M.S., M.A.
- Ph.D.
- Integrated B.S. in Statistics and Master of Applied Statistics (M.A.S.)

The Graduate Faculty

- Michael G. Akritas, Ph.D. (Wisconsin) Professor of Statistics
- Naomi S. Altman, Ph.D. (Stanford) Associate Professor of Statistics
- Charles E. Antle, Ph.D. (Oklahoma State) Professor Emeritus of Statistics
- Steven F. Arnold, Ph.D. (Stanford) Professor of Statistics
- Gutti Jogesh Babu, Ph.D. (ISI-Calcutta, India) Professor of Statistics
- Jesse L. Barlow, Ph.D. (Northwestern) Professor of Computer Science and Engineering, and Statistics
- Ottar N. Bjørnstad, Ph.D. (Oslo, Norway) Professor of Biology, Entomology, and Statistics
- Marllyn T. Boswell, Ph.D. (California, Riverside) Associate Professor Emeritus of Statistics
- Francesca Chiaromonte, Ph.D. (Minnesota) Associate Professor of Statistics and Public Health Sciences
- Vernon M. Chinchilli, Ph.D. (North Carolina) Distinguished Professor of Biostatistics and Statistics
- Mosuk Chow, Ph.D. (Cornell) Associate Professor of Statistics; Senior Research Associate
- Linda M. Collins, Ph.D. (USC) Professor of Human Development and Family Studies, and Statistics
- Enrique del Castillo, Ph.D. (Arizona State) Associate Professor of Industrial Engineering and Statistics
- Manfred Denker, Ph.D. (Nürnberg) Professor of Statistics and Mathematics
- Duncan Fong, Ph.D. (Purdue) Professor of Marketing and Statistics
- John Fricks, Ph.D. (North Carolina) Assistant Professor of Statistics
- Debashis Ghosh, Ph.D. (Washington) Associate Professor of Statistics and Public Health Sciences
- Murali Haran, Ph.D. (Minnesota) Assistant Professor of Statistics
- William L. Harkness, Ph.D. (Michigan State) Professor Emeritus of Statistics
- Thomas P. Hettmansperger, Ph.D. (Iowa) Professor Emeritus of Statistics
- Robert A. Hultquist, Ph.D. (Oklahoma State) Professor Emeritus of Statistics
- David R. Hunter, Ph.D. (Michigan) Associate Professor of Statistics
- Bing Li, Ph.D. (Chicago) Professor of Statistics
- Jia Li, Ph.D. (Stanford) Associate Professor of Statistics and Computer Science and Engineering
- Runze Li, Ph.D. (North Carolina) Professor of Statistics
- John C. Liechty, Ph.D. (Cambridge) Associate Professor of Marketing and Statistics
- Dennis K. J. Lin, Ph.D. (Wisconsin) University Distinguished Professor of Statistics and Supply Chain Management
- Bruce G. Lindsay, Ph.D. (Washington) Willaman Professor of Statistics
- David T. Mauger, Ph.D. (Michigan) Associate Professor of Public Health Sciences and Statistics
- Ganapati P. Patil, Ph.D., D.Sc. (Michigan) Distinguished Professor Emeritus of Mathematical Statistics
- Calyampudi R. Rao, Sc.D. (Cambridge) Eberly Professor Emeritus of Statistics
- Donald St. P. Richards, Ph.D. (UWI) Professor of Statistics
- James L. Rosenberger, Ph.D. (Cornell) Professor of Statistics
- Thomas A. Ryan, Jr., Ph.D. (Cornell) Associate Professor Emeritus of Statistics
- Joseph L. Schafer, Ph.D. (Harvard) Associate Professor of Statistics
- Michele L. Shaffer, Ph.D. (Penn State) Associate Professor of Public Health Sciences and Statistics
- Damla Sentürk, Ph.D. (California, Davis) Assistant Professor of Statistics
- Durland L. Shumway, Ph.D. (Penn State) Assistant Professor of Statistics; Research Associate
- Laura B. Simon, Ph.D. (Penn State) Lecturer in Statistics
- Aleksandra B. Slavkovic, Ph.D. (Carnegie Mellon) Assistant Professor of Statistics
- Linda C. Strauss, Ph.D. (Penn State) Assistant Professor of Statistics; Research Associate
- Arkady A. Tempelman, D.Sc. (Vilnius, Lithuania) Professor of Statistics and Mathematics
- Rongling Wu, Ph.D. (U of Washington) Professor of Public Health Sciences and Statistics
- Fuqing Zhang, Ph.D. (North Carolina State) Professor of Meteorology and Statistics
- Yu Zhang, Ph.D. (Southern California) Assistant Professor of Statistics
- Zhibiao Zhao, Ph.D. (Chicago) Assistant Professor of Statistics

Graduate instruction and research opportunities are available in most areas of statistics and probability, including linear models, nonparametric statistics, robustness, statistical computing, analysis of count data, multivariate analysis, experimental design, reliability, stochastic processes and probability (applied and theoretical), distribution theory, statistical ecology, and biometrics.

Graduate students can gain practical experience in the application of statistical methodology through participation in the department's statistical consulting center and collaborative research activities. In addition, collaborative projects with other departments provide longer term experience and support for selected students. Most students gain valuable teaching experience by assisting in the teaching and grading of courses. In addition, Ph.D. candidates with proper qualifications can receive support for teaching undergraduate courses.

The Master of Applied Statistics (M.A.S.) program is a professional degree designed to provide training in statistics focused on developing data analysis skills, and exploration of all core areas of applied statistics, without going deeply into the mathematical statistics foundations. It aims to provide its graduates with broad knowledge in a wide range of statistical application areas.

The Doctor of Philosophy (Ph.D.), Master of Arts (M.A.), and Master of Science (M.S.) degrees in Statistics are designed for advanced studies in applied and theoretical statistics. Special emphases include biostatistics, statistical ecology, environmental statistics, genometrics, biometrics and statistical computation. The M.S. degree is appropriate preparation for the department's Ph.D. degree.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. Entering graduate students in statistics for whom English is not the first language are required to take the TOEFL (Test of English as a Foreign Language) examination. The results of this examination must be received by the Department of Statistics at least six months prior to the requested date of admission to the Graduate School and must pass the PSU test of spoken English in the first year of the program. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the Internet-based test (iBT). Applicants with lower scores may be considered for provisional admission.

While applications from all students (including those who already have done graduate work) are reviewed, completion of a standard calculus sequence is regarded as a prerequisite. Students with a 3.00 or better junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Students hoping to earn a Ph.D. in statistics may apply directly to the Ph.D. program without need for a master's degree.

Degree Requirements

Professional Master of Applied Statistics Requirements

For the M.A.S. degree, a minimum of 30 credits and a minimum grade-point average of 3.0 are required for graduation. Of the 30 credits, 24 must be courses from the Statistics department and 21 must be at the 500 level. The candidate must complete 6 credits in applied statistics (STAT 501, STAT 502), 6 credits in mathematical statistics (STAT 414, STAT 415) and 3 credits in statistical consulting (STAT 580-581). For all M.A.S. students, the Stat 581 course will have a comprehensive written project report required as part of the course, which serves as the culminating experience. To complete the remaining credit requirements, a candidate can select 9-15 credits from the following applied statistics courses: STAT 464, STAT 480, STAT 500, STAT 503, STAT 504, STAT 505, STAT 506, STAT 507, STAT 509, and STAT 510. In addition, students with suitable backgrounds may choose up to 6 credits from a departmental list of additional courses with approval from their adviser.

Master of Arts and Master of Science Degree Requirements

For the M.A. and M.S. degrees, a candidate must complete at least 30 credits, including at least 27 at the 500 or 600 level; 21 of the 27 500-level credits must be formal course work from the department of Statistics. A candidate must complete 6 credits in applied statistics (STAT 511, STAT 512), 6 credits in mathematical statistics (STAT 513, STAT 514), 3 credits in stochastic processes (STAT 515) and 3 credits in statistical consulting (STAT 580-581). The student must also pass a written master's qualifying examination taken at the end of the first year. Finally, an M.A. candidate must submit an acceptable master's paper to the department, and an M.S. candidate must submit a thesis.

Doctoral Degree Requirements

In addition to the course requirements for the M.A. and M.S. degrees given above, a Ph.D. candidate in Statistics must complete further courses in linear models (STAT 551), asymptotic tools (STAT 553), statistical inference (STAT 561), and advanced probability (STAT 517), as well as 15 credits of electives taken from STAT 518, STAT 544, STAT 545, STAT 552, STAT 562, STAT 564, STAT 565, and STAT 572, or other courses suggested by the Ph.D. committee and approved by the Graduate Studies Committee. The student also must pass a written Ph.D. qualifying exam, typically during the second year, and a comprehensive exam given at the end of the third year. The comprehensive exam will have a written component, whose content will be determined and administered by the student's Ph.D. graduate committee, and an oral component, which includes the presentation of a thesis research proposal. The candidate then must submit an acceptable Ph.D. thesis and defend it.

The Ph.D. in Statistics offers options in Biometrics, Biostatistics, Environmental Statistics, and Genometrics. The course and the examination requirements remain the same under these options, however, the candidate must take 15 credits from a list of courses identified by the option.

Minor in Statistics Requirements

The Department of Statistics has three possible options for a Graduate Minor in Statistics:

- **Option 1**: STAT/MATH 414-415 and at least three 500-level courses from the department.
- **Option 2**: Five or more courses totaling 15 credits at the 500-level from the department. Stat 464 may also count toward the 15 credits.
- **Option 3**: Four 500-level courses totaling 12 credits from the department and one additional course of 3 credits approved by the department head or graduate studies chairman.

Please note: STAT 500 will not be counted toward the Graduate Minor in Statistics under any option.

For all options, a 3.5 GPA is required in the courses to be counted toward the minor. Completion of one of the options listed above, with the specified grade-point average, and the signature on the Graduate Minor Program form (www.stat.psu.edu/grad/degrees/Minor/Graduate_Minor_Application_Form.pdf) constitutes approval of the Minor in Statistics. The candidate must indicate the wish to have a Graduate Minor in Statistics when the diploma card is filed and indicate the semester the Ph.D. degree is expected.

Other Relevant Information

Students in the Statistics program may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. (*See also* Operations Research.)

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. GRE scores are required for consideration for assistantships.

Integrated B.S. in Statistics and Master of Applied Statistics (M.A.S.)

The Integrated Undergraduate-Graduate (IUG) degree with B.S. in Statistics and Master of Applied Statistics (M.A.S.) is designed to be completed in five years. This integrated degree will enable a select number of highly qualified and career-oriented students to obtain training in statistics focused on developing data analysis skills and exploration of core areas of applied statistics at the undergraduate and graduate levels. The M.A.S. degree is a professional master's degree that emphasizes applications and does not provide as much training in the mathematical and statistical theory. The degree prepares students with interests in mathematics, computation, and the quantitative aspects of science for careers in industry and government as statistical analyst. Research divisions in the pharmaceutical industry, quality control and quality engineering divisions in manufacturing companies, clinical research units, corporate planning and research units, and other data-intensive positions require persons with training in mathematics, computation, database management, and statistical analysis, which this program will provide.

Application Process

The number of openings in the integrated B.S./M.A.S. program is limited. Admission will be based on specific criteria and the recommendation of faculty. Applicants to the integrated program:

- Must be enrolled in the Statistics B.S. program.
- Must have completed at least 60 credits of the undergraduate degree program, including the two courses: STAT 414 and STAT 415 and the students must apply to the program prior to completing 110 credits.
- Must submit a transcript and a statement of purpose.
- Must present a departmental approved plan of study in the application process in consultation with the M.A.S. program director.
- Must be recommended by the chair of the department's undergraduate program committee.
- Must be accepted into the M.A.S. program in Statistics.

For the IUG B.S./M.A.S. degree, 120 credits are required for the B.S. and 30 credits for the M.A.S. The following twelve graduate-level credits (number of credits in parentheses) can apply to both B.S. and M.A.S. degrees; six of these are at the 500 level:

STATISTICS (STAT)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)

Assuming all requirements for the B.S. are completed, students in the program can complete the B.S. degree and not advance to the M.A.S. Degree if they desire.

Degree Requirements

IUG Statistics B.S. prescribed Statistics courses (25 credits)

STATISTICS (STAT)
220. Basic Statistics (3)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
416. Stochastic Modeling (3)
464. Applied Nonparametric Statistics (3)
470W. Problem Solving and Communication in Applied Statistics (3)
480. Introduction to Statistical Analysis System (SAS) (1)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)

Note that students in IUG Statistics B.S. take STAT 501 and STAT 502 instead of STAT 460 and STAT 462 for the regular Statistics B.S.

IUG Statistics M.A.S. requirement (30 credits)

STATISTICS (STAT)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)
580.** Statistical Consulting Practicum (2)
581.**Stastical Consulting Practicum II (1)

Electives (15 credits)
Select from STAT 503, STAT 504, STAT 505, STAT 506, STAT 507, STAT 509, STAT 510 and the departmental list of additional courses for the M.A.S program with the approval of the adviser.

**For all students in the M.A.S program, the STAT 581 courses will have a comprehensive written project report required as part of the course, which serves as the culminating experience.

Integrated B.A./B.S. in Mathematics and Master of Applied Statistics (M.A.S.)

The Integrated Undergraduate-Graduate (IUG) degree with B.A./B.S. in Mathematics and Master of Applied Statistics (M.A.S.) is designed to be completed in five years. This integrated degree will enable a select number of highly qualified and career oriented students to obtain training in statistics focused on developing data analysis skills, and exploration of core areas of applied statistics at the graduate levels in addition to an undergraduate degree in Mathematics. The M.A.S. degree is a professional masters degree that emphasizes applications. The degree prepares students with interests in mathematics, computation, and the quantitative aspects of science for careers in industry and government as statistical analysts. Research divisions in the pharmaceutical industry, quality control, and quality engineering divisions in manufacturing companies, clinical research units, corporate planning and research units, and other data intensive positions require persons with training in mathematics, computation, database management, and statistical analysis, which this program will provide.

Application Process

The number of openings in the integrated B.A./B.S. in Mathematics and M.A.S. program is limited. Admission will be based on specific criteria and the recommendation of faculty. Applicants to the integrated program:

- Must be enrolled in the Mathematics B.A./B.S. program.
- Must have completed at least 60 credits of the undergraduate degree program including the two courses: STAT 414 and STAT 415 and the students must apply to the integrated program prior to completing 110 credits.
- Must submit a transcript and a statement of purpose.
- Must present a departmental approved plan of study in the application process in consultation with the M.A.S. program director.
- Must be recommended by the chair of Mathematics Department's undergraduate program committee. Two additional recommendation letters must be sent to the M.A.S. admissions committee.
- Must submit the GRE to the M.A.S. admissions committee.
- Must apply to the M.A.S. program in Statistics.

For the IUG B.A./B.S. in Mathematics and M.A.S. degree, 120 credits are required for the B.A./B.S. and 30 credits for the M.A.S. The following twelve graduate level credits (number of credits in parentheses) can apply to both B.A./B.S. and M.A.S. degrees, six of these are at the 500 level:

STATISTICS (STAT)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)

Assuming all requirements for the B.A./B.S. in Mathematics are completed, students in the program can complete the B.A./B.S. degree and not advance to the M.A.S. degree if they desire.

Degree Requirements

IUG Math B.A./B.S. students must fulfill the Math B.A./B.S. requirement while counting these prescribed Statistics courses (15 credits)

STATISTICS (STAT)
220.* Basic Statistics (3)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)

IUG M.A.S. Requirements (30 credits)

STATISTICS (STAT)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)
580. Statistical Consulting Practicum (2)
581.** Statistical Consulting Practicum II (1)

Electives: (15 credits)
Select from STAT 464, STAT 503, STAT 504, STAT 505, STAT 506, STAT 507, STAT 509, STAT 510 and the departmental list of additional courses for the M.A.S. program with the approval of the adviser.

For the IUG B.A./B.S. in Mathematics and M.A.S. degree, the four courses: STAT 414, STAT 415, STAT 501 and STAT 502 can apply to both the B.A./B.S. and M.A.S. degrees.

*Can be waived for students with an equivalent course, e.g., STAT 250 or STAT 301.

** For all students in the M.A.S. program, the STAT 581 course will have a comprehensive written project report required as part of the course, which serves as the culminating experience.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Edgar P. Yoder, Ph.D. (Ohio State) Professor of Agricultural and Extension Education

The curriculum prepares students to assume leadership roles in education and human service organizations whose goals are to support and enhance the well-being of youth and families within community settings. Through this graduate program, students will: (1) design, implement, and evaluate educational programs for youth and families; (2) interpret relevant research in youth and family education; and (3) apply research and problem-solving strategies to increase professional effectiveness.

Admission Requirements

Applicants whose junior/senior grade-point average is below 3.00 on a 4.00 scale for their baccalaureate degree are required to submit Graduate Record Examinations (GRE) scores. The program is tailored to students with baccalaureate degrees in family and consumer science, youth development, or other disciplines closely related to the human sciences.

Degree Requirements

For the M.Ed., a minimum of 30 credits is required, including a 3-credit professional paper or thesis. The paper or thesis is defended in a one-hour oral examination. The graduate program is organized around the following themes: youth and family education, community-based education, and research. Students have the flexibility to focus their programs in areas of professional interest within youth and family education.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:

- Ph.D., M.S., M.A.E., M.Eng.
- Integrated Programs

The Graduate Faculty

- Chimay J. Anumba, Ph.D. (U of Leeds, UK); D.Sc. (Loughborough, UK) Head; Professor of Architectural Engineering
- William P. Bahnfleth, Ph.D. (Illinois) P.E. Professor of Architectural Engineering
- Richard A. Behr, Ph.D. (Texas Tech) P.E. Charles and Elinor Matts Professor of Architectural Engineering
- Thomas E. Boothby, Ph.D. (Washington) P.E., R.A. Professor of Architectural Engineering
- James D. Freihaut, Ph.D. (Penn State) Associate Professor of Architectural Engineering
- Louis F. Geschwindner, Ph.D. (Penn State) P.E. Professor Emeritus of Architectural Engineering
- Linda M. Hanagan, Ph.D. (Virginia Tech) P.E. Associate Professor of Architectural Engineering
- Michael J. Horman, Ph.D. (Melbourne) Associate Professor of Architectural Engineering
- Bohumil Kasal, Ph.D. (Oregon) Professor of Architectural and Civil Engineering; Bernard and Henrietta Hankin Chair in Residential Building Construction; Director of Research, Pennsylvania Housing Research Center
- Andres LePage, Ph.D. (Illinois) P.E. Assistant Professor of Architectectural Engineering
- Ali. M. Memari, Ph.D. (Penn State) P.E. Associate Professor of Architectural Engineering
- John I. Messner, Ph.D. (Penn State) Associate Professor of Architectural Engineering
- Richard G. Mistrick, Ph.D. (Penn State) P.E. Associate Professor of Architectural Engineering
- Stanley A. Mumma, Ph.D. (Illinois) P.E. Professor Emeritus of Architectural Engineering
- M. Kevin Parfitt, M.Eng. (Cornell) P.E. Associate Professor of Architectural Engineering
- David R. Riley, Ph.D. (Penn State) Associate Professor of Architectural Engineering
- Jelena Srebric, Ph.D. (MIT) Associate Professor of Architectural Engineering
- Stephen Treado, Ph.D., P.E. (Maryland) Associate Professor of Architectural Engineering

Students may specialize in building construction, building illumination systems, building mechanical and energy systems, or building structural systems.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission to the Ph.D. and M.S. programs.

Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission to the AE graduate programs. Students accepted into the Architectural Engineering program generally have an undergraduate degree in mechanical engineering, electrical engineering, civil engineering, architectural engineering, science, or architecture.

All degree candidates are required to provide a letter of intent outlining the student's intended area of study as well as three letters of recommendation. The best-qualified applicants will be accepted up to the number of spaces that are available for new students.

A limited number of undergraduate students in the B.A.E. program will be considered for admission to the integrated undergraduate/graduate program leading to the B.A.E. and the M.A.E. degrees. Students who are currently enrolled in the seventh semester of the B.A.E. degree program may be admitted to the integrated B.A.E./M.A.E. program, following a positive review of an application specific to this program, by the faculty committee on graduate admissions. Students must have maintained a GPA for classes taken in the third and fourth years of at least 3.00 and must have attained a grade of C or better in all classes listed as A E. Students admitted to the integrated program must maintain a GPA of at least 3.00 in classes used toward the M.A.E. degree.

Degree Requirements

A thesis is required for the M.S. degree, which consists of 24 credits of courses and a 6-credit research thesis. A minimum of 12 of the course credits must be completed at the graduate (500) level. A student's program of courses in the M.S. program is developed in cooperation with the student's academic adviser.

For the Ph.D. degree, a dissertation that displays a student's ability to conduct high-quality original scholarly work is required of all Ph.D. students. Each student accepted into the Ph.D. degree program must pass the Ph.D. Candidacy Examination, which requires students to display an understanding of basic material in all AE option areas, along with an in-depth understanding of material covered in the AE undergraduate courses within their area of focus. This examination must be taken no later than the beginning of the student's second year in the program. Each Ph.D. student must also pass an English Proficiency Examination that is administered by the department, typically during the first semester. The student's program of courses is developed in cooperation with the student's Ph.D. committee. It is recommended that this consist of approximately 30 credits of courses beyond the master's degree, although there is no established minimum or maximum. At the conclusion of the student's course work, the Ph.D. student must take a two-day written comprehensive examination that is developed by the student's Ph.D. committee. Following the comprehensive exam, continuous registration is required for all Ph.D. graduate students until the dissertation is approved. Each student presents a comprehensive thesis proposal to his/her committee prior to starting his/her dissertation research and must present the results of this research in a final oral examination.

The M.Eng. degree is a nonthesis professional master's degree. Candidates for the M.Eng. degree are required to complete 30 credits of course work. A minimum of 18 credits must be at the 500 level or above. Students must follow the approved program of courses for one of the four available specialty areas. Minor modifications to these programs are permitted, with approval of the Graduate Program Officer. Each student must also complete a capstone project/report, supervised by a member of the graduate faculty.

For the integrated B.A.E./M.A.E. degree program, 30 credits of the 172 total credits required to receive both degrees are applied toward the master's degree (a portion of these credits count toward both degrees). A minimum of 18 credits of graduate-level course work is required (500 and 800 level). Approved M.A.E. course sequences are available for each of the four undergraduate option areas. Each

student must submit an M.A.E. course plan for approval when applying to this program and must request approval from the Graduate Program Officer of any proposed modifications to this plan following admission to the program.

All students in the M.Eng., M.S., and Ph.D. programs must also attend a minimum of 10 approved lectures during their degree program.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. A limited number of research and teaching assistantships, scholarships, and fellowships are available to M.S. and Ph.D. students in the Department of Architectural Engineering. The intent of these assistantships and awards is to support students conducting research under faculty supervision. For this reason, students in the M.S. and Ph.D. programs who receive these types of financial support are expected to complete their degree program, including the thesis or dissertation, and may not transfer to the Master of Engineering degree program.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:

- M.Arch.
- Integrated B.Arch.-M.Arch. Program
- Ph.D.

Ph.D. Program Faculty

- Chimay Anumba, Ph.D. (Leeds) Professor of Architectural Engineering
- Irina Aristarkhova, Ph.D. (Moscow) Assistant Professor of Women Studies and Art
- Jin Baek, Ph.D. (Penn) Assistant Professor of Architecture
- Mark Ballora, Ph.D. (McGill) Associate Professor of Integrative Arts and Music
- Thomas E. Boothby, Ph.D. (Washington) P.E., R.A. Professor of Architectural Engineering
- Malika Bose, Ph.D. (Wisconsin) Associate Professor of Landscape Architecture
- Gary L. Catchen, Ph.D. (Columbia) Professor of Nuclear Engineering
- Sidney Cohn, Ph.D. (North Carolina) Professor Emeritus of Urban Design
- James Cooper, Ph.D. (Virginia) Assistant Professor of Architecture
- Madhuri Desai, Ph.D. (Berkeley) Assistant Professor of Art History
- Mary I. Frecker, Ph.D. (Michigan) Professor of Mechanical Engineering
- Jawaid Haider, Ph.D. (Penn State) Professor of Architecture
- Deryck Holdsworth, Ph.D. (British Columbia) Professor of Geography
- Larry Gorenflo, Ph.D. (California - Santa Barbara) Associate Professor of Landscape Architecture
- Loukas Kalisperis, Ph.D. (Penn State) Professor of Architecture
- James Kalsbeek, M.S. Arch. (Cincinnati) Associate Professor of Architecture
- Donald E. Kunze, Jr., Ph.D. (Penn State) Associate Professor of Architecture and Integrative Art
- Nancy Locke, Ph.D. (Harvard) Associate Professor of Art History
- John I. Messner, Ph.D. (Penn State) Assistant Professor of Architectural Engineering
- Richard G. Mistrick, Ph.D. (Penn State) P.E. Associate Professor of Architectural Engineering
- Timothy Murtha, Ph.D. (Penn State) Assistant Professor of Landscape Architecture
- Ute Poerschke, Ph.D. (Cottbus, Germany) Associate Professor of Architecture
- Daniel Purdy, Ph.D. (Cornell) Associate Professor of German
- Sarah K. Rich, Ph.D. (Yale) Assistant Professor of Art History
- Timothy W. Simpson, Ph.D. (Georgia Tech) Professor of Industrial and Mechanical Engineering
- Elizabeth Smith, Ph.D. (NYU) Associate Professor of Art History
- Alexandra Staub, Ph.D. (Cottbus, Germany) Associate Professor of Architecture
- Allan Stoekl, Ph.D. (SUNY, Buffalo) Professor of French and Comparative Literature
- S. Shyam Sundar, Ph.D. (Stanford) Professor of Media Studies and Communications
- Robin Thomas, Ph.D. (Columbia) Assistant Professor of Art History
- Robert Yarber, M.F.A. (Louisiana) Distinguished Professor of School of Visual Art
- Craig Zabel, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of Art History

M.Arch Program Faculty

- Arthur K. Anderson, Jr., M.F.A. (Princeton) Professor Emeritus of Architecture
- Jin Baek, Ph.D. (Penn) Assistant Professor of Architecture
- Pier Luigi Bandini, Lau.Arch. (U of Florence, Italy) Associate Professor of Architecture
- David Celento, M.Arch. (Harvard) Assistant Professor of Architecture
- Sidney Cohn, Ph.D. (North Carolina) Professor Emeritus of Urban Design
- James Cooper, Ph.D. (Virginia) Assistant Professor of Architecture
- Christine Gorby, M.Arch. (Harvard) Associate Professor of Architecture
- Jawaid Haider, Ph.D. (Penn State) Professor of Architecture
- Lisa Iulo, M.Arch. (CUNY) Assistant Professor of Architecture
- Loukas Kalisperis, Ph.D. (Penn State) Professor of Architecture
- James Kalsbeek, M.S. Arch. (Cincinnati) Associate Professor of Architecture
- Donald E. Kunze, Jr., Ph.D. (Penn State) Professor of Architecture and Integrative Arts
- Jodi L. LaCoe, M.Arch. (McGill) Instructor in Architecture
- Darla Lindberg, M.Arch. (Iowa State) Associate Professor of Architecture
- John P. Lucas, M.Arch. (North Carolina State) Professor of Architecture
- Romolo Martemucci, M.S.Urb Des. (Pratt Institute) Professor of Architecture
- Raymon J. Masters, M.S.Arch.Eng. (Penn State) Affiliate Associate Professor of Architecture
- Katsuhiko Muramoto, M.Arch.(Cranbrook Academy) Associate Professor of Architecture
- Madis Pihlak, M.C.P. (Berkeley) Associate Professor of Architecture and Landscape Architecture
- Ute Poerschke, Ph.D. (Cottbus, Germany) Associate Professor of Architecture
- Alexandra Staub, Ph.D. (Cottbus, Germany) Associate Professor of Architecture
- Daniel Willis, M.S.Arch. (Penn State) Professor of Architecture: Head, Department of Architecture
- James Wines, B.S. (Syracuse) Professor of Architecture
- Scott W. Wing, M.Arch. (Princeton) Associate Professor of Architecture

The Master of Architecture program emphasizes three areas central to the school: Community and Urban Design (CUD), Digital Design (DD), and Culture, Society and Space (CSS). The program allows opportunities for graduate students to assist in undergraduate courses and work with the two endowed centers: the Hamer Center for Community Design Assistance and the Stuckeman Center for Design Computing. In addition, selected graduate students can also participate in the department's Rome program for undergraduates. The Master of Architecture is a post-professional degree. Post-professional degrees do not qualify the recipient for professional licensure in the United States. The program is intended for students already holding professional degrees in architecture, and in exceptional cases, for students with nonprofessional architectural degrees who seek to develop a better understanding of architecture. The Master of Architecture program is specially designed for students interested in advanced studies in Community and Urban Design, Digital Design and Culture, Society and Space. It is expected that such students will have previously studied the technical and professional aspects of architectural practice and are primarily interested in strengthening the intellectual underpinnings of their work through intensive studio investigations, design applications, and rigorous theoretical inquiry.

The Ph.D. in Architecture is a research-based degree supporting a number of areas of research inquiry. The program's distinguishing quality is its broad-based research core, grounded in contemporary critical theory and methods. Faculty include Penn State scholars with an expertise in architectural theory, the design process, digital design, digital fabrication, building construction and technology, cultural and environmental behavior, housing, urban design, and sustainability. Visiting scholars further enhance the program and course offerings. The program allows opportunities for graduate students to assist in undergraduate courses and work with the research centers of the department. It is expected that students will have previously studied the technical and professional aspects of architectural practice and are primarily interested in strengthening the intellectual underpinnings of their work through intensive investigation, design applications, and rigorous theoretical inquiry.

M.Arch. Admission Requirements

M.Arch degree applicants should have a five-year professional degree in architecture. This M.Arch. program culminates in a post-professional degree for students with a five-year professional degree that is accredited by the National Architectural Accrediting Board (NAAB) or its equivalent. Any exceptions must have the approval of the department head. International applicants with a five-year degree in architecture are considered equivalent to a graduate from a five-year NAAB-accredited program for admission purposes. In exceptional cases, the M.Arch. program may serve students with a four-year architecture degree or other degrees who seek to develop a better understanding of the principles and theory that underlie the profession of architecture. It is understood that such students are interested in the academic path and eventually intend to pursue the Ph.D. degree. These students would be required to take remedial undergraduate or graduate courses and may have to significantly extend the duration of their study.

In addition to the application to the University for admission to the Graduate School, all applicants for the M.Arch degree must submit the following to the Department of Architecture.

A statement of intent should be primarily a description of the applicant's professional goals, desired option and subjects of study, and the area(s) of anticipated architectural inquiry. A portfolio of creative and design work (architecture and planning projects) executed at the undergraduate level or under professional guidance or independently, provided that such work can be evidenced as executed by the applicant, is an important part of the graduate application. A minimum portfolio representation of one project for each year of academic undergraduate study, or its equivalent, is required. The applicant is encouraged to include other evidence of academic excellence, such as awards, design and scholarly achievements, and other recognitions. A complete set of official transcripts is required for all applications. A minimum of three statements of recommendation from faculty members acquainted with the applicant's academic history and/or recommendations by an undergraduate review committee should accompany the application.

Scores from the Graduate Record Examinations (GRE) are required for admission for all applicants. A minimum grade-point average of 3.00 is required for admission.

Ph.D. Admission Requirements

To be admitted into the Doctor of Philosophy in Architecture degree program, an applicant must have received a professional degree in architecture from an accredited institution and a Masters degree in architecture or related field. Outstanding candidates who do not hold a professional architecture degree but who satisfy all other entrance to major requirements may be admitted by the PH.D. program director with the concurrence of the Department Head. Scores from the Graduate Record Examination (GRE) will be required for admission. An overall minimum grade-point average of 3.20 for graduate and undergraduate degrees is required for admission. In addition to the application to the University for admission to the Graduate School, all applicants must submit the following to the Department of Architecture: 1)an official transcript from all institution of higher education attended, both undergraduate and graduate, 2) official diploma/certificates for each degree obtained, 3) three letters of recommendation, 4) a statement of intent, and 50 a CV.

The best-qualified applicants will be accepted up to the number of spaces that are available for new students**.** Exceptions to the minimum 3.20 grade-point average may be made for student with special backgrounds, abilities, and interests.

English Language Requirements

The language of instruction at Penn State is English. International applicants for all degrees must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the Internet-based test (iBT). Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. Specific graduate programs may have more stringent requirements. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec) England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

M.Arch. Degree Requirements

The capstone of the M.Arch. Program is a Master's Thesis or Thesis [Design] Project, which requires the student to identify and formulate an area of inquiry within which he or she will be expected to do original research and to complete a project or a written thesis that tests the theoretical ideas. The Master of Architecture is a 30-credit program that requires 24 credits of course work and 6 credits of thesis or thesis project. At least 18 credits must be at the 500 or 600 levels, and at least 20 credits must be taken in residence at University Park. The core courses consist of a total of 12 credits.

A graduate student may be able to complete the requirements for the M.Arch. degree in one year. Those students who are awarded an assistantship will require more than two semesters to complete the requirements for the M.Arch. degree. Directed Electives include courses related to one of the three options from other disciplines, such as Landscape Architecture, Geography, Sociology, Philosophy,

Psychology, and Computer Science, as well as within the Department of Architecture. Architectural Research (Arch 591) is specifically designed for each of the three options and counts toward the 12 credits necessary to satisfy the option within the major. The thesis requirement can be fulfilled in two ways: through a written thesis, which conforms to the scholarly standards of the Graduate School or through a design project that tests theoretical ideas. A written monograph will accompany all thesis design projects.

Ph.D. Degree Requirements

The capstone of the Ph.D. program is a dissertation, which requires the student to identify and formulate an area of inquiry within which he or she will be expected to conduct high-quality original scholarly research. Each student accepted into the Ph.D. degree program must pass the Ph.D. Candidacy Examination, which requires students to display an understanding of basic material in all areas, along with an in-depth understanding of material covered in courses within their area of focus. This examination must be passed within three semesters, not counting summer session, of entry into the doctoral program. The student's program of courses is developed in cooperation with the student's Ph.D. committee. It is recommended that this consist of approximately 30 credits of courses beyond the master's degree. At the conclusion of the student's course work, the Ph.D. student must take a written comprehensive examination that is developed by the student's Ph.D. committee. Following the comprehensive exam, continuous registration is required for all Ph.D. graduate students until the dissertation is approved. Each student presents a comprehensive thesis proposal to his/her committee prior to starting his/her dissertation research and must present the results of this research in a final oral examination.

Ph.D. Coursework

- 6 credits of Critical Theory and Methods in Architecture (ARCH 512)
- 12 credits of Architectural Research and/or Design Inquiry (ARCH 520, 536,591)
- 12 credits of research-area related courses such as Computational Methods in Architectural Design or Pedagogical Topics in Architecture (ARCH 522,545,590)
- 12 credits of Dissertation

Integrated B.Arch.-M.Arch. Program

The Department of Architecture offers a limited number of academically superior students enrolled in the fourth year of the Bachelor of Architecture degree program the opportunity to enroll in an integrated program leading to both the B.Arch. and the Master of Architecture degrees. The program permits the student to integrate the fifth year of study for the professional B.Arch. degree with the program of study for the M.Arch. degree into a continuous program of study culminating in the award of both degrees. The ability to coordinate as well as concurrently pursue the two degree programs enables the student to achieve greater depth and comprehensiveness than if the degrees are pursued sequentially and to earn the two degrees in a shorter period of time. In particular, the program encourages the student to integrate the undergraduate thesis design project with the master's thesis, thereby achieving a greater depth of inquiry.

The number of openings to this special program is limited; admission is by invitation of the faculty and is extremely selective.

Admission Requirements

Applicants to the integrated program must be enrolled in the fourth year of a B.Arch. program or otherwise qualified to apply for admission to the fifth year of the B.Arch. program at Penn State. To be admitted, applicants must be able to meet the following requirements:

1. Must have completed the first through fourth years of the B.Arch., or other degree qualifying for admission to the fifth-year standing in the B.Arch. program, prior to entry into the Integrated Degree Program.
2. Must be unconditionally accepted into the fifth year of the B.Arch. program at the Penn State University (see B.Arch. requirements above).
3. Must be unprovisionally accepted into the M.Arch. program at Penn State (see application requirements for the M.Arch. degree in the Penn State Graduate Degree Programs Bulletin).
4. Must have a minimum 3.2 junior/senior overall GPA (on a 4.0 scale) as well as: (1) a minimum 3.2 GPA in architectural design courses (studio), and (2) a minimum 3.2 GPA in all coursework except architectural design courses (studio).

In addition to the normal application requirements for the M.Arch. degree, the student applicant shall provide a Plan of Study of not more than 1,500 words.

The best-qualified students will be accepted up to the number of spaces available for new students. Acceptance to the program prior to the completion of all required course work is provisional, contingent upon meeting the above requirements.

Degree Requirements

Students must complete the requirements for both the B.Arch. and M.Arch. degrees except that not more than 12 credits earned in either degree program may be used to the meet the requirements of both degrees. Therefore, a minimum total of 48 credits are required to complete the Integrated B.Arch.-M.Arch. Program and earn both degrees. The student must maintain not less than a 3.2 overall GPA and shall achieve not less than a B grade in each required course.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin.* All applicants who are accepted are considered for departmental financial aid.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Christopher P. Staley, M.F.A. (Alfred) *Professor of Art*
- James Thurman, M.F.A. (Cranbrook Acad of Art) *Assistant Professor of Art*
- Robert Yarber, M.F.A. (Louisiana State) *Distinguished Professor of Art*

M.F.A. program is planned to provide professional emphasis in a specific area of art.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

The Master of Fine Arts program in art, with its emphasis on professional study, is designed for the mature individual who by previous training and study has sufficiently prepared for the undertaking. It is strongly suggested that applicants have a minimum of 12 credits of art history at the undergraduate level. Any qualified student who has graduated from an accredited college that offers a bachelor of arts, bachelor of science, or bachelor of fine arts in the area of art of the equivalent may seek admission. The School of Visual Arts requires a minimum of 3.00 junior/senior grade-point average (on a 4.00 scale) for admission to the master of fine arts program. Exceptions to the minimum 3.00 average may be made for students with special backgrounds, abilities, and interests.

In addition to the previous requirements, all applicants must submit:

1. A portfolio of his/her work to illustrate his/her preparation for graduate study. A portfolio of slides, rather than actual work, is required. A selection of no fewer than twenty examples should be presented. The majority should be in the area of the applicant's interest.
2. A statement of professional aims. This statement should include the applicant's intentions for his/her proposed study. Some indications of his/her philosophy, beliefs, and goals in regard to education and art should give evidence that he/she is prepared to undertake the work outlined for the Master of Fine Arts program.
3. Three letters of reference attesting to the applicant's scholarship and ability to work independently.

Degree Requirements

The School of Visual Arts requires a minimum total of 60 credits for the Master of Fine Arts degree. Not more than 10 credits may be transferred from other accredited graduate institutions. Of the 60 credits required for graduation, candidates are expected to complete the following distribution of credits: 30 credits in a major area of concentration, 12 credits in art history and critical studies, 10 credits in related areas, and 8 credits in graduate seminar.

Additional M.F.A. Requirements

For M.F.A. candidates, at least 24 credits of the required 60 credits must be at the 500 level. In addition to course work, M.F.A. candidates must pass a candidacy review, which is usually held at the end of the second semester of study, submit an artist's statement, pass the M.F.A. comprehensive oral examination and produce an M.F.A. exhibition.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

wbk10@psu.edu

Degrees Conferred:

Ph.D., M.S., M.Ed., M.P.S., Dual Degrees in Art Education and Women's Studies

The Graduate Faculty

- Patricia Amburgy, Ph.D. (Illinois) Associate Professor of Art Education
- David Ebitz, Ph.D. (Harvard) Associate Professor of Art and Art Education; Professor-in-Charge of Art Education
- Charles R. Garoian, Ph.D. (Stanford) Professor of Art Education; Director, School of Visual Arts
- Yvonne M. Gaudelius, Ph.D. (Penn State) Assistant Vice President and Associate Dean for Undergraduate Education; Professor of Art Education
- Grace Hampton, Ph.D. (Arizona State) Head of the Department of African and African American Studies; Professor of Art, Art Education, and Integrative Arts
- Karen Keifer-Boyd, Ph.D. (Oregon) Professor of Art Education; Affiliate Professor of Women's Studies
- Wanda B. Knight, Ph.D. (Ohio State) Associate Professor of Art Education
- Kimberly Powell, Ph.D. (Stanford) Assistant Professor of Art Education, and Curriculum and Instruction
- Mary Ann Stankiewicz, Ph.D. (Ohio State) Professor of Art Education
- Christine Marmé Thompson, Ph.D. (Iowa) Professor of Art Education

This program helps students prepare for careers in college teaching, administration, research, public school art teaching, and art supervision.

Admission Requirements

For admission to the Graduate School, an applicant must hold either (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the Internet-based test (iBT). Applicants with iBT speaking scores between 15 and 19 may be considered for provisional admission, enrollment, and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Scores from the Graduate Record Examinations (GRE) or from the Miller Analogies Test (MAT) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Students who seek admission to the graduate program must make formal application to the admissions committee of the Art Education program. To be admitted without deficiencies, the student is expected to have completed either a baccalaureate degree in art education or a program considered by the admissions committee to provide an appropriate background for the application's degree objectives. Related programs include work in studio art, art history, art education, education, museum education, etc. Deficiencies may be made up by course work that is not counted as credit toward an advanced degree. Students pursuing graduate degrees may simultaneously take course work leading to teaching certification and art supervisory certification. The students who plan to teach art education at the college level should note that some institutions require professors to hold a public school art teaching certificate and to have had public school teaching experience.

Students with a minimum 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The most qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 average may be made for students with special backgrounds, abilities, and interests. Transcripts should indicate high attainment in appropriate academic and creative work. Letters of recommendation should attest to scholarship and ability to work independently. In addition to the above requirements, all applicants must submit an example of scholarly writing and a one- to two-page statement of:

1. professional objectives; and
2. the areas in which research and creative work are planned. The statement should indicate how these objectives will be furthered by graduate study. For applications with a studio background, the inclusion of slides of creative work showing the depth and range of studio abilities is also recommended. Teachers may also submit slides of student works. Applicants planning to pursue studio work as a part of their graduate program must submit ten to fifteen slides of their creative work showing the depth and range of their studio abilities.

Master's Degree Requirements

A minimum of 30 graduate credits is required for the M.S. and M.Ed. degrees. Students must take a minimum of 15 credits in art education. Of those, M.Ed. and M.S. candidates are expected to complete the following 3-credit core: A ED 502, 505; 536 or 588; and A ED 590 (1 credit for each two semesters enrolled in course work). Students must take additional credits to total a minimum of 15 credits. All master's degree candidates must also complete 6 credits of foundational studies at the 400 level or above in areas such as art history, studio, philosophy, educational theory and policy, educational psychology, psychology, and anthropology. The remaining 9 credits are made up of elective studies.

Additional M.Ed. requirements. For M.Ed. candidates, 12 credits of course work must be at the 500 level or above. In addition to course work, M.Ed. candidates must write a substantial paper or present an exhibition in lieu of a thesis.

Additional M.S. requirements. For M.S. candidates, 18 credits of course work must be at the 500 level or above. M.S. candidates must prepare and orally defend a thesis. Requirements include 6 credits of thesis research within the 30 credits.

Students who seek admission to the M.P.S. in Art Education program should have current or recent teaching positions in a school, museum, cultural institution, or other community site at the time of application, with the expectation that the student continue to teach art in schools, museum, or other sites throughout the M.P.S. program. Applicants may apply to be admitted as a Graduate Non-degree Student for no more than 15 credits of course work accumulated in non-degee status.

For the M.P.S. in Art Education program, a minimum of 30 graduate credits is required. Students must complete 18 credits in 500-level courses and above, with a minimum of 6 credits at the 500-level. A minimum of 18 credits in art education includes the following Internet-based 3-credit courses: A ED 811, 812, 813, 814, 815, and A ED 594. Selecting from World Campus offering in other programs, students must take an additional 6 credits of Foundational courses at the 400 level or above in art history, studio, philosophy, educational theory and policy, educational psychology, psychology, and/or anthropology, and 6 credits of Elective courses.

M.P.S. in Art Education program participants can start in any semester, taking one online art education course and one or more foundation or elective courses in other programs per semester. A ED 594 is the culminating experience for the program with an action research project in one's teaching context.

Doctoral Degree Requirements

Admission to Candidacy. Once admitted to the doctoral program, all students must take a candidacy examination, which is given during the first year that the student is in residence. During the candidacy examination there is a review of (1) the student's professional resume; (2) a statement regarding the general direction of the student's research interests and possible areas of thesis inquiry; (3) completed graduate courses; (4) proposed course of study for subsequent semesters; (5) selected graduate papers written by the student; (6) slides or original work if studio inquiry is part of the student's program of study.

English competence. At or before the candidacy exam, all candidates for doctoral degrees are required to demonstrate high-level competence in the use of the English language, including reading, writing, and speaking, as part of the requirement for the doctoral program. Competency must be formally attested to by the student's committee before the comprehensive examination is held.

Course requirements. All doctoral students are expected to complete the following 3-credit core courses: A ED 502, 505, 536, 588; and A ED 590 (1 credit for each two semesters enrolled in course work).

Additional Ph.D. requirements. All Ph.D. students must complete at least 2 continuous semesters of residency after being admitted to candidacy. Although not required by the program, Ph.D. students are strongly encouraged to complete a minor area of study. A foreign language is not required of Ph.D. candidates. Instead, the inquiry and foreign language requirement for the Ph.D. is met through 12 credits of graduate-level course work in a related discipline as determined by the student's committee. All Ph.D. students are required to complete 18 credits of course work in art education. These 18 credits comprise the core courses plus two other courses in art education.

Comprehensive examination. Ph.D. candidates are required to take a written and oral comprehensive examination once their course work is substantially completed. The examination, prepared by the student's doctoral committee, covers all phases of the student's doctoral work both inside and outside the field of art education.

Doctoral dissertation. Ph.D. candidates are required to complete a dissertation on a topic of research approved by the student's doctoral committee. The dissertation must be defended before the academic community at a final oral examination.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

814-865-6326
ccw2@psu.edu

Degrees Conferred:

Ph.D., M.A.

The Graduate Faculty

- Brian A. Curran, Ph.D. (Princeton) Associate Professor of Art History
- Anthony Cutler, Ph.D. (Emory) Evan Pugh Professor of Art History
- Madhuri Desai, Ph.D. (California, Berkeley) Assistant Professor of Art History and Asian Studies
- Roland E. Fleischer, Ph.D. (Johns Hopkins) Professor Emeritus of Art History
- Hellmut Hager, Ph.D. (Universität Bonn) Evan Pugh Professor and Professor Emeritus of Art History
- Charlotte M. Houghton, Ph.D. (Duke) Associate Professor of Art History
- Nancy Locke, Ph.D. (Harvard) Associate Professor of Art History
- Leo Mazow, Ph.D. (North Carolina, Chapel Hill) Affiliate Associate Professor of Art History
- Patrick McGrady, Ph.D. (SUNY, Binghamton) Affiliate Assistant Professor of Art History
- Randy J. Ploog, Ph.D. (Penn State) Affiliate Assistant Professor of Art History
- Jeanne Chenault Porter, Ph.D. (Michigan) Associate Professor Emerita of Art History
- Sarah K. Rich, Ph.D. (Yale) Associate Professor of Art History
- Joyce Henri Robinson, Ph.D. (Virginia) Affiliate Associate Professor of Art History
- Elizabeth B. Smith, Ph.D. (NYU, Institute of Fine Arts) Associate Professor of Art History
- Robin Thomas, Ph.D. (Columbia) Assistant Professor of Art History
- Elizabeth Walters, Ph.D. (NYU, Institute of Fine Arts) Associate Professor of Art History
- Kristi Ann Wormhoudt, Ph.D. (Iowa) Affiliate Assistant Professor of Art History
- Craig Zabel, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of Art History

Graduate work is offered in the following areas: Ancient, Byzantine, Medieval, Renaissance, Baroque, Modern, Contemporary, American, African, and Asian art and architectural history.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) Aptitude Test (verbal, quantitative, and analytical) are required for admission to the Department of Art History. Special emphasis will be given to the verbal part of the GRE scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Candidates with a 3.00 junior/senior grade-point average and a minimum of 21 credits in art history will be considered for admission to the master's program. Lacking these, a promising candidate may be accepted on condition that deficiencies be remedied, but without graduate degree credit. Applicants to the Ph.D. program must have an M.A. in art history or a closely related field. The best-qualified applicants will be accepted up to the number of spaces that are available for new students.

Master's Degree Requirements

Candidates for the M.A. degree are required to complete a minimum total of 36 credits (including a master's thesis or paper), divided as follows:

- ART H 551 (3 credits), to be taken during one's first fall semester
- 12 credits at the 400 level, of which 3 credits must be taken in four of the five following areas of art history: African/Asian, Ancient, Byzantine/Medieval, Renaissance/Baroque, and Modern
- 9 credits of 500-level seminars in art history (ART H 551, and ART H 596 may not be used to fulfill this requirement). Each seminar in this 9-credit requirement must be taken with a different faculty member.
- 6 additional credits in art history at the 400 or 500 level. With the approval of one's adviser and the graduate officer, 3 credits of this requirement may be a course at the 400 or 500 level outside the Department of Art History.
- 6 credits of ART H 600 for a master's thesis or 6 credits of ART H 596 for a master's paper. ART H 596 may be used only by a master's candidate for a master's paper; all other individual studies should use ART H 496.

In addition, candidates must demonstrate a reading proficiency in two foreign languages. One of these languages must be German, and the other being French, Italian, or Spanish. On the recommendation of a student's adviser, and with the approval of the graduate officer, a student may substitute one of the above-named languages with another foreign language deemed appropriate for a specialized field. Proficiency in one language must be demonstrated before the end of one year of study. A reading knowledge of the second language must be demonstrated before the end of the second year. A master's examination must also be passed before completing the M.A. degree.

Doctoral Degree Requirements

Thirty additional credits, not including doctoral dissertation research, are required for the Ph.D. At least 24 of these credits must be in art history and 3 to 6 must be in a related area outside art history. At least 9 of the art history credits must be at the 500 level, exclusive of Art History 510 and Art History 596. At the discretion of the candidate's doctoral committee, the candidate may be required to take additional specialized courses pertaining to his or her major area of study. For students who have received a master's degree from another university, a reading competency in German and in French or Italian must be demonstrated before the end of one year of study. For the Ph.D., a candidacy examination, a comprehensive examination, and a final oral examination must be successfully completed in addition to the student's doctoral dissertation.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin.*

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Dual-Title Graduate Degree in Asian Studies (ASIA)

Eric Hayot
Director of Asian Studies
441 Burrowes Building
814-865-1188
ehayot@psu.edu

Degrees Conferred:

Students electing this program through primary departments will earn a Ph.D. in (graduate program name) and Asian Studies.

The following graduate programs offer dual degrees in Asian Studies: Applied Linguistics, Comparative Literature, and History.

Faculty

Asian Studies faculty include individuals with budgeted appointments in Asian Studies and individuals with courtesy joint appointments. The following faculty members have budgeted or courtesy joint appointments in Asian Studies:

Jonathan Abel, Assistant Professor of Comparative Literature and Asian Studies
David Atwill, Assistant Professor of History and Asian Studies
Erica Brindley, Assistant Professor of Religious Studies and History and Asian Studies
Suresh Canagarajah, Kirby Professor of Language Learning, English, and Asian Studies
Gretchen Caspar, Associate Professor of Political Science and Asian Studies
Kumkum Chaggerjee, Associate Professor of History and Asian Studies
Tina Chen, Associate Professor of English and Asian Studies
Madhuri Desai, Assistant Professor of Art and Art History and Asian Studies
Charlotte Eubanks, Assistant Professor of Comparative Literature and Asian Studies
Eric Hayot, Associate Professor of Comparative Literature and Asian Studies
Ronnie Hsia, Edwin Earle Sparks Professor of History and Asian Studies
Alexander Huang, Assistant Professor of Comparative Literature and Asian Studies
On-cho Ng, Professor of History and Religious Studies and Asian Studies
Sumita Raghuram, Associate Professor of Labor Studies and Employment Relations and Asian Studies
Bee-yan Roberts, professor of Economics and Asian Studies
Gonzalo Rubio, Associate Professor of Classics and Mediterranean Studies and Asian Studies
Denis Simon, Professor of International Affairs
Mrinalini Sinha, Professor of History, Women's Studies, and Asian Studies
Gregory Smits, Associate Professor of History and Asian Studies
Susan Strauss, Associate Professor of Applied Linguistics and Asian Studies
Reiko Tachibana, Associate Professor of Comparative Literature and Asian Studies
Xiaoye You, Assistant Professor of English and Asian Studies

Program Objectives of a Dual-Title Degree in Asian Studies

A dual-title degree in Asian Studies and a given discipline acknowledges and fosters scholarly work across the disciplines, and increases the intellectual rigor and breadth of graduate work. The dual-title degree teaches student to synthesize knowledge within and across disciplinary boundaries.

The primary advantages of a dual-title degree includes the intellectual and academic advantages of interdisciplinarity, strengthening the reputation of individual programs/departments through innovative degree programs, increased recruitment of quality graduate students, and improved placement of doctoral graduates.

The dual-title degree program in Asian Studies does not duplicate any other degree program at Penn State.

Admission Requirements

In addition to the admission requirements set forth by the Graduate School and the cooperating department, students seeking admission to the dual-title program will be admitted to graduate study in Asian Studies by an admissions committee of Asian Studies-affiliated faculty. Students must be admitted to a primary program before applying for the dual-title degree. Therefore, the Asian Studies program will follow the timetable and admission requirements of the cooperating department. Applicants should have a junior/senior cumulative average of a 3.00 (on a 4.00 scale) and appropriate course background. Prospective students seeking admission to the dual-title degree program will write a statement of purpose that addresses the ways in which their research and professional goals will reflect an interest in interdisciplinary and Asian Studies-related research.

Degree Requirements

The requirements for the dual-title Ph.D. include Asia-related coursework, Asia-related components to the candidacy and comprehensive exams, strong all-skills proficiency in one Asian language and either two-years' college study (or equivalent) of another Asian language or else an alternative proficiency appropriate to the student's field; and the completion of an Asian Studies-related dissertation.

Ph.D. Requirements

Coursework: 15 credits of Asia-related coursework at the 400 or 500 level. At least 9 of these 15 credits will be from ASIA 501, 502, and 597; the remainder may come from Asian Studies or from the student's home department, as approved by the student's doctoral adviser and the Asian Studies program director of graduate studies.

Language requirement: Students will show strong all-skills proficiency in one Asian language and either two years' college study (or equivalent) of another Asian language or else an alternative proficiency appropriate to the student's field.

Graduate committee, examinations, dissertation: A representative of the Asian Studies program will serve on the student's doctoral

committee, which will take the student's home departmental practice into consideration in determining how to include an appropriate Asian Studies component in the student's candidacy and comprehensive examinations and in the dissertation.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are in the STUDENT AID section of the *Graduate Bulletin*.

Dual-Title Graduate Degree in Astrobiology (ABIOL)

LEE R. KUMP, Program Coordinator
435 Deike Building
814-865-8761; psarc.geosc.psu.edu (Opens New Window)

Degree Conferred

Students electing this degree program through participating programs earn a degree with a dual title in the Ph.D., i.e., Ph.D. in (graduate program name) and Astrobiology.

The following graduate programs offer dual degrees in Astrobiology: Astronomy and Astrophysics; Biology; Biochemistry, Microbiology, and Molecular Biology; Geosciences; and Meteorology.

The Graduate Faculty

- Michael A. Arthur, Ph.D. (Princeton) Professor of Geosciences
- Susan L. Brantley, Ph.D. (Princeton) Professor of Geosciences; Director, Earth and Environmental Sytems Institute
- Jean E. Brenchley, Ph.D. (California, Davis) Professor of Microbiology and Biotechnology
- Albert Welford Castleman, Jr., Ph.D. (Polytechnic Inst of Brooklyn) Eberly Distinguished Chair in Science; Evan Pugh Professor of Chemistry
- James G. Ferry, Ph.D. (Illinois) Stanley Person Professor of Molecular Biology
- Katherine H. Freeman, Ph.D. (Indiana) Professor of Geosciences
- S. Blair Hedges, Ph.D. (Maryland) Professor of Biology
- Christopher H. House, Ph.D. (California) Assistant Professor of Geosciences
- James F. Kasting, Ph.D. (Michigan) Distinguished Professor of Geosciences
- Lee R. Kump, Ph.D. (South Florida) Professor of Geosciences
- Hiroshi Ohmoto, Ph.D. (Princeton) Professor of Geochemistry; Director, Penn State Astrobiology Research Center
- Mark E. Patzkowsky, Ph.D. (Chicago) Professor of Geosciences
- Beth Shapiro, Ph.D. (Oxford) Assistant Professor of Biology
- Steinn Sigurdsson, Ph.D. (Cal Tech) Associate Professor of Astronomy and Astrophysics
- Aleksander Wolszczan, Ph.D. (Copernicus U, Poland) Evan Pugh Professor of Astronomy and Astrophysics

The Astrobiology dual-title degree program is administered by the Department of Geosciences for the participating graduate programs. A program committee with representatives from each participating department maintains program definition, defines the nature of the candidacy examination and assigns the examining committee, identifies courses appropriate to the program, and recommends policy and procedures for the program's operation to the dean of the Graduate School and to the deans of the participating colleges. The dual-title degree program is offered through participating programs in the College of Earth and Mineral Sciences and the Eberly College of Science and, where appropriate, other graduate programs in the University. The program enables students from several graduate programs to gain the perspectives, techniques, and methodologies of Astrobiology, while maintaining a close association with major program areas of application.

Astrobiology is a field devoted to the exploration of life outside of Earth and to the investigation of the origin and early evolution of life on Earth. For admission to pursue a dual-title degree under this program, a student must apply to (1) the Graduate School; (2) one of the participating major graduate programs; and (3) the Astrobiology program committee. Usually students will apply and be accepted into the major program first. Application to the dual-title degree program can occur upon matriculation, but should be completed before the candidacy examination in the major program is scheduled.

Admission Requirements

Graduate students with research and educational interests in astrobiology may apply to the Astrobiology Dual-Title Degree Program. Candidates must submit transcripts of their undergraduate and graduate course work, a written personal statement indicating the career goals they hope to serve by attaining an Astrobiology dual title, and a statement of support from their dissertation adviser. A strong undergraduate preparation in the basic sciences is expected, with evidence of an interest in multiple disciplines.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the major graduate program in which they are enrolled, in addition to the minimum requirements of the Astrobiology program. The minimum course requirements for the dual-title in Astrobiology are ABIOL 574 Planetary Habitability (3 credits), ABIOL 590 Astrobiology Seminar (2 credits), ABIOL 570 Astrobiology Field Experience (2 credits), and at least 2 credits of 400- or 500-level course work outside of the student's major program in an area relevant to Astrobiology (through consultation with their adviser). All students must pass a candidacy examination that assesses their potential in the field of astrobiology. This examination may be part of the candidacy examination in the student's major graduate program if an Astrobiology faculty member serves on the examination committee and if acceptable to the major program. If not, the Astrobiology dual-title program will offer a second candidacy examination. The structure and timing of the second candidacy examination will be determined jointly by the dual-title and major program. The student's doctoral committee should include faculty from the Astrobiology program, but this person may be the adviser and have an appointment in the major program of study. The field of Astrobiology should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of Astrobiology is required. A public oral presentation of the dissertation is required.

Financial Aid

Financial aid is generally available through the major program and through highly competitive University Graduate Fellowships (UGF). In addition, Penn State's Astrobiology Research Center (PSARC) provides support for students through research assistantships and graduate fellowships. Typically, students in Astrobiology are supported 12 months per year on some form of assistantship, fellowship, or summer wages provided by PSARC, UGF, or their home department.

Other Relevant Information

Students intrigued by the possibility of pursuing research in Astrobiology should visit the PSARC Web site and the NASA Astrobiology

Institute Web site (http://nai.arc.nasa.gov).

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- George G. Pavlov, Ph.D. (Ioffe Physical-Technical Institute) Senior Scientist/Research Associate
- Lawrence W. Ramsey, Ph.D. (Indiana) Professor of Astronomy and Astrophysics
- Mercedes Richards, Ph.D. (Toronto) Professor of Astonomy and Astrophysics
- Peter W. A. Roming, Ph.D. (Brigham Young) Senior Research Associate
- Donald P. Schneider, Ph.D. (Cal Tech) Professor of Astronomy and Astrophysics
- Steinn Sigurdsson, Ph.D. (Cal Tech) Associate Professor of Astronomy and Astrophysics
- Paul Sommers, Ph.D. (Texas, Austin) Professor of Physics
- Leisa K. Townsley, Ph.D. (Wyoming) Senior Scientist
- Richard A. Wade, Ph.D. (Cal Tech) Associate Professor of Astronomy and Astrophysics
- Aleksander Wolszczan, Ph.D. (Copernicus U, Poland) Evan Pugh Professor of Astronomy and Astrophysics
- Jason Wright, Ph.D. (California, Berkeley) Assistant Professor of Astronomy and Astrophysics

The graduate program in Astronomy & Astrophysics prepares students for careers in astronomy, space science and education. Graduate instruction and research opportunities are available in theoretical, observational, and instrumental astronomy and astrophysics. Currently active areas of theoretical research include high-energy astrophysics (including theory of neutron stars, black holes, and gamma ray bursts), relativity and cosmology, stellar dynamics and planet formation, and computational methodology. Observational areas include spectroscopic and photometric observations of high-redshift quasars, galaxies and the intergalactic medium; gamma-ray bursts; X-ray and visible light studies of quasars, starburst and other active galaxies; visible light studies of nearby galaxies and their stellar populations; infrared study of brown dwarfs and protoplanetary disks; spectroscopy and modeling of binary, magnetically active, pre- and post-main sequence stars; spectroscopic searches for planetary systems. Instrumental areas include: development of X-ray telescopes and detectors; and high-precision visible and near-infrared light spectrographs. Department faculty members participate in several university cross-disciplinary organizations: Astrobiology Research Center, Center for Astrostatistics, Center for Gravitational Physics and Geometry, and the Center for Gravitational Wave Physics.

The Department played a seminal role in and leads many science investigations using two NASA-launched satellites, the Chandra X-ray Observatory and the Swift panchromatic gamma-ray burst mission, and the innovative 9-meter Hobby-Eberly Telescope located at the McDonald Observatory in Texas. Faculty and students also observe with other space-based observatories (GALEX, Hubble Space Telescope, Spitzer Space Telescope, XMM-Newton) and ground-based telescopes (Gemini and other national facilities, Magellan, Keck, South Africa Large Telescope, Very Large Telescopes). Physics faculty members closely associated with the Department are involved in particle and gravitational wave observations using the Auger, AMANDA, Ice Cube, and LIGO instruments. The Department has extensive computing facilities, and research is also conducted with university and national supercomputing resources.

Graduate students also have ample opportunity to acquire experience in undergraduate teaching and public outreach.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), including the Physics test, are required for admission. In addition, students coming from non-English speaking undergraduate institutions must submit scores from the TOEFL (Test of english as a Foreign Language) or IELTS (International English Language Testing System) examination. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Normally, students admitted to the program are required to have a bachelor's degree in physics and/or astronomy with a grade-point average of at least 3.0 in their junior/senior courses in physics, astronomy, math, and related subjects. Typical GRE scores for entering students are 720 or more on the general test, and 680 or more on the Physics test. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System). The minimum acceptable score for the TOEFL is 590 for the paper-based test, 243 for the computer-based test, or a total score of 96 with a 23 on the speaking section for the internet-based test. The minimum composite score for the IELTS is 6.5.

Degree Requirements

Course requirements for the Ph.D. consists of 30 credits of 3-credit courses, 3 credits of ASTRO 596 for directed research in the second year, 3 credits of ASTRO 589 Seminars in current research, 1 credit of ASTRO 590 Colloquium, and 1 credit of ASTRO 602 for supervised teaching. The ten 3-credit courses must include ASTRO 501, ASTRO 502, at least four additional ASTRO 500-level courses, and at least two PHYS 500-level courses. One 400-level class may be substituted. A GPA of 3.2 in these courses is required.

The Candidacy Examination is an oral examination with broad coverage of covering any area of astronomy. Students who fail the Examination may make a second attempt. At the Comprehensive Examination, the student presents a significant body of original research conducted at Penn State. This Examination tests the student's mastery of the chosen field of research. The student prepares an extended written report and oral presentation, and answers questions on the research and closely related areas. The Comprehensive Exam can be passed, failed with option retake, or failed followed by dismissal from the Ph.D. program. Graduation requires the completion of a dissertation of original research and a thesis defense before the Doctoral Committee.

While all students are admitted into the Ph.D. program, occasionally students terminate with a M.S. degree. This requires completion of the Ph.D. course requirements (except the three topical seminars) with 3.00 grade point average, passage of the Candidacy Exam, and submission of a suitable thesis.

Student Aid

Graduate Teaching Assistantships, externally funded graduate Research Assistantships, and/or University fellowships are typically provided to student admitted and continuing in good standing. Many students also apply for externally funded fellowships. University sources of funding are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Laura Cousino Klein, Ph.D. (U of the Health Sciences) Associate Professor of Biobehavioral Health
- Patricia Barthalow Koch, Ph.D. (Penn State) Associate Professor of Biobehavioral Health
- Gerald E. McClearn, Ph.D. (Wisconsin) Evan Pugh Professor of Human Development and Psychology
- Elizabeth J. Susman, Ph.D. (Penn State) Jean Phillips-Shibley Professor of Human Development and Nursing
- David J. Vandenbergh, Ph.D. (Penn State) Associate Professor of Biobehavioral Health
- George P. Vogler, Ph.D. (Colorado) Associate Professor of Biobehavioral Health
- Sheila G. West, Ph.D. (North Carolina, Chapel Hill) Associate Professor of Biobehavioral Health
- Linda Ann Wray, Ph.D. (Southern California) Professor of Biobehavioral Health

The graduate program in Biobehavioral Health (BB H) is an interdisciplinary graduate program provided by the College of Health and Human Development and involving faculty from its departments. The focus of the program is on the interaction of biological, behavioral, sociocultural, and environmental variables in the etiology and prevention of health problems and in the promotion of healthy human development. The program is designed to cultivate competence in basic and applied research, in the evaluation of biobehavioral health intervention strategies, and in university teaching. Graduates are prepared for research, teaching, or policy roles in health care settings, private and public research laboratories, government agencies, and universities including medical schools.

Special resources available in the college that students may draw upon and potentially participate in for their research programs include a Health and Human Development Consultation Center, Nutrition Clinic, and Speech and Hearing Clinic; Centers for Gerontology, the Study of Child and Adolescent Development, Developmental and Health Genetics, Locomotion Studies, Worksite Health Enhancement, and Developmental and Health Research Methodology; special laboratories in Behavioral Endocrinology, Biomechanics, Human Performance, Motor Behavior, and Nutrition; and extensive computer resources. Additional resources, including elaborate mainframe and super computer capabilities, are available in other parts of the University.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from the Medical College Admission Test (MCAT), are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

College graduates with an undergraduate or master's degree, or a health professions degree emphasizing biological and/or behavioral sciences, or an interdisciplinary program combining aspects of these will be considered for admission. Applicants should have a minimum grade-point average of 3.00 (A=4.00), an above-average score on the GRE or MCAT, and three supporting recommendations. At the discretion of the graduate program, exceptions may be made to these requirements for students with special backgrounds, abilities, and interests. Admission will be offered to candidates who are the best qualified, in the judgment of the faculty, taking all factors in to account.

Entering students should have a basic background in biological sciences, the behavioral sciences, or a combination of the two. In addition, they should have a basic background in quantitative methods. They should have competence in English, as reflected in a Test of English as a Foreign Language (TOEFL) score of 600 or above. In exceptional cases, superior students who do not meet these requirements may be admitted provisionally, while correcting their deficiencies. This must occur during their first two semesters in the program.

Master's Degree Requirements

M.S. degree candidates must take five core courses in biobehavioral health and 12 additional credits in methods individually designed in consultation with and with the approval of their adviser and committee. All M.S. degree candidates must complete a formal master's thesis or a master's paper. Candidates selecting the thesis option must complete an additional 6 credits of master's thesis research (BB H 600) for a total of 33 credits. Candidates selecting the paper option must complete an additional 6 credits of individual studies (BB H 596) in lieu of the 6 thesis credits. The master's thesis will typically describe original research. The master's paper may describe original research, but may also involve a substantial review of the literature, or a substantial description of a new research-related procedure. The choice of thesis or paper options will be made by the student in consultation with the adviser. The student's advisory committee judges the quality and acceptability of the paper or thesis. Additionally, the thesis must be submitted to, and accept by the Graduate School M.S. candidates' grade-point average of all course work through completion of M.S. degree requirements must be 3.0 or higher.

M.S. program course requirements: BB H core courses (15 credits: BB H 501, BB H 502, BB H 503, BB H 504, BB H 505); other methods courses (12 credits minimum: courses at the 400 or 500 level to be selected in consultation with the student's adviser); research credits (6 credits minimum or 6 thesis credits)

Doctoral Degree Requirements

Formal admission to the doctoral program depends on satisfactory completion of the candidacy examination. This exam is designed to assess the student's potential and academic preparation for doctoral study. The candidacy exam may be given after at least 18 credits have been earned in graduate courses beyond the baccalaureate and must be completed no completed no later than the end of the third semester (summer sessions do not count).

Communication and Language Requirement. Doctoral students must demonstrate competency in spoken English as judged by the faculty and in technical writing as demonstrated in research papers and/or publications. In addition, they must demonstrate competence in one of the following areas: (1) a foreign language; (2) computer science; (3) college teaching; (4) logic or philosophy of science.

Other Requirements. All students must take five core courses in Biobehavioral Health and 12 additional credits in research methods individually designed in consultation with and with the approval of the student's adviser and committee to develop doctoral-level competence in biobehavioral health and one or more related specialized areas.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- Maria C. Bewley, Ph.D. (U of Leeds, UK) Associate Professor of Biochemistry and Molecular Biology
- Judith S. Bond, Ph.D. (Rutgers) Distinguished Professor and Chair of Biochemistry and Molecular Biology
- Telih Boyiri, Ph.D. (Virginia Commonwealth U) Associate Professor of Biochemistry and Molecular Biology
- Laura Carrel, Ph.D. (Stanford) Associate Professor of Biochemistry and Molecular Biology
- Keith C. Cheng, M.D., Ph.D. (NYU; Washington) Professor of Pathology, and Biochemistry and Molecular Biology
- Gary A. Clawson, M.D., Ph.D. (Miami; Michigan State) Professor of Pathology and Biochemistry and Molecular Biology
- Arunangshu Das, Ph.D. (Jadavpur, India) Assistant Professor of Biochemistry and Molecular Biology
- Kristin A. Eckert, Ph.D. (Wisconsin) Professor of Pathology, and Biochemistry and Molecular Biology
- Karam El-Bayoumy, Ph.D. (NYU) Professor of Biochemistry and Molecular Biology; Associate Director of Basic Research, Penn State Cancer Institute
- John M. Flanagan, Ph.D. (Tennessee) Professor of Biochemistry and Molecular Biology
- D. Channe Gowda, Ph.D. (Mysore, India) Professor of Biochemistry and Molecular Biology
- Sergei A. Gregoryev, Ph.D. (Lomonosov Moscow State University) Associate Professor of Biochemistry and Molecular Biology
- Ralph L. Keil, Ph.D. (Cornell) Associate Professor of Biochemistry and Molecular Biology
- Gail L. Matters, Ph.D. (North Carolina) Assistant Professor of Biochemistry and Molecular Biology
- David Mu, Ph.D. (California, Berkeley) Associate Professor of Pathology, and Biochemistry and Molecular Biology
- Kathleen M. Mulder, Ph.D. (SUNY, Buffalo) Professor of Biochemistry and Molecular Biology
- Christopher Niyibizi, Ph.D. (McGill, Canada) Associate Professor of Orthopaedics and Rehabilitation
- Barbara A. Miller, M.D. (Penn State) Professor of Pediatrics
- W. Brian Reeves, M.D. (Jefferson) Professor of Medicine
- Ira J. Ropson, Ph.D. (Johns Hopkins) Associate Professor of Biochemistry and Molecular Biology
- Cara-Lynne Schengrund, Ph.D. (Seton Hall) Professor of Biochemistry and Molecular Biology
- Raghu Sinha, Ph.D. (Chandigarh, India) Associate Professor of Biochemistry and Molecular Biology
- Thomas Spratt, Ph.D. (U of Chicago) Associate Professor of Biochemistry and Molecular Biology
- Fang Tian, Ph.D. (Florida State) Assistant Professor of Biochemistry and Molecular Biology

Opportunities for research in the department include investigations of the structure and function of macromolecules and macromolecular complexes, and regulation of gene expression and post-transcriptional events using the approaches of biochemistry and biophysics, molecular and cell biology, and molecular genetics. Areas of specialization focus on cell surface components and membrane enzymes, protein folding and oligomerization, proteases, regulation of gene expression, silencing and organization, chromatin remodeling, post-translational modifications of proteins, trafficking of cellular proteins, regulation of proteolysis, enzyme biochemistry, glycoconjugates, and neurotoxins. These areas relate to the control of growth and cancer, cancer prevention, malaria, mechanisms of anesthesia actions, medicinal chemistry, neuropathology, kidney and intestinal diseases, and diabetes.

The program is offered only through the College of Medicine at Penn State's Milton S. Hershey Medical Center.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Students with a 3.00 junior/senior grade-point average and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 average may be made for students with special backgrounds, abilities, and interests. Interested students should contact the department chair.

Degree Requirements

The options for the M.S. degree are thesis or published manuscript.

Doctoral Degree Requirements

During the first year of study, Ph.D. candidates take The College of Medicine Core Curriculum (BMS 501 Regulation of Cellular and Systemic Energy Metabolism, BMS 502 Cell and Systems Biology, and BMS 503 Flow of Cellular Information) in the Fall semester to provide a strong foundation. In the Spring semester, students take the Biochemistry Core consisting of the Enzymology selective (BCHEM 581 Enzymology - A: Structure, BCHEM 582 Enzymology - B: Energetics, and BCHEM 583 Enzymology - C: Function). In addition, students are required to take a total of 6 credits chosen from the College of Medicine list of selectives, plus two elective credits. At the end of the first year, admission to Ph.D. candidacy is determined by performance in course work, laboratory rotations, and the departmental candidacy examination. Ph.D. candidates prepare a written comprehensive examination in the format of a grant application prior to the end of the fifth semester of enrollment. As part of this examination, the candidate also gives an oral presentation of this proposal to their thesis committee. Each candidate for the Ph.D. degree must fulfill written and spoken English communication requirements established by the department. It is expected that a student will have at least one paper accepted for publication in a major peer-reviewed scientific journal prior to the thesis defense. A thesis must be prepared and defended by each Ph.D. candidate.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- J. Martin Bollinger, Ph.D. (MIT) Professor of Biochemistry and Molecular Biology; Professor of Chemistry
- Squire Booker, Ph.D. (MIT) Associate Professor of Biochemistry and Molecular Biology; Professor of Chemistry
- Jean E. Brenchley, Ph.D. (California, Davis) Professor of Microbiology and Biotechnology
- Don A. Bryant, Ph.D. (UCLA) Ernest C. Pollard Professor in Biotechnology; Professor of Biochemistry and Molecular Biology
- Craig E. Cameron, Ph.D. (Case Western) Paul Berg Professor of Biochemistry and Molecular Biology
- Nina V. Fedoroff, Ph.D. (Rockefeller) Willaman Professor of Life Sciences and Director, Biotechnology Institute
- James G. Ferry, Ph.D. (Illinois) Stanley Person Professor and Director, Center for Microbial Structural Biology
- Richard J. Frisque, Ph.D. (Wisconsin) Professor of Molecular Virology
- David S. Gilmour, Ph.D. (Cornell) Professor of Molecular and Cell Biology
- John H. Golbeck, Ph.D. (Indiana U) Professor of Biochemistry and Biophysics; Professor of Chemistry
- Ying Gu, Ph.D. (California, Riverside) Assistant Professor of Biochemistry and Molecular Biology
- Wendy Hanna-Rose, Ph.D. (Harvard) Associate Professor of Biochemistry and Molecular Biology
- Ross C. Hardison, Ph.D. (Iowa) T. Ming Chu Professor of Biochemistry and Molecular Biology
- Eric T. Harvill, Ph.D. (California, Los Angeles) Associate Professor of Microbiology and Infectious Diseases
- Teh-Hui Kao, Ph.D. (Yale) Professor of Biochemistry and Molecular Biology
- Kenneth C. Keiler, Ph.D. (MIT) Associate Professor of Biochemistry and Molecular Biology
- Emine Koc, Ph.D. (New Mexico State) Assistant Professor of Biochemistry and Molecular Biology
- Hasan Koc, Ph.D. (New Mexico State) Research Assistant Professor, Biochemistry and Molecular Biology
- Kouacou Konan, Ph.D. (Indiana) Assistant Professor of Biochemistry and Molecular Biology
- Andrey Krasilnikov, Ph.D. (Russian Academy of Science) Assistant Professor of Biochemistry and Molecular Biology
- Maria Krasilnikov, Ph.D. (Moscow Inst of Physics and Tech) Research Assistant Professor, Biochemistry and Molecular Biology
- Carsten Krebs, Ph.D. (MPI for Radiation Chem, Germany) Associate Professor of Biochemistry and Molecular Biology; Associate Professor of Chemistry
- Zhi-Chun Lai, Ph.D. (Albert Einstein College of Medicine) Professor of Biology and Biochemistry and Molecular Biology
- Arthur Lesk, Ph.D. (Princeton) Professor of Biochemistry and Molecular Biology
- Bernhard Luscher, Ph.D. (Zürich) Associate Professor of Biochemistry and Molecular Biology
- Andrea M. Mastro, Ph.D. (Penn State) Professor of Microbiology and Cell Biology
- Pamela Mitchell, Ph.D. (Columbia) Associate Professor of Biochemistry and Molecular Biology
- Katsuhiko Murakami, Ph.D. (National Inst of Genetics, Japan) Associate Professor of Biochemistry and Molecular Biology
- Anton Nekrutenko, Ph.D. (Texas Tech) Associate Professor of Biochemistry and Molecular Biology
- B. Tracy Nixon, Ph.D. (MIT) Professor of Biochemistry and Molecular Biology
- Randen Patterson, Ph.D. (Maryland) Assistant Professor of Biology
- Robert F. Paulson, Ph.D. (California, San Francisco) Associate Professor of Veterinary and Biomedical Sciences
- Gary H. Perdew, Ph.D. (Oregon State) John T. and Paige S. Smith Professor in Agricultural Sciences
- Jeffrey M. Peters, Ph.D. (California, Davis) Professor of Environmental Toxicology
- Ronald D. Porter, Ph.D. (Duke) Associate Professor of Microbiology and Molecular Genetics
- Kathleen Postle, Ph.D. (Wisconsin, Madison) Professor of Biochemistry and Molecular Biology
- B. Franklin Pugh, Ph.D. (Wisconsin) Willaman Professor of Biochemistry and Molecular Biology
- Joseph Reese, Ph.D. (Illinois at Urbana-Champaign) Associate Professor of Biochemistry and Molecular Biology
- Melissa Rolls, Ph.D. (Harvard) Assistant Professor of Biochemistry and Molecular Biology
- Lorraine Santy, Ph.D. (Harvard) Assistant Professor (Research), Biochemistry and Molecular Biology
- Stephan Schuster, Ph.D. (Munich [LMU], Germany) Professor of Biochemistry and Molecular Biology
- Scott Selleck, M.D., Ph.D. (Washington U School of Medicine) Professor of Biochemistry and Molecular Biology
- Song Tan, Ph.D. (Univ. of Cambridge) Associate Professor of Biochemistry and Molecular Biology
- Ming Tien, Ph.D. (Michigan State) Professor of Biochemistry
- Graham H. Thomas, Ph.D. (Edinburgh, Scotland) Associate Professor of Biology, and Biochemistry and Molecular Biology
- Chen-Pei David Tu, Ph.D. (Cornell) Professor of Biochemistry and Molecular Biology
- Yanming Wang, Ph.D. (Iowa State) Assistant Professor of Biochemistry and Molecular Biology

The major goal of the program in Biochemistry, Microbiology, and Molecular Biology is to train students for independent research and teaching in the principal areas of those scientific disciplines. Students may enter the program from a variety of backgrounds such as biochemistry, biology, biophysics, cell biology, chemistry, genetics, microbiology, molecular biology, physics, and other related disciplines. The student's research may begin during the first year. Research areas of faculty include bacterial growth regulation and differentiation, biophysics and biochemistry and molecular biology of photosynthesis, calcium metabolism in skeletal tissues, cell cycle regulation, chromosome organization and structure, control of gene expression, DNA-binding proteins, electron paramagnetic resonance spectroscopy, enzyme kinetics and mechanisms of DNA-acting enzymes, functional genomics, membrane structure and function, metallobiochemistry of iron-sulfur proteins, mobile genetic elements, molecular biology of development, molecular biology of xenobiotic metabolism, prokaryotic sensory transduction, regulation of amino acid metabolism, RNA-binding proteins, RNA structure, self-incompatibility in plants, spermatogenesis and spermatozoan maturation, structure and function of enzymes, virology, and X-ray crystallography.

Admission Requirements

Scores on the Graduate Record Examination (GRE) Aptitude Test (verbal, quantitative, and analytical) are normally required for admission. Only under exceptional circumstances will an applicant be considered without those scores. It is also recommended that applicants take the Subject Test in Biochemistry, Cell and Molecular Biology, or Chemistry or Biology. Entering students should have taken courses in biology, organic chemistry, calculus, general physics, genetics, microbiology, and preferably physical chemistry. Any deficiencies may be made up concurrently with graduate studies. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION of the *Graduate Bulletin*.

Admission to the program is based on prior course records and grades, GRE scores, letters of recommendation and interviews. Virtually all students are admitted with the intent of obtaining a Ph.D. degree although a master's degree is obtained in some cases on the way to the Ph.D., or as a final degree.

Master's Degree Requirements

Students must meet the M.S. degree requirements specified by the Graduate School in the *Graduate Bulletin*. In addition, a research thesis must be submitted and defended before a committee of the faculty. In general, the master's program is expected to take about two years beyond a bachelor's degree.

Doctoral Degree Requirements

Admission to Ph.D. candidacy is decided on the basis of the student's performance in courses, research and teaching. In addition, an oral candidacy examination is taken during the fall semester of the second year. This examination tests the student's ability to utilize what s/he has learned in solving problems based on the scientific method. A comprehensive oral examination is taken before the student's Ph.D. thesis committee within approximately three semesters after the student has been admitted to candidacy. The student is expected to present a written proposal concerning his or her research problem in terms of the relevant current literature, the data that has been gathered and the future directions of the experimentation. Questioning may involve, but is not limited to, that research proposal.

The faculty requires that each student demonstrate the ability to collect, organize and present the results of their research in a professional manner before graduation. This is accomplished by preparing a manuscript based on the Ph.D. thesis research. The manuscript must be written primarily by the student and submitted for publication in a refereed journal. The final Ph.D. thesis defense is taken before the student's thesis committee at the end of the program. The student must also present a public seminar on the thesis research within the two-week period preceding the thesis defense. Generally the Ph.D. degree takes about five years beyond a bachelor's degree.

Biogeochemistry Dual-Title Degree Program

Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework from an approved list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. A single candidacy examination that includes biogeochemistry will be administered for admission into the student's Ph.D. program, as well as the biogeochemistry dual-title. The structure and timing of this exam will be determined jointly by the dual-title and major program. The student's doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Other Relevant Information

The director of graduate studies is in charge of advising students about academic and related matters until they have chosen a thesis adviser. Beginning students carry out a series of rotation projects in at least three different faculty laboratories before deciding on a research area. Students generally decide on their thesis research adviser at the end of their first fall semester. Each student must take a total of 18 credits in 400- and 500-level courses, required and elective, from a list approved by the program faculty.

Further course work and research are individually planned by the student and the research adviser in consultation with the Ph.D. thesis committee. The thesis committee is established according to the rules of the Graduate School once Ph.D. candidacy has been attained.

All students are required to participate as teaching assistants in undergraduate laboratory courses as part of their training. Students are required to register for BMMB 602 (Supervised Experience in College Teaching) for two semesters.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. Under normal circumstances, all students admitted and continuing in good standing are provided with graduate assistantship support from University sources and research grants.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- William J. Weiss, Ph.D. (Penn State) Professor of Surgery and Bioengineering
- Qing X. Yang, Ph.D. (Georgia Tech) Professor of Radiology
- Jun You, Ph.D. (Penn State) Assistant Professor of Orthopaedics and Rehabilitation
- Siyang Zheng, Ph.D. (Cal Tech) Assistant Professor of Bioengineering

This intercollege program is designed to provide students with graduate level training in engineering and the life sciences by the application of engineering principles and techniques to the solution of problems in medicine and biology. Graduate instruction in bioengineering is under the direction of a program committee composed of graduate faculty representing several departments in the Colleges of Engineering, Health and Human Development, Science, and Medicine.

Opportunities for specialized research revolve around a delineation of the electrical, mechanical, and biophysical properties of biological materials at the cellular, tissue, and organ levels. Specific applications include: development of artificial organs, with an emphasis on the artificial heart and heart assist devices; cardiovascular hemodynamics, with an emphasis on the structure and function of the capillary network, and blood behavior in contact with the walls of blood vessels and artificial surfaces; cardiac and auditory electrophysiology; lung mechanics and pulmonary function; and non-invasive diagnostic techniques, with an emphasis on ultrasound and X-ray devices and medical imaging. Extensive computer facilities and specialized equipment are available to support a combination of studies that employ experimental observations and their analysis through mathematical modeling and computer simulations.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. However, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Students with a degree in engineering, physics, or the life sciences will be eligible for admission. All students must have a strong background in physics and mathematics. This background should include 6 credits in chemistry, 9 credits in calculus-based physics, and

mathematics through calculus and differential equations. Students who lack one or two courses may still be considered for admission but will have to make up any deficiency early in their graduate program. Students with a 3.0 junior/senior grade-point average and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces available. Exceptions to the minimum average may be made for students with special backgrounds, abilities, and interests.

Master's Degree Requirements

The particular course of study depends on the student's background and area of research specialization. Courses are selected from the life sciences, engineering, and bioengineering. Course requirements include BIOE 401, BIOE 402, and BIOE 403 plus two 500-level courses in bioengineering, 6 credits in the life sciences (including BIOL 472), and 6 credits in technically oriented courses outside bioengineering and the life sciences. In addition, students without a previous degree in engineering or physics are required to complete up to 24 additional credits in engineering. Most of this additional course work will be at the undergraduate level and typically includes statics and dynamics, electric circuits and fields, electronic devices, fluid mechanics, and linear systems.

A thesis is required for the M.S. degree. Students must continue to register at appropriate times until the thesis is approved.

Doctoral Degree Requirements

Candidates for the Ph.D. degree generally are expected to complete PHSIO 571 (BIOL 571) and PHSIO 572 (BIOL 572) plus several additional courses in the life sciences, five courses in bioengineering, and five graduate-level courses in engineering, mathematics, and physics. Supporting courses are available at University Park and the Penn State Milton S. Hershey Medical Center in anatomy, biochemistry, biology, biophysics, chemistry, laboratory animal medicine, materials science, mathematics, physics, physiology, and the engineering departments.

The communication and foreign language requirement for the Ph.D. degree may be satisfied by demonstrating intermediate knowledge of an acceptable foreign language, or by taking an advanced technical writing course and presenting a formal proposal for thesis research to the doctoral committee.

Students must continue to register at appropriate times until the thesis is approved.

Biomolecular Transport Dynamics Option

The Biomolecular Transport Dynamics option requires the following courses in addition to the doctoral dissertation, candidacy, and comprehensive examinations:

- three Biotransport courses (9 credits)
- two Life Science courses (6)
- five Engineering or Life Science courses (15)
- IBIOS 590. COLLOQUIUM (twice) (2)
- IBIOS 591. ETHICS IN LIFE SCIENCES (1)
- IBIOS 595. INTERNSHIP (optional) (1)
- IBIOS 596. LABORATORY ROTATIONS (1)
- IBIOS 602. TEACHING EXPERIENCE (twice) (2)

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

BIOENGINEERING (BIOE) course list

Dual-Title Graduate Degree in Biogeochemistry

JENNIFER L. MACALADY, *Program Coordinator*
210 Deike Building
814-865-6330
jmacalad@geosc.psu.edu

Degree Conferred:

Students electing this degree program through participating programs earn a degree with a dual title in the Ph.D., e.g., Ph.D. in (graduate program name) and Biogeochemistry.

The following graduate programs offer dual degrees in Biogeochemistry: Biochemistry, Microbiology, and Molecular Biology; Civil Engineering; Chemistry; Ecology; Environmental Engineering; Geosciences; Materials Science and Engineering; and Soil Science.

The Graduate Faculty

Michael A. Arthur, Ph.D. (Princeton) Professor of Geosciences
Elizabeth W. Boyer, Ph.D. (Virginia) Associate Professor of Water Resources
Susan L. Brantley, Ph.D. (Princeton) Professor of Geosciences
Jean E. Brenchley, Ph.D. (California, Davis) Professor of Microbiology and Biotechnology
Mary Ann Bruns, Ph.D. (Michigan State) Associate Professor of Agronomy/Soil Microbiology
William Burgos, Ph.D. (Virginia Tech) Professor of Environmental Engineering
Hunter J. Carrick, Ph.D. (Michigan) Associate Professor of Aquatic Ecology
Brian A. Dempsey, Ph.D. (North Carolina) Professor of Environmental Engineering
David M. Eissenstat, Ph.D. (Utah State) Professor of Woody Plant Physiology
Matthew Fantle, Ph.D. (California, Berkeley) Assistant Professor of Geosciences
James G. Ferry, Ph.D. (Illinois) Stanley Person Professor of Biochemistry and Molecular Biology
Katherine H. Freeman, Ph.D. (Indiana) Professor of Geosciences
Peter Heaney, Ph.D. (Johns Hopkins) Professor of Mineral Sciences
Christopher House, Ph.D. (California) Assistant Professor of Geosciences
Jason Kay, Ph.D. (Colorado State) Assistant Professor of Soil Biogeochemistry
Roger Koide, Ph.D. (California, Berkeley) Professor of Horticultural Ecology
James D. Kubicki, Ph.D. (Yale) Associate Professor of Geochemistry
Lee Kump, Ph.D. (South Florida) Professor of Geosciences
Bruce E. Logan, Ph.D. (California, Berkeley) Kappe Professor of Environmental Engineering
Jennifer L. Macalady, Ph.D. (California, Davis) Assistant Professor of Geosciences
Carmen Enid Martinez, Ph.D. (Rutgers) Associate Professor of Environmental Soil Chemistry
Karl T. Mueller, Ph.D. (California, Berkeley) Professor of Chemistry
Kwadwo Osseo-Asare, Ph.D. (California, Berkeley) Distinguished Professor of Metallurgy, and Energy and Geo-environmental Engineering
John M. Regan, Ph.D. (Wisconsin) Associate Professor of Environmental Engineering
Erica A. H. Smithwick, Ph.D. (Oregon State) Assistant Professor of Geography
Ming Tien, Ph.D. (Michigan State) Professor of Biochemistry
Denice H. Wardrop, Ph.D. (Penn State) Associate Professor of Geography and Ecology

The Biogeochemistry Dual-Title Degree Program will be administered by the Department of Geosciences for the participating graduate programs. A program committee with representatives from each participating department maintains program definition, identifies courses appropriate to the program, and recommends policy and procedures for the program's operation to the dean of the Graduate School and to the deans of the participating colleges.The dual-title degree program is offered through participating programs in the College of Earth and Mineral Sciences, College of Agricultural Sciences, College of Engineering, Eberly College of Science, and the Intercollege Graduate Degree Programs.The program enables students from several graduate programs to gain the perspectives, techniques, and methodologies of Biogeochemistry, while maintaining a close association with major program areas of study. For admission to pursue a dual-title degree under this program, a student must apply to (1) the Graduate School and (2) one of the participating major graduate programs; and then subsequently to (3) the Biogeochemistry program committee. Students may only apply to the dual-title program once they have been accepted into a major program. Once a student has been accepted to a major program, application to the dual-title degree program can occur immediately or at a later time, such as upon matriculation. The application to the dual-title degree program, however, should be completed before the candidacy examination in the major program is scheduled.

Admission Requirements

Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Candidates must submit transcripts of their undergraduate and graduate coursework, a written personal statement indicating their interests in the interdisciplinary arena of Biogeochemistry and their career goals they hope to serve by attaining a Biogeochemistry dual-title, and a statement of support from their dissertation advisor, if assigned. A strong undergraduate preparation in the basic sciences is expected, with evidence of an interest in multiple disciplines.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the major graduate program in which they are enrolled, in addition to the minimum requirements of the Biogeochemistry program. Students are required to have two advisors from separate disciplines: one individual serving as a primary advisor in their major degree program (i.e., Soil Science, BMMB, Material Science & Engineering, Chemistry, Ecology, Environmental Engineering or Geosciences) and a secondary advisor in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. The major program advisor normally will also be a member of the Biogeochemistry faculty. The two faculty advisors can represent different academic programs, but this is not required, as faculty from a scientifically diverse department could represent very different areas of expertise.

To fulfill the course requirements for the dual-title in Biogeochemistry, students must complete a total of 15 graduate credits chosen in consultation with the advisor from an approved list of courses in the areas of biochemistry and microbiology, environmental chemistry, environmental engineering, geochemistry, materials science and engineering, and soil science.All students must pass a candidacy

examination that includes an assessment of their potential in the field of biogeochemistry. In all cases, the result of a single candidacy exam for both entrance to the student's major Ph.D. program and this dual-title program will be reported to the graduate school. When possible, the candidacy exam will involve a single examination that includes biogeochemistry. However, in some cases, such as with the Chemistry Department, existing candidacy procedures preclude use for the Biogeochemistry dual-title program. In these instances that require a major program's existing candidacy procedure to be augmented by a biogeochemistry examination, the structure and timing of this exam will be determined jointly by the dual-title and major program. The student's doctoral committee should include faculty from the major program of study and also faculty with expertise within Biogeochemistry. The field of Biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of Biogeochemistry is required. A public oral presentation of the dissertation is required, which may be part of the final defense within the major degree program.

Financial Aid

Graduate assistantships and other forms of student aid are described in the Student Aid section of the Graduate Bulletin. A limited number of Research Assistantships are also available through the Biogeochemistry Dual-Title Degree Program.

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- Hiroshi Akashi, Ph.D. (Chicago) Assistant Professor of Biology
- Sarah M. Assmann, Ph.D. (Stanford) Waller Professor of Biology
- Ottar Bjørnstad, Ph.D. (Oslo) Assisant Professor of Biology and Entymology
- David M. Braun, Ph.D. (Missouri) Assistant Professor of Biology
- Douglas R. Cavener, Ph.D. (Georgia) Professor of Biology
- Gong Chen, Ph.D. (Shanghai) Assistant Professor of Biology
- Daniel J. Cosgrove, Ph.D. (Stanford) Eberly Chair and Professor of Biology
- Richard J. Cyr, Ph.D. (California, Irvine) Professor of Biology
- Claude W. dePamphilis, Ph.D. (Georgia) Associate Professor of Biology
- Alan D. Ealy, Ph.D. (Florida) Assistant Professor of Biology and Molecular Endocrinology
- Bertrand D. Eardly, Ph.D. (Oregon State) Associate Professor of Biology (Berks-Lehigh Valley)
- Nina V. Fedoroff, Ph.D. (Rockefeller) Evan Pugh Professor; Willaman Professor of Life Sciences
- Charles R. Fisher, Ph.D. (California, Santa Barbara) Professor of Biology
- Michael Gannon, Ph.D. (Texas Tech) Associate Professor of Biology (Altoona)
- Simon G. Gilroy, Ph.D. (Edinburgh) Associate Professor of Biology
- Mark J. Guiltinan, Ph.D. (California, Irvine) Professor of Biology and Plant Molecular Biology
- Kyung-An Han, Ph.D. (SUNY, Buffalo) Assistant Professor of Biology
- Lauraine Hawkins, Ph.D. (New Mexico) Assistant Professor of Biology (Mont Alto)
- S. Blair Hedges, Ph.D. (Maryland) Professor of Biology
- Rod M. Heisey, Ph.D. (California, Davis) Professor of Biology (Schuylkill)
- Dale Holen, Ph.D. (Wisconsin, Milwaukee) Associate Professor of Biology (Worthington Scranton)
- Peter Hudson, Ph.D. (Oxford) Willaman Professor of Biology
- Zhi-Chun Lai, Ph.D. (Albert Einstein College of Medicine) Associate Professor of Biology
- Bernhard LÜscher, Ph.D. (ZÜrich) Associate Professor of Biology, and Biochemistry and Molecular Biology
- Hong Ma, Ph.D. (MIT) Professor of Biology
- Wojciech Makalowski, Ph.D. (Poznan) Associate Professor of Biology
- Kateryna Makova, Ph.D. (Texas Tech) Assistant Professor of Biology
- James H. Marden, Ph.D. (Vermont) Professor of Biology
- Paula C. McSteen, Ph.D. (East Anglia) Assistant Professor of Biology
- Webb C. Miller, Ph.D. (Washington) Professor of Biology, and Computer Science and Engineering
- Robert B. Mitchell, Ph.D. (Penn State) Professor of Biology
- Masatoshi Nei, Ph.D. (Kyoto) Evan Pugh Professor; Director, Institute of Molecular and Evolutionary Genetics
- Richard W. Ordway, Ph.D. (Mass Medical Inst) Associate Professor of Biology
- Eric S. Post, Ph.D. (Alaska) Assistant Professor of Biology
- Steven W. Schaeffer, Ph.D. (Georgia) Associate Professor of Biology
- Katriona Shea, Ph.D. (London) Assistant Professor of Biology
- Sharon P. Shriver, Ph.D. (Case Western Reserve) Assistant Professor of Biology
- Andrew G. Stephenson, Ph.D. (Michigan) Professor of Biology
- Graham H. Thomas, Ph.D. (Edinburgh) Associate Professor of Biology, and Biochemistry and Molecular Biology
- Christopher F. Uhl, Ph.D. (Michigan State) Professor of Biology
- Nandini Vasudevan, Ph.D. (Indian Inst Science, Bangalore) Assistant Professor of Biology
- Alan Walker, Ph.D. (London) Evan Professor of Biology and Anthropology
- Kenneth M. Weiss, Ph.D. (Michigan) Evan Pugh Professor of Anthropology and Genetics
- Matthew Whim, Ph.D. (Cambridge) Assistant Professor of Biology
- James A. Winsor, Ph.D. (Michigan) Professor of Biology (Altoona)

The department directs graduate programs in a broad spectrum of research areas, including bioinformatics, cell biology, developmental biology, ecology, evolution, genetics, neuroscience, phylogenetics, and physiology. The department houses the Institute of Molecular Evolutionary Genetics. The Ph.D. in Biology may be taken with an option in Molecular Evolutionary Biology, Plant Biology, or one of the Integrative Biosciences options adopted by the department (Molecular Medicine, Cell and Developmental Biology, Chemical Biology, Ecological and Molecular Plant Physiology, or Neuroscience). The courses of study are planned individually by the student and an adviser.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Admission is restricted to students who have the baccalaureate degree in a biological science and who present a cumulative undergraduate average of at least 3.00 on a scale of 4.00. Each applicant must provide a personal statement of interests and objectives and letters from three persons verifying the applicant's academic competence.

Master's Degree Requirements

Students obtaining an M.S. degree in Biology must complete course work as described in the General Information section of this bulletin,

with guidance from their academic adviser. A thesis is usually required and must be defended before a faculty committee. The research must represent an original contribution, and the time allotted to it is about one year.

Doctoral Degree Requirements

The only courses required across the department are Biology 592, Critical Evaluation of Biological Literature, and Biology 590, a colloquium covering the Biology Seminar Series. Course work specific to individual plans of study are decided upon by the student in consultation with their graduate adviser and Ph.D. committee. All doctoral degree students must pass a written and oral candidacy examination that is usually administered during their third semester of study. After a student has completed all of their course work and made substantial progress on the design and execution of their thesis research, a comprehensive examination is administered by their Ph.D. committee. The Ph.D. thesis must represent a significant original contribution suitable for publication, and will usually require between two and four years of laboratory or field research. When complete the thesis must be defended before the student's graduate committee. The thesis defense is normally immediately preceded by a public presentation of the thesis research by the student.

The department awards Ph.D. degrees in Biology covering the full spectrum of subjects represented by our diverse faculty. If desired, a student may elect to pursue one of the following options as part of his/her program of study.

Molecular Evolutionary Biology option: (1) The student must meet the criteria for the M.S. or Ph.D. in Biology. (2) The student's research adviser must be a member of the Biology program and/or a full member of the Institute of Molecular Evolutionary Genetics. Other committee members may be chosen as needed providing that a majority of the committee is associated with the IMEG. (3) In addition to the normal Biology program requirements, the student must take (for both an M.S. or Ph.D. in Biology) 3 credits of course work in BIOL 591; 9 credits from among the following courses (to be selected in consultation with the student's committee): BIOL 405, BIOL 410, BIOL 422, BIOL 427, BIOL 428, BIOL 501, BIOL 504, BIOL 514, BIOL 524, BIOL 533, BIOL 542, BIOL 590. (4) Any other course work or training deemed appropriate by the student's committee.

Plant Biology option: (1) The student must meet the criteria for the M.S. or Ph.D. in Biology. (2) The student's research adviser must be a member of the Biology program. Other committee members may be chosen as needed to assure that a well-rounded graduate advisory committee is established. (3) In addition to the normal Biology program requirements, the student must take the required colloquia in the field of specialization and (for both an M.S. or Ph.D. in Biology) a minimum of 6 credits from among the following courses (to be selected in consultation with the student's committee): BIOL 410, BIOL 414, BIOL 422, BIOL 427, BIOL 441, BIOL 448, BIOL 513, BIOL 514, BIOL 515, BIOL 516, BIOL 544, BIOL 591, BIOL 597, B M B 514, HORT 444. (4) Any other course work or training deemed appropriate by the student's committee.

Integrative Biosciences options are available in Molecular Medicine, Cell and Developmental Biology, Ecological and Molecular Plant Physiology, Chemical Biology, and Neuroscience. Requirements for these options that are in addition to the basic criteria for a Ph.D. in Biology are described under Integrative Graduate Program in Biosciences in this bulletin.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:

- Master of Biotechnology
- Integrated B.S. in Biotechnology - Master of Biotechnology in Biotechnology Program
- Integrated B.S. in Animal Sciences - Master of Biotechnology in Biotechnology

The Graduate Faculty

- Jean E. Brenchley, Ph.D. (California, Davis) Professor of Microbiology and Biotechnology
- John E. Carlson, Ph.D. (Illinois) Associate Professor of Molecular Genetics
- Barbara J. Christ, Ph.D. (British Columbia) Professor of Plant Pathology
- Diana Cox-Foster, Ph.D. (Illinois) Professor of Entomology
- Wayne R. Curtis, Ph.D. (Purdue) Professor of Chemical Engineering and Biotechnology
- Ali Demirci, Ph.D. (Iowa) Assistant Professor of Agricultural and Biological Engineering
- Richard F. Devon (California, Berkeley) Associate Professor of Engineering Design and Graphics
- Min Ding, Ph.D. (Pennsylvania, Wharton School) Assistant Professor of Marketing
- Stephanie Doores, Ph.D. (Maryland) Associate Professor of Food Science
- J. Larry Duda, Ph.D. (Delaware) Professor of Chemical Engineering
- Nina V. Fedoroff, Ph.D. (Rockefeller U) Willaman Professor of Life Sciences
- Henry C. Foley, Ph.D. (Penn State) Professor of Chemical Engineering
- Majid R. Foolad, Ph.D. (California, Davis) Professor of Plant Genetics
- Richard J. Frisque, Ph.D. (Wisconsin) Professor of Molecular Virology
- Frederick E. Gildow, Ph.D. (Cornell) Professor of Plant Pathology
- Simon G. Gilroy, Ph.D. (Edinburgh) Associate Professor of Biology
- Mark J. Guiltinan, Ph.D. (California, Irvine) Associate Professor of Plant Molecular Biology
- Roy H. Hammerstedt, Ph.D. (Minnesota) Professor Emeritus of Biochemistry
- Ross C. Hardison, Ph.D. (Iowa) Professor of Biochemistry
- Kelli Hoover, Ph.D. (California, Davis) Assistant Professor of Entomology
- Bhushan M. Jayarao, Ph.D. (Hungary) Associate Professor of Veterinary Science
- Seogchan Kang, Ph.D. (Wisconsin) Associate Professor of Plant Pathology
- Lynn Kozlowski, Ph.D. (Columbia) Professor of Biobehavioral Health
- Gretchen A. Kuldau, Ph.D. (California, Berkeley) Assistant Professor of Plant Pathology
- Hong Ma, Ph.D. (Mass Med Inst) Professor of Biology
- Wojciech Makalowski, Ph.D. (Poznan U, Poland) Associate Professor of Biology
- Bruce A. McPheron, Ph.D. (Illinois) Associate Professor of Entomology
- Webb Miller, Ph.D. (Washington) Professor of Computer Science and Engineering
- Christopher A. Mullin, Ph.D. (Cornell) Professor of Entomology
- Michael V. Pishko, Ph.D. (Texas) Associate Professor of Chemical Engineering
- B. Franklin Pugh, Ph.D. (Wisconsin) Associate Professor of Biochemistry and Molecular Biology
- C. Channa Reddy, Ph.D. (India) Distinguished Professor of Veterinary Science
- Robert A. Schlegel, Ph.D. (Harvard) Professor of Biochemistry and Molecular Biology
- Cooduvalli Shashikant, Ph.D. (India) Associate Professor of Molecular and Developmental Biology
- David T. Wilson, Ph.D. (Western Ontario) Professor of Marketing; Alvin H. Clemens Professor of Entrepreneurial Studies
- Andrew L. Zydney, Ph.D. (MIT) Professor of Chemical Engineering

The Master of Biotechnology degree program is offered through a collaboration of the Life Sciences Consortium with the Department of Biochemistry and Molecular Biology and the Department of Chemical Engineering. It is a multidisciplinary program involving at least thirty-two regular faculty members from fourteen different academic departments in Penn State University as well as ad hoc mentors from the academic faculty and from industry. The Master of Biotechnology curriculum is designed to give students broad knowledge and training in the scientific and practical aspects of biotechnology. It involves innovative, hands-on, and multidisciplinary learning approaches to educate and train students in the science behind biotechnology, its business and legal aspects, and the ethical and social issues that it brings about. In addition, the courses and the activities required of all students in this program intend to develop team working and communication skills, which are very important in industry in particular. Graduates of this program are expected to have the knowledge and training for diverse career options: as academic educators, as scientists in both academic and industry settings, as members of decision-making business and management teams in government and biotechnology industries, as bioentrepreneurs, and as members and leaders of governmental, public, and private organizations that deal with social, ethical and legal issues in biotechnology. Furthermore, because of their broad knowledge in biotechnology, graduates of this program are expected to fill a niche in industry where knowledge and ability to interphase and communicate with various functional groups within the organization are required.

Admission Requirements

Applications will be considered in accordance with the requirements of the Graduate School as described in the GENERAL INFORMATION section of the *Graduate Bulletin*. The program is appropriate for students with a baccalaureate degree in biological sciences, chemistry, or engineering or other baccalaureate degrees that include sufficient credits from relevant courses in the life sciences. Applicants must have a minimum junior/senior grade point average of 3.00 (on a 4.00 scale). Graduate Record Examinations (GRE) scores are required with a combined total of at least 1700 points for the verbal, quantitative, and analytical tests. Typically, students are admitted as part of a cohort to commence studies in the fall. The best-qualified applicants will be accepted up to the number of spaces available for new students.

Degree Requirements

A minimum of 30 graduate credits is required for completion of the program, 18 credits of which must be from courses in the 500 level. Students are required to take 16 to 19 credits from core courses described below. Additional credits are from industry internship and elective courses which are determined based on the interest and career track the student decides to pursue: agriculture, medical applications, or diversified. All Master of Biotechnology candidates are required to write a research paper based on a research project conducted in an academic research laboratory or in industry. A student whose research project is conducted in an academic laboratory will be required to do an internship in industry.

Core Courses

AGRICULTURAL AND BIOLOGICAL ENGINEERING (A B E)

- 468. MICROBIOLOGICAL ENGINEERING

BIOCHEMISTRY AND MOLECULAR BIOLOGY (B M B)

- 400. MOLECULAR BIOLOGY OF THE GENE (3)

BIOTECHNOLOGY (BIOTC)

- 479. METHODS IN BIOFERMENTATIONS (3)

INTEGRATIVE BIOSCIENCES (IBIOS)

- 571. CURRENT ISSUES IN BIOTECHNOLOGY (2)
- 590. LSC COLLOQUIUM SEMINAR SERIES (1)
- 591. ETHICS IN THE LIFE SCIENCES (1)
- 593. MOLECULAR BIOLOGY LABORATORY (3)
- 594. RESEARCH PROJECT IN BIOTECHNOLOGY (3-6)

Electives

These courses are chosen from offerings in various academic departments based on students' interest or track and career objectives. These include IBIOS 595 (Industry Internship), which is required unless a student already opted to do IBIOS 594 (Research Project) in industry, and IBIOS 597C (Special Topics: Advanced Laboratory Techniques in the Life Sciences), another elective course that is virtually required of students who intend to pursue research and development careers in industry. This is a modular laboratory course dealing with specialized techniques currently used in life sciences research: mammalian cell culture and monoclonal antibody production, quantitative cell analysis by flow cytometry and digital microscopy, nucleic acid sequence analysis, high-throughput analysis of nucleic acids using microarrays, protein analysis by mass spectrometry, techniques in animal transgenics, and other specialized techniques a student may arrange to work on with a research laboratory on campus.

Integrated B.S. in Biotechnology - Master of Biotechnology in Biotechnology Program

The integrated B.S. in Biotechnology-Master of Biotechnology degree program is designed to enable qualified undergraduate students in the B.S. Biotechnology program to graduate in five years with the Master of Biotechnology degree. The requirements of the Master of Biotechnology degree are designed to prepare students for diverse career opportunities in the burgeoning biotechnology industry. The integrated B.S. Biotechnology-Master of Biotechnology program will enhance the preparation and qualifications of B.S. Biotechnology students seeking entry-level positions in biotechnology and related industries. At the same time, students develop a practical knowledge of the laboratory techniques that underlie current research in the life sciences that will serve as excellent preparation for those students in the Master of Biotechnology program who later decide to pursue further graduate degrees.

A maximum of 12 credits will be cross-counted towards the B.S. and Masters degrees, from the following courses:

- B M B 400(2-3)
- BIOTC 479(3)
- IBIOS 571(2)
- IBIOS 591(1)
- IBIOS 593(3)

B.S. Biotechnology Requirements:

Total credits required: 125
GENERAL EDUCATION: 46 credits (15 of these are included in the REQUIREMENTS FOR THE MAJOR)
REQUIREMENTS FOR THE MAJOR: 94-95 credits

- Prescribed courses: 67 credits
- Additional courses: 6-9 credits
- Supporting courses and related areas: 18-21 credits

Master of Biotechnology Requirements:

Total credits required: 30 (18 of which must be from 500-level courses)

- Required courses: 16-19 credits
- Electives: 11-14 credits

Integrated B.S. in Animal Sciences - Master of Biotechnology in Biotechnology

The integrated B.S. in Animal Sciences Master of Biotechnology in Biotechnology degree program is designed to enable qualified undergraduate students in the B.S. Animal Sciences program to graduate in five years with the Master of Biotechnology degree. The requirements of the Master of Biotechnology degree are designed prepare students for diverse career opportunities in the burgeoning

biotechnology industry. The integrated B.S. in Animal Sciences Master of Biotechnology in Biotechnology program will enhance the preparation and qualifications of B.S. Animal Sciences students seeking entry-level positions in biotechnology and related industries. At the same time, students develop a practical knowledge of the laboratory techniques that underlie current research in the life sciences that will serve as excellent preparation for those students in the Master of Biotechnology program who later decide to pursuer further graduate degrees.

A maximum of 12 credits will be cross-counted towards the B.S. and Masters degrees*.

Year	Semester	B.S. Animal Sciences (125 credits required) credits completed
I	Fall	15
	Spring	16
II	Fall	15.5
	Spring	16
III	Fall	15
	Spring	15.5
IV	Fall	15*
	Spring	17*
Total credits for B.S.		**125**

* The following courses to be taken in these semesters will be cross-counted towards the B.S. and Master of Biotechnology. degrees:

- BIOTC 479. Methods in Biofermentation OR CH E 409 (3 credits)
- B M B 400. Molecular Biology of the Gene (2-3 credits)
- IBIOS 571. Current Issues in Biotechnology (2 credits)
- IBIOS 591. Ethics in the Life Sciences (1 credit)
- IBIOS 593. Molecular Biology Laboratory (3 credits)

Total credits cross-counted in B.S. and Master of Biotechnology degrees	**12 credits, 6 of which are 500-level credits**

Master of Biotechnology in Biotechnology (30 credits required, 18 of which must be 500-level)

IV	Summer	IBIOS 595 or equivalent in AN SC (2 credits) Internship
V	Fall	IBIOS 594. Research Project (3-6 credits)
	Spring	IBIOS 590. Colloquium (1 credit) Electives, 500-level (3-6 credits) Other graduate level electives (6 credits)
Minimum total credits earned for Summer and 5th year		**18 credits, at least 12 of which are 500-level credits**

Admission Requirements

Students must have a GPA of 3.5 at the time of application to the integrated degree program when they have completed at least 75 credits of their B.S. curriculum. The GRE scores normally required in the Master of Biotechnology in Biotechnology program will be waived for applicants to the integrated B.S.-Master of Biotechnology degree.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Charles R. Enis, D.B.A. (Maryland) Associate Professor of Accounting
- Deborah Ettington, Ph.D. (Michigan) Clinical Professor of Management
- Laura Field, Ph.D. (California, Los Angeles) Associate Professor of Finance
- Paul E. Fischer, Ph.D. (Rochester) Professor of Accounting
- Duncan Fong, Ph.D. (Purdue) Professor of Marketing
- Raghu Garud, Ph.D. (Minnesota) Professor of Management and Organization
- Fariborz Ghadar, D.B.A. (Harvard) Professor of Finance and William A. Shreyer Chair of Global Management, Policies, and Planning
- Dennis A. Gioia, Ph.D. (Florida State) Chair, Department of Management and Organization; Professor of Organizational Behavior
- Dan Givoly, Ph.D. (NYU) Chair, Department of Accounting; Ernst & Young Professor of Accounting
- Edward J. Glantz, Ph.D. (Wharton) Clinical Assistant Professor of Information Systems
- Marvin Goldberg, Ph.D. (Illinois) Irving and Irene Bard Professor of Marketing
- Guojin Gong, Ph.D. (Iowa) Assistant Professor of Accounting
- Barbara L. Gray, Ph.D. (Case Western Reserve) Professor of Organizational Behavior
- Rajdeep Grewal, Ph.D. (Cincinnati) Professor of Marketing
- Olesya Grishchenko, Ph.D. (New York) Assistant Professor of Accounting
- V. Daniel Guide, Jr., Ph.D. (Georgia) Associate Professor of Operations and Supply Chain Management
- Donald Hambrick, Ph.D. (Penn State) Smeal Chaired Professor of Management
- David A. Harrison, Ph.D. (Illinois) Smeal Professor of Organizational Behavior and Human Resource Management
- Terry P. Harrison Ph.D. (Tennessee) Professor of Supply Chain and Information Systems
- David Haushalter, Ph.D. (Purdue) Clinical Assistant Professor of Finance
- Jean Helwege, Ph.D. (UCLA) Associate Professor of Finance
- Jingzhi (Jay) Huang, Ph.D. (Northwestern) Associate Professor of Finance
- Steven J. Huddart, Ph.D. (Yale) Professor of Accounting
- Stephen F. Jablonsky, Ph.D. (Illinois) Associate Professor Emeritus of Accounting
- Austin J. Jaffe, Ph.D. (Illinois) Chair, Department of Insurance and Real Estate; Philip H. Sieg Professor of Business Administration
- Elena Katok, Ph.D. (Penn State) Associate Professor of Supply Chain and Information Systems
- Bin Ke, Ph.D. (Michigan State) Associate Professor of Accounting
- J. Edward Ketz, Ph.D. (Virginia Tech) Associate Professor of Accounting
- William Kracaw, Ph.D. (Utah) Chair, Department of Finance; Sykes Professor of Finance
- Akhil Kumar, Ph.D. (California, Berkeley) Professor of Management Information Systems
- Anthony Kwasnica, Ph.D. (Cal Tech) Associate Professor of Business Economics
- John Liechty, Ph.D. (Cambridge) Associate Professor of Marketing
- Gary L. Lilien, D.E.S. (Columbia) Distinguished Research Professor of Management Science
- Dennis K. J. Lin (Wisconsin) Professor of Statistics and Supply Chain Management
- Michelle Liu, Ph.D. (MIT Sloan) Assistant Professor of Accounting
- Henock Louis, Ph.D. (Ohio State) Associate Professor of Accounting
- Michelle B. Lowry, Ph.D. (Rochester) Associate Professor of Finance
- Kenneth M. Lusht, Ph.D. (Georgia State) Professor Emeritus of Business Administration
- James McKeown, Ph.D. (Michigan State) Mary Jean and Frank P. Smeal Professor of Accounting
- Margaret Meloy, Ph.D. (Cornell) Associate Professor of Marketing
- James A. Miles, Ph.D. (Penn State) Professor of Finance; Joseph F. Bradley Fellow of Finance
- Karl Muller, Ph.D. (Illinois) Associate Professor of Accounting
- Chris J. Muscarella, Ph.D. (Purdue) Professor of Finance; L. W. 'Roy' and Mary Lois Clark Teaching Fellow
- Robert A. Novack, Ph.D. (Tennessee) Associate Professor of Supply Chain Management
- Ralph Oliva, Ph.D. (Rensselaer) Professor of Marketing
- Timothy Pollock, Ph.D. (Illinois) Associate Professor of Management
- Lisa L. Posey, Ph.D. (Pennsylvania) Associate Professor of Business Administration
- Arvind Rangaswamy, Ph.D. (Northwestern) Senior Associate Dean; Jonas H. Anchel Professor of Business Administration; Professor of Marketing

- Edward T. Reutzel, Ph.D. (Penn State) Associate Professor of Management Science
- William T. Ross, Ph.D. (Duke) Professor of Marketing; Director of Ph.D./M.S. Programs
- Dawn M. Russell, Ph.D. (Northwestern) Assistant Professor of Supply Chain Management and Information Systems
- Arnold F. Shapiro, Ph.D. (Pennsylvania) Professor of Business Administration and Robert G. Schwartz University Endowed Fellow
- Jeffery M. Sharp, J.D. (Oklahoma) Associate Professor of Business Law
- Dennis P. Sheehan, Ph.D. (California) Professor of Finance; The Virginia and Louis Benzak Professor of Finance; Associate Dean of MBA Programs
- Jun Shu, Ph.D. (California, Berkeley) Assistant Professor of Supply Chain and Information Systems
- Timothy Simin, Ph.D. (Washington) Assistant Professor of Finance
- Charles H. Smith, Ph.D. (Penn State) KPMG Professor Emeritus of Accounting
- Charles C. Snow, Ph.D. (California) Professor of Business Administration
- John C. Spychalski, D.B.A. (Indiana) Professor Emeritus of Supply Chain Management
- Alan J. Stenger, Ph.D. (Minnesota) Professor of Supply Chain Management
- John Stevens, Ph.D. (SUNY) Professor of Management and Organization
- Amy Xue Sun, Ph.D. (Carnegie Mellon) Assistant Professor of Accounting
- Gerald I. Susman, Ph.D. (UCLA) Robert and Judith Klein Professor of Management; Associate Dean for Research
- Douglas J. Thomas, Ph.D. (Georgia Tech) Associate Professor of Supply Chain Management
- James B. Thomas, Ph.D. (Texas) Dean, Professor of Information Sciences and Management
- Evelyn A. Thomchick, Ph.D. (Clemson) Associate Professor of Supply Chain Management
- Linda K. Treviño, Ph.D. (Texas A&M) Professor of Organizational Behavior
- Wenpin Tsai, Ph.D. (London) Associate Professor of International Management
- John E. Tyworth, Ph.D. (Oregon) Chair, Department of Supply Chain Management and Information Systems; Professor of Supply Chain Management
- Albert A. Vicere, D.Ed. (Penn State) Professor of Business Administration
- Qiong Wang, Ph.D. (Florida) Assistant Professor of Marketing
- Xiaotong Wang, Ph.D. (Yale) Assistant Professor of Finance
- J. Randall Woolridge, Ph.D. (Iowa) Professor of Finance and The Goldman, Sachs & Co. and Frank P. Smeal Endowed University Fellow
- Susan H. Xu, Ph.D. (Rensselaer) Professor of Management Science and Supply Chain Management

The Master of Business Administration program is a professional degree designed to prepare individuals for managerial positions in business, government, and nonprofit institutions. The M.B.A. curriculum blends technical rigor, managerial theory, and integrative learning experiences through case studies and other teaching methods. A managerial communications course is fully integrated into the program.

The Master of Science in Business Administration program is highly flexible and designed for advanced study in a specialized field. The M.S. program is directed toward the development of competency within a defined area of management. Fields such as accounting and management science are examples of career opportunities requiring specialized knowledge and skill, including research.

The Doctor of Philosophy degree in the Business Administration program offers advanced graduate education for students focused on research careers at leading business schools. The faculty of the college views the Ph.D. as evidencing scholarship at the highest level.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

Applicants to the master's programs are required to take the Graduate Management Admission Test (GMAT); whereas applications to the doctoral program are required to take either the GMAT or the Graduate Record Examination (GRE) administered by the Educational Testing Service throughout a year. For dates, locations, and other information about the test, write for the Bulletin of Information, Graduate Management Admission Test, Educational Testing Service, Princeton, NJ 08540; www.gmat.org; 800-982-6740.

Criteria for evaluating applicants include professional and academic accomplishments, GMAT scores, recommendations, and personal data from application forms that provide indications of future academic and professional accomplishment.

Work on the M.B.A. degree may be started fall semester only. M.S. and Ph.D. candidates may begin either the fall or spring semester. However, only rarely are admissions for the M.S. and Ph.D. programs granted for spring semester. Individuals from all undergraduate disciplines are encouraged to apply.

Master's Degree Requirements

The M.B.A. program consists of two distinct portions: (1) preprogram competency expectations, including accounting, economics, mathematics, and statistics; and (2) 60 credits of graduate courses. Individuals who did not have adequate preparation in accounting, economics, mathematics, and statistics in their undergraduate programs are expected to develop the required minimum level of competency before graduate study can begin. The time required to complete this graduate program, based on full-time study, is twenty-one months. The student body is divided into diverse sections of approximately forty students, with each section proceeding through the same core classes each semester. Emphasis is placed on student interaction and shared learning both inside and outside the classroom.

The M.S. program consists of two distinct portions: (1) approximately 33 acceptable undergraduate foundation credits in business administration, economics, and mathematics; and (2) 30 graduate credits in business administration or related areas, including a paper or thesis. An applicant may be admitted without foundation courses, but they must be made up without degree credit. A professional paper and 3 additional credits of graduate-level course work can be substituted for the thesis.

Doctoral Degree Requirements

Competency Expectations: Entrance into the doctoral program in business administration does not require the completion of an undergraduate degree specifically in business. While almost any major at the undergraduate level may be acceptable, graduate study in business administration does presume a minimum level of competency in mathematics, statistics, and computing. No transcript credit is required for entering doctoral candidates in these areas, except where specified by particular fields of specialization. However, it must be emphasized that lack of minimum competency in mathematics, statistics and computing could be a significant disadvantage to the candidate.

Breadth Requirement: All candidates are expected to develop a broad understanding of the functions of the business organization. To achieve breadth, all Ph.D. candidates must show competency by completing 12 credits of graduate course work in a minimum of two of the approved fields of study within the Smeal College of Business and in economics. The 12 credits in the breadth requirement must be taken in fields outside or separate from a candidate's primary, supporting, and research competency fields.

Primary Field Requirements: All candidates are required to achieve competency in a primary field of business administration. The primary field is the sphere of scholarship that commands the most extensive and intensive portion of a program and is the area in which the dissertation research and major professors are selected. Primary fields may be selected from the following: accounting; finance/insurance and real estate; management and organization; management science/operations/logistics; and marketing and distribution.

Graduate work in a selected primary field may require competency in prerequisite areas, including undergraduate work in the field itself as well as prior work in mathematics, statistics, computer science, economics, and social and behavioral sciences. The prerequisite work will be specified by each primary field.

Supporting Field Requirements: All candidates must select a supporting field of study from business administration or related outside areas. Those spheres of scholarship complement the candidate's primary field. Supporting fields from business administration include all the primary fields. Outside supporting fields include, but are not limited to, anthropology, civil engineering, computer science, economics, industrial engineering, mathematics, political science, psychology, sociology, and statistics.

Research Methods Field: All candidates must develop a broad understanding of the scientific research process and in-depth competency in the research methods used in the primary field. Each candidate's doctoral committee shall specify a minimum of three graduate-level courses (beyond the M.B.A. core courses) to constitute a supporting field in research methods. One of these courses must focus on the philosophy of science. Others should cover specific methods and tools relevant for research in the primary fields. A member of the doctoral committee shall be designated to represent the research methods field and shall be responsible for evaluating the candidate's competence in the field.

Research Paper and Presentation Requirement: To introduce students early to the research process, each Ph.D. student must complete a written research paper with two years after admission to the Ph.D. program. The student must then present the paper at an open departmental workshop or seminar within one semester after the paper is approved by the department committee and chair. The student must work under the guidance of a Research Paper Supervisor (who may or may not later be the thesis adviser). The research paper supervisor mentors the student, possibly suggesting the research topic, monitoring progress, providing ideas and feedback, and helping the student develop appropriate research, writing, and presentation skills. The paper must substantially represent the student's work, and must be written by the student. The paper must clearly define and motivate the problem being addressed, contain a comprehensive literature review, and present the research contributions and conclusions. Approval of written paper and presentation can be used as a means to the satisfy the University's English competence and communication requirement (to be completed before the comprehensive examination).

Other Degree Programs

QUALITY AND MANUFACTURING MANAGEMENT MASTER'S PROGRAM (QMM)

The QMM program is an integrated, one-year academic program requiring 30 credits and leading to a master's degree in Manufacturing Management. The Penn State College of Engineering and Smeal College of Business have jointly developed this curriculum so as to integrate the viewpoints and fundamentals of the disciplines on engineering and business as applied to quality and manufacturing management. The objective of the QMM program is to develop graduates who are prepared to assume leadership positions in manufacturing and to contribute through functional integration to the firm's competitiveness in global markets.

M.B.A./M.M.M. CONCURRENT DEGREE PROGRAM

This concurrent degree program, an intensive two-year program that combines the M.B.A. degree and M.M.M. degree, is available for students interested in both degrees. In order to complete the concurrent degree within the two-year period, the student must opt for the Supply Chain Management portfolio in the MBA program.

M.B.A./M.H.A. CONCURRENT DEGREE PROGRAM

The MBA program of Smeal College of Business and the Department of Health Policy and Administration of the College of Health and Human Development offer a concurrent degree program that will enable a student to finish in two academic years both a master's degree in Business Administration (M.B.A.) and a master's degree in Health Administration (M.H.A.). An M.B.A./M.H.A. graduate will be well-grounded in business management, health management, and the skills and expertise associated with functional areas of health services management. During the two academic years and intervening summer, the student will complete 63 credits of course work and a professional internship of 400 hours in a health care organization.

FIVE-YEAR SCIENCE B.S./M.B.A. PROGRAM

This program is the result of collaboration between the Eberly College of Science and Smeal College of Business. With the accelerated nature of the program, students can earn a B.S. degree in science and an M.B.A. degree in five calendar years after graduation from high school. For the first three and one-half years, including the first semester of the M.B.A. curriculum, students are enrolled as undergraduates in the Eberly College of Science. For the remaining three semesters, participants are graduate students formally enrolled in the Smeal College of Business M.B.A. program. Successful completion of this program results in a B.S. degree in Science awarded by the Eberly College of Science during year four and an M.B.A. from the Smeal College of Business at the end of year five.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, other awards are available to graduate students in Smeal College of Business.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

ACCOUNTING (ACCTG) course list

Dr. Dan Givoly, *Chair*; 814-865-0041

BUSINESS ADMINISTRATION (B A):
The following courses require matriculation into the MBA program at University Park campus and are considered part of the MBA core

curriculum:

- 500. MARKETING MANAGEMENT (1-3)
- 501. MANAGEMENT (2)
- 502. TEAM PROCESSES AND PERFORMANCE (1-3)
- 504. ETHICAL LEADERSHIP (2)
- 505. NEGOTIATION THEORY AND SKILLS (1-3)
- 510. SUPPLY CHAIN AND OPERATIONS MANAGEMENT (1-3)
- 511. FINANCIAL ACCOUNTING (1-3)
- 512. RISK & DECISION (2)
- 515. BUSINESS STATISTICS FOR CONTEMPORARY DECISION MAKING (2)
- 517. LEADERSHIP COMMUNICATIONS (1-3)
- 521. INTRODUCTION TO MANAGERIAL ACCOUNTING (2)
- 523. INFORMATION TECHNOLOGY (2)
- 531. INTRODUCTION TO FINANCE (1-3)
- 532. GLOBAL BUSINESS ENVIRONMENT (1)
- 533. ECONOMICS FOR MANAGERS (2)
- 535. GLOBAL PERSPECTIVES (1)
- 536. INTERNATIONAL IMMERSION (2)
- 571. STRATEGIC MANAGEMENT (1-3)
- 575. CAPSTONE BUSINESS CASE (4)

Courses outside the MBA core:

- 528. BUSINESS SIMULATION (1-3)
- 545. BUSINESS, GOVERNMENT & INTERNATIONAL ECONOMICS (2)
- 565. STRATEGIC LEADERSHIP (1-3)
- 574. BUSINESS RESEARCH (1-3)
- 596. INDIVIDUAL STUDIES (1-9)
- 599. FOREIGN STUDY - BUSINESS ADMINISTRATION (1-12)

BUSINESS LAW (B LAW) course list
525. BUSINESS LAW FOR INNOVATION & COMPETITION (2)

BUSINESS LOGISTICS (B LOG) course list

Dr. John E. Tyworth, *Chair*; 814-865-1866

E-BUSINESS (EBIZ) course list

ENTREPRENEURSHIP (ENTR) course list
500. INNOVATION AND ENTREPRENEURSHIP (1-3)

FINANCE (FIN) course list
515. NITTANY LION FUND MANAGER (3)
555. GLOBAL FINANCE (1-3)
570. FINANCIAL MODELING (2)

Dr. William A. Kracaw, *Chair*; 814-863-0486

INFORMATION SCIENCES AND TECHNOLOGY (IST) course list

INSURANCE (INS) course list

Dr. Austin Jaffe, *Chair*; 814-865-1190

INTERNATIONAL BUSINESS (I B) course list
555.GLOBAL FINANCE (1-3)

Dr. Fariborz Ghadar, *Director*, 814-865-0544

MANAGEMENT AND ORGANIZATION (MGMT) course list
561. GLOBAL STRATEGY AND ORGANIZATION (1-3)
565. POWER & INFLUENCE (2)

Dr. Dennis Gioia, *Chair*; 814-865-2194

MANAGEMENT INFORMATION SYSTEMS (M I S) course list

MANAGEMENT SCIENCE AND INFORMATION SYSTEMS (MS&IS) course list

John E. Tyworth, *Chair*, 814-865-1866

MARKETING (MKTG) course list

Dr. Hans Baumgartner, *Chair*; 814-863-3559

OPERATIONS AND INFORMATION SYSTEMS MANAGEMENT (OISM) course list

OPERATIONS MANAGEMENT (OPMGT) course list

REAL ESTATE (R EST) course list
515. PROPERTY RIGHTS IN A GLOBAL ECONOMY (2)

Dr. Austin Jaffe, *Chair*; 814-865-1190

SUPPLY CHAIN MANAGEMENT (SCM) course list

CONCURRENT DEGREE OFFERING WITH THE PENN STATE DICKINSON

SCHOOL OF LAW

Smeal College of Business, University Park campus
The Penn State Dickinson School of Law

Degrees Conferred:

J.D. (Dickinson) M.B.A. (The Smeal College)

Concurrent degree program. Smeal College of Business and the Penn State Dickinson School of Law offer a concurrent degree program leading to the degrees of Juris Doctor (J.D.) and Master of Business Administration (M.B.A.). We live in a global society where complex legal structures interact with dynamic and powerful market forces. Individuals with backgrounds in both business and law have a distinct advantage in understanding this interaction and are uniquely positioned for success in our modern society. The Juris Doctor/Master of Business Administration (JD/MBA) joint degree program provides outstanding, highly motivated students the opportunity to combine a Juris Doctor degree from the Penn State's Dickinson School of Law (DSL), one of America's oldest and most respected law schools, with an M.B.A. degree from Penn State's internationally ranked Smeal MBA Program (Smeal). Participants in this program earn both a Juris Doctor degree and a Master of Business Administration in four years compared to the five years required to earn the two degrees separately.

Admission to the program. In order to be admitted to the program, students may: (a) first be admitted and enrolled in either Smeal College or Dickinson and subsequently admitted to the other program; or (b) be admitted to the concurrent program prior to commencing studies at Penn State. Each program will make a separate admission decision. Students admitted to both programs will be admitted as concurrent degree candidates.

Admission Requirements

Candidates must apply to DSL and Smeal separately and must meet each school's requirements. Visit the following Web sites for additional information regarding each school's application.

For DSL: http://www.dsl.psu.edu/admissions/applyjd.cfm (Opens New Window)

For Smeal: http://www.smeal.psu.edu/mba/admission/apply

Dickinson. All applicants for the JD program must hold a bachelor's degree from a regionally accredited institution and are required to take the Law School Admissions Test (LSAT). Applicants must submit a JD application form; pay a $60 nonrefundable application fee if using electronic methods (a $70 nonrefundable application fee if using a downloaded application); submit a complete Law School Data Assembly Service (LSDAS) report; and provide two examples of written expression, an overview of your academic and professional experiences, and two letters of recommendation.

MBA program in Smeal College. All applicants for the MBA program must hold a bachelor's degree from a regionally accredited institution and are required to take the Graduate Management Admission Test (GMAT). They must also complete the online application (consisting of the application form, a professional resume, work history, and three essays); provide two copies of their prior academic transcripts; submit two letters of recommendation, and pay a $60 nonrefundable application fee.

Credit Requirements: The J.D. degree at DSL requires a minimum of 88 credits and the Smeal M.B.A. degree requires a minimum of 60 credits. For students enrolled in the JD/MBA Program, DSL accepts the transfer of twelve (12) Smeal credits which all come from Smeal's required core curriculum. Similarly, Smeal accepts the transfer of twelve (12) credits from the DSL required core curriculum with the possibility of four (4) additional credits eligible for transfer from DSL's elective courses. Twelve of these credits come from the DSL required core curriculum while the possible other four of these credits would come from DSL's elective courses. Accordingly, students must take a ***minimum*** of 76 credits from DSL and 44-48 credits from Smeal in order to complete the JD/MBA program.

Pursuant to University policy, the transfer credits may not be applied to their corresponding joint degree until a participant has completed at least one year of study in both DSL and Smeal.

Current DSL Students: Students currently enrolled at DSL in the JD program may apply to the JD/MBA program during their first or second year of study by applying for admission to Smeal.

Sequence. Students may choose to conduct their study in either of the two sequences shown below. Each "Year" refers to the traditional academic year beginning in late August and concluding in May. In addition, DSL offers a limited number of courses during the summer term. Smeal does not offer any classes over the summer term.

Option 1

Year 1: JD Foundation Course work at either the Carlisle or the University Park location
Year 2: MBA Foundation Course work at the University Park location
Year 3: Combination of JD and MBA Course work at the University Park location
Year 4: JD Upper Level Course work at either the Carlisle or the University Park location

Option 2

Year 1: JD Foundation Course work at either the Carlisle or the University Park location
Year 2: JD Upper Level Course work at either the Carlisle or the University Park location
Year 3: MBA Foundation Course work at the University park location
Year 4: Combination of JD and MBA Course work at the University Park location. Students complete at least one year at University Park campus and one year at Dickinson before being able to cross-count courses. It is anticipated that after one year at each location, a student will spend one additional semester at Smeal and three more semesters at Dickinson

Transfer of Credits: M.B.A. Twelve (12) credits from Dickinson course work may be transferred toward the M.B.A. degree at Smeal. Courses for which such credit may be applied shall be subject to approval by Smeal based on relevance to the MBA program. Students must obtain a grade satisfactory to Smeal for any J.D. course work to be credited toward the M.B.A. degree. (Up to four (4) additional DSL credits may be considered for transfer to Smeal.)

Transfer of Credits: J.D. A maximum of 12 credits for M.B.A. course work may be transferred for credit toward the J.D. degree at the Dickinson School of Law. Courses for which such credit may be applied shall be subject to approval by the Dickinson faculty. Students must obtain a grade satisfactory to Dickinson for any M.B.A. course work to be credited toward the J.D. degree.

Advising of Students. All students in the program shall have two advisers, one from Smeal and one from Dickinson. Periodic interaction between the two advisers is encouraged.

Graduation. It is anticipated that students will complete a minimum of 44 credits from the Smeal College and 76 credits from The Dickinson School of Law in order to obtain the concurrent M.B.A. and J.D. degrees from those institutions. However, a student can graduate with one degree before the other as long as he/she has completed all of the requirements for that degree.

ALFRED G. WARNER, *Director of the M.B.A. Program*
Penn State Erie, The Behrend College
5101 Jordan Road
Erie, PA 16563

Degree Conferred:

M.B.A.

Associate Members of the Graduate Faculty

- Stuart J. Allen, Ph.D. (Minnesota) Associate Professor Emeritus of Management
- S. Saad Andaleeb, Ph.D. (Illinois) Professor of Marketing
- Brian L. Boscaljon, Ph.D. (Texas Tech) Associate Professor of Finance
- Charles A. Brown, Ph.D. (Kent State) Associate Professor of Accounting
- Michael E. Brown, Ph.D. (Penn State) Associate Professor of Management
- Ashutosh V. Deshmukh, Ph.D. (Memphis State) Professor of Accounting
- David T. Doran, Ph.D. (Pittsburgh) Associate Professor of Accounting
- James F. Fairbank, Ph.D. (Penn State) Associate Professor of Management
- Michael G. Filbeck, D.B.A. (Kentucky) Professor of Finance and Samuel Patton Black III Chair in Insurance and Risk Management
- John L. Fizel, Ph.D. (Michigan State) Professor of Economics
- Eric C. Jackson, Ph.D. (Michigan State) Assistant Professor of Management
- Kerry A. King, Ph.D. (West Virginia) Assistant Professor of Economics
- James A. Kurre, Ph.D. (Wayne State) Associate Professor of Economics
- Kenneth K. T. Louie, Ph.D. (Illinois) Associate Professor of Economics
- John M. Magenau, Ph.D. (SUNY, Buffalo) Associate Professor of Management
- Phylis M. Mansfield, Ph.D. (Memphis) Associate Professor of Marketing
- Ido Millet, Ph.D. (Pennsylvania) Professor of Management Information Systems
- Todd M. Nesbit, Ph.D. (West Virginia) Assistant Professor of Economics
- Diane H. Parente, Ph.D. (SUNY, Buffalo) Professor of Management
- Jeffrey K. Pinto, Ph.D. (Pittsburgh) Professor of Management and Andrew Morrow and Elizabeth Lee Black Chair in Management Technology
- Mary Beth Pinto, Ph.D. (Pittsburgh) Professor of Marketing
- Matthew E. Swinarski, Ph.D. (SUNY, Buffalo) Assistant Professor of Management Information Systems
- Margaret A. Thoms, Ph.D. (Ohio State) Professor of Management
- Ray R. Venkataraman, Ph.D. (Illinois Inst of Tech) Associate Professor of Management
- Alfred G. Warner, Ph.D. (Ohio State) Associate Professor of Management
- Barry R. Weller, Ph.D. (Penn State) Associate Professor Emeritus of Economics
- Jessica Xin Zhao, Ph.D. (SUNY, Buffalo) Assistant Professor of Finance

The Penn State Erie M.B.A. is a general degree emphasizing development of the planning and problem-solving skills crucial in middle and upper management. Course work emphasizes the integration of business functions and the practical application of theory in the business world, using cases, simulated problems and actual situations students are experiencing at work. Many students are fully employed professionals who bring a wealth of knowledge and experience to the classroom. Both full-time and part-time study are possible and the program can be completed by attending evening and daytime classes.

Admission Requirements

Admission is granted only to candidates who demonstrate high promise of success for graduate work. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Applicants are required to take the Graduate Management Admissions Test (GMAT) administered by the Educational Testing Service, Box 966, Princeton, NJ 08541; telephone (609) 771-7330.

Admission decisions are based on the following: undergraduate grade-point average; the degree of correspondence between the applicant's objectives and those of the program; three letters of reference; and GMAT score. Favorable consideration will be given to applicants who have significant work experience. An applicant's GMAT score plus undergraduate grade-point average (multiplied by 200) must total at least 1,050 to be considered for admission. A minimum GMAT score of 450 is required. However, admission is competitive and higher scores may be required, depending on the qualifications of the applicants. Entering graduate students for whom English is not the first language are required to have a TOEFL (Test of English as a Foreign Language) score of at least 550 on the paper-based test and at least 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the speaking portion; or the International English Language Testing System (IELTS) with a minimum composite score of 6.5 for admission. Admission is open during the fall and spring semesters, as well as during the summer session.

Applicants must demonstrate proficiency in writing by having earned a grade of B or higher in a college English composition or writing course or by achieving a score of four or higher on the GMAT Analytical Writing Assessment. Students who fail to meet at least one of these two criteria must complete a college English composition or writing course and earn a grade of B or higher or retake the GMAT test and score four or higher on the Analytical Writing Assessment. This requirement must be satisfied during either the first semester or summer session of the student's matriculation.

All students must be computer literate and have ready and reliable access to a computer and the Internet to successfully complete the MBA program. Students must know how to use word processing software, log-on to an Internet provider, and use E-mail. Additionally, MBS students must have a working knowledge of Microsoft Office programs including Word, Excel, PowerPoint, and Access.

Master's Degree Requirements

The Master of Business Administration degree program consists of three parts:

Foundation Core Courses (18 credits): These courses introduce students to the ethical, legal, social, political, technological, and societal environment of business, accounting, economics, finance, management, marketing, operations management, and the application of quantitative methods to the analysis of business problems. Completion of the foundation core, consisting of B ADM 500, B ADM 501, and B ADM 503, prepares students for the program's advanced required courses and electives. The foundation core is required of all applicants who have not completed an undergraduate degree in business or previous undergraduate or graduate course work relevant to the foundation core requirements.

Applicants who have, within seven years prior to the date of their admission to degree candidacy, completed a baccalaureate degree in business from a regionally accredited institution that includes course content equivalent to the foundation core courses may be exempted from part or all of this requirement as long as the previously completed courses carry grades of B or higher. An applicant who, within seven years prior to his or her admission to degree candidacy, completed a baccalaureate degree in a non-business field from a regionally accredited institution that includes equivalent undergraduate or graduate courses carrying a grade of B or higher also may be exempted from relevant portions of the foundation core courses. Applicants who have maintained currency of knowledge through relevant business experience and continuing professional education in one or more of the areas within the foundation core courses and who completed relevant course work more than seven years prior to admission to degree status may also be exempted from relevant portions of foundation core requirements. Exemption from foundation core requirements is granted in accordance with the course exemption guidelines for the MBA program.

Advanced Required Courses (18 credits): These courses build on the knowledge base established in the foundation core and provide greater depth of knowledge in the subject areas included. This component of the MBA program consists of five 3-credit courses that cover advanced topics in cost management, finance, information systems management, managing a diverse workforce, global operations and supply chain management, and strategic management and business policy.

All students are required to complete this requirement which includes B ADM 510, B ADM 511, B ADM 512, B ADM 513, B ADM 514, and B ADM 532 unless they can demonstrate advanced knowledge of the course subject matter through prior course work, extensive experience and/or advanced professional education. Students who believe they have knowledge of an advanced required course must submit a written request and documentation describing their knowledge of the course subject matter. If approved, the student will substitute an additional elective course for the advanced required course.

Elective Courses (12 credits): All students are required to take 12 credits of elective courses covering advanced topics of their choice. Elective courses allow students to pursue a particular area in depth, choose particular subjects of interest, and gain an appreciation of more complex issues facing managers. Electives must include at least 3 credits of internationally focused course work from the program approved list of courses. MBA students may also apply a maximum of 6 credits of approved 400-level course work toward elective requirements. Course work at the 400 level must be approved by the director of the MBA program and cannot have been used for another degree.

Transfer Credits: Students may transfer a maximum of 9 credit hours from another accredited graduate program to fulfill elective or advanced required courses. Application of transfer credits to the student's academic program must be approved by the director of the MBA program and be in compliance with Graduate School requirements described in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

***Foundation Core Courses*:**

BUSINESS ADMINISTRATION (B ADM)

- 500. Business, Government, and Society (3)
- 501. Costs, Competition, and Market Performance (6)
- 502. Demand, Operations, and Firm Performance (6)
- 503. Integrated Business Analysis (3)

***Advanced Required Courses*:**

BUSINESS ADMINISTRATION (B ADM)

- 510. Cost Management for Decision Making and Control (3)
- 511. Information Systems Management and Strategy (3)
- 512. Managing a Diverse Workforce (3)
- 513. Global Operations and Supply Chain Management (3)
- 514. Strategic Planning and Business Policy (3)
- 532. Corporate Finance (3)

Elective Courses:

BUSINESS ADMINISTRATION (B ADM)

- 520. Entrepreneurial Ventures (3)
- 521. Leadership Seminar (3)
- 522. Business Solutions (3)
- 523. International Business (3)
- 524. Operations Strategy (3)
- 525. Innovation and Change Management (3)
- 526. Leadership and Ethics (3)
- 530. Investment Theory (3)
- 531. Business Forecasting (3)
- 532. Corporate Finance (3)
- 533. Derivatives (3)
- 550. Global Marketing (3)
- 551. Marketing Research (3)
- 552. Service Marketing (3)
- 553. Consumer Behavior (3)
- 554. Marketing Strategy (3)

- 562. Financial Statement Analysis (3)
- 563. Financial Electronic Commerce (3)
- 590. Colloquium (1-3)
- 595. Internship (1-18)
- 596. Independent Studies (1-9)
- 597. Special Topics (1-9)
- 598. Special Topics (1-9)
- 599. Foreign Studies (1-12)

ECONOMICS (ECNS)

- 410. Economics of Labor Markets (3)
- 420. Money, Banking, and Economic Activity (3)
- 430. Regional Economic Analysis (3)
- 440. Industrial Organization (3)
- 450. Managerial Economics (3)
- 460. Business Forecasting Techniques (3)
- 462. Advanced Business Forecasting Techniques (3)
- 470. International Trade and Finance (3)
- 485. Econometric Techniques (3)
- 497. Special Topics (1-9)

FINANCE (FNC)

- 400. Problems in Financial Management (3)
- 410. Introduction to Investments (3)
- 430. Estate Planning (3)
- 450. Retirement Planning (3)
- 460. Investment Analysis (3)
- 470. International Financial Management (3)
- 480. Advanced Financial Analysis (3)
- 497. Special Topics (1-9)

INTERNATIONAL BUSINESS (INT B)

- 411. International Business (3)
- 497. Special Topics (1-9)

MANAGEMENT (MANGT)

- 420. Conflict Management (3)
- 440. Advanced Human Resource Management (3)
- 480. International Management (3)
- 497. Special Topics (1-9)
- 510. Project Management (3)
- 515. Cost and Value Management (3)
- 520. Planning and Resource Management (3)
- 525. Commercial Law and Project Procurement (3)
- 531. Organizations (3)
- 535. Interpersonal and Group Behavior (3)
- 540. Strategy: Corporate, Business, and Project (3)
- 575. Management of Projects (3)

MANAGEMENT INFORMATION SYSTEMS (MIS)

- 430. Systems Analysis (3)
- 435. Systems Design and Implementation (3)
- 440. Expert Systems (3)
- 445. Management Reporting Sytems (3)
- 470. Advanced Applications Development (3)
- 497. Special Topics (1-9)

MARKETING (MRKTG)

- 400. Retailing (3)
- 410. Personal Selling (3)
- 420. Sales Management (3)
- 470. Global Marketing (3)
- 497 special Topics (1-9)

SUPPLY CHAIN MANAGEMENT (SCM)

- 445. Operations Planning and Control (3)
- 455. Logistics Systems Analysis and Design (3)
- 460. Purchasing and Materials Management (3)

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Robert D. Russell, Ph.D. (Pittsburgh) *Assistant Professor of Management*
- Stephen P. Schappe, Ph.D. (Ohio State) *Director, School of Business Administration; Associate Professor of Management*
- Girish Subramanian, Ph.D. (Temple) *Professor of Information Systems*
- Peter Swan, Ph.D. (Michigan) *Assistant Professor of Logistics and Operations Management*
- Oranee Tawatnuntachai, Ph.D. (New Orleans) *Associate Professor of Finance*
- Premal P. Vora, Ph.D. (Penn State) *Associate Professor of Finance*
- Gayle J. Yaverbaum, Ph.D. (Temple) *Professor Emerita of Information Systems*
- Richard Young, Ph.D. (Penn State) Professor of Supply Chain Management
- Ugur Yucelt, Ph.D. (New School) *Associate Professor of Marketing*

The Program

Students served by the M.B.A. program are, primarily, nontraditional and reside in south-central Pennsylvania. With the exception of a small percentage of students who are full-time, they are employees of area businesses, state and local governments, and not-for-profit organizations, who study on a part-time basis. In order to accommodate both full- and part-time students, courses are offered primarily in the late afternoon and evening--with occasional offerings on weekends.

The program is intended not only to satisfy current individual needs for professional growth, but also to foster lifelong learning. As an outcome of the program, students may expect to gain participative strengths, problem solving and critical thinking skills, technical expertise, and desirable attitudes and values, particularly ethical values needed in the conduct of business.

To strengthen the educational experience, the Program places high priority on teaching and currency of curriculum, with an emphasis on oral and written communication, research, and cross-functional integration of concepts.

Admission Requirements

Applicants to the program must hold a baccalaureate degree in any field from a regionally accredited, college-level institution. Decisions are based primarily on undergraduate junior/senior grade-point average and the Graduate Management Admission Test (GMAT) scores. (Please visit http://www.mba.com/(Opens New Window) for more information about the GMAT). Post baccalaureate course work, professional experience, and the statements provided in the application are also taken into account.

Students are also required to submit:

- --a completed online application form with application fee
- --two copies of official transcripts from all colleges or universities attended
- --GMAT test scores (the test must have been taken within the past five years)
- --two letters of recommendation

For complete admission information, on-line application, and the latest updates on admission requirements and procedures, please consult the College Web page at http://www.hbg.psu.edu/ (Opens New Window).

International Students

Applicants whose first language is not English or who have not received a baccalaureate degree from an institution in which the language of instruction is English, must take the Test of English as a Foreign Language (TOEFL), http://www.toefl.org/. The test must be passed

with a score of 550 (paper based test) or 213 (computer based test) or higher.

All students with international credentials must submit transcripts to Educational Credential Evaluators, Inc. (ECE) for a "course by course" academic evaluation of transcripts and degree. An ECE application can be obtained on the Web at: http://www.ece.org (Opens New Window).

Application Dates

Candidates may enter the program at the beginning of the fall or spring semester, or the summer session. To allow time for applications to be processed, all information, including the GMAT score, should be received by the admissions office no later than July 18 for admission to the fall semester, November 18 for the spring semester, and April 18 for admission to the summer session.

Applicants from outside the United States must follow the early-admission dates in order to allow the necessary clearances and paperwork to be processed in time. International application deadline dates are:

- Fall Semester--May 31
- Spring Semester--September 30
- Summer Session--February 28

Preparation for the Program

Analytic Skills Requirement: Prior to enrolling in their M.B.A. course work, students must demonstrate competence in analytic skills. This requirement can be satisfied in one of two ways: (1) by satisfactory completion of college-level courses in calculus and statistics such as QUANT 310, or MATH 110 plus STAT 200; or (2) by successful completion of proficiency examinations in calculus and statistics approved by the M.B.A. Program. This requirement must be satisfied by the first semester or summer session of the student's matriculation, and completed with a grade of C or higher.

Credit by examination: Interested students should obtain a Credit by Examination form from Enrollment Services and consult with the MBA Program to obtain a list of suggested preparatory materials and schedule the exam.

Computer Skills Requirement: Students are required to demonstrate proficiency in the use of microcomputer applications.This requirement can be satisfied through of a college-level microcomputer applications course within the past five years with a grade of a B or higher, or by documented , significant, computer-related work experience. If this requirement has not been met prior to admission, a college-level microcomputer course such as MIS 103 or COMPSC 203 is required. Course work must be completed by the first semester or summer session of the student's matriculation with a grade of B or higher.

Communications Skills Requirement: Successful completion of the M.B.A. Program requires the ability to think clearly, and to write and speak persuasively. Part of this requirement can be satisfied by achieving a score of "4" or higher on the Graduate Management Admission Test (GMAT) Analytical Writing Assessment. If this score is not achieved, students must satisfy this requirement through additional course work in writing skills such as ENGL 5013 or other work developed in consultation with the M.B.A. Program. This requirement must be satisfied by the first semester or summer session of the student's matriculation. All courses taken must be completed with a grade of B or higher. The speech component of this requirement is satisfied through individual and group presentations in BUS 500 and other courses in the M.B.A. Program.

Pre-Program Courses:
The MBA Program is grounded in the academic disciplines of accounting, finance, economics, marketing, management, and information sciences, among others, in order to provide students with the conceptual foundation required for competent pursuit of more advanced studies in business administration as well as the ethical and legal management of profit and non-profit organizations. This background can be provided by course work taken as part of a comprehensive and integrated, four-year degree program at an accredited, college-level institution, or through graduate course work. All courses must have been completed with a grade of B or higher, within seven years prior to admission to the M.B.A. Program. Course work not meeting the tests of relevancy, quality, or currency must be taken at the graduate level prior to starting the 30-credit M.B.A. Program. Time limits may be waived by the M.B.A. Program on the basis of post-graduation training or current and relevant work experience. Courses available at Penn State Harrisburg that provide the necessary foundation for graduate business study include: ACCT 501, BUS 500, BUS 505, BUSEC 502, BUSEC 503, MNGMT 511; Either MNGMT 522 or MNGMT 523; and MRKT 513.

Degree Requirements

The M.B.A. degree requires 30 credits of course work at the graduate level (500-level or higher). These credits are distributed over two clusters of courses: Prescribed Courses and Elective Courses/Tracks.

Prescribed Courses: 18 credits, aimed at developing general competence for overall management. ACCT 540, BUS 515, BUS 588, BUS 589, FINAN 521, INFSY 540, MNGMT 514, MKTG 514.

Elective Courses/Tracks: 12 credits. Students may elect courses in clusters of "Tracks" organized around a common theme designed to be integrative and cohesive. The Tracks provide competencies and skill sets for decision making in four areas: (1) the E-business Track is intended to provide competencies enabling managers to develop and implement a global marketing strategy using Internet-based technology; (2) the Human Resources Track is intended to provide competencies enabling managers to organize and operate high performing work organizations that are both efficient and human; (3) the Financial Analysis Track provides competencies needed to control competitive performance, and to develop improvement and innovation in all parts of the organization; (4) the General Business Track is provided for students who wish to develop a broad generalist program, or who have a particular personal or professional goals not met by one of the other tracks.

Tracks:
E-business: The objective of this Track is to examine and apply concepts, models, and techniques from the fields of business and information technology for value chain management and support of the domestic and global strategy of the business enterprise. Internet technologies that enable opportunities in marketing, sales, research and development, promotion, procurement, inventory control, manufacturing, supply chain management, order status checking, and payment systems are examined.

- INFSY 543 Foundations of E-business (3)
- MRKT 586 Internet Marketing (3)

Select 6 credits:
Select 6 credits from INFSY 544(3); MRKT 587(3); or, in consultation with an advisor, from courses in such areas as supply chain management; research and development; promotion; inventory control; procurement; international finance; and international management to meet the objectives of the Track.

Human Resources Management: The objective of this Track is to examine and apply models and techniques from human resources management, labor relations, and behavioral science for the planning and organization of work and work systems to promote cooperation and collaboration, individual and group initiative, innovation, motivation, and flexibility. Also examined are techniques and mechanisms used to develop and maintain a work environment and work climate supportive of performance excellence, full participation, employee well-being and satisfaction, and personal and organizational learning and growth.

- MNGMT 505 Managing Human Resources(3)
- MNGMT 515 Labor Management Relations(3)
- MNGMT 545 Employment Law for Business(3)

Select 3 credits:
Select 3 credits from MNGMT 520(3); MNGMT 570(3); or, in consultation with an advisor, from courses in such areas as human resources management; labor relations; behavioral science; and international management to meet the objectives of the Track.

Financial Analysis: The objective of this Track is to examine and apply models and techniques from finance and accounting for the planning, analysis, control, and improvement of competitive performance, organizational health, ethical business practices, performance capabilities, and progress toward key business results, strategic objectives, and changing organizational goals. Particular emphasis is placed on approaches for translating those analyses into priorities for improvement and opportunities for innovation at all levels, and in all parts of the organization.

- FINAN 531 Managing Financial Operations(3)
- ACCT 561 Financial Statement Analysis II(3)

Select 6 credits:
Select 6 graduate credits in Accounting and/or Finance, in consultation with an advisor, to meet the objectives of the Track.

General Business: The objective of this Track is to allow students to select graduate courses that meet their personal and professional goals.

Select 12 credits:
Select 12 graduate credits, in consultation with an advisor, to meet the objectives of the Track. With Program approval, a maximum of 6 graduate credits may be selected in courses outside the School of Business Administration.

Transfer Credit and Course Substitutions

Transfer Credits: Up to 10 transfer credits may be applied toward the degree. However, credits used to complete a previous degree may not be applied. Transfer credits must have been completed within the past five years, appear on a graduate transcript, and have been passed with a B grade or higher and been earned in an equivalent graduate-level program at an accredited, college-level institution. It must be the opinion of the reviewing faculty that these courses are equivalent in quality to those offered at Penn State Harrisburg.

Course substitutions: Some students enter the Program with advanced coursework in one or more subject areas (e.g., a degree in accounting plus a C.P.A.) making some prescribed coursework redundant. Except for BUS 588, which must be taken at Penn State Harrisburg, students may petition or be advised by the Program to replace up to six credits in Prescribed Courses with an equivalent number of credits of more advanced graduate courses in the same subject area. The advanced course(s) taken must have the replaced courses as an important foundation or prerequisite. Courses must have been completed within the past five years and have earned a grade of B or higher.

Grade-point Average and Time Limit

A 3.00 (out of 4.00) minimum grade-point average is required for the M.B.A. degree. All course work must be completed within six years, or seven consecutive summers of matriculation.

Financial aid

There are a limited number of scholarships, fellowships, and research grants available, as well as several graduate assistantships. For more information on these, contact the School of Business Administration.

Many students work full-time and take classes part-time. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To find other options available to you, contact the Financial Aid Office, 717-948-6307.

Graduate School Assistantships

Full-time graduate students who are interested in an assistantship should contact the graduate program coordinator. Students must be nominated for an assistantship by their program coordinator.

Students applying for an assistantship should submit scores from the Graduate Management Admissions test, or similar examinations by January 30.

Concurrent Degree Offering with the Penn State Dickinson School of Law

Penn State Harrisburg, the Capital College, School of Business Administration
The Penn State Dickinson School of Law

Degrees Conferred: J.D. (Dickinson)
M.B.A. (The Capital College)
M.S.I.S. (The Capital College)

Concurrent Degree Programs

The Dickinson School of Law and the School of Business Administration of Penn State Harrisburg offer cooperative programs leading to the degrees of Juris Doctor (J.D.) to be granted by the Dickinson School of Law, and either the Master of Business Administration (M.B.A.) or Master of Science in Information Systems (M.S.I.S.) to be granted by Penn State Harrisburg, The Capital College. These concurrent degree opportunities facilitate the completion of both a law degree, and a professional degree in business or information systems.

Admission Requirements

The concurrent programs require that the student first be admitted to The Dickinson School of Law. Subsequently, the student is *recommended* for and *applies* for admission to the Graduate School for the Penn State Harrisburg M.B.A. Program or M.S.I.S. Program.

The following are required for applicants:

The Dickinson School of Law: Completed Law School application; Law School Admission Test (LSAT) score; Law School Data Assembly Service (LSDAS) report; one page personal statement; employment record since high school; two letters of recommendation.

M.B.A. and M.S.I.S. Programs: Completed Graduate School application; Graduate Management Admission Test (GMAT); letter of recommendation from the Associate Dean of the Dickinson School of Law; evidence of proficiency in analytic skills through college-level calculus and statistics demonstrated either by completion of courses or successful completion of proficiency examinations approved by the M.B.A. Program; evidence of proficiency in microcomputer applications skills; proficiency in writing evidenced by a score of "4" or higher on the Analytical Writing Assessment portion of the GMAT; evidence of proficiency in the academic disciplines of accounting, finance, economics, marketing, management and information sciences equivalent to that provided by completion of an integrated four-year business program, or completion of additional course work at the graduate level. Each course must have been completed with a grade of B or higher within seven years prior to admission to the M.B.A. or M.S.I.S. program. The School of Business Administration will review the applicant's transcripts for acceptability of the courses.

No courses from the M.B.A. or M.S.I.S. program may count toward the J.D. program until the student is matriculated at The Dickinson School of Law. However, graduate-level courses taken in either the M.B.A. or M.S.I.S. program at Penn State Harrisburg, or at another graduate-level institution may be applied to the M.B.A.or M.S.I.S. in accordance with the transfer policies of the Graduate School.

Transfer of Credits

Nine credits of course work at The Dickinson School of Law may be transferred toward the M.B.A. or the M.S.I.S. degrees, subject to Program approval. Students must obtain a grade satisfactory to the M.B.A. and M.S.I.S. program in order for the credits to be transferable. Nine credits of M.B.A. or M.S.I.S. courses may be transferred for credit toward the J.D. degree at The Dickinson School of Law, subject to the approval of the School of Law.

Advising of Students

All students in the concurrent program have two advisors, on in the School of Business Administration and one from the faculty at The Dickinson School of Law. Because the concurrent program is designed to be taken in synchrony with the objective that both degrees will be earned simultaneously, students who do not demonstrate progress toward completion of both degrees may be denied continuation in the concurrent program. Such a decision will rest jointly with the faculties of the M.B.A. or M.S.I.S. program and the J.D. program.

Tuition

The Dickinson School of Law and Penn State Harrisburg will each charge their own tuition to students in the concurrent programs.

Additional Information

For more information and the latest updates on the concurrent programs, call the Law school at 717-240-5207 or 800-840-1122, or visit the web sites at:
http://www.dsl.psu.edu/ (Opens New Window)
http://www.hbg.psu.edu/ (Opens New Window)

Concurrent Degree Offering with the Milton S. Hershey Medical Center, The Department of Pharmacology

Penn State Harrisburg, The Capital College, School of Business Administration
The Penn State Milton S. Hershey Medical Center, the Department of Pharmacology

Degrees Conferred:
Ph.D. (Hershey)
M.B.A. (The Capital College)

Concurrent Degree Programs

The Milton S. Hershey Medical Center, Department of Pharmacology, and the School of Business Administration of Penn State Harrisburg, The Capital College offer cooperative programs leading to the degrees of doctor of philosophy (Ph.D.) to be granted by the Hershey Medical Center, and either the Master of Business Administration (M.B.A.) or Master of Science in Information Systems (M.S.I.S.) to be granted by the Capital College. These concurrent degree opportunities facilitate the completion of both a pharmacology doctorate and a professional degree in business administration or informations systems. The programs are designed primarily for students interested in pursuing a career involving high-quality independent research and positions of management responsibility within the pharmacological community.

Admission Requirements:
The concurrent programs require that the student first be admitted to The Pharmacology Program. Subsequently, the student is *recommended* for and *applies* for admission to the Graduate School for the Penn State Harrisburg M.B.A. or M.S.I.S. program.

The following are required for applicants:

Pharmacology: Completed application; Graduate Record Examination (GRE) score; a bachelor's degree reflecting a reasonable background in zoology or biology, mathematics and chemistry; a minimum junior/senior grade point average of 3.00 and with appropriate course backgrounds; two letters of recommendation; a curriculum vitae; a description of career goals. Reading knowledge of one or two foreign

languages is recommended.

M.B.A. and M.S.I.S. Programs: Completed Graduate School application; Graduate Management Admission test (GMAT) score; letter of recommendation from the department chair of the pharmacology department; evidence of proficiency in analytic skills through college-level calculus and statistics demonstrated either by completion of course or successful completion of a mathematics proficiency examination approved by the program; evidence of proficiency in microcomputer applications skills; proficiency in writing evidenced by a score of "4" or higher on the Writing Assessment portion of the GMAT; evidence of proficiency in the academic disciplines of accounting, finance, economics, marketing, management and information sciences equivalent to that provided by completion of an integrated four-year business program, or completion of additional course work at the graduate level. Each course must have been completed with a grade of B or higher within seven years prior to admission to the M.B.A. or M.S.I.S. program. The School of Business Administration will review the applicant's transcripts for acceptability of the courses.

No courses from the M.B.A. or M.S.I.S. program may count toward the Ph.D. until the student is admitted to the pharmacology program. However, graduate-level courses taken in the M.B.A. or M.S.I.S. program at Penn State Harrisburg, or at another graduate-level institution, may be applied to the M.B.A. or M.S.I.S. in accordance with the transfer policies of the Graduate School.

Transfer of Credits

Nine credits of course work in pharmacology may be transferred toward the M.B.A. or M.S.I.S., subject to Program approval. Students must obtain a grade satisfactory to the M.B.A. or M.S.I.S. Program in order for the credits to be transferable. Nine credits of M.B.A. or M.S.I.S. coursework may be transferred for credit toward the Ph.D. degree, subject to the approval of the Department of Pharmacology.

Advising of Students

All students in the concurrent program have two advisors, one in the School of Business Administration, and one from the faculty in the Department of Pharmacology. Because the concurrent program is designed to be taken in synchrony with the objective that both degrees will be earned simultaneously, students who do not demonstrate progress toward completion of both degrees may be denied continuation in the concurrent program. Such a decision will rest jointly with the faculties of the M.B.A. or M.S.I.S. and the Ph.D. programs.

- Colin J. Neill, Ph.D. (University of Wales, UK) *Associate Professor of Software Engineering*
- Simon J. Pak, Ph.D. (California, Berkeley) *Associate Professor of Finance*
- Michael J. Piovoso, Ph.D. (University of Delaware) *Professor of Electrical Engineering*
- Denise Potosky, Ph.D. (Rutgers) *Associate Professor of Management and Organization*
- Robin G. Qiu, Ph.D. (Penn State) *Assistant Professor of Information Science*
- Raghvinder Sangwan, Ph.D. (Temple University) *Assistant Professor of Information Science*
- Kailasam Satyamurthy, Ph.D. (Clemson) *Senior Lecturer in Engineering and Management*
- John Sosik, Ph.D. (SUNY Binghamton) *Associate Professor of Management and Organization*
- Eric W. Stein, Ph.D. (Pennsylvania) *Associate Professor of Management Science and Information Systems*
- G. Walter Wang, Ph.D. (Louisiana State) *Associate Professor of Marketing*

The Penn State Great Valley M.B.A. is a general degree program emphasizing development of the planning and problem-solving skills crucial in middle and upper management in the public, private, and nonprofit sectors. Nearly all students are working professionals who bring a wealth of experience and knowledge to the classroom. Program options are offered in Biotechnology and Health Industry Management, New Ventures and Entrepreneurial Studies, and Management of Information Technology. Required research in these areas of specialization may be conducted in Penn State Great Valley's Library and Computer Center, which provide local research support as well as access to the library and computer resources of the entire Penn State system.

The M.B.A. program is geared toward the needs of part-time students who are employed full-time. Courses in the program, which are offered at Great Valley, are scheduled for the convenience of adult learners, in the evening or on Saturday.

Admission Requirements

Requirements listed here are in addition to the Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Graduate Bulletin*. Scores from the Graduate Management Admission Test (GMAT) are required for admission. Scores from the Test of English as a Foreign Language (TOEFL) are required of international applicants and must be submitted at the time of application. Exception: The TOEFL is not required of natives of an English-speaking country or applicants who hold a baccalaureate or master's degree from an institution of an English-speaking country. Applicants should have had at least one year of quantitative analysis or statistics.

Admission decisions are based on the quality of the applicant's credentials in relation to those of other applicants. Evaluation criteria include professional and academic accomplishments, GMAT scores, two recommendations, and a personal statement that provides indications of future academic and professional potential. Application filing dates: Penn State Great Valley's M.B.A. program has a rolling admission policy. New students may start classes in early September, late October, early January, early March, or late April.

Degree Requirements

Normally 45 credits will be required to complete the M.B.A. degree.

Prior to enrolling in M.B.A. program requirements, students entering the program are expected to meet preprogram requirements that build a foundation for effective communication skills and quantitative analysis as described below.

Quantitative Skills Requirement: Prior to enrolling in their M.B.A. course work, students must demonstrate competence in quantitative skills. This requirement must be satisfied in one of two ways:

1. Completion of two sequential undergraduate courses in applied statistics or one graduate introductory course in applied statistics at a regionally accredited institution of higher education with a minimum grade of B, within the past seven years prior to being enrolled at Penn State Great Valley. Syllabi for such courses must be provided.

OR

1. Satisfactory completion of BUSAD 501 (formerly MS&IS 510): Statistical Analysis for Managerial Decision Making at Penn State Great Valley. This requirement must be satisfied by the first semester or summer session of the student's matriculation prior to enrolling in M.B.A. degree courses, and completed with a grade of B or higher. Successful completion of this course will result in 3 credits of

graduate credit, but will not count toward the completion of program requirements for the M.B.A. degree.

Communications Skills Requirement: Successful completion of the M.B.A. Program requires the ability to think clearly, and to write and speak persuasively. Students must satisfy this requirement in one of two ways:

1. Completion of two undergraduate courses or one graduate-level course in managerial communication from a regionally accredited institution of higher education with a minimum grade of B, within the past seven years prior to being enrolled at Penn State Great Valley. Syllabi for such courses must be provided.

OR

1. Satisfactory completion of BA 517: Communication Skills for Management at Penn State Great Valley. This requirement must be satisfied by the first semester or summer session of the student's matriculation prior to enrolling in M.B.A. degree courses, and completed with a grade of B or higher. Successful completion of this course will result in 3 credits of graduate credit, but will not count toward the completion requirements of the M.B.A. degree.

To facilitate successful fulfillment of preprogram requirements, students needing to take BA 517 or BUSAD 501 will be admitted on a one-year provisional basis.

Core Courses (18 credits)
Core Courses provide a foundation for business studies. They include MGMT 501(3), ACCTG 512(3), BUSAD 523(3), MKTG 500(3), FIN 531(3), and OPMGT 510(3).

Exemption from up to 15 credits from the core courses may be granted in accordance with the course exemption guidelines for the M.B.A. program. Normally students will need to have completed at least two undergraduate courses with a grade of B or higher, no more than seven years prior to admission to the M.B.A. program, to be eligible for exemption from a single core course. At the Management Division Head's discretion, a competency exam may be required to receive certain course exemptions. Course work not meeting the tests of relevancy, quality, or currency must be taken at the graduate level prior to starting advanced coursework. Time limits may be waived by the M.B.A. program on the basis of post-graduate training or current and relevant work experience.

All entering students are required to take MGMT 501.

All students must complete advanced course work consisting of 9 credits of required courses (ACCTG 524, BUSAD 537, and BUSAD 551 or BUSAD 534), 15 credits of elective courses and a 3-credit capstone course. For specialized options in New Ventures and Entrepreneurial Studies and Biotechnology and Health Industry Management, the capstone course and 9 credits of electives are restricted to more specialized study.

For the Business Administration option, these courses include BUSAD 551, BUSAD 537, ACCTG 524, a Managing and Leading People elective, a Managing Technology and Innovation elective, 9 credits of free electives, and the 3-credit capstone course MGMT 571.

For the option in New Ventures and Entrepreneurial Studies, students fulfill their advanced course requirements with BUSAD 551, BUSAD 537, ACCTG 524, a Managing and Leading People elective, a Managing Technology and Innovation elective, and 12 credits of New Ventures courses, including a choice of capstone course: BUSAD 581 (Entrepreneurship track), MGMT 571 (Intrapreneurship track), or LEAD 582 (Social Entrepreneurship track).

For the Biotechnology and Health Industry Management option, students take BUSAD 530, BUSAD 537, ACCTG 524, a Managing and Leading People elective, a Managing Technology and Innovation elective, BUSAD 534, the capstone course BUSAD 583, and two courses from a suggested list of courses in health care, product development, or bioinformatics.

For the option in Management of Information Technology, students fulfill their advanced course requirement with ACCTG 524, BUSAD 537, BUSAD 576, Managing and Leading People elective, Managing Technology & Innovation course (MIS 539), three elective courses in Management of Information Technology, and the capstone course MGMT 571.

Students should consult the professor in charge of each option for specific curriculum requirements.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. Additional information is available from the financial aid office at Penn State Great Valley.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Business Administration, Executive Master of (exMBA)

The Executive MBA program is a cohort program with a class of approximately forty students moving in lockstep through the program. Classes are taught primarily on the weekends in the Philadelphia area, complemented with several residence weeks on the University Park campus. The time required to complete the program is twenty-two months.

Admission Requirements

Please refer to the requirements listed in the *Admission Requirements* section of the full-time MBA program at University Park. Applicants to the Executive MBA program should have considerable work experience, typically ten years or more.

Master's Degree Requirements

Please refer to the requirements listed in the *Master's Degree Requirements* section of the full-time MBA program at University Park.

Degree Conferred:

M.B.A.

The Graduate Faculty -- Penn State Erie, The Behrend College

- S. Saad Andaleeb, Ph.D. (Illinois at Urbana-Champaign) Professor of Marketing
- Brian L. Boscaljon, Ph.D. (Texas Tech) Associate Professor of Finance
- Ashutosh V. Deshmukh, Ph.D. (Memphis) Professor of Accounting and Management Information Systems
- David T. Doran, Ph.D. (Pittsburgh) Associate Professor of Accounting
- John L. Fizel, Ph.D. (Michigan State) Professor of Economics
- James A. Kurre, Ph.D. (Wayne State) Associate Professor of Economics
- Kenneth K. T. Louie, Ph.D. (Illinois) Associate Professor of Economics
- John M. Magenau, Ph.D. (SUNY at Buffalo) Associate Professor of Management
- Ido Millet, Ph.D. (Pennsylvania) Professor of Management Information Systems
- Diane H. Parente, Ph.D. (SUNY, Buffalo) Professor of Management
- Jeffrey K. Pinto, Ph.D. (Pittsburgh) Professor of Management
- Mary Beth Pinto, Ph.D. (Pittsburgh) Professor of Marketing
- Ray Venkataraman, Ph.D. (Illinois Inst of Tech) Professor of Management

The Graduate Faculty -- Penn State Great Valley, School of Graduate Professional Studies

- Janet Duck, Ph.D. (Penn State) Assistant Professor of Management
- John Mason, Ph.D. (Michigan State) Associate Professor of Management
- Kimberly K. Merriman, Ph.D. (Temple) Assistant Professor of Management
- Denise Potosky, Ph.D. (Rutgers) Associate Professor of Management and Organization
- Matthew Sarkees, Ph.D. (Pittsburgh) Assistant Professor of Marketing

The Graduate Faculty -- Penn State Harrisburg, The Capital College

- Melvin Blumberg, Ph.D. (Penn State) Professor of Management
- Terence A. Brown, D.B.A. (Maryland) Associate Professor of Transportation and Marketing
- Thomas Buttross, Ph.D. (Mississippi) Associate Professor of Professional Accountancy
- Refik Culpan, Ph.D. (NYU) Professor of Management and International Business
- Jacob De Rooy, Ph.D. (Rutgers) Associate Professor of Managerial Economics and Statistics
- Robert D'Intino, Ph.D. (Virginia Tech) Assistant Professor of Management
- Krishna S. Dhir, Ph.D. (Colorado) Professor of Business Administration
- Jean Harris, Ph.D. (Virginia Tech) Associate Professor of Professional Accountancy
- Erdener Kaynak, Ph.D. (Cranfield) Professor of Marketing
- Mukund S. Kulkarni, Ph.D. (Kentucky) Professor of Finance
- David A. Morand, Ph.D. (Cornell) Professor of Management
- Vedula N. Murti, Ph.D. (Pennsylvania) Assistant Professor of Economics and Statistics
- Kurt H. Parkum, Ph.D. (Wisconsin) Associate Professor of Management
- Parag C. Pendharkar, D.B.A. (Southern Illinois) Professor of Information Systems
- Robert D. Russell, Ph.D. (Pittsburgh) Assistant Professor of Management
- Stephen P. Schappe, Ph.D. (Ohio State) Associate Professor of Management
- John A. Sinisi, Ph.D. (Massachusetts) Assistant Professor of Economics
- Girish Subramanian, Ph.D. (Temple) Associate Professor of Information Systems
- Oranee Tawatnuntachai, Ph.D. (New Orleans) Associate Professor of Finance
- John M. Trussel, Ph.D. (George Washington) Associate Professor of Professional Accountancy
- Ugur Yucelt, Ph.D. (New School) Associate Professor of Marketing

The Graduate Faculty -- The Smeal College of Business

- Robert P. Crum, D.B.A. (Kentucky) Associate Professor of Accounting
- Edward Ketz, Ph.D., Associate Professor of Accounting

The Penn State Intercollege Master of Business Administration (iMBA) is an online degree program of Penn State Erie, The Behrend College; Penn State Great Valley, The School of Graduate Professional Studies; Penn State Harrisburg; and Smeal College of Business, Penn State University Park. The iMBA curriculum emphasizes cross-functional organizational thinking; focuses on business planning and strategy; closely follows the quality guidelines for accreditation of AACSB (American Assembly of Collegiate Schools of Business), the accrediting body affiliated with The International Association for Management Education; and uses cutting-edge instructional technology to transcend issues of time and space, and to support effective teaching and learning.

Within the context of these goals, the iMBA curriculum was developed around four core business areas and six themes. The core business areas include: Financial Reporting, Analysis, and Markets; Domestic and Global Economic Environments; Human Behavior in Organizations; Creation and Distribution of Goods and Services.

The themes were derived from values and concepts found in high performing organizations: Leadership; Strategic Planning; Customer and Market; Information and Analysis; Human Resources; Process Management.

These business areas and themes are integrated at the course level. Students apply knowledge developed in these areas to multidimensional problems and issues throughout the program, which includes two required one-week culminating or capstone

residential experiences.

Admission Requirements

Admission is granted only to candidates who demonstrate high promise of success for graduate work. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Applicants are required to take the Graduate Management Admission Test (GMAT). Applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English, must take the TOEFL (Test of English as a Foreign Language).

Admissions decisions are based on a review of a complete admission portfolio, including an application, a statement of intent, a current resume, official transcripts from each undergraduate and graduate institution attended, two letters of recommendation, and GMAT scores. An applicant's credentials are compared to the standards set by other candidates in the current application pool. Please see http://www.worldcampus.psu.edu/iMBA (Opens New Window) for additional program information.

Applicants must have completed the following prerequisites or the equivalent before they may matriculate: Quantitative Analysis (e.g., QUANT 310), Business Statistics (e.g., STAT 200 or MSIS 200), Accounting (e.g., ACCTG 211), Microeconomics (e.g., ECON 002) and Macroeconomics (e.g., ECON 004). Applicants who have developed relevant knowledge and skills in one or more of these areas through work experiences may demonstrate their proficiency through the application portfolio. A working knowledge of the Microsoft Office suite is required.

Master's Degree Requirements

The iMBA degree requires 48 credits distributed across the following courses: IMBA 501, IMBA 502, IMBA 513, IMBA 515, IMBA 516, IMBA 517, IMBA 521, IMBA 522, IMBA 523, IMBA 530, IMBA 531, IMBA 543, IMBA 544, IMBA 550, IMBA 560, IMBA 561, IMBA 562, IMBA 573, and IMBA 574. Attendance at the two one-week Residency Experiences is mandatory. Following the iMBA course schedule, which involves completing credits over eight consecutive terms, a part-time student can complete the program in two years (see http://www.worldcampus.psu.edu/pub/imba/afs_sched.shtml (Opens New Window)).

Other Relevant Information

The iMBA is an online graduate degree program delivered via World Campus (http://www.worldcampus.psu.edu/ (Opens New Window)). Students progress through the program in cohorts. They must be computer literate and have immediate, ready, and reliable access to a computer and the Internet. Although not all aspects of the course are delivered via electronic media, Internet access is required to successfully complete the course of instruction, as well as participate in online discussion groups. See (http://www.worldcampus.psu.edu/pub/imba/afs_equip.shtml (Opens New Window)) for the most current technical requirements. Students are required to complete the two one-week residency experiences. No alternatives and substitutions are possible.

Courses

Term One

INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (iMBA)
501. Markets, Industry Analysis, and Business Strategy (3)
502. Financial and Accounting Tools (3)

Term Two

INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (iMBA)
513. Data Analysis Resource Module (2)
515. Accounting for External Reporting (2)
516. Organizational Behavior and Performance(2)

Term Three

INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (iMBA)
521. Strategic Analysis (2)
522. Financial Management (2)
523. Organizational Development, Intervention and Change (2)

Residency Experience I (required)

Term Four

INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (iMBA)
517. Corporate Governance (2)
531. Project Management (2)
543. Accounting for Internal Decision Making (2)

Term Five

INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (iMBA)
530. Marketing in a Global Environment (3)
544. Managing Human Resources(3)

Term Six

INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (iMBA)
550. Corporate Information Strategy(3)
560. Corporate Innovative Strategies (3)

Term Seven

INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (iMBA)
561. Global Operations and Supply Chain Management (3)
562. Global Business Management (3)

Term Eight

INTERCOLLEGE MASTER OF BUSINESS ADMINISTRATION (iMBA)
573. Strategic Planning (3)
574. Strategic Financial Decisions (3)

Residency Experience II (required)

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Ian Zagon, Ph.D., (Neural and Behavioral Sciences, College of Medicine)

The Intercollege Graduate Degree Program in Cell and Developmental Biology (IGDP in CDB) prepares graduates for diverse opportunities in academic institutions, pharmaceutical companies, private research foundations, governmental research and regulatory programs. The program includes faculty from 10 departments in the College of Agricultural Sciences, Engineering, Liberal Arts, and Eberly College of Science at the University Park campus and the College of Medicine at the Penn State Milton S. Hershey Medical Center. The IGDP in CDB is also supported by the Huck Institutes of Life Sciences which provides modern telecommunications facilities and sophisticated equipment for state-of-the-art research applications. Doctoral students not only receive education and training new principles and experimental approaches, but also practice communication skills in group discussions and informal seminars and explore various potential career opportunities before graduation. Two unique aspects are (1) optional dual mentors will provide students with a interdisciplinary and multidisciplinary training, stimulate scientific thinking using different perspectives, and prepare for a wide range of future career options; and (2) an optional internship will provide a mechanism for students to obtain practical experience in future professional settings or gain specialized training off campus.

General Admission Requirements

M.S. or Ph.D. degrees

Application deadline is January 10 for priority consideration.

1. Completed official Penn State Graduate School application
2. Paid nonrefundable application fee
3. Two official transcripts from each institution attended
4. Completed Integrative Biosciences Graduate Degree Program application
5. Application for a U.S. visa (International applicants only)
6. Graduate Record Examinations (GRE) general test scores
7. Three letters of recommendation
8. Statement of goals that pertains to the life sciences
9. All international applicants whose first language is not English or who have not received baccalaureate or masters degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the new speaking portion is required for admission. The International English Language Testing System (IELTS) module provides an exam to test four mandatory skill areas: listening, reading, writing and speaking. All four modules are equally weighted in the evaluation process. The International English Language Testing System has been approved by the Graduate Council as an alternative exam to the TOEFL for international students applying to Penn State. A minimum composite score of 6.5 on the IELTS test is required for admission.
10. Students must have completed a bachelor's degree at an accredited college or university and have a minimum of a 3.0/4.0 junior/senior undergraduate grade-point average.

Program Requirements

M.S. or Ph.D. degrees

1. Foundation of basic knowledge in cell biology, developmental biology, biochemistry, and molecular biology. The IGDP in CDB requires at least 9 credits in one or more of these disciplines, taken either as an undergraduate or as a part of the graduate curriculum. The following courses serve to fulfill this requirement.
    - IBIOS 590. COLLOQUIUM (2 credits) All students are required to enroll for 4 credits of Colloquium. Students receive A-F quality grades.
    - IBIOS 592. CURRENT RESEARCH SEMINARS (2 credits) Students are required to enroll for 4 credits. Students receive A-F quality grades.
    - BMMB 501 (*). CORE CONCEPTS IN BIOMOLECULAR SCIENCES (5 credits) Students receive A-F quality grades.
    - IBIOS 572 (*). BENCHMARK PAPERS (2 credits) Students are required to enroll for 2 credits. Students receive A-F quality grades.
    - BMMB 541 (*). MOLECULAR BIOLOGY OF ANIMAL DEVELOPMENT (3 credits) Students receive A-F quality grades.
    - * The paperwork has been filed to seek approval of each of these as a standing course.
2. IBIOS 596. INDEPENDENT STUDIES: LABORATORY ROTATIONS (1-3 credits per semester) Students receive an R (satisfactory/passing) or F (unsatisfactory/failing). Only R credits are counted for credit totals.
3. IBIOS 595. INTERNSHIP (1 credit, optional) Students receive an R (satisfactory/passing) or U (unsatisfactory/failing). Only R credits are counted for credit totals.
4. IBIOS 591. ETHICS IN THE LIFE SCIENCES (1 credit) Students receive A-F quality grades.
5. IBIOS 600 THESIS RESEARCH (variable credits)
6. IBIOS 601 Ph.D. DISSERTATION FULL-TIME (0 credits)
7. IBIOS/VSC 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING (optional, 1 credit), one semester is encouraged after the first year in residence. International Fellows must pass an English proficiency exam before teaching.
8. The Graduate School requires all graduate students to maintain a 3.0 grade-point average.

English Requirement for International Students

The English Requirement for International students in IBIOS is that prescribed by the Graduate School. All entering international students, whose first language is not English, will be required to take a Test of Spoken English (TSE) which is administered by the University's Center for English as a Second Language (ESL). Exceptions may be made if the entering applicant received a baccalaureate or Master's from an institution which instructs in English.

Students with teaching responsibilities are required to take the American English Oral Communicative Proficiency Test (AEOCPT) prior to entering the classroom. The AEOCPT is given at the beginning of fall and spring semesters. All international students are required to pre-register for this test. The test scores from the AEOCPT (American English Oral Communicative Proficiency Test) are posted on the University's Administrative Information System (AIS) computer. Below is the course of action or the various TSE (Test of Spoken English) score ranges.

>250 approved for teaching and the ESL (English as a Second Language) requirement will be satisfied.

230-249 required to schedule and pass ESL 118G.

200-229 required to pass ESL 117G*. These students will not be permitted to teach in a classroom situation, and may instead be assigned to grading and/or proctoring duties.

<200 required to schedule and pass with the grade of A in ESL 115G, before ESL 117G*. These students will not be permitted to teach in a classroom situation, and may instead be assigned to grading and/or proctoring duties.

* At the end of this course, students are re-tested. Based upon these test results, students are either approved for teaching, placed in a subsequent ESL course, or asked to retake the course.

For students who enroll at the Hershey Medical School who need to take one or more of the above English courses can fulfill the requirements on one of the following ways. First, take the course at UP. If the student needs to commute between the two campuses but does not have a car, the UP-HY shuttle service can potentially be used. Secondly, a student may take a similar course at Hershey or an area college, approved by the CDB program curriculum committee.

Students, who are required to enroll in ESL courses, must complete the ESL requirement by the end of the second semester of residency. Students who fail to satisfy this requirement may be terminated from the IBIOS program, at the discretion of the Co-Chairs.

M.S. Degree Requirements

For all master's degrees, a minimum of 30 graduate credits and a 3.0 overall GPA are required. At least 18 credits at the 500-level or above, combined, (with at least 6 credits of 500-level in professional master's programs) must be included in the program. If pursuing a Masters thesis option, up to 6 IBIOS 600 credits may be A-F graded and 12 credits need to be in the major at the 500 level (excluding IBIOS 600). IBIOS 595 (Internship) and 596 (Rotations) credits all count toward the 30 credits. All CDB graduate students must successfully complete required courses and/or electives (see below) during the first two years of their graduate education. If all course credits and requirements are met, students do not have to be registered for classes while writing and/or defending his/her work. The student selects a thesis committee (upon consultation with faculty advisor), writes a thesis, and defends his/her work. If pursuing a Masters non-thesis option, the student must have a first authored manuscript (based on his/her research) that has been either accepted and/or published in a peer reviewed journal. The manuscript is given to at least the faculty advisor and the IGDP Chair for evaluation.

Students must present their thesis in accordance with the Penn State guidelines as described in the *THESIS GUIDE Requirements for the Preparation of Master's and Doctoral Theses*. Current copies may be obtained from website: http://www.gradsch.psu.edu/current/thesis/guide.html (Opens New Window), or from the Thesis Office, 115 Kern Building, University Park, PA 16802; 814-865-5448.

Ph.D. Degree Requirements

Ph.D. students must have a minimum of 30 credits and a 3.0 overall GPA through out the program. The course requirements are essentially the same as that required for the M.S. degree listed above, with some discretion left to the student and advisor.

Grade Point Average/Unsatisfactory Scholarship: Students are required to have a minimum grade-point average of 3.0 through out the course of their training. Furthermore, the student must have a 3.0 to take the doctoral candidacy, the comprehensive and final oral examinations. One or more failing grades or a cumulative grade-point average below 3.0 may be considered evidence of unsatisfactory scholarship and be grounds for dismissal from the program.

English Competence: A candidate for Ph.D. in the CDB program is required to demonstrate high-level competence in the use of the English language, including reading, writing, and speaking, as part of the language and communication requirements. The CDB program has several required courses, all of which train students to develop and improve skills in reading, writing, and speaking in English. Students are required to make oral presentations and complete written assignments. The instructors of these courses will assist in evaluating the competence in using English and those students identified as being deficient in English will be required to take remedial activities, such as additional courses, writing assignments, and tutorials. International students are advised that the submission of minimum requirements for TOEFL does not constitute the fulfillment of the English competence requirement. English competence must be demonstrated before or at the candidacy exam.

Besides coursework, research, and teaching, IGDP in CDB doctoral students participate in the following:

Candidacy Exam: This exam should be taken by the end or during the student's third semester in the CDB Program. The student will be assigned one scientific papers from the primary literature to read and analyze for approximately one week. The papers will be selected based upon the students' background and coursework. The analysis should involve exploring the relevant literature as well as the fundamental issues in Cell and Developmental Biology. Following this independent research the student will take an oral exam. The oral exam will be administered by at least three members of the graduate program. The overall goal of the exam is to assure that the student has an intellectual foundation in Cell and Developmental Biology. The exam is designed to evaluate basic knowledge in Cell and Developmental Biology and related disciplines as well as the students' ability to integrate this understanding to effectively evaluate experimental design, results, and the conclusions drawn. In the event that the student does not pass this exam, the student's committee will make a recommendation as to whether to offer another opportunity or to terminate the student's enrollment in the program.

Comprehensive Examination: Evaluation via the Doctoral Committee to determine the feasibility of proposed research and the preparedness of the student. Students must be registered for classes (typically IBIOS 600) the semester they take this exam.

Doctoral Committee: Upon successful completion of the Candidacy Examination, the student in consultation with the mentors will, as soon as possible, select a doctoral committee. The committee will consist of three members of the IGDP in CDB and one faculty member who is not a member of the IGDP in CDB. One members of the committee must be from a different department from the home department(s) of the mentor(s). This committee is responsible for supervising the academic program and monitoring the progress of the student towards his/her degree. Doctoral Thesis Committee Composition is based on the Graduate Degree Programs Bulletin (http://bulletins.psu.edu/bulletins/whitebook/degree_requirements.cfm?section=degreeReq1) published by the Graduate School regarding Doctoral Committees and requires:

- 4 person minimum of approved PSU Graduate Faculty.
- 2 members must be inside the major and 1 member must be outside the major. Note - the outside member must be member of the approved PSU Graduate Faculty. The outside member for intercollege graduate programs may be inside the major but committee membership must have representation from more than one department.
- For students with dual mentors, both mentors may serve on the committee. One of the mentors should be designated as the primary mentor. The outside member must not be in the same department as the primary mentor.
- A person not affiliated with PSU may be added as a special member (beyond the 4 members of the approved PSU Graduate Faculty) upon recommendation of the head of the program and approval of the graduate dean.
- Have committee chair or one of the co-chairs be a member of the approved PSU Graduate Faculty. Typically it's the faculty advisor.
- The doctoral candidate and three committee members must be physically present for the comprehensive exam and defense. No more than one person may be present via telephone. Telephone or video conference arrangements must be approved by the Dean of the Graduate School.
- Need approval of 2/3 of the committee members for passing comprehensive exam and defense dissertation.

Ph.D. Defense: Evaluation via the Doctoral Committee of the thesis research.

Students must present their thesis in accordance with the Penn State guidelines as described in the *THESIS GUIDE Requirements for the Preparation of Master's and Doctoral Theses*. Current copies may be obtained from website: http://www.gradsch.psu.edu/current/thesis/guide.html (Opens New Window), or from the Thesis Office, 115 Kern Building, University Park, PA 16802; 814-865-5448.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- David A. Antonetti, Ph.D. (Penn State) Associate Professor of Cellular and Molecular Physiology, and Ophthalmology
- Alistair J. Barber, Ph.D. Associate Professor of Ophthalmology, and Cellular and Molecular Physiology
- Colin Barnstable, Ph.D., Professor and Chair of Neurology, Neural and Behavioral Sciences
- Melvin L. Billingsley, Ph.D. (George Washington) Professor of Pharmacology
- Judith S. Bond, Ph.D. (Rutgers) Professor and Chair of Biochemistry and Molecular Biology
- Robert H. Bonneau, Ph.D. (Penn State) Professor of Microbiology and Immunology
- Sarah K. Bronson, Ph.D. (Washington) Associate Professor of Cellular and Molecular Physiology
- Laura Carrel, Ph.D., Associate Professor, Department of Biochemistry and Molecular Biology
- Vincent Chau, Ph.D. (Virginia) Professor of Cellular and Molecular Physiology
- Hua Cheng, Ph.D., Assistant Professor, Department of Medicine, Microbiology and Immunology
- Keith C. Cheng, M.D., Ph.D. (NYU/Washington) Associate Professor of Pathology, and Biochemistry and Molecular Biology
- Hui-Ling Chiang, Ph.D. (Harvard) Professor of Cellular and Molecular Physiology
- Neil D. Christensen, Ph.D. (Auckland, New Zealand) Associate Professor of Pathology, and Microbiology and Immunology
- Gary A. Clawson, M.D., Ph.D. (Miami/Michigan State) Professor of Pathology, and Biochemistry and Molecular Biology
- James R. Connor, Ph.D. (California, Berkeley) Distinguished Professor and Vice Chair, Department of Neurosurgery
- Richard J. Courtney, Ph.D. (Syracuse) Professor and Chair of Microbiology and Immunology
- Rebecca C. Craven, Ph.D. (Tennessee) Associate Professor of Microbiology and Immunology
- Henry J. Donahue, Ph.D. (California, Santa Barbara) Baker Professor and Vice Chair, Department of Orthopaedics and Rehabilitation; Professor of Cellular and Molecular Biology
- Kristin A. Eckert, Ph.D. (Wisconsin) Associate Professor of Pathology, and Biochemistry and Molecular Biology
- James M. Flanagan, Ph.D. Professor of Biochemistry and molecular Biology
- Joanna Floros, Ph.D.(Temple) Evan Pugh Professor of Cellular and Molecular Physiology, Pediatrics, and Obstetrics and Gynecology
- Thomas W. Gardner, M.D., M.S. (Jefferson Medical College) Professor of Ophthalmology, and Cellular and Molecular Physiology
- Channe D. Gowda, Ph.D. (U of Mysore, India) Professor of Biochemistry and Molecular Biology
- Sergei A. Grigoryev, Ph.D. (Moscow State U) Assistant Professor of Biochemistry and Molecular Biology
- Edward J. Gunther, Ph.D. (Yale) Assistant Professor of Medicine
- James M. Hammond, M.D. (Washington, St. Louis) Professor of Medicine, and Cellular and Molecular Physiology
- Jianming Hu, M.D., Associate Professor of Micriobiology and Immunology
- Rosalyn B. Irby, Ph.D. Assistant Professor of Medicine
- Harriet C. Isom, Ph.D. (Illinois) Distinguished Professor of Microbiology and Immunology; Professor of Pathology
- Leonard S. Jefferson, Jr., Ph.D. (Vanderbilt) Evan Pugh Professor and Chair of Cellular and Molecular Physiology
- Michael Katzman, M.D. (Columbia) Associate Professor of Medicine, and Microbiology and Immunology
- Ralph L. Keil, Ph.D. (Cornell) Associate Professor of Biochemistry and Molecular Biology
- Mark Kester, Ph.D. (SUNY, Buffalo) Professor of Pharmacology
- Charles H. Lang, Ph.D. (Hahnemann) Professor of Cellular and Molecular Physiology, and Surgery
- Kathryn F. LaNoue, Ph.D. (Yale) Professor of Cellular and Molecular Physiology
- Philip Lazarus, Ph.D. (McGill, Montreal) Professor of Pharmacology and Health Evaluation Sciences
- Robert Levenson, Ph.D. (SUNY, Stony Brook) Professor of Pharmacology
- Thomas P. Loughran, Jr., M.D. Professor of Medicine
- Christopher J. Lynch, Ph.D. (Northeastern) Associate Professor of Cellular and Molecular Physiology
- Jan M. McAllister, Ph.D. (California, San Diego) Associate Professor of Cellular and Molecular Physiology
- Patricia J. McLaughlin, D.Ed. (Penn State) Professor of Neural and Behavioral Sciences
- Craig M. Meyers, Ph.D. (California, Los Angeles) Professor of Microbiology and Immunology
- David Mu, Ph.D., Associate Professor of Pathology, and Biochemistry and Molecular Biology
- Kathleen M. Mulder, Ph.D. (SUNY, Buffalo) Professor of Pharmacology
- Yuk-Chow Ng, Ph.D. (Michigan) Associate Professor of Pharmacology
- Christopher Niyibizi, Ph.D. (McGill, Montreal) Associate Professor of Orthopaedics and Rehabilitation
- Christopher Norbury, Ph.D. (U Dundee, Scotland) Assistant Professor of Microbiology and Immunology
- Leslie Parent, M.D. (Duke) Associate Professor of Medicine, and Microbiology and Immunology
- Anthony E. Pegg, Ph.D. (Cambridge) Evan Pugh Professor of Cellular and Molecular Physiology, and Pharmacology; J. Lloyd Huck Professor of Cell and Molecular Biology
- Blaise Z. Peterson, Ph.D. (Washington) Associate Professor of Cellular and Molecular Physiology
- David S. Phelps, Ph.D. (Temple) Professor of Pediatrics
- Maricamen D. Planas-Silva (Baylor College of Medicine) Assistant Professor of Pharmacology
- John P. Richie, Jr., Ph.D. Professor of Health Evaluation Sciences
- Timothy M. Ritty, Ph.D. Assistant Professor of Orthopaedics and Rehabilitation
- Gavin P. Robertson, Ph.D. (California, Riverside) Assistant Professor of Pharmacology, Pathology, and Dermatology
- Ira J. Ropson, Ph.D. (Johns Hopkins) Associate Professor of Biochemistry and Molecular Biology
- Jeffery Sample, Ph.D., Professor of Microbiology and Immunology
- Todd Schell, Ph.D., Assistant Professor of Microbiology and Immunology
- Cara-Lynne Schengrund, Ph.D. (Seton Hall) Professor of Biochemistry and Molecular Biology
- Ian A. Simpson, Ph.D. (University College, London) Professor of Neural and Behavioral Sciences
- Lawrence II Sinoway, M.D. Professor of Medicine
- Jill P. Smith, Ph.D. (Florida) Professor of Medicine
- David J. Spector, Ph.D. (Pennsylvania) Associate Professor of Microbiology and Immunology
- Thomas C. Vary, Ph.D. (Penn State) Professor of Cellular and Molecular Physiology

- Michael F. Verderame, Ph.D. (Columbia) Associate Professor of Medicine; Assistant Professor of Microbiology and Immunology
- Kent E. Vrana, Ph.D. Elliot S. Vesell Professor and Chair of Pharmacology
- Hong-Gang Wang, PhD., Lois H. Berstler Professor of Pharmacology
- John W. Wills, Ph.D. (Tennessee) Professor of Microbiology and Immunology
- Jun You, Ph.D. Assistant Professor of Orthopaedics and Rehabilitation
- Ian S. Zagon, Ph.D. (Colorado) Distinguished Professor of Neural and Behavioral Sciences
- Jiyue Zhu, Ph.D. (Dartmouth) Assistant Professor of Cellular and Molecular Physiology

The graduate program in Cell and Molecular Biology (CMBIO) is designed to prepare students for careers in basic or applied research. Two hallmarks of the program are its interdisciplinary nature and the close contact that is maintained between faculty and students. The seventy-plus members of the program represent a cross-section of research from twelve departments: Biochemistry and Molecular Biology, Cellular and Molecular Physiology, Health Evaluation Sciences, Medicine, Microbiology and Immunology, Medicine, Neural and Behavioral Sciences, Ophthalmology, Orthopaedics and Rehabilitation, Pathology, Pediatrics, Pharmacology, and Surgery. Graduate students benefit from the diverse base of training and research opportunities provided by the faculty. All courses are available at the College of Medicine(Opens New Window).

Research carried out by participating faculty encompasses all subfields of cell and molecular biology, including membrane structure, receptors, and modulators; the role of extracellular matrix in cellular function; organelle assembly, structure, and function; cell division, differentiation, adhesion, communication, and movement; recombination, organization, and expression of genes; gene mapping and recombinant DNA; and regulation of gene expression. Modern, well-equipped laboratories are available for graduate students from the molecular to tissue level.

Admission Requirements

Qualified students with undergraduate preparation in the biological, biochemical, or physical sciences and an overall grade-point average of 3.00 or better will be considered for admission. The best-qualified applicants will be accepted on a space-available basis. Applications must include transcripts, three letters of recommendation, Graduate Record Examination scores (or scores from a comparable examination accepted by the graduate program, e.g., MCAT exam), and a brief personal essay summarizing the background and professional goals of the applicant.

Doctoral Degree Requirements

Ph.D. candidates in the Cell and Molecular Biology Graduate program take The College of Medicine Core Curriculum (BMS 501 Regulation of Cellular and Systemic Energy Metabolism, BMS 502 Cell and Systems Biology, and BMS 503 Flow of Cellular Information) in the Fall semester to provide a strong foundation. Additional required courses include the complete Anatomy Selective (ANAT/PHARM 584 Human Anatomy and Development A: Human Development, ANAT/PHARM 585 Human Anatomy and Development B: general Human Anatomy, ANAT/PHARM 586 Human Anatomy and Development C: Stem Cell Biology and Regenerative Medicine for a total of 3 credits), as well as CMBIO (MICRO) 554 Principles of Immunology, HES 515 Biostatistics, and IBIOS 591 Ethics in the Life Sciences. An additional 7 credits of electives will be chosen based upon the individual student's career goals. Each student will be required to complete the following successfully: (1) A candidacy examination covering the general course material that will consist of a written portion and an oral portion designed to explore in depth an area of research in cell and molecular biology. The examination will be given after completion of the spring semester of the first year. (2) A comprehensive examination consisting of a written research proposal and an oral defense of that proposal will be required after completion of the spring semester of the second year. (3) An original research project under the supervision of a Cell and Molecular Biology faculty adviser. (4) A thesis. (5) A final oral defense of the thesis. The program is designed for completion within four years, but this can vary depending on the individual progress of the student.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. Graduate assistantships in the program are awarded by the Cell and Molecular Biology Program Committee. After the second year, Cell and Molecular Biology students are eligible for departmental teaching or research assistantships and other assistantships supported by grant funds of individual faculty members. The program encourages all Ph.D. candidates to apply for fellowships, scholarships, and stipend support from outside sources. For students obtaining outside fellowships, scholarships, and stipend support, supplementation to the level of the assistantships will be provided.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- Antonios Armaou, Ph.D. (UCLA) Associate Professor of Chemical Engineering
- Abdellaziz Ben-Jebria, Ph.D. (U Paris) Professor of Chemical Engineering
- Ali Borhan, Ph.D. (Stanford) Professor of Chemical Engineering
- Patrick Cirino, Ph.D. (Cal Tech) Assistant Professor of Chemical Engineering
- Wayne R. Curtis, Ph.D. (Purdue) Professor of Chemical Engineering and Biotechnology
- Ronald P. Danner, Ph.D. (Lehigh) Professor Emeritus of Chemical Engineering
- Thomas E. Daubert, Ph.D. (Penn State) Professor Emeritus of Chemical Engineering
- Kristen Fichthorn, Ph.D. (Michigan) Merrell R. Fenske Professor of Chemical Engineering
- Henry C. Foley, Ph.D. (Penn State) Dean, College of Information Sciences and Technology; Professor of Chemical Engineering
- Enrique D. Gomez, Ph.D. (California, Berkeley) Assistant Professor of Chemical Engineering
- Jong-In Hahm, Ph.D. (U of Chicago) Assistant Professor of Chemical Engineering
- Michael Janik, Ph.D. (Virginia) Assistant Professor of Chemical Engineering
- Seong Han Kim, Ph.D. (Northwestern) Associate Professor of Chemical Engineering
- Wallis Lloyd, Ph.D. (Minnesota) Adjunct Professor of Chemical Engineering
- Costas D. Maranas, Ph.D. (Princeton) Donald B. Broughton Professor of Chemical Engineering
- Janna Maranas, Ph.D. (Princeton) Associate Professor of Chemical Engineering
- Themis Matsoukas, Ph.D. (Michigan) Professor of Chemical Engineering
- Scott T. Milner, Ph.D. (Harvard) Joyce Chair Professor of Chemical Engineering
- Joseph Perez, Ph.D. (Penn State) Senior Research Scientist
- Robert Rioux, Ph.D. (California, Berkeley) Friedrich G. Helfferich Assistant Professor of Chemical Engineering
- Chunshan Song, Ph.D. (Osaka) Professor of Fuel Science
- James S. Ultman, Ph.D. (Delaware) Professor Emeritus of Chemical Engineering
- M. Albert Vannice, Ph.D. (Stanford) Professor Emeritus of Chemical Engineering
- Darrell Velegol, Ph.D. (Carnegie Mellon) Professor of Chemical Engineering
- James S. Vrentas, Ph.D. (Delaware) Professor of Chemical Engineering
- Andrew Zydney, Ph.D. (MIT) Professor of Chemical Engineering

Course offerings or research facilities are available in the following areas: applied thermodynamics, physiological transport studies, biotechnology, protein engineering, catalysis and surface science, polymer and colloid science, transport phenomena, nanotechnology, computational chemical engineering, molecular dynamics, tribology and lubrication.

Admission Requirements

Scores from the Graduate Record Examination (GRE) are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

To be admitted, a student should be a graduate of an accredited major in chemical engineering or the equivalent. Graduates of other accredited engineering or physical science majors may be admitted but will be required to make up certain undergraduate deficiencies without graduate credit. Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students.

Master's Degree Requirements

A minimum of 18 course credits is required and must include at least 12 credits in the 500-series chemical engineering courses. A thesis is required. There is no communication or language requirement.

Continuous registration is required for all graduate students until the thesis is approved.

Doctoral Degree Requirements

A minimum of 30 graduate course credits is required and must include a minimum of 15 credits of 500-series Chemical Engineering courses taken at the University. There is no communication or language requirement. The comprehensive examination consists of a written research proposal or project defended orally after it has been accepted.

Continuous registration is required for all graduate students until the thesis is approved.

Other Relevant Information

An option for specialization in Biomolecular Transport Dynamics is available to doctoral students. This option provides interdisciplinary education in biotransport phenomena, molecular and cell biology, and medical applications.

Programs leading to a minor in Chemical Engineering are available to both M.S. and Ph.D. candidates who wish to complement studies in their major fields with a broader knowledge of chemical thermodynamics, transport phenomena, and reactor design.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Raymond E. Schaak, Ph.D. (Penn State) Associate Professor of Chemistry
- Ayusman Sen, Ph.D. (Chicago) Professor of Chemistry
- Scott A. Showalter, Ph.D. (Washington U) Assistant Professor of Chemistry
- Dan G. Sykes, Ph.D. (U of Alberta) Senior Lecturer and Director
- Steven M. Weinreb, Ph.D. (Rochester) Russell and Mildred Marker Professor of Natural Products Chemistry
- Paul S. Weiss, Ph.D. (California, Berkeley) Professor of Chemistry
- Mary Beth Williams, Ph.D. (North Carolina, Chapel Hill) Associate Professor of Chemistry
- Nicholas Winograd, Ph.D. (Case Western Reserve) Evan Pugh Professor of Chemistry

The Ph.D. program in Chemistry provides students with a broad background in chemistry and intensive research experience culminating in the preparation of a formal thesis. The goal of the program is to prepare students for a variety of careers in academia, government, or industry. The exceptionally high quality of our laboratory and computer facilities enables us to provide students with outstanding research opportunities. Distinguished visiting scholars conduct informal discussions each week at a departmental colloquium.

The Chemical Biology option introduces graduate students to training with more active, multidisciplinary, and group learning experience. Students in the option will have the opportunity to participate in the Life Sciences Consortium seminars and will have dual mentorship.

Admission Requirements

Scores from the Graduate Record Examination (GRE) are required for admission. In extenuating circumstances, a student may be admitted provisionally for graduate study in the program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

For admission, at least integral calculus plus one year's work in general physics, organic chemistry, physical chemistry, and either analytical or inorganic chemistry are normally required. Students who have appropriate course backgrounds and who present a 2.50 average (on a 4.00 scale) in all undergraduate courses in chemistry, physics, and mathematics will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 2.50 grade-point average may be made for students with special backgrounds, abilities, and interests.

Master's Degree Requirements

The program of the M.S. candidate must include a total of at least 30 graduate-level course credits (CHEM 431W, CHEM 450, CHEM 452, CHEM 457, CHEM 494, and CHEM 500 may not be included in this credit count.)

Additional requirements of the M.S. program are that the candidate must write a thesis and must defend this thesis at an oral

examination. The thesis will be accomplished under the sponsorship of a faculty member, and the candidate must schedule at least 6 credits of CHEM 600 (for a thesis) or CHEM 589 (for a research report) to fulfill this requirement. The candidate's attainments under a thesis must be approved by a committee of at least three faculty members, one of whom will be the candidate's sponsor.

Qualifying examinations in analytical, biological, inorganic, organic, and physical chemistry will be given to all new students upon entrance in the fall semester. These exams cover subject matter at the level of the basic courses offered for the B.S. degree in chemistry at Penn State. For certification as an M.S. candidate, proficiency in two areas is required. These must include physical chemistry. Such proficiency may be demonstrated either by (1) passing the area examination upon entrance, or (2) obtaining a grade-point equivalent of 3.0 in at least 3 credits of graduate-level course work in the area. The courses to be used to fulfill this latter option will be designated by the graduate counseling committee. This course work must be completed successfully during the student's first two semesters of residence.

A final oral examination will be administered by a committee consisting of the student's research preceptor and two other faculty members. This examination is scheduled after the M.S. thesis has been completed.

Doctoral Degree Requirements

Candidates for the Ph.D. degree in Chemistry must meet the following requirements established by the department faculty.

A Ph.D. candidate shall be required to take a minimum of five 3-credit courses in chemistry at the 400-500 level (only CHEM 408, CHEM 430, and CHEM 448 can be used). The candidate's doctoral committee may require additional specific courses.

Qualifying examinations in analytical, biological, inorganic, organic, and physical chemistry will be given to all new students upon entrance in the fall semester. These exams cover subject matter at the level of the basic courses offered for the B.S. degree in chemistry at Penn State. As a part of the requirements for certification as a Ph.D. candidate, each student will be expected to demonstrate proficiency in three areas of chemistry, including physical chemistry. Such proficiency may be demonstrated either by (a) passing the area examination upon entrance, or (b) obtaining a grade-point equivalent of 3.0 in at least 3 credits of graduate-level course work in the area. The courses to be used to fulfill this latter option will be designated by the graduate counseling committee. This course work must be completed successfully during the student's first two semesters of residence.

In order to qualify for the oral comprehensive examination, a Ph.D. candidate must first obtain a grade of 3.0 or better on 3 credits of CHEM 500 (by writing the requisite number of seminar reports, proposals, and presenting in an area seminar).

A Ph.D. candidate shall take the oral comprehensive examination during his or her first two and one-half years of residency.

Every Ph.D. candidate shall present at least one area or department seminar during the course of residency.

A final oral examination based on a defense of the doctoral thesis is required of all candidates. This exam is given as a formal public seminar with a subsequent closed meeting with the doctoral committee.

Biogeochemistry Dual-Title Degree Program

Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework from an approved list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. Chemistry's existing candidacy procedure is to be augmented by a biogeochemistry examination, the structure and timing of this exam will be determined jointly by the dual-title and major program. A single candidacy result is to be reported to the graduate school once this process is complete. The student's doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Candidacy exams must incorporate a biogeochemistry component; for Chemistry students, an oral exam in biogeochemistry will be administered. See the Biogeochemistry Dual Title listing in the Graduate Degree Programs Bulletin for further details regarding program requirements.

Other Relevant Information

All candidates for advanced degrees must schedule CHEM 602, Supervised Experience in College Teaching, for 1 to 2 credits for at least one semester. This requirement may be waived or modified for students who have attained satisfactory competence in teaching as a result of prior experience.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. It is important to note that department policy limits financial support from department funds to the first two years of graduate study of an M.S. candidate and to the first five years of graduate study of a Ph.D. candidate. Financial support beyond these periods is permitted from other than department funds, e.g., a research assistantship funded from an individual faculty member's research grant(s).

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Civil Engineering (C E)

Program Home Page (Opens New Window)

PEGGY A. JOHNSON, *Head of the Department of Civil and Environmental Engineering*
212 Sackett Building
814-863-3084

Degrees Conferred:

Ph.D., M.S., M.Eng.

The Graduate Faculty

- Rachel A. Brennan, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of Civil Engineering
- William D. Burgos, Ph.D. (Virginia Tech) Associate Professor of Environmental Engineering
- Fred S. Cannon, Ph.D. (Illinois, Urbana-Champaign) P.E. Professor of Environmental Engineering
- Brian A. Dempsey, Ph.D. (North Carolina) Professor of Environmental Engineering
- Eric T. Donnell, Ph.D. (Penn State) Assistant Professor of Civil Engineering
- Christopher J. Duffy, Ph.D. (New Mexico Institute of Mining and Technology) P.H. Professor of Civil Engineering
- William J. Gburek, Ph.D. (Penn State) Adjunct Associate Professor of Civil Engineering
- Michael Gooseff, Ph.D. (Colorado) Assistant Professor of Civil Engineering
- David F. Hill, Ph.D. (California, Berkeley) Associate Professor of Civil Engineering
- Peggy A. Johnson, Ph.D. (Maryland) Head; Professor of Civil Engineering
- Paul P. Jovanis, Ph.D. (California, Berkeley) Professor of Civil Engineering
- Bo Kasal, Ph.D. (Oregon State) Hankin Chair of Residential Building Construction
- Jeffrey A. Laman, Ph.D. (Michigan) P.E. Associate Professor of Civil Engineering
- Daniel G. Linzell, Ph.D. (Georgia Tech) P.E. Associate Professor of Civil Engineering
- Bruce E. Logan, Ph.D. (California, Berkeley) Kappe Professor of Environmental Engineering
- Maria M. Lopez de Murphy, Ph.D. (Michigan) Will Assistant Professor of Civil Engineering
- Jack V. Matson, Ph.D. (Rice) P.E. Professor of Environmental Engineering
- Angelica Palomino, Ph.D. Hartz Family Career Development Professor; Assistant Professor of Civil Engineering
- Martin T. Pietrucha, Ph.D. (Maryland) P.E. Associate Professor of Civil Engineering
- Patrick Reed, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of Civil Engineering
- John M. Regan, Ph.D. (Wisconsin, Madison) P.E. Associate Professor of Civil Engineering
- Andrew Scanlon, Ph.D. (Alberta) S.E. Professor of Civil Engineering
- Barry Scheetz, Ph.D. Professor of Civil Engineering
- Andrea J. Schokker, Ph.D. (Texas, Austin) Adjunct Professor of Civil Engineering
- Venkataraman (Venky) N. Shankar, Ph.D. (U Washington, Seattle) Associate Professor of Civil Engineering
- Shelley M. Stoffels, D.E. (Texas A&M) P.E. Associate Professor of Civil Engineering
- H. Randolph Thomas, Jr., Ph.D. (Vanderbilt) P.E. Professor of Civil Engineering
- Mian C. Wang, Ph.D. (California, Berkeley) P.E. Professor of Civil Engineering
- Gordon Warn, Ph.D. Assistant Professor of Civil Engineering

Students may specialize in construction engineering, environmental engineering, hydrosystems engineering, structural engineering, and transportation engineering.

Admission Requirements

The requirements listed here are in addition to the general requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Candidates should possess a baccalaureate degree from a regionally accredited institution. Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and appropriate course backgrounds may be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

International applicants must submit OFFICIAL transcripts, degree, and diploma certificates in **both English and native language**. These documents must contain the “red stamp” or have the raised notary stamp. Photocopies will NOT be accepted.

All applicants must provide the department with official transcripts of all their previous course work (in duplicate), a statement of objectives, and three letters of recommendation AT THE TIME OF APPLICATION. In addition, all applicants must submit scores from the General Graduate Record Examinations Aptitude Test (verbal, quantitative, and analytical).

All international applicants whose native language is not English must present an acceptable score (560 minimum on the paper-based test; 220 minimum on the computer-based test) on the Test of English as a Foreign Language (TOEFL).

Applicants for fall admission who wish to be considered for financial aid should have COMPLETED applications on file by DECEMBER 1 of the preceding year.

Degree Requirements

The M.Eng. degree is a nonthesis professional master's degree. The program provides training for advanced professional practice. A minimum of 30 graduate credits (400 level and above) of course work and a writing portfolio are required. It should be noted that 20 credits must be earned at an established graduate campus of the University. At least 15 credits must be earned in graduate courses (500 level). Divisions may require specific core courses. Students are not permitted to count audited credits toward the minimum credits required for the degree.

The M.S. degree program is strongly oriented toward research. A minimum of 30 graduate credits (400-level and above) is required, of which 20 must be earned at an established graduate campus of the University. At least 18 credits in the 500 and 600 levels, combined, must be included in the program. A minimum of 12 credits of course work (400 and 500 level), as contrasted with research, must be completed in the major (courses prefixed C E). Division may require specific core courses. Students are not permitted to count audited credits toward the minimum credits required for the degree. A thesis is required, and at least 6 credits of thesis research (C E 600 or 610)

must be included in the candidate's academic course plan.

A candidate for the Ph.D. degree must pass the English proficiency and candidacy examinations, prepare and defend the thesis proposal as part of the oral comprehensive examination, and pass the final oral examination (thesis defense). In addition, a Ph.D. candidate must satisfy the University residency requirement by registering for two consecutive semesters as a full-time student.

Continuous registration is required for all graduate students until the thesis or writing portfolio has been approved. See also Environmental Engineering.

Biogeochemistry Dual-Title Degree Program

Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework from an approved list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. A single candidacy examination that includes biogeochemistry will be administered for admission into the student's Ph.D. program, as well as the biogeochemistry dual-title. The structure and timing of this exam will be determined jointly by the dual-title and major program. The student's doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Other Relevant Information

Students in this program may elect to participate in the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. See also Environmental Engineering.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. International applicants who wish to be considered for a teaching assistantship must present an acceptable score (250-300 or 55-60) on the Test of Spoken English (TSE). The TSE can be taken in many countries, or at Penn State after arrival.

CECIL M. PEPPERMAN MEMORIAL GRADUATE FELLOWSHIP
Available to a graduate student in civil or environmental engineering specializing in one of the following fields, listed in order of priority: waste treatment and management, water pollution control, environmental engineering, or related fields.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Dual-Title Graduate Degree in Classics and Ancient Mediterranean Studies (CAMS)

Program Home Page (Opens New Window)
PAUL HARVEY, *Department Head*
101 Weaver Building
814-863-0061
pbh1@psu.edu

Degrees Conferred

Students electing this program through participating departments will earn a degree with a dual-title at both the Ph.D. and the master's levels, i.e., Ph.D. in (graduate program name) and Classics and Ancient Mediterranean Studies, or master's degree in (graduate program name) and Classics and Ancient Mediterranean Studies.

The following graduate programs offer dual degrees in Classics and Mediterranean Studies: History.

The Graduate Faculty

Classics and Ancient Mediterranean Studies-affiliated faculty include individuals with budgeted appointments in Classics and Ancient Mediterranean Studies and individuals with courtesy joint appointments. The following faculty members have budgeted and courtesy joint appointments in Classics and Ancient Mediterranean Studies:

- Philip H. Baldi, Ph.D. (University of Rochester) Professor of Classics and Linguistics
- Daniel William Berman, Ph.D. (Yale University) Associate Professor of Classics and Ancient Mediterranean Studies
- Chris Brady, D. Phil. (Oxford University) Associate Professor of Classics and Ancient Mediterranean Studies
- Garrett George Fagan, Ph.D. (McMaster University) Associate Professor of Classics and Ancient Mediterranean Studies, and History
- Paul B. Harvey Jr., Ph.D. (University of Pennsylvania) Associate Professor of Classics and Ancient Mediterranean Studies, History, and Religious Studies
- Brian Hesse, Ph.D. (Columbia University) Professor of Jewish Studies and Ancient Mediterranean Studies
- Ann Eloise Killebrew, Ph.D. (Hebrew University , Jerusalem) Associate Professor of Classics and Ancient Mediterranean Studies, Jewish Studies, and Anthropology
- Gerald Neil Knoppers, Ph.D. (Harvard University) Professor of Classics and Ancient Mediterranean Studies and Jewish Studies
- Mark Munn, Ph.D. (University of Pennsylvania) Professor of Greek History and Greek Archaeology
- Donald Redford, Ph.D. (University of Toronto) Professor of Classics and Ancient Mediterranean Studies
- Aaron Rubin, Ph.D. (Harvard University) Assistant Professor of Classics and Ancient Mediterranean Studies, Jewish Studies, and Comparative Literature
- Gonzalo Rubio, Ph.D. (Johns Hopkins University) Assistant Professor of Classics and Ancient Mediterranean Studies, History, and Religious Studies
- Stephen Wheeler, Ph.D. (Princeton University) Associate Professor of Classics

Dual-title degrees grounded both in CAMS and a given discipline will acknowledge and foster interdisciplinary scholarship. This dual-title degree program will increase the intellectual rigor, breadth, and depth of graduate work in a participating program through immersion in the disciplinary fields covered by the Department of Classics and Ancient Mediterranean Studies: the philology and literature of ancient Mediterranean languages; the history and material cultures of those societies.

This dual-title program will thus provide a context in which students will learn how to synthesize knowledge within and across traditional disciplinary boundaries. In addition, this dual-title degree program will provide qualified students opportunities for instructional training encouraging an interdisciplinary approach to teaching.

The primary advantages of this dual-title program include the intellectual and academic advantages and benefits of interdisciplinary study, as well as the enhancement of the reputation of the departments concerned through an innovative program, leading to recruitment of highly qualified graduate students, and an improved placement of doctoral graduates in highly-competitive humanities fields.

This dual-title degree program does not duplicate any other degree program in the University.

Admission Requirements

Students must first be admitted to a participating program; only after admittance by a participating program, will students be admitted to graduate study in CAMS by an admissions committee of CAMS faculty and the approval of the head of CAMS. CAMS will follow the timetable and admissions requirements of the participating program. Applicants to this dual-title degree program should have a junior/senior cumulative average of at least 3.30 (on a 4.00 scale) and appropriate academic preparation. Preference will be given to those candidates whose undergraduate record demonstrates expertise in ancient Mediterranean studies (history; literature; archaeology) and proficiency to the 12 th credit level in one or more ancient languages. Where applicable, a minimum GPA of 3.5 (on a 4.00) scale is requisite for graduate work previously undertaken. Prospective students seeking admission to this dual-title degree program are required to write a statement of purpose that addresses the ways in which their research and professional goals will reflect an interest in interdisciplinary research in the participating program and the disciplines and fields included in CAMS.

Degree Requirements

This dual-title degree will have requirements in addition to those for graduate degrees in a participating program. Those requirements include additional course work in ancient languages, additional components to the comprehensive examinations at the doctoral level, and the completion of CAMS-related theses at the master's level (optional; see below) and doctoral levels (compulsory). A CAMS master's. and a doctoral . committee, chaired by faculty closely related to the student's field of interest, will supervise the graduate study of each student accepted into this dual-title program. Students will be expected to attend and participate actively in the CAMS regularly-scheduled colloquia.

Master's Degree

33 credits, including:

6 required credits (CAMS 592: CAMS Proseminar; CAMS 593: Research Seminar).
9 additional credits in 500 or 400-level work in CAMS courses.

Reading knowledge of one ancient language: proficiency to be demonstrated through 400/500 level work in that language as instructed by CAMS language faculty.

Writing requirement: completion and approval of two seminar research papers. Those research papers should be conceived, in terms of length, format, and quality, as suitable for submission to refereed journals for publication. A student has the option of filing one of those research papers with the Graduate School as a master's thesis, in the appropriate format specified by the Graduate School .

Although the Graduate School permits eight years to complete the master's degree, master's-level students who expect to enter the Ph.D. program are strongly encouraged to graduate in either spring or summer at the end of the second year. . The culminating experience leading to the master's degree will be evaluated in accord with the procedures and standards of the participating program and of CAMS.

Ph.D. Degree

6 required credits (CAMS 592: CAMS Proseminar; CAMS 593: Research Seminar).
9 additional credits in 500 or 400-level work in CAMS courses.
9 additional credits (a minimum of 6 should be at the 500-level) in CAMS courses or courses relevant to the student's research interests.

Reading knowledge of a second ancient language--proficiency to be demonstrated through 400/500 level work in that language as instructed by CAMS language faculty--or competence, demonstrated in course work or field study, as approved by the student's supervisory committee, in a research technique in a technical field relevant to CAMS: e.g., archaeology, art history, anthropology, historical linguistics, literary studies and analysis.

Dissertation on a CAMS-related topic as approved by the student's committee.

Foreign Language and English Competency Requirements

The student will fulfill the English Competency requirements specified by the participating program. Master's students will fulfill a requirement of reading knowledge of one ancient language: Ph.D. candidates will fulfill a requirement of reading knowledge of two ancient languages or of one ancient language and competence in a research technique. Language proficiency will be demonstrated through 400/500 level work in the languages concerned, as instructed by CAMS faculty.

Students will be expected to acquire and demonstrate reading proficiency in those modern foreign languages (e.g., but not exclusively, French, German, Italian) appropriate to their research interests, as identified in consultation with their CAMS graduate supervisory committee.

Dissertation

A dissertation on a CAMS topic is required of students in this dual-title degree program. The CAMS topic of the dissertation will be approved by the student's committee.

Student Aid

Graduate assistantships are available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry numbers from 500-599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate language requirements when taken by graduate students. Courses below the 400 level do not qualify. A graduate student may register for or audit these lower-level courses in order to make up deficiencies, but not to meet requirements for an advanced (graduate) degree.

College Student Affairs (CSA)

ROBERT D. REASON, *in charge*
400 Rackley Building
814-863-2690
814-865-0543
psu-csa@psu.edu

Degree Conferred:

M.Ed.

The Graduate Faculty

- Kimberly A. Griffin, Ph.D. (California, Los Angeles) Assistant Professor of Education, College Student Affairs, and Higher Education
- Robert Hendrickson, Ed.D. (Indiana) Professor of Education
- Jennifer L. Crissman Ishler, D.Ed. (Penn State) Assistant Professor of Counselor Education
- Dorothy Evensen, Ph.D. (NYU) Associate Professor of Education
- Lisa Lattuca, Ph.D. (Michigan) Associate Professor of Education
- Margaret A. Lorah, D.Ed. (Penn State) Affiliate Assistant Professor of Counselor Education
- Spencer G. Niles, D.Ed. (Penn State) Professor of Counselor Education
- Susan R. Rankin, Ph.D. (Penn State) Associate Professor of College Student Affairs and Higher Education
- Robert D. Reason, Ph.D. (Iowa State) Associate Professor of Education
- Eric White, Ed.D. (Pennsylvania) Affiliate Assistant Professor of Education

The College Student Affairs program provides graduate instruction for students preparing to enter the student affairs profession on college and university campuses. Students will choose one of the two curricular options: Administration and Leadership or College Counseling. Course work for both areas includes foundational studies as well as professional studies in the areas of student development theory, student characteristics and effects of college on students, individual and group interventions, organization and administration of student affairs, and assessment, evaluation, and research. Both emphasis areas provide intentional opportunities for students to enhance their professional skills through internships in student affairs administrative and/or college counseling offices.

Admission Requirements

Graduate Record Examinations (GRE) combined verbal and quantitative scores or Miller Analogies Test (MAT) score are required, as are TOEFL scores, if applicable. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

An applicant must have received, from a regionally accredited institution, a baccalaureate degree earned under residence and credit conditions substantially equivalent to those required by Penn State. The individual's junior-senior grade-point average must be at least 3.0 on a 4.0 system. The individual's overall grade-point average must be at least 2.75 on a 4.0 system. Individuals who do not meet this requirement may request special consideration by submitting a letter indicating why they feel they deserve consideration.

If an individual has completed graduate course work prior to application, his or her grade-point average for this course work must be a 3.0 on a 4.0 system.

Three recommendation letters and a personal statement are also required as part of the application process.

Degree Requirements

The College Student Affairs degree, with an option in College Counseling, requires 48 credits. The Administration and Leadership option requires 42 credits. Both options require two 150-hour internships and the completion of a master's paper.

Joint Degree Program between The Pennsylvania State University Dickinson School of Law (J.D.) and the College Student Affairs Program (M.Ed.)

Joint Degree Program: The Dickinson School of Law (DSL) and the College Student Affairs Program (CSA) are offering a joint degree program leading to a Juris Doctor (J.D.), and Master of Education (M.Ed.). in College Student Affairs.

Admission Requirements

The number of openings in the joint degree J.D./M.Ed. program will be limited to students with an outstanding academic record who have successfully completed two semesters at the Dickinson School of Law.

Applicants to the joint degree program:

1. must have been admitted to the Dickinson School of Law
2. should have successfully completed two semesters of course work at the Dickinson School of Law with a grade-point average of 3.0
3. must submit two letters of recommendation from the Dickinson School of Law faculty
4. must submit a career statement

Note: Students are eligible to start taking courses in the CSA program after successfully completing two semesters of law school work.

College-Specific Admission Requirements

DSL: A bachelor's or equivalent degree from an accredited college is a prerequisite for admission; however, there is no standard prescribed undergraduate curriculum. An applicant should have acquired significant oral and written communication skills before entering law school. The following are required of applicants: a completed application form for DSL; submission of the results of the law school admission test (LSAT); completion of an LSDAS report; a one-page personal statement; employment records since high school; and two letters of recommendation.

CSA: The following are required of all applicants: a completed Graduate School application; submission of the results of the Graduate Record Examination (GRE), Miller Analogies Test (MAT), or LSAT; an official undergraduate transcript or transcripts; a personal statement; employment records since high school; and three letters of recommendation.

All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the Test of English as a Second Language (TOEFL) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test or a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the new speaking portion; or the International English Language Testing System (IELTS) with a minimum composite score of 6.5 is required for admission.

An applicant must have received from a regionally accredited institution, a baccalaureate degree earned under residence and credit conditions substantially equivalent to those required by Penn State. The individual's junior-senior grade-point-average (GPA) must be at least 3.0 on a 4.0 system. The individual's overall GPA must be at least 2.75 on a 4.0 system. Individuals who do not meet this requirement may request special consideration by submitting a letter indicating why the feel they deserve consideration.

If an individual has completed graduate course work prior to applying to the CSA program, his or her grade-point-average for this course work must be at least a 3.0 on a 4.0 system.

Residency: Students will normally spend four semesters in residence at DSL and as many additional semesters in residence as needed to complete the M.Ed. requirements for the CSA degree.

Liaisons: The department and faculty liaisons for DSL shall be the Associate Dean for Academic Affairs and the student advisor shall be the Associate Dean for Academic Affairs or such other faculty member(s) as may be designated by the Dean. The liaison for CSA shall be the Professor-in-Charge (PIC) or such faculty member(s) as may be designated by the PIC.

PRESCRIBED COURSES

DSL: All students in the J.D. program are required to take the first-year curriculum in DSL. In the second or third year, students must take CORE 934 (Professional Responsibility).

The fall curriculum for the first year consists of the following courses:

CORE COURSES (CORE)

- 900. Civil Procedure (4)
- 910. Criminal Law (3)
- 912. Legal Analysis, Research & Writing I (3)
- 925. Torts (4)

The spring curriculum of the first year consists of the following courses:

One 3-credit Elective

CORE COURSES (CORE)

- 903. Constitutional Law I (3)
- 905. Contracts (4)
- 914. Legal Analysis, Research & Writing II (3)
- 920. Property (4)

CSA: *All students in the CSA program must take the following courses:*

COLLEGE STUDENT AFFAIRS (CSA)

- 501. Introduction to Student Affairs (3)
- 502. Organization and Administration in Student Affairs (3)
- 503. Student Development in College Environments (3)
- 504. Research and Assessment in Student Affairs (3)
- 505. Capstone Seminar (2)
- 506. Campus Environments
- 507. Social Justice
- 595. Internship (student must take two 3-credit internships) (1-9)
- 596. Culminating Experience, Learning Portfolio (1-9)

COUNSELOR EDUCATION (CN ED)

- 501. Counseling Theory and Methods (3)
- 506. Helping Skills for CSA Professions (3)

HIGHER EDUCATION (HI ED)

- 545. Higher Education in the U.S. (3)
- 556. Higher Education Students (3)

Two 3-credit Electives

INTERPROGRAM TRANSFER OF CREDITS

DSL: A maximum of twelve credits of CSA course work may be transferred for credit toward the J.D. degree at DSL. Students must obtain a grade satisfactory to DSL for the course work to be credited toward the J.D. degree. The following courses offered by CSA may qualify for credit in DSL: (1) CSA 501 (Introduction to College Student Affairs); (2) CSA 502 (Organization and Administration in College Affairs); (3) CSA 503 (Student Development in College Environments); and (4) CSA 504 (Research and Assessment in Student Affairs).

CSA: What courses may be credited will be determined by the student's degree program. Normally a maximum of nine credits of DSL course work will be counted for credit for the minimum requirements for a master's degree, subject to approval by the Professor-in-Charge.

Sequence: The sequence of courses will be determined by the students and their advisors.

Recommended Program of Study and Advising: All students in the program will have two advisors, one from DSL and one from CSA. Periodic interaction between the two advisors will be encouraged. A program of study will be developed for each student, taking into account the fact that some courses are offered on a rotating or intermittent basis. Many courses are offered every year but some are offered every two or three years. Advisors will have available a list of projected relevant courses or educational experiences in order to work with the student on an individualized program of study. The standard committee structure will apply to the CSA programs.

Tuition: Students will be charged the applicable DSL tuition to cover the J.D. program and the applicable graduate tuition to cover the CSA degree program. DSL tuition will be paid for the semesters in which the student is registered for DSL courses, and graduate tuition will be paid for the semesters in which the student is registered for graduate courses. A student may take up to one course (3 credit hours) per semester in the program where the student is not primarily registered without any change in tuition, but must pay additional tuition to the program that the student is not primarily registered if he or she wishes to take additional course work pursuant to that program during the semester.

Financial Aid and Assistantships: Decisions on financial aid and assistantships will be made by each school according to that school's procedures.

Fulfillment of Degree Requirements and Graduation: All courses in one program that will count toward meeting the requirements of the other program must be completed before the awarding of either degree. Students will be required to fulfill all requirements for each degree in order to be awarded that degree, subject to the interprogram transfer of credits. With respect to CSA program requirements for a learning portfolio, work done while at DSL under the supervision of a DSL faculty member may be appropriate for incorporation into the learning portfolio with the approval of the CSA degree program committee (in such cases, the committee should consider whether the credits afforded such work will be subject to the twelve credit maximum for interprogram transfers). A DSL faculty member must be a member of the committee).

If for some reason the student cannot complete the requirements of the J.D. degree, the student will still be allowed to count DSL courses already taken toward the M.Ed. in CSA, even if he or she is no longer in the joint degree program.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.A.

The Graduate Faculty

- Deborah F. Atwater, Ph.D. (SUNY, Buffalo) Associate Professor Emerita of Communication Arts and Sciences, and African and African American Studies
- Thomas W. Benson, Ph.D. (Cornell) Edwin Erle Sparks Professor of Rhetoric
- Stephen H. Browne, Ph.D. (Wisconsin) Professor of Communication Arts and Sciences
- J. Louis Campbell III, Ph.D. (Minnesota) Associate Professor of Speech Communication
- James P. Dillard, Ph.D. (Michigan State) Professor of Communication Arts and Sciences
- Rosa Eberly, Ph.D. (Penn State) Associate Professor of Communication Arts and Sciences, and English
- Jeremy Engels, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of Communication Arts and Sciences
- Dennis S. Gouran, Ph.D. (Iowa) Professor of Communication Arts and Sciences, and Labor Studies and Industrial Relations
- Michael L. Hecht, Ph.D. (Illinois) Professor of Communication Arts and Sciences, and Crime, Law, and Justice
- J. Michael Hogan, Ph.D. (Wisconsin) Professor of Communication Arts and Sciences
- Lisa S. Hogan, Ph.D. (Indiana) Lecturer in Communication Arts and Sciences, and Women's Studies
- Christopher L. Johnstone, Ph.D. (Wisconsin) Associate Professor of Communication Arts and Sciences
- Tony M. Lentz, Ph.D. (Michigan) Assistant Professor of Communication Arts and Sciences
- Wayne J. McMullen, Ph.D. (Penn State) Associate Professor of Communication Arts and Sciences
- Michelle Miller-Day, Ph.D. (Arizona State) Associate Professor of Communication Arts and Sciences
- Mary K. Mino, Ph.D. (Penn State) Associate Professor of Communication Arts and Sciences
- Jon F. Nussbaum, Ph.D. (Purdue) Professor of Communication Arts and Sciences
- Mary Beth Oliver, Ph.D. (Wisconsin) Professor of Communications, and Communication Arts and Sciences
- Roxanne L. Parrott, Ph.D. (Arizona) Professor of Communication Arts and Sciences
- Rachel A. Smith, Ph.D. (Michigan State) Assistant Professor of Communication Arts and Sciences
- Denise Solomon, Ph.D. (Northwestern) Professor of Communication Arts and Sciences
- Judith L. Stephens, Ph.D. (Kent State) Professor of Humanities and Theatre
- S. Shyam Sundar, Ph.D. (Stanford) Distinguished Professor of Communications, and Communication Arts and Sciences
- Jane Sutton, Ph.D. (Colorado) Associate Professor of Communication Arts and Sciences
- Molly Wertheimer, Ph.D. (Penn State) Professor of Communication Arts and Sciences
- Nancy J. Wyatt, Ph.D. (Penn State) Associate Professor Emerita of Communication Arts and Sciences, and Women's Studies

Students may specialize in communication theory (communication sciences) or rhetoric (communication arts).

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

The minimum undergraduate preparation is 12 credits in communication studies/speech communication. Students who cannot meet this requirement in full may be admitted but must make up their deficiencies without credit toward the graduate degree.

Additionally, students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. A student must have completed the master's degree before being admitted as a doctoral candidate.

Master's Degree Requirements

Students pursuing the M.A. degree in Communication Arts and Sciences must schedule a review of their program of courses during the first year of residence and receive approval by a duly constituted advisory committee.

A total of 30 credits, including 6 for the master's thesis and at least 12 other 500-level credits, is required. Candidates must schedule a proposal meeting in which their research plan for their thesis is approved by their committee. They are also required to present an oral defense before their committee.

Although typically discouraged, students in unique circumstances may apply to complete a nonthesis track. Students must apply in advance for acceptance in the nonthesis track and additional course credits will be required, among other differences from the thesis track.

Doctoral Degree Requirements

The communication and foreign language requirement for the Ph.D. degree may be satisfied by options selected from designated areas including, but not restricted to, foreign languages. Doctoral candidates must schedule a candidacy evaluation during their first year. Following completion of the language requirement and all courses from the program of study, doctoral candidates must take a comprehensive examination to determine their mastery and competence in the discipline of communication. After successful completion of the written and oral component of the comprehensive exam, doctoral candidates must schedule a proposal meeting at which the research plan for their dissertation is approved by their committee. Doctoral candidates must present a final oral defense of their dissertation before their committee.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following awards typically have been available to graduate students in this program:

EDWIN ERLE SPARKS FELLOWSHIPS IN THE HUMANITIES (8)
Available to beginning and continuing graduate students in one of the following graduate programs: Communication Arts and Sciences, Comparative Literature, English, French, German, History, Linguistics, Philosophy, and Spanish; stipend $15, 340 plus waiver of tuition. Apply to department before February 1.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

COMMUNICATION ARTS AND SCIENCES (CAS) course list

Communication Sciences and Disorders (CSD)

Program Home Page (Opens New Window)

GORDON W. BLOOD, *Head of the Department of Communication Sciences and Disorders*
308 Ford Building
814-865-3177
cyw2@psu.edu

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- Gordon W. Blood, Ph.D. (Bowling Green) *Professor of Communication Sciences and Disorders*
- Ingrid M. Blood, Ph.D. (Bowling Green) *Professor of Communication Sciences and Disorders*
- Kathryn D. R. Drager, Ph.D. (Minnesota) *Associate Professor of Communication Sciences and Disorders*
- Janice C. Light, Ph.D. (Toronto) *Distinguished Professor of Communication Sciences and Disorders*
- Elina Mainela-Arnold, Ph.D. (Wisconsin) *Assistant Professor of Communication Sciences and Disorders*
- Carol Miller, Ph.D. (Pennsylvania) *Associate Professor of Communication Sciences and Disorders*
- Maya Misra, Ph.D. (Tufts) *Assistant Professor of Communication Sciences and Disorders*
- Robert A. Prosek, Ph.D. (Purdue) *Professor of Communication Sciences and Disorders*
- Krista Wilkinson, Ph.D. (Georgia State) *Professor of Communication Sciences and Disorders*

The goals of the program in Communication Sciences and Disorders are to train professionals to conduct research and be consumers of research in communication sciences and disorders and to prepare competent professionals to habilitate and rehabilitate individuals who have speech, language, and/or hearing problems. The program also serves to provide students in other curricula at Penn State with orientation toward and information about communication sciences and disorders.

Facilities for student training and research include in-house clinical therapy and diagnostic services, laboratories in speech science and audiology, and affiliated schools and clinics. The program enjoys academic, research, and clinical relationships with a number of related programs at Penn State and draws upon academic work from related areas as part of the graduate training in communication sciences and disorders. Preparation is given for school and professional certifications and licensure. The CSD academic program is accredited by the Council of Academic Affairs of the American Speech-Language-Hearing Association. Master's-level graduate study requires a full-time externship experience, ordinarily occurring during the final semester of study.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Approximately 35 credits are required for admission, distributed among speech pathology, audiology, speech science, education, and psychology, and including a course in statistics. Students entering without an undergraduate degree in CSD will be required to take additional make-up work.

Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Usually students earn a master's degree in communication sciences and disorders prior to being considered for doctoral study, although persons with master's degrees in other fields will be considered for a doctoral program.

Master's Degree Requirements

The master's degrees require a minimum of 50 graduate credits beyond admission standards. Students usually earn 55 to 65 credits to complete a degree, over four semesters and a summer of study.

There is a nonthesis option for the Master of Science degree, requiring a paper and additional course credits in lieu of a thesis. The master's program of study provides course work and practicum for advanced and/or professional-level licensure.

Doctoral Degree Requirements

The Doctor of Philosophy degree normally requires a master's degree in communication sciences and disorders or a related field, plus a minimum of two years of advanced study, and presentation and oral defense of a research-based dissertation.

The communication and foreign language requirement is a minimum of 6 credits of statistics beyond the first course, plus 9 credits selected from among statistics, technical writing, computer science, research design, or a foreign language.

Two research exercises, one of which is used for doctoral candidacy evaluation early in the doctoral program, are required prior to the dissertation. Comprehensive written examinations in the areas of a student's interest and an optional minor field examination, plus an oral examination prior to dissertation, are required.

Details of a student's doctoral program are determined by the doctoral committee.

Student Aid

Student Aid Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499

may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Community and Economic Development (CEDEV)

Program Home Page

STEPHEN M. SMITH , *Head of the Department of Agricultural Economics and Rural Sociology*
103 Armsby Building
814-865-5461; cedevinfo@psu.edu

Degree Conferred:

M.S., M.P.S.

The Graduate Faculty

- David G. Abler, Ph.D. (Chicago) Professor of Agricultural, Environmental, and Regional Economics, and Demography
- Theodore R. Alter, Ph.D. (Michigan State) Professor of Agricultural, Environmental, and Regional Economics
- John C. Becker, J.D. (Dickinson) Professor of Agricultural Economics and Law
- David Blandford, Ph.D. (Manchester) Professor of Agricultural Economics
- Jill L. Findeis, Ph.D. (Washington State) Professor of Agricultural Economics
- Stephan J. Goetz, Ph.D. (Michigan State) Professor of Agricultural and Regional Economics
- Drew W. Hyman, Ph.D. (California) Professor Emeritus of Public Policy and Community Systems
- Francis X. Higdon, Ph.D. (Pittsburgh) Senior Lecturer in Community Development
- Leif I. Jensen, Ph.D. (Wisconsin) Professor of Rural Sociology, Demography, and Sociology
- Timothy W. Kelsey, Ph.D. (Michigan) Professor of Agricultural Economics
- Janelle B. Larson, Ph.D. (Oxford) Associate Professor of Agricultural Economics
- Stanford M. Lembeck, Ph.D. (Penn State) Professor Emeritus of Rural Sociology
- A. E. Luloff, Ph.D. (Penn State) Professor of Rural Sociology
- Diane K. McLaughlin, Ph.D. (Penn State) Associate Professor of Rural Sociology
- Carolyn Sachs, Ph.D. (Kentucky) Professor of Rural Sociology
- Martin Shields, Ph.D. (Wisconsin) Associate Professor of Agricultural and Regional Economics
- James Shortle, Ph.D. (Iowa State) Professor of Agricultural and Environmental Economics
- Stephen M. Smith, Ph.D. (Wisconsin) Professor of Agricultural and Regional Economics
- C. Shannon Stokes, Ph.D. (Kentucky) Professor of Rural Sociology
- Joan S. Thomson, Ph.D. (Wisconsin) Professor of Agricultural Communications
- James E. Van Horn, Ph.D. (Ohio State) Professor of Rural Sociology
- Rex H. Warland, Ph.D. (Iowa State) Professor Emeritus of Rural Sociology
- Fern K. Willits, Ph.D. (Penn State) Professor of Rural Sociology

The graduate program in Community and Economic Development helps students prepare to confront the multidimensional challenges faced by community development practitioners. The program's main objective is educating professionals who will assume leadership roles in helping establish and maintain viable communities. Graduates become deeply involved in assisting localities with a variety of issues, including: developing new organizations and new industries, growth management, protecting the environment, revitalizing downtown areas, enhancing the local quality of life, assisting educational, social, health and human service systems, and developing vital infrastructure in short, helping communities shape their own futures.

Students in Community and Economic Development gain a broad understanding of the dynamics of communities and their social, economic, and political systems. The program emphasizes teaching the theory, skills, and tools that allow practitioners to address the important issues in development practice.

Learning is through a combination of formal classes, case studies, field experiences, field projects, and professional internships. The program is multidisciplinary, with students taking courses not only in the Community and Economic Development program, but also in such subjects as rural sociology, sociology, agricultural economics, economics, computer science, political science, public administration, real estate, geography, demography, landscape architecture, and environmental resource management.

Graduates of the Community and Economic Development program have a wide range of career opportunities, including: local and state government, planning commissions, major corporations, non-governmental organizations, and consulting firms. While the degree emphasizes practical experience, the program is flexible enough to provide students the requisite skills that will enable them to commence and make rapid progress toward advanced degrees in areas such as law, public administration, agricultural economics, rural sociology, and urban and regional planning.

Admission Requirements

Students with a 3.00 average (on a 4.00 scale) for the most recent two years of college/university education, or with an advanced degree, and with appropriate course and experiential backgrounds will be considered for admission. Applicants must submit a letter of professional introduction in which they describe their professional experiences and education, delineate their career goals, and discuss how the MS program will enable them to meet their objectives. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, experience, abilities, and interests.

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Prerequisites for the master's program include 12 credits in rural sociology, sociology, agricultural economics, or other social and behavioral sciences at the discretion of the graduate program. If the entering student does not have these prerequisites, they must be made up at the University during the early part of the master's program.

Degree Requirements

All students are required to complete a core program of community and economic development courses, statistics and research methods.

Students may also be required to complete a project, internship, or thesis. (1) The CEDEV core consists of CEDEV 500, R SOC 452, AG EC 430, CEDEV 509, and R SOC 505/R SOC597 for the M.S. (2) The statistics, methods, and techniques requirement includes at least AG 400, CEDEV 575, and CEDEV 576. There is no foreign language requirement for the degree; the student is expected to complete such statistics and research courses and instruction necessary to generate superior capabilities of inquiry into and analysis of applied community and economic development issues. The M.S. requires at least 35 credits, including a final project, internship, or thesis. Students wishing to prepare for the Ph.D. in agricultural economics or rural sociology are encouraged to include advanced economics or rural sociology courses identified by the program and to choose the thesis option. Students planning to work in multicultural or international settings are encouraged to gain competency in the appropriate language(s). Some classes are offered via the Internet, although a reading requirement must be met for the M.S.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Master of Professional Studies in Community and Economic Development (MPS CEDEV)

The Master of Professional Studies in Community and Economic Development (MPS CEDEV) is a 30-credit terminal master's degree program that emphasizes an interdisciplinary approach to community and economic development. The program balances theory and practice. Courses taught in MPS CEDEV use a blend of Web technology, print, and other media to provide an effective balance of flexibility and interaction. Individuals who currently work with, or are interested in working with communities, community organizations and stakeholders, or on a range of community and economic development issues at the state or national levels would benefit from this program. The MPS CEDEV program requires the completion of seven core courses (21 credits) in which students learn and apply sociological and economic concepts to issues in community and economic development. The courses offer examples and opportunities to apply these concepts to real issues facing communities and rural regions. Two of the core courses (6 credits) emphasize statistical methods and tools and techniques useful to practitioners in community and economic development. Students then can take from 3 to 6 credits of elective coursework to focus on their particular interests within community and economic development, or to work toward additional certifications. All students are required to complete a project, paper or internship (3 to 6 credits) that integrates theory and practice.

Instruction in the MPS CEDEV program emphasizes key themes that include economic planning and development; municipal finance, land use and population change; community structure, organization and process; leadership; tools and techniques in community development; community decision-making and capacity building. Students also may complete 12 credits in the core and a professional paper and earn a Post-baccalaureate Certificate in Community and Economic Development.

Degree Requirements

The professional Master's degree requires 30 credits including a final integrative assessment/experience. All students complete the required MPS CEDEV core program of community and economic development courses, statistics, and methods. The MPS CEDEV courses consist of CEDEV 430, CEDEV 452, CEDEV 500, CEDEV 505, and CEDEV 509. The statistics, methods, and techniques requirement includes STAT 500 (or the equivalent) and CEDEV 575. CEDEV 576 is an optional summer institute focusing on applications and practices for community and economic development. An integrative paper, project, or internship is required where the student demonstrates the capability to integrate and apply concepts, principles, analytical techniques and interpretation skills learned in the program to a real problem faced by a community or community organization. Choice of electives will be based on a plan of study worked out between the student and faculty adviser. There is no foreign language requirement for the degree, however, students planning to work in multi-cultural or international settings are encouraged to gain competency in an appropriate language(s). A total of 18 credits must be 500 level or higher, with at least 6 credits of 500-level course work. This Graduate School requirement is met through the required courses and the project, internship or paper credits.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Master of Arts in Community Psychology and Social Change

The Graduate Faculty

- Holly Angelique, Ph.D. (Michigan State) *Associate Professor of Community Psychology*
- Ken Cunningham, Ph.D. (CUNY) *Assistant Professor of Sociology*
- Clemmie E. Gilpin, Ph.D. (Penn State) *Assistant Professor of Community Systems and Afro-American Studies*
- Kamini Maraj Grahame, Ph.D. (Toronto) *Assistant Professor of Community Psychology and Social Change*
- Ken Kyle, Ph.D. (Arizona State) *Associate Professor of Sociology*
- Senel Poyrazli, Ph.D. (Houston) *Assistant Professor of Counseling Psychology*

The graduate program in Community Psychology leads to a master of arts degree in Community Psychology and Social Change with concentration in Children, Youth, and Family; Environmental Issues; and Individualized Studies. The nontraditional program emphasizes planned social change, and is based on both sociology and psychology. The program equips students with skills useful in coping with the multifaceted problems facing communities. Students learn (a) to assess problems at the level of communities or organizations, (b) to plan and implement possible solutions to these problems, and (c) to evaluate the effectiveness of the solutions. Learning takes place both in courses and in a master's project that entails fieldwork and the writing of a master's paper.

To act as a change agent, the student must be aware of contemporary community needs, along with the impact of the community structure upon its individual members and the techniques best suited to initiate productive changes. After completing this interdisciplinary program, the graduate should be able to approach problems with a more integrated point of view and work cooperatively with community individuals and agencies toward practical solutions. Problems related to crime, education, child and family development, employment, the lack of effective social power, and other factors affecting psychological well being are approached from bases in community service agencies or informal community groups. The majority of students work full-time in agencies or governmental units. To accommodate these working students, 500-level graduate courses are scheduled in the evening.

Admission Requirements

Requirements listed below are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

For admission to the program, a student must have a baccalaureate degree from an accredited academic institution, earned under residence and credit conditions equivalent to those required by Penn State. The minimum grade-point average (GPA) in the junior and senior years must be 3.00 or higher (on a 4.00 scale). Students with experience in carrying out planned social change are particularly encouraged to apply. Most applicants hold degrees in psychology, sociology, or related disciplines. Ideally, applicants will have taken courses in developmental, personality, and social psychology, along with work in social change, social problems, and social conflict. Students from diverse other backgrounds are welcome to apply, particularly if they have had work or other experience effecting change in community settings. Applicants will be asked to take additional course work without graduate credit, chosen after consultation with an adviser, if they have had no psychology or sociology courses beyond the introductory level. Applicants must have received a C or better in an introductory statistics course covering parametric and non-parametric inferential statistics; they will be requested to make up any deficiency without graduate credit.

Off-campus and transfer credits from accredited institutions will be evaluated by the Program Coordinator for recentness and appropriateness to the student's course of study. Approval for up to 10 transfer credits may be given. Documented applications for credit for work experience will be evaluated by students' masters committees, made up of members of the graduate faculty. Approval for up to 6 credits may be given. If granted, approval for this credit can take the place of the fieldwork usually undertaken in CMPSY 522, Practicum. The student must register for the number of credits approved, either in CMPSY 522, or, if the student prefers, after having asked for a waiver of the CMPSY 522 requirement, in additional elective course work, chosen with help from an adviser.

Courses in the program are sequenced on the assumption that students will be entering in the fall semester. Students may apply for admission for the spring (but not the summer) semester, but they may not start taking 500-level required courses until the following fall.

Admission to the Community Psychology program is based on clear suitability for the program as evidenced by the application as a whole; it is limited to the number of spaces available for masters project supervision.

Applicants must submit the following:

1. A completed application form and application fee.
2. Two copies of official transcripts from colleges or universities previously attended (including Penn State)
3. Admission Essay: We are interested in learning something about your writing and analytical abilities, and about you as a person. Please take two to six double-spaced pages to answer the following question.

   C. Wright Mills wrote: "The sociological imagination enables its possessor to understand the larger historical scene in terms of its meaning for the inner life and the external career of a variety of individuals....The sociological imagination enables us to grasp history and biography and the relations between the two within society. That is its task and its promise. To recognize this task and this promise is the mark of the classic social analyst ... ."

   Discuss the intersection of your biography with history and society. How have the society and the times in which you live

helped to shape who you are? What do you hope to accomplish in life? How do you think our graduate program will help you to reach your goals?

- A letter of about 500 words outlining significant community or work experience, along with career and academic objectives.
- Three professional letters of recommendation, special forms provided. Please include at least two essays from academic sources.

Program Requirements

An important part of this degree is a master's project, made up a total of 9 credits, comprising from 3 to 6 credits of Practicum (CMPSY 522), and from 3 to 6 credits of Research (CMPSY 594). The project is planned in the context of the course Roles and Methods in Community Psychology (CMPSY 521); it is supervised by a master's committee of graduate faculty. The particular mix of practicum and research is worked out by the student in consultation with the faculty. The variable mix of practicum and of research credits results in the student's being able to choose course work that emphasizes study in the area in which she or he needs most skill-development. In the usual case, a student with a strong background in fieldwork would be asked to emphasize research in her or his master's project, and a student with a strong research background, but with limited fieldwork, would be asked to emphasize the practicum. The output of CMPSY 522 is a practicum; the output of the research course CMPSY 594 is a required master's paper of at least 3 credits. The master's paper may be based on the field experience. Students often choose to structure their master's paper around a specific community research problem. Again, students can apply for Practicum (522) credit, or, at their choice, ask for a waiver of the requirement, on the basis of documented prior experience. Decisions about such applications are made by the student's master's committee.

Part-time students who are able to take two courses at a time can complete the degree in seven to eight semesters. Since the processes of designing a master's project and of writing a master's paper are labor-intensive and frequently take more time than the student expects, even full-time students will often take six or more semesters to complete the degree.

The program offers three concentrations, each including all the required Community Psychology courses. The Children, Youth, and Families Concentration uses as its electives 9 approved credits from courses in psychology, education, and sociology. The Environmental Issues Concentration uses electives approved by an adviser and drawn from special courses in environmental issues and from various other programs. The Individualized Concentration uses as its elective courses chosen to meet individual needs, with the approval of an adviser.

Graduation Requirements

To qualify for the degree, 36 credits are needed, 24 of which must be at the 500 level. There is a sequence of substantive courses, starting with Theories and Issues in Community Psychology (CMPSY 500).

Required Courses (27 credits)

COMMUNITY PSYCHOLOGY (CMPSY)

- 500. Theories and Issues in Community Psychology (3)
- 510. Change Processes (3)
- 511. Social Impacts on Psychological Functioning (3)
- 519. Research Methods I (3)
- 520. Research Methods II (3)
- 521. Roles and Methods in Community Psychology (3)
- 522. Practicum (3-6)
- 594. Master's Paper (3-6)

Elective Courses (9 credits)

Concentrations

In addition to the core curriculum, students will complete the requirements of one of the three concentrations described below:

Children, Youth, and Families Concentration

Students working toward a Master of Arts degree in Community Psychology and Social Change with this concentration must complete three of the following courses. Students should check for prerequisites when deciding on which courses to take.

EDUCATION (EDUC)

- 404. Young Children's Behavior: Observation and Evaluation (3)
- 410. The Child and Social Institution. (3)

PSYCHOLOGY (PSYC)

- 405. DEVELOPMENTAL PSYCHOLOGY (3)

SOCIOLOGY (SOCIO)

- 462. Perspectives on Aging (3)
- 463. The Family (3)

Environmental Issues Concentration

Students working toward a Master of Arts degree in Community Psychology and Social Change with this concentration must complete three of the following courses. Students should check for prerequisites when deciding on which courses to take.

CIVIL ENGINEERING (C E)

- 471. Environmental Sanitation (3)
- 497. The Human Environment (1-9)

ENVIRONMENTAL ENGINEERING (ENVE)

- 487. Environmental Law (3)

PUBLIC ADMINISTRATION (P ADM)

- 531. Environmental Policy (3)

SOCIOLOGY (SOCIO)

- 470. Environmental Sociology (3)
- 471. Environmental Movements (3)
- 472. Justice and the Environment (3)

Individual Concentration

Students choose electives from a wide variety of courses offered by the Behavioral Science and other faculties. The object is to support a special interest or mix of interests, in, for instance, environmental issues, adult education, criminal justice, urban sociology, women's studies, or issues of class-ism, racism, or sexism. Students work with faculty advisers in gaining approval of electives and in choosing topics for master's projects.

Student Aid

A number of scholarships, fellowships, and graduate assistantships are available. Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Comparative and International Education (CI ED)

Program Home Page (Opens New Window)

LADISLAUS SEMALI, Program Contact; Associate Professor of Education
314 Keller Building
814-865-2246

Degrees Conferred:

Students earn a dual-title degree in this option through participating programs at either the Ph.D. (or D.Ed.) or the M.A., M.S., M.Ed. level. Students receive a degree which lists their major program and Comparative and International Education.

The following graduate programs offer dual degrees in Comparative and International Education: Adult Education, Agricultural and Extension Education, Curriculum and Instruction, Counselor Education, Counseling Psychology, College Student Affairs, Educational Leadership, Educational Psychology, Educational Theory and Policy, Entomology, Human Development and Family Studies, Higher Education, Instructional Systems, School Psychology, Special Education, and Workforce Educationi and Development.

The Graduate Faculty

- Clemente Abrokwaa, Ph.D. (Alberta) Assistant Professor of African and African American Studies
- David P. Baker, Ph.D. (Johns Hopkins) Professor of Education and Sociology
- Katerina Bodovski, Ph.D. (Penn State) Assistant Professor of Education
- Thomas Bruening, Ph.D. (Iowa) Associate Professor of Agricultural and Extension Education
- Liza Conyers, Ph.D. (Wisconsin, Madison) Associate Professor of Education
- Constance Flanagan, Ph.D. (Michigan) Professor of Agricultural and Extension Education
- Roger L. Geiger, Ph.D. (Michigan) Distinguished Professor of Education
- Dennis Jett, Ph.D. (Witwaterrand, Johannesburg, South Africa) Professor of International Affairs
- Matt Kaplan, Ph.D. (CUNY) Associate Professor of Agricultural and Extension Education
- Gerald LeTendre, Ph.D. (Stanford) Professor of Education
- Beverly Lindsay, Ph.D. (American) Professor of Education
- Sinfree Makoni, Ph.D. (Edinburgh, Scotland) Associate Professor of Applied Linguistics, and African and African American Studies
- Michael G. Moore, Ph.D. (Wisconsin, Madison) Professor of Education
- Kyle L. Peck, Ph.D. (Colorado, Boulder) Professor of Education
- Suet-ling Pong, Ph.D. (Chicago) Professor of Education and Demography
- David Post, Ph.D. (Chicago) Professor of Education
- Madhu Suri Prakash, Ph.D. (Syracuse) Professor of Education
- Esther Prins, Ph.D. (Cornell) Assistant Professor of Education
- Edwin Rajotte, Ph.D. (Rutgers) Professor of Entomology
- Kai Schafft, Ph.D. (Cornell) Assistant Professor of Education
- Ladislaus M. Semali, Ph.D. (California, Los Angeles) Associate Professor of Education

The Comparative and International Education dual-title degree program option is administered by the Committee on Comparative and International Education. The committee maintains program definition, identifies courses appropriate to the option, develops and administers the program's comprehensive examination, and recommends policy and procedures for the program's operation to the dean of the College of Education and to the dean of the Graduate School. Members of the committee also chair or co-chair the dissertation committees for students electing the dual-title doctoral degree.

The dual-title degree program is offered through participating programs in the College of Education and, where appropriate, other graduate programs in the University. The option enables students from several graduate programs to gain the perspectives, techniques, and methodologies of comparative and international education, while maintaining a close association with program areas of application. Comparative and international education is a field devoted to the systematic analysis of the operation and effects of the world's education systems. For admission to pursue a dual-title degree under this program, a student must apply to (1) the Graduate School; (2) one of the participating graduate major programs; and (3) the Committee on Comparative and International Education.

Admission Requirements

Program candidates will be required to take the Graduate Record Examination, to provide a writing sample, and, where appropriate, a satisfactory TOEFL score, and to submit a written personal statement indicating the career goals they hope to serve by attaining a Comparative and International Education degree.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the graduate major programs in which they are enrolled, in addition to the minimum requirements of the Comparative and International Education program.

For the M.A., M.S., or M.Ed. dual-title degree in Comparative and International Education, the minimum course requirements are: 3 credits in the required Proseminar in Comparative and International Education; 6 credits in advanced Comparative and International Education courses; and 3 credits in Comparative and International Education content courses. Candidates for the dual-title master's degree in Comparative and International Education will also be required to pass a written comprehensive examination based on a set of core readings established by the committee.

A master's thesis or master's paper is required, depending upon the student's graduate major program, the supervisor of which must be a member of the graduate faculty recommended by the chair of the program granting the degree and approved by the Committee on Comparative and International Education as qualified to supervise work in Comparative and International Education.

The minimum course requirements for the Ph.D. (or D.Ed.) dual-title degree in Comparative and International Education are: 3 credits in the Proseminar in Comparative and International Education; 6 credits in advanced-Comparative and International Education courses; 12 credits in Comparative and International Education content courses or courses with comparative or international content; and 6 credits in research methods. Students are expected to be fluent in reading, writing, and speaking English, and must demonstrate competency in reading a language other than English, preferably a language relevant to a country or geographic area they propose to study. (This foreign

language requirement can be satisfied by passing the appropriate ETS Language Achievement Test, or by passing the appropriate Penn State foreign language course.) A minimum of 18 credits must be 500-level course, and particular courses may satisfy both the graduate major program requirements and those in the Comparative and International Education program. Candidates for the dual-title doctoral degree in Comparative and International Education will also be required to pass a written comprehensive examination based on a set of core readings established by the committee.

A Ph.D. (or D.Ed.) minor program in Comparative and International Education is available to doctoral students who find it desirable to include the perspectives and methodologies of Comparative and International Education in their programs and have been approved to do so by their doctoral committees. To qualify for a minor in Comparative and International Education, students must satisfy the requirements of their graduate major programs, and meet the following minimum requirements: 3 credits in the Proseminar in Comparative and International Education; 3 credits in a Comparative and International Education course; and 6 credits in Comparative and International Education content courses (or advanced courses) or in courses with comparative or international content offered outside the College of Education.

The doctoral dissertation committee of a Ph.D. (or Ed.D.) dual-title degree student is recommended, in conjunction with the Comparative and International Education committee, by the graduate major program granting the degree. The chair and at least two members of a doctoral committee must be members of the graduate faculty. The chair or co-chair of the dissertation committee must be a member of the Comparative and International Education committee.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Comparative Literature (CMLIT)

Program Home Page

CAROLINE D. ECKHARDT, *Head, In Charge of Graduate Programs in Comparative Literature*
427 Burrowes Building
814-863-0589
cmlit@psu.edu

Degrees Conferred:

- Ph.D., M.A.
- Integrated B.A./M.A. Program in Comparative Literature

The Graduate Faculty

- Jonathan Abel, Ph.D. (Princeton) Associate Professor of Comparative Literature and Asian Studies
- Mary Barnard, Ph.D. (Michigan) Associate Professor of Spanish and Comparative Literature
- Thomas O. Beebee, Ph.D. (Michigan) Distinguished Professor of Comparative Literature and German
- Kevin J. H. Berland, Ph.D. (McMaster) Associate Professor of English
- Patrick G. Cheney, Ph.D. (Toronto) Distinguished Professor of English and Comparative Literature
- Jonathan P. Eburne, Ph.D. (Penn) Assistant Professor of Comparative Literature and English; Josephine Berry Weiss Early Career Professor in the Humanities
- Caroline D. Eckhardt, Ph.D. (Michigan) Professor of Comparative Literature and English
- Robert Edwards, Ph.D. (California, Riverside) Edwin Erle Sparks Professor of English and Comparative Literature
- Nergis Ertürk, Ph.D. (Columbia) Assistant Professor of Comparative Literature
- Charlotte Eubanks, Ph.D. (Colorado) Assistant Professor of Comparative Literature and Asian Studies
- Richard Frushell, Ph.D. (Duquesne) Professor Emeritus of English and Comparative Literature
- Kathryn M. Grossman, Ph.D. (Yale) Professor of French
- Thomas A. Hale, Ph.D. (Rochester) Edwin Erle Sparks Professor of African, French, and Comparative Literature
- Eric Hayot, Ph.D. (University of Wisconsin-Milwaukee) Associate Professor of Comparative Literature and Asian Studies
- Alexander C. Y. Huang, Ph.D. (Stanford) Assistant Professor of Comparative Literature, Chinese, and Asian Studies
- Linda J. Ivanits, Ph.D. (Wisconsin) Associate Professor of Russian and Comparative Literature
- Djelal Kadir, Ph.D. (New Mexico) Edwin Erle Sparks Professor of Comparative Literature
- Sophia A. McClennen, Ph.D. (Duke) Associate Professor of Comparative Literature, Spanish, and Women's Studies
- John W. Moore, Jr., Ph.D. (Stanford) Associate Professor Emeritus of English and Comparative Literature
- Philip Mosley, Ph.D. (East Anglia) Professor of English, Communications, and Comparative Literature
- John Ochoa, Ph.D. (Yale) Associate Professor of Spanish and Comparative Literature
- Steven Putzel, Ph.D. (Toronto) Associate Professor of English
- Dennis Schmidt, Ph.D. (Boston College) Liberal Arts Research Professor of Philosophy, Comparative Literature, and German
- Scott Smith, Ph.D. (Notre Dame) Assistant Professor of English and Comparative Literature
- Allan Stoekl, Ph.D. (SUNY) Professor of French and Comparative Literature
- Reiko Tachibana, Ph.D. (Penn State) Associate Professor of Comparative Literature, Japanese, and Asian Studies
- Daniel Walden, Ph.D. (NYU) Professor Emeritus of American Studies, English, and Comparative Literature
- Adrian Wanner, Ph.D. (Columbia) Professor of Russian and Comparative Literature
- Stanley Weintraub, Ph.D. (Penn State) Evan Pugh Professor Emeritus of Arts and Humanities

Graduate programs in Comparative Literature are designed to permit advanced study in several departments along with integrative courses in the Department of Comparative Literature. Both the M.A. and the Ph.D. combine a core of comparative literature requirements with courses in national literatures and further comparative courses, according to each student's interests. For example, programs of study can concentrate on such topics as genres, themes, periods, movements, folktale and oral literature, criticism, and the links between literature and related fields such as theatre or women's studies.

The M.A. is a general humanistic degree that helps prepare students for a variety of situations, including teaching in private high schools or community colleges, or further graduate work. The Ph.D. is a more specialized degree. The Ph.D. in comparative literature can be combined with a minor in a professional field such as teaching English as a second language.

Only the faculty members and courses officially associated with the Department of Comparative Literature are listed here. Faculty members and courses in other departments are also available to comparative literature students according to their preparation.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

Students with appropriate course backgrounds and a 3.00 junior/senior average (on a 4.00 scale) will be considered for admission. The admission process is highly competitive and the best qualified students will be admitted subject to space availability. Scores from the Graduate Record Examination (GRE) are required for admission. Most students who do graduate work in comparative literature hold a B.A. or M.A. degree in comparative literature or in a national language and literature. Students completing degrees in such fields are welcome to apply--as are students in other humanistic fields, such as philosophy or history, if they have studied literature.

For admission to the M.A. program, students should be prepared to study at least one foreign literature in its own language. For admission to the Ph.D. program, students should be prepared to study at least two foreign literatures in their own language. Doctorate-seeking students usually complete the M.A. before being formally admitted to the Ph.D. program, but exceptional students may be admitted from the B.A. level directly to the Ph.D. Students are encouraged to plan a unified M.A./Ph.D. program if they take both degrees here; however, Ph.D. applications are welcomed from students holding or completing an M.A. elsewhere.

Master's Degree Requirements

Requirements for the M.A. in comparative literature include CMLIT 501; 12 further credits in comparative literature courses; 18 credits divided between two literatures (9 credits in each); a master's paper; and proficiency in two foreign languages (one at the level that

permits thorough literary analysis of texts, the other at the level of reading proficiency).

Doctoral Degree Requirements

Requirements for the Ph.D. in comparative literature include (1) CMLIT 501, CMLIT 502, and CMLIT 503--with substitute courses if these have been used in the M.A. program; (2) at least an additional 21 credits in literature courses, including course work in the three languages that the student selects, with emphasis on the student's primary literature--students should organize their course work, as much as possible, around a unifying principle, such as genre, period, or theme; (3) an oral candidacy examination; (4) proficiency in three foreign languages; (5) a written comprehensive examination based on a reading list; and (6) a dissertation.

On item (4), two of the foreign languages are to be prepared at a level that permits thorough literary analysis of texts in those languages; the third foreign language may be prepared at reading proficiency only. Upon approval of the department's graduate committee in consultation with an expert in the student's field, an official doctoral minor may be substituted for the reading-proficiency language.

Other Relevant Information

Students pursuing a graduate degree in comparative literature have individualized programs of study within the requirements specified above. For example, one student may emphasize drama; another, the novel. One student may concentrate on earlier literatures; another, on modern. One student may be interested primarily in the European tradition; another, in the New World (or "Inter-American") literatures. In such a program, the relationship between student and adviser is important. Each graduate student works with faculty advisers (a general adviser and a thesis or dissertation adviser) familiar with comparative studies as a whole and with the student's particular area of interest.

Student Aid

Teaching assistantships in the Department of Comparative Literature, as well as in related language and literature departments, typically have been available to students taking comparative literature degrees. In recent years, Comparative Literature students have held assistantships in Arabic, Chinese, English, French, German, Hebrew, Italian, Japanese, Polish, Slavic, Spanish, Swahili, and Women's Studies, as well as in Comparative Literature courses. There also is a graduate assistantship position for an editorial assistant to the journal Comparative Literature Studies, which is edited in the department. In addition to the fellowships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following awards typically have been available to graduate students in this program:

SAMUEL P. BAYARD AWARD

Available annually to a graduate student in comparative literature, selected by the graduate committee of the Department of Comparative Literature. Amount varies.

EDWIN ERLE SPARKS FELLOWSHIPS IN THE HUMANITIES (8)

Available to beginning and continuing graduate students in the following graduate programs: Comparative Literature, English, French, German, History, Philosophy, Spanish, and Speech Communication; stipend $12,260 plus waiver of tuition. Apply to department before January 1.

FOLGER INSTITUTE FELLOWSHIPS

Penn State is a member of the Folger Institute of Renaissance and Eighteenth-Century Studies. Graduate students in Comparative Literature are eligible for Folger Institute Fellowships to study in seminars and workshops at the Folger Library, Washington, D.C.

Integrated B.A./M.A. Program in Comparative Literature (CMLIT)

The Department of Comparative Literature offers an integrated B.A./M.A. program that is designed to allow academically superior baccalaureate students to obtain both the B.A. and the M.A. degrees in Comparative Literature within five years of study. The first two years of undergraduate course work include the University General Education and Liberal Arts requirements in addition to language and literature study in the major. In the third year, students are expected to define areas of interest in two primary literatures in different languages. In addition, students in the B.A./M.A. program should begin to undertake work in a second foreign language. The fourth year includes graduate-level work in methodology and the student's selection of primary literatures, which replaces comparable 400-level senior year courses. The fifth and final year of the program typically consists of graduate work in Comparative Literature courses as well as the chosen literatures. The program culminates with an M.A. paper.

By encouraging greater depth and focus in the course of study beginning in the third undergraduate year, this program helps the student more clearly define his/her area of interest and expertise in the otherwise vast field of international literatures. As a result, long-range academic planning for exceptional students pursuing doctoral degrees after leaving Penn State, or other professional goals, will be greatly enhanced. The student may also be more competitive in applying for admission to Ph.D. programs as well as for institutional and national grant monies and scholarships.

Admission Requirements

The number of openings in the integrated B.A./M.A. program is limited. Admission is selective based on specific criteria and the unqualified recommendation of faculty. Applicants to the integrated program:

1. Must be enrolled in the Comparative Literature B.A. program**[1]**.
2. Must have completed 60 credits of the undergraduate degree program. (It is strongly suggested that students apply to the program prior to completing 100 credits.)
3. Must be accepted without reservation into the M.A. program in Comparative Literature.
4. Should have a recommended overall GPA of 3.2 (on a 4.0 scale) in undergraduate coursework and a minimum GPA of 3.5 in all coursework completed for the major.
5. Must present a departmentally approved plan of study in the application process.
6. Must be recommended by the chairs of the Department's undergraduate and graduate committees.

A typical sequence of coursework for the integrated program would appear as follows:

Year One:	6 credits:	CMLIT 010 CMLIT 100
Year Two:	6 credits:	Foreign Language (beyond the 12-credit level)
	6 credits:	Courses in Literature
Year Three:	9 credits:	400-level courses in Literature, including CMLIT 400Y
	(variable credits)	Work in foreign language (credits do not count towards the major, but reading proficiency is required for the M.A. degree)
Year Four:	3 credits:	CMLIT 501 (if offered)
	6 credits:	Comparative Literature courses
	6-9 credits:	500-level courses in two Literatures

Year Five: 3 credits: CMLIT 501 (if offered)

9-12 credits:	500-level courses in two Literatures
6 credits:	500-level Comparative Literature Courses M.A. paper

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

COMPARATIVE LITERATURE (CMLIT) course list

[1] A student enrolled in this major must receive a grade of C or better, as specified in Senate Policy 82-44.

Program Home Page (Opens New Window)

LINDA NULL, *Graduate Program Coordinator*
E-256 Olmsted Building
Penn State Harrisburg
777 W. Harrisburg Pike
Middletown, PA 17057-4898
717-948-6081
E-mail: lnull@psu.edu

Degree Conferred:

M.S.

The Graduate Faculty

- Jeremy J. Blum, D.Sc. (George Washington) *Assistant Professor of Computer Science*
- Thang N. Bui, Ph.D. (MIT) *Associate Professor of Computer Science; Program Chair*
- Sukmoon Chang, Ph.D. (Rutgers) *Assistant Professor of Computer Science*
- William Deng, Ph.D. (Kansas State) *Assistant Professor of Computer Science*
- Linda M. Null, Ph.D. (Iowa State) *Associate Professor of Computer Science*
- Clifford H. Wagner, Ph.D. (SUNY, Albany) *Associate Professor of Mathematics and Computer Science*
- Seth Wolpert, Ph.D. (Rutgers) *Associate Professor of Electrical Engineering*

The program is professionally oriented and designed to prepare students for employment in industry or government. Courses emphasize practical concerns as well as the relevant theoretical background. The program will provide appropriate background for diverse tasks such as developing scientific and engineering applications, developing system software, developing safety or security critical systems, solving computationally hard problems, and developing distributed applications. While not intended as preparation for subsequent entrance to a Ph.D. program, this goal is not precluded. Once the specific course requirements are met, appropriate selection of electives will enable individual interests to be met within the program. Anticipated areas of interest include software engineering, systems programming, and artificial intelligence.

Admission Requirements

In addition to the general Graduate School requirements, applicants must present a baccalaureate degree in Computer Science or a related field from a regionally accredited institution. A minimum GPA of 2.75 (on a 4.0 scale) is required. While a bachelor's degree in Computer Science is not required, admission without deficiency requires that an applicant has completed courses in analysis of algorithms, operating systems, database, and linear algebra. If these courses are not taken before admission to the program, they may be taken at Penn State Harrisburg, but the student will receive at most 3 credits toward the MS degree for these courses.

At the discretion of the program, applicants may be required to provide scores from the Graduate Record Examinations (GRE) and/or the GRE subject test in computer science. In addition, applicants must provide three letters of reference, at least one of which is from an academic source, and a letter outlining significant work experience and academic and career objectives.

Degree Requirements

A total of 30 graduate credits (400 level or above) is required for the degree of master of science in Computer Science. Students are required to take the following courses: MA SC 505 and COMP 511, COMP 512, and COMP 519. Additionally, students are required to complete either a thesis or a paper according to one of the two options described below. Students who believe that they have completed a course substantially similar to one of the specific course requirements may apply to have their previous work evaluated for the purpose of exemption to that requirement. If the exemption is granted, another approved course shall be taken in place of that required course. The remaining 18 credits must be completed according to one of the following options:

1. *Thesis Option: Research into a specific computer science problem, development of a scholarly written paper, and an oral defense.*
   This option requires: 6 credits of COMP 600, 3 additional credits from approved 500-level electives in computer science, mathematics, engineering, and information systems courses and 9 credits from approved 400- and 500-level electives in computer science, mathematics, engineering, and information systems courses.
2. *Paper Option: In-depth study of specific computer science problems, development of a written paper or project, and an oral defense.*
   This option requires: 3 credits of COMP 594, 9 credits from approved 500-level electives in computer science, mathematics, engineering, and information systems courses and 6 credits from approved 400- and 500-level electives in computer science, mathematics, engineering, and information systems courses.

A maximum of 9 transfer credits will be allowed for course work completed as a graduate student at another institution.

Suggested Tracks

For students with interests in the areas of software engineering, systems programming, and artificial intelligence, the program suggests the following course work. These tracks are only advisory--there is no requirement that a student follow any track, and tracks will not be noted on diplomas or transcripts.

Track in Software Engineering: Students following the track in software engineering will be provided with the conceptual tools needed for designing and managing large software systems. In addition to the required core, the track in software engineering consists of the following courses: COMP 513, COMP 516, INFSY 570. In addition to these courses, CMPSC 470 is highly recommended, as compiler development is an ideal environment for gaining practical experience with software engineering techniques and tools.

Track in Systems Programming: Students following the track in systems programming will receive instruction in both the conceptual foundation of systems software and the implementation of such systems. In addition to the required core, the track in systems

programming consists of the following courses: CMPSC 436, COMP 517, COMP 545.

Track in Artificial Intelligence: Students following the track in artificial intelligence are expected to gain an understanding in the theory and applications of AI methods as well as evolutionary methods for solving a variety of problems. In addition to the required core, the track in artificial intelligence consists of the following courses: COMP 520, COMP 524, COMP 556.

Additional Information

For further information, see: http://cs.hbg.psu.edu

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S., M.Eng.

The Graduate Faculty

- Raj Acharya, Ph.D. (Minnesota/Mayo School of Medicine) Professor of Computer Science and Engineering; Department Head
- Jesse Barlow, Ph.D. (Northwestern) Professor of Computer Science and Engineering
- Piotr Berman, Ph.D. (MIT) Associate Professor of Computer Science and Engineering
- Guoray Cai, Ph.D. (Pittsburgh) Associate Professor of Information Sciences and Technology, Geography, and Computer Science and Engineering
- Octavia I. Camps, Ph.D. (Washington) Adjunct Associate Professor of Electrical and Computer Engineering, Northeastern
- Guohong Cao, Ph.D. (Ohio) Professor of Computer Science and Engineering
- David Capel, Ph.D. Assistant Professor of Computer Science and Engineering
- Swarat Chauduri, Ph.D. (Pennsylvania) Assistant Professor of Computer Science and Engineering
- Kyusun Choi, Ph.D. (Penn State) Assistant Professor of Computer Science and Engineering
- Robert Collins, Ph.D. (Massachusetts) Associate Professor of Computer Science and Engineering
- Lee D. Coraor, Ph.D. (Iowa) Associate Professor of Computer Science and Engineering
- Chitaranjan R. Das, Ph.D. (Louisiana) Professor of Computer Science and Engineering
- Frederico Torres Fonseca, Ph.D. (Maine) Associate Professor of Information Sciences and Technology
- Dennis F. Dunn, Ph.D. (Penn State) Associate Professor and Director of Academic Affairs, Computer Science and Engineering
- Martin Fürer, Dr.Sc.Math. (ETH-Zürich) Professor of Computer Science and Engineering
- C. Lee Giles, Ph.D. (Arizona) David Reese Professor of Information Sciences and Technology; Professor of Computer Science and Engineering
- Sean Hallgren, Ph.D. Assistant Professor of Computer Science and Engineering
- John Hannan, Ph.D. (Pennsylvania) Associate Professor of Computer Science and Engineering
- William E. Higgins, Ph.D. (Illinois) Professor of Electrical Engineering
- Mary Jane Irwin, Ph.D. (Illinois) Evan Pugh Professor, A. Robert Noll Chair of Engineering, Department of Computer Science and Engineering
- Trent Jaeger, Ph.D. (Michigan) Associate Professor of Computer Science and Engineering
- Mahmut Kandemir, Ph.D. (Syracuse) Associate Professor of Computer Science and Engineering
- George Kesidis, Ph.D. (California, Berkeley) Professor of Computer Science and Engineering; Electrical Engineering
- Daniel Kifer, Ph.D. Assistant Professor of Computer Science and Engineering
- Thomas F. La Porta, Ph.D. (Columbia) Professor of Computer Science and Engineering
- Dongwon Lee, Ph.D. (UCLA) Associate Professor of Information Sciences and Technology; Computer Science and Engineering
- Wang-Chien Lee, Ph.D. (Ohio) Associate Professor of Computer Science and Engineering
- Jia Li, Ph.D. (Stanford) Associate Professor of Statistics
- Peng Liu, Ph.D. (George Mason) Associate Professor of Information Sciences and Technology; Computer Science and Engineering
- Yanxi Liu, Ph.D. (Massachusetts) Associate Professor of Computer Science and Engineering; Electrical Engineering
- Patrick McDaniel, Ph.D. (Michigan) Associate Professor of Computer Science and Engineering
- John J. Metzner, Eng.Sc.D. (New York) Professor of Computer Science and Engineering
- Webb Miller, Ph.D. (Washington) Professor of Biology; Computer Science and Engineering
- Prasenjit Mitra, Ph.D. (Stanford) Assistant Professor of Information Sciences and Technology; Computer Science and Engineering
- Vijaykrishnan Narayanan, Ph.D. (South Florida) Professor of Computer Science and Engineering
- Padma Raghavan, Ph.D. (Penn State) Professor of Computer Science and Engineering
- Sofya Raskhodnikova, Ph.D. (MIT) Assistant Professor of Computer Science and Engineering
- Frank E. Ritter, Ph.D. (Carnegie Mellon) Associate Professor of Information Sciences and Technology; Psychology
- Suzanne Shontz, Ph.D. (Cornell) Assistant Professor of Computer Science and Engineering
- Rajeev Sharma, Ph.D. (Maryland) Associate Professor of Computer Science and Engineering
- Sunil Sinha, Ph.D. (Waterloo) Assistant Professor of Civil and Environmental Engineering
- Anand Sivasubramaniam, Ph.D. (Georgia Tech) Professor of Computer Science and Engineering
- Adam Smith, Ph.D. (MIT) Assistant Professor of Computer Science and Engineering
- Soundar R. Tirupatikumara (Kumara), Ph.D. (Purdue) Allen E. Pearce/Allen M. Pearce Professor of Industrial and Manufacturing Engineering; Professor of Computer Science and Engineering, and Information Sciences and Technology
- Bhuvan Urgaonkar, Ph.D. (Massachusetts) Assistant Professor of Computer Science and Engineering
- James Z. Wang, Ph.D. (Stanford) Associate Professor of Information Sciences and Technology; Computer Science and Engineering
- Yuan Xie, Ph.D. (Princeton) Associate Professor of Computer Science and Engineering
- John Yen, Ph.D. (California, Berkeley) University Professor of Information Sciences and Technology; Professor of Computer Science and Engineering
- Sencun Zhu, Ph.D. (George Mason) Assistant Professor of Computer Science and Engineering; Information Sciences and Technology

The department offers courses and is prepared to direct research in a variety of subfields of computer science and engineering, including VLSI, computer architecture, parallel/distributed processors and processing, multiprocessors, interconnection networks, pattern recognition and image processing, performance evaluation, reliability, fault tolerance, theory of computation, computer systems, numerical analysis and optimization, programming methodology, and analysis of algorithms. Research and instruction are supported by extensive computing facilities within the University's Information Technology Services and by the computer laboratories operated by the department.

For information about areas of specialization, laboratory and research facilities, fellowships assistantships, and other sources of financial assistance, please refer to our Web site: **www.cse.psu.edu**.

Admission Requirements

All applicants must provide a one-page statement of purpose and scores from the Graduate Record Examinations (GRE) Aptitude Test (verbal, quantitative, and analytical). A subject test in the GRE is not required, but the subject test in Computer Science is recommended.

Those students seeking an assistantship in Computer Science and Engineering ARE REQUIRED to submit a Test of Spoken English (TSE) or the TOEFL iBT. A score of 26 on the speaking section of the TOEFL iBT is equivalent to passing the TSE. A lower score would require remedial English as a Second Language courses. For score reporting for TOEFL and TSE, our institution code is 2660 and our department code is 78.

English Proficiency--The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the Internet-based test. The minimum composite score for the IELTS is 6.5. Specific graduate programs may have more stringent requirements.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Specific graduate programs may require all international applicants to submit a TOEFL or IELTS score, regardless of their academic background and country of origin.

Information about the TOEFL can be obtained by writing to the Educational Testing Service, Box 6155, Princeton, NJ 08541-6155 or visiting its Web site at **www.toefl.org**. Local administration at University Park campus of the TOEFL is handled by the IECP. Information about the IELTS can be obtained by contacting IELTS International, 100 East Corson Street, Suite 200, Pasadena, CA 91103 or visiting its Web site a**www.ielts.org**.

Master's Degree Requirements

Candidates for the master's degree must satisfactorily complete the requirements of the Graduate School. In addition, all students are expected to have completed appropriate courses in computer architecture and machine organization, data structures and analysis of algorithms, programming languages, operating systems, and logical design/switching theory or theory of automata. Students who do not meet background requirements will be required to take the appropriate 400-level courses to prepare them for the 500-level courses. At most, 3 credits of background course work can be used to satisfy the degree requirements. Students admitted to the M.S. program will not be permitted to switch to the M. Eng. program at a later time, except under extenuating circumstances.

Master of Science students must take 15 credits of courses numbered CSE 500 through 589, including a minimum of 9 credits of breadth courses taken from the department's Graduate Handbook in Computer Science and Engineering. An additional 9 credits of 400-level courses and above (excluding independent studies courses and ENGR 588) are required (see Handbook). This must include at least 1, and at most 2, credits of CSE 590 (Colloquium). Students must complete and defend an M.S. thesis (6 credits of CSE 600). The total degree requirement is 30 credits.

Master of Engineering students must take 18 credits of 500-level courses with at least 15 of the credits being associated with courses that have CSE designations and numbered 500-589 (including a minimum of 9 credits of breadth courses referenced above and at least 3 credits of a depth course from the department list. Students must also take 12 additional credits of 400-level courses and above, excluding independent studies courses and ENGR 588 (See Handbook). This must include at least 1, and at most 2, credits of CSE 590 (colloquium). Students are required to complete and defend a 1-credit technical paper (CSE 594). The total degree requirement is 30 credits.

Doctoral Degree Requirements

The doctoral degree requirements include the general requirements of the Graduate School as listed under Doctoral Degree Requirements. Furthermore, students applying for and gaining admittance to the Ph.D. program will not be permitted to switch to the master's program at a later date, except under extenuating circumstances. To qualify for a Ph.D. degree, each student must take 27 credits of courses with numbers CSE 500-589 or CSE 598, and 21 additional credits of 400-level and above courses. The 21 additional credits must include at least 3 credits of CSE 590 (colloquium), with a maximum of 3 credits of CSE 590 being counted toward the total of 48 minimum credits. A maximum of 3 credits of X96 may also be counted. A student must pass the Ph.D. candidacy examination by the third regular semester after entering the program (see Handbook). Students must pass the Ph.D. comprehensive examination after completion of most of the course work, and the English competency and communication requirements. A thesis must be completed under the direction of a Ph.D. committee and the results must be successfully defended in the thesis defense examination.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Elizabeth Skowron, Ph.D. (Albany) *Associate Professor of Counseling Psychology*
- Robert B. Slaney, Ph.D. (Ohio State) *Professor of Counseling Psychology*
- Jerry G. Trusty, Ph.D. (Mississippi State) Professor of Counselor Education
- Keith B. Wilson, Ph.D. (Ohio State) *Professor of Rehabilitation Services*
- Susan S. Woodhouse, Ph.D. (Maryland) *Assistant Professor of Counseling Psychology*

The Ph.D. in Counseling Psychology is fully accredited by the American Psychological Association and approved by the Pennsylvania Board of Psychologist Examiners. This degree program is designed to train counseling psychologists in a multiculturally infused scientist-practitioner model. Graduates of this program are automatically entitled to sit for the psychology licensure examination in Pennsylvania and in most other states. Requirements vary from state to state so students desiring licensure in other states must determine the requirements of the state in which they intend to practice, although graduation from an A.P.A.-approved doctoral training program in counseling psychology is ordinarily sufficient to qualify to sit for a state licensure examination as a psychologist.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

All candidates for the Ph.D. in Counseling Psychology must possess a master's degree program, the content of which is relevant to counseling psychology (e.g., rehabilitation counseling, counselor education, clinical or general psychology). Doctoral candidates should present a 3.33 average in all graduate study completed.

Degree Requirements

In addition to academic competence, all candidates are expected to exhibit effectiveness in interpersonal relations and in both written and oral communication. They also must evidence support of professional counseling activities and organizations.

Ph.D. students in Counseling Psychology must satisfy degree requirements in statistics and research design, general psychology foundations, and counseling psychology core courses. In addition, students participate in extensive practicum, research team, and internship experiences under supervision. As part of the requirements for the Ph.D., all students must complete an approved internship in a counseling center or other facility meeting criteria set by the American Psychological Association.

The communication and foreign language requirement for the Ph.D. degree may be satisfied by a comprehensive knowledge of one foreign language and courses from other designated areas, or by options from designated areas selected to include competence in statistics, research design, computer application, or measurement.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Professional preparation is offered at the master's level for school counselors (elementary and secondary) and rehabilitation counselors. Credits required by different master's options vary from 51 to 54. Specifically, program specializations at the master's level include elementary school counseling (54 credit hours), secondary school counseling (54 credit hours), and rehabilitation counseling (51 credit hours).

The Ph.D. program prepares candidates for positions as counselor education faculty members and consists of a minimum of four academic years of graduate level preparation (including master's-level preparation), defined as eight semesters, with a minimum of 96 graduate-level credits required of all students in the program. The D.Ed. program helps students prepare to become supervisors of counseling services and requires 52 credit hours beyond the master's degree in counselor education.

Admission Requirements

Scores from the Graduate Record Examination (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin.* All candidates for graduate degrees in Counselor Education must present for admission at least 27 undergraduate credits with a GPA of 3.00 or better distributed among at least three of the following areas: economics, education, psychology, sociology, and physiology or anatomy.

Students with a 2.50 junior/senior average (on a scale of 4.00) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 2.50 grade-point average may be made for students with special backgrounds, abilities, and interests. All doctoral candidates should present at least a 3.33 average in all graduate study completed.

All doctoral applicants must have completed a master's degree in counselor education prior to admission into the Ph.D. or D.Ed. program. The master's degree must be comprised of 48 credit hours as specified by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).

Degree Requirements

All candidates are expected to exhibit, in addition to academic competence, effectiveness in interpersonal relations and in both written and oral communication. They also must evidence support of professional counseling activities and organizations. All degree options require students to participate in extensive practicum or fieldwork experience under supervision.

The Ph.D. program includes 76 credit hours beyond the master's degree in counselor education. The master's degree must be comprised of 48 credit hours as specified by CACREP. Ph.D. students must satisfy advanced degree requirements in the CACREP counselor education core areas (31 credit hours including a counseling and teaching internship), a minor field of study (15 credit hours), and empirical foundations (15 credit hours). Students in the Ph.D. program are expected to complete a dissertation involving independent and original research. Students are expected to use theoretical models of counseling to investigate problems of importance to the field. The additional credits in the Ph.D. program incorporate advanced coursework in research design, statistics, and counseling theory to prepare students for their subsequent roles as faculty members in counselor education programs.

The D.Ed. Program includes 52 credit hours beyond the master's degree in counselor education. Students in the D.Ed. program in Counselor Education must satisfy degree requirements in core counselor education courses (7 credit hours), empirical foundations (15 credit hours), and a counseling specialty area (15 credit hours) such as : career guidance, administration, planning, and management in

service delivery settings, and a minor field of study. D.Ed. students must complete a dissertation (15 dissertation credit hours) that is of practical significance to the delivery or administration of counseling services.

Candidacy Examination

All Ph.D./D.Ed. students are required to have a master's degree in counselor education prior to admission. After completion of 12 credits of doctoral study, which may allow the student to take the candidacy examination as early as the second semester in their doctoral program, Ph.D. and D.Ed. students may take a candidacy examination. Given the requirement that doctoral students will have a master's degree in counselor education thereby demonstrating their ability to complete graduate work successfully, the nature of the candidacy examination will include a review of the following by the student's candidacy committee: (1) the student's professional resume, (2) a statement regarding the general direction of the student's research interests and possible areas of dissertation inquiry, (3) grades from completed graduate courses, (4) proposed course of study for subsequent semesters, (5) selected graduate papers written by the student, and (6) a statement regarding the student's professional goals. In the candidacy examination, the student's candidacy committee determines the student's ability to continue in the program and to conduct doctoral research.

Comprehensive Examination

Both Ph.D. and D.Ed. candidates are required to take a written and oral comprehensive examination once their course work is completed (or when they are in their final semester of required coursework) and prior to the dissertation. The examination, prepared by the student's doctoral committee, covers all areas of the student's doctoral work both in and outside the field of counselor education. The comprehensive examination for Ph.D. students must include an assessment of the student's competence related to conducting independent and original research.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

CORE COURSES for Counselor Education Doctoral Program:

- CN ED 502(3) Advanced Counseling Theory
- CN ED 554(3) Cross-Cultural Counseling
- CN ED 555(3) Career Counseling
- CN ED 580(3) Foundations of Counselor Education Seminar
- CN ED 581(3) Professional Issues Seminar
- CN ED 582(3) Advanced Group Psychotherapy
- CN ED 589(1) Seminar on Counseling Supervision
- CN ED 595D(3) Supervision of Counselors
- CN ED 595I(3) Teaching Internship
- CN ED 595K(3) Doctoral Counseling Internship
- CN ED 595P(3) Counselor Education Doctoral Practicum

- Duane Alwin, Ph.D. (Wisconsin) McCourtney Professor of Sociology, Demography, and Human Development and Family Studies
- Paul Amato, Ph.D. (James Cook, Australia) Professor of Sociology and Demography
- Roy L. Austin, Ph.D. (Washington) Associate Professor of Sociology and Justice
- Alan A. Block, Ph.D. (California, Los Angeles) Professor of Crime, Law, and Justice, and Jewish Studies
- Alan Booth, Ph.D. (Nebraska) Distinguished Professor Emeritus of Sociology, Human Development, and Demography
- Richard Bord, Ph.D. (Iowa) Professor Emeritus of Sociology
- Lori Burrington, Ph.D. (Ohio State) Assistant Professor of Crime, Law, and Justice
- Frank Clemente, Ph.D. (Tennessee) Professor of Sociology
- Stephen R. Couch, Ph.D. (SUNY) Professor of Sociology
- Gordon F. De Jong, Ph.D. (Kentucky) Distinguished Professor of Sociology and Demography; Director, Graduate Program in Demography
- Francis Dodoo, Ph.D. (Pennsylvania) Professor of Sociology and Demography
- James Eisenstein, Ph.D. (Yale) Professor Emeritus of Political Science and Crime, Law, and Justice
- Richard Felson, Ph.D. (Indiana) Professor of Crime, Law, and Justice, and Sociology
- Roger Finke, Ph.D. (Washington) Professor of Sociology and Religious Studies
- Glenn Firebaugh, Ph.D. (Indiana) Professor of Sociology and Demography
- Michelle Frisco, Ph.D. (Texas) Assistant Professor of Sociology and Demography
- Emily Greenman, Ph.D. (Michigan) Assistant Professor of Sociology
- Melissa Hardy, Ph.D. (Indiana) Distinguished Professor of Human Development and Family Studies, Sociology, and Demography
- Michael Hecht, Ph.D. (Illinois) Distinguished Professor of Speech Communication, and Crime, Law, and Justice
- Julie Horney, P{h.D. (California, San Diego) Professor of Crime, Law, and Justice; Graduate Officer
- Craig Humphrey, Ph.D. (Brown) Professor Emeritus of Sociology
- John Iceland, Ph.D. (Brown) Professor of Sociology and Demography
- David R. Johnson, Ph.D. (Vanderbilt) Professor of Sociology, and Human Development and Family Studies; Director, Survey Research Center
- Kurt Johnson, Ph.D. (Nebraska) Research Associate, Social Science Research Institute
- Michael P. Johnson, Ph.D. (Michigan) Professor Emeritus of Sociology, Women's Studies, and African and African American Studies
- Valarie King, Ph.D. (Pennsylvania) Associate Professor of Sociology, Demography, and Human Development and Family Studies
- John H. Kramer, Ph.D. (Iowa) Professor of Sociology, and Crime, Law, and Justice
- Derek Kreager, Ph.D. (Washington) Assistant Professor of Crime, Law, and Justice
- Nancy S. Landale, Ph.D. (Washington) Professor of Sociology and Demography
- Barrett A. Lee, Ph.D. (Washington) Professor of Sociology and Demography
- Doris MacKenzie, Ph.D. (Penn State) Professor of Crime, Law, and Justice
- Molly Martin, Ph.D. (Wisconsin) Assistant Professor of Sociology and Demography
- Michael Massoglia, Ph.D. (Minnesota) Assistant Professor of Crime, Law, and Justice
- Jennifer Mastrofski, Ph.D. (Penn State) Associate Professor of Administration of Justice
- Stephen Matthews, Ph.D. (Wales) Associate Professor of Sociology, Anthropology, and Demography
- John D. McCarthy, Ph.D. (Oregon) Professor of Sociology
- Hart Nelsen, Ph.D. (Vanderblit) Professor Emeritus of Sociology
- R. Salvador Oropesa, Ph.D. (Washington) Professor of Sociology and Demography
- D. Wayne Osgood, Ph.D. (Colorado) Professor of Crime, Law, and Justice, and Sociology
- William Parsonage, Ph.D. (South Dakota) Professor Emeritus of Crime, Law, and Justice
- Evelyn Patterson, Ph.D. (Pennsylvania) Assistant Professor of Crime, Law, and Justice, Sociology, and Demography
- Roland Pellegrin, Ph.D. (North Carolina) Professor Emeritus of Sociology
- Eric Plutzer, Ph.D. (Washington-St. Louis) Associate Professor of Political Science and Sociology
- Suet-Ling Pong, Ph.D. (Chicago) Associate Professor of Education and Sociology
- Richard Ritti, Ph.D. (Cornell) Professor Emeritus of Crime, Law, and Justice
- R. Barry Ruback, Ph.D. (Pittsburgh) Professor of Crime, Law, and Justice, and Sociology
- Eric Silver, Ph.D. (SUNY, Albany) Associate Professor of Crime, Law, and Justice, and Sociology
- Graham B. Spanier, Ph.D. (Northwestern) Professor of Human Development, Sociology, and Family, and Community Medicine
- Jeremy Staff, Ph.D. (Minnesota) Assistant Professor of Crime, Law, and Justice, and Sociology
- Darrell J. Steffensmeier, Ph.D. (Iowa) Professor of Sociology and Crime, Law, and Justice
- C. Shannon Stokes, Ph.D. (Kentucky) Professor of Rural Sociology, Sociology, and Demography
- Marylee C. Taylor, Ph.D. (Harvard) Associate Professor of Sociology
- George Theodorson, Ph.D. (Cornell) Professor Emeritus of Sociology
- Kevin J. A. Thomas, Ph.D., (Pennsylvania) Assistant Professor of African and African American Studies, Sociology, and Demography
- Jenny Trinitapoli (Texas) Assistant Professor of Sociology, Demography, and Religious Studies)
- Jeffery T. Ulmer, Ph.D. (Penn State) Associate Professor of Crime, Law, and Justice, and Sociology
- Jennifer Van Hook, Ph.D. (Texas) Associate Professor of Sociology and Demography
- Edward Walsh, Ph.D. (Michigan) Professor Emeritus of Crime, Law, and Justice
- Susan Welch, Ph.D. (Illinois) Professor of Political Science and Crime, Law, and Justice

The graduate program in Crime, Law, and Justice is for students seeking the Ph.D. degree. It offers an advanced education on crime and its control to persons interested in research careers in academia and public service.

The graduate program emphasizes theory and research on crime and justice, research and statistical methodology, and substantive knowledge about crime and its control.

Admission Requirements

Applications from students with either the B.A. or M.A. degree will be accepted through January 1 for admission in the fall of the following year. Selection is based on transcripts, three letters of recommendation from persons familiar with the applicant's academic performance, a statement of goals, a sample of written work such as a term paper, and Graduate Record Examinations (GRE) verbal and quantitative scores. The best-qualified applicants will be admitted to the program up to the number of spaces available.

M.A. and Ph.D. Degree Requirements

Students entering the program with the B.A. degree will first earn the M.A. degree. Thirty-seven credits of course work and a master's thesis are required for the M.A. The course work includes a sequence of methods and statistics courses; a crime theory course; a course in the organization and criminal justice system; and additional 500-level substantive Crime, Law, and Justice courses selected in consultation with a student's faculty committee.

A candidacy exam is required of all students seeking the Ph.D., after a master's degree has been earned. This exam will consist of an evaluation by the program's graduate faculty of the student's seminar papers, master's thesis, and overall record of performance. Students admitted with a master's degree will stand for this exam in the second semester of full-time study.

To complete the Ph.D., students must, in consultation with their committee, select 12 credits of 500-level courses outside the program that form a coherent disciplinary concentration that complements the study of Crime, Law, and Justice. A comprehensive exam must be passed by all students before intensive dissertation research begins.

The program in Crime, Law, and Justice has no formal foreign language or communication requirement. However, students are encouraged to pursue additional training in statistics, computer science, foreign language, technical writing, specialized methods, or specialized theory that will further their dissertation or career plans.

Student Aid

All students admitted to the program are supported with stipends and tuition waivers for either four years (students entering with a master's degree) or five years (students entering with a bachelor's degree). Support may be in the form of research assistantships or teaching assistantships, with most students receiving a combination of types of support across their graduate careers.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Criminal Justice (CRIMJ)

BARBARA S. SIMS, *Graduate Programs Chair*
Penn State Harrisburg
777 W. Harrisburg Pike
Middletown, PA 17057-4898
717-948-6044
717-948-6322 (administrative assistant)
717-948-6320 (fax)
bas4@psu.edu
www.hbg.psu.edu (Opens New Window)

Degree Conferred:

M.A.

The Graduate Faculty

- Danielle Boisvert, Ph.D. (Cincinnati) *Assistant Professor of Criminal Justice*
- Shaun L. Gabbidon, Ph.D. (Indiana U of Pa.) *Professor of Criminal Justice*
- Carl Garver, D.Ed. (Penn State) *Instructor in Criminal Justice*
- Don Hummer, Ph.D. (Michigan State) *Associate Professor of Criminal Justice*
- James M. Ruiz, Ph.D. (Sam Houston State) *Associate Professor of Criminal Justice*
- Barbara A. Sims, Ph.D. (Sam Houston State) *Professor of Criminal Justice*
- Jennifer Sumner, Ph.D. (California, Irvine) *Assistant Professor of Criminal Justice*

The program reflects the numerous complexities of the discipline. It provides academic leadership for students to work within corrections, institutionalized and non-institutionalized settings, victim services, adult and juvenile services, policing and law enforcement, private security, courts, and other human service organizations serving the clients of these institutions. It also helps develop research acumen for those students who may wish to consider doctoral studies.

Strong ties developed in state, local, and federal level law enforcement, corrections, drug treatment, victimization, and crime control policy organizations provide research and learning opportunities for interested students.

The degree may be earned by full or part-time study. Most courses will be offered in the evening, although some will be offered during the day or on weekends.

Admission Requirements

- A completed application form with the application fee.
- Two official transcripts of all colleges and universities attended.
- Graduation from a regionally accredited college or university.
- Three letters of recommendation.
- A brief (two-page) statement of purpose or a writing sample.
- Minimum GPA of a 3.0 for the last 60 credits of undergraduate study. Satisfactory scores on the Graduate Record Examination (GRE), Graduate Management Admissions Test (GMAT), or Law School Admissions Test (LSAT) are required if the GPA is less than 3.0. *Note: All students who seek funding must take one of these standardized tests, preferably the GRE.*
- The language of instruction at Penn State is English. All international applicants whose first language is not English or who have not received a baccalaureate or master's degree from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test, a score of 213 on the compluter-based test, or 80 points on the new Internet-based test with a minimum of 20 points on the speaking portion; or the IELTS module with a minimum compusite score of 6/5 is required for admission.
- Some foundational course work may be required for those students who did not major in criminal justice as an undergraduate. This decision will be made by the MACJ Program Coordinator after a close review of the undergraduate transcript.
- In exceptional cases, the program may also approve admission by reason of special backgrounds, abilities, and interests.
- Students must submit admission materials for fall by February 15.

Degree Requirements

1. The thesis track requires 36 credits. Six of the credits will be for the thesis.
2. The non-thesis track will require 36 credits plus successful completion of the comprehensive essays, for which a student will register for one credit of CRIMJ 594.
3. These credits must be at the 400 level or above with a minimum of 30 credits at the 500 level or above.
4. A minimum grade-point average of a 3.0 must be earned for course work taken as a graduate student.
5. Students are required to take the following courses: CRIMJ 500, CRIMJ 501, CRIMJ 502, CRIMJ 503, and CRIMJ 504. CRIMJ 501 and CRIMJ 503 are to be taken concurrently.
6. Students who believe they have completed a course substantially similar to one of the specific course requirements may apply to have their previous work evaluated for the purposes of exemption to that requirement. If approved, another course will be taken in place of that requirement.
7. A maximum of 6 credits of completed graduate work may be transferred in from another accredited institution.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Curriculum and Instruction (C I)

Program Home Page

GLENDON W. BLUME, *Coordinator for Graduate Programs in Curriculum and Instruction*
269 Chambers Building
814-865-2169
bti@psu.edu

Degrees Conferred:

Ph.D., D.Ed., M.S., M.Ed. (Penn State University Park), M.Ed. (Penn State Great Valley)
Integrated B.S. in Special Education/M.Ed. in Curriculum and Instruction

The Graduate Faculty

- Glendon W. Blume, Ph.D. (Wisconsin) Professor of Education
- William S. Carlsen, Ph.D. (Stanford) Professor of Education
- Jacqueline Edmondson, Ph.D. (Penn State) Assistant Professor of Education
- Miriam Espinosa-Dulanto, Ph.D. (Wisconsin, Madison) Assistant Professor of Education
- Marnina Gonick, Ph.D. (Ontario Inst for Studies in Education) Assistant Professor of Education
- Daniel D. Hade, Ph.D. (Ohio State) Associate Professor of Education
- M. Kathleen Heid, Ph.D. (Maryland) Professor of Education
- Steven Herb, Ph.D. (Penn State) Librarian; Head, Education Library, Affiliate Associate Professor of Education
- Patricia H. Hinchey, Ed.D. (Columbia) Associate Professor of Education
- James E. Johnson, Ph.D. (Wayne State) Professor of Education
- Ravinder Koul, Ph.D. (Penn State) Associate Professor of Education
- James Levin, Ph.D. (Penn State) Affiliate Associate Professor of Education
- Arlene Mitchell, Ph.D. (Penn State) Associate Professor of Education
- Jamie Myers, Ph.D. (Indiana) Associate Professor of Education
- Murry R. Nelson, Ph.D. (Stanford) Professor of Education
- Peter A. Rubba, Ed.D. (Indiana) Professor of Education
- David W. Saxe, Ph.D. (Illinois) Associate Professor of Education
- Patrick W. Shannon, Ph.D. (Minnesota) Professor of Education
- Iris M. Striedieck, D.Ed. (Penn State) Assistant Professor of Education
- Thomas D. Yawkey, Ph.D. (Illinois) Professor of Education
- Rose Mary Zbiek, Ph.D. (Penn State) Associate Professor of Education
- Carla M. Zembal-Saul, Ph.D. (Michigan) Associate Professor of Education

This program provides advanced professional preparation in the special areas of bilingual education, curriculum and supervision, early childhood education, elementary education, instructional leadership, language and literacy education, science education, social studies education, and mathematics education.

The M.Ed. program in the areas of curriculum and supervision and instructional leadership is available at Penn State Great Valley (see www.gv.psu.edu).

Admission Requirements

Scores from the Miller Analogies Test (MAT) or the Graduate Record Examinations (GRE) are required for admission. However, applicants for the doctoral degree are strongly encouraged to take the GRE. Moreover, students with excellent academic records who wish to be considered for fellowships, scholarships, and assistantships should take the GRE as a matter of course. At the discretion of an option area, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Students with appropriate course and professional backgrounds will be considered for admission, subject to the limitation of program facilities. For admission to the professional degree programs leading to the M.Ed. and D.Ed., teaching or equivalent experience and at least 18 credits in education are recommended.

Master's Degree Requirements

M.Ed. and M.S. candidates are expected to complete the core: EDPSY 421, C I 400, and C I 550, or the equivalent.

Candidates for the M.Ed. degree with a minor in Curriculum and Instruction must take a minimum of 6 course credits approved in advance.

Doctoral Degree Requirements

The completion of a core of competencies in curriculum, instruction, and supervision is expected of Ph.D. and D.Ed. candidates.

To meet residency requirements, the Ph.D. candidate must spend at least two consecutive semesters enrolled as a full-time student at the University Park campus. The D.Ed. candidate must spend at least two consecutive sessions (e.g., semester, summer session) enrolled as a full-time student at the University Park campus.

Candidates for the D.Ed. degree with a minor in Curriculum and Instruction must take a minimum of 15 course credits approved in advance by the graduate program coordinator in Curriculum and Instruction.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Integrated B.S. in Special Education/M.Ed. in Curriculum and Instruction

The Special Education and Curriculum and Instruction with emphasis in Language and Literacy Education Integrated Undergraduate-Graduate (SE/CI-LLED IUG) leading to certification as a Reading Specialist.

The Special Education and Curriculum Instruction with Emphasis in Language and Literacy Education Integrated Undergraduate-Graduate (SE/CI-LLED IUG) Degree Program consists of integration of required courses for a B.S. in Special Education with courses required for certification as a Reading Specialist and a M.Ed. in Curriculum and Instruction with emphasis in Language and Literacy Education (LLED). The five-year, SE/CI-LLED IUG is an option for highly qualified students seeking certification to teach Special Education in Pennsylvania in grades K-12. Students in this IUG will be taught how to design and deliver appropriate instruction based on individual needs and incorporate a variety of materials and strategies. Students are expected to complete courses required for the graduate level K-12 reading specialist integrated with their undergraduate experiences and coursework in Special Education and will complete a summer practicum in an on-campus reading clinic as well as a capstone Special Education teaching experience in their final semester. Completion of the IUG (along with earning a passing score on PDE required PRAXIS tests) leads to a B.S. in Special Education, certification in special education and as a reading specialist in the state of Pennsylvania, and a M.Ed. in Curriculum and Instruction.

Admission to the SE/CI-LLED IUG Reading Specialist program will be based upon having attained a minimum GPA of 3.5 in Special Education courses, with a grade of B or better in SPLED 412. Admission will be based on a recommendation by the Reading Specialist Program Coordinator in consultation with the Coordinator of Teacher Education in Special Education.

For the B.S./M.Ed. Degree in integrated Special Education B.S. and Curriculum and Instruction M.Ed., a minimum of 150 credits is required. Up to 12 graduate level credits can apply to both undergraduate and graduate degrees; half of these must be at the 500-level. Students can complete the B.S. in Special Education and not advance to the M.Ed. CI degree if they desire.

Master of Education

CURRICULUM AND INSTRUCTION M.Ed. (30 credits)

Core Areas (9 credits - choose one course from each area):
Curriculum: C I 550
Research: C I 501 or EDPSY 400
Learning: EDPSY 421, EDPSY 545, or HD FS 429

Emphasis in Language and Literacy Education with Reading Specialist (* denotes required courses)
EDLDR 563, EDPSY 526 *LL ED 500, *LL ED 501, *LL ED 550, *LL ED 595A,

Note: A Master's paper is required for completion of the M.Ed.

A passing score on the PRAXIS Reading Specialist Exam (qualifying score of 570) is required for Reading Specialist certification.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

CURRICULUM AND INSTRUCTION (C I) course list

CURRICULUM AND SUPERVISION (C & S) course list

EARLY CHILDHOOD EDUCATION (E C E) course list

LANGUAGE AND LITERACY EDUCATION (LL ED) course list

MATHEMATICS EDUCATION (MTHED) course list

SCIENCE EDUCATION (SCIED) course list

SOCIAL STUDIES EDUCATION (SS ED) course list

Demography (DEMOG)

Program Home Page

GORDON F. De JONG, *In Charge*
601 Oswald Tower
814-865-0486
demography@pop.psu.edu

Degrees Conferred:

Students electing this option through participating programs will earn a degree with a dual title at both the Ph.D. and M.A. levels, i.e., Ph.D. in (graduate program name) and Demography, or M.A. or M.S. in (graduate program name) and Demography.

The following graduate programs offer dual degrees in Demography: M.A. and Ph.D. in Sociology and Demography; M.A. and Ph.D. in Economics and Demograpy; M.A. and Ph.D. in Anthropology and Demography; M.S. and Ph.D. in Rural Sociology and Demography; M.S. and Ph.D. in Human Development and Family Studies, and Demography; M.S. and Ph.D. in Agricultural, Environmental, and Regional Economics, and Demography; M.S. and Ph.D. in Health Policy and Administration.

The Graduate Faculty

- David G. Abler, Ph.D. (Chicago) Professor of Agricultural, Environmental, and Regional Economics and Demography
- Duane F. Alwin, Ph.D. (Wisconsin) McCourtney Professor of Sociology, Demography, and Human Development and Family Studies
- Paul R. Amato, Ph.D. (James Cook University) Hoffman Professor of Sociology and Demography
- Alan Booth, Ph.D. (Nebraska) Distinguished Professor of Sociology, Human Development, and Demography
- Linda M. Burton, Ph.D. (USC) Professor of Human Development and Sociology
- Jeffrey H. Cohen, Ph.D. (Indiana) Assistant Professor of Anthropology and Demography
- Gretchen T. Cornwell, Ph.D. (Penn State) Assistant Professor of Rural Sociology and Demography
- Gordon F. De Jong, Ph.D. (Kentucky) Distinguished Professor of Sociology and Demography
- Francis Dodoo, Ph.D. (Pennsylvania) Liberal Arts Research Professor of Sociology and Demography
- David J. Eggebeen, Ph.D. (North Carolina) Associate Professor of Human Development
- George Farkas, Ph.D. (Cornell) Professor of Sociology and Demography
- Jill L. Findeis, Ph.D. (Washington State) Distinguished Professor of Agricultural, Environmental, and Regional Economics, and Demography
- Glenn Firebaugh Ph.D. (Indiana) Distinguished Professor of Sociology and Demography
- E. Michael Foster, Ph.D. (North Carolina) Professor of Health Policy and Administration, and Demography
- Mark D. Hayward, Ph.D. (Indiana) Distinguished Professor of Sociology and Demography
- Mark Hill, Ph.D. (Pennsylvania) Assistant Professor of Sociology and Demography
- Marianne Hillemeier, Ph.D. (Michigan) Associate Professor of Health Policy Administration and Demography
- John Iceland, Ph.D. (Brown) Professor of Sociology and Demography
- Rukmalie Jayakody, Ph.D. (Michigan) Associate Professor of Human Development and Family Studies, and Demography
- Leif I. Jensen, Ph.D. (Wisconsin) Professor of Rural Sociology and Demography
- David R. Johnson, Ph.D. (Vanderbilt) Professor of Sociology, Human Development and Family Studies, and Demography
- Patricia L. Johnson, Ph.D. (Michigan) Associate Professor of Anthropology, Demography, and Women's Studies
- Valarie King, Ph.D. (Pennsylvania) Professor of Sociology, Demography, and Human Development and Family Studies
- Nancy S. Landale, Ph.D. (Washington) Professor of Sociology and Demography
- Barrett A. Lee, Ph.D. (Washington) Professor of Sociology and Demography
- Bruce G. Lindsay, Ph.D. (Washington) Distinguished Professor of Statistics
- Stephen A. Matthews, Ph.D. (Wales College of Cardiff) Associate Professor of Sociology, Geography, and Demography
- Diane K. McLaughlin, Ph.D. (Penn State) Professor of Rural Sociology and Demography
- Salvador R. Oropesa, Ph.D. (Washington) Professor of Sociology and Demography
- Suet-ling Pong, Ph.D. (Chicago) Professor of Foundations and Comparative/International Education
- David Shapiro, Ph.D. (Princeton) Professor of Economics, Demography, and Women's Studies
- Pamela Farley Short, Ph.D. (Yale) Professor of Health Policy Administration
- Anastasia R. Snyder, Ph.D. (Penn State) Assistant Professor of Rural Sociology and Demography
- Graham B. Spanier, Ph.D. (Northwestern) Professor of Human Development, Sociology, and Demography
- Jennifer Van Hook, Ph.D. (Texas, Austin) Professor of Sociology and Demography
- James W. Wood, Ph.D. (Michigan) Professor of Anthropology and Demography
- Wilbur Zelinsky, Ph.D. (California, Berkeley) Professor Emeritus of Geography

The Demography dual-title degree program option is administered by the Demography Program Committee, which is responsible for management of the program. The committee maintains program definition, identifies faculty and courses appropriate to the option, and recommends policies and procedures for its operation to the dean of the Graduate School. This dual-title degree program is offered as an option to graduate major programs in three colleges: Agricultural Sciences, Health and Human Development, and the Liberal Arts. The option enables students from diverse graduate programs to attain and be identified with the content, techniques, methodology, and policy implications of demography, while maintaining a close association with areas of application. Through demography, students study (1) the size, composition, and distribution of the population; (2) changes in these characteristics; (3) the processes that determine these changes--fertility, migration, and mortality; and (4) their social, economic, and cultural causes and consequences. To pursue a dual-title degree under this program option, the student must apply to the Graduate School and register through one of the following graduate programs: Agricultural Economics, Anthropology, Economics, Human Development and Family Studies, Rural Sociology, or Sociology.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

There are no prerequisites for admission to the M.A., M.S., or Ph.D. program options other than those imposed by the participating graduate program.

All application materials should be submitted by January 1. Applicants should have a junior/senior cumulative average of at least 3.00 (on

a 4.00 scale) and appropriate courses in statistics and in the social science department to which they are applying. The application should include three letters of reference and a statement describing and explaining the applicant's interest in demography and goals during and after graduate study. TOEFL scores are required of all students for whom English is a second language.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the graduate program in which they are enrolled, including the communication/foreign language requirements, if any. In addition, they must satisfy the minimum requirements in the Demography option described here, as established by the Demography Program Committee. Within this framework, final course selection is determined by students and their degree committees. All dual-title degree candidates who are in residence must enroll in DEMOG 590 for 1 credit each year in residence.

Master's Degree: For the M.A. and M.S. degree with the Demography option, 12 course credits are required in addition to the colloquium credit or credits. A minimum of 3 credits is required in each of the following areas: (1) disciplinary perspective courses-ANTH 408 and 462, ECON 463, SOC 423; (2) demographic methods courses-SOC 573 (required of all candidates), 576, 577, DEMOG 597, SOC/EDTHP 597; (3) seminars in demographic processes-SOC 521, 523, 524, 535, R SOC 525, ANTH 566, DEMOG 597, SOC 597; (4) seminars in population studies-ECON 516, SOC 522, 530, 531, 537, 560, 597, R SOC 530, 597, HD FS 531, 537, 577, AG EC 597, EDTHP 516, ANTH 597, H P A 525.

Particular courses may satisfy both the graduate major program requirements and those of the Demography option. The thesis supervisor must be a member of the graduate faculty recommended by the chair or the graduate officer of the program granting the degree and approved by the Demography Program Committee as qualified to supervise thesis work in demography. If a nonthesis option is available in the student's graduate program, a paper or report may be written in lieu of the M.A. or M.S. thesis. A student selecting the paper instead of a thesis must take an additional 3 credits in the Demography option.

Ph.D. Degree: For the Ph.D. degree with the Demography option, a minimum of 24 credits (a minimum of 27 credits for students who completed a non-thesis M.A. or M.S. program) is required in addition to the colloquium credits. For students entering with a master's degree from another institution, equivalent course credits may be accepted. The following minimum number of credits is required in each curriculum category: 3 credits of disciplinary perspective courses; 6 credits of demographic methods courses; 6 credits of seminars in demographic processes; 3 credits of seminars in population studies; and 6 credits of electives. Final course selection is determined in consultation with the doctoral committee.

The doctoral committee is recommended by the graduate major program granting the degree. A four-member committee is required for a dual-title degree program. The chair and at least one additional member of the doctoral committee must be members of the graduate faculty approved by the Demography Program Committee as qualified to supervise doctoral theses in demography. The Demography faculty members on the student's committee are responsible for administering an examination in demography that constitutes a portion of the comprehensive examination of the doctoral student in the program option. A dissertation on a demographic topic is required of students in the dual-title degree program.

Other Relevant Information

A Ph.D. minor in Demography is available for doctoral students in graduate programs other than the dual-title participating programs who find it advantageous to include demographic content, methods, and policy analysis in their program of study. The student's doctoral committee must approve the choice of this minor, and one member of the doctoral committee must be from the Demography faculty.

To qualify for a minor in Demography, students must satisfy the requirements of their graduate major program and take at least 15 credits in demography in addition to colloquium credits. A minimum of at least 3 credits each in (1) disciplinary perspective, (2) demographic methods courses, (3) seminars in demographic processes, and (4) seminars in population studies is required. Students must enroll in DEMOG 590 for 1 credit during each year enrolled in the program and in residence.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following award typically has been available to graduate students in this program:

HEWLETT FOUNDATION AND NICHO TRAINEESHIP AWARDS

Available to demography students from developing countries. NICHD traineeships available to Demography students from the United States.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Dual-Title Graduate Degree in History (HIST) and in Classics and Ancient Mediterranean Studies (CAMS)

Degrees Conferred

Students electing this program through the participating departments (History and CAMS) will earn a degree with a dual-title at both the PH.D. and the M.A. levels, i.e., Ph.D. in History with a dual-title in CAMS, or M.A. in History with a dual-title in CAMS.

The Graduate Faculty
Classics and Ancient Mediterranean Studies and History

David G. Atwill, Ph.D. (U of Hawaii) Assistant Professor of History and Religious Studies
Philip H. Baldi, Ph.D. (U of Rochester) Professor of Classics and Linguistics
Daniel C. Beaver, Ph.D. (Chicago) Associate Professor of History
Daniel William Berman, Ph.D. (Yale) Associate Professor of Classics and Ancient Mediterranean Studies
Lila C. Berman, Ph.D. (Yale) Assistant Professor of History and Religious Studies
William A. Blair, Ph.D. (Penn State) Professor of History; Director, Civil War Era Center
Chris Brady ,D. Phil. (Oxford) Associate Professor of Classics and Ancient Mediterranean Studies
Erica F. Brindley, Ph.D. (Princeton) Assistant Professor of History and Religious Studies
Jonathan E. Brockopp, Ph.D. (Yale) Associate Professor of Religious Studies and History
Kumkum Chatterjee, Ph.D. (Calcutta, India) Associate Professor of History
Gary S. Cross, Ph.D. (Wisconsin, Madison) Distinguished Professor of Modern History
Grace Delgado, Ph.D. (UCLA) Assistant Professor of History and Religious Studies
Alan Derickson, Ph.D. (California) Professor of History
Sophie C. M. deSchaepdrijver, Ph.D. (U of Amsterdam) Associate Professor of History
Greg A. Eghigian, Ph.D. (Chicago) Associate Professor of History
Garrett G. Fagan, Ph.D. (McMaster) Associate Professor of Classics and Ancient Mediterranean Studies and History
Cary F. Fraser, Ph.D. (U of Geneva) Associate Professor of African and African American Studies and History
Lori D. Ginzberg, Ph.D. (Yale) Professor of History and Women's Studies
Amy Greenberg, Ph.D. (Harvard) Professor of History and Women's Studies
Baruch Halpern, Ph.D. (Harvard) Professor of Ancient History, Jewish Studies, and Classics and Ancient Mediterranean Studies
Paul B. Harvey, Jr., Ph.D. (Pennsylvania) Associate Professor of Classics and Ancient Mediterranean Studies, History, and Religious Studies, and Jewish Studies
Brian Hesse, Ph.D. (Columbia) Professor of Jewish Studies and Ancient Mediterranean Studies
Ronnie Po-chia Hsia, Ph.D. (Yale) Edwin Erle Sparks Professor of History
Benjamin T. Hudson, Ph.D. (Oxford) Professor of History and Medieval Studies
Philip Jenkins, Ph.D. (Cambridge) Distinguished Professor of Religious Studies and History
Anthony E. Kaye, Ph.D. (Columbia) Assistant Professor of History
Ann Eloise Killebrew, Ph.D. (Hebrew University, Jerusalem) Associate Professor of Classics and Mediterranean Studies, Jewish Studies, and Anthropology
Gerald Neil Knoppers, Ph.D. (Harvard) Sparks Professor of Classics and Ancient Mediterranean Studies and Jewish Studies
Tijana Krstic, Ph.D. (Michigan) Assistant Professor of History
Joan B. Landis, Ph.D., (NYU) Professor of Women's Studies and History
Daniel L. Letwin, Ph.D., (Yale) Associate Professor of History
Sally A. McMurry, Ph.D., (Cornell) Professor of American History
Jennifer L. Mittelstadt, Ph.D., (Michigan) Assistant Professor of History and Women's Studies
Wilson J. Moses, Ph.D., (Brown) Professor of American History
Mark Munn, Ph.D., (Pennsylvania) Professor of Greek History and Greek Archaeology, and Classics and Ancient Mediterranean Studies
Mark E. Neely, Jr., Ph.D., (Yale) McCabe Greer Professor of the ERa of the American Civil War
Sylvia Neely, Ph.D., (Notre Dame) Associate Professor of History
On-Cho Ng, Ph.D., (Hawaii, Manoa) Associate Professor of History
William A. Pencak, Ph.D., (Columbia) Professor of American History
Carol Reardon, Ph.D., (Kentucky) Professor of History
Donald Redford, Ph.D., (U of Toronto) Professor of Classics and Ancient Mediterranean Studies
Matther Restall, Ph.D., (California, Los Angeles) Sparks Professor of History
A.G. Roeber, Ph.D., (Brown) Professor of Early Modern History and Religious Studies
Adam Rome, Ph.D., (Kansas) Associate Professor of History
Anne Carver Rose, Ph.D., (Yale) Professor of History, Religious Studies, and Jewish Studies
Paul Lawrence Ross, Ph.D., (Sorbonne) Professor of European History and Mitrani Professor of Jewish Studies
Aaron Rubin, Ph.D., (Harvard) Assistant Professor of Classics and Ancient Mediterranean Studies, Jewish Studies, and Comparative Literature
Gonzala Rubio, Ph.D., (Johns Hopkins) Associate Professor of Classics and Ancient Mediterranean Studies, and History and Religious Studies
Janina Safran, Ph.D., (Harvard) Associate Professor of History
Mrinalini Sinha, Ph.D., (SUNY, Stony Brook) Research Professor of History and Women's Studies
Gregory Smits, Ph.D., (Southern California) Associate Professor of History
Catherine Wanner, Ph.D., (Columbia) Assistant Professor of History and Religious Studies
Stephen Wheeler, Ph.D., (Princeton) Associate Professor of Classics
Nan E. Woodruff, Ph.D., (Tennessee) Professor of History

This dual-title degree program will increase the intellectual rigor, breadth, and depth of graduate work in history through immersion in the disciplinary fields covered by the Department of Classics and Ancient Mediterranean Studies: the philology and literature of ancient Mediterranean languages; the history and material cultures of those societies.

This dual-title program will thus provide a context in which history graduate students will learn how to synthesize knowledge within and across traditional disciplinary boundaries. In addition, this dual-title degree program will provide qualified history graduate students opportunities for instructional training encouraging an interdisciplinary approach to teaching.

The primary advantages of this dual-title program include the intellectual and academic advantages and benefits of interdisciplinary study, as well as the enhancement of the reputation of the history department through an innovative program, leading to recruitment of highly qualified history graduate students, and an improved placement of doctoral graduates in the highly-competitive field of ancient history.

This dual-title degree program does not duplicate any other degree program in the University.

Admission Requirements

Students must first be admitted to the graduate program of the Department of History; only after admittance by the Department of History will history graduate students be eligible to apply for graduate study in the dual-title program. An admissions committee of CAMS faculty will review applications for graduate study in the dual-title program. The dual-title program will follow the timetable and admissions requirements of the Department of History. Applicants to this dual-title degree program should have a junior/senior cumulative average of at least a 3.30 (on a 4.00 scale) and appropriate academic preparation. Preference will be given to those candidates whose undergraduate record demonstrates expertise in ancient Mediterranean studies (history; literature; archaeology) and proficiency to the 12th credit level in one or more ancient languages. Where applicable, a minimum GPA of 3.5 (on a 4.00 scale) is requisite for graduate work previously undertaken. Prospective students seeking admission to this dual-title degree program are required to write a statement of purpose that addressees the ways in which their research and profession goals will reflect an interest in interdisciplinary research in history and the disciplines and fields included in the CAMS dual-title program.

Degree Requirements

This dual-title degree will have requirements in addition to those for graduate degrees in History. Those requirements include additional course work in ancient languages, additional components to the candidacy and comprehensive examinations at the doctoral level, and the completion of CAMS-related thesis at the master's level (optional; see below) and doctoral levels (compulsory). A dual-title M.A. committee and/or a Ph.D. (doctoral) committee, chaired by faculty closely related to the student's field of interest, will supervise and direct the graduate study of each student accepted into this dual-title program. That committee will, as pertinent, also serve as the student's candidacy committee and, in accordance with Graduate Faculty policies, serve as the student's doctoral Comprehensive Examination committee. Students will be expected to attend and participate actively in the CAMS regularly-scheduled colloquia.

Master's Degree

33 credits, including 18 credits at the 500-level and above.
6 required credits in CAMS: CAMS 592: CAMS Proseminar; CAMS 593: Research Seminar.
6 required credits in 500-level History Seminars (e.g., History 502, 503, 504, 505).
Students electing to complete a thesis must enroll for 6 credits at the 600-level.
Students electing to submit research papers (see the next paragraph), in lieu of a thesis, must enroll for additional 500-level credits to fulfill the Graduate Faculty requirement of 18 credits at the 500-level or above.
9 additional credits in 500 or 400-level work in CAMS courses.

Ph.D. Degree

6 required credits in CAMS: CAMS 592:CAMS Proseminar; CAMS 593: Research Seminar
6 required credits in 500-level History seminars (e.g., History 502, 503, 504, 505)
9 additional credits (a minimum of 6 should be at the 500-level) in CAMS courses or History courses relevant to the student's research interests.
Reading knowledge of a second ancient language--proficiency to be demonstrated through 400/500 level course work in that language as instructed by CAMS language faculty--or competence, demonstrated in course work or field study as approved by the student's dual-title doctoral committee, in a research technique in a technical field relevant to the dual-title program: e.g., archaeology, art history, anthropology, historical linguistics, literary studies and analysis. Following Department of History guidelines, the comprehensive examination must take place in either spring or summer of the second year (if entering as a M.A./Ph.D. student) or in either spring or summer of the second year (if entering as a Ph.D. only student). Dual-title students may receive an additional one to two semesters of coursework prior to taking the examination only if the student's dual-title doctoral committee determines that need. That committee will then request the written approval of the Department of History's Director of Graduate Studies.

Dissertation on a CAMS-related topic is required of students in this dual-title degree program, as approved by the student's dual-title doctoral committee.

Communications and English Competency Requirements
The student will fulfill the English Competency requirements specified by the History department. Master's students will fulfill a requirement of reading knowledge of one ancient language; Ph.D. candidates will fulfill a requirement of reading knowledge of two ancient languages or of one ancient language and competence in a research technique. Language proficiency will be demonstrated through 400/500 level work in the languages concerned, as instructed by CAMS faculty. Students will be expected to acquire and demonstrate reading proficiency in those modern foreign languages (e.g., but not exclusively, French, German, Italian) appropriate to their research interests, as identified in consultation with their dual-title master's and/or doctoral committee.

Candidacy
In order to be admitted to doctoral candidacy in this dual-title program, students must meet the Ph.D. candidacy requirements specified by the History and CAMS dual-title programs. A Ph.D. candidacy examination is required of all students pursuing a doctorate in this dual-title program. The examination may be taken on completion of at least 18 credits of acceptable graduate work at Penn State and must be taken by the third semester of full-time study in this doctoral program. A single candidacy examination will contain elements of History and the participating program (CAMS). Following successful passage of the candidacy exam, a program plan will be submitted to the Departments of History and the participating program after consultation with members of the student's doctoral committee.

Committee Composition
For the dual-title M.A., the student's dual-title master's committee will include, at a minimum, one CAMS faculty member. For the dual-title Ph.D., one CAMS faculty member, at a minimum, will be a member of the dual-title doctoral committee. The chair of the committee may represent both the History and the CAMS dual-title programs. Graduate Faculty requirements stipulate that a minimum of four graduate faculty must constitute a doctoral committee of which at least two members of the doctoral committee must be from the major program and at least one member must be the outside member. The outside member of the doctoral committee of a dual-title student must have no budgetary connection either to History or to CAMS.

Comprehensive Exams
Dual-title students must successfully pass a comprehensive examination, as required by History. The comprehensive examination must

take place in either spring or summer at the end of the student's third year (if entering as a master's/Ph.D. student) or in either spring or summer of the second year (if entering as a Ph.D. only student); dual-title students may receive an additional one or two semesters of coursework prior to taking the examination only by petition from the student's dual-title doctoral committee and the written approval of the participating program's Director of Graduate Studies. The comprehensive examination must reflect the dual-title content or the History and CAMS dual-title programs. The participating program faculty on the student's dual-title doctoral committee are responsible for administering the part of the comprehensive examination covering CAMS topics. The comprehensive exam will have written and oral components. The CAMS portion of this examination will focus on those CAMS-related fields the student has studied as well as the topic of the proposed Ph.D. The comprehensive examination will therefore cover the research field, as well as the other historical fields, ancient languages, and research techniques the student has studied.

Dissertation
A dissertation on a CAMS topic is required of students in this dual-title degree program. The CAMS topic of the dissertation will be approved by the student's dual-title doctoral committee.

Student Aid

Graduate assistantships are available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin.

Courses

Graduate courses carry number from 500-599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate language requirements when taken by graduate students. Courses below the 400 level do not qualify. A graduate student may register for or audit these lower-level courses in order to make up deficiencies, but not to meet requirements for an advanced (graduate) degree.

Degree Conferred:

M.Ed.

The Graduate Faculty

- Eliza Richardson, Ph.D. (MIT), Assistant Professor of Geosciences, Program Manager
- Richard Alley, Ph.D. (UW Madison), Evan Pugh Professor of Geosciences
- Sridhar Anandakrishnan, Ph.D. (UW Madison), Associate Professor of Geosciences
- Charles Ammon, Ph.D. (Penn State), Associate Professor of Geosciences
- Michael Arthur, Ph.D. (Princeton), Professor of Geosciences
- David Babb, Ph.D. (Penn State), Assistant Professor of Meteorology
- Timothy Bralower, Ph.D., (UC San Diego), Professor and Head, Department of Geosciences
- Roger Downs, Ph.D. (Bristol), Professor of Geography
- Kevin P. Furlong, Ph.D. (Utah), Professor of Geosciences and Director, EMS Environment Institute Natural Hazards Center
- Tanya Furman, Ph.D. (MIT) Associate Professor of Geosciences
- Russell W. Graham, Ph.D. (UT Austin), Associate Professor of Geosciences and Director, EMS Museum
- Peter J. Heaney, Ph.D. (Johns Hopkins), Associate Professor of Geosciences
- Paul Howell, Ph.D. (Cambridge), Professor of Materials Science and Engineering
- James F. Kasting, Ph.D. (Michigan) Professor of Geosciences
- R. Allen Kimel, Ph.D. (Penn State), Assistant Professor of Materials Science and Engineering
- Eric Kirby, Ph.D. (MIT), Assistant Professor of Geosciences
- Lee Kump, Ph.D. (South Florida), Professor of Geosciences
- Chris Marone, Ph.D. (Columbia), Professor of Geosciences
- Jonathan Mathews, Ph.D. (Penn State), Assistant Professor of Energy and Mineral Engineering
- Scott P. McDonald, Ph.D. (Michigan), Professor of Geosciences
- Andrew A. Nyblade, Ph.D. (Michigan), Associate Professor of Geosciences
- Christopher Palma, Ph.D. (Virginia), Outreach Fellow, Science
- Demian M. Saffer, Ph.D. (UC Santa Cruz), Assistant Professor of Geosciences
- Kamini Singha, Ph.D. (Stanford), Assistant Professor of Geosciences
- Timothy White, Ph.D. (Penn State), P.G., Senior Research Associate, EMS Earth and Environmental Systems Institute

The M.Ed. in Earth Sciences program is designed for secondary science teachers who seek to enrich their knowledge and practice through rigorous courses and individual projects supervised by Penn State faculty members. Combining graduate courses from academic departments in Penn State's College of Earth and Mineral Sciences, College of Education, and Eberly College of Science, the curriculum will prepare teachers to help students in grades 7 through 12 master educational objectives related to Earth and space science, as specified in National Science Education Standards (National Academy of Sciences, 1996). To accommodate working teachers who are only able to study part-time and at a distance, courses will be offered online through Penn State's World Campus. Fall, Spring, and Summer semester offerings will be available. Students will be granted licenses to use the courseware modules developed for the M.Ed. in Earth Sciences program in their secondary classrooms.

Admission Requirements

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the internet-based test. The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a masters degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British west Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, The United States, and Wales.

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

Students may initially enroll in M.Ed. in Earth Sciences classes as non-degree graduate students. Up to 15 credits earned in non-degree status may be counted toward the M.Ed. in Earth Sciences degree.

Master's Degree Requirements

The M.Ed. in Earth Sciences degree is conferred upon students who earn a minimum of 30 credits while maintaining an average grade of 3.0 or better in all course work, including at least 18 credits at the 500 level or above (with at least 6 credits at the 500 level), and who complete a quality culminating individual project in consultation with a graduate adviser. Students will have the opportunity to participate in face-to-face field experiences or workshops at University Park or other locations during Summer sessions.

Student Aid

Graduate assistantships are not available. Financial aid opportunities for part-time students who participate through the World Campus are discussed at http://worldcampus.psu.edu/StudentServices_Paying.shtml.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The Graduate Faculty

- § Marc D. Abrams, Ph.D. (Michigan State) *Professor of Forest Ecology and Physiology*
- Mary Barbercheck, Ph.D. (California, Davis) *Professor of Entomology*
- Paul Bartell, Ph.D. (Virginia) *Assistant Professor of Avian Biology*
- Iliana Baums, Ph.D. (Miami) *Assistant Professor of Biology*
- § Stephen J. Beckerman, Ph.D. (New Mexico) *Associate Professor of Anthropology*
- Ottar Bjornstad, Ph.D. (Oslo) *Assistant Professor of Entomology*
- Victoria Braithwaite-Read, D.Phil. (Oxford, UK) *Professor of Fisheries and Biology*
- § Margaret C. Brittingham, Ph.D. (Wisconsin) *Associate Professor of Wildlife Resources*
- § Robert P. Brooks, Ph.D. (Massachusetts) *Professor of Wildlife and Wetlands*
- # Mary Ann Bruns, Ph.D. (Michigan State) *Assistant Professor of Agronomy/Soil Microbial Ecology*
- Tomas Carlo-Joglar, Ph.D. (Colorado) *Assistant Professor of Biology*
- Hunter Carrick, Ph.D. (Michigan) *Assistant Professor of Forest Resources*
- Charles Andrew Cole, Ph.D. (Southern Illinois) *Assistant Professor of Landscape Architecture and Ecology*
- William S. Curran, Ph.D. (Illinois) *Professor of Weed Science*
- Rick Day, Ph.D. (Penn State) *Associate Professor of Soil Science and Environmental Information Systems*
- Dennis Decoteau, Ph.D. (Massachusetts) *Professor of Horticulture and Plant Ecosystem Health*
- Consuelo M. DeMoraes, Ph.D. (Georgia) *Assistant Professor of Entomology*
- Claude dePamphilis, Ph.D. (Georgia) *Associate Professor of Biology and Life Sciences Consortium*
- Duane Diefenbach, Ph.D. (Georgia) *Adjunct Assistant Professor of Wildlife Ecology*
- Patrick Drohan, Ph.D. (Penn State) *Assistant Professor of Pedology*
- David M. Eissenstat, Ph.D. (Utah State) *Professor of Woody Plant Physiology; Coordinator, Physiological Ecology Option*
- § C. Paola Ferreri, Ph.D. (Michigan State) *Assistant Professor of Fisheries Management*
- James Finley, Ph.D. (Penn State) *Associate Professor of Forest Resources*
- Charles R. Fisher, Jr., Ph.D. (California, Santa Barbara) *Professor of Biology*
- * Shelby J. Fleischer, Ph.D. (Auburn) *Associate Professor of Entomology*
- Robert Gallagher, Ph.D. (Ohio State) *Associate Professor of Cropping Systems*
- § Michael R. Gannon, Ph.D. (Texas Tech) *Associate Professor of Biology*
- Bryan T. Grenfell, Ph.D. (Sheffield, UK) *Professor of Biology*
- § Lauraine K. Hawkins, Ph.D. (New Mexico) *Assistant Professor of Biology*
- § S. Blair Hedges, Ph.D. (Maryland) *Associate Professor of Biology*
- Dale Holen, Ph.D. (Wisconsin, Milwaukee) *Associate Professor of Biology*
- Peter Hudson, Ph.D. (Oxford, UK) *Willaman Professor of Biology*
- Scott Isard, Ph.D. (Indiana) *Professor of Aerobiology*
- § Heather D. Karsten, Ph.D. (Cornell) *Assistant Professor of Crop Production/Ecology*
- Jason P. Kaye, Ph.D. (Colorado) *Assistant Professor of Soil Biogeochemistry*
- Margot Kaye, Ph.D. (Colorado State) *Assistant Professor of Forest Ecology*
- *§ K. C. Kim, Ph.D. (Minnesota) *Professor of Entomology*
- Roger Koide, Ph.D. (California, Berkeley) *Professor of Horticulture Ecology*
- Tracy Langkilde, Ph.D. (Sydney) *Assistant Professor of Biology*
- Henry Lin, Ph.D. (Texas A&M) *Assistant Professor of Crop and Soil Science*
- Jonathan P. Lynch, Ph.D. (California, Davis) *Associate Professor of Plant Nutrition*
- Jennifer Macalady, Ph.D. (Caifornia, Davis) *Assistant Professor of Geosciences*
- Carolyn G. Mahan, Ph.D. *Associate Professor of Biology; Co-coordinator, Environmental Studies Program, Penn State Altoona*
- James H. Marden, Ph.D. (Vermont) *Associate Professor of Biology*
- Mark Mescher, Ph.D. (Georgia) *Assistant Professor of Entomology*
- David A. Mortensen (North Carolina State) *Associate Professor of Crop and Soil Sciences*
- §* Wayne L. Myers, Ph.D. (Michigan) *Associate Professor of Forest Biometrics*
- Nancy Ostiguy, Ph.D. (Cornell) *Senior Research Associate in Entomology*
- Susan Parks, Ph.D. (MIT/Woods Hole Oceanographic Inst) *Research Associate*
- * Ganapati P. Patil, Ph.D. (Michigan) *Distinguished Professor of Mathematical Statistics*
- Eric Post, Ph.D. (Alaska) *Assistant Professor of Biology*
- Andrew Read, D.Phil. (Oxford, UK) Professor of Biology and Entomology
- §* Michael C. Saunders, Ph.D. (Georgia) *Associate Professor of Entomology*
- Robert Shannon (Indiana) *Associate Professor of Agricultural Engineering*
- Beth Shapiro, D.Phil. (Oxford, UK) *Schaffer Career Development Assistant Professor of Biology*
- William E. Sharpe, Ph.D. (West Virginia) *Professor of Forest Hydrology*
- Katriona Shea, Ph.D. (London) *Assistant Professor of Theoretical Applied Ecology, Life Sciences Consortium*
- Erica Smithwick, Ph.D. (Oregon State) *Assistant Professor of Geography*
- § Jay R. Stauffer, Jr., Ph.D. (Virginia Tech) *Professor of Ichthyology; Coordinator, Conservation Biology Option*
- § Kim C. Steiner, Ph.D. (Michigan State) *Professor of Forest Biology*
- § Andrew G. Stephenson, Ph.D. (Michigan) *Professor of Biology*
- Kenneth R. Tamminga, M.P. (Queens, Canada) *Associate Professor of Landscape Architecture*
- § Alan H. Taylor, Ph.D. (Colorado) *Associate Professor of Geography*

- John Tooker, Ph.D. (Illinois, Urbana-Champaign) *Assistant Professor of Entomology*
- James Tumlinson, Ph.D. (Mississippi) *Ralph O. Mumma Professor of Entomology*
- § Christopher F. Uhl, Ph.D. (Michigan State) *Professor of Biology; Chair, IGDP in Ecology*
- Tyler Wagner, Ph.D. (Michigan State) Adjunct Assistant Professor of Fisheries Ecology
- Denice Wardrop, Ph.D. (Penn State) *Assistant Director, Penn State Cooperative Wetlands Center*
- Peter Wilf, Ph.D. (Pennsylvania) *Associate Professor of Geosciences; John T. Ryan Jr. Faculty Fellow*
- Eric Zenner, Ph.D. (Oregon State) *Associate Professor of Silviculture*

Note: Quantitative Ecology option faculty are designated by (*), Microbial Ecology option faculty by (#), Conservation Biology option faculty by (§), and Physiological Ecology option faculty by (). See text for further explanation.

This intercollege program emphasizes the properties of ecosystems by focusing attention on interactions of single organisms, populations, and communities with their environment. It is designed to give students a basic understanding of ecological theory and hypothesis testing and is complementary to other environmental programs that emphasize the human role in ecosystems.

The program is administered by a committee drawn from faculty members in several departments and colleges of the University. This committee and its chair are appointed by the dean of the Graduate School. The instructional staff is composed of participating faculty in those departments offering graduate courses in fields closely allied to ecology.

The advisory committee is selected by the candidate and his/her adviser and approved by the Graduate School. The committee has the responsibility for determining the course program and research acceptable in satisfying degree requirements.

Four options for specialization are offered: Quantitative Ecology, Microbial Ecology, Conservation Biology and Physiological Ecology. Students are not required to select an option. The quantitative ecology option includes mathematical and statistical modeling and applications of statistics to experimental design and data analysis. The microbial ecology option includes basic aquatic and soil microbial ecology and applications to recycling of materials and release of genetically engineered organisms. The conservation biology option is concerned with problems of maintaining the rapidly disappearing diversity of organisms and their habitats, and the global reservoir of genetic diversity that these organisms represent. The physiological ecology option is concerned primarily with the function and performance of organisms in their environment. Each option entails extra course requirements plus a thesis directed by an ecology faculty member in the option. Additional information can be obtained from the option coordinators.

Admission Requirements

Scores from the Grade Record Examination (GRE), including verbal, quantitative, and advanced biology test, are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*. Candidates should have a strong science background, including chemistry through organic chemistry, mathematics through calculus, physics, and biology. A limited number of such courses can be made up while the student is pursuing graduate student.

Students with a background in another discipline that has potential value to original ecological work will be seriously considered. A junior/senior grade-point average of 3.00 or better (on a 4.00 scale) is required.

Students are strongly urged to choose their research interests and initiate communication with the relevant faculty member(s) before applying for admission. A student will not be admitted without the commitment of a faculty member to serve as the student's research adviser. Teaching and research assistantships are available only through the student's faculty adviser.

The top sheet (white copy) of the application and application fee are to be sent to the Graduate School. The applicant should forward the following directly to the program chair: (1) pink copy of the application; (2) three or more letters of recommendation regarding the student's academic and professional promise; (3) a concise one-page statement describing the student's goals both within the program and in professional life; and (4) GRE scores (general test and the subject test in biology) Specific inquiries about the Ecology Program may be directed to the program chair. Applications should be submitted by February 1 for summer or fall semester admission.

Master's Degree Requirements

In addition to Graduate School requirements, the instructional program includes two graduate core courses in ecology (one each in two of the three core areas: population ecology, community/ecosystem ecology, and physiological ecology), an advanced 3-credit statistic course, two credits of colloquium, a minimum of six thesis credits, breadth courses selected by the student in consultation with the research adviser and research committee, and a thesis research project directed by the student's adviser. A nonthesis option is available for the M.S. degree, at the adviser's discretion.

Doctoral Degree Requirements

In addition to Graduate School requirements, the instructional program includes three graduate core courses in ecology (one each of three core areas: population ecology, community/ecosystem ecology, and physiological ecology), two advanced 3-credit statistics courses, 4 credits of colloquium, breadth courses selected by the student in consultation with the research adviser and research committee, a minimum of 15 thesis credits, and a thesis research project directed by the student's adviser.

The communication and foreign language requirement for the Ph.D. degree may be satisfied by strong performance in two semesters of one foreign language or the equivalent. Both the candidacy and comprehensive examinations will be written and oral.

Biogeochemistry Dual-Title Degree Program

Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework from an approved list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. A single candidacy examination that includes biogeochemistry will be administered for admission into the student's Ph.D. program, as well as the biogeochemistry dual-title. The structure and timing of this exam will be determined jointly by the dual-title and major program. The student's doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Watershed Stewardship Option

The Graduate Option in Watershed Stewardship is intended to provide enhanced educational opportunities for students with an interest in water resources management who are enrolled in the Intercollege Graduate Degree Program in Ecology at the University Park campus. The objective of the Graduate Option in Watershed Stewardship is to educate students to facilitate team-oriented, community-based watershed management planning directed at natural resources conservation and environmental problems encountered in Pennsylvania communities, especially non-point source water pollution. The Graduate Option in Watershed Stewardship requires 22 credits of graduate course work: 12 credits of breadth courses, 2 credits of Watershed Stewardship Seminar courses (FOR 591A and FOR 591B or LARCH 510.2), and 8 credits of Watershed Stewardship Practicum I and II courses (FOR 570 and FOR 571 or LARCH 540.2 and LARCH 550.2). Breadth courses will consist of three graduate credits of course work from each of four subject matter areas: (1) water resources science, (2) social science, public policy and economics, (3) humanities, and (4) communications and design. In the watershed stewardship practicum courses, students work in teams with community, government, and business leaders to analyze and understand natural resources and ecological issues and creatively synthesize appropriate solutions in the form of a written watershed management plan.

Other Relevant Information

Detailed descriptions of courses now available for students majoring in ecology may be found under the offerings of several ecologically oriented departments.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Educational Leadership (EDLDR)

Program Home Page (Opens New Window)

WILLIAM HARTMAN, *In Charge of Graduate Programs in Educational Leadership*
204 Rackley Building
814-863-3765
EDLDR@psu.edu

Degrees Conferred:

Ph.D., D.Ed., M.S., M.Ed.

Graduate work in the Educational Leadership program encompasses two major strands or paths. The first strand focuses on those who want to engage in a wide variety of leadership roles within and directly affecting schools and districts. These roles include, but are not limited to teacher leadership, instructional leadership, principal leadership, and district-level leadership. This strand may also lead to certification and/or letters of endorsement in supervision, the principalship or the superintendency. The second strand focuses on those who want to exercise leadership roles in educational policy arenas and/or engage in educational research. Possible roles include: intermediate unit officials, state and federal agency administrators and staff, professors of educational administration, and research and development personnel. The principalship certification is also available at Penn State Great Valley and Penn State Harrisburg.

Admission Requirements

Scores from the Miller Analogies Test (MAT) are required for admission to the doctoral programs in Educational Leadership. When the MAT is not available (e.g., some overseas locations), Graduate Record Examinations (GRE) scores or Graduate Management Admissions Test (GMAT), may be substituted. At the discretion of a graduate program, a student may be admitted provisionally. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Applicants to the M.Ed. and M.S. degree programs must present evidence of at least a 2.60 grade-point average in the last two years of undergraduate work. A grade-point average of 3.50 in prior graduate work is required of those desiring admission to enter a doctoral program. The best-qualified students will be accepted up to the number of spaces available. Special backgrounds and experiences may allow for conditional admission to those not meeting stated criteria.

More details concerning the degree and certification programs are presented in a prospectus that is available upon request.

Students interested in pursuing the on-line M.Ed. in Educational Leadership with a Teacher Leadership option must first be admitted to Penn State's Graduate School. The requirements listed below are in addition to general Graduate School requirements as stated in the GENERAL INFORMATION section of the *Graduate Bulletin*. Scores from the Miller Analogies Test (MAT), the Graduate Record Examinations (GRE), or some other pertinent standardized test are required for admission to all graduate programs in Educational Leadership, including the proposed online M.Ed. with an option in Teacher Leadership.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with exceptions noted below.

The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test or a total score of 80 with a 20 on the speaking section for the internet-based test. Applicants with IBT speaking scores between 15 and 19 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work.

The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States and Wales. Complete details concerning the TOEFL/IELTS requirements are available at the Applications and Admission Procedures section of the Graduate Bulletin.

In addition to standardized test scores, the Educational Leadership Program requires all graduate program applicants to submit three reference letters, official copies of undergraduate and graduate transcripts, a short review of a professional journal article of the applicant's choosing (along with a copy of the actual article), and a current resume or CV. Applicants must present evidence of at least a 3.0 grade-point average in the last two years of undergraduate work. The best-qualified students will be accepted up to the number of spaces available. Special backgrounds and experiences may allow for provisional admission to those not meeting all of the above criteria.

Master's Degree and Certification Requirements

All candidates for the M.Ed. and M.S. degrees will complete a minimum of 30 graduate credits. Certification for various public school administrative positions requires additional graduate work beyond the master's degree and such requirements as specified in the program prospectus.

M.Ed. students must submit a master's paper. M.S. degree students are expected to submit a thesis.

The M.Ed. in Educational Leadership with an Option in Teacher Leadership via World Campus and in residence at Penn State University Park is a 30-credit M.Ed. program with 2 designated "core" courses and 6 required courses for a total of 24 credits. The two designated "core" courses for this M.Ed. option are: (1) EDLDR 560 Principles of Instructional Supervision and (2) EDLDR 559 School Improvement. Six other courses are required and include EDLDR 563, EDLDR 553, C I 501, EDLDR 551, EDPSY 421, and EDLDR 596. Six additional credits (2 courses) from outside of the Educational Leadership Program are considered electives in the proposed Teacher Leadership option.

The resident M.Ed. in Educational Leadership (non-option) requires 30 credits, including the 2 "core" courses noted above and 6 required courses for a total of 24 credits. The two designated "core" courses for the M.Ed. non-option are: (1) EDLDR 560 Principles of Instructional Supervision and (2) EDLDR 559 School Improvement. The six required courses are drawn from several "strands" or areas of concentration offered, including School Leadership, Professional Development, Curriculum, School Policy, & Change and an "Open" area. Determination of the specific courses is dependent on: (1) the "strand" or area of concentration selected by the student and (2) advisement and guidance from the assigned academic advisor.

Credits toward a M.Ed. in Educational Leadership will be from graduate level courses - 400 or above - with a minimum of 18 credits

earned from courses at or above the 500-level. At least six (6) credits must be completed outside of the EDLDR Program area. An additional Program requirement states that all master's degrees (either the M.S. or the M.Ed.) must contain a total of at least 18 credits of EDLDR course work.

Each student will complete the M.Ed. in Educational Leadership with an option in Teacher Leadership via World Campus in conjunction with a designated EDLDR faculty member and in connection with the EDLDR 596 course work. This is the culminating course of the program and focuses on an application of course information in the form of an action research project. This project will be planned in cooperation with the EDLDR faculty member who serves as the student's project advisor and must reflect an appropriate degree of graduate-level scholarship, as determined by the advisor.

The master's project is a completed piece of work representing the culmination of academic work toward the M.Ed. degree.

Doctoral Degree Requirements

Candidates for the D.Ed. degree are required to spend at least one semester and one summer session consecutively in full-time residence during a twelve-month period. Ph.D. candidates are strongly encouraged to spend two academic years in residence, but must spend at least two consecutive semesters in residence. D.Ed. candidates may satisfy the residence requirement in another manner consistent with Graduate School policy, including attendance at the day-long seminars offered weekly every other academic year. Candidates for all degrees are required to combine work in the social sciences and humanities with the specialization in Educational Leadership.

Expectations of candidates for both the D.Ed. and Ph.D. are high in the field of research competence and require the ability to identify and conceptualize a research problem for the thesis. The D.Ed. is more appropriate for those with career goals in administration and policy making. The Ph.D. is more appropriate for those with career goals in research and scholarship.

After the doctoral student has been admitted to a doctoral program and has completed forty to forty-five hours beyond the bachelor's degree, his or her name is usually submitted for candidacy. After a student is admitted to candidacy for the doctoral degree, he or she takes the comprehensive written and oral examinations. After those are successfully completed, the student presents a thesis problem on a significant, researchable topic, evidenced by a prospectus to the doctoral committee for review.

Other Relevant Information

American Indian students participate in a special administrator preparation program. Foreign students can work on research topics in their home nations.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- Jeanne T. Amlund, Ph.D. (Arizona State) Assistant Professor of Educational Psychology
- Robert L. Hale, Ph.D. (Nebraska) Professor of Education
- Jonna Kulikowich, Ph.D. (Texas A&M) Professor of Education
- Pui-Wa Lei, Ph.D. (Iowa) Assistant Professor of Education
- Bonnie J. F. Meyer, Ph.D. (Cornell) Professor of Educational Psychology
- P. Karen Murphy, Ph.D. (Maryland) Associate Professor of Education
- Rayne A. Sperling, Ph.D. (Nebraska) Associate Professor of Education
- Robert J. Stevens, Ph.D. (Illinois) Associate Professor of Educational Psychology
- Hoi K. Suen, Ed.D. (Northern Illinois) Professor of Educational Psychology
- Peggy Van Meter, Ph.D. (Maryland) Associate Professor of Education

The graduate program in Educational Psychology focuses on the study of learning, instruction, and measurement across the life span. The learning and instruction emphasis applies the study of cognitive psychology to research on learning and instruction in applied settings like schools. The course of study provides a strong foundation in psychological theory, principles related to instructional applications, and quantitative methodology. The measurement emphasis applies cognitive psychology and theories of measurement to test design, instrument construction, scale analysis, and measurement theory. The Educational Psychology program emphasizes the use of rigorous quantitative methodology in the scientific study of learning, instruction, and measurement in applied settings. Typically this program prepares individuals for professions in universities, research institutions, government agencies, and industry. Individuals interested in more clinical applications of psychology, such as counseling psychology or school psychology should contact those specific graduate programs in the University.

Admission Requirements

Applicants are required to submit scores from the Graduate Record Examinations (GRE) verbal, quantitative, and analytic writing. Typically applicants have at least a 3.0 junior/senior grade-point average (on a 4.0 point scale) and broad undergraduate background including college level mathematics. Exceptions may be made for students with special backgrounds, abilities, and interests. Applicants with a master's degree will be required to show strong performance in their graduate program. Applicants will also supply letters of reference and a written statement of their professional goals. The requirements specified here are in addition to the Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin.*

Master's Degree Requirements

Students in the master's degree program are required to take 30 credits, including core courses EDPSY 406, 421, 450, and 475. Students will also take at least one foundational course in educational theory, philosophy, or individual differences. The remaining credits will be taken in a way to develop the student's area of specialization, in consultation with the student's adviser. The program offers two options, M.S. with a thesis, and an M.S. without a thesis. Students wishing to go on to the Ph.D. are required to complete the M.S. with thesis option.

Doctoral Degree Requirements

Students in the doctoral degree program will select a major emphasis in either learning and instruction or measurement. Students in the doctoral program must complete the core courses as listed in the master's program. All students must also have at least one advanced-level course in learning and in measurement. Students will also have three courses spread across the foundational areas of educational theory and history, philosophy, and individual differences. Students must pass a candidacy examination to enter into the doctoral program, assessing their mastery of the content in the core courses. Students must also pass a comprehensive examination assessing their areas of specialization near the end of their doctoral studies. Students are also expected to develop and defend a theoretically based scholarly research proposal that will become their dissertation project. The doctoral program culminates in the production of and defense of the student's dissertation that is expected to be a publishable quality independent research study. All of these requirements are specified in more detail in the student handbook.

Student Aid

All applicants are considered for Graduate Assistantships that are available in the program. Typically these assistantships provide tuition waiver plus a stipend.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not

to meet requirements for an advanced degree.

Educational Theory and Policy (EDTHP)

Program Home Page (Opens New Window)

DAVID GAMSON, *In Charge of Graduate Programs in Educational Theory and Policy*
300 Rackley Building
814-865-2583
EDTHP@psu.edu

Degrees Conferred:

Ph.D., M.A.

The Graduate Faculty

- David P. Baker, Ph.D. (Johns Hopkins) Professor of Education and Sociology
- Katerina Bodovski, Ph.D. (Penn State) Assistant Professor of Education
- David Gamson, Ph.D. (Stanford) Associate Professor of Education
- Henry C. Johnson, Jr., Ph.D. (Illinois) Professor Emeritus of Education
- Mindy L. Kornhaber, Ed.D. (Harvard) Associate Professor of Education
- Gerald K. LeTendre, Ph.D. (Stanford) Professor of Education
- Dana Mitra, Ph.D. (Standford) Assistant Professor of Education
- Suet-Ling Pong, Ph.D. (Chicago) Professor of Education, Demography, and Sociology
- Madhu S. Prakash, Ph.D. (Syracuse) Professor of Education
- Liang Zhang, Ph.D. (Cornell) Assistant Professor of Education

The master's and doctoral programs in Educational Theory and Policy are designed primarily to prepare persons for careers in education policy development and analysis. Students in the program may choose to emphasize policy development and analysis either in the United States or in terms of a comparative and international perspective. Additionally, individualized multidisciplinary programs of study in the foundation areas of education (history, philosophy, sociology, and comparative/international) and in the social sciences, management sciences, and/or humanities will be designed jointly by the student and the program faculty. It is anticipated that graduates will find employment in state departments of education, ministries of education, federal and international education agencies, academic institutions, and various professional associations.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Students with a 2.75 grade-point average will be considered for admission to the master's program, and with a 3.00 grade-point average at the master's level for the Ph.D. program. Exceptions to the minimum grade-point average may be made for students with special backgrounds, abilities, and interests.

Master's Degree Requirements

Candidates who seek an M.A. in Educational Theory and Policy shall complete programs that will include studies in social theory, policy, and planning or in the social sciences or humanities. A thesis is required.

Doctoral Degree Requirements

Candidates who seek a Ph.D. in Educational Theory and Policy shall complete programs that will include studies in social theory, policy, and planning, or in the social sciences or humanities.

All doctoral students must pass a written candidacy examination after nine to eighteen hours of study.

Candidates for the Ph.D. degree are required to complete a minimum of two consecutive semesters in residence during an academic year.

The communication and foreign language requirements for the Ph.D. degree may be satisfied by options selected from foreign languages, statistics, computer science, logic, or other research methodologies deemed acceptable by the candidate's doctoral committee.

At the end of the program of study, each student must take a written and oral comprehensive examination that will cover the student's major areas of study.

Other Relevant Information

Upon admission, each student will be assigned to a faculty adviser whose specialization best coincides with the student's background or academic interest. For the master's degree, the adviser and student together will plan the program of study. For doctoral students, the adviser and student will plan the early aspects of study, but an interdisciplinary committee will be formed, soon after the student is admitted to candidacy, to supervise completion of a program of study.

Student Aid

Graduate assistantships available to doctoral students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Joint Degree Program between The Pennsylvania State University Dickinson School of Law (J.D.) and the Educational Theory And Policy Program (M.A., & Ph.D.)

Joint Degree Program: The Pennsylvania State University Dickinson School of Law (DSL) and the Educational Theory and Policy (EDTHP) Program are offering a joint degree program leading to a Juris Doctor (J.D.); and a Master of Arts (M.A.), or a Doctor of Philosophy (Ph.D) in Educational Theory and Policy.

Admission Requirements

The number of openings in the joint degree J.D./M.A. or Ph.D. program will be limited to students with an outstanding academic record who have successfully completed two semesters at the Dickinson School of Law.

Applicants to the joint degree program:

1. must have been admitted to the Dickinson School of Law
2. should have successfully completed two semesters of course work at the Dickinson School of Law with a grade-point average of 3.0
3. must submit two letters of recommendation from the Dickinson School of Law faculty
4. must submit a career statement

Note: Students are eligible to start taking courses in the EDTHP program after successfully completing two semesters of law school work.

College-Specific Admission Requirements

DSL: A bachelor's or equivalent degree from an accredited college is a prerequisite for admission; however, there is no standard prescribed undergraduate curriculum. An applicant should have acquired significant oral and written communication skills before entering law school. The following are required of applicants: a completed application form for DSL; submission of the results of the law school admission test (LSAT); completion of an LSDAS report; a one-page personal statement; employment records since high school; and two letters of recommendation.

EDTHP: The following are required of all applicants: a completed application form to EDTHP; submission of the results of the Graduate Record Examination (GRE), or LSAT; an official undergraduate transcript or transcripts; a personal statement; employment records since high school; and three letters of recommendation.

The best qualified students will be accepted for admission into the doctoral programs up to the number of spaces available. Students with a 2.75 grade-point-average (GPA) will be considered to the master's program, and with a 3.0 GPA at the master's level for the Ph.D. program. Exceptions to the minimum GPA may be made for students with special backgrounds, abilities, and interests.

All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the Test of English as a Second Language (TOEFL) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test or a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the new speaking portion; or the International English Language Testing System (IELTS) with a minimum composite score of 6.5 is required for admission.

Residency: Students will normally spend four semesters in residence at DSL and as many additional semesters in residence as needed to complete the additional requirements for the pertinent EDTHP degree. Ph.D. candidates must arrange the sequence of semesters to ensure that they are in residence as full-time students in the EDLDR program for at least two consecutive semesters (Fall-Spring or Spring-Fall) excluding summer in a single twelve-month period. D.Ed.

Liaisons: The department and faculty liaisons for DSL shall be the Associate Dean for Academic Affairs and the student advisor shall be the Associate Dean for Academic Affairs or such other faculty member(s) as may be designated by the Dean. The liaison for EDTHP shall be the Professor-in-Charge (PIC) or such faculty member(s) as may be designated by the PIC.

PRESCRIBED COURSES

DSL: All students are required to take the first-year curriculum in DSL. In the second or third year, students must take CORE 934 (Professional Responsibility). The fall curriculum for the first year consists of the following courses:

CORE COURSES (CORE)

- 900. Civil Procedure (4)
- 910. Criminal Law (3)
- 912. Legal Analysis, Research & Writing I (3)
- 925. Torts (4)

The spring curriculum of the first year consists of the following courses:

One 3-credit Elective

CORE COURSES (CORE)

- 903. Constitutional Law (3)
- 905. Contracts (4)
- 914. Legal Analysis, Research & Writing II (3)
- 920. Property (4)

EDTHP: A minimum of 36 credits is required for the M.A. in EDTHP. At least 27 credits must be at the 500 level or above; at least 18 credits must be in EDTHP. At least 6 credits of thesis research (EDTHP 600 or 610) must be taken to fulfill the Graduate School's requirements. Only 3 credits of EDTHP 596 (Independent Study) may be counted toward the M.A. requirements. Students who wish to transfer credits from other programs must receive prior approval from the EDTHP faculty. The required course is EDTHP 500 (Proseminar).

Ph.D. requirements

Introduction to the EDTHP Program (3 credits)

EDTHP 500 Proseminar

Research Methods (12 credits)
EDTHP/EDLDR/HI ED 585: Research Design
EDTHP/EDLDR/HI ED 586: Qualitative Methods

Two quantitative methods courses.

Research Courses: 6 credits

These are research method courses specifically related to the student's thesis.

Theory Foundations: 12 credits*

Four theory-based 500-level EDTHP courses are required. At least one course must be a 500-level EDTHP course in the area of history or philosophy of education (e.g., EDTHP 533, 536, 540, or 541), and another must be a 500-level EDTHP course in the area of sociology or demography of education (e.g., EDTHP 516, 557, or 597 classes such as Sociology of Education or Sociology of Adolescence). After a student has consulted with his or her advisor, one 400-level course may be substituted for EITHER one 500-level Theory course OR one 500-level Policy course, depending on the nature of the 400-level course. Students who take advantage of this option will need to do additional work beyond the 400-level requirements and should make arrangements with the instructor ahead of time.

Policy Foundations: 12 credits*

EDTHP/EDLDR/HI ED 587: Policy and Politics

In addition, three 500-level EDTHP courses in educational policy (e.g., EDTHP 516, 518, 520, 527, or 597 classes such as Comparative Analysis of Education Policy) are required. After a student has consulted with his or her advisor, one 400-level course may be substituted for EITHER one 500-level Theory course OR one 500-level Policy course, depending on the nature of the 400-level course. Students who take advantage of this option will need to do additional work beyond the 400-level requirements and should make arrangements with the instructor ahead of time.

*Note: Some EDTHP courses may be counted as either a Theory course or a Policy course, but they may not be double-counted.

Other: 21 credits

These include credits for minor or dual-title requirements, electives, and thesis research. A maximum of 9 professional credits and 15 academic transfer credits may be counted.

EDTHP independent study courses (EDTHP 596) will be counted only as electives unless the student consults with his or her advisor and then petitions the EDTHP faculty.

INTERPROGRAM TRANSFER OF CREDITS

DSL: A maximum of twelve credits for EDTHP course work may be transferred for credit toward the J.D. degree at DSL. Students must obtain a grade satisfactory to DSL for the course work to be credited toward the J.D. degree. The following EDTHP courses may qualify for credit in DSL: (1) EDTHP 518 (Analysis of U.S. Educational Policy); EDTHP 520 (Theoretical Perspectives on School Reform); (3) EDTHP 533 (Social History and Educational Policy); (4) EDTHP 541 (Contemporary Philosophies of Education); and (5) EDTHP 587 (Education Policy and Politics).

EDTHP: What courses may be credited will be determined by the student's degree program. Normally a maximum of twelve credits of DSL course work will be counted for credit for the minimum requirements for a master's degree, subject to approval by the student's advisory committee. Normally, a maximum of 30 credits from a master's degree program will be counted for credit for the minimum requirements for a Ph.D. degree.

Sequence: The sequence of courses will be determined by the students and their advisors.

Recommended Program of Study and Advising: All students in the program will have two advisors, one from DSL and one from EDTHP. Periodic interaction between the two advisors will be encouraged. A program of study will be developed for each student, taking into account the fact that some courses are offered on a rotating or intermittent basis. Many courses are offered every year but some are offered every two or three years. Advisors will have available a list of projected relevant courses or educational experiences in order to work with the student on an individualized program of study. The standard committee structure will apply to the EDTHP programs.

Tuition: Students will be charged the applicable DSL tuition to cover the J.D. program and the applicable graduate tuition to cover the EDLDR degree program. DSL tuition will be paid for the semesters in which the student is registered for DSL courses, and graduate tuition will be paid for the semesters in which the student is registered for graduate courses. A student may take up to one course (3 credit hours) per semester in the program where the student is not primarily registered without any change in tuition, but must pay additional tuition to the program that the student is not primarily registered if he or she wishes to take additional course work pursuant to that program during the semester.

Financial Aid and Assistantships: Decisions on financial aid and assistantships will be made by each school according to that school's procedures.

Fulfillment of Degree Requirements and Graduation: All courses in one program that will count toward meeting the requirements of the other program must be completed before the awarding of either degree. Students will be required to fulfill all requirements for each degree in order to be awarded that degree, subject to the interprogram transfer of credits. With respect to EDTHP program requirements for a thesis or paper, work done while at DSL under the supervision of a DSL faculty member may be appropriate for incorporation into the thesis or paper with the approval of the EDTHP degree program committee (in such cases, the committee should consider whether the credits afforded such work will be subject to the twelve credit maximum for interprogram transfers). A DSL faculty member must be a member of the committee).

If for some reason the student cannot complete the requirements of the J.D., the student will still be allowed to count DSL courses already taken toward the pertinent EDTHP degree, even if he or she is no longer in the joint degree program.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- William S. Adams, Ph.D. (Penn State) Professor Emeritus of Electrical Engineering
- Osama O. Awadelkarim, Ph.D. (Reading, England) Professor of Engineering Science and Mechanics
- Kultegin Aydin, Ph.D. (METU, Ankara) Professor of Electrical Engineering
- Sven G. Bilén, Ph.D. (Michigan) Associate Professor of Electrical Engineering
- Nirmal K. Bose, Ph.D. (Syracuse) HRB Systems Professor of Electrical Engineering
- James K. Breakall, Ph.D. (Case Western Reserve) Professor of Electrical Engineering
- John L. Brown, Jr., Ph.D. (Brown) Professor Emeritus of Electrical Engineering
- Larry C. Burton, Ph.D. (Penn State) Associate Dean for Administration and Planning; Professor of Electrical Engineering
- Lynn A. Carpenter, Ph.D. (Illinois) P.E. Associate Professor of Electrical Engineering
- Lee D. Coraor, Ph.D. (Iowa) Associate Professor of Electrical Engineering, and Computer Science and Engineering
- Leslie E. Cross, Ph.D. (Leeds) Evan Pugh Professor Emeritus of Electrical Engineering
- Chitaranjan Das, Ph.D. (S.W. Louisiana) Professor of Computer Science and Electrial Engineering
- Suman Datta, Ph.D. (Cincinatti) Associate Professor of Electrical Engineering
- John F. Doherty, Ph.D. (Rutgers) Professor of Electrical Engineering
- John E. Dzielski, Ph.D. (MIT) Research Engineer; Assistant Professor of Acoustics
- Anthony J. Ferraro, Ph.D. (Penn State) Professor Emeritus of Electrical Engineering
- Richard A. Goldberg, Ph.D. (Penn State) Adjunct Professor of Electrical Engineering
- Craig A. Grimes, Ph.D. (Texas at Austin) Professor of Electrical Engineering
- Dale M. Grimes, Ph.D. (Michigan) Professor Emeritus of Electrical Engineering
- Ruyan Guo, Ph.D. (Penn State) Professor of Electrical Engineering and Materials
- David L. Hall, Ph.D. (Penn State) Associate Dean for Research and Graduate Studies, School of Information Sciences and Technology; Professor of Information Sciences and Technology, and Electrical Engineering
- Randy Haupt, Ph.D. (Michigan) Senior Scientist
- William E. Higgins, Ph.D. (Illinois) Professor of Electrical Engineering
- Heath F. Hofmann, Ph.D. (California, Berkeley) Associate Professor of Electrical Engineering
- Ali R. Hurson, Ph.D. (Florida) Professor of Computer Science and Engineering
- Mary Jane Irwin, Ph.D. (Illinois) Noll Chair; Professor of Computer Science and Engineering
- Thomas N. Jackson, Ph.D. (Michigan) Robert E. Kirby Chair; Professor of Electrical Engineering
- W. Kenneth Jenkins, Ph.D. (Purdue) Department Head; Professor of Electrical Engineering
- Timothy J. Kane, Ph.D. (Illinois) Professor of Electrical Engineering
- Mohsen Kavehrad, Ph.D. (Polytechnic Univ) William L. Weiss Chair; Professor of Electrical Engineering
- George Kesidis, Ph.D. (California, Berkeley) Professor of Electrical Engineering, and Computer Science and Engineering
- Iam-Choon Khoo, Ph.D. (Rochester) William E. Leonard Chair; Distinguished Professor of Electrical Engineering
- Stewart K. Kurtz, Ph.D. (Ohio State) Murata Professor of Materials Research and Professor Emeritus of Electrical Engineering
- Constantino M. Lagoa, Ph.D. (Wisconsin, Madison) Associate Professor of Electrical Engineering
- Thomas F. LaPorta, Ph.D. (Coumbia) Distinguished Professor of Computer Science and Engineering
- Ji-Woong Lee, Ph.D. (Michigan) Assistant Professor of Electrical Engineering
- Kwang Y. Lee, Ph.D. (Michigan State) Professor Emeritus of Electrical Engineering
- Yanxi Liu, Ph.D. Associate Professor of Electrical Engineerg and Computer Science and Engineering
- Zhiwen Liu, Ph.D. (California Inst of Tech) Assistant Professor of Electrical Engineering
- John D. Mathews, Ph.D. (Case Western Reserve) Professor of Electrical Engineering
- Jeffrey S. Mayer, Ph.D. (Purdue) P.E. Associate Professor of Electrical Engineering
- Theresa S. Mayer, Ph.D. (Purdue) Professor of Electrical Engineering
- George J. McMurtry, Ph.D. (Purdue) Professor Emeritus of Electrical Engineering
- John J. Metzner, Eng. Sc. D. (New York) Professor of Computer Science and Engineering, and Electrical Engineering
- David J. Miller, Ph.D. (California, Santa Barbara) Associate Professor of Electrical Engineering
- John D. Mitchell, Ph.D. (Penn State) Professor of Electrical Engineering
- Raj Mittra, Ph.D. Professor of Electrical Engineering
- Suzanne Mohney, Ph.D. (Wisconsin, Madison) Professor of Materials and Science Engineering
- Ram Narayanan, Ph.D. (UMass, Amherst) Professor of Electrical Engineering
- Vijay Krishnan Narayanan, Ph.D. (South Florida, Tampa) Professor of Computer Science and Engineering, and Electrical Engineering
- John S. Nisbet, Ph.D. (Penn State) Alumni Professor Emeritus of Electrical Engineering
- Victor P. Pasko, Ph.D. (Stanford) Associate Professor of Electrical Engineering
- C. Russell Philbrick, Ph.D. (North Carolina State) Professor of Electrical Engineering
- Shashi Phoha, Ph.D. (Michigan State) Head of Information Sciences and Technology Division, ARL; Professor of Electrical Engineering
- Michael Piovosi, Ph.D. (Delaware) P.E. Associate Professor of Electrical Engineering (Penn State Great Valley)
- Asok Ray, Ph.D. (Northeastern) Distinguished Professor of Mechanical Engineering
- Joan M. Redwing, Ph.D. (Wisconsin, Madison) Professor of Materials Science and Engineering, and Electrical Engineering
- Sal Riggio, Ph.D. (Florida Atlantic) Associate Professor of Electrical Engineering
- James W. Robinson, Ph.D. (Michigan) Professor Emeritus of Electrical Engineering
- William J. Ross, Ph.D. (New Zealand) Professor Emeritus of Electrical Engineering
- David W. Russell, Ph.D. (CNAA, London) Professor of Electrical Engineering
- Jerzy Ruzyllo, Ph.D. (Technical U of Warsaw) Professor of Electrical Engineering
- Jeffrey L. Schiano, Ph.D. (Illinois) Associate Professor of Electrical Engineering
- Srinivas Tadigadapa, Ph.D. (Cambridge) Associate Professor of Electrical Engineering
- Richard L. Tutwiler, Ph.D. (Penn State) Senior Research Associate

- Kenji Uchino, Ph.D. (Tokyo Institute of Technology) Professor of Electrical Engineering
- Julio V. Urbina, Ph.D. (Illinois) Assistant Professor of Electrical Engineering
- Vijay K. Varadan, Ph.D. (Northwestern) Distinguished Alumni Professor of Engineering Science and Mechanics and Electrical Engineering
- Douglas H. Werner, Ph.D. (Penn State) Professor of Electrical Engineering
- Pingjuan L. Werner, Ph.D. (Penn State) Associate Professor of Electrical Engineering
- Christopher R. Wronski, Ph.D. (Imperial College, London) P.E. Professor Emeritus of Electrical Engineering
- Aylin Yener, Ph.D. (Rutgers) Associate Professor of Electrical Engineering
- Stuart (Shizhuo) Yin, Ph.D. (Penn State) Professor of Electrical Engineering
- Randy Young, Ph.D. (Penn State) Senior Research Associate
- Francis T. S. Yu, Ph.D. (Michigan) Evan Pugh Professor Emeritus of Electrical Engineering
- Qiming Zhang, Ph.D. (Penn State) Professor of Electrical Engineering

The general areas of graduate research in Electrical Engineering are electromagnetics and optics; electronics and photonics; communications, computers, networking, and signal processing; and control and power systems. Specializations available within these areas include microwaves, antennas, and propagation; electro-optics and nonlinear optics; remote sensing and space systems; materials and devices; circuits and networks; VLSI; communications; networking; signal and image processing; computer vision and pattern recognition; control systems; and power systems.

For information about areas of specialization, laboratory and research facilities, fellowships, assistantships, and other sources of financial assistance, write directly to the Graduate Program Coordinator, Department of Electrical Engineering, 121 Electrical Engineering East, University Park, PA 16802-2705, or review the Web pages at www.ee.psu.edu.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*. Applicants are required to submit scores from the general portions of the Graduate Record Examinations, three letters of reference, and a personal statement of relevant experience and goals, a resume, undergraduate transcripts, and a supplemental application.

Master of Science Degree Requirements

The Master of Science requirements include the general requirements of the Graduate School as listed under Master's Degree Requirements in the *Graduate Bulletin.*

Specific course requirements: (1) Thesis option--24 course credits, including a broad selection of 500-level courses, 2 colloquium credits, 6 thesis credits, and a satisfactory thesis; (2) Paper option--30 course credits, including a broad selection of 500-level courses, 2 colloquium credits, 2 paper credits, and a satisfactory paper.

Doctoral Degree Requirements

The Doctor of Philosophy requirements include the general requirements of the Graduate School as listed under Doctoral Degree Requirements in the *Graduate Bulletin.*

Specific requirements: The communication requirement is met by adequacy in both spoken and written English. The candidacy examination consists of both written and oral parts; the oral comprehensive examination is preceded by the writing of a thesis proposal. The program requires a minimum of 39 course credits and 2 colloquium credits beyond the B.S. degree.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following awards typically have been available to graduate students in this program:

PAUL F. ANDERSON GRADUATE FELLOWSHIP
MELVIN P. BLOOM MEMORIAL GRADUATE FELLOWSHIP
LUTHER B. AND PATRICIA A. BROWN GRADUATE FELLOWSHIP
JOSEPH R. AND JANICE M. MONKOWSKI GRADUATE FELLOWSHIP
JAMES R. AND BARBARA R. PALMER FELLOWSHIP
PONTANO FAMILY SCHOLARSHIP IN ELECTRICAL ENGINEERING
SOCIETY OF PENN STATE ELECTRICAL ENGINEERS (SPSEE) GRADUATE FELLOWSHIP
FRED C. AND M. JOAN THOMPSON GRADUATE FELLOWSHIP
BESS L. AND MYLAN R. WATKINS GRADUATE FELLOWSHIP

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

M. Eng. E E

Admission Requirements

A prospective graduate student in Electrical Engineering at Penn State Harrisburg must fulfill the admission requirements as set forth by the Graduate School, and have a bachelor of science degree in electrical engineering or its equivalent from an institution that is accredited by the Accreditation Board of Engineering and Technology (ABET). An undergraduate cumulative grade-point average of 3.0 or better on a 4.0 scale is required for admission. Exceptions to this will be based on professional experience and other factors such as GRE scores. In addition, a student who does not meet the overall 3.0 grade-point average may be considered for admission if the student has a 3.0 junior/senior grade-point average. Up to 15 credits earned in three semesters or fewer, as a special nondegree student, may be applied toward the master's degree. Those applying for admission as a master of engineering candidate without an electrical engineering degree may be admitted with the stipulation that deficiencies in background, if any, will be remedied early in the program and that these courses will be in addition to the required number of credits for the degree.

Applicants should submit the following:

- a graduate **online** application with the application fee;
- official copies of undergraduate transcripts;
- test scores from the Graduate Record Examinations (GRE) (preferable, but not required);
- three (3) letters of reference, especially those from faculty who can evaluate academic potential;
- a personal statement of technical interest, goals, and experience.

Test scores from the Graduate Record Examination (GRE) are required ONLY for those applicants indicating interest in an assistantship.

Degree Requirements

A total of 33 credits is required for a Master of Engineering degree, of which at least 24 must be taken through Penn State Harrisburg engineering graduate programs. Up to 9 credits of graduate work may be transferred from other institutions provided (a) credits are suitable for the particular engineering discipline, and (b) students have earned a grade of B or better. At least 18 credits must be at the 500 level, which includes 3 credits of ENGR 594.

Generally, students enrolled in the program for the Master of Engineering degree in Electrical Engineering must earn 12 credits in the required core courses (i.e., courses with the E E prefix).

Master of Engineering Paper: A candidate for the master of engineering degree in Electrical Engineering must write a scholarly report or engineering paper and defend it before three faculty members. The paper is intended to be a relatively short document compared with a thesis. A published paper may be used to meet this requirement. The paper should be written according to the standards set for an IEEE publication.

The engineering paper may be initiated by taking the 1-credit ENGR 594 course. This should be done approximately halfway through the program. Once the proposal is approved and the work well under way, the student should register for ENGR 594 with his/her paper adviser. Work will proceed as planned under the direction of the paper adviser, though changes may be made with the consent of the master's paper committee.

Up to 9 credits of graduate work may be transferred from other institutions provided (a) credits are suitable for the particular engineering discipline, and (b) students have earned a grade of B or better.

Students must have a 3.00 grade-point average in both prescribed and supporting courses approved by the program to graduate. Students pursue the program on a part-time basis. A student can complete the program within two years, based on completion of two courses a semester.

M. S. E E

Admission Requirements

Admission into the Master of Science (M.S.) Electrical Engineering program will be granted only to candidates who demonstrate high potential for success in graduate studies.

Applicants should have undergraduate degrees in engineering or technology-related fields from an accredited university and must meet the admission requirements as set by Penn State's Graduate School. An applicant must hold either (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution.

An undergraduate cumulative grade-point average of 3.0 or better on a 4.0 scale, and scores from the GRE are required for admission.

Applicants should submit the following:

- a completed Graduate School online application with the application fee;
- official copies of undergraduate transcripts;
- three (3) letters of professional recommendations from individuals who can evaluate the applicant's potential;
- a personal statement of technical interest, goals, and experience;
- test scores from the Graduate Record Examination (GRE); and
- statement of interest in graduate assistantship, if desired.

Degree Requirements

All graduate students in Electrical Engineering are required to adhere to the requirements of the Graduate School, as found in the Graduate Degree Programs Bulletin. The requirements of the Graduate School, however, are minimum requirements and the policies, procedures, and regulations listed below are additional and more specific for graduate students pursuing the MS in Electrical Engineering degree. Advisers will call pertinent regulations to the attention of their advisees, but it should be understood that it is the student's personal responsibility to see that all requirements are satisfied.

The MSEE program at Penn State Harrisburg is structured into two areas of concentration to fully take advantage of the specialty areas represented in the E E graduate faculty. The areas are Electronics- Electromagnetics-Optics (EEO) and Systems.The program requires 31-credits, including 24 course credits with at least 15 credits at the 500 level, one colloquium credit, and 6 thesis credits (600-level). All students are required to take a 500-level analysis course (EMCH 524A) in addition to prescribed courses in one of the two concentration areas. The prescribed courses are intended to establish the fundamentals of the technical areas. To incorporate some breadth into the program, students are required to take at least one course in the second concentration area. A maximum of three 400-level courses (9 credits) may be taken for the MSEE degree

Original research, usually requiring at least two semesters of work (nominal 6 credits), is expected for a thesis. The work should be an in-depth investigation intended to extend the state of knowledge in some specialty area.

The E E program has established a six-year time limit for completion of the M.S. degree. Any extension beyond six years requires the approval of the E E program Graduate Faculty.

The student must maintain a minimum grade point average (GPA) of 3.00 or better on a 4.00 scale in 500- and 400-level courses listed on his/her Plan of Study.

Penn State Harrisburg's MSEE program is distinct and independent of the MSEE program offered at the University Park campus.

English Proficiency— The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. Specific graduate programs may have more stringent requirements.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Completed International Application material must be submitted by the following deadlines: May 31 for the fall semester; September 30 for the spring semester; February 28 for the summer session. Applications received after these deadlines will be processed for the following semester.

PLEASE NOTE: Each graduate program reserves the right to set earlier deadlines than those noted above.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Michael A. Adewumi, Ph.D. (IIT) Professor of Petroleum and Natural Gas Engineering
- Shelton S. Alexander, Ph.D. (Cal. Tech) Professor of Geophysics
- John Andresen'Ph.D. (Strathclyde) Assistant Professor of Energy and Geo-Environmental Engineering
- André L. Boehman, Ph.D. (Stanford) Associate Professor of Fuel Science
- Susan L. Brantley, Ph.D. (Princeton) Professor of Geosciences
- Timothy Considine, Ph.D. (Cornell) Professor of Natural Resource Economics
- Derek Elsworth, Ph.D. (California, Berkeley) Professor of Geo-Environmental Engineering
- Turgay Ertekin, Ph.D. (Penn State) Professor of Petroleum and Natural Gas Engineering
- Semih Eser, Ph.D. (Penn State) Associate Professor of Energy and Geo-Environmental Engineering
- Peter B. Flemings, Ph.D. (Cornell) Professor of Geosciences
- Maochen Ge, Ph.D. (Penn State) Associate Professor of Mining Engineering
- Abraham S. Grader, Ph.D. (Stanford) Professor of Petroleum and Natural Gas Engineering
- Phillip M. Halleck, Ph.D. (Chicago) Associate Professor of Petroleum and Natural Gas Engineering
- Richard Hogg, Ph.D. (California, Berkeley) Professor Emeritus of Mineral Processing and Geo-Environmental Engineering
- M. Thaddeus Ityokumbul, Ph.D. (Univ. of Western Ontario) Associate Professor of Mineral Processing and Geo-Environmental Engineering
- Mark S. Klima, Ph.D. (Penn State) Associate Professor of Mineral Processing and Geo-Environmental Engineering
- Lee R. Kump, Ph.D. (South Florida) Professor of Geosciences
- Peter T. Luckie, Ph.D. (Penn State) Professor Emeritus of Mineral Processing
- Angela D. Lueking, Ph.D. (Michigan) Assistant Professor of Energy and Geo-Environmental Engineering
- Serguei Lvov, Ph.D. (St. Petersburg) Professor of Energy and Geo-Environmental Engineering
- Christopher J. Marone, Ph.D. (Columbia) Professor of Geosciences
- Mercedes M. Maroto-Valer, Ph.D. (Strathclyde) Assistant Professor of Energy and Geo-Environmental Engineering
- Jonathan Mathews, Ph.D. (Penn State) Assistant Professor of Energy and Geo-Environmental Engineering
- Andrew Nyblade, Ph.D. (Michigan) Associate Professor of Geosciences
- Kwadwo A. Osseo-Asare, Ph.D. (California, Berkeley) Professor of Metallurgy
- Richard R. Parizek, Ph.D. (Illinois) Professor of Geology and Geo-Environmental Engineering
- Sarma Pisupati, Ph.D. (Penn State) Associate Professor of Fuel Science
- Ljubisa R. Radovic, Ph.D. (Penn State) Professor of Energy and Geo-Environmental Engineering
- Alan W. Scaroni, Ph.D. (Penn State) Professor of Energy and Geo-Environmental Engineering
- Harold H. Schobert, Ph.D. (Iowa State) Professor of Fuel Science
- Chunshan Song, Ph.D. (Osaka) Professor of Fuel Science
- Robert W. Watson, Ph.D. (Penn State) Associate Professor of Petroleum and Natural Gas Engineering
- William B. White, Ph.D. (Penn State) Professor of Geochemistry
- John C. Wyngaard, Ph.D. (Penn State) Professor of Meteorology, Mechanical Engineering, and Geo-Environmental Engineering
- Yaw D. Yeboah, Sc.D. (MIT) Professor of Energy and Geo-Environmental Engineering
- George S. Young, Ph.D. (Colorado State) Associate Professor of Meteorology and Geo-Environmental Engineering

The Department of Energy and Mineral Engineering provides a vertically integrated approach to research and education in all aspects of the energy and mineral industries, including scientific and engineering issues, health and safety and maintenance of high environmental standards. The department's mission is to forge an intellectual and scientific cohesiveness in energy and mineral resource technology. This objective is achieved by exploiting the natural synergy between the exploration, extraction, processing and utilization of energy and mineral resources so as to cater to the emerging needs of society.

The Department of Energy and Mineral Engineering offers advanced degrees in six programmatic areas (Energy and Geo-Environmental Engineering, Industrial Health and Safety, Mineral Processing, Mining Engineering, Oil and Gas Engineering Management, and Petroleum and Natural Gas Engineering). Each academic degree program has specific faculty associated with it and a professor who serves as the graduate program chair. The Department of Energy and Mineral Engineering has overall requirements for the M.S., M.Eng., and Ph.D. degrees with specific requirements associated with each program.

Energy and Geo-Environmental Engineering Program

The graduate program in Energy and Geo-Environmental Engineering is an interdisciplinary program providing comprehensive study and education in the environmental sciences and engineering. Students take classes in a common core of materials, with subsequent specialization determined by the student and adviser, in consideration of the selected research topic.

Admission Requirements

Scores for the Graduate Record Examinations (GRE) are required. The best-qualified applicants will be accepted up to the number of spaces available for new students. Students will be accepted by the academic programs and at the discretion of a graduate program, a student may be granted provisional admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Admission to the academic programs in the Department of Energy and Mineral Engineering is competitive. Entering students must hold a bachelor's degree in engineering or physical sciences. Students with 3.00 or better (out of 4.00) junior/senior cumulative grade-point averages and appropriate course backgrounds will be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Entering graduate students in Energy and Geo-Environmental Engineering for whom English is not the first language are required to have a score of at least 550 on the Test of English as a Foreign Language (TOEFL) examination. Letters of recommendation and a statement of purpose written by the applicant are also required.

Master's Degree Requirements

The M.S. degree programs in the Department of Energy and Mineral Engineering are designed for students to gain advanced knowledge for research, analysis, and design in Energy and Geo-Environmental Engineering, Industrial Health and Safety, Mineral Processing, Mining Engineering, and Petroleum and Natural Gas Engineering. Students pursuing an M.S. degree will be required to complete 24 course credits and submit a thesis (6 credits) to the Graduate School. Graduate committees in each academic program play an important role in formulating individual course and research schedules.

The Mining Engineering and Oil and Gas Engineering programs also offer an M.Eng. degree. Students pursuing an M.Eng degree are required to present a scholarly written report on a suitable project, the topic of which may be suggested by the industry. The report must be a scholarly achievement, relating a developmental study that involves an appropriate, significant subject in the discipline. The report must be approved by a committee of the faculty composed of report adviser, report reader, and chair of the program.

The specific credit requirements and other specifics of the master's programs in Energy and Geo-Environmental Engineering are available upon request.

Doctoral Degree Requirements

The Ph.D. programs in the Department of Energy and Mineral Engineering emphasize scholarly research and help students prepare for research and related careers in industry, government and academe. Acceptance into the Ph.D. degree programs in the Department of Energy and Mineral Engineering is based on the student's performance on the Ph.D. candidacy examination administered by the faculty of a specific academic program. A comprehensive examination is required of all Ph.D. candidates and should be taken after substantial completion of course work. The comprehensive examination is the responsibility of the candidate's doctoral committee and administered according to the rules specified by the Graduate School. The Ph.D. programs in Energy and Geo-Environmental Engineering are quite flexible, with minimum formal requirements. The communication and foreign language requirements for the Ph.D. degree may be satisfied by intermediate knowledge of one foreign language. The general requirements for graduation are outlined in the GENERAL INFORMATION section of the Graduate Bulletin. The specific credit requirements of the Ph.D. programs in Energy and Geo-Environmental Engineering are available upon request.

Other Relevant Information

All graduate students are expected to attend general department seminars and seminars in their programmatic areas. Graduate students may be asked to contribute to the instructional programs of the department by assisting with laboratory and lecture courses.

Students in Mining Engineering and Petroleum and Natural Gas Engineering may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. (See also Operations Research.)

Student Aid

Graduate students are supported by a variety of government and industry fellowships, and research and teaching assistantships. Stipends vary depending on the source. Please see the STUDENT AID section of the *Graduate Bulletin* to learn other forms of the student aid.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Yaw D. Yeboah, Sc.D. (MIT) Professor and Head of Energy and Mineral Engineering
- Fan Zhang, Ph.D. (Harvard), Assistant Professor of Energy and Mineral Engineering

The Department of Energy and Mineral Engineering provides a vertically integrated approach to research and education in all aspects of the energy and mineral industries, including scientific and engineering issues, health and safety and maintenance of high environmental standards. The Department's mission is to forge an intellectual and scientific cohesiveness in energy and mineral resource technology. This objective is achieved by exploiting the natural synergy between the exploration, extraction, processing and utilization of energy and mineral resources so as to cater to the emerging needs of society.

The Department offers advanced degrees in Energy and Mineral Engineering (M.S. and Ph.D.) and an online professional Master of Engineering (M. Eng.) degree in Oil and Gas Engineering Management. The Department has overall requirements for the M.S., M. Eng., and Ph.D. degrees with specific requirements associated with each program.

Energy and Mineral Engineering Program

The Energy and Mineral Engineering (EME) program is a single graduate program with a focus on the production of energy and minerals in an economic, safe and efficient manner. The program provides flexible education of students in energy and mineral sciences and

engineering, with focus on both non-renewable and renewable resource and energy industries. The program is designed to resolve the sometimes competing goals of flexible education of requisite breadth while still providing in-depth study; students are required to follow a focused curriculum that combines the requisite rigor with flexibility in a rapidly changing field of endeavor. Participating students take core program and required option courses and additional courses from a broad array of courses to meet the total credit requirements. Students are not required to choose an option. However, a student who desires disciplinary identity may choose from among the five available options: petroleum and natural gas engineering, mining and mineral process engineering, environmental health and safety engineering, fuel science, and energy management and policy.

Admission Requirements

Scores for the Graduate Record Examinations (GRE) are required for admission, though this may be waived at the discretion of the Energy and Mineral Engineering graduate program. The best-qualified applicants will be accepted by the Energy and Mineral Engineering graduate program up to the number of spaces available for new students. At the discretion of the Energy and Mineral Engineering graduate program, a student may be granted provisional admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Admission to the Energy and Mineral Engineering graduate program in the Department of Energy and Mineral Engineering is competitive. Entering students must hold a bachelor's degree in a science or engineering discipline . Students with 3.00 or better (out of 4.00) junior/senior cumulative grade-point averages and appropriate course backgrounds will be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Undergraduate students from the Department of Energy and Mineral Engineering with sixth semester standing, minimum grade-point average of 3.3, and excellent faculty recommendations may be admitted for a five-year B.S./M.S. dual degree.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the internet-based test (iBT). Applicants with iBT speaking scores between 15 and 19 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. Specific graduate programs may have more stringent requirements. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a masters degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British west Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, The United States, and Wales.

Letters of recommendation and an applicant's statement of purpose are also required.

Master's Degree Requirements

The M.S. degree program in Energy and Mineral Engineering is designed for students to gain advanced knowledge for research, analysis, and design in Energy and Mineral Engineering. Students pursuing an M.S. degree will be required to complete 24 course credits and submit a thesis (6 credits) to the Graduate School. Graduate committees in the graduate program in the Department of Energy and Mineral Engineering play an important role in formulating individual course and research schedules. At least 18 of the total course credits must be at the 500 level.

Doctoral Degree Requirements

The Ph.D. program in Energy and Mineral Engineering emphasizes scholarly research and help students prepare for research and related careers in industry, government and academe. Acceptance into the Ph.D. degree program in Energy and Mineral Engineering is based on the student's performance on the Ph.D. candidacy examination administered by the faculty of the EME graduate program. A comprehensive examination is required of all Ph.D. candidates and should be taken after substantial completion of course work. The comprehensive examination is the responsibility of the candidate's doctoral committee and administered according to the rules specified by the Graduate School. The Ph.D. program in Energy and Mineral Engineering is quite flexible, with minimum formal requirements. A minimum of 12 post M.S. course credits is required. At least 18 course credits for the graduate program must be at the 500 level. For students entering the program with an M.S. degree, 500-level courses already taken either at Penn State or other institutions may be accepted in partial fulfillment of the Ph.D. 18 credits of 500-level course requirements if the are found to be appropriate. The communication and foreign language requirements for the Ph.D. degree may be satisfied by intermediate knowledge of one foreign language. The general requirements for graduation are outlined in the GENERAL INFORMATION section of the Graduate Bulletin.

Other Relevant Information

All graduate students are expected to attend general Department seminars. Graduate students may be asked to contribute to the instructional programs of the Department by assisting with laboratory and lecture courses.

Students in Energy and Mineral Engineering may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. (See also Operations Research.)**Student Aid**

Graduate students are supported by a variety of government and industry fellowships, and research and teaching assistantships. Stipends vary depending on the source. Please see the STUDENT AID section of the *Graduate Bulletin* to learn other forms of the student aid.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Refik Culpan, Ph.D. (NYU) Professor of Management and International Business
Patrick Cusatis, Ph.D. (Penn State) Assistant Professor of Finance
Douglas C. Friedman, Ph.D. (Michigan) Assistant Professor of Marketing
Jean E. Harris, Ph.D. (Virginia Tech) Associate Professor of Accounting
Rhoda Joseph, Ph.D. (Baruch) Assistant Professor of Information Systems
Erdener Kaynak, Ph.D. (Cranfield, Bedford, England) Professor of Marketing
Mukund S. Kulkarni, Ph.D. (Kentucky) Senior Associate Dean for Academic Affairs; Professor of Finance
David A. Morand, Ph.D. (Cornell) Professor of Management
Parag C. Pendharkar, D.B.A. (Southern Illinois) Professor of Information Systems
Robert D. Russell, Ph.D. (Pittsburgh) Assistant Professor of Management
Stephen P. Schappe, Ph.D. (Ohio State) Director, School of Business Administration; Associate Professor of Management
Girish Subramanian, Ph.D. (Temple) Professor of Information Systems
Peter Swan, Ph.D. (Michigan) Assistant Professor of Logistics and Operations Management
Oranee Tawatnuntachai, Ph.D. (New Orleans) Associate Professor of Finance
Premal P. Vora, Ph.D. (Penn State) Associate Professor of Finance
Gayle J. Yaverbaum, Ph.D. (Temple) Professor Emerita of Information Systems
Ji Wu, Ph.D. (Drexel) Assistant Professor of Economics
Richard Young, Ph.D. (Penn State) Professor of Supply Chain Management
Ugur Yucelt, Ph.D. (New School) Associate Professor of Marketing
Lu Zhang, Ph.D. (George Washington) Assistant Professor of Management

The Master of Professional Studies (M.P.S.) Engineering Mangement degree program is a graduate professional degree program that integrates engineering with business and management principles. The program provides engineers with business and management

perspectives and enhances their capabilities in the management of major projects, business initiatives, policies, and other activities in both the public and private sectors. Furthermore, it highlights the importance of technology strategy and intellectual properties management, and offers an environment for personal and professional networking that could hold significant future dividend.

The program is offered at Penn State Harrisburg as a partnership between the School of Science, Engineering, and Technology and the School of Business Administration, which is accredited at the undergradute and graduate levels by AACSB International---the Association to Advance Collegiate Schools of Business International.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin. Admission into the Master of Professional Studies program will be granted only to candidates who demonstrate high potential for success in graduate studies.

Applicants should have undergraduate degrees in engineering or technology from an accredited university and are expected to have completed undergraduate course work in calculus and economics.

An undergraduate cumulative grade-point average of 3.0 or better on a 4.0 scale, and scores from the Graduate Management Admission Test (GMAT) are required for admission. Students demonstrating high potential but failing to meet the minimum GMAT score requirements may be considered on the basis of professional accomplishments and other criteria that may predict success in the program.

Applicants should submit the following:
---a graduate online application with the application fee
---official copies of undergraduate transcripts
---three (3) letters of reference, especially from faculty who can evaluate academic potential
---a personal statement of technical interest, goals, and experience
---test scores from the Graduate Management Admission Test (GMAT)
---test scores from the Graduate Record Examination (GRE) are required for those indicating interest in an assistantship

English Proficiency—The language of instruction at Penn State is English. All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. Departments and programs may have more stringent requirements and may require all international applicants to submit a TOEFL or IELTS score regardless of their academic background. A TOEFL score of at least 550 (paper-based test), 213 (computer-based test) or a total score of 80 on the Internet-based test (iBT), with a minimum of 19 points on the speaking section, is required for admission. Graduate programs may require a higher score. The International English Language Testing System (IELTS) module provides an exam to test four mandatory skill areas: listening, reading, writing and speaking. All four modules are equally weighted in the evaluation process. The International English Language Testing System has been approved by the Graduate Council as an alternative exam to the TOEFL for international students applying to Penn State. A minimum composite score of 6.5 on the IELTS test is required for admission.

Degree Requirements

All graduate students in Engineering Management are required to adhere to the requirements of the Graduate School, as listed in the Graduate Degree Programs Bulletin. The requirements of the Graduate School, however, are minimum requirements and the policies, procedures, and regulations listed below are additional and more specific for graduates students pursuing the M.P.S. degree in Engineering Management. Advisers will call pertinent regulations to the attention of their advisees, but it should be understood that it is the student's personal responsibility to see that all requirements listed are satisfied.

The M.P.S. in Engineering Management is a 34-credit graduate program that integrates engineering with business and management principles. The multidisciplinary, broadly based M.P.S. program provides engineers with business and management perspectives to enhance capabiiities in management of large projects.

All M.P.S. students are required to take eight core courses (21 credits) focusing on economic analysis, communication and teamwork, management processes, corporate finance, energy and the environment, and engineering analysis.

The curriculum requires the completion of two free electives (6 credits) in any of the engineering disciplines, and a culminating experience through a three-course sequence (7 credits) on strategic management of new ventures and innovations. Of the 34 credits required for the degree, 31 must be earned in 500-level graduate courses.

Courses

Please refer to the graduate program home page for a complete list of available courses.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Adrian Barb, M.B.A., Ph.D. (Missouri, Columbia) *Assistant Professor in Information Science*
Joanna Defranco, Ph.D. (NJIT) *Senior Lecturer in Information Science*
Kathryn W. Jablokow, Ph.D. (Ohio State) *Associate Professor of Mechanical Engineering and STS*
Phillip A. Laplante, M.B.A., Ph.D. (Stevens Institute of Tech) *Distinguished Professor of Systems Engineering*
John I. McCool, Ph.D. (Temple) *Distinguished Professor of Systems Engineering*
Colin J. Neill, Ph.D. (Wales) *Associate Professor of Software Engineering*
James A. Nemes, D.Sc. (George Washington) *Professor of Mechanical Engineering*
Michael J. Piovoso, Ph.D. (Delaware) *Professor of Electrical Engineering*
Robin G. Qiu, Ph.D. (Penn State) *Associate Professor of Information Science*
David W. Russell, Ph.D. (CNAA, London) *Professor of Electrical Engineering*
Raghvinder Sangwan, Ph.D. (Temple) *Assistant Professor of Information Science*
Kailasam Satyamurthy, M.B.A., Ph.D., (Clemson) *Senior Lecturer of Engineering and Management*

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*. The Master of Engineering Management is developed for students with a background in engineering or science. Applicants with a four year undergraduate degree in engineering, mathematics, physics, computer science, or a related discipline will be considered. Test scores from the GMAT or BRE exams are not required, but will be considered by the admissions committee if submitted. Jr/Sr GPA of 3.0 or better on a 4.0 scale is required. Students must have three years or more work experience in an engineering or engineering-related position. Applicants must submit a letter of reference, and a one page personal statement of relevant experience and goals.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the Internet-based test (iBT). Applicants with iBT speaking scores between 15 and 19 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or master's degree from a college /university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Degree Requirements

All students in the Master of Engineering Management program must complete a minimum of 33 credits.
The courses must include the required core courses of 18 credits:

ENGMT 501: Engineering Management Science (3)
ENGMT 510: Economics and Financial Studies for Engineers (3)
SYSEN 505: Technical Project Management (3)
SYSEN 536: Decision and Risk Analysis in Engineering (3)
SYSEN 550: Creativity and Problem Solving I (3)
SYSEN 552: Creativity and Problem Solving II (3)

as well as the capstone course:

ENGMT 539: Engineering Management Strategy (3)

Student Aid

Graduate Assistantships available to students in the program and other forms of student aid are described in the STUDENT AID section of the *Gradate Bulletin.*

- Junjia Zhu, Ph.D. (Wyoming) Assistant Professor of Mathematics

A program leading to the degree of Master of Engineering with a major in Engineering Science is offered at Penn State Harrisburg. The program is designed to provide a broad, advanced education in the engineering sciences with some specialization permitted in the area of the student's major interest. It is offered specifically to permit practicing engineers to pursue advanced studies through evening classes while in full-time employment in industry in the area. Courses offered for the program are all established and authorized by the resident departments at the University Park campus.

Admission Requirements

Scores from the graduate Record Examinations (GRE) are not required for students holding baccalaureate degrees from accredited U.S. educational institutions. At the discretion of a graduate program, students may be admitted for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements state in the GENERAL INFORMATION section of the *Graduate Bulletin.*

Students may be admitted to the program from a wide variety of disciplines. Students applying for admission are expected to have completed the following core courses: (1) physics through modern physics; (2) mathematics through differential equations; (3) one course in engineering thermodynamics; (4) one course in electrical circuits; (5) basic courses in engineering statics, dynamics, and strength of

materials; and (6) computer programming. Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

English Proficiency—The language of instruction at Penn State is English. All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. Departments and programs may have more stringent requirements and may require all international applicants to submit a TOEFL or IELTS score regardless of their academic background. A TOEFL score of at least 550 (paper-based test), 213 (computer-based test) or a total score of 80 on the Internet-based test (iBT), with a minimum of 19 points on the speaking section, is required for admission. Graduate programs may require a higher score. The International English Language Testing System (IELTS) module provides an exam to test four mandatory skill areas: listening, reading, writing and speaking. All four modules are equally weighted in the evaluation process. The International English Language Testing System has been approved by the Graduate Council as an alternative exam to the TOEFL for international students applying to Penn State. A minimum composite score of 6.5 on the IELTS test is required for admission.

Completed International Application material must be submitted by the following deadlines: May 31 for the fall semester; September 30 for the spring semester; February 28 for the summer session. Applications received after these deadlines will be processed for the following semester.

Applicants should submit the following:
—A graduate **online** application with the application fee;
—Official copies of undergraduate transcripts;
—Three (3) letters of reference, especially those from faculty who can evaluate academic potential;
—A personal statement of technical interest, goals, and experience.

NOTE: Test scores from the Graduate Record Examination (GRE) are required ONLY for those applicants indicating interest in an assistantship.

Degree Requirements

The credit requirements in this major will be satisfied by an appropriate combination of core courses and elective courses. The core courses include offerings in mathematics and in several branches of engineering that have been selected because of their general character and breadth of applicability to all fields of engineering. A minimum of 30 credits is required, of which at least 18 must be at the 500 level. Of the 30 credits, 6 credits of mathematics and a scholarly written report (3 credits) must be completed.

This program should be distinguished from the graduate program in Engineering Science at University Park campus, which offers the M.S. degree.

Other Relevant Information

More details regarding admission requirements are available from the directors of the graduate centers offering the program.

Student Aid

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the *Graduate Bulletin.*

- R. P. McNitt, Ph.D. (Purdue) Professor Emeritus of Engineering Science and Mechanics; Department Head Emeritus
- Robert N. Pangborn, Ph.D. (Rutgers) Professor of Engineering Mechanics; Vice President and Dean for Undergraduate Education
- Andrew Pytel, Ph.D. (Penn State) Professor Emeritus of Engineering Mechanics
- Jean Landa Pytel, Ph.D. (Penn State) Associate Professor of Engineering Mechanics; Assistant Dean, Student Services
- Joseph L. Rose, Ph.D. (Drexel) Paul Morrow Professor of Engineering Science and Mechanics in Design and Manufacturing
- Nicholas J. Salamon, Ph.D. (Northwestern) Professor Emeritus of Engineering Mechanics
- Steven J. Schiff, M.D., Ph.D. (Duke School of Medicine) Brush Chair Professor of Engineering in the Departments of Neurosurgery, Engineering Science and Mechanics, and Physics
- Albert E. Segall (Penn State) Professor of Engineering Science and Mechanics
- Vladimir V. Semak, Ph.D. (Moscow Inst of Physics and Tech) Senior Research Associate; Associate Professor of Engineering Science and Mechanics
- Barbara A. Shaw, Ph.D. (Johns Hopkins) Professor of Engineering Science and Mechanics
- Elzbieta Sikora, Ph.D. (Polish Academy of Science) Research Associate
- Ivica Smid, Ph.D. (U Vienna) Associate Professor of Engineering Science and Mechanics
- Samia A. Suliman, Ph.D. (Penn State) Assistant Professor of Engineering Science and Mechanics
- Bernhard R. Tittmann, Ph.D. (California, Los Angeles) Schell Professor of Engineering Science and Mechanics
- Judith A. Todd, Ph.D. (Cambridge) P. B. Breneman Department Head
- Mirna Urquidi-Macdonald, Ph.D. (U Paris, Sud) Professor of Engineering Science and Mechanics
- Eduard Ventsel, D.Sc. (Moscow Civil Engineering Inst) Professor of Engineering Science and Mechanics
- Jian Xu, Ph.D. (Michigan) Assistant Professor of Engineering Science and Mechanics
- S. Y. Zamrik, Ph.D. (Penn State) Professor Emeritus of Engineering Mechanics
- Sulin Zhang, Ph.D. (Illinois) Assistant Professor of Engineering Science and Mechanics

Opportunity for graduate studies are available in interdisciplinary and multidisciplinary research areas including: biomechanics; composite materials; continuum mechanics; electrical, magnetic, electromagnetic, optical, thermal, and mechanical properties of thin films; experimental mechanics; lithography; MEMS and MOEMS; micromechanics; molecular beam epitaxy; numerical methods; photovoltaic materials and devices; nanotechnology and nanobiotechnology; properties of materials; shock, vibration acoustics and nonlinear dynamics; structural health monitoring; structural mechanics; wave-material interaction; non-destructive evaluation and

testing; and failure analysis.

Admission Requirements

The minimum departmental requirements for admission to graduate standing include a baccalaureate degree from an approved institution, either in an accredited engineering curriculum or in some other program in mathematics, physical science, or engineering science. For regular admission, the student's grade-point average in the junior and senior undergraduate years must be 3.00 or better. Graduate Record Examinations (GRE) Aptitude Test scores must also be submitted. International students are required to submit TOEFL scores as well.

M. Eng. (E MCH) Degree Requirements

At least 30 graduate credits must be earned, of which 22 must be from lecture/laboratory courses approved by the department. Fifteen credits must be earned from E SC/E MCH courses as follows: 3 credits are required in the area of Analysis; 3 credits in the area of Fields; 3 credits in the area of Motion; 3 credits in the areas of Materials Performance/Reliability or Materials Processing/Structure/Characterization; and 3 credits from any one of the four categories. Additionally, 1 credit of graduate seminar (E SC/MCH 514) must be earned. A scholarly written report on a developmental study involving at least one area represented in the course work must be written, for which 3 credits of E SCI/E MCH 596 can be granted. This report must be comparable in the level of work and quality to a graduate thesis. Graduate GPA must be 3.0 or higher after admission and thereafter.

M.S. (E MCH) Degree Requirements

At least 32 graduate credits must be earned, of which 24 credits must be from lecture/laboratory 400- and 500-level courses approved by the department. No more than 6 credits may be earned from 400-level courses. Three credits are required in the area of Analysis; 3 credits in the area of Fields; 3 credits in the area of Motion; and 3 credits in the areas of Materials Performance/Reliability or Materials Processing/Structure/Characterization. Additionally, 2 credits of graduate seminar (E SC/E MCH 514) must be earned. A graduate thesis on an appropriate topic must also be submitted. It must be a well-organized account of research undertaken by the student, and must show initiative and originality. For the work leading to this thesis, 6 credits of E MCH 600 can be granted. Graduate GPA must be 3.0 or higher after admission and thereafter.

M.S. (E SC) Degree Requirements

At least 32 graduate credits must be earned, of which 24 credits must be from lecture/laboratory 400- and 500-level courses approved by the department. No more than 6 credits may be earned from 400-level courses. 6 credits are required in the area of Engineering Analysis; 6 credits in the area of Materials; 6 credits in the area of Basic Sciences; and 6 credits in the areas of Engineering Sciences. Additionally, 2 credits of graduate seminar (E SC/E MCH 514) must be earned. A graduate thesis on an appropriate topic must also be submitted. It must be a well-organized account of research undertaken by the student, and must show initiative and originality. For the work leading to this thesis, 6 credits of E SC 600 can be granted. Graduate GPA must be 3.0 or higher after admission and thereafter.

Ph.D. (ESMCH) Degree Requirements

Students may enter the Ph.D. program after completing an M.S. degree or directly from the B.S. degree. The student must have completed an appropriate M.S. degree prior to admission, or all course work requirements of the B.S. (E SC), M.S. (E SC), or M.S. (E MCH) degree must be satisfied before eligibility for the Ph.D. program can be established. In addition, (1) at least 18 graduate credits must be earned in lecture/laboratory 400- and 500-level courses approved by the department and (2) 3 credits of graduate seminar (E SC/E MCH 514) must be earned beyond the M.S. degree requirements. The student is required to pass a candidacy examination, an English competency examination (non-U.S. students), and a comprehensive examination. A doctoral thesis on an appropriate topic must also be submitted. It must be a well-organized account of research undertaken by the student, and must show initiative and originality. For the work leading to this thesis, 12 credits of E SC/E MCH 600 can be granted. Graduate GPA must be 3.0 or higher after admission and thereafter.

Integrated Undergraduate/Graduate Study - B.S. in Engineering Science - M.S. in Engineering Science

Introduction

The flexibility and strength in fundamentals of the Engineering Science curriculum provides an opportunity for Engineering Science undergraduate students to participate in the ESM Integrated Undergraduate Graduate (IUG) program. Application for IUG status may be made in the fifth or subsequent semesters.

IUG status permits students to take on the rigors and research challenges of graduate study at Penn State, coordinating and combining them with their baccalaureate studies. Because some credits earned as an undergraduate may be applied to both degree programs, the time required for completion of integrated undergraduate/graduate studies is normally less than that required to complete separate degree programs. The actual time required is determined by the individual student's objectives, needs, and diligence.

Integrated Undergraduate/Graduate Study - B.S. in Engineering Science - M.S. in Engineering Mechanics

Engineering Mechanics students, because of the flexibility of the curriculum and their strength in fundamentals, have a unique opportunity to take advantage of the ESM Integrated Undergraduate Graduate (IUG) program. Application for IUG status may be made in the fifth or subsequent semesters.

IUG status permits students to take on the rigors and research challenges of graduate study at Penn State, coordinating and combining them with their baccalaureate studies. Because some credits earned as an undergraduate may be applied to both degree programs, the time required for completion of integrated undergraduate/graduate studies is normally less than that required to complete separate

degree programs. The actual time required is determined by the individual student's objectives, needs, and diligence.

Other Relevant Information

Continuous registration is required for all students until the thesis or engineering report is approved.

Student Aid

Research and Teaching Assistantships (half time) are granted to a majority of graduate students in good academic standing. Financial supported is ordinarily limited to three semesters for full-time master's degree students, and six semesters for full-time Ph.D. students.

In addition to the fellowships, traineeships, graduate assistantships, or other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin,* the following awards typically have been available to graduate students in this program.

THEODORE HOLDEN THOMAS, Jr., MEMORIAL SCHOLARSHIP-Available to undergraduate or graduate students who display outstanding ability and have enrolled in the Department of Engineering Science and Mechanics. Apply to the Department of Engineering Science and Mechanics, 212 Earth-Engineering Sciences Building. Deadline is February 1.

SABIH AND GÜLER HAYEK GRADUATE SCHOLARSHIP IN ENGINEERING SCIENCE AND MECHANICS-Provides recognition and financial assistance to outstanding graduate students enrolled or planning to enroll in the Department of Engineering Science and Mechanics. Apply to the Department of Engineering Science and Mechanics, 211 Earth-Engineering Sciences Building. Deadline is February 1.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The Graduate Faculty

- Michael Anesko, Ph.D. (Harvard) *Associate Professor of English and American Studies*
- Robin Becker, M.A. (Boston) *Professor of English and Women's Studies*
- Bernard W. Bell, Ph.D. (Massachusetts) *Professor of English*
- Kevin J. H. Berland, Ph.D. (McMaster) *Associate Professor of English*
- Michael Berube, Ph.D. (Virginia) *Paterno Family Professor of Literature*
- Hester Blum, Ph.D. (University of Pennsylvania) *Assistant Professor of English*
- Robert E. Burkholder, Ph.D. (South Carolina) *Associate Professor of English*
- Athelstan Suresh Canagarajah, Ph.D. (University of Texas at Austin) *Kirby Professor of Language Learning*
- Barbara Cantalupo, A.B. (Rochester) *Associate Professor of English*
- Charles Cantalupo, Ph.D. (Rutgers) *Professor of English, Comparative Literature, and African Studies*
- Robert L. Caserio, Ph.D. (Yale) *Professor of English*
- Christopher Castiglia, Ph.D. (Columbia University) *Professor of English*
- Patrick G. Cheney, Ph.D. (Toronto) *Professor of English*
- Margaret Christian, Ph.D. (California, Los Angeles) *Associate Professor of English*
- William J. Cobb, Ph.D. (Houston) *Associate Professor of English*
- Phyllis B. Cole, Ph.D. (Harvard) *Professor of English*
- Claire M. Colebrook, Ph.D. (University of Edinburgh) *Edwin Erle Sparks Professor of English*
- Mary G. DeJong, Ph.D. (South Carolina) *Associate Professor of English and Women's Studies*
- Richard M. Doyle, Ph.D. (California, Berkeley) *Associate Professor of English*
- Jonathan P. Eburne, Ph.D. (University of Pennsylvania) *Assistant Professor of English*
- Caroline D. Eckhardt, Ph.D. (Michigan) *Professor of English and Comparative Literature; Head, Comparative Literature*
- Robert R. Edwards, Ph.D. (California, Riverside) *Distinguished Professor of English*
- William Ellis, Ph.D. (Ohio State) *Associate Professor of English*
- Richard C. Frushell, Ph.D. (Duquesne) *Professor of English and Comparative Literature*
- Keith Gilyard, Ph.D. (NYU) *Professor of English*
- Cheryl Glenn, Ph.D. (Ohio State) *Associate Professor of English*
- Sean Goudie, Ph.D. (University of California, Berkeley) *Associate Professor of English and Asian Studies*
- Caroline K. B. Hall, Ph.D. (Brown) *Associate Professor of English and American Studies*
- Emily Harrington, Ph.D. (University of Michigan) *Assistant Professor of English*
- John T. Harwood, Ph.D. (Nebraska) *Associate Professor of English; Senior Director of Teaching and Learning with Technology, Information Technology Services*
- Clement Hawes, Ph.D. (Yale) *Associate Professor of English*
- Charlotte Holmes, M.F.A. (Columbia) *Associate Professor of English*
- Evelyn Hovanec, Ph.D. (Pittsburgh) *Associate Professor of English*
- Kathryn Hume, Ph.D. (Pennsylvania) *Distinguished Professor of English*
- Robert D. Hume, Ph.D. (Pennsylvania) *Evan Pugh Professor of English*
- Nicholas A. Joukovsky, D.Phil. (Oxford) *Professor of English*
- Julia Kasdorf, Ph.D. (NYU) *Associate Professor of English*
- Michael Kiernan, Ph.D. (Harvard) *Associate Professor of English*
- Lovalerie King, Ph.D. (university of North Carolina, Chapel Hill) *Assistant Professor of English*
- Laura L. Knoppers, Ph.D. (Harvard) *Professor of English*
- Jeanne E. Krochalis, Ph.D. (Harvard) *Associate Professor of English*
- Brian Lennon, Ph.D. (Columbia University) *Assistant Professor of English and Comparative Literature*
- Robert E. Lougy, Ph.D. (California, Davis) *Associate Professor of English*
- Janet Lyon, Ph.D. (Virginia) *Associate Professor of English*
- Ian Marshall, Ph.D. (Delaware) *Associate Professor of English*
- James E. May, Ph.D. (Maryland) *Associate Professor of English*
- William B. McCarthy, Ph.D. (Indiana) *Professor of English*
- Linda Patterson Miller, Ph.D. (Delaware) *Professor of English*
- Shirley Moody, Ph.D. (University of Maryland) *Assistant Professor of English*
- Mark Morrisson, Ph.D. (Chicago) *Associate Professor of English*
- J. Philip Mosley, Ph.D. (East Anglia) *Associate Professor of English and Comparative Literature*
- Carla J. Mulford, Ph.D. (Delaware) *Associate Professor of English*
- Leonard Mustazza, Ph.D. (SUNY) *Professor of English*
- Jeffrey Nealon, Ph.D. (Loyola) *Professor of English*
- Aldon Nielsen, Ph.D. (George Washington) *George and Barbara Kelly Professor of English*
- Marcy North, Ph.D. (University of Michigan) *Associate Professor of English*
- Josip Novakovich, M.A. (Texas at Austin) *Associate Professor of English*
- Jon Olson, Ph.D. (USC) *Assistant Professor of Writing*
- Paul Orlov, Ph.D. (Toronto) *Associate Professor of English*
- Iyunolu F. Osagie, Ph.D. (Cornell) *Associate Professor of English*
- Beverly Peterson, Ph.D. (William and Mary) *Assistant Professor of English*
- R. Alan Price, Ph.D. (Rochester) *Associate Professor of English*
- Steven D. Putzel, Ph.D. (Toronto) *Associate Professor of English*
- Christopher Reed, Ph.D. (Yale University) *Associate Professor of English and Visual Culture*
- Mike Riley, Ph.D. (Ohio) *Associate Professor of English*
- Benjamin Schreier, Ph.D. (Brandeis University) *Assistant Professor English and Jewish Studies*

- Robin G. Schulze, Ph.D. (Michigan) *Professor of English*
- Sanford Schwartz, Ph.D. (Princeton) *Associate Professor of English*
- Stuart Selber, Ph.D. (Michigan Tech U) *Associate Professor of English*
- John L. Selzer, Ph.D. (Miami) *Professor of English*
- Linda Selzer, Ph.D. (The Pennsylvania State University) *Assistant Professor of English and American Studies*
- Gayle L. Smith, Ph.D. (Massachusetts) *Associate Professor of English*
- James F. Smith, Ph.D. (Penn State) *Professor of English*
- Scott Smith, Ph.D. (University of Notre Dame) *Assistant Professor of English and Comparative Literature*
- Thomas Smith, Ph.D. (Rutgers) *Assistant Professor of English*
- Adam J. Sorkin, Ph.D. (North Carolina) *Distinguished Professor of English*
- Sandra Spanier, Ph.D. (Penn State) *Professor of English and Women's Studies*
- Susan Squier, Ph.D. (Stanford) *Julia Gregg Brill Professor of English and Women's Studies*
- Ryan Stark, Ph.D. (Texas Christian University) *Assistant Professor of English*
- Lisa Sternlieb, Ph.D. (Princeton University) *Associate Professor of English*
- Suzanne Stutman, Ph.D. (Temple) *Professor of English*
- Garrett Sullivan, Ph.D. (Brown) *Associate Professor of English*
- Toby Thompson, M.A. (Virginia) *Associate Professor of English*
- Tramble Turner, Ph.D. (North Carolina) *Associate Professor of English*
- Anthony Vallone, M.F.A. (Indiana) *Associate Professor of English*
- James L. W. West III, Ph.D. (South Carolina) *Edwin Erle Sparks Professor of English*
- Linda Woodbridge, Ph.D. (UCLA) *Distinguished Professor of English*
- Xiaoye You, Ph.D. (Purdue University) *Assistant Professor of English and Asian Studies*
- Paul Youngquist, Ph.D. (Virginia) *Professor of English*

Candidates for the M.A., M.F.A., and Ph.D. in English may choose from a variety of courses in English literature and language, rhetoric and composition, and theory/cultural studies. The M.F.A. in English helps prepare candidates for professional careers as writers of fiction, poetry, or nonfiction, or for careers in academia.

The department offers a strong college-level teacher-training program, and most graduate students in English have the opportunity to serve as teaching assistants. Students usually begin by teaching basic composition courses, but there are opportunities for advanced students to teach courses in business writing, technical writing, fiction writing, poetry writing, literature, and humanities, and to serve as tutors in the Writing Center.

Admission Requirements

Requirements listed in this section are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

English Proficiency--The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test; or a minimum composite score of 6.5 on the IELTS.

Applicants should have a junior/senior grade-point average of 3.50 (on a 4.00 scale), although exceptions may be made for students with special backgrounds, abilities, and interests. Scores from the Graduate Record Examinations (GRE) Aptitude Tests (verbal and quantitative) are required for admission. Applicants must also submit three letters of recommendation, a writing sample indicating their ability to do analytical or original work, and a statement of their professional goals.

For admission, M.A. students should have strong backgrounds in English courses: 18 credits beyond freshman composition are a minimum, but the department prefers at least 24 credits.

For admission into the M.F.A. program, students must have a baccalaureate degree (with substantial work in English), a portfolio of publishable student writing, and the intention to pursue a career as a professional writer.

To be considered for the doctoral program, students must have completed an M.A. in English, M.F.A. or its equivalent. The records of potential students should indicate promise of superior work in doctoral study.

Master's Degree Requirements

Candidates for the M.A. take at least 30 credits of course work. M.A. candidates must fulfill the language requirement in one foreign language. All master's candidates are required to take ENGL 501, one course in literary or rhetorical theory, two courses in periods prior to 1800, and two courses in periods after 1800. Students are also required to complete a Writing Project that will demonstrate mastery of the field.

For admission into the M.F.A. program, students must have a baccalaureate degree (with substantial work in English), a portfolio of publishable student writing, and the intention to pursue a career as a professional writer.

M.F.A. candidates are required to take 42 credits, distributed as follows:

- 3 credits ENGL 501
- 12 credits in ENGL 512, ENGL 513, or ENGL 515, at least 9 of which must be in the student's area of specialization (ENGL 512, 513, and 515 can be repeated for credit)
- 12 credits in ENGL 596 for the final project, or at least 6 credits of ENGL 596 and 6 credits of English Department graduate seminars
- 3 credits in electives (400 or 500-level courses)
- 12 credits in literature at the 500 level
- Candidates will complete a book-length manuscript of publishable quality in their area of specialization.

Doctoral Degree Requirements

The Ph.D. degree does not require a specific number of credits although all candidates are required to have completed English 501 (or the equivalent), one course in rhetoric or theory, two courses in periods before 1800, and two in periods after 1800. With the help of departmental graduate advisers, students select a program of seminars or reading courses. To complete their programs, students must show reading proficiency in one foreign language, pass written comprehensive examinations, and write and defend a doctoral dissertation.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following awards typically have been available to graduate students in this program:

EDWIN ERLE SPARKS FELLOWSHIPS IN THE HUMANITIES (8)

Available to beginning and continuing graduate students in one of the following graduate programs: Comparative Literature, English, French, German, History, Linguistics, Philosophy, Spanish, and Speech Communication; stipend $12,560 plus waiver of tuition. Apply to department before February 1.

KATEY LEHMAN FELLOWSHIP

Provides approximately $13,000 plus tuition for a year's study in poetry or fiction writing leading toward an M.F.A. in English. The Lehman Fellow will teach one course during the fellowship year. Fellowship holders are eligible for graduate assistantships with a similar stipend and tuition grant during the second year of study.

WILMA EBBITT AWARD

Funding to support research in rhetoric. Number and amount of awards to be determined.

BEN EUWEMA MEMORIAL SCHOLARSHIP

Travel funding for graduate degree candidates; consideration will be given to all currently enrolled graduate students in English. Preference will be given to students at the Ph.D. thesis stage, particularly those who need to travel to complete their research; number of awards and amount of each will be determined each year.

FOLGER INSTITUTE FELLOWSHIPS

Penn State is a member of the Folger Institute of Renaissance and Eighteenth-Century Studies. Graduate students in English are eligible for Folger Institute Fellowship to study in seminars and workshops at the Folger Library, Washington, D.C.

PHILIP YOUNG MEMORIAL AWARD

Funding to support research in American Literature. Number and amount of awards will be determined.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

ENGLISH (ENGL) course list

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- Tom Baker, Ph.D. (Michigan State) Professor of Entomology
- Mary E. Barbercheck, Ph.D. (California, Davis) Professor of Entomology
- Ottar N. Bjornstad, Ph.D. (Oslo) Associate Professor of Entomology
- Dennis D. Calvin, Ph.D. (Kansas State) Professor of Entomology
- Diana Cox-Foster, Ph.D. (Illinois) Professor of Entomology
- Liwang Cui, Ph.D. (Kentucky) Professor of Entomology
- Consuelo M. De Moraes, Ph.D. (Georgia) Assistant Professor of Entomology
- Gary W. Felton, Ph.D. (California, Davis) Professor of Entomology
- Shelby J. Fleischer, Ph.D. (Auburn) Professor of Entomology
- James L. Frazier, Ph.D. (Ohio) Professor of Entomology
- Christina Grozinger, Ph.D. (Harvard) Associate Professor of Entomology
- Paul R. Heller, Ph.D. (Ohio State) Professor of Entomology
- Kelli Hoover, Ph.D. (California, Davis) Associate Professor of Entomology
- Larry A. Hull, Ph.D. (Penn State) Professor of Entomology
- Ke Chung Kim, Ph.D. (Minnesota) Professor Emeritus of Entomology
- George Krawczyk, Ph.D. (Michigan State) Research Associate
- Bruce A. McPheron, Ph.D. (Illinois) Professor of Entomology
- Mark Mescher, Ph.D. (U of Georgia) Assistant Professor of Entomology
- Christopher A. Mullin, Ph.D. (Cornell) Professor of Entomology
- Nancy Ostiguy, Ph.D. (Cornell) Associate Professor of Entomology
- Edwin G. Rajotte, Ph.D. (Rutgers) Professor of Entomology
- Andrew Read, Ph.D. (Oxford, UK) Professor of Biology and Entomology, Eberly College of Science Distinguished Senior Scholar
- Michael C. Saunders, Ph.D. (Georgia) Professor of Entomology
- Matthew Thomas, Ph.D. (U of Southampton, UK) Professor of Entomology
- Jim Tumlinson, Ph.D. (Mississippi State) Professor of Entomology, Ralph O. Mumma Endowed Professor of Chemical Ecology

Graduate study in the Entomology program seeks to develop students to assume leadership roles in science upon graduation. Students are encouraged to write research proposals, give professional presentations, and publish research articles. Emphasis is placed upon the professional development of the student. Part of the student's training is participation in professional development activities. These are selected by the student from course preparation/delivery, experience in insect identification clinics, experience in museum collection, preparation of multimedia educational materials, and entrepreneurial activities. Students are able to specialize in the research program areas of insect-plant interactions, environmental and developmental regulation of genes, artificial intelligence and modeling, population biology, ecology and biodiversity, integrated pest management, and environmental quality and application technology. Additional specialization is available to students performing research with insects in the intercollege degree programs in genetics, ecology, and plant physiology.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

For admission a student should have a strong background in biological sciences. Courses in chemistry through organic, physics, mathematics through calculus, statistics, and computer application are recommended.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. Specific graduate programs may have more stringent requirements.

Master's Degree Requirements

The master of science degree in Entomology is an intermediate degree leading toward the development of special knowledge in entomology. It provides training for prospective doctoral candidates. A minimum of 30 graduate credits (400 and 500 level) are required, with at least 20 credits earned in residence. At least 18 credits in the 500 and 600 series must be included in the program. A minimum of 12 credits in coursework (400 and 500) must be completed in the major program.

The program requires all students to take (or have the equivalent of) ENT 410, 412, and 457, Professional Development and Ethics, Insect Ecology, Natural History, Insect Genomics, Proteomics, and Bioinformatics, and a minimum of 3 credits of statistics. Additional courses may be selected by the student in consultation with his/her graduate committee. Each student must present the results of thesis research at a departmental seminar, and the student may register for 1 credit of ENT 590 that semester. A thesis equivalent to 6 credits (ENT 600) is required. A final oral examination covering the general field of entomology, with emphasis in the student's area of specialization, is required by the department. This is to be administered by the student's committee. A favorable vote of a two-thirds majority is necessary for passing.

The Thesis Guide is available electronically, visit www.etd.psu.edu.

Doctoral Degree Requirements

The degree of doctor of philosophy signifies high scholastic achievement and demonstrated capability in independent research. Although there is no formal credit requirement, it will normally require at least three years of graduate work. Some of the work may be completed off campus or on a part-time basis, but between the time of acceptance as a candidate and completing the degree requirements the student must spend two academic sessions in residence within a twelve-month period. The department requires that all students have ENT 410, 412, and 457, Professional Development and Ethics, Insect Ecology, Natural History, Insect Genomics, Proteomics, and Bioinformatics, or their equivalent. Other course requirements are dependent on the student's program of study. The results of the dissertation research must be presented at a departmental seminar. In addition, students must take and pass a comprehensive and final oral examination. A minor is not required, but a student may elect a minor in general studies or a related field. This consists of no fewer than 15 credits.

There is no foreign language requirement for the Ph.D. degree. However, depending on the nature of the thesis research and with the advice and consent of the Doctoral Committee, competency in a foreign language may be required as a part of the doctoral studies of certain students.

Students are not formally admitted to the doctoral candidacy until they have passed a candidacy examination. A favorable vote by two-thirds of the committee members is necessary for acceptance of a candidate.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Dual-Title Graduate Degree in Entomology (ENT) and Comparative and International Education (CI ED)

Graduate student with research and educational interests in international education may apply to the Entomology/CI ED Dual-Title Degree Program. The goal of the dual-title degree Entomology and CI ED graduate program is to enable graduate students from Entomology to acquire the knowledge and skill of their primary area of specialization in Entomology, while at the same time gaining the perspective and methods of comparative and international education.Graduate Dual-Title degree program in Entomology and CI ED study in this program seeks to prepare students to assume leadership roles in science, science education, outreach, and project management anywhere in the world. Students are required to write research proposals and expected to write grants to support their research activities, reflecting the dual-title degree. As part of their professional development, presentations, publication of research articles, and active participation in professional societies is expected. Emphasis is placed upon the professional development of the student. Students are able to specialize in the research program areas of chemical ecology, disease ecology and biology, ecology, genomics and pest management. Additional specialization is available to students performing research with insects in the inter-college degree programs in genetics, ecology, and plant biology. At the same time they will acquire a broad perspective about how to apply their research findings in the context of the broader international community. Thus, the dual-title will allow students to master their field of specialization from an international perspective so that they can compare practices and outcomes between countries and regions.

This dual-title graduate degree program does not duplicate any other degree program at the University.

Admission Requirements

For admission to the dual-title degree under this program, a student must first apply and be admitted to the Entomology graduate program. Once accepted into the Entomology program, the student can apply to the Admissions Committee on the Comparative and International Education program. The CI ED admissions committee reviews applications and recommends students for admission to the dual-title degree program to the Graduate School. Scores from the Graduate Records Examinations (GRE) are required for admission. In addition, students are to provide a written personal statement indicating the career goals they hope to accomplish by earning a dual-title Entomology/CI ED degree. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the Entomology program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, as established by the CI ED program committee. Within this framework, final course selection is determined by the student, their CI ED adviser, and their Entomology program adviser.

Upon a student's acceptance by the CI ED admissions committee, the student will be assigned a CI ED academic adviser in consultation with the CI ED program chair. As students develop specific scholarly interests, they may request that a different CI ED faculty member serve as their adviser. The student and adviser will discuss a program of study that is appropriate for the student's professional objectives and that is in accord with the policies of The Graduate School, the Entomology program and the CI ED program.

Requirements for Entomology/CI ED Dual-Title M.S.

The master's in Entomology and CI ED is a dual-title degree awarded only to students who are admitted to the Entomology master's program and admitted to the dual-title degree in CI ED. In addition to the requirements for the Entomology degree, dual-title students must:

Complete a minimum of 12 CI ED credits with study in the following curriculum categories:
3 credits, CI ED Proseminar (CI ED 500)
6 credits, advanced comparative and international education content courses
3 credits, advanced or focused comparative and international education content courses
Write a master's thesis on a topic that reflects both the graduate program in Entomology and the dual-title offering in Comparative and International Education.

The thesis committee for the dual-title M.S. degree will consist of two graduate faculty members from Entomology and one graduate

faculty member from CI ED.

Candidates for the dual-title master's degree in Entomology and CI ED will also be required to pass a final oral examination covering the general field of Entomology and CI ED , with emphasis on the student's area of specialization. The oral exam (thesis defense) is to be administered by the student's thesis committee. A favorable vote of a two-thirds majority is necessary for passing.

Some courses may satisfy both the graduate primary program requirements and those of the CI ED program. Final course selection is determined by the students in consultation with their CI ED advisers and their major program advisers. Students and advisers should maintain the CI ED Master's Degree Plan of Study, which must be submitted to the CI ED program office two months before the student files the "Intent to Graduate" via eLion.

Requirements for the Entomology/CI ED Dual-Title Ph.D.

The doctoral degree in Entomology and CI ED is a dual-title degree awarded only to students who are admitted to the Entomology doctoral program and admitted to the dual-title degree in CI ED. The minimum course requirements for the dual-title Ph.D. degree in Entomology and CI ED, in addition to the Entomology Department requirements, are as follows:

Complete a minimum of 27 graduate credits
3 credits of Proseminar in Comparative and International Education (CI ED500);
6 credits in advanced-Comparative and International Education courses;
12 credits in Comparative and International Education content courses or courses with comparative or international content;
6 credits in research methods.

A minimum of 18 of the 27 credits must be taken at the 500-level, and particular courses may satisfy both the Entomology Department requirements and those in the Comparative and International Education program. Final course selection is determined by the student in consultation with their CI ED advisers and their major program advisers. Students who already hold a master's degree from another institution may petition to have equivalent course credits accepted.

Ph.D. Minor in CI ED

A Ph.D. (or D.Ed.) minor program in Comparative and International Education is available to doctoral students who find it desirable to include the perspectives and methodologies of Comparative and International Education in the Entomology program and have been approved to do so by their doctoral committees. To qualify for a minor in Comparative and International Education, students must satisfy the requirements of the Entomology Department, and meet the following minimum requirements:

3 credits in the Proseminar in Comparative and International Educations (CI ED 500);
3 credits in a Comparative and International Education courses;
9 credits in Comparative and International Education content courses (or advanced courses) or in courses with comparative or international content outside the College of Education.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Program Home Page (Opens New Window)

PEGGY JOHNSON, *Professor and Head of the Department of Civil and Environmental Engineering*
212 Sackett Building
814-863-3085

Degrees Conferred:

Ph.D., M.S., M.Eng.

The Graduate Faculty

- Rachel A. Brennan, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of Civil Engineering
- William D. Burgos, Ph.D. (Virginia Tech) Associate Professor of Environmental Engineering
- Fred S. Cannon, Ph.D. (Illinois, Urbana-Champaign) P.E. Associate Professor of Environmental Engineering
- Brian A. Dempsey, Ph.D. (North Carolina) Professor of Environmental Engineering
- Christopher J. Duffy, Ph.D. (New Mexico Institute of Mining and Technology) P.H. Professor of Civil Engineering
- Peggy A. Johnson, Ph.D. (Maryland) Professor of Civil Engineering
- Bruce E. Logan, Ph.D. (California, Berkeley) Kappe Professor of Environmental Engineering
- Jack V. Matson, Ph.D. (Rice) P.E. Professor of Environmental Engineering
- Arthur C. Miller, Ph.D. (Colorado State) P.E., P.L.S. Professor of Civil Engineering
- Raymond W. Regan, Sr., Ph.D. (Kansas) P.E. Professor of Environmental Engineering

This specialty prepares students for careers in the design of treatment facilities, environmental monitoring, process development for water quality control, industrial waste treatment, management of hazardous and toxic substances, monitoring and management of environmental quality, air pollution control, and water resource systems.

Admission Requirements

The requirements listed here are in addition to the general requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Candidates should possess a baccalaureate degree from a regionally accredited institution. Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and appropriate course backgrounds may be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

International applicants must submit OFFICIAL transcripts, degree, and diploma certificates in both English and their native language. These documents must contain the “red stamp” or have the raised notary stamp. Photocopies will NOT be accepted. Applicants must provide the department with official transcripts of all of their previous course work (in duplicate), a statement of objectives, and three letters of recommendation AT THE TIME OF APPLICATION. Résumés are encouraged, but not required. In addition, all applicants must submit scores from the General Graduate Record Examination Aptitude Test (verbal, quantitative, and analytical).

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the internet-based test. The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a masters degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British west Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, The United States, and Wales.

Applicants for fall admission who wish to be considered for financial aid should have COMPLETED applications on file by DECEMBER 1 of the preceding year.

Degree Requirements

The M.Eng. degree is a nonthesis professional master's degree. The program provides training for advanced professional practice. A minimum of 30 graduate credits (400 level and above) of course work and a writing portfolio are required. It should be noted that 20 credits must be earned at an established graduate campus of the University. At least 15 credits must be earned in graduate courses (500 level). Students are no permitted to count audited credits toward the minimum credits required for the degree. The writing portfolio may consist of the following types of writing samples: a semester paper, a report that documents a semester design project, an applied research paper, or professional papers. The writing sample must demonstrate in-depth knowledge of an engineering topic presented in a format typical of professional practice.

The M.S. degree program is strongly oriented toward research. A minimum of 30 graduate credits (400 level and above) is required, of which 20 must be earned at an established graduate campus of the University. At least 18 credits in the 500 and 600 series, combined, must be included in the program. A minimum of 12 credits of course work (400 and 500 level), as contrasted with research, must be completed in the major (courses prefixed C E). Students are not permitted to count audited credits toward the minimum credits required for the degree. A thesis is required, and at least 6 credits of thesis research (C E 600 or 610) must be included in the candidate's academic course plan.

A minimum of 24 credits of graduate course work (400 level and above) is required beyond the master's degree. A candidate for the Ph.D. degree must pass the English proficiency and candidacy examinations, prepare and defend the thesis proposal as part of the oral comprehensive examination, and pass the final oral examination (thesis defense). In addition, Ph.D. candidates must satisfy the University residency requirement by registering for two consecutive semesters as a full-time student.

Continuous registration is required for all graduate students until the thesis or writing portfolio has been approved.

Biogeochemistry Dual-Title Degree Program

Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree

Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework from an approved list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. A single candidacy examination that includes biogeochemistry will be administered for admission into the student's Ph.D. program, as well as the biogeochemistry dual-title. The structure and timing of this exam will be determined jointly by the dual-title and major program. The student's doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Other Relevant Information

The following courses offered by the Department of Civil and Environmental Engineering are appropriate for students majoring in Environmental Engineering (course descriptions are given under Civil Engineering); C E 462, 465W, 472W, 475, 476, 479, 496, 497, 551, 555, 556, 561, 564, 566, 567, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 596, 597, and 598. Appropriate courses offered by other departments include, but are not limited to: B M B 401, 402; CHEM 406; GEOSC 452; M E 405, 470, 521; METEO 454; MICRB 400; NUC E 420.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. International applicants who wish to be considered for a teaching assistantship must present an acceptable score (250-300 or 55-60) on the Test of Spoken English (TSE). The TSE can be taken in many countries, or at Penn State after arrival.

CECIL M. PEPPERMAN MEMORIAL GRADUATE FELLOWSHIP
Available to a graduate student in civil or environmental engineering specializing in one of the following fields, listed in order of priority: waste treatment and management, water pollution control, environmental engineering, or related fields.

Environmental Engineering (ENVE)

THOMAS H. EBERLEIN, *Coordinator, Environmental Programs*
Penn State Harrisburg
TL 177 Science and Technology Building
777 W. Harrisburg Pike
Middletown, PA 17057-4898

www.hbg.psu.edu (Opens New Window)

Degree Conferred:

M.Eng.

The Graduate Faculty:

- Katherine A. Baker, Ph.D. (Delaware) Associate Professor of Environmental Microbiology
- Yen-Chih (David) Chen, Ph.D. (Purdue) Assistant Professor of Environmental Engineering
- Balwant Chohan, Ph.D. (Massachusetts) Assistant Professor of Chemistry
- Shirley Clark, Ph.D. (Alabama, Birmingham) Assistant Professor of Environmental Engineering
- Sairam Rudrabhatla, Ph.D. (Osmania, India) Assistant Professor of Biology
- Howard G. Sachs, Ph.D. (Clark) Professor of Biology
- Yuefeng Xie, Ph.D. (Tsinghua) Associate Professor of Environmental Engineering

This program, offered at the Harrisburg campus, is intended for the engineer who desires a part-time graduate environmental engineering program. Prospective students who do not have an undergraduate engineering degree, but rather hold a baccalaureate degree in a related scientific field (such as chemistry, microbiology, environmental science) may be admitted to the program but may need to take some prerequisite undergraduate engineering courses. This degree program complements the Environmental Pollution Control graduate programs (M.E.P.C. and M.S. in EPC) offered by the same faculty.

A variety of civil and environmental engineering courses are regularly offered, as well as specialty courses in environmental policy, other engineering areas, computer science, and other policy-related areas.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin.*

Applicants are strongly encouraged to present an undergraduate degree in engineering from an accredited program. However, those who possess an undergraduate degree in a related scientific field may be considered for admission; those students will need to take additional engineering courses in order to be adequately prepared.

All students are expected to have an undergraduate junior/senior grade-point average of 3.0 on a 4.0-point system. Exceptions to this minimum may be made for students with special backgrounds or abilities, or other qualifications.

All applicants must provide two copies of all official transcripts of all their previous course work. In addition, applicants must supply a statement of objectives and three letters of recommendation.

For those students for whom English is not their native language, scores on the Test of English as a Foreign Language (TOEFL) are required; an acceptable score of 560 on the paper-based version or 220 on the computer-based test is required.

International applicants should be aware that processing of transcripts and other application-related information may take considerable time. Applicants must ensure that materials arrive at least three months prior to the start of the semester they first intend to begin studies.

Degree Requirements

A minimum of 30 credits is required for the degree. All candidates are required to take a core course in each of the four environmental areas: air, water, solid waste management, and policy/risk. The program suggests that students take the following courses to meet the first three area requirements:

MECHANICAL ENGINEERING (M E)

- M E 433 Air Pollution Control (3)

CIVIL ENGINEERING (C E)

- CE 472 Water Pollution Control (3)
- CE 476 Solid Waste Management (3)

The college regularly offers several courses that meet the policy/risk area requirement, including:
ENVE 487 Environmental Law, ENVE 569 Environmental Risk Assessment, and P ADM 531 Environmental Policy.

Courses in the degree program may be taken at the 400 or 500 level, but a minimum of 18 credits must be at the 500 level. All students must take at least 1 credit of EPC 590 Seminar and complete a scholarly master's paper. The seminar and the paper count toward the 500-level requirement. All students must complete a total of 30 credits in order to earn the degree.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A

graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- John C. Wyngaard, Ph.D. (Penn State) *Professor of Meteorology*

This intercollege master's degree program, available at Penn State Harrisburg and Penn State University Park, deals with the various aspects of air, land, and water pollution control. Graduate instruction is under the direction of an interdisciplinary faculty committee and the departments participating in the program. The EPC faculty have teaching and research interests in the area of environmental pollution control, and where projects are being funded, support opportunities may be available. Currently, faculty from sixteen departments in four colleges are participating in the program at University Park and faculty from four graduate programs participate at Penn State Harrisburg. A student is affiliated with one of these departments on the basis of his/her specific area of interest and is advised by an EPC faculty member in that department. Maximum flexibility is maintained by the program in an effort to meet both the needs of the individual student and the pollution control activity in which he/she wants to participate.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad*

Graduate Bulletin.

The EPC program is designed for students with backgrounds in science or engineering. Admission will be granted if the applicant has the necessary program prerequisites and a faculty member in the student's interest area agrees to serve as adviser. Normal admission requirements include mathematics through integral calculus plus two courses each in both general chemistry and physics.

Students with a 3.00 junior/senior average and with appropriate backgrounds in mathematics and science will be considered for admission. The best-qualified applicants will be admitted up to the number of places that are available for new students. Applicants to the Environmental Pollution Control program are required to provide a statement of objectives, three letters of recommendation, and scores from the Graduate Record Examination (GRE) Aptitude Test (verbal, quantitative, analytical) to complete the admission process. Entering graduate students for whom English is not their first language are required to have a score of at least 560 on the TOEFL (Test of English as a Foreign Language) examination. There is no foreign language requirement.

Degree Requirements

All candidates are required to take a core course in each of four environmental areas--air, water, solid waste, hazardous waste management, and policy/risk--and 1 credit of the E P C 590 seminar for a minimum core requirement of 12 credits. All but 6 of the total 30 credits required must be selected from a recommended course list. If the option to prepare a thesis is selected (M.S. only), students must schedule at least 12 credits at the 500 level, take at least 6 credits of 600-level thesis research in their thesis adviser's academic department, and write a thesis on an area concerned with environmental pollution. Only 6 credits of 600-level course work may count toward the 30-credit minimum degree requirement. Students who select the nonthesis option must schedule at least 18 credits at the 500 level, which may include 1 credit of E P C 590 and a maximum of 3 paper-writing credits. The M.E.P.C. E P C degree require submission of a scholarly master's paper.

Watershed Stewardship Option

The Graduate Option in Watershed Stewardship is a graduate option intended to provide enhanced educational opportunities for students with an interest in water resources management who are enrolled in a graduate degree program within Environmental Pollution Control at the University Park campus. The objective of the Graduate Option in Watershed Stewardship is to educate students to facilitate team-oriented, community-based watershed management planning directed at natural resources conservation and environmental problems encountered in Pennsylvania communities, especially non-point source water pollution. The Graduate Option in Watershed Stewardship requires 22 credits of graduate coursework: 12 credits of breadth courses, 2 credits of Watershed Stewardship Seminar courses (FOR 591A and FOR 591B or LARCH 510.2), and 8 credits of Watershed Stewardship Practicum I and II courses (FOR 570 and FOR 571 or LARCH 540.2 and LARCH 550.2). Breadth courses will consist of three graduate credits of coursework from each of four subject matter areas: 1) water resources science, 2) social science, public policy and economics, 3) humanities, and 4) communications and design. In the watershed stewardship practicum courses students work in teams with community, government and business leaders to analyze and understand natural resources and environmental pollution problems and creatively synthesize appropriate solutions in the form of a written watershed management plan.

A representative pattern of scheduling for the Graduate Option in Watershed Stewardship in addition to a student?s other degree requirements might be:

First Year:

Fall Semester
Breadth electives?6 credits
FOR 591A or LARCH 510.2
Watershed Stewardship Issues
Colloquium, 1 credit

Spring Semester
Breadth electives?6 credits
FOR 591B or LARCH 510.2
Watershed Stewardship
Planning Colloquium, 1 credit

Second Year:

Fall Semester
FOR 570 or LARCH 540.2?3 credits
Keystone Project

Spring Semester
FOR 571 or LARCH 550.2?5 credits
Keystone Project

A list of acceptable breadth courses from each category is provided in the Graduate Option in Watershed Stewardship Handbook. Students will be allowed to petition to the Center for Watershed Stewardship to substitute higher level or equivalent courses in a major field to suit their specific backgrounds and goals. Courses taken for the Graduate Option in Watershed Stewardship may be used to satisfy other EPC degree requirements with concurrence of their adviser and graduate committee and only if such courses are approved EPC core requirements or are on the currently approved list of additional 400- and 500-level course for the EPC major. The graduate committee for a student enrolled in the Option in Watershed Stewardship must include a faculty representative from the Center for Watershed Stewardship.

Students enrolled in M.E.P.C. or M.S. degree program within Environmental Pollution Control may apply to participate in the Graduate Option in Watershed Stewardship. EPC students may prepare their thesis or paper on a topic related to their watershed management plan, but the thesis or paper must reflect independent thought and scholarly effort above and beyond the requirements of FOR 570 and FOR 571 or LARCH 540.2 and LARCH 550.2.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

ENVIRONMENTAL POLLUTION CONTROL (E P C)
590. COLLOQUIUM (1)

EPC Concurrent degree offering with the Penn State Dickinson School of Law

Penn State Harrisburg School of Science, Engineering, and Technology
Penn State Dickinson School of Law

Degrees Conferred:

J.D. (Dickinson) M.E.P.C., M.S. (Penn State Harrisburg)

Degrees

The Penn State Dickinson School of Law and the Intercollege Graduate Program in Environmental Pollution Control (EPC) offer a coordinated program leading to the degrees of Juris Doctor (J.D.) and Master of Environmental Pollution Control (M.E.P.C.), or Master of Science in EPC (M.S.).

The EPC programs are interdisciplinary, dealing with all aspects of controlling air, water, and solid waste pollution and disposal. The master of engineering degree is designed for those with an undergraduate degree in engineering, while the master of environmental pollution control degree is for those with science or nontechnical backgrounds. The master of science degree is intended for those students who wish to intensively pursue a research area as part of their master's degree work.

Admission to the Program

In order to be admitted to the program, students must first be admitted to Dickinson under its regular admission procedures. Students are admitted to begin classes in the fall only. Dickinson will screen potential program candidates, and need not forward applications of all Dickinson admittees who have expressed an interest in the EPC programs. Dickinson can withhold support for some admittees until they have demonstrated proficiency in their legal studies and a capacity for dual-degree study. The EPC program at Penn State Harrisburg will make an independent admission decision as to all dual-degree applicants.

Admission Requirements

Dickinson

A bachelor's or equivalent degree from an accredited college is a prerequisite for admission. However, there is no standard prescribed undergraduate curriculum. An applicant should have acquired significant oral and written communication skills before entering law school. The following are required of applicants: complete application form for Dickinson; taking of the Law School Admission Test (LSAT); completion of an LSDAS report; a one-page personal statement; employment record since high school; two recommendations.

EPC

A bachelor's degree in engineering from an accredited program is required for the Master of Engineering degree program. For the Environmental Pollution Control program, a bachelor's degree is required, including courses in mathematics through integral calculus and two courses each in both general physics and chemistry. If the applicant has not had experience with aspects of environmental engineering or science, completion of ENVE 397 Introduction to Environmental Engineering and Science or C E 297B Water Pollution Control is strongly suggested prior to the start of the graduate course work in the program. A completed Graduate School application form also is required.

Sequence

Students complete the first year of the J.D. program before beginning the EPC program. (While students might take courses in the EPC program prior to enrollment at Dickinson, credit for those courses may not count toward the J.D. degree.) Thereafter, students may concurrently enroll in courses in the J.D. and the EPC programs provided that they abide by the requirements of each program.

Interprogram Transfer of Credits

J.D.

A maximum of 12 credits for EPC course work may be transferred for credit toward the J.D. degree at Dickinson. Courses for which such credit may be applied shall be subject to approval by the Dickinson faculty. Students must obtain a grade satisfactory to Dickinson for the course work to be credited toward the J.D. degree.

M.E.P.C.

A maximum of 12 credits of Dickinson course work may be counted for credit toward this degree, subject to EPC approval based on the relevance to the MEPC degree program. No course work at Dickinson may be used to satisfy the master's paper requirement of the MEPC degree program. However, a member of the Penn State graduate faculty from Dickinson may be designated as a reader for the master's project.

M.S. in EPC

A maximum of 8 credits of Dickinson course work may be counted for credit toward this degree, subject to EPC approval based on relevance to the degree program. No course work at Dickinson may be used to satisfy the master's paper requirement of the M.Eng. degree program or the thesis requirement of the M.S. degree. However, a member of Penn State graduate faculty from Dickinson may be designated as a reader for the master's project.

Recommended Program of Study and Advising

All students in the program have two advisers, one from Dickinson and one from EPC (Penn State Harrisburg). Periodic interaction between the two advisers is encouraged. A program of study is developed for each student, taking into account the fact that some courses at both locations are offered on a rotating basis. Many courses are offered every year, but some are offered every two or three years. Advisers will have available a list of projected relevant offerings in order to work with the student on an individualized program of study.

Tuition

Students will be charged the applicable Dickinson tuition to cover the J.D. program and graduate tuition on a per credit (in-state) rate of the EPC courses.

Graduation

A student in the program may complete the requirements for one of the degrees, and be awarded that degree, prior to completing all the requirements for the other degree. All courses in one program that will count toward meeting the requirements of the other program must be completed before awarding the first degree.

Finance (FINAN)

DANIEL C. INDRO, *Academic Division Head*
School of Graduate Professional Studies
Penn State Great Valley
30 East Swedesford Road
Malvern, PA 19355-1443
610-648-3229
www.sgps.psu.edu (Opens New Window)

Degree Conferred:

Master of Finance (M.Fin.)

The Graduate Faculty

- Andrew J. Felo, Ph.D., CMA, CRM (SUNY, Binghamton) Associate Professor of Accounting
- Daniel Indro, Ph.D. (Indiana University) Associate Professor of Finance
- Pornsit Jiraporn, Ph.D. (Southern Illinois, Carbondale) Assistant Professor of Finance
- John Mason, Ph.D. (Michgan State) Associate Professor of Management and Organization
- John I. McCool, Ph.D. (Temple) Professor of Systems Engineering
- Simon J. Pak, Ph.D. (California, Berkeley) Associate Professor of Finance
- Kailasam Satyamurthy, Ph.D. (Clemson) Senior Lecturer in Engineering and Management

The Master of Finance (M.Fin.) at Penn State Great Valley is a graduate degree program designed for intensive and focused study in finance. The M.Fin. is a cohort-based program with a small class size. Students will move in lockstep throughout the program. Classes will be taught on the weekends at the Penn State Great Valley campus, in a schedule convenient for working professionals with demanding time commitments. The time required to complete the program is fifteen months.

The program will provide an advanced and specialized graduate education in finance for individuals with career interests as finance professionals in financial management, or investment management. The curriculum for the M.Fin. program reflects a balanced combination of advanced financial theory and practical business applications. Major emerging concepts and practices in the finance field will be introduced and discussed throughout the program. The program will help the graduates to become proficient in technical and analytical skills in finance and to develop expertise in financial problem solving and financial decision-making preparing them to advance their finance careers in organizations such as investment and commercial banking firms, mutual funds, other financial firms, non-financial businesses, consulting firms, government agencies and non-profit organizations. In addition, students will find a substantial number of courses in the M.Fin. program helpful in preparing for tests required for various professional certifications in finance, such as the Chartered Financial Analyst (CFA) Program.

Admission Requirements

Requirements listed here are in addition to the Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Graduate Bulletin*. All international applicants whose first language is not English or who have not received a baccalaureate or graduate degree from an institution in an English-speaking country must take the TOEFL (Test of English as a Foreign Language) and submit the results of the test with the application for admission. A minimum TOEFL score of 550 (paper test) or 213 (electronic test) is required on tests taken prior to September 2005. A minimum TOEFL score of 80 overall and 23 speaking is required beginning September 2005.

Applicants should:

1. Submit a completed application.
2. Hold a baccalaureate degree earned at a regionally accredited institution whose credit and residence conditions are substantially equivalent to those required by Penn State.
3. Have a 3.0 or better (on a 4.0 scale) junior/senior grade-point average.
4. Submit a GMAT or GRE score. Applicants holding an MBA, JD, Ph.D., CPA, or CFA are not required to submit standardized test scores.
5. Submit a statement of intent or career objective (one page).
6. Submit two confidential recommendation form letters.
7. Submit two official transcripts from all post-secondary institutions attended.
   International applicants must submit official university records (transcripts/marksheets and diploma if date conferred does not appear on transcripts/marksheets), with attested English translations if the record is not in English.
8. Submit a current resume.
9. Submit a visa application document if they are in the U.S. on a student or work visa.
10. Complete an admissions interview (by telephone or in person).

Admission decisions are based on the quality of the applicant's credentials and an interview in relation to those of other applicants who meet the requirements for admission outlined above.

Application Filing Dates: Applications to the Penn State Great Valley's M.Fin. are reviewed on a rolling basis. Students may be admitted to a cohort starting in early January.

Pre-Program Requirements:

The applicants are expected to have a working knowledge of a spreadsheet program, financial management, statistics and microeconomics. The pre-program requirements may be satisfied with academic work prior to matriculation in the M.Fin. program through college-level course credits in the following areas:

1. Financial Management/Corporate Finance: Topics include time value of money, basic theories of bond and stock valuation, capital budgeting, capital asset pricing model, market efficiency, and capital structure
2. Introductory Business Statistics: Topics include probability theory, sampling, inference, quality assurance, regression, forecasting, and simulation
3. Microeconomics: Topics include allocation of resources and distribution of income with in various market structures

The professor-in-charge will examine academic transcripts of each student to determine if and how requirements are met. If a requirement is not met, the deficiency must be corrected through earned credit.

Degree Requirements:

Thirty (30) credits are required to complete the M.Fin. degree. The course work in the Master of Finance (M.Fin.) program will have six required core courses (18 credit hours), three elective courses (9 credit hours), and a capstone course (3 credit hours). The required courses provide a quantitative and analytical foundation in finance. They include:

CORE COURSES:

- ACCTG 512 Financial Accounting Theory and Reporting Problems
- BUSAD 525 Quantitative Methods in Finance
- BUSAD 526 Current Issues in Corporate Finance
- FIN 505 Multinational Managerial Finance
- FIN 508 Analysis of Financial Markets
- FIN 513 Speculative Markets

The capstone course, BUSAD 585 Research in Security Valuation, provides a culminating experience for students to develop their analytical ability to identify strategies that enhance value creation, building upon their knowledge acquired from the core courses.

The electives allow students to focus in a selected field of finance such as corporate financial management or investment management. The exact elective courses to be offered for a cohort will be determined by the professor-in-charge based on polls taken from each cohort class and on consultation with the faculty who are teaching elective courses.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. Additional information is available from the Financial Aid Office at Penn State Great Valley.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Edward Dudley, Ph.D. (Wisconsin-Madison) Assistant Professor of Food Science
- Ryan J. Elias, Ph.D. (Massachusetts) Assistant Professor of Food Science
- John D. Floros, Ph.D. (Georgia) Professor of Food Science
- Hassan Gourama, Ph.D. (Nebraska) Associate Professor of Food Science
- John E. Hayes, Ph.D. (Connecticut) Assistant Professor of Food Science
- Stephen J. Knabel, Ph.D. (Iowa State) Professor of Food Science
- Luke F. LaBorde, Ph.D. (Wisconsin-Madison) Associate Professor of Food Science
- Joshua D. Lambert, Ph.D. (Arizona) Assistant Professor of Food Science
- Robert F. Roberts, Ph.D. (Minnesota) Associate Professor of Food Science
- Robert D. Steele, Ph.D. (Wisconsin-Madison) Professor of Food Science
- Donald B. Thompson, Ph.D. (Illinois) Professor of Food Science
- Gregory R. Ziegler, Ph. D. (Cornell) Professor of Food Science

Graduate work leading to the M.S. and Ph.D. degrees in Food Science is directed toward a multidisciplinary and integrated approach to teaching and research relevant to processing and manufacture of value-added foods from agricultural commodities. Through integration of the disciplines of chemistry, microbiology, engineering, and nutrition, students learn to ensure that consumers can make healthful choices from an abundant supply of affordable, safe, nutritious, and appealing foods.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Students with a 3.00 junior/senior average (on a 4.00 scale) will be considered for admission to the program. Exceptions may be made for students with special backgrounds, abilities, and interests.

Best preparation for graduate work would be the completion of an undergraduate degree in food science, biochemistry, microbiology, or other related areas. The undergraduate program must include calculus, organic chemistry, microbiology, and general physics. Students may be admitted with deficiencies but are required to make them up without degree credit.

Students are generally admitted directly to a master's program unless they have previously earned an M.S. degree in food science or an appropriate related area; in such cases, admission can be made directly to the doctoral program by approval of the graduate program committee.

Master's Degree Requirements

The requirements for the M.S. program are detailed in the Department of Food Science's "Graduate Program Handbook." Minimum course requirements for the M.S. degree are as follows:

Fundamentals of Food Science (FD SC 500), 4 credits; Research Methods in Food Science (FD SC 501), 2 credits; Supervised Experience in College Teaching (FD SC 602), 1 credit; Statistics (STAT 500 or equivalent), Biochemistry (B M B 401 or equivalent); research (FD SC 600), 6 credits.

Doctoral Degree Requirements

The requirements for the Ph.D. program are detailed in the Department of Food Science's "Graduate Program Handbook." Minimum course requirements for the Ph.D. degree are as follows: FD SC 500 Fundamentals of Food Science, 4 credits; FD SC 501 Research Methods in Food Science, 2 credits; FD SC 602 Supervised Experience in College Teaching, 2 credits; STAT 500 or equivalent, B M B 401 or equivalent.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:

Master of Professional Studies in Forensic Science

The Graduate Faculty

- Mitchell M. Holland, Ph.D. (Maryland, College Park) Associate Professor of Biochemistry and Molecular Biology
- Ke Chung Kim, Ph.D. (Minnesota) Professor of Entomology
- John H. Kramer, Ph.D. (Iowa) Professor of Sociology, and Crime, Law, and Justice
- Kateryna Makova, Ph.D. (Texas Tech) Assistant Professor of Biology
- George R. Milner, Ph.D. (Northwestern) Professor of Anthropology
- Robert B. Mitchell, Ph.D. (Penn State) Professor of Biology
- Kevin R. Murphy, Ph.D. (Penn State) Department Head, Professor of Psychology
- Stephan C. Schuster, Ph.D. (University of Munich) Associate Professor of Biochemistry and Molecular Biology
- Ayusman Sen, Ph.D. (Chicago) Professor of Chemistry
- Robert C. Shaler, Ph.D. (Penn State) Professor of Biochemistry and Molecular Biology
- Mark D. Shriver, Ph.D. (Texas) Associate Professor of Anthropology
- Daniel G. Sykes, Ph.D (Alberta) Lecturer, Department of Chemistry

The Master of Professional Studies (MPS) in Forensic Science is an inter-college degree program housed in the Eberly College of Science and is offered through a collaboration of the Departments of Anthropology, Biochemistry and Molecular Biology, Biology, Chemistry, Entomology, Psychology, and Sociology. The program is offered by Penn State graduate faculty members, with enrichment by mentors from the academic faculty, public crime laboratories, and private forensic laboratories. The curriculum is designed to provide students with innovative, hands-on, and multidisciplinary learning approaches to educate and train them in crime scene investigation, the science behind forensics, courtroom proceedings, and the ethical and social issues that they will be exposed to when they join the forensic community. In addition, the program will develop teamwork and communication skills, which will be important when working actual cases in a crime laboratory.

Admission Requirements and the Application Process

Applications will be considered in accordance with the requirements of the Graduate School as described in the GENERAL INFORMATION section of the *Graduate Bulletin*. The MPS in Forensic Science program is appropriate for students with a baccalaureate degree in the biological sciences, chemistry, or a related field of study. Applicants for the MPS program are required to have a minimum cumulative GPA of 3.00 (on a 4.00 scale) in their undergraduate degree. In addition, each applicant is asked to provide a personal statement of interests and objectives, as well as two letters of reference. Letters of reference can be submitted by the student's undergraduate advisor, research advisor, and/or an instructor for an upper level course taken as part of their major. An applicant may be asked to go through an interview process conducted by members of the forensic science faculty. Admission to the program is based upon a thorough review of all applicant qualifications, and the best-qualified applicants will be accepted up to the number of spaces available for new students.

Applicants are referred to the program web site for guidance on how to submit their applications, the deadline for submitting applications, and when decisions on acceptance into the program will be announced: www.forensics.psu.edu.

Degree Requirements

A minimum of 30 graduate credits is required for completion of the program, at least 18 credits from courses at the 500 and 800-level. Students are required to take 16 credits from the core courses listed below. Additional credits are from elective courses (which are determined based on interest and career track). FRNSC 801 will serve as the capstone experience for completion of the MPS degree in Forensic Science.

Core Courses (16 credits)

FORENSIC SCIENCE (FRNSC)

- 500. Principles of CSI and Criminalistics I (6)
- 501. Criminalistics II (4)
- 541. Forensic Seminar Series (1)
- 561. Ethics in Forensic Science (1)
- 801. Criminalistics III (4)

Electives (Select at least 14 credits)

A minimum of 30 graduate credits will be required for completion of the program, with at least 18 credits from courses at the 500 and 800-level. The elective courses are chosen in consultation with the student's advisor from offerings in various academic departments based on the student's interest and career objectives to provide interdisciplinary breadth and perspective. Some examples are;

ANTHROPOLOGY (ANTH)

- 411. Skeletal Forensic Anthropology (3)
- 413. Molecular Forensic Anthropology (3)

BIOLOGY (BIOL)

- 422. Advanced Genetics (3)
- 505. Statistical Methods in Evolutionary Genetics (3)
- 514. Topics in Systematics and Evolution (2)

BIOCHEMISTRY AND MOLECULAR BIOLOGY (B M B)

- 400. Molecular Biology of the Gene (3)
- 401. General Biochemistry (2)

BIOCHEMISTRY, MICROBIOLOGY, AND MOLECULAR BIOLOGY (BMMB)

- 597A. Concepts in Biomedical Sciences (5)

CHEMISTRY (CHEM)

- 427. Forensic Chemistry (4)
- 525. Analytical Separations (3)
- 526. Spectroscopic Analysis (3)

CRIME, LAW AND JUSTICE (CLJ)

- 501. Criminal Justice Organizations and Institutions (3)
- 585. Law Enforcement Process and Policy (3)

ENTOMOLOGY (ENT)

- 412. Insect Taxonomy (3)

FORENSIC SCIENCE (FRNSC)

- 421. Forensic Molecular Biology (3)
- 821. Forensic Molecular Biology II (4)
- 831. Forensic Chemistry II (3)
- 832. Forensic Drug Chemistry (3)
- 833. Forensic Toxicology (3)
- 894. Research Projects in Forensic Science (1-12)
- 895. Internship (1-6)

INTEGRATIVE BIOSCIENCES (IBIOS)

- 593. Molecular Biology Laboratory (3)

NURSING (NURS)

- 409. Introduction to Forensic Nursing (3)

PHARMACOLOGY (PHARM)

- 501. Pharmacology (4)

PSYCHOLOGY (PSYCH)

- 464. Behavior Genetics (3)
- 470. Abnormal Psychology (3)
- 445. Forensic Psychology (3)

SOCIOLOGY (SOC)

- 413. Advanced Criminological Theory (3)
- 512. Criminological Theories (3)
- 515. Research Methods in Criminology and Deviance (3)

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Forest Resources (FOR R)

Program Home Page (Opens New Window)

MICHAEL G. MESSINA, *Director of the School of Forest Resources and Professor of Forest Resources*
121 Ferguson Building
814-863-7093

Degrees Conferred:

Ph.D., M.S., M.Agr., M.F.R.

The Graduate Faculty

- Marc D. Abrams, Ph.D. (Michigan State) Professor of Forest Ecology and Physiology
- Paul Blankenhorn, Ph.D. (Penn State) Professor of Wood Technology
- Nicole Brown, Ph.D. (Virginia Tech) Assistant Professor of Wood Chemistry
- John E. Carlson, Ph.D. (Illinois) Associate Professor of Molecular Genetics
- William F. Elmendorf, Ph.D. (Penn State) Assistant Professor of Urban and Community Forestry
- James C. Finley, Ph.D. (Penn State) Professor of Forest Resources
- Michael G. Jacobson, Ph.D. (North Carolina State) Assistant Professor of Forest Resources
- John Janowiak, Ph.D. (Washington State) Professor of Wood Products Engineering
- Margot Kaye, Ph.D. (Colorado State) Assistant Professor of Forest Ecology
- Marc E. McDill, Ph.D. (Virigina Tech) Associate Professor of Forest Resource Management
- Judd Michael, Ph.D. (Penn State) Associate Professor of Wood Products Business Management
- Wayne L. Myers, Ph.D. (Michigan) Professor of Forest Biometrics
- Charles Ray, Ph.D. (Texas A&M) Assistant Professor of Wood Products Operations
- Paul M. Smith, Ph.D. (Virginia Tech) Professor of Forest Products Marketing
- Sanford Smith, Ph.D. (Penn State) Lecturer in Forest Resources
- Kim C. Steiner, Ph.D. (Michigan State) Professor of Forest Biology
- Charles H. Strauss, Ph.D. (Penn State) Professor of Forest Economics
- Harry V. Wiant, Jr., Ph.D. (Yale) Joseph E. Ibberson Chair in Forest Resources Management
- Eric Zenner, Ph.D. (Oregon State) Associate Professor of Silviculture

The Doctor of Philosophy and the Master of Science degree programs are oriented toward research, education, and scientific technology in the professions of forest products and forestry. The Master of Forest Resources (M.F.R.) is a professional degree designed for students who want to specialize in fields of wood products marketing or industries, forest management, silviculture, urban forestry, watershed management, or wildlife and fisheries management. This degree differs from the research-oriented Master of Science degree programs in the School of Forest Resources because the M.F.R. emphasizes applications, analysis, and synthesis of knowledge rather than creating new information through more traditional types of research. This program is especially attractive to returning students interested in gaining state-of-the-art information rather than thesis research in their specialized field. Students who have baccalaureate degrees in forestry, wood products, or wildlife and fisheries may complete the M.F.R. degree requirements in one year, whereas those with degrees in related fields generally require longer because of deficiencies in prerequisite undergraduate courses. The Master of Agriculture is intended to enable students to develop skills as professionals in the communication of technical knowledge.

Faculty expertise, laboratories, and outdoor facilities are available to support specialization in a variety of fields. Possibilities for specialization are indicated in part by the courses listed under forest products, forestry, and wildlife, and by related courses in agricultural economics, agronomy, animal nutrition, biology business administration, chemical engineering, computer science, ecology, economics, entomology, environmental pollution control, environmental resource management, genetics, horticulture, industrial engineering, landscape architecture, meteorology, physiology, plant pathology, polymer sciences, recreation and parks, regional planning, or statistics.

Students in this program may elect the dual-degree program option in Operations Research for the Ph.D. and M.S. degrees. (*See also* Operations Research.)

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. A student may be admitted provisionally without GRE scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Application materials should be submitted before February by those who want to begin in summer or fall. For admission, an applicant should have at least a 2.75 grade-point average, a 3.00 junior/senior average (on a 4.00 scale), and courses that are basic to the individual's field of specialization. Ordinarily, these include 12 credits in communication; 12 credits in social sciences and humanities; 10 credits in quantification, including calculus and statistics; 8 credits in chemistry and/or physics; 8 credits in biological sciences; and 18 credits in forest products, forestry, fish, wildlife, or related courses. Three reference letters and a brief statement describing the applicant's academic goals, career interests, and special qualifications are required. The best-qualified applicants will be accepted up to the number of spaces available. Exceptions to admission requirements may be made for students with special backgrounds, abilities, and interests.

Admission to the Ph.D. program in Forest Resources requires a master's degree in Forest Resources or a closely related field, or a bachelor's degree with a minimum grade-point average of 3.30 and demonstrated research ability.

Master's Degree Requirements

M.S.: In addition to Graduate School requirements, 6 credits of statistics and 2 credits of colloquium are required.

M.F.R.: A minimum of 30 graduate credits (400- to 500-level courses) is required, of which at least 20 must be earned at an established graduate campus of the University with at least 18 credits as formal courses (excluding paper writing, colloquia, and independent studies) related to forest resources, wood products, wildlife and fisheries. At least 12 credits must be at the 500 level, including 6 credits of formal courses. A paper (3-6 credits of FOR 596/FP 596/WFS 596) and formal presentation (1 credit for FOR 596/WP 596/WFS 596) is

required as part of the 30 credits that demonstrates ability to apply the knowledge gained during the program to the specialized field of interest. The program must also include 3 credits of statistics at the graduate level.

M.Agr.: Candidates will elect a minimum of 15 credits of graduate-level communications courses in majors such as Agricultural and Extension Education, English, Instructional Media, Journalism, Mass Communications, Recreation and Parks, Speech Communication, and Theatre. Any deficiencies in a student's resource specialty, as judged by his or her advisory committee, must be remedied. An acceptable paper on a selected professional problem or a report of internship training worth 3 credits or more also is required.

Doctoral Degree Requirements

An international communications or cultural requirement is required for the Ph.D. degree. This requirement may be satisfied by demonstrating competence in one foreign language equivalent to passing two or three college-level courses. It also may be met by two courses in one or two contemporary foreign cultures. With approval of the doctoral committee, a student may petition the graduate faculty of the school for waiver of the international communications or culture requirement.

Postbaccalaureate course work will include courses specified for the M.S. degree plus 2 credits of colloquium. The entire program of courses tailored to the student's objectives is subject to approval of the student's committee.

The comprehensive examination will consist of an oral and written portion, the written coming first. Copies of the student's thesis research proposal should be provided to the committee before the comprehensive examination.

WATERSHED STEWARDSHIP OPTION

The Graduate Option in Watershed Stewardship is a graduate option intended to provide enhanced educational opportunities for students with an interest in water resources management who are enrolled in a graduate degree program within Forest Resources. The objective of the Graduate Option in Watershed Stewardship is to educate students to facilitate team-oriented, community-based watershed management planning directed at water resources problems encountered in Pennsylvania communities, especially non-point source water pollution. The Graduate Option in Watershed Stewardship requires 22 credits of graduate course work: 12 credits of breadth courses, 2 credits of Watershed Stewardship Seminar courses (FOR 591A and FOR 591B or LARCH 510.2), and 8 credits of Watershed Stewardship Practicum I and II courses (FOR 570 and FOR 571, or LARCH 540.2 and LARCH 550.2). Breadth courses will consist of 3 graduate credits of course work from each of four subject matter areas: (1) water resources science, (2) social science, public policy and economics, (3) humanities, and (4) communications and design. In the watershed stewardship practicum course students work in teams with community, government, and business leaders to analyze and understand natural resources problems and creatively synthesize appropriate solutions in the form of a written watershed management plan.

A representative pattern of scheduling for the Graduate Option in Watershed Stewardship in addition to a student's other degree requirements is:

First Year:	**Second Year:**
Fall Semester	*Fall Semester*
Breadth electives--6 credits	FOR 570 or LARCH 540.2--3 credits
FOR 591A or LARCH 510.2, Watershed Stewardship Issues Colloquium--1 credit	Keystone Project
Spring Semester	*Spring Semester*
Breadth electives--6 credits	FOR 571 or LARCH 550.2--5 credits
FOR 591B or LARCH 510.2, Watershed Stewardship Planning Colloquium--1 credit	Keystone Project

A list of acceptable breadth courses from each category is provided in the Graduate Option in Watershed Stewardship Handbook. Students will be allowed to petition to the Center for Watershed Stewardship to substitute higher level or equivalent courses in a major field to suit their specific backgrounds and goals. Courses taken for the Graduate Option in Watershed Stewardship may be used to satisfy other equivalent (400- or 500-level) degree requirements with concurrence of adviser and graduate committee. The graduate committee for a student enrolled in the Option in Watershed Stewardship must include a faculty representative from the Center for Watershed Stewardship.

Students enrolled in M.F.R., M.Agr., M.S., or Ph.D. degree programs within the School of Forest Resources and other participating programs may apply to participate in the Graduate Option in Watershed Stewardship. Watershed Stewardship option students enrolled in an M.F.R. or M.Agr. degree program that requires a professional paper rather than a thesis could write their professional paper on a topic that directly contributes to their overall watershed management plan prepared as part of FOR 570 and FOR 571 or LARCH 540.2 and LARCH 550.2 classes.

Other Relevant Information

Each entering student receives individual guidance from an adviser, and later from his or her committee, in designing a program of studies and research based on his or her own interests. The student is responsible for conforming to all requirements summarized in the "Graduate Studies Handbook" of the School of Forest Resources, and for completing the degree program within a reasonable time, i.e., two years for a master's degree or three years for a Ph.D.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following award typically has been available to graduate students in this program:

FOREST RESOURCES: JESSE ROSSITER RAPP MEMORIAL SCHOLARSHIP

--Available to graduate students. Apply to the School of Forest Resources' Scholarships, Loans, and Awards Committee.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

FORESTRY (FOR) course list

See also Wildlife and Fisheries Science.

WOOD PRODUCTS (W P) course list

Joint Degree Programs between The Pennsylvania State University Dickinson School of Law (J.D.) and the School of Forest Resources (M.F.R., M.S., M.Agr., Ph.D.)

Joint Degree Program. The Pennsylvania State University Dickinson School of Law (DSL) and the School of Forest Resources (SFR) will offer coordinated programs of studies leading to the degrees of Juris Doctor (J.D.) and a Master of Forest Resources (M.F.R.), a Master of Science (M.S.), a Master of Agriculture (M.Agr.) or a Doctor of Philosophy (Ph.D.) in Forest Resources or Wildlife and Fisheries Sciences. The SFR programs are interdisciplinary. In the SFR programs, students may concentrate in Forest Resources, Wildlife and Fisheries Science, or Wood Products.

Admissions. In order to be admitted to the program, students may a) first be admitted and enrolled in either SFR or DSL, and be subsequently admitted to the other program, or b) be admitted to the joint degree program prior to commencing studies at Pennsylvania State University. Credits earned in the SFR program before admission to DSL cannot, however, be credited to the J.D. degree. Each program will make a separate admission decision. Students admitted to both programs will be admitted as joint degree candidates. Applications for transfer into the joint degree program from another law school or forestry/natural resources program at another University will be considered on a case-by-case basis.

Admission Requirements

DSL. A bachelor's or equivalent degree from an accredited college is a prerequisite for admission. However, there is no standard prescribed undergraduate curriculum. An applicant should have acquired significant oral, and written communications skills before entering law school. The following are required of applicants: a completed application form for DSL; taking of the Law School Admissions Test (LSAT); completion of an LSDAS report; a one-page personal statement; employment record since high school; and two recommendations.

School of Forest Resources: A Bachelor's or equivalent degree from an accredited college is a prerequisite for admission to a master's degree program, with a cumulative grade point average of 2.75 and junior-senior average of 3.0, based on a maximum 4.0 system. The following are also required of applicants to the joint degree program: taking of the Graduate Record Examination (GRE) or the LSAT; an official undergraduate transcript or transcripts; a personal statement; employment record since high school; and three recommendations. There is no prescribed undergraduate curriculum, and, because of the diversity of programs in the School, professional preparation may vary considerably. As a guide, SFR suggests having 8 credit hours in chemistry and/or physics; 12 in calculus, statistics, and/or computer science; 8 in biology, botany, and/or zoology; 12 in writing and speaking; 12 in economics, social sciences, and/or humanities; and 18 in forest science, wildlife and fisheries science, and/or wood products. Completed applications showing that a candidate is qualified for admission will be forwarded to potential faculty advisers in SFR, and admission of otherwise qualified candidates will depend upon the willingness of a faculty member to act as an adviser. Applicants are advised to contact potential advisers before applying and should contact the SFR liaison (the Goddard Chair), as well as the SFR Assistant Director of Graduate Studies, to identify potential advisers.

Admission to the Ph.D. program requires evidence of research ability, e.g., a master's degree thesis, paper, or equivalent publication and a grade point average of 3.3 or higher in graduate studies work, exclusive of thesis and special problem courses. Baccalaureate degree students graduating from an honors program with a required thesis, or who have authored a refereed publication, may be considered for admittance without a master's degree.

Residency: For master's programs, 5 semesters residence is required at the Law School and 3 semesters residence at the SFR at University Park, although additional time may be required to complete the M.S. thesis requirements. For Ph.D. programs, the same minimum number of semesters will be required, as well as the additional time as required to complete additional course work and a dissertation. In addition, Ph.D. candidates must arrange the sequence of semesters such that they are in residence at University Park as a full time student for at least two semesters in a single 12-month period. Although a student will normally take all courses at the campus where the student is in residence, a student may take up to one course (three credit hours) per semester at the campus where the student is not in residence. A Ph.D. joint degree student in residence at DSL will be considered to be "registered" at University Park for the purpose of satisfying any requirement of continuous registration and/or benchmarking in the Ph.D. program.

Liaisons: The respective liaisons for DSL and SFR shall be as follows: The Department and Faculty liaison for DSL shall be the Associate Dean for Academic Affairs and the student adviser will be the Director of the Agricultural Law Center or such other faculty member(s) as may be designated by the Dean. The liaison for SFR for the Joint Degree Program and the student contact for inquiries regarding the Joint Degree Program shall be the then current holder of the Maurice K. Goddard Chair in Forestry and Environmental Resources Conservation, or the Director of SFR when there is no current appointee to the Goddard Chair.

Interprogram Transfer of Credits

J.D. A maximum of 12 credits for SFR course work may be transferred for credit toward the J.D. degree at DSL. Students must obtain a grade satisfactory to DSL for the course work to be credited toward the J.D. degree. What courses may qualify for credit shall be determined by the DSL liaison. Because of the interdisciplinary nature of many SFR degrees, courses from other Departments and Colleges are credited towards an SFR degree with the approval of the SFR committee (e.g. courses in Economics, Agricultural Economics, Agricultural and Extension, Agronomy, Entomology, Geosciences, Landscape Architecture, Leisure Studies, Meteorology, Plant Pathology, Soil Science, EPC) and credits of these courses will be treated as SFR courses (i.e. may be credited to the DSL program with DSL approval, subject to the 12-credit limit).

SFR Degrees: The SFR programs are interdisciplinary programs and typically credits from other Departments and Colleges may be credited. What courses may be credited will be determined by the student's SFR committee. Normally, a maximum of 12 credits of DSL course work will be counted for credit toward the minimum requirements for an SFR Master's degree, subject to approval by the student's SFR committee.

Sequence. The sequence of courses will be determined by the students and their advisers. Generally, however, students will complete the first year of the DSL program before beginning the SFR program. Thereafter, students may concurrently enroll in courses in the DSL and SFR programs, provided that they abide by the requirements of each program. The ordinary expectation will be that students will spend entire semesters at one location or the other.

Recommended Program of Study and Advising. All students in the program will have two advisers, one from DSL and one from SFR (the committee chair). Periodic interaction between the two advisers will be encouraged. A program of study will be developed for each student taking into account the fact that some courses at both locations are offered on a rotating or intermittent basis. Many courses are offered every year, but some are offered every two or three years. Advisers will have available a list of projected relevant offerings in order to work with the student on an individualized program of study. The standard committee structure will apply to the SFR programs.

Tuition. Students will be charged the applicable DSL tuition to cover the J.D. program and the applicable SFR tuition to cover the SFR degree program. The DSL tuition will be paid for the semesters that the student is in residence at DSL and the SFR tuition will be paid for the semesters that the student is in residence at University Park. A student may take up to one course (3 credit hours) per semester at the campus where the student is not residence without, any change in tuition, but must pay additional tuition to the nonresidential campus if he or she wishes to take additional course work at that campus during that semester.*

Financial Aid and Assistantships. Decisions on financial aid and assistantships will be made by each school according to that school's procedures. Generally, SFR assistantships and financial aid will not apply to time spent at DSL.

Fulfillment of Degree Requirements and Graduation. A student in the program may complete the requirements for one of the degrees and be awarded that degree prior to completing all the requirements for the other degree, provided, however, that the student shall have successfully completed at least two semesters of work towards the other degree. All courses in one program that will count toward meeting the requirements of the other program must be completed before award of either degree. Students will be required to fulfill all requirements for each degree in order to be awarded that degree, subject to the interprogram transfer of credits. With respect to SFR's requirement for a thesis or paper, work done while at DSL under the supervision of a DSL faculty member may be appropriate for incorporation into the thesis or paper with the approval of the SFR committee (in such cases, the committee should consider whether credits afforded such work will be subject to the 12-credit maximum for interprogram transfers described in paragraph 6(b) and the DSL faculty member should be a member of the committee).

*After taking comprehensive examinations, a Ph.D. student must pay tuition for all courses taken at any campus where the Ph.D. student is not registered.

- Benedicte Monicat, Ph.D. (Maryland) Professor of French and Women's Studies
- Lisa Reed, Ph.D. (Université d'Ottawa) Associate Professor of French and Linguistics
- Willa Z. Silverman, Ph.D. (New York) Professor of French and Jewish Studies
- Allan Stoekl, Ph.D. (SUNY, Buffalo) Professor of French and Comparative Literature
- Jean-Claude Vuillemin, Ph.D. (Michigan State) Professor of French
- Monique Yaari, Ph.D. (Cincinnati) Associate Professor of French

This program offers training in French literature and civilization.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are generally required of all students educated (high school and college) in the continental United States. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Minimum qualifications for admission typically include a B.A. in French or the equivalent, a minimum of 3.20 grade-point average (on a 4.0 scale), and the ability to speak and write in both French and English (a speech sample demonstrating the applicant's ability to speak extemporaneously and coherently about his/her study and career goals in French for anglophones, in English for francophones, and in French and English for speakers of other foreign languages is required). A written text on a literary or cultural topic also must be submitted. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.20 GPA may be made for students with special backgrounds, abilities, and interests.

Master's Degree Requirements

Candidates for the master's degree in French complete a minimum of ten 3-credit graduate-level courses, plus a master's paper or a minimum of nine 3-credit courses, plus a thesis. A reading knowledge of a second foreign language plus oral and written examinations also are required. All candidates take FR 571 Introduction to Criticism, FR 502 Introduction to French Linguistics, FR 580 Approaches to French Civilization, and FR 581 Theory and Techniques of Teaching French. In addition to the four required courses designated here, all candidates take three 3-credit courses in French literature, plus three 3-credit elective courses. At least one elective course should be in the area of projected specialization at the Ph.D. level. The M.A. degree (or equivalent) is normally a prerequisite to doctoral candidacy.

Candidates for the Women's Studies and French dual-title master's degree complete a minimum 30 credits plus a master's paper. All candidates take FR 502 Introduction to French, FR 580 Approaches to French Civilization, FR 581 Theory and Techniques of Teaching French, FR 571 French Literary Theory and Criticism, WMNST 501 Feminist Perspectives in Research and Teaching, WMNST 502 Global Feminism, WMNST 507 Feminist Theory, and 9 credits in literature (6 of those credits in Women's Studies-approved courses).

Doctoral Degree Requirements

The Ph.D. degree prepares candidates for careers in teaching and research at the college or university level. Between 30 and 36 credits beyond the M.A. in French (or equivalent) is required in graduate course work. Credits must be distributed in one of two areas of specialization: civilization or literature.

Doctoral candidates must demonstrate either an advanced knowledge of one foreign language other than French or a reading ability of two foreign languages other than French (equivalent to the 12-credit level). All doctoral students must pass a candidacy examination, a comprehensive written and oral examination, and a final oral defense.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

*FR 121G. FUNDAMENTALS OF READING FRENCH
*FR 122G. PRACTICE IN READING FRENCH

*No graduate credit is given for this course.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- Sarah E. Ades, Ph.D. (MIT) Assistant Professor of Biochemistry and Molecular Biology
- Hiroshi Akashi, Ph.D. (Chicago) Assistant Professor of Biology
- Avery August, Ph.D. (Cornell) Assistant Professor of Immunology
- John E. Ayers, Ph.D. (Penn State) Professor of Plant Pathology
- Paul Babitzke, Ph.D. (Georgia) Associate Professor of Biochemistry and Molecular Biology
- Guy F. Barbato, Ph.D. (Virginia Tech) Associate Professor of Poultry Science
- David Blizard, Ph.D. (Wales) Senior Research Scientist, Center for Development and Health Genetics
- David M. Braun, Ph.D. (Missouri) Assistant Professor of Biology
- Sarah Kay Bronson, Ph.D. (Washington U) Assistant Professor of Cellular and Molecular Physiology (Hershey)
- Craig Cameron, Ph.D. (Case Western Reserve) Louis Martarano Associate Professor of Biochemistry and Molecular Biology
- John E. Carlson, Ph.D. (Illinois) Associate Professor of Molecular Genetics
- Laura Carrel, Ph.D. (Standford) Assistant Professor of Biochemistry and Molecular Biology (Hershey)
- Douglas R. Cavener, Ph.D. (Georgia) Professor of Biology
- Vincent Chau, Ph.D. (Virginia) Professor of Cellular and Molecular Physiology (Hershey)
- Keith C. Cheng, M.D. (NYU School of Medicine); Ph.D. (Washington) Professor of Pathology (Hershey)
- Hui-Ling Chiang, Ph.D. (Harvard) Associate Professor of Cellular and Molecular Physiology (Hershey)
- Surinder Chopra, Ph.D. (Vrije U, Brussels) Assistant Professor of Maize Genetics
- Barbara J. Christ, Ph.D. (British Columbia) Professor of Plant Pathology
- Gary Clawson, M.D., Ph.D. (Michigan State) Professor of Pathology, and Biochemistry and Molecular Biology (Hershey)
- Pamela H. Correll, Ph.D. (George Washington) Associate Professor of Immunology
- Diana Cox-Foster, Ph.D. (Illinois) Professor of Entomology
- Richard Craig, Ph.D. (Penn State) J. Franklin Styer Professor Emeritus of Horticultural Botany; Professor Emeritus of Plant Breeding
- Rebecca Craven, Ph.D. (Tennessee) Associate Professor of Microbiology and Immunology (Hershey)
- Liwang Cui, Ph.D. (Kentucky) Assistant Professor of Entomology
- Claude W. dePamphilis, Ph.D. (Georgia) Associate Professor of Biology
- Kristin A. Eckert, Ph.D. (Wisconsin) Associate Professor of Pathology (Hershey)
- Robert B. Eckhardt, Ph.D. (Michigan) Professor of Developmental Genetics and Evolutionary Morphology
- James G. Ferry, Ph.D. (Illinois) Stanley Person Professorof Biochemistry and Molecular Biology
- Joanna Floros, Ph.D. (Temple) Professor of Cellular and Molecular Physiology (Hershey)
- Majid R. Foolad, Ph.D. (California, Davis) Professor of Plant Genetics
- David Geiser, Ph.D. (Northwestern) Assistant Professor of Plant Pathology
- Henry D. Gerhold, Ph.D. (Yale) Professor of Forest Genetics
- David S. Gilmour, Ph.D. (Cornell) Associate Professor of Biochemistry and Molecular Biology
- Sergei Grigoryev, Ph.D. (Moscow State) Assistant Professor of Biochemistry and Molecular Biology (Hershey)
- Edward G. Gunther, Ph.D. (Yale) Assistant Professor, Jake Gittlen Cancer Research Institute (Hershey)
- Kyung-An Han, Ph.D. (SUNY, Buffalo) Assistant Professor of Biology
- Wendy Hanna-Rose, Ph.D. (Harvard) Assistant Professor of Biochemistry and Molecular Biology
- Ross C. Hardison, Ph.D. (Iowa) Professor of Biochemistry
- Eric T. Harvill, Ph.D. (California, Los Angeles) Assistant Professor of Microbiology and Infectious Disease
- Biao He, Ph.D. (SUNY Health Sciences Ctr, Brooklyn) Assistant Professor of Virology
- S. Blair Hedges, Ph.D. (Maryland) Professor of Biology
- Christopher R. Herzog, Ph.D. (Medical College of Ohio) Assistant Professor of Pharmacology
- Jianming Hu, Ph.D. (Penn State) Associate Professor of Microbiology and Immunology (Hershey)
- Seogchan Kang, Ph.D. (Wisconsin) Associate Professor of Plant Pathology
- Ralph L. Keil, Ph.D. (Cornell) Associate Professor of Biochemistry and Molecular Biology (Hershey)
- Kenneth Keiler, Ph.D. (MIT) Assistant Professor of Biochemistry and Molecular Biology
- Zhi-Chun Lai, Ph.D. (Albert Einstein College of Medicine) Associate Professor of Biology, and Biochemistry and Molecular Biology
- Philip Lazarus, Ph.D. (McGill) Professor of Pharmacology and Health Evaluation Science (Hershey)
- Robert Levenson, Ph.D. (SUNY, Stony Brook) Professor of Pharmacology (Hershey)
- David Liu, Ph.D. (CUNY) Assistant Professor of Neural and Behavioral Science
- Bernhard Lüscher, Ph.D. (Zurich) Associate Professor of Biology, and Biochemistry and Molecular Biology
- Hong Ma, Ph.D. (MIT) Professor of Biology
- Wojciech Makalowski, Ph.D. (Poznan, Poland) Associate Professor of Biology
- Kateryna Makova, Ph.D. (Texas Tech) Assistant Professor of Biology
- Gerald E. McClearn, Ph.D. (Wisconsin) Evan Pugh Professor of Health and Human Development
- Patricia McLaughlin, D.Ed. (Penn State) Professor of Neural and Behavioral Science (Hershey)
- Bruce A. McPheron, Ph.D. (Illinois) Professor of Entomology
- Paula C. McSteen, Ph.D. (East Anglia) Assistant Professor of Biology
- Pamela J. Mitchell, Ph.D. (Columbia) Associate Professor of Biochemistry and Molecular Biology

- David Mu, Ph.D., Associate Professor of Pathology, and Biochemistry and Molecular Biology (Hershey)
- Kathleen M. Mulder, Ph.D. (SUNY, Buffalo) Professor of Pharmacology (Hershey)
- Joshua Muscat, Ph.D. (New York University) Professor of Public Health Science (Hershey)
- Masatoshi Nei, Ph.D. (Kyoto, Japan) Evan Pugh Professor of Biology
- Davis T. W. Ng, Ph.D. (Northwestern) Associate Professor of Biochemistry and Molecular Biology
- B. Tracy Nixon, Ph.D. (MIT) Associate Professor of Biochemistry and Molecular Biology Pharmacology (Hershey)
- Curt Omiecinski, Ph.D. (Washington, Seattle) Professor of Veterinary Science; H. Thomas and Dorothy Willets Hallowell Chair
- Richard W. Ordway, Ph.D. (UMass Medical School) Associate Professor of Biology
- Leslie Parent, M.D. (Duke) Assistant Professor of Medicine, and Microbiology and Immunology (Hershey)
- Robert F. Paulson, Ph.D. (California, San Francisco) Associate Professor of Veterinary Science
- Anthony E. Pegg, Ph.D. (Cambridge) Evan Pugh Professor of Cellular and Molecular Physiology and
- Gary H. Perdew, Ph.D. (Oregon State) Professor of Veterinary Science
- Jeffrey M. Peters, Ph.D. (California, Davis) Assistant Professor of Environmental Toxicology
- C. Channa Reddy, Ph.D. (Indian Inst of Science) Distinguished Professor of Veterinary Science
- Joseph C. Reese, Ph.D. (Illinois) Associate Professor of Biochemistry and Molecular Biology
- Joan T. Richtsmeier, Ph.D. (Northwestern) Professor of Anthropology
- Gavin P. Robertson, Ph.D. (California, Riverside) Assistant Professor of Pharmacology and Pathology (Hershey)
- Daniel J. Royse, Ph.D. (Illinois) Professor of Plant Pathology
- Jeffery Sample, Ph.D. (South Florida) Professor of Micrbiology and Immunology (Hershey)
- Stephen W. Schaeffer, Ph.D. (Georgia) Associate Professor of Biology
- Robert A. Schlegel, Ph.D. (Harvard) Professor of Biochemistry and Molecular Biology
- Lisa Shantz, Ph.D. (Johns Hopkins) Associate Professor of Cellular and Molecular Physiology (Hershey)
- Cooduvalli S. Shashikant, Ph.D. (Osmania U, India) Associate Professor of Molecular and Developmental Biology
- Yuguang (Roger) Shi, Ph.D. (Australian Natl U) Assistant Professor of Cellular and Molecular Physiology
- Mark D. Shriver, Ph.D. (Texas, Houston) Assistant Professor of Anthropology
- Sharon P. Shriver, Ph.D. (Case Western Reserve) Assistant Professor of Biology
- Esther Siegfried, Ph.D. (Washington U) Assistant Professor of Biology, and Biochemistry and Molecular Biology
- David J. Spector, Ph.D. (Pennsylvania) Associate Professor of Microbiology and Immunology (Hershey)
- Graham H. Thomas, Ph.D. (Edinburgh) Associate Professor of Biology, and Biochemistry and Molecular Biology
- Chen-Pei David Tu, Ph.D. (Cornell) Professor of Biochemistry and Molecular Biology
- David J. Vandenbergh, Ph.D. (Penn State) Assistant Professor of Biobehavioral Health
- Michael F. Verderame, Ph.D. (Columbia) Associate Professor of Medicine; Assistant Professor of
- Microbiology and Immunology (Hershey)
- George P. Vogler, Ph.D. (Colorado) Associate Professor of Biobehavioral Health
- Kent E. Vrana, Ph.D. (Louisiana State) Elliot S. Vesell Professor of Pharmacology (Hershey)
- Kenneth M. Weiss, Ph.D. (Michigan) Evan Pugh Professor of Anthropology and Genetics
- John W. Wills, Ph.D. (Tennessee, Knoxville) Professor of Microbiology and Immunology (Hershey)
- Jin-Ming Yang, Ph.D. (Shanghai Medical, China) Professor of Pharmacology (Hershey)
- Ian S. Zagon, Ph.D. (Colorado) Professor of Neuroscience and Anatomy (Hershey)
- Samuel Shao-Min Zhang, Ph.D. (Tokyo, Japan) Assistant Professor of Neural and Behavioral Science (Hershey)
- Jiyue Zhu, Ph.D. (Dartmouth Medical School) Assistant Professor of Cellular and Molecular Physiology (Hershey)

The Intercollege Graduate Program in Genetics is designed to prepare graduates for rapidly expanding opportunities in genetics in academic institutions, biotechnology and pharmaceutical companies, private research institutes, governmental research laboratories, etc. The program includes faculty from eighteen departments in the Eberly College of Science and the Colleges of Agricultural Sciences, Health and Human Development, and the Liberal Arts at the University Park campus and the Penn State College of Medicine at The Milton S. Hershey Medical Center. Beginning and advanced graduate-level courses are taught by active research faculty members in their own areas of specialization. Fields available of study and research include molecular, biochemical, physiological, cellular, behavioral, developmental, pharmacological, genomics, bioinformatics, population, and evolutionary genetics; also applications in recombinant DNA technology, genetic engineering, breeding plants or animals, and genetic counseling of humans. Please see the list of faculty on the Web site www.genetics.psu.edu (Opens New Window) for the full range of areas represented.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Only under exceptional circumstances will an applicant be considered without these scores. In addition, applicants should have a cumulative undergraduate grade-point average of at least 3.00 and appropriate courses in biology (including genetics, organic chemistry or biochemistry), statistics, other sciences, and communications. The application must include three letters of reference and a statement describing and explaining interests in genetics, types of organism and research preferred, and goals during and after graduate studies.

All application materials should be submitted by January 31 for the best chance of admission and financial aid. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Master's Degree Requirements

The master's degree program can serve as an alternative for students who, for any number of reasons, do not proceed to the Ph.D. A committee appointed for each student, with the approval of the program chair, determines specific courses, communication skills, and research acceptable for satisfying M.S. degree requirements. Students must meet the M.S. degree requirements specified by the Graduate School in the Graduate Bulletin. In addition, specific genetics course requirements include 12 credits selected from a list of approved genetics courses, 3 credits in statistics, and 2 credits per year in genetics colloquium. A thesis is required of all candidates for the M.S. degree.

Doctoral Degree Requirements

The student's Ph.D. committee, appointed after a written and oral candidacy examination is passed, determines specific requirements for courses and research, and administers the comprehensive and final examinations. The Graduate School requires no specified number of credits for the attainment of the doctorate. However, the Genetics program requires 15 credits in approved genetics courses, 3 credits in statistics, and 2 credits per year in genetics colloquium. The requirement in communication and foreign language skills is the same as that of the thesis adviser's department or program. All Ph.D. students are required to prepare and formally defend a thesis involving independent research.

Other Relevant Information

Because the selection of the faculty adviser is one of the most important decisions that each student will make during their graduate

career, we offer a rotation program to allow students to do three laboratory rotations with different faculty during the first semester. At the end of the first semester, students choose their doctoral adviser in consultation with the faculty adviser and chair of the Genetics program. Although most students accepted into the Genetics graduate program are admitted to the rotation program, some students may be admitted to receive training by a specific faculty member. All admissions must be approved by the IGDP Genetics Admissions Committee.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. In most participating departments, Genetics applicants are eligible for departmental teaching or research assistantships, and other assistantships supported by grant funds of individual faculty who make these award decisions.

Applicants with a grade-point average above 3.60 and superior GRE scores are encouraged to request fellowship applications from the Graduate School before January 31.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

M.G.I.S.

The Graduate Faculty

Todd Bacastow, Ph.D. (Penn State) Professor of Practice for Geospatial Intelligence
Joseph A. Bishop, Ph.D. (Penn State) Research Associate
Cynthia A. Brewer, Ph.D. (Michigan State) Professor of Geography
Roberts P. Brooks, Ph.D. (UMass, Amherst) Professor of Geography
Mark W. Corson, Ph.D. (South Carolina) Associate Professor of Geography
Robert G. Crane, Ph.D. (Colorado) Professor of Geography
David W. DiBiase, M.S. (Wisconsin-Madison) Senior Lecturer of Geography
Mark Gahegan, Ph.D. (Curtin) Professor of Geography
Peter L. Guth, Ph.D. (MIT) Professor of Geography
Patrick J. Kennelly, Ph.D. (Oregon State) Associate Professor of Geography
Fritz C. Kessler, Ph.D. (Kansas) Associate Professor of Geography
Alexander Klippel, Ph.D. (Bremen, Germany) Assistant Professor of Geography
C. Gregory Knight, Ph. D. (Minnesota) Professor of Geography
Alan M. MacEachren, Ph.D. (Kansas) Professor of Geography
Douglas A. Miller, Ph.D. (Penn State) Associate Professor of Geography
Anthony C. Robinson, Ph.D. (Penn State) Research Associate
Adena B. Schutzbert, M.S. (Penn State) Senior Lecturer of Geography
Alan H. Taylor, Ph.D. (Colorado) Professor of Geography
Ian Turton, Ph.D. (Edinburgh) Senior Research Associate, Geography
Denise H. Wardrop, Ph.D. (Penn State) Associate Professor of Geography
Brenton M. Yarnal, Ph.D. (Simon Fraser) Professor of Geography

The Master of Geographic Information Systems (M.G.I.S.) degree is awarded to students who demonstrate mastery of the technical competencies and leadership skills required to design, manage, and use geographic information technologies successfully in a wide range of professional fields. The MGIS program is intended specifically for working professionals who are able to participate only on a part-time basis and at a distance. It is offered exclusively through World Campus. The MGIS complements, but does not replace, the Department of Geography's more research-focused Master of Science program, which is offered at the University Park campus. Students who expect to pursue the Ph.D. in Geography should apply for admission to the residential M.S. program.

Admission Requirements

Students who wish to pursue the M.G.I.S. degree must be admitted both to the MGIS program and to Penn State's Graduate School. The Graduate School requires applicants to possess any baccalaureate degree from a regionally accredited institution earned under residence and credit conditions substantially equivalent to those required by Penn State. It also requires official TOEFL or IELTS scores for students from countries in which English is not the primary language. Minimum TOEFL scores are 550 for the paper test or 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the Internet-based test (iBT). Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a masters degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Additional requirements imposed by the Department of Geography include:

- Statement of professional experience and goals including documentation of a minimum two years of professional experience, preferably (but not necessarily) related to geographic information technologies. A résumé may be attached as a supplement, but the statement itself should be an essay (two to three pages) that demonstrates the applicant's verbal communication skills;
- Three letters of recommendation that attest to the applicant's readiness for graduate study and that he or she has the requisite minimum of two years of professional experience;
- Two official transcripts from each post-secondary institution attended, including the institution that conferred the applicant's baccalaureate degree (and any graduate degrees, if applicable). Applicants are expected to have earned a grade-point average of 3.0 (or equivalent) or better during their final two years of undergraduate work;
- Official Graduate Records Examinations (GRE) score reported directly from the testing center to Penn State. GRE scores are required: however, this requirement may be waived under certain circumstances. Please contact the graduate program directly.

A committee consisting of at least three Geography faculty members, including one faculty member not currently participating in the MGIS program, will meet three times annually to screen applications and identify applicants qualified for admission. Three cohorts of approximately twelve students each will be admitted during three annual admissions cycles. Applicants who are only able to participate part-time and at a distance while maintaining full-time professional responsibilities (and who are therefore effectively excluded from participation in the department's resident program) will be preferred. The best-qualified applicants will be admitted up to the number of spaces that are available for new students.

Prior to admission in the MGIS program, students may enroll in MGIS courses as nondegree graduate students. Nondegree graduate students who are subsequently admitted to the MGIS program may count up to 15 credits of course work accumulated in nondegree status toward the M.G.I.S. degree. Applicants for nondegree graduate status must submit transcripts that confirm they have received a baccalaureate degree from an accredited institution under residence and credit conditions substantially equivalent to those required by Penn State. Admission as a nondegree student neither guarantees nor implies subsequent admission to the MGIS degree program. Changing from nondegree status to regular graduate status requires a new admission application.

By Graduate School rules, a maximum of 10 credits of high-quality graduate work completed at a regionally accredited institution may be

applied toward the requirements for the M.G.I.S. degree. However, credits earned to complete a previous master's degree, whether at Penn State or elsewhere, may not be applied to a second master's degree program at Penn State. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser or program and the Graduate School. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School of Penn State, must be of at least B quality, and must appear on an official graduate transcript of an accredited university.

Degree Requirements

Students earn the M.G.I.S. degree by successfully completing 35 credits of graduate-level course work, including a supervised independent project. Course requirements include a minimum of 18 credits at the 500 level or above, 6 to 9 credits of which are earned through individual studies (GEOG 596). Students are encouraged to create and maintain personal e-portfolios that chronicle their achievements in the program, outline long-term professional development strategies, and foster meaningful interactions among students and faculty members. The independent project demonstrates the student's ability to apply advanced knowledge and skills related to geographic information systems in a way that makes a substantial contribution to his or her professional work. For most student, the project culminates in a formal public presentation, attended by a member of the graduate faculty associated with the MGIS program, which takes place at an appropriate professional conference (such as annual conferences of the Urban and Regional Information Systems Association, the American Congress on Surveying and Mapping, or ESRI). Alternative arrangements are made for students with special needs or contraints. For example, students who submit written reports of project aims and outcomes for publication in adviser-approved peer-reviewed journals are exempt from the public presentation requirement. Presentations and papers are preceded by dress rehearsals that are open to all students in the program through Web and audio conferencing. As part of his or her individual studies, every student is expected to contribute a formal peer review of one other student's rehearsal.

An Advisory Board consisting of accomplished GIS professionals in government and industry, as well as Penn State faculty members in a variety of disciplines who specialize in geographic information science and technology, guides the ongoing development of the MGIS curriculum. Designed for students who are able to participate only on a part-time basis and at a distance, the curriculum is spread over three years; however, students who are able to manage heavier course loads may complete the program in a shorter period of time. Courses are ten weeks in length and require eight to twelve hours of student effort per week. Most courses are offered four times annually, starting in early January, April, July, and October. Most students will complete four courses per year, one course at a time. First-year courses are designed to help students develop the information literacy and technical competencies they need to become knowledgeable and skillful users of desktop geographic information technologies. Second-year courses prepare students for leadership in their organizations with regard to the design, specification, and management of complex geographic information infrastructures. During the third year, students complete electives and an independent study project by which they demonstrate a substantive contribution to their organization as well as the ability to communicate their contribution to a professional audience. Students who successfully complete the Penn State MGIS satisfy the minimum educational achievement required for professional certification by the Geographic Information Systems Certification Institute (www.gisci.org).

Student Aid

Graduate assistantships are not available. Financial aid opportunities for part-time students who participate through the World Campus are discussed at http://worldcampus.psu.edu/StudentServices_FinancialAidOffice.shtml.

PRESCRIBED COURSES

MASTER OF GEOGRAPHIC INFORMATION SYSTEMS

GEOGRAPHY (GEOG)

- 482. The Nature of Geographic Information (2)
- 864. Professionalism in GIS&T (2)
- 483. Problem-Solving with GIS (3)
- 484. GIS Database Development (3)
- 583. Geospatial System Analysis and Design (3)
- 584. Geospatial Technology Project Management (3)
- 586. Geographical Information Analysis (3)
- 596. Individual Studies (3)

In lieu of the 8 credits of prescribed introductory courses (GEOG 482 or 864 + 483 + 484) plus 6 additional elective credits, MGIS students may substitute 14 credits associated with courses that comprise the Geospatial Intelligence Option. This option is designed for current or aspiring practitioners in government agencies, businesses, and non-governmental organizations that rely on insights produced through skillful, knowledgeable, and conscientious analysis of diverse geo-referenced data to plan for emergencies, to coordinate responses to natural and human induced disasters, to enforce the law, and to plan and conduct military operations.

GEOSPATIAL INTELLIGENCE OPTION

GEOGRAPHY (GEOG)

- 882. Geographic Foundations of Geospatial Intelligence (3)
- 883. Remote Sensing for the Geospatial Intelligence Professional (3)
- 884. Geographic Information Systems for the Geospatial Intelligence Professional (3)
- 885. Advanced Analytic Methods in Geospatial Intelligence (3)
- 889. Seminar in Geospatial Intelligence (2)

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- Cynthia A. Brewer, Ph.D. (Michigan State) Professor of Geography
- Robert P. Brooks, Ph.D. (UMass, Amherst) Professor of Geography
- Andrew M. Carleton, Ph.D. (Colorado) Professor of Geography
- Robert G. Crane, Ph.D. (Colorado) Professor of Geography
- Lorraine Dowler, Ph.D. (Syracuse) Associate Professor of Geography and Women's Studies
- Roger M. Downs, Ph.D. (Bristol) Professor of Geography
- William Easterling, Ph.D. (North Carolina) Dean; Professor of Geography
- Rodney A. Erickson, Ph.D. (Washington) Executive Vice President and Provost
- Amy K. Glasmeier, Ph.D. (California, Berkeley) Professor of Geography
- Deryck W. Holdsworth, Ph.D. (British Columbia) Professor of Geography
- Brian King, Ph.D. (Colorado) Assistant Professor of Geography
- Alexander Klippel, Ph.D. (Bremen, Germany) Assistant Professor of Geography
- C. Gregory Knight, Ph.D. (Minnesota) Professor of Geography
- Derrick J. Lampkin, Ph.D. (Arizona) Assistant Professor of Geography
- B. Ikubolajeh Logan, Ph.D. (California, Los Angeles) Professor of Geography
- Alan M. MacEachren, Ph.D. (Kansas) Professor of Geography
- James McCarthy, Ph.D. (California, Berkeley) Associate Professor of Geography
- Donna J. Peuquet, Ph.D. (SUNY, Buffalo) Professor of Geography
- Erica Smithwick, Ph.D. (Oregon State) Assistant Professor of Geography
- Alan H. Taylor, Ph.D. (Colorado) Professor of Geography
- Petra Tschakert, Ph.D. (Arizona) Assistant Professor of Geography
- Melissa Wright, Ph.D. (Johns Hopkins) Associate Professor of Geography
- Lakshman S. Yapa, Ph.D. (Syracuse) Professor of Geography
- Brenton M. Yarnal, Ph.D. (Simon Fraser) Associate Head; Professor of Geography
- Karl S. Zimmerer, Ph.D. (California, Berkeley) Head of the Department; Professor of Geography

Affiliated Faculty

- Guoray Cai, Ph.D. (Pittsburgh) Associate Professor of Information Sciences and Technology, and Geography
- Susan W. Friedman, Ph.D. (Toronto) Adjunct Assistant Professor of Geography
- Stephen Matthews, Ph.D. (U of Wales) Associate Professor of Demography
- Douglas Miller, Ph.D. (Penn State) Associate Professor of Geography; Director for Outreach, Earth and Mineral Sciences Environment Institute
- Adam Rome, Ph.D. (Kansas) Associate Professor of History

Faculty Emeriti

- Ronald F. Abler, Ph.D. (Minnesota) Professor Emeritus of Geography
- Peirce F. Lewis, Ph.D. (Michigan) Professor Emeritus of Geography
- Allan L. Rodgers, Ph.D. (Wisconsin) Professor Emeritus of Geography
- Paul D. Simkins, Ph.D. (Wisconsin) Professor Emeritus of Geography
- Frederick L. Wernstedt, Ph.D. (California, Los Angeles) Professor Emeritus of Geography
- Anthony V. Williams, Ph.D. (Michigan State) Professor Emeritus of Geography
- Wilbur Zelinsky, Ph.D. (California, Berkeley) Professor Emeritus of Geography

The faculty encourages graduate students to arrange courses of study appropriate to their individual needs and aspirations. Programs in Geography may be directed toward a career in public service, teaching and research, private industry, or one of the many other vocational opportunities open to geographers.

Students typically concentrate their study on topics that fall within the special skills and interests of the faculty. Current specialties include behavioral geography; biogeography; cartography; climatology; cultural geography; feminist geography; geo-computation; geographic education; geographic information science; geography of the developing world; geographic theory; geographic visualization; historical geography; human dimensions of global change; nature and society; political geography; population geography; regional economic development and industrial location; remote sensing; and urban geography.

The M.S. program is broadly based. It is designed to provide beginning graduate students with basic training in systematic fields, geographical theory, and research techniques. Study at the Ph.D. level is also broad in the first year, then becomes more specialized.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission, as well as a personal statement. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course work in geography or a related discipline will be considered for admission to the M.S. program. Applicants with master's degrees from high-quality graduate programs in geography will be considered for admission to the doctoral program. The best-qualified applicants will be admitted up to the number of

places that are available for new students. All students must have or must acquire a broad competence in physical geography, human geography, representation methods, and analysis methods (qualitative or quantitative).

Baccalaureate students must earn a master's degree before they will be considered for admission to the doctoral program.

Master's Degree Requirements

The M.S. degree may be earned by completing a thesis or two papers. The thesis option requires completion of at least 30 graduate credits. If the two-paper option is elected, the candidate must earn 35 credits of graduate-level work. The master's papers are usually expanded versions of course or semester papers that are of sufficiently high quality that they can be submitted to scholarly journals. At least one of the papers offered to fulfill the M.S. papers requirement must have been written in connection with a departmental course or seminar.

All M.S. students are required to enroll in GEOG 500 Introduction to Geographic Research (3 credits), GEOG 502 Research Scholarship in Geography (3 credits), and at least 3 credits of GEOG 501A, B, C, or D Research Perspectives (1 credit each) during their first year of residence. All M.S. students are required to complete at least one seminar at the 500 level. Supporting courses are chosen in consultation with an entrance committee (in year one) or the adviser (in subsequent years).

Doctoral Degree Requirements

There is no fixed number of credits; courses are prescribed according to the student's prior experience. The Graduate School's communication and foreign language requirement for the Ph.D. degree shall be satisfied in a manner approved by the candidate's doctoral committee.

All doctoral students are required to enroll in GEOG 500 Introduction to Geographic Research (3 credits) and GEOG 502 Research Scholarship in Geography (3 credits) during their first year of residence.

Other Relevant Information

Penn State's graduate program in Geography works with incoming students to design programs tailored to their specific interests and needs. Thus there are few formal requirements and a maximum of opportunities for students to pursue their own interests under the guidance of the faculty. Each student's work is supervised by his or her academic adviser and by a committee consisting of two additional members of the graduate faculty for M.S. students and three or four additional members for doctoral students.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Ph.D., M.S.
- Integrated B.S/M.S. Program in Geosciences

The Graduate Faculty

- Shelton S. Alexander, Ph.D. (Cal Tech) Professor Emeritus of Geophysics
- Richard B. Alley, Ph.D. (Wisconsin, Madison) Evan Pugh Professor of Geosciences
- Charles J. Ammon, Ph.D. (Penn State) Associate Professor of Geosciences
- Sridhar Anandakrishnan (Wisconsin, Madison) Associate Professor of Geosciences
- Michael A. Arthur, Ph.D. (Princeton) Professor of Geosciences
- Hubert L. Barnes, Ph.D. (Columbia) Distinguished Professor Emeritus of Geochemistry
- Eric J. Barron, Ph.D. (Miami) Professor of Geosciences; Dean, College of Earth and Mineral Sciences
- Timothy J. Bralower, Ph.D. (California, San Diego) Professor of Geosciences
- Susan L. Brantley, Ph.D. (Princeton) Professor of Geosciences
- Roger J. Cuffey, Ph.D. (Indiana) Professor of Paleontology
- David H. Eggler, Ph.D. (Colorado) Professor Emeritus of Petrology
- Terry Engelder, Ph.D. (Texas A&M) Professor of Geosciences
- Donald M. Fisher, Ph.D. (Brown) Professor of Geosciences
- Peter B. Flemings, Ph.D. (Cornell) Professor of Geosciences
- Katherine H. Freeman, Ph.D. (Indiana) Professor of Geosciences
- Kevin P. Furlong, Ph.D. (Utah) Professor of Geosciences
- Tanya Furman, Ph.D. (MIT) Associate Professor of Geosciences
- Earl K. Graham, Ph.D. (Penn State) Professor Emeritus of Geophysics
- Peter Heaney, Ph. D. (Johns Hopkins) Associate Professor of Geosciences
- Christopher H. House, Ph.D. (California) Assistant Professor of Geosciences
- James F. Kasting, Ph.D. (Michigan) Professor of Geosciences and Meteorology
- Klaus Keller, Ph.D. (Princeton) Assistant Professor of Geosciences
- Derrill M. Kerrick, Ph.D. (California, Berkeley) Professor Emeritus of Geochemistry
- Eric Kirby, Ph.D. (MIT) Assistant Professor of Geosciences
- James Kubicki, Ph.D. (Yale) Associate Professor of Geosciences
- Lee R. Kump, Ph.D. (South Florida) Professor of Geosciences
- Christopher J. Marone, Ph.D. (Columbia) Professor of Geosciences
- Raymond G. Najjar, Ph.D. (Princeton) Associate Professor of Meteorology
- Andrew A. Nyblade, Ph.D. (Michigan) Associate Professor of Geosciences
- Hiroshi Ohmoto, Ph.D. (Princeton) Professor of Geochemistry
- Richard R. Parizek, Ph.D. (Illinois) Professor of Geology
- Mark E. Patzkowsky, Ph.D. (Chicago) Associate Professor of Geosciences
- Arthur W. Rose, Ph.D. (Cal. Tech.) Professor Emeritus of Geochemistry
- Rudy L. Slingerland, Ph.D. (Penn State) Professor of Geology
- Barry Voight, Ph.D. (Columbia) Professor of Geology
- William B. White, Ph.D. (Penn State) Professor Emeritus of Geochemistry
- Peter Wilf, Ph.D. (Pennsylvania) Assistant Professor of Geosciences

M.S. and Ph.D. Degrees

The Department of Geosciences offers M.S. and Ph.D. degree programs that provide students with a broad background in any of the major areas of geological sciences and intensive research experiences culminating in the preparation of a formal thesis. The goal of the programs is to prepare students for scientific careers in academia, government, or industry. A wide range of faculty interests and exceptional laboratory and other support facilities provide an extensive variety of areas of specialization in which students may choose their course work and research topics, which include: aqueous geochemistry, chemistry and physics of rocks and mineral, geodynamics, global change and earth history, sedimentary geology and paleobiology, solid earth and applied geophysics, surficial processes. A complete listing can be found at: www.geosc.psu.edu.

The research of faculty and students is facilitated through: the Biogeochemical Research Initiative for Education (BRIE, an NSF-sponsored graduate program in microbial biogeochemistry), the Petroleum Geosystems Initiative (an industry-sponsored, team-based M.S. program) linking the Department of Geosciences and the Department of Energy and Geo-Environmental Engineering and the Penn State Astrobiology Research Center (PSARC, an NSF-sponsored interdisciplinary program in the origin and evolution of life in the universe, aimed at understanding the connections between the environment and the biota on Earth, especially during the stages of its evolution) as well as the Environment Institute of the College of Earth and Mineral Sciences, including the Earth System Science Center, and the Center for Environmental Chemistry and Geochemistry.

In addition to extensive computing and supercomputing facilities developed in association with the Earth System Science Center, students have access to a wealth of analytical, experimental, and field equipment. State-of-the-art analytical equipment is maintained by the department and the Material Characterization Laboratory. The Department of Geography and the Office for Remote Sensing of Environmental Resources have remote sensing facilities.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are normally required for admission. Exceptions must be approved by the

department.

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

For admission, applicants generally are expected to have a bachelor's degree in some branch of the natural or physical sciences, engineering, or mathematics. An applicant also is expected to have completed standard introductory courses in geosciences, chemistry, physics, and mathematics through integral calculus, plus 15 credits of intermediate-level work in one or a combination of these subjects. Greater than minimal preparation in chemistry, geology, biology, mathematics, or physics may be required for particular subdisciplines. Applicants who have taken somewhat less than the indicated minimum in these subjects may be admitted but must make up their deficiencies concurrently with their graduate studies.

Students with special backgrounds, abilities, and interests whose undergraduate grade-point average in courses pertinent to geosciences is below a 3.00 (on a 4.00 scale) will be considered for admission only when there are strong indications that a 3.00 average can be maintained at the graduate level.

Students are admitted both to the M.S. and Ph.D. degree programs. A student may work toward a Ph.D. degree without first earning a master's degree. If this option is desired, the student must arrange the scheduling of a candidacy evaluation no later than the end of the third semester of residence at Penn State.

Faculty Advisers

Upon arrival, students will be advised initially by a committee appointed by the associate head for Graduate program and Research. The committee in turn will designate an interim adviser. Before the end of the first academic year of residence, the student is expected to develop specific academic and research interests so that an appropriate permanent academic adviser and research supervisor may be chosen. The academic adviser and research supervisor are usually the same person, except when the research supervisor is not a member of the geosciences graduate faculty. In such a case, a geosciences program family member serves as the academic adviser.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate Bulletin. In addition, several graduate fellowships are available for students within the Department of Geosciences.

Programs of study are planned to require no more than two years for the M.S. degree and three additional years, or five years total, for the Ph.D. degree. A student transferring to the department with the M.S. degree should plan on four additional years. Financial support from teaching or research assistantships or from fellowships is available to students in good standing, but not awarded beyond these limits except in unusual cases.

Common Degree Requirements

All graduate students in geosciences, including both M.S. and Ph.D. students, are expected to acquire breadth of knowledge in the geosciences, a fundamental and advanced knowledge of their subdiscipline, and skills in the areas of data collection and quantitative analysis. Toward that end, all graduate students must select one of the approved courses in each of the following areas: (1) Geosciences Breadth -- 3-4 credits; (2) Disciplinary Fundamentals -- 3--4 credits; (3) Data Gathering -- 3--4 credits; and (4) Quantitative Analysis -- 3--4 credits.

Prescribed courses (3 credits): GEOSC 500 (3)

Additional Courses
Disciplinary Fundamentals: Select 3 credits from GEOSC 488(4), GEOSC 489(4), GEOSC 502(4), GEOSC 507(3), GEOSC 518(3), GEOSC 519(3), GEOSC 533(3), GEOSC 542(1-4), GEOSC 548(3), GEOSC 585(3)

Data Gathering and Interpretation: Select 3 credits from GEOSC 410(3), GEOSC 413W(3), GEOSC 483(3), GEOSC 508(3), GEOSC 558(4), GEOSC 565(3), GEOSC 572(1-2)

Quantitative Analysis: Select 3 credits from E MCH 524A(3), GEOSC 514(3), GEOSC 560(3), GEOSC 561(4), MNG 557(3-6), P N G 425(3); GEOSC 597(3) (either Multivariate Analyses in Geosciences OR Data Analysis in the Earth Sciences)

A current list of approved courses is maintained by the Department's Graduate Program Office in room 507 Deike Building. The list of approved courses may be modified by approval of the Department's Graduate Program Committee.

Additional Master's Degree Requirements

Master's degree students are required to take 30 graduate credits, which include at least 18 credits at the 500 to 600 level. The 12 to 16 common degree credits described above satisfy the Graduate School minimum of at least 12 credits in course work in the major program.

As part of the M.S. program, each student is required to complete a thesis. The thesis must be defended in an oral examination administered by an M.S. committee.

Additional Doctoral Degree Requirements

Admission to Ph.D. candidacy is determined by an oral examination before a candidacy committee. Preparation and defense of two research proposals will serve as one means of assessing the student's ability. At least one of these proposals should represent original work by the student, but the other may be an actual thesis proposal and involve limited initial input from the adviser or others.

Course work in addition to the common degree requirements described above will be selected by the student in consultation with his/her committee.

The comprehensive examination is both oral and written. It is administered by the doctoral committee after the student has essentially completed course work and after a foreign language requirement (if required by the committee) is fulfilled. A final oral defense of the thesis is required.

Biogeochemistry Dual-Title Degree Program

Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual

serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework from an approved list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. A single candidacy examination that includes biogeochemistry will be administered for admission into the student's Ph.D. program, as well as the biogeochemistry dual-title. The structure and timing of this exam will be determined jointly by the dual-title and major program. The student's doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Integrated B.S/M.S. Program in Geosciences

The Department of Geosciences offers an integrated B.S./MS. Program that is designed to allow academically superior students to obtain both the B.S. and the M.S. degree in Geosciences within 5 years of study. Students who wish to complete the Integrated B.S./M.S. Program in Geosciences must apply for admission to the Graduate School and the Integrated B.S/M.S program by the end of their junior year

During the first three years, the student follows the course scheduling of one of the options in Geosciences (see *Undergraduate Degree Program Bulletin*); however, if a student intends to enter the Integrated B.S./M.S. program, he/she would be encouraged to take, wherever appropriate, upper level classes. By the end of the junior year, the student normally would apply for admission to the program. A decision of acceptance would be made prior to the beginning of the senior year and a M.S. Advising Committee would be appointed. During the senior year, the student would follow the scheduling of the B.S. Geosciences option he/she has selected, with an emphasis on completing 500-level coursework wherever appropriate. During the senior year, the student will start work on a thesis designed to meet the departmental requirements of a M.S. Thesis. During the fifth year, the student will take courses fulfilling the departmental M.S. degree requirements and complete the M.S. Thesis. Undergraduate tuition rates will apply as long as the student is an undergraduate, unless the student receives financial support, for example, an assistantship requiring the payment of graduate tuition.

Admission Requirements

Students who wish to complete the Integrated B.S/M.S. Program in Geosciences must apply for admission to the Graduate School and the Integrated B.S/M.S program at the by the end of their junior year. Typical test scores of students admitted to the Geosciences Graduate Program are: GPA 3.5, and GRE's Verbal 570, and Quantitative 700. Three letters of recommendation by faculty members for admission to graduate studies are required. The applications are reviewed by the Admissions Committee of the Geosciences Graduate Program and acted upon by the Associate Head for Graduate Programs.

Requirements

B.S. Degree Portion: Total B.S. Requirements - 121 Credits
(For details on courses see the *Undergraduate Degree Programs Bulletin*.)

General Education: 45 Credits
18 of these are included in the REQUIREMENTS FOR THE MAJOR

Requirements for the Major - 94 Credits

Common Requirements for all options - 61 Credits

Prescribed Courses - 61 credits

Additional Courses - 3 Credits

Additional Geosciences Courses - 15 Credits

Supporting Courses and Related Areas - 15 Credits

M.S. Portion: Total M.S. Requirements - 30 Credits

Prescribed Courses: GEOSC 501(1), GEOSC 600(1-15)

Additional Courses - 9 credits

Disciplinary Fundamentals: Select 3 credits from GEOSC 479, GEOSC 481, GEOSC 489, GEOSC 519, GEOSC 533, GEOSC 548, GEOSC 585

Data Gathering: Select 3 credits from GEOSC 413W, GEOSC 483, GEOSC 558, GEOSC 565, GEOSC 572

Quantitative Analysis: Select 3 credits from E MCH 524A, GEOSC 560, GEOSC 561, GEOSC 514, MNG 557, P N G 425, P N G 430, P N G 511, STAT 500

Additional Geosciences Courses at the 400 and 500 level - 6 Credits

Supporting Areas: 6 Credits of Graduate course work.
These courses should be related to the thesis work of the student.

If a student has accumulated more than 121 Credits as an undergraduate student, 9 credits of 400- or 500-level class credits can be transferred to the MS program, provided these courses were not used to fulfill BS requirements.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

GEOSCIENCES (GEOSC) course list

NOTE: GEOSC 439, GEOSC 470W, GEOSC 472A, GEOSC 472B includes from one to several field trips for which an additional charge will be made.

Unit A.
(MATSC) POWDER X-RAY DIFFRACTION (1) Compound identification, lattice parameter measurement, and other applications of the powder diffraction method.

Unit B.
(MATSC) TRANSMISSION ELECTRON MICROSCOPY (1) Principles and practice of transmission electron microscope operation. Students undertake individual projects.

Unit C.
(MATSC) SPECTROSCOPY (1) Emission spectrographic analysis of powders and atomic absorption analysis of solutions.

Unit D.
(MATSC) ELECTRON MICROPROBE ANALYSIS (1) Qualitative and quantitative elemental analysis of microvolumes within solids. Emphasis on individual student projects.

Unit E.
(MATSC) SCANNING ELECTRON MICROSCOPY (1) Principles and practice of scanning electron microscope operation. Students undertake individual projects.

Unit G.
(MATSC) ANALYTICAL ELECTRON MICROSCOPY (1) Modern analytical electron microscope techniques: scanning transmission electron microscopy; electron energy loss spectroscopy; energy dispersive analysis of X-rays. Prerequisite: MATSC (GEOSC) 511B.

Degree Conferred:

Ph.D., M.A.
Dual-Title PH.D. Degree in German and Language Science

The Graduate Faculty

- Thomas O. Beebee, Ph.D. (Michigan) Distinguished Professor of Comparative Literature and German
- Hartmut Heep, Ph.D. (Illinois) Associate Professor of German and Comparative Literature
- Carrie N. Jackson, Ph.D. (Wisconsin, Madison) Assistant Professor of German and Linguistics
- Martina Kolb, Ph.D. (Yale) Assistant Professor of German and Comparative Literature
- Bettina E. Mathes, M.A., Ph.D. (Humboldt) Associate Professor of German; Science, Technology, and Society; and Women's Studies
- B. Richard Page, Ph.D. (Wisconsin, Madison) Associate Professor of German and Linguistics
- Daniel Purdy, Ph.D. (Cornell) Associate Professor of German
- Dennis Schmidt, Ph.D. (Boston College) Professor of Philosophy, German, and Comparative Literature
- Adrian Wanner, Ph.D. (Columbia) Professor of Russian and Comparative Literature

Programs of study with major emphasis upon literature, culture, linguistics, or applied linguistics lead to advanced degrees.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are desirable. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin.*

Minimum qualifications for admission include 30 undergraduate credits in German beyond the intermediate level. Provision is made, however, for admission with limited deficiencies. Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. Requirements for admission to the M.Ed. degree program include 18 credits in education and related psychology. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Master's Degree Requirements

The M.A. in German is designed to offer students a general foundation in German culture, language, linguistics, and literature. After completing a small set of core requirements, students may pursue their individual interests from among the courses offered by faculty who specialize in German Applied Linguistics, Culture, Linguistics, and Literature. The M.A. degree requires a minimum of 36 credits and is designed as a terminal degree.

The following courses are required for the M.A. degree:

- German 510: Introduction to Literary Criticism and Its Application
- German 511: The Teaching of College German
- German 512 or 515: Introduction to German Linguistics or Introduction to German Applied Linguistics

Practical experience in supervised teaching is required for all graduate degrees. Students who wish to earn a Master's Degree must write a research paper of between thirty and fifty pages on a topic defined in conjunction with a faculty adviser. The research paper should demonstrate mastery of primary and secondary literature, interpretative skills, and academic prose in both German and English. A one-hour oral defense of the paper shall be scheduled two weeks after its formal submission to the adviser. A committee consisting of faculty adviser and two other members of the German program selected by the M.A. candidate shall evaluate the student's knowledge of the subject matter.

Doctoral Degree Requirements

For the Ph.D., a student must complete at least 66 credits (including M.A. credits) of graduate-level work. GER 510, 511, and 512 or 515 are required of all students. Other requirements include: (1) demonstrated reading knowledge of one foreign language in addition to German and English, (2) successful passing of the comprehensive examination with written and oral components, and (3) completed doctoral dissertation. Students specialize in one of two options: German Literature and Culture, or German Applied Linguistics. The Literature and Culture option allows students to combine courses in various fields to create an interdisciplinary program of study. In addition to the 9 credits of required work, students will complete 57 credits chosen in consultation with an adviser from courses that allow students to create an interdisciplinary program of study. The Applied Linguistics option requires 15 credits in the core areas of German, 21 credits of German electives (6 of which must be in German linguistics), a minimum of 21 credits in six core areas of Linguistics and Applied Language Studies (LALS), and 9 credits of LALS electives.

Dual-Title Graduate Degree in German and Language Science

Graduate students with research and educational interests in German and Language Science may apply to German and Language Science Ph.D. Graduate Program. The goal of the dual-title degree German and Language Science graduate program is to enable graduate students from German to acquire the knowledge and skills of their major area of specialization in German, while at the same time gaining the perspective and methods of the Language Sciences.

Admission Requirements

To pursue a dual-title degree under this program, the student must first apply to the Graduate School and be admitted through the

Department of Germanic and Slavic Languages and Literatures (see below for admission requirements for the Graduate Program in German). Upon admission to the German Program and with a recommendation from a Language Science program faculty member in the Department of Germanic and Slavic Languages and Literatures, the student's application will be forwarded to a committee that will include the Director of the Linguistics Program, one of the Co-Directors of the Center for Language Science, and a third elected faculty member within the Center for Language Science. All three committee members will be affiliated with the Program in Linguistics. Upon the recommendation of this committee, the student will be admitted to the dual-title degree program in Language Science.

Requirements for the Dual-Title Ph.D. Degree in German and Language Science

The doctoral degree in German and Language Science is awarded only to students who are admitted to the German doctoral program and admitted to the dual-title degree in Language Science. The minimum course requirements for the dual-title Ph.D. degree in German and Language Science, in addition to the German Program requirements, are as follows:

- Language Science proseminar courses (LING 521 and LING 522; 6 credits).
- Research Methods/Statistics (LING 525 or equivalent; 3 credits).
- Theoretical Linguistics (LING 500 or LING 504; 3 credits)
- Cognitive Neuroscience or Psycholinguistics (LING/PSY 520, PSY 511 or equivalent; 3 credits)
- Research internships with two different Language Science faculty mentors (CSD 596, GER 596, LING 596, PSY 596, SPAN 596; 6 credits).

Particular courses may satisfy both the German requirements and those in the Language Science program. Final course selection is determined by the student in consultation with the dual-title program advisors and the major program advisors. Students who already hold a master's degree from another institution may petition to have equivalent course credits accepted.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following awards typically have been available to graduate students in this program:

EXCHANGE FELLOWSHIPS AT CHRISTIAN ALBRECHTS UNIVERSITÄT, KIEL, AND THE PHILLIPS UNIVERSITÄT, MARBURG--Available to graduate students in German and other fields for a full academic year. Students must have a good command of German.

WALTER EDWIN THOMPSON AND DR. REGINA BLOCK THOMPSON SCHOLARSHIP FUND--Thompson Fellowships are available each year for graduate students in the Department of Germanic and Slavic Literatures and Languages. These fellowships can be awarded in addition to other grants or stipends.

Courses

*GER 001G. ELEMENTARY GERMAN FOR GRADUATE STUDENTS (3) Designed for students preparing to satisfy language requirements for advanced degrees.
*GER 002G. ELEMENTARY GERMAN FOR GRADUATE STUDENTS (3) Continuation of GER 001G, with opportunity for reading in special fields.

*No graduate credit is given for this course.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Health Administration (H ADM)

Program Home Page (Opens New Window)

JAMES T. ZIEGENFUSS, Jr., *Graduate Program Coordinator*
School of Public Affairs, Penn State Harrisburg
W-160 Olmsted Building; 717-948-6226

Degree Conferred:

M.H.A.

Graduate Faculty

- Cynthia Mara, Ph.D. (Virginia Tech) *Associate Professor of Health Care Administration and Policy*
- Goktug Morcol, Ph.D. (Virginia Tech) *Associate Professor of Public Administration*
- Bing Ran, Ph.D. (Waterloo) *Assistant Professor of Public Administration*
- Jill S. Rumberger, Ph.D. (Penn State) *Assistant Professor of Health Administration*
- Triparna Vasavada, Ph.D. (SUNY-Albany) *Assistant Professor of Public Administration*
- James T. Ziegenfuss, Jr., Ph.D. (Penn/Wharton School) *Professor of Management and Health Care Systems*

Recognizing that the national health care system is in a period of reform and redesign, the program emphasis involves design/redesign in a 36-credit curriculum. Based on eight core courses defined as the foundation of administration in health care, the degree is designed for part-time professional students already engaged in health administration careers. The mission of the program is to further student knowledge and skills in a continuous learning cycle. Students are expected not only to know the existing health system, but are to develop a capability for design consistent with demands of access to care, management, and control of costs and quality of care delivery.

Part-time students may start the program at the beginning of any semester. They usually take one or two 3-credit courses each semester. Students may also take one or two courses during the summer session to maintain steady progress toward the degree. All Health Administration courses are available during the evening for the convenience of part-time students. A student may complete the M.H.A. on a part-time basis in about two to four years.

Admission Requirements

Applicants must have received their baccalaureate degree from an accredited college or university prior to starting the graduate program. Applicants who are still completing their baccalaureate requirements at the time of the application may be admitted to the Graduate School conditional on the awarding of the baccalaureate degree.

Admission to the MHA program is based on clear suitability for the MHA program as demonstrated by the application as a whole, to include: a completed application, evidence of a bachelor's degree from an accredited college; a statement of career and educational goals; a successful undergraduate record with a grade-point average of 3.00 (with particular attention given to the last two years of undergraduate work); satisfactory scores on the Graduate Record Examination (GRE) or Graduate Management Admission Test (GMAT) are required if the GPA is less than 3.00; three years of work experience; and names of three references willing to provide recommendations.

The GPA requirement may be relaxed if the student has professional experience or other strong evidence suggesting likely success in the MHA program. Some applicants may be accepted on a non-matriculated probationary basis, pending performance at the B (3.00) level over 15 hours of approved credit.

Program Requirements

All undergraduate degrees are acceptable for admission. All students are expected to have had at least an introductory course in statistics and statistical software.

If these introductory knowledge and skill areas have not been completed prior to admission they must be satisfied prior to completion of 12 graduate credits. Reading and introductory courses--for which not graduate credit is given--are available at Penn State Harrisburg. The computer area may be satisfied by completing a 1-credit computer course: P ADM 486 Applied Statistical Package.

The degree requires a minimum of 36 graduate credits, including a 3-credit, faculty-supervised paper. Three credits of 400-level work may be included in the electives. An overall 3.00 (B) grade-point average must be earned in all 400- and 500-level work.

REQUIRED COURSES: 24 credits
H ADM 539, H ADM 540, H ADM 541, H ADM 542, H ADM 545, P ADM 503, P ADM 506, P ADM 510

ELECTIVE CONCENTRATION: 9 credits
H ADM 543, H ADM 546, H ADM 548, H ADM 551, H ADM 552, H ADM 597, P ADM 505, P ADM 511, P ADM 512, P ADM 514, P ADM 515, P ADM 516, P ADM 520

CAPSTONE COURSE: 3 credits
H ADM 594

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

M.Ed.

The Graduate Faculty

- Raffy R. Luquis, Ph.D. (Arkansas) *Associate Professor of Health Education*
- Samuel W. Monismith, D.Ed. (Penn State) *Associate Professor of Health Education*

The Health Education program emphasizes behavioral and organizational strategies to plan, implement, and evaluate interventions that enable individuals, groups and communities to achieve personal, environmental, and social health. It complements other professional fields such as education, nutrition, physical therapy, occupational therapy, dental hygiene, nursing, health care administration, and preventive psychology.

The program follows a professional development focus, as many of the students are employed in the broad areas of disease prevention andhealth promotion and are pursuing graduate study on a part-time basis. The M.Ed. is a professional degree emphasizing applied research.

The program requires a research-based culminating experience. The faculty has a broad range of interests, including health promotion, family systems, teaching and training methods, violence and substance abuse prevention and control, and multicultural health issues.

A minimum of 30 graduate credits is required for the completion of the degree. A 3 credit research-based culminating writing experience is required. The program requires students to complete 21 credits in Prescribed Core courses and 9 credits in Elective courses.

Admission Requirements

Students must have a baccalaureate degree from an accredited college or university, an overall minimum undergraduate grade-point average of 2.50 and a junior/senior GPA of 3.00 (on a 4.00 scale) for admission into the program. Students are also required to submit:

- A completed application form with application fee;
- Two copies of an official transcript from an accredited, college-level university;
- Supplementary application.

An application is available on the Web at www.hbg.psu.edu (Opens New Window) or by calling 717-948-6250.

Degree Requirements

A minimum of 30 graduate credits is required for the completion of the degree. A 3-credit research-based culminating experience is required. The program has a required core of courses totalling 18 credits as follows:

Prescribed Core Courses: 21 credits

- HLHED 415 Planning and Development of Health Education Programs (3)
- HLHED 456 Advanced Techniques in School and Community Health Education (3)
- EDUC 440 Education Statistics and Measurement (3) or EDPSY 400 Introduction to Statistics in Educational Research (3)
- HLHED 552 Current Health Education Issues (3)
- HLHED 553 Multicultural Health Issues (3)
- EDUC 586 Educational Research Design (3) or HLHED 530 Research Techniques in Health Education (3)
- *Culminating Experience:* HLHED 591 Culminating Health Education Seminar (3) or HLHED 587 Master's Project (3)

Elective Courses: 9 credits

A minimum of 12 credits is to be selected from the following HLHED courses: HLHED 420, 421, 443, 497, 501, 516, 590, 596, or 597.

Students also may select electives from suitable courses in Psychology, Community Psychology and Social Change, Education, Training and Development, or Health Administration programs. Note that 6 credits must be at the 500 level. Please contact the program office for further information about electives.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Health Policy and Administration (H P A)

Program Home Page

DENNIS G. SHEA, *Head*
604 Ford Building
814-863-5421

Degrees Conferred:

- M.S., Ph.D., M.H.A., M.B.A./M.H.A.(concurrent)
- Integrated B.S. in Health Policy and Administration/Master of Health Administration (MHA) Admission and Degree Requirements

The Graduate Faculty

- Rhonda BeLue, Ph.D. (Cornell) *Assistant Professor of Health Policy and Administration*
- S. Diane Brannon, Ph.D. (Cornell) *Professor of Health Policy and Administration*
- Kathryn H. Dansky, Ph.D. (Ohio State) *Associate Professor of Health Policy and Administration*
- Jami DelliFraine, Ph.D. (Virginia Commonwealth) *Adjunct Assistant Professor of Health Policy and Administration*
- Elizabeth Farmer, Ph.D. (Duke) *Associate Professor of Health Policy and Administration*
- Marianne Hillemeier, Ph.D. (Michigan) *Associate Professor of Health Policy and Administration, Demography, Health Evaluation Sciences, Obstetrics and Gynecology, and Nursing*
- Kyoungrae Jung, Ph.D. (Yale) *Assistant Professor of Health Policy and Administration*
- Peter Kemper, Ph.D. (Yale) *Professor of Health Policy and Administration, and Demography*
- Deirdre McCaughey, Ph.D. (Manitoba) *Assistant Professor of Health Policy and Administration*
- Michael R. Meacham, J.D. (Kansas) *Associate Professor of Health Policy and Administration; Director of Professional Development and External Relations*
- Jessica Mittler, Ph.D. (Harvard) *Assistant Professor of Health Policy and Administration*
- John Moran, Ph.D. (Penn State) *Assistant Professor of Health Policy and Administration*
- Dennis Scanlon, Ph.D. (Michigan) *Associate Professor of Health Policy and Administration; Professor-in-Charge of M.S./Ph.D. Program*
- Mark Sciegaj, Ph.D. (Brandeis) *Associate Professor of Health Policy and Administration*
- Dennis G. Shea, Ph.D. (Rutgers) *Professor of Health Policy and Administration and Economics; Department Head*
- Pamela Farley Short, Ph.D. (Yale) *Professor of Health Policy Administration, Demography, and Health Evaluation Sciences*
- Joseph Vasey, Ph.D. (Penn State) *Assistant Professor of Health Policy and Administration*
- Karen Volmar, J.D. (Boston College) *Associate Professor of Health Policy and Administration; Executive Director, Master of Health Administration*

The graduate degrees in the Department of Health Policy and Administration focus on management, policy, and research in health services, with particular attention to the recurrent problems of cost, quality, and access to health services.

The doctoral program (Ph.D.) is designed to provide advanced knowledge and skills in health services research, with an emphasis track in health policy and economics, health care organizations or population health and demography. The doctorate in H P A prepares students to become independent health services researchers in academic and nonacademic settings.

The Master of Science (M.S.) degree in Health Policy and Administration provides a solid foundation of knowledge and skills in health services research. The M.S. in H P A prepares students for further graduate study toward a doctorate in health services research or related fields or for research and analytic work in academic and nonacademic health services research settings.

The professional Master of Health Administration (M.H.A.) program prepares students for the complexities they will face in managing organizations that plan, finance and deliver health care. The curriculum emphasizes strategic decision-making, financial management, communication and detailed aspects of the U.S. health care system. These include health law, epidemiology, health insurance, government health-financing programs, ethics, managed care, long-term care, health care technology, marketing, and strategic planning for health services.

The integrated B.S. in Health Policy and Administration/Master of Health Administration (M.H.A.) program allows qualified undergraduate students to earn both degrees in five calendar years of full time academic study. Students completing an integrated B.S./M.H.A. are prepared to advance quickly to positions of leadership in health care organizations.

The M.B.A. program of the Smeal College of Business and the Department of Health Policy and Administration of the College of Health and Human Development offer a concurrent degree program. The M.B.A./M.H.A. graduate will be well-grounded in both business and health management and prepared for positions in hospitals, nursing homes, managed care and health insurance organizations, health care consulting, and pharmaceutical companies,as well as for helping businesses in all sectors understand the unique features of the health care system.

Doctoral Admission and Degree Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

Satisfactory scores from either the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) are required for admission; the GRE is preferred. A junior/senior grade-point average of 3.00 or better (on a 4.00 scale) and a well-considered statement of experience and career goals are major criteria for admission. Some work experience in health services is preferred, but not required.

The H P A doctoral curriculum includes study in three substantive areas: (1) core courses in health services organization, delivery, finance and policy; (2) core courses in health services research methods and statistics, and (3) courses and a doctoral thesis in an emphasis track approved by the doctoral committee.

M.S. Admission and Degree Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad*

Graduate Bulletin.

Satisfactory scores from either the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) are required for admission; the GRE is preferred. A junior/senior grade-point average of 3.00 or better (on a 4.00 scale) and a well-considered statement of experience and career goals are major criteria for admission. Some work experience in health services is preferred, but not required.

The M.S. curriculum in H P A includes study in three substantive areas: (1) a core set of courses in health services organization, delivery, finance, and policy; (2) courses in health services research methods and statistics, and (3) courses and a master's thesis approved by the thesis advisor. At least 15 credits of the program must be completed in H P A departmental course offerings at the 400-and 500-level. At least 18 credits of the degree must be in 500-and 600-level courses. A 6-credits master's thesis must be completed as part of the degree requirement.

M.H.A. Admission and Degree Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

Satisfactory scores from either the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) are required for admission; the GRE is preferred. This requirement may be waived for applicants with extensive work experience. A junior/senior grade-point average of 3.00 or better (on a 4.00 scale), a relevant personal statement and three letters of recommendation are necessary. Some work experience in health care is preferred, but not required.

The program can be completed on a full-time basis in 21 months or on a part-time basis. Requirements for the completion of the M.H.A., include 49 credits with at least 18 credits at the 500-or 800-level with a minimum of 6 credits specifically in 500-level courses. Included in the 49 credits are both a ten-week summer residency in a health care setting and a capstone course to demonstrate evidence of analytical ability and synthesis of material.

Integrated B.S. in Health Policy and Administration/Master of Health Administration (M.H.A.) Admission and Degree Requirements

The following credentials will be considered for admission:

- A demonstrated ability to communicate effectively, an advanced level of maturity, and high motivation to pursue a career in the health care field
- Academic references
- Successful completion of 60 undergraduate credits having maintained a cumulative GPA of 3.4 or better

Students admitted to the B.S. in Health Policy and Administration/M.H.A. are able to earn both the B.S. and M.H.A. in five calendar years of full-time academic study.

M.B.A./M.H.A. Concurrent Degree Program Admission and Degree Requirements

Students may apply to be admitted to either the M.H.A. or the M.B.A. program initially. During the initial year in either graduate program, students may apply to complete the concurrent degree program and must meet admission requirements for the other program. See the M.H.A. and M.B.A. degree program descriptions for further admission requirements of each program.

Students complete 88 credits associated with both the M.H.A. and M.B.A. degrees. Included within the required credits is a 10-week integrated residency during a summer. The time required to complete the M.B.A./M.H.A. can be as much as 34 months.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

DOROTHY EVENSEN, *Professor-in-Charge of Graduate Programs in Higher Education*
400 Rackley Building
814-863-2690
Highered@psu.edu

Degrees Conferred:

Ph.D., D.Ed., M.Ed.

The Graduate Faculty

- Michael Dooris, Ph.D. (Penn State) Affiliate Assistant Professor of Education
- Dorothy H. Evensen, Ph.D. (New York U) Associate Professor of Education
- Roger L. Geiger, Ph.D. (Michigan) Distinguished Professor of Education
- Kimberly A. Griffin, Ph.D. (UCLA) Associate Professor of Education
- Donald E. Heller, Ed.D. (Harvard) Associate Professor of Education
- Robert M. Hendrickson, Ed.D. (Indiana) Professor of Education
- Lisa R. Lattuca, Ph.D. (Michigan) Assistant Professor of Education
- Beverly Lindsay, Ph.D. (American) Professor of Education
- David M. Post, Ph.D. (Chicago) Professor of Education
- Robert D. Reason, Ph.D. (Iowa State) Assistant Professor of Education
- Patrick T. Terenzini, Ph.D. (Syracuse) Professor of Education
- M. Lee Upcraft, Ph.D. (Michigan State) Adjunct Professor of Education
- Roger L. Williams, D.Ed. (Penn State) Affiliate Assistant Professor of Education

The graduate program in Higher Education has as its goal the preparation of individuals who will pursue careers and exert leadership in postsecondary education as administrators, faculty, or researchers in the nation's colleges and universities and in a variety of public and private agencies and associations in the United States and other nations. With emphasis on the systematic study of higher education, the program builds on the scholarly and scientific disciplines offered throughout the University and applies these studies to the professional functions and responsibilities that its graduates will assume, and to the knowledge of the field of higher education. The program is concerned with four broad areas of higher education study and with three areas of special emphasis: academic programs and evaluation, organization and administration, and perspectives on higher education policy and practice.

With mounting awareness of the changes occurring in various academic and professional fields, of the need for higher education reform, and of the need for improved articulation among the various levels of education, higher education faculty cooperates with other departments of the University to offer a number of courses and seminars for graduate students interested in pursuing a minor in higher education.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by the graduate program and authorized by the dean of the Graduate School, such as the Miller Analogies Test (MAT), are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

APPLICATION DEADLINE: Candidates may enter the program at the beginning of the fall or spring semester, or the summer session. To allow sufficient time for processing applications, required information must be received by January 1 for international applicants and those wishing to be considered for Graduate Fellowships, or February 1 for all other applicants. Those wishing consideration for the spring semester should submit materials by September 15. Applicants should contact the program office for additional application materials.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Joint Degree Program between The Pennsylvania State University Dickinson School of Law (J.D.) and the Higher Education Program (M.Ed., D.Ed., Ph.D.)

Joint Degree Program. The Pennsylvania State University Dickinson School of Law (DSL) and the Higher Education (HI ED) Program are offering a joint degree program leading to a Juris Doctor (J.D.); and a Master of Education (M.Ed), a Doctor of Education (D.Ed), or a Doctor of Philosophy (Ph.D). in Higher Education.

Admission Requirements

The number of openings in the joint degree J.D./M.Ed., D.Ed., or Ph.D. program will be limited to students with an outstanding academic record who have successfully completed two semesters at the Dickinson School of Law.

Applicants to the joint degree program:

1. must have been admitted to the Dickinson School of Law
2. should have successfully completed two semesters of course work at the Dickinson School of Law with a grade-point average of 3.0
3. must submit two letters of recommendation from the Dickinson School of Law faculty
4. must submit a career statement

Note: Students are eligible to start taking courses in the HI ED program after successfully completing two semesters of law school work.

College-Specific Admission Requirements

DSL: A bachelor's or equivalent degree from an accredited college is a prerequisite for admission; however, there is no standard prescribed undergraduate curriculum. An applicant should have acquired significant oral and written communication skills before entering law school. The following are required of applicants: a completed application form for DSL; submission of the results of the law school admission test (LSAT); completion of an LSDAS report; a one-page personal statement; employment records since high school; and two letters of recommendation.

HI ED: The following are required of all applicants: a completed application form to HI ED; submission of the results of the Graduate Record Examination (GRE), Miller Analogy Test (MAT), or LSAT; an official undergraduate transcript or transcripts; a personal statement; employment records since high school; and four letters of recommendation.

All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the Test of English as a Second Language (TOEFL) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test or a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the new speaking portion; or the International English Language Testing System (IELTS) with a minimum composite score of 6.5 is required for admission.

Residency

Students will normally spend four semesters in residence at DSL and as many additional semesters in residence as needed to complete the additional requirements for the pertinent HI ED degree. Ph.D. candidates must arrange the sequence of semesters to ensure that they are in residence as full-time students in the HI ED program for at least two consecutive semesters (Fall-Spring or Spring-Fall) excluding summer in a single twelve-month period. D.Ed. candidates must take at least 90 credits, of which at least 30 credits must be earned at the University Park campus.

Liaisons

The department and faculty liaisons for DSL shall be the Associate Dean for Academic Affairs and the student advisor will be the Associate Dean for Academic Affairs or such other faculty member(s) as may be designated by the Dean. The liaison for HI ED shall be the Professor-in-Charge (PIC) or such faculty member(s) as may be designated by the PIC.

PRESCRIBED COURSES

DSL: All students in the J.D. program are required to take the first-year curriculum in DSL. In the second or third year, students must take CORE 934 (Professional Responsibility).

The fall curriculum for the first year consists of the following courses:

CORE COURSES (CORE)
900. Civil Procedure (4)
910. Criminal Law (3)
912. Legal Analysis, Research & Writing I (3)
925. Torts (4)

The spring curriculum of the first year consists of the following courses:

One 3-credit Elective

CORE COURSES (CORE)
903. Constitutional Law (3)
905. Contracts (4)
914. Legal Analysis, Research & Writing II (3)
920. Property (4)

HI ED: *All students pursing a Ph.D. must satisfy the following minimum requirements:*

Core Courses: 18 credits

HIGHER EDUCATION (HI ED)
548. Curriculums in Higher Education (2-3)
552. Administration in Higher Education (3)
556. Higher Education Students and Clientele (3)
562. Organizational Theory and Higher Education (3)

Research Requirements: 12 credits

Statistics through Multivariate Analysis:

AG 400(4) and R SOC 573(3) or STAT 500(3) and STAT 501(3)

HIGHER EDUCATION (HI ED)
585. Research Design
586. Qualitative Research Methods

Advanced Skills: 9 credits

Specialization in Higher Education: 12 credits

Cognate Minor: 15 credits (minimum)

PROPOSAL WRITING

HI ED 594 (Research Topics) (minimum of 3 credits; maximum of 9)

Ph.D. DISSERTATION (non-credit; for continuous registration after completion of coursework and Oral Comprehensive Exam)

HI ED 601 (full time) or HI ED 611 (part time)

All students pursuing a D.Ed. must satisfy the following minimum requirements:

Core Courses: 18 credits

HIGHER EDUCATION (HI ED)
548. Curriculums in Higher Education (2-3)
552. Administration in Higher Education (3)
556. Higher Education Students and Clientele (3)
562. Organizational Theory and Higher Education (3)

Research Requirements: 12 credits

Statistics through Multivariate Analysis:

AG 400(4) and R SOC 573(3) or STAT 500(3) and STAT 501(3)

HIGHER EDUCATION (HI ED)
585. Research Design (3)
586. Qualitative Research Methods (3)

Specialization in Higher Education: 12 credits

Minor or General Studies Grouping: 15 credits (minimum)

INTERNSHIP

HI ED 595 (9 credits optional based on previous experience in higher education administration)

VI. D.Ed. THESIS RESEARCH

HI ED 594 (Research Topics) (minimum of 3 credits; maximum of 9)

DISSERTATION (minimum of 15 credits)

HI ED 600 (thesis research) or HI ED 610 (Thesis Research Off-Campus)

Students pursuing the M.Ed. must satisfy the following requirements: (30 credits for degree)

- Higher Education Courses (15 credits minimum; HI ED 545 (Higher Education in the U.S.) is required).
- Research methods (3 credits)
- Minor field or General Studies Grouping (6 credits)
- Master's Paper (3 credits)
- HI ED 596 (Independent Study)

INTERPROGRAM TRANSFER OF CREDITS

DSL: A maximum of twelve credits for HI ED course work may be transferred for credit toward the J.D. degree at DSL. Students must obtain a grade satisfactory to DSL for the course work to be credited towards the J.D. degree. The following HI ED program may qualify for credit in DSL: (1) HI ED 545 (Higher Education in the United States); (2) HI ED 552 (Administration in Higher Education); (3) HI ED 560 (Legal Issues in Higher Education); (4)HI ED 546 (College Teaching) and (5) HI ED 587 (Education Policy and Politics).

HI ED: What courses may be credited will be determined by the student's degree program. Normally a maximum of twelve credits of DSL course work will be counted for credit for the minimum requirements for a master's degree, subject to approval by the student's advisory committee. Normally, a maximum of 30 credits from a master's degree program will be counted for credit for the minimum requirements for a Ph.D. or D.Ed. degree.

Sequence

The sequence of courses will be determined by the students and their advisors.

Recommended Program of Study and Advising

All students in the program will have two advisors, one from DSL and one from HI ED. Periodic interaction between the two advisors will be encouraged. A program of study will be developed for each student, taking into account the fact that some courses at both locations are offered on a rotating or intermittent basis. Many courses are offered every year but some are offered every two or three years. Advisors will have available a list of projected relevant courses or educational experiences in order to work with the student on an individualized program of study. The standard committee structure will apply to the HI ED programs.

Tuition

Students will be charged the applicable DSL tuition to cover the J.D. program and the applicable graduate tuition to cover the HI ED degree program. DSL tuition will be paid for the semesters in which the student is registered for DSL courses, and graduate tuition will be paid for the semesters in which the student is registered for graduate courses. A student may take up to one course (3 credit hours) per semester in the program where the student is not primarily registered without any change in tuition, but must pay additional tuition to the program that the student is not primarily registered if he or she wishes to take additional course work pursuant to that program during the semester.

Financial Aid and Assistantships

Decisions on financial aid and assistantships will be made by each school according to that school's procedures. Generally, assistantships and financial aid granted by HI ED will not apply to time spent at DSL.

Fulfillment of Degree Requirements and Graduation

All courses in one program that will count towards meeting the requirements of the other must be completed before the awarding of

either degree. Students will be required to fulfill all requirements for each degree in order to be awarded that degree, subject to the interprogram transfer of credits. With respect to HI ED program requirements for a thesis or paper, work done while at DSL under the supervision of a DSL faculty member may be appropriate for incorporation into the thesis or paper with the approval of the HI ED degree program committee (in such cases, the committee should consider whether the credits afforded such work will be subject to the twelve credit maximum for interprogram transfers). A DSL faculty member must be a member of the committee).

If for some reason the student cannot complete the requirements of the J.D., the student will still be allowed to count DSL courses already taken toward the pertinent HI ED degree, even if he or she is no longer in the joint degree program.

Course Descriptions

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Sophie C. M. deSchaepdrijver, Ph.D. (U Amsterdam) Associate Professor of History
William J. Duiker III, Ph.D., (Georgetown) Professor Emeritus of History and Liberal Arts, and East Asian Studies
Gerald G. Eggert, Ph.D. (Michigan) Professor Emeritus of American History
Greg Eghigian, Ph.D. (Chicago) Associate Professor of History
George M. Enteen Ph.D. (George Washington) Professor Emeritus of Russian History
Garett G. Fagen, Ph.D. (McMaster) Associate Professor of Classics and Ancient Mediterranean Studies and History
John B. Frantz, Ph.D. (Pennsylvania) Associate Professor Emeritus of American History
Cary Fraser, Ph.D. (U of Geneva) Associate Professor of African and African American Studies and History
Lori D. Ginzberg, Ph.D. (Yale) Associate Professor of History and Women's Studies
Arthur E. Goldschmidt, Jr., Ph.D. (Harvard) Professor Emeritus of Middle East History
Amy Greenberg, Ph.D. (Harvard) Associate Professor of History and Women's Studies
Baruch Halpern, Ph.D. (Harvard) Professor of Ancient History, Jewish Studies, and Classics and Ancient Mediterranean Studies
Paul B. Harvey, Ph.D. (Pennsylvania) Associate Professor of Classics and Ancient Mediterranean Studies, History, and Religious Studies
Claire Hirshfield, Ph.D. (Pennsylvania) Professor Emerita of European History
Benjamin T. Hudson, Ph.D. (Oxford) Associate Professor of History and Medieval Studies
Natalie K. Isser, Ph.D. (Pennsylvania) Professor Emerita of European Studies
Philip Jenkins, Ph.D. (Cambridge) Distinguished Professor of Religious Studies and History
Leah R. Johnson, Ph.D. (California, Berkeley) Assistant Professor of Classics and Ancient Mediterranean Studies, and History
Anthony E. Kaye, Ph.D. (Columbia) Assistant Professor of History
Isabel F. Knight, Ph.D. (Yale) Associate Professor Emerita of History
Joan B. Landes, Ph.D. (NYU) Professor of Women's Studies and History
Daniel L. Letwin, Ph.D. (Yale) Associate Professor of History
Kathleen L. Lodwick, Ph.D. (Arizona) Professor of Modern Chinese History
Robert J. Maddox, Ph.D. (Rutgers) Professor Emeritus of American History
David McBride, Ph.D. (Columbia) Professor of African/African American Studies and African American History
Sally A. McMurry, Ph.D. (Cornell) Professor of American History
Jennifer L. Mittlestadt, Ph.D. (Michigan) Assistant Professor of History and Women's Studies
Wilson J. Moses, Ph.D. (Brown) Professor of American History
Mark Munn, Ph.D. (Bryn Mawr) Associate Professor of History, and Classics and Ancient Mediterranean Studies
Mark E. Neely, Jr., Ph.D. (Yale) McCabe Greer Professor of the Era of the American Civil War
Sylvia Neely, Ph.D. (Notre Dame) Associate Professor of History
On-Cho Ng, Ph.D. (Hawaii, Manoa) Associate Professor of History
Susan M. O'Brien, Ph.D. (Wisconsin, Madison) Assistant Professor of History
William A. Pencak, Ph.D. (Columbia) Professor of American History
Carol Reardon, Ph.D. (Kentucky) Associate Professor of History
P. Peter Rebane, Ph.D. (Michigan State) Associate Professor of History
Matthew Restall, Ph.D. (California, Los Angeles) Professor of History
A.G. Roeber, Ph.D. (Brown) Professor of Early Modern History and Religious Studies
Adam Rome, Ph.D. (Kansas) Associate Professor of History
Anne Carver Rose, Ph.D. (Yale) Professor of History, Religious Studies, and Jewish Studies
Paul Lawrence Rose, Ph.D. (Sorbonne) Professor of European History and Mitrani Professor of Jewish Studies
Gonzalo Rubio, Ph.D. (Johns Hopkins) Assistant Professor of Classics and Ancient Mediterranean Studies, and History and Religious Studies
Janina Safran, Ph.D. (Harvard) Associate Professor of History
Dan P.Silverman, Ph.D. (Yale) Professor Emeritus of European History
Mrinalini Sinha, Ph.D. (SUNY, Stony Brook) Associate Professor of History and Women's Studies
Gregory Smits, Ph.D. (Southern California) Associate Professor of History
Robin Spencer, Ph.D. (Columbia) Assistant Professor of African and African American Studies, and History
Jackson J. Spielvogel, Ph.D. (Ohio State) Associate Professor Emeritus of History
James Ross Sweeney, Ph.D. (Cornell) Professor of Medieval History
Ben Vnson III, PH. D. (Columbia) Associate Professor of History
Catherine Wanner, Ph.D. (Columbia) Assistant Professor of History and Religious Studies
Christine A. White, Ph.D. (Cambridge) Associate Professor of History
Michael Wolfe, Ph.D. (Johns Hopkins) Associate Professor of History
Nan E. Woodruff, Ph.D. (Tennessee) Professor of History

Paul Tiyambe Zeleza, Ph.D. (Dalhousie U) Professor of African Studies and History

Graduate instruction at the master's degree level is offered in the following areas of history: the Ancient Mediterranean; Medieval, Early Modern, and Modern European, including Great Britain and Russia; the United States, including colonial American and African American history; the Middle East; East and South Asian; and Latin America. In addition, graduate instruction is offered in such comparative or topical areas as Military History, Women's History, History of Religion, Jewish History, and the History of Science.

Doctoral programs ordinarily are limited to American, Ancient, Medieval, Early Modern British and European, Modern European, and East Asian History; as well as comparative studies in the History of War and Society; Women's History; the History of Industry, Agriculture, and Society; the History of Science and Technology; and the History of Religion. Prospective doctoral candidates are invited to contact the graduate officer about the current availability of any of these or other areas before applying.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

Applicants to the doctoral program must hold or be near completion of the master's degree (or its equivalent); all others will be considered for admission to the master's program, even if it is their ultimate intention to pursue a doctoral degree at Penn State.

To be considered for admission, applicants must submit transcripts that show (1) substantial course work in history with a minimum grade-point average of 3.50 (on a 4.0 scale) in all undergraduate history courses, (2) a minimum junior/senior GPA in all courses of 3.30, (3) at least three semesters of college-level work in a foreign language (additional language training appropriate to the fields in which the applicant proposes to work may also be required for admission) and (4) where applicable, a minimum GPA of 3.50 for all graduate work previously undertaken. Each applicant must submit the scores of the Graduate Record Examination (GRE) taken within five years previous to the date of application; the general examination scores are mandatory, the history examination is optional. Students with scores of 650 or better in each of the verbal, quantitative, and analytic sections of the general examination will be given preference in admission. Applicants from abroad whose native language is not English must submit the scores of TOEFL to the Graduate School; admission to the history program normally requires a score of 600 or better.

The Department of History further requires all applicants to submit directly to the department a statement of intent outlining their proposed fields of study and career goals, as well as a sample of their written work (undergraduate history thesis, master's thesis, seminar paper or equivalent research paper) as evidence of their historical research and writing skills. Three letters of recommendation are required; it is strongly preferred that at least two of them be from historians.

Master's Degree Requirements

(1) Candidates for the M.A. degree must earn a minimum of 33 credits of graduate-level work, of which 18 credits will be in the student's major area and 6 credits each in two other areas, one of which may be in another discipline. Three credits in History 592 (Proseminar) in the student's major area of historical study, or in a related field if no Proseminar exists in the major area. (2) Reading proficiency in at least one foreign language must be demonstrated no later than the beginning of the second year of residence. (3) Students electing to write a master's thesis will take 6 credits of thesis research as part of the 18 credits in their major area, and will be given an oral examination on the thesis and topics related to the thesis. Students offering a master's paper in lieu of a thesis will be given an oral examination based on the master's paper and any of the student's course and seminar work in history related to the paper.

Doctoral Degree Requirements

History 592 (Proseminar in the major field or related field) is the only course required of all Ph.D. candidates. The remainder of a student's doctoral program, including foreign language requirements, will be determined by the doctoral committee. In order to be admitted to doctoral candidacy, students must submit a historiographical essay in the proposed research field and pass an oral examination (the candidacy examination) on the essay and on possible dissertation topics suggested by the essay. After completing all course work, doctoral candidates must pass written and oral examinations in the research field, a primary area of specialization, and two additional areas (one of which may be outside the discipline of history). Upon completion of the doctoral dissertation, the candidate must pass a final oral examination (the dissertation defense) to earn the degree.

Other Relevant Information

The department's graduate officer, who supervises the overall graduate program in history and maintains student records, will assign newly admitted graduated students to advisers on the basis of each student's expressed area of interest. Advisers provide assistance in planning courses of study, guidance in choosing thesis and dissertation topics, direction in conducting research, and career counseling. Students who serve as graduate assistants will be given a variety of experiences as they assist different professors, ranging from paper-grading and administering exams, to preparing and delivering occasional lectures, to conducting review or discussion sections for large lecture courses. Advanced doctoral students may hold lectureships while working on their dissertations; lecturers have complete instructional responsibility for one or two sections of an undergraduate course in their area of specialization.

Student Aid

In addition to the fellowships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the Graduate Bulletin, the following awards typically have been available to graduate students in this program:

JAMES HAMILTON HARTZELL AND LUCRETIA IRVINE BOYD HARTZELL HISTORY AWARD
A $200 to $300 award made annually to a graduate student in the Department of History whose field of interest is Pennsylvania history.

JAMES LANDING FELLOWSHIP ADN THE WARREN HASSLER FELLOWSHIP FOR STUDY IN THE CIVIL WAR
Each fellowship is available each year to doctoral candidates who are working on their dissertations. The award consists of a stipend that earns the successful candidate one semester of release time for research and writing. No tuition waiver if offered.

HILL FELLOWSHIPS FOR STUDY IN HISTORY
Awarded annually by the Department of History to doctoral candidates who are working on their dissertations. The amount of the award varies, but it generally supports one semester free of duties.

EDWIN ERLE SPARKS FELLOWSHIP IN THE HUMANITIES
One fellowship is available each year to doctoral candidates in the Department of History who are working on their dissertations.

MARK AND LUCY MACMILLAN STITZER AWARD
Awarded by the Department of History each year to support graduate student travel for the purpose of research. The number and value of

these awards depends on the quality of proposals received, the level of funding required by each meritorious project, and the funds available in the endowment. Preference is given to request for doctoral dissertation research.

THE E-TU ZEN SUN AWARD FOR OUTSTANDING TEACHING BY A GRADUATE ASSISTANT
One award is made each year to recognize excellence in teaching by a History graduate assistant in the conduct of discussion sections, review sessions, or lecture presentations. The value of the award varies depending on funds available, but it is normally about $500.

Dual-Title Graduate Degree in History and Asian Studies

Graduate students with research and educational interests in international education may apply to the History/Asian Studies Degree Program. The goal of the dual-title degree History and Asian Studies is to enable graduate students from History to acquire the knowledge and skills of their major area of specialization in History while at the same time gaining the perspective of Asian Studies.

In order to prepare graduate students for the competitive job market, this program provides them with a solid disciplinary foundation that will allow them to compete for the best jobs in their field. For such students the dual-title Ph.D. in Asian Studies will add value to their degree and their status as candidates. It will produce excellent historians who are experts in Asian Studies as well. The dual-title degree in History and Asian Studies will build curricular bridges beyond the student's major field so as to provide a unique training regime for the global scholar.

Additional details of the dual degree program are available in separate documentation and from the Asian Studies Program (see http://asian.la.psu.edu/graduate.shtml).

Admission Requirements

For admission to the dual-title Ph.D. degree under this program, a student must first apply and be admitted to the History graduate program. Once accepted into the History program, the student can apply to the Admissions Committee of the Asian Studies. The Asian Studies admissions committee reviews applications and recommends students for admission to the Asian Studies program to the Graduate School. There are no specific requirements for admissions into the dual-title program beyond the requirements of the Graduate School and History, though applicants interested in the program should make that known clearly on their applications and include remarks in their essays that explain their training, interests, and career goals in an area of Asian Studies.

Each applicant must submit the scores of the Graduate Record Examinations (GRE) taken within five years previous to the date of application; the general examination scores are mandatory, the history examination is optional. Students with scores of 650 or better in each of the verbal, quantitative, and analytic sections of the general examination will be given preference in admission.

General Graduate School requirements are stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Degree Requirements

To qualify for an Asian Studies degree, students must satisfy the requirements of the History program in which they are primarily enrolled. In addition, they must satisfy the requirements described below, as established by the Asian Studies committee. Within this framework, final course selection is determined by the student, their Asian Studies advisor, and their History program advisor.

Upon a student's acceptance by the Asian Studies Admissions Committee, the student will be assigned an Asian Studies academic advisor in consultation with the Asian Studies chair. As students develop specific scholarly interests, they may request that a different Asian Studies faculty member serve as their advisor. The student and advisor will discuss a program of study that is appropriate for the student's professional objectives and that is in accord with the policies of The Graduate School, the History department and the Asian Studies program.

Requirements for the History/Asian Studies Ph.D.

The doctoral degree in History and Asian Studies is awarded only to students who are admitted to the History doctoral program and admitted to the dual-title degree in Asian Studies. The minimum course requirements for the dual-title Ph.D. degree in History and Asian Studies are as follows:

- History 592 and History 593 (proseminars in historical methods and research)
  - For students entering with a B.A. degree, a two-year sequence of these courses is required, for a total of four courses
  - For students entering with an M.A. degree, a one-year sequence of these courses is required, for a total of two courses
- 15 credits of Asia-related coursework at the 400 or 500 level. At least 6 of these 15 credits will be from ASIA 501 and 502 (the required proseminar sequence in Asian Studies). As many as 6 may come from History, as approved by the student's doctoral advisor and the ASP Director of Graduate Studies. The remaining credits can be taken in ASIA or in any department other than History.

Particular courses may satisfy both the History requirements and those of the Asian Studies program. Final course selection is determined by the student in consultation with their dual-title program advisors and their major program advisors. Students who already hold a master's degree from another institution may petition to have equivalent course credits accepted.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:

Master of Professional Studies in Homeland Security

Graduate Faculty:

Agricultural Biosecurity
Walter R. McVey, Jr., M.S. (West Virginia University) Sr. Project Manager in VBSC
Catherine Cutter, Ph.D. (Clemson) Assoc. Professor of Food Science
Bhushan Jayarao, MPH, Ph.D. (Univ. of Vet Sci Budapest) Professor of Veterinary and Biomedical Sciences
Fred Gildow, Ph.D. (Cornell), Professor of Plant Pathology
Gretchen Kuldau, Ph.D. (California), Associate Professor of Plant Pathology

Computer and Network Security
Raj Acharya, Ph.D. (Minnesota/Mayo Grad School of Med), Professor
Piotr Berman, Ph.D. (M.I.T), Associate Professor
Guohong Cao Ph.D. (OSU) Professor
Trent Jaeger, Ph.D. (Michigan), Associate Professor
George Kesidis, Ph.D. (Berkeley), Professor of CSE & EE
Thomas La Porta, Ph.D. (Columbia), Distinguished Professor
Yanxi Liu, Ph.D. (Umass), Associate Professor
John Metzner. (NYU), Professor of CSE & EE
David Miller, Ph.D. (UCSB), Associate Professor of EE
Patrick McDaniel, Ph.D. (Michigan), Associate Professor
Sofya Raskhodnikova, Ph.D. (M.I.T.), Assistant Professor
Anand Sivasubramaniyam Ph.D. (Gatech), Professor
Adam Smith, Ph.D. (M.I.T.), Assistant Professor
Aylin Yener, Ph.D. (Rutgers), Associate Professor of EE
Sencun Zhu, Ph.D. (GMU), Assistant Professor of CSE & IST

Geospatial Intelligence
Todd Bacastow, Ph.D. (PSU), Professor of Practice for Geospatial Intelligence
Mark Corson, Ph.D. (PSU), Associate Professor of Geography
Peter Guth, Ph.D. (PSU), Visiting Professor of Geography
David Hall, Ph.D. (PSU), Associate Dean for Research and Graduate Programs, College of Information Sciences and Technology

Homeland Security (Base Program)
Thomas Arminio (United States Naval War College), Instructor
Jeremy Plant (Virginia), Professor of Public Administration and Public Policy
Peter Forster (Penn State), Instructor

Information Security and Forensics
Guoray Cai, Ph.D. (Pittsburgh) Associate Professor of IST, Geography and CSE
Chao-Hsien Chu, Ph.D. (Penn State) Professor of IST and Management Science
Dongwon Lee, Ph.D. (UCLA) Associate Professor of IST and CSE
Peng Liu, Ph.D. (George Mason) Associate Professor of IST and CSE
Prasenjit Mitra, Ph.D. (Stanford) Assistant Professor of IST and CSE
Irene Petrick, Ph.D. (Penn State) Professor of Practice in IST
Gerald M. Santoro, Ph.D. (Penn State) Assistant Professor of IST and CAS
Robin G. Qiu, Ph.D. (Penn State) Associate Professor of Information Science
Anna Squicciarini, Ph.D. (U. Milan, Italy) Assistant Professor of IST
Heng Xu, Ph.D. (National Singapore) Assistant Professor of IST
Sencun Zhu, Ph.D. (George Mason) Assistant Professor of CSE and IST

Public Health Preparedness
Robert A. Cherry, MD (Columbia), Associate Professor of Surgery
Kevin P. Furlong, PhD (Utah), Professor of Geosciences
Jim Holliman, MD (Washington), Professor of Emergency Medicine
Gretchen A. Kuldau, PhD (California), Assistant Professor of Plant Pathology
Eugene J. Lengerich VMD, MS (U of Penn), Associate Professor, Health Evaluation Sciences
Craig Meyers, PhD, (UCLA), Professor of Microbiology and Immunology
Roxanne Parrott PhD, Professor of Communication Arts and Sciences & Health Policy Admin
Zhengmin Qian MD, PhD (Rutgers), Assistant Professor of Health Evaluation Sciences

Program Description
The *i*MPS-HLS degree program is designed to prepare professionals and develop leaders for the field of homeland security by providing exceptional graduate education. The curriculum is delivered in a distance education format through the Penn State World Campus in order to accommodate the needs and careers of professionals who are already active in homeland security and public health, or those interested in transitioning into the field. The program provides enrollees with an integrated, cross-functional curriculum that is focused

on a set of unified educational goals in order to help them understand and manage the complexities of homeland security in a global environment. Students select from one of six disciplines of study: homeland security (base program); public health preparedness; geospatial intelligence; computer and network security; information security and forensics; and agricultural biosecurity. The participating academic units for this collaborative program are: Penn State Harrisburg, the College of Medicine, the College of the Liberal Arts, the College of Earth and Mineral Sciences, the College of Information Sciences and Technology, Penn State Great Valley School of Graduate Professional Studies, the College of Engineering, and the College of Agricultural Sciences.

General Admission Requirements

Educational Background:

An applicant must hold either (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution.

Core Application Packet

- Statement of Purpose
- Vita or Résumé
- Three letters of recommendation
- Two official transcripts from each institution attended
- Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) score, if applicable
- Application fee

Statement of Purpose and Curriculum Vitae

A statement of professional experience and goals (up to 500 words) and the candidate's Vita or Resume must accompany the application.

Letters of Recommendation

- The individuals writing letters should be familiar with you and comfortable discussing your professional and/or academic strengths and accomplishments.
- The Admissions Committee prefers that all letters be written within the last 6 months and reference the applicant's current career goals and/or ability to perform graduate level study.
- A person choosing to submit a letter of reference will do this through the online application process and either select our pre-formatted template or upload his/her own letter.

GPA Requirements

Your GPA is interpreted by the admissions committee in the context of a completed application. Some Options may require a minimum GPA.

GRE Requirements

The GRE may be required by some options.

TOEFL

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. Specific graduate programs may have more stringent requirements.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Other Considerations

Special backgrounds, abilities, and interests related to homeland security are desirable.

Course Enrollment before Formal Acceptance

- If a student wishes to enroll in a course (s) while he/she completes the application process, the student can do so by contacting Adult Learner Enrollment Services at 800-252-3592.
- Students who have completed an application and have already been accepted to the program will be given preference for course enrollment.
- All other students will be enrolled in courses on a first-come, first-served basis depending on availability.

Financial Aid

World Campus students who are enrolled in a degree program and meet all other federal student aid eligibility requirements may be eligible for federal aid programs. Students must complete the Free Application for Federal Student Aid (FAFSA) to be considered for student aid.

Degree Requirements:

The Master of Professional Studies in Homeland Security program requires a minimum of 33 credits, 24 of which must be earned at Penn State. Up to 10 graduate credits may be transferred in from an accredited institution (as is permissible by the Graduate School). At least 18 credits must be courses at the 500 level and above, of which 6 credits must be in 500-level courses. Students are expected to maintain a B (3.0) or better average in academic courses to be retained in the program. Each student will take a 9 credit *core curriculum* consisting of HLS/PDM 801, HLS 803/PHIL, and HLS/CRIM 805. Students will also take 12 credits of prescribed courses for the specialized option. There are 9 elective credits of elective that are chosen in consultation with the student's advisor. Students choose two courses from Elective Group A and one course from Elective Group B. Finally, each degree candidate must complete a capstone project on a topic related to homeland security and defense (IST 594 - Research Topics). Lists below are the courses required/suggested for the option:

Prescribed Courses

Homeland security refers to the unifying core for the vast global network of organizations and institutions that are involved in the efforts to secure society. Regardless of field of specialization, or chosen discipline for graduate study, all professionals in the program will participate in a Unifying Core Curriculum with the following educational goals and objectives:

1. Understand major policies and legislation that shapes homeland security in a globalized society.

- Become familiar with organizations that play a key role in the implementation of homeland security policies and administration, and recognize the interactions among them.
- Understand the way in which a person or group responds to a set of conditions so as to prevent and respond to incidents and catastrophic events when needed.
- Recognize the impact that catastrophic events, both natural and man-made, have on society and the domestic and global economy.
- Identify and assess potential threats, vulnerabilities, and consequences.
- Apply leadership skills and principles that are necessary for producing and acting on information of value within a collaborative setting.
- Communicate effectively in the context of particular institutional cultures.
- Use, conduct, and interpret research and data effectively in decision-making.
- Practice ethics and integrity as a foundation for analytical debate and conclusion.
- Develop an appreciation of the cultural, social, psychological, political, and legal aspects of terrorism and counterterrorism.

The Core Curriculum consists of the following three courses:

HLS/P ADM 801: Homeland Security Administration: Policies and Programs (3). Foundation for understanding homeland security history, the development of homeland security policies and organizations, and current management approaches.

HLS/PHIL 803: Ethics and Leadership (3). This course will examine the social, political, legal, and ethical issues that arise in the context of homeland security.

HLS/CRIM 805: Violence, Threats, Terror, and Insurgency (3) Provides an overview of the domestic and global issues related to homeland security.

Agricultural Biosecurity Option

Director: Gretchen Kuldau, Ph.D. (California), Associate Professor of Plant Pathology 0205 Buckout Laboratory, University Park; 814 863 7232; kuldau@psu.edu

Core Curriculum
HLS 801/P ADM: Homeland Security Administration: Policies and Programs (3)
HLS 803/PHIL: Ethics and Leadership (3)
HLS/CRIM 805: Violence, Threats, Terror, and Insurgency (3)

Prescribed Courses
AGBIO 520*: Agricultural Biosecurity: Protecting a Key Infrastructure (3)
AGBIO 801: Veterinary Infectious Disease Diagnostic and Surveillance Systems (3)
AGBIO 802: Plant Protection: Responding to Introductions of Threatening Pest and Pathogens (3)
AGBIO 521: Food Defense: Prevention Planning For Food Processors (3)

Elective Group A (Choose 2)
GEOSC 402Y: Natural Disasters (3)
MANGT 510: Project Management (3)
PHP/PSY 558: Disaster Psychology (3)
VB SC 444: Epidemiology of Infectious Disease (3)

Courses with an asterisk (*) found in other Options

Elective Group B (Choose 1)
IST 564: Crisis, Disaster, Risk Management (3)
PHP/CAS 553: Disaster Communication (3)
PL SC 439: Politics of Terrorism (3)

Capstone Experience
AGBIO 594: Research Topics

Computer and Network Security Option:

Director: Patrick McDaniel, Ph.D. (Michigan), Associate Professor of Computer Science & Engineering; 360A Information Sciences and Technology Building; 814-863-3599; pdm12@psu.edu

Core Curriculum
HLS/P ADM 801: Homeland Security Administration: Policies and Programs (3)
HLS/PHIL 803: Ethics and Leadership (3)
HLS/CRIM 805: Violence, Threats, Terror, and Insurgency (3)

Prescribed Courses
CSE 514: Computer Networks (3)
CSE 543*: Introduction to Computer and Network Security (3)
CSE 546: Cryptography (3)
E E 561: Information Theory (3)

Elective Group A (Choose 2)
CSE 511: Operating Systems (3)
CSE 544: Advanced Systems Security (3)
CSE 545: Advanced Network Security (3)
E E/CSE 588: Pattern Recognition & Data Mining (3)

Courses with an asterisk (*) found in other Options

Elective Group B (Choose 1)
IST 564: Crisis, Disaster, Risk Management (3)
PHP 553 / CAS 553: Disaster Communications (3)
PL SC 439: Politics of Terrorism (3)

Capstone Experience
CSE 594: Research Topics (3)

Geospatial Intelligence Option:

Director: Todd Bacastow, Ph.D. (PSU), Professor of Practice for Geospatial Intelligence; 2217 Earth & Engineering Sciences, University Park; 814-863-0049; bacastow@psu.edu

Core Curriculum
HLS/P ADM 801: Homeland Security Administration: Policies and Programs (3)
HLS/PHIL 803: Ethics and Leadership (3)
HLS/CRIM 805: Violence, Threats, Terror, and Insurgency (3)

Prescribed Courses
GEOG 882: Geographic Foundations of Geospatial Intelligence (3)
GEOG 883*: Remote Sensing for the Geospatial Intelligence Professional (3)
GEOG 884: Geographic Information Systems for the Geospatial Intelligence Professional (3)
GEOG 885: Advanced Analytic Methods for Geospatial Intelligence (3)

Elective Group A (Choose 2)
GEOSC 402Y: Natural Disasters (3)
IST 552: Data, Information, and Knowledge Management
IST 885: Introduction to Multi-sensor Data Infusion (3)

Courses with an asterisk (*) found in other Options

Elective Group B: (Choose 1)
IST 564: Crisis, Disaster, Risk Management (3)
PHP 553 / CAS 553: Disaster Communications (3)
PL SC 439: Politics of Terrorism (3)

Capstone Experience
GEOG 594: Research Topics

Homeland Security (Base Program):
Director: Dr. Jeremy F. Plant, Professor of Public Administration and Public Policy, School of Public Affairs, W160 Olmsted Building, Penn State Harrisburg; 717-948-6045; jfp2@psu.edu

Core Curriculum
HLS/P ADM 801: Homeland Security Administration: Policies and Programs (3)
HLS/PHIL 803: Ethics and Leadership (3)
HLS/CRIM 805: Violence, Threats, Terror, and Insurgency (3)

Prescribed Courses
P ADM 401: Foundations of Homeland Security (3)
P ADM 404: Homeland Security and Defense in Practice (3)
P ADM 802: Collaboration and Integration: Multifaceted Approaches to Homeland Security (3)
P ADM 803*: Strategic Planning and Organizational Imperatives in Homeland Security and Defense (3)

Elective Group A (Choose 2)
GEOSC 402: Natural Disasters (3)
PHP/CAS 553: Disaster Communication (3)
PHP/PSY 558: Disaster Psychology (3)
PL SC 439: Politics of Terror (3)

Courses with an asterisk (*) found in other Option

Elective Group B (Choose 1)
IST 564: Crisis, Disaster, Risk Management (3)
PHP/CAS 553: Disaster Communication (3)
PL SC 439: Politics of Terror (3)

Capstone Experience
P ADM 594: Research Topics (3)

Information Security and Forensics

Director: Chao-Hsien Chu, Ph.D. (Penn State) Professor of IST and Management Science; 301K Information Sciences and Technology Building, University Park; 814-865-4446; chc4@psu.edu

Core Curriculum
HLS 801/P ADM: Homeland Security Administration: Policies and Programs (3)
HLS 803/PHIL: Ethics and Leadership (3)

Horticulture (HORT)

Program Home Page (Opens New Window)

RICHARD P. MARINI, *Head of the Department*
102 Tyson Building
814-865-2571

Degrees Conferred:

Ph.D., M.S., M.Agr.

The Graduate Faculty

- Richard N. Arteca, Ph.D. (Washington State) Professor of Horticultural Physiology
- Rick Bates, Ph.D. (Virginia Tech) Assistant Professor of Ornamental Horticulture
- David J. Beattie, Ph.D. (Michigan State) Associate Professor of Ornamental Horticulture
- Robert D. Berghage, Ph.D. (Michigan State) Associate Professor of Horticulture
- Kathleen B. Brown (formerly Evensen), Ph.D. (Florida) Professor of Postharvest Physiology
- Richard Craig, Ph.D. (Penn State) Professor of Plant Breeding and J. Franklin Styer Professor of Horticultural Botany
- Robert M. Crassweller, Ph.D. (Ohio State) Professor of Tree Fruit
- David Decoteau, Ph.D. (UMass) Professor of Horticulture
- David M. Eissenstat, Ph.D. (Utah) Professor of Woody Plant Physiology
- Peter A. Ferretti, Ph.D. (Penn State) Professor of Vegetable Crops
- Majid R. Foolad, Ph.D. (California, Davis) Professor of Plant Genetics
- Mark J. Guiltinan, Ph.D. (California, Irvine) Professor of Plant Molecular Biology
- Charles W. Heuser, Ph.D. (Rutgers) Professor of Horticultural Physiology
- E. Jay Holcomb, Ph.D. (Penn State) Professor of Floriculture
- Kathleen Kelley, Ph.D. (Michigan State) Assistant Professor of Consumer Horticulture
- Roger T. Koide, Ph.D. (California, Berkeley) Professor of Horticultural Ecology
- Larry J. Kuhns, Ph.D. (Ohio State) Professor of Ornamental Horticulture
- William J. Lamont, Jr. Ph.D. (Cornell) Associate Professor of Vegetable Crops
- Jonathan P. Lynch, Ph.D. (California, Davis) Professor of Plant Nutrition
- Michael D. Orzolek, Ph.D. (Maryland) Professor of Vegetable Crops
- Elsa Sanchez, Ph.D. (Washington State) Assistant Professor of Horticultural Systems Management
- James C. Sellmer, Ph.D. (Wisconsin, Madison) Assistant Professor of Ornamental Horticulture
- Dan T. Stearns, M.S. (North Carolina State) Professor of Landscape Contracting
- Dennis J. Wolnick, Ph.D. (Penn State) Associate Professor of Floriculture

Students may specialize in crop production and marketing, integrated crop management, plant genetics and breeding, horticultural plant physiology, postharvest physiology, plant molecular biology and biotechnology, and horticultural ecology.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of the graduate program officer, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Prerequisites for admission vary according to the area of specialization, but basic courses in physical sciences, mathematics, biological sciences, communication skills, and social sciences and humanities are required. Students who lack prerequisite courses may be admitted but are required to make up deficiencies without degree credit.

Students with a 2.75 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students.

See hortweb.cas.psu.edu/academic/gradprog.html for the most current Admission requirements.

Master's Degree Requirements

All M.Agr. candidates must present one seminar (HORT 590) and an acceptable paper on a selected professional problem, or a report of internship training. Up to 3 graduate credits will be given for an acceptable paper. The candidate may be required to provide one or more copies of the paper for the University. All M.S. degree candidates must complete at least one graduate course in biometry, at least 2 credits of resident or extension education (HORT 596 or HORT 602), and two seminars (HORT 590). A thesis is required for the M.S. degree.

Doctoral Degree Requirements

The communication requirement for the Ph.D. degree may be satisfied by completing at least 6 graduate credits in an area of communications skills approved by the student's advisory committee.

All Ph.D. candidates must present at least three seminars (HORT 590) for credit and complete at least two graduate courses in statistics or statistical applications. Ph.D. students must take 2 credits of resident or extension education (HORT 596 or HORT 602).

The candidacy examination must be taken within six months after beginning residency.

Within one semester after passing the candidacy examination, the student's doctoral committee, with the thesis adviser in charge, will have the program planning meeting. The purposes of this meeting are to (1) determine the student's strengths and weaknesses in pertinent subject matter areas; (2) guide the student in developing a plan of study; and (3) review and discuss the proposed thesis research.

The comprehensive examination, composed of both written and oral parts, will be given when, in the student's and adviser's opinion, the

student is ready for the examination, and when the communication requirements and essentially all courses have been completed.

After the thesis is completed and all other requirements for the Ph.D. have been met, the dean of the Graduate School will schedule the final examination. Normally, three months must elapse between the comprehensive and the final examinations. A major part of the examination will be an oral defense of the thesis.

Student Aid

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the *Graduate Bulletin*. Students who wish to compete for fellowships should be sure that their application materials are complete by January 15 for entry the following fall semester.
The following award typically has been available to graduate students in this program:

WALTER THOMAS MEMORIAL SCHOLARSHIP

Available to students studying the nutrition of horticultural crops; stipend equivalent to a half-time assistantship. Apply through the Department of Horticulture.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Hotel, Restaurant, and Institutional Management (HRIM)

Program Home Page (Opens New Window)

ANNA MATTILA, *Professor in Charge*
224 Mateer Building
814-863-5757
klh3@psu.edu

Degree Conferred:

Ph.D., M.S.

The Graduate Faculty

- William P. Andrew, Ph.D. (Penn State) Associate Professor of Hotel, Restaurant, and Institutional Finance
- Albert Bartlett, Ph.D. (Penn State) Associate Professor of Hospitality Management
- Peter Bordi, Ph.D. (Penn State) Associate Professor of Hospitality Management
- Martha Conklin, Ph.D. (New York) Associate Professor of Hospitality Management
- David Cranage, Ph.D. (Penn State) Assistant Professor of Hospitality Management
- Robert D. Lee, Ph.D. (Syracuse) Professor Emeritus of Hospitality Management
- Anna Mattila, Ph.D. (Cornell) Associate Professor of Hospitality Management
- Daniel Mount, Ph.D. (U.S. International U) Associate Professor of Hospitality Management
- Karthik Namasivayan, Ph.D. (Cornell) Assistant Professor of Hospitality Management
- John O'Neill, Ph.D. (Rhode Island) Assistant Professor of Hospitality Management
- Sara J. Parks, R.D., M.B.A. (Michigan State) Professor Emerita of Hospitality Management
- Elwood L. Shafer, Ph.D. (SUNY, Syracuse) Professor Emeritus of Environmental Management and Tourism
- Arun Upneja, Ph.D. (U of Houston) Associate Professor of Hospitality Management
- Hubert B. Van Hoof, Ph.D. (Arizona State) Professor of Hospitality Management

The Hotel, Restaurant, and Institutional Management M.S. and Ph.D. degree programs are designed to prepare individuals for research and educational roles in the hospitality industry. The programs offer advanced graduate research training for students who desire to become educators, researchers, and knowledge-based professionals in the hospitality field. Student's individualized programs are designed to ensure they will have a mastery of the scope of knowledge covering the entire spectrum of hospitality management as well as the ability the complete significant research in a specific hospitality area.

Students in the program may elect the dual-title degree program in Operations Research for the Ph.D. and M.S. degrees. (See also Operations Research.)

Admission Requirements

Entry into the program requires a baccalaureate degree from a regionally accredited institution as well as a minimum of one to two years of work experience in the hospitality industry.

Scores for the Graduate Record Examinations (GRE), Graduate Management Aptitude Test (GMAT), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Grad Graduate Bulletin*

Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) will be considered for admission. Exceptions to this minimum average are sometimes made for students with special backgrounds, abilities, interests, and circumstances. Students are expected to have managerial competency in accounting, marketing, economics, human resource management, management information systems, and computer technology prior to entry into the program. Deficiencies in any of these areas must be made up in the first year that the student is enrolled (and will not be counted toward the program's 36-credit requirement).

Master's Degree (M.S.) Requirements

The master's degree program is designed to help students develop solid graduate-level research skills within a focused hospitality research area. Each student must complete a core of 12 credits of Methods Courses to include HRIM 503, STAT 500, and 6 credits of Methods Courses. In addition, students must take a minimum of 3 credits of HRIM 590 Colloquium. Students also complete a minimum of 15 credits of concentration area course work that is custom tailored to the student's hospitality research interests and academic and professional background.

A master's thesis is required of all students. The thesis is based on original empirical research. A master's committee of three persons who oversee the master's thesis is appointed for each candidate. This committee gives the final master's exam, which is an oral defense of the master's thesis.

Doctoral Degree Requirements

The doctoral program is an advanced graduate research program designed for students who want to become educators, researchers, and knowledge-based professionals in the hospitality field. Students' programs are individualized to ensure in addition to a mastery of the scope of knowledge in hospitality management they will also have the ability to complete significant research in a focused hospitality management area. In addition to satisfying the requirements of the Graduate School, a student must complete the following courses prior to scheduling the Ph.D. comprehensive examination: HRIM 585, HRIM 586, HRIM 590 (total of 3 credits), 12 credits of quantitative and statistical analysis, 18 credits in an HRIM concentration area, and 12 credits from an outside supporting area.

The language or communication requirement for the Ph.D. can be fulfilled by (1) demonstrating proficiency in an approved foreign language, or (2) demonstrating proficiency in computer programming, or (3) completing a minor. The demonstration of proficiency is determined by an HRIM faculty committee.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S. (A master's degree is offered only to persons interested in studying for a doctorate.)

The Graduate Faculty

- David M. Almeida, Ph.D. (Victoria) Associate Professor of Human Development and Family Studies
- Leann Birch, Ph.D. (Michigan) Distinguished Professor of Human Development and Family Studies
- Clancy Blair, Ph.D. (Alabama, Birmingham) Associate Professor of Human Development and Family Studies
- Alan Booth, Ph.D. (Nebraska, Lincoln) Distinguished Professor of Human Development, Sociology, and Demography
- Chalandra M. Bryant, Ph.D. (Texas, Austin) Associate Professor of Human Development and Family Studies
- Robert L. Burgess, Ph.D. (Washington, St. Louis) Professor of Human Development
- Linda M. Burton, Ph.D. (Southern California) Professor of Human Development and Sociology
- J. Douglas Coatsworth, Ph.D. (Minnesota) Assistant Professor of Human Development and Family Studies
- Linda Collins, Ph.D. (Southern California) Professor of Human Development and Family Studies
- Sherry Corneal, Ph.D. (Penn State) Associate Professor of Human Development and Family Studies
- Ann C. Crouter, Ph.D. (Cornell) Professor of Human Development and Family Studies
- Anthony R. D'Augelli, Ph.D. (Connecticut) Professor of Human Development
- Judith F. Dunn, Ph.D. (Cambridge) Adjunct Professor of Human Development and Family Studies
- Craig Edelbrock, Ph.D. (Oregon State) Professor of Human Development and Family Studies
- David J. Eggebeen, Ph.D. (North Carolina) Associate Professor of Human Development and Family Studies, and Sociology
- Donald H. Ford, Ph.D. (Penn State) Professor Emeritus of Human Development
- Paul A. Games. Ph.D. (Iowa) Professor Emeritus of Human Development
- Scott Gest, Ph.D. (Minnesota) Assistant Professor of Human Development and Family Studies
- Mark T. Greenberg, Ph.D. (Virginia) Professor of Human Development and Family Studies and Bennett Chair of Prevention Research
- Bernard G. Guerney, Jr., Ph.D. (Penn State) Professor Emeritus of Human Development and Counseling Psychology
- Louise F. Guerney, Ph.D. (Penn State) Professor Emerita of Human Development and Family Studies and Counseling Psychology
- Melissa A. Hardy, Ph.D. (Indiana) Distinguished Professor of Human Development and Family Studies, and Sociology; Director, Gerontology Center
- Scott M. Hofer, Ph.D. (Southern California, Los Angeles) Assistant Professor of Human Development and Family Studies
- Kathryn Hood, Ph.D. (Temple) Associate Professor of Human Development
- Rukmalie Jayakody, Ph.D. (Michigan) Associate Professor of Human Development and Family Studies, and Demography
- Eva S. Lefkowitz, Ph.D. (California, Los Angeles) Associate Professor of Human Development and Family Studies
- Eric Loken, Ph.D. (Harvard) Assistant Professor of Human Development and Family Studies
- Jennifer L. Maggs, Ph.D. (Victoria) Associate Professor of Human Development and Family Studies
- Susan M. McHale, Ph.D. (North Carolina) Professor of Human Development and Family Studies
- Gordon K. Nelson, Ph.D. (Wisconsin) Associate Professor of Human Development (Capital College)
- Judith L. Newman, Ph.D. (Temple) Associate Professor of Human Development (Abington College)
- Robert Plomin, Ph.D. (Texas) Adjunct Professor of Human Development and Family Studies
- Michael Rovine, Ph.D. (Penn State) Associate Professor of Human Development and Family Studies
- K. Warner Schaie, Ph.D. (Washington) Evan Pugh Professor of Human Development and Psychology
- Rainer Silbereisen, Ph.D. (Jena) Adjunct Professor of Human Development and Family Studies
- Edward Smith, Ph.D. (North Carolina) Senior Research Associate in the College of Health and Human Development
- Emilie Phillips Smith, Ph.D. (Michigan State) Associate Professor of Human Development and Family Studies
- Graham B. Spanier, Ph.D. (Northwestern) Professor of Human Development and Family Studies, Sociology, Demography, and Family and Community Medicine
- Cynthia A. Stifter, Ph.D. (Maryland) Professor of Human Development and Family Studies
- Dena Swanson, Ph.D. (Emory) Assistant Professor of Human Development and Family Studies
- Douglas M. Teti, Ph.D. (Vermont) Professor of Human Development
- Fred W. Vondracek, Ph.D. (Penn State) Professor of Human Development
- Sherry L. Willis, Ph.D. (Texas) Professor of Human Development
- Steven H. Zarit, Ph.D. (Chicago) Professor of Human Development

This interdisciplinary program is one of the graduate programs of the College of Health and Human Development. It is administered through the Department of Human Development and Family Studies. The Human Development and Family Studies graduate program is designed to educate students about research, theory, and methodology related to the study of individuals and families across diverse populations and diverse settings. There is a strong interest in the ways in which social institutions and settings such as day care facilities, schools, neighborhoods, and social policy institutions facilitate (or inhibit) opportunities for development and change for individuals and families. Understanding the characteristics and conditions that place individuals or families at risk for developing problems, designing effective prevention program to address those risks, and mounting rigorous evaluations of such programs is a growing emphasis in the program. All students, regardless of substantive area, are encouraged to develop strong skills in research methods, a hallmark of our graduate training. Through course work and apprenticeship experiences, students develop an understanding of the program's multidisciplinary life span/life course, and applied orientation. As student's progress through the program, they are expected to develop specialized expertise in two or more of the department's areas of concentration: individual development, family studies, intervention research, and research methods. Further specialization is possible in adult development and aging, biological bases of behavior, child and adolescent development, cognitive development and functioning, family relationships, integrative theories of human development, interpersonal relationships, and social-emotional development and change.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Entering students should have at least 6 credits in the biological and physical sciences; 12 in the social sciences and, depending upon proposed area of emphasis, basic courses in sociology, psychology, and economics; and 6 in developmental and family studies. Students not meeting these requirements may be admitted with limited deficiencies to be made up concurrently with their graduate work.

Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission for fall semester only. Early application is required, and a special application to HD FS must be completed; additional information can be obtained from the professor in charge of Graduate Recruitment and Interdisciplinary Training. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Degree Requirements

Entering students take three required 3-credit courses (Life Span Development, Family Studies, and Intervention Research), four required 3-credit methods courses in Research Methods and Statistics, and 2 credits of a professional development seminar during the first two years. Over time, course work becomes increasingly specialized and tailored to the student's individual interests. Yearly Plans of Study developed in consultation with the student's adviser specify course work and apprenticeship experience directed at the student's emerging scholarly and career interests. For the master's degree, in addition to the required courses, students take 9 credits in their substantive field and 6 credits of thesis research. For the doctorate, in addition to the required courses, students must take a total of 12 credits in their substantive field, 6 methodology elective credits, and 6 credits of thesis research.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Human Dimensions of Natural Resources and the Environment (HDNRE)

Co-Chairs, Department of Agricultural Economics and Rural Sociology and Department of Geography

Degrees Conferred:

Students electing the dual-title intercollege program in HDNRE through participating majors may earn a degree with dual-title at both the Ph.D. and M.S./M.A. levels, i.e., Ph.D. in (graduate program name) and Human Dimensions of Natural Resources and the Environment, or M.S./M.A. in (graduate program name) and Human Dimensions of Natural Resources and the Environment.

The following graduate programs offer dual-title degrees in HDNRE: M.A. and Ph.D. in Anthropology and HDNRE; M.S. and Ph.D. in Energy and Mineral Engineering and HDNRE; M.S. and Ph.D. in Forest Resources and HDNRE; M.S. and Ph.D. in Geography and HDNRE; M.S. and Ph.D. in Recreation, Park and Tourism Management and HDNRE; and M.S. and Ph.D. in Rural Sociology and HDNRE.

The Graduate Faculty

- Richard B. Alley, Ph.D. (Wisconsin, Madison) Evan Pugh Professor of Geosciences
- Theodore R. Alter, Ph.D. (Michigan State) Professor of Agricultural, Environmental, and Regional Economics
- John C. Becker, J.D. (Dickinson) Professor of Agricultural Economics and Law
- Stephen J. Beckerman, Ph.D. (New Mexico) Associate Professor of Anthropology
- André L. Boehman, Ph.D. (Stanford) Professor of Fuel Science
- Mallika Bose, Ph.D. (Wisconsin) Assistant Professor of Landscape Architecture
- Caru Bowns, Ph.D. (California, Davis) Assistant Professor of Landscape Architecture
- Kathy Brasier, Ph.D. (Wisconsin) Assistant Professor of Rural Sociology
- C. Andrew Cole, Ph.D. (Southern Illinois) Assistant Professor of Landscape Architecture and Ecology
- Robert G. Crane, Ph.D. (Colorado) Professor of Geography; Director, Alliance for Earth Sciences, Engineering, and Development in Africa
- Duane R. Diefenbach, Ph.D. (Georgia, Athens) Adjunct Assistant Professor; Leader—Wildlife, PaCFWRU
- Stuart Echols, Ph.D. (Virginia Tech) Assistant Professor of Landscape Architecture
- Semih Eser, Ph.D. (Penn State) Professor of Energy and Geo-Environmental Engineering
- Jill L. Findeis, Ph.D. (Washington State) Distinguished Professor of Agricultural Economics
- James C. Finley, Ph.D. (Penn State) Professor of Forest Resources
- Leland Glenna, Ph.D. (Missouri) Assistant Professor of Rural Sociology and Science Technology and Society
- Larry Gorenflo, Ph.D. (California, Santa Barbara) Associate Professor of Landscape Architecture
- Alan R. Graefe, Ph.D. (Texas A&M) Associate Professor of Leisure Studies
- Murali Haran, Ph.D. (Minnesota) Assistant Professor of Statistics
- Clare Hinrichs, Ph.D. (Cornell) Associate Professor of Rural Sociology
- Nina G. Jablonski, Ph.D. (Washington) Head and Professor of Anthropology
- Jason Kaye, Ph.D. (Colorado State) Assistant Professor of Soils and Biogeochemistry
- Klaus Keller, Ph.D. (Princeton) Associate Professor of Geosciences
- C. Gregory Knight, Ph.D. (Minnesota) Professor of Geography
- Neil P. Korostoff, M.L.A. (Pennsylvania) Associate Professor of Landscape Architecture
- A.E. Luloff, Ph.D. (Penn State) Professor of Rural Sociology
- James McCarthy, Ph.D. (California , Berkeley) Assistant Professor of Geography
- Robert McKinstry, J.D., M.F.S. (Yale) Adjunct Professor of Forest Resources
- Douglas Miller, Ph.D. (Penn State) Assistant Professor of Geography; Director for Outreach, Earth and Mineral Sciences Environment Institute
- Timothy Murtha, Ph.D. (Penn State) Assistant Professor of Landscape Architecture
- Wayne L. Myers, Ph.D. (Michigan) Professor of Forest Biometrics
- Lee A. Newsom, Ph.D. (Florida) Associate Professor of Anthropology
- Daniel F. Perkins, Ph.D. (Michigan State) Professor of Agricultural and Extension Education
- Charles Ray, Ph.D. (Texas A&M) Assistant Professor of Wood Products Operations
- Gary J. San Julian, Ph.D. (Colorado State) Professor of Wildlife Resources
- Michael C. Saunders, Ph.D. (Georgia) Professor of Entomology
- Kamini Singha, (Stanford) Assistant Professor of Geosciences
- Arthur Small, (California, Berkeley) Associate Professor of Meteorology
- Sanford Smith, Ph.D. (Penn State) Lecturer in Forest Resources
- Ken Tamminga, M.P.L. (Queen's) Associate Professor of Landscape Architecture
- Petra Tschakert, Ph.D. (Arizona) Assistant Professor of Geography
- Nancy Tuana, Ph.D. (California, Santa Barbara) DuPont/Class of '49 Professor of Philosophy, Humanities, and Women's Studies; Director, Rock Ethics Institute
- George Vahoviak, Ph.D. (Penn State) Affiliate Associate Professor of Recreation, Park, and Tourism Management; Program Director, Shaver's Creek Center
- Thorsten Wagener, Ph.D. (Imperial College) Assistant Professor of Civil Engineering
- James W. Wood, Ph.D. (Michigan) Professor of Anthropology and Demography
- Melissa Wright, Ph.D. (Johns Hopkins) Associate Professor of Geography and Women's Studies
- Brenton M. Yarnal, Ph.D. (Simon Fraser) Professor of Geography; Director, Center for Integrated Regional Assessment
- Karl S. Zimmerer, Ph.D., (California, Berkeley) Head and Professor of Geography
- Harry C. Zinn, Ph.D. (Colorado) Associate Professor of Recreation, Park, and Tourism Management

The HDNRE dual-title intercollege degree program is administered by the HDNRE Program Committee. The committee maintains program definition, identifies appropriate faculty and courses, and recommends policies and procedures for its operation. This dual-title intercollege degree program is offered through graduate major programs in four colleges: Agricultural Sciences, Earth and Mineral Sciences, Health and Human Development, and the Liberal Arts. HDNRE enables students to attain and be identified with the content, techniques, applications, methods, and policy implications of an interdisciplinary focus on Human Dimensions of Natural Resources and the Environment, while maintaining a close association with areas of application.

Through participation in HDNRE, student programs of study will emphasize integrated, multidisciplinary approaches designed for improving their understanding about and management of natural resources. Areas of study will reflect the faculty advisor's home department and disciplinary thrust. To pursue a dual-title intercollege degree under this program, the student must first apply and be admitted through one of the existing graduate programs that offers the dual-title degree in HDNRE (Anthropology; Energy and Mineral

Engineering; Forest Resources; Geography; Recreation, Park, and Tourism Management; or Rural Sociology).

Admission Requirements

HDNRE requirements include: (1) a minimum baccalaureate Jr/Sr grade point average of 3.0 out of a 4.0 scale; (2) a statement of professional goals, natural resource management philosophy, and reasons for applying to the program; and (3) three letters of reference from individuals capable of evaluating the applicant's potential for graduate work in interdisciplinary natural resource management. TOEFL scores are required of all students for whom English is a second language.

The language of instruction at Penn State is English. All international applicants whose first language is not English or who have not received a baccalaureate or master's degree from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based Test with a minimum of 20 points on the speaking portion; or the IELTS module with a minimum composite score of 6.5 is required for admission.

Degree Requirements

To qualify for a dual-title intercollege degree, students must satisfy the requirements of the major program in which they are enrolled, including the communication/foreign language requirements, if any. In addition, they must satisfy the minimum requirements in the HDNRE dual-title intercollege program described here. Final course selection is determined by the student and her/his respective graduate committee. All dual-title intercollege degree candidates must enroll in HDNRE 590 in each of their first two semesters.

M.S./M.A. Degree: A candidate for the dual-title intercollege M.S./M.A. in HDNRE must complete 17 credit hours of HDNRE coursework beyond the bachelor's degree in addition to curricular requirements for the masters degree in the student's primary program. The HDNRE requirement includes four common courses in the HDNRE curriculum – i.e., HDNRE 590 Colloquium (two credits), HDNRE 574 Integrated Perspectives in Human Dimensions of Natural Resources and the Environment, HDNRE 575 Ethical Issues in Human Dimensions of Natural Resources and the Environment, and RSOC 555 Human Dimensions of Natural Resources. In addition, each HDNRE student will take either ANTH 559 Behavioral Ecology (to be changed to Human Ecology – name change proposal at Department) or FOR 565 GIS-Based Socio-Ecological Landscape Analysis, and one additional course selected in consultation with the student's graduate committee. The HDNRE Colloquium must be taken in each of the first two semesters of enrollment in the dual-title intercollege degree program. In addition, 6 semester credit hours of Thesis Research (in the student's home graduate degree program) are required if the candidate is writing a thesis. Particular courses may satisfy both the graduate major program requirements and those of the HDNRE dual-title intercollege program. All courses must be approved by the student's M.S./M.A. committee.

The thesis supervisor and chair of the student's graduate committee shall be a member of the student's major program, and a member of the dual-title program. All members of the committee must hold Graduate Faculty status or secure the same before serving on the committee.

The culminating experience (e.g., thesis, scholarly paper, project) must incorporate an HDNRE interest together with the primary field of study. All students are also required to successfully complete an oral defense of the M.S./M.A. project completed as part of the master's requirements if required by the participating program.

Ph.D. Degree: A candidate for the dual-title intercollege HDNRE Ph.D. must complete, in addition to curricular requirements for the doctoral degree in the student's primary program, a minimum of 18 credit hours of HDNRE coursework. This includes the required courses for the HDNRE M.S./M.A. program. The HDNRE Colloquium must be taken each of the first two semesters of enrollment in the dual-title intercollege degree program, and once more prior to graduation. In addition, 9 semester credit hours of Thesis Research (either in the home department or in HDNRE) are required. Particular courses may satisfy both the graduate major program requirements and those of the HDNRE program. If an HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary course work must be selected, with the approval of the student's doctoral committee. As well, a continuing doctoral candidate must take 3 credits of HDNRE 590 (each student must enroll the first two semesters and then once more prior to graduation).

All Ph.D. students will be required to complete, present, and defend a dissertation that incorporates a topic related to HDNRE, in addition to the participating program.

All participating primary programs (Anthropology; Energy and Mineral Engineering; Forest Resources; Geography; Recreation, Park, and Tourism Management; and Rural Sociology) have agreed to incorporate the dual-title program within the student's dissertation work.

Student Aid

Forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin.*

Primary Programs of Study

All students (M.S./M.A. and Ph.D.) in the dual-title intercollege graduate degree program in HDNRE are expected to complete the common series of courses (HNDRE 590 – 2 credit minimum for masters students and 3 credit minimum for doctoral students, HDNRE 574, HDNRE 575, and RSOC 555). As well, each student is required to take either ANTH 559 or FORS 565 and one additional course selected in consultation with the student's graduate committee. All students must complete the required course of study in their primary program. Further, all HDNRE Ph.D. students will be encouraged to assist in teaching at least one course as part of their training and education in the dual-title intercollege graduate degree program.

Rural Sociology

M.S.

- M.S. – minimum of 30 credits (400, 500, 600 level) plus thesis
- Research Methods (AGEC 525 or its equivalent)
- Statistics – two semester sequence (AG 400 or RSOC 573 or their equivalent)
- Two or more of the following courses for Rural Sociology (RSOC 444, 452, 501, 502, 508, or 516)
- 6 semester credit hours of Thesis Research
- A final oral defense of thesis

- M.S. – 17 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course).
- 6 semester credit hours of Thesis Research if a thesis is required.

Ph.D.

- Ph.D. – no specified minimum credit requirements plus dissertation
- RSOC 502
- Either RSOC 516 or 517
- Two of the following (includes untaken course from above; RSOC 501, 508, 525, 530, 552, 555, 597A-E)
- Research Methods (AGEC 525 or its equivalent)
- Statistics – two semester sequence (AG 400 or RSOC 573 or their equivalent)
- 9 semester credit hours of Thesis Research
- Comprehensive examinations in four areas (Rural Sociology; Methods/Statistics; two additional areas. These areas of concentration are developed in consultation with major professor and others. One of these areas must be HDNR.)
- A final oral defense of dissertation

- Ph.D. – 18 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course). If a HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary courses must be selected with the approval of the student's doctoral committee.
- 9 semester credit hours of Thesis Research

Forest Resources

M.S.

- M.S. – minimum of 30 credits (400, 500, 600 level) plus thesis
- 12 credits in 400 and 500 level courses appropriate to field of interest
- 6 credits of graduate level statistics
- 2 graduate seminar colloquium credits
- At least 6 and no more than 15 credits of Thesis Research
- At least 18 credits total must consist of 500- or 600-level course series, and only 6 thesis research credits (600) are applicable
- A final oral examination

- M.S. – 17 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course).
- 6 semester credit hours of Thesis Research if a thesis is required.

Ph.D.

- Ph.D. – no specified minimum credit requirements plus dissertation
- Candidacy Examination
- 2 credits of 590
- 1 credit FOR 602 credit (Supervised Experience in College Teaching)
- Satisfy Language or Culture requirement
- Comprehensive Examination
- A final oral defense of dissertation

- Ph.D. – 18 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course). If a HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary courses must be selected with the approval of the student's doctoral committee.
- 9 semester credit hours of Thesis Research

Energy and Mineral Engineering

M.S.

- M.S. – minimum of 30 credits (24 course credits + 6 credits of Thesis Research)
- 15 credits representing physical (EGEE 500 – 3 credits) and chemical (EGEE 510 -3 credits) interactions, quantitative skills (EGEE 520 -3 credits), integrative design experience (EGEE 580 – 5 credits), or equivalent substitution in these main programmatic areas, and Colloquium (EGEE 590- 1 credit)
- A final oral defense of thesis

- M.S. – 17 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course).
- 6 semester credit hours of Thesis Research if a thesis is required.

- Ph.D. – minimum of 15 credits of 500-level courses plus dissertation
- Candidacy examination
- Comprehensive examination
- A final oral defense of dissertation

- Ph.D. – 18 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course). If a HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary courses must be selected with the approval of the student's doctoral committee.
- 9 semester credit hours of Thesis Research

Recreation, Park, and Tourism Management

M.S.

- M.S. – minimum of 36 credits including thesis
- 9 credits RPTM core courses (RPTM 501, 527, 545)
- Research Methods (RPTM 530)
- Statistics – one statistics course at 400 or 500 level
- 5 credits of RPTM electives
- 6 semester credit hours of thesis research
- A final oral defense of thesis

- M.S. – 17 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course).

- 6 semester credit hours of Thesis Research if a thesis is required.

- Ph.D. – no specified minimum number of credits plus dissertation
- 12 credits RPTM core courses (RPTM 501, 527, 545, 597)
- Research Methods (RPTM 533 plus a qualitative methods course)
- Candidacy and comprehensive examination
- Statistics – three statistics courses beyond master's coursework
- 6 credits of RPTM electives
- Dissertation research (no specified minimum of credit hours)
- A final oral defense of dissertation

- Ph.D. – 18 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course). If a HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary courses must be selected with the approval of the student's doctoral committee.
- 9 semester credit hours of Thesis Research

Anthropology

M.A.

- M.A. – minimum of 30 credits (24 course credits + 6 credits of Thesis Research)
- 12 credits in Anthropology (including ANTH 408 and ANTH 456)
- 6 credits of graduate level statistics
- At least 6, but no more than 15 credits of Thesis Research
- At least 18 credits total must consist of 500- or 600- level course series, and only 6 thesis research credits (600) are applicable
- A final oral examination

- M.A. – 17 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course).
- 6 semester credit hours of Thesis Research if a thesis is required.

Ph.D.

- Ph.D. – The M.A. requirements as noted above (or equivalent)
- 18 additional graduate level credits
- Satisfy foreign language requirement
- Comprehensive Examination
- A final oral defense of dissertation

- Ph.D. – 18 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course). If a HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary courses must be selected with the approval of the student's doctoral committee.
- 9 semester credit hours of Thesis Research

Geography

M.S.

- M.S. –Thesis option or two-paper option: thesis option minimum of 30 credits, plus thesis; paper option minimum of 35 credits, plus two papers, one of which must be associated with a seminar. Geography 500 and 502, 3 credits of 501, 2 credits of 590, and a minimum of 3 other 500-level seminar credits from the Department required. Proposal defense required of both options;
- Illustrated Paper presentation required at end of 2 nd year.

- M.S. – 17 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course).
- 6 semester credit hours of Thesis Research if a thesis is required.

Ph.D.

- Ph.D. – Geography 500 and 502, 2 credits of 590; no other course or credit requirements, plus dissertation
- Proposal defense a minimum of two weeks before comprehensive exam; final oral defense of dissertation.

- Ph.D. – 18 credits in HDNRE program (HDNRE 590, HDNRE 574, HDNRE 575, RSOC 555; either ANTH 559 or FORS 565; plus one course). If a HDNRE M.S./M.A. student continues into the HDNRE Ph.D. program, 15 credits of interdisciplinary courses must be selected with the approval of the student's doctoral committee.
- 9 semester credit hours of Thesis Research

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

HUMAN DIMENSIONS OF NATURAL RESOURCES AND THE ENVIRONMENT (HDNRE) course list

Last Revised by the Department: Fall Semester 2008

Review Date: 6/17/08

Human Resources and Employment Relations (HRER)

Program Home Page (Opens New Window)

PAUL F. CLARK, *Head*
133 Willard Building
814-865-5425

Degree Conferred:

- M.S. in Human Resources and Employment Relations
- Master of Professional Studies in Human Resources and Employment Relations (MPS HRER)
- Integrated B.S. in Labor and Employment Relations and M.S. in Human Resources and Employment Relations (LRHRER)
- Integrated B.S. in Spanish and M.S. in Human Resources and Employment Relations (SPHRER)

The Graduate Faculty

- Mark S. Anner, Ph.D. (Cornell) Assistant Professor of Labor Studies and Employment Relations, and Political Science
- Forrest S. Briscoe, Ph.D. (MIT) Assistant Professor of Labor Studies and Employment Relations, and Sociology
- Paul F. Clark, Ph.D. (Pittsburgh) Professor of Labor Studies and Employment Relations
- Alex Colvin, Ph.D. (Cornell) Assistant Professor of Labor Studies and Employment Relations
- Alan Derickson, Ph.D. (California, San Francisco) Professor of Labor Studies and Employment Relations, and History
- Robert Drago, Ph.D. (Massachusetts, Amherst) Professor of Labor Studies and Employment Relations, and Women's Studies
- Ronald L. Filippelli, Ph.D. (Penn State) Professor of Labor Studies and Employment Relations
- Dennis Gouran, Ph.D. (Iowa) Professor of Speech Communication and Labor Studies and Employment Relations
- Sumita Raghuram, Ph.D. (Minnesota) Associate Professor of Labor Studies and Employment Relations
- Jackie Krasas Rogers, Ph.D. (USC) Associate Professor of Labor Studies and Employment Relations, Sociology, and Women's Studies
- James B. Stewart, Ph.D. (Notre Dame) Professor of Labor Studies and Employment Relations
- Mark Wardell, Ph.D. (Missouri) Associate Professor of Labor Studies and Employment Relations

The master of science degree in Human Resources and Employment Relations (HRER) is a two-year program designed for students anticipating careers in some aspect of labor and human resources or labor-management relations. The program has the following objectives:

- provide students with an understanding of the roles employers, employees, employee organizations, and public policy makers play in the employment relationship;
- familiarize students with the complex personal and organizational issues inherent in the employment relationship;
- prepare students to systematically analyze complex issues and evaluate research results in the process of administering labor and human resource systems;
- prepare students for advanced graduate or professional training beyond the master's degree;
- prepare students for employment as practitioners in the field.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) or the Graduate Management Admission Test (GMAT) are required. Applicants with a 3.00 junior/senior grade-point average (on a 4.00 scale) will be considered for admission. Applicants must have three letters of recommendation sent from people who can assess adequately their likelihood of completing the graduate program.

Students are expected to have completed successfully an undergraduate statistics course plus a minimum of 12 undergraduate credits in the social sciences as part of their baccalaureate degree.

Degree Requirements

THESIS OPTION:

The HRER thesis option is intended for students anticipating additional graduate education beyond the master's degree. It requires 36 credits, including a minimum of 30 at the 400 and 500 level, and a minimum of 6 600-level thesis credits. For the degree, an overall 3.00 (B) grade-point average must be earned in the 400- and 500-level work and a grade of B or above must be earned in all 500-level courses. At least 6 credits must emphasize a particular aspect of employment relations. A student's thesis should reflect the chose emphasis.

RESEARCH PAPER OPTION:

The HRER research paper option is intended for students expecting to enter the labor market upon completion of the master's degree. It requires a minimum of 37 credits at the 400 and 500 level. For the degree, and overall 3.00 (B) grade-point average must be earned in the 400- and 500-level work and a grade of B or above must be earned in all 500-level courses. At least 6 credits must emphasize a particular aspect of employment relations. A student's research paper should reflect the chosen emphasis.

Student Aid

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Course Requirements

Core Courses (22 credits)

HRER 501, HRER 502, HRER 504, HRER 505, HRER 512, HRER 513, HRER 516
Required course are offered once per academic year and elective courses at least once every two academic years.

Emphasis Courses (6 credits)

An emphasis is an area of study related to a particular aspect or domain of industrial relations and human resources. Students select an emphasis in consultation with their master's advisory committee.

Elective Courses (3-9 credits)

With the faculty adviser's approval, a student selects at least 3 or more elective credits, depending on the chosen option. Examples of suitable elective courses are: HRER 500, HRER 535, HRER 536, HRER 594, HRER 595, HRER 596, HRER 597, HRER 599; LER 411, LER 401, LER 444, LER 458Y; ECON 412, ECON 436W, ECON 571; EDLDR 565, EDLDR 574; HIST (LER) 555; MGMT 321, MGMT 523, MGMT 548; PSYCH 484, PSYCH 485, PSY 522; SOC 455, SOC 456, SOC 555.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

HUMAN RESOURCES AND EMPLOYMENT RELATIONS (HRER) course list

Master of Professional Studies in Human Resources and Employment Relations (MPS HRER)

PAUL F. CLARK, *Professor in charge*

The MPS in Human Resources and Employment Relations (HRER) is a 33 credit program of study for professionals working in human resources/employment relations or considering a career in some aspect of human resources and employment relations. The program will prepare students to:

- understand the roles that employers, employees, employee organizations and unions, and public policy makers play in the employment relationship;
- analyze the complex personal, legal, and organizational issues inherent in the employment relationship;
- understand the ethical dimensions of human resource and employment relations;
- analyze complex issues and evaluate research results in the process of administering labor and human resource systems;

Courses include the study of employment law, labor and employment relations, human resources, workplace organization, labor markets, ethics, and the employment relationship, recruiting/selection, compensation and benefits, workforce development, and diversity in the workplace.

The program will highlight the changing nature of the HRER field, including the impact of the globalization of private and public organizations and the growing importance of diversity in the workforce. It will culminate in a capstone class in which students will demonstrate their understanding of the curriculum and apply it to their professional areas of interest. Upon completion of the MPS HRER, students will be equipped to work as professionals in human resource management, employment relations, and general management with private employers, unions, government agencies, and non-profit organizations.

Students pursuing the MPS in HRER would be required to complete a concentration designed to provide the student an opportunity to develop expertise in a specific area of human resources and employment relations. The focused coursework should make the degree more relevant to potential students and add value to the degree from the student's perspective.

Students will choose and complete one concentration which will include six credits beyond the 27 required credits. Double counting six required credits, including the Research Project, the concentration would be 12 credits of coursework in a particular area of HRER. Students will be required to complete the capstone project in their area of concentration. (For example, students choosing the Benefits and Compensation concentration would be required to complete a capstone project that focused on some aspect of benefits and compensation).

Degree Requirements

PRESCRIBED COURSES: 27 credits

HUMAN RESOURCES AND EMPLOYMENT RELATIONS (HRER)
501. Labor and Employment Law (3)

504. Seminar in Industrial Relations (3)
505. Seminar in Human Resources (3)
800. International Context of HRER (3)
802. Organizations in the Workplace (3)
816. Labor Market Analysis (3)
836. Diversity in the Workplace (3)
894. Research Project (3)

PHILOSOPHY (PHIL)
503. Ethics Seminar (3)

ELECTIVE COURSES: 6 credits
Select 6 credits in area of concentration.

LABOR AND EMPLOYMENT RELATIONS (LER)
401. Law of Labor-Management Relations (3)
424. Employment Compensation (3)
425. Employment Benefits (3)
426. Staffing and Training
435. Labor Relations in the Public Sector (3)
445Y. Politics of Affirmative Action (3)

WORKFORCE EDUCATION AND DEVELOPMENT (WF ED)
471. Training in Industry and Business (3)
573. Needs Assessment for Industrial Trainers (3)

AREAS OF CONCENTRATION (student must complete one)

--Benefits and Compensation

HRER 505 Seminar in Human Resources (3)
HRER 894 Research Project (3)
LER 424 Employment Compensation (3)
LER 425 Employment Benefits (3)

--Employment and Labor Law

HRER 501 Labor and Employment Law (3)
HRER 894 Research Project (3)
LER 401 Law of Labor-Management Relations (3)
LER 445 Y The Politics of Affirmative Action (3)

--Labor and Collective Bargaining

HRER 504 Seminar in Industrial Relations (3)
HRER 894 Research Project (3)
LER 401 Law of Labor-Management Relations (3)
LER 435 Labor Relations in the Public Sector (3)

--Staffing, Training, and Development

HRER 505 Seminar in Human Resources (3)
HRER 894 Research Project (3)
LER 426 Staffing and Training (3) or WF ED 471 Training in Industry and Business (3)
WF ED 573 Needs Assessment for Industrial Trainers (3)

3. Admission Requirements

In order to enter the MPS in HRER, applicants must have a baccalaureate degree from an accredited college or university with a GPA of 3.0. or above. Students who do not have a GPA of 3.0 will be considered on a case-by-case basis depending on the quality of their overall application. Applicants who are still completing their baccalaureate requirements at the time of application may be admitted to the Graduate School conditional on the awarding of the baccalaureate degree. Students are also expected to have a minimum of two years of full-time work experience prior to admission.

Admissions decisions for the program are based on the quality of the applicant's credentials. The decisions are based on a review of the complete application portfolio. During the admission process, students who are better suited for another graduate level program will be encouraged to apply to the appropriate program. Applicants to the MPS HRER should submit the following materials:

- Penn State graduate degree application form and application fee;
- World Campus program application;
- A 2-3 page essay articulating career and educational goals that demonstrates the applicant's written communication skills. Documentation of a minimum of two years of full-time work and a resume should be attached as a supplement;
- Three letters of recommendation that attest to the applicant's readiness for graduate study and document the requisite minimum of two years of work experience;
- Official transcript(s) of all institutions attended;

TOEFL score, if applicable. A TOEFL score of 580 on the paper test, a score of 237 on the computer-based test, or **80** points on the new Internet-based test with a minimum of 23 points on the new speaking portion is required for admission.

A minimum composite score of 6.5 on the IELTS test is required for admission.

Graduate Record Examination (GRE) scores are not required.

4. Recommended Sequence of Courses

Most adult students will participate in the online program on a part-time basis because of full-time professional responsibilities. The typical student course load is expected to be one course or two courses each semester (fall, spring, and possibly summer). Below, we illustrate one course per semester program. The sequence of courses may change and additional courses may be scheduled per semester depending on enrollment and demand. Course development will focus on one area of concentration creating one path through the degree. Additional courses for other areas of concentration will be added as enrollments increase to support a broader curriculum.

Year one: 9 Credits

HRER 501(3): Labor and Employment Law (fall)
HRER 504(3): Seminar in Industrial Relations (spring)
HRER 505(3): Seminar in Human Resources (summer)

Year two: 9 Credits

HRER 800(3): International Context of HRER (fall)
HRER 802(3): Organizations in the Workplace (spring)
HRER 836(3): Diversity in the Workplace (summer)

Year three: 9 credits

HRER 816(3): Labor Market Analysis (fall)
PHIL 503(3): Ethics Seminar (spring)
Electives (3): (summer)

Electives for concentration

Year four: 6 credits

Electives (3): Fall/Spring)

HRER 894 Research Project (Can be offered fall, spring, and summer depending on demand.)

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Integrated B.S. in Labor and Employment Relations and M.S. in Human Resources and Employment Relations (LRHRER)

PROFESSOR PAUL F. CLARK, *Head*

The integrated LER B.S. and HRER M.S. is a five-year program designed for academically talented baccalaureate students to obtain both the B.S. and the M.S. degrees in LER and HRER with five years of study. Students will develop expertise in the human resources and labor relations fields beyond the B.S. degree. The undergraduate curriculum educates students about (1) the roles of employers, employees, employee organizations and public policy makers play in the employment relationship, (2) the complex personal and organizational issues inherent in the employment relationship (3) and how to systematically analyze those complex issues and evaluate research relevant to those analyses. The graduate curriculum provides for more individualized, focused learning in a concentrated sub-area of the HRER field. The program culminates with an M.S. research paper. Upon completion of the integrated degree, students will enter the workforce with advanced knowledge and expertise gained from conducting and analyzing empirical work and participating in seminar-style classes.

Bachelor of Science

Scheduling Recommendation by Semester Standing given like (Sem: 1-2)

GENERAL EDUCATION: 45 credits
(10 of these 45 credits are included in the REQUIREMENTS FOR THE MAJOR)

FIRST-YEAR SEMINAR:
(Included in ELECTIVES or GENERAL EDUCATION course selection)

UNITED STATES CULTURES AND INTERNATIONAL CULTURES:
(Included in ELECTIVES or GENERAL EDUCATION course selection)

WRITING ACROSS THE CURRICULUM:
(Included in REQUIREMENTS FOR THE MAJOR)

ELECTIVES: 18 credits

REQUIREMENTS FOR THE MAJOR: 98-99 credits
[12 credits may be double counted, 6 must be at the 500 level]

B.S. REQUIREMENTS: 62-63 credits
(This includes 10 credits of General Education courses)

COMMON REQUIREMENTS FOR THE MAJOR (ALL OPTIONS): 36-37 credits

PRESCRIBED COURSES: (16 credits)
(Some courses in this category have prerequisites that are not included in the major)
LER 100 GS(3), LER 312(4) (Sem: 3-8)
ECON 002 GS(3), ECON 315 GS(3), PSYCH 281 GS(3) (Sem: 1-8)

ADDITIONAL COURSES: (13 credits)
(Some courses in this category have prerequisites that are not included in the major)
LER 201 GS(3) or LER 401(3) (Sem: 3-8)
SCM 200(4) or STAT 200 GQ(4) (Sem: 3-8)
LER 136 US(3) or WMNST 136 US(3) or LER 400 IL(3) (Sem: 5-8)
LER 458Y US(3) or HIST 458Y US(3) or LER 414W(3) (Sem: 5-8)

SUPPORTING COURSES AND RELATED AREAS: (33-34 credits)

(LER courses that are used in the Additional Courses category may not be double counted to satisfy this requirement. Some courses in this category have prerequisites that are not included in the major.)

Select 15-21 credits from appropriate LER courses, at least 9 must be at the 400 level (only 3 credits of LER 495 or 3 credits of LER 496 may be used to satisfy this requirement) (Sem: 5-8)

Select 12-19 credits from the department list in consultation with an adviser, at least 6 credits must be at the 400 level, 3 each from 3 categories:

1. ECON 342 GS(3), ECON 370 GS(3), ECON 412(3), ECON 436W(3), ECON 445(3) (Sem: 5-8)
2. MGMT 100(3), MGMT 321(3), MGMT 331(3), MGMT 341(3), MGMT 424(3) (Sem: 3-8)
3. PL SC 451(3), PL SC 471(3), PL SC 473(3), PL SC 474(3) (Sem: 5-8)
4. PSYCH 482(3), PSYCH 484(3), PSYCH 485(3) (Sem: 5-8)
5. SOC 119 GS;US(4), SOC 409 US(3), SOC 444(3), SOC 455(3), SOC 456(3) (Sem: 3-8)
6. ACCTG 211(4), CAS 352(3), H P A 460(3), HD FS 425 US(3), HIST 155 GH;US(3), S T S 407(3) (Sem: 5-8)

M.S. REQUIREMENTS: 36 credits

[12 credits may be double counted, 6 must be at the 500 level]

PRESCRIBED COURSES: (21 credits)
HRER 501(3), HRER 502(3), HRER 504(3), HRER 505(3), HRER 512(3)*, HRER 513(3)**, HRER 516(3)
*or other statistics course approved in advance by graduate director
**or other methods course approved in advance by graduate director

ADDITIONAL COURSES: (15 credits)
Select 15 credits from the following list in consultation with adviser (only 6 credits may be at the 400 level).
LER 400 IL(3), LER 401(3), LER 414W(3), LER 424(3), LER 434(3), LER 435(3), LER 437(3), LER 444(3), LER 458Y US(3), LER 460(3), LER 465(3), LER 470(3), HRER 500(3), HRER 535(3), HRER 536(3), HRER 594(1-6), HRER 595(1-6), HRER 596(1-6), HRER 597(1-3), HRER 600(3-6)

Emphasis Courses (6 credits)
An emphasis is an area of study related to a particular aspect or domain of industrial relations and human resources. Select 6 credits from the M.S. prescribed or additional courses in consultation with their adviser.

Masters Research Paper or a Masters Thesis (6 credits)
Students must complete either a Masters Research Paper or a Masters Thesis. Students choosing the Thesis option must complete 6 thesis credits (HRER 600). These credits can be counted towards the 15 credits required from the M.S. Additional Courses section above.

HUMAN RESOURCES AND EMPLOYMENT RELATIONS (HRER) course list
LABOR AND EMPLOYMENT RELATIONS (LER) course list

[1] A student enrolled in this major must receive a grade of C or better, as specified in Senate Policy 82-44.

Integrated B.S. in Spanish and M.S. in Human Resources and Employment Relations (SPHRER)

The integrated Spanish B.S. and HRER M.S. is a five-year program designed for highly qualified and motivated students seeking employment within a culturally diverse workplace. Students will develop basic skills in speaking, understanding, reading, and writing Spanish. Students will gain familiarity with Hispanic cultures through literature and the University's international education program, if they choose to have that experience. Students also will learn about (1) the roles that employers, employees, employee organizations, and public policy makers play in the employment relationship, (2) the complex personal and organizational issues inherent in the employment relationship, and (3) how to systematically analyze those complex issues and evaluate research relevant to those analyses.

For the B. S./M. S. degree in Integrated Spanish B.S. and Human Resources and Employment Relations M.S., a minimum of 154 credits is required. Twelve graduate level credits can apply to both undergraduate and graduate degrees; six of these must be at the 500 level. Students can complete the B.S. in Spanish and not advance to the M.S. HRER degree if they desire.

Bachelor of Science

Scheduling Recommendation by Semester Standing given like (Sem: 1–2)

GENERAL EDUCATION: 45 credits
(10 of these 45 credits are included in the REQUIREMENTS FOR THE MAJOR)

FIRST-YEAR SEMINAR:
(Included in ELECTIVES or GENERAL EDUCATION course selection)

UNITED STATES CULTURES AND INTERNATIONAL CULTURES:
(Included in ELECTIVES or GENERAL EDUCATION course selection)

WRITING ACROSS THE CURRICULUM:
(Included in REQUIREMENTS FOR THE MAJOR)

ELECTIVES: 18 credits

REQUIREMENTS FOR THE MAJOR: 101 credits
(This includes 10 credits of General Education courses: 6 credits of GS courses; 4 credits of GQ courses.)

PRESCRIBED COURSES: (27 credits)
[Some courses in this category have prerequisites that are not included in the major]
SPAN 100(3), SPAN 120(3), SPAN 200(3), SPAN 253(3), SPAN 305(3) (Sem: 1–6)
SPAN 300W(3), SPAN 410(3), SPAN 412(3), SPAN 414(3) (Sem: 5–8)

ADDITIONAL COURSES: (12 credits)
SPAN 210(3) or SPAN 220(3), SPAN 353(3) or SPAN 354(3) (Sem: 3–6)
SPAN 472(3) or SPAN 476(3) (Sem: 5–8)
Select 3 credits of SPAN 415(3), SPAN 418(3), SPAN 420(3), SPAN 439(3), SPAN 490(3), SPAN 491(3), or SPAN 497(1–9) (Sem: 5–8)

LABOR AND EMPLOYMENT RELATIONS: (32 credits)
[Prescribed undergraduate credits in Labor and Employment Relations option]
ECON 002 GS(3), LER 100 GS(3), LER 201(3), LER 312(4), LER 400 IL(3), LER 414W(3), LER 458Y US(3), STAT 200 GQ(4) (Sem: 1–6)
HRER 501(3), HRER 512(3) (Sem: 7–8)

Master of Science

EMPLOYMENT RELATIONS/HUMAN RESOURCES M.S.: (30 credits)
[HRER credits to be selected from the following in consultation with an HRER adviser]
HRER 500, HRER 502, HRER 504, HRER 505, HRER 513, HRER 516, HRER 535, HRER 536, HRER 595*, HRER 596*, HRER 597, HRER 599

[* Heritage speakers (students with Spanish language in family background but not necessarily a native speaker) should take SPAN 100A and SPAN 301 instead of SPAN 100 and SPAN 300W]

- George W. Boudreau, Ph.D. (Indiana) Associate Professor of Humanities and History
- Carl P. Burrowes, Ph.D. (Temple) Associate Professor of Communications and Humanities
- Sandra G. Carter, Ph.D. (Texas) Assistant Professor of Communications and Humanities
- Gloria B. Clark, Ph.D. (SUNY, Binghamton) Associate Professor of Humanities and Spanish
- Louise E. Hoffman, Ph.D. (Bryn Mawr) Associate Professor of Humanities and History
- Margaret Rose Jaster, Ph.D. (Maryland) Associate Professor of Humanities and Literature
- Patricia E. Johnson, Ph.D. (Minnesota) Professor of Humanities and Literature
- Peter J. Kareithi, Ph.D. (Massachusetts) Associate Professor of Humanities and Communications
- Julie Kearney, Ph.D. (Bowling Green) Assistant Professor of English Composition and Humanities
- Glen A. Mazis, Ph.D. (Yale) Professor of Humanities and Philosophy
- Catherine A. Rios, M.F.A. (Columbia) Assistant Professor of Humanities and Communications
- Kathryn Robinson, Ph.D. (Texas Tech) Director, School of Humanities; Professor of Humanities
- Cheri L. Ross, Ph.D. (Purdue) Associate Professor of Humanities and English
- Yu Shi, Ph.D. (Iowa) Assistant Professor of Speech Communications and Humanities
- Troy M. Thomas, Ph.D. (California, Berkeley) Associate Professor of Humanities and Art
- Robin Veder, Ph.D. (William and Mary) Assistant Professor of Humanities and Art History/Visual Culture
- Craig Welsh, M.F.A. (Marywood) Assistant Professor of Humanities and Communications
- Matthew T. Wilson, Ph.D. (Rutgers) Professor of Humanities and English
- Samuel Winch, Ph.D. (Indiana) Associate Professor of Humanities and Communications
- David Witwer, Ph.D. (Brown) Associate Professor of History and Humanities

This program is interdisciplinary, emphasizing critical theories and interpretive approaches that transcend disciplinary boundaries as well as providing advanced study within various humanities disciplines. These include art history, communications, history, literature, music history, philosophy, and writing. The program offers small classes, individualized advising, and assistance in developing advanced analytical, synthetic, and interpretive skills. It accommodates both part- and full-time students.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

Applicants must hold a baccalaureate degree from an accredited college or university; have earned at least a 2.50 grade-point average in their junior and senior years; and have studied in two humanities disciplines (usually a major in one area and some course work in another). Exceptions may be made for those with special backgrounds or abilities who are committed to advanced interdisciplinary study. All applicants must submit the following items, preferably by March of the year in which they wish to begin study: an application form and fee; two copies of official transcripts from all colleges/universities attended; a letter explaining personal or career goals and reasons for wishing to enroll in the program; two letters of reference (preferably from previous professors or others familiar with the applicant's intellectual/creative work or interests); and a writing sample (an academic paper; if this is not available, consult the graduate coordinator for an alternative).

Students applying for fellowships or assistantships must submit scores from the Graduate Record Examinations (GRE) or similar examination by January 15. An admissions committee often interviews applicants in person or by telephone. Applications must be received by November 1 for spring semester admission; by January 15 for applicants requesting financial aid for the following year; and by April 1 for summer and fall admission.

Degree Requirements

All students must complete 30 credits, 18 of which must be at the 500 level, achieve a 3.00 grade-point average, and successfully complete an interdisciplinary master's production (academic thesis or creative production with academic essay). Students work with their faculty advisers and supervisory committees to select courses in accordance with their individual interests.

Courses required of all students include HUM 500, a foundation course in research methods; HUM 560, a capstone course in interdisciplinary theory and research; and HUM 580, the master's production. (See course titles and descriptions in this section.) Recommended courses include HUM 525 Studies in Aesthetics, and HUM 535 Topics in Cultural and Intellectual History, both multidisciplinary courses, covering the content of various disciplines form the perspective of one discipline. To acquire breadth in the humanities, students must take at least one course in each of three disciplines; single-discipline courses are available as HUM 515 Seminar (repeatable for credit). Other courses in particular disciplines are available at the 400 level. Other available 500-level courses are listed in this section. Students planning to teach in a junior or community college may arrange a teaching internship (HUM 550), subject to appropriate preparation and approval by both the program and the community college.

A full-time student can expect to complete the program in four semesters, a part-time student in six or more semesters. Students are expected to complete all requirements for the degree within six years, although the deadline may be extended at the discretion of the graduate coordinator in accordance with policies approved by the Graduate School.

Required Courses

HUMANITIES (HUM)
500. RESEARCH METHODS AND SCHOLARLY INQUIRY IN THE HUMANITIES (3)
560. INTERRELATIONS IN THE HUMANITIES (3)
580. MASTER'S PRODUCTION (1-6)

Recommended Courses

HUMANITIES (HUM)
525. STUDIES IN AESTHETICS (3)
535. TOPICS IN CULTURAL AND INTELLECTUAL HISTORY (3 per semester, maximum of 9)

Other Courses

HUMANITIES (HUM)
502. ENGLISH COMPOSITION STUDIES (3)
515. SEMINAR (3 per semester, maximum of 9)
Unit A. Art History (3)
Unit B. History. (3)
Unit C. Literature (3)
Unit D. Music History and Analysis (3)
Unit E. Philosophy (3)
Unit F. Communications (3)
Unit G. Writing (3)
530. SEMINAR IN COMPARATIVE ARTS (3 per semester, maximum of 9)
550. JUNIOR COLLEGE TEACHING INTERNSHIP (3)
590. COLLOQUIUM (1-3)
596. INDIVIDUAL STUDIES (1-9)
597. SPECIAL TOPICS (1-9)

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Anthony Schmitt, Ph.D., (Veterinary and Biomedical Sciences, College of AgSci)
- Shao-Cong Sun, Ph.D., (Microbiology and Immunology, CoM)
- Michael Teng, Ph.D., (Biochemistry and Molecular Biology, ECoS)
- Satvir S. Tevethia, Ph.D., (Microbiology and Immunology, CoM)
- Emmy Truckenmiller, Ph.D., (Microbiology and Immunology, CoM)
- Na Xiong, Ph.D., (Veterinary and Biomedical Sciences, College of AgSci)

The Intercollege Graduate Program in Immunology and Infectious Diseases (IGDP in I&ID) prepares graduates for diverse opportunities in academic institutions, pharmaceutical companies, private research foundations, governmental research and regulatory programs. The program includes faculty from 12 departments in the College of Agricultural Sciences, Health and Human Development and Eberly College of Science at the University Park campus and the College of Medicine at the Penn State Milton S. Hershey Medical Center. The IGDP in I&ID is also supported by the Huck Institutes of Life Sciences which provides modern telecommunications facilities and sophisticated equipment for state-of-the-art research applications. Doctoral students not only explore new conceptual connections, but also engage in active group learning experiences and explore a variety of potential career opportunities before graduation. Two unique aspects are (1) optional dual mentors will expose students to complementary viewpoints and encourage students to pursue problems at the interface between traditional disciplines, and (2) an optional internship will provide a mechanism for students to obtain practical experience in future professional settings.

General Admission Requirements

M.S. or Ph.D. degrees

Application deadline is January 10 for priority consideration.

1. Completed official Penn State Graduate School application
2. Paid nonrefundable application fee
3. Two official transcripts from each institution attended
4. Completed Integrative Biosciences Graduate Degree Program application
5. Application for a U.S. visa (International applicants only)
6. Graduate Record Examinations (GRE) general test
7. Three letters of recommendation
8. Statement of goals that pertains to the life sciences
9. All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System) and submit the results of that test with the application for admission. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the new Internet-based test with a minimum of 23 points on the speaking portion; or the International English Language Testing System (IELTS) module with a minimum composite score of 6.5 is required for admission.
10. Students must have completed a bachelor's degree at an accredited college or university and have a minimum of a 3.0/4.0

junior/senior undergraduate grade-point average.

Program Requirements

M.S. or Ph.D. degrees

Students are expected to have a foundation and basic knowledge in immunology, infectious diseases, molecular biology, cell biology, biochemistry, and virology. Required course are designed to fulfill this aspect of the training. The courses offered at the Hershey and University Park Campuses are interchangeable and fulfill requirements on both campuses. All students receive A-F grades except for rotations, internships and research credits for which students will receive R (satisfactory/passing) or F (unsatisfactory/failing).

General coursework required for both M.S. and Ph.D. Students

IBIOS 590 COLLOQUIUM (2 credits) All students are required to enroll for 4 credits of colloquium.

IBIOS 591 ETHICS IN THE LIFE SCIENCES (1 credit)

IBIOS 596 INDEPENDENT STUDIES: LABORATORY ROTATIONS (1-3 credits per semester)

IBIOS 600 THESIS RESEARCH (1-9 credits per semester)

IBIOS 601 THESIS PREPARATION (0 credit per semester) For those students who passed their comprehensive exams (For Ph.D. students only)

IBIOS 511 .MOLECULAR IMMUNOLOGY (2) or **MICRO/CMBIO 554**.PRINCIPLES OF IMMUNOLOGY (2)

BMMB/VB SC 432 MECHANISMS OF MOLECULAR CELL COMMUNICATION(2) or **CMBIO/BCHEM/MICRO 503** CORE MOLECULAR BIOLOGY (3)

BMMB 501 CORE CONCEPTS IN BIOMOLECULAR SCIENCE (5), or **BCHEM 502** CORE BIOCHEMISTRY (3) or **B M B 401H** BIOCHEMISTRY (3) and **B M B 400** MOLECULAR BIOLOGY (2-3)

Supporting Courses

IBIOS 595 INTERNSHIP (1)

VB SC 602/IBIOS 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING. (1) All students are strongly encouraged to enroll for 1 credit (or the equivalent) although this is an optional requirement.

IBIOS/V SC/BMMB 515 INNATE IMMUNITY (2)

IBIOS/V SC/BMMB 516 VIRAL EVASION OF IMMUNE RESPONSES (2)

IBIOS/V SC/BMMB 518 T CELL RECOGNITION AND DEVELOPMENT (2)

IBIOS/V SC/BMMB 519 DEVELOPMENT OF THE HEMATOPOIETIC AND VASCULAR SYSTEM (2)

MICRO 550 MEDICAL MICROBIOLOGY (2)

MICRO 572 LITERATURE REPORTS (1)

MICRO 553 SCIENCE OF VIROLOGY (4)

The Graduate School requires all graduate students to maintain a 3.0 grade-point average.

M.S. Degree Requirements

Masters students must have a minimum of 30 credits and a 3.0 overall GPA. IBIOS 595 (Internship) and 596 (Rotations) credits all count toward the 30 credits. 18 credits need to be in the major at the 500-600 level. If pursuing a Masters thesis option, up to 6 IBIOS 600 credits may be A-F graded and 12 credits need to be in the major at the 400-500 level. The student selects a thesis committee (upon consultation with faculty advisor), writes a thesis, and defends his/her work. If all course credits and requirements are met, students do not have to be registered for classes while writing and/or defending his/her work. If pursuing a masters non-thesis option, 18 credits must be in 500-level courses; and the student must have a first authored manuscript (based on his/her research) that has been submitted to a peer reviewed journal. The manuscript is given to at least the faculty advisor and the IGDP Chair for evaluation.

Students must present their thesis in accordance with the Penn State guidelines as described in the *THESIS GUIDE Requirements for the Preparation of Master's and Doctoral Theses.* Current copies may be obtained from the following website: http://www.gradsch.psu.edu/current/thesis/guide.html (Opens New Window).

Ph.D. Degree Requirements

Ph.D. students must have a minimum of 30 credits and a 3.0 overall GPA through out the program. IBIOS 595 (Internship) and 596 (Rotations) credits all count toward the 30 credits. 18 credits need to be in the major at the 500-600 level. Up to 6 IBIOS 600 credits may be A-F graded and 12 credits need to be in the major at the 400-500 level. Additional course work is left to the discretion of the student and advisor.

Grade Point Average/Unsatisfactory Scholarship:

Students are required to have a minimum grade-point average of 3.0 through out the course of their training. Furthermore, the student must have a 3.0 to take the doctoral candidacy, the comprehensive and final oral examinations. One or more failing grades (F) or a cumulative grade-point average below 3.0 may be considered evidence of unsatisfactory scholarship and be grounds for dismissal from the program.

English Competence:

A candidate for the degree of Doctor of Philosophy is required to demonstrate high-level competence in the use of the English language, including reading, writing, and speaking, as part of the language and communication requirements for the Ph.D. This will be assessed for both domestic and international students as part of the candidacy exam, which includes a reading and original writing component. Should deficiencies be identified at the candidacy examination, students will be directed into appropriate remedial activities, including additional English and communication courses. Competence must be formally attested by the program before the doctoral comprehensive

examination is scheduled. (International students should note that passage of the minimal TOEFL requirement does not demonstrate the level of competence expected of a Ph.D. from Penn State.)

Besides coursework, research, and teaching, IGDP in I&ID doctoral students participate in the following:

Candidacy Exam:

This exam should be taken by the end or during the student's third semester in the I&ID Program. The student will be assigned two scientific papers from the primary literature to read and analyze for approximately one month. The papers will be selected based upon the students' background and coursework. The analysis should involve exploring the relevant literature as well as the fundamental issues in immunology, infectious diseases, biochemistry, molecular biology and biology. Following this independent research the student will take a written exam to answer several questions related to the two papers followed by an oral exam a week later. The questions and oral exam will be administered by at least three members of the graduate program and include individuals from both UP and CoM. The overall goal of the exam is to assure that the student has an intellectual foundation in immunology and infectious diseases. The exam is designed to evaluate basic knowledge in immunology, infectious diseases, biochemistry, molecular biology and related disciplines as well as the students' ability to integrate this understanding to effectively evaluate experimental design, results, and the conclusions drawn. In the event that the student does not pass this exam, the student's committee will make a recommendation as to whether to offer another opportunity or to terminate the student's enrollment in the program.

Doctoral Committee:

Upon successful completion of the Candidacy Examination, the student in consultation with the mentors will, as soon as possible, select a doctoral committee. The committee will consist of both mentors, one additional member of the IGDP in I&ID and one faculty member who is not a member of the IGDP in I&ID. If the three I&ID members of the committee are also members of the same department, the fourth committee member must be from a different department. This committee is responsible for supervising the academic program and monitoring the progress of the student towards his/her degree. It is the charge of this committee to assure that the student carries out a substantial piece of independent research and presents it as a dissertation. Doctoral Thesis Committee Composition is based on the Graduate Degree Programs Bulletin published by the Graduate School (refer to http://bulletins.psu.edu/bulletins/whitebook/degree_requirements.cfm?section=degreeReq1) regarding Doctoral Committees and requires:

- 4 person minimum of approved PSU Graduate Faculty.
- 2 members must be inside the major and 1 member must be outside the major. Note - the outside member must be member of the approved PSU Graduate Faculty. The outside member for intercollege graduate programs may be inside the major but committee membership must have representation from more than one department.
- A person not affiliated with PSU may be added as a special member (beyond the 4 members of the approved PSU Graduate Faculty) upon recommendation of the head of the program and approval of the graduate dean.
- Have committee chair or one of the co-chairs be a member of the approved PSU Graduate Faculty. Typically it's the faculty advisor.
- The doctoral candidate and three committee members must be physically present for the comprehensive exam and defense. No more than one person may be present via telephone. Telephone or video conference arrangements must be approved by the Dean of the Graduate School.
- Need approval of 2/3 of the committee members for passing comprehensive exam and defense dissertation.

Comprehensive Examination:

Evaluation via the Doctoral Committee to determine the feasibility of proposed research and the preparedness of the student. Students must be registered for classes (typically IBIOS 600) the semester they take this exam.

Ph.D. Defense: Evaluation via the Doctoral Committee of the thesis research.

Students must present their thesis in accordance with the Penn State guidelines as described in the *THESIS GUIDE Requirements for the Preparation of Master's and Doctoral Theses*. Current copies may be obtained from the following Web site: http://www.gradsch.psu.edu/current/thesis/guide.html (Opens New Window).

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Timothy W. Simpson, Ph.D. (Georgia Tech) Professor of Industrial Engineering and Mechanical Engineering
- Soundar R. Tirupatikumara (Kumara), Ph.D. (Purdue) Allen E. Pearce/Allen M. Pearce Chaired Professor; Distinguished Professor of Industrial Engineering
- Jose A. Ventura, Ph.D. (Florida) Professor of Industrial Engineering
- Robert C. Voigt, Ph.D. (Wisconsin) P.E. Professor of Industrial Engineering
- Richard A. Wysk, Ph.D. (Purdue) Leonhard Chair in Engineering; Professor of Industrial Engineering
- Tao Yao, Ph.D. (Stanford) Assistant Professor of Industrial Engineering

Graduate study and research are conducted in manufacturing process, information engineering operations research-management science, production engineering, process design, systems engineering, human factors, ergonomics, quality engineering, and robotics.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission, at the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

To be admitted into the program, an applicant must have received a baccalaureate degree from a regionally accredited institution. Graduates in engineering, physical sciences, and mathematics who present a 3.00 grade-point average will be considered for admission. For all international students whose native language is not English, scores from the Test of English as a Foreign Language (TOEFL) are required with a minimum score of 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the Internet-based test required for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Degree Requirements

Three degrees are offered: Master of Engineering (M.Eng.), Master of Science (M.S.), and the Doctor of Philosophy (Ph.D.).

The M.Eng. is a professional degree program aimed at preparing students with a breadth of technical and managerial skills to make significant immediate contributions in an industrial setting. The degree requirements include 27 credits of course work, one credit of I E 590 (Colloquium), and a scholarly paper for which two credits of I E 596 (Individual Studies) must be taken. Of the 27 credits of required course work, at least 18 must be prefixed I E, and at least 15 must be at the 500 level. Of the 15 credits at the 500 level, at least 12 must be in I E courses. The scholarly paper must demonstrate comprehensive and in-depth knowledge of a topic in industrial engineering, and it should be suitable for submission for publication in a refereed journal as approved by the committee.

The M.S. degree program is intended for students to gain advanced knowledge for research, analysis, and design in industrial engineering. The degree requirements include 24 credits of course work and two I E 590 (Colloquium) credits. Of the 24 credits of required course work, at least 15 must be prefixed I E, and at least 12 must be at the 500 level. Of the 12 credits at the 500 level, at least nine must be I E courses. A thesis is required, for which six credits of I E 600 or I E 610 must be taken.

For the M.Eng. and M.S. degrees, area options are available in Human Factors/Ergonomics Engineering, Manufacturing Engineering and Quality Engineering. M. Eng. and M. S. dual-title degree programs in Industrial Engineering and Operations Research are also offered.

The Ph.D. program emphasizes scholarly research, and prepares students for research and development careers in industry, government, and academe. Students are admitted to candidacy after passing a written examination. The Ph.D. is awarded upon completion of a program of advanced study that includes a minimum period of residence, passing the English proficiency and comprehensive

examinations, completing a satisfactory dissertation, and passing the final oral examination. The degree requirements consist of 45 credits of course work and four I E 590 (Colloquium) credits. Of the 45 credits of required course work, 36 must be prefixed I E, and at least 30 must be at the 500 level. Nine credits must be from outside the Department and must include a six-credit sequence, with at least three credits at the 500 level. A Ph.D. dual-title degree program in Industrial Engineering and Operations Research is also available.

Continuous registration is required for all graduate students until the paper, thesis, or dissertation is approved.

Master of Engineering (M.Eng.) Degree - Human Factors/Ergonomics Engineering Option

To receive the M.Eng. degree in Industrial Engineering with an Option in Human Factors/Ergonomics Engineering, a student must complete at least 30 credits beyond the bachelor's degree: 27 credits of course work, 1 credit of colloquium, and 2 credits of individual studies leading to a scholarly paper, as required for the M.Eng. degree in Industrial Engineering.

The 30 credits for the Option in Human Factors/Ergonomics Engineering must include the following:

I. CORE REQUIREMENT

1. Experimental Design (3 credits)

INDUSTRIAL ENGINEERING (I E)
511. Experimental Design in Engineering

II. ELECTIVES

1. Human Factors - Any three courses from the following list: (9 credits)

INDUSTRIAL ENGINEERING (I E)
552. Mechanics of the Musculoskeletal System
553. Engineering of Human Work
558. Engineering of Cognitive Work
Any of these courses may be substituted by other suitable I E 500-level courses, subject to the approval of the IME Graduate Faculty.

2. Industrial Engineering (6 credits)

Any two I E courses approved for graduate credit.

3. Any three courses from the following list; at least one course must be at the 500 level. (9 credits)

BIOENGINEERING (BIOE)
507. Biomedical Signal Processing

INDUSTRIAL HEALTH AND SAFETY (I H S)
445. Industrial Hygiene & Toxicology
447. Industrial Hygiene Measurements
450. Environmental Health & Safety
470 Analytical Metholds for System Safety

KINESIOLOGY (KINES)
565. Neurophysiological Basis of MOvement
574. Modeling in Biomechanics
578. Physiology & Mechanical Behavior of Skeletal Tissues
579. Advanced Biomechanics of Human Motion

PSYCHOLOGY (PSYCH)
453. Sensation & Perception
456. Advanced Cognitive Psychology
458. Visual Cognition
462. Physiological Psychology

III. Colloquium (1 credit)

I E 590. Colloquium (or 1 credit of O R 590)

IV. Individual Studies (2 credits)

I E 596 Individual Studies

Master of Engineering (M.Eng.) Degree - Manufacturing Engineering Option

To receive the M.Eng. degree in Industrial Engineering with an Option in Manufacturing Engineering, a student must complete at least 30 credits beyond the bachelor's degree: 27 credits of course work, 1 credit of colloquium, and 2 credits of individual studies leading to a scholarly paper, as required for the M.Eng. degree in Industrial Engineering.

The 30 credits required for the Option in Manufacturing Engineering must include the following:

I. CORE REQUIREMENT

INDUSTRIAL ENGINEERING (I E) (9 credits)

511. Experimental Design in Engineering
550. Manufacturing Systems
582. Information Technology for Industrial & Manufacturing Engineering

II. ELECTIVES

1. Students must take at least one course from each of the following four groups; at least two courses must be at the 500 level.

a. Materials and Manufacturing Processes
INDUSTRIAL ENGINEERING (I E)
428. Metal Casting
438. Metal Cutting Principles & Practices
518. Materials, Forming Processes & Quality
528. Metal Cutting Theory
538. Experimental Investigation in Materials Processing
561. Weld Design
580. Analysis of Machining Precision

b. Process, Assembly and Product Engineering
INDUSTRIAL ENGINEERING (I E)
464. Assembly of Printed Circuit Boards
563. Computer-Aided Design for Manufacturing
576. Computer-Aided Tolerancing in Design & Manufacturing
579. Designing Product Families

c. Manufacturing Productivity and Quality
INDUSTRIAL ENGINEERING (I E)
402. Advanced Engineering Economy
456. Industrial Robot Applications
507. Operations Research: Scheduling Models
551 Computer Control of Manufacturing Systems
553. Engineering of Human Work
556. Robotic Concepts
558. Engineering of Cognitive Work
566. Advanced Quality Control

d. Manufacturing Integration Methods for Systems Design
INDUSTRIAL ENGINEERING (I E)
455. Production Panning & Control
505. Linear Programming
509. Operations Research: Waiting Line Models
521. Non-Linear Programming
522. Discrete Event Systems Simulation
532. Reliability Engineering
540. Manufacturing Systems Simulation
554. Production, Planning & Control
562. Expert Systems Design in Industrial Engineering
578. Using Simulation Models for Design

2. Any two I E or non-I E courses approved for graduate credit. See *"IME List of Approved Non-I E Courses--All Options" (attached) (6 credits)

III. Colloquium (1 credit)

I E 590 Colloquium (or 1 credit of O R 590)

IV. Individual Studies (2 credits)

I E 596 Individual Studies

Master of Engineering (M.Eng.) Degree - Quality Engineering Option

To receive the M.Eng. degree in Industrial Engineering with an Option in Quality Engineering, a student must complete at least 30 credits beyond the bachelor's degree: 27 credits of course work, 1 credit of colloquium, and 2 credits of individual studies leading to a scholarly paper, as required for the M.Eng. degree in Industrial Engineering.

I. CORE REQUIREMENT

INDUSTRIAL ENGINEERING (I E)
511. Experimental Design in Engineering

II. ELECTIVES

1. Any three courses from the following list: (9 credits)

INDUSTRIAL ENGINEERING (I E)

532. Reliability Engineering
566. Quality Control
576. Computer-Aided Tolerancing in Design and Manufacturing
583. Response Surface Methodology and Process Optimization
584. Time Series Control and Process Adjustment

2. Any one course from the following list: (3 credits)

STATISTICS (STAT)
500. Applied Statistics
505. Applied Multivariate Statistical Analysis
506. Sampling Theory and Methods
511. Regression Analysis and Modeling
512. Design and Analysis of Experiments

3. Any two I E courses from the following list; of which at lest one course must be at the 500 level. (6 credits)

INDUSTRIAL ENGINEERING (I E)
454. Applied Decision Analysis
468. Optimization Modeling and Methods
505. Linear Programming
516. Applied Stochastic Processes
519. Dynamic Programming
520. Multiple Criteria Optimization
521. Nonlinear Programming

4. Any two I E or non-I E courses approved for graduate credit. See *"IME List Of Approved No-I E Courses-All Options" (attached). (6 credits)

III. Colloquium (1 credit)

I E 590 Colloquium (or 1 credit of O R 590)

IV. Individual Studies (2 credits)

I E 596 Individual Studies

***IME List of Approved Non-I E Courses - All Options**
(The material covered in a course already taken should not be duplicated.)

500 LEVEL: Any courses, subject to approval by the Graduate Program Coordinator

400 LEVEL:
BIOE 419
CMPEN 362, CMPSC 431W, CMPSC 456, CMPSC 468
E MCH 461
ENGR 411, ENGR 407
FD SC 430

W P 416

Other Relevant Information

Students in this program may elect the dual-title degree program in Operations Research for the Ph.D. and M.S. degrees.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following award typically has been available to graduate students in this program:

HAROLD & INGE MARCUS GRADUATE FELLOWSHIPS--Consideration for these fellowships shall be given to all students exhibiting academic excellence who have been admitted to Penn State as candidates for a graduate degree in the Department of Industrial and Manufacturing Engineering, College of Engineering.

BENJAMIN W. NIEBEL MANUFACTURING FELLOWSHIP
Consideration for this fellowship shall be given to all students exhibiting academic excellence who have been admitted to Penn State as candidates for a graduate degree in the Department of Industrial and Manufacturing Engineering, College of Engineering.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Industrial Relations and Human Resources (IRHR)

Program Home Page (Opens New Window)

PAUL F. CLARK, *Head*
133 Willard Building
814-865-5425

Degree Conferred:

M.S. in Industrial Relations and Human Resources

The Graduate Faculty

- Mark S. Anner, Ph.D. (Cornell) Assistant Professor of Labor Studies and Industrial Relations, and Political Science
- Forrest S. Briscoe, Ph.D. (MIT) Assistant Professor of Labor Studies and Industrial Relations, and Sociology
- Paul F. Clark, Ph.D. (Pittsburgh) Professor of Labor Studies and Industrial Relations
- Alex Colvin, Ph.D. (Cornell) Assistant Professor of Labor Studies and Industrial Relations
- Alan Derickson, Ph.D. (California, San Francisco) Professor of Labor Studies and Industrial Relations, and History
- Robert Drago, Ph.D. (Massachusetts, Amherst) Professor of Labor Studies and Industrial Relations, and Women's Studies
- Ronald L. Filippelli, Ph.D. (Penn State) Professor of Labor Studies and Industrial Relations
- Dennis Gouran, Ph.D. (Iowa) Professor of Speech Communication and Labor Studies and Industrial Relations
- Sumita Raghuram, Ph.D. (Minnesota) Associate Professor of Labor Studies and Industrial Relations
- Jackie Krasas Rogers, Ph.D. (USC) Associate Professor of Labor Studies and Industrial Relations, Sociology, and Women's Studies
- James B. Stewart, Ph.D. (Notre Dame) Professor of Labor Studies and Industrial Relations
- Mark Wardell, Ph.D. (Missouri) Associate Professor of Labor Studies and Industrial Relations

The master of science degree in Industrial Relations and Human Resources (IRHR) is a two-year program designed for students anticipating careers in some aspect of labor and human resources or labor-management relations. The program has the following objectives:

- provide students with an understanding of the roles employers, employees, employee organizations, and public policy makers play in the employment relationship;
- familiarize students with the complex personal and organizational issues inherent in the employment relationship;
- prepare students to systematically analyze complex issues and evaluate research results in the process of administering labor and human resource systems;
- prepare students for advanced graduate or professional training beyond the master's degree;
- prepare students for employment as practitioners in the field.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) or the Graduate Management Admission Test (GMAT) are required. Applicants with a 3.00 junior/senior grade-point average (on a 4.00 scale) will be considered for admission. Applicants must have three letters of recommendation sent from people who can assess adequately their likelihood of completing the graduate program.

Students are expected to have completed successfully an undergraduate statistics course plus a minimum of 12 undergraduate credits in the social sciences as part of their baccalaureate degree.

Degree Requirements

THESIS OPTION: The IRHR thesis option is intended for students anticipating additional graduate education beyond the master's degree. It requires 36 credits, including a minimum of 30 at the 400 and 500 level, and a minimum of 6 600-level thesis credits. For the degree, an overall 3.00 (B) grade-point average must be earned in the 400- and 500-level work and a grade of B or above must be earned in all 500-level courses. At least 6 credits must emphasize a particular aspect of employment relations. A student's thesis should reflect the chose emphasis.

RESEARCH PAPER OPTION: The IRHR research paper option is intended for students expecting to enter the labor market upon completion of the master's degree. It requires a minimum of 37 credits at the 400 and 500 level. For the degree, and overall 3.00 (B) grade-point average must be earned in the 400- and 500-level work and a grade of B or above must be earned in all 500-level courses. At least 6 credits must emphasize a particular aspect of employment relations. A student's research paper should reflect the chosen emphasis.

Student Aid

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Course Requirements

Core Courses (22 credits)
IRHR 501, IRHR 502, IRHR 504, IRHR 505, IRHR 512, IRHR 513, IRHR 516
Required course are offered once per academic year and elective courses at least once every two academic years.

Emphasis Courses (6 credits)
An emphasis is an area of study related to a particular aspect or domain of industrial relations and human resources. Students select an emphasis in consultation with their master's advisory committee.

Elective Courses (3-9 credits)
With the faculty adviser's approval, a student selects at least 3 or more elective credits, depending on the chosen option. Examples of suitable elective courses are: L I R 411, L I R 401, L I R 444, L I R 458Y; IRHR 500, IRHR 535, IRHR 536, IRHR 594, IRHR 595, IRHR 596, IRHR 597, IRHR 599; ECON 412, ECON 436, ECON 571; EDLDR 565, EDLDR 574; HIST (L I R) 555; MGMT 321, MGMT 523, MGMT 548; PSYCH 484, PSYCH 485, PSY 522; SOC 455, SOC 456, SOC 555.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

INDUSTRIAL RELATIONS AND HUMAN RESOURCES (IRHR) course list

Integrated B.S. in Labor and Industrial Relations and M.S. in Industrial Relations and Human Resources (LRIRHR)

PROFESSOR PAUL F. CLARK, *Head*

The integrated B.S. in Labor and Industrial Relations and M.S. in Industrial Relations and Human Resources is a five-year program designed for academically talented baccalaureate students to obtain both the B.S. and the M.S. degrees in LIR and IRHR with five years of study. Students will develop expertise in the human resources and labor relations fields beyond the B.S. degree. The undergraduate curriculum educates students about (1) the roles of employers, employees, employee organizations and public policy makers play in the employment relationship, (2) the complex personal and organizational issues inherent in the employment relationship (3) and how to systematically analyze those complex issues and evaluate research relevant to those analyses. The graduate curriculum provides for more individualized, focused learning in a concentrated sub-area of the IRHR field. The program culminates with an M.S. research paper. Upon completion of the integrated degree, students will enter the workforce with advanced knowledge and expertise gained from conducting and analyzing empirical work and participating in seminar-style classes.

Bachelor of Science

Scheduling Recommendation by Semester Standing given like (Sem: 1-2)

GENERAL EDUCATION: 45 credits
(10 of these 45 credits are included in the REQUIREMENTS FOR THE MAJOR)

FIRST-YEAR SEMINAR:
(Included in ELECTIVES or GENERAL EDUCATION course selection)

UNITED STATES CULTURES AND INTERNATIONAL CULTURES:
(Included in ELECTIVES or GENERAL EDUCATION course selection)

WRITING ACROSS THE CURRICULUM:
(Included in REQUIREMENTS FOR THE MAJOR)

ELECTIVES: 18 credits

REQUIREMENTS FOR THE MAJOR: 98-99 credits
[12 credits may be double counted, 6 must be at the 500 level]

B.S. REQUIREMENTS: 62-63 credits
(This includes 10 credits of General Education courses)

COMMON REQUIREMENTS FOR THE MAJOR (ALL OPTIONS): 36-37 credits

PRESCRIBED COURSES: (16 credits)
(Some courses in this category have prerequisites that are not included in the major)
L I R 100 GS(3), L I R 312(4) (Sem: 3-8)
ECON 002 GS(3), ECON 315 GS(3), PSYCH 281 GS(3) (Sem: 1-8)

ADDITIONAL COURSES: (13 credits)
(Some courses in this category have prerequisites that are not included in the major)
L I R 201 GS(3) or L I R 401(3) (Sem: 3-8)
SCM 200(4) or STAT 200 GQ(4) (Sem: 3-8)
L I R 136 US(3) or WMNST 136 US(3) or L I R 400 IL(3) (Sem: 5-8)
L I R 458Y US(3) or HIST 458Y US(3) or L I R 414W(3) (Sem: 5-8)

SUPPORTING COURSES AND RELATED AREAS: (33-34 credits)

(L I R courses that are used in the Additional Courses category may not be double counted to satisfy this requirement. Some courses in this category have prerequisites that are not included in the major.)

Select 15-21 credits from appropriate L I R courses, at least 9 must be at the 400 level (only 3 credits of L I R 495 or 3 credits of L I R 496 may be used to satisfy this requirement) (Sem: 5-8)

Select 12-19 credits from the department list in consultation with an adviser, at least 6 credits must be at the 400 level, 3 each from 3 categories:

1. ECON 342 GS(3), ECON 370 GS(3), ECON 412(3), ECON 436(3), ECON 445(3) (Sem: 5-8)
2. MGMT 100(3), MGMT 321(3), MGMT 331(3), MGMT 341(3), MGMT 424(3) (Sem: 3-8)
3. PL SC 451(3), PL SC 471(3), PL SC 473(3), PL SC 474(3) (Sem: 5-8)
4. PSYCH 482(3), PSYCH 484(3), PSYCH 485(3) (Sem: 5-8)
5. SOC 119 GS;US(4), SOC 409 US(3), SOC 444(3), SOC 455(3), SOC 456(3) (Sem: 3-8)
6. ACCTG 211(4), CAS 352(3), H P A 460(3), HD FS 425 US(3), HIST 155 GH(3), S T S 407(3) (Sem: 5-8)

[1] A student enrolled in this major must receive a grade of C or better, as specified in Senate Policy 82-44.

M.S. REQUIREMENTS: 36 credits
[12 credits may be double counted, 6 must be at the 500 level]

PRESCRIBED COURSES: (21 credits)
IRHR 501(3), IRHR 502(3), IRHR 504(3), IRHR 505(3), IRHR 512(3)*, IRHR 513(3)*, IRHR 516(3)
*or other statistics course approved in advance by graduate director
**or other methods course approved in advance by graduate director

ADDITIONAL COURSES: (15 credits)
Select 15 credits from the following list in consultation with adviser (only 6 credits may be at the 400 level).
L I R 400 IL(3), L I R 401(3), L I R 414W(3), L I R 424(3), L I R 434(3), L I R 435(3), L I R 437(3), L I R 444(3), L I R 458Y US(3), L I R 460(3), L I R 465(3), L I R 470(3), IRHR 500(3), IRHR 535(3), IRHR 536(3), IRHR 594(1-6), IRHR 595(1-6), IRHR 596(1-6), IRHR 597(1-3), IRHR 600(3-6)

Emphasis Courses (6 credits)
An emphasis is an area of study related to a particular aspect or domain of industrial relations and human resources. Select 6 credits from the M.S. prescribed or additional courses in consultation with their adviser.

Masters Research Paper or a Masters Thesis (6 credits)
Students must complete either a Masters Research Paper or a Masters Thesis. Students choosing the Thesis option must complete 6 thesis credits (IRHR 600). These credits can be counted towards the 15 credits required from the M.S. Additional Courses section above.

INDUSTRIAL RELATIONS AND HUMAN RESOURCES (IRHR) course list
LABOR AND INDUSTRIAL RELATIONS (L I R) course list

[1] A student enrolled in this major must receive a grade of C or better, as specified in Senate Policy 82-44.

Integrated B.S. in Spanish and M.S. in Industrial Relations and Human Resources (SPIRHR)

http://lsir.la.psu.edu/gshms/integratedspanishirhrbsms.htm

The integrated Spanish B.S. and IRHR M.S. is a five-year program designed for highly qualified and motivated students seeking employment within a culturally diverse workplace. Students will develop basic skills in speaking, understanding, reading, and writing Spanish. Students will gain familiarity with Hispanic cultures through literature and the University's international education program, if they choose to have that experience. Students also will learn about (1) the roles that employers, employees, employee organizations, and public policy makers play in the employment relationship, (2) the complex personal and organizational issues inherent in the employment relationship, and (3) how to systematically analyze those complex issues and evaluate research relevant to those analyses.

For the B. S./M. S. degree in Integrated Spanish B.S. and Industrial Relations and Human Resources M.S., a minimum of 154 credits is required. Twelve graduate level credits can apply to both undergraduate and graduate degrees; six of these must be at the 500 level. Students can complete the B.S. in Spanish and not advance to the M.S. IRHR degree if they desire.

Bachelor of Science

Scheduling Recommendation by Semester Standing given like (Sem: 1-2)

30 East Swedesford Road
Malvern, PA 19355
610-648-3335

Degree Conferred:

M.S. in Information Science

The Graduate Faculty

- Adrian Barb, Ph.D. (University of Missouri) *Assistant Professor of Information Science*
- Joanna Defranco, Ph.D. (New Jersey Institute of Technology) *Assistant Professor of Information Science*
- Nil H. Ergin, Ph.D. (University of Missouri-Rolla), *Assistant Professor of Systems Engineering*
- Kathryn Jablokow, Ph.D. (Ohio State) *Associate Professor of Mechanical Engineering*
- Phillip A. Laplante, Ph.D. (Stevens Institute of Tech) P.E. *Associate Professor of Software Engineering*
- John I. McCool, Ph.D. (Temple) *Distinguished Professor of Industrial and Manufacturing Engineering*
- Colin J. Neill, Ph.D. (Wales) *Associate Division Head and Professor of Software Engineering*
- James A. Nemes, D.Sc. (George Washington University) *Professor and Division Head*
- Michael J. Piovoso, Ph.D. (Delaware) *Professor of Electrical Engineering*
- Robin G. Qui, Ph.D. (Penn State) *Associate Professor of Information Science*
- David W. Russell, Ph.D. (CNAA, London) *Professor of Electrical Engineering*
- Raghvinder Sangwan, Ph.D. (Temple) *Associate Professor of Software Engineering*
- Kailasam Satyamurthy, Ph.D. (Clemson) *Assistant Professor of Engineering and Management*

The professional, nonthesis graduate program is designed to offer students a balance of information systems and management theories and emphasizes technical competence, leadership skills, and business expertise. Students gain insight in the role and management of emerging information technologies to gain competitive advantage.

Admission Requirements

Students who have a baccalaureate degree in data processing, information systems and/or other quantitative, scientific, or business discipline will be considered for admission to the program. Students should have earned at least a 3.00 junior/senior average in their baccalaureate program at a regionally accredited institution. It is recommended that scores from the Graduate Record Examinations (GRE) or the Graduate Management Admissions Test (GMAT) be submitted. Under special circumstances, exceptions to these requirements may be considered; students with a particularly strong undergraduate background may petition to substitute advanced courses for required ones. If the admissions committee determines an area of weakness or insufficient baccalaureate preparation, the student may be required to take preparatory courses prior to being admitted to the program. Scores from the Test of English as a Foreign Language (TOEFL) are required of international applicants at the time of application. The minimum TOEFL score is 550 (paper) or 213 (computer).

Program Requirements

The requirement for the degree is 39 credits of graduate course work and completion of a master's paper. The Master of Science in Information Science program is based on a sequence of 18 credits of required core courses. This is followed by 18 credits of approved electives, selected with the assistance of a graduate adviser, followed by an integrative capstone course (IN SC 539). Required and elective credits must be distributed so that a minimum of 12 and a maximum of 18 credits derive from the Management Division and the remainder from the Engineering Division. A grade-point average of at least 3.0 must be achieved, with at least 18 credits at the 500 level.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:

Ph.D., M.S., M.P.S. in Information Sciences

The Graduate Faculty

University Park:
Reka Albert, Ph.D. (Notre Dame) Affiliate Assistant Professor of Information Sciences and Technology; Assistant Professor of Physics
John W. Bagby, J.D. (Tulsa) Professor of Information Sciences and Technology
Christian Brady, Ph.D. (Oxford) Dean, Schreyer Honors College; Affiliate Professor of Information Sciences and Technology; Associate Professor of Classical Studies and Jewish Studies
Guoray Cai, Ph.D. (Pittsburgh) Associate Professor of Information Sciences and Technology, Geography, and Computer Science and Engineering
Brian Cameron, Ph.D. (Penn State) Professor of Practice in Information Sciences and Technology
John Carroll, Ph.D. (Columbia) Edward M. Frymoyer Chair Professor of Information Sciences and Technology
Chao-Hsien Chu, Ph.D. (Penn State) Professor of Information Sciences and Technology, and Management Science
Shawn Clark, Ph.D. (Penn State) Professor of Practice in Information Sciences and Technology
Henry C. “Hank ” Foley, Ph.D. (Penn State) Vice President for Research and Dean of the Graduate School; Professor of Information Sciences and Technology, and Chemical Engineering
Frederico T. Fonseca, Ph.D. (Maine) Associate Professor of Information Sciences and Technology, Geography, and Computer Science and Engineering
C. Lee Giles, Ph.D. (Arizona) David Reese Professor of Information Sciences and Technology; Professor of Computer Science and Engineering
David L. Hall, Ph.D. (Penn State) Interim Dean; Professor of Information Sciences and Technology, and Electrical Engineering
John Harwood, Ph.D. (Nebraska) Associate Professor of Information Sciences and Technology; Associate Professor of English
Steven R. Haynes, Ph.D. (London School of Economics) Assistant Professor of Information Sciences and Technology
Bernard James Jansen, Ph.D. (Texas A&M) Assistant Professor of Information Sciences and Technology
Lynette Kvasny, Ph.D. (Georgia State) Assistant Professor of Information Sciences and Technology
Dongwon Lee, Ph.D. (UCLA) Assistant Professor of Information Sciences and Technology, and Computer Science and Engineering
Peng Liu, Ph.D. (George Mason) Associate Professor of Information Sciences and Technology, and Computer Science and Engineering
David Mudgett, Ph.D. (Yale), Senior Instructor in Information Sciences and Technology
Carleen Maitland, Ph.D. (Delft University of Technology) Assistant Professor of Information Sciences and Technology
Alan MacEachren, Ph.D. (Kansas) Affiliate Professor of Information Sciences and Technology; E. Willard and Ruby S. Miller Professor of Geography
William McGill, Ph.D. (Maryland), Assistant Professor of Information Sciences and Technology
Michael D. McNeese, Ph.D. (Vanderbilt) Professor of Information Sciences and Technology, and Psychology
Prasenjit Mitra, Ph.D. (Stanford) Assistant Professor of IST and CSE
Tracy Mullen, Ph.D. (Michigan) Assistant Professor of IST
Kevin Murphy, Ph.D. (Penn State) Affiliate Professor of Information Sciences and Technology; Professor of Psychology
Irene Petrick, Ph.D. (Penn State) Professor of Practice in Information Sciences and Technology
Sandeep Purao, Ph.D. (Wisconsin--Milwaukee) Associate Professor of Information Sciences and Technology
Madhu Reddy, Ph.D. (California, Irvine) Assistant Professor of Information Sciences and Technology
Frank E. Ritter, Ph.D. (Carnegie Mellon) Associate Professor of Information Sciences and Technology, Computer Science and Engineering, and Psychology
Mary Beth Rosson, Ph.D. (Texas at Austin) Professor of Information Sciences and Technology
Gerald M. Santoro, Ph.D. (Penn State) Assistant Professor of Information Sciences and Technology, and Communication Arts and Sciences
Brian Smith, Ph.D. (Northwestern) Associate Professor of Information Sciences and Technology, and Information Systems
Anna Squicciarini, Ph.D. (University of Milan, Italy) Assistant Professor of Information Sciences and Technology
Andrea Tapia, Ph.D. (New Mexico) Assistant Professor of Information Sciences and Technology
Angsana Techatassanasoontorn, Ph.D. (Minnesota) Assistant Professor of Information Sciences and Technology
Eileen M. Trauth, Ph.D. (Pittsburgh) Professor of Information Sciences and Technology
James Z. Wang, Ph.D. (Stanford) Associate Professor of Information Sciences and Technology, and Computer Science and Engineering
Heng Xu, Ph.D. (National Singapore) Assistant Professor of Information Sciences and Technology
John Yen, Ph.D. (California, Berkeley) Associate Dean for Strategic Initiatives and University Professor of Information Sciences and Technology; Professor of Computer Science and Engineering
Xiaolong (Luke) Zhang, Ph.D. (Michigan) Assistant Professor of Information Sciences and Technology
Sencun Zhu, Ph.D. (George Mason) Assistant Professor of Information Sciences and Technology and Computer Science and Engineering

Great Valley:
Adrian Sorin Barb, Ph.D. (Missouri) Assistant Professor of Information Science
Kathryn W. Jablokow, Ph.D. (Ohio State) Associate Professor of Mechanical Engineering
Phillip A. Laplante, Ph.D. (Stevens Institute) P.E. Professor of Software Engineering
John I. McCool, Ph.D. (Temple) Distinguished Professor of Systems Engineering
Colin Neill, Ph.D. (Wales, United Kingdom) Associate Professor of Software Engineering
James Nemes, D.Sc. (George Washington) Division Head and Professor of Mechanical Engineering
Michael J.Piovoso, Ph.D. (Delaware) Professor of Electrical Engineering
Robin G. Qiu, Ph.D. (Penn State) Associate Professor of Information Science
David W. Russell, Ph.D. (Council for National Academic Awards, United Kingdom) Professor of Electrical Engineering
Raghvinder S. Sangwan, Ph.D. (Temple) Assistant Professor of Information Science

Harrisburg:
Gregory A. Crawford, Ph.D. (Rutgers) Librarian; Director, Penn State Harrisburg Library
Rhoda Joseph, Ph.D. (City University of New York, Baruch College), Assistant Professor of Information Systems
Parag C. Pendharkar, D.B.A. (Southern Illinois) Professor of Information Systems
Girish Subramanian, Ph.D. (Temple) Professor of Information Systems

Program Description

The Doctor of Philosophy degree in Information Sciences and Technology offers advanced graduate education for students contemplating careers in academic teaching and research, or research in a non-academic setting. The program is interdisciplinary in nature and expects scholarship at the highest level exhibiting depth of competency in at least one of the core areas of the Information Sciences and Technology and an understanding of the integration of the critical constructs that drive the field: people, information, and technology.

The Master of Science in Information Sciences and Technology is an interdisciplinary degree program that focuses on the theoretical, application-oriented, and educational issues facing a digital, global economy. The program is designed to build an understanding of how information and technology fundamentally impact (and are impacted by) people, organizations, and the world community. Topical areas within IST span a broad range including: human computer interaction, computational techniques, applications (e.g., bio-informatics and geographical information systems), societal issues (such as digital divide issues), user issues (e.g., computer-aided cognition), and information systems design and development providing exposure and grounding in many of the aspects of the information sciences. The program is especially attractive to students interested in gaining state-of-the-art understanding of information technology and its use as a solution in multiple venues.

The Master of Professional Studies in Information Sciences (also referred to as Master in Information Sciences as an abbreviated program name) is an innovative program that targets professionals and organizational leaders who wish to seek a professional education and training program that can (1) empower them to assume greater responsibilities related to information sciences and information technologies, and/or (2) assist them in transitioning into a career that utilizes information science and information technologies to deal with information-centric challenges. The purpose of the proposed professional master program is to produce professionals and organizational leaders who not only can select and draw upon the necessary foundations within the information sciences and information technology areas, test the applicability of these foundations for addressing a given issue, and apply resulted solutions, but also can be aware of the multitude of technological trends and environmental factors that organizations must address in the changing global economy.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*. Applicants are required to submit scores from the general portions of the Graduate Record Examinations (GRE) or the Graduate Management Admissions Test (GMAT), three letters of reference, and a one-three page personal statement of relevant experience and goals; In addition, applicants to the Ph.D. and M.S. programs are required to submit a current resume, statement of research interests, and a sample of applicant's writing (e.g., technical paper, etc.). The GRE or GMAT requirement can be waived for applicants to the Professional Master Program if the student has five or more years of relevant information sciences and technology working experience.

Since the program is multidisciplinary in nature, students from almost any discipline may be acceptable for entry into the program. A bachelor's degree in a related area (e.g., engineering and science), while not necessary for admission, is helpful in the successful completion of the degree. It is expected that students will have a basic level of competency in statistics, computer language, and information technology (related work experience can be used to demonstrate such competency). A student may be accepted into the program with "provisional status" for no more than one year while work is completed to meet these expectations.

It is expected that a successful applicant has an overall grade point average of 3.00 (on a 4.00 scale) or higher for their undergraduate study (and/or graduate-level studies). However, accomplishments demonstrated through work experience and recommendation letters from the applicant's academic advisor or employer will also play an important role in making the admission decision. The most qualified applicants will be accepted into the program until all spaces for new students are filled.

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, a total score of 80 with a 20 on the speaking section for the Internet-based test (iBT) or a minimum composite score for the IELTS of 6.5.. Applicants with iBT speaking scores between 15 and 19 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work.

Degree Requirements

Doctoral Degree Requirements

The doctoral degree requirements include the general requirements of the Graduate School as listed under the Doctoral Degree Requirements. To qualify for a Ph.D. degree, each student must take 12 credits of courses IST 501, IST 511 or IST 512, IST 521 or IST 522, IST 531 or IST 532; plus four (4) credits of IST 590 (colloquium); 12 credits of graduate-level courses to supporting the primary field research methods, (one of these courses, 3 credits, must focus on the philosophy of science); and 12 to 30 additional credits of nonthesis graduate courses that support the student's IST research program. In addition, all candidates must be competent in the English language and must have demonstrated skills in the communication of ideas both verbally and in writing commensurate with the requirement of scholarly and professional work. The candidacy examination will be used as an occasion to assess English proficiency and plan for remediation (including additional courses, mentoring, or experiences) for all students. A short essay will be included as part of the assessment process. The foreign language and communication requirement may be fulfilled through demonstrating computer language proficiency (assessed through courses taken) or a minimum of 9 credits of 500-level statistics courses. Students must pass the Ph.D. candidacy examination at the end of their second regular semester after entering the program. Students must pass the Ph.D. comprehensive examination after completion of most of the course work, usually at the end of the student's second year in the program. A research-based dissertation must be completed under the direction of the Ph.D. committee, with the student submitting a dissertation proposal and defending that proposal in the defense examination.

M.S. Degree Requirements

The M.S. in Information Sciences and Technology requires a minimum of 32 credits, 27 of which must be earned at University Park. These credits are distributed among the following requirements:

Core Courses (14 credits). All candidates are expected to develop a broad understanding of the core constructs of people, information, technology, and the significant interactions among those elements through taking IST 501, IST 511 or IST 512, IST 521 or IST 522, IST 531 or IST 532 plus two graduate colloquia offered by the college.

Support Area (6 credits). A candidate is expected to choose an area customized to support the thesis requirement. A support area could be a selection of courses in law, business, education, engineering, the liberal arts, science, or any area that is linked to the information sciences.

Research Methods (6 credits). All candidates must develop a basic understanding of the scientific research process, statistical techniques, and research methods utilized in the information sciences.

Thesis (6 credits). All students must write a thesis. The thesis should focus on a well-defined problem relevant to the information sciences. The student must present the thesis in a public presentation and successfully defend the thesis to the adviser and committee.

Language and Communication. All candidates must be competent in the English language and must have demonstrated skills in the communication of ideas both orally and in writing commensurate with the requirement of professional work. The foreign language and communication requirement may be fulfilled through demonstrating computer language proficiency (assessed through courses taken).

M.P.S. Degree Requirements

The Master in Information Sciences program requires a minimum of 3 3 credits, 2 4 of which must be earned at Penn State. Up to 9 graduate credits may be transferred in from an accredited institution (as is permissible by the Graduate School). At least 18 credits must be courses at the 500 level and above. A student will first take 9-credits of core courses. The student will then take 12 credits of prescribed courses for the base program or a specialized option . Currently, two specialized options are available: the Information Assurance and Decision Support (IADS) option and the Software Development (SD) option. The remaining 9 course credits of electives are chosen in consultation with the student's advisor. Lastly, the student must complete a master project guided by the student's adviser. A student can choose to be in the Base Program or in an Option. These credits are distributed among the following requirements:

Core Courses (9 credits). The core of the Master in Information Sciences program consists of four courses -- IST 552 (or INFSY 540), IST 554, IST 562, and IST 594 -- for a total of 12 credits. These courses represent the core technical foundations to study Information Sciences and Technology.

The Base Program (12 credits of prescribed courses and 9 credits of electives). The base program consists of four prescribed (required) courses, IST 516, IST 521 (or IST 522), IST 532 (or IST 531) and IST 564 and 9 credits of elective courses, in addition to the 9-credit core and three-credit capstone course. It is designed for students who do not have a special interest in mind. The elective courses are chosen in consultation with the student's advisor. Hence, it offers the flexibility that enables the student to build an in-depth knowledge and skills about information sciences tailored to his/her interests and background. Students from Harrisburg region can also select courses from Harrisburg Campus to fulfill the prescribed courses (by substitution) and 9 credits of electives.

Information Assurance and Decision Support (IADS) Option (12 credits of prescribed courses and 9 credits of electives). The IADS option consists of four prescribed (required) courses, IST 515, IST 555, IST/STAT 557, and IST 885, and 9 credits of elective courses, in addition to the 9-credit core and three-credit capstone courses. These courses enable the student to focus on developing knowledge and skills for information analysis, information assurance and decision support including theories, techniques, and applications of data mining, data fusion, information search, information security, and intelligent resource allocation. Students who prefer more flexibility in time and location can take the online courses, offered through World Campus as meeting elective requirements.

Software Development (SD) Option (12 credits of prescribed courses and 9 credits of electives). The SD option consists of four prescribed (required) courses, IST 411, IST 412, SWENG 586 and SWENG 587, and 9 credits of elective courses, in addition to the 9-credit core and three-credit capstone courses. This option prepares IT professionals to develop software products and services for industry and government through software analysis, design and architecture; system verification; data storage and retrieval; and managing globally-distributed development. During the course of study, students will be involved in e licitation of requirements, legacy system analysis and repair, service-oriented applications, agile development projects, and open-source software development. Students who prefer more flexibility in time and location can also select the seven-week online courses from World Campus (developed by Penn State Great Valley) as part of the elective requirements.

Master Project (3 credits). The project requires all students in the Master in Information Sciences program to focus on a well-defined issue or problem relevant to the information sciences and technology. The student will submit a project proposal to his/her faculty advisor for approval. Upon completion of the project, the student will share or present the project results at a final presentation as a component of IST 594.

Language and Communication. All candidates must be competent in the English language and must have demonstrated skills in the communication of ideas both orally and in writing commensurate with the requirement of professional work. The foreign language and communication requirement may be fulfilled through demonstrating computer language proficiency (assessed through courses taken).

Courses

Graduate courses carry numbers from 500 to 599 or 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:

M.S.

The Graduate Faculty

- Melvin Billingsley, Ph.D. (Yale) Professor of Biotechnology and Entrepreneurship
- Gregory A. Crawford, Ph.D. (Rutgers) Associate Librarian
- Rhoda Joseph, Ph.D. (City University of New York, Baruch College), Assistant Professor of Information Systems
- Parag C. Pendharkar, D.B.A. (Southern Illinois) Associate Professor of Information Systems
- Girish Subramanian, Ph.D. (Temple) Associate Professor of Information Systems
- Gayle J. Yaverbaum, Ph.D. (Temple) Professor of Information Systems

The Program

Operating under the auspices of the School of Business Administration, Penn State Harrisburg's master's degree program in information systems is designed to meet the rapidly increasing need for technically grounded, upper-level information resources managers within business organizations. With the exception of a small percentage of students who are full-time, the students served by the M.S.I.S. program are employees of area businesses, state and local governments, and not-for-profit organizations who study on a part-time basis. In order to accommodate both full- and part-time students, courses are primarily offered in the evening.

The two-fold nature of the program requires a manager to have competence both in information technology and in management theory; therefore, the curriculum combines the highly technical content of information science with the managerial emphasis of information systems. Unlike computer science programs, which tend to focus on computer hardware and architecture, this program is organized around applied computer-based activities, the development of communication skills, and managerial principles.

Students may elect to take one of two options in the program: Information Systems in Health Care Management and Delivery, or Information Systems in the Life Sciences. Each of these options requires a total of 36 credits. Alternatively, students can earn the degree without notation of an option; the total credits required for the degree under this choice are 30 credits.

Admission Requirements

Applicants to the program must hold a baccalaureate degree in any field from a regionally accredited, college-level institution. Students who apply for the option in Life Sciences must hold a baccalaureate degree in life sciences or a related field from a regionally accredited college-level institution. Decisions are based primarily on undergraduate junior-senior grade-point average and the Graduate Management Admissions Test (GMAT) scores. (Please visit www.gmac.com for more information on the GMAT). Post-baccalaureate course work, professional experience, and the statements provided in the application are also taken into account.

Students are also required to submit the following:

- a completed application form with application fee
- two copies of official transcripts from all colleges or universities attended;
- official scores from the GMAT test (the test must have been taken within the past five years);
- letters of recommendation (optional);
- supplemental application;

An application is available on the web at www.hbg.psu.edu or by calling 717-948-6250.

The Test of English as a Foreign Language (TOEFL) (www.toefl.org) must be taken by applicants for whom English is not their first language or whose language of instruction was not English. Submit the results of that test with the application for admission. A TOEFL score of 550 (paper-based test) or 213 (computer-based test) or higher is required for admission.

All students with international credentials must submit transcripts to Educational Credential evaluators, Inc. (ECE) for a "course by course" academic evaluation of transcripts and degree. An ECE application can be obtained on the web at: www.ece.org.

Application Dates

Candidates may enter the program at the beginning of the fall, spring, or summer session. To allow time for applications to be processed, all information, including GMAT score, must be received by Enrollment Services no later than July 18 for admission to the fall semester, November 18 for admission to the spring semester, and April 18 for admission to the summer session.

Applicants from outside the United States must follow the early admission dates in order to allow the necessary clearances and paperwork to be processed in time.

Entry Requirements

Analytic Skills Requirement: Prior to enrolling in their M.S.I.S. course work, students are required to demonstrate competence in Analytic skills. This requirement may be demonstrated by: (1) satisfactory completion of college-level courses in calculus and statistics such as QUANT 310 or MATH 110 plus STAT 200 or (2) successful completion of a calculus and statistics proficiency examination approved by

the M.S.I.S. program. This requirement must be taken either during the first semester or summer session of the student's matriculation and completed with a grade of C or better.

Credit by Examination: Interested students should obtain a Credit by Examination form from Enrollment Services and should consult with the M.S.I.S. Program to schedule the exam and obtain a list of suggested preparatory materials.

Computer Skills Requirement: Students are required to demonstrate proficiency in the use of Microcomputer Applications. This requirement can be satisfied through completion of a college-level microcomputer applications course within the past five years with a grade of B or higher or by documented significant computer-related work experience. If this requirement has not been met prior to admission, a college-level microcomputer course such as M I S 103 or CMPSC 203--Microcomputers in Business--is required. Course work must be taken either during the first semester or summer session of the student's matriculation and completed with a grade of B or higher.

Communication Skills Requirement: Successful completion of the M.S.I.S. program requires the ability to think clearly and to write and speak persuasively. Part of this requirement can be met by obtaining a score of "4" or more on the Graduate Management Admission Test (GMAT) Analytical Writing Assessment (AWA). If this score is not achieved, students must satisfy this requirement through additional course work in writing skills or other work developed in consultation with the M.S.I.S. Program. This requirement must be satisfied during the first semester or summer session of the student's matriculation and completed with a grade of B or higher. The speech component of this requirement is satisfied through individual and group presentations in courses in the M.S.I.S. Program.

Pre-Program Requirement: The Pre-program requirement provides a basic foundation in theory, tools and techniques required for the management of profit and non-profit organizations. It also provides a basic understanding of applications of financial accounting, the creation and distribution of goods and services, and how people relate to others in various organizations, helping to merge two related disciplines: business and information systems. Students who have completed the appropriate pre-program courses previously must have completed the courses with a grade of B or higher within seven years prior to admission, or through equivalent graduate course work completed with a B or higher within seven years prior to admission or college level course work validated by recent work experience. Students who have not met these tests of relevancy, grade or currency, prior to admission to the program must take these courses at the graduate level and early in Program. Students choosing an option in life sciences are required to have a baccalaureate degree in life sciences or a related field.

Pre-Program Requirement: 9 credits
ACCT 501, BUS 505, MGMT 511, BUSEC 502

Degree Requirements

The M.S.I.S. program requires, excluding prerequisite requirements, 30-36 credits of course work at the graduate level (500-level or higher). Options require 36 credits.

These are distributed over three groups of courses: Prescribed Courses, Additional Courses, and Electives.

M.S.I.S. Degree Program

Master of Science in Information Systems

Pre-Program Courses
ACCT 501. Financial Analysis (3)
BUS 505. Data Analysis for Business Decisions (2)
BUSEC 502. Prices, Markets, and Competitive Strategy (2)
MNGMT 511. Organizational Behavior (2)

Prescribed Courses
INFSY 535. Object-Oriented Design and Program Development (3)
INFSY 540. Information Technology and Knowledge Management (3)
INFSY 554. Master's Project (3)

Additional Courses (choose 15 credits)
INFSY 543. Electronic Commerce (3)
or
INFSY 550. Strategic Information Systems (3)
or
INFSY 587. Global Information Technology (3)
INFSY 545. Program, Data, and File Structures (3)
INFSY 547. WEB Enabled Technologies (3)
INFSY 555. Data Management (3)
INFSY 556. Data Warehousing (3)
INFSY 560. Data Communications Systems and Networks (3)
INFSY 562. Network Protocols (3)
or
INFSY 563. Network Security Management (3)
or
INFSY 564. Mobile computing (3)
INFSY 565. Intelligent Systems (3)
INFSY 566. Data Mining and Knowledge Discovery (3)
INFSY 570. Software Engineering in the Analysis and Design of Information Systems (3)
INFSY 575. Seminar in Information Technology Management (3) (as approved for major by Program)
INFSY 597. Special Topics (3)

Electives (6 credits)

Elective courses allow students to select additional elective courses of interest. Six credits of elective courses should be taken from 500-level courses offered by Penn State Harrisburg's School of Business Administration.

M.S.I.S. Degree with Options

Information Systems in Health Care Management and Delivery Option

Pre-Program Courses
ACCT 501. Financial Statement Analysis (3)
BUS 505: Data Analysis for Business Decisions (2)
BUSEC 502. Prices, Markets, and Competitive Strategy (2)
MNGMT 511. Organizational Behavior (2)

Prescribed Courses
INFSY 535. Object-Oriented Design and Program Development (3)
INFSY 540. Information Technology and Knowledge Management (3)
INFSY 554. Master's Project (3)

Additional Courses
INFSY 555. Data Management (3)
INFSY 556. Data Warehousing (3)
INFSY 560. Data Communications Systems and Networks (3)
INFSY 565. Intelligent Systems (3)
INFSY 566. Data Mining and Knowledge Discovery (3)

Option Courses
H ADM 539. Health Systems Organizations (3)
INFSY 585. Advanced Applications in Medical Informatics (3)

Select 6 credits from:
H ADM 540. Health Administrative Policy Formulation (3)
H ADM 541. Health Economics (3)
H ADM 542. Health Care Politics (3)
H ADM 543. Long-Term Care Administration (3)
H ADM 548. Health Care Quality (3)
H ADM 551. Health Care Law (3)
H ADM 552. Health Delivery Systems: managed care (3)
HES 570. Health Economics (3)
INFSY 575. Seminar in Information Technology Management (3) (as approved for option by Program)
INFSY 597. Special Topics (3) (as approved for option by Program)

Information Systems in Life Sciences Option

Prerequisite
A baccalaureate degree in a life sciences field

Pre-Program Courses
ACCT 501. Financial Analysis (3)
BUS 505. Data Analysis for Business Decisions (2)
BUSEC 502. Prices, Markets, and Competitive Strategy (2)
MNGMT 511. Organizational Behavior (2)

Prescribed Courses
INFSY 535. Object-Oriented Design and Program Development (3)
INFSY 540. Information Technology and Knowledge Management (3)
INFSY 554. Master's Project (3)

Additional Courses
INFSY 555. Data Management (3)
INFSY 556. Data Warehousing (3)
INFSY 560. Data Communications Systems and Networks (3)
INFSY 565. Intelligent Systems (3)
INFSY 566. Data Mining and Knowledge Discovery (3)

Option Courses
INFSY 578. Technology and Life Sciences (3)

Select 9 credits from:
BUSAD 534. Ethical Dimensions of Management in the Biotechnology and Health Industry (3)
BUSAD 583. Future of the Biotechnology and Health Industry: Strategic Implications (3)
INFSY 575. Seminar in Information Technology Management (3) (as approved for option by Program)
INFSY 597. Special Topics (3) (as approved for option by Program)
S T S 589. Ethics and Values in Science and Technology (3)
SWENG 552. Bioinformatics (3)

Students electing an option in the M.S.I.S. program must complete a total of 36 credits in the major to obtain the degree.

A minimum 3.0 grade-point average is required before a student is awarded an M.S. degree in Information Systems.

All course work must be completed within six years, or seven consecutive summers of matriculation.

Transfer Credits

Up to 10 transfer credits may be applied toward the degree. However, credits used to complete a previous graduate degree may not be applied. These courses must have been taken within the past five years, appear on a graduate transcript, and have been passed with a B grade or higher. It must be the opinion of the reviewing faculty that these courses are equivalent in quality to those offered at Penn State Harrisburg. Credit will not be given for any class used to complete a previous degree.

Course Substitutions

Because some students enter the Program with advanced knowledge in one or more subject areas, up to six credits in prescribed or additional courses may be replaced with more advanced graduate courses in the same subject area. Except for INFSY 554, which must be

taken at the College, INFSY prescribed and additional courses, in cases where there is equivalent knowledge, must be replaced with more advanced courses in the same field. Substitutions are based on a minimum of six credits of advanced undergraduate course work in an area of concentration or credits earned in an equivalent graduate-level program at a regionally accredited, college-level institution. These courses must have been completed within the past five years and have earned a grade of B or better. Substituted courses must be replaced with other advanced graduate courses in the field for which the substitute is the foundation/prerequisite. Substitutions are based on past academic performance. An examination cannot be used for earned graduate course credit.

Grade-Point Average and Time Limit

A 3.00 (out of 4.00) minimum grade-point average is required FOR THE AWARD OF THE M.S.I.S. degree. All course work must be completed within six years, or seven consecutive summers, of matriculation.

Financial Aid

There are a limited number of scholarships, fellowships, and research grants available, as well as several graduate assistantships. For more information on these, contact Penn State Harrisburg's School of Business Administration.

Many students work full-time and take classes part-time. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition.To find other options available to you, contact one of the following offices: Financial Aid Office, 717-948-6307 or Enrollment Services, 717-948-6250.

Graduate School Assistantships

Full time graduate students who are interested in an assistantship should contact the graduate program coordinator. Students must be nominated for an assistantship by their program coordinator.

Students applying for an assistantship should submit scores from the Graduate Management Admissions Test (GMAT), or similar examinations by January 30.

CONCURRENT DEGREE OFFERINGS WITH THE DICKINSON SCHOOL OF LAW

Penn State Harrisburg, School of Business Administration
The Dickinson School of Law

Degrees Conferred:

J.D. (Dickinson)
M.B.A. (Penn State Harrisburg)
M.S.I.S. (Penn State Harrisburg)

Concurrent Degree Programs

The Dickinson School of Law and the School of Business Administration of Penn State Harrisburg offer cooperative programs leading to the degrees of Juris Doctor (J.D.) to be granted by the Dickinson School of Law, and either the Master of Business Administration (M.B.A.) or Master of Science in Information Systems (M.S.I.S.) to be granted by Penn State Harrisburg. These concurrent degree opportunities facilitate the completion of both a law degree and a professional degree in business or information systems. The programs are designed primarily for location-bound students who enter law school with an undergraduate degree in business, information systems or related fields.

Admission Requirements

The concurrent programs require that the student first be admitted to the Dickinson School of Law. Subsequently, the student is recommended for and applies for admission to the graduate school for the Penn State Harrisburg M.B.A. program or M.S.I.S. program.

The following are required for applicants:

The Dickinson School of Law: Completed Law School application; Law School Admission Test (LSAT) score; Law School Data Assembly Service (LSDAS) report; one page personal statement; employment record since high school; two letters of recommendation.

M.B.A. And M.S.I.S. Programs: Completed Graduate School application; Graduate Management Admission Test (GMAT); letter of recommendation from the associate dean of the Dickinson School of Law; evidence of proficiency in analytic skills through college-level calculus and statistics demonstrated either by completion of courses or successful completion of a mathematics proficiency examination approved by the program; evidence of proficiency in microcomputer applications skills; proficiency in writing evidenced by a score of "4" or higher on the analytical writing assessment portion of the GMAT; proficiency in entry-level financial accounting as demonstrated by completion of college-level course work; completion of a set of pre-program business core requirements demonstrated by completion of a minimum of six credits of advanced undergraduate work in each core areas. Each course must have been completed with a grade of B or higher within seven years prior to admission to the M.B.A. or M.S.I.S. program. The School of Business Administration will review the applicant's transcripts for acceptability of the courses.

No courses from the M.B.A program or M.S.I.S. program may count toward the J.D. program until the student is matriculated at The Dickinson School of Law. However, graduate-level courses taken in either in the M.B.A. or M.S.I.S. program at Penn State Harrisburg or at another graduate-level institution may be applied to the M.B.A. or M.S.I.S. in accordance with the transfer policies of the Graduate School.

Transfer of Credits

For those students meeting the entry and pre-program requirements of the M.B.A. and M.S.I.S. programs, 30 additional credits are required. Nine credits of course work at the Dickinson School of Law may be transferred toward the M.B.A. or the M.S.I.S. degrees, subject to program approval. Students must obtain a grade satisfactory to the M.B.A. and M.S.I.S. program in order for the credits to be transferable. Nine credits of M.B.A. or M.S.I.S. courses may be transferred for credit toward the J.D. degree at the Dickinson School of Law, subject to the approval of the school of law.

Advising of Students

All students in the concurrent program have two advisers, one in the School of Business Administration and one from the faculty at the Dickinson School of Law. Because the concurrent program is designed to be taken in synchrony with the objective that both degrees will be earned simultaneously, students who do not demonstrate progress toward completion of both degrees may be denied continuation in the concurrent program. Such a decision will rest jointly with the faculties of the M.B.A. or M.S.I.S. program and the J.D. program.

Tuition

The Dickinson School Of Law and Penn State Harrisburg will each charge their own tuition to students in the J.D./M.B.A. and J.D./M.S.I.S. programs.

Additional Information

For more information and the latest updates on the concurrent programs, call the law school at 717-240-5207 or 800-840-1122, or visit the Web sites at:
http://www.dsl.psu.edu
http://www.hbg.psu.edu

CONCURRENT DEGREE OFFERINGS WITH THE PENN STATE COLLEGE OF MEDICINE, THE DEPARTMENT OF PHARMACOLOGY

Penn State Harrisburg, School of Business Administration
The Penn State College of Medicine, The Department of Pharmacology

Degrees Conferred:

Ph.D. (College of Medicine)
M.B.A. or M.S.I.S. (Penn State Harrisburg)

Concurrent Degree Programs

The Penn State College of Medicine, Department of Pharmacology, and The School of Business Administration of Penn State Harrisburg offer cooperative programs leading to the degrees of Doctor Of Philosophy (Ph.D.) to be granted by the Penn State College of Medicine, and either the Master of Business Administration (M.B.A.) or Master of Science in Information Systems (M.S.I.S.) to be granted by Penn State Harrisburg. These concurrent degree opportunities facilitate the completion of both a pharmacology doctorate and a professional degree in business administration or information systems. The programs are designed primarily for students interested in pursuing a career involving high-quality independent research and positions of management responsibility within the pharmacological community.

Admission Requirements:

The concurrent programs require that the student first be admitted to the pharmacology program. Subsequently, the student is recommended for and applies for admission to the graduate school for the Penn State Harrisburg M.B.A. or M.S.I.S. program.

The following are required for applicants:

Pharmacology: Completed application; Graduate Record Examination (GRE) Score; A bachelor's degree reflecting a reasonable background in zoology or biology, mathematics and chemistry; a minimum junior/senior grade point average of 3.00 and with appropriate course backgrounds; two letters of recommendation; a curriculum vitae; a description of career goals. Reading knowledge of one or two foreign languages is recommended.

M.B.A. and M.S.I.S. Programs: Completed Graduate School application; Graduate Management Admission Test (GMAT) score; letter of recommendation from the department chair of the pharmacology department; evidence of proficiency in analytic skills through college-level calculus and statistics demonstrated either by completion of courses or successful completion of a mathematics proficiency examination approved by the program; evidence of proficiency in microcomputer applications skills; proficiency in writing evidenced by a score of "4" or higher on the writing assessment portion of the GMAT; proficiency in entry-level financial accounting as demonstrated by completion of college-level course work; completion of a set of pre-program business core requirements demonstrated by completion of a minimum of six credits of advanced undergraduate work in each core area. Each course must have been completed with a grade of B or higher within seven years prior to admission to the M.B.A. or M.S.I.S. program. The School of Business Administration will review the applicant's transcripts for acceptability of the courses.

No courses from the M.B.A program or M.S.I.S. program may count toward the Ph.D. until the student is admitted to the Pharmacology Program. However, graduate-level courses taken in either in the M.B.A. or M.S.I.S. program at Penn State Harrisburg or at another graduate-level institution may be applied to the M.B.A. or M.S.I.S. in accordance with the transfer policies of the Graduate School.

It is anticipated that most students in the concurrent programs will require additional graduate credits in order to satisfy the entry and pre-program requirements in business administration. Nine credits of course work in pharmacology may be transferred toward the M.B.A. or M.S.I.S. Students must obtain a grade satisfactory to the program in order for the credits to be transferable. Nine credits of M.B.A. or M.S.I.S. course work may be transferred for credit toward the Ph.D. degree, subject to the approval of the department of pharmacology.

All students in the concurrent program have two advisers, one in the School of Business Administration and one from the faculty in the department of Pharmacology. Because the concurrent program is designed to be taken in synchrony with the objective that both degrees will be earned simultaneously, students who do not demonstrate progress toward completion of both degrees may be denied continuation in the concurrent program. Such a decision will rest jointly with the faculties of the M.B.A. or M.S.I.S. and the Ph.D. programs.

The Course Matrix

For more information and the latest updates on the concurrent programs, call the department of pharmacology at 717-531-8285 or visit the Web sites at:
http://www.hmc.psu/pharmacology_.program.index.html (Opens New Window)
http://www.hbg.psu.edu (Opens New Window)

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

nxc1@psu.edu

Degrees Conferred:

Ph.D., D.Ed., M.S., M.Ed. (Penn State University Park); M.S., M.Ed. (Penn State Great Valley)

The Graduate Faculty

- Alison A. Carr-Chellman, Ph.D. (Indiana) *Professor of Education*
- Roy B. Clariana, Ed.D. (Memphis) *Professor of Education*
- Barbara L. Grabowski, Ph.D. (Penn State) *Professor of Education*
- Simon R. Hooper, Ph.D. (Penn State) *Associate Professor of Education*
- Susan M. Land, Ph.D. (Florida State) *Associate Professor of Education*
- Doris Lee, Ph.D. (Texas) *Associate Professor of Education*
- Orrin Murray, Ph.D. (Michigan) *Assistant Professor of Educaiton*
- Kyle L. Peck, Ph.D. (Colorado) *Professor of Education*
- Priya Sharma, Ph.D. (Georgia) *Associate Professor of Education*
- Heather Zimmerman, Ph.D. (Washington) *Assistant Professor of Education*

This program provides advanced professional preparation in the development of effective, efficient instructional materials and the use of technology in educational settings. Skill and knowledge in the fields of educational psychology, instructional design, computer technologies, development of educational materials, and evaluation of educational outcomes combine to prepare graduates for a variety of roles and professional environments. Graduates are employed by corporate, agency, and military training departments; entrepreneurial consulting companies; public school districts, community college learning resource centers, and colleges and universities. At the University Park campus, the program offers an M.S. degree for students who will continue into the Ph.D. program and a career in higher education, and two options within the M.Ed., Instructional Systems Design and Educational Technology. At Penn State Great Valley (Opens New Window), the program offers the M.S. and M.Ed. degrees listed above, as well as M.Ed. degrees with corporate Training Design and Development and Leadership in Technology Integration emphases.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) (for master's or doctorate) or Miller Analogies Test (for master's), transcripts, letters of reference, application letter, and writing assignment are required for admission.

Master's Degree Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*. For the M.S. degree, EDPSY 400 or its equivalent is prerequisite. M.Ed. and M.S. candidates are expected to complete the following courses: INSYS 415, INSYS 521, INSYS 522, INSYS 525 or INSYS 527, four INSYS emphasis courses, and 6 credits of professional orientation in Educational Psychology, Educational Administration, Workforce Education and Development, and/or Adult Education. Other courses may be substituted with approval from the candidate's adviser. The Leadership in Technology Integration emphasis requires INSYS 471 instead of INSYS 521.

The M.S. degree requires: as core courses INSYS 415 and EDPSY 421; as required courses INSYS 575 or EDPSY 475, and 6 credits of INSYS 600/610; and a master's project paper, internship and paper, or design apprenticeship.

The M.Ed. Instructional Systems Design option requires: as core courses INSYS 415, INSYS 521, INSYS 522, and INSYS 525; as required courses , INSYS 527, and EDPSY 421; and a master's project paper, internship and paper, or design apprenticeship.

The M.Ed. with an Educational Technology option requires: as core courses INSYS 415 and EDPSY 421; as required courses AEE 521 or STAT 500; EDTEC 448, EDTEC 561, EDTEC 562; EDTEC 566 or EDTEC 566; and EDTEC 567; and a master's paper documenting the effectiveness of a technology-related intervention in an educational setting.

Doctoral Degree Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*. In addition to those requirements for a master's degree, D.Ed. and Ph.D. candidates are expected to complete the following courses: EDPSY 421, two doctoral CORE courses (INSYS 581, INSYS 583, or INSYS 586), 12 credits of Instructional Systems emphasis courses, and a 15-credit minor or supporting field.

The Ph.D. candidate is expected to complete four research design courses covering both quantitative and qualitative methods. The communication requirement must be satisfied by completing one course in applied statistics, and either one course in advanced statistics or one course in advanced qualitative data analysis. The Ph.D. candidate is also expected to complete a research apprenticeship working directly with a faculty member.

The D.Ed. candidate is expected to complete two research design courses, choosing from experimental, qualitative, or survey research design, and a 9- to 15-credit internship.

As part of the candidacy exam, candidates are required to prepare residency plans indicating how they will be professionally immersed during their residency period. This plan is then reviewed again prior to graduation.

Candidates for doctoral degrees with a minor in Instructional Systems must take a minimum of 15 credits approved in advance by the professor in charge of the Instructional Systems program.

Student Aid

A limited number of graduate assistantships are available to students in this program. These and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degree Conferred:

Ph.D.gradinfo@huck.psu.edu

The Integrative Biosciences Graduate Faculty

- Raj Acharya, Ph.D. (Minnesota) Professor of Computer Science and Engineering
- Hiroshi Akashi, Ph.D. (Chicago) Assistant Professor of Biology
- Reka Albert, Ph.D. (Notre Dame) Assistant Professor of Physics
- Naomi Altman, Ph.D. (Stanford) Associate Professor of Statistics
- Sarah Assmann, Ph.D. (Stanford) Professor of Biology
- Stephen Benkovic, Ph.D. (Cornell) Evan Pugh Professor and Eberly Chair in Chemistry
- Piotr Berman, Ph.D. (MIT) Associate Professor of Computer Science and Engineering
- Maria Bewley, Ph.D. (University of Leeds) Assistant Professor of Biochemistry
- Judith Bond, Ph.D. (Rutgers) Professor and Chair, Biochemistry and Molecular Biology
- Donald Bryant, Ph.D. (California, Los Angeles) Ernest C. Pollard Professor of Biotechnology, and Professor of Biochemistry and Molecular Biology
- John Carlson, Ph.D. (Illinois) Professor of Molecular Genetics; Director, Schatz Center for Tree Molecular Genetics
- Laura Carrel, Ph.D. (Stanford Reserve) Assistant Professor of Biochemistry and Molecular Biology
- Douglas Cavener, Ph.D. (Georgia) Professor of Biology
- Francesca Chiaromonte, Ph.D. (Minnesota) Associate Professor of Statistics
- Keith Cheng, M.D.; Ph.D. (NYU; U Washington) Professor of Pathology; Adjunct Professor of Biochemistry and Molecular Biology
- Surinder Chopra, Ph.D. (Vrje U of Brussels, Belgium) Associate Professor of Maize Genetics
- Michael Chorney, Ph.D. (Cornell, Sloan Kettering Cancer Center) Professor of Microbiology
- Daniel Cosgrove, Ph.D. (Stanford) Professor of Biology
- Claude de Pamphilis, Ph.D. (Georgia) Associate Professor of Biology
- Nina Fedoroff, Ph.D. (Rockefeller) Willaman Professor of Life Sciences; Director, Biotechnology Institute
- Gregory Ferry, Ph.D. (Illinois) Stanley Person Professor of Molecular Biology
- John Flanagan, Ph.D. (Tennessee) Professor of Biochemistry and Molecular Biology
- Majid R. Foolad, Ph.D. (California, Davis) Professor of Plant Genetics
- David Geiser, Ph.D. (Georgia) Associate Professor of Plant Pathology
- Channe Gowda, Ph.D. (Mysore, India) Professor of Biochemistry and Molecular Biology
- Mark Guiltinan, Ph.D. (California, Irvine) Professor of Plant Molecular Biology; Director, Endowed Program in the Molecular Biology of Cocoa
- Ross Hardison, Ph.D. (Iowa) Professor of Biochemistry
- Terryl J. Hartman, Ph.D.; M.P.H., (Minnesota; Harvard School of Public Health) Assistant Professor of Nutrition
- S. Blair Hedges, Ph.D. (Maryland) Professor of Biology
- Christopher H. House, Ph.D. (California) Associate Professor of Geosciences
- Peter Hudson, F.R.S. (UK) Willaman Professor of Biology
- Leonard Jefferson, Ph.D. (Vanderbilt) Evan Pugh Professor; Chair of Cellular and Molecular Physiology
- Byron Jones, Ph.D. (Arizona) Professor of Biobehavioral Health and Pharmacology
- Seogchan Kang, Ph.D. (Wisconsin) Associate Professor of Plant Pathology
- Teh-hui Kao, Ph.D. (Yale) Professor of Biochemistry and Molecular Biology
- Ermine Koc, Ph.D. (New Mexico State) Assistant Professor of Biochemistry and Molecular Biology
- Kathryn LaNoue, Ph.D. (Yale) Professor of Cellular and Molecular Physiology
- Arthur Lesk, Ph.D. (Princeton) Professor of Biochemistry and Molecular Biology
- Jia Li, Ph.D. (Stanford) Associate Professor of Statistics
- Bruce G. Lindsay, Ph.D. (Washington) Willaman Professor and Head of Statistics
- Hong Ma, Ph.D. (MIT) Professor of Biology
- George Makhatadze, Ph.D. (Moscow Physico-Technical Institute) Professor of Biochemistry and Molecular Biology
- Kateryna Makova, Ph.D. (Texas Tech) Assistant Professor of Biology
- Costas Maranas, Ph.D. (Princeton) Professor of Chemical Engineering
- Timothey McNellis, Ph.D. (Yale) Assistant Professor of Plant Pathology
- Webb C. Miller, Ph.D. (Washington), Professor of Biology and Computer Science and Engineering
- Kathleen Mulder, Ph.D. (SUNY, Buffalo) Professor of Pharmacology
- Masatoshi Nei, Ph.D. (Kyoto University, Japan) Evan Pugh Professor of Biology
- Anton Nekrutenko, Ph.D. (Texas Tech) Assistant Professor of Biochemistry and Molecular Biology
- Karl M. Newell, Ph.D. (Illinois) Professor of Kinesiology and Biobehavioral Health
- Randen Patterson, Ph.D. Assistant Professor of Biology
- Anthony Pegg, Ph.D. (Cambridge) Evan Pugh Professor of Cellular and Molecular Physiology, and Pharmacology; J. Lloyd Huck Professor of Cell and Molecular Biology
- B. Franklin Pugh, Ph.D. (Wisconsin, Madison) Associate Professor of Biochemistry and Molecular Biology
- Calyampudi Rao, Sc.D. (Cambridge) Eberly Professor Emeritus of Statistics
- W. Brian Reeves, M.D. (Thomas Jefferson) Staff Physician
- Gavin Robertson, Ph.D. (California, Riverside) Associate Professor of Pharmacology
- Ira Ropson, Ph.D. (Johns Hopkins) Associate Professor of Biochemistry and Molecular Biology
- James Rosenberger, Ph.D. (Cornell) Professor of Statistics
- Stephen Schaeffer, Ph.D. (Georgia) Associate PRoefessor of Biology
- Cara-Lynne Schengrund, Ph.D. (Seton Hall) Professor of Biochemistry and Molecular Biology
- Stephan Schuster, Ph.D. (University of Munich, Germany) Professor of Biochemistry and Molecular Biology
- Cooduvalli Shashikaut, Ph.D. (Osmania University, India) Associate Professor of Molecular and Developmental Biology

- Mark Shriver, Ph.D. (U of Texas Health Science Center) Associate Professor of Anthropology
- Thomas Spratt, Ph.D. (Chicago) Associate Professor of Biochemistry
- Jack Vanden Heuvel, Ph.D. (Wisconsin) Professor of Molecular Toxicology
- David J. Vandenbergh, Ph.D. (Penn State) Associate Professor of Biobehavioral Health
- George Vogler, Ph.D. (Colorado, Boulder) Professor of Biobehavioral Health
- Kent Vrana, Ph.D. (Louisiana State) Medical Center Professor and Chair of Pharmacology
- James Wang, Ph.D. (Stanford) Associate Professor of Information Sciences and Technology
- Kenneth Weiss, Ph.D. (Michigan) Evan Pugh Professor of Anthropology and Genetics

Calling upon the expertise of more than seventy faculty members representing twenty-seven different departments among eight different colleges between two different campuses, the Integrative Biosciences (IBIOS) Graduate Program offers a unique opportunity to learn about and work in multiple disciplines. This graduate education component of the Huck Institutes of the Life Sciences is supported by modern telecommunications facilities and equipment. Doctoral students not only explore new conceptual connections, but also engage in active group learning experiences and explore a variety of potential career opportunities before graduation. Two unique aspects are (1) dual mentors who will expose students to complementary viewpoints and encourage students to pursue problems at the interface between traditional disciplines, and (2) an optional internship that provides a mechanism for students to obtain “real world” experience in future professional settings.

The program offers the following areas of research emphasis (called options): Bioinformatics and Genomics, and Chemical Biology.

General Admission Requirements

Faculty begin reviewing applications December 1.

1. Completed official Penn State Graduate School application
2. Paid nonrefundable application fee ($45 U.S.)
3. Two official transcripts from each institution attended
4. Completed Integrative Biosciences Graduate Degree Program application
5. Application for a U.S. visa (International applicants only)
6. Graduate Record Examinations (GRE) general test
7. Three letters of recommendation
8. Statement of goals that pertains to the life sciences
9. All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) examination. A minimum TOEFL score of 600 on the paper test, 250 on the computer-based test, or 100 (including 23 on the speaking component) on the Internet-based test is required.
10. Students must have completed a bachelor's degree at an accredited college or university and have a minimum of a 3.0/4.0 junior/senior undergraduate grade-point average.

Prescribed (Required) Courses:

1. Foundation of basic knowledge in molecular biology, cell biology, biochemistry, and computational methods in the life sciences. The IBIOS Graduate Program expects at least 6 credits (or the equivalent) in one or more of these disciplines, taken either as an undergraduate or as a part of the graduate curriculum. The specific courses are left to the discretion of each option.
2. IBIOS 590 COLLOQUIUM (4 credits, 2 per semester during any of the first four semesters in residence), a monthly colloquium that will present life science topics of general interest to all faculty and graduate students in the Huck Institutes of the Life Sciences.
3. IBIOS 591 ETHICS IN LIFE SCIENCES (1 credit), an examination of integrity and misconduct in life sciences research, including issues of data collection, publication, authorship, and peer review.
4. IBIOS 595 INTERNSHIP (optional, 1 credit), an external work assignment relevant to individual research or career goals. (Register for IBIOS 595 in 520 Thomas Building)
5. IBIOS 596 INDIVIDUAL STUDIES: Laboratory Rotations (1-3 credits per semester, depending upon option)
6. IBIOS 600 THESIS RESEARCH (variable credits)
7. IBIOS 601 Ph.D. DISSERTATION FULL-TIME (0 credits)
8. IBIOS 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING (1 credit each semester), two semesters or the equivalent is required after the first year in residence. International Fellows must pass an English proficiency exam before teaching.

The Graduate School requires all graduate students to maintain a 3.0 grade-point average. Individual options may require a higher GPA.

Students must present their thesis in accordance with the Penn State guidelines as described in the *THESIS GUIDE Requirements for the Preparation of Master's and Doctoral Theses*. Current copies may be obtained from the web site www.gradsch.psu.edu/current/thesisguide or the Thesis Office, 115 Kern Building, University Park, PA 16802; 814-865-5448.

Elective courses. Studenst may select any 400- to 500-level courses pending approval by the Faculty Mentor and the Option Director - available elective courses vary from year to year.

BIOINFORMATICS AND GENOMICS (BG) OPTION

College of Medicine (Hershey)
Prescribed (Required) Courses:

- IBIOS stable number Genomics (3 credits), currently offered as 598B, a special topics course. Videoconferenced between UP and COM
- GEN 520. Genetics (Offered at COM and now planned to be videoconferenced between COM and UP.)
- BCHEM 502. Biological Chemistry (3 credits)
- IBIOS 591. Ethics (1 credit)
- IBIOS 590. Colloquium (1 credit)
- HES 615. Statistical Genetics
- CMBIO 520. Genetic Analysis (3 credits)
- Electives: Choose at least three credits from courses that support the chosen thesis research.

University Park
Prescribed (Required) Courses:

- IBIOS stable number Genomics (3 credits), currently offered as 598B, Bioinformatics I - BIOL 597F, CSE/STAT 598 (3 credits)

- IBIOS 591. Ethics (1 credit)
- IBIOS 590. Colloquium (1 credit)
- Electives. Choose at least three credits from the following courses.
  - BIOL 597F, CSE 598F, STAT 597F Bioinformatics II
  - GEN 520. Genetics (Offered at COM and now planned to be videoconferenced between COM and UP.)
  - STAT 597D. Genometrics
  - BIOL 497D. Practical Bioinformatics
  - BIOL 497G/597G. Computer Programming in C: Biological Applications
  - BIOL 505. Statistical Methods in Evolutionary Genetics
  - B M B 597C. Computers for biochemists and molecular biologists
  - CSE 598E, STAT 597E. Data Mining

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- James Adair, Ph.D. Professor of Materials Science and Engineering
- Dinish K. Agrawal, Ph.D. Professor of Materials
- David L. Allara, Ph.D. Professor of Materials Science and Chemistry
- Harry L. Allcock, Ph.D. Evan Pugh Professor of Chemistry
- Maurice F. Amateau, Ph.D. Professor of Engineering Science and Mechanics
- S. Ashok, Ph.D. Professor of Engineering Science
- John V. Badding, Ph.D. Assistant Professor of Chemistry
- Andrzej R. Badzian, Ph.D. Professor of Materials
- Charles Bakis, Ph.D. Associate Professor of Engineering Science and Mechanics
- Jayanth R. Banavar, Ph.D. Professor of Physics
- Anthony Baratta, Ph.D. Professor of Nuclear Engineering
- Uma Belegundu, Ph.D. Research Associate in Materials
- Amar S. Bhalla, Ph.D. Professor of Materials and Electrical Engineering
- William R. Bitler, Ph.D. Professor Emeritus of Metallurgy
- Paul R. Blankenhorn, Ph.D. Professor of Wood Technology
- Andre L. Boehman, Ph.D. Associate Professor of Fuel Science
- Susan L. Brantley, Ph.D. Associate Professor of Geosciences
- Paul W. Brown, Ph.D. Professor of Materials Science and Engineering
- Wenwu Cao, Ph.D. Professor of Mathematics, and Materials Research
- Gary L. Catchen, Ph.D. Professor of Nuclear Engineering
- Moses H. W. Chan, Ph.D. Evan Pugh Professor of Physics
- Subhash Chander, Ph.D. Professor of Mineral Processing
- Long-Qing Chen, Ph.D. Professor of Materials Science and Engineering
- Ralph Colby, Ph.D. Professor of Materials Science and Engineering
- Milton W. Cole, Ph.D. Distinguished Professor of Physics
- Lance Collins, Ph.D. Professor of Chemical Engineering
- Robert W. Collins, Ph.D. Professor of Physics and Materials Research
- Joseph C. Conway, Jr., Ph.D. Professor of Engineering Science and Mechanics
- Vincent Crespi, Ph.D. Professor of Physics
- L. Eric Cross, Ph.D. Evan Pugh Professor Emeritus of Electrical Engineering
- Paul H. Cutler, Ph.D. Professor Emeritus of Physics
- Makunda B. Das, Professor Emeritus of Electrical Engineering
- Tarasankar DebRoy, Ph.D. Professor of Materials Science and Engineering
- Elizabeth Dickey, Ph.D. Assistant Professor of Materials Science and Engineering
- Renee D. Diehl, Ph.D. Professor of Physics
- Joseph P. Dougherty, Ph.D. Associate Professor of Materials and Electrical Engineering
- Moustafa El-Gindy, Ph.D. Senior Research Associate in Mechanical Engineering
- Renata S. Engel, Ph.D. Professor of Engineering Science and Mechanics
- Wolfgang E. Ernst, Ph.D. Professor of Physics and Chemistry
- Kristen A. Fichthorn, Ph.D. Professor of Chemical Engineering and Physics
- Stephen J. Fonash, Ph.D. Kunkle Chair; Professor of Engineering Science
- Barbara J. Garrison, Ph.D. Shapiro Professor of Chemistry
- Randall German, Ph.D. Brush Chair; Professor of Materials
- Venkatraman Gopalan, Ph.D. Assistant Professor of Materials Science and Engineering
- Eark K. Graham, Jr., Ph.D. Professor of Geosciences
- David J. Green, Ph.D. Professor of Ceramic Science and Engineering
- Michael K. Grutzeck, Ph.D. Professor of Materials
- Ruyan Guo, Ph.D. Associate Professor of Electrical Engineering
- Ian R. Harrison, Ph.D. Professor of Polymer Science
- Donald Heaney, Ph.D. Research Associate in Materials
- John R. Hellmann, Ph.D. Associate Professor of Ceramic Science and Engineering
- Paul R. Howell, Ph.D. Professor of Metals Science and Engineering
- Thomas N. Jackson, Ph.D. Professor of Electrical Engineering
- Gerald G. Johnson, Ph.D. Associate Professor Emeritus of Computer Science and Engineering
- Sridhar Komarneni, Ph.D. Professor of Clay Mineralogy
- Iam-Choo Khoo, Ph.D. Professor of Electrical Engineering
- Donald A. Koss, Ph.D. Professor of Metals Science and Engineering
- Sanat Kumar, Ph.D. Professor of Materials Science and Engineering
- Kenneth K. Kuo, Ph.D. Distinguished Professor of Mechanical Engineering
- Peter Labosky, Ph.D. Professor of Wood Science and Technology
- Akhlesh Lakhtakia, Ph.D. Professor of Engineering Science and Mechanics
- Michael Lanagan, Ph.D. Associate Professor of Materials Science and Engineering
- George A. Lesieutre, Ph.D. Professor of Aerospace Engineering
- Qi Li, Ph.D. Associate Professor of Physics
- Ying Liu, Ph.D. Associate Professor of Physics
- Zi-Kiu Liu, Ph.D. Assistant Professor of Materials Science and Engineering
- Digby D. Macdonald, Ph.D. Professor of Materials Science and Engineering

- Thomas E. Mallouk, Ph.D. DuPont Professor of Materials Chemistry
- Harvey Manbeck, Ph.D. Distinguished Professor of Agricultural Engineering
- Evangelos Manias, Ph.D. Virginia and Philip L. Walker Faculty Fellow; Assistant Professor of Materials Science and Engineering
- William D. Mark, Professor of Mechanical Engineering; Senior Scientist
- Theresa S. Mayer, Associate Professor of Electrical Engineering
- Julian D. Maynard, Jr., Distinguished Professor of Physics
- Russell F. Messier, Professor of Engineering Science and Mechanics
- Gary L. Messing, Professor of Ceramic Science and Engineering; Head, Materials Science and Engineering
- Suzanne E. Mohney, Ph.D. Associate Professor of Materials Science and Engineering
- Arthur M. T. Motta, Ph.D. Associate Professor of Nuclear Engineering
- Karl T. Mueller, Ph.D. Associate Professor of Chemistry
- Michael J. Natan, Ph.D. Professor of Chemistry
- Robert N. Pangborn, Ph.D. Professor of Engineering Mechanics; Associate Dean
- Carlo Pantano, Ph.D. Distinguished Professor of Materials Science and Engineering; Director, Materials Research Institute
- Seung-Eek Park, Ph.D. Professor of Materials
- Howard W. Pickering, Ph.D. Distinguished Professor of Metals Science and Engineering
- Lawrence J. Pilione, Ph.D. Professor of Physics
- V. M. Puri, Ph.D. Professor of Agricultural Engineering
- Richard A. Queeney, Ph.D. Professor of Engineering Mechanics
- Ljubisa R. Radovic, Ph.D. Associate Professor of Fuel Science
- Clive A. Randall, Ph.D. Professor of Materials Science and Engineering
- Asok Ray, Ph.D. Professor of Mechanical Engineering
- Joan M. Redwing, Ph.D. Assistant Professor of Materials Science and Engineering
- Joseph L. Rose, Ph.D. Paul Morrow Professor of Engineering Science and Mechanics
- Della M. Roy, Ph.D. Professor Emerita of Materials Science
- Rustum Roy, Ph.D. Evan Pugh Professor Emeritus of the Solid State
- James P. Runt, Ph.D. Professor of Polymer Science
- Clayton O. Ruud, Ph.D. Professor of Industrial Engineering
- Earle Ryba, Ph.D. Associate Professor of Metallurgy
- Nicholas J. Salamon, Ph.D. Professor of Engineering Science and Mechanics
- Nitin Samarth, Ph.D. Professor of Physics
- Robert J. Santoro, Ph.D. Professor of Mechanical Engineering
- Barry E. Scheetz, Ph.D. Professor of Materials, Civil and Environmental Engineering, and Nuclear Engineering
- Darrell G. Schlom, Ph.D. Associate Professor of Materials Science and Engineering
- Harold Schobert, Ph.D. Professor of Fuel Science
- Barbara Shaw, Ph.D. Associate Professor of Engineering Science and Mechanics; Chair, Intercollege Graduate Program in Materials
- Thomas R. Shrout, Ph.D. Professor of Materials
- Michael R. Silsbee, Ph.D. Associate Professor of Materials
- George Simkovich, Ph.D. Professor Emeritus of Metallurgy
- Jogender Singh, Ph.D. Professor of Metals Science; Senior Scientist
- Deane K. Smith, Ph.D. Professor Emeritus of Mineralogy
- Paul Sokol, Ph.D. Professor of Physics
- Karl E. Spear, Ph.D. Professor Emeritus of Materials Science and Engineering
- Donald B. Thompson, Ph.D. Professor of Food Science
- Bernhard R. Tittmann, Ph.D. Schell Professor of Engineering Science and Mechanics
- Richard E. Tressler, Ph.D. Professor Emeritus of Materials Science and Engineering
- Susan Troiler-McKinstry, Ph.D. Corning Faculty Fellow and Professor of Ceramic Science and Engineering
- Kenji Uchino, Ph.D. Professor of Electrical Engineering
- M. Urquidi-Macdonald, Ph.D. Professor of Engineering Science and Mechanics
- Vasundara V. Varadan, Ph.D. Distinguished Alumni Professor of Engineering Science and Mechanics, and Electrical Engineering
- Vijay Varadan, Ph.D. Distinguished Alumni Professor of Engineering Science and Mechanics, and Electrical Engineering
- Robert C. Voight, Ph.D. Professor of Industrial Engineering
- William B. White, Ph.D. Professor of Geochemistry
- Roy F. Willis, Ph.D. Professor of Physics
- Nicholas Winograd, Ph.D. Evan Pugh Professor of Chemistry
- Christopher R. Wronski, Ph.D. Leonhard Professor of Electrical Engineering
- Xiaoxing Xi, Ph.D. Associate Professor of Physics
- Qiming Zhang, Ph.D. Professor of Electrical Engineering
- Gregory R. Ziegler, Ph.D. Associate Professor of Food Science

The aim of the intercollege program in Materials is to provide an opportunity for the student interested in the structure, properties, and behavior of solid materials to obtain an integrated program of courses encompassing both the necessary fundamentals of chemistry, physics, and mathematics and their technological and engineering applications.

The program is designed to encourage graduate study and research that cut across the traditional engineering disciplines and scientific inquiry related to materials. Faculty members associated with the program come from several colleges and many research centers at the University.

In order to maintain focus for the selection of core courses and for the administration of the comprehensive examination, formal options have been established (i.e., Materials Science and Materials Engineering). These options differ in the specification of core courses and in the focus of the research. Other program requirements are common for the two options.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are recommended but not required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Entering students should hold a bachelor's degree in chemistry, physics, mathematics, geological science, engineering, ceramics, or metallurgy, or in a closely related field that will have included in it mathematics at least through integral calculus and a minimum of one year of physics and one year of chemistry. Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. Exceptions to the 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. The applicant should be interested specifically in an interdisciplinary program of study and research.

Master's Degree Requirements

The program for the M.S. degree must include a total of 30 credits as outlined in the GENERAL INFORMATION section of the *Graduate Bulletin*. The candidate must prepare a thesis proposal and list of courses for approval by the program faculty constituting the student's M.S. committee. A thesis describing original work performed by the student shall be written and defended before the M.S. committee.

Doctoral Degree Requirements

Acceptance into the Ph.D. program is based on the student's performance on the Ph.D. candidacy exam administered by a rotating committee of program faculty. The examination is designed to evaluate the student's potential for original and successful Ph.D. research and is composed of a written proposal and oral presentation. Detailed plans for thesis research and course work consistent with the student's declared option are to be presented to the Ph.D. committee following successful completion of the candidacy exam, and the student is to present periodic progress reports to the committee until the thesis is defended. Near the end of the period of formal course work, each student will take a comprehensive exam. The examination consists of a written part administered by a rotating committee of program faculty, based on specific areas of knowledge depending on the chosen option, and an oral part, administered by the candidate's Ph.D. committee, that will emphasize an understanding of both fundamentals and the student's area of specialization. At the culmination of the Ph.D. research experience, each candidate must write a thesis, present it to his/her Ph.D. committee, and defend it at a public, oral presentation, followed by an examination by the committee. All candidates must demonstrate proficiency in English in both written and oral form, which is established formally in conjunction with the candidacy exam.

Other Relevant Information

Seminar series are offered on various materials topics under the course listing MATL 590 Colloquium, and students are encouraged to enroll in these courses or to take materials-related seminar courses offered by other departments. The program offers instruction on special topics under the designation MATL 597, or students may explore such areas individually under a faculty member's supervision, receiving credit under the designation MATL 596.

Thesis research on various aspects of the solid state may be conducted in the Intercollege Materials Research Laboratory, Applied Research Laboratory, or appropriate departments in the Colleges of Earth and Mineral Sciences, Engineering, or Science. A wide variety of experimental facilities for materials research are available.

Student Aid

Assistance is provided by the program office in identifying and applying for fellowships and scholarships from internal and external sources, and in facilitating linkages with faculty and units that can offer support in the form of graduate assistantships for research in specific topical areas. These and other types of financial aid are described in the STUDENT AID section of the*Graduate Bulletin*.

- Eileen Trauth, Ph.D. (Pittsburgh) *Professor of Information Sciences and Technology*
- Mirna Urquidi-MacDonald, Ph.D. (Paris-Sud) *Professor of Engineering Science and Mechanics*

The School of International Affairs (SIA) is designed to prepare students for occupations involving public service, private enterprise, nonprofit organizations, and international organizations worldwide. The Master's in International Affairs (MIA) degree program will provide students with a substantial knowledge base in international systems, institutions, issues and history and the advanced analytical tools and cross-cultural skills and competencies necessary for these occupations. Students will work closely with faculty to design a curriculum around their core course work, which incorporates a functional or regional theme and provides the opportunity to apply and enhance the core knowledge component with a thematically based set of graduate courses from across Penn State's existing graduate and professional curriculum.

Admission Requirements

Admission to the MIA degree program will require: (i) a bachelor's degree from a U.S. regionally accredited institution or (ii) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution. All applicants will submit GRE scores, two letters of recommendation and a personal statement addressing their reasons for pursuing a graduate degree in international affairs and discussing their plans and goals.

International applicants whose native language is not English will submit a satisfactory TOEFL or IELTS score from a test taken within two years of application. A satisfactory TOEFL score is 550 or above on the paper test, 213 or above on the computer-based test or 80 or above on the new internet-based test (with a minimum of 23 points on the new speaking portion). A satisfactory IELTS score is a minimum composite score of 6.5. If the applicant's qualifying degree is from a country where English is the native language and the degree is from an institution where English is the language of instruction, the applicant may apply for an exemption from these requirements.

Admissions will be based on a review of all submitted materials and spaces will be offered to the best qualified applicants, taking into account academic achievement, relevant work experience and other indices of aptitude for advanced study in international affairs.

Master's Degree Requirements

M.I.A. degree candidates must take a total of 30 units of graduate credit, including 18 credits of required core courses. M.I.A. degree candidates must take the six core courses described below plus an additional 12 credits or more of graduate level course work with a faculty-approved theme and content. The six courses that compose the core curriculum of the M.I.A. are: (i) INTAF 801, (ii) INTAF 802, (iii) INTAF 803, (iv) INTAF 804, (v) INTAF 805, and (vi) INTAF 590.

Students will choose their elective courses, with faculty guidance, from a substantial list of graduate courses. The advanced course work usually will be clustered around areas of concentration designated by the SIA's Faculty Governing Council, but students also will be permitted to design an independent interdisciplinary curriculum with faculty approval. The areas of concentration will take advantage of Penn State's rich graduate curriculum by aggregating in appropriate thematic clusters pre-existing and specially created graduate-level classes.

In addition to the core curriculum and elective courses, degree candidates must complete either: (i) a master's paper or (ii) a supervised internship placement. If the first option is chosen and the candidate opts to complete a paper, he or she must enroll in 3 credits of INTAF 594. The master's paper will involve integrating and showing mastery of the subject matter of the student's curricular emphasis, and may also involve original research. If the second option is chosen, the candidate will enroll in 3 credits of INTAF 595. The student will participate in a supervised internship placement of sufficient depth and professionalism that would allow the student to experience the integration of their curricular studies in an actual professional environment. A reflective paper will be submitted as a part of this credit requirement.

In order to graduate, students also will need to demonstrate proficiency in a language other than English. Proficiency will be defined as follows: (i) four semesters of a Penn State language *sequence* or its equivalent (15 credits); (ii) native acquisition, as shown by the candidate's personal history and approved by the SIA faculty; or (iii) performance on a proficiency evaluation sufficient to equal four semesters of language learning: for this purpose, either Penn State's proficiency certification process*(described below)* or another pre-approved proficiency *assessment* may be used.

Penn State's language proficiency certification process, for students seeking a noncredit evaluation of their proficiency in languages other

than English, is established by the School of Languages and Literatures (SLL) and is described briefly as follows. Requests are submitted to the department that offers the language curriculum, on a form available on the SLL website, at least three weeks prior to the time when the certification will be needed. It is not guaranteed that all requests for evaluation will be fulfilled; for example, a tester may not be available. If the language department cannot fulfill the request for an evaluation, the student will be notified and can seek alternative means of documenting proficiency (such as taking an external standardized exam in the language). If the language department can fulfill the request, an evaluation fee (currently $60) must be paid before the evaluation occurs.

Joint Degree Program between The Pennsylvania State University Dickinson School of Law (J.D.) and the School of International Affairs (M.I.A.)

Joint Degree Program:

The Dickinson School of Law (DSL) and the School of International Affairs (SIA) are offering a joint degree program that will enable a student to complete in four academic years both a Juris Doctor degree (J.D.) and a Master's in International Affairs (M.I.A.). A J.D./M.I.A. graduate will have the education and skills background to practice law in the United States, to work in an international context and to assume a leadership role in international affairs. The student will complete a minimum of 109 credits including eleven required law courses, two of which involve skills training, and seven required international affairs courses, one of which involves either an internship or a master's paper.

Admission Requirements

Students applying to the joint degree program must be admitted separately into both DSL and SIA. Students must first be admitted into the law school and will always complete their first two semesters in law before commencing the M.I.A. component. Credits earned towards an M.I.A. prior to entry into DSL will not be credited towards the J.D.

College Specific Admission Requirements

DSL: The DSL admissions process considers academic transcripts, leadership activities, community activities, work experience, personal background, letters of recommendation, the personal statement, LSAT scores and the LSAT writing sample. An admissions committee identifies candidates who are academically prepared for law study and who will contribute to the promotion of diversity and excellence in the student body and the legal profession. There is no standard prescribed undergraduate curriculum. The following are required of J.D. degree applicants: a completed application form, an LSAT score, an LSDAS report, a one-page personal statement and two letters of recommendation.

SIA: The following are required of M.I.A. applicants: (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution. There is no standard prescribed undergraduate curriculum. All applicants will submit GRE scores, two letters of recommendation and a personal statement addressing their reasons for pursuing a graduate degree in international affairs and discussing their plans and goals. Upon the student's request, the LSAT may replace the GRE for joint degree admissions purposes.

International applicants who are applying to the Joint Degree program, and who do not qualify for the English exemption, must provide a satisfactory English test score. Joint degree applicants will be required to achieve a minimum TOEFL score of 575 on the paper test, 230 on the computer-based test or 88 on the internet-based test (with a minimum speaking score of 20); a minimum of 6.5 on the IELTS will also be acceptable.

Residency

A typical J.D./M.I.A. joint degree student will be in residence at DSL for six semesters and at SIA for two semesters.

Liaisons

The respective liaisons for DSL and SIA shall be as follows: the department and faculty liaisons for DSL shall be the Associate Dean for Academic Affairs and the student adviser will be the Associate Dean for Academic Affairs or such other faculty member(s) as may be designated by the Dean. The liaison for SIA shall be the Director or such faculty member(s) as may be designated by the Director.

Interprogram Transfer of Credits

DSL: A maximum of nine credits for M.I.A. course work may be transferred for credit toward the J.D. degree at DSL. Courses eligible for cross-counting towards the J.D. and M.I.A. include the courses on the M.I.A. Electives list (Appendix A-31) and any other courses taken as M.I.A. electives with the express written permission of the M.I.A. and J.D. advisers. Students must obtain a grade satisfactory to DSL for the course work to be credited towards the J.D. degree.

SIA: Because of the interdisciplinary nature of the M.I.A. degree, courses taken in DSL as a part of the elective component of the M.I.A. automatically count towards the M.I.A. Courses eligible for cross-counting towards the J.D. and M.I.A. include the courses on the M.I.A. Electives list (Appendix A-31) and any other courses taken as M.I.A. electives with the express written permission of the M.I.A. and J.D. advisers.

Sequence

The sequence of courses will be determined by the students and their advisers. However, students are required to complete the first year of the DSL program before beginning the M.I.A. program. It is expected that most joint degree students will complete the first two semesters of the M.I.A. consecutively in either the first or second year after completion of the first year of the J.D. degree.

Recommended Program of Study and Advising

All students in the program will have two advisers, one from DSL and one from SIA. Periodic interaction between the two advisers will be encouraged. A program of study will developed for each student, taking into account the fact that some courses at both locations are offered on a rotating or intermittent basis. Many courses are offered every year but some are offered every two or three years. Advisers will have available a list of projected relevant courses or educational experiences in order to work with the student on an individualized program of study. The standard committee structure will apply to the SIA programs.

Tuition

Students will be charged the applicable DSL tuition to cover the J.D. program and the applicable SIA tuition to cover the M.I.A. degree program. The DSL tuition will be paid for the semesters that the student is in residence at DSL, and the SIA tuition will be paid for the semesters that the student is in residence there. A student may take up to one course (3 credit hours) per semester in the school where the student is not in residence without any change in tuition, but must pay additional tuition to the non-residential program if he or she wishes to take additional course work at that campus during that semester.

Financial Aid and Assistantships

Decisions on financial aid and assistantships will be made by each school according to that school's procedures.

Fulfillment of Degree Requirements and Graduation

A student in the program may complete the requirements for one of the degrees and be awarded that degree prior to completing all the requirements for the other degree; provided, however, that the student shall have successfully completed at least two semesters of work towards the other degree. All courses in one program that will count towards meeting the requirements of the other must be completed before the awarding of either degree. Students will be required to fulfill all requirements for each degree in order to be awarded that degree, subject to the inter-program transfer of credits.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- April Armstrong, M.D. (Western Ontario) Assistant Professor of Orthopaedics
- Cynthia Bartok, Ph.D. (Wisconsin) Assistant Professor of Kinesiology
- Kathryn A. Bonnett, M.D. (Wright State) Adjunct Assistant Professor of Kinesiology
- W. E. Buckley, Ph.D. (Penn State) Professor of Exercise and Sport Science, and Health Education
- John H. Challis, Ph.D. (Loughborough University of Technology) Professor of Kinesiology
- David E. Conroy, Ph.D. (Utah) Associate Professor of Kinesiology
- Mary Jane De Souza, Ph.D. (Connecticut) Professor of Kinesiology
- Danielle Symons Downs, Ph.D. (Florida) Associate Professor of Kinesiology
- Mark Dyreson, Ph.D. (Arizona) Associate Professor of Kinesiology
- Robert B. Eckhardt, Ph.D. (Michigan) Professor of Developmental Genetics and Evolutionary Morphology
- Steriani Elavsky, Ph.D. (Illinois) Assistant Professor of Kinesiology
- Jinger S. Gottschall, Ph.D. (Colorado) Assistant Professor of Kinesiology
- George M. Graham, Ph.D. (Oregon) Professor of Kinesiology
- Douglas R. Hochstetler, Ph.D. (Penn State) Associate Professor of Kinesiology
- Lacy A. Holowatz, Ph.D. (Penn State) Assistant Professor of Kinesiology
- W. Larry Kenney, Ph.D. (Penn State) Professor of Physiology and Kinesiology
- Donna H. Korzick, Ph.D. (Penn State) Associate Professor of Kinesiology and Physiology
- R. Scott Kretchmar, Ph.D. (Southern California) Professor of Exercise and Sport Science
- Teresa Lang, Ph.D. (Penn State) Research Associate
- Mark L. Latash, Ph.D. (Rush) Distinguished Professor of Kinesiology
- John A. Lucas, Ed.D. (Maryland) Professor Emeritus of Exercise and Sport Science
- Nicole McBrier, Ph.D. (Ohio State) Assistant Professor of Kinesiology
- Sayers John Miller, Ph.D. (Penn State) Assistant Professor of Kinesiology
- Karl M. Newell, Ph.D. (Illinois) Professor of Kinesiology and Biobehavioral Health
- James A. Pawelczyk, Ph.D. (North Texas) Associate Professor of Physiology and Kinesiology
- Stephen J. Piazza, Ph.D. (Northwestern) Associate Professor of Kinesiology
- David N. Proctor, Ph.D. (Kent State) Associate Professor of Kinesiology
- Robert L. Sainburg, Ph.D. (Rutgers) Associate Professor of Kinesiology
- George F. Salvaterra, Ph.D. (Penn State) Affiliate Assistant Professor of Kinesiology
- Neil A. Sharkey, Ph.D. (California, Davis) Professor of Kinesiology
- Semyon M. Slobounov, Ph.D. (Illinois) Professor of Kinesiology
- Ronald A. Smith, Ph.D. (Wisconsin) Professor Emeritus of Exercise and Sport Science
- Karl G. Stoedefalke, Ph.D. (Illinois) Professor Emeritus of Exercise and Sport Science
- Kenneth L. Swalgin, Ph.D. (Ohio) Assistant Professor of Kinesiology
- James G. Thompson, Ph.D. (Penn State) Professor of Exercise and Sport Science
- Richard L. Tutwiler, Ph.D. (Penn State) Adjunct Research Associate
- Nancy I. Williams, Sc.D. (Boston U) Professor of Kinesiology
- David Yukelson, Ph.D. (North Texas State) Affiliate Assistant Professor of Exercise and Sport Science
- Vladimir M. Zatsiorsky, Ph.D. (Central Institute of Physical Culture, Moscow) Professor of Kinesiology

The graduate programs in Kinesiology are research oriented and are designed to meet the specific goals and interests of the student. The primary goal of the overall program is to provide students the opportunity to study in depth one area of specialization and to develop necessary research skills to enhance their professional competence. The master's program is designed to prepare students for future graduate study, while the doctoral program is directed toward careers in research and in teaching at the advanced undergraduate and graduate levels in colleges and universities. Six areas of study are available at both the master's and doctoral levels: (1) athletic training and sports medicine, (2) biomechanics, (3) exercise physiology, (4) history and philosophy of sport, (5) motor control, and (6) psychology of movement and sport. Several well-equipped research facilities are available to support graduate study, including the Biomechanics Laboratory, Motor Behavior Laboratory, and Noll Physiological Research Center.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

Scores from the Graduate Record Examinations (GRE) are required for admission. The minimum requirements for admission to the master's program include a 3.00 junior/senior grade-point average (on a 4.00 scale), satisfactory recommendations, a total of 1000 or higher on the verbal and quantitative sections of the GRE, and appropriate background courses in physical, biological, behavioral, and/or social science, depending on the intended area of specialization. Candidates from majors other than exercise and sport science/physical education are welcome to apply. In addition, doctoral applicants are expected to meet more stringent admission standards, including documented research capabilities (e.g., from an M.S. degree). Experience is highly desirable. Admission is highly competitive and the best-qualified students will be admitted subject to space availability and compatibility of the student with the department's research mission.

Master's Degree Requirements

All master's candidates are required to complete a research methods course and an acceptable statistics course; show proficiency in the English language; and write a thesis. In addition, each specialization may require specific courses. All specializations require a minimum of 30 credits.

Doctoral Degree Requirements

A program to meet the individual needs of each student is planned with the adviser in consultation with the doctoral committee members. Students should elect at least 15 credits from courses within the department and at least 6 credits from courses outside the department. It is expected that the depth of knowledge in each area of study comes from independent study and research experiences, in addition to the dissertation, which are under the direction of the faculty. Specific required courses include the Colloquium and Proseminar.

Student Aid

Graduate assistantships that are available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

KINESIOLOGY (KINES) course list

DATE LAST REVIEWED BY THE GRADUATE SCHOOL: 5/21/04

Laboratory Animal Medicine (L A M)

Program Home Page (Opens New Window)

RONALD P. WILSON, *Professor and Chair of the Department of Comparative Medicine*
Department of Comparative Medicine, H054
College of Medicine
P.O. Box 850
500 University Drive
Hershey, PA 17033-0850
717-531-8462

Degree Conferred:

M.S.

Graduate Faculty

- Catherin S. Beckwith, D.V.M. (Illinois), Ph.D. (Missouri) Associate Professor of Comparative Medicine
- Xuwen Peng, D.V.M. (Huazhong Agricultural U), Ph.D. (Penn State) Associate Professor of Comparative Medicine
- Ronald P. Wilson, V.M.D. (Pennsylvania) Professor and Chair of Comparative Medicine

All students entering the program must have completed a professional degree program in veterinary medicine and must hold the degree of D.V.M., V.M.D., or equivalent.

The Department of Comparative Medicine is a basic science, academic department of the College of Medicine. It is concerned with the range of variation of normal and abnormal structure, function, and behavior in a variety of species of animals used for teaching, testing, and research. Its faculty, staff, and students work in a multidisciplinary and collaborative fashion with all other departments in the college to advance the research mission.

Graduate study in laboratory animal medicine consists of advanced training in biology, medicine and methodology pertinent to animal-based research, and the development of scholarship and research capabilities within the specialty. The general plan is one that provides a broad, basic foundation upon which the individual can build a career in teaching and research and/or in the professional direction of research animal facilities.

The curriculum of this training program includes:

First Year:

COMPARATIVE MEDICINE (C MED)
501. Biology and Care of Laboratory Animals (3)
503. * Laboratory Animal Genetics (3)
507. * Techniques of Laboratory Animal Experimentation (3)
515. Experimental Surgery of Laboratory Animals (3)
530. Diseases of Laboratory Animals I (3)
531. Diseases of Laboratory Animals II (3)
535.* Comparative Pathology (3)
590. Colloquium (1 credit per semester)
600. (3)

INTEGRATED BIOSCIENCES (IBIOS)
591. Ethics in the Life Sciences (1)

*Courses offered every other year on an alternating basis; thus students entering program on even numbered years will take during second year.

Second Year:

COMPARATIVE MEDICINE (C MED)
590. Colloquium (1 credit/semester)
600. Research project for M.S. thesis (6-9)

This program is offered only at the Penn State Milton S. Hershey Medical Center.

Landscape Architecture (LARCH)

Program Home Page

BRIAN ORLAND, *Head*
121 Stuckeman Family Building
814-865-9511

Degree Conferred:

- M.L.A., M.S.

The Graduate Faculty

- Peter J. Aeschbacher, M.Arch., M.U.P. (UCLA) Assistant Professor of Landscape Architecture
- C. Timothy Baird, M.L.A. (Pennsylvania) Associate Professor of Landscape Architecture
- Mallika Bose, Ph.D. (Wisconsin) Associate Professor of Landscape Architecture
- Caru Bowns, Ph.D. (California, Davis) Assistant Professor of Landscape Architecture
- C. Andrew Cole, Ph.D. (Southern Illinois) Assistant Professor of Landscape Architecture and Ecology
- George Dickie, M.L.A. (Pennsylvania) Professor Emeritus of Landscape Architecture
- James R. DeTuerk, M.L.A. (Michigan) Professor Emeritus of Landscape Architecture
- Stuart Echols, Ph.D. (Virginia Tech) Assistant Professor of Landscape Architecture
- Kelleann Foster, M.L.A. (Massachusetts) Associate Professor of Landscape Architecture
- Larry Gorenflo, Ph.D. (UCSB) Associate Professor of Landscape Architecture
- Timothy P. Johnson, M.L.A. (Ohio State) Associate Professor of Landscape Architecture
- Daniel R. Jones, M.L.A. (Harvard) Professor Emeritus of Landscape Architecture
- Barry W. Kew, M.L.A. (Virginia) Assistant Professor of Landscape Architecture
- Neil P. Korostoff, M.L.A. (Pennsylvania) Associate Professor of Landscape Architecture
- Timothy M. Murtha, Ph.D. (Penn State) Assistant Professor of Landscape Architecture
- M. Eliza Pennypacker, M.L.A. (Virginia) Professor of Landscape Architecture
- Madis Pihlak, M.L.A., M.C.P. (California, Berkeley) Associate Professor of Landscape Architecture and Architecture
- Cecilia Rusnak, M.A. (Iowa) Associate Professor of Landscape Architecture
- Bonj Szczygiel, M.L.A. (Penn State) Associate Professor of Landscape Architecture
- Ken Tamminga, M.P.L. (Queen's) Professor of Landscape Architecture
- Thomas C. Yahner, M.L.A. (Penn State) Associate Professor of Landscape Architecture

M.L.A. (Professional Degree)

The M.L.A. program is an accredited professional degree program focused on preparation to practice landscape architecture for students who hold a bachelor's degree in another field.

M.S. in Landscape Architecture (Research Degree)

The M.S. in Landscape Architecture program is a research focused degree program designed to offer students graduate level research inquiry into landscape architecture for students who hold a bachelor's degree.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

To be admitted to the program, applicants must be able to meet the following requirements:

- For admission to the M.L.A. applicants must have completed a bachelor's degree from any discipline prior to entry into the M.L.A. program.
- For admission to the M.S. in Landscape Architecture, applicants must have completed a bachelor's degree in Landscape Architecture or a closely related discipline (e.g., geography, ecology, and anthropology).

All submission for admission must include:

1. A graduate school application
2. Evidence of creativity (portfolio or other), evidence of analytical ability (research paper or other), and an essay explaining why the individual seeks to study landscape architecture at Penn State
3. Official undergraduate transcript
4. GRE scores
5. TOEFL scores (see below)
6. 3 letters of recommendation

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination, are required for admission. At the discretion of the program, a student may be admitted provisionally for graduate study without these scores.

Students with a 3.00 junior/senior average (on a 4.00 scale) will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

M.L.A. Degree Requirements

The M.L.A. curriculum requires completion of 34 credits of graduate work at the 400-level and above, including a minimum of 18 at the 500-level and above. In addition, to fulfill the requirements of professional accreditation, students must undertake 49 credits of prerequisite classes. Students can be provisionally admitted to the M.L.A. until the prerequisites have been met.

Students will be required to take the following classes:

Prerequisites:
LANDSCAPE ARCHITECTURE (LARCH)
060. History of Landscape Architecture (3)
065. Built Environment and Culture (3)
231. Introduction to Design Implementation (3)
232. Landscape Architectural Design Implementation I (3)
241. Vegetation Ecology and Landscape Design (3)
251. Design Visualization and Graphics I (3)
272. Landscape Architecture Field Trip (1)
311. Design and Theory III: Site Planning and Design (4)
312. Design and Theory IV: Site and Regional Planning (4)
321. Design Theory Seminar (1)
322. Design Theory Seminar (1)
331. Landscape Architectural Design Implementation III (3)
332. Landscape Architectural Design Implementation II (3)
341. Plants, People and Place: Plants in Landscape Architectural Design (3)
361W. Historic Issues in Landscape Architecture (3)
382. Professional Practice (3)

Graduate requirements:
LANDSCAPE ARCHITECTURE (LARCH)
400. Introduction to Design and Theory (IUG) (5)
414. Design and Theory V: Advanced Landscape Architectural Design (10)
502. Intellectual History and Theory of Landscape Architecture (3)
510. Graduate Seminar in Landscape Architecture (6)
550. Graduate Studio IV (7)
590. Colloquium (6)

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

M.S. in Landscape Architecture Degree Requirements

The core curriculum is a two-year research focused 40 credit minimum program including a minimum of 18 credits at the 500-level and above. Students are required to take graduated level coursework, including graduate seminars (12 credits), graduate colloquium (4 credits), research design (3 credits), and a course in quantitative/qualitative analysis (3 credits minimum). Students must also complete a M.S. Thesis.

Core graduate requirements:
LANDSCAPE ARCHITECTURE (LARCH)
501. Research Writing in Landscape Architecture (3)
502. Intellectual History and Theory of Landscape Architecture (3)
510. Graduate Seminar (12)
590. Graduate Colloquium (4)
600. Thesis Research (1- 15)

The student and the student's adviser, subject to the approval of the departmental Graduate Program Committee, determine specific course requirements.

Option 1: M.S. in Landscape Architecture (Community and Urban Design)

The Community and Urban Design (CUD) Option provides students with in-depth inquiry into the theory and practice of community-based and urban design that responds to trends related to urban growth and change, the rise of the non-profit sector in community governance, and poverty and environmental degradation in urbanized and urbanizing areas. The intent of the CUD Option is to introduce students to theory, methods, and research surrounding specific topics in CUD. Students undertake hands-on design work and research as well as coursework in methods and computer applications, planning and policy, and ethics and society.

The CUD Option offers a topical curricular "track" within the M.S. in Landscape Architecture program. The core degree requirements for the CUD Option are the same as for the M.S.: 40 credits, comprising seminars, electives, design, and research, but focuses student core seminars and methods on CUD specific courses. Twenty-four credits of the following coursework must be completed for the CUD option:

- Depth and Hands-on Experience in Design and Research Inquiry
- 9 credits of breadth at 400-500 level are required in the following subject areas:
  - 3 credits in Methods and Computer Applications
  - 3 credits in Community and Urban Design in Planning
  - 3 credits in Ethics and Society

Additional CUD-oriented breadth electives are recommended, but optional, within the remaining elective credits required in the M.S. in Landscape Architecture.

Students are expected to complete the requirements of the M.S. in Landscape Architecture with CUD option in four semesters.

Option 2: M.S.in Landscape Architecture (Watershed Stewardship)

The pedagogic foundation of the Graduate Option in Watershed Stewardship is the integration of depth, breadth, and experience for each student. From their undergraduate background students will bring a focus which will be enhanced via graduate level coursework in their field. They will also be required to take graduate courses in watershed-related disciplines outside their own major: the breadth requirements. And through community focused experience of at least 8 credits of Keystone Projects (FOR 570 and FOR 571) and at least 2 credits of seminars (LARCH 510 or FOR 591A and FOR 591B), students will be challenged to analyze and understand watersheds and creatively synthesize community-appropriate solutions.

The degree requirements for Graduate Option in Watershed Stewardship are the same as those for the Master of Science in Landscape Architecture degree program with the addition of a minimum of 2 credits of FOR 591A and FOR 591B Watershed Stewardship Graduate

Seminar sections focused on watershed stewardship in their first year, and at least 8 credits of FOR 570 and FOR 571 Watershed Stewardship sections for the Keystone Project in their second year .

Students in the Graduate Option in Watershed Stewardship will be required to take a minimum of 9 credits of elective course work to ensure breadth of training in essential watershed stewardship subjects. Three credits of 400- or 500-level course work will be required from each of the following three subject categories: (1) Water Resources Sciences, (2) Social Science, Public Policy, or Economics, and (3) Humanities.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

TOEFL Information

The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the Internet-based test (iBT). Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Dual-Title Graduate Degree in Language Science

PHILIP BALDI, *Director*
Program in Linguistics
323 Weaver Building
814-863-7891
phb@psu.edu

Degrees Conferred

Students electing this degree program through participating programs earn a degree with a dual-title at the Ph.D. level, i.e., Ph.D. in (graduate program name) and Language Science.

The following graduate programs offer dual degrees in Language Science: German and Psychology.

The Graduate Faculty

Marc Authier (University of Southern California) Associate Professor of French and Linguistics
*Philip Baldi (University of Rochester), Professor of Linguistics and Classics
*Barbara Bullock (University of Delaware) Professor of French and Linguistics
*Paola Dussias (University of Arizona) Associate Professor of Spanish, Psychology and Linguistics
*Henry Gerfen (University of Arizona) Associate Professor of Spanish and Linguistics
*Carol Scheffner Hammer (University of Iowa) Associate Professor of Communication Sciences and Disorders and Linguistics
*Carrie Jackson (University of Wisconsin) Assistant Professor of German and Linguistics
*Judith Kroll (Brandeis University) Distinguished Professor of Psychology, Linguistics, and Women's Studies
*Ping Li (Leiden University) Professor of Psychology and Linguistics
*John Lipski (University of Alberta) Edwin Erle Sparks Professor of Spanish and Linguistics
*Elina Mainela-Arnold (University of Wisconsin) Assistant Professor of Communication Sciences and Disorders and Linguistics
*Carol A. Miller (University of Pennsylvania) Associate Professor of Communication Sciences and Disorders and Linguistics
*Maya Misra (Tufts University) Assistant Professor of Communication Sciences and Disorders and Linguistics
*B. Richard Page (University of Wisconsin) Associate Professor of German and Linguistics
Lisa Reed (University of Ottawa) Associate Professor of French and Linguistics
Gonzalo Rubio (Johns Hopkins), Associate Professor of Classics and Ancient Mediterranean Studies and Linguistics
Aaron Rubin (Harvard University) Assistant Professor of Classics and Ancient
Mediterranean Studies, Jewish Studies and Linguistics
*Nuria Sagarra (University of Illinois) Assistant Professor of Spanish Linguistics and Applied Linguistics
*Robert Schrauf (Case Western Reserve University), Associate Professor of Applied Linguistics
*Susan Strauss (University of California Los Angeles), Associate Professor of Applied Linguistics and Asian Studies
Jacqueline Toribio (Cornell University) Professor of Spanish and Linguistics
*Janet van Hell (University of Amsterdam) Visiting Professor of Psychology and Linguistics
*Daniel Weiss (Harvard University) Assistant Professor of Psychology and Linguistics

* Member of Center for Language Science

Program Objectives of the Dual-Title Degree in Language Science

A dual-title degree program in participating programs and Language Science will prepare students to combine the theoretical and methodological approaches of several disciplines in order to contribute to research in the rapidly growing area of Language Science. This inherently interdisciplinary field draws on linguistics, psychology, speech-language pathology, and cognitive neuroscience, as well as other disciplines, to address both basic and applied research questions in such areas as first and second language acquisition, developmental and acquired language disorders, literacy, and language pedagogy. Dual-title degree students will receive interdisciplinary training that will enable them to communicate and collaborate productively with a wide range of colleagues across traditional discipline boundaries. Such training will open up new employment opportunities for students and give them the tools to foster a thriving interdisciplinary culture in their own future students. The dual-title program will facilitate the formation of a cross-disciplinary network of peers for participating students as part of their professional development.

The dual-title degree program will not duplicate other degree programs in the University.

Admission Requirements

To pursue a dual-title degree under this program, the student must first apply to the Graduate School and be admitted through one of the participating graduate degree programs (see Appendix E for admissions requirements of potential participating programs). Upon admission to one of the above programs and with a recommendation from a Language Science program faculty member in that department, the student's application will be forwarded to a committee that will include the Director of the Linguistics Program, one of the Co-Directors of the Center for Language Science, and a third elected faculty member within the Center for Language Science. All three committee members will be affiliated with the Program in Linguistics. Upon the recommendation of this committee, the student will be admitted to the dual-title degree program in Language Science.

Doctoral Degree Requirements

The dual-title Ph.D. degree in Language Science will have the following requirements.

Course work (21 credits of 500-level courses)
6 credits, Proseminar in the Language Science of Bilingualism (LING 521), Proseminar in Professional Issues in Language Science (LING 522)
3 credits, Research methods/statistics in Language Science (such as LING 525, PSY 507, PSY 508)
3 credits in theoretical linguistics (students will choose between LING 500 or LING 504)
3 credits, Cognitive Neuroscience or Psycholinguistics (such as PSY/LING 520, PSY 511)
6 credits, Research internships (students will choose one course among the following: CSD 596, GER 596, LING 596, PSY 596, SPAN 596)

Language Science Research Meetings

Students must participate in weekly Language Science Research meetings each semester in residence.

Foreign Language and English Competency Requirements

The student will fulfill the language requirement specified by the participating department through which the student is admitted to the dual-title degree program.

Candidacy Examination

In order to be admitted to doctoral candidacy in the dual-title degree program, students will take a candidacy examination that is administered by the primary program. However, the dual-title degree student may require an additional semester or more to fulfill requirements for the primary program and dual-title program; therefore, the candidacy examination may be delayed. In addition, the student will be required to present a portfolio of work in Language Science to their committee. Such a portfolio would include a statement of the student's interdisciplinary research interests, a plan of future study, and samples of writing that indicate the student's work in Language Science. The candidacy examination committee will be composed of faculty from the primary program, as well as at least one faculty member affiliated with Language Science. The designated Language Science faculty member may be appointed in the student's primary program, but he or she may also hold a formal appointment with Linguistics. The Language Science member will participate in constructing and grading candidacy examination questions in the area of Language Science.

Doctoral Committee Composition

A doctoral committee consisting of at least four members of the Graduate Faculty must be appointed and will include a representative of the Language Science dual-title program. In addition, an official "outside member" must be appointed as one of the four members. The student's doctoral committee will include faculty from the primary program as well as faculty from Language Science. Faculty members who hold appointments in both the primary program and Language Science may serve in a combined role.

Comprehensive Examination

The student's doctoral committee will include faculty from the primary program as well as faculty from Language Science. Faculty members who hold appointments in both the primary program and Language Science may serve in a combined role. The Language Science representative(s) will help to insure that the field of Language Science is integrated into the comprehensive examination.

Dissertation

A dissertation on a topic related to Language Science is required for a dual-title Ph.D. degree in Language Science.

Linguistics Minor

The doctoral minor provides interested students with an opportunity to complete a program of scientific study focused on the nature, structure, and use of human language. The minor is designed to cover the foundations of the discipline of linguistics by reviewing fundamental core areas such as phonology and syntax. Course work is also available in many additional areas of linguistics such as semantics, morphology, language variation, historical linguistics, and discourse analysis.

The minor requires a minimum of 15 credits, 6 of which must be at the 500 level. Nine credits are prescribed in syntax (LING 402), phonology (LING 404), and a general introduction to linguistics (LING 401), although a linguistics course at the 500 level may be substituted for LING 401 with the approval of the director of the program in Linguistics.

Student Aid

Most students will be funded through their primary departments, and will be considered for graduate assistantships according to the procedures of those departments. The Center for Language Science currently has two graduate assistantships for which dual-title degree students will be eligible.

Leadership Development (LEAD)

DANIEL C. INDRO, *Academic Division Head*
School of Graduate Professional Studies
Penn State Great Valley
30 East Swedesford Road
Malvern, PA 19355-1443
610-648-3229
www.sgps.psu.edu

Degree Conferred:

M.L.D.

The Graduate Faculty

- Janice L. Dreachslin, Ph.D. (Wayne State) Professor of Health Policy and Administration
- Janet M. Duck, Ph.D. (Penn State) Assistant Professor of Management and Organization
- Kathryn Jablokow, Ph.D. (Ohio State) Associate Professor of Engineering
- Barrie E. Litzky, Ph.D. (Drexel) Associate Professor of Management and Organization
- Denise Potosky, Ph.D. (Rutgers) Associate Professor of Management and Organization
- John J. Sosik, Ph.D. (SUNY, Binghamton) Professor of Management and Organization
- Eric W. Stein, Ph.D. (Pennsylvania) Associate Professor of Management Science and Information Systems

The Penn State Great Valley Master of Leadership Development (MLD) program is a 36-credit interdisciplinary professional program that blends the social and behavioral sciences with ethical studies to develop outstanding organizational and community leaders. As part of the School's Management Division, the program is accredited under the specialized accreditation received from the Association to Advance Collegiate Schools of Business International (AACSB).The program is designed to meet the educational needs of professionals at the middle to senior levels of management. Note that the focus of this program is different from that of the MBA offered by the School: While the MBA program provides an overview of leadership, the purpose of the MLD program is to provide an in-depth analysis of the theory and practice of authentic transformational leadersthip by providing an environment in which faculty and students can have a complete and open collaboration on what constitutes exemplary leadership. The MLD curriculum emphasizes strategic leadership and the creation of wealth in organizations, balancing financial measure of performance with learning and growth, and customer and external process perspectives. The program builds on the mid- and high-level managerial and administrative experience of students in order to achieve its goal of promoting positive change in individuals, teams, organizations, and communities.

The program provides training in leadership-relevant research, and some students continue on to pursue a doctoral degree. Required research may be conducted in Penn State Great Valley's Library and Computer Center, which provide local research support as well as access to the library and computer resources of the entire Penn State system.

The MLD program is geared primarily toward the needs of part-time students who are employed full-time. Courses in the program, which are offered at Great Valley, are scheduled for the convenience of adult learners, mainly in the evening or on Saturdays.

Admission Requirements

Admission is granted only to candidates who demonstrate high promise of success for graduate work. Requirements listed here are in addition to the Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

An undergraduate and/or graduate GPA of at least 3.0 on a 4.0 scale is required for admission. It is strongly preferred that applicants present at least five years of related professional work experience.

All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) and receive a minimum of 570 (paper score), or 230 (electronic score), or 80 points on the new Internet-based test with a minimum of 23 points on the speaking portion; or the International English Language Testing System (IELTS) with a minimum composite score of 6.5 for admission and submit the results of that test with the application for admission.

Admission decisions are based on a review of the applicant’s professional and academic accomplishments as presented in the Admissions Dossier and the quality of the applicant's credentials in relation to those of other applicants who meet the requirements for admission. A complete Admissions Dossier includes the following:

- Online application and non-refundable application fee;
- current resume, preferably indicating at least five years of related work experience;
- two official transcripts from each regionally-accredited college or university attended, (both undergraduate and graduate),with credit conditions equivalent to those required by Penn State; or a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution.
- completion of two 300-word leadership essay questions developed by the faculty to assess an applicant’s logical reasoning and writing skills;
- two confidential evaluation forms/letters of endorsement from executives or community leaders detailing their evaluation of the applicant's leadership ability and potential.

Application Filing Dates: Penn State Great Valley's MLD program has a rolling admissions policy. Students may be admitted and enroll in classes in early September or early January. More detailed information about the program may be found at http://www.sgps.psu.edu/prospective/academicprograms/leadership/mld.ashx. More detailed information about the application process and the application requirements may be found athttp://www.sgps.psu.edu/prospective/academicprograms/leadership/mld/admission.ashx.

Degree Requirements

Thirty-six (36) credits are required to complete the MLD degree. A series of leadership cornerstone (12 credits) and leadership competency courses (9 credits) are required to provide all MLD students with a common body of knowledge. Leadership Context courses

(12 credits) and a Capstone course (3 credits) round out the program.

Leadership Cornerstone courses (12 credits) provide a foundation for leadership development studies. They include: LEAD 501 (Leadership Across the Lifespan), BUSAD 555/LEAD 555 (Full-Range Leadership Development), BUSAD 556/LEAD 556 (Diversity Leadership***),*** and LEAD 557 (Leadership Models and Methods).

Leadership Competency courses (9 credits) build a foundation for effective leadership communication, creativity/innovation, and moral development. They include: LEAD 561 (Dynamic Communication in Leadership Contexts), [MGMT 573 (Corporate Innovation Strategies or SYSEN 550 (Creativity, Innovation, and Change) or BUSAD/LEAD 519 (Developing Creative High Performance Organizations)], and [BUSAD 534 (Ethical Dimensions of Management in the Biotechnology and Health Industry) or PHIL 597 (Ethical Dimensions of Leadership) or BUSAD 576 (Ethical Issues in Information Technology)].

Leadership Context courses (12 credits) provide an overview of the situations in which leadership processes are embedded. They include: LEAD 562 (Strategic Leadership), [BUSAD 551 (Business Environment) or BUSAD 530 (Biotechnology and Health Industry Overview)], and a choice of 2 context-specific electives (6 credits).

All students must complete a capstone course that provides students with an opportunity to enact what they have learned in their course work in the context of promoting positive change in their community, LEAD 582 (Social Entrepreneurship and Community Leadership).

Student Aid

There are a limited number of scholarships, fellowships, and graduate assistantships available. For more information on these, contact the Financial Aid Office at Penn State Great Valley.

Most students work full-time and take classes part-time. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To learn more about payment options for students who receive employer tuition reimbursement benefits, or for more information on other payment options that may be available to you, contact the Great Valley Financial Aid Office, 610-648-3311.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

BUSINESS ADMINISTRATION (BUSAD) courses

INTERNATIONAL BUSINESS (I B) courses

LEADERSHIP (LEAD) courses

MANAGEMENT (MGMT) courses

The Graduate Faculty

- Richard I. Ammon, D.Ed. (Penn State) Associate Professor Emeritus of Education
- Shanetia P. Clark, Ph.D. (Penn State) Assistant Professor of Education
- Ernest K. Dishner, Ed.D. (Georgia) Professor of Education and Reading
- Betty C. Fortner, Ph.D. (Texas) Associate Professor Emeritus of Education and Reading
- Xiaoming Liu, Ph.D. (Texas Tech) Assistant Professor of Education and Reading
- Barbara A. Marinak, Ph.D. (Maryland) Assistant Professor of Reading Education
- Mary Napoli, Ph.D. (Penn State) Assistant Professor of Education

The Master of Education in Literacy Education at Penn State Harrisburg is designed to provide full-time and part-time graduate students with a focused program of study in the field of reading education. The program is aligned with the standards of the Pennsylvania Department of Education. Following successful completion of the program, students are eligible to take the Praxis examination for certification as a reading specialist (K-12). Specifically, the goals of the program are to develop in students: (1) specialized, in-depth knowledge about the teaching of reading and writing; (2) the clinical skills necessary for diagnosing and intervening with reading disabled students; (3) the ability to interpret and to evaluate literacy research, (4) the literacy leadership skills necessary to support the professional practices in a K-12 setting; (5) provide rigorous offerings aligned with the standards of the International Reading Association (IRA) and the National Council for the Accreditation of Teacher Education (NCATE); and (6) prepare students for the complexities they will face as reading specialists in schools serving the K-12 population.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

Admissions

The M.Ed. Program in Literacy Education has five important admission requirements.

First, candidates must have achieved an overall junior/senior grade point average of 3.00 or higher. For candidates applying for admission who have completed credits beyond the baccalaureate degree, we will evaluate the last (approximately) 60 credits completed.

Second, candidates must submit two letters of recommendation. These letters must be from former professors who can attest to the academic ability and potential of the candidate.

Third, candidates must submit a 200-300 word personal statement that addresses their career goals and reasons for pursuing a graduate degree.

Fourth, candidates must have a valid Pennsylvania Teaching Certificate and present evidence that they have completed a course in the methods of teaching reading such as EDUC 320 (Methods in Teaching Beginning Readers) or 321 (Methods in Teaching Intermediate and Advanced Readers) with a grade of C or better.

Fifth, candidates must submit test scores from one of the following: Graduate Record Examination, Miller Analogies Test, or Praxis examinations completed for certification. In addition, the language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer based test, or a total score of 80 with a 20 on the speaking section for the internet-based test. The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a masters degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States and Wales.

Retention

Candidates must maintain a minimum 3.00 grade point average, satisfactorily complete all required key assessments, attain a grade of "C" or better in all required core courses. Candidates who do not make satisfactory progress will be notified in writing noting the specific deficiencies and requesting that they meet with the program coordinator to develop a remediation plan. Failure to meet or to satisfactorily complete the remediation plan will result in termination from the program.

All persons enrolled in Teacher Education Programs at Penn State Harrisburg are expected to demonstrate the professional dispositions that are aligned with the unit's vision statement. The faculty shall evaluate the approved dispositions demonstrated by the candidates in class and during field experiences. Candidates may be rated as exemplary, acceptable, or unacceptable. Candidates are expected to attain acceptable or exemplary ratings in order to graduate.

Degree Requirements

The Master of Education degree in Literacy Education consists of 42 credits that prepare candidates for the Pennsylvania Reading Specialist Certification (K-12). The degree requirements for the Master of Education in Literacy Education includes 36 credits in foundational, pedagogical, and advanced theoretical work in reading, writing and educational research design and a 6 credit capstone

clinical practicum for a total of 42 credits. A minimum grade-point average of 3.00 for work done at the University and acceptable or higher ratings on the professional dispositions are required for graduation.

Prescribed Core Course Requirements (39 Credits)

EDUCATION (EDUC)

422. Literature for Children and Adolescents (3)
425. Literacy Assessment (3)
452. Teaching Writing (3)
466. Foundations of Teaching English as a Second Language (3)
471. Best Practices in Literacy (3)
477. Teaching Struggling Readers and Writers (3)
561. Psychology of Reading (3)
562. Diagnostic Evaluation of Reading Problems (3)
563. Advanced Methods of Teaching Reading (3)
564. Reading Clinic (6)
565. Literacy Leadership (3)
586. Educational Research Designs (3)

Electives

(Choose 3 credits from the following)
Students can choose either one of two electives in the program. Both elective courses (ENGL 409 or EDUC 432) require specialized study in the teaching of writing. ENGL 409 (taken concurrently with EDUC 452) will allow the student to complete a writing fellowship with the Capital Area Writing Project. Or, EDUC 432 allows for the in-depth study of writing through children's literature.

EDUC 432 Children's Literature in the Writing Curriculum (3)
ENGL 409 Composition Theory and Practice for Teachers (3)

Transfer Credits

Subject to the limitations given below, a maximum of 10 credits of high-quality graduate work done at a regionally accredited institution may be applied toward the requirements for the master's degree. However, credits earned to complete a previous master's degree, whether at Penn State or elsewhere, may not be applied to a second master's degree program at Penn State. The student should distinguish carefully between the transferability of credit and its applicability in a particular degree program. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser, the program head or graduate officer, and the Graduate School. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School of Penn State, must be of at least B quality (grades of B- are not transferable), and must appear on an official graduate transcript of an accredited university. Pass-fail grades are not transferable to an advanced degree program unless the "Pass" can be substantiated by the former institution as having at least B quality.

A maximum of 15 graduate credits taken as a nondegree student prior to admission to a graduate degree program may be applied to a graduate program, with departmental approval. The credits must have been earned within five years preceding entry into the degree program.

Forms for transfer of credit can be obtained from the Office of Graduate Enrollment Services, 114 Kern Building.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit courses below the 400 level in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Chris Coulston, Ph.D. (Penn State) Assistant Professor of Electrical and Computer Engineering
- Kenneth J. Fisher, M.S. (Purdue) Professor of Engineering
- Ralph Ford, Ph.D. (Arizona) Associate Professor of Electrical and Computer Engineering
- Robert Gray, Ph.D. (Ohio) Assistant Professor of Engineering
- Thomas L. Hemminger, Ph.D. (Case Western Reserve) Associate Professor of Computer and Electrical Engineering
- Amir Khalilollahi, Ph.D. (Penn State) Assistant Professor of Mechanical Engineering
- Paul Koch, Ph.D. (Lowell) Associate Professor of Engineering
- William C. Lasher, Ph.D. (SUNY, Buffalo) Associate Professor of Mechanical Engineering
- Diane Parente, Ph.D. (SUNY, Buffalo) Associate Professor of Management
- Jeffrey K. Pinto, Ph.D. (Pittsburgh) Professor of Management
- John Roth, Ph.D. (Michigan) Assistant Professor of Mechanical Engineering
- Robert Simoneau, Ph.D. (North Carolina State) Professor of Mechanical Engineering
- Russell Warley, Ph.D. (Case Western Reserve) Assistant Professor of Mechanical Engineering
- Robert S. Weissbach, Ph.D. (Arizona) Assistant Professor of Engineering

The master of engineering (M.Eng.) degree program in Manufacturing Systems Engineering is a professionally oriented graduate engineering program designed to enhance the technical and business capabilities of its graduates.

Five core courses focus on the structure and operation of a manufacturing business; the development of the skills required to identify newly emerging process and systems technologies; and the managed integration of these technologies into today's modern manufacturing environment. In addition, emphasis is directed toward reinforcing the latest quality practices currently being adopted by U.S. manufacturers. Courses emphasize practical concerns as well as relevant theoretical background. The program meets the needs of diverse manufacturing enterprises through the selection of elective courses, including a master's project focusing on the practical application of advanced technology into local industry.

The program is designed to meet the needs of working professionals in the tri-state region. To this end, classes are offered during a late afternoon/evening timeframe, allowing students to attend on a part-time basis. Part-time students can complete the program in three years, with full-time students finishing in less than two years.

Admission Requirements

Students can apply for admission to the program for the fall or spring semesters or summer session. Applicants are encouraged to apply at least one month prior to the start of classes.

Applicants to the M.Eng. program in Manufacturing Systems Engineering should have an undergraduate degree in engineering or engineering technology from an ABET-accredited program. Students who lack specific technical or mathematical background deemed necessary for success in this program will be required to take foundation courses as prerequisites.

The following materials are required to be considered for admission: Penn State Graduate School application; a nonrefundable application fee; official copies of all undergraduate transcripts; a minimum grade-point average of 3.0 on a 4.0 scale in the junior/senior years of baccalaureate study and evidence of completion of a math sequence that includes introduction to differential equations; three letters of recommendation, at least one of which is from an academic source; personal statement outlining significant work history and experience, academic and career goals, and a description of the applicant's current position and professional affiliations.

NOTE: International students must submit an official TOEFL score report.

Applicants who do not meet the minimum 3.0 grade-point average or who have not graduated from an ABET-accredited undergraduate program will be reviewed on an individual basis. The Graduate Record Examinations (GRE) or comparable exam may be required for those applicants who do not meet the minimum admission requirements stated above.

The Educational Testing Service (ETS) administers the GRE and TOEFL. Arrangements for taking these tests are to be made directly with the Educational Testing Service. Information about the GRE may be obtained at www.gre.org or by calling 609-771-7670. Information about the TOEFL may be obtained by visiting www.toefl.org or by calling 609-771-7760. Applicants are urged to take the tests at least three months prior to the semester they would like to begin study at Penn State Erie.

International students applying for admission to the Penn State Erie M.Eng. program must hold a bachelor's degree from an accredited United States college or university, or its equivalent from a recognized foreign institution of higher learning. An applicant must have a minimum TOEFL score of 550 (paper-based exam) or 213 (computer-based exam) to be considered for admission. Applications without the $50 application fee cannot be processed, and the fee is not refundable for any reason. International students must also complete the Application for Visa Document and provide proof of financial support with an official bank letter. Additional information can be found on the Office of International Students home page at www.international.psu.edu/iss/ (Opens New Window).

Master's Degree Requirements

The M.Eng. in Manufacturing Systems Engineering degree program consists of five core courses, three elective courses, and a required project. A total of 30 credits is required.

Core courses focus on the critical principles of management, including quality and supply chain management, marketing and operations, project management, the development of statistical methods used in manufacturing and design including design of experiments and process optimization, exposure to a variety of manufacturing processes, and the managed integration of these technologies into today's modern manufacturing environment using Design for Manufacturing principles.

Elective courses allow students to place added emphasis in the focus areas of engineering management, product realization, or on gaining added technical depth in the mechanical, electrical, or plastics manufacturing fields. Electives are offered within the School of Business or the School of Engineering and Engineering Technology.

PRESCRIBED COURSES (21 credits)

Core Courses (12 credits)
B ADM 502. DEMAND, OPERATIONS, AND FIRM PERFORMANCE (6)
MANGT 510. PROJECT MANAGEMENT (3)
MFGSE 520. ANALYTICAL TECHNIQUES IN MANUFACTURING AND DESIGN (3)

Project (3 credits)
MFGSE 580. MASTER'S PROJECT (3)

Additional Courses (6 credits): Select two courses from: MFGSE 530, 550, 551

Elective Courses (9 credits)

Electives are selected from a school-approved list. Courses offered from outside the School of Engineering and Engineering Technology will be considered on an individual basis and in consultation with the graduate adviser.

Course Descriptions

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Michael Elavsky, Ph.D. (Illinois) Assistant Professor of Communications
- Russell Frank, Ph.D. (Pennsylvania) Associate Professor of Communications
- Robert M. Frieden, J.D. (Virginia) Cable TV Pioneers Chair Professor in Telecommunications Studies and Law
- Jeanne Hall, Ph.D. (Wisconsin) Associate Professor of Media Studies
- Martin E. Halstuk, Ph.D. (Florida) Associate Professor of Communications
- Marie Hardin, Ph.D. (Georgia) Associate Professor of Communications
- R. Dorn Hetzel, M.F.A. (New York) Associate Professor of Film and Video
- Anne Hoag, Ph.D. (Michigan) Associate Professor of Communications
- Matthew Jackson, Ph.D. (Indiana) Associate Professor of Communications
- Krishna Jayakar, Ph.D. (Indiana) Associate Professor of Communications
- Matthew Jordan, Ph.D. (Claremont) Assistant Professor of Communications
- Ann Marie Major, Ph.D. (Southern Illinois) Associate Professor of Communications
- Matthew P. McAllister, Ph.D. (Illinois) Professor of Communications
- John S. Nichols, Ph.D. (Minnesota) Professor of Communications
- Mary Beth Oliver, Ph.D. (Wisconsin) Distinguished Professor of Communications
- Anthony A. Olorunnisola, Ph.D. (Howard) Associate Professor of Communications
- Jeremy S. Packer, Ph.D. (Illinois) Assistant Professor of Communications
- Patrick R. Parsons, Ph.D. (Minnesota) Don Davis Professor in Ethics
- Robert D. Richards, J.D. (American) John and Ann Curley Professor of First Admendment Studies
- Ford Risley, Ph.D. (Florida) Associate Professor of Communications
- Michelle Rodino-Colocino, Ph.D. (Pittsburgh) Assistant Professor of Communications
- Amit M. Schejter, Ph.D. (Rutgers) Associate Professor of Communications
- Jorge Reina Schement, Ph.D. (Stanford) Professor of Communications
- Michael Schmierbach, Ph.D. (Wisconsin) Assistant Professor of Communications
- Fuyuan Shen, Ph.D. (North Carolina, Chapel Hill) Associate Professor of Communications
- Richard Sherman, M.F.A. (Ohio) Assistant Professor of Communications
- Susan M. Strohm, Ph.D. (Minnesota) Assistant Professor of Communications
- S. Shyam Sundar, Ph.D. (Stanford) Distinguished Professor of Communications and Communication Arts and Sciences
- Richard D. Taylor, J.D. (New York) Palmer Chair of Telecommunications Studies and Law
- Bu Zhong, Ph.D. (Maryland) Assistant Professor of Communications

Doctoral Degree Requirements

The Ph.D. Program in Mass Communications is administered by the College of Communications. All students seeking admission to the program are required to submit Graduate Record Examination scores, transcripts of all previous undergraduate and graduate work, and three letters of recommendation from individuals qualified to comment on their ability to perform successfully at the doctoral level. Students whose native language is not English must present a minimum TOEFL score of 600 to be considered for admission. In most cases, a completed master's degree is required for admission to the program. In addition, applicants are required to submit a formal statement indicating what they expect to achieve and how their educational background qualifies them for doctoral-level study in mass communications. Admission decisions are made by the college admissions committee.

Requirements listed above are in addition to general Graduate School requirements listed in the GENERAL INFORMATION section of the *Graduate Bulletin*. Students admitted to the doctoral program must complete a candidacy examination. For students with a master's degree or equivalent, this examination ordinarily will occur before the student has completed 10 credits of doctoral-level work. For individuals admitted with only a baccalaureate degree and no graduate-level work, the candidacy examination will be administered after 30 credits and before 40 credits of graduate-level work, have been completed. The committee designated to conduct the examination will determine whether the student's knowledge of mass communications is adequate for doctoral-level study, specify what deficiencies, if any, must be removed, and pass judgment on a proposed plan of study.

The program requirements include both semesters of the Mass Communications Proseminar (COMM 501.1 and COMM 501.2), a foundation course and other courses selected by the student, with committee approval, that collectively constitute a coherent sequence appropriate to the advanced study of mass communications. Students are expected to take a minimum of 20 credits in communications-related courses. No more than 6 credits can be taken as independent study credits. Students also are required to take at

least one course in research methods approved by the doctoral committee. Upon completion of the course work approved for the plan of study, the candidate will take a comprehensive examination. Following the comprehensive examination, doctoral candidates schedule a dissertation proposal meeting at which the research plan for their dissertation is reviewed and approved by their committee. Upon completion of the dissertation, doctoral candidates present a final oral defense of their dissertations before their committees.

The communication and foreign language requirement for the Ph.D. degree may be satisfied by intermediate knowledge of one foreign language or by an equivalent research skill relevant to the student's field of study.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The Intercollege Graduate Degree Program in Materials Science and Engineering offers comprehensive graduate education in the fundamentals of materials science (synthesis-structure-property-performance relationships). Faculty have interests in many research areas including biomaterials, ceramics, composites and hybrids, computational materials science, electronic and photonic materials, materials chemistry and physics, metals, nanostructured and nanoscale materials, piezoelectrics and ferroelectrics, polymers and soft materials. Students may choose to study across the major themes of materials today including materials in energy applications, nanotechnology, materials in medicine, materials in communications, materials for sensor applications, structural materials, etc., by using a combination of MATSE courses and a myriad of materials-related courses offered in the science and engineering departments at Penn State.

Admission Requirements

Scores for the Graduate Record Examinations (GRE) are required for admission, though this requirement may be waived at the discretion of the departmental graduate admission committee. The best-qualified applicants will be accepted up to the number of spaces available for new students. The degree requirements listed here are in addition to the general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Master's Degree Requirements

The graduate program for the M.S. degree must include a total of at least 30 credits. Subject to the approval of the graduate program coordinator, a maximum of 10 credits of high-quality graduate work done at an accredited U.S. institution may be applied toward the requirements for the master's degree. A minimum of 6 research credits (MATSE 600) is required. The minimum number of formal course credits (excluding seminar MATSE 590) required is 18 for all students. All candidates for advanced degrees are also expected to attend MATSE 590 colloquium. A thesis describing independent research performed by the student shall be written and defended at an oral examination. Bound copies will be made available for the University Libraries and the thesis adviser. A thesis committee shall administer the final oral examination of the thesis. The committee shall consist of at least three graduate faculty members.

M. S. Requirements (Summary)-minimum total credits: 30; minimum research credits: 6; minimum formal course credits: 18; minimum 500-level credits: 12; minimum credits in the major: 12; seminar: 2 credits per year; minimum GPA: 3.00.

Doctoral Degree Requirements

The general requirements are based upon a period of residence, the writing of a satisfactory thesis and its acceptance by the doctoral committee and the Graduate School, and the passing of the comprehensive examination. A doctoral program consists of a combination of courses, seminars, and research that fulfills the minimum requirements of the Graduate School and is approved by the doctoral committee for each individual student. A master's degree is not a prerequisite for the doctorate. However, the first year of graduate study leading to the Ph.D. may be the same as that provided for the M. S. degree.

Acceptance into the Ph.D. program is based on the student's performance on the Ph.D. candidacy exam, which is administered by a graduate candidacy exam committee of the department. Although there is no specified requirement by the graduate school for the number of course credits for a Ph.D. degree, the department requires a minimum of 18 credits of 500-level courses courses for completing a doctoral degree. The specific courses are determined by the student and the adviser in consultation with the student's doctoral committee. A student with a M. S. degree from Penn State can use the 500-level credits earned during his or her M. S. study to fulfill the course requirements. Upon approval by the doctoral committee and the graduate program coordinator, a student with an M. S. degree from another U.S. university may use a maximum of 10 credits from that school to partially fulfill the course requirement.

- Candidacy exam: (Offered twice a year: at the beginning of spring and fall semesters) Students will write a research proposal and give a presentation on the proposal to three members of the candidacy committee, whose members will ask questions about the proposal and the student's prior course work. The student will choose a topic for the proposal from three provided by the faculty committee, chosen to reflect the interest area(s) of the individual candidate. Students will be given three weeks to write the proposal and turn it into the MATSE graduate office. The oral presentation will take place seven to ten days after the written paper is submitted.
- Minimum formal course requirement (This is not required by the University, but required by the department): 18 credits of 500-level courses after B. S. (The courses to be taken are determined by the adviser and a thesis committee, having a minimum of four members with at least one outside of the department.)
- Comprehensive exam: Progress report and thesis proposal (five to ten pages) provided to the student's doctoral committee. An oral presentation is given to the research committee, followed by questions on the written and oral presentations.
- Seminar: 2 credits of MATSE 590 per year, until comprehensive exam is passed
- Minimum GPA: 3.0
- Thesis: A written thesis and an oral defense administrated by the doctoral committee

Biogeochemistry Dual-Title Degree Program

Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework from an approved list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. A single candidacy examination that includes biogeochemistry will be administered for admission into the student's Ph.D. program, as well as the biogeochemistry dual-title. The structure and timing of this exam will be determined jointly by the dual-title and major program. The student's doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Student Aid

Top graduate applicants will be automatically nominated for a number of graduate fellowships in the department, including the University Graduate Fellowship, the Materials Research Institute Fellowship, the Wilson Fellowship of the College of Earth and Mineral Sciences, and the University Minority Scholar Fellowship. Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

The Graduate Faculty

- Joel H. Anderson, Ph.D. (Indiana) Professor of Mathematics
- George E. Andrews, Ph.D. (Pennsylvania) Evan Pugh Professor of Mathematics
- Augustin Banyaga, Ph.D. (Geneva) Professor of Mathematics
- Paul F. Baum, Ph.D. (Princeton) Evan Pugh Professor of Mathematics
- Andrew Belmonte, Ph.D. (Princeton) Associate Professor of Mathematics
- Leonid Berlyand, Ph.D. (Kharkov State) Professor of Mathematics
- Nathaniel Brown, Ph.D. (Purdue) Assistant Professor of Mathematics
- W. Dale Brownawell, Ph.D. (Cornell) Distinguished Professor of Mathematics
- Dmitri Burago, Ph.D. (St. Petersburg State) Professor of Mathematics
- Wenwu Cao, Ph.D. (Penn State) Professor of Mathematics and Materials
- John Clemens, Ph.D. (California, Berkeley) Assistant Professor of Mathematics
- Qiang Du, Ph.D. (Carnegie Mellon) Professor of Mathematics
- Edward Formanek, Ph.D. (Rice) Professor of Mathematics
- Moses Glasner, Ph.D. (California, Los Angeles) Associate Professor of Mathematics
- Diane M. Henderson, Ph.D. (California, San Diego) Associate Professor of Mathematics
- Nigel Higson, Ph.D. (Dalhousie) Distinguished Professor of Mathematics
- Robert P. Hunter, Ph.D. (Louisiana State) Professor of Mathematics
- Anatole Katok, Ph.D. (Moscow State) Shibley Professor of Mathematics
- Bryna Kra, Ph.D. (Stanford) Associate Professor of Mathematics
- Svetlana Katok, Ph.D. (Maryland) Professor of Mathematics
- Gerald Lallement, Doc. es Mathematiques (Paris) Professor of Mathematics
- Marc Levi, Ph.D. (Courant) Professor of Mathematics
- Jenny Xiaoe Li, Ph.D. (Cornell) Associate Professor of Mathematics and Economics
- L. C. Li, Ph.D. (Courant) Associate Professor of Mathematics
- W. C. Li, Ph.D. (California, Berkeley) Professor of Mathematics
- Chun Liu, Ph.D. (Courant) Associate Professor of Mathematics
- Anna Mazzucato, Ph.D. (North Carolina, Chapel Hill) Assistant Professor of Mathematics
- Gary L. Mullen, Ph.D. (Penn State) Professor of Mathematics
- Victor Nistor, Ph.D. (California, Berkeley) Professor of Mathematics
- Alexei Novikov, Ph.D. (California, Berkeley) Assistant Professor of Mathematics
- Adrian Ocneanu, Ph.D. (Warwick) Professor of Mathematics
- Yakov Pesin, Ph.D. (Moscow State) Distinguished Professor of Mathematics
- Anton Petrunin, Ph.D. (Illinois) Assistant Professor of Mathematics
- John Roe, D.Phil. (Oxford) Professor of Mathematics
- James A. Sellers, Ph.D. (Penn State) Associate Professor of Mathematics
- Stephen G. Simpson, Ph.D. (MIT) Professor of Mathematics
- Gregory Swiatek, Ph.D. (Warsaw) Professor of Mathematics
- Sergei Tabachnikov, Ph.D. (Moscow State) Professor of Mathematics
- Arkady Tempelman, Ph.D. (Vilnius) Professor of Mathematics and Statistics
- Leonid N. Vaserstein Ph.D. (Moscow State) Professor of Mathematics
- Robert C. Vaughan, Ph.D. (London) Professor of Mathematics
- Aissa Wade, Ph.D. (Montpellier) Assistant Professor of Mathematics
- William C. Waterhouse, Ph.D. (Harvard) Professor of Mathematics
- Howard Weiss, Ph.D. (Maryland) Professor of Mathematics
- Jinchao Xu, Ph.D. (Cornell) Professor of Mathematics
- Ping Xu, Ph.D. (California, Berkeley) Professor of Mathematics
- Ae Ja Yee, Ph.D. (Korea Advanced Inst of Sci and Tech) Associate Professor of Mathematics
- Yuri G. Zarhin, Ph.D. (Leningrad State) Professor of Mathematics
- Yuxi Zheng, Ph.D. (Berkeley) Professor of Mathematics
- Ludmil Zikatanov, Ph.D. (Sofia) Assistant Professor of Mathematics

Graduate courses in all the principal branches of mathematics are offered regularly each year. The department is prepared to direct research in a variety of fields, including various branches of analysis, algebra, topology, number theory, applied analysis, and mathematical logic and foundations.

Admission Requirements

Scores from the Graduate Record Examinations Aptitude Test (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

To be admitted to the Ph.D., D.Ed., or M.A. program without undergraduate deficiency, an applicant should have completed at least 18 credits in mathematics at the advanced undergraduate level (400 series or their equivalents). The undergraduate student is urged to take at least 6 credits in foundations of analysis (MATH 401), 6 in modern algebra (MATH 435 and MATH 436), and 3 in topology (MATH 429) or their equivalents. These courses are essential preparation for the graduate program, and if they are taken after admission, a

maximum of 6 credits may be counted toward an advanced degree.

Students with a 3.00 junior/senior average and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Students applying to the graduate program in mathematics for whom English is not their native language are required to have a score of at least 550 (paper-based test) or 213 (computer-based test) on the Test of English as a Foreign Language (TOEFL) examination. The results of this examination must be submitted along with other requested items before the application deadline date.

Master's Degree Requirements

For the M.A. degree the department offers two options: (1) the thesis option requires 12 credits of approved 500-series course in mathematics, 6 to 9 credits of thesis, sufficient credits in approved 400- or 500-series courses to make a total of 30 credits, and a final oral examination based on the thesis and general course material; and (2) the nonthesis option requires 18 credits of 500-series courses in mathematics, sufficient credits in approved 400- or 500-series courses to make a total of 30 credits, and a term paper on an approved topic in mathematics. No final examination is given in this option. Under this option a student may also elect to take a minor in applied mathematics (9 credits with at least 6 at the 500 level) and may use these credits toward the necessary 30 credits. For both options, a grade of A or B is required in all courses.

To be admitted to the M.Ed. program without undergraduate deficiency, an applicant should have completed at least 15 credits in mathematics at the intermediate level beyond calculus. The M.Ed. program does not require any 500-series courses, but the student is encouraged to select some at this level. Special courses have been instituted for the training of teachers. Among these are MATH 470 and MATH 471. These are acceptable to satisfy credit requirements only for the M.Ed. degree.

Doctoral Degree Requirements

All doctoral students are required to take three qualifying examinations. Two of these examinations must be completed prior to the beginning of the student's second year of graduate study, and the third prior to the beginning of the third year. The qualifying examinations are in the areas of analysis, algebra, and topology/geometry, unless a student chooses to enroll in the Applied Mathematics option or the Logic and Foundations option. For the Applied Mathematics option, the qualifying examinations are in the areas of analysis, numerical analysis, and partial differential equations, and for the Logic and Foundations option, the areas are analysis, algebra, and logic and foundations. Students who wish to enroll in the Applied Mathematics option or the Logic and Foundations option must file a petition with the Graduate Studies Committee anytime between admission to the Ph.D. program and the add/drop deadline for the student's first semester.

The qualifying examinations are given twice a year--after the end of the spring semester and before the beginning of the fall semester. Basic, one-year sequences are offered in each subject annually to help students prepare for the examinations. Typically, an entering Ph.D. student takes two of the basic sequences in the first year and the third basic sequence in the second year of study, and takes the qualifying examinations in the spring after completing the corresponding courses. If an examination is failed, the student must take it again. Students who fail a qualifying examination in a given subject twice may not continue in the Ph.D. program.

Entering Ph.D. students may take one or more of the qualifying examinations on arrival in August without penalty. If they fail a pre-entrance exam, they still have two more opportunities to pass it. Entering Ph.D. students are advised to take at least two basic sequences (in the subjects they did not pass qualifying exams in on arrival) and the subsequent qualifying exams in the first year of graduate study.

After passing all three qualifying exams, students are expected to select a thesis adviser and form a doctoral committee. The committee administers the comprehensive exam (no later than the end of the seventh semester of study) and offers counsel of the student as his research progresses.

Other Relevant Information

Students in this program may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. (*See also* Operations Research.)

Further information about hte graduate program in Mathematics may be found at the following Web site: www.math/psu.edu/grad.

Student Aid

Graduate assistantships available through this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Domenic A. Santavicca, Ph.D. (Princeton) Professor of Mechanical Engineering
- Robert J. Santoro, Ph.D. (Boston College) George L. Guillet Professor of Mechanical Engineering
- Frank W. Schmidt, Ph.D. (Wisconsin) Professor Emeritus of Mechanical Engineering
- Gary S. Settles, Ph.D. (Princeton) Professor of Mechanical Engineering
- Alok Sinha, Ph.D. (Carnegie Mellon) Professor of Mechanical Engineering
- H. Joseph Sommer III, Ph.D. (Illinois, Urbana-Champaign) Professor of Mechanical Engineering
- Jelena Srebric, Ph.D. (MIT) Adjunct Professor of Mechanical Engineering; Associate Professor of Architectural Engineering
- Gita Talmage, Ph.D. (Illinois, Urbana-Champaign) Professor of Mechanical Engineering
- Karen A. Thole, Ph.D. (Texas, Austin) Professor of Mechanical Engineering
- Stefan T. Thynell, Ph.D. (North Carolina State) Professor of Mechanical Engineering
- Martin W. Trethewey, Ph.D. (Michigan Tech) Professor of Mechanical Engineering
- Stephen R. Turns, Ph.D. (Wisconsin) Professor of Mechanical Engineering
- Adri van Duin, Ph.D. (Delft U of Tech, The Netherlands) Associate Professor of Mechanical Engineering
- James C. Wambold, Ph.D. (New Mexico) Professor Emeritus of Mechanical Engineering
- Chao-Yang Wang, Ph.D. (Iowa) Professor of Mechanical Engineering and Materials Science
- Donghai Wang, Ph.D. (Tulane) Assistant Professor of Mechanical Engineering
- Kon-Well Wang, Ph.D. (California, Berkeley) William E. Diefenderfer Chaired Professor of Mechanical Engineering
- Qian Wang, Ph.D. (Princeton) Assistant Professor of Mechanical Engineering
- Ralph L. Webb, Ph.D. (Minnesota) Professor Emeritus of Mechanical Engineering
- David N. Wormley, Ph.D. (MIT) Harold and Inge Marcus Dean of Engineering; Professor of Mechanical Engineering
- John Wyngaard, Ph.D. (Penn State) Professor of Meteorology, Geo-Environmental Engineering, and Mechanical Engineering
- Vigor Yang, Ph.D. (Cal-Tech) Distinguished Professor of Mechanical Engineering
- Savas Yavuzkurt, Ph.D. (Stanford) Professor of Mechanical Engineering
- Richard A. Yetter, Ph.D. (Princeton) Professor of Mechanical Engineering

Graduate programs and research facilities are available in combustion, heat transfer, fluid mechanics, dynamic system analysis, robotics,

mechanical design, and energy systems. Air pollution control, automotive safety, tribology, designing for noise control and for reliability also provide many research and design opportunities.

Admission Requirements

Admission to the program is quite competitive. Entering students must hold a B.S. degree in engineering or physical science. Students with 3.0 or better (out of 4.0) junior/senior cumulative grade-point averages and appropriate course backgrounds will be considered for admission. The best-qualified applicants will be admitted. In addition, scores from the Graduate Record Examinations (GRE) are required. To qualify for admission, an international student must achieve a minimum score of 550 on the paper-based Test of English as a Foreign Language (TOEFL), or a minimum score of 213 on the computer-based test. Letters of recommendation and a statement of purpose written by the applicant are also required to complete the application pacakge.

Degree Requirements

The M.S. degree program is designed for students to gain advanced knowledge for research, analysis, and design in mechanical engineering. Students pursuing an M.S. degree may choose one of two options: completion of 24 course credits and the submission of a thesis (6 credits) to the Graduate School, or 30 course credits and the submission of a scholarly paper to the department. A Ph.D. thesis proposal may serve as the paper, provided the student has passed the Ph.D. candidacy examination.

Continuous registration is required of all Ph.D. graduate students until the thesis is approved.

The Ph.D. program emphasizes scholarly research and helps students prepare for research and related careers in industry, government, and academe. Students are admitted to candidacy after passing written and oral examinations. The Ph.D. program is quite flexible, with minimal formal requirements. The Ph.D. is awarded upon completion of a program of advanced study that includes a minimum period of residence, a satisfactory thesis, and the passing of comprehensive and final oral examinations as determined by the student's doctoral committee.

Generally, a Ph.D. student must have 30 credits above a master's degree before taking the comprehensive examination.

Integrated B.S. and M.S. in Mechanical Engineering

A limited number of undergraduate students in the B.S.M.E. program will be considered for admission to the integrated undergraduate/graduate program leading to the B.S.M.E. and the M.S.M.E. degrees. Students with a junior standing in the B.S.M.E. degree program may be admitted to the integrated B.S.M.E./M.S.M.E. program, following a positive review of an application specific to this program by the faculty committee on graduate admissions. Students must have attained a GPA of at least 3.0. Students admitted to the integrated program must maintain a GPA in all classes used toward the M.S.M.E. degree of at least 3.0.

Student Aid

Graduate students are supported by a variety of government and industry fellowships, traineeships, and research and teaching assistantships. Stipends vary depending on the source. Competition for support is extremely keen; however, outstanding students are considered for attractive offers of support, including various fellowships specifically for new students in the College of Engineering. By completing the department's application for financial assistance, you will automatically be considered for a graduate assistantship. To receive full consideration for financial aid, all application materials should be submitted by January 15.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- S. Shyam Sundar, Ph.D. (Stanford) Distinguished Professor of Communications and Communication Arts and Sciences
- Richard D. Taylor, J.D. (New York) Palmer Chair of Telecommunications Studies and Law
- Bu Zhong, Ph.D. (Maryland) Assistant Professor of Communications

The master's degree in Media Studies is an academic program that involves students in the systematic study of media. The objective of the course of study is to enable students to achieve a comprehensive understanding of the systems, networks, cultures, and information associated with media. The program prepares students for doctoral study in communications and for professional positions in business and government requiring a comprehensive understanding of the historical, social, and political implications of the media. This program helps prepare students to organize research projects, critically evaluate research reports, and directly influence media practices by the application of research findings.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Students with a 3.00 junior/senior grade-point average are eligible for admission. Three letters of recommendation are required. Applicants must also submit an autobiographical statement of about 1,000 words indicating the nature of the applicant's interest in Media Studies, reasons for wanting to do graduate work, and future aspirations relating to the field of mass communications. Experience shows that most applicants hold a bachelor's degree in a field of the liberal arts or the social and behavioral sciences, including journalism and mass communications. However, this does not preclude applicants with other backgrounds, abilities, and interests such as those whose undergraduate training may have been in a scientific or technical field. In every case, the applicant should explain in the autobiographical statement how his or her undergraduate education relates to the decision to seek admission to graduate study in mass communications.

Program of Study

The M.A. program seeks to integrate two areas of inquiry and analysis. The "Critical Studies" area centers on the expressive, creative, and linguistic dimensions of media as cultural processes. The "Political Studies" area focuses primarily on the political and economic dimensions of national and international communications systems and processes. The student is encouraged to combine courses from these and possibly other areas into a coherent package of course work culminating in a thesis.

Degree Requirements

For the M.A. degree, candidates must complete a one-course research core by taking either COMM 506 (quantitative research methods) or COMM 511 (qualitative research methods). The remaining credits are selected by the student in consultation with the adviser from the graduate courses listed in this section. Candidates must complete a minimum of 36 credits, including 6 for the thesis (COMM 600). At least 18 credits must be at the 500 level. Course work offered by departments outside the College of Communications may be scheduled as part of the student's program with prior approval of the student's academic committee. In some cases, students may be required to take additional credits in order to make up deficiencies in undergraduate course work. Students are required to schedule three separate, formal meetings with their advisers and the academic committees for (1) discussion and approval of the general program plan, (2) the thesis proposal, and (3) the defense of the thesis. In most cases, satisfactory completion of course work and thesis requires two years.

Integrated B.A/M.A. in Media Studies

The College of Communications offers academically qualified students enrolled in a bachelor of arts program in the College of Communications the opportunity to earn both the B.A and the M.A. upon completion of five years of study. The Integrated Undergraduate-Graduate Program in Media Studies would facilitate the advanced study of communications research and thesis development through a carefully organized selection of undergraduate courses, graduate seminars and directed research projects. The program would accelerate and enhance undergraduate students' appreciation for graduate level scholarship by involving them in the seminars, research activities, and the scholarly discourse of the college's community of master's- and doctoral-level scholars.

For the IUG Media Studies B.A./M.A. degree, a minimum of 120 credits is required for the B.A. and 36 credits for the M.A. Twelve graduate-level credits, in consultation with the adviser, can apply to both the B.A. and M.A. degrees. Six of these must be at the 500 level.

If for any reason a student admitted to the B.A./M.A. program is unable to complete the requirements for the master of arts degree program in Media Studies, the student will be permitted to receive the B.A. degree, assuming all degree requirements have been satisfactorily completed.

Application Process and Admissions Requirements

Applicants must complete 6 credits from the following lists of courses with a minimum GPA of 3.5 in order to be admitted: 3 credits from COMM 100, COMM 150, COMM 180, COMM 320, or COMM 370 and 3 credits from COMM 205, COMM 250, COMM 381, COMM 401, COMM 403, COMM 304, COMM 405, COMM 407, COMM 408, COMM 409, COMM 410, COMM 411, COMM 413W, COMM 417, COMM 418, COMM 419, COMM 451, COMM 452, COMM 453, COMM 454, COMM 455, COMM 484, or COMM 485. The minimum overall GPA required of applicants is 3.2. Admission to the program is based on the evaluation of the student's transcript, examples of completed writing and research projects, a narrative statement of objectives, and two letters of support from faculty with whom they have worked. One faculty member must be from the College of Communications. Students are expected to apply after completing 60 credits but before the completion of 100 credits. Candidates are expected to present records of outstanding scholarly achievement to qualify. Applications will be reviewed by the appropriate subset of members of the Graduate Committee of the college.

Applicants to the Integrated program:

1. Must be enrolled in a B.A. program in the College of Communications.
2. Must have completed 60 credits of the undergraduate degree program. (It is recommended that students apply prior to completing 100 credits.)
3. Must provide a narrative statement of objectives and two letters of endorsement from faculty with whom they have worked. One faculty member must be from the College of Communications.
4. Must present an approved plan of study in the application process.

Program of Study

The Integrated B.A./M.A. degree in Media Studies is an academic program that involves students in the systematic study of media. The objective of the course of study is to enable students to achieve a comprehensive understanding of the systems, networks, cultures, and information associated with media. The program prepares students for doctoral study in communications and for professional positions in business and government requiring a comprehensive understanding of the historical, social, and political implications of the media. This program helps prepare students to organize research projects, critically evaluate research reports, and directly influence media practices by the application of research findings. The program is specifically not intended for advanced professional education.

Undergraduate tuition rates will apply as long as the student is in undergraduate status, unless the student receives financial support, such as an assistantship requiring the payment of graduate tuition.

Degree Requirements

For the IUG Media Studies M.A. degree, a minimum of 120 credits is required for the B.A. and 36 credits for the M.A. At least 18 of the required 36 credits must be at the 500 level. Twelve graduate-level credits, in consultation with the adviser, can apply to both the B.A. and M.A. degrees. Six of these double-counted credits must be at the 500 level. A minimum of 12 credits of course work, as opposed to research credits, must be completed in Communications. COMM 515 and COMM 506 or COMM 511 are required. IUG students will prepare a thesis proposal in consultation with their advisers and are required to present the final thesis in a formal oral defense meeting to a committee of at least three members of graduate faculty, two of whom must be members of the college faculty. It is encouraged that one member of the committee be from outside the college.

Student Aid

Graduate assistantships and other forms of student aid available to students in this program are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

- Ph.D., M.S.
- Integrated B.S./M.S. Program in Meteorology

The Graduate Faculty

- Peter R. Bannon, Ph.D. (Colorado) Professor of Meteorology
- Alfred K. Blackadar, Ph.D. (NYU) Professor Emeritus of Meteorology
- Craig F. Bohren, Ph.D. (Arizona) Distinguished Professor Emeritus of Meteorology
- William H. Brune, Ph.D. (Johns Hopkins) Professor of Meteorology
- John J. Cahir, Ph.D. (Penn State) Professor Emeritus of Meteorology
- Toby N. Carlson, Ph.D. (Imperial College-London) Professor Emeritus of Meteorology
- John H. E. Clark, Ph.D. (Florida State) Associate Professor of Meteorology
- Eugene Clothiaux, Ph.D. (Brown) Associate Professor of Meteorology
- Kenneth J. Davis, Ph.D. (Colorado) Associate Professor of Meteorology
- John A. Dutton, Ph.D. (Wisconsin) Professor Emeritus of Meteorology
- Jenni L. Evans, Ph.D. (Monash) Professor of Meteorology
- Steven B. Feldstein, Ph.D. (Penn State) Senior Scientist
- William M. Frank, Ph.D. (Colorado State) Professor of Meteorology
- J. Michael Fritsch, Ph.D. (Colorado State) Distinguished Professor Emeritus of Meteorology
- Jerry Y. Harrington, Ph.D. (Colorado State) Associate Professor of Meteorology
- Charles L. Hosler, Ph.D. (Penn State) Professor Emeritus of Meteorology
- James F. Kasting, Ph.D. (Michigan) Distinguished Professor of Geosciences and Meteorology
- Andrew Kleit, Ph.D. (Yale) Professor of Meteorology
- Dennis Lamb, Ph.D. (Washington) Professor of Meteorology
- Sukyoung Lee, Ph.D. (Princeton) Professor of Meteorology
- Paul Markowski, Ph.D. (Oklahoma) Assistant Professor of Meteorology
- Raymond G. Najjar, Ph.D. (Princeton) Associate Professor of Meteorology
- Yvette Pamela Richardson, Ph.D. (Oklahoma) Assistant Professor of Meteorology
- Nelson L. Seaman, Ph.D. (Penn State) Associate Professor of Meteorology
- Hampton N. Shirer, Ph.D. (Penn State) Associate Professor of Meteorology
- David R. Stauffer, Ph.D. (Penn State) Senior Research Associate and Associate Professor of Meteorology
- Dennis W. Thomson, Ph.D. (Wisconsin) Professor of Meteorology
- Johannes Verlinde, Ph.D. (Colorado State) Associate Professor of Meteorology
- John C. Wyngaard, Ph.D. (Penn State) Professor of Meteorology and Geo-Environmental/Mechanical Engineering
- George S. Young, Ph.D. (Colorado State) Professor of Meteorology and Geo-Environmental Engineering

The graduate program embraces topics that span atmospheric processes from those of the planetary boundary layer to those of the upper atmosphere, that encompass phenomena with molecular to planetary dimensions, and that range from practical to theoretical significance. The program develops and integrates approaches based on observational, computational and analytical techniques.

The major interests of the faculty and graduate students center on (1) analysis, modeling, and prediction of the evolution of synoptic-scale, or mesoscale weather systems, particularly those of significant impact on human activities; (2) observation and theoretical study of processes related to transmission of radiation through the atmosphere, including remote sensing through use of electromagnetic or acoustic systems; (3) observations, laboratory, and theoretical study of trace gases, particulates, and clouds and their consequences for air quality and climate; and (4) observation and theoretical study of atmospheric physics on a variety of scales, including phenomena of weather and climate, boundary layer physics, turbulence, convective systems, and severe storms.

The department encourages interdisciplinary studies and is expanding its programs in biometeorology, climate dynamics, atmospheric pollution prediction, atmospheric carbon cycling, forecast reliability and verification, mathematical study of fluid dynamical systems, and integrated atmosphere-ocean studies. The department is affiliated with the Earth and Environmental Sciences Institute, which conducts studies in Earth system science, including climate, large-scale dynamics, oceanography, and regional assessments.

For the M.S. program, a minimum of 30 credits is required. For the Ph.D. program, a minimum of 4 credits is required, plus 6 elective credits per academic year in consultation with the adviser until the comprehensive examination is passed.

Admission Requirements

The Meteorology program is open to all students with a baccalaureate degree and a strong interest in the atmospheric sciences. A degree in meteorology, science, mathematics, or engineering provides a particularly good background, although the department has had some students with arts and humanities degrees (such as Art History) who have done well. The minimum course requirements for admission are mathematics at least through differential equations and at least one year of physics. Scores from the Graduate Record Examinations (GRE) are required for the evaluation of all applicants. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

For admission to the program, the departmental admission committee considers courses taken, grade-point average, supporting letters, GRE scores, professional experience, and English proficiency. Rather than setting rigid standards in each category, the committee examines the overall record as a whole. The best-qualified applicants are accepted up to the number of spaces that are available for new students.

Generally, additional mathematics and physics beyond the minimum requirements listed above, as well as courses in statistics, chemistry, and computer programming, will strengthen the student's application. Courses in meteorology are not required for admission. Most

students admitted to the graduate program have GPA's of 3.50 or higher; particularly good grades in the sciences are desirable. Two recommendations are solicited from persons familiar with the student's academic competence, and the student is required to write a letter summarizing interests and goals. The General Test package containing the Mathematical Reasoning Test of the GRE is required of all applicants. A verbal and quantitative combined score of 1200 or greater is typical for the department's students. All international students whose native language is not English must take the Test of English as a Foreign Language (TOEFL). A minimum TOEFL score of 550 points on the paper test, of 213 points on the computer-based test, or of 80 points on the Internet-based test together with a minimum score of 23 points on the speaking portion, is required for admission.

Master's Degree Requirements

The degree is offered with both thesis and research paper options. For both options, a core curriculum is required that is composed of METEO 520, 521, 533, 535, and 580 that is supplemented by 5 elective credits from 500-level Meteorology courses, for a total of 18 credits.

All students must take a minimum of 12 additional elective credits for a total of 30 credits, which are distributed as follows. Students in the master's thesis option must select 6 additional credits from 400- and 500-level course work in Meteorology or related disciplines, and 6 quality-graded credits of METEO 600 (quality-graded credits count toward the grade-point average). Student in the master's paper option must select 6 of the additional credits from 400- and 500-level course work in Meteorology, together with 6 additional credits from 400- and 500-level course work in Meteorology or related disciplines if not used as electives above. METEO 600 credits cannot be used to fulfill any portion of these additional credits.

Finally, all M.S. students defend their thesis or paper in a public presentation that is evaluated by, and must be approved by, the students' committee. A minimum of three signatures is required for a master's thesis, including the thesis adviser and the department head or program chair.

For a minor in Meteorology, an M.S. student must select 6 credits of 500-level Meteorology courses in a course plan approved by the department.

Doctoral Degree Requirements

Studies for the Ph.D. degree are designed to accommodate the interests and capabilities of the candidate, and they are overseen by a doctoral committee, which also administers comprehensive and final oral examinations. Before being admitted to Ph.D. candidacy, a student must have the academic support of a faculty member and the student must pass each part of the two-part Ph.D. candidacy examination that is typically offered twice each year. In order to assess the student's progress in assimilating the required material, both sections of the exam must be taken within one year of being admitted to the program and the student must pass the entire exam within two years of admission. Once a student passes a section of the candidacy exam, the student does not take that section again. Before being admitted to the comprehensive exam, a student must have passed the department's competency exam in written and spoken technical English. Before being admitted to the final oral exam, a student must have completed 4 required credits: METEO 580 (1 credit) and 3 credits from at least two different graduate seminar courses. In addition, 6 credits per academic year from 400- and 500-level course work in Meteorology or related disciplines must be taken until the comprehensive examination is passed (METEO 580 and the elective courses apply to this requirement). One credit of METEO 590 is required each semester until the comprehensive exam is passed. There are no minimal credit requirements for quality-graded METEO 600 (research credits whose grades count toward the grade-point average). Students may earn up to 12 quality-graded credits, including those earned during the pursuit of an M.S. degree in Meteorology from Penn State. The student is expected to master the material in the M.S. core courses (METEO 520, 521, 533, and 535), but need not take those courses for credit.

Students interested in the emerging field of Astrobiology may wish to obtain a dual-title degree in Astrobiology and Meteorology. The pursuit of this dual title entails additional course work beyond the degree requirements set forth here (see the *Graduate Bulletin* graduate_degree_programs.cfm?letter=D&program=grad_abiol.htm for further details concerning these course and other program requirements), as well as the participation of at least one Astrobiology program faculty member on the dissertation committee. The Astrobiology representative, who assists with the selection of courses, may be the adviser and have an appointment in Meteorology. In addition to passing the departmental Ph.D. Candidacy exam that all Meteorology doctoral students must take, all dual-title students must pass a second Candidacy Examination that assesses their potential in the field of astrobiology. The structure and timing of the second candidacy examination will determined jointly by the dual-title and major program. The field of Astrobiology should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of Astrobiology is required. A public oral presentation of the dissertation is required.

For a minor in Meteorology, Ph.D. students should select 15 credits of 500-level Meteorology courses in a course plan approved by the department.

Other Relevant Information

The program differentiates between instruction and research topics appropriate for M.S. students seeking positions of advanced responsibility in government or industry, those appropriate for M.S. students anticipating further study, and those appropriate for Ph.D. candidates who will work in advanced research laboratories or academic institutions.

Student Aid

Graduate assistantships available through this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. Most graduate students are supported with teaching or research assistantships.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

METEOROLOGY (METEO) course list

NOTE: Courses in the use of X-ray diffraction, electron microscopy, and spectroscopy in meteorological studies are listed under MATERIALS SCIENCE.

Integrated B.S./M.S. Program in Meteorology

The Department of Meteorology offers an integrated B.S./M.S. Program that is designed to allow academically superior students to obtain both the B.S. and the M.S. degree in Meteorology in five years of study. In order to complete the program in five years, students interested in the Integrated B.S./M.S. Program in Meteorology must apply for admission to the Graduate School and the Integrated B.S./M.S. program by the end of their junior year.

During the first three years, the student will follow the course scheduling of one of the options in the B.S. degree, normally the Atmospheric Sciences or the General Option (see the *Undergraduate Bulletin*). Students who intend to enter the Integrated B.S./M.S. Program are encouraged to take upper level classes during their first three years whenever appropriate. By the end of the junior year, students normally apply for admission to both the IUG Program and to the Graduate School. Acceptance decisions will be made prior to the beginning of the senior year and M.S. advising committees appointed for successful applicants. During the senior year, IUG students follow the scheduling of the selected B.S. Meteorology Option, with an emphasis on completing 500-level course work as appropriate. During the senior year, IUG students will start work on their theses or papers that are designed to meet the requirements of the M.S. degree in Meteorology. During the fifth year, IUG students take courses fulfilling the departmental M.S. degree requirements and complete their M.S. theses or papers. Typical scheduling plans for students pursuing the General or Atmospheric Sciences Options are given on the departmental Web site http://www.met.psu.edu. If a plan similar to one of these plans is followed, then the student will have completed all requirements for the B.S. in Meteorology by the end of the fourth year. If, for some reason, a student cannot continue in the integrated program, then this student will be able to receive the undergraduate degree upon completion of all of the B.S. requirements. Undergraduate tuition rates will apply as long as the student is an undergraduate, unless the student receives financial support, for example, via an assistantship requiring the payment of graduate tuition.

Admission Requirements

Students who wish to complete the Integrated B.S./M.S. Program in Meteorology should apply for admission to both the Graduate School and the Integrated B.S./M.S. Program by no later than the end of their junior year. In this case, successful students will be admitted formally into the graduate program in Meteorology just prior to their senior year, if their progress has been satisfactory. Admission prior to the senior year is also possible in some unusual circumstances. In all cases, admission to the program will be at the discretion of the Graduate Admissions Officer for the Department of Meteorology, who will determine the necessary criteria for all applicants. These criteria include the setting of the minimum required scores on the GRE and minimum cumulative GPA for consideration, the receipt of recommendation letters from three faculty and a letter of support from the department head, and the identification of an adviser who is willing to oversee the student's research project; normally, evidence of significant research potential must be provided in the application as well.

Degree Requirements

The total degree requirements are as follows: The new program will fulfill the present rigorous requirements of the existing M.S. Program. In particular, all IUG students must defend their theses or papers, as do all M.S. students, in a public presentation toward the end of their graduate program.

B.S. Degree Portion:

TOTAL B.S. REQUIREMENTS: 121 credits (12 double-counted with the M.S. Requirements)

General Education: 45 credits, 24 of which are included in the REQUIREMENTS FOR THE MAJOR

Requirements for the Major (All Options): 75 credits

Prescribed Courses: 56 credits
Additional Courses: 19 credits

Requirements for the General Option: 18-19 credits

M.S. Degree Portion:

TOTAL M.S. REQUIREMENTS: 30 credits (12 double-counted with the B.S. Requirements)

Prescribed Courses: METEO 520, 521, 533, 535 (12 credits)

Additional Courses: 18 credits

6 credits of 500-level course work
6 credits of 400- or 500-level course work
6 credits of METEO 600 (thesis option)
or 6 credits of 400- or 500-level course work

- Richard B. Tenser, M.D. (SUNY, Upstate) Professor of Medicine, and Microbiology and Immunology
- M. Judith Tevethia, Ph.D. (Michigan State) Professor Emeritus of Microbiology and Immunology
- Satvir S. Tevethia, B.V.Sc. (Agra, India); Ph.D. (Michigan State) Distinguished Professor Emeritus of Microbiology and Immunology
- Mary Ellen Truckenmiller, Ph.D. (California) Assistant Professor of Microbiology and Immunology
- Michael F. Verderame, Ph.D. (Columbia) Professor of Medicine, and Microbiology and Immunology
- Hanspeter Waldner, Ph.D. (U of Basil) Assistant Professor of Microbiology and Immunology
- John W. Wills, Ph.D. (Tennessee) Distinguished Professor of Microbiology and Immunology

The graduate program in Microbiology and Immunology emphasizes basic research consisting of the application of molecular, genetic, and biochemical approaches to problems of fundamental biological interest. The research activities of the department are focused on the study of the interactions of viruses with their host cells and organisms with emphasis on adenoviruses, hepatitis virus, herpesviruses, papillomaviruses, papovaviruses, and retroviruses. Individual research programs center on virus replication and cellular immune response in these processes. Viral systems are also utilized as models for the study of eukaryotic gene regulation, protein transport and processing, transmembrane and intracellular signal transduction, and the human immune response. In addition, active research programs are maintained in the areas of eukaryotic cellular differentiation and growth control, tumor cell biology and immunology, and the mapping of human immune response genes and genes associated with other human diseases.

A laboratory rotation program during the first academic year serves as an introduction to the different subdisciplines and investigators. This experience acquaints each student with four research groups leading to the choice of a permanent research adviser. A broad-based curriculum and stimulating series of seminars and literature reports complement the research training.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by the Graduate Program Committee and authorized by the dean of the Graduate School, are required for admission. Requirements listed here are in addition to general Graduate School admission requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Qualified students with undergraduate preparation in biological, biochemical, or physical sciences may apply. An adequate background in biology, general and organic chemistry, and mathematics and an overall grade-point average of 3.00 or better are required.

The best-qualified applicants will be accepted on a space-available basis. Formal applications should contain three letters of recommendation and a brief personal essay summarizing the background and professional goals of the applicant.

Doctoral Degree Requirements

During the first year of study, Ph.D. candidates take The College of Medicine Core Curriculum (BMS 501 Regulation of Cellular and Systemic Energy Metabolism, BMS 502 Cell and Systems Biology, and BMS 503 Flow of Cellular Information) in the Fall semester to provide a strong foundation. Additional Required courses are GENET 581, IBIOS 580, IBIOS 591, MICRO 550, MICRO 551, MICRO 553, MICRO 560, MICRO 572, MICRO 581, MICRO 582, MICRO 583, MICRO 590, and MICRO 602. To augment the core sequence of courses, students and their thesis committees will formulate an individualized advanced curriculum including departmental courses, as well as graduate courses offered by other departments.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of

the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Peter T. Luckie, Ph.D. (Penn State) *Professor Emeritus of Mineral Engineering*
- Kwadwo A. Osseo-Asare, Ph.D. (California, Berkeley) *Professor of Metallurgy*

The Department of Energy and Geo-Environmental Engineering provides a vertically integrated approach to research and education in all aspects of the energy and mineral industries, including scientific and engineering issues, health and safety and maintenance of high environmental standards. The department's mission is to forge an intellectual and scientific cohesiveness in energy and mineral resource technology. This objective is achieved by exploiting the natural synergy between the exploration, extraction, processing and utilization of energy and mineral resources so as to cater to the emerging needs of society.

The Department of Energy and Geo-Environmental Engineering offers advanced degrees in six programmatic areas (Energy and Geo-Environmental Engineering, Industrial Health and Safety, Mineral Processing, Mining Engineering, Oil and Gas Engineering Management, and Petroleum and Natural Gas Engineering). Each academic degree program has specific faculty associated with it and a professor who serves as the graduate program chair. The Department of Energy and Geo-Environmental Engineering has overall requirements for the M.S., M.Eng., and Ph.D. degrees with specific requirements associated with each program.

Mineral Processing Program

Mineral Processing is concerned with the extraction and purification of valuable commodities from the earth. The raw materials produced by mining are highly impure and must be upgraded before they are of use to society. For example, the cleaning of coal to minimize pollution is an area of national and international concern. Energy, raw materials, and the environment are some of the most serious problem areas facing the world today. Mineral processing engineers play a key role in solving these problems.

The refining of mineral commodities involves a broad variety of problems, mostly associated with the production, handling, and separation of solid particles. Particle systems are also critical to many of the processes and products of modern industry: materials, chemicals, and electronics as well as minerals. Mineral processing engineers are at the forefront of the science and technology of particle systems, and many of the techniques and procedures used in mineral processing find direct application in other areas. Training of a mineral processing engineer involves interdisciplinary study of chemistry, physics, the geological sciences, and engineering with special emphasis on concentration by physical methods; surface chemistry of particles; particle processing; chemical and thermal extraction processes, etc.

Pollution control and the preservation of environmental quality are of major concern to the mineral processing profession. The mining and processing industries produce large quantities of solid waste which must be disposed of properly. Process water must be treated for reuse or disposal and processing systems must be designed and operated to minimize air pollution. Many air and water pollution control methods use equipment and processes originally developed for the mineral industries. Mineral processing methods are also involved in the recovery, recycling, and reuse of metals and other materials.

Admission Requirements

Scores for the Graduate Record Examinations (GRE) are required for admission, though this may be waived at the discretion of the academic programs. The best-qualified applicants will be accepted up to the number of spaces available for new students. Students will be accepted by the academic programs and at the discretion of a graduate program, a student may be granted provisional admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*

Admission to the academic programs in the Department of Energy and Geo-Environmental Engineering is competitive. Entering students must hold a bachelor's degree in engineering or physical sciences. Students with 3.00 or better (out of 4.00) junior/senior cumulative grade-point averages and appropriate course backgrounds will be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Entering graduate students in Energy and Geo-Environmental Engineering for whom English is not the first language are required to have a score of at least 550 on the Test of English as a Foreign Language (TOEFL) examination. Letters of recommendation and a statement of purpose written by the applicant are also required.

Masters Degree Requirements

The M.S. degree programs in the Department of Energy and Geo-Environmental Engineering are designed for students to gain advanced knowledge for research, analysis, and design in Energy and Geo-Environmental Engineering, Industrial Health and Safety, Mineral Processing, Mining Engineering, and Petroleum and Natural Gas Engineering. Students pursuing an M.S. degree will be required to

complete 24 course credits and submit a thesis (6 credits) to the Graduate School. Graduate committees in each academic program play an important role in formulating individual course and research schedules.

The Mining Engineering and Oil and Gas Engineering Management programs also offer an M.Eng. degree. Students pursuing an M.Eng degree are required to present a scholarly written report on a suitable project, the topic of which may be suggested by the industry. The report must be a scholarly achievement, relating a developmental study that involves an appropriate, significant subject in the discipline. The report must be approved by a committee of the faculty comprised of report adviser, report reader, and chair of the program.

The specific credit requirements and other specifics of the master's programs in Energy and Geo-Environmental Engineering are available upon request.

Doctoral Degree Requirements

The Ph.D. programs in the Department of Energy and Geo-Environmental Engineering emphasize scholarly research and help students prepare for research and related careers in industry, government and academe. Acceptance into the Ph.D. degree programs in the Department of Energy and Geo-Environmental Engineering are based on the student's performance on the Ph.D. candidacy examination administered by the faculty of a specific academic program. A comprehensive examination is required of all Ph.D. candidates and should be taken after substantial completion of course work. The comprehensive examination is the responsibility of the candidate's doctoral committee and administered according to the rules specified by the Graduate School. The Ph.D. programs in Energy and Geo-Environmental Engineering are quite flexible with minimum formal requirements. The communication and foreign language requirements for the Ph.D. degree may be satisfied by intermediate knowledge of one foreign language. The general requirements for graduation are outlined in the GENERAL INFORMATION section of the *Graduate Bulletin*. The specific credit requirements of the Ph.D. programs in Energy and Geo-Environmental Engineering are available upon request.

Other Relevant Information

All graduate students are expected to attend general department seminars and seminars in their programmatic areas. Graduate students may be asked to contribute to the instructional programs of the department by assisting with laboratory and lecture courses.

Students in Mining Engineering and Petroleum and Natural Gas Engineering may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. (*See also* Operations Research.)

Student Aid

Graduate students are supported by a variety of government and industry fellowships, and research and teaching assistantships. Stipends vary depending on the source. Please see the STUDENT AID section of the *Graduate Bulletin* to learn other forms of the student aid.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

MARK S. KLIMA, *Associate Department Head*

Department Office
110 Hosler Building
814-865-3437

Degrees Conferred:

Ph.D., M.S., M.Eng.

The Graduate Faculty

- Z. T. Bieniawski, D.Sc. (Eng) (U Pretoria) *Professor Emeritus of Mineral Engineering*
- Christopher J. Bise, Ph.D. (Penn State) *Professor of Mining Engineering, and Industrial Health and Safety; George H., Jr., and Anne B. Deike Chair in Mining Engineering*
- Robert L. Frantz, M.S. (Penn State) *Professor Emeritus of Mining Engineering*
- Maochen Ge, Ph.D. (Penn State) *Associate Professor of Mining Engineering*
- H. Reginald Hardy, Ph.D. (Virginia Tech) *Professor Emeritus of Mining Engineering*
- M. Thaddeus Ityokumbul, Ph.D. (Univ. of Western Ontario) *Associate Professor of Mineral Processing and Geo-Environmental Engineering*
- Vladislav Kecojevic, Ph.D. (U Belgrade) *Assistant Professor of Mining Engineering*
- Mark S. Klima, Ph.D. (Penn State) *Associate Professor of Mineral Processing and Geo-Environmental Engineering*
- Jan M. Mutmansky, Ph.D. (Penn State) *Professor Emeritus of Mining Engineering*
- Barry L. Phelps, Ph.D. (Penn State) *Associate Professor Emeritus of Mining Engineering*
- Raja V. Ramani, Ph.D. (Penn State) *Professor Emeritus of Mining and Geo-Environmental Engineering*
- Andrew P. Schissler, Ph.D. (Colorado School of Mines) *Assistant Professor of Mining Engineering*

The Department of Energy and Geo-Environmental Engineering provides a vertically integrated approach to research and education in all aspects of the energy and mineral industries, including scientific and engineering issues, health and safety and maintenance of high environmental standards. The department's mission is to forge an intellectual and scientific cohesiveness in energy and mineral resource technology. This objective is achieved by exploiting the natural synergy between the exploration, extraction, processing and utilization of energy and mineral resources so as to cater to the emerging needs of society.

The Department of Energy and Geo-Environmental Engineering offers advanced degrees in six programmatic areas (Energy and Geo-Environmental Engineering, Industrial Health and Safety, Mineral Processing, Mining Engineering, Oil and Gas Engineering Management, and Petroleum and Natural Gas Engineering). Each academic degree program has specific faculty associated with it and a professor who serves as the graduate program chair. The Department of Energy and Geo-Environmental Engineering has overall requirements for the M.S., M.Eng., and Ph.D. degrees with specific requirements associated with each program.

Mining Engineering: The objectives of the Mining Engineering program are to train students in the methodology of research and expand the student's knowledge in selected subjects related to research as well as to the entire field of mining engineering.

Areas of specialization in research and course work include computer applications, environmental control, geomechanics and rock mechanics, health and safety, innovative mining systems, materials handling, mine electrical systems, mine maintenance, mine management, mine planning and reclamation, monitoring and control, operations research, surface mining, underground mining, and ventilation. Interests cover coal, metal, and nonmetal mining.

The program has outstanding facilities for mining engineering research. Among these are the Mining Computer Laboratory, Rock Mechanics Laboratory, and Ventilation Laboratory.

Admission Requirements

Scores for the Graduate Record Examinations (GRE) are required for admission, though this may be waived at the discretion of the academic programs. The best-qualified applicants will be accepted up to the number of spaces available for new students. Students will be accepted by the academic programs and at the discretion of a graduate program, a student may be granted provisional admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*

Admission to the academic programs in the Department of Energy and Geo-Environmental Engineering is competitive. Entering students must hold a bachelor's degree in engineering or physical sciences. Students with 3.00 or better (out of 4.00) junior/senior cumulative grade-point averages and appropriate course backgrounds will be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Entering graduate students in Energy and Geo-Environmental Engineering for whom English is not the first language are required to have a score of at least 550 on the Test of English as a Foreign Language (TOEFL) examination. Letters of recommendation and a statement of purpose written by the applicant are also required.

Master's Degree Requirements

The M.S. degree programs in the Department of Energy and Geo-Environmental Engineering are designed for students to gain advanced knowledge for research, analysis, and design in Energy and Geo-Environmental Engineering, Industrial Health and Safety, Mineral Processing, Mining Engineering, and Petroleum and Natural Gas Engineering. Students pursuing an M.S. degree will be required to complete 24 course credits and submit a thesis (6 credits) to the Graduate School. Graduate committees in each academic program play an important role in formulating individual course and research schedules.

The Mining Engineering and Oil and Gas Engineering Management programs also offer an M.Eng. degree. Students pursuing an M.Eng degree are required to present a scholarly written report on a suitable project, the topic of which may be suggested by the industry. The

report must be a scholarly achievement, relating a developmental study that involves an appropriate, significant subject in the discipline. The report must be approved by a committee of the faculty comprised of report adviser, report reader, and chair of the program.

The specific credit requirements and other specifics of the master's programs in Energy and Geo-Environmental Engineering are available upon request.

Doctoral Degree Requirements

The Ph.D. programs in the Department of Energy and Geo-Environmental Engineering emphasize scholarly research and help students prepare for research and related careers in industry, government and academe. Acceptance into the Ph.D. degree programs in the Department of Energy and Geo-Environmental Engineering are based on the student's performance on the Ph.D. candidacy examination administered by the faculty of a specific academic program. A comprehensive examination is required of all Ph.D. candidates and should be taken after substantial completion of course work. The comprehensive examination is the responsibility of the candidate's doctoral committee and administered according to the rules specified by the Graduate School. The Ph.D. programs in Energy and Geo-Environmental Engineering are quite flexible with minimum formal requirements. The communication and foreign language requirements for the Ph.D. degree may be satisfied by intermediate knowledge of one foreign language. The general requirements for graduation are outlined in the GENERAL INFORMATION section of the *Graduate Bulletin*. The specific credit requirements of the Ph.D. programs in Energy and Geo-Environmental Engineering are available upon request.

Other Relevant Information

All graduate students are expected to attend general department seminars and seminars in their programmatic areas. Graduate students may be asked to contribute to the instructional programs of the department by assisting with laboratory and lecture courses.

Students in Mining Engineering and Petroleum and Natural Gas Engineering may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. (*See also* Operations Research.)

Student Aid

Graduate students are supported by a variety of government and industry fellowships, and research and teaching assistantships. Stipends vary depending on the source. Please see the STUDENT AID section of the *Graduate Bulletin* to learn other forms of the student aid.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. Current Co-Chairs

AVERY AUGUST, Department of Veterinary and Biomedical Sciences, University Park
CHARLES H. LANG, Department of Cellular and Molecular Physiology, College of Medicine, Penn State Hershey Medical Center

Degrees Conferred:

Ph. D., M.S.

The Graduate Faculty

- Avery August , Ph.D. (Veterinary and Biomedical Sciences, College of AgSci)
- David Antonetti, Ph.D. (Cellular and Molecular Physiology, College of Medicine)
- Rebecca Bascom, M.D. (Medicine, College of Medicine)
- Sarah Bronson, Ph.D. (Cellular and Molecular Physiology, College of Medicine)
- Craig E. Cameron, Ph.D. (Biochemistry and Molecular Biology, ECoS)
- Margherita Cantorna , Ph.D. (Veterinary and Biomedical Sciences, College of AgSci)
- Douglas R. Cavener, Ph.D. (Biology, ECoS)
- Gary Clawson, M.D., Ph.D. (Pathology, Molecular Biology and Biochemistry, and Gittlen Cancer Center, College of Medicine)
- James Connor, Ph.D. (Neural and Behavioral Sciences, College of Medicine)
- Pamela Correll, Ph.D. (Veterinary and Biomedical Sciences, College of AgSci)
- Richard Courtney, Ph.D. (Microbiology and Immunology, College of Medicine)
- Kristen Eckert, Ph.D. (Pathology, Molecular Biology and Biochemistry, and Gittlen Cancer Center, College of Medicine)
- Nina Federoff, Ph.D. (Biology, ECoS)
- Richard Frisque, Ph.D. (Biochemistry and Molecular Biology, ECoS)
- Robert Gabbay, M.D., Ph.D. (Medicine, College of Medicine)
- Thomas Gardner, M.D. (Molecular Biology and Physiology, College of Medicine)
- Adam Glick, Ph.D. (Veterinary and Biomedical Sciences, College of AgSci)
- Channe Gowda, Ph.D. (Molecular Biology and Biochemistry, College of Medicine)
- Eric Harvill, Ph.D. (Veterinary and Biomedical Sciences, College of AgSci)
- Biao He, Ph.D. (Veterinary and Biomedical Sciences, College of AgSci)
- Andrew Henderson, Ph.D. (Veterinary and Biomedical Sciences, College of AgSci)
- Jianming Hu, Ph.D. (Microbiology and Immunology, College of Medicine)
- Harriet Isom, Ph.D. (Microbiology and Immunology, College of Medicine)
- Leonard Jefferson, Ph.D. (Cellular and Molecular Physiology , College of Medicine)
- Michael Katzman, M.D. (Medicine, College of Medicine)
- Ralph Keil, Ph.D. (Molecular Biology and Biochemistry, College of Medicine)
- Mark Kester, Ph.D. (Pharmacology, College of Medicine)
- Kouacou Konan , Ph.D. (Biochemistry and Molecular Biology, ECoS)
- Zhi-Chun Lai, Ph.D. (Biology and Biochemistry & Molecular Biology, ECoS)
- Charles H. Lang, Ph.D. (Cellular and Molecular Biology, College of Medicine)
- Kathryn LaNoue, Ph.D. (Cellular and Molecular Physiology, College of Medicine)
- Philip Lazarus, Ph.D. (Pharmacology, College of Medicine)
- Robert Levenson, Ph.D. (Pharmacology, College of Medicine)
- Thomas Loughran, M.D. (Penn State Cancer Institute, College of Medicine)
- Bernhard Luscher, Ph.D. (Biology and Biochemistry &Molecular Biology, ECoS)
- Christopher Lynch, Ph.D. (Cellular and Molecular Physiology, College of Medicine)
- Andrea M. Mastro, Ph.D. (Biochemistry and Molecular Biology, ECoS)
- Patricia McLaughlin, Ph.D. (Neural and Behavioral Sciences, College of Medicine)
- Jan McAllister, Ph.D. (Cellular and Molecular Physiology, College of Medicine)
- Craig Meyers, Ph.D. (Microbiology and Immunology, College of Medicine)
- David Mu, Ph.D., (Pathology, and Biochemistry and Molecular Biology, College of Medicine)
- Kathleen Mulder, Ph.D. (Pharmacology, College of Medicine)
- Christopher Norbury, Ph.D. (Microbiology and Immunology, College of Medicine)
- Curt Omiecinski, Ph.D. (Veterinary and Biomedical Sciences, College of AgSci)
- Leslie Parent, M.D. (Medicine, College of Medicine)
- Robert Paulson, Ph.D. (Veterinary and Biomedical Sciences, College of AgSci)
- Gary Perdew, Ph.D. (Veterinary and Biomedical Sciences, College of AgSci)
- Jeffrey M. Peters, Ph.D. (Veterinary and Biomedical Sciences, College of AgSci)
- Joseph Reese, Ph.D. (Biochemistry and Molecular Biology, ECoS)
- Ira Ropson, Ph.D. (Molecular Biology and Biochemistry, College of Medicine)
- Carl Barth Roundtree, Ph.D. (Pediatrics and Pharmacology, College of Medicine)
- Jeffery Sample, Ph.D. (Micrbiology and Immunology, College of Medicine)
- Robert A. Schlegel, Ph.D. (Biochemistry and Molecular Biology, ECoS)
- Cara-Lynn Schengrund, Ph.D. (Molecular Biology and Biochemistry, College of Medicine)
- Ian Simpson, Ph.D. (Neural and Behavioral Sciences, College of Medicine)
- Jill Smith, M.D. (Medicine, College of Medicine)
- Michael Smith, Ph.D. (Radiology, College of Medicine)
- Shao-Cong Sun, Ph.D. (Microbiology and Immunology, College of Medicine)
- Song Tan, Ph.D. (Biochemistry and Molecular Biology, ECoS)
- Michael Teng, Ph.D. (Biochemistry and Molecular Biology, ECoS)
- Diane Thiboutot, M.D. (Medicine, College of Medicine)
- Thomas Vary, Ph.D. (Cellular and Molecular Physiology, College of Medicine)
- Kent Vrana, Ph.D. (Pharmacology, College of Medicine)
- Yanming Wang, Ph.D. (Biochemistry and Molecular Biology, ECoS)
- Na Xiong , Ph.D. (Veterinary and Biomedical Sciences, College of AgSci)

- Ian Zagon, Ph.D. (Neural and Behavioral Sciences, College of Medicine)
- Jiyue Zhu, Ph.D. (Cellular and Molecular Physiology, College of Medicine)

The Intercollege Graduate Program in Molecular Medicine (IGDP in MM) prepares graduates for diverse opportunities in academic institutions, pharmaceutical companies, private research foundations, governmental research and regulatory programs. The program includes faculty from 14 academic units in the College of Agricultural Sciences and Eberly College of Science at the University Park campus and the College of Medicine at the Penn State Milton S. Hershey Medical Center. The IGDP in MM is also supported by the Huck Institutes of Life Sciences which provides modern telecommunications facilities and sophisticated equipment for state-of-the-art research applications. Doctoral students not only explore new conceptual connections, but also engage in active group learning experiences and explore a variety of potential career opportunities before graduation. Two unique aspects are (1) optional dual mentors will expose students to complementary viewpoints and encourage students to pursue problems at the interface between traditional disciplines, and (2) an optional internship will provide a mechanism for students to obtain practical experience in future professional settings.

General Admission Requirements

Ph.D. degrees

Application deadline is December 1 for priority consideration.

1. Completed official Penn State Graduate School application for the IGDP in Molecular Medicine
2. Paid nonrefundable application fee
3. Two official transcripts from each institution attended
4. Application for a U.S. visa (International applicants only)
5. Graduate Record Examinations (GRE) general test
6. Three letters of recommendation
7. Statement of goals that pertains to the life sciences
8. All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the TOEFL (Test of English as a Foreign Language) examination. A minimum TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or a score of 80 on the internet-based test is required.
9. Students must have completed a bachelor's degree at an accredited college or university and have a minimum of a 3.0/4.0 junior/senior undergraduate grade-point average.

Program Requirements

Ph.D. degrees

1. Foundation of basic knowledge in cancer biology, toxicology, immunology, infectious diseases, molecular biology, cell biology, biochemistry. The IGDP in MM requires at least 9 credits in one or more of these disciplines. Students may request a waiver of a required if they have taken the specific course as an undergraduate or a similar course at another institution. The request will be made in writing to the campus curriculum committee after consultation with the co-chair. The following courses are to fulfill this requirement.

University Park

BIOCHEMISTRY AND MOLECULAR BIOLOGY (B M B)
464. Molecular Medicine (3 credits)

BIOCHEMISTRY, MICROBIOLOGY & MOLECULAR BIOLOGY (BMMB)
501. Biochemistry & Molecular Biology (5 credits)

INTEGRATIVE BIOSCIENCES (IBIOS)
VBS/IBIOS 511. Molecular Immunology (2 credits)
590. Colloquium(1 credit)
591. Ethics in Life Sciences (1 credit)
596. Independent Studies: 3 Laboratory Rotations (1 credit)

Penn State Hershey

College of Medicine Core Curriculum

BIOMEDICAL SCIENCE (BMS)
501. Regulation of Cellular and Systemic Energy Metabolism (3 credits)
502. Cell and Systems Biology (3 credits)
503. Flow of Cellular Information (3 credits)

Molecular Medicine Core Curriculum

INTEGRATIVE BIOSCIENCES (IBIOS)
590. Colloquium (1 credit)
591. Ethics in Life Sciences (1 credit)
596 Independent Studies: 3 Laboratory Rotations (1 credit)

Electives

Five additional credits from the College of Medicine Selective Courses

To augment the core sequences of courses, students and their research committees will formulate an individualized advanced curriculum. Additionally, opportunities to participate in an internship (IBIOS 595) or supervised college teaching experiences (IBIOS 602/VBS 602) are available. Interested graduate students are to discuss the opportunity with a MM IGDP Co-Chair and/or their faculty advisor.

IBIOS 595. INTERNSHIP (1 credit). For students interested in exploring academic, government, medical, law, or business corporate approaches to research. This is an external work assignment relevant to individual research or career goals. Interested graduate students are to discuss the opportunity with the IGDP in MM co-chair and/or their faculty advisor.

IBIOS 602/VBS 602. SUPERVISED EXPERIENCE IN COLLEGE TEACHING (1 credit). All students are strongly encouraged to enroll for 1 credit

(or the equivalent) of Supervised Experience in College Teaching before the beginning of their third year. International fellows from non-English speaking countries must pass an English proficiency exam before any teaching duties are assigned.

M.S. Degree Requirements

Although the graduate program in Molecular Medicine generally gives admission to students who seek the Ph.D. degree, on occasion, the program may allow candidates to pursue the Master of Science (M.S.) degree. This degree can also serve as an alternative for students who do not proceed to the Ph.D. for any number of reasons. It should be noted that an M.S. degree is not required for entry into the Ph.D. program of the Molecular Medicine IGDP. Masters students must have a minimum of 30 credits and a 3.0 overall GPA. IBIOS 595 (Internship), 596 (Rotations), and 602 (Teaching) credits all count toward the 30 credits. 18 credits need to be in the major at the 500-600 level.

Student Aid

Graduate assistantships available in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. Under normal circumstances, all students admitted and continuing in good standing are provided with graduate assistantship support from University sources, research grants, or fellowships. Financial support is usually not provided for work toward a M.S. degree.

Courses

Graduate courses carry numbers from 500-599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

For course descriptions see the corresponding URLs.

Degrees Conferred:

Ph. D., M.S.

The Graduate Faculty

- Shantu Amin, Ph.D. (Stevens Institute of Technology) Professor of Pharmacology and Biochemistry and Molecular Biology
- Anne Andrews, Ph.D. (American University) Assistant Professor of Veterinary and Biomedical Sciences
- Keith Cheng, M.D.; Ph.D. (NYU; U Washington) Associate Professor of Pathology; Adjunct Professor of Biochemistry and Molecular Biology
- Gary Clawson, Ph.D.; M.D., (Michigan State; Miami) Professor of Pathology, and Biochemistry and Molecular Biology
- Kristin Eckert, Ph.D. (Wisconsin, Madison) Associate Professor of Pathology, and Biochemistry and Molecular Biology
- Karam El-Bayoumy, Ph.D. (New York University) Professor of Pharmacology and Biochemistry and Molecular Biology
- Adam Glick, Ph.D. (Yale) Associate Professor of Veterinary and Biomedical Sciences
- Christopher Herzog, Ph.D. (Medical College of Ohio) Assistant Professor of Pharmacology
- Harriet Isom, Ph.D. (Illinois) Assistant Dean and Director of the M.D./Ph.D. Program; Distinguished Professor of Microbiology and Immunology and Professor of Pathology
- Mark Kester, Ph.D. (SUNY, Buffalo) Professor of Pharmacology
- Philip Lazarus, Ph.D. (McGill) Associate Director Penn State Cancer Institute
- Robert Levenson, Ph.D. (SUNY, Stony Brook) Professor of Pharmacology
- Keith Martin, Ph.D. (North Carolina, Greensboro) Assistant Professor of Nutrition
- Andrea M. Mastro, Ph.D. (Penn State) Professor of Microbiology and Cell Biology
- Kathleen Mulder, Ph.D. (SUNY, Buffalo) Professor of Pharmacology
- Chris Mullin, Ph.D. (Cornell) Professor of Insect Toxicology
- Curtis J. Omiecinski, Ph.D. (U of Washington) Professor of Veterinary and Biomedical Sciences
- Gary Perdew, Ph.D. (Oregon State) Distinguished Professor of Molecular Toxicology
- Jeffrey M. Peters, Ph.D. (California, Davis) Associate Professor of Molecular Toxicology
- C. Channa Reddy, Ph.D. (Indian Inst of Science) Distinguished Professor and Head of Veterinary and Biomedical Sciences
- John Richie, Ph.D. (Louisville) Professor of Health Evaluation Sciences
- Gavin Robertson, Ph.D. (California, Riverside) Assistant Professor of Pharmacology
- Thomas Spratt, Ph.D. (Chicago) Associate Professor of Biochemistry and Molecular Biology
- Chen-Pei David Tu, Ph.D. (Cornell) Professor of Biochemistry and Molecular Biology
- John Vanden Heuvel, Ph.D. (Wisconsin) Associate Professor of Molecular Toxicology
- Kent Vrana, Ph.D. (Louisiana State) Professor and Chair of Pharmacology
- Jong Yun, Ph.D. (Case Western Reserve) Assistant Professor of Pharmacology
- Jiyue Zhu, Ph.D. (Dartmouth Medical School) Assistant Professor of Cellular and Molecular Physiology

The Intercollege Graduate Program in Molecular Toxicology (IGDP in MT) prepares graduates for diverse opportunities in academic institutions, pharmaceutical companies, private research foundations, governmental research, and regulatory programs. The program includes faculty from eight departments in the College of Agricultural Sciences, Health and Human Development and Eberly College of Science at the University Park campus and the College of Medicine at the Penn State Milton S. Hershey Medical Center. The IGDP in MT is also supported by the Huck Institutes of Life Sciences, which provides modern telecommunications facilities and sophisticated equipment for state-of-the-art research applications. Doctoral students not only explore new conceptual connections, but also engage in active group-learning experiences and explore a variety of potential career opportunities before graduation. Two unique aspects are (1) optional dual mentors will expose students to complementary viewpoints and encourage students to pursue problems at the interface between traditional disciplines, and (2) an optional internship will provide a mechanism for students to obtain "real world" experience in future professional settings.

General Admission Requirements

M.S. or Ph.D. degrees

Application deadline is January 10 for priority consideration.

1. Completed official Penn State Graduate School application
2. Paid nonrefundable application fee
3. Two official transcripts from each institution attended
4. Completed Integrative Biosciences Graduate Degree Program application
5. Application for a U.S. visa (International applicants only)
6. Graduate Record Examinations (GRE) general test
7. Three letters of recommendation
8. Statement of goals that pertains to the life sciences
9. International applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English, must take the TOEFL (Test of English as a Second Language) and submit

the results of that test with the application for admission. A TOEFL score of 550 on the paper test, a score of 213 on the computer-based test, or 80 points on the internet-based test with a minimum of 23 points on the speaking portion is required for admission.

10. Students must have completed a bachelor's degree at an accredited college or university and have a minimum of a 3.0/4.0 junior/senior undergraduate grade-point average.

Additional English Requirement for International Students (both M.S. and Ph.D.)

International applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English, whether or not they hold a teaching assistantship, will be required to take the AEOCPT (American English Oral Communicative Proficiency Test) prior to entering the classroom. The AEOCPT is given at the beginning of fall and spring semesters. All international students are required to preregister for this test. This test is administered at the University Park campus, thus students from the Hershey campus are required to take the test at the University Park campus. Below is the course of action for the score ranges:

- Greater than 250 approved for teaching and the ESL (English as a Second Language) requirement will be satisfied.
- 230-249 required to schedule and pass ESL 118G.
- 200-229 required to pass ESL 117G*. These students will not be permitted to teach in a classroom situation, and may instead be assigned to grading and/or proctoring duties.
- Less than 200 required to schedule and pass with the grade of A ESL 115G, before ESL 117G*. These students will not be permitted to teach in a classroom situation, and may instead be assigned to grading and/or proctoring duties.

* At the end of this course, students are re-tested. Based upon these test results, students are either approved for teaching, placed in a subsequent ESL course, or asked to retake the course. Students who are required to enroll in ESL courses must complete the ESL requirement by the end of the second semester of residency. As noted above, the ESL courses are taught at the University Park campus, thus students from the Hershey campus must attend these courses at the University Park campus, or receive suitable course work at Hershey, if available. Students who fail to satisfy this requirement may be terminated from the IGDP in MT program, at the discretion of the co-chairs.

Program Requirements

M.S. or Ph.D. degrees

1. Foundation of basic knowledge in molecular biology, cell biology, biochemistry, and molecular toxicology. The IGDP in MT requires at least 9 credits in one or more of these disciplines, taken either as an undergraduate or as a part of the graduate curriculum. The following courses are requirements for respective campuses.

University Park students

BIOCHEMISTRY AND MOLECULAR BIOLOGY (B M B)
400. MOLECULAR BIOLOGY OF THE GENE (3 credits)

VETERINARY AND BIOMEDICAL SCIENCES (VB SC)
433. MOLECULAR AND CELLULAR TOXICOLOGY (3 credits)

VETERINARY SCIENCE (V SC)
V SC/IBIOS 530. REGULATION OF GENE EXPRESSION (3 credits)

Hershey Medical Center Students

CELL AND MOLECULAR BIOLOGY (CMBIO)
502. CORE BIOCHEMISTRY (3 credits)
503. MOLECULAR BIOLOGY (3 credits)

PHARMACOLOGY (PHARM)
520. PRINCIPLES OF DRUG ACTION (2 credits)

In addition to these required courses, electives must also be taken to fulfill the required number of academic credits for either an M.S. or Ph.D. degrees.

1. **IBIOS 570 MOLECULAR TOXICOLOGY SEMINAR (2 credits, 1 per semester during any of the first four semesters in residence)**, a monthly colloquium that will present molecular toxicology topics of general interest to all faculty and graduate students in the IGDP in MT.
2. **IBIOS 590 COLLOQUIUM (2 credits)** All students are required to enroll for 4 credits of Colloquium. Students typically take this course in the fall and spring semesters of their first year. In Colloquium, students are introduced to a wide variety of topics of contemporary and future importance in the life sciences. A particular focus is placed on topics where science is likely to impact on society (and society on science). Topics are drawn from the area introduced by the speaker and can span the entire spectrum from basic research to the social, legal, moral and ethical implications of the science. A significant challenge in Colloquium is to organize and coordinate a presentation using contemporary presentation software, such as PowerPoint, in an environment in which part of the audience is present at a remote site. Students are required to attend the lectures and the dinners following the lectures. Students also participate in the group presentations during discussion sessions and submit written reports. Reports may be submitted to the co-chairs of the IGDP who may add them to the student's permanent record. Students receive A-F quality grades.
3. **IBIOS 591. ETHICS IN THE LIFE SCIENCES (1 credit)** Usually taken the fall semester of their second year, students exam integrity and misconduct in life sciences research, including issues of data collection, publication, authorship, and peer review. Students receive A-F quality grades.
4. **IBIOS 595. INTERNSHIP (1 credit, optional)** For students interested in exploring academic, government, medical, law, or business corporate approaches to research. This is an external work assignment relevant to individual research or career goals. Students receive an R (satisfactory/passing) or U (unsatisfactory/failing). Only R credits are counted for credit totals. Students typically participate in an internship the summer of their first or second year. Contacts, positions, applications, course registration, course requirements, and grading are processed through the Eberly College of Science Cooperative Education Program (814-865-5000). Additional credits of IBIOS 595 are at the expense of the student. Interested graduate students are to discuss the opportunity with the IGDP in MT chair and/or their faculty adviser.
5. **IBIOS 596. INDEPENDENT STUDIES: LABORATORY ROTATIONS (1-3 credits per semester)** For students exploring potential Ph.D. projects and faculty advisers. Students receive a R (satisfactory/passing) or F (unsatisfactory/failing). Only R credits are counted for credit totals.

6. **IBIOS 597(optional, variable credits)** SPECIAL TOPICS
7. **IBIOS 600. THESIS RESEARCH (1-9 per semester)** For students who have been matched with a faculty adviser AND have not taken/passed their comprehensive exams. Students may receive A-F grades or R/F grades at any time. By the time a student passes his/her comprehensive exam, up to 12 credits worth of IBIOS 600 may have the A-F quality grade.
8. **IBIOS 601. THESIS PREPARATION (0 per semester)** For those students who passed their comprehensive exams. This course appears on the transcript but does not have any grade or credit associated with it.
9. **VB SC 602/IBIOS 602. SUPERVISED EXPERIENCE IN COLLEGE TEACHING (1 credit, optional)** All students are strongly encouraged to enroll for 1 credit (or the equivalent) of Supervised Experience in College Teaching before the beginning of their third year. Students typically take this course during the fall semester of their second year. To encourage teaching experience in toxicological sciences, students will be encouraged to enroll in VSC 602 for supervised experience in college teaching for a toxicology-related courses (VSC 433, VSC 430, ERM 431). As an alternative, after consulting with their respective adviser, students may elect to enroll in IBIOS 602. Teaching at Hershey is arranged by the co-chairs of the IGDP and co-director of graduate education for the IBIOS program. Students receive A-F grades on their transcripts but these grades are not computed in with the overall GPA. International fellows must pass an English proficiency exam before any teaching duties are assigned.
10. The Graduate School requires all graduate students to maintain a 3.0 grade-point average.

M.S. Degree Requirements

Masters students must have a minimum of 30 credits and a 3.0 overall grade-point average. For a master's thesis option, up to 6 IBIOS 600 credits may be A-F graded. Eighteen (18) credits must be at the 500 to 600 level, and a minimum of 12 credits need to be in the major at the 400 to 600 level (excluding IBIOS 600). The student selects a thesis committee (upon consultation with faculty adviser), writes a thesis, and defends his/her work. If pursuing a master's nonthesis option, the student must have a first-authored manuscript (based on his/her research) that has been either accepted and/or published in a peer reviewed journal. Additionally, for a master's nonthesis option, 18 credits need to be in the major at the 500 level. The manuscript is given to at least the faculty adviser and the IGDP Chair for evaluation. IBIOS 595 (Internship) and 596 (Rotations) credits count toward the 30 credits. However, the 602 (Teaching) optional credits do not count toward the 30 credits. All IGDP in Molecular Toxicology graduate students must successfully take the following list of required courses and/or electives during the first two years of their graduate education. If all course credits and requirements are met, students do not have to be registered for classes while writing and/or defending his/her work.

*Optional

Students must present their thesis in accordance with the Penn State guidelines as described in the THESIS GUIDE Requirements for the Preparation of Master's and Doctoral Theses. Current copies may be obtained from the Thesis Information Web site. For more informatin, contact the Thesis Office, 115 Kern Building, University Park, PA 16802; 814-865-5448.

Ph.D. Degree Requirements

Ph.D. students must have a minimum of 30 credits and a 3.0 overall grade-point average. For a master's thesis option, up to 6 IBIOS 600 credits may be A-F graded and 12 credits need to be in the major at the 400 to 600 level (excluding IBIOS 600). The course requirements are essentially the same as that required for the M.S. degree listed above, with some discretion left to the student and adviser.

Grade-Point Average/Unsatisfactory Scholarship

Students are required to maintain an overall 3.0 GPA throughout the program, and, in particular, must have a 3.0 to take the doctoral candidacy, the comprehensive examination, and the final oral examination. One or more failing grades or a cumulative grade-point average below 3.0 may be considered evidence of unsatisfactory scholarship and may be grounds for dismissal from the IGDP in MT.

English competence

A candidate for the degree of Doctor of Philosophy for the IGDP in MT is required to demonstrate a high-level competence in the use of the English language, including reading, writing, and speaking, as part of the language and communication requirements for the Ph.D. Programs are expected to establish mechanisms for assessing and improving competence of both domestic and international students. Toward this goal, all students must participate in the IBIOS 590 colloquium, which includes assessment of reading, original writing and speaking skills. International students must also demonstrate proficiency of the English language as part of the Additional English Requirement for teaching described above. During the course work prior to the candidacy examination, candidates will be assessed for communicative competence in reading, writing, and speaking English. Should a higher level of competence be required, the candidate will be directed to the appropriate resources. International students are advised that the passage of the minimum TOEFL requirements does not demonstrate the level of competence required for completion of the Ph.D. program. English competence must be demonstrated before the doctoral comprehensive examination is scheduled. Besides course work, research, and teaching, IGDP Molecular Toxicology doctoral students participate in the following:

Candidacy Exam

The Candidacy Exam is uniquely designed for each student. The exam should be taken by the end or during the student's third semester in the Integrative Biosciences graduate program. The student will be assigned a scientific paper from the biochemical literature to read and analyze; the paper will be selected based upon the student's background and course work. The analysis should involve exploring the relevant literature as well as the fundamental issues in toxicology, biochemistry, and biology. The student will be given ten days to write a three-page single-spaced review. At the same time the paper is assigned a meeting of the committee should be arranged for a sixty- to ninety-minute oral exam by the committee to review the written assignment and discuss other issues. The committee meeting shall be within twenty-one days of the original assignment of the paper. The student is not require to make a formal oral presentation, but should have overheads of the data for discussion purposes. The student should be able to integrate knowledge about chemical and biological

aspects of the paper and understand and evaluate the experimental design, rationale, results, and the authors' interpretation of their work. In the event that the student does not pass this exam, the student's committee will make a recommendation as to whether to offer another opportunity or to terminate the student's enrollment in the program.

Comprehensive Examination

Evaluation via the Doctoral Committee to determine the feasibility of proposed research and the preparedness of the student. Students must be registered for classes (typically IBIOS 600) the semester they take this exam.

Doctoral Committee

Upon successful completion of the Candidacy Examination, the student in consultation with the advisor will, as soon as possible, select a doctoral committee. The committee will consist of the advisor, two members of the IGDP in MT and up to two faculty members who are not a member of the IGDP in MT. If the student has selected the option of having dual advisors, then both of the advisors will be on the doctoral committee, along with two members of the IGDP in MT and one faculty member who is not a member of the IGDP in MT. If the faculty members from the IGDP in MT on the committee are also members of the same department, the one faculty member who is not a member of the IGDP in MT must be from a different department. This committee is responsible for supervising the academic program and monitoring the progress of the student towards his/her degree. Doctoral thesis committee composition is based on the Graduate Degree Programs Bulletin prepared by the Graduate School regarding Doctoral Committees and requires:

- Four-person minimum of approved Penn State Graduate Faculty.
- Two members must be inside the major and one member must be outside the major. Note: The outside member must be member of the approved Penn State Graduate Faculty. The outside member for intercollege graduate programs may be inside the major but committee membership must have representation from more than one department.
- A person not affiliated with Penn State may be added as a special member (beyond the four members of the approved Penn State Graduate Faculty) upon recommendation of the head of the program and approval of the graduate dean.
- Have committee chair or one of the co-chairs be a member of the approved Penn State Graduate Faculty. Typically it's the faculty adviser.
- The doctoral candidate and three committee members must be physically present for the comprehensive exam and defense. No more than one person may be present via telephone. Telephone or video conference arrangements must be approved by the Dean of the Graduate School.
- Need approval of two-thirds of the committee members for passing comprehensive exam and defense dissertation.

Ph.D. Defense

Evaluation via the Doctoral Committee of the thesis research. Students must present their thesis in accordance with the Penn State guidelines as described in the THESIS GUIDE Requirements for the Preparation of Master's and Doctoral Theses. Current copies may be obtained from the Thesis Information Web site. For more informatin, contact the Thesis Office, 115 Kern Building, University Park, PA 16802; 814-865-5448.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

- M.A., M.Mus., M.M.E.
- Ph.D.
- D.M.A.
- Music: Integrated Undergraduate-Graduate Degrees

The Graduate Faculty

- Sue Haug, D.M.A. (Iowa) Professor of Music
- Dan C. Armstrong, M.Mus. (Michigan) Professor of Music
- Eleanor Duncan Armstrong, D.Mus.A. (Michigan) Professor of Music
- Mark Ballora, Ph.D. (McGill) Associate Professor of Music
- Paul Barsom, Ph.D. (Eastman) Associate Professor of Music
- Vincent Benitez, Ph.D. (Indiana) Assistant Professor of Music
- Lisa J. Bontrager, M.Mus. (Michigan) Professor of Music
- Velvet Brown, M.Mus. (Boston) Professor of Music
- O. Richard Bundy, D.Ed. (Penn State) Professor of Music Education
- Maureen A. Carr, Ph.D. (University of Wisconsin) Distinguished Professor of Music
- Ann Clements, Ph.D. (Washington, Seattle) Assistant Professor of Music Education
- Kim Cook, M.Mus. (Yale) Professor of Music
- Timothy Deighton, D.Mus.A. (Kansas) Associate Professor of Music
- Lynn Drafall, D.Ed. (Illinois) Associate Professor of Music
- Daryl Durran, M.Mus. (Wisconsin, Milwaukee) Associate Professor of Music
- Gerardo Edelstein, M.Mus. (Rice) Associate Professor of Music
- Langston Fitzgerald III, D.Mus.A. (Catholic) Professor of Music
- Robert Gardner, Ph.D. (Eastman) Assistant Professor of Music Education
- Dennis Glocke, M.Mus. (Northwestern) Associate Professor of Music
- Taylor Greer, Ph.D. (Yale) Associate Professor of Music
- Stephen Hopkins, Ph.D. (Florida State) Assistant Professor of Music
- Timothy Hurtz, B.Mus. (Southern California) Associate Professor of Music
- Lisa Jenkins, Ph.D. (Michigan) Instructor in Music
- Richard Kennedy, M.Mus. (Indiana) Professor of Music
- Christopher Kiver, D.Mus.A. (Michigan) Assistant Professor of Music
- Anthony Leach, Ph.D. (Penn State) Associate Professor of Music
- Mark Lusk, M.Mus. (Eastman) Professor of Music
- James Lyon, M.Mus. (West Texas) Professor of Music
- Eric J. McKee, Ph.D. (Michigan) Associate Professor of Music
- Robert Nairn, Dipl.Mus. (Berlin Musikhochschule) Associate Professor of Music
- Joanne Rutkowski, Ph.D. (SUNY, Buffalo). Professor of Music Education
- Mary Saunders, M.A. (Middlebury College/Sorbonne, Paris) Associate Professor of Music
- Timothy Shafer, D.Mus. (Indiana) Professor of Music
- Steven H. Smith, D.Mus.A. (Eastman) Professor of Music
- Norman Spivey, D.Mus.A. (Michigan) Associate Professor of Music
- David Stambler, D.Mus.A. (Maryland) Associate Professor of Music
- Marica Tacconi, Ph.D. (Yale) Associate Professor of Music
- Linda Thornton, Ph.D. (Missouri) Assistant Professor of Music Education
- Jennifer Trost, M.Mus. (Michigan State) Assistant Professor of Music
- M. Daniel Yoder, M.Mus. (Idaho) Professor of Music
- Charles Youmans, Ph.D. (Duke) Associate Professor of Music
- Max Zorin, M.Mus. (Yale) Assistant Professor of Music

Admission Requirements

In addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin, the School of Music requires the completion of a recognized baccalaureate degree in music or music education, with a junior/senior grade-point average of 2.80 or higher (on a 4.00 scale), but admission to the Doctor of Musical Arts (D.M.A.) requires a grade point average of 3.00. Admission to the M.Mus. program requires an audition or the submission of compositions, or a list of works studied in preparation for conducting (depending on the specific degree); admission to the M.M.E. program requires the completion of 12-15 credits in music education methods at the undergraduate level and successful teaching or student teaching experience; admission to the Ph.D. requires an interview, submission of videotapes of teaching or conducting, scores from the Miller Analogies Test, and a portfolio of requested documents; admission to the M.A. program requires scores from the Graduate Record Examinations (GRE General Test), and evidence of scholarly writing on a musical topic. Information on additional requirements for entrance to the various degree programs can be obtained from the School of Music office. Admission to the D.M.A. (major in piano performance) requires an audition in person or by video recording of an extensive memorized program; students admitted to this program must perform musically at least at the level required to complete the degree Master of Music at Penn State, and must show potential ability to perform professionally. Additional requirements include an interview in person or by interactive video to assess language skills in addition to the University's requirement of specific performance on the TOEFL (550 on the paper test, 213 on the computer-based test, or 80 points on the new Internet test with a minimum of 20 on the new speaking portion) or alternatively, the International English Language Testing System (IELTS) with a minimum of 6.5.

Master's Degree Requirements

Three programs leading to the master of arts degree are offered. All three degrees require a research component. The M.A. in Music Theory and History (34 credits) provides an interdisciplinary approach to the field of music scholarship, whereas the M.A. in Musicology (32 credits) and the M.A. in Music Theory (32 credits) are more specialized in preparing students for doctoral study. All three programs require a thesis. A reading knowledge of German or another appropriate language must be demonstrated before thesis credit may be scheduled.

The master of music education degree provides opportunity for advanced study in the art of music, pedagogy, and systematic problem solving. Fulfillment of degree requirements includes successful completion of 30 credits of course work, a comprehensive examination, and a master's paper. (Twenty credits must be earned at the University Park campus.)

The master of music degree (36 credits) provides five majors: Performance, Composition/Theory, Conducting, Piano Pedagogy and Performance, and Voice Performance and Pedagogy. The M.Mus. in Performance offers three separate curricula with areas of emphasis in Voice, Keyboard, or Orchestral Instruments. Depending on the area of emphasis, a recital, a composition project, or a conducting project is required. For the M.Mus. in Performance with emphasis in voice or keyboard, a master's recital is required, in addition to either a master's paper or lecture-recital. For the M.Mus. in Performance (orchestral instruments), a master's recital is required. For the M.Mus. in Composition/Theory, a composition project and a master's paper are required. The M.Mus. in Conducting offers three areas of emphasis: Orchestral, Choral, or Band/Wind Ensemble. A performance project and a master's paper are required.

In all master's programs, at least one-half the required credits must be at the 500 level, and a comprehensive examination is required.

Doctoral Degree Requirements: Ph.D. in Music Education

The Ph.D. in Music Education is designed to provide opportunities for the highest level of scholarly study in the processes of teaching and learning music. Candidates are expected to develop and test new knowledge in the field of music education while preparing themselves for positions in higher education or other leadership roles within the profession. A candidacy exam, a doctoral thesis, and comprehensive written and oral examinations are required.

Doctoral Degree Requirements: D.M.A. major in Piano Performance

The Doctor of Musical Arts is offered with a major in Piano Performance. Four semesters in residence are required. The degree is designed to provide students with a thorough background of preparation and experience in professional-level performance and in the literature of the instrument, while becoming sufficiently knowledgeable about the discipline of music as a whole, in order to teach at the collegiate or university level. This background knowledge would include, but not be limited to, music theory, analysis, and history. Sixty credits are required beyond the Master of Music; if an exceptional student is admitted before completion of a prior Master of Music degree, the student will complete a total of 30 credits in categories equivalent to those required for the M.Mus., in addition to the 60 required for the D.M.A. A candidacy examination will follow upon two semesters completed in residence. Minimum course requirements (post-Master's degree) include sixteen credits (four semesters at 4 credits/semester) of Keyboard 580J applied music instruction; four credits of advanced ensembles; 10 credits of literature and pedagogy in the major area; and 18 credits in the broader discipline of music. the comprehensive examination will occur upon the completion of course work, before the final recital. The culminating experience of the D.M.A. degree is public performance: three memorized solo recitals are required (the final recital is prepared independently), and two recitals of chamber music. Although no written thesis is required, a lecture-recital is required, with a pre-approved monograph text.

Other Relevant Information

The School of Music sponsors many musical ensembles, and candidates for performance degrees are required to participate in positions of responsibility. All candidates for degrees are expected to be in residence for a minimum of two semesters, except that D.M.A. candidates must be in residence for at least four semesters.

The School of Music is a regionally accredited institutional member of the National Association of Schools of Music.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin.*

Music: Integrated Undergraduate-Graduate Degrees

The School of Music offers six Integrated Undergraduate-Graduate degree programs--three that combine the B.A. in Music with the M.A. in Musicology, Music Theory, and Music Theory and History, and three that combine the B.M. in Performance with the M.A. in Musicology, Music Theory, and Music Theory and History. This enables a select number of students to further their research interests at the undergraduate and graduate levels. By the end of the five-year program students receive two degrees, a B.A. in Music and an M.A. in Musicology, Music Theory, or Music Theory and History, or a B.M. in Performance and an M.A. in Musicology, Music Theory, or Music Theory and History.

Candidates for these Integrated Undergraduate-Graduate degrees must demonstrate a high level of aptitude and achievement in academic core courses and be highly motivated to pursue research projects with faculty.

Modeled after a similar program in the Schreyer Honors College, this IUG program enables gifted music students to double count credits in two degree programs. As a result they will have developed a research focus during their fourth and fifth years, which will help them prepare for entry into doctoral programs at other institutions.
For further information about the six Integrated Undergraduate-Graduate degree programs, including application procedures and degree requirements, see the School of Music Web site (Opens New Window) and click on the "Prospective Students" link.

MUSIC COURSES
Individualized instruction is offered in six categories covering eighteen instruments:

Brass (BRASS)	Trumpet, french horn, trombone, euphonium, tuba
Keyboard (KEYBD)	Piano, organ
Strings (STRNG)	Violin, viola, violoncello, double bass

Woodwinds (WWNDS)	Flute, oboe, clarinet, bassoon, saxophone
Percussion (PERCN)	
Voice (VOICE)	

Instruction is offered for each instrument in three different modes: Secondary for 1 credit, Secondary for 2 credits, and Performance for 4 credits.

The Performance mode is available only to M.Mus. (Performance) students in their major areas. All other students take Secondary for 1 or 2 credits.

Applied music fees are required for individual instruction: $175 per instrument for a 1-credit course, $250 per instrument for a 2-, 3-, or 4-credit course. A complete list can be obtained from the School of Music office.

MUSIC (MUSIC)
*503. CONCERT CHOIR (1 per semester, maximum of 4)
*504. CHAMBER SINGERS (1 per semester, maximum of 4)
*505. SYMPHONIC WIND ENSEMBLE (1 per semester, maximum of 4)
*506. SYMPHONIC BAND (1 per semester, maximum of 4)
*507. PHILHARMONIC ORCHESTRA (1 per semester, maximum of 4)
*508. CHAMBER ORCHESTRA (1 per semester, maximum of 4)
*509. CENTRE DIMENSIONS (1 per semester, maximum of 4)
*510. BRASS CHOIR (1 per semester, maximum of 4)
*511. PERCUSSION ENSEMBLE (1 per semester, maximum of 4)
*520. CHAMBER MUSIC FOR STRINGS (1-4)
*521. CHAMBER MUSIC FOR WOODWINDS (1-4)
*522. CHAMBER MUSIC FOR BRASS (1-4)
*523. SONATA DUOS (1)
560. CHORAL CONDUCTING (2-4 per semester, maximum of 16)
561. ORCHESTRAL CONDUCTING (2-4 per semester, maximum of 8)
562. BAND/WIND ENSEMBLE CONDUCTING (2-4 per semester, maximum of 16)
**565. STUDIO AND RECITAL ACCOMPANIMENT (1)

*Admission by audition.
**Course may be scheduled only after consultation with the director of the School of Music.

Course Descriptions

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Ph.D., M.S.

The Graduate Faculty

- Kevin D. Alloway, Ph.D. (Indiana) Professor of Neural and Behavioral Sciences
- Anne Andrews, Ph.D. (American U) Associate Professor of Molecular Toxicology
- Alistair J. Barber, Ph.D. (Open University, Milton Keynes, UK) Assistant Professor of Ophthalmology, and Cellular and Molecular Physiology
- Colin Barnstable, Ph.D. (Wolfson College, Oxford, UK) Professor and Chair, Neural and Behavioral Sciences
- Paul Bartell, Ph.D. (Virginia) Assistant Professor of Avian Biology
- Sheri Berenbaum, Ph.D. (California, Berkeley) Professor of Psychology
- Melvin L. Billingsley, Ph.D. (George Washington) Professor of Pharmacology
- Edward O. Bixler, Ph.D. (New Mexico) Professor of Psychiatry; Vice Chair of Research
- Robert H. Bonneau, Ph.D. (Penn State) Professor of Microbiology and Immunology
- Douglas Cavener, Ph.D. (Georgia) Professor and Head of Biology
- Sonia Cavigelli, Ph.D. (Duke) Assistant Professor of Biobehavioral Health
- John Collins, Ph.D. (Cambridge) Professor of Physics
- James R. Connor, Ph.D. (California, Berkeley) Distinguished Professor and Vice Chair of Neurosurgery
- Rebecca Corwin, Ph.D. (Chicago) Associate Professor of Psychology
- Mihai Covasa, Ph.D. Associate Professor of Nutrition
- Nancy Dennis, Ph.D. (Catholic U of America) Assistant Professor of Psychology
- Min Ding, Ph.D. (Pennsylvania); Ph.D. (Ohio State) Associate Professor of Marketing
- Barry R. Dworkin, Ph.D. (Rockefeller) Professor of Neural and Behavioral Sciences
- John Ellis, Ph.D. (Rochester) Professor of Psychiatry and Pharmacology; Director, Molecular Neuropharmacology Laboratory
- Paul J. Eslinger, Ph.D. (Texas Christian) Professor of Neurology
- Andrew G. Ewing, Ph.D. (Indiana) Professor of Chemistry, and Neural and Behavioral Sciences; J. Lloyd Huck Chair in Natural Sciences
- Jidong Fang, M.D./Ph.D. (CUNY) Associate Professor of Psychiatry
- Thomas W. Gardner, M.D. (Thomas Jefferson) Professor of Opthalmology, and Cellular and Molecular Physiology
- Rick Gilmore, Ph.D. (Carnegie Mellon) Associate Professor of Psychology
- Bruce Gluckman, Ph.D. (Pennsylvania) Associate Professor of Engineering Science and Mechanics, and Neurosurgery; Associate Director, Penn State Center for Neural Engineering
- Jinger Gottschall, Ph.D. (Colorado) Assistant Professor of Kinesiology
- Patricia S. Grigson, Ph.D. (Rutgers) Associate Professor of Neural and Behavioral Sciences
- Andras Hajnal, M.D., Ph.D. (Pécs U Medical School, Hungary) Assistant Professor of Neural and Behavioral Sciences
- Kyung-An Han, Ph.D. Associate Professor of Biology
- Frank Hillary, Ph.D. (Drexel) Assistant Professor Psychology
- Dezhe Jin, Ph.D. Assistant Professor of Physics
- Byron C. Jones, Ph.D. (Arizona) Professor of Biobehavioral Health and Pharmacology
- Uhnoh Kim, Ph.D. (Duke) Associate Professor of Neurosurgery
- Laura Klein, Ph.D. (Uniformed Services U of Health Sci) Associate Professor of Biobehavioral Health
- Lisa Kopp, Ph.D. (USC) Assistant Professor of Human Development
- Alexay Kozhevnikov, Ph.D., Assistant Professor of Physics
- J. Kyle Krady, Ph.D. Assistant Professor of Neural and Behavioral Sciences
- Zhi-Chun Lai, Ph.D. (Albert Einstein College of Med) Professor of Biology, Biochemistry and Molecular Biology
- Kathryn F. LaNoue, Ph.D. (Yale) Professor of Cellular and Molecular Physiology
- Alphonse E. Leure-duPree, Ph.D. (U of London, England) Professor of Neural and Behavioral Sciences
- Robert Levenson, Ph.D. (SUNY, Stony Brook) Professor of Pharmacology
- Aimin Liu, Ph.D. (NYU Medical Center) Assistant Professor of Biology
- David X. Liu, Ph.D. (CUNY) Assistant Professor of Neural and Behavioral Sciences
- Lyle N. Long, D.Sc. (George Washington) Distinguished Professor of Aerospace Engineering and Mathematics
- Patricia J. McLaughlin, D.Ed. (Penn State, Harrisburg) Professor of Neural and Behavioral Sciences
- Robert J. Milner, Ph.D. (Rockefeller) Professor of Neural and Behavioral Sciences; Co-Director, Graduate Program in Neuroscience
- Gregory Moore, M.D. (Wayne State School of Med), Ph.D. (MIT) Professor of Psychiatry, and Neural and Behavioral Sciences; Director, Behavioral Neuroimaging Research Division
- Ralph Norgren, Ph.D. (Michigan) Professor of Neural and Behavioral Sciences
- Richard W. Ordway, Ph.D. (UMass Medical School) Professor of Biology; Chair, Intercollege Graduate Degree Program in Genetics
- Ann Ouyang, M.B., B.S. (London) Professor of Medicine
- Charles Palmer, M.D. (U of Cape Town, South Africa) Professor of Pediatrics
- Randen Patterson, Ph.D. (Maryland) Assistant Professor of Biology
- Blaise Peterson, PhD. (U of Washington) Associate Professor of Cellular and Molecular Physiology
- Thomas G. Pritchard, Ph.D. (Delaware) Associate Professor of Neural and Behavioral Sciences
- Chester A. Ray, Ph.D. (Georgia) Professor of Medicine and Cellular and Molecular Physiology

- William Ray, Ph.D. (Vanderbilt) Professor of Psychology
- Frank Ritter, Ph.D. (Carnegie Mellon) Associate Professor of Information Sciences and Technology
- Victor J. Ruiz-Velasco, Ph.D. (Tulane) Assistant Professor of Anesthesiology
- Robert L. Sainburg, Ph.D. (Rutgers) Associate Professor of Kinesiology and Neurology; Co-Director, Graduate Program in Neuroscience
- Russell C. Scaduto, Jr., Ph.D. (Indiana) Associate Professor of Cellular and Molecular Physiology
- Cara-Lynne Schengrund, Ph.D. (Seton Hall) Professor of Biochemistry and Molecular Biology
- Steven Schiff, M.D., Ph.D. (Duke) Brush Chair Professor of Engineering; Professor of Neurosurgery, and Engineering Science and Mechanics; Director, Penn State Center for Neural Engineering,
- Zachery Simmons, M.D. (Florida) Professor of Neurology
- Ian A. Simpson, Ph.D. (U of London, England) Professor of Neural and Behavioral Sciences
- Semyon Slobounov, Ph.D. (Illinois); Ph.D. (U of Leningrad) Associate Professor of Kinesiology
- Thyagarajan Subramanian, Professor of Neuorology and Neural and Behavioral Sciences; Director, Movement Disorders Program
- Joan Y. Summy-Long, Ph.D. (Penn State) Professor of Pharmacology
- Xiaorui Tang, Ph.D., Assistant Professor of Neural and Behavioral Sciences
- Richard B. Tenser, M.D. (SUNY, Syracuse) Professor of Neurology, and Microbiology and Immunology
- Joyce Tombran-Tink, Ph.D. Professor of Neural and Behavioral Science
- David Vandenbergh, Ph.D. (Penn State) Associate Professor of Biobehavioral Health
- Kent Vrana, Ph.D. (Louisiana State) Elliot S. Vesell Professor and Chair of Pharmacology
- Andrew Webb, Ph.D. (Cambridge) Professor of Bioengineering and Director, Magnetic Resonance Center
- Paul Weiss, Ph.D. (California, Berkeley) Distinguished Professor of Chemistry and Physics
- Judith Weisz, M.B., B.Chir. (Cambridge, England) Professor of Obstetrics and Gynecology
- Michael Wenger, Ph.D. (SUNY, Binghamton) Associate Professor of Psychology; Director, Human Electrophysiology Facility
- Matthew Whim, Ph.D. (Cambridge) Assistant Professor of Biology
- Qing Yang, Ph.D. (Georgia Inst of Tech) Associate Professor of Radiology
- Ian S. Zagon, Ph.D. (Colorado) Distinguished Professor of Neural and Behavioral Sciences; Director, Program on Education in Human Structure
- Samuel (Sam) Shao-Min Zhang, M.D. (Henan Med College, China), Ph.D. (U of Tokyo) Assistant Professor of Neural and Behavioral Sciences

The Neuroscience graduate program is an interdepartmental program within the College of Medicine. The goal of the program is to provide academic and research training leading to the Ph.D. or M.S. degree in Neuroscience. Graduates are prepared for future careers in academic research, teaching, industry or government service. Doctoral students are expected to graduate with the following competencies: (1) the conceptual and technical skills necessary to conduct a research project in an area of neuroscience; (2) a broad general knowledge of neuroscience and detailed knowledge of one or more specialized areas; (3) the ability to appraise scientific evidence; (4) effective oral and written communication skills; (5) a commitment to professional responsibilities and adherence to ethical principles; and (6) an understanding of the external structures that govern biomedical research and the career pathways available to graduates. These competencies are delivered and/or assessed through formal course work (required and elective courses), candidacy and comprehensive examinations, mentored laboratory research, public presentations, publication of research papers, and defense of a written dissertation.

Although the program focuses on doctoral education; the M.S. degree in Neuroscience can be granted to students who request it. Master's students are expected to complete the same course requirements as doctoral students and to write a research thesis.

Admission Requirements

Prospective applicants should have a bachelor's degree in a biological, physical, or behavioral science and are expected to have taken courses in biology, chemistry, physics, and mathematics. Candidates are expected to have a 3.0 (B) grade-point average or better. Neuroscience courses are desirable but not essential and research experience is an advantage. The General Test of the Graduate Record Examinations (GRE), or a comparable substitute examination accepted by a graduate program and authorized by the dean of the graduate school, is required for all applicants. Foreign applicants whose native language is not English must provide evidence of proficiency in English with a minimum Test of English as a Foreign Language (TOEFL) score of 550 on the paper test or 213 on the computer-based test.

A complete application should include: completed application form with personal statement of purpose; GRE scores; undergraduate transcripts; three letters of recommendation; and TOEFL scores (if applicable).

The application deadline is February 1 for admission in the following fall.

Qualified applicants generally will be requested to visit Hershey for an interview. Admission is based on evaluation of the undergraduate transcript, GRE scores, personal statement of purpose, letters of recommendation and performance on interview.

Graduate Degree Requirements

Ph.D. degree in Neuroscience

During the first year of study, Ph.D. candidates in neurosciences receive a broad education in the breadth of neuroscience through three core neuroscience courses covering cellular and molecular neuroscience (which includes developmental neuroscience and neuropharmacology), systems neuroscience, and neuroanatomy. Students must also demonstrate competency in biostatistics. This requirement is satisfied by passing the course HES 515 or another similar course with the approval of the program director. This requirement may be waived with the approval of the program director for students who can demonstrate prior course work in biostatistics. In addition, 3 credits of elective courses offered at Penn State; course selection for this elective is with the approval of the program director.

The Language and Communication Requirement is satisfied by a grade of at least 3.0 in NEURO 530.
A research thesis and thesis defense are required.

M.S. Degree in Neuroscience

Core or Required Courses: NEURO 511, 520, 521, 522, 523, 530, 597; CMBIO 540; IBIOS 591.
Language and Communication Requirement: Satisfied by a grade of at least 3.0 in NEURO 530
Thesis or Paper Requirement and Course(s)/Credits Required: A research thesis is required.

Student Aid

Graduate research assistantships are provided for qualified doctoral students; full tuition is also provided. All support is continuous for the first year from the Neuroscience program. Support in years two and above, when the student is conducting thesis research, must be acquired from either the basic science department in which the candidate elects to pursue his/her minor or from funds available from the thesis adviser. These funds must be secured by the student in conjunction with his/her adviser.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Nuclear Engineering (NUC E)

Program Home Page (Opens New Window)

JACK S. BRENIZER, Jr., *Chair of Nuclear Engineering*
138 Reber Building
814-863-6384

Degrees Conferred:

Ph.D., M.S., M.Eng.

The Graduate Faculty

- Maria Avramova, Ph.D. (Penn State) Assistant Professor of Nuclear Engineering
- Yousry Y. Azmy, Ph.D. (Illinois, Urbana-Champaign) Adjunct Professor of Nuclear Engineering
- Anthony J. Baratta, Ph.D. (Brown) Professor Emeritus of Nuclear Engineering
- Jack S. Brenizer, Jr., Ph.D. (Penn State) Professor of Mechanical and Nuclear Engineering
- Gary L. Catchen, Ph.D. (Columbia) Professor of Nuclear Engineering
- Fan-Bill Cheung, Ph.D. (Notre Dame) Professor of Mechanical and Nuclear Engineering
- Ward S. Diethorn, Ph.D. (Carnegie Tech) Professor Emeritus of Nuclear Engineering
- Robert M. Edwards, Ph.D. (Penn State) Professor of Nuclear Engineering
- Kostadin N. Ivanov, Ph.D. (Bulgarian Academy of Sciences) Professor of Nuclear Engineering
- Edward S. Kenney, Ph.D. (Penn State) Professor Emeritus of Nuclear Engineering
- Seungjin Kim, Ph.D. (Purdue) Assistant Professor of Mechanical and Nuclear Engineering
- Edward H. Klevans, Ph.D. (Michigan) Professor Emeritus of Nuclear Engineering
- Samuel H. Levine, Ph.D. (Pittsburgh) Professor Emeritus of Nuclear Engineering
- Thomas F. Lin, Senior Research Associate
- Arthur M. Motta, Ph.D. (California, Berkeley) Professor of Nuclear Engineering
- Gordon E. Robinson, Ph.D. (Penn State) Professor Emeritus of Nuclear Engineering
- Barry E. Scheetz, Ph.D. (Penn State) Professor of Materials; Senior Scientist, Materials Research Laboratory; Professor of Civil Engineering and Nuclear Engineering
- Kenan Ünlü, Ph.D. (Michigan) Professor of Nuclear Engineering; Director, Radiation Science and Engineering Center

Graduate programs and research facilities are available in thermal-hydraulics, neutronics, computational methods, advanced controls with applications of artificial intelligence, materials, radiation monitoring and effects, fuel management, and radioactive waste management. Application areas include advanced reactor design, safety analysis, radiation instrumentation development, neutron imaging, and plant life extension.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Students with a 3.00 junior/senior grade-point average and with appropriate course backgrounds will be considered for admission. General aptitude GRE test results are required. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

To qualify for admission, an international student must achieve a minimum score on the Test of English as a Foreign Lanaguage (TOEFL) of 550 on the paper-based test, 213 on the computer-based test, and 80 on the Internet-based test with a 19 in the speaking section. This requirement is waived if the student's native language is English or if the student received a bacclauareate or master's degree from an institution in which the language of instruction was English. Letters of recommendation and a statement of purpose written by the applicant are also required to complete the application package.

Degree Requirements

The M.Eng. degree is a nonthesis professional master's degree. In the M.Eng. degree program, 30 course credits are required. Twelve of those credits must be in Nuclear Engineering with at least 18 credits at the 500 level. No thesis is required for the M.Eng. degree. Instead, the student must take 3 credits of NUC E 597C Professional Topics in Nuclear Engineering, which represents formal recognition of the student's effort spent on writing a paper about an engineering subject. It must be approved by the adviser, a faculty reader, and the program chair.

The M.S. degree program is designed for students to gain advanced knowledge for research, analysis, and design in nuclear engineering. Student pursuing an M.S. degree must complete 24 course credits and submit an acceptable thesis (6 research credits) to the Graduate School.

Continuous registration is required of all Ph.D. students until the thesis is approved.

The Ph.D. program emphasizes scholarly research and helps students prepare for research and related careers in industry, government, and academe. Students are admitted to candidacy after passing written and oral examinations. The Ph.D. program is quite flexible, with minimal formal requirements. The Ph.D.. degree is awarded upon completion of a program of advanced study that includes a minimum period of residence, a satisfactory thesis, and the passing of comprehensive and final oral examinations as determined by the student's doctoral committee.

Generally, a Ph.D. student must have 30 credits above a master's degree before taking a comprehensive examination.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin,* the following awards typically have been available to graduate students in this program:

NATIONAL ACADEMY FOR NUCLEAR TRAINING FELLOWSHIPS-Available to graduate students in nuclear engineering; stipend plus tuition.

U.S. DEPARTMENT OF ENERGY-NUCLEAR SCIENCE AND ENGINEERING FELLOWSHIPS-Available to graduate students interested in engineering and engineering support related to nuclear technology; stipend plus tuition.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level will not count. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Kathryn Dansky, Ph.D. (Ohio State) *Associate Professor of Health Policy and Administration, and Nursing*
- Sharon Falkenstern, Ph.D. (Penn State) *Assistant Professor in Nursing; Coordinator, Family Nurse Practitioner Option*
- Donna Fick, Ph.D. (California) *Associate Professor of Nursing*
- Christine Frazer, Ph.D. (Widener) *Instructor in Nursing*
- Kim Kopenhaver Haidet, Ph.D. (Penn State) *Assistant Professor of Nursing*
- Marianne Hillemeier, Ph.D. (Michigan) *Assistant Professor of Health Policy and Administration, and Nursing Health Policy*
- Judith E. Hupcey, Ed.D. (Columbia) *Associate Professor of Nursing; Coordinator, Clinical Nurse Specialist Option*
- Rita Jablonski, Ph.D. (Virginia) *Assistant Professor of Nursing*
- Ann M. Kolanowski, Ph.D. (New York) *Professor of Nursing; Elouise Ross Eberly Professor of The School of Nursing*
- Susan Loeb, Ph.D. (Penn State) *Assistant Professor of Nursing*
- Kathleen G. Mastrian, Ph.D. (Kent State) *Assistant Professor of Nursing*
- Dee M. McGonigle, Ph.D. (Pittsburgh) *Associate Professor of Nursing*
- Paula Milone-Nuzzo, Ph.D. (Connecticut) *Professor and Dean, School of Nursing*
- Janice L. Penrod, Ph.D. (Penn State) *Associate Professor of Nursing*
- Deborah B. Preston, Ph.D. (Penn State) *Professor Emerita of Nursing*
- Carol A. Smith, D.S.N. (Alabama) *Associate Professor of Nursing*
- Elizabeth J. Susman, Ph.D. (Penn State) *Jean Phillips Shibley Professor of Biobehavioral Health; Professor of Nursing*

The graduate programs emphasize productive scholarship and research in the development of nursing knowledge and the translation of knowledge into practice. Advanced study is in human health and development throughout the life span, and in nursing's role in providing health services to individuals, families, and communities.

The Ph.D. program prepares nurse scientists and clinical scholars to provide leadership in nursing education, practice and research. Individualized curricula prepare nursing graduates to assume positions as faculty, advanced clinicians, clinical researchers and leadership positions in community, governmental, or institutional settings.

The M.S. degree in Nursing prepares advanced practice nurses. Two options are offered within the major of Nursing: Clinical Nurse Specialist with an intensive role specialty concentration (at least 8 credits of course work related to the area of specialization) or a graduate minor in another program and Nurse Practitioner with specializations in Family or Adult populations. The master's degree program in Nursing is accredited by the National League for Nursing Accrediting Commission and the Commission on Collegiate Nursing Education.

The Nurse Practitioner option is designed to help prepare the professional nurse to function in an expanded nursing role providing direct care to specific groups of clients in a variety of health care settings. Since that practice is inherently interdisciplinary in nature, advanced knowledge and research from nursing is combined with knowledge from science, medicine, and related disciplines. The Nurse Practitioner may also function in supervisory, consultative, education, and research roles.

The Clinical Nurse Specialist option prepares advanced practice nurses in a specialty field to plan, implement, and evaluate care in a variety of settings. They function in direct care, supervisory, consultative, education, and research roles serving individuals, families, and communities.

Admission Requirements for M.S. and Ph.D. Programs

1. A baccalaureate degree in Nursing from a regionally accredited program is required for all applicants. Students entering the doctoral program via the traditional post-master's route must have earned a master's degree with a major in nursing from a program accredited by a national accrediting agency for nursing. Well-qualified doctoral applicants with a baccalaureate degree in nursing and master's degree in a related discipline (e.g., public health) will be evaluated individually to assess the need for prerequisite master's-level course work in nursing for doctoral program admission.
2. Strong letters of evaluation and a well-crafted statement of purpose.
3. Applicants must submit transcripts of all previous course work from institutions of higher learning. For M.S. applicants, a cumulative grade-point average of 3.0 (on a 4.0 scale) for junior/senior baccalaureate degree is expected. For doctoral applicants, a cumulative grade-point average 3.5 (on a 4.0 scale) for master's and subsequent course work is expected.
4. Two letters of evaluation are required for the master's program and three letters of reference are required for the doctoral program. the letters should be solicited from professional colleagues who can attest to the applicant's ability.
5. All applicants must submit a statement of purpose. In addition, doctoral applicants must also submit a published or unpublished scientific paper, thesis, or other scholarly writing sample and a complete curriculum vitae.
6. International students for whom English is not the primary language must demonstrate competence in English, as reflected in a Test of English as a Foreign Language (TOEFL). Minimum score requirements are: 550 or above on a paper-based test or 213 or above on a computer-based test. The International English Language Testing System (IELTS) has been approved by the Graduate

Council as an alternative exam to the TOEFL for international students applying to Penn State. A minimum composite score of 6.5 on the IELTS test or 80 points on the Internet-based test with a minimum of 19 points on the speaking portion is required for admission.

7. Applicants to the master's program must hold a current Pennsylvania license to practice professional nursing. Applicants to the doctoral program must be licensed to practice professional nursing in at least one state or in a foreign country.
8. Applicants to the master's program are encouraged to discuss program options with the faculty; however, an interview is not required. Doctoral applicants will be contacted by the School of Nursing to schedule a required interview (either in person or via telephone).

M.S. Degree Requirements

A core of courses including nursing issues, theory, and research is required of all students. Candidates in the Clinical Nurse Specialist option must earn a minimum of 37-43 credits (including an intensive concentration in a specialty area). In the Nurse Practitioner option, the requirement is a minimum of 47 to 50 credits. Students in all options may choose to do either a thesis for 6 credits or a scholarly paper for 3 credits. The scholarly paper option is designed to be as academically rigorous as the thesis option. A scholarly paper demonstrates the application of theory and research to a clinical problem based on review of literature and research utilization for that problem.

Ph.D. Degree Requirements

Candidacy Examination: All students must satisfactorily complete the candidacy examination, which is designed to confirm the student's mastery of basic nursing theory and research methods. For students entering the doctoral program with a master's degree, the candidacy examination must be taken at the end of the first year of full-time study or the equivalent. Students who fail the examination on the first attempt may repeat it once. Students who fail the examination the second time are terminated from the program.

Comprehensive Examination: The comprehensive examination is designed to test the student's mastery of and ability to synthesize and integrate the theoretical basis for nursing science, advanced research methods and the chosen specialty area. This examination is taken upon completion of all course work. Students who fail the examination on the first attempt may repeat it once. Students who fail the examination the second time are terminated from the program.

English Competency: All students will be assessed for deficiencies in reading, writing and speaking of English during the core nursing courses prior to the candidacy examination; should remedial work be necessary, the student will be directed to the appropriate sources. International students will be advised that the passage of the minimal TOEFL or IELTS requirement does not demonstrate the level of competence expected of a Ph.D. in nursing.

Communication and Language Requirement: A foreign language will not be required. However, all students are required to be computer literate in word processing and use of statistical packages, as determined by their dissertation committee, and will be assessed for communication skills during core nursing courses.

Dissertation: Each student is required to conduct an original and independent research project which adds to nursing's body of knowledge, and to communicate the research report in a written dissertation. A written dissertation proposal is required and must be approved at a proposal hearing by a majority vote of the student's dissertation committee. A majority vote is also required for approval of the completed written dissertation at the final oral defense.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following awards typically have been available to graduate students in this program:

U.S. PUBLIC HEALTH SERVICE TRAINEESHIPS IN NURSING
Open to selected registered nurse, full-time students in nursing; stipend may be available plus tuition. Apply to Professor-in-Charge, Graduate Programs, School of Nursing.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

GORDON JENSEN, *Head of the Department of Nutritional Sciences*
SHELLY NICKOLS-RICHARDSON, *Professor-in-Charge of Graduate Program in Nutrition*
323 Chandlee Laboratory
814-863-2920

Degrees Conferred:

Ph.D., M.S., M.Ed. in Human Nutrition

The Graduate Faculty

- Craig R. Baumrucker, Ph.D. (Purdue) Professor of Animal Nutrition and Physiology
- Cheston M. Berlin, Jr., M.D. (Harvard) University Professor of Pediatrics and Pharmacology
- Leann Lipps Birch, Ph.D. (Michigan) Professor, Department of Human Development and Family Studies
- Dorothy A. Blair, Ph.D. (Cornell) Assistant Professor of Nutrition
- J. Lynne Brown, Ph.D. (MIT) Associate Professor of Food Science
- Margherita Cantorna, Ph.D. (Wisconsin, Madison) Associate Professor of Nutrition
- Katherine Cason, Ph.D. (Virginia Tech) Associate Professor of Food Science
- James R. Connor, Ph.D. (California, Berkeley) Professor of Neuroscience and Anatomy
- Rebecca L. Corwin, Ph.D. (Chicago) Associate Professor of Nutrition
- Gary J. Fosmire, Ph.D. (California, Berkeley) Associate Professor of Nutrition
- Michael H. Green, Ph.D. (California, Berkeley) Professor of Nutrition Science and Physiology; Head, Department of Nutrition
- Andras Hajnal, M.D., Ph.D. (Univ Medical School Pecs, Hungary) Associate Professor of Neural/Behavioral Sciences
- Terry Hartman, Ph.D. (Minnesota) Assistant Professor of Nutrition
- Leonard S. Jefferson, Jr., Ph.D. (Vanderbilt) Professor and Head, Department of Cellular and Molecular Physiology; Associate Dean for Research and Graduate Studies
- Shannon L. Kelleher, Ph.D. (California, Davis) Assistant Professor of Nutrition
- Katarzyna (Kasia) Kordas, Ph.D. (Johns Hopkins) Assistant Professor of Nutrition
- Penny M. Kris-Etherton, Ph.D. (Minnesota) Distinguished Professor of Nutrition
- Barbara Lohse, Ph.D. (Wisconsin-Madison), R.D., Associate Professor and Director, Pennsylvania Nutrition Education Program and Pennsylvania Nutrition
- Audrey N. Maretzki, Ph.D. (Pittsburgh) Professor of Food Science and Nutrition
- Andrea M. Mastro, Ph.D. (Penn State) Professor of Microbiology and Cell Biology
- Edward W. Mills, Ph.D. (Purdue) Associate Professor of Dairy and Animal Science
- Shelly Nickols-Richardson, Ph.D. (Georgia) Associate Professor of Nutrition
- Han Okhee, Ph.D. (North Carolina) Assistant Professor of Nutrition
- Jill Patterson, Ph.D. (Wisconsin-Madison) Assistant Professor of Nutrition
- Jeffrey Peters, Ph.D. (California, Davis) Associate Professor of Veterinary Science
- Claudia K. Probart, Ph.D. (Oregon) Associate Professor of Nutrition
- Barbara J. Rolls, Ph.D. (Cambridge) Helen A. Guthrie Chair and Professor of Nutrition
- A. Catharine Ross, Ph.D. (Cornell) Dorothy Foehr Huck Chair and Professor of Nutrition
- Ian Simpson, Ph.D. (University College, London) Professor of Neuroscience and Anatomy
- Helen Smiciklas-Wright, Ph.D. (Penn State) Professor of Nutrition
- Donald B. Thompson, Ph.D. (Illinois) Professor of Food Science
- Jack Vanden Heuvel, Ph.D. (Wisconsin) Associate Professor of Veterinary Science
- Regina Vasilatos-Younken, Ph.D. (Penn State) Professor of Poultry Science
- Nancy I. Williams, Sc.D. (Boston) Associate Professor of Kinesiology

Graduates are prepared for careers in basic and applied research in nutrition and in college teaching. The course of study is planned to meet the professional objectives of the individual student. Students may emphasize nutrition science, applied human nutrition, applied animal nutrition, nutrition education, and nutrition in public health. Supporting courses are available in biochemistry, physiology, genetics, microbiology, biophysics, food science, education, health policy and administration, human development and family studies, anthropology, sociology, and psychology.

Current research emphasizes trace elements, vitamin A, lipid metabolism, nutrition and behavior, nutrition education strategies, and evaluation of dietary intake and nutritional status and nutrition policy.

Facilities include well-equipped nutrition science laboratories with animal facilities supervised by a University laboratory animal resource staff. The Nutrition Center and the program in nutrition education serve as a laboratory for students in community nutrition and nutrition education, and the Nutrition Clinic serves this function for those in clinical nutrition.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from the Medical College Admission Test (MCAT), are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Gene General Bulletin*

College graduates with an undergraduate degree in nutrition, animal sciences, food science, dietetics, or a related biological or social science will be considered for admission. Applicants should have a minimum grade-point average of 3.00 (on a 4.00 scale), an acceptable score on the GRE (an average quantitative and verbal score above the fiftieth percentile), and three supporting recommendations. Exceptions may be made for students with special backgrounds, abilities, and interests. When openings are limited, the best-qualified candidates are given priority.

The basic expectations for admission from undergraduate studies include 6 credits in chemistry (organic and inorganic); 3 credits each in physiology, biochemistry, and nutrition; and physics, calculus, and analytical chemistry for some research areas in nutrition science and social science for public health and community nutrition. Students with more than 9 credits of deficiency and a superior record may be admitted as provisional students until they qualify for consideration for regular degree status. Deficiencies are expected to be made up

with a 3.00 grade-point average or better within the first two semesters.

Master's Degree Requirements

The graduate program in Nutrition offers the M.S. degree with an emphasis in nutrition science, applied human nutrition, nutrition education, or nutrition in public health.

The M.S. degree requires 30 credits of course work, including 6 credits in research (NUTRN 600). The M.Ed. degree requires 45 credits of course work, including 6 credits in a field of professional education. The M.S. and M.Ed. degrees with an emphasis on nutrition in public health include a 4-credit field experience (NUTR 555).

Doctoral Degree Requirements

Students are admitted on a provisional basis pending satisfactory completion of the candidacy examination designed to assess the student's potential and academic preparation for doctoral study. Candidacy examinations must be scheduled by students with a master's degree after they have completed 10 credits in doctoral work but before the end of the second semester following admission to the graduate program. The candidacy examination is administered and evaluated by the Graduate Candidacy Committee.

Communication and Language Requirement: Doctoral students must demonstrate competency in spoken English as judged by the program faculty and in technical writing by completion of ENGL 418 with a grade of B or better. Students also must complete satisfactorily 2 to 3 credits at the 400 or 500 level from any one of the following areas: (1) college teaching; (2) logic or philosophy of science; (3) foreign language; or (4) computer science. There are no specific course requirements; however, the academic program is developed by the student in consultation with his or her adviser to develop doctoral-level competence in nutrition and one or more supporting areas. Students are expected to participate in a colloquium each semester and enroll in a seminar on a regular basis.

Nutrition Sciences Option within the IBIOS program: This option in Nutrition Sciences is proposed to promote excellence in graduate education in nutrition by capitalizing on the expertise existing within the biological, biomedical, behavioral, and social sciences at Penn State. Students can choose an area of focus within this option that emphasizes biomolecular nutrition, human nutrient requirements, or ingestive behavior and nutrition intervention. The educational goal of this option is to create a stimulating and diverse environment in which students will develop the critical thinking skills needed to tackle complex issues in nutrition. Students will be expected to develop a foundation of basic knowledge in molecular biology, cell biology, biochemistry and computational methodology. In addition, students are required to complete 2 credits of IBIOS 590. Students are required to complete a course in professional developmental ethics. All students are required to assist in teaching/resident instruction for at least two semesters during their degree program.

Student Aid

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Semih Eser, Ph.D. (Penn State) *Associate Professor of Energy and Geo-Environmental Engineering*
- Abraham S. Grader, Ph.D. (Stanford) *Professor of Petroleum and Natural Gas Engineering*
- Phillip M. Halleck, Ph.D. (Chicago) *Associate Professor of Petroleum and Natural Gas Engineering*
- M. Thaddeus Ityokumbul, Ph.D. (Western Ontario) *Associate Professor of Energy and Geo-Environmental Engineering*
- Zuleima Karypyn, Ph.D. (Penn State) *Assistant Professor of Petroleum and Natural Gas Engineering*
- Jonathan P. Mathews, Ph.D. (Penn State) *Assistant Professor of Energy and Geo-Environmental Engineering*
- Alan W. Scaroni, Ph.D. (Penn State) *Professor of Energy and Geo-Environmental Engineering*
- Andrew P. Schissler, Ph.D. (Colorado School of Mines) *Assistant Professor of Mining Engineering*
- Robert W. Watson, Ph.D. (Penn State) *Associate Professor of Petroleum and Natural Gas Engineering, and Geo-Environmental Engineering*
- Yaw D. Yeboah, Sc.D. (MIT) *Professor of Energy and Geo-Environmental Engineering*

Course offerings are available in four thematic areas: reservoir engineering, transmission and processing, porous media flow dynamics, and production engineering.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. At the discretion of the program, a student may be offered provisional admission without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Prospective candidates should hold a bachelor's degree in a physical science or an engineering discipline with a minimum of 3.00 junior/senior grade point average on a scale of 4.00 (or equivalent).

Exceptions can be made, at the discretion of the program, for students with special backgrounds, experiences, abilities and interests. Working experience in the petroleum and/or natural gas industry will be considered a plus in the admission consideration.

Master of Engineering Degree Requirements

A total of 33 credit hours will be required to complete the degree program of M. Eng. in Oil and Gas Engineering Management. Twenty-four credits will be taken from the focused areas (reservoir engineering, transmission and processing, porous media flow dynamics, production engineering). Additional 6 credits will be taken for the common courses (PNG 550 Advanced Engineering Evaluation in Oil and Gas Management; PNG 551 Advanced Risk Analysis in Oil and Gas Management). The final 3 credits are assigned to a comprehensive engineering project report (PNG 594 Research Topics) to be taken under the supervision of a faculty adviser.

Other Relevant Information

Of the 24 credits required in the focused areas, at least 9 credits will be earned from structured graduate courses. The remaining 15 credits will be designed around the interest and experience of each candidate. This strategy is aimed at broadening the technical horizon of the candidate in anticipation for a career in management. These customized course contents will be administered under the umbrella of PNG 595 and/or PNG 596; in so doing the candidate will work with a Committee of faculty members who will design their appropriate internship program and administer a comprehensive examination at its conclusion.

Operations Research (O R)

Program Home Page

SUSAN H. XU, *Chair of the Committee on Operations Research*
335 Beam Building
814-863-0531

Degrees Conferred:

Students electing this option through participating programs earn a degree with a dual title at both the Ph.D. and the M.S., M.A., or M.Eng. levels, i.e., Ph.D. in (graduate program name) and Operations Research, or M.S., M.A., or M.Eng. in (graduate program name) and Operations Research.

The following graduate programs offer dual degrees in Operations Research: Agricultural, Environmental and Regional Economics; Agricultural and Biological Engineering; Animal Science; Business Administration; Civil Engineering; Chemical Engineering; Computer Science and Engineering; Electrical Engineering; Economics; Educational Leadership; Energy and Mineral Engineering; Entomology; Forest Resources; Geography; Geosciences; Hotel, Restaurant and Institutional Management; Industrial Engineering; Mathematics; Mechanical Engineering; Statistics; and Workforce Education and Development.

The Graduate Faculty

- William P. Andrew, Ph.D. (Penn State) Associate Professor of Hotel, Restaurant, and Institutional Management
- Charles E. Antle, Ph.D. (Oklahoma State) Professor Emeritus of Statistics
- Steven E. Arnold, Ph.D. (Stanford) Professor of Statistics
- Russell R. Barton, Ph.D. (Cornell) Professor of Industrial Engineering
- Tom M. Cavalier, Ph.D. (Virginia Tech) Professor of Industrial Engineering
- M. Jeya Chandra, Ph.D. (Syracuse) Professor of Industrial Engineering
- Kalyan Chatterjee, Ph.D. (Harvard) Distinguished Professor of Management Science and Information Systems
- David P. Christy, Ph.D. (Georgia) Associate Professor of Management Science and Information Systems
- N. Edward Coulson, Ph.D. (California, San Diego) Associate Professor of Economics
- Lily (Ageliki) Elefteriadou, Ph.D. (Polytechnic U, Brooklyn) Associate Professor of Civil Engineering
- E. Emory Enscore, Jr., Ph.D. (Penn State) Professor Emeritus of Industrial Engineering
- Turgay Ertekin, Ph.D. (Penn State) Professor of Petroleum and Natural Gas Engineering
- Jill L. Findeis, Ph.D. (Washington State) Professor of Agricultural Economics
- Duncan K. H. Fong, Ph.D. (Purdue) Professor of Management Science and Information Systems
- Natarajan Gautam (North Carolina) Associate Professor of Industrial Engineering
- Richard L. Gordon, Ph.D. (MIT) Professor Emeritus of Mineral Economics
- Milton C. Hallberg, Ph.D. (Iowa State) Professor Emeritus of Agricultural Economics
- Catherine Harmonosky, Ph.D. (Purdue) Associate Professor of Industrial Engineering
- Terry P. Harrison, Ph.D. (Tennessee) Professor of Supply Chain and Information Systems
- Jack C. Hayya, Ph.D. (UCLA) Professor Emeritus of Management Science and Information Systems
- Paul H. Heinemann, Ph.D. (Florida) Associate Professor of Agricultural Engineering
- George B. Kleindorfer, Ph.D. (Carnegie Mellon) Professor of Management Science and Information Systems
- Joseph M. Lambert, Ph.D. (Purdue) Associate Professor of Computer Science
- Holly S. Lewis, Ph.D. (South Carolina) Associate Professor of Management Science and Information Systems
- Gary L. Lilien, D.E.S. (Columbia) Distinguished Research Professor of Management Science
- Costas Maranas (Princeton) Associate Professor of Chemical Engineering
- John I. McCool, Ph.D. (Temple) Associate Professor of Industrial Engineering
- Elise D. Miller-Hooks, Ph.D. (Texas, Austin) Assistant Professor of Civil Engineering
- Jan M. Mutmansky, Ph.D. (Penn State) Professor of Mineral Engineering
- David Passmore, Ph.D. (Minnesota) Professor of Education
- Raja V. Ramani, Ph.D. (Penn State) P.E. Professor of Mining Engineering
- A. Ravindran (Berkeley) Professor of Industrial Engineering
- William J. Rothwell, Ph.D. (Illinois) Professor of Education
- Michael Saunders, Ph.D. (Georgia) Associate Professor of Entomology
- James S. Shortle, Ph.D. (Iowa State) Associate Professor of Agricultural Economics
- Timothy W. Simpson, Ph.D. (Georgia Tech) Associate Professor of Mechanical Engineering and Industrial Engineering
- Spiro Stefanou, Ph.D. (California State) Professor of Agricultural Economics
- Joseph V. Terza, Ph.D. (U of Pittsburg) Associate Professor of Economics
- Leonid N. Vaserstein, Ph.D. (Moscow State) Professor of Mathematics
- Jose A. Ventura, Ph.D. (Florida) Professor of Industrial Engineering
- Paul N. Walker, Ph.D. (Massachusetts) P.E. Professor of Agricultural Engineering
- Robert D. Weaver, Ph.D. (Wisconsin) Professor of Agricultural Economics
- Anthony V. Williams, Ph.D. (Michigan State) Associate Professor of Geography
- Susan H. Xu, Ph.D. (Rensselaer) Associate Professor of Management Science and Information Systems

The Operations Research dual-title degree program option is administered by an Operations Research committee, which is responsible for management of the program. The committee maintains program definition, identifies faculty and courses appropriate to the option, and recommends policy and procedures for its operation to the dean of the Graduate School. This dual-title degree program is offered as an option through graduate major programs in eight colleges. The option enables students from diverse graduate programs to attain and be identified with the tools, techniques, and methodology of operations research, while maintaining a close association with areas of application. Operations research is the analysis--usually involving mathematical treatment--of a process, problem, or operation to determine its purpose and effectiveness and to gain maximum efficiency. To pursue a dual-title degree under this program option the student must apply to the Graduate School and register through one of the approved graduate programs.

Admission Requirements

Scores from the Graduate Record Examination (GRE), or from a comparable substitute examination accepted by a graduate program and

authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements listed in the GENERAL INFORMATION section of the *Graduate Bulletin*.

For the M.S., M.A., M.Eng. dual-title degree in Operations Research, in addition to those prescribed by the graduate major program, prerequisites for acceptance to the program without deficiency include the following or their equivalent: MATH 140, MATH 141, MATH 220; CMPSC 101; and 3 credits of probability and statistics.

For the Ph.D. dual-title degree in Operations Research, in addition to those prescribed by the graduate major program, prerequisites for acceptance to the program without deficiency include the following or their equivalent: MATH 401, MATH 436; CMPSC 101; and 3 credits of probability and statistics.

Degree Requirements

To qualify for a dual-title degree, students must satisfy the requirements of the graduate major programs in which they are enrolled, in addition to the minimum requirements, or their equivalent, in the Operations Research program. Students must enroll in O R 590 Colloquium for at least 1 credit in each year enrolled in the program and in residence.

For the M.S. or M.A. dual-title degree in Operations Research, the minimum requirements are: 6 credits in stochastic/statistical methods, including a minimum of 3 credits in each of the areas of statistical methods and stochastic processes; 6 credits in optimization, including a minimum of 3 credits in linear programming; 3 credits in computational methods; and 3 credits in applications/specialization. (Application courses are those that involve problem solving through the use of decision methods.) A minimum of 9 credits must be in the 500 series. Particular courses may satisfy both the graduate major program requirements and those in the Operations Research program.

A thesis may be required, the supervisor of which must be a member of the graduate faculty recommended by the chair of the program granting the degree and approved by the Operations Research committee as qualified to supervise thesis work in operations research. A paper or report may be written in lieu of the M.S. or M.A. thesis upon approval of the student's graduate major program. An M.Eng. student or a student selecting the paper or report must take an additional 6 credits in the Operations Research program. It is the prerogative of the graduate major program to assign these credits to one or more of the following categories: stochastic/statistical methods, optimization, computational methods, or applications.

The minimum requirements for the Ph.D. dual-title degree in Operations Research are: 9 credits in stochastic/statistical methods, including a minimum of 3 credits in each of the areas of statistical methods and stochastic processes; 9 credits in optimization, including a minimum of 3 credits in linear programming; 6 credits in computational methods, including a minimum of 3 credits in simulation; and 12 credits in applications/specialization. A minimum of 18 credits must be in the 500 series, and particular courses may satisfy both the graduate major program requirements and those in the Operations Research program.

A Ph.D. minor program in Operations Research is available for doctoral students who find it advantageous to include advanced quantitative methods of systems analysis in their programs of study and have been approved to do so by their doctoral committees. To qualify for a minor in Operations Research, students must satisfy the requirements of their graduate major programs, meet the same prerequisites as the M.S. dual-title degree, and meet the following minimum requirements: 6 credits in stochastic/statistical methods, including a minimum of 3 credits in each of the areas of statistical methods and stochastic processes; 6 credits in optimization; and 3 credits in computational methods. A minimum of 6 credits must be taken at the 500 level.

The doctoral committee for a Ph.D. dual-title degree student is recommended by the graduate major program granting the degree. The chair and at least two members of a doctoral committee must be members of the graduate faculty and approved by the Operations Research committee as qualified to supervise doctoral theses in operations research. The Operations Research committee is responsible for administering an examination in operations research that constitutes a portion of the comprehensive examination administered to the doctoral students in the program option, as well as to the candidate who chooses operations research as a minor field.

- Jack Vanden Heuvel, Ph.D. (Wisconsin) Professor of Veterinary Science and Biomedical Sciences
- Na Xiong, Ph.D. (Case Western Reserve) Assistant Professor of Veterinary Science and Biomedical Sciences

The graduate program in Pathobiology is designed to provide flexibility in graduate work while providing opportunities to study immunology, microbiology, nutrition, biochemistry, virology, veterinary pathology, physiology, or toxicology, usually as related to problems seen in domestic animals and humans.

Graduate instruction is directed by graduate faculty members from the Department of Veterinary Science and related units including dairy and animal science, biochemistry, biology, biophysics, immunology, nutrition, physiology, zoology, and others. The Ph.D. program is designed for completion in three to four academic years. Doctoral candidates usually complete certain required courses and obtain laboratory experience before selecting an area of specialization and completing an original research problem, including the defense of the Ph.D. dissertation.

Facilities for departmental research include laboratories in the Agricultural Sciences and Industries Building, Henning Building, Poultry Disease Laboratory, Animal Diagnostic Laboratory, Centralized Biological Laboratory, and Environmental Resources Research Institute. Opportunities to utilize specialized research equipment exist in other related facilities. The University has an extensive, modern library. A large University computer center and consultation service are available.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Applicants with a 3.00 or better grade-point average (on a 4.00 scale) in undergraduate science courses and appropriate course backgrounds will be considered for admission. Applicants should have a baccalaureate degree in biological science or a degree as a graduate veterinarian or equivalent. Undergraduate preparation should include biology, chemistry, physics, mathematics through calculus, and preferably biostatistics and biochemistry.

Master's Degree Requirements

A minimum of 30 graduate credits is required for the M.S. degree, of which 18 credits must be taken in 500- and 600-level courses.

Satisfactory completion of the following courses or their equivalent is required of all degree candidates: statistics, 3 credits; biochemistry or molecular and cell biology (usually chosen from B M B 400, B M B 401, B M B 402, B M B 437, and BMMB 514), 6 credits; and pathobiology (V SC 520), 3 credits.

All graduate students are required to complete one semester of VB SC 590 Colloquium each year as well as 8 credits from a list of courses.

Pathobiology requires no program-specific qualifying examinations, and there is no communication/language requirement for the M.S.

A thesis is required of all candidates for the M.S. degree.

Doctoral Degree Requirements

The doctor of philosophy degree places a strong emphasis on research. It is conferred in recognition of the capacity to carry out independent research and the attainment of a high level of scholarship. General requirements for the doctorate specify a minimum period of residence, the passing of candidacy, comprehensive and final oral examinations, and the writing of a satisfactory thesis. The particular combination of courses, seminars, individual study, and research that constitutes an individual student's program is arranged by the doctoral committee and should include the courses that have been designated in the Pathobiology graduate curriculum, subject to the general policies of the Graduate School.

The Graduate School requires no specified number of courses for the attainment of the doctorate. However, the Pathobiology graduate program requires that all graduate students complete the course requirements outlined. A total of 21 graduate credits is required for the Ph.D. degree. A minimum grade-point average of 3.00 for work done at the University is required.

There are formal communications requirements for the Ph.D. degree in Pathobiology which are required by the Graduate School. The doctoral committee will assess the technical writing and oral communication skills of the candidate and may require that formal course work or other means to improve these skills be undertaken.

The graduate program requires that each graduate student have 3 credits in statistics. However, Ph.D. candidates are expected to have statistical skills equivalent to those learned in STAT 501 and STAT 502. The candidacy examination committee and the doctoral committee will assess the student's competence in statistics and may require that additional course work be taken.

A candidacy examination is given to students entering the Ph.D. program and after they complete at least twelve hours of postbaccalaureate course work.

After being admitted to candidacy, each doctoral candidate is guided by a doctoral committee consisting of four or more members of the graduate faculty. At least one member and preferably two are from other departments. These committees are appointed through the Office of Graduate Student Programs, upon recommendation of the department head, after the student is admitted to candidacy.

Other Relevant Information

After a student has been admitted to graduate study in the department, an adviser will be appointed by the program director. This person may be a member of the eventual M.S. committee or someone else assigned the responsibility for directing the student's scheduling of course work. In the case of a doctoral candidate, the person may be a member of the eventual doctoral committee or someone else designated the responsibility for directing the student's scheduling of course work. The adviser is also responsible for initiating the scheduling of the candidacy examination.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Yaw D. Yeboah, Sc.D. (MIT) *Professor and Head of Energy and Geo-Environmental Engineering*

The Department of Energy and Mineral Engineering provides a vertically integrated approach to research and education in all aspects of the energy and mineral industries, including scientific and engineering issues, health and safety, and maintenance of high environmental standards. The department's mission is to forge an intellectual and scientific cohesiveness in energy and mineral resource technology. This objective is achieved by exploiting the natural synergy between the exploration, extraction, processing, and utilization of energy and mineral resources so as to cater to the emerging needs of society.

The Department of Energy and Mineral Engineering offers advanced degrees in three programmatic areas (Energy and Geo-Environmental Engineering, Oil and Gas Engineering Management, and Petroleum and Mineral Engineering). Each academic degree program has specific faculty associated with it and a professor who serves as the graduate program chair. The Department of Energy and Mineral Engineering has overall requirements for the M.S., M.Eng., and Ph.D. degrees with specific requirements associated with each program.

Petroleum and Mineral Engineering

The Petroleum and Mineral Engineering (PME) program is a single graduate program with a focus on the production of energy and minerals in an economic, safe, and efficient manner. The program provides flexible education of students in energy and mineral sciences and engineering, and industrial health and safety, with particular focus on non-renewable resource and energy industries. The program is designed to resolve the sometimes competing goals of flexible education of requisite breadth while still providing in-depth study; students are required to follow a focused core curriculum that combines the requisite rigor with flexibility in a rapidly changing field of endeavor. Participating students take common core courses in engineering project investment evaluation, occupational health and safety, and engineering multiphase systems analysis with subsequent specialization in one of three specialty option areas: petroleum and natural gas engineering, mining and mineral process engineering, and industrial health and safety.

Admission Requirements

Scores for the Graduate Record Examinations (GRE) are required for admission, though this may be waived at the discretion of the Petroleum and Mineral Engineering graduate program. The best-qualified applicants will be accepted up to the number of spaces available for new students. Students will be accepted by the Petroleum and Mineral Engineering graduate program, and at the discretion of the Petroleum and Mineral Engineering graduate program, a student may be granted provisional admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Admission to the Petroleum and Mineral Engineering graduate program in the Department of Energy and Mineral Engineering is competitive. Entering students must hold a bachelor's degree in a science or engineering discipline. Students with 3.00 or better (out of 4.00) junior/senior cumulative grade-point average and appropriate course backgrounds will be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Entering graduate students in Energy and Mineral Engineering for whom English is not the first language are required to have a score of at least 550 on the Test of English as a Foreign Language (TOEFL) examination. Letters of recommendation and a statement of purpose written by the applicant are also required.

Master's Degree Requirements

The M.S. degree program in Petroleum and Mineral Engineering is designed for students to gain advanced knowledge for research, analysis, and design in Industrial Health and Safety, Mining and Mineral Process Engineering, and Petroleum and Natural Gas Engineering. Students pursuing an M.S. degree will be required to complete 24 course credits and submit a thesis (6 credits) to the Graduate School. Graduate committees in each academic program within the Department of Energy and Mineral Engineering play an important role in formulating individual course and research schedules. M.S. students in the Petroleum and Mineral Engineering graduate program after completing 10 credits of common core courses must select a specialty option from among three available options and take a minimum of 14 course credits from a list of specialty option courses for that particular option. At least 12 of the total course credits must be at the 500 level.

Doctoral Degree Requirements

The Ph.D. program in Petroleum and Mineral Engineering emphasizes scholarly research and helps students prepare for research and related careers in industry, government, and academe. Acceptance into the Ph.D. degree program in Petroleum and Mineral Engineering is based on the student's performance on the Ph.D. candidacy examination administered by the faculty of the PME graduate program. A comprehensive examination is required of all Ph.D. candidates and should be taken after substantial completion of course work. The comprehensive examination is the responsibility of the candidate's doctoral committee and administered according to the rules specified by the Graduate School. The Ph.D. program in Petroleum and Mineral Engineering is quite flexible with minimum formal requirements. The communication and foreign language requirements for the Ph.D. degree may be satisfied by intermediate knowledge of one foreign language. The general requirements for graduation are outlined in the GENERAL INFORMATION section of the *Graduate Bulletin*. The specific credit requirements of the Ph.D. programs in the Department of Energy and Mineral Engineering are available upon request.

Other Relevant Information

All graduate students are expected to attend general department seminars and seminars in their programmatic areas. Graduate students may be asked to contribute to the instructional programs of the department by assisting with laboratory and lecture courses.

Students in Petroleum and Mineral Engineering may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. (*See also* Operations Research online at http://bulletins.psu.edu/bulletins/whitebook/graduate_degree_programs.cfm?letter=O&program=grad_o_r.htm)

Student Aid

Graduate students are supported by a variety of government and industry fellowships, and research and teaching assistantships. Stipends vary depending on the source. Please see the STUDENT AID section of the *Graduate Bulletin* to learn other forms of the student aid.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Phillip M. Halleck, Ph.D. (Chicago) *Associate Professor of Petroleum and Natural Gas Engineering*
- Robert W. Watson, Ph.D. (Penn State) *Associate Professor of Petroleum and Natural Gas, and Geo-Environmental Engineering*

The Department of Energy and Mineral Engineering provides a vertically integrated approach to research and education in all aspects of the energy and mineral industries, including scientific and engineering issues, health and safety and maintenance of high environmental standards. The department's mission is to forge an intellectual and scientific cohesiveness in energy and mineral resource technology. This objective is achieved by exploiting the natural synergy between the exploration, extraction, processing and utilization of energy and mineral resources so as to cater to the emerging needs of society.

The Department of Energy and Mineral Engineering offers advanced degrees in six programmatic areas (Energy and Geo-Environmental Engineering, Industrial Health and Safety, Mineral Processing, Mining Engineering, Oil and Gas Engineering Management, and Petroleum and Natural Gas Engineering). Each academic degree program has specific faculty associated with it and a professor who serves as the graduate program chair. The Department of Energy and Mineral Engineering has overall requirements for the M.S., M.Eng., and Ph.D. degrees with specific requirements associated with each program.

Petroleum and Natural Gas Engineering Program
Areas of specialization include fluid dynamics in pipes, multiphase flow in porous media, reservoir engineering, pressure transient analysis, drilling, perforating and completion engineering, secondary migration, environmental issues, numerical reservoir simulation, artificial neural networks, rock mechanics, improved hydrocarbon recovery, unconventional gas reservoirs, natural gas processing and transmission, coalbed methane reservoirs.

Admission Requirements

Scores for the Graduate Record Examinations (GRE) are required for admission, though this may be waived at the discretion of the academic programs. The best-qualified applicants will be accepted up to the number of spaces available for new students. Students will be accepted by the academic programs and at the discretion of a graduate program, a student may be granted provisional admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Gradu*
Graduate Bulletin

Admission to the academic programs in the Department of Energy and Geo-Environmental Engineering is competitive. Entering students must hold a bachelor's degree in engineering or physical sciences. Students with 3.00 or better (out of 4.00) junior/senior cumulative grade-point averages and appropriate course backgrounds will be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Entering graduate students in Energy and Geo-Environmental Engineering for whom English is not the first language are required to have a score of at least 550 on the Test of English as a Foreign Language (TOEFL) examination. Letters of recommendation and a statement of purpose written by the applicant are also required.

Master's Degree Requirements

The M.S. degree programs in the Department of Energy and Geo-Environmental Engineering are designed for students to gain advanced knowledge for research, analysis, and design in Energy and Geo-Environmental Engineering, Industrial Health and Safety, Mineral Processing, Mining Engineering, and Petroleum and Natural Gas Engineering. Students pursuing an M.S. degree will be required to complete 24 course credits and submit a thesis (6 credits) to the Graduate School. Graduate committees in each academic program play an important role in formulating individual course and research schedules.

The Mining Engineering and Oil and Gas Engineering Management programs also offer an M.Eng. degree. Students pursuing an M.Eng degree are required to present a scholarly written report on a suitable project, the topic of which may be suggested by the industry. The report must be a scholarly achievement, relating a developmental study that involves an appropriate, significant subject in the discipline. The report must be approved by a committee of the faculty comprised of report adviser, report reader, and chair of the program.

The specific credit requirements and other specifics of the master's programs in Energy and Geo-Environmental Engineering are available upon request.

Doctoral Degree Requirements

The Ph.D. programs in the Department of Energy and Geo-Environmental Engineering emphasize scholarly research and help students prepare for research and related careers in industry, government and academe. Acceptance into the Ph.D. degree programs in the Department of Energy and Geo-Environmental Engineering are based on the student's performance on the Ph.D. candidacy examination administered by the faculty of a specific academic program. A comprehensive examination is required of all Ph.D. candidates and should be taken after substantial completion of course work. The comprehensive examination is the responsibility of the candidate's doctoral

committee and administered according to the rules specified by the Graduate School. The Ph.D. programs in Energy and Geo-Environmental Engineering are quite flexible with minimum formal requirements. The communication and foreign language requirements for the Ph.D. degree may be satisfied by intermediate knowledge of one foreign language. The general requirements for graduation are outlined in the GENERAL INFORMATION section of the *Graduate Bulletin*. The specific credit requirements of the Ph.D. programs in Energy and Geo-Environmental Engineering are available upon request.

Other Relevant Information

All graduate students are expected to attend general department seminars and seminars in their programmatic areas. Graduate students may be asked to contribute to the instructional programs of the department by assisting with laboratory and lecture courses.

Students in Mining Engineering and Petroleum and Natural Gas Engineering may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. (*See also* Operations Research.)

Student Aid

Graduate students are supported by a variety of government and industry fellowships, and research and teaching assistantships. Stipends vary depending on the source. Please see the STUDENT AID section of the *Graduate Bulletin* to learn other forms of the student aid.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Ph.D., M.S., M.D./Ph.D. M.B.A./Ph.D.

The Graduate Faculty

- Shantu G. Amin, Ph.D. (Stevens Institute of Technology) Professor of Pharmacology
- Cheston M. Berlin, Jr., M.D. (Harvard) University Professor of Pediatrics and Professor of Pharmacology
- Melvin L. Billingsley, Ph.D. (George Washington) Professor of Pharmacology, and Biotechnology and Entrepreneurship
- Victor A. Canfield, Ph.D. (California) Assistant Professor of Pharmacology
- Keith C. Cheng, M.D., Ph.D. (New York; Washington) Professor of Pathology, Biochemistry and Molecular Biology, and Pharmacology
- John D. Connor, Ph.D. (Phila. College of Pharmacy and Sci) Professor Emeritus of Pharmacology
- Dhimant Desai, Ph.D. (Bombay) Associate Professor of Pharmacology
- John Ellis, Ph.D. (Rochester) Associate Professor of Pharmacology and Psychiatry
- Keith Elmslie, Ph.D. (SUNY, Stony Brook) Associate Professor of Anesthesiology and Pharmacology
- Leo Fitzpatrick, Ph.D. (Texas) Associate Professor of Pharmacology
- Willard M. Freeman, Ph.D. (Wake Forest) Assistant Professor of Pharmacology
- Frank E. Greene, Ph.D. (Florida) Associate Professor Emeritus of Pharmacology
- Christopher R. Herzog, Ph.D. (Ohio) Assistant Professor of Pharmacology and Pathology
- Byron C. Jones, Ph.D. (Arizona) Associate Professor of Biobehavioral Health and Pharmacology
- Kelly Karpa, Ph.D. (Penn State) Associate Professor of Pharmacology
- Mark Kester, Ph.D. (SUNY, Buffalo) G. Thomas Passananti Professor of Pharmacology
- Philip Lazarus, Ph.D. (McGill) Professor of Pharmacology and Health Evaluation Sciences
- Robert G. Levenson, Ph.D. (SUNY, Stony Brook) Professor of Pharmacology
- Thomas A. Lloyd, Ph.D. (Harvard) Professor of Health Evaluation Sciences and Pharmacology; Professor of Obstetrics and Gynecology
- Richard B. Mailman, Ph.D. (North Carolina) Professor of Pharmacology; Distinguished Senior Scholar in Pharmacology and Neurology
- Kathleen M. Mulder, Ph.D. (SUNY, Buffalo) Professor of Biochemistry and Molecular Biology
- Anthony E. Pegg, Ph.D. (Cambridge) Evan Pugh Professor of Physiology and Professor of Pharmacology
- Bogdan Prokopczyk, Ph.D. (Warsaw) Associate Professor of Pharmacology
- ohn P. Richie (Louisville) Professor of Public Health Sciences, and Pharmacology
- Gavin P. Robertson, Ph.D. (California) Associate Professor of Pharmacology, Dermatology, Pathology, and Surgery
- Victor J. Ruiz-Velasco, Ph.D. (Tulane) Associate Professor of Anesthesiology, and Pharmacology
- Ugur Salli, Ph.D. (Oregon) Assistant Professor of Pharmacology
- Lakshman Sandirasegarane, Ph.D. (Saskatchewan) Assistant Professor of Pharmacology
- Walter B. Severs, Ph.D. (Pittsburgh) Professor Emeritus of Pharmacology
- Arun K. Sharma, Ph.D. (North Eastern) Associate Professor of Pharmacology
- Joan Y. Summy-Long, Ph.D. (Penn State) Professor of Neural and Behavioral Sciences
- Elliot S. Vesell, M.D. (Harvard) Evan Pugh Professor Emeritus of Pharmacology and Medicine
- Hong Gang Wang, Ph.D. (Japan) Lois High Berstler Professor of Pharmacology
- Jin-Ming Yang, M.D., Ph.D. (China) Professor of Pharmacology
- Jong K. Yun, Ph.D. (Case Western Reserve) Associate Professor of Pharmacology

The graduate studies program in Pharmacology is designed to give qualified students a combination of didactic instruction, informal direction, and laboratory experience that will enable them to obtain a firm foundation in the principles, methods, and contributions of pharmacology (defined broadly as the science of the multiple aspects of the interaction of chemical agents with biological systems). With this preparation, graduates of the program should be capable of designing and executing high-quality independent research, and of assuming positions of responsibility within the pharmacologic community.

The department offers studies in the general areas of drug metabolism, molecular pharmacology, endocrine pharmacology, neuropharmacology, cardiovascular-renal pharmacology, and clinical pharmacology. Primary emphasis is placed on the molecular mechanism by which drugs act in the body and by which the body transforms drugs. The department also offers a concurrent degree program resulting in a combined M.B.A./Ph.D. Consult department for details.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. At the discretion of the graduate program, a student may be admitted provisionally for graduate study without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

A bachelor's degree reflecting a reasonable background in zoology or biology, mathematics, and chemistry is required. Reading knowledge of one or two foreign languages is recommended. Students with a minimum junior/senior grade-point average of 3.00 and with appropriate course backgrounds will be considered for admission. Three letters of recommendation, a curriculum vitae, and a description of career goals are required. Students are not usually accepted into the graduate program unless they are preparing for the doctoral degree.

Master's Degree Requirements

A minimum of 30 credits as specified by the Graduate School are required. Candidates must submit a thesis based on original laboratory observations. A specified core curriculum includes the following courses: BMS 501, BMS 502, BMS 503, PHARM 520, PHARM 502, PHARM 503, PHARM 504 (or PHARM 550), PHARM 590; PHARM 597. Candidates must defend their theses to the satisfaction of the graduate

faculty (two-thirds favorable vote).

Doctoral Degree Requirements

During the first two years of study Ph.D. candidates take The College of Medicine Core Curriculum (BMS 501 Regulation of Cellular and Systemic Energy Metabolism, BMS 502 Cell and Systems Biology, and BMS 503 Flow of Cellular Information) in the Fall semester to provide a strong foundation. Additional courses in general pharmacology, molecular pharmacology and principles of drug action are required including PHARM 502, PHARM 503, PHARM 504 (or PHARM 550), PHARM 520, PHARM 582, PHARM 590, and PHARM 597. Students will demonstrate skills in one of the following areas of communications: computer language, biostatistics; the department also requires competency in written and oral English.

Candidates for the combined M.D./Ph.D. programs must apply to and be accepted by the medical school before they can be considered for the combined program.

Candidates for the M.B.A./Ph.D. program must first apply and be accepted by the doctoral program before being considered for the M.B.A.

Other Relevant Information

Each new graduate student is assigned an adviser pro team who will serve as a general counselor. Master's candidates have three months from initial registration to form an agreement with a member of the graduate faculty who will supervise their laboratory work. Doctoral candidates can take as much as a year to form this agreement.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.A.

The Graduate Faculty

- Mitchell S. Aboulafia, Ph.D. (Boston College) Professor of Philosophy
- Douglas R. Anderson, Ph.D. (Penn State) Associate Professor of Philosophy
- John P. Christman, Ph.D. (Illinois, Chicago) Associate Professor of Philosophy and Women's Studies
- Vincent M. Colapietro, Ph.D. (Marquette) Professor of Philosophy
- Daniel W. Conway, Ph.D. (California, San Diego) Professor of Philosophy
- Véronique M. Fóti, Ph.D. (Boston College) Associate Professor of Philosophy
- Emily R. Grosholz, Ph.D. (Yale) Professor of Philosophy and African American Studies; Fellow of the Institute for the Arts and Humanities
- Irene E. Harvey, Ph.D. (York) Associate Professor of Philosophy and Women's Studies
- Dale Jacquette, Ph.D. (Brown) Professor of Philosophy
- Claire Katz, Ph.D. (Memphis) Associate Professor of Philosophy, Jewish Studies and Women's Studies
- Catherine E. Kemp, Ph.D. (SUNY, Stony Brook) Assistant Professor of Philosophy
- Christopher P. Long, Ph.D. (New School, New York) Associate Professor of Philosophy
- Evelyn B. Pluhar-Moravetz, Ph.D. (Michigan) Professor of Philosophy
- Dennis J. Schmidt, Ph.D. (Boston College) Professor of Philosophy, German, and Comparative Literature; Co-director, Institute for the Arts and Humanities
- Shannon W. Sullivan, Ph.D. (Vanderbilt) Head; Associate Professor of Philosophy and Women's Studies
- Nancy Tuana, Ph.D. (California, Santa Barbara) DuPont/Class of '49 Professor of Philosophy, Humanities, and Women's Studies; Director, Rock Ethics Institute

Graduate education in the Penn State Department of Philosophy is characterized by a focus on, and commitment to, the history of philosophy, conceived as a basis for study in diverse areas of special interest. In addition, the graduate program includes special emphases on both contemporary Continental philosophy (including phenomenology, existentialism, hermeneutics, social theory, and postmodernism) and Classical American philosophy (including transcendentalism, semiotics, pragmatism, and contemporary cultural issues). All students' programs are arranged to facilitate preparation in the systematic fields of their interests, such as aesthetics, ethics, political philosophy, metaphysics, philosophy of religion, epistemology, philosophy of science, and mathematical logic, and there is a provision for directed research, collaboration, and in-depth consultation by students with member of the faculty.

Interdisciplinary study is also possible across the humanities, the social sciences, the arts, the natural sciences, and interdisciplinary programs such as Women's Studies, Classics and Ancient Mediterranean Studies, and Science Technology, and Society. The Philosophy department offers students the opportunity to earn a dual-title doctoral degree in Philosophy and Women's Studies. Doctoral minors are available in social thought and in literary theory, criticism, and aesthetics. Study abroad is possible as well, through exchange programs or individual arrangements with leading departments of philosophy.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the Graduate Bulletin.

Undergraduate preparation is advisable.

Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 GPA may be made for students with special backgrounds, abilities, and interests. Apply by January 15.

Degree Requirements

The department may waive the requirement of a thesis for an M.A. candidate. The foreign language requirement for the Ph.D. degree is satisfied by passing department translation examinations in two languages other than English, and by completing a course in philosophy in one of the these languages. The logic requirement for the Ph.D. degree is satisfied by passing a department logic examination.

Student Aid

Every student admitted to the department's Ph.D. program receives full assistantship or fellowship funding (stipend and tuition waiver) for five years (assuming reasonable progress). In addition to the many fellowships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the Graduate Bulletin, the department awards annually an Edwin Erle Sparks Fellowship in the Humanities. In the last several years, Philosophy graduate students have received numerous external national and international fellowships and awards (such as DADD, Fulbright, Javits, Mellon). Many Philosophy graduate students have received assistantship support for interdisciplinary teaching assignments in programs such as American Studies, Classics and Ancient Mediterranean Studies, Religious Studies, and Women's Studies.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not

to meet requirements for an advanced degree.

- Thomas Winter, Ph.D. (Wisconsin) Professor of Physics
- Xiaoxing Xi, Ph.D. (Peking) Professor of Physics; Associate Professor of Materials Science and Engineering
- Jinwu Ye, Ph.D. (Yale) Assistant Professor of Physics

Graduate instruction and research opportunities are available in atomic and molecular physics, laser physics, experimental and theoretical condensed matter and materials physics, surface physics, low-temperature physics, statistical physics, acoustics, nuclear physics, experimental and theoretical particle physics, quantum field theory, general relativity, cosmology and relativistic astrophysics and quantum gravity. Work in some areas is conducted in cooperation with the Materials Research Institute, the Applied Research Laboratory, and other interdisciplinary research facilities.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School Requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin.*

A bachelor's degree in physics or an allied field is required for admission to the M.S., D.Ed., and Ph.D. programs. Students with a 2.50 or higher junior/senior grade-point average (on a 4.00 scale) in physics and mathematics will be considered, and the best-qualified

applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 2.50 GPA may be made for students with special backgrounds, abilities, and interests. Exceptions may also be made for applicants for doctoral programs who have completed master's degrees at other institutions.

Admission and study programs for the M.Ed. degree are handled on an individual basis.

Master's Degree Requirements

M.S. program: Required courses include PHYS 530, PHYS 557, PHYS 559 (2 credits), PHYS 561, or PHYS 410. There are two options. Thesis option: The thesis must be based on at least 6 credits of PHYS 600 and must conform to Graduate School regulations. Nonthesis option: An additional 6 credits of 500-level physics courses beyond the required ones must be taken, and a short paper must be submitted to, and accepted by, the department. There is no degree examination for either option.

M.Ed. program: At least 18 credits in physics are required, of which up to 6 credits may be for research. Six additional nonresearch science credits (which may be in physics) and a 6-credit minor in a field of professional education also must be included. A thesis or term paper must be submitted and accepted by the department.

Doctoral Degree Requirements

Ph.D. program: Required courses include PHYS 517, PHYS 525, PHYS 530, PHYS 557, PHYS 559 (2 credits), PHYS 561, PHYS 562, and a first-year seminar series. Courses required beyond these depend on the Ph.D. option. Those who choose the standard option take at least five additional 3-credit, 500-level physics courses. Those who choose the applied physics option take at least four additional courses of an applied nature selected from a list which will be provided by the physics department on request.

A candidacy examination is given at the end of the first year, a comprehensive examination approximately two years after the candidacy examination, and a final thesis defense takes place after the completion of the thesis. There is no departmental foreign language requirement, although a reading knowledge of one foreign language may be needed in some areas of research.

D.Ed. program: The requirements and procedures are the same as those for the Ph.D. program except for the following changes. Only three 500-level physics courses are required after the first nine courses listed above. An educational minor of at least 15 credits is required. A total of 90 credits must be earned in graduate school, at least 30 in residence. The thesis must be based on a minimum of 15 research credits.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following awards typically have been available to graduate students in this program:

HOMER F. BRADDOCK GRADUATE FELLOWSHIPS Available to exceptional Ph.D. candidates in several departments of the Eberly College of Science. They carry stipends of $3,500 to $7,500 per year for each of the first three years.

WHEELER P. DAVEY MEMORIAL FELLOWSHIPS Carry stipend of variable amount and are available to a limited number of qualified graduate students in the Eberly College of Science.

DAVID C. DUNCAN GRADUATE FELLOWSHIPS Available to first- and second-year graduate students in physics and carry a stipend of approximately $2,000 per year for each of the first two years.

FRYMOYER SCHOLARSHIP

W. DONALD MILLER GRADUATE FELLOWSHIP

DAVID H. RANK MEMORIAL PHYSICS AWARD

THE NELLIE AND OSCAR L. ROBERTS FELLOWSHIPS Available to graduate students majoring in the physical sciences and in biochemistry and molecular biology. Each award is for $4,000 per year for one or two years.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Robert B. Mitchell, Ph.D. (Penn State) Professor of Biology
- Jon Oatley, Ph.D. Assistant Professor of Reproductive Physiology and Physiology
- James A. Pawelczyk, Ph.D. (North Texas) Associate Professor of Physiology and Kinesiology
- Anthony E. Pegg, Ph.D. (Cambridge) Evan Pugh Professor of Cellular and Molecular Physiology and Pharmacology; J. Lloyd Huck Professor of Cell and Molecular Biology
- Blaise Peterson, Ph.D. (Washington) Associate Professor of Cellualar and Molecular Physiology
- Lisa S. Poritz, MD. (Northwestern) Assistant Professor of Surgery and Cellular and Molecular Physiology
- David N. Proctor, Ph.D. (Kent State) Associate Professor of Kinesiology and Physiology
- Stephen R. Rannels, Ph.D. (Penn State) Associate Professor of Cellular and Molecular Physiology
- Chester A. Ray, Ph.D. (Georgia) Professor of Medicine, and Cellular and Molecular Physiology
- Gavin Robertson, Ph.D. (California) Associate Professor of Pharmacology, Pathology, and Dermatology
- Barbara J. Rolls, Ph.D. (Cambridge, England) Professor and Guthrie Chair in Nutrition
- Russell C. Scaduto, Jr., Ph.D. (Indiana) Associate Professor of Cellular and Molecular Physiology
- Lisa M. Shantz, Ph.D. (Johns Hopkins) Associate Professor of Cellular and Molecular Physiology
- Neil A. Sharkey, Ph.D. (California, Davis) Professor of Kinesiology, Orthopaedics, and Rehabilitation
- Cooduvalli S. Shahikant, Ph.D. (Hyderabad, India) Associate Professor of Molecular and Developmental Biology
- Jeffrey S. Shenberger, MD (Penn State Hershey) Associate Professor of Pediatrics and Cellular and Molecular Physiology
- Yuguang (Roger) Shi, Ph.D. (Australian National University & UC-Davis) Associate Professor of Cellular and Molecular Physiology
- Ian Simpson, Ph.D. (London) Professor of Neural and Behavioral Sciences and Cellular and Molecular Physiology
- Jill P. Smith, M.D. (Florida) Professor of Medicine, Division of Gastroenterology
- Diane M. Thiboutot, MD. (Penn State Hershey) Professor of Dermatology
- James Ultman, Ph.D. (Delaware, Newark) Distinguished Professor of Chemical Engineering and Bioengineering
- Thomas C. Vary, Ph.D. (Penn State) Distinguished Professor of Cellular and Molecular Physiology
- Regina Vasilatos-Younken, Ph.D. (Penn State) Professor of Endocrine Physiology and Nutrition

- Nancy I. Williams, Sc.D. (Boston) Associate Professor of Kinesiology
- Jiyue Zhu, Ph.D. (Dartmouth) Associate Professor of Cellular and Molecular Physiology

This is an intercollege program designed to enable students to obtain an integrated series of courses encompassing both the fundamentals of physiology and advanced training in a specialized area. Courses can be taken either at the College of Medicineor at University Park campus.

Graduate instruction in physiology is under the direction of the program committee, composed of graduate faculty from several departments at University Park–including the areas of animal science, biochemistry, bioengineering, biology, kinesiology, microbiology, and nutrition, as well as the Department of Cellular and Molecular Physiology at the College of Medicine. The master's program, including courses, laboratory experience, and original research, is designed for completion in approximately two years, while the doctoral degree requires approximately five years.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Degree Requirements

Deficiencies in chemistry, biological science, mathematics (through a second course in calculus), and physics must be made up early in the student's graduate program. All candidates must complete a general basic laboratory course in physiology (combined cellular, mammalian, and comparative) before choosing an area of specialization. Possible areas of specialization are cardiovascular and respiratory physiology; cellular and subcellular physiology; comparative physiology; environmental physiology; exercise physiology; physiology of nutrition and metabolism; neurophysiology; renal physiology; and reproductive physiology. The graduate committee shall be appropriately represented by members of the physiology program committee and those of the area of specialization who shall have the responsibility and jurisdiction for determining the course program and research acceptable in satisfying degree requirements. The nonthesis option is available for the M.S. degree on a limited basis.

The communication and foreign language requirement for the Ph.D. degree may be satisfied by one of several options including intermediate knowledge of one foreign language.

Other Relevant Information

The following courses, among others, are available for physiology majors, and their descriptions may be found under the offerings of several departments: AGRO 545; AN SC 420, AN SC 423, AN SC 431W, AN SC 502, AN SC 514, AN SC 515; B M B 400, B M B 401, B M B 402, B M B 437; BIOE 402, BIOE 501, BIOE 502, BIOE 503, BIOE 504, BIOE 505, BIOE 506, BIOE 507, BIOE 552, BIOE 553, BIOE 570; BIOL 409, BIOL 428, BIOL 429, BIOL 437, BIOL 446, BIOL 465, BIOL 466, BIOL 467, BIOL 472, BIOL 473, BIOL 477, BIOL 479, BIOL 538, BIOL 539, BIOL 544, BIOL 550; CMPSC 412; EDPSY 400, EDPSY 406, EDPSY 450, EDPSY 506, EDPSY 507; KINES 456, KINES 457, KINES 484, KINES 530, KINES 565, KINES 567, KINES 577, KINES 587; MICRB 400, MICRB 401, MICRB 410, MICRB 412; NUC E 405, NUC E 420; NURS 503; NUTR 452, NUTR 515, NUTR 581, NUTR 582; PHSIO 503, PHSIO 506, PHSIO 507; PHYS 400, PHYS 402, PHYS 420; PTYSC 424, PTYSC 455; PSYCH 453, PSYCH 404, PSYCH 462, PSY 527; STAT 460, STAT 462, STAT 464, STAT 500, STAT 501, STAT 502, STAT 503, STAT 505; V SC 405, V SC 420.

The following courses are offered at the College of Medicine: ANAT 503, ANAT 505, ANAT 510, ANAT 512, ANAT 515, ANAT 535, ANAT 542, ANAT 543, ANAT 544, ANAT 545, ANAT 550; BCHEM 502, BCHEM 503, BCHEM 505, BCHEM 513, BCHEM 523, BCHEM 528, BCHEM 551, BCHEM 553; L A M 501, L A M 503, L A M 507, L A M 510, L A M 515; MICRO 552, MICRO 554, MICRO 555, MICRO 559; NEURO 509, NEURO 510, NEURO 515, NEURO 526, NEURO 527, NEURO 528, NEURO 550; PHARM 502, PHARM 505, PHARM 511, PHARM 515, PHARM 520, PHARM 540, PHARM 550. Descriptions of these courses can be found under the designated program.

Physiology Minor

The objective of the doctoral minor in Physiology is to augment the training of doctoral students with a coordinated group of courses that provide an integrated perspective of physiology from the molecular to the organismal level. It is expected that most students pursuing the minor will be graduate degree candidates in basic biological sciences, health sciences, or bioengineering.

The graduate minor in Physiology requires the following. (1) BIOL 472. If the student took a one-semester, upper-level undergraduate mammalian physiology course as an undergraduate, then this requirement may be waived with approval by the chair of the Physiology program. (2) PHSIO 571 and PHSIO 572. If these courses are required for the major, then substitute an equal number of credits in 500-level Physiology elective courses. (3) A 3-credit, 500-level Physiology elective course. (4) Select additional credits from 500-level Physiology courses or a relevant 400- or 500-level course so that the total course credits for the minor is 15. These 15 credits cannot include course work that is used to fulfill requirements in the student's major. (5) Elective courses for the minor must be approved by the chair of the Physiology program. For a list of suggested courses, see “Other Relevant Information” in the Physiology section of this bulletin. (6) Students must earn a grade of C or better in each course in the minor and maintain an overall average of 3.00 in the minor. (7) One member of the doctoral committee must be a faculty member in the Intercollege Graduate Degree Program in Physiology.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following awards typically have been available to graduate students in this program:

MRS. A. ROBERT NOLL GRADUATE FELLOWSHIP IN APPLIED PHYSIOLOGY
For graduate research in applied physiology, especially in environmental or exercise physiology; stipend variable.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- Richard N. Arteca, Ph.D. (Washington State) Professor of Horticultural Physiology
- Sarah M. Assmann, Ph.D. (Stanford) Waller Professor of Biology
- Michael Axtell, Ph.D. (California, Berkeley) Assistant Professor of Biology
- Robert D. Berghage. Ph.D. (Michigan State) Associate Professor of Horticulture
- Philip C. Bevilacqua, Ph.D. (Rochester) Associate Professor of Chemistry
- David M. Braun, Ph.D. (Missouri) Assistant Professor of Biology
- Kathleen M. Brown, Ph.D. (Florida) Professor of Postharvest Physiology
- Donald A. Bryant, Ph.D. (California, Los Angeles) Ernest C. Pollard Professor of Biotechnology and Professor of Biochemistry and Molecular Biology
- John E. Carlson, Ph.D. (Illinois) Associate Professor of Molecular Genetics (Forest Resources)
- Surinder Chopra, Ph.D. (Vrije U, Brussels) Associate Professor of Maize Genetics
- Daniel Cosgrove, Ph.D. (Stanford) Eberly Chair and Professor of Biology
- Wayne R. Curtis, Ph.D. (Purdue) Professor of Chemical Engineering and Biotechnology
- Richard J. Cyr, Ph.D. (California, Irvine) Professor of Biology
- Consuelo DeMoraes, Ph.D. (Georgia) Assistant Professor of Entomology
- Claude DePamphillis, Ph.D. (Georgia) Associate Professor of Biology
- David M. Eissenstat, Ph.D. (Utah State) Professor of Woody Plant Physiology
- Nina V. Fedoroff, Ph.D. (Rockefeller) Willaman Professor of Life Sciences and Evan Pugh Professor
- Majid Foolad, Ph.D. (California, Davis) Professor of Plant Genetics
- Simon Gilroy, Ph.D. (Edinburgh) Associate Professor of Biology
- John H. Golbeck, Ph.D. (Indiana) Professor of Biochemistry and Biophysics
- Mark J. Guiltinan, Ph.D. (California, Irvine) Professor of Plant Molecular Biology
- David Huff, Ph.D. (California, Davis) Associate Professor of Turfgrass Breeding and Genetics
- Seogchan Kang, Ph.D. (Wisconsin) Associate Professor of Plant Pathology
- Teh-hui Kao, Ph.D. (Yale) Professor of Biochemistry and Molecular Biology
- Roger Koide, Ph.D. (California, Berkeley) Professor of Horticultural Ecology
- Dawn S. Luthe, Ph.D. (Wisconsin--Madison) Professor of Plant Stress Biology
- Jonathan P. Lynch, Ph.D. (California, Davis) Professor of Plant Nutrition
- Hong Ma, Ph.D. (MIT) Professor of Biology
- Timothy McNellis, Ph.D. (Yale) Associate Professor of Plant Pathology
- Paula McSteen, Ph.D. (East Anglia, UK) Assistant Professor of Biology
- Christopher A. Mullin, Ph.D. (Cornell) Professor of Entomology
- B. Tracy Nixon, Ph.D. (MIT) Associate Professor of Biochemistry and Molecular Biology
- John C. Schultz, Ph.D. (Washington) Distinguished Professor of Entomology
- Andrew G. Stephenson, Ph.D. (Michigan) Professor of Biology
- Ming Tien, Ph.D. (Michigan) Professor of Biochemistry and Molecular Biology
- Yinong Yang, Ph.D. (U Florida) Associate Professor of Plant Pathology

The Intercollege Graduate Degree Program in Plant Biology includes faculty from nine departments in the College of Agricultural Sciences, College of Engineering, and Eberly College of Science. Each student becomes associated with the adviser's department, which may provide financial support, research facilities, and office space. Applicants are encouraged to explore opportunities by contacting faculty who may be prospective advisers.

The objective of this program is to educate and train plant biologists using the most modern techniques available today. Graduates from this program have gone on to a diverse range of careers, including positions in colleges and universities, research institutes, industry, and government. Research interests of the program faculty span the breadth of scientific areas ranging from molecular, cell, and evolutionary biology, biochemistry, biophysics, genetics, and functional genomics to whole-plant physiology and ecology. Student training includes a comprehensive set of team-taught courses that reflect this breadth of scientific approaches.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) Aptitude Test (verbal, quantitative, analytical) are required for admission. At the discretion of the graduate program officers, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Students with a 3.00 junior/senior grade-point average (on a 4.00 scale) and with appropriate course background will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces available for new students. Students entering this program should have had a strong foundation in the biological sciences, including biochemistry, general physics, and college mathematics through calculus. Students with limited deficiencies may be admitted but must make up their deficiencies concurrently with their graduate studies. B.S.-level applicants with good academic records who have had strong training in plant biology and related courses, including research experience, are generally admitted directly into the Ph.D. program and bypass the M.S. degree.

Master's Degree Requirements

Candidates for the M.S. must take a written diagnostic examination during the first academic year in the program. The functions of this test are to (1) determine the areas of expertise and deficiency in the student's academic preparation and (2) serve as an early screening system to eliminate students with too great an academic deficiency to continue in the program.

As part of the core courses for any degree in the Plant Biology program, all students must enroll in the two tutorial courses, PLBIO 512 and PLBIO 513, and an ethics course, IBIOS 591. Students are presented with advanced lectures in various areas of plant biology and must prepare approximately three written solutions to problems per semester. This dossier of papers constitutes the written diagnostic examination for the M.S. degree and is also used for evaluation of English writing competency. At the end of the respective semesters, the faculty coordinator will present a summary and evaluation of the student's progress to the Candidacy Examination Committee. The committee will then decide if the student has passed the written diagnostic examination and satisfied English writing competency.

All M.S. degree candidates will be required to complete 30 credits of course work. In addition to the courses mentioned previously, students must include two biochemistry courses, 1 credit of colloquium (PLBIO 590), and at least 6 credits of thesis research (PLBIO 600 or PLBIO 610) in their program and they must complete a thesis. Upon recommendation of the advisory committee, equivalent courses taken at another university may be substituted for the above requirements.

Doctoral Degree Requirements

Students in the Ph.D. program must successfully pass the candidacy, comprehensive, and final examinations required by the Graduate School. One of the main goals of the candidacy examination is to determine the potential of a student to successfully obtain a Ph.D. degree and is intended to be a vigorous test of a student's abilities, prior to the major investment in time and effort necessary to pass the comprehensive examination.

As in the M.S. program, students enrolled in the Ph.D. program must pass a written English competency evaluation based on the dossier of papers written for PLBIO 512 and PLBIO 513. This evaluation is done at the end of the student's first year. The oral candidacy examination is based on two of the papers, jointly chosen by the student and the Candidacy Examination Committee, and must be passed by the end of the student's third semester.

Ph.D. candidates must complete the core courses required for the M.S. plus three 2-credit courses dealing with theory and techniques of plant ecophysiology, plant cell biology, and plant molecular biology (PLBIO 514, PLBIO 515, PLBIO 516) and 2 credits of colloquium (PLBIO 590). Upon recommendation of the candidacy committee, equivalent courses taken at another university may be substituted for some of the above requirements. Based on the results of the candidacy examinations, the major professor and the student's advisory committee will determine other course requirements.

Other Relevant Information

The following courses are some of the courses available for Plant Biology majors, in addition to the required courses. Their descriptions may be found under the offerings of several departments: AGRO 517, AGRO 518; BIOL 407, BIOL 431, BIOL 441, BIOL 448, BIOL 510, BIOL 513; BMMB 514, BMMB 520, BMMB 525; HORT 402W, HORT 407, HORT 412W, HORT 420, HORT 440W, HORT 444, HORT 445, HORT 517, HORT 520; PPATH 405, PPATH 516, PPATH 543; any course offered by the Plant Biology program.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. In most participating departments, Plant Biology applicants are eligible for departmental teaching or research assistantships, and other assistantships supported by grant funds of individual faculty who make these award decisions.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S., M.Agr.

The Graduate Faculty

- Paul A. Backman, Ph.D. (California) Professor of Plant Pathology
- David M. Beyer, Ph.D. (Penn State) Professor of Plant Pathology
- Barbara J. Christ, Ph.D. (British Columbia) Senior Associate Dean; Professor of Plant Pathology
- Donald D. Davis, Ph.D. (Penn State) Professor of Plant Pathology
- David M. Geiser, Ph.D. (Georgia) Professor of Plant Pathology
- Frederick E. Gildow, Ph.D. (Cornell) Department Head; Professor of Plant Pathology
- Beth K. Gugino, Ph.D. (Penn State) Assistant Professor of Plant Pathology
- John M. Halbrendt, Ph.D. (Missouri) Associate Professor of Plant Pathology
- Scott A. Isard, Ph.D. (Indiana) Professor of Aerobiology
- Maria del Mar Jimenez Gasco, Ph.D. (Cordoba, Spain) Assistant Professor of Plant Pathology
- Seogchan Kang, Ph.D. (Wisconsin) Professor of Plant Pathology
- Gretchen A. Kuldau, Ph.D. (California) Associate Professor of Plant Pathology
- Timothy W. McNellis, Ph.D. (Yale) Associate Professor of Plant Pathology
- Gary W. Moorman, Ph.D. (North Carolina State) Professor of Plant Pathology
- Henry Ngugi, Ph.D. (Reading, UK) Assistant Professor of Plant Pathology
- C. Peter Romaine, Ph.D. (Cornell) Professor of Plant Pathology
- Daniel J. Royse, Ph.D. (Illinois) Professor of Plant Pathology
- Elwin L. Stewart, Ph.D. (Oregon State) Professor of Plant Pathology
- James W. Travis, Ph.D. (North Carolina State) Professor of Plant Pathology
- Wakar Uddin, Ph.D. (Georgia) Associate Professor of Plant Pathology
- Yinong Yang, Ph.D. (Florida) Associate Professor of Plant Pathology

Plant pathology is the study of disease in plants and concerns the dynamic interaction between the plant, the causal agent (bacteria, fungi, viruses, nematodes, etc.), and their environments. A student prepares for a professional career in research, teaching, extension, or industry through advanced studies of the principles of plant infection, the physiology of disease in plants, the ecology of root diseases, the nature and inheritance of disease resistance in plants, epidemiology, ecology and physiology of air pollution injury to plants, or plant disease control by biological or chemical means. A student also may specialize in the nature and control of the diseases of forest trees, agronomic or horticultural crops, and commercial mushrooms. Advanced studies in molecular systematics of fungi and applied mycology, related to the production of the commercial mushroom, also may be taken. Modern, well-equipped laboratories, controlled environment facilities and greenhouses, and well-developed field research areas are available for graduate study.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Students scoring in the fiftieth percentile or above on each section of the GRE will be given preference. The best-qualified applicants will be accepted up to the number of spaces and advisers that are available for new students. Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Students are expected to have a strong foundation in biological and physical sciences. Generally, students with B.S. degrees in biology, microbiology, plant science, molecular biology, or biochemistry are well prepared.

Degree Requirements

M.Agr. DEGREE

The Master of Agriculture degree is offered to provide professional training in plant pathology with more of a crop orientation than is available under the M.S. program. In addition to the courses required for an M.S. degree, the M.Agr. degree requires further study in the areas of entomology and crop sciences.
Required courses for the M.Agr. degree are: PPATH 405, 502, 590, and 596. Candidates are required to take three additional courses from a list provided by the department (a minimum of 7 credits total). Candidates for the M.Agr. degree in Plant Pathology must present a suitable paper. A research thesis is not required. A thesis substitute, such as an internship report, or an adaptive or demonstrative activity whereby known technology or procedures are applied, is acceptable. The nature and extent of this paper shall be decided by the candidate's advistory committee and may result from an internship experience or PPATH 596 (Special Problems).

M.S. DEGREE

The master of science degree program in Plant Pathology leads students either to the development of special proficiencies in Plant Pathology, which will allow the individual to directly enter a professional career, or to the development of a basic knowledge of the discipline, allowing for advancement to the Ph.D. degree. M.S. degree students will be introduced to the broad aspects of the field of plant pathology, including exposure to the various causal agents of plant disease and the diseases they incite; diseases of current and classical importance affecting a wide range of crop plants; a variety of techniques used to isolate, characterize, and identify causal agents of plant disease; and an appreciation for the relationship between plant pathology and other biological and physical sciences.

Required Courses for the M.S. Degree are: PPATH 405, 416, 417, 425, 502, and 590. Candidates are required to take a minimum of 6 additional credits of Plant Pathology courses from a list provided by the department.

Candidates for the M.S. degree in Plant Pathology must present a thesis to their graduate advisory committee.

Ph.D. DEGREE

Students earning a Ph.D. degree from Penn State should have a thorough understanding of the complex interaction between the pathogen and its host. They should know how representative pathogens are dispersed and enter hosts and how the environment mediates these processes. They should understand the role that the pathogen, host genes, and metabolic products play in pathogenesis. They must be aware of the mechanisms the host has to defend it and how these are breeched by a successful pathogen. They must know the parameters involved in disease development and with this knowledge be able to apply measures of control.

Candidates for the Ph.D. degree in Plant Pathology are required to have an M.S. in plant pathology or a closely related field, or equivalent educational background. In addition, all students must enroll in PPATH 505 and other courses tailored to the individual by the candidate's doctoral advisory committee. Ph.D. candidates must prepare a thesis and present seminars in the departmental colloquium (PPATH 590), through which English communication skills will be evaluated. During their studies, Ph.D. students will have an opportunity to assist in teaching a disciplinary subject.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Susan Welch, Ph.D. (Illinois, Urbana-Champaign) Professor of Political Science
- Joseph G. Wright, Ph.D. (California, Los Angeles) Assistant Professor or Political Science
- Christopher Zorn, Ph.D. (Ohio State) Professor of Political Science

The purpose of the graduate program in Political Science is to train professional political scientists who intend to pursue careers in research, teaching, and public service. The department offers programs leading to the M.A. and Ph.D. degrees. The programs are designed to enable students to acquire both methodological sophistication and substantive knowledge in a variety of fields.

The graduate program in Political Science encourages the study of a variety of substantive concerns, methodological approaches, and research skills. Among the department's special areas of strength are United States politics and political behavior (legislative politics, public opinion and voting, parties and interest groups, and judicial process); political and social theory; international relations and peace science; and the politics of western and eastern Europe, Latin America, and South Asia; international conflict; international political economy; democratization; social movements; political culture; gender and politics. A dual-degree program with Women's Studies is also available.

Admission Requirements

Entrance to the Political Science graduate program occurs in the fall semester. Applications must be received by the department not later than January 15 for fall admission. However, the department will begin accepting applications as of September 1.

The Department of Political Science requires M.A. and Ph.D. program applicants to submit transcripts, Graduate Record Examinations (GRE) scores (verbal, quantitative, and analytical), a statement of career plans and proposed emphasis in political science, at least three letters of recommendation from persons familiar with the applicant's academic performance, and a writing sample demonstrating research and/or analytical skills. Students whose native language is not English must also submit the results of the Test of English as a Foreign Language (TOEFL). Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Students can be admitted to the master's program or, after passing a Ph.D. candidacy exam, can be admitted to the Ph.D. program with a master's degree.

Master's Degree Requirements

Depending on the student's previous methodological training, 30 credits of course work, including an essay, are required for a master's degree. The course work includes a methodological core of 9 credits (PL SC 501, 502, and 503); 12 credits in a primary field (including the survey seminar in the field); 6 credits in a secondary field; and 3 credits for the M.A. essay. Students also take a seminar on teaching and professional development in political science. There are no language requirements for the degree. Every master's candidate is required to pass an examination of their master's essay.

In the case of transfer students, a maximum of 10 credits earned in an advanced degree program at another university or in another department at Penn State will count toward the 30-credit requirement.

Doctoral Degree Requirements

The Department of Political Science requires a minimum total of 60 postbaccalaureate credits for the Ph.D. Course work accepted for the M.A. in Political Science will count toward the 60-credit requirement. At least 45 credits, exclusive of the dissertation, must be in political science.

In the case of transfer students, a maximum of 30 credits earned in an advanced degree program at another university or in another department at Penn State will count toward the 60-credit requirement.

The department requires that a student complete the designated "core" courses in methodology (PL SC 501, 502, and 503) and a seminar on teaching and professional development in political science. Ph.D. degree candidates must present three fields for the purposes of comprehensive examinations. The major and one of the minor fields must be selected from the department's recognized fields, and one of the minor fields may be outside political science. The major field requires a minimum of 15 credits; each minor field requires a minimum of 9 credits.

The communication and foreign language requirement for the Ph.D. may be satisfied by advanced course work and competence developed in foreign languages, statistics, or other research methods.

Other Relevant Information

Penn State is a member of the Committee on Institutional Cooperation (CIC), an association of the Big Ten universities and the University of Chicago. The CIC sponsors the Traveling Scholars program, which provides doctoral-level students with an opportunity to study at another CIC university. In addition to participating in CIC programs, the department sponsors attendance at the ICPSR Summer program at the University of Michigan.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Project Management (PRMGT)

JEFFREY PINTO, Program Chair
Penn State Erie, The Behrend College
Station Road
Erie, PA 16563

The Master of Project Management (MPM) is a 30-credit graduate degree program that emphasizes all aspects of project management theory and practice. The MPM is interdisciplinary and utilizes problem-based learning as well as a combination of face-to-face and Web-based instructional methods to transcend time and space, and to support effective teaching and learning. The key themes of the MPM include: planning, cost, and value management; project control; human issues in project management; strategic issues in project management; and commercial and procurement law as it relates to project management.

Degree Requirements

Students complete eight required courses (24 credits) in which they apply course concepts to project management scenarios through the use of cases, simulations or actual situations in their employing organizations. The required corpuses are:

MANAGEMENT (MANGT)
510. Project Management (3)
515. Cost adn Value Management (3)
520. Planning and Resource Management (3)
525. Commercial Law and Project Management (3)
531. Organizaitons (3)
535. Interpersonal and Group Behavior (3)
540. Strategy: Corporate, Business, and Project (3)
575. Managment of Projects (3)
596. Independent Studies (6)

In addition, students take 6 credits of elective courses. Electives may include additional program-approved courses or an applied research project focusing on some aspect of project management completed as an independent study. All students must attend a minimum of one on-site residency experience for two to three days in order to complete the graduation requirements of the program. Attendance at additional annual residency events is encouraged but optional.

Admission Requirements

Only candidates who demonstrate high promise of success for graduate work are admitted to the MPM program. All applicants must have received from a regionally accredited institution a baccalaureate degree earned under residence and credit conditions that are deemed substantially equivalent to those currently required by Penn State. Admission decisions are based on undergraduate grade-point average, Graduate Management Admission Test (GMAT) scores, and a personal essay.

Applicants must achieve a minimum GMAT score of 450. When this score is added to the applicant's undergraduate grade-point average, multiplied by 200, the total must be at least 1,050 in order to meet minimum requirements for admission to the MPM program. Either the applicant's cumulative undergraduate grade-point average or the junior/senior grade-point average can be used for this calculation. Applicants must also demonstrate proficiency in writing by obtaining at least a 4.0 on the analytical writing assessment portion of the GMAT, or by earning a grade of B or higher in a college English composition course. The MPM program emphasizes application of course concepts to actual project management opportunities and problems. Therefore, students who currently are, or previously were, employed as project managers or project team members will derive the greatest benefit from the program. All applicants must provide evidence of sufficient current or previous work experience that will enable them to successfully complete course assignments requiring the application of course concepts to real project management situations. This evidence may be provided in either the form of three letters of recommendation from individuals who know the applicant in a professional capacity or through nomination to participate in the program by an appropriate official within the applicant's employing organization. Those who write letters of recommendation or submit nominations on behalf of the candidate will be asked to attest to the nominee's suitability for the program of study considering factors such as the applicant's length of employment, level and areas of work responsibility, personal qualities, career goals, maturity of purpose, and program requirements to apply course concepts to work-related issues. Applicants are encouraged to consult with the program chair concerning the suitability of their work experiences in relationship to program requirements.

The language of instruction at Penn State is English. All international applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the Internet-based test (iBT). The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

All students must be computer literate and have ready and reliable access to a computer and the Internet to successfully complete the MPM program. They must know how to use word processing software, log on to an Internet provider, and use e-mail. Additionally, MPM students will use Microsoft Office in their coursework that will require they have a working knowledge of Microsoft Office programs such as Word, Excel, Power Point, and Access. Access to fax facilities may be needed as an additional form of communications between student and instructor or between students.

Course Scheduling Considerations

The recommended maximum course load is 6 credits per semester for students working full-time. MANGT 510 must be taken in the first semester of study and is a prerequisite or co-requisite for all other courses in the program. MANGT 575, Management of Projects, is a problem-based capstone course that integrates the themes necessary to appreciate the overall challenge of project management. The course includes a final, integrative and comprehensive project based on the identification and analysis of real project management problems from the students' work organizations. This written assignment requires the integration of theory from previous courses along with significant library and literature searches to analyze and propose solutions to these problems. MANGT 575 must be taken following completion of at least 18 credits. No more than one of the required courses may be taken concurrently with MANGT 575.

Psychology (PSY)

Program Home Page

MELVIN M. MARK, *Head of the Department*
Department office: 111 Moore Building
814-865-9514

Degrees Conferred:

Ph.D., M.S.
Dual-Title Doctoral Degree in Psychology and Language Science

The Graduate Faculty

- Reginald B. Adams Jr., Ph.D. (Dartmouth) Assistant Professor of Psychology
- Peter A. Arnett, Ph.D. (Wisconsin, Madison) Associate Professor of Psychology
- Sandra T. Azar, Ph.D. (Rochester) Professor of Psychology
- Sheri Berenbaum, Ph.D. (California) Professor of Psychology
- Karen L. Bierman, Ph.D. (Denver) Distinguished Professor of Psychology
- Alysia Y. Blandon, Ph.D. (Michigan) Assistant Professor of Psychology
- Frederick M. Brown, Ph.D. (Virginia) Associate Professor of Psychology
- Kristen A. Buss, Ph.D. (Wisconsin) Associate Professor of Psychology
- Richard A. Carlson, Ph.D. (Illinois) Professor of Psychology
- Mark A. Casteel, Ph.D. (Nebraska) Associate Professor of Psychology
- Louis G. Castonguay, Ph.D. (SUNY, Stony Brook) Professor of Psychology
- Jeanette Cleveland, Ph.D. (Penn State) Professor of Psychology
- Pamela M. Cole, Ph.D. (Penn State) Professor of Psychology
- Peter B. Crabb, Ph.D. (Temple) Associate Professor of Psychology
- Nancy A. Dennis, Ph.D. (Catholic U of America) Assistant Professor of Psychology
- James L. Farr, Ph.D. (Maryland) Professor of Psychology
- Karen Gasper, Ph.D. (Illinois) Associate Professor of Psychology
- Mary Gergen, Ph.D. (Temple) Professor of Psychology
- Rick O. Gilmore, Ph.D. (Carnegie Mellon) Associate Professor of Psychology
- Alicia A. Grandey, Ph.D. (Colorado State) Associate Professor of Psychology
- Monica E. Gregory, Ph.D. (Oklahoma) Associate Professor of Psychology
- Frank G. Hillary, Ph.D. (Drexel) Assistant Professor of Psychology
- Cynthia L. Huang-Pollock, Ph.D. (Michigan State) Assistant Professor of Psychology
- Sam Hunter, Ph.D. (Oklahoma) Assistant Professor of Psychology
- Rick R. Jacobs, Ph.D. (California) Professor of Psychology
- John A. Johnson, Ph.D. (Johns Hopkins) Professor of Psychology
- Alexay Kozhevnikov, Ph.D. (Yale) Assistant Professor of Physics and Psychology
- Judith F. Kroll, Ph.D. (Brandeis) Liberal Arts Research Professor of Psychology and Linguistics
- Kenneth N. Levy, Ph.D. (CUNY) Assistant Professor of Psychology
- Ping Li, Ph.D. (Leiden U) Professor of Psychology and Linguistics
- Lynn S. Liben, Ph.D. (Michigan) Distinguished Professor of Psychology
- Melvin M. Mark, Ph.D. (Northwestern) Professor of Psychology
- Amy D. Marshall, Ph.D. (Indiana) Assistant Professor of Psychology
- Gerald E. McClearn, Ph.D. (Wisconsin) Evan Pugh Professor of Health and Human Development and Psychology
- Michael D. McNeese, Ph.D. (Vanderbilt) Associate Professor of Information Sciences and Technology, and Psychology
- Susan Mohammed, Ph.D. (Ohio) Associate Professor of Psychology
- Ginger Moore, Ph.D. (Pittsburgh) Assistant Professor of Psychology
- Kevin R. Murphy, Ph.D. (Penn State) Professor of Psychology
- Jenae Neiderhiser, Ph.D. (Penn State) Professor of Psychology
- Keith E. Nelson, Ph.D. (Yale) Professor of Psychology
- Michelle G. Newman, Ph.D. (SUNY, Stony Brook) Associate Professor of Psychology and Psychiatry
- Aaron L. Pincus, Ph.D. (British Columbia) Associate Professor of Psychology
- Brian Rabian, Ph.D. (George Washington) Clinical Associate Professor of Psychology
- Richard J. Ravizza, Ph.D. (Vanderbilt) Associate Professor of Psychology
- William J. Ray, Ph.D. (Vanderbilt) Professor of Psychology
- Frank E. Ritter, Ph.D. (Carnegie Mellon) Associate Professor of Information Sciences and Technology, and Psychology
- David A. Rosenbaum, Ph.D. (Stanford) Distinguished Professor of Psychology
- Stephanie A. Shields, Ph.D. (Penn State) Professor of Women's Studies and Psychology
- Margaret L. Signorella, Ph.D. (Penn State) Professor of Psychology
- José Soto, Ph.D. (California, Berkeley) Assistant Professor of Psychology
- Janet Swim, Ph.D. (Minnesota) Professor of Psychology
- Hoben Thomas, Ph.D. (Claremont) Professor of Psychology
- Theresa K. Vescio, Ph.D. (Kansas) Associate Professor of Psychology and Women's Studies
- Daniel J. Weiss, Ph.D. (Harvard) Associate Professor of Psychology
- Michael Wenger, Ph.D. (Binghamton) Associate Professor of Psychology
- Stephen Wilson, Ph.D. (Pittsburgh) Assistant Professor of Psychology

The graduate Psychology program is characterized by highly individualized study leading to the Ph.D. degree. Emphasis is placed on research, teaching, and professional career development. Each student is associated with one of the six program areas offered in the department: *Clinical* (including *Child Clinical*; *Cognitive*; *Developmental*; *Psychobiology; Industrial/Organizational*; and *Social.* An individual's particular pattern of interests dictates in part the course of study followed. Within all areas, research is an integral part of study; usually, the research is empirical in focus, but it may be applied or basic, depending on the problem of interest.

The department has laboratories, computer facilities, darkroom, and shop, and students have access to the large resources of the University, which include excellent computation facilities and a large open-stack library. Opportunities for practicum experience are available; e.g., clinical students find practicum in local mental health centers, while industrial students find placement in appropriate

business or industrial settings.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) verbal and quantitative portions are required; scores from the Miller Analogies Test (MAT) are optional. All applicants who were psychology majors as undergraduates should provide scores from the advanced psychology (subject) GRE test. Applicants with superior undergraduate (particularly junior and senior years) or graduate grade-point averages will be considered for admission. Although a major in psychology is not required, applicants should have a broad undergraduate background that includes 12 credits in psychology. Undergraduate study in psychology should include a course in statistics and a psychological methodology course. Requirements listed above are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin.*

Master's Degree Requirements

The psychology department does not have a graduate program designed for students seeking only the master's degree. A master's thesis, or the department's equivalent (an acceptable published journal article), is required for advancement to candidacy for the Ph.D. degree in Psychology. Usually, but not always, the master's thesis centers on an empirical research topic. The typical thesis involves a literature review, data collection, analysis, and discussion. A master's degree is not awarded unless a thesis is submitted to the Graduate School. Students must successfully propose a thesis study by the end of the second year and have a successfully defended a thesis by the end of their third year in the program.

Doctoral Degree Requirements

All students in their first year of residency must satisfactorily complete the department's English proficiency requirement (PSY 501).

Students must complete (within their first 60 graduate credits for students without previous graduate credit) 6 departmentally approved graduate credits in statistics with a grade of B or better. Students must complete 18 credits in a suitably selected major area; majors usually are defined by one of the six program areas noted above. In addition to the major area credits, students must complete a minimum of 12 credits outside the major area. Two options exist for completing these 12 credits: (1) completing four courses in APA-recommended breadth areas, or (2) completing course work in a particular area of expertise outside the major. Some areas may have additional recommended or required courses as well. The Ph.D. comprehensive examination must be taken by the time 70 graduate credits are earned, or prior to the student's fourth year in residency, whichever comes first. The department has no foreign language requirement.

Applied Linguistics Option

The program offers an option in Applied Linguistics which includes 18 credits in APLNG/LING offered in the Linguistics and Applied Language Studies program. Underpinning the option is the synthesis of knowledge related to how language is acquired, understood, and spoken by children and adults who use one or more languages.

Other Relevant Information

The Department of Psychology makes every effort to recruit and train minority psychologists. Support for minority students is coordinated by the department, the Graduate School Minority Graduate Scholars Award Program, and the American Psychological Association Minority Fellowship Program. In addition, the department often has funded minority students through minority training programs and special minority research programs.

Student Aid

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Dual-Title Graduate Degree in Psychology and Language Science

Graduate students with research and educational interests in Psychology and Language Science may apply to Psychology and Language Science PH.D. Graduate Program. The goal of the dual-title degree Psychology and language Science graduate program is to enable graduate students from Psychology to acquire the knowledge and skills of their major area of specialization in Psychology, while at the same time gaining the perspective and methods of the Language Sciences.

Admission Requirements

To pursue a dual-title degree under this program, the student must first apply to the Graduate School and be admitted through the Psychology Department (see below for admission requirements for the Graduate Program in Psychology). Upon admission to the Psychology Program and with a recommendation from a Language Science program faculty member in the Department of Psychology, the student's application will be forwarded to a committee that will include the Director of the Linguistics Program, one of the Co-Directors of the Center for Language Science, and a third elected faculty member within the Center for Language Science. All three committee members will be affiliated with the Program in Linguistics. Upon the recommendation of this committee, the student will be admitted to the dual-title degree program in Language Science.

Admission Requirements for Incoming Graduate Students in Psychology

Most incoming graduate students have earned an undergraduate degree in psychology. In some cases, students from other majors are also admitted, but it is expected that applicants will have a background in psychology before applying. Graduate Record Exam (GRE) is required; however, the subject exam is not required. The TOEFL exam is required for international students except for those applicants who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize,

British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States and Wales. All international students will be required to take the English Proficiency Exam upon arrival at the Penn State campus. Students are asked to complete a departmental application form, write a statement of purpose, and include a writing sample in the application materials.

Requirements for the Dual-Title Ph.D. Degree in Psychology and Language Science

Two Language Science proseminar courses (Ling 521 and Ling 522; 6 credits). One 3 credit research internship with a Language Science faculty mentor from an outside area. The 3 credit internship required by the Psychology program may satisfy both the Psychology requirement and the Language Science requirement (for 6 total credits of internship to be completed with two faculty members from the Language Science program). Students will choose one course among the following: CSD 596, GER 596, LING 596, PSY 596, SPAN 596.

Final course selection is determined by the student in consultation with their dual-title program advisors and their major program advisors. Students who already hold a master's degree from another institution may petition to have equivalent course credits accepted.

- James T. Ziegenfuss, Jr., Ph.D. (Pennsylvania/Wharton) *Professor of Management and Health Care Systems*

MPA Program

The Master of Public Administration (MPA) program is intended for those with career interests in public management, health and human services, government, and other public service and nonprofit organizations. The curriculum blends theoretical and applied concepts and assures “real-world” experiences for the novice administrator. In addition, it requires that students devote attention to general professional development. The MPA program is accredited by the National Association of Schools of Public Affairs and Administration.

FULL-TIME OR PART-TIME--Students may begin the program in any semester. Three courses (or 9 credits) per semester are considered a normal course load for full-time students. Part-time students typically take one or two 3-credit courses each semester and one or two courses during the summer session to maintain steady progress toward the degree. The program, including an internship in a public agency or nonprofit organization for those without three years of managerial, supervisory, or professional experience, requires eighteen to twenty-four months of full-time study, or three to five years on a part-time basis.

Admission Requirements

Applicants must have received their baccalaureate degree from an accredited college or university prior to starting the graduate program. Applicants who are still completing their baccalaureate requirements at the time of application may be admitted to the Graduate School conditional on the awarding of the baccalaureate degree.

Admission to the MPA program is based on clear suitability for the program as demonstrated by the application as a whole, including the following: a completed application with the application fee; evidence of a bachelor's degree from an accredited college; a statement of career and educational goals; a successful undergraduate record with a grade-point average of 3.00 (either as the cumulative GPA or for the last 60 hours of relevant course work); satisfactory scores on the Graduate Record Examination (GRE), Graduate Management Admission Test (GMAT), or Law School Admission Test (LSAT) if the GPA is less than 3.0; and three references willing to provide recommendations.

Prerequisites

All students admitted to the MPA program must show prerequisite 3-credit course work in statistics and statistical software with a satisfactory grade. Students without prior course work in statistics must fulfill this prerequisite within two semesters of admission. Credits earned do not count toward the MPA requirement.

Degree Requirements

The MPA degree program requires 36 graduate credits—18 in core courses, 15 in electives, and 3 for the master's project. Up to 6 credits of 400-level courses may be taken as electives, with the approval of an adviser. In addition, a 9-credit internship is required of students who do not have at least three years of full-time relevant work experience that consists of supervisory, managerial, or professional work. The internship is waived for students with this experience before they enter the program or who gain it during the program.

REQUIRED CORE COURSES (18 credits)

P ADM 500, P ADM 502, P ADM 503, P ADM 505, P ADM 506, P ADM 510

ELECTIVE CONCENTRATION AREA (15 credits)

With the faculty adviser's approval, a student selects 15 credits of electives. Concentrations offered are Government Administration, Health Care Management and Policy, Human Resources Management, Information Resource Management, Policy Analysis, and Criminal Justice, as well as the general Public Administration degree.

Examples of suitable elective courses: P ADM 507, P ADM 511, P ADM 512, P ADM 514, P ADM 515, P ADM 516, P ADM 522, P ADM 523, P ADM 524, P ADM 531, P ADM 532, P ADM 533, P ADM 534, P ADM 535, P ADM 550, P ADM 556, P ADM 557, P ADM 558, CRIMJ 563, CRIMJ 564, and CRIMJ 565. Courses listed under the Master of Health Administration program may also be taken: H ADM 539, H ADM 540, H ADM 541, H ADM 542, H ADM 543, H ADM 545, H ADM 546, H ADM 548, H ADM 551, H ADM 552.

MASTER's PROJECT--P ADM 594

INTERNSHIP IN PUBLIC ADMINISTRATION--P ADM 595 (if required)

Ph.D. Program

The Doctor of Philosophy in Public Administration provides a broad-based academic program combining conceptual foundations with research and analytical skills. The goal of the program is to educate professionals with the ability to create and apply knowledge through teaching, research, consulting, and management.

Graduates of the program work in such occupations as:

- university or college professor
- president of community hospital
- senior positions in state and federal government
- senior training officer national executive development institute
- health care consultant
- president, non-profit organization

The Program retains the traditional requirements of the Ph.D. degree--advanced coursework, comprehensive examinations, residency, a research dissertation, final oral examination, and standards of excellence--in a program that allows students to combine study and work. Students may pursue the program on a full- or part-time basis. The emphasis is placed in critical thinking, research, writing, and mastery of a broad body of literature. In the emerging "information age," public administrators are both producers and consumers of research. The roles of administrator and scholar are increasingly blurred, as scientific reasoning and data gathering increasingly permeates public managerial decision making. Creating and accessing knowledge that is useful to address organizational and policy issues is increasingly important.

Application for Admission

To assure course availability and maximize progress, applicants should carefully consider when to apply to the Program and begin study. In general, students should plan to begin taking P ADM 570 (Scope and Methods of Public Administration) and other doctoral seminars during the Fall Semester.

The following information should also help applicants decide when to apply to the Program:
Fall Admission:

- Applicants for fellowships and assistantships must complete and submit materials by January 30.
- Applicants who must take one or more prerequisite courses typically should apply by October 31.
  This will enable them to take the necessary prerequisite courses during the Spring Semester and/or Summer Term and begin doctoral seminars the next Fall. If in doubt about the need for prerequisites, an applicant should meet the October 31 deadline.
- Students who are not required to take prerequisite courses may submit their application materials by October 31 or March 15. However, we encourage students to apply at the earliest possible date.
  The Program Coordinator can answer individual applicant questions about application and entrance dates.

Admission Requirements

Applicants for the Doctor of Philosophy in Public Administration should hold a masters degree in public administration, public policy, or a related field such as business, economics, political science, or sociology. Applicants with masters degrees in other fields also will be considered. Students may be required to take additional courses after admission to the program to make up for any deficiencies.

A student must have taken the following graduate courses as program prerequisites or corequisites: Public Organization and Management (P ADM 500), Introduction to Public Policy Analysis (P ADM 507), Research Methods (P ADM 503), and Organization Behavior (P ADM 510).

In addition, most applicants should have five years of relevant professional work experience.

Students are required to submit the following:

- a completed application, with the application fee
- two official transcripts of all undergraduate and graduate course work scores from the Graduate Record Exam (GRE), with official verification
- three letters of reference attesting to both academic and professional capabilities (at least two of the three letters should be from academic sources, such as prior professors or academic advisors)
- a letter of approximately 500 words outlining significant work experience, career goals, and academic objectives
- a recent personal vita
- a substantial academic paper written for a previous graduate course(e.g. seminar paper)

Interviews: The Admissions Committee interviews individuals whose application material indicates they qualify for entry into the Program. These interviews may be face-to-face or by telephone. Interviews help assure a good fit between individual interests and the Program.

International Students

Application deadlines: International student application materials must meet the following deadlines:
January 30 for Fall, September 30 for Spring, February 28 for Summer.*
*Applications received after the deadlines will be processed for the following semester.

Language Proficiency: International students must have received either the bachelors or masters degree from a program that uses English as the primary language.

Students for whom English is not a first language also are required to pass the Test of ENglish as a Foreign Language (TOEFL) [www.toefl.org(TOEFL) (Opens New Window)] with a score of 600 or higher (Paper-Based Test) or 250 (Computer-Based Test) or higher.

Degree Requirements

Students progress through the following phases and take the required courses indicated as part of their study for the Ph.D.

Precandidacy and Provisional Admission --Applicants who do not have necessary background, but otherwise meet the criteria for admission may be admitted provisionally and must (1) make up any deficiencies in graduate courses in public administration noted in the letter of acceptance, (2) complete P ADM 570 (Scope and Methods), P ADM 575 (Research Design), and at least one course from the P ADM 571, P ADM 572, P ADM 573, and P ADM 574 seminar series, with an average of 3.5 or better, and (3) pass a candidacy exam. Students who must make up deficiencies are considered to be provisionally admitted into the program. A student may remain in this temporary classification for a period of no longer than two semesters following admission. Upon successful completion of the requisite courses noted in the letter (with a 3.5 grade point average), the student will be removed from provisional status and be regularly enrolled. It is to be emphasized that the provisional condition must be met before a student reaches an academic benchmark (doctoral candidacy, comprehensive, and final oral examination). A student will not be permitted to graduate with a provisional status remaining on his or her record.

Comprehensive Examination--Candidates take additional course work to prepare for comprehensive examinations in three subfields of study, complete a period of residency, and write the Ph.D. dissertation. The three formal subfields of specialization are: organization theory and behavior, policy analysis and governance, and public management. Additional subfields of study, such as Health Care Management and Policy, Criminal Justice, Management Information Systems, and Training and Development may be selected with the approval of the student's doctoral committee.

Residency--A period of two consecutive semesters of concentrated study and research as a full-time student--9 credits per semester.

The Dissertation

Under guidance from the dissertation committee, the candidate prepares a detailed research proposal that serves as the basis for the written dissertation. The writing and defense of this original contribution to the theory of public administration is the capstone to the Ph.D. program.

Grade Point Average and Time Limit

Part-time students can complete the program in approximately seven to eight years of continuous study. Full time students may complete the Program in four to five years. Students must have a 3.50 grade-point average to graduate.

Financial Aid

There are a limited number of scholarships, fellowships, and research grants available, as well as graduate assistantships. Many students work full-time and take classes part-time. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To find other options available to you, contact the Financial Aid Office at 717-948-6307.

PUBLIC ADMINISTRATION (P ADM) course list

PUBLIC ADMINISTRATION, JURIS DOCTOR AND MASTER OF PUBLIC ADMINISTRATION (J.D./M.P.A.)

STEVEN A. PETERSON, *Program Coordinator*
Penn State Harrisburg
777 W. Harrisburg Pike
Middletown, PA 17057-4898
717-948-6050
www.hbg.psu.edu (Opens New Window)

Degrees Conferred:

J.D./M.P.A.

The Dickinson School of Law of The Pennsylvania State University and the School of Public Affairs of Penn State Harrisburg, the Capital College, offer a cooperative program leading to the degrees of Juris Doctor, to be granted by Dickinson, and Master of Public Administration, to be granted by Penn State Harrisburg.

Admission Requirements

In order to be admitted to the program, students must first be admitted to The Dickinson School of Law under its regular admission procedures. Dickinson need not forward applications of all DSL admittees who have expressed interest in the MPA program and can withhold support for some admittees until they have demonstrated proficiency in their legal studies and a capacity for dual degree study. Penn State Harrisburg will make independent admissions decisions as to all dual degree applicants.

The Dickinson Admissions Office requires: application forms for DSL and PSH Graduate School, the Law School Admission Test (LSAT), a completed LSDAS report, a one-page personal statement, employment record since high school, and two recommendations.

The Penn State Harrisburg Admissions Office requires: completed applications (Graduate School and MPA), with the application fee; evidence of a bachelor's degree from an accredited college; a statement of career and educational goals; a successful undergraduate record with a grade-point average of 3.0 (either as the cumulative GPA or for the last 60 hours of relevant course work); satisfactory scores on the Graduate Record Examination (GRE), Graduate Management Admission Test (GMAT), or Law School Admission Test (LSAT) if junior–senior or cumulative GPA is less than 3.0); and three names of references willing to provide recommendations.

Prerequisites

All students admitted to the MPA program must show prerequisite course work in statistics and statistical software with a satisfactory grade. Students without prior course work in statistics must fulfill this prerequisite within two semesters of admission. Credits earned do not count toward the J.D./M.P.A. degree.

Degree Requirements

To be eligible to earn the Juris Doctor degree, a candidate must: earn credit for 88 semester hours of course work, have a cumulative average of at least 70.00, complete all required courses (currently totaling 41 semester hours) plus at least one seminar, and complete six semesters in residence.

The MPA degree program requires 36 graduate credits—18 in core courses, 15 in electives, and 3 for the Master's Project.

A maximum of 9 credits for Dickinson School of Law course work may be transferred for credit toward the MPA degree at Penn State Harrisburg, subject to Harrisburg's approval based on relevance to the MPA program.

A maximum of 9 credits for MPA course work with a grade of B or better may be transferred for credit toward the J.D. degree at Dickinson. Courses for which such credit may be applied shall be subject to approval by the Dickinson faculty.

It is anticipated that students will complete a minimum of 79 credits from Dickinson and 27 credits (not including the internship) from Penn State Harrisburg in order to earn the J.D. and M.P.A. degrees. A student in the program, however, may obtain either degree prior to completing all requirements for the other degree. Students must earn at least a 3.0 grade-point average to be eligible for the M.P.A. degree.

Robert A. Cherry, *Medical Director*, Penn State Shock Trauma Center; *Chief*,
Section of Trauma and Critical Care, Penn State Milton S. Hershey Medical Center
College of Medicine, C1524
717-531-6066

Degrees Conferred:

M.H.S., Master of Homeland Security (Penn State University Park)

The Graduate Faculty

- Robert A. Cherry, M.D. (Columbia) *Assistant Professor of Surgery*
- Elizabeth Carney, DVM (Iowa State) *Assistant Professor of Comparative Medicine*
- Peter K. Forster, Ph.D. (Penn State) *Instructor of Political Science*
- Kevin P. Furlong, Ph.D. (Utah) *Professor of Geosciences*
- Jim Holliman, M.D. (Washington) *Professor of Emergency Medicine*
- Gretchen A. Kuldau, Ph.D. (California) *Assistant Professor of Plant Pathology*
- Eugene J. Lengerich VMD, MS (U of Penn), *Associate Professor of Health Evaluation Sciences*
- Craig Meyers, Ph.D. (UCLA) *Professor of Microbiology and Immunology*
- Kevin R. Murphy, Ph.D. (Penn State) *Professor and Head of Psychology*
- Roxanne Parrott, Ph.D. (Penn State) *Professor of Communication Arts and Sciences and Health Policy Administration*
- Zhengmin Qian, M.D., Ph.D. (Rutgers) *Assistant Professor of Health Evaluation Services*

The M.H.S. in Public Health Preparedness is designed to provide both science and nonscience post-baccalaureate students with broad training in public health preparedness as it relates to issues surrounding homeland security. The curriculum will be delivered in a distance education format to accommodate the needs and careers of professionals who are already working in or wish to transition into the field of homeland security. The program's target audience may include federal, state, and local public health officials, public affairs administrators, emergency management professionals, health care professionals, first responders, criminal justice and law enforcement personnel, military staff, and members of corporate security.

Graduates of the program will have a fundamental understanding of disaster communication, the principles of hazard analysis and incident management with respect to chemical, biological, radiological, and nuclear incidents, disaster planning and coordination, agricultural safety and security, critical infrastructure protection, and the political, legal, psychological and social aspects of terrorism.

Admission Requirements

The objective of the admissions process is to identify and admit qualified graduate students who have the capacity, motivation and intellect to protect and serve local, state, and national interests with respect to the occurrence of or threat of a natural disaster or terrorist attack.

Qualified candidates will have a baccalaureate degree from a regionally accredited institution and are expected to have a 3.0 or higher undergraduate grade point average on a 4.0 scale. Scores on the General Test of the Graduate Record Examination (GRE) are generally required for all applicants. GRE requirements may be waived in selected cases for those with advanced degrees who have demonstrated the ability to perform graduate level work and have submitted scores for consideration on comparable standardized tests, such as the GMAT, MCAT, or LSAT. A statement of professional experience and goals (up to 500 words) and the candidate's CV must accompany the application. Three letters of recommendation that attest to the applicant's readiness for graduate study are also required.

Applicants whose native language is not English must provide evidence of proficiency in English with a minimum TOEFL score of 550 (paper-based test) or 220 (computer-based test). Special backgrounds, abilities, and interests related to homeland security are desirable. Students will be required to possess a suitably configured personal computer and Internet connections.

Transfer Credit

A maximum of 10 credits of high-quality graduate work done at a regionally accredited institution may be applied toward the requirements for the master's degree. However, credits earned to complete a previous master's degree, whether at Penn State or elsewhere, may not be applied to a second master's degree program at Penn State. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser, the program head or graduate officer, and the Graduate School. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School of Penn State, must be of at least B quality (grades of B- are not transferable), and must appear on an official graduate transcript of an accredited university. Pass-fail grades are not transferable to an advanced degree program unless the "Pass" can be substantiated by the former institution as having at least B quality.

Funding Sources

World Campus students who are enrolled in a degree program and meet all other federal student aid eligibility requirements may be eligible for federal aid programs. Students must complete the Free Application for Federal Student Aid (FAFSA) to be considered for student aid.

Other Financing Options

- **Tuition Assistance Programs:** Students should check with their employer on the availability of tuition assistance programs to help cover graduate school costs.
- **Veterans Programs:** Veterans enrolled in degree programs may be eligible for reimbursement when they successfully complete a World Campus course. Students should contact their local Office of Veterans Programs, or Penn State's Office of Veteran's Programs.
- **Alternative Loans:** World Campus students who need to explore additional financing options are encouraged to review the following private educational lenders:
  - Citiassist
  - TERI Continuing Education Loans--for World Campus students who are non-degree or taking continuing education units

(CEUs)

- **World Campus Student Fund:** This scholarship is funded annually by World Campus staff members and students who understand that financial aid is not always available to distance learners--and when it is, the eligibility requirements are often difficult to meet. All scholarship monies awarded will be deposited directly into the recipients' student accounts at Penn State.
- **Trustee Scholarship Program:** Eligible students demonstrating financial need as determined by the Free Application for Federal Student Aid (FAFSA) will be contacted.

Degree Requirements

To be awarded a Master of Homeland Security degree in Public Health Preparedness, the student must successfully earn a total of 30 credit hours, of which at least 18 must be in 500-level courses. Students are expected to maintain a B (3.0) or better average in academic courses to be retained in the program. Each candidate must complete a project report on a topic related to public health preparedness in homeland security.

Faculty Advisers

All graduate students will be assigned a faculty adviser to encourage and mentor students in their educational pursuits, and to provide students with advice on research projects and career opportunities. Interactive communication is available through telephone sessions and video conferencing. On-site campus visits are encouraged, but not required.

Library Resources

The Penn State University Libraries provide an extraordinary array of collections and services to students who participate in classes through the World Campus. Students will have a Penn State Access Account that will allow them to access the online catalog, databases, digital library projects, and the growing number of full-test resources. The Libraries are able to service requests to scan print documents and deliver PDF documents at no charge through the University network. Students can also utilize the "ASK" reference service, which allows students to seek assistance through phone, e-mail, or synchronous online chats. Materials not owned by Penn State can be obtained through Interlibrary Loan services. ILLIAD, a service available through the Libraries' Web site, allows students to make and track their interlibrary loan requests without the need for an intermediary. The Libraries also operate an Electronic Reserves service that allows faculty members to make electronic materials available to students enrolled in a particular course. Students are always welcome to contact one of the Libraries' subject specialists for personalized assistance with their information needs.

PRESCRIBED COURSES: 27 credits

HOMELAND SECURITY (HLS)
410. Public Health Preparedness for Disaster and Bioterrorism Emergencies I (3)
510. Public Health Preparedness for Disaster and Bioterrorism Emergencies II (3)
520. Agricultural Biosecurity (3)
527. Public Health Evaluation of Disasters and Bioterrorism (3)
530. Critical Infrastructure Protection of Health Care Delivery Systems (3)
553. Disaster Communication (3)
558. Disaster Psychology (3)
594. Research Project (3)

GEOSCIENCES (GEOSC)
402Y. Natural Disasters (3)

POLITICAL SCIENCE (PL SC)
439. The Politics of Terrorism (3)

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Eugene J. Lengerich, V.M.D. (Pennsylvania) Professor of Public Health Sciences
Duanping Liao, Ph.D. (North Carolina) Professor of Public Health Sciences
Jiangang (Jason) Liao, Ph.D. (Johns Hopkins) Professor of Public Health Sciences
Thomas A. Lloyd, Ph.D. (Harvard) Professor of Public Health Sciences; Chief, Epidemiology Division
David T. Mauger, Ph.D. (Michigan) Professor of Public Health Sciences; Chief, Biostatistics Division
Joshua Muscat, Ph.D. (NYU) Professor of Public Health Sciences
John Richie, Ph.D. (Louisville) Professor of Public Health Sciences
Michele L. Shaffer, Ph.D. (Penn State) Associate Professor of Public Health Sciences
Li Wang, PhD (Penn State) Assistant Professor of Public Health Sciences
Carol S. Weisman, Ph.D. (Johns Hopkins) Distinguished Professor of Public Health Sciences and OB/GYN
Robin Taylor Wilson, Ph.D. (Iowa) Assistant Professor of Public Health Sciences
Rongling Wu, Ph.D. (U Washington) Professor of Public Health Sciences and Statistics

The Master's Program in Public Health Sciences includes graduate-level course work in biostatistics, epidemiology, and health services research, and provides knowledge and insight required in health related research. Students learn population-based methods for planning, executing, analyzing, and disseminating research results, and methods for evaluating and improving health care practices.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*. Prospective applicants for this program should have at least a bachelor's degree in a biological, physical, or behavioral science. Please see the program Web page for specific program application requirements.

Master's Degree Requirements

Each student in Public Health Sciences is expected to acquire breadth of knowledge in the disciplines of Biostatistics, Epidemiology and Health Services Research, and skills in the areas of experimental design, data collection and quantitative analysis. The PHS Master of Science degree can lead to careers in a wide variety of fields and settings, including academic health centers; the health insurance industry; health services networks; local, state, and federal government agencies; and the pharmaceutical industry. Each student must complete at least 30 credits at the 500 level, including 3 research credits and 27 credits of formal course work. Each student must carry out a research project concluding with a manuscript suitable for publication.

Prescribed Courses: 16 credits

PHS 520(3), PHS 521(3), PHS 536(3), PHS 550(3), PHS 551(3), PHS 500(1)

Additional Courses: 11 credits

PHS 510(3), PHS 511(1), PHS 518(1), PHS 519(1), PHS 522(3), PHS 535(3), PHS 540(1), PHS 541(1), PHS 552(3), PHS 560(1), PHS 561(1), PHS 570(3), PHS 580(3), PHS 581(1)

Research Courses: 3 credits

PHS 594(3)

Courses in Health Policy and Administration (HPA) and Statistics (STAT) may be taken as elective courses and will be considered on an individual basis in consultation with the student's academic adviser.

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Quality and Manufacturing Management (QMM)

Program Home Page (Opens New Window)

RUSSELL BARTON, *Co-Director; Professor of Management Science and Information Systems*
ROBERT VOIGT, *Co-Director; Professor of Industrial and Manufacturing Engineering*
344 Leonhard Building
814-863-5802
qmm@psu.edu

Degree Conferred:

M.M.M.

Penn State's Master of Manufacturing Management (M.M.M.) degree is offered by the Quality and Manufacturing Management (QMM) program. The degree is conferred by both the College of Engineering and the Smeal College of Business. This interdisciplinary graduate program is designed to prepare students for careers in manufacturing, consulting, services, and operations. The program is offered on a full-time basis only and requires nine months of continuous study during a normal academic year. An appropriate internship experience is a precondition for entrance to the program if the applicant does not have sufficient work experience to waive the internship requirement. Students take 32 credits of work in eleven core courses.

The program develops future executives who possess in-depth, relevant manufacturing knowledge bridging engineering and management. Graduates are afforded a life-changing experience that provides them with a unique set of engineering, business, and quality skills combined with a suite of communication skills critical to management success. Students fuse Six Sigma certification with corporate social responsibility and emotional intelligence to become well-rounded leaders. MMM students develop business plans and analyze and predict corporate financial performance in a global marketplace. They emerge from Penn State as international leaders understanding the fundamentals of materials and processes and project confidence in product and manufacturing system design.

Admission Requirements

The program draws its students from two groups: practicing professionals from industry and individuals who have graduated from, or are currently enrolled in, a business administration, science, or engineering program. Applicants who expect to graduate with a B.S. in engineering, science, or business administration may apply for admission to the program in their senior year.

All applicants must submit scores from the GRE or the GMAT. International students must also submit TOEFL scores. However, the TOEFL requirement is waived for international students who have successfully completed undergraduate work in an American college or university. The average grade-point average is 3.0; the average GRE score is 1100 on the verbal and quantitative sections and 4.0 on the analytical section. The average GMAT score is 580.

All applicants must have taken the prerequisite mathematics, computer science, and statistics courses or equivalents **prior to** starting the program. Applicants **cannot** register until they have completed these courses. For a listing of the prerequisite courses, visit www.mmmdegree.psu.edu (Opens New Window)

Degree Requirements

The M.M.M. degree requires 32 credits of graduate work on a full-time basis. The courses are as follows: QMM 491 or QMM 492; QMM 552, QMM 561, QMM 562, QMM 581, QMM 582, QMM 593, QMM 851, QMM 871, QMM 872, and QMM 891.

In some instances, course changes are being considered and prospective students should consult with the M.M.M. degree program to determine what new requirements might be in effect. The program co-directors are authorized to make suitable substitutions in the above curriculum in consultation with the faculty steering committee.

Student Aid

A limited number of partial scholarships are available for students in the program.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

QUALITY AND MANUFACTURING MANAGEMENT (QMM) course list

Only students enrolled in the M.M.M. degree program may take the 500- and 800-level courses.

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- Christine Buzinde, Ph.D. (Illinois), Assistant Professor of Recreation, Park, and Tourism Management
- Linda L. Caldwell, Ph.D. (Maryland), Professor of Recreation, Park, and Tourism Management
- Garry Chick, Ph.D. (Pittsburgh), Professor of Recreation, Park, and Tourism Management
- John Dattilo, Ph.D. (Illinois) Professor of Recreation, Park, and Tourism Management
- Alan R. Graefe, Ph.D. (Texas A&M), Associate Professor of Recreation, Park, and Tourism Management
- Deborah L. Kerstetter, Ph.D. (Penn State), Associate Professor of Recreation, Park, and Tourism Management
- Duarte B. Morais, Ph.D. (Clemson), Assistant Professor of Recreation, Park, and Tourism Management
- Andrew J. Mowen, Ph.D. (Penn State), Assistant Professor of Recreation, Park, and Tourism Management
- George Vahoviak, Ph.D. (Penn State) Affiliate Associate Professor of Recreation, Park, and Tourism Management; Program Director, Shaver's Creek Center
- Careen Yarnal, Ph.D. (Penn State), Assistant Professor of Recreation, Park, and Tourism Management
- Harry C. Zinn, Ph.D. (Colorado), Associate Professor of Recreation, Park, and Tourism Management

The graduate program is designed to prepare students for administrative, supervisory, research, and teaching positions in public and private recreation and park systems, in colleges and universities, in voluntary agencies and institutions, and in commercial ventures.

The program is oriented to meet the specific needs and research interests of the candidate. Students may pursue interests in the community, including public park and recreation systems, voluntary agencies, and private commercial enterprises; tourism; institution and community-oriented therapeutic settings concerned with many different disabilities and utilizing a variety of activity modalities; park planning, resource management, interpretive services, outdoor education, and outdoor recreation services.

Admission Requirements

Scores from the Graduate Record Examination (GRE) are required for admission to the master's and doctoral programs. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

For admission to the graduate program, a bachelor's or master's degree is required. Candidates from majors other than recreation and parks are welcome to apply; however, additional course work is required. Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. All students must write a thesis.

There are no additional requirements beyond the general Graduate School requirements for the master's degree. Doctoral degree requirements include a 3.20 average for the master's degree work; understanding of a foreign culture; computer competency; and at least one year's experience in the recreation and parks field before completion of the degree.

Student Aid

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the *Graduate Bulletin.*

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Rural Sociology (R SOC)

Program Home Page (Opens New Window)

STEPHEN M. SMITH, *Head of the Department of Agricultural Economics and Rural Sociology*
103 Armsby Building
814-865-5461

Degrees Conferred:

Ph.D., M.S., M.Agr.

The Graduate Faculty

- Kathryn J. Brasier, Ph.D. (Wisconsin--Madison) Assistant Professor of Rural Sociology
- Gretchen T. Cornwell, Ph.D. (Penn State) Assistant Professor of Rural Sociology
- Leland L. Glenna, Ph.D. (Missouri) Assistant Professor of Rural Sociology, and Science, Technology, and Society
- Clare Hinrichs, Ph.D. (Cornell) Associate Professor of Rural Sociology
- Leif I. Jensen, Ph.D. (Wisconsin) Professor of Rural Sociology
- Albert E. Luloff, Ph.D. (Penn State) Professor of Rural Sociology
- Diane K. McLaughlin, Ph.D. (Penn State) Associate Professor of Rural Sociology
- Anouk Patel-Campillo, Ph.D. (Cornell) Assistant Professor of Rural Sociology
- Carolyn E. Sachs, Ph.D. (Kentucky) Professor of Rural Sociology
- Joan S. Thomson, Ph.D. (Wisconsin) Professor of Agricultural Communications
- James Van Horn, Ph.D. (Ohio State) Professor of Rural Sociology
- Fern K. Willits, Ph.D. (Penn State) Distinguished Professor of Rural Sociology

All degree programs emphasize a comprehensive understanding of the various facets of societal organization pertinent to the rural sector. While breadth is encouraged, areas of special interest and research include rural social change, community structure, population, rural community development, the structure of agriculture, natural resources, and the environment.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Prerequisites for the master's program include 3 credits in rural sociology or sociology, and additional credits in either field. If the entering student does not have these prerequisites, they must be made up at the University during the early part of the master's program.

Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Degree Requirements

All students are required to have training in sociological theory, statistics, and research methods.

There is no foreign language requirement for the Ph.D. degree; the student is expected to substitute such courses and instruction necessary to generate superior capabilities of inquiry into an analysis of basic and/or applied rural sociological problems.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Russian and Comparative Literature

B. RICHARD PAGE, *Associate Professor of German and Linguistics; Head, Department of Germanic and Slavic Languages and Literatures*
427 Burrowes Building
814-865-5481

CAROLINE D. ECKHARDT, *Head, Department of Comparative Literature*
427 Burrowes Building
814-863-0589

Degree Conferred:

M.A. in Russian and Comparative Literature

The Department of Germanic and Slavic Languages and Literatures and the Department of Comparative Literature offer a joint master's degree in Russian and Comparative Literature. The program enables students to concentrate in Russian literature at the graduate level while having the advantages of a comparative context. Students completing this M.A. will acquire an in-depth understanding of Russian literature and culture and will be proficient in Russian and one other foreign language. Graduates should be prepared for service with the U.S. government or an international corporation, or to continue graduate study either in Russian or comparative literature.

Admission Requirements

Requirements listed here are in addition to the general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*. Students with appropriate course backgrounds and a 3.00 junior/senior average (on a 4.00 scale) will be considered for admission. Scores from the Graduate Record Examination (GRE) are required. It is expected that students entering this degree program will have proficiency in Russian language and will have completed the B.A. in Russian or Comparative Literature. Students in other humanistic fields such as philosophy or history who have studied some literature and are proficient in Russian are welcome to apply.

Master's Degree Requirements

Candidates for the M.A. degree must earn a minimum of 33 credits of which at least 18 must be at the 500 level. Required courses in Russian include RUS 530 (Seminar in Nineteenth-Century Russian Literature), RUS 525 (Pushkin), and RUS 560 (History of the Russian Language) or RUS 542 (Seminar in Russian Literature in the Twentieth Century) plus an additional 6 credits. Required courses in comparative literature include CMLIT 501 plus an additional 12 credits in comparative literature. Also required are an additional 3 credits in Russian, comparative literature, or another approved area; passing of a proficiency examination in Russian; demonstration of reading knowledge of one other foreign language; and the completion of an acceptable M.A. paper.

Student Aid

A number of teaching assistantships are available in the Departments of Comparative Literature and Germanic and Slavic Languages and Literatures for students taking advanced degrees in these disciplines. There is also a graduate assistant position for an editorial assistant. See also the fellowships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*.

- Joseph L. French, Ed.D. (Nebraska) Professor Emeritus of Education
- Robert L. Hale, Ph.D. (Nebraska) Professor of Education
- Ronald A. Madle, Ph.D. (Penn State) Adjunct Associate Professor of Education
- Bonnie J. F. Meyer, Ph.D. (Cornell) Professor of Educational Psychology
- Barbara A. Schaefer, Ph.D. (Pennsylvania) Assistant Professor of Education
- Beverly Vandiver, Ph.D. (Ball State) Associate Professor of Education

This intercollege program is based primarily on courses in educational psychology, psychology, and special education. In addition, courses are often drawn from counselor education, human development and family studies, educational theory and policy, educational administration, and curriculum and instruction. The objective is to develop a psychologist capable of providing health care who is interested in and knowledgeable about education and psychology in the school setting. The school psychologist must utilize professional skill and knowledge about children and youth to make contributions that are meaningful to and utilized by teachers, other school personnel, and parents. The development of competencies needed by a fully qualified school psychologist requires at least the education represented by a doctoral degree.

Practicum facilities, in addition to those in nearby public schools, include the Center for Educational Diagnosis and Remediation, the School Psychology Clinic, the Communication Disorders Clinic, the Reading Center, and the Psychology Clinic. Facilities for work with children are also available through other academic units, as well as through assistantship assignments.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

Only those students who anticipate a doctoral degree will be admitted. Students are selected within the limitations of program facilities. Priority is given to applicants with work experience with children.

An undergraduate major emphasizing work in psychology and/or education is preferred, but students with fewer than 20 upper-division credits in psychology, educational psychology, or special education may be admitted with limited deficiencies to be fulfilled concurrently with their graduate work. Requirements for admission include a minimum of one-third of graduate credits of A quality; undergraduate GPA of B or higher; satisfactory recommendations from two or more professors, preferably psychologists; and a score of 1000 or higher on the two general sections or a score of 1500 or higher, including the analytical or an advanced test, of the Graduate Record Examination. Exceptions may be made for students with special backgrounds, abilities, and interests.

Master's Degree Requirements

Students entering the program with a bachelor's degree complete the M.S. as prescribed by the Graduate School.

Students qualifying for a certificate to practice in the schools must meet standards specified by the Pennsylvania Department of Education. These include, but are not limited to, a master's degree, about 60 graduate credits, practicum experiences, and successful completion of precertification tests.

Doctoral Degree Requirements

Students may be admitted with a master's degree from school psychology programs from other institutions or from related programs in this or other universities. The doctoral program includes a predissertation research requirement; the core program described here (which qualifies the candidate for a school psychology certificate); a special proficiency of 6 to 18 credits; an internship; and a dissertation.

Students completing the School Psychology Core Program will have courses in the biological bases of behavior, the cognitive bases of behavior, the social bases of behavior, personality theory or abnormal psychology, human development, professional ethics and standards, research design and methodology, statistics, psychometrics, counseling theory, educational foundations, educational administration, the education of exceptional children, and curriculum.

Other Relevant Information

The program has been accredited by the American Psychological Association, the National Commission for Accreditation in Teacher Education (NASP), and the Pennsylvania Department of Education.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of

the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

SCHOOL PSYCHOLOGY (S PSY) course list

DATE LAST REVIEWED BY GRADUATE SCHOOL: 4/12/04

Science/Business, Integrated Five-Year Program

Degree Conferred:

B.S./M.B.A. Degrees

This special program is a cooperative effort between the Eberly College of Science and the Smeal College of Business. The program will provide an opportunity for students to combine and accelerate an undergraduate program in the basic sciences with a graduate program in business administration. Students admitted to this program will have the opportunity to earn a B.S. degree in General Science from the Eberly College of Science and an M.B.A. in Business Administration from the Smeal College in a total of five years. The first three years of study will include courses that satisfy the undergraduate science and General Education components of the program, and the last two years will satisfy the graduate business components of the program.

Initial program admission decisions are made jointly by the Eberly College of Science and the Smeal College of Business. The decision to extend an invitation to join the program as an undergraduate is reached through a multi-step process. First, applicants meeting all program criteria will be initially reviewed. Then a limited number of top candidates will be selected for on campus interviews by representatives of the Eberly College of Science and the Smeal College of Business. Successful interviewees will be offered admission to the accelerated program.

During the third year of the program, students formally apply to the MBA program in the Smeal College of Business. Applications are reviewed against the same criteria used for all MBA applicants, including undergraduate record, GMAT scores and related work experience. Successful candidates will gain admission into the MBA program for their fourth year of study. Students will then earn their B.S. degree during the first year of M.B.A. course work, and earn their M.B.A. degree at the end of their second year of graduate study. In addition to the regular fall and spring semester course work, program students are expected to earn credit during summer session through Cooperative Education experiences and participate in the MBA internship program.

This program seeks to combine an undergraduate program with graduate study in a professional school, and it proposes to attract and select excellent students with defined career goals. It is important to note that students in this program will have completed at least 112 undergraduate credits before entering the MBA component of the program. They will satisfy all of Penn State's undergraduate General Education requirements and will complete the science course requirements that a General Science student with the General option does. The main elements that are different for students in the accelerated program as compared with regular four-year General Science major (General option) are that in the accelerated program students use elective credits for summer Co-op experiences and for 12 transfer credits from their first year of MBA studies. These 12 credits will be "double counted" on both the undergraduate and graduate transcripts. Accelerated students also will have an opportunity to take special "bridge" courses including 1- and 2-credit seminar classes that will focus on traversing the boundaries among science, technology, and business.

M.A., Ph.D.

The Graduate Faculty

- Duane Alwin, Ph.D. (Wisconsin) McCourtney Professor of Sociology, Demography, and Human Development and Family Studies
- Paul Amato, Ph.D. (James Cook, Australia) Professor of Sociology and Demography
- Roy L. Austin, Ph.D. (Washington) Associate Professor of Sociology and Justice
- Alan A. Block, Ph.D. (California, Los Angeles) Professor of Crime, Law, and Justice, and Jewish Studies
- Alan Booth, Ph.D. (Nebraska) Distinguished Professor Emeritus of Sociology, Human Development, and Demography
- Richard Bord, Ph.D. (Iowa) Professor Emeritus of Sociology
- Lori Burrington, Ph.D. (Ohio State) Assistant Professor of Crime, Law, and Justice
- Frank Clemente, Ph.D. (Tennessee) Professor of Sociology
- Stephen R. Couch, Ph.D. (SUNY) Professor of Sociology
- Gordon F. De Jong, Ph.D. (Kentucky) Distinguished Professor of Sociology and Demography; Director, Graduate Program in Demography
- Francis Dodoo, Ph.D. (Pennsylvania) Professor of Sociology and Demography
- James Eisenstein, Ph.D. (Yale) Professor Emeritus of Political Science and Crime, Law, and Justice
- Richard Felson, Ph.D. (Indiana) Professor of Crime, Law, and Justice, and Sociology
- Roger Finke, Ph.D. (Washington) Professor of Sociology and Religious Studies
- Glenn Firebaugh, Ph.D. (Indiana) Professor of Sociology and Demography
- Michelle Frisco, Ph.D. (Texas) Assistant Professor of Sociology and Demography
- Emily Greenman, Ph.D. (Michigan) Assistant Professor of Sociology
- Melissa Hardy, Ph.D. (Indiana) Distinguished Professor of Human Development and Family Studies, Sociology, and Demography
- Michael Hecht, Ph.D. (Illinois) Distinguished Professor of Speech Communication, and Crime, Law, and Justice
- Julie Horney, P{h.D. (California, San Diego) Professor of Crime, Law, and Justice; Graduate Officer
- Craig Humphrey, Ph.D. (Brown) Professor Emeritus of Sociology
- John Iceland, Ph.D. (Brown) Professor of Sociology and Demography
- David R. Johnson, Ph.D. (Vanderbilt) Professor of Sociology, and Human Development and Family Studies; Director, Survey Research Center
- Kurt Johnson, Ph.D. (Nebraska) Research Associate, Social Science Research Institute
- Michael P. Johnson, Ph.D. (Michigan) Professor Emeritus of Sociology, Women's Studies, and African and African American Studies
- Valarie King, Ph.D. (Pennsylvania) Associate Professor of Sociology, Demography, and Human Development and Family Studies
- John H. Kramer, Ph.D. (Iowa) Professor of Sociology, and Crime, Law, and Justice
- Derek Kreager, Ph.D. (Washington) Assistant Professor of Crime, Law, and Justice
- Nancy S. Landale, Ph.D. (Washington) Professor of Sociology and Demography
- Barrett A. Lee, Ph.D. (Washington) Professor of Sociology and Demography
- Doris MacKenzie, Ph.D. (Penn State) Professor of Crime, Law, and Justice
- Molly Martin, Ph.D. (Wisconsin) Assistant Professor of Sociology and Demography
- Michael Massoglia, Ph.D. (Minnesota) Assistant Professor of Crime, Law, and Justice
- Jennifer Mastrofski, Ph.D. (Penn State) Associate Professor of Administration of Justice
- Stephen Matthews, Ph.D. (Wales) Associate Professor of Sociology, Anthropology, and Demography
- John D. McCarthy, Ph.D. (Oregon) Professor of Sociology
- Hart Nelsen, Ph.D. (Vanderblit) Professor Emeritus of Sociology
- R. Salvador Oropesa, Ph.D. (Washington) Professor of Sociology and Demography
- D. Wayne Osgood, Ph.D. (Colorado) Professor of Crime, Law, and Justice, and Sociology
- William Parsonage, Ph.D. (South Dakota) Professor Emeritus of Crime, Law, and Justice
- Evelyn Patterson, Ph.D. (Pennsylvania) Assistant Professor of Crime, Law, and Justice, Sociology, and Demography
- Roland Pellegrin, Ph.D. (North Carolina) Professor Emeritus of Sociology
- Eric Plutzer, Ph.D. (Washington-St. Louis) Associate Professor of Political Science and Sociology
- Suet-Ling Pong, Ph.D. (Chicago) Associate Professor of Education and Sociology
- Richard Ritti, Ph.D. (Cornell) Professor Emeritus of Crime, Law, and Justice
- R. Barry Ruback, Ph.D. (Pittsburgh) Professor of Crime, Law, and Justice, and Sociology
- Eric Silver, Ph.D. (SUNY, Albany) Associate Professor of Crime, Law, and Justice, and Sociology
- Graham B. Spanier, Ph.D. (Northwestern) Professor of Human Development, Sociology, and Family, and Community Medicine
- Jeremy Staff, Ph.D. (Minnesota) Assistant Professor of Crime, Law, and Justice, and Sociology
- Darrell J. Steffensmeier, Ph.D. (Iowa) Professor of Sociology and Crime, Law, and Justice
- C. Shannon Stokes, Ph.D. (Kentucky) Professor of Rural Sociology, Sociology, and Demography
- Marylee C. Taylor, Ph.D. (Harvard) Associate Professor of Sociology
- George Theodorson, Ph.D. (Cornell) Professor Emeritus of Sociology
- Kevin J. A. Thomas, Ph.D., (Pennsylvania) Assistant Professor of African and African American Studies, Sociology, and Demography
- Jenny Trinitapoli (Texas) Assistant Professor of Sociology, Demography, and Religious Studies)
- Jeffery T. Ulmer, Ph.D. (Penn State) Associate Professor of Crime, Law, and Justice, and Sociology
- Jennifer Van Hook, Ph.D. (Texas) Associate Professor of Sociology and Demography
- Edward Walsh, Ph.D. (Michigan) Professor Emeritus of Crime, Law, and Justice
- Susan Welch, Ph.D. (Illinois) Professor of Political Science and Crime, Law, and Justice

The graduate program in Sociology offers advanced education for students who intend to pursue academic careers in sociology or who aspire to nonacademic research positions.

The M.A. and Ph.D. programs provide training in general social theory, research methodology, statistics, and a number of traditional and developing substantive specialties. In consultation with faculty advisers, students select two specialties that are among the department's

strengths, such as classical and contemporary theory; community and environment; demography; family, life course, and aging; quantitative methods; social psychology; and stratification and social change.

Alternate specialty areas not listed above may be selected as the major or the minor, with the approval of the graduate committee. Students may elect to pursue a dual-title degree in Sociology and Demography. For details, refer to the Demography program description. A separate Ph.D. program in Crime, Law, and Justice is also housed within the department. Please see the CLJ program description for details.

All students who intend to pursue doctoral work are expected to earn an M.A. degree in their normal progress to the Ph.D.

Course work outside the department is encouraged. Areas of study related to sociology, such as rural sociology, geography, economics, business administration, statistics, cultural anthropology, political science, and human development and family studies are available at the University.

Special department-related research and training facilities include on-site computer laboratories and the Social Science Research Center, the Population Research Institute, the Center for Research on Crime and Justice, and the Pennsylvania Commission on Sentencing. Additional University facilities used by sociology faculty and graduate students include the Computation Center (containing information about the extensive databases provided through the Inter-University Consortium for Political and Social Research) and the Gerontology Center.

Admission Requirements

Applications will be accepted through January 1 for fall admission the following year. Selection is based on undergraduate grades (and where applicable, record of previous graduate work); letters of recommendation; statement of purpose; a sample of written work, such as a term paper; and Graduate Record ExaminationS (GRE) verbal and quantitative scores. The best-qualified applicants will be accepted up to the number of spaces available. Students with limited prior training in sociology may be accepted, with the provision that they make up background deficiencies in the early part of their graduate program.

Degree Requirements

Required courses for the M.A. include a two-semester proseminar, one seminar each in research methods and social theory, and two seminars in social statistics. Students complete an M.A. thesis during their second year of the program.

A candidacy examination is required of all students seeking the Ph.D. This evaluation by the departmental Graduate Committee is based on the student's seminar papers, research proposal, and record of course performance and on faculty assessments of the student's ability to complete a high-quality Ph.D. program. For those admitted to the Ph.D. candidacy, a lab in teaching sociology is required, along with substantive courses in the student's major and minor areas of concentration. A comprehensive examination must be passed before the period of intensive dissertation research begins.

The Department of Sociology has no formal foreign language or communication requirement. However, students are encouraged to pursue additional training in statistics, computer science, foreign language, technical writing, specialized methods, or specialized theory that will further dissertation and career plans.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, teaching assistantships support many students admitted to the program. Research assistantships also are available to qualified students through individual faculty members' grants and contracts. A number of federal agencies also offer fellowships for graduate study in sociology.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

JAMES A. NEMES, *Professor and Division Head, Engineering*
School of Graduate Professional Studies
Penn State Great Valley
30 East Swedesford Road
Malvern, PA 19355-1443
610-648-3335
gvengin@psu.edu

The Graduate Faculty

- Adrian Barb, Ph.D. (University of Missouri) *Assistant Professor of Information Science*
- Joanna Defranco, Ph.D. (New Jersey Institute of Technology) *Assistant Professor of Information Science*
- Nil H. Ergin, Ph.D. (University of Missouri-Rolla), *Assistant Professor of Systems Engineering*
- Kathryn Jablokow, Ph.D. (Ohio State) *Associate Professor of Mechanical Engineering*
- Phillip A. Laplante, Ph.D. (Stevens Institute of Tech) P.E. *Associate Professor of Software Engineering*
- John I. McCool, Ph.D. (Temple) *Distinguished Professor of Industrial and Manufacturing Engineering*
- Colin J. Neill, Ph.D. (Wales) *Associate Division Head and Professor of Software Engineering*
- James A. Nemes, D.Sc. (George Washington University) *Professor and Division Head*
- Michael J. Piovoso, Ph.D. (Delaware) *Professor of Electrical Engineering*
- Robin G. Qui, Ph.D. (Penn State) *Associate Professor of Information Science*
- David W. Russell, Ph.D. (CNAA, London) *Professor of Electrical Engineering*
- Raghvinder Sangwan, Ph.D. (Temple) *Associate Professor of Software Engineering*
- Kailasam Satyamurthy, Ph.D. (Clemson) *Assistant Professor of Engineering and Management*

This professional master's degree program, available at Penn State Great Valley, focuses on various aspects of software engineering. The primary goal of the program is to prepare students to develop the next generation of software products and services for consumers, industry, and government. The curriculum includes comprehensive, intensive coverage of modern software concepts and techniques, and emphasizes a holistic approach, encompassing financial, legal, and presales issues; technical concepts; software design techniques; methods; and project management.

The program is constituted by four, 9-credit modules of study. Each module is designed for in-depth coverage of a specific area of study (e.g., modem software methods, algorithms, information science). Two of the modules are required; one centers on professional, skill-based topics such as software project management or business communications, and includes the option to select a professional paper or the advanced software studio. The second required module comprises 9 credits of advanced software engineering course work. Graduate instruction is under the direction of a faculty committee.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

The Master of Software Engineering (M SE) program is designed for students with technical backgrounds. Admission will be granted if the applicant has the necessary program prerequisites and a faculty member in the student's interest area agrees to serve as adviser. Candidates lacking in a modem programming language can meet that requirement by scheduling the 400-level software engineering studio. Scores from the Graduate Record Examinations (GRE) are not an entrance requirement unless the applicant has a junior/senior grade-point average below 3.00 (on a 4.00 scale).

Students with a 3.00 junior/senior average in an appropriate technical degree program will be considered for admission. The best-qualified applicants will be accepted. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Entering graduate students for whom English is not their first language are required to have a score of at least 550 on the TOEFL (Test of English as a Foreign Language).

Program Requirements

All candidates must complete two required 9-credit core modules, for a total core curriculum of 18 credits, and two other 9-credit modules. At least 15 credits of selected courses must be at the 500 level.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S.

The Graduate Faculty

- Douglas B. Beegle, Ph.D. (Penn State) Professor of Agronomy
- Mary Ann Bruns, Ph.D. (Michigan) Assistant Professor of Soil Microbial Ecology
- Ray B. Bryant, Ph.D. (Purdue) Adjunct Professor of Soil Science
- Edward J. Ciolkosz, Ph.D. (Wisconsin) Professor of Soil Genesis and Morphology
- Rick L. Day, Ph.D. (Penn State) Associate Professor of Science and Environmental Information Systems
- Jerzy Dec, Ph.D. (Warsaw, Poland) Research Associate
- Curtis J. Dell, Ph.D. (Kent State) Adjunct Assistant Professor of Soil Science
- Sjoerd W. Duiker, Ph.D. (Ohio State) Associate Professor of Soil Management and Applied Soil Physics
- William E. Easterling, Ph.D. (UNC, Chapel Hill) Professor of Geography and Agronomy
- Daniel D. Fritton, Ph.D. (Iowa State) Professor of Soil Physics
- Peter J. A. Kleinman, Ph.D. (Cornell) Adjunct Assistant Professor of Soil Science
- Sridhar Komarneni, Ph.D. (Wisconsin) Professor of Clay Mineralogy
- Hangsheng Lin, Ph.D. (Texas A&M) Associate Professor of Hydropedology/Soil Hydrology
- Carmen Enid Martinez, Ph.D. (Rutgers) Assistant Professor of Environmental Soil Chemistry
- Andrew S. McNitt, Ph.D. (Penn State) Assistant Professor of Turfgrass Science
- Gary W. Petersen, Ph.D. (Wisconsin) Distinguished Professor of Soil and Land Resources
- Andrew S. Rogowski, Ph.D. (Iowa State) Adjunct Professor of Soil Physics
- Maxim J. Schlossberg, Ph.D. (Georgia) Assistant Professor of Turfgrass Nutrition and Soil Fertility
- Andrew N. Sharpley, Ph.D. (Massey, New Zealand) Adjunct Professor of Soil Science
- Richard C. Stehouwer, Ph.D. (Ohio State) Assistant Professor of Environmental Soil Science
- David M. Sylvia, Ph.D. (Cornell) Professor of Soil Microbiology
- John E. (Jack) Watson, Ph.D. (Arizona) Professor of Soil Science
- Ann M. Wolf, Ph.D. (Penn State) Affiliate Assistant Professor of Soil Science

The Soil Science program is administered in the Department of Crop and Soil Sciences, College of Agricultural Sciences. Each student will be associated with an adviser who may provide financial support, research facilities, and/or office space. Applicants are encouraged to explore, study, and research opportunities by contacting faculty who may be prospective advisers.

This program provides opportunities for candidates interested in soil and related water resources to become a professional leader and an independent scholar. Faculty in this program are competent to prepare candidates in the subfields of Soil Science including: soil genesis, soil classification, soil morphology, soil mapping, soil physics, soil chemistry, soil mineralogy, soil microbiology, soil fertility, soil conservation, geographic information systems, computer mapping, watershed analysis, soil hydrology, soil and water management, resource inventory and assessment, remote sensing, land evaluation, land waste disposal, and land management.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination, are required for admission. At the discretion of the graduate standards committee, a student may be admitted provisionally for graduate study in the program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

Prerequisites for major work in Soil Science vary with the area of specialization and the degree sought, but courses in chemistry, mathematics, physics, geology, basic and applied biological sciences, and English communication skills are required. Applicants for the M.S. degree should have a baccalaureate degree including 76 credits of basic and applied natural sciences. Admission to the Ph.D. program usually requires an M.S. or equivalent degree with a minimum cumulative grade-point average of 3.25 (on a 4.00 scale). Applicants for the Ph.D. program will be evaluated on the quality of work completed in all previous degree programs. Students who lack some of the prerequisite courses may be admitted but are required to take these courses without degree credit. The best-qualified applicants will be accepted up to the number of spaces available for new students.

Master's Degree Requirements

In addition to the general requirements for the M.S. degree as defined by the Graduate School, the department requires 12 credits of 400- or 500-level formal courses in the major field of which 6 must be 500-level. Participation in at least one colloquium course each semester is required and students must complete at least 1 credit of colloquium (SOILS 590), as well as 1 credit of Teaching Experience (SOILS 602). An advisory committee will be appointed for each student and additional courses and requirements may be determined by this advisory committee.

A thesis based on field or laboratory research is required for the M.S. degree. M.S. candidates must pass a final examination.

Doctoral Degree Requirements

Beyond the general requirements for the Ph.D. defined by the Graduate School, the department has a number of specific requirements regarding course level and distribution that are defined in the departmental publication "Graduate Degrees in Soil Science." While a

minimum number of courses for the degree is not specified, the doctoral advisory committee has the responsibility of specifying courses and credits essential for the education and development of the candidate. Students are expected to be educated in depth in a specific subfield of Soil Science and to have a perspective of the general field. Normally, 55 to 60 credits in formal course work beyond the B.S. degree are required.

Doctoral candidates are required to participate regularly in a departmental colloquium and to register for at least 2 credits of Colloquium (SOILS 590) during the Ph.D. program. A teaching experiecne, consisting of two separate semesters, is also required of all Ph.D. students.

The communication and foreign language requirement for the Ph.D. degree may be met either by demonstrating a knowledge of at least one foreign language or by completing at least 6 credits of course work in an area of English communications approved by the student's advisory committee.

Graduate students with research and educational interests in biogeochemistry may apply to the Biogeochemistry Dual-Title Degree Program. Students in the Biogeochemistry Dual Title program are required to have two advisers from separate disciplines: one individual serving as a primary adviser in their major degree program and a secondary adviser in an area within a field covered by the dual-title program and a member of the Biogeochemistry faculty. Additional coursework from an approved list of courses is required. All students must pass a candidacy examination that includes an assessment of their potential in the field of biogeochemistry. A single candidacy examination that includes biogeochemistry will be administered for admission into the student's Ph.D. program, as well as the biogeochemistry dual-title. The structure and timing of this exam will be determined jointly by the dual-title and major program. The student's doctoral committee should include faculty from the major program of study and also faculty with expertise in biogeochemistry. The field of biogeochemistry should be integrated into the comprehensive examination. A Ph.D. dissertation that contributes fundamentally to the field of biogeochemistry is required.

Other Relevant Information

Every student has a close professional relationship with his or her faculty adviser. While research that is done for the thesis will be on subjects that fall within the ongoing research program of the adviser, students are encouraged to propose research projects that are of interest to them. For the most part, all costs relative to the research program will be covered by the department. The department encourages professional development of students through participation in meetings of relevant professional societies and organizations.

Student Aid

Graduate assistantships and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin.*

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- Sherry Roush, Ph.D. (Yale) Associate Professor of Italian
- Nuria Sagarra, Ph.D. (Illinois) Assistant Professor of Spanish and Applied Linguistics
- Maria R. Truglio, Ph.D. (Yale) Associate Professor of Italian

The program offers M.A. options in literature and linguistics, as well as doctoral emphasis in either of these two areas.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required of all students educated (high school and college) in the continental United States. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Graduate Bulletin*.

The minimum requirement for admission normally will be 24 credits of postintermediate work in Spanish language and literature.

Students with a 3.00 junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests.

Degree Requirements

A candidate for the M.A. degree must take a minimum of 30 credits at the graduate level including 6 credits in a related minor field. An M.A. essay and a comprehensive written examination also are required. The M.A. degree (or equivalent) is normally a prerequisite to doctoral candidacy.

For the Ph.D. degree, a student must complete at least 60 credits (including M.A. credits) of graduate-level work, including a 15-credit minor. Other requirements include (1) a doctoral candidacy examination and written area examinations; (2) reading knowledge of two foreign languages or a comprehensive knowledge of one foreign language; and (3) a doctoral dissertation.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following awards typically have been available to graduate students in this program:

The department awards annually an Edwin Erle Sparks Fellowship in the Humanities. In the past several years, graduate students have received external NSF fellowships and awards such as Doctoral Dissertation Research Improvement grants.

Courses

*SPAN 001G. ELEMENTARY SPANISH FOR GRADUATE STUDENTS (3)
*SPAN 002G. ELEMENTARY SPANISH FOR GRADUATE STUDENTS (3)

*No graduate credit given for this course.

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

Ph.D., M.S., M.Ed. (Penn State University Park) M.S., M.Ed. (Penn State Great Valley)

The Graduate Faculty

- Sean Casey, Ph.D. (Iowa) Assistant Professor of Education
- Thomas Farmer, Ph.D. (North Carolina) Associate Professor of Special Education
- Charles A. Hughes, Ph.D. (Florida) Professor of Special Education
- Richard M. Kubina, Jr., Ph.D. (Ohio State) Associate Professor of Education
- David Lee, Ph.D. (Purdue) Associate Professor of Special Education
- Linda Mason, Ph.D. (Maryland) Associate Professor of Special Education
- James K. McAfee, Ph.D. (Georgia State) Associate Professor of Special Education
- David McNaughton, Ph.D. (Penn State) Professor of Education
- Paul Morgan, Ph.D. (Vanderbilt) Assistant Professor of Education
- Kathy L. Ruhl, Ph.D. (Florida) Professor of Special Education
- Frank Rusch, Ph.D. (Washington U) Professor of Special Education
- Mary Catherine Scheeler, Ph.D. (Penn State) Associate Professor of Education
- Gerald L. Shook, Ph.D. (Western Michigan) Adjunct Associate Professor of Education
- Pamela S. Wolfe, Ph.D. (Virginia) Associate Professor of Special Education

Exceptional children are those who deviate so far from average in physical, intellectual, emotional, or social characteristics that they require highly specialized instruction and related services. The purpose of the M.Ed. program in Special Education is to prepare teachers of exceptional children. M.Ed. students are trained in behavior management and instructional design, implementation, and evaluation appropriate for effective work with children and youth who qualify for services for mental or physical disabilities at all age levels and degrees of severity. The purpose of the M.S. and Ph.D. programs is to prepare researchers and college and university teachers in areas encompassing the education of the children and youth who qualify for services for mental or physical disabilities. The former program is professional in nature; the latter two, academic.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) (verbal and quantitative) are required for admission. At the discretion of a graduate program, a student may be admitted provisionally for graduate study in a program without these scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Highest admission priorities are given to applicants who possess certification in special education or elementary education. Applicants for master's and doctoral programs must present evidence of superior academic achievement, complete a personal statement, present GRE verbal and quantitative test scores, and provide professional references. Minimum GPA for master's and doctoral applicants are, respectively, 3.00 for M.Ed. and M.S., and 3.50 for Ph.D. Minimum GRE test scores of master's and doctoral applicants, respectively, are (verbal and quantitative combined): 800 for M.Ed., 900 for M.S., and 1000 for Ph.D. Applicants for doctoral study must have had at least three years of relevant experience with special-needs children or youth. Applicants from foreign countries whose first language is not English must submit TOEFL (Test of English as a Foreign Language) scores. Exceptions to the admissions criteria may be made only for highly qualified students with special backgrounds, abilities, and interests.

Master's Degree Requirements

Prerequisites for the M.Ed. program include 26 credits basic to the education of exceptional children (courses comparable to SPLED 401, SPLED 425, SPLED 454, and SPLED 495E). Of the 30 credits required for the M.Ed. degree, 6 must be taken from fields outside of special education; at least 18 must be taken in special education; and 18 credits must be taken at the 500 level. SPLED 411, SPLED 412, and SPLED 573 are required along with two practica: SPLED 595A and SPLED 595B. M.Ed. students must submit a master's paper. M.Ed. students must submit a master's paper and meet all of the eligibility criteria for Pennsylvania certification at the completion of their programs.

Of the 30 credits required for the M.S. degree, 6 must be taken from one discipline outside of education; 18 must be taken in special education; and 18 must be taken at the 500 level or above. SPLED 573 and EDPSY 400 are required as are 6 credits of thesis research, SPLED 600. M.S. students must submit a master's thesis and pass a comprehensive examination.

All requirements for either the M.Ed. or the M.S. degree, whether satisfied on the University Park campus or elsewhere, must be met within six years or a period spanning seven consecutive summers.

Doctoral Degree Requirements

The communication and foreign language requirement for the Ph.D. degree is prescribed by each student's committee. The requirements include the successful completion of a philosophy of science course (e.g., PHIL 421) and additional language and communication abilities such as foreign language competence, computer programming skills, expertise with alternative communication systems, research publication, etc. Minimum requirements for the Ph.D. degree include 24 credits of research methods; 18 credits in a cognate area such as psychology, sociology, or child development; and 36 credits in education. The student also must enroll in SPLED 500 each semester prior to successful completion of the comprehensive examinations. A candidacy examination is required no later than the second semester of full-time study; written and oral comprehensive examinations are required following the satisfactory completion of the language

requirement. A student is required to complete the program within seven years from the date of acceptance as a candidate.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following award typically has been available to graduate students in this program:

U.S. OFFICE OF EDUCATION ASSISTANTSHIPS OR TRAINEESHIPS IN SPECIAL EDUCATION. Open to graduate students being prepared as leadership personnel in special education; stipend varies, depending on conditions of existing grants. Other graduate assistantships also may be available. Apply to the Graduate Admissions Committee, 227 CEDAR Building.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

814-865-1348

Degrees Conferred:

- M.A.S.
- M.S., M.A.
- Ph.D.
- Integrated B.S. in Statistics and Master of Applied Statistics (M.A.S.)

The Graduate Faculty

- Michael G. Akritas, Ph.D. (Wisconsin) Professor of Statistics
- Naomi S. Altman, Ph.D. (Stanford) Associate Professor of Statistics
- Charles E. Antle, Ph.D. (Oklahoma State) Professor Emeritus of Statistics
- Steven F. Arnold, Ph.D. (Stanford) Professor of Statistics
- Gutti Jogesh Babu, Ph.D. (ISI-Calcutta, India) Professor of Statistics
- Jesse L. Barlow, Ph.D. (Northwestern) Professor of Computer Science and Engineering, and Statistics
- Ottar N. Bjørnstad, Ph.D. (Oslo, Norway) Professor of Biology, Entomology, and Statistics
- Marllyn T. Boswell, Ph.D. (California, Riverside) Associate Professor Emeritus of Statistics
- Francesca Chiaromonte, Ph.D. (Minnesota) Associate Professor of Statistics and Public Health Sciences
- Vernon M. Chinchilli, Ph.D. (North Carolina) Distinguished Professor of Biostatistics and Statistics
- Mosuk Chow, Ph.D. (Cornell) Associate Professor of Statistics; Senior Research Associate
- Linda M. Collins, Ph.D. (USC) Professor of Human Development and Family Studies, and Statistics
- Enrique del Castillo, Ph.D. (Arizona State) Associate Professor of Industrial Engineering and Statistics
- Manfred Denker, Ph.D. (Nürnberg) Professor of Statistics and Mathematics
- Duncan Fong, Ph.D. (Purdue) Professor of Marketing and Statistics
- John Fricks, Ph.D. (North Carolina) Assistant Professor of Statistics
- Debashis Ghosh, Ph.D. (Washington) Associate Professor of Statistics and Public Health Sciences
- Murali Haran, Ph.D. (Minnesota) Assistant Professor of Statistics
- William L. Harkness, Ph.D. (Michigan State) Professor Emeritus of Statistics
- Thomas P. Hettmansperger, Ph.D. (Iowa) Professor Emeritus of Statistics
- Robert A. Hultquist, Ph.D. (Oklahoma State) Professor Emeritus of Statistics
- David R. Hunter, Ph.D. (Michigan) Associate Professor of Statistics
- Bing Li, Ph.D. (Chicago) Professor of Statistics
- Jia Li, Ph.D. (Stanford) Associate Professor of Statistics and Computer Science and Engineering
- Runze Li, Ph.D. (North Carolina) Professor of Statistics
- John C. Liechty, Ph.D. (Cambridge) Associate Professor of Marketing and Statistics
- Dennis K. J. Lin, Ph.D. (Wisconsin) University Distinguished Professor of Statistics and Supply Chain Management
- Bruce G. Lindsay, Ph.D. (Washington) Willaman Professor of Statistics
- David T. Mauger, Ph.D. (Michigan) Associate Professor of Public Health Sciences and Statistics
- Ganapati P. Patil, Ph.D., D.Sc. (Michigan) Distinguished Professor Emeritus of Mathematical Statistics
- Calyampudi R. Rao, Sc.D. (Cambridge) Eberly Professor Emeritus of Statistics
- Donald St. P. Richards, Ph.D. (UWI) Professor of Statistics
- James L. Rosenberger, Ph.D. (Cornell) Professor of Statistics
- Thomas A. Ryan, Jr., Ph.D. (Cornell) Associate Professor Emeritus of Statistics
- Joseph L. Schafer, Ph.D. (Harvard) Associate Professor of Statistics
- Michele L. Shaffer, Ph.D. (Penn State) Associate Professor of Public Health Sciences and Statistics
- Damla Sentürk, Ph.D. (California, Davis) Assistant Professor of Statistics
- Durland L. Shumway, Ph.D. (Penn State) Assistant Professor of Statistics; Research Associate
- Laura B. Simon, Ph.D. (Penn State) Lecturer in Statistics
- Aleksandra B. Slavkovic, Ph.D. (Carnegie Mellon) Assistant Professor of Statistics
- Linda C. Strauss, Ph.D. (Penn State) Assistant Professor of Statistics; Research Associate
- Arkady A. Tempelman, D.Sc. (Vilnius, Lithuania) Professor of Statistics and Mathematics
- Rongling Wu, Ph.D. (U of Washington) Professor of Public Health Sciences and Statistics
- Fuqing Zhang, Ph.D. (North Carolina State) Professor of Meteorology and Statistics
- Yu Zhang, Ph.D. (Southern California) Assistant Professor of Statistics
- Zhibiao Zhao, Ph.D. (Chicago) Assistant Professor of Statistics

Graduate instruction and research opportunities are available in most areas of statistics and probability, including linear models, nonparametric statistics, robustness, statistical computing, analysis of count data, multivariate analysis, experimental design, reliability, stochastic processes and probability (applied and theoretical), distribution theory, statistical ecology, and biometrics.

Graduate students can gain practical experience in the application of statistical methodology through participation in the department's statistical consulting center and collaborative research activities. In addition, collaborative projects with other departments provide longer term experience and support for selected students. Most students gain valuable teaching experience by assisting in the teaching and grading of courses. In addition, Ph.D. candidates with proper qualifications can receive support for teaching undergraduate courses.

The Master of Applied Statistics (M.A.S.) program is a professional degree designed to provide training in statistics focused on developing data analysis skills, and exploration of all core areas of applied statistics, without going deeply into the mathematical statistics foundations. It aims to provide its graduates with broad knowledge in a wide range of statistical application areas.

The Doctor of Philosophy (Ph.D.), Master of Arts (M.A.), and Master of Science (M.S.) degrees in Statistics are designed for advanced studies in applied and theoretical statistics. Special emphases include biostatistics, statistical ecology, environmental statistics, genometrics, biometrics and statistical computation. The M.S. degree is appropriate preparation for the department's Ph.D. degree.

Admission Requirements

Scores from the Graduate Record Examinations (GRE), or from a comparable substitute examination accepted by a graduate program and authorized by the dean of the Graduate School, are required for admission. Entering graduate students in statistics for whom English is not the first language are required to take the TOEFL (Test of English as a Foreign Language) examination. The results of this examination must be received by the Department of Statistics at least six months prior to the requested date of admission to the Graduate School and must pass the PSU test of spoken English in the first year of the program. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 20 on the speaking section for the Internet-based test (iBT). Applicants with lower scores may be considered for provisional admission.

While applications from all students (including those who already have done graduate work) are reviewed, completion of a standard calculus sequence is regarded as a prerequisite. Students with a 3.00 or better junior/senior average (on a 4.00 scale) and with appropriate course backgrounds will be considered for admission. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Exceptions to the minimum 3.00 grade-point average may be made for students with special backgrounds, abilities, and interests. Students hoping to earn a Ph.D. in statistics may apply directly to the Ph.D. program without need for a master's degree.

Degree Requirements

Professional Master of Applied Statistics Requirements

For the M.A.S. degree, a minimum of 30 credits and a minimum grade-point average of 3.0 are required for graduation. Of the 30 credits, 24 must be courses from the Statistics department and 21 must be at the 500 level. The candidate must complete 6 credits in applied statistics (STAT 501, STAT 502), 6 credits in mathematical statistics (STAT 414, STAT 415) and 3 credits in statistical consulting (STAT 580-581). For all M.A.S. students, the Stat 581 course will have a comprehensive written project report required as part of the course, which serves as the culminating experience. To complete the remaining credit requirements, a candidate can select 9-15 credits from the following applied statistics courses: STAT 464, STAT 480, STAT 500, STAT 503, STAT 504, STAT 505, STAT 506, STAT 507, STAT 509, and STAT 510. In addition, students with suitable backgrounds may choose up to 6 credits from a departmental list of additional courses with approval from their adviser.

Master of Arts and Master of Science Degree Requirements

For the M.A. and M.S. degrees, a candidate must complete at least 30 credits, including at least 27 at the 500 or 600 level; 21 of the 27 500-level credits must be formal course work from the department of Statistics. A candidate must complete 6 credits in applied statistics (STAT 511, STAT 512), 6 credits in mathematical statistics (STAT 513, STAT 514), 3 credits in stochastic processes (STAT 515) and 3 credits in statistical consulting (STAT 580-581). The student must also pass a written master's qualifying examination taken at the end of the first year. Finally, an M.A. candidate must submit an acceptable master's paper to the department, and an M.S. candidate must submit a thesis.

Doctoral Degree Requirements

In addition to the course requirements for the M.A. and M.S. degrees given above, a Ph.D. candidate in Statistics must complete further courses in linear models (STAT 551), asymptotic tools (STAT 553), statistical inference (STAT 561), and advanced probability (STAT 517), as well as 15 credits of electives taken from STAT 518, STAT 544, STAT 545, STAT 552, STAT 562, STAT 564, STAT 565, and STAT 572, or other courses suggested by the Ph.D. committee and approved by the Graduate Studies Committee. The student also must pass a written Ph.D. qualifying exam, typically during the second year, and a comprehensive exam given at the end of the third year. The comprehensive exam will have a written component, whose content will be determined and administered by the student's Ph.D. graduate committee, and an oral component, which includes the presentation of a thesis research proposal. The candidate then must submit an acceptable Ph.D. thesis and defend it.

The Ph.D. in Statistics offers options in Biometrics, Biostatistics, Environmental Statistics, and Genometrics. The course and the examination requirements remain the same under these options, however, the candidate must take 15 credits from a list of courses identified by the option.

Minor in Statistics Requirements

The Department of Statistics has three possible options for a Graduate Minor in Statistics:

- **Option 1**: STAT/MATH 414-415 and at least three 500-level courses from the department.
- **Option 2**: Five or more courses totaling 15 credits at the 500-level from the department. Stat 464 may also count toward the 15 credits.
- **Option 3**: Four 500-level courses totaling 12 credits from the department and one additional course of 3 credits approved by the department head or graduate studies chairman.

Please note: STAT 500 will not be counted toward the Graduate Minor in Statistics under any option.

For all options, a 3.5 GPA is required in the courses to be counted toward the minor. Completion of one of the options listed above, with the specified grade-point average, and the signature on the Graduate Minor Program form (www.stat.psu.edu/grad/degrees/Minor/Graduate_Minor_Application_Form.pdf) constitutes approval of the Minor in Statistics. The candidate must indicate the wish to have a Graduate Minor in Statistics when the diploma card is filed and indicate the semester the Ph.D. degree is expected.

Other Relevant Information

Students in the Statistics program may elect the dual-title degree program option in Operations Research for the Ph.D. and M.S. degrees. (*See also* Operations Research.)

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*. GRE scores are required for consideration for assistantships.

Integrated B.S. in Statistics and Master of Applied Statistics (M.A.S.)

The Integrated Undergraduate-Graduate (IUG) degree with B.S. in Statistics and Master of Applied Statistics (M.A.S.) is designed to be completed in five years. This integrated degree will enable a select number of highly qualified and career-oriented students to obtain training in statistics focused on developing data analysis skills and exploration of core areas of applied statistics at the undergraduate and graduate levels. The M.A.S. degree is a professional master's degree that emphasizes applications and does not provide as much training in the mathematical and statistical theory. The degree prepares students with interests in mathematics, computation, and the quantitative aspects of science for careers in industry and government as statistical analyst. Research divisions in the pharmaceutical industry, quality control and quality engineering divisions in manufacturing companies, clinical research units, corporate planning and research units, and other data-intensive positions require persons with training in mathematics, computation, database management, and statistical analysis, which this program will provide.

Application Process

The number of openings in the integrated B.S./M.A.S. program is limited. Admission will be based on specific criteria and the recommendation of faculty. Applicants to the integrated program:

- Must be enrolled in the Statistics B.S. program.
- Must have completed at least 60 credits of the undergraduate degree program, including the two courses: STAT 414 and STAT 415 and the students must apply to the program prior to completing 110 credits.
- Must submit a transcript and a statement of purpose.
- Must present a departmental approved plan of study in the application process in consultation with the M.A.S. program director.
- Must be recommended by the chair of the department's undergraduate program committee.
- Must be accepted into the M.A.S. program in Statistics.

For the IUG B.S./M.A.S. degree, 120 credits are required for the B.S. and 30 credits for the M.A.S. The following twelve graduate-level credits (number of credits in parentheses) can apply to both B.S. and M.A.S. degrees; six of these are at the 500 level:

STATISTICS (STAT)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)

Assuming all requirements for the B.S. are completed, students in the program can complete the B.S. degree and not advance to the M.A.S. Degree if they desire.

Degree Requirements

IUG Statistics B.S. prescribed Statistics courses (25 credits)

STATISTICS (STAT)
220. Basic Statistics (3)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
416. Stochastic Modeling (3)
464. Applied Nonparametric Statistics (3)
470W. Problem Solving and Communication in Applied Statistics (3)
480. Introduction to Statistical Analysis System (SAS) (1)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)

Note that students in IUG Statistics B.S. take STAT 501 and STAT 502 instead of STAT 460 and STAT 462 for the regular Statistics B.S.

IUG Statistics M.A.S. requirement (30 credits)

STATISTICS (STAT)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)
580.** Statistical Consulting Practicum (2)
581.**Stastical Consulting Practicum II (1)

Electives (15 credits)
Select from STAT 503, STAT 504, STAT 505, STAT 506, STAT 507, STAT 509, STAT 510 and the departmental list of additional courses for the M.A.S program with the approval of the adviser.

**For all students in the M.A.S program, the STAT 581 courses will have a comprehensive written project report required as part of the course, which serves as the culminating experience.

Integrated B.A./B.S. in Mathematics and Master of Applied Statistics (M.A.S.)

The Integrated Undergraduate-Graduate (IUG) degree with B.A./B.S. in Mathematics and Master of Applied Statistics (M.A.S.) is designed to be completed in five years. This integrated degree will enable a select number of highly qualified and career oriented students to obtain training in statistics focused on developing data analysis skills, and exploration of core areas of applied statistics at the graduate levels in addition to an undergraduate degree in Mathematics. The M.A.S. degree is a professional masters degree that emphasizes applications. The degree prepares students with interests in mathematics, computation, and the quantitative aspects of science for careers in industry and government as statistical analysts. Research divisions in the pharmaceutical industry, quality control, and quality engineering divisions in manufacturing companies, clinical research units, corporate planning and research units, and other data intensive positions require persons with training in mathematics, computation, database management, and statistical analysis, which this program will provide.

Application Process

The number of openings in the integrated B.A./B.S. in Mathematics and M.A.S. program is limited. Admission will be based on specific criteria and the recommendation of faculty. Applicants to the integrated program:

- Must be enrolled in the Mathematics B.A./B.S. program.
- Must have completed at least 60 credits of the undergraduate degree program including the two courses: STAT 414 and STAT 415 and the students must apply to the integrated program prior to completing 110 credits.
- Must submit a transcript and a statement of purpose.
- Must present a departmental approved plan of study in the application process in consultation with the M.A.S. program director.
- Must be recommended by the chair of Mathematics Department's undergraduate program committee. Two additional recommendation letters must be sent to the M.A.S. admissions committee.
- Must submit the GRE to the M.A.S. admissions committee.
- Must apply to the M.A.S. program in Statistics.

For the IUG B.A./B.S. in Mathematics and M.A.S. degree, 120 credits are required for the B.A./B.S. and 30 credits for the M.A.S. The following twelve graduate level credits (number of credits in parentheses) can apply to both B.A./B.S. and M.A.S. degrees, six of these are at the 500 level:

STATISTICS (STAT)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)

Assuming all requirements for the B.A./B.S. in Mathematics are completed, students in the program can complete the B.A./B.S. degree and not advance to the M.A.S. degree if they desire.

Degree Requirements

IUG Math B.A./B.S. students must fulfill the Math B.A./B.S. requirement while counting these prescribed Statistics courses (15 credits)

STATISTICS (STAT)
220.* Basic Statistics (3)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)

IUG M.A.S. Requirements (30 credits)

STATISTICS (STAT)
414. Introduction to Probability Theory (3)
415. Introduction to Mathematical Statistics (3)
501. Regression Methods (3)
502. Analysis of Variance and Design of Experiments (3)
580. Statistical Consulting Practicum (2)
581.** Statistical Consulting Practicum II (1)

Electives: (15 credits)
Select from STAT 464, STAT 503, STAT 504, STAT 505, STAT 506, STAT 507, STAT 509, STAT 510 and the departmental list of additional courses for the M.A.S. program with the approval of the adviser.

For the IUG B.A./B.S. in Mathematics and M.A.S. degree, the four courses: STAT 414, STAT 415, STAT 501 and STAT 502 can apply to both the B.A./B.S. and M.A.S. degrees.

*Can be waived for students with an equivalent course, e.g., STAT 250 or STAT 301.

** For all students in the M.A.S. program, the STAT 581 course will have a comprehensive written project report required as part of the course, which serves as the culminating experience.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Degrees Conferred:

M.P.S., S.C.M.

The Graduate Faculty

- Stephen Brady Ph.D. (Penn State) Assistant Professor of Operations and Supply Chain Management
- Terrance A. Brown D.B.A. (Maryland) Associate Professor of Transportation and Marketing
- Gary L Gittings Ph.D. (Penn State) Instructor of Supply Chain Management
- Daniel Guide Ph.D. (Georgia) Associate Professor of Operations and Supply Chain Management
- Terry P. Harrison Ph.D. (Tennessee) Professor of Supply Chain and Information Systems
- Elena Katok (Penn State) Associate Professor of Supply Chain and Information Systems
- Robert A. Novack Ph.D. (Tennessee) Associate Professor of Supply chain Management
- Alan J. Stenger Ph.D. (Minnesota) Professor of Supply Chain Management
- Peter F. Swan Ph.D. (Penn State) Assistant Professor of Logistics and Operations Management
- Douglas J. Thomas Ph.D. (Georgia Tech) Associate Professor of Supply Chain Management
- Evelyn A. Thomchick Ph.D. (Clemson) Associate Professor of Supply Chain Management
- John E. Tyworth Ph.D. (Oregon) Professor of Supply Chain Management
- Richard Young Ph.D. (Penn State) Associate Professor of Supply Chain Management

The Master of Professional Studies in Supply Chain Management (MPS/SCM) is awarded to students who demonstrate mastery of the knowledge, problem-solving competencies, and leadership skills that are critical to leading business transformation through integrated supply chain planning and execution. The program emphasizes problem-based learning coupled with integrative, collaborative learning experiences to develop the requisite knowledge, skills, and abilities for effective supply chain management. Instruction is delivered on line and in a short course at an on- or off-campus location, so that working professionals will complete the degree as part-time students working largely or entirely, off campus.

Admission Requirements

Students applying to the professional MPS/SCM degree program must be admitted by both the MPS/SCM program and the Graduate School at The Pennsylvania State University. The Graduate School requires applicants to have earned a baccalaureate degree from a regionally accredited institution earned under residence and credit conditions substantially equivalent to those required by Penn State. Applicants whose first language is not English or who have received a baccalaureate or master's degree from an institution in which the language of instruction is not English must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) module and submit the results of that test with the application for admission. The TOEFL test is offered in different formats depending on location. A score of at least 600 on the paper-based TOEFL or 250 on the computer-based TOEFL must be attained. A minimum total score of 80, along with a minimum score of 23 on the speaking portion, is required for the Internet-based test (iBT). Information about the TOEFL can be obtained by writing to the Educational Testing Service, Box 6155, Princeton, NJ 08541-6155 or visiting their web site at www.toefl.org. Alternatively, a minimum composite score of 6.5 on the IELTS test is required for admission. Information about the IELTS can be obtained by contacting IELTS International, 100 East Corson Street, Suite 200, Pasadena, CA 91103 or visiting its Web site at www.ielts.org (Opens New Window).

Additionally, the graduate program in Supply Chain Management requires:

- A completed application for graduate study, including Graduate School application fee
- A current resume, along with a statement of professional experience and goals. This statement of approximately two pages must describe the applicant's professional goals, experience, and responsibilities. The statement must also indicate why the applicant is applying to the professional MPS/SCM program at Penn State
- One letter of recommendation relevant to the applicant's professional capabilities, such as preferably from the employee's immediate supervisor, which should address the applicant's readiness for graduate study
- Official transcripts from all completed graduate and undergraduate coursework
- An undergraduate GPA of at least 3.0, or grade average of "B": or better in graduate courses completed since the first bachelor's degree, with at least 6 credits of graduate courses completed to qualify under this option
- Official Graduate Management Admission Test scores reported directly from the testing center to Penn State

A committee consisting of three SC&IS Department faculty meet once annually to review applications and identify applicants qualified for admission. Admissions decisions are based on a review of a complete admission portfolio, including an application, the statement of professional experience and goals, a current resume, official transcripts from each undergraduate and graduate institution attended, the letter of recommendation, and GMAT scores. An applicant's credentials are compared to the standards set by other candidates in the current application pool. Approved applicants are admitted in time to enroll for the fall semester offerings that begin in early August.

Degree Requirements

Students earn the professional MPS/SCM degree by successfully completing 30 graduate credits in supply chain management courses and a high-quality professional paper as a culminating experience. All MPS/SCM credits must be earned in courses at the 500 level or above, including at least 6 credits at the 500 level. The professional paper demonstrates the student's ability to apply advanced supply chain management knowledge to a supply chain-related problem or situation in a way that makes a substantial contribution to the student's professional development. The program requires a cumulative grade point average of at least 3.00 and no course grade below a C. All requirements for the professional MPS/SCM degree, including acceptance of the professional paper, must be met within four years of admission to degree status. Students are expected to make continuous progress toward the degree. Leaves of absence, however, may be granted under exceptional circumstances on a case-by-case basis.

A maximum of 10 credits of high quality graduate work completed at other accredited institutions may be applied toward the requirements for the professional MPS/SCM degree. However, credits earned to complete a previously completed professional or academic post baccalaureate degree, whether at Penn State or elsewhere, may not be applied to a second post baccalaureate degree program at Penn State. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser or program and the Graduate School. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School, must be of at least B quality (grades of B- are not transferable), and must appear on an official graduate transcript of an accredited university.

Prescribed Courses

SUPPLY CHAIN MANAGEMENT (SCM)
530. Supply Chain Analysis (3)
594. Research Topics (3)
800. Supply Chain Management (4)
810. Transportation and Distribution (4)
820. Strategic Procurement (4)
840. Supply Chain Project Management (4)
850. Supply Chain Design and Strategy (4)
860. Supply Chain Transformation and Innovation (4)

Student Aid

Fellowships, traineeships, graduate assistantships, and other forms of financial aid are described in the STUDENT AID section of the *Graduate Bulletin.*

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

M.Eng. in Systems Engineering

The Graduate Faculty

- Adrian Barb, Ph.D. (University of Missouri) *Assistant Professor of Information Science*
- Joanna Defranco, Ph.D. (New Jersey Institute of Technology) *Assistant Professor of Information Science*
- Nil H. Ergin, Ph.D. (University of Missouri-Rolla), *Assistant Professor of Systems Engineering*
- Kathryn Jablokow, Ph.D. (Ohio State) *Associate Professor of Mechanical Engineering*
- Phillip A. Laplante, Ph.D. (Stevens Institute of Tech) P.E. *Associate Professor of Software Engineering*
- John I. McCool, Ph.D. (Temple) *Distinguished Professor of Industrial and Manufacturing Engineering*
- Colin J. Neill, Ph.D. (Wales) *Associate Division Head and Professor of Software Engineering*
- James A. Nemes, D.Sc. (George Washington University) *Professor and Division Head*
- Michael J. Piovoso, Ph.D. (Delaware) *Professor of Electrical Engineering*
- Robin G. Qui, Ph.D. (Penn State) *Associate Professor of Information Science*
- David W. Russell, Ph.D. (CNAA, London) *Professor of Electrical Engineering*
- Raghvinder Sangwan, Ph.D. (Temple) *Associate Professor of Software Engineering*
- Kailasam Satyamurthy, Ph.D. (Clemson) *Assistant Professor of Engineering and Management*

This professional master's degree program, available at Penn State Great Valley, deals with the various aspects of systems engineering. The primary goal of the program is to prepare engineers to develop the next generation of engineering products, systems, and services for industry and government.

The curriculum integrates the traditional engineering disciplines in a synergistic manner. Course work includes four 9-credit modules of study with each module designed for in-depth coverage of a specific area of study (e.g., systems and control, robotics). Two of the four modules, the Skill-Based module and the Systems Engineering module, are required and constitute an 18-credit core. To complete the program, students choose an additional 18 credits of electives in two modules of professional interest. As part of the 18-credit core curriculum, students who are nearing the end of their program complete a capstone research experience. Graduate instruction is under the direction of an interdisciplinary faculty committee and the departments participating in the program. The graduate faculty consists of members who have teaching and research interests in the area of systems engineering. Maximum flexibility is maintained by the program in an effort to meet both the professional needs of the individual students and academic quality standards.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

The M.Eng. in Systems Engineering program is designed for students with backgrounds in science or engineering. Admission will be granted if the applicant has the necessary program prerequisites and a faculty member in the student's interest area agrees to serve as adviser. Normal admission requirements include mathematics through differential equations. Scores from the Graduate Record Examinations (GRE) are not an entrance requirement unless the junior/senior grade-point average is below 3.00 (on a 4.00 scale). There is no foreign language requirement.

Students with a 3.00 junior/senior GPA in an appropriate technical degree program will be considered for admission. The best-qualified applicants will be accepted. Exceptions to the minimum 3.00 GPA may be made for students with special backgrounds, abilities, and interests. Entering graduate students for whom English is not their first language are required to have a score of at least 550 (paper) or 213 (computer) on the Test of English as a Foreign Language (TOEFL).

Degree Requirements

All candidates must take two required 9-credit core modules for a total core curriculum of 18 credits and two other 9-credit elective modules. At least 15 credits of selected courses must be at the 500 level.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Teaching and Curriculum (T & C)

Program Home Page

DENISE G. MEISTER, *Coordinator of the Graduate Program in Teaching and Curriculum*
Penn State Harrisburg
Middletown, PA 17057
717-948-6213

Degree Conferred:

M.Ed.

The Master of Education in Teaching and Curriculum is designed to enhance the skills of teachers for public and private schools. The program focuses on three eseential components--curriculum, instruction, and assessment--that contribute to the organization's philosophy of learning. The Teaching and Curriculum program is unified by its vision of critical thinking, democracy, diversity, lifelong learning, nurturance, and scholarship. Courses are designed to reflect the standards of the National Council for Accreditation of Teacher Education (NCATE) and the National Board for Professional Teaching Standards (NBPTS). The program is offered at Penn State Harrisburg and other selected Penn State campuses.

Specifically, the goals of the program are to develop in students (1) the ability to communicate effectively either with school-age students and their parents or with co-workers and/or clients; (2) the ability to conduct an instructional program that provides a sound intellectual and emotional climate for learning; (3) competence in a variety of teaching methods and in the utilization of materials and content appropriate for an effective instructional program; (4) the ability to interpret and to evaluate educational literature and research; and (5) the ability to describe and to evaluate major issues and current trends in instructional curriculum practice and development.

Certification programs are also available in the areas of early childhood education, English as a second language, and principalship.

Admission Requirements

Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

The M.Ed. Program in Teaching and Curriculum has four important admission requirements.

First, candidates must have achieved an overall junior/senior grade point average of 3.00 or higher. For candidates applying for admission who have completed credits beyond the baccalaureate degree, we will evaluate the last (approximately) 60 credits completed.

Second, candidates must submit two letters of recommendation. These letters must be from former professors who can attest to the academic ability and potential of the candidate.

Third, candidates must submit a 200-300 word personal statement that addresses their career goals and reasons for pursuing a graduate degree.

Fourth, candidates must submit test scores from one of the following: Graduate Record Examination, Miller Analogies Test, or Praxis examinations completed for certification. In addition, the language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. The minimum composite score for the IELTS is 6.5. International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a masters degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States and Wales.

Retention

Candidates must maintain a minimum 3.00 grade point average in courses approved by the program, satisfactorily complete all required key assessments, attain a grade "C" or better in all required core courses. Candidates who do not make satisfactory progress will be notified in writing noting the specific deficiencies and requesting that they meet with the program coordinator to develop a remediation plan. Failure to meet or to satisfactorily complete the remediation plan will result in termination from the program.

In compliance with the National Council for the Accreditation of Teacher Education (NCATE) requirements, all persons enrolled in Teacher Education Programs at Penn State Harrisburg are expected to demonstrate the professional dispositions that are aligned with the unit's vision statement. The faculty shall evaluate the approved dispositions demonstrated by the candidates in class and during field experiences. Candidates may be rated as exemplary, acceptable, or unacceptable. Candidates are expected to attain acceptable or exemplary ratings in order to graduate.

Degree Requirements

The Master of Education degree in Teaching and Curriculum provides students with two alternatives to meet the required culminating or capstone experience : (1) course work with a master's project (EDUC 587) or (2) course work that includes a capstone course (EDUC 591). Students may complete the degree requirements for either of the two alternatives with the approval of their adviser.

A total of 30 credits must be completed: 18 credits in core courses and 12 credits in electives. At least 18 credits must be at the 500 level or higher. A minimum grade-point average of 3.00 for work done at the University and acceptable or higher ratings on the professional dispositions are required for graduation.

Prescribed Core Course Requirements (18 credits)

Learning Theory: EDUC 520(3)

Curriculum Development and Instructional Design: EDUC 506(3) or EDUC 403(3) (Early Childhood only)
Educational Assessment: EDUC 539(3) or EDUC 404(3) (Early Childhood only)
Educational Foundations: EDUC 505(3)
Educational Research Designs: EDUC 586(3)
Culminating Course: EDUC 587 Master's Project or EDUC 591 Education Seminar

Electives

Students are required to take up to 12-15 credits of elective course work. Students may take all of those credits in education or, with the approval of their adviser, select up to 9 credits of electives in a field other than education.

Options

Language Arts Option: The goal of the language arts option is to provide students an in depth understanding of how research in theory in the language arts are related to language acquisition and growth; the knowledge and skills necessary for conducting informal assessments in the language arts and required to implement a variety of instructional procedures for the language arts; and an awareness of the role that literature can have in an effective language arts program at any level.

Mathematics Education Option: The objective of the mathematics education option is to provide courses that will emphasize current research and curriculum shifts related to the teaching of mathematics in K - 12 classrooms. This option requires completion of four EDMTH courses (a total of 12 credits): EDMTH 441, 442, 443, 444 in addition to the other program requirements.

Transfer Credits

Subject to the limitations given below, a maximum of 10 credits of high-quality graduate work done at a regionally accredited institution may be applied toward the requirements for the master's degree. However, credits earned to complete a previous master's degree, whether at Penn State or elsewhere, may not be applied to a second master's degree program at Penn State. The student should distinguish carefully between the transferability of credit and its applicability in a particular degree program. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser, the program head or graduate officer, and the Graduate School. Transferred academic work must have been completed within five years prior to the date of the first degree registration at the Graduate School of Penn State, must be of at least B quality (grades of B- are not transferable), and must appear on an official graduate transcript of an accredited university. Pass-fail grades can be substantiated by the former institution as having at least B quality.

A maximum of 15 graduate credits taken as a nondegree student prior to admission to a graduate degree program may be applied to a graduate program, with departmental approval. The credits must have been earned within five years preceding entry into the degree program.

Forms for transfer of credit can be obtained from the Office of Graduate Enrollment Services, 114 Kern Building.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit courses below the 400 level in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

305 Sparks Building
814-865-7365

Degree Conferred:

M.A.

The Graduate Faculty

- Gabriela Appel-Lantolf, Ph.D. (Delaware) Senior Lecturer in German and Applied Linguistics
- Meredith Doran, Ph.D. (Cornell) Assistant Professor of French and Applied Linguistics
- Paula R. Golombek, Ph.D. (Penn State) Senior Lecturer in Applied Linguistics
- Joan Kelly Hall, Ph.D. (SUNY, Albany) Professor of Applied Linguistics and Education
- Karen E. Johnson, Ph.D. (Syracuse) Professor of Applied Linguistics
- Celeste Kinginger, Ph.D. (Illinois, Urbana-Champaign) Associate Professor of French and Applied Linguistics
- James Lantolf, Ph.D. (Penn State) Professor of Applied Linguistics
- Xiaofei Lu, Ph.D. (Ohio State) Assistnat Professor of Applied Linguistics
- Sinfree Makoni, Ph.D. (Edinburgh) Associate Professor of Applied Linguistics and African American Studies
- Elaine Richardson, Ph.D. (Michigan State) Associate Professor of English and Applied Linguistics
- Sandra J. Savignon, Ph.D. (Illinois, Urbana-Champaign) Professor of Applied Linguistics
- Susan G. Strauss, Ph.D. (California, Los Angeles) Associate Professor of Applied Linguistics
- Steve Thorn, Ph.D. (California, Berkeley) Assistant Professor of Applied Linguistics

The master's program in English as a Second Language is designed to provide professional development for teachers and administrators in English as a second or foreign language. The program is problem focused, integrating theory and practice from the fields of applied linguistics and teaching English as a second language to address issues of second language acquisition/teaching and program development, with special focus on English in a wide range of both domestic and international contexts. Requirements include 36 credit hours, a master's paper, and a teaching portfolio.

Completion of this degree program does not automatically provide teacher certification in the Commonwealth of Pennsylvania. Further information on teaching certification is available from the College of Education. Students who desire to continue their studies in ESL at Penn State may be admitted to the Ph.D. program in Applied Linguistics through the program in Linguistics and Applied Language Studies.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Applicants whose native language is not English must take the TOEFL examination and attain a score greater than 600. All applicants are also required to arrange for three letters of reference to be submitted along with a one- to two-page statement of the applicant's goals and professional objectives.

Degree Requirements

The M.A. in TESL requires 36 credits, of which 18 credits must consist of 500-level courses. In lieu of a thesis, students must prepare a master's paper and compile a teaching portfolio. The following courses are required: APLNG 484, APLNG 493, APLNG 591, APLNG 595; 9 credits of electives from the following APLNG courses: APLNG 410, APLNG 482W, APLNG 572, APLNG 573, APLNG 581, APLNG 583, APLNG 593, APLNG 597; and 6 credits of approved electives.

Student Aid

Graduate Assistantships that may be available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

- S. Shyam Sundar, Ph.D. (Stanford) Distinguished Professor of Communications and Communication Arts and Sciences
- Richard D. Taylor, J.D. (New York) Palmer Chair of Telecommunications Studies and Law
- Bu Zhong, Ph.D. (Maryland) Assistant Professor of Communications

The M.A. in Telecommunications Studies program offers a systematic approach to understanding the globalization of information technologies and the convergence of electronic media and telecommunications. It includes history, technology, policy, economics, industrial structures, and e-commerce issues. The program is for both recent undergraduates in communications and related fields seeking advanced study, as well as for individuals currently associated with the media information and telecommunications industries wishing to advance themselves professionally. Applicants without an undergraduate degree or professional connection to the field may be required to acquire a basic background as a condition of admission, based on a case-by-case evaluation.

Admission Requirements

Scores for the Graduate Record Examinations (GRE) are required for admission. All international applicants whose first language is not English or who have not received baccalaureate or master's degrees from an institution in which the language of instruction is English must take the Test of English as a Foreign Language (TOEFL) and submit the results of that test with the application for admission. The minimum TOEFL admittance score is 600. Applicants with an undergraduate 3.00 junior/senior grade-point average (on a 4.00 scale) are eligible for admission. Also required are three letters of recommendation and an autobiographical statement of 750 to 1,000 words indicating the nature of the applicant's interest in undertaking graduate study in telecommunications.

Program of Study

The M.A. in Telecommunications Studies program is a one-calendar year, 30-credit program that requires a 3-credit master's paper. A student must enter the program in the fall semester.

Degree Requirements

Candidates must complete a minimum of 30 credits (including master's paper preparation): no more than 9 credits at the 400 level and no more than 6 credits in independent study (in addition to 3 credits researching and writing a master's paper). Candidates must complete a 9-credit core. The remaining credits are selected by the student in consultation with the adviser. Course work offered by departments outside the College of Communications may be scheduled as part of the student's program with prior approval of the student's academic committee. A candidate must maintain 3.00 grade-point average and complete a significant research paper (master's paper) under the direction of a faculty adviser. This paper shall be reviewed and approved by a faculty committee of at least three members. Students are required to schedule three separate, formal meetings with their advisers and academic committees for (1) discussion and approval of the general program plan, (2) the paper proposal, and (3) a formal presentation and defense of the paper at the final meeting of the student's advisory committee.

Student Aid

Graduate assistantship and other forms of student aid available to students in the program are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Faculty Emeriti

- Douglas N. Cook, M.A. (Stanford) Professor Emeritus of Theatre
- Charles Firmin, M.F.A. (Penn State) Associate Professor Emeritus of Theatre
- Anne A. Gibson, M.F.A. (Carnegie Mellon) Professor Emerita of Theatre
- Robert E. Leonard, M.F.A. (Goodman School of Drama) Professor Emeritus of Theatre
- Helen A. Manfull, Ph.D. (Minnesota) Professor Emerita of Theatre
- Douglas R. Marmee, M.F.A. (Brandeis) Associate Professor Emeritus of Theatre

The master of fine arts degree program in Theatre pursues the following objectives: (1) to assist each student in acquiring discriminating taste and critical judgment in theatre; (2) to help each student attain skills and proficiencies in theatre; (3) to provide the training, discipline, and opportunities essential to the development of a professional ability in at least one area of theatre; and (4) to prepare each student for an active career in academic and/or professional theatre or other areas within the entertainment industry.

Facilities include the Playhouse, a 450-seat proscenium theatre; the Pavilion, a 249-seat thrust theatre; a 150-seat proscenium theatre in the heart of downtown State College; theatre production studios for scenic, property, and costume preparation; two computer-assisted design laboratories; a lighting laboratory; a sound and media studio; and rehearsal and dance studios.

Admission Requirements

Graduate Record Examination (GRE) scores, or comparable examination scores, are not required for admission to the School of Theatre. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the *Grad Graduate Bulletin*.

Requirements for admission to the M.F.A. program are (1) a broad undergraduate preparation in theatre, including 3 credits each in acting, directing, stagecraft, and theatre history; and 6 credits of dramatic literature; (2) 12 credits in related subject areas such as communications, oral interpretation, art, business, music, and dance; and (3) submission of a vita and at least three letters of recommendation.

Additional requirements for M.F.A. candidates are (1) submission of evidence of professional potential in the proposed area of specialization-auditions, prompt books, portfolios, manuscripts, and other appropriate presentations-to the applicable study program(s) by arrangement with the department; and (2) a personal interview to be arranged by the student.

Master of Fine Arts Degree Requirements

The program entails specialized professional training in one of the following areas: acting, directing, scene design, costume design, costuming, lighting design, and technical direction. Six semesters in residence are normally required to complete the minimum 60-credit degree.

Students are evaluated on a semester-by-semester basis on academic progress, creative achievement, and professional potential. The M.F.A. is a professional degree and is granted by the Graduate Faculty on the basis of academic and creative excellence over and above the fulfillment of requirements. Satisfactory academic progress does not guarantee continuance in the program, nor does continuance in the program imply the automatic granting of a degree. M.F.A. candidates are required to participate in the School of Theatre productions in positions of responsibility. Additionally, each student must complete a committee-approved monograph project in the area of specialization. An international residency is required and is funded by the school.

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

MARGARET LOHMAN, *Coordinator*
Penn State Harrisburg
777 West Harrisburg Pike
Middletown, PA 17057
717-948-6215

Degree Conferred:

M.Ed.

The Graduate Faculty

- Margaret Lohman, Ph.D. (Ohio State) *Associate Professor of Training and Development*
- Jo Tyler, Ed.D. (Columbia) *Assistant Professor of Adult Learning and Leadership*
- William Milheim, Ph.D. (Kent State) *Professor of Education; Director, School of Behavioral Sciences*

The master of education degree program in Training and Development at Penn State Harrisburg helps students prepare for professional careers in training and development in diverse organizational settings, including business and industry, government, and health care. Graduates of the Training and Development Program frequently assume positions such as trainers, instructional designers, program evaluators, performance analysts, career development specialists, and organization developers.

The overarching goal of the Training and Development Program is to help students develop the ability to assess and improve employee learning and performance. Accordingly, specific goals of the program include developing the ability to: analyze employee performance; design a broad range of performance improvement interventions, with particular emphasis on the design, development, and delivery of training programs; evaluate training and development programs; facilitate work group discussions and group processes; translate training and development theory into practice; and critically evaluate research in training and development.

Admission Requirements

An applicant must hold a baccalaureate degree in any field from a regionally accredited, college-level institution. Admission decisions are based primarily on an applicant's junior/senior cumulative grade-point average and career-goal statement. Additional information pertaining to any post-baccalaureate course work and professional experience are considered. The best-qualified applicants will be accepted up to the number of spaces available for new students.

Applicants with low grade-point averages may be required to take the Graduate Record Examinations (GRE) or take 9 credits of course work recommended by a program faculty member and maintain a GPA of B or higher in order to be reconsidered.

Students are required to submit the following:

- A completed application with the application fee
- Two copies of official transcripts from all colleges/universities attended
- A brief career-goal statement

International Students

All applicants whose first language is not English or who have not received a baccalaureate degree from an institution in which the language of instruction is English must take the Test of English as a Foreign Language (TOEFL; www.toefl.org (Opens New Window)).

The test must be passed with a score of 550 (paper-based test) or 213 (computer-based test) or higher.

All students with international credentials must submit transcripts to Educational Credential Evaluators, Inc. (ECE) for a "Course by Course" academic evaluation of transcripts and degree. An ECE application can be obtained at www.ece.org (Opens New Window).

Application Deadlines

Candidates may enter the program at the beginning of fall or spring semester, or the summer session. Application deadline dates for U.S. students and international students are posted on the Training and Development program website. (http://www.hbg.psu.edu/hbg/programs/gradprog/trdev.html)

Please note: Each graduate program reserves the right to set earlier deadlines than those noted above.

Degree Requirements

Students may enter the Training and Development program from a variety of backgrounds and enroll in courses to help them develop competencies in training and development. Coursework includes both required and elective courses in training and development as well as electives from outside the program. Students select one of two areas of professional practice, training or human resource development, as a focus for their electives in the training and development program. Courses are scheduled to accommodate part- and full-time students.

There are two options in the program: the Paper option requires the completion of a master's paper (TRDEV 587) and a total of 36 credits (excluding an internship if one is needed); the Non-Paper option does not require a master's paper, but does require Research Designs Applied to Training (TRDEV 588) and an extra elective in Training and Development for a total of 39 credits (excluding an internship if one is needed). For both the Paper and Non-Paper options, at least half of the total credits must be earned in 500-level courses.

Both options require successful completion of Instructional Methods in Training and Development (TRDEV 418), Foundations in Training and Development (TRDEV 460), Performance Analysis (TRDEV 465), Systematic Instructional Design (TRDEV 518), Technology in Training

(TRDEV 531), and Educational Research Design (EDUC 586).

Prescribed (Required) Courses:

TRDEV 418: Instructional Methods in Training & Development (3 credits)
TRDEV 460: Foundations in Training & Development (3 credits)
TRDEV 465: Performance Analysis (3 credits)
TRDEV 518: Systematic Instructional Design (3 credits)
TRDEV 531: Technology in Training (3 credits)
EDUC 586: Educational Research and Design (3 credits)

Additional Courses

A. From Training and Development courses, select three courses for the Paper option or four courses for the Non-Paper option:

TRDEV 421: Presentation Skills for New Trainers (3 credits)
TRDEV 432: Video Production for Training (3 credits)
TRDEV 470: HRD Tools and Techniques (3 credits)
TRDEV 475: Career and Succession Management (3 credits)
TRDEV 505: Project Management (3 credits)
TRDEV 507: Program Evaluation (3 credits)
TRDEV 520: Learning Styles and Theories for Trainers (3 credits)
TRDEV 532: Web-Based Training (3 credits)
TRDEV 533: Distance Learning in Training (3 credits)
TRDEV 565: Implementing Training and HRD Programs (_ credits)
TRDEV 583: Issues in Training & Development (3 credits)
TRDEV 596: Individual Studies (1-3 credits)
TRDEV 597: Special Topics (3 credits)

B. Select two three-credit courses at the 400/500 level from programs outside Training and Development. The two courses should assist you in preparing for professional roles and responsibilities in training and development. The following courses are highly recommended:

BE SC 408: Group Facilitation and Leadership Skills (3 credits)
BE SC 468: Industrial Psychology (3 credits)
P ADM 510 or MNGMT 510: Organizational Behavior (3 credits)

Required Experience:

One of the following:

A. Holds or has held a position in training and development successfully for six months or more. Submit request for waiver for approval.

B. TRDEV 595 Internship (3 credits which are not counted in the 36 credit or 39 credit requirement)

Capstone Requirement:

Choose one of the following options:

A. TRDEV 588: Research Designs Applied to Training (3 credits - plus one additional 3-credit elective)

B. TRDEV 587: Master's Paper (3 credits)

Transfer Credits and Course Substitutions

A maximum of 10 credits of high-quality graduate work done at a regionally accredited institution may be applied toward the requirements for the master's degree in Training and Development. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser and the Graduate School. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School, must be of at least B quality (grades of B- are not transferable), and must appear on an official graduate transcript. Credits earned toward a previously completed postbaccalaureate professional degree program (law, medicine, etc.) are not transferable. However, up to 10 credits can be transferred from a professional degree program if the degree has not been conferred.

A maximum of 15 credits earned as a special nondegree student at Penn State University may be applied to the Training and Development program, with departmental approval. The credits must have been earned within five years preceding entry into the program.

Grade-point Average and Time Limit

A 3.00 (out of 4.00) minimum grade-point average is required to graduate from the program. All course work must be completed within eight years.

Financial Aid

There are a limited number of scholarships, fellowships, and research grants available, as well as graduate assistantships. Many students work full-time and take classes part-time. In many cases, employers have a tuition-reimbursement plan paying for partial or full tuition. To find other options available to you, contact the Financial Aid Office at 717-948-6307.

Courses

Graduate courses carry numbers from 500 to 599. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not be used to meet graduate degree requirements. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Master of Professional Studies in Turfgrass Management

A. J. TURGEON, *In Charge of Master of Professional Studies in Turfgrass Management Graduate Program*
419 Agricultural Administration Building
814-863-7626, at2@psu.edu

The Graduate Faculty

- David R. Huff, Ph.D. (California, Davis) Professor of Turfgrass Breeding, Department of Crop and Soil Sciences
- Andrew S. McNitt, Ph.D. (Penn State) Assistant Professor of Soil Science, Department of Crop and Soil Sciences
- Maxim J. Schlossberg, Ph.D. (Georgia) Associate Professor of Turfgrass Nutrition and Soil Fertility, Department of Crop and Soil Sciences
- J. Turgeon, Ph.D. (Michigan State) Professor of Turfgrass Management, Department of Crop and Soil Sciences
- Wakar Uddin, Ph.D. (Georgia) Associate Professor of Plant Pathology. Department of Plant Pathology

The Master of Professional Studies in Turfgrass Management (MPS-TM) is a 30-credit terminal master's degree program that emphasizes a systems approach to turfgrass management. The program balances theory and practice. Courses taught in MPS-TM use Web-based lessons, quizzes, exams, and team projects and exercises to provide a balance between individualized study and interactive learning. Individuals who currently work as managers of turfgrass facilities, including golf courses and professional sports complexes, would benefit from this program. The MPS-TM program requires the completion of four core courses in which students learn to apply scientific concepts to fundamental problems encountered in the management of complex turfgrass ecosystems. Additionally, a capstone individual studies in turfgrass management course is a project that integrates theory and practice in addressing real problems encountered in turfgrass facility management.

Degree Requirements

The professional master's degree requires 30 credits including a final integrative project. All students complete the required MPS-TM core program of turfgrass courses. The MPS-TM turfgrass courses consist of TURF 850 (Turfgrass Physiology), AGRO 851 (Applied Plant Population Biology), TURF 852 (Turfgrass Health Management), TURF/PPATH 853 (Turfgrass Science Literature), and AGRO 596 (Individual Studies in Agronomy). An integrative project is required in which the student demonstrates the capability to integrate and apply concepts, principles, analytical techniques, and interpretation skills learned in the program to a real problem faced in turfgrass facility management. In consultation with their advisor, students also take an additional 15 credits of elective coursework to focus on their particular interest within turfgrass facility management. A total of 18 credits must be 500-level or higher, with at least 6 credits of 500-level coursework; this Graduate School requirement is met through the required courses, the project, and at least one 500-level elective course.

List of required courses in proposed program*

AGRO 596 (3) Individual Studies in Agronomy. Used by students to work with an advisor on their capstone project.

AGRO 851 Applied Plant Population Biology (3). Lectures and exercises designed to develop student competency in plant selection to promote ecological diversity and genetically superior plants.

TURF 850 Turfgrass Physiology (3). Lectures, reading assignments, and exercises designed to develop student competency in plant physiology as it relates to turfgrass management strategies.

TURF 852 Turfgrass Health Management (3). Lectures and exercises designed to develop student competency in solving turfgrass pest problems, as well as disease resistance in turfgrasses.

TURF/PPATH 853 (3). Interpreting Turfgrass Science Literature (3). Introduction to turfgrass research publications, interpretation of the data, and discussion of the significance of the results.

*See Appendix B for elective courses

Admissions Requirements

Applicants must submit a letter of professional introduction in which they describe their professional experiences and education, delineate their career goals, and discuss how the MPS-TM program will enable them to meet their objectives. Applicants must also provide three letters of reference and recommendation. The best-qualified applicants will be accepted up to the number of spaces that are available for new students. Scores from Graduate Record Examination (GRE), or from a comparable substitute examination accepted by a graduate program are required for admission; however, exceptions may be considered on a case-by-case basis. The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. International applicants are exempt from the TOEFL/ELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales. Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin* http://www.psu.edu/bulletins/whitebook/$gradregs.htm.

Transfer Credits

If students have successfully completed courses from another institution that are equivalent to the elective turfgrass courses (TURF 425, 434, 435, and 436) with grades of B or better, these can be applied toward satisfying the MPS-TM degree requirements. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School, must be equivalent to "B" quality (grades of B- are not transferable) on Penn State's grading system, and must appear on an official graduate

transcript.

Student Aid

Students in this program may receive financial assistance from their workplace or bear the cost of the degree personally. Other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin* http://www.psu.edu/bulletins/whitebook/$gradregs.htm. The forms of financial aid noted in the bulletin available to residential graduate students are not available to students studying via the World Campus, e.g., assistantships, fellowships. The other common form of financial aid is loans.

Typical Schedule

Flexibility is a key principle of the design of this program. Each course will be offered once each academic year. Sequencing of courses is determined by the semester the student begins the program. Students and their advisor will develop a plan of study upon completion of the second course taken in the program or the end of the first year, whichever occurs sooner. Many students may take three or four courses per year while others may only take one or two. Because of this, the time to degree will average three years and one semester. The typical schedule for offering the required MPS-TM courses is shown in Table 1.

Table 1. MPS-TM REQUIREMENTS (30 credits)

REQUIRED COURSES (12 credits)

FALL SEMESTER	SPRING SEMESTER
AGRO 851 (3) Applied Plant Population Biology	TURF 852 (3) Turfgrass Health Management
TURF 850 (3) Turfgrass Physiology	TURF/PPATH 853 (3) Turfgrass Science Literature

INTEGRATIVE PROJECT (3 credits)

AGRO 596 (3) Individual Studies

ELECTIVES (15 credits)

See list of approved elective courses available through Penn State. All electives listed are offered online. Must include at least one 500-level (3 credit) course.

Elements of Residency

We propose several strategies to meet the elements of residency in MPS-TM. We describe these strategies and then indicate how each contributes to various elements of residency. Table 2 provides a summary of the program strategies that contribute to each element of residency. These elements will be phased into the program over the first five years the program is in existence. The elements will be evaluated for their effectiveness and modifications made, as necessary, to ensure a quality educational experience. This section is organized by the strategies we plan to use to meet the elements of residency.

Strategy A–Seminars and discussions: CSS offers departmental seminars during Fall and Spring Semesters. Topics that are relevant to MPS-TM students will be made available for students to view using appropriate technology. We then would offer chat-room time and threaded discussion opportunities for the students to interact with each other and with the presenter and/or a faculty facilitator. Faculty and graduate students in the program will be invited to participate in the discussions. We will explore the use of real-time teleconferencing for students to join the seminars, but the geographical (time zone) distribution of our students may make this difficult. Strategy A contributes to residency elements 1, 2, 4 and 7. Strategy A provides opportunity for interaction among students and faculty outside of direct instruction (1); offers students a chance to interact with each other on the topic (2); provides broader exposure to and socialization to the field and to related fields (crop science, soil science, horticulture, plant pathology, entomology) (4); and it increases student identification with Penn State (7) by giving students the opportunity to discuss topics with faculty and graduate students in the other two graduate programs in the department (i.e., Agronomy, Soil Science). It also will increase student awareness of the department and the breadth of its substantive expertise. We expect that at least one seminar per semester will be made available in this way and we expect all students currently enrolled in the program to take part in one of these seminar/discussion opportunities each academic year. Strategy A will be phased in during year 1 of the new program.

Strategy B–Student seminar or discussion of their capstone project in the program: An important part of socialization and sharing of information is student-led seminars and discussions. Each student in the program will be required to offer a seminar and/or to lead a discussion about their capstone project. This is the integrative experience in the program and will be a required element for completion of the program. As part of this, the student will post the presentation and the full project report prior to the seminar/discussion. The student will work with their faculty advisor and the MPS-TM program coordinator to develop the content of the seminar and/or discussion questions. The faculty advisor and the MPS-TM program coordinator will provide support to the student during the seminar and/or discussion. This will give other students an opportunity to become familiar with the requirements of the integrative experience as well as allowing for sharing of the experiences of the student completing the program. We will evaluate the feasibility of video conferencing for those students interested in giving a formal seminar, and recording the presentation for distribution to students and others unable to participate in real-time. Alternatives to video conferencing include a threaded discussion format based on the written document, and/or specific times for students and faculty to visit a chat room for a guided discussion led by the student. Strategy B contributes to residency elements 1, 2, 4, 6 and 7. Strategy B offers an opportunity for interaction between students and faculty outside the course context (1); encourages interaction among students with student led discussions (2); provides students an opportunity to explore substantive or socialization issues in the field (4); allows students to contribute their own insights, knowledge and expertise and to share those with other students and faculty in the program, the department, college and university (6); and increases identification with Penn State through participation in university-sponsored discussions (7). This strategy will be phased in as the first cohorts of students in MPS-TM complete their programs.

Strategy C: Informal discussions. An online ‘coffee room’ will be set up as a space for informal discussions among students and faculty. Topics may be proposed by students and faculty. A threaded discussion format will be used, although the ‘coffee room’ also will be available for chat rooms for a particular meeting or discussion group. Participation will be voluntary and we expect different students and faculty to take part depending on the topics. Strategy C fulfills residency elements 1, 2, 4, 6 and 7. Informal student interaction with faculty is encouraged (1), as is interaction among students (2). The topics are likely to include issues of socialization in the field and practical application of course content and so will contribute to residency element (4). The discussions and interactions will allow students to contribute their expertise and experiences, shaping faculty knowledge of applications in the field and providing ideas for

applied research. Thus, these discussions will enable students to contribute to the program, college and university (6). Participation will increase identification with Penn State (7). Strategy C will be phased in during year 1 of the program.

Strategy D: Students as experts. The CSS department has an established undergraduate major in Turfgrass Science (TS) that has important conceptual and practice overlap with MPS-TM. We plan to provide opportunities for students in MPS-TM to participate as experts in the field or as video conference presenters on certain topics in the undergraduate classes. Again, the practical, real world experiences of MPS-TM students will be invaluable in helping the undergraduates to understand how the information from classes translates into application. This interaction also will provide undergraduate students opportunities to interact with professionals in the field about the nature of their careers, the kinds of tasks they do on a daily basis, and the relevance of program/course content. Strategy D contributes to residency elements 1, 2, 4, 6 and 7. In developing the undergraduate course presentation, MPS-TM students will work with the faculty member in the course to develop content and instructional strategies thus providing socialization and experience with instruction (1, 4); if a panel is used then MPS-TM students on the panel will need to interact to organize the presentation (2). MPS-TM students would make a clear and strong contribution to the program, college, and university by participating as experts, panel members in undergraduate courses related to their coursework and professional experiences (6). Such participation will increase the identification with Penn State (7). Students will be encouraged to participate in one such activity during their program.

Strategy E: Students as mentors. MPS-TM students will be asked to serve as mentors in two capacities. First, 'senior students' will be asked to serve as mentors to new students in the MPS-TM program. This will include providing advice, responding to questions that new students in the program might have, and helping new students to navigate the somewhat less-structured world of online courses (where there is no formal class meeting time). Since many students are already practitioners, these mentoring relationships should help to build networks among students on which they can draw in their professional careers, not just in the program context. Second, MPS-TM students will be asked if they would be interested in volunteering to mentor one or two undergraduate students in the TS program. This provides MPS-TM students with experience in mentoring and providing leadership to those with less knowledge and experience, and it enhances the experiences of the undergraduate students to have a practitioner to whom they can turn with substantive/career-related questions. Strategy E contributes to residency elements 2, 4, 5, 6 and 7. This strategy encourages interaction among students (2), provides a socialization/professionalization experience guided by faculty (4), it provides a student perspective on the program and courses in terms of advising (5), allows students in MPS-TM to make invaluable contributions to the program, college and university through involvement in undergraduate education (6), and increases student involvement in and identification with Penn State and its programs (7). Strategy E will be phased in during years 2 and 3 of the MPS-TM program and the Turfgrass Science undergraduate program, as feasible.

Strategy F: Annual Turfgrass Management Institute. One element often missing from online programs is face-to-face interaction. We propose to offer an Annual Institute for one week during the fall Penn State Golf Turf Conference to bring faculty and students together at University Park. The Institute would include substantive topics or short courses that would describe recent developments in different areas of turfgrass science and management, and would provide opportunities for informal discussions and socializing among students and faculty. Because of the costs involved, this will not be a required element, but we will strongly encourage students to participate at least once during their program. In addition, we would plan to invite new students to participate in the Institute prior to taking their first course. We also would invite alumni to attend and to participate in organizing/presenting some of the sessions. Student and alumni mentors could then meet those they are mentoring. Opportunities for advising sessions on coursework and an introduction to the program would be included for students new to the program. Times also would be available for students to set up meetings with their academic advisors to discuss their integrative experience. Some sessions in the Institute may be made available to those unable to attend in person. The Annual Institute contributes to all of the elements of residency. The institute provides opportunities for face-to-face interaction among faculty and students (1); among students (2); will increase access to information and instructional resources of the program, department and University (3); offer opportunities for socialization to the field (4); provide face-to-face academic and program advising (5); enable students to contribute by helping to organize sessions and use their expertise (6); and a visit to University Park is generally always a good way to increase identification with Penn State (7). We view the Institute as an important element of the program, and will work to develop funding mechanisms to assist students and alumni in covering the costs of travel to and living expenses while visiting Penn State. We expect to offer the first institute during the second fall following the approval of the MPS-TM program.

Strategy G: Academic advising and support services. Academic advising is provided initially by the Graduate Program Coordinator who is a tenure-line faculty member in the program. Students will be encouraged to identify a permanent faculty advisor as soon as possible in the program and will work through a proposed schedule of courses and a tentative timeline within the first year. This process will be facilitated by the Graduate Program Coordinator. Advising is conducted by email and phone. Once a faculty advisor is identified, the student can seek advice from the faculty advisor, the Graduate Program Coordinator, or from other faculty and students in the program. Advising also will be available through an online advising 'coffee room,' the Annual Institute, and the use of senior students in MPS-TM as mentors/peer advisors. Materials providing specific information on program requirements, the unique aspects and responsibilities of participating in an online program, identifying a faculty advisor and committee, and the integrative experience are being developed and will be available on the program web site. Support for MPS-TM will be provided by a staff assistant in CSS and through initial contact with World Campus personnel/advisors. Students will apply for admission directly to the MPS-TM program in the academic department. Strategy G meets residency elements 1, 3, 4 and 5.

Strategy H: MPS TM program web site. We view the MPS-TM program web site as an essential element in creating a 'home and identity' for the MPS-TM program. The web site will contain the typical elements of an educational program with information on application guidelines, course offerings, requirements for the degree, information on faculty in the program, and links to broader Penn State resources. We also propose to develop elements of the web site that will provide opportunities for interaction (formal and informal), program and course review and evaluation, professional networking, and building program identity. Interaction linked through the web site would be the opportunities to participate in organized chat rooms or threaded discussions related to the departmental or student seminars or discussion (Strategies A and B) informal discussion chat-rooms and threaded discussions (Strategy C), and the 'coffee room' (Strategy C, E and F). The 'coffee room' also can be used for course review and evaluation where access would be restricted to students in a particular course and the faculty peer evaluator of the course. One page on the web site would include links to professional organizations, nationally and within states, that provide training and conferences for practitioners and researchers in topics related to community and economic development. We plan to identify these through searches, but also by the organizations in which our students and alumni participate. This site also will include a link to a discussion area about insights obtained from student/faculty/alumni participation in particular conferences. Another element would be a restricted access site that includes information on former and current students in MPS-TM. This would include information on current positions, locations, and areas of expertise of the students and alumni; lists of the capstone projects completed by the students with links to electronic copies, and a map showing locations of current and former students. We see this information as building identity with the program and Penn State and encouraging continued participation in the program by alumni. This alumni/student/faculty space would include access to chat rooms, threaded discussions, and coffee rooms on organized topics and informal discussion topics introduced by members. The web site contributes to all elements of residency. It offers opportunities for interaction among faculty and students (1), interaction among students and among students and alumni (2), provides access to information and instructional resources (3), increases exposure to substantive issues in the field and to professional networks and experiences (4), provides access to advising information and support services (5), offers a means for students and alums to stay connected with the program and contribute substantively both formally and informally (6), and creates a location and reason for continuing active participation in and identification with the Penn State community. We plan to develop a new website for the MPS-TM program and to phase in various elements within the first three years of the program.

Ultimately, we would like to employ all of the above strategies to increase participation and interaction available to alumni of the MPS-TM

program. The alumni of this program are practitioners in the field or work in related areas and can provide an invaluable resource to current graduate and future undergraduate students, the program, and Penn State. We would hope to use the 'friends of Penn State' accounts to provide access to the web sites and associated activities. Recent efforts by the Penn State Alumni Association and University Libraries to offer some restricted access to library resources to members of the Alumni Association also will increase the benefits to alumni of retaining their contact and interaction with the program and with Penn State. The special interaction elements related to community and economic development offered to alumni and students should increase the attractiveness to alumni of staying involved. Another element would be a virtual coffee room for informal discussions with and among students. We will maintain alumni and former student lists. As we develop the program website, we will consider an electronic newsletter for alums and a special alums page on the web site.

Last Revised by the Department: Summer Session 2010

Blue Sheet Item #: 38-04-099

Review Date: 01/12/2010

Wildlife and Fisheries Science (W F S)

Program Home Page (Opens New Window)

MICHAEL G. MESSINA, *Director of the School of Forest Resources and Professor of Forest Resources*
121 Ferguson Building
814-863-7093

Degrees Conferred:

Ph.D., M.S., M.Agr., M.F.R.

The Graduate Faculty

- Margaret C. Brittingham, Ph.D. (Wisconsin) Professor of Wildlife Resources
- Hunter Carrick, Ph.D. (Michigan) Assistant Professor of Wildlife and Fisheries Science
- Charles Andrew Cole, Ph.D. (Southern Illinois) Associate Director, Center for Watershed Stewardship
- Duane R. Diefenbach, Ph.D. (Georgia, Athens) Adjunct Assistant Professor; Assistant Leader-Wildlife, PaCFWRU
- C. Paola Ferreri, Ph.D. (Michigan State) Associate Professor of Fisheries Management
- Gary J. San Julian, Ph.D. (Colorado State) Professor of Wildlife Resources
- Jay R. Stauffer, Jr., Ph.D. (Virginia Polytech) Professor of Ichthyology
- Walter M. Tzilkowski, Ph.D. (Massachusetts) Associate Professor of Wildlife Science
- Richard H. Yahner, Ph.D. (Ohio) Professor of Wildlife Conservation

Programs are designed to give students an understanding of the biology and management of terrestrial or aquatic wildlife species and their environments, and include training in fish and wildlife ecology, nutrition, physiology, behavior, and pathology of wildlife species; study of successional stages, land use, and management of various habitats and their impact on fish and wildlife populations; population dynamics and manipulation of animal numbers; and studies of recreational, aesthetic, and socioeconomic values of fish and wildlife. Most programs of study are strengthened by including appropriate courses offered by related departments.

Admission Requirements

Scores from the Graduate Record Examinations (GRE) are required for admission. A student may be admitted provisionally without GRE scores. Requirements listed here are in addition to general Graduate School requirements stated in the GENERAL INFORMATION section of the*Graduate Bulletin*.

Application materials should be submitted before February by those who want to begin in summer or fall. For admission, an applicant should have at least a 2.75 grade-point average, a 3.00 junior/senior average, and courses that are basic to the individual's field of specialization. Ordinarily these include 12 credits in communication, 12 credits in social sciences and humanities, 10 credits in quantification including calculus and statistics, 8 credits in chemistry and/or physics, 8 credits in biological sciences, and 18 credits in fish, wildlife, forestry, or related courses. Three reference reports (forms supplied on request), and a brief statement describing the applicant's academic goals, career interests, and special qualifications are required. The best-qualified applicants will be accepted up to the number of spaces available. Exceptions to admission requirements may be made for students with special backgrounds, abilities, and interests.

Admission to the Ph.D. program in Wildlife and Fisheries Science requires a master's degree in wildlife and fisheries science or a closely related field, or a bachelor's degree with a minimum grade-point average of 3.30 and demonstrated research ability.

Master's Degree Requirements

M.S.: In addition to Graduate School requirements, 6 credits of statistics and 2 credits of colloquium are required.

M.F.R.: A minimum of 30 graduate credits (400- to 500-level courses) is required, of which at least 20 must be earned at an established graduate campus of the University. At least 12 credits must be formal courses at the 500 level related to forest resources. A paper (3-6 credits of FOR 596/FP 596/W F S 596) is included as part of the 30 credits, demonstrating an ability to apply the knowledge gained during the program to the specialized field of interest; the paper will be evaluated by the student's committee. Two credits of colloquium and 3 credits of statistics (400- or 500-level) are required.

M.Agr.: Candidates select a minimum of 15 credits of graduate-level communications courses in majors such as Agricultural and Extension Education, Instructional Media, Journalism, Recreation and Parks, Speech Communication, English, and Theatre Arts. Any deficiencies in a student's resource specialty, as judged by his or her advisory committee, must be remedied. An acceptable paper on a selected professional problem or a report on internship training worth 3 credits or more also is required.

Doctoral Degree Requirements

Doctoral students would normally emphasize either wildlife or fisheries in their course selection. Course work shall include at least 15 graduate credits beyond those required for an M.S. in Wildlife and Fisheries Science. At least 9 of these credits must include courses at the 500 level with a Wildlife and Fisheries Science designation.

An international communications or cultural requirement is required for the Ph.D. degree. This requirement may be satisfied by demonstrating competence in one foreign language equivalent to passing two or three college-level courses. It also may be met by two courses in one or two contemporary foreign cultures. With approval of the doctoral committee, a student may petition the Graduate Faculty of the school for waiver of the international communications or culture requirement.

Students must pass the candidacy examination during their first year of residence and a comprehensive examination which is given after all course requirements have been completed. The final examination is oral; all doctoral students are required to present a public seminar on their dissertation prior to the final examination.

Watershed Stewardship Option

The Graduate Option in Watershed Stewardship is intended to provide enhanced educational opportunities for students with an interest in

water resources management who are enrolled in a graduate degree program within Wildlife and Fisheries Science. The objective of the Graduate Option in Watershed Stewardship is to educate students to facilitate team-oriented, community-based watershed management planning directed at water resources problems encountered in Pennsylvania communities, especially nonpoint source water pollution. The Graduate Option in Watershed Stewardship requires 22 credits of graduate course work: 12 credits of breadth courses, 2 credits of Watershed Stewardship Seminar courses (FOR 591A and 591B or LARCH 510.2), and 8 credits of Watershed Stewardship Practicum I and II courses (FOR 570 and FOR 571 or LARCH 540.2 and LARCH 550.2). One credit of FOR 591 would count as a colloquium course toward degree requirements, but at least 1 additional credit of FOR 590 is required. Breadth courses will consist of three graduate credits of course work from each of four subject matter areas: (1) water resources science, (2) social science, public policy and economics, (3) humanities, and (4) communications and design. In the watershed stewardship practicum courses students work in teams with community, government and business leaders to analyze and understand natural resources problems and creatively synthesize appropriate solutions in the form of a written watershed management plan.

A representative pattern of scheduling for the Graduate Option in Watershed Stewardship in addition to a student's other degree requirements might be:

First Year:

Fall Semester
Breadth electives--6 credits
FOR 591A or LARCH 510.2,
Watershed Stewardship
Issues Colloquium--1 credit

Spring Semester
Breadth electives--6 credits
FOR 591B or LARCH 510.2,
Watershed Colloquium--1 credit

Second Year:

Fall Semester
FOR 570 or LARCH 540.2,
3 credits
Keystone Project

Spring Semester
FOR 571 or LARCH 550.2,
5 credits
Keystone Project

A list of acceptable breadth courses from each discipline is provided in the Graduate Option in Watershed Stewardship Handbook. Students will be allowed to petition to the Center for Watershed Stewardship to substitute higher level or equivalent courses in a major field to suit their specific backgrounds and goals. Courses taken for the Graduate Option in Watershed Stewardship may be used to satisfy other equivalent (400- or 500-level) degree requirements with concurrence of their adviser and graduate committee. The graduate committee for a student enrolled in the Option in Watershed Stewardship must include a faculty representative from the Center for Watershed Stewardship.

Students enrolled in M.F.R., M.Agr., M.S. or Ph.D. degree programs within Wildlife and Fisheries Sciences may apply to participate in the Graduate Option in Watershed Stewardship. Watershed Stewardship Option students enrolled in an M.F.R. or M.Agr. degree program, which requires a professional paper rather than a thesis, could write their professional paper on a topic which directly contributes to their overall watershed management plan prepared as part of FOR 570 and FOR 571 or LARCH 540.2 and LARCH 550.2 classes.

Other Relevant Information

Each entering student receives individual guidance from an adviser, and later from his or her committee, in designing a program of studies and research based on his or her own interests. The student is responsible for conforming to all requirements summarized in the "Graduate Studies Handbook" of the School of Forest Resources, and for completing the degree program within a reasonable time, i.e., two years for a master's degree and three years for a Ph.D.

Student Aid

In addition to the fellowships, traineeships, graduate assistantships, and other forms of financial aid described in the STUDENT AID section of the *Graduate Bulletin*, the following awards typically have been available to graduate students in this program:

Forest Resources: Jesse Rossiter Rapp Memorial Scholarship
Available to graduate students in the School of Forest Resources who are not holding assistantships as graduate students. Apply to the School of Forest Resources' Scholarships, Loans, and Awards Committee.

Roger M. Latham Memorial Award
Awarded to outstanding graduate students specializing in wildlife or fisheries after at least one semester in residence.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Dual-Title Graduate Degrees in Women's Studies (WMNST)

Program Home Page (Opens New Window)

LORRAINE DOWLER, *Program Director*
LORI GINZBERG, *Graduate Officer*

133 Willard Building
814-863-4025; fax: 814-863-3578

Degrees Conferred

Students electing this program through participating departments will earn a degree with a dual title at both the Ph.D. and M.A./M.S. levels, i.e., Ph.D. in (graduate program name) and Women's Studies, or M.A./M.S. in (graduate program name) and Women's Studies.

The following graduate programs offer dual degrees in Women's Studies: Adult Education, Curriculum and Instruction, English, French, Geography, History, Philosophy, Political Science, Psychology, and Rural Sociology.

The Graduate Faculty

Women's Studies-affiliated faculty include individuals with budgeted appointments in Women's Studies and individuals with courtesy joint appointments. The following faculty members have budgeted and courtesy joint appointments in Women's Studies:

- Micaela Amato, M.F.A. (Colorado) Professor of Art and Women's Studies
- Lee Ann Banaszak, Ph.D. (Washington U) Associate Professor of Political Science and Women's Studies
- Wenda Bauchspies, Ph.D. (Rensselaer) Assistant Professor of Science, Technology, and Society, and Women's Studies
- Robin Becker, Ph.D. (Boston) Associate Professor of English and Women's Studies
- John P. Christman, Ph.D. (Illinois) Associate Professor of Philosophy and Women's Studies
- Christine Clark-Evans, Ph.D. (Bryn Mawr) Associate Professor of French, Women's Studies and African and African American Studies
- Deborah Clarke, Ph.D. (Yale) Associate Professor of English and Women's Studies
- Mary De Jong, Ph.D. (S. Carolina) Associate Professor of English and Women's Studies
- Lorraine Dowler, Ph.D. (Syracuse) Associate Professor of Geography and Women's Studies
- Robert Drago, Ph.D. (UMass) Professor of Labor Studies and Industrial Relations and Women's Studies
- Yvonne Gaudelius, Ph.D. (Penn State) Associate Professor of Art Education and Women's Studies
- Lori Ginzberg, Ph.D. (Yale) Associate Professor of History and Women's Studies
- Cheryl Glenn, Ph.D. (Ohio) Associate Professor of English and Women's Studies
- Marnina Gonick, Ph.D. (Toronto) Assistant Professor of Curriculum and Instruction, and Women's Studies
- Amy Greenberg, Ph.D. (Harvard) Associate Professor of History and Women's Studies
- Irene Harvey, Ph.D. (York) Associate Professor of Philosophy and Women's Studies
- Lisa Hogan, Ph.D. (Indiana) Senior Lecturer in Communication Arts and Sciences, and Women's Studies
- Charlotte Holmes, M.F.A. (Columbia) Associate Professor of English and Women's Studies
- Kathryn E. Hood, Ph.D. (Temple) Associate Professor of Human Development and Women's Studies
- Patricia Johnson, Ph.D. (Michigan) Associate Professor of Anthropology and Women's Studies
- Jane Juffer, Ph.D. (Illinois, Urbana-Champaign) Assistant Professor of English and Women's Studies
- Julie Kasdorf, Ph.D. (NYU) Associate Professor of English and Women's Studies
- Claire Katz, Ph.D. (Memphis) Associate Professor of Philosophy, Jewish Studies, and Women's Studies
- Karen Keifer-Boyd, Ph.D. (Oregon) Associate Professor of Art Eduation and Women's Studies
- Patricia Koch, Ph.D. (Penn State) Associate Professor of Biobehavioral Health, Health Education, and Women's Studies
- Joan Landes, Ph.D. (NYU) Ferree Professor of Early Modern History and Women's Studies
- Margaret Lyday, Ph.D. Catholic U of America) Associate Professor of English and Women's Studies
- Janet Lyon, Ph.D. (Virginia) Associate Professor of English and Women's Studies
- Christiane Makward, Ph.D. Docteur es Lettres (Sorbonne) Professor of French and Women's Studies
- Phyllis Mansfield, Ph.D. (Penn State) Professor of Women's Studies
- Sophia McClennen, Ph.D. (Duke) Associate Professor of Comparative Literature, Spanish, and Women's Studies
- Sallie McCorkle, M.F.A. (Rutgers) Associate Professor of Art and Women's Studies
- Sally McMurry, Ph.D. (Cornell) Professor of American History and Women's Studies
- Jennifer Mittelstadt, Ph.D. (Michigan) Assistant Professor of History and Women's Studies
- Benedicte Monicat, Ph.D. (Maryland) Associate Professor of French and Women's Studies
- Cecelia Novero, Ph.D. (Chicago) Assistant Professor of German, Comparative Literature, and Women's Studies
- Stacy Rogers, Ph.D. (Ohio State) Associate Professor of Sociology, Crime, Law, and Justice, and Women's Studies
- Carolyn Sachs, Ph.D. (Kentucky) Professor of Rural Sociology and Women's Studies
- David Shapiro, Ph.D. (Princeton) Professor of Economics, Demography, and Women's Studies
- Stephanie Shields, Ph.D. (Penn State) Professor of Psychology and Women's Studies
- Mrinalini Sinha, Ph.D. (SUNY, Stony Brook) Associate Professor of History and Women's Studies
- Sandra Spanier, Ph.D. (Penn State) Associate Professor of English and Women's Studies
- Stephanie Springgay, Ph.D. (U of British Columbia) Assistant Professor of Art Education and Women's Studies
- Susan Squier, Ph.D. (Stanford) Julia Gregg Brill Professor of English and Women's Studies
- Shannon Sullivan, Ph.D. Assistant Professor of Philosophy and Women's Studies
- Nancy Tuana, Ph.D. (California) DuPont/Class of 1949 Professor in Ethics; Professor of
- Philosophy and Women's Studies; Director, Rock Ethics Institute; Interim Head, Department of Philosophy
- Cassandra Veney, Ph.D. (Missouri) Assistant Professor of Women's Studies, and African and African American Studies
- Theresa K. Vescio, Ph.D. (Kansas) Assistant Professor of Psychology and Women's Studies
- Aaronette M. White, Ph.D. (Washington U) Assistant Professor of Women's Studies, and African and African American Studies
- Linda Woodbridge, Ph.D. (UCLA) Professor of English and Women's Studies
- Linda Wray, Ph.D. (Southern California) Assistant Professor of Biobehavioral Health and Women's Studies
- Melissa Wright, Ph.D. (Johns Hopkins) Assistant Professor of Geography and Women's Studies

Dual-title degrees grounded both in Women's Studies and a given discipline will acknowledge and foster scholarly work across disciplines. A dual-title degree program will increase the intellectual rigor and breadth of graduate work through immersion of candidates in Women's Studies and their discipline. The dual-title degree will also provide a context in which students can learn to synthesize knowledge within and across disciplinary boundaries. In addition, a dual-title degree program provides students with an opportunity for increased work within a pedagogical framework that also encourages an interdisciplinary approach to teaching.

The primary advantages of dual-title degrees include the intellectual and academic advantages of interdisciplinary, strengthening the reputation of individual programs/departments through innovative degree programs, increased recruitment of quality graduate students, and improved placement of doctoral graduates.

The dual-title degree programs do not duplicate other degree programs in the University.

Admission Requirements

In addition to the admission requirements set forth by the Graduate School and the cooperating department, students will be admitted to graduate study in Women's Studies by an admissions committee of Women's Studies-affiliated faculty. The Women's Studies program will follow the timetable and admission requirements of the cooperating department. Applicants should have a junior/senior cumulative average of at least 3.00 (on a 4.00 scale) and appropriate course background should be considered for study. It is required that prospective students seeking admission to a dual-title degree program will write a statement of purpose that addresses the ways in which their research and professional goals will reflect an interest in interdisciplinary and feminist research.

Degree Requirements

The dual-title degree will have requirements above those for the graduate minor, which currently requires 9 credit hours for the M.A./M.S. and 15 credit hours for the Ph.D. The requirements for the dual-title degree include increased course work, additional components to the comprehensive exams at the doctoral level, and the completion of women's studies related theses at both the master's and doctoral level. Degree requirements for dual-title degrees in Political Science, French, History, English, Education, Geography, Curriculum and Instruction, and Philosophy will be added to the Women's Studies Graduate Handbook.

Master's Degree

9 required credits (WMNST 501, WMNST 502, WMNST 507)
3 additional credits of Women's Studies course work
Thesis on a Women's Studies-related topic, or another 3 additional credits of Women's Studies course work and a master's essay will be approved by the student's committee

Ph.D. Degree

9 required credits (WMNST 501, WMNST 502, WMNST 507)
9 additional credits of Women's Studies course work (at least 6 of these should be at the 500 level)
Comprehensive examination in Women's Studies and the disciplinary field
Dissertation on a Women's Studies-related topic will be approved by the student's committee

Foreign Language and English Competency Requirements

The student will fulfill the language requirement specified by the cooperating department through which the student is admitted to the dual-title degree program.

Candidacy

In order to be admitted to doctoral candidacy in the dual-title degree program, students must meet the Ph.D. candidacy requirements specified by the cooperating department. In addition, the student will be required to present a portfolio of work in Women's Studies to their committee. Such a portfolio would include a statement of the student's interdisciplinary research interests, a program plan, and samples of writing that indicate the student's work in Women's Studies.

Committee Composition

For a dual-title M.A./M.S., the recommended student's committee will include at least one Women's Studies-affiliated faculty member.

For a dual-title Ph.D., 2 out of 4 members of the committee will be Women's Studies-affiliated faculty members.

Comprehensive Exams

The Women's Studies affiliated faculty members on the student's committee are responsible for administering a comprehensive examination in Women's Studies that constitutes a portion of the student's comprehensive exams. The women's studies portion of the exam will focus on the following areas: feminist theory, feminist methodology, global feminism, and feminist studies in the student's discipline.

Dissertation

A dissertation on a women's studies topic is required of students in the dual-title degree program. The women's studies-related topic of the dissertation will be approved by the student's committee.

Women's Studies Minor

An interdisciplinary dual-degree graduate minor is available, administered by the Women's Studies program. Each student's major and minor is planned by the student and the Women's Studies graduate adviser in consultation with the student's graduate adviser in his or her major field.

Master's Minor Requirements: Master's-level dual-title degree students are required to take 9 credits of course work in Women's Studies: WMNST 501 Feminist Perspectives on Research and Teaching (3 credits); WMNST 502 Global Feminism (3 credits); and WMNST 507 Feminist Theory (3 credits). Students also must complete 3 additional credits in Women's Studies, chosen in consultation with the Women's Studies graduate adviser.

Doctoral Minor Requirements: Doctoral-level dual-title degree students are required to take 9 credits of course work in Women's Studies: WMNST 501 Feminist Perspectives on Research and Teaching (3 credits); WMNST 502 Global Feminism (3 credits); and WMNST 507 Feminist Theory (3 credits). Students also must complete 9 additional credits of Women's Studies course work (at least 6 of which should be at the 500 level), chosen in consultation with the Women's Studies graduate adviser.

9 credits required credits of Women's Studies courses for master's level
15 credits required credits of Women's Studies courses for doctoral level

The above credits are in addition to the requirements for the student's major. Six credits consist of required courses in feminist theory (3) and feminist methodology (3). The remaining credits may include a combination of WMNST 400- and 500-level courses, as well as special topics courses (numbered 497 and 597) and independent/individual studies (496 and 596).

Prescribed courses (6 credits): WMNST 507 Feminist Theory; WMNST 501 Feminist Perspectives on Research and Teaching

Additional courses (a minimum of 3 credits at the 500 level)

Student Aid

Graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the Graduate *Bulletin.*

Last Revised by the Department: Fall Semester 2001

Workforce Education and Development (WF ED)

Program Home Page (Opens New Window)

RICHARD A. WALTER, *Professor-In-Charge of Graduate Programs in Workforce Education and Development*
301 Keller Building
814-865-2133

Degrees Conferred:

Ph.D., D.Ed., M.S., M.Ed.

The Graduate Faculty

- Wesley E. Donahue, Ph.D. (Penn State) Associate Professor of Management Development
- Edgar I. Farmer, D.Ed. (Penn State) Professor of Education
- Kenneth C. Gray, Ed.D. (Virginia Tech) Professor of Education
- Judith A. Kolb, Ph.D. (U of Denver) Associate Professor of Education
- David L. Passmore, Ph.D. (Minnesota) Professor of Education
- Cynthia Pellock, Ph.D. (Penn State) Assistant Professor of Education
- William J. Rothwell, Ph.D. (Illinois) Professor of Education
- Richard A. Walter, Ph.D. (Penn State) Associate Professor of Education

The general focus of the program is preparation for entry into professional positions within the broadly conceived field of workforce education and development, including human resource development in industry, secondary and postsecondary technical education, and employability programs for special populations. Emphases within the program include: training and development/human resources, leadership/administration, school-to-work, and postsecondary technical and community college leadership.

Admission Requirements

Admission to graduate programs in Workforce Education and Development (WF ED) is based on the faculty's evaluation of a candidate's prior undergraduate and graduate work, relevant prior work experience including military service, and career goals. A minimum undergraduate GPA of 2.50 is required for admission to the master's degree program. A GPA of 3.00 in prior graduate course work is required for admission to the doctoral program.

Degree Requirements

Master's Degrees Requirements

M.Ed. and M.S. degrees are offered in Workforce Education and Development, both of which require a minimum of 30 credits beyond the baccalaureate degree. M.S. candidates must complete a master's thesis or paper. Candidates for the M.Ed. degree must complete a written comprehensive examination.

Doctoral Degrees Requirements

Both the Ph.D. and D.Ed. degrees are offered in Workforce Education and Development. Two or more years of prior full-time work experience that is relevant to WF ED is an important consideration in evaluating applications for the doctoral program. Students are admitted only for the fall semester. Beginning students are not formally granted candidate status for a doctoral degree until successfully completing the candidacy exam given in the spring semester. Please see WF ED Web site for further details.

Student Aid

A limited number of graduate assistantships available to students in this program and other forms of student aid are described in the STUDENT AID section of the *Graduate Bulletin*.

Courses

Graduate courses carry numbers from 500 to 599 and 800 to 899. Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

WORKFORCE EDUCATION AND DEVELOPMENT (WF ED) course list

Date last reviewed by the Graduate School: 4/15/04

Date last updated by Publications: 9/2/09

Graduate Minors

A graduate minor normally may be taken in only one of the approved graduate degree programs offered at Penn State. However, some formal graduate minors have been approved by the Graduate Council, such as the minors listed on this page. A minor at the graduate level should represent curriculum and study that reflect graduate-level concepts and scholarship, with a preponderance of courses at the 500 level. A doctoral minor consists of no fewer than 15 graduate credits of integrated or articulated work in one field related to, but different from, that of the major with a preponderance of courses at the 500 level; however, at a minimum, 6 credits must be at the 500 level. A master's minor consists of no fewer than 6 credits of integrated or articulated work in one field related to, but different from, that of the major; however, at a minimum, 3 credits must be at the 500 level.

Bioinformatics

The interdisciplinary graduate minor in Bioinformatics is administered by the Engineering Division at Penn State Great Valley and requires 15 graduate credits. The minor offers an opportunity for graduate students in all Penn State colleges and majors to pursue a focused set of graduate courses and gain core competency and experience in informatics, statistics, and ethics as they relate to the field of biotechnology.

Students complete a 9-credit core curriculum of SYSEN 509 Biostatistics, SWENG 552 Bioinformatics, and S T S 589 Ethics and Values in Science and Technology. Students then build upon the core by selecting 6 credits of electives focusing on database design concepts, data mining, and genetic algorithms.

Nine of the 15 credits in this minor may be applied toward the student's major program of graduate study. Students seeking admission to the Bioinformatics minor without appropriate prerequisite courses may be required to complete preparatory courses that are not applicable to either their major or minor program of study.

Additional information and application materials maybe found at www.gv.psu.edu/b www.gv.psu.edu/bioinformatics.

Review Date: 4/10/07

Last reviewed by Publications: 12/18/06

Second Language Acquisition

This interdepartmental doctoral minor draws upon the opportunities that various departments offer to study the processes of language acquisition and pedagogy, and to conduct research in these fields. Developments in the theories of language acquisition, the practices in language instruction, and the technical innovations provide a wide range of resources for secondary specializations in second language acquisition theory. The minor provides an official credential for doctoral students who complete an organized program of study.

The minor requires a minimum of 15 credits at the 400, 500, or 600 levels (beyond credits used for degree requirements in the student's field of study), consisting of one or two methodology courses totaling 3 credits and 12 additional credits selected from an interdepartmental list of eligible courses, with approval both by the student's doctoral committee in his or her major field, and by the person in charge of the minor. A maximum of 6 credits may be taken at the 400 level, and no more than 3 credits of 602 may count toward the minor. Courses in at least two departments must be included. Further, students must complete at least two semesters' experience in supervised teaching of either a foreign language or ESL, or alternative equivalent practicum if approved by the doctoral committee and the person in charge of the Minor.

In general, students whose major field of study in the Ph.D. is a concentration in foreign language acquisition or ESL are not eligible for this minor, as their field of specialization already includes this area. However, students in English as a Second Language may do the minor with a focus on foreign language acquisition or a student with a specialty area in forced language acquisition may complete the minor with a specialty area in English as a Second Language.

Social Thought

The purpose of the Social Thought minor is to enable graduate students in a variety of fields to study theories of society across conventional disciplinary boundaries. The minor enables qualified students to enrich their own chosen fields of study with readings and discoveries from other, contiguous fields. The minor requires at least 15 credits of courses with social thought content. These are courses taught by STP Affiliated Faculty or those approved by the STP Advisory Committee. Those 15 credits must include the following: at least 9 credits of courses from outside the student's major discipline and SOCTH 501 -- Introduction to Social Thought. In addition, at least one member of the student's dissertation committee must be an STP Affiliated Faculty and preferably be from outside the student's major discipline.

Women's Studies

This interdisciplinary dual degree graduate minor is administered by the Women's Studies program. Each student's major and minor is planned by the student and the Women's Studies graduate adviser in consultation with the student's graduate adviser in his or her major field.

MASTER'S REQUIREMENTS: Master's-level dual-title degree students are required to take 9 credits of course work in Women's Studies: WMNST 501 Feminist Perspectives on Research and Teaching (3 credits); WMNST 502 Global Feminism (3 credits); and WMNST 507 Feminist Theory (3 credits). Students also must complete 3 additional credits in Women's Studies, chosen in consultation with the Women's Studies graduate adviser.

DOCTORAL REQUIREMENTS: Doctoral-level dual-title degree students are required to take 9 credits of course work in Women's Studies: WMNST 501 Feminist Perspectives on Research and Teaching (3 credits); WMNST 502 Global Feminism (3 credits); and WMNST 507 Feminist Theory (3 credits). Students also must complete 9 additional credits of Women's Studies course work (at least 6 of which should be at the 500 level), chosen in consultation with the Women's Studies graduate adviser.

The minor requires a minimum of 9 credits of Women's Studies courses for a master's degree and 15 credits for a doctorate. These credits are in addition to the requirements for the student's major. Six credits consist of required course in feminist theory (3) and feminist methodology (3). The remaining credits may include a combination of WMNST 400- and 500-level courses, as well as special topics courses (numbered 497 and 597) and independent/individual studies (496 and 596).

Prescribed courses (6 credits): WMNST 507 Feminist Theory; WMNST 501 Feminist Perspectives on Research and Teaching. Additional courses (a minimum of 3 credits at the 500 level).

Computational Science

The Department of Aerospace Engineering administers this interdisciplinary minor. Each student's program is planned by the student and a designated computational science adviser, in consultation with the graduate adviser in the student's major field.

The minor offers an opportunity for students in all colleges and majors to pursue a focused set of courses that emphasize computational science. The minor requires 9 credits in computational science courses for a master's degree and 15 credits for a doctoral minor. All students are required to take the two-semester (3 credits total) computational science colloquium (AERSP 590). Six additional credits will be taken from AERSP 424, NUC E 530 or CSE 557 or MATH 523. For the Ph.D. minor, 6 additional credits will be chosen from a list of approved courses on the Computational Science Web site (see below). Each of the core courses will be offered every year. In addition, the course prerequisites can be met readily by students in science and engineering and many other disciplines.

More information can be found on the Computational Science Web site: http://www.csci.psu.edu.

Blue Sheet Item #: 35-06-540

Review Date: 4/10/07

Gerontology

The interdisciplinary graduate minor in Gerontology is administered by a committee of faculty appointed by the Gerontology Center Advisory Board. The committee members represent diverse programs within the University. Students admitted to the minor will develop a course of study that includes both prescribed course work and additional course work suited to the student's interests. The minor course of study will be developed jointly by the student, the student's academic adviser, and one member of the graduate minor gerontology committee. Contact the Gerontology Center (S-105 Henderson) for information regarding the committee membership.

The minor requires a minimum of 10 credits of the master's level and 15 credits at the doctoral level, 10 of which are prescribed. The prescribed courses are: BIOL 409 Biology of Aging (3); HD FS/PSYCH 445 Development throughout Adulthood (3); HD FS 590 Gerontology Colloquium (1); and SOC 435/HD FS 434 or SOC 535 (3). Doctoral students must select a minimum of 5 additional credits from among the following courses: ADTED 460, 505, CN ED 415, EDPSY 527, HD FS 446, 447, 579, H P A 442, KINES 481, 482, NURS 464, 500, NUTR 512, SOC 535, and gerontology-related special topics courses (SUBJ 497, 597) or independent studies (SUBJ 496, 596).

Latina and Latino Studies

The Latina and Latino Studies graduate minor is an interdisciplinary minor that will be administered by a faculty committee appointed by the dean of Liberal Arts and made up of faculty in English, Comparative Literature, Spanish, and other appropriate disciplines. Graduate students from across the university are encouraged to participate. Students who are admitted to the minor will develop courses of study suited to their special interests. The minor for each student will be planned jointly by the student, the student's doctoral adviser, and an adviser designated by the Latina and Latino Studies committee. Any change in the plan must be approved by both advisers.

A minimum of 15 credits must be completed. Per graduate school regulations for the minor, a representative of the minor will participate on the student's doctoral committee. This representative may be a member of the Latina and Latino Studies committee or any other faculty member approved by that committee.

Linguistics

The doctoral minor provides interested students with an opportunity to complete a program of scientific study focused on the nature, structure, and use of human language. The minor is designed to cover the foundations of the discipline of linguistics by reviewing fundamental core areas such as phonology and syntax. Course work is also available in many additional areas of linguistics such as semantics, morphology, language variation, historical linguistics, and discourse analysis.

The minor requires a minimum of 15 credits, 6 of which must be at the 500 level. Nine credits are prescribed in syntax (LING 400), phonology (LING 404), and a general introduction to linguistics (LING 401), although a linguistics course at the 500 level may be substituted for LING 401 with the approval of the director of the program in Linguistics.

Literary Theory, Criticism, and Aesthetics

This is an interdisciplinary doctoral minor that is administered by two designated advisers, one from the Department of Comparative Literature and one from the Department of Philosophy. Students who are admitted to the minor will develop courses of study suited to their special interests. The minor for each student will be planned jointly by the student and the two advisers, in consultation with the student's doctoral adviser in his or her major field. Any change in the plan must be approved by all of the advisers. A minimum of 15 credits must be selected from among the following courses (including at least 3 credits each in comparative literature and philosophy, chosen from the asterisked courses): ART H 410, CMLIT 502*, 503*, 580, ENGL 581, 582, 583, FR 571, GER 591, PHIL 413, 414*, 516*, 581, 582, SPAN 587, SPCOM 503, 505, 507, or THEA 503, 504. Note 1: 3 credits of SUBJ 596 in one of the nine subject areas indicated may be substituted for one of the non-asterisked 3-credit courses. Note 2: A student majoring in one of the nine subject areas may not include any courses in that field as part of the minor. Appropriate courses may be substituted.

Medieval Studies

The graduate minor in Medieval Studies offers graduate students in the humanities an interdisciplinary field of study in an important era in European development. The minor provides students with a broader historical and cultural background for their major discipline. Graduate status is required for admission to the minor.

The graduate minor in Medieval Studies requires 9 credits of course work (of which 3 credits are at the 500 level) for a master's candidate and 15 credits of course work (of which 6 credits are at the 500 level) for a doctoral candidate; the courses will be selected in consultation with an adviser for the minor, who will normally be a member of the Liberal Arts Medieval Studies Committee; and with the chair of the student's graduate committee. The courses for the minor will be chosen from at least two of the following areas outside the students' area of specialization: arts; history; literature and language; medieval studies; philosophy and religious studies; and other areas as available. The sequence of the courses will be determined by the student's major department.

Religious Studies

This is a graduate minor administered by the Religious Studies program leading to a minor at the master's or doctoral level. Each student's course of study would be planned jointly by the student and an adviser selected from the Religious Studies faculty, in consultation with the student's adviser in his or her major field.

The minor requires a minimum of 9 credits of Religious Studies courses for a master's degree and 15 credits for a doctorate. These credits are in addition to the requirements for a student's major. Three credits consist of a required course, Research in Religious Studies (RL ST/HIST 565). Students would select among 500-level Religious Studies course to fulfill the remaining requirements. These include: RL ST 532, 536, 539, 596, RL ST/HIST 510, 560, 561, 562, 563, 564.

With the consent of a student's adviser, the student may elect to take a 500-level course in a field closely related to Religious Studies that may help to satisfy the minor's requirements. This may not be in the student's major field.

Science, Technology, and Society

This interdisciplinary graduate minor is administered by the Science, Technology, and Society Program. Each student's program will be planned by the student and designated S T S graduate adviser, in consultation with the graduate adviser in the student's major field.

The goal of the graduate minor in Science, Technology, and Society is to complement graduate and professional students' major programs through study of the interactions among science, technology, and society. More specific objectives are to promote scholarship in the humanities and social sciences concerning the social and ethical dimensions of science and technology; to inform those training in the scientific and technical professions about the social and ethical dimensions of their professional practice; and to develop research and rhetorical skills used in shaping public discourses about, and public policies regulating, science and technology.

The minor requires 9 credits in S T S courses for a master's and 15 credits for a doctoral minor. Six credits consist of S T S 589 Ethics and Values in Science and Technology and S T S 591 Research and Writing in S T S. The remaining credits may include 400- and 500-level, special topics (S T S 497 and 597), and independent study (S T S 496 and 596) courses.
