

Academic Information and Procedures

It is each student's responsibility to know or seek out as needed the regulations and pertinent procedures of the Graduate School as set forth in the Graduate Degree Programs Bulletin and in the Thesis Guide and to meet the standards and requirements expressed by these regulations. The Graduate Bulletin is available online at www.psu.edu/bulletins/whitebook; the Thesis Guide is on the Thesis Office Web site at: forms.gradsch.psu.edu/thesis/thesisguide.pdf.

Graduate students are encouraged to contact the Office of Graduate Enrollment Services, 114 Kern Building (814-865-1795), for guidance if they have any questions, uncertainties, or difficulties concerning any procedure or regulation of the Graduate School or any procedure or regulation of the University as it may affect them.

In addition, all programs should have a graduate handbook, which provides students with information on specific program requirements and procedures from admission to degree completion (i.e., arrangement of courses in accordance with degree requirements including required courses and typical elective courses; appointment of advisors and/or committees; responsibilities of the student, advisor and committee; scheduling of exams; assistantship duties; etc.).

UNSATISFACTORY SCHOLARSHIP

A graduate student who fails to maintain satisfactory scholarship or to make acceptable progress in a degree program may be dropped from the University. One or more failing grades or a cumulative grade-point average below 3.00 for any semester or session or combination of semesters and/or sessions may be considered as evidence of failure to maintain satisfactory scholarship. Action may be initiated by the department or committee in charge of the graduate major or by the chair of the student's doctoral committee. The procedures to be followed in such action are found in [Appendix III](#) in this bulletin.

CONFIDENTIALITY OF STUDENTS' RECORDS

The Pennsylvania State University collects and retains data and information about students for designa-~~ted~~ periods of time for the express purpose of facilitating the students' educational development. The University recognizes the privacy rights of individuals in exerting control over what information about themselves may be disclosed and, at the same time, attempts to balance that right with the institution's need for information relevant to the fulfillment of its educational missions.

The University further recognizes its obligation to inform the students of their rights under the Family Educational Rights and Privacy Act of 1978 (FERPA); to inform students of the existence and location of records as well as to define the

purposes for which such information is obtained; to provide security for such material; to permit students access to, disclosure of, and challenge to this information as here- in described; and to discontinue such information when compelling reasons for its retention no longer exist.

Student Record Policy--No information from records, files and data directly related to a student shall be disclosed by any means (including telephone) to individuals or agencies outside the University without the written consent of the student, except pursuant to lawful subpoena or court order, or in the case of specifically designated educational and governmental officials as required by FERPA. Information contained in such records may be shared within the University by University officials with "legitimate educational interest" in such information.

A more complete description of the University's policy on confidentiality of student records, including educational records and alumni records; disclosures to students, third parties, agencies and parents of dependent students; and challenges to entries, is contained in *Policies and Rules*, which is available at departmental and deans' offices.

Programs and Advanced Degrees

PROGRAMS

Major Program--A student's major program is the field of primary interest and the one in which the greater portion of graduate work is taken. Programs are designed to prepare students to assume positions of informed and responsible authority in their fields and to contribute creatively to them. They promote not only specialization, but also breadth of scholarship, the ability to study and think independently, and familiarity with the principal techniques and important literature in the field. The research undertaken by the candidate should deal with a problem that can yield a significant contribution to knowledge.

In general, departments of the University are identified with specific major programs. Thus, Aerospace Engineering is the program of study that is offered by the Department of Aerospace Engineering. In some cases, a single department offers work in more than one degree program. Occasionally, two or more departments within a college collaborate in offering an interdisciplinary program.

Intercollege Graduate Programs--When faculty members from departments in two or more colleges collaborate in offering a graduate major, the program is designated as an intercollege graduate degree program. A committee of graduate faculty members approved by the Graduate School is responsible for administering the program under a program chair. The University currently offers more than a dozen such programs, primarily at the doctoral level. They are included and identified in the listings at the beginning of this bulletin. Students interested in these programs should contact the program chair listed in the program description in this bulletin.

ADVANCED DEGREES OFFERED

The degrees of Doctor of Philosophy, Doctor of Education, and Doctor of Musical Arts are conferred by the University. The Ph.D. places a strong emphasis on research. The D.Ed. strongly emphasizes professional competence in a field of education. All require high attainment and productive scholarship.

The Master of Arts and the Master of Science degrees are academic in nature, the programs placing emphasis on basic knowledge and research. A number of professional master's degrees also are conferred: Master of Accounting, Master of Agriculture, Master of Applied Statistics, Master of Architecture, Master of Biotechnology, Master of Business Administration, Master of Education, Master of Engineering, Master of Environmental Pollution Control, Master of Finance, Master of Fine Arts, Master of Forest Resources, Master of Geographic Information Systems, Master of Health Administration, Master of International Affairs, Master of Landscape Architecture, Master of Leadership Development, Master of Manufacturing Management, Master of Music, Master of Music Education, Master of

Professional Studies, Master of Project Management, Master of Public Administration, and Master of Software Engineering.

Graduate degree programs are offered at five campuses of the University: University Park (State College); Penn State Erie, The Behrend College (Erie); Penn State Harrisburg (Harrisburg); the Penn State Milton S. Hershey Medical Center (Hershey); and Penn State Great Valley (Malvern). Some graduate programs also are offered online through Penn State's World Campus at www.worldcampus.psu.edu ([Opens New Window](#)).

CHANGE OF DEGREE OR PROGRAM

A graduate student who has been admitted for work in one major program but who wants to transfer to another should complete a “Resume Study/Change of Degree or Major” form and submit the request to the Office of Graduate Enrollment Services. The student’s credentials will be reviewed and the proposed new major department head or committee chair consulted. If the change is approved but the student is inadequately prepared for the new major, the student may be required to make up certain deficiencies.

A graduate student admitted for either an academic degree (M.A., M.S., or Ph.D.) or a professional degree (M.Acc., M.Agr., M.A.S., M.Arch., M.Biot., M.B.A., M.C.P., M.E.P.C., M.Ed., M.Eng., M.F.A., M.Fin., M.F.R., M.G.I.S., M.H.A., M.I.A., M.L.A., M.L.D., M.M.E., M.M.M., M.Mus., M.P.A., M.P.M., M.P.S., M.S.E., D.Ed., or D.M.A.) who wants to change from one type of degree program to another must complete a “Resume Study/Change of Degree or Major” form and submit the request to the Office of Graduate Enrollment Services. Similarly, a student who has earned a master’s degree but who wants to earn a doctoral degree in a different field must complete a “Resume Study/Change of Degree or Major” form and submit the request to the Office of Graduate Enrollment Services. A student may be required to make up certain deficiencies if inadequately prepared for the new program.

CONCURRENT CANDIDACIES

In general, graduate students are best advised to focus on one degree objective at a time. However, a candidate for a master’s degree in one major field who wishes to begin work for either a master’s or a doctoral degree in a second field; or a candidate for a doctoral degree who wishes to begin work on a master’s degree in a second field while concurrently completing the doctoral program can petition to do so (approval will not be granted for concurrent double Ph.D. or D.Ed. degrees). The department heads of both fields and the director of Graduate Enrollment Services must approve any such plan. Guidelines for preparation of a proposal for concurrent candidacies have been established by the Graduate Council and are available in the Office of Graduate Enrollment Services, 114 Kern Building.

DUAL-TITLE DEGREE PROGRAMS

Students may apply for dual-title degrees in one of the dual-title programs approved by the Graduate Council. Students wishing to follow this course of action must already be enrolled in an existing graduate program and have a primary program in which the greater portion of the work will be conducted. The primary program will be supplemented by a secondary program in which substantial work is carried out under the supervision of a faculty adviser from the secondary program. Guidelines and information are available from the dean of the Graduate School.

Integrated Undergraduate-Graduate Study--The Schreyer Honors College offers selected baccalaureate degree candidates the opportunity to integrate undergraduate and graduate courses of study in a continuous program culminating in both a baccalaureate and a master's degree.

A University Scholar who is granted Integrated Undergraduate–Graduate (IUG) status will have dual enrollment in an undergraduate program and in the Graduate School. Some credits earned as an undergraduate may be applied to both degree programs. Guidelines and information are available from The Schreyer Honors College.

Other Integrated Undergraduate-Graduate Programs--A limited number of approved Integrated Undergraduate–Graduate programs other than those in The Schreyer Honors College are also offered. These programs allow students to work on an undergraduate and a graduate degree at the same time and are intended for exceptional students who can perform their academic studies at an accelerated pace and take on the challenges of graduate courses and research while still enrolled as undergraduates. Typically, a certain number of credits may be applied to both degrees, and the total time for completing both degrees is less than if the degrees were earned separately. These programs include those within a single department, such as the B.L.A./M.L.A. in Landscape Architecture, the B.Arch.-M.S.Arch. program, the B.A./M.A. in Comparative Literature, and B.A.E./M.A.E. in Architectural Engineering; and also those that are interdepartmental or intercollegiate programs, and the integrated five-year science/business B.S./M.B.A. program. Guidelines and information are available from the dean of the Graduate School.

Registration

A graduate student who is in residence at the University is expected to be properly registered. In residence means that the student (whether full- or part-time, whether commuting to campus or other instructional site or living nearby or on campus) is pursuing graduate credits and/or an advanced degree by (a) attending classes or seminars for credit or audit; (b) doing a thesis, term project, independent study, or similar research or scholarly work in a University laboratory or other research facility; (c) consulting in person or by other means of communication with one or more faculty members on scholarly matters, research projects, or dissertation; (d) using the library, Computation Center, or other University information resources; or (e) using other University facilities provided for graduate study.

The responsibility for being properly registered rests first with the student and secondarily with the student's adviser if the student has one (nondegree students may not). A student may register for course work or research or a combination of the two. In the case of research the number of credits shall be determined by the amount of time devoted to the investigation, with 1 credit representing approximately the equivalent of one week of full-time work. In the later stages of the program, the situation will determine the requirements for the student's registration. (See Registration Near the Completion of a Program.)

International Students--Because international students on an F1 or J1 visa are required by the Department of Homeland Security regulation to be in residence, all international students need to be registered for full-time status (fall and spring semester), unless an exception to full-time enrollment has been approved. Students who fail to register may jeopardize their status.

Advisers--Advising is an important factor in enhancing the quality of a student's program. To assist the student in planning a coherent program and meeting all degree requirements, the head of the major department or program chair will designate a member of the faculty to serve as adviser. It is the student's responsibility to secure an adviser from the department or program and to seek a conference before each registration.

Time of Registration--Registration days are indicated in the calendar at the beginning of this bulletin. A student is expected to complete registration during the officially designated period and to attend the first meeting of all classes. If this is impossible because of some emergency or unusual circumstance, the student may be granted permission by the instructor to miss a few class meetings, it being understood that work missed will be made up subsequently. Under these conditions permission may be granted through the Office of Graduate Enrollment Services for the student to register late. In general, a student who receives permission to register late will be required to reduce the course load in proportion to the length of absence.

A student who fails to complete the process of registration within the officially

designated registration period will be liable for the late registration charge, regardless of when the student begins attending classes.

Continuity of Registration--A student who is a degree candidate at any of the five graduate campuses of the University and who registers there without interruption for each fall and spring semester is considered to have maintained a normal continuity of registration. A student who has been admitted as a "summers only" D.Ed. candidate (see D.Ed. Residence Requirements) can maintain continuity by registering each summer for a six-week summer session.

Anyone who has interrupted such a normal sequence and now plans to register for work at the University Park campus is required to apply to the Office of Graduate Enrollment Services, 114 Kern Building, or via the Web at www.gradsch.psu.edu/current/current.html (Opens New Window).

The policy may be summarized for any specific semester or session as follows:

- *Summer Session*--Resume Study/Change of Degree or Major form required unless the student was registered for the preceding spring semester or the preceding summer session (if "summers only" student).
- *Fall Semester*--Resume Study/Change of Degree or Major form required unless the student was registered for the preceding summer session or the preceding spring semester.
- *Spring Semester*--Resume Study/Change of Degree or Major form required unless the student was registered for the preceding fall semester.

Withdrawal--The dropping of all academic work for which a student is registered in any semester constitutes withdrawal from the University, and changes the student's status to nondegree. A "Resume Study/Change of Degree or Major" form must then be submitted and approved if the student wants to enroll for further work toward a degree.

Procedure--For each registration, it is expected that the student, in consultation with the adviser, will prepare a schedule of courses and research designed to fit individual needs and meeting the pertinent credit limits. The registration process is completed in the manner specified for all students at the University.

Under certain conditions credit may be earned for work done away from the campus. A student contemplating such work should first consult with his or her adviser and then inquire at the Office of Graduate Enrollment Services about the procedures and conditions. The student must assume responsibility for the registration process, by accessing the Registrar's Web site at www.registrar.psu.edu (Opens New Window). Registration must be completed before the close of central registration at University Park campus.

A student must register for courses audited as well as those taken for credit.

REGISTRATION NEAR THE COMPLETION OF A PROGRAM

A candidate for the Ph.D. degree is required to register continuously for each semester from the time the comprehensive examination is passed and the two-semester residence requirement is met until the thesis is accepted by the doctoral committee, regardless of whether work is being done on the thesis during this interval. (See Registration and Continuous Registration.)

Although there is no general continuous registration requirement for D.Ed. degree candidates and master's students, individual programs may require it. It should be noted, moreover, that (a) proper registration (see Registration) is expected of all graduate students; (b) graduate assistants must carry the prescribed credit loads (see Credit Loads and Academic Status); and (c) because of visa considerations, international students typically will register every semester, no matter what their degree objectives.

A master's candidate is not required to register for the final semester in order to graduate or in order to make minor revisions to the thesis and/or to take a final examination for the degree, unless required to do so by the program.

Graduate Credits

Typically, a candidate for an advanced degree is required to earn a certain minimum number of credits at Penn State. Consequently, there is a limit to the number of credits that may be earned at another approved institution to meet the minimum requirements of the degree. Moreover, the department or committee in charge of a major program may require a student to do more of the work at the University than specified by the limitations set by the Graduate Faculty.

Full-time participation in graduate study involves a wide range of activities. The nature of these activities varies because of the diversity of programs throughout the University. The graduate student is responsible for ascertaining, through the adviser and/or program office, the range of total activity of his or her individual program that constitutes normal progress toward the degree.

A self-supported or fellowship student who is registered for at least 9 credits is considered to be engaged in full-time academic work for that semester. If such a student wishes to register for more than 15 credits, an exception to the normal maximum load must be granted through petition (with adviser's approval) to the Office of Graduate Enrollment Services.

Credit limits and full-time status for assistants and University employees are described under Assistantships and Credit Loads and Academic Status.

Graduate courses carry numbers from 500 to 599 and 800 to 899.

--A 500-level graduate course builds on advanced undergraduate and/or graduate courses, dealing with the frontiers of knowledge in the field. It is grounded in theories, hypotheses, and methodologies as expounded in current and/or primary literature sources. Synthesis of knowledge and independent analytical work by the student must be demonstrated. Significant interaction among students and with the instructor(s) is expected.

--An 800-level graduate course pertains to the most recently established knowledge and methodologies in a field of study, as applied to practice. It emphasizes analytical thinking and application of knowledge by the student in the context of providing pragmatic solutions for professionals. Significant interaction among students and with the instructor(s) is expected.

Advanced undergraduate courses numbered between 400 and 499 may be used to meet some graduate degree requirements when taken by graduate students. Courses below the 400 level may not. Language courses used to meet foreign language requirements are exceptions, as are the ESL courses for international students.

No student is permitted to count audited credits toward the minimum credit load for full-time or part-time status.

Course-Numbering System--Courses in the series 1-399 are not listed in this bulletin because they are strictly undergraduate courses and yield no graduate

credit. A graduate student may register for or audit these courses in order to make up deficiencies or to fill in gaps in previous education but not to meet requirements for an advanced degree.

Courses in the series 400–499 are for upperclass students with at least a junior standing and for graduate students. Only a limited number of credits earned in these courses may be counted toward the requirements for an advanced degree. Detailed regulations concerning the restrictions are given under the specific requirements for the various master's degrees.

Courses in the series 500–599 and 800-899 are restricted to students registered in the Graduate School, senior undergraduate students with an average of at least 3.50, and certain other students with averages of at least 3.00 who have been granted special permission to enroll through the Office of Graduate Enrollment Services. (See the introduction to Graduate Programs, Faculty, and Courses for a more detailed description of these courses.)

The numbers 600 (on campus) and 610 (off campus) are available for credit in thesis research in all graduate major programs. The numbers 601 and 611 do not denote conventional courses but are used for noncredit special registration for thesis preparation by a Ph.D. candidate. (Note that 596 course numbers may not be used for thesis research work.) Registration under these numbers will maintain status as a full-time (601) or part-time (611) student during the interval that begins at the time the student passes the comprehensive examination and meets the two-semester residence requirement and ends at the time the doctoral committee accepts the thesis. The student may register for 601 if engaged full-time in the preparation of a thesis or for 611 if engaged only part-time in thesis preparation. Candidates for the Ph.D. degree do not receive grades for noncredit registrations (601 and 611). [See also Ph.D.—Additional Specific Requirements and the common course descriptions in the introduction to Graduate Programs, Faculty, and Courses.]

Schedule of Courses--The most current information on courses that will be offered in any specific semester is at <http://soc.our.psu.edu/soc> ([Opens New Window](#)). It gives the number of the class, the hours at which the class will meet, the location of the class, and in some cases the instructor's name.

Visiting and Auditing Classes--A graduate student registered for a given semester who wants to attend classes without receiving credit may secure permission either to visit or to audit courses during that semester.

As a visitor, a student may attend classes with the approval of the instructor but may not claim the usual privileges of class membership, such as participating in discussion, doing practicum work, or taking examinations. Registration is not required for the privilege of visiting, and no record appears on the student's transcript.

As an auditor, a student may participate in class discussion, do practicum work, take examinations, and generally enjoy the privileges of a class member. Registration procedures and fee payment are the same as for taking the course for credit. Attendance is required. No credit is given, either on completion of the

course or at a later time; however, the number of credits assigned to the course appears on the grade report and on the student's transcript. Thus, when a student receives an audit grade, the number of credits audited is shown. The symbol AU shall be used if attendance has been regular, the symbol W if attendance has been unsatisfactory.

A graduate assistant or Fellow who is required to register for a certain minimum number of credits is not permitted to count audited course credits toward the minimum credits needed. Undergraduate courses taken to meet foreign language or English requirements do count in the total credit load. The student may register for credit or audit beyond the required minimum but may not exceed the normal maximum without special permission.

Credit Loads and Academic Status

Graduate Assistants--Graduate assistants must be enrolled at Penn State as graduate students. More specifically, since assistantships are provided as aids to completion of advanced degrees, assistants are expected to enroll for credit loads each semester that fall within the limits indicated in the table below. Maximum limits on permissible credit loads are indicated in order to assure that the student can give appropriate attention both to academic progress and assistantship responsibilities. These considerations give rise to the table of permissible credit loads below.

Level of Assistantship	Credits Per Semester		Credits per 6-Week Summer Session	
	Minimum	Maximum	Minimum	Maximum
Quarter-time	9	14	5	7
Half-time	9	12	4	6
Three-quarter-time	6	8	3	4

*Credits taken over both six-week summer sessions must total a minimum of 9 (for 1/4- and 1/2-time assistantships) or 6 (for 3/4-time assistantships) and cannot exceed a maximum of 8 (for 3/4-time assistantships), 12 (for 1/2-time assistantships), or 14 (for 1/4-time assistantships).

To provide for some flexibility, moderate exceptions to the specified limits may be made in particular cases. The credit limits specified above may only be increased or decreased in exceptional cases for a specific semester or summer session by permission of the assistantship supervisor, the student's academic adviser, and the dean of the Graduate School (requests should be submitted for the dean's approval via the Office of Graduate Enrollment Services). The Graduate School expects that an exception made in one semester or summer session will be compensated for by a suitably modified credit load in the subsequent semester or summer session, so that, on the average, normal progress is maintained at a rate falling within the limits above. Failure to do so may jeopardize the student's academic status. Maintenance of the established credit loads and responsibility for consequences of a graduate student's change of course load rest with the student and adviser. The course load is a factor in determining whether a graduate student is classified as a full-time or part-time student; has met residence requirements; and is eligible to hold a fellowship, traineeship, assistantship, or departmental or program appointment.

Full-Time Academic Status--Students holding fellowships, traineeships, or other awards based on academic excellence are required to carry 9 or more credits each semester (fall and spring). For awards that require full-time summer registration, students should register for a minimum cumulative total of nine credits (over all summer sessions), or SUBJ 601 (in the case of post-comprehensive doctoral candidates). A graduate assistant whose semester or summer session credit load

exceeds the minima in the above credit table and whose assistantship duties are directly related to his or her degree objectives is considered by the Graduate School to be engaged in full-time academic work for that semester or summer. A post-comprehensive doctoral candidate who is registered for SUBJ 601 also is so considered.

Part-Time Academic Status--A student who in any semester or summer session is registered for study but who does not meet the criteria for full-time status is considered to be engaged in part-time academic work for that semester. This includes students registered for SUBJ 611.

Credit Loads for Internationals--The Department of Homeland Security requires that international students proceed in a timely fashion toward completion of their degrees, as established by the academic department and (usually) stated on their initial immigration document. Failure to maintain normal progress toward completion of the degree during this period will jeopardize the student's ability to continue academic study, adjust status, or seek future employment in the United States. Because of this, students should not be enrolled less than full-time during fall or spring semester without approval of International Student Services (ISS).

The U.S. Department of Homeland Security requires the ISS to report violations of status, including failure to maintain full-time enrollment. The following is intended to provide guidance for international graduate students and for ISS in determining full-time status:

- A graduate student is considered full-time if registered for a minimum of 9 credits, excluding courses taken for audit, or if a Ph.D. candidate who has successfully completed the comprehensive examination and is registered for SUBJ 601.
- On rare occasions, and under exceptional circumstances, international students in master's degree programs who have completed all required course work and, if applicable, research for their degree, may be granted an exception to the need to maintain full-time status as defined above, for a limited period (in no case to exceed two semesters), by special petition to ISS in advance of the semester in which the exception is needed. This request must be accompanied by a letter from the chair of the graduate program in which the student is enrolled verifying that all course and any research requirements have been completed, and indicating support for the request. ISS may consult with the Office of the Dean of the Graduate School in determining whether specific requests are appropriate and justified.
- Under all circumstances, international students must maintain registration for at least 1 credit as stipulated earlier in this bulletin. (See Academic Information and Procedures/International Students.)

Employment--Many students depend upon part-time employment to help meet their expenses. A student who is thus employed, whether on or off campus, must recognize the time demands of a work schedule in planning an academic program. A student holding a fellowship or scholarship may not accept employment of any kind for service beyond that specifically permitted by the appointment. A graduate assistant may assist in classroom or laboratory instruction, in research

or in other work. The tasks assigned to a graduate assistant often are identical in nature to those required for the advanced degree sought. Additional compensation is paid to a graduate assistant by the University for additional hours of work only with special, advance approval of the administrative head of the academic unit in which the assistantship is held, and of the chair of the student's graduate academic program, and provided that such compensation is not for additional hours of work on the assigned assistantship duties. A graduate assistant may not hold a concurrent appointment with the University other than a Fellowship Supplement.

For international students, guidelines for assistantships or employment are the same as for domestic students, with the following distinctions: (a) I-9 and W-4 forms must be processed through ISS; (b) vacation period employment may be up to forty hours per week; and (c) since Department of Homeland Security regulations on employment are subject to change, all employment off campus for international students must be cleared through ISS.

Full-Time Employment Off Campus--A candidate for the Ph.D. degree at a particular campus of the University may not count the work of any semester toward the residence requirement for this degree while engaged in full-time employment off campus or at a different campus of the University.

Staff Employee Credit Status--A full-time staff employee of the University may schedule up to 16 credits per academic year, either for credit or audit.

Full-time University employees may meet Ph.D. degree residence requirements by registering for 6 credits per semester or 4 credits per eight-week summer session and by obtaining certification from the department head as being principally engaged in activities directly relating to their degree objectives. A post-comprehensive full-time University employee may not register for SUBJ 601 (i.e., full-time thesis preparation), but may register for SUBJ 611 (part-time thesis preparation).

No academic employee above the rank of instructor or research assistant or equivalent may receive from the University a master's degree or doctoral degree in any graduate program where the faculty member has membership, teaches courses, serves on master's or doctoral committees, or has other supervisory responsibilities that might give rise to conflicts of interest. The faculty member should inform his/her department head of his/her intention to pursue an advanced degree.

University staff employees who want to take graduate degree work must first be admitted to the Graduate School.

Grading System

A grade is given solely on the basis of the instructor's judgment as to the student's scholarly attainment. The following grading system applies to graduate students: A (EXCELLENT) indicates exceptional achievement; B (GOOD) indicates substantial achievement; C (SATISFACTORY) indicates acceptable but substandard achievement; D (POOR) indicates inadequate achievement and is a failing grade for a graduate student—a required course in which a D has been obtained cannot be used to meet degree requirements; and F (FAILURE) indicates work unworthy of any credit, and suggests that the student may not be capable of succeeding in graduate study. The grade-point equivalents for the above marks are: A, 4.00; B, 3.00; C, 2.00; D, 1.00; F, 0. A minimum grade-point average of 3.00 for work done at the University is required for all graduate degrees. In Fall 1995 a +/- grading system went into effect that includes A-, B+, B-, and C+. The grade-point equivalents are A-, 3.67; B+, 3.33; B-, 2.67; and C+, 2.33.

In addition to the quality grades listed above, two symbols, DF (deferred) and R, may appear on a student's transcript. If work is incomplete at the end of a semester because of extenuating circumstances, the instructor may report DF in place of a grade, which will appear temporarily on the student's record. It is not appropriate to use the DF either casually or routinely to extend a course beyond the end of the semester or to extend a course for a student who has failed so that the individual can do extra work to improve the grade. The DF must be removed (i.e., the course must be completed) within nine weeks of the beginning of the succeeding semester, with two possible exceptions: (a) a completion deadline longer than nine weeks may have been previously agreed upon by the instructor and student, with a memo on the agreement having been sent to the Office of Graduate Enrollment Services, 114 Kern Building, for inclusion in the student's file; or (b) as the nine-week deadline nears, it may become evident that an extension is warranted. The instructor then sends a request for an extension (to a specified date) to the Office of Graduate Enrollment Services, with a justifying statement.

It is to be emphasized that no deferred (DF), missing(*), or no grades (NG) may remain on the record at those times when a student reaches an academic benchmark. Benchmarks include completion of a degree program (e.g., master's completed for a student continuing through for a doctoral degree) and the doctoral candidacy, comprehensive, and final oral examinations. Graduate programs may add additional benchmarks.

It is further noted that there are only three circumstances under which a course grade, once assigned, can be changed: (1) if there was a calculational or recording error on the instructor's part in the original grade assignment (Senate Policy 48-30); (2) if it is a course for which an R grade has been approved and in which an initial R can be assigned and changed later to a quality grade; (3) if, as discussed above, a DF was assigned and the deadline for course completion has not yet passed.

Grade changes are governed by Senate Policy 48-30, found in Policies and Rules.

In the case of thesis work, either in progress or completed, and in certain courses (e.g., 590, 594, 595, 596, 597, 598, 599, 894, 895, 896, 897, 899, and a few others) approved by the Graduate Council, the instructor may report the symbol R in place of a grade. An R does not influence the grade-point average. It indicates that the student has devoted adequate effort to the work scheduled but gives no indication of its quality. The symbol may be used, for instance, in courses that are officially designed to extend over more than one semester or in courses for which a quality grade is not appropriate. An R in an approved graduate course need not be changed later to a quality grade. Graduate courses approved for R grading may be credited toward fulfilling graduation requirements. However, if the instructor deems it appropriate, the R grade may be changed to a quality grade when the course work has been completed. Normally, if a quality grade is to be assigned, the grade must be reported no later than the end of the following semester.

When reported for thesis work, an R will not influence the grade-point average and remains on the student's transcript if not converted to a quality grade within one semester of its recording. *The Graduate Council has established upper limits of 6 credits of quality grades for master's thesis research and 12 credits for doctoral dissertation research. The remaining credits must be assigned Rs except in the case of academic or disciplinary sanctions, in which case an F or XF grade may be assigned, as appropriate, up to the total number of thesis research credits (600 or 610) on record. (See Senate Policy 49-20 and Procedures G-9, as well as [Appendix II](#) of this bulletin).*

Pass-Fail (P/F) grading is used exclusively in certain graduate courses where it has been requested by the program and approved by the graduate dean following guidelines established by the Graduate Council. A grade of P does not influence the GPA, but an F does.

Thesis

Thesis Research--To register for thesis research in all graduate major programs, a student uses the appropriate number (600 for on campus, 610 for off campus) preceded by the abbreviation designating the major field. The Bursar's office assesses charges for these courses at the current rate of tuition according to the student's status at the time of registration.

Students registering for 600 or 610 should be aware that the Graduate Council has established limits on the total number of research credits that can be assigned letter grades in a student's program (i.e., other than R): 6 credits for master's candidates and 12 credits for doctoral candidates.

Thesis Preparation--The numbers 601 and 611 are available to Ph.D. degree candidates only and are used for special noncredit registration for thesis preparation work. Such candidates must have passed the comprehensive examination and must have met the two-semester residence requirement. A candidate registered for SUBJ 601 is classified as a full-time student, while one registered for SUBJ 611 is classified as a part-time student.

The numbers 600, 601, 610, and 611 may not always appear in the Schedule of Courses for each semester, but they are available for registration each semester.

Thesis Deposit--When a student completes a thesis or a dissertation, an archival copy must be submitted to the Graduate School (see Thesis Acceptance). After acceptance by the Graduate School, the document is available through the University Libraries.

Graduation

Students who plan to graduate at the end of the current semester/session are responsible for indicating an intent to graduate. A student must initiate an intent to graduate via eLion during the designated period for that semester. Any changes to a student's graduation status after this time period must be made by contacting Graduate Enrollment Services at 814-865-1795.

Students who have been removed from the graduation list will need to initiate their intent to graduate again for the semester in which they plan to graduate.

A preliminary graduation list is prepared and reviewed by Graduate Enrollment Services soon after the deadline for each semester or summer session. Accepted theses, master's papers, and project reports are noted as may be relevant. The records of candidates who appear to have met requirements are forwarded to major and minor department heads or program chairs for review and recommendation. The final list of approved candidates appears in the fall, spring, or summer commencement program.

Only those transfer credits that have been accepted by the Graduate School and entered upon the student's transcript before the graduation deadline will be considered in evaluating a student for graduation at the end of that particular semester or summer session.

The University holds commencement exercises for graduate students three times a year: at the end of the fall and spring semesters and at the end of the summer session. Attendance at commencement exercises is expected. Diplomas are mailed to all students unable to participate in the commencement exercises. Information is available at the Office of the University Registrar, 112 Shields Building, or by accessing the Registrar's Web site at www.registrar.psu.edu ([Opens New Window](#)).

Even though the student's name may appear in the commencement program, no degrees are conferred until final grade reports have been received and all requirements fulfilled. A student's transcript or diploma, or both, may be withheld until any outstanding financial obligations to the University have been paid.

Admission

The Pennsylvania State University is committed to the policy that all persons shall have equal access to programs, facilities, admission, and employment without regard to personal characteristics not related to ability, performance, or qualifications as determined by University policy or by state or federal authorities. It is the policy of the University to maintain an academic and work environment free of discrimination, including harassment. The Pennsylvania State University prohibits discrimination and harassment against any person because of age, ancestry, color, disability or handicap, national origin, race, religious creed, sex, sexual orientation, or veteran status. Discrimination or harassment against faculty, staff, or students will not be tolerated at The Pennsylvania State University. Direct all inquiries regarding the nondiscrimination policy to the Affirmative Action Director, The Pennsylvania State University, 328 Boucke Building, University Park, PA 16802-2801, Tel 814-863-0471; 814-863-1150/TTY.

Application and Admission Procedures

Each step of the educational process, from admission through graduation, requires continuing review and appropriate approval by University officials. The University, therefore, reserves the right to change the requirements and regulations contained in this bulletin and to determine whether a student has satisfactorily met its requirements for admission or graduation, and to reject any applicant for admission for any reason the University determines to be material to the applicant's qualification to pursue higher education.

An applicant for admission to the Graduate School should understand that graduate work is not a simple extension of an undergraduate program but, rather, demands scholarship of a higher order, and emphasizes research, creativity, and professional competence with a minimum of formal requirements and a maximum of student initiative and responsibility.

Objective--The objective of the admission process of the Graduate School is to identify and admit a qualified graduate student body up to the limit of the University's resources to provide outstanding graduate programs. In most programs, a student may begin graduate work in the fall or spring semester or in the summer session.

As at all universities, Penn State's staff, facilities, and other resources are limited, so that not all qualified persons can be admitted. The number accepted will vary by program and from semester to semester. In some graduate programs all vacancies will have been filled long before the deadline for submitting applications, so that even outstanding students cannot be accepted.

Degree Admission--Applicants interested in applying to a graduate program at Penn State should obtain information on individual program requirements via the Web site at www.gradsch.psu.edu/prospective/program.cfm ([Opens New Window](#)). Applicants may apply for admission to only one program at a time.

Qualifications--For admission to the Graduate School, an applicant must hold either (1) a bachelor's degree from a U.S. regionally accredited institution or (2) a postsecondary degree that is equivalent to a U.S. baccalaureate degree earned from an officially recognized degree-granting international institution. Ordinarily, an entering student must have completed in a satisfactory manner a minimum of course work in designated areas, the specific courses and amount of work depending upon the intended field of advanced study. Scores on the Graduate Record Examinations (GRE) General Test are required by most programs. Individual program requirements for admission are included under the specific program descriptions. Information about GRE publications can be obtained by calling the Educational Testing Service in Princeton, New Jersey, USA at 1-866-473-4373 or writing to GRE, Educational Testing Service, P.O. Box 6000, Princeton, NJ USA 08541-6000. If you prefer, you may send an e-mail to gre-info@ets.org or order publications through the Web site at www.gre.org ([Opens New Window](#)).

Provisional admission may be granted to applicants whose credentials are not complete at the time of application because the baccalaureate degree has not yet been conferred, grades for the current semester are not yet available, etc. Such admission is subject to cancellation if the complete credentials, on arrival, do not meet the requirements for admission. In the interim, certification of any earned credits will be withheld. If admission is canceled for any reason, the student is dropped automatically from the Graduate School. Completion of admission in such cases is dependent upon receipt of the missing credentials. (See Provisional Admission under Classification of Students.)

Admission is granted jointly by the Graduate School and the department or graduate program in which the student plans to study. The establishment of standards by which applicants are admitted is a departmental or program responsibility. Although the Graduate School has no fixed minimum grade-point requirement for admission, an applicant is generally expected to maintain a junior-senior grade-point average of at least 2.50 on Penn State's grading scale of A (4.00) to D (1.00). Individual programs often establish higher grade-point average requirements and use other criteria to judge candidates for admission. In exceptional cases, departments or major programs may also approve admission by reason of special backgrounds, abilities, and interests. Departmental or program requirements are given in the descriptive statements appearing under the graduate programs listed in the latter part of this publication.

A student who has been admitted to a program in which the doctorate is offered may begin working toward that degree but has no official status as a doctoral student and no assurance of acceptance as a doctoral candidate until a candidacy examination administered by the major department or committee has been passed. (See Candidacy Examination under Graduate Degree Requirements.)

Deadlines--Applicants should obtain application deadlines by contacting the individual graduate program. Because the admission process is time consuming, applications should be submitted as early as possible.

Pennsylvania Act 34 Clearance—Applicants should note that some programs may require clearance of students participating in internships/practicums in Pennsylvania school districts. Pennsylvania Act 34 of 1985 (Criminal History Record Information) specifies that employees of Pennsylvania public and private schools must undergo background checks. School districts accepting graduate students for internships/practicums increasingly require Act 34 clearance before permitting students to begin their practicums in the district, even though they are not employees. In addition, non-Pennsylvania residents are expected to present evidence of an FBI background information check. Applicants are encouraged to contact the program to which they are applying if they have questions as to this requirement and how it may affect them.

Nondegree Admission--If you do not intend to pursue a graduate degree, but want to take graduate-level courses for personal enrichment, professional development, permanent certification, or to apply for degree status at a later date, you can seek admission as a nondegree graduate student. Information on applying for nondegree graduate status may be obtained via the Web site at www.gradsch.psu.edu/go/apply(Opens New Window).

Changing from graduate nondegree status to regular status requires a new admission application. No more than 15 graduate credits of course work taken prior to admission to a graduate degree program may be applicable to a graduate program. (See "Nondegree Student" under Classification of Students.) However, admission as a nondegree graduate student neither guarantees nor implies subsequent admission to a degree program. Nondegree students are not eligible to receive fellowships or graduate assistantships and preference for courses is given to degree students. Programs control access to some courses.

Applicants for nondegree admission must have received from a regionally accredited institution a baccalaureate degree under residence and credit conditions substantially equivalent to those required by Penn State.

Minority Students--Minority students are encouraged to apply for admission to any of the programs offered in the Graduate School. Information concerning programs and financial aid can be obtained from the chair of the graduate program, the dean of the college of the student's major interest, or from the Office of Graduate Educational Equity, 304 Kern Building.

International Students--International applicants must hold the equivalent of an American **four**-year baccalaureate degree. They must submit official or attested university records, with certified translations if the records are not in English. Notarized copies are not sufficient.

English Proficiency--The language of instruction at Penn State is English. International applicants must take and submit scores for the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), with the exceptions noted below. The minimum acceptable score for the TOEFL is 550 for the paper-based test, 213 for the computer-based test, or a total score of 80 with a 19 on the speaking section for the internet-based test. Applicants with iBT speaking scores between 15 and 18 may be considered for provisional admission, which requires an institutional test of English proficiency upon first enrollment and, if necessary, remedial course work. The minimum composite score for the IELTS is 6.5. Specific graduate programs may have more stringent requirements.

International applicants are exempt from the TOEFL/IELTS requirement who have received a baccalaureate or a master's degree from a college/university/institution in any of the following: Australia, Belize, British Caribbean and British West Indies, Canada (except Quebec), England, Guyana, Republic of Ireland, Liberia, New Zealand, Northern Ireland, Scotland, the United States, and Wales.

Specific graduate programs may require all international applicants to submit a TOEFL or IELTS score, regardless of their academic background and country of origin.

Information about the TOEFL can be obtained by writing to the Educational Testing Service, Box 6155, Princeton, NJ 08541-6155 or visiting its Web site at www.toefl.org (Opens New Window). Local administration at University Park campus of the TOEFL is handled by the IECF. Information about the IELTS can be

obtained by contacting IELTS International, 100 East Corson Street, Suite 200, Pasadena, CA 91103 or visiting its Web site at www.ielts.org ([Opens New Window](#)).

Undergraduate Students--Any senior with a 3.50 grade-point average may be admitted to 500- or 800-level courses with the consent of the instructor; other seniors with a B average or better may be admitted to graduate courses with the consent of the instructor, the student's academic adviser, and the director of Graduate Enrollment Services. Forms to request permission to take 500- or 800-level courses are available in the Office of Graduate Enrollment Services, 114 Kern Building.

Undergraduate students in The Schreyer Honors College who undertake integrated undergraduate-graduate study (IUG) can pursue concurrent bachelor's and master's degrees. Information on IUG study can be obtained at the office of the dean of The Schreyer Honors College, 10 Schreyer Honors College.

In certain cases undergraduate students may subsequently apply credits they have earned in 400, 500, and 800 series courses toward an advanced degree at Penn State. After admission to the Graduate School, and with the approval of the major field, a maximum of 9 credits relevant to the graduate program of study that were not used to satisfy undergraduate requirements may be applied toward an advanced degree. The time limitation on the completion of a master's degree program applies to these as well as to other credits.

Postdoctoral Fellows, Scholars, and Guests of the University--Postdoctoral Fellow appointments are financed under a Postdoctoral Fellow Program of a granting agency outside the University. A Postdoctoral Scholar is the usual designation for all other postdoctoral appointments that meet the standards enumerated by the National Research Council. Postdoctoral appointments are considered appointments of a temporary nature that are intended to offer an opportunity for continued experience in research or teaching, usually, though not necessarily, under the supervision of a senior mentor.

Individuals holding the highest degree in their fields from Penn State or other accredited colleges and universities are invited to apply to the dean of the Graduate School for guest privileges for purposes of noncredit study. Guests may attend seminars and courses with the privileges of faculty members and, if space and facilities are available, carry on research. Individuals may also be appointed to temporary positions in all University ranks. All guests are expected to affiliate formally or informally with one of the departments, institutes, or other subdivisions of the University engaged in scholarly pursuits.

Policy on Second Doctorates--The Graduate School does not admit applicants to concurrent double Ph.D. degree programs, D.Ed. degree programs, or concurrent Ph.D. and D.Ed. programs. In general, the Graduate School discourages the pursuit of a second Ph.D. or D.Ed. degree. However, if an applicant who holds either of these degrees requests admission to a second doctoral degree program (either Ph.D. or D.Ed.), the applicant is asked to give the Graduate School the reason why the second doctorate is necessary (as opposed to taking course work or a master's degree in the second field). The Graduate School then may solicit responses concerning the necessity of the second doctorate from representatives of the field

at Penn State or elsewhere. This information is then given to the Dean of the Graduate School for the final decision. If approved, all Graduate School requirements for the second doctorate must be met *de novo*.

Student Pennsylvania Resident Status--When it appears that an applicant for admission is not a resident of Pennsylvania for tuition purposes, a non-Pennsylvanian classification is assigned. If the student who is thus admitted believes that circumstances do not justify classification as a non-Pennsylvanian, a petition may be addressed to the Fee Assessor, The Pennsylvania State University, 108 Shields Building, University Park, PA 16802 for reclassification. Penn State Harrisburg students may petition the Penn State Harrisburg financial officer.

A copy of the Policy for Determination of Eligibility for Reclassification as a Pennsylvania Resident for Tuition Purposes can be obtained in the office mentioned above or via the Web at

www.psu.edu/bulletins/bluebook/intro/gi-051.htm and should be reviewed before requesting reclassification. Any reclassification resulting from a student's petition shall be effective for tuition purposes as of the date such petition was filed. A student who changes residency from Pennsylvania to another state must promptly give written notice to the University. See [Appendix V](#) to this bulletin.

TRANSFER CREDIT

Subject to the limitations given below, a maximum of 10 credits of high-quality graduate work done at a regionally accredited institution may be applied toward the requirements for the master's degree. However, credits earned to complete a previous master's degree, whether at Penn State or elsewhere, may not be applied to a second master's degree program at Penn State.

The student should distinguish carefully between the transferability of credit and its applicability in a particular degree program. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser, the program head or graduate officer, and the Graduate School.

Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School of Penn State, must be of at least B quality (grades of B- are not transferable), and must appear on an official graduate transcript of a regionally accredited university.

Pass-fail grades are not transferable to an advanced degree program unless the "Pass" can be substantiated by the former institution as having at least B quality.

Forms for transfer of credit can be obtained from the Office of Graduate Enrollment Services, 114 Kern Building.

Classification of Students

A graduate student may be admitted as a degree student, a certificate student, or a nondegree student, depending upon the student's objectives. A student who has held only nondegree status and who later wants to apply for degree status should contact his or her intended program of study. Admission as a nondegree student neither guarantees nor implies subsequent admission to a degree program. Any other change in classification must be arranged through the Office of Graduate Enrollment Services, 114 Kern Building.

Degree Student--A degree student is one who plans to become a candidate for an advanced degree at Penn State and who has been formally admitted for advanced studies in a particular program. The program of study is developed under the guidance of an adviser appointed by the head of the student's major program. A degree student who has passed a candidacy examination is classified as a doctoral candidate.

Provisional Admission--Provisional admission is a temporary classification in which an applicant may remain for a period of either one or two semesters (depending on the provisional type) following admission. If the conditions of provisional admission are not met within that time, the student may be dropped from the program. In addition, all provisional conditions must be met before a student reaches an academic benchmark. Benchmarks include completion of a master's program, the doctoral candidacy, comprehensive, and the final oral examinations. A student will not be permitted to graduate who has not met the conditions of his or her provisional admission.

Nondegree Student--If you do not intend to pursue a graduate degree, but want to take graduate-level courses for personal enrichment, professional development, permanent certification, or to apply for degree status at a later date, you can seek admission as a nondegree graduate student. Information on applying for nondegree graduate status may be obtained via the Web site at www.gradsch.psu.edu/go/apply(Opens New Window).

A maximum of 15 graduate credits taken as a nondegree student prior to admission to a graduate degree program may be applied to a graduate program, with departmental approval. The credits must have been earned within five years preceding entry into the degree program. Forms for transfer of nondegree credits are available in the Office of Graduate Enrollment Services, 114 Kern Building.

Applicants for nondegree admission must have received from a regionally accredited institution a baccalaureate degree earned under residence and credit conditions substantially equivalent to those required by Penn State.

Certificate Student--A certificate student is one who is engaged in a program of study leading to a certificate or equivalent recognition of accomplishment rather than a graduate degree program at Penn State. Certification students, i.e., candidates for Instructional, Supervisory, Educational Specialist, and Administrative certificates, have the same University privileges and

responsibilities as graduate degree students. (*See* additional information under Pennsylvania Department of Education Certificate Candidates.)

Undergraduate Student--Such a student is not a graduate student because a baccalaureate degree has not been attained. The student may not register for graduate courses (500 or 800 series) unless he or she is a senior with at least a 3.50 cumulative GPA or with at least a 3.0 GPA and special permission from the Office of Graduate Enrollment Services. Forms to request permission to take 500- or 800-level courses are available in the Office of Graduate Enrollment Services, 114 Kern Building.

CREDIT BY EXAMINATION

Examinations to establish credit for work done in absentia or without formal class work may be used to remove undergraduate deficiencies, but not to earn credits toward an advanced degree. Arrangements are made by the student directly with the major department head or program chair.

Tuition and Costs

All tuition information is accessible at www.tuition.psu.edu ([Opens New Window](#)). For other general financial information, go to <http://www.bursar.psu.edu/> ([Opens New Window](#)) and click on the appropriate links.

Student Aid

For general information regarding available sources of student aid, see www.psu.edu/studentaid ([Opens New Window](#)) and click on the link for Graduate Students.

Assistantships

For information, see www.gradsch.psu.edu/prospective/assistantships.html ([Opens New Window](#)).

Fellowships and Traineeships

For information, see <http://gradsch.psu.edu/fellowships> ([Opens New Window](#)).

For information about specific funding programs, see www.gradsch.psu.edu/fellowships/programs ([Opens New Window](#)).

Veterans' Benefits

For information, see www.equity.psu.edu/veterans/outreach.asp ([Opens New Window](#)).

History of Graduate Education at Penn State

Program Locations

Programs of graduate study are offered at five locations in Pennsylvania:

- **Penn State Erie-** [-pennstatebehrend.psu.edu](http://pennstatebehrend.psu.edu) ([Opens New Window](#))
- **Penn State Harrisburg-** [-www.hbg.psu.edu](http://www.hbg.psu.edu) ([Opens New Window](#))
- **College of Medicine-** [-http://www.pennstatehershey.org/web/guest/education](http://www.pennstatehershey.org/web/guest/education)
- **Penn State Great Valley-** [-www.gv.psu.edu](http://www.gv.psu.edu) ([Opens New Window](#))
- **University Park Campus-** [-www.gradsch.psu.edu](http://www.gradsch.psu.edu) ([Opens New Window](#))

Off-site courses--Graduate degree programs based at any of the five administrative centers of the Graduate School listed previously, but offered at locations away from those centers, may be discontinued at any time. Degree candidates will be eligible to continue the program, but this may require attendance at courses offered only at the center where the program is based. The University will provide notice of the discontinuance of any program offered at an off-center site at least one semester in advance and furnish information concerning available options for continuance in the program.

GRADUATE LIFE

Current graduate enrollment at University Park campus is about 6,790 students, of whom 78 percent are engaged in graduate study full time, 47 percent are women, and 35 percent are residents of Pennsylvania. (Undergraduate enrollment at University Park campus exceeds 40,000.) International students make up about 35 percent of the graduate student population, and about 8 percent of enrolling graduate students report themselves as members of recognized U.S. ethnic minority groups.

University Park campus is one of the most naturally beautiful American campuses. On any given day of the semester, about 50,000 people will be on the campus: 38,000 students, 12,000 employees, and several hundred visitors. Although the size of the campus can be intimidating, graduate students soon find that its size and diversity afford a variety of stimulating activities. This variety reflects the University's view that a person's graduate experience should include, in addition to course work and research, living in a scholarly atmosphere, profiting from the perspectives of visiting scholars and artists, and engaging in informal discussions with faculty and fellow students. It also should mean participating in student affairs and University governance, and allowing time to reflect, to explore fields related to one's specialty, and to enjoy leisure activities.

Although the mailing address of the largest campus is University Park, PA 16802, this name ordinarily does not appear on maps. The University Park campus is located in State College, Pennsylvania, an area with a population of more than 67,000. State College is located on U.S. Highway 322, near Interstates 80 and 99, and can be reached directly by bus or airline service. The town retains a collegiate atmosphere enhanced by many small shops, restaurants, cinemas, and bookstores.

GRADUATE STUDENT ASSOCIATION

For information, see www.clubs.psu.edu/up/gsa (Opens New Window).

GRADUATE SCHOOL ALUMNI SOCIETY

For information, see www.gradsch.psu.edu/av (Opens New Window).

RECREATIONAL AND ATHLETIC FACILITIES

REGULATIONS AND CONDUCT STANDARDS FOR STUDENTS ENROLLED IN THE GRADUATE SCHOOL

It is the responsibility of students to be cognizant of the rules, regulations, and procedures of the University. This information is contained in the graduate school policies at www.gradsch.psu.edu/policies ([Opens New Window](#)).

MOTOR VEHICLE REGULATIONS

For information, see guru.psu.edu/policies/BS04.html ([Opens New Window](#)).

BICYCLE REGULATIONS

For information, see guru.psu.edu/policies/SY16.html ([Opens New Window](#)).

STANDARDS OF CONDUCT

For general information, see Appendix I in this bulletin and www.sa.psu.edu/ja ([Opens New Window](#)).

Research Integrity-See guru.psu.edu/policies/AD47.html ([Opens New Window](#)).

General Standards of Professional Ethics-See guru.psu.edu/policies/RA10.html ([Opens New Window](#)).

RESOLUTION OF PROBLEMS

For information regarding procedures for resolving or appealing problems in the classroom and outside, see Appendix II in this bulletin.

OWNERSHIP OF INTELLECTUAL PROPERTY

For information, see www.research.psu.edu/ipo ([Opens New Window](#)) and guru.psu.edu/policies/RA11.html ([Opens New Window](#)).

RESEARCH PROTECTIONS

To ensure compliance with applicable federal and state laws, certain University activities require review and approval by appointed institutional review committees. Projects involving any of the following concerns must be reviewed and approved through the Office for Research Protections (ORP) before the project is initiated.

For information, see www.research.psu.edu/orp (Opens New Window).

Conflict of Interest--See guru.psu.edu/policies/RA20.html (Opens New Window).

For policy statements on these issues, see guru.psu.edu/policies/RA14.html and guru.psu.edu/policies/RA15.html. See also policies on safety issues at guru.psu.edu/policies/SY24.html (Opens New Window).

NOTE: The College of Medicine at the Penn State Milton S. Hershey Medical Center is a unique Penn State campus in that it maintains a separate IRB, IACUC, UBC, and UIC. Students conducting projects at Hershey should contact their local committees for approval of research.

FACILITIES

Of the University's more than 16,000 acres of land, a substantial portion consists of recreation areas, farms and agricultural experiment grounds, and forest tracts that are used by graduate students in their work and research. Animal and wildlife students, for example, are conducting nutrition and reproductive physiology studies of whitetail deer, sheltered at one of the forest tracts. Astronomy students study at an observatory housing the largest telescope east of the Rockies. Those in civil engineering can carry out research at the only highway test track in Pennsylvania. Laboratories and equipment devoted to meteorology, mining, chemistry, combustion, biomechanics, engineering acoustics, psychology, and microbiology mirror the University's strengths in those disciplines. Biotechnology and microelectronics groups have established themselves here, and centers of expertise in computer-assisted design and manufacture, as well as robotics, have emerged. The Huck Institutes of the Life Sciences provides centralized facilities for all researchers in the biological sciences. The Huck Institutes, Materials Research Institute, and the Penn State Institutes of the Environment enable new opportunities for multidisciplinary education and research within the life sciences, materials, energy, and environment-related disciplines.

The Social Science Research Institute has a Survey Research Center (SRC) that provides state-of-the-art and cost-effective survey research services to Penn State faculty and administrative units. SRC contributes to the education and training of Penn State students in areas related to survey research, and also serves as a focal point for Penn State faculty in a variety of disciplines whose research interests touch on the methodology of survey research. The SRC provides services in the areas of survey design, sampling, and data collection (including telephone, mail, face-to-face, and Internet surveys and focus groups); survey data management; and data analysis. Center staff assist researchers in estimating the costs associated with the collection and analysis of survey data. The center employs undergraduate and graduate students, serves as a resource on primary survey data collection for students enrolled in research methods courses, and offers short survey research workshops open to students and faculty each academic year. A major goal of the center is to serve as a focal point for Penn State faculty in a variety of disciplines who have an interest in the methodology of survey research. In the near future we will be developing a program to enable faculty to become associates of the Survey Research Center. The purpose of this program is to enhance collaborative research and training activities focusing on survey research methodology.

In addition to research conducted in academic departments or in organized research units within the individual colleges, opportunities for interdisciplinary research exist in the Huck Institutes of the Life Sciences, the Materials Research Institute, the Children, Youth, and Families Consortium, the Penn State Institutes of the Environment, the Social Science Research Institute, and in research units: the Applied Research Laboratory and the Institute for the Arts and Humanities. The Animal Resource Program also provides University-wide services.

THE UNIVERSITY LIBRARIES

The University Libraries constitute a major resource for students and researchers in all fields of study. The Libraries are ranked among the top ten research libraries in North America by the Association of Research Libraries and contain more than 53 million volumes, 6.9 million microforms, 88,668 serial subscriptions, plus more than 536 databases and 45,906 online full-text journals, and 100,000 e-books.

The University Libraries include a central facility and five other libraries at University Park campus, plus libraries at 23 Penn State locations throughout the state, including the Dickinson School of Law and the Milton S. Hershey Center and the Penn State affiliated Pennsylvania College of Technology. At University Park, the Arts and Humanities, Business, Education and Behavioral Sciences, Gateway Commons, Social Sciences, Maps, Life Sciences, Special Collections, and News and Microforms libraries are maintained in Pattee Library and Paterno Library. Other Libraries at University Park include the Architecture and Landscape Architecture, Earth and Mineral Sciences, Engineering, Law, and Physical and Mathematical Sciences libraries.

In addition Pattee Library houses Course Reserves Services, the Extended Hours Study Area, (now offering 24-hour service), and Library Services for Persons with Disabilities. The Special Collections Library in Paterno Library includes Historical Collections and Labor Archives, Rare Books and Manuscripts, and the Penn State University Archives. Additional library services include assigned carrels, photocopiers, a student lounge with vending machines, change machines, and MacKinnon's Cafe.

Among special collections of national importance are those on Arnold Bennett, Kenneth Burke, Jean Giraudoux, John O'Hara, Vance Packard, Joseph Priestley, Conrad Richter; the Allison-Shelley collection of Anglo-Americana-Germanica; and materials on Utopian literature and on Australia. The Historical Collections and Labor Archives contain a wide variety of documentary sources, including the papers of Pennsylvania leaders and businesses and records of labor unions. The most notable of these documents are those of Richard Schweiker, William Scranton, the United Steelworkers of America, and the United Mine Workers of America. The Penn State University Archives house an extensive collection of materials about the University and the surrounding community.

Faculty members may recommend books and other library material purchases by contacting a subject specialist at www.libraries.psu.edu/psul/cataloging/services_policies/specialists.html ([Opens New Window](#)). Faculty at locations other than University Park can also contact their head librarian.

Access to holdings is obtained through The CAT, a computerized catalog, part of the Library Information Access System (LIAS), available on the Web at www.libraries.psu.edu ([Opens New Window](#)). LIAS is a dynamic, integrated information system that provides electronic access to a great variety of materials

in many subject areas.

The Libraries maintain a comprehensive program of general and specialized reference and instructional services. The Libraries' faculty teach credit courses as part of the Library Studies Program and offer a variety of topical seminars. Introductory sessions, offered by Library Learning Services, are scheduled on a regular basis to familiarize faculty, students, and other library users with LIAS. Class sessions designed for specific courses can be arranged in the library to help students learn how to find, use, and evaluate relevant books, articles, Web sites, and other information resources. Assistance is available to help design assignments that use library resources to enhance student research skills and critical thinking. Library instruction rooms (hands-on labs or traditional classrooms) can be reserved for on-site instruction in the use of library resources. For information, go to: www.libraries.psu.edu/psul/lis.html ([Opens New Window](#)).

Penn State holds membership in the Association of Research Libraries, the Consortium for Institutional Cooperation, and the Online Computer Library Center (OCLC). Participation in these organizations provides faculty and students with access to the collections of more than 2,500 libraries across the United States and internationally, including major research libraries. It is the largest research library in Pennsylvania and one of four resource libraries that provide service and collections to all other libraries and citizens of the Commonwealth.

The publication Guide to the University Libraries offers additional information on services and programs and is available at Libraries service desks and by calling 814-863-4240. More information is also available at www.libraries.psu.edu/psul/pram/publications.html ([Opens New Window](#)). An Open House is held each fall semester.

Media and Technology Support Services (MediaTech), www.libraries.psu.edu/mtss/ ([Opens New Window](#)), a division of the University Libraries, has a collection of more than 24,000 films and videotapes and more than 5,000 pieces of technology and audio-visual equipment available to faculty, staff, and students. Titles in the Media Tech collection are listed in The CAT, the Libraries' online catalog and in the MediaTech database at <http://extranet.libraries.psu.edu/mtss/media/searchMedianet.html> ([Opens New Window](#)).

Services include:

- Consultation for purchase of technology or audiovisual equipment: 814-863-0665
- Consultation for purchase of technology or audiovisual equipment: 814-863-0665
- Equipment scheduling: 814-865-5400, or 26 Willard Building; e-mail to mtsseq@psulias.psu.edu
- Media Duplication: Call 814-863-8144 or e-mail mjs149@psu.edu. Downloadable duplication order form (PDF) at www.libraries.psu.edu/mtss/services/duplication.html
- Media Site Live: www.libraries.psu.edu/mtss/mediasitelive/mediasitelive.html
- Preview facilities: 814-863-3202 and 814-865-5400, Wagner Annex

- Program scheduling: 814-865-5400; e-mail to mtssmed@psulias.psu.edu
- Repair and Installation Services: 814-863-4389
- Video/Photo Production Studios: Students and faculty may reserve time and space in the studios to produce, edit, and export their video/audio projects. Green Screen is also available for use, with on-site staff available to answer questions and conduct demonstrations. Call 814-865-5400.
- Video Taping Class Presentations: Schedule taping at least thirty-eight hours before the presentation by contacting MTSS Equipment at 814-865-5400 or mtsseq@psulias.psu.edu. Indicate desired format when scheduling--mini-DV tape or DVD (digital).
- MediaTech Info Line: 814-863-1234 (touch-tone phones only). Includes current weather forecasts as provided by the Campus Weather Service, the University Calendar of Events, information on town and campus movies, JOBS-Penn State's employment information service, open house schedules for the Department of Astronomy, and construction barriers on or around the University Park campus.

For more information about services available from MediaTech, e-mail mtssmed@psulias.psu.edu or visit www.libraries.psu.edu/mtss ([Opens New Window](#))

THE PENN STATE PRESS

The Penn State Press is a publisher of books and journals that contribute to the advancement of scholarship. It publishes in most areas of the humanities and social sciences, giving emphasis to art and architectural history, literature and literary criticism, philosophy, religious studies, history, political science, women's studies, sociology, Latin American studies, and East European and Russian studies. Its journals include the Chaucer Review, Journal of Nietzsche Studies, the Good Society, Philosophy and Rhetoric, Journal of General Education, Journal of Speculative Philosophy, Comparative Literature Studies, Journal of Policy History, Pennsylvania History, Book History, and Shaw: The Annual of Bernard Shaw Studies. The Press publishes eight series: Issues in Policy History (Editor: Donald T. Critchlow); Literature and Philosophy (Editor: Anthony J. Cascardi); Penn State Series in the History of the Book (Editor: James L. W. West III); Re-reading the Canon (Editor: Nancy Tuana); Studies of the Greater Philadelphia Philosophy Consortium (Editor: Michael Krausz); Rural Studies Series (Editor: Clare Hinrichs); Penn State Library of Jewish Literature (Editors: Baruch Halpern and Aminadav Dykman); American and European Philosophy Series (Editors: Charles Scott and John Stuhr); Buildings, Landscapes, and Societies; and Refiguring Modernism.

INFORMATION TECHNOLOGY SERVICES

Information Technology Services (ITS) ensures that faculty, students, and staff have the information technology tools and infrastructure necessary to carry out the University's mission. ITS is working to achieve five broad goals: help faculty improve the way education is delivered; provide students with resources to enrich their educational experience; create and sustain an environment that enables leading-edge research; help to improve productivity; and establish the information technology infrastructure necessary to maintain Penn State's preeminence in integrating high-quality programs in teaching, research, and outreach. For additional information, see its.psu.edu on the Web.

SPECIALIZED COMPUTING FACILITIES

Penn State also provides distributed computing and information systems. Many academic computing facilities exist to support the specialized research and instructional requirements of the colleges and the intercollege research programs. Some of these facilities are described below.

Colleges

College of Arts and Architecture

The School of Architecture and Landscape Architecture operates dedicated student computer labs and has integrated desktop computers into the studio environment. Students have access to high-performance networks via either wired or wireless connections. The school's computer labs, including the Stuckeman Center for Design Computing, are primarily used for teaching and research in such areas as computer graphics, computer-assisted drawing, design, GIS, and digital imaging, as well as exploration into computer visualization, virtual reality, and digital fabrication. A wide variety of available input and output equipment, such as large-format printers, color printers, scanners, a CNC laser cutter, site survey, and video imaging and capturing equipment, provides faculty and students with opportunities to explore and master a variety of technologies and presentation techniques.

The Immersive Environments Lab (IEL) is a joint venture between Penn State's Information Technology Services (ITS) and the School of Architecture and Landscape Architecture (SALA). The IEL is a stereo visualization system consisting of a three-screen panorama display and a cluster of graphics workstations. Students have the capability of displaying a range of 2D and 3D presentations or they may launch 3D to a full three-screen stereo panorama for a group walk-through. Using virtual reality to visualize interior and exterior spaces allows students to follow the design process from conception to construction to completion.

The School of Music provides students and faculty in all disciplines within the school with a Macintosh-based electronic music laboratory and two computerized music rooms. These facilities afford faculty and students opportunities to create, analyze, and perform music as well as develop innovative music teaching materials.

The School of Theatre maintains lab facilities to support its technical theatre program, including set design, lighting, sound, and costume design. Interaction with common and professional applications affords students the opportunity to gain familiarity and experience with tools being used in the field. In addition, computers are regularly used in performance to control lighting and sound systems and to facilitate such complex tasks as moving scenery.

The School of Visual Arts computer facilities are customized for the advanced technological needs of students and faculty in the School of Visual Arts and the Department of Integrative Arts. Located in 302, 304, and 401 Patterson Building and maintained by Information Technology Services (ITS), the Patterson computer laboratories are specialized for design, animation, and high-end multimedia production. Within close proximity, the Graphic Design computer laboratory, 208 Visual Arts Building, is designed to meet the specific needs of students enrolled in the Graphic Design program. The Digital Photography computer laboratory, customized for students enrolled in the Photography program, is located in 209 Visual Arts Building. All five labs are Macintosh environments and are used as both teaching and study facilities. Most labs are open twenty-four hours a day, seven days a week.

College of Earth and Mineral Sciences

The College of Earth and Mineral Sciences has installed a high-speed communications network that provides computer-to-computer communications within the college, as well as with external networks and computers via University facilities. Wireless access to this network is provided throughout the college. Computing facilities are distributed throughout the departments and institutes of the college, and include extensive local PC, UNIX/LINUX, and Macintosh computer laboratories accessible to undergraduate and graduate students. Many graduate students have a PC or UNIX computer supplied to their desktop. In addition to these distributed facilities, high-performance computing is available on high-end Linux clusters operated by the ITS GeARS group in concert with the college's departments and institutes.

College of Education

In the College of Education, the Education Technology Center, located in 201 Chambers Building, provides technical support services, multimedia and graphic design services, Web design and development services, and computer application training for College of Education faculty and staff. The Education Technology Center also maintains the Education Technology Demonstration Classroom and video conferencing services. The Demonstration Classroom is used by College of Education faculty for implementing technology into teaching and learning for undergraduate and graduate College of Education courses. It also provides a computer facility equipped to instruct College of Education students how to use technology in their teaching and learning experiences.

The IBM Personal Computer Lab, located in 202 Chambers Building and the Macintosh Computer Lab located in 205 Chambers provide microcomputer access to the University community. Thirty networked IBM and twenty-eight Macintosh computers are available for student and faculty use. (The labs are restricted during certain hours; check schedule outside each room.)

College of Engineering

The College of Engineering has a number of general and special purpose computational resources and services to support the College's educational and research endeavors. Each department maintains multiple laboratories that include various servers and workstations. These laboratories employ a number of Sun, PC, and Macintosh workstations running under the latest Sun, Microsoft, LINUX, or UNIX operating system. In addition to these general purpose facilities, several departments have faculty who maintain High-Performance Parallel Computing facilities with multiprocessor computing nodes for research initiatives. These facilities typically use PC-based systems running LINUX or Macintosh OSX servers running Open BSD in Beowulf clustering configurations. The University's Information Technology Services also maintains a multinode High-Performance Parallel Computing facility for faculty and graduate student research. The College of Engineering also operates and maintains a multimode High-Performance Computing cluster to support undergraduate and graduate education. The College system is available during non-peak usage times to support graduate research.

The Department of Computer Science and Engineering at Penn State uses a network of Solaris, Linux, OS X, and Windows workstations and servers to support academic computing needs. Instruction is supported by pairs of Sun V240 and V880 servers. These servers act as application, Web, e-mail, and license servers for over 400 workstations in labs, graduate student offices, and faculty offices. Funded research efforts utilize any one of the departments nine High Performance Computing Clusters, totaling nearly 400 multi-processor compute nodes sharing IBA, DolpinNet, Myrinet, and GigE interconnection. Researchers currently share approximately 15TB of BlueArc NAS storage. Additionally, the department is constructing a cognition and perception lab with cutting edge computer vision technology. NSF CISE/Instrumentation, Infrastructure, and IGERT grants have funded much of CSE's research equipment. Computing resources are connected via a fail-safe pair of 3Com 7700 Switching Routers. The routers provide GigE service to all backbone-connected devices, including all edge switching devices. CSE's GigE connection to the campus backbone (including I and I2) is hosted with a resilient pair of interfaces through an HSRP enabled firewall. All of this equipment is housed in the Information Sciences and Technology building, Penn State's new technology showcase building.

The Institute for Computational Science is a University-wide initiative conceived and chaired by a faculty member in the College of Engineering. The institute addresses the need for resources and computing power required for fields such as computational fluid dynamics, computational chemistry, computational meteorology, computational physics, artificial intelligence, computational materials science, business computing, etc. Annual conferences focus on collaboration among researchers in the aforementioned computation intensive programs.

Electronic and Computer Services (ECS) within the College of Engineering provides faculty and graduate students with engineering expertise and support in the areas of hardware and software system design, prototyping, and complete systems integration. ECS resources include high-performance workstations and design tools (ViewLogic, H-Spice, Cadence, LabView, AutoCAD, etc.). Also available are

tools for embedded system development. Prototyping facilities consist of Xilinx and Altera systems for FPGA design. Distributed access to College, departmental, and ECS resources is through the College's maintained high-speed secure data network. ECS maintains the College's High-Performance computing cluster and network throughout 26 buildings; ECS also maintains and operates core College e-mail, Web and departmental servers, providing nightly backup services to these critical systems. Virtual Private Networking and secure wireless services throughout the College enables mobile computing and data access from anywhere Internet connectivity is available.

College of Health and Human Development

The Department of Kinesiology maintains several specialized computer systems dedicated to automated motion analyses, musculoskeletal modeling, medical imaging, physiological testing, and the generation of virtual reality environments for experimental purposes.

Eberly College of Science

Within the Eberly College of Science, each department has an array of computer facilities.

- The Department of Astronomy and Astrophysics computing resources include a large and ever-expanding network of workstations and personal computers. The current census includes 50 Sun workstations, 12 Power Macs, and 70 PCs. Many of the workstations are configured for maximum processing power so that data sets from various ground- and space-based observing platforms from around the world can be intensively analyzed by faculty and graduate students. The Department has a 100-MB intranet with a fiber optic 100-MB connection to the University backbone. Ten terabytes of online disk space serves data to Department research teams.
- The Department of Biochemistry and Molecular Biology maintains a 100-Mbps Ethernet with ~500 IP addresses currently in use. Most of these serve desktop computers in individual research groups. Twelve desktop computers are maintained in one room for general or instructional use, and eight workstations are dedicated to special equipment for phosphorimaging, laser densitometry, analytical ultracentrifugation, surface plasmon resonance measurements, and X-ray crystallography. Laptops and projectors also are available for general use.
- The Department of Biology maintains two 100-MB fiber backbones that support nearly 500 PC and Macintosh machines. Most of these computers are used to run research machinery and for individual research label workstations. The department also houses thirteen servers, including a state-of-the-art firewall, two domain controllers, automated Windows patch management, automated antivirus system management, and an advanced Web application cluster. Licensed software within the department includes a wide array of Microsoft and Macintosh products.
- The Department of Chemistry provides network access for approximately

1,024 nodes comprising numerous PCs, workstations, and servers of varying operation systems, supported by 10/100/1000 MB Fast Ethernet. Chemistry also Penn State Wireless 2.0 access, VPN service and Web space for courses and research as well as computer and instrumentation repair services for Penn State-funded equipment. Several individual research groups within Chemistry boast their own PC clusters. Some of the computer-intensive research groups participate in the shared resources of the Graduate Educational and Research Services (GEaRs) and the Institute for High-Performance Computing Applications.

- The Department of Mathematics maintains a high-speed switched network of UNIX-based workstations and servers for use by faculty, students, and staff. Most workstations are for use by individuals or small groups. A lab is maintained for use by undergraduates, graduates, faculty, and visitors. Supported operating systems are Solaris and OSX. Supported software includes Mathematica, Matlab, TeX, and LaTeX. Supported programming languages include C, C++, Java, Fortran, and Perl. Some research groups maintain their own computing equipment including a Beowulf cluster and computers used to control high-speed cameras.
- The Department of Physics maintains a high-speed switched network that provides several connections to each office and supports a wide variety of computing environments. In addition to this wired networking, the department provides wireless internet access in several areas. Many research groups have their own computing systems, which range from simple PCs to Beowulf clusters. At the departmental level, a group of UNIX and MAC servers supports mail, Web, printing, backup, etc. All department members are entitled to accounts on general access Windows XP, Linux, and Sun system with a variety of appropriate software. A computer lab, available to all department members, has workstations, printers, and scanners. The department hosts a Reconfigurable Advance Visualization Environment (RAVE) for stereoscopic visualization of simulation results.
- The Department of Statistics maintains computer systems and laboratories to provide facilities for both research and instruction. Equipment includes thirty Sun UNIX workstations, sixty PCs (operating Windows and LINUX), high-quality laser printers, color printers, a color scanner, and video-capture facilities. Faculty and students have computers in their offices. Software packages include BMDP, MINITAB, SAS, Splus, R, ArcInfo, Mathematica, FORTRAN, C, Java, LaTeX, and TeX. The department has two full-time system administrators to maintain a high-quality computer infrastructure.

Many colleges operate computing laboratories that provide students and faculty with microcomputing capabilities and/or batch and interactive access to the University's principal computers through Information Technology Services (ITS).

Interdisciplinary—The Applied Research Laboratory (ARL) uses more than 2,000 computers in multiple networks of Microsoft Windows, LINUX, Solaris, and VAX workstations, with software supporting data acquisition and processing, process control, modeling and simulation, visualization, data fusion, interactive problem solving, and business applications. MATLAB is used extensively. A synthetic

environment lab is available for 3-D visualization. High-performance computer resources include multiple Linux clusters and grids, and access to U.S. government HPC resources. Mechanical and printed circuit CAD software is used for design, and computer-aided manufacturing software is used extensively to run the shop's multi-axis CNC machines. Student access is dependant upon their relationship with ARL.

The Materials Research Institute (MRI, at www.mri.psu.edu ([Opens New Window](#))), together with more than a dozen academic departments/units, offers students access to professionally staffed materials processing, characterization, and computer simulation facilities. MRI enables new opportunities for multidisciplinary education and research within the materials-related disciplines.

Materials Simulation Center (MSC)

A group of faculty and professional staff develop state-of-the-art atomic-scale materials modeling for design of high-performance alloys, evaluation of precursors for epitaxial growth, calculation of electronic and structural properties of nanoscale materials, and simulations for materials processing.

Center for Computational Materials Design (CCMD)

An NSF I/UCRC Center based on needs identified by CCMD members, which initially includes 13 organizations representing both large and small businesses and DOE and DOD laboratories. Faculty from Penn State and Georgia Tech will carry out short and long term research in innovative materials design. The proposed research will be at the interface of industrial relevance and scientific knowledge and will include interdisciplinary groups of materials science and engineering faculty and graduate students, as well as engineering systems design faculty, computer scientists, and applied mathematicians.

Institute for Computational Science

Computational science refers to the use of computers, networks, storage devices, software, and algorithms to solve problems, do simulations, build things, or create new knowledge.

The Penn State Institutes of Energy and the Environment (PSIE) at the Land and Water Research Building provide computing and network infrastructure to support the research of affiliated faculty, researchers, and graduate students. Resources include a firewalled local network as well as web servers and infrastructure for public presentation of research, applications, and data. Additionally, PSIE maintains a 25-person capacity videoconferencing facility for faculty and research use.

DOCTORAL DEGREES

The Doctor of Philosophy, an academic degree; the Doctor of Education and Doctor of Musical Arts, both professional degrees, are conferred by the University. Recognized as different in purpose, the three programs consequently have different requirements in certain respects.

ADMISSION

A student who has been admitted to the Graduate School and has been accepted by the department or committee in charge of a major program in which the doctorate is offered may begin working toward a doctoral degree. However, the student has no official status as a doctoral student and no assurance of acceptance as a doctoral candidate until the candidacy examination has been passed. This examination is administered by the major department or graduate program and is given early in the student's program.

It is the policy of the Graduate School not to encourage applicants to work for a second doctoral degree. (See Policy on Second Doctorates). However, the President, on recommendation of the dean of the Graduate School, will welcome, as guests, holders of earned doctoral degrees who may be visiting the University Park campus for purposes of noncredit study. Guest privileges apply to persons holding the degree from Penn State or other accredited colleges and universities. Guests may attend seminars and courses and, if space and facilities are available, carry on research. There will be no charge except for laboratory expenses. Arrangements should be made in advance with the dean of the Graduate School.

GENERAL REQUIREMENTS

No specified number of courses completed or credits earned will assure attainment of the doctorate. The general requirements are based upon a period of residence, the writing of a satisfactory dissertation acceptance by the doctoral committee and the Graduate School, and the passing of a comprehensive and a final oral examination. A doctoral program consists of such a combination of course seminars and individual study and research as meets the minimum requirements of the Graduate School and is approved by the doctoral committee for each individual student.

A master's degree is not a prerequisite for the doctorate in some major programs. However, the first year of graduate study leading to the Ph.D. may be substantially the same as that provided for the M.A. or M.S. degree. Similarly, the first year of the D.Ed. program may be essentially the same as that provided for the M.Ed. degree.

GRADE-POINT AVERAGE

A minimum grade-point average of 3.00 for work done at the University is required for doctoral candidacy, for admission to the comprehensive examination, the final oral examination, and for graduation.

TIME LIMITATION

A doctoral student is required to complete the program, including acceptance of the doctoral thesis, within eight years from the date of successful completion of the candidacy examination. Individual programs may set shorter time limits. Extensions may be granted by the Director of Graduate Enrollment Services in appropriate circumstances.

OFF-CAMPUS AND TRANSFER CREDIT

A maximum of 30 credits beyond the baccalaureate at a regionally accredited school not granting the doctorate in the student's major program may be accepted by the Graduate School in partial fulfillment of the requirement for a D.Ed. degree at Penn State. A maximum of two full academic years of work (60 credits) beyond the baccalaureate at a regionally accredited graduate school that grants the doctorate in the candidate's major program may be accepted here to apply toward D.Ed. degree requirements. A completed master's degree may be transferred to a D.Ed. program with no intervening time limitation. Because there is no total-credit requirement for the Ph.D. degree program, advanced standing is not awarded for a master's degree. Advanced standing is awarded for only one master's degree.

Subject to the approval of the adviser and the head of the major department or program chair, a student may register for research to be done away from the University Park campus.

Academic work to be so transferred must meet the following criteria:

1. It must have been completed within five years prior to the date of first degree registration at the Graduate School of Penn State (see below);
2. It must appear on an official graduate transcript of an accredited or recognized degree-granting institution;
3. It must be equivalent to "B" quality or higher (grades of B- are not transferrable) on Penn State's grading system;
4. It must be deemed applicable to the student's program by the current academic adviser, approved in writing, and submitted to the Graduate School for approval and action.

Credits earned toward a previously completed postbaccalaureate professional degree program (law, medicine, etc.) are not transferrable. However, up to 10 credits can be transferred from a professional degree program if the degree has not been conferred. All transfer credit must be substantiated by the former institution as having at least B quality whatever grading system is in place (e.g., this includes P/F grading).

ADVISERS AND DOCTORAL COMMITTEES

Following admittance to a degree program, the student should confer with the head of that major department or program concerning procedures and the appointment of an academic adviser. Consultation or arrangement of the details of the student's semester-by-semester schedule is the function of the academic adviser. This person may be a member of the doctoral committee or someone else designated by the head of the major program for this specific duty. The academic adviser may be different from the dissertation adviser.

Doctoral Committee--General guidance of a doctoral candidate is the responsibility of a doctoral committee consisting of four or more active members of the Graduate Faculty, which includes at least two faculty members in the major field, and one outside member, as described below. The dissertation adviser must be a member of the doctoral committee and usually (but is not required to) serves as chair. If the candidate has a minor, that field must be represented on the committee. (See also Major Program and Minor Field under D.Ed.—Additional Specific Requirements in this bulletin.) This committee is appointed by the graduate dean through the Office of Graduate Enrollment Services, upon recommendation of the head of the major program, soon after the student is admitted to candidacy. A person not affiliated with Penn State who has particular expertise in the candidate's research area may be added as a special member, upon recommendation by the head of the program and approval of the graduate dean (via the Office of Graduate Enrollment Services). A special member is expected to participate fully in the functions of the doctoral committee. If the special member is asked only to read and approve the doctoral dissertation, that person is designated a special signatory. Occasionally, special signatories may be drawn from within the Penn State faculty in particular situations.

Chair--The chair or at least one co-chair must be a member of the specific graduate faculty of the doctoral program in which the candidate is enrolled. A retired or emeritus faculty member may chair a doctoral committee if he/she began chairing the committee prior to retirement and has the continuing approval of the department head or program chair. The primary duties of the chair are: (1) to maintain the academic standards of the doctoral program and the Graduate School, (2) to ensure that the comprehensive and final examinations are conducted in a timely fashion, (3) to arrange and conduct all meetings, and (4) to ensure that requirements set forth by the committee are implemented in the final version of the thesis.

Outside Member--While one or more members of the doctoral committee may be from outside the department in which the graduate program resides, an official "outside member" must be appointed, who serves a specific role as described below. The primary responsibilities of this outside member are (1) to maintain the academic standards of the Graduate School and (2) to assure that all procedures are carried out fairly. The outside member represents the Graduate School; and, as such, the outside member shall be a member of the Graduate Faculty but need not have direct expertise in the research area of the candidate. The outside member

may contribute technical expertise, but this role is subordinate to the aforementioned primary responsibilities. In this context, the head of the doctoral program will recommend to the dean (via the Office of Graduate Enrollment Services) a sufficient number of members, exclusive of the outside member, so that sufficient technical expertise is represented on the committee. Thus, the outside member may be in addition to a full complement of committee members with technical expertise in the area. Heads of doctoral programs will seek an outside member who has no conflicts of interest with members of the committee, in such a way as to preclude their fulfilling the primary duties as the outside member. The outside member shall not hold a budgetary or adjunct appointment in the department or academic unit to which the student's doctoral program belongs. The outside member shall also not have a budgetary or adjunct appointment in or other conflict of interest with the unit(s) to which either the chair or the dissertation adviser belongs. The outside member cannot chair or co-chair the committee. This does not preclude other members of the Graduate Faculty regardless of budgetary appointment from serving on the committee, and potentially in dual roles, for example, as co-chair. The committee member representing the minor may serve as the outside member if his or her budgetary appointment satisfies the conditions noted above.

The membership of doctoral committees should be periodically reviewed by the program chair to ensure that its members continue to qualify for service on the committee in their designated roles. For example, if budgetary appointments, employment at the University, etc., have changed since initial appointment to the committee, changes to the committee membership may be necessary. If changes are warranted, they should be made as soon as possible to prevent future problems that may delay academic progress for the student (e.g., ability to conduct the comprehensive or final examinations).

Responsibilities of Doctoral Committees--The doctoral committee is responsible for approving the broad outline of the student's program and should review the program as soon as possible after the student's admission to candidacy. Moreover, continuing communication among the student, the committee chair, the research supervisor, and the members of the committee is strongly recommended, to preclude misunderstandings and to develop a collegial relation between the candidate and the committee.

Doctoral Examination--The (entire) committee will prepare and administer the examination, and evaluate the candidate's performance on the examination. If a committee member is unable to attend the final oral defense, the member may sign as a special signatory. A revised committee appointment form will need to be sent to the Office of Graduate Enrollment Services, 114 Kern Building, removing the faculty member as a regular committee member and moving the member to a special signatory. If there are then not enough members serving on the committee (i.e., four or more active members of the Graduate Faculty) another Penn State faculty member will need to replace that member to constitute a legitimate doctoral committee. (Substitutes are not permitted.) These changes and approvals shall occur before the actual examination takes place. The department or program head will notify the Office of Graduate Enrollment Services when the candidate is

ready to have the comprehensive and the final oral examinations scheduled and will report the results of these examinations to that office.

The dissertation adviser, as well as the chair of the doctoral committee (if not the same individual as the dissertation adviser), along with additional members of the committee to total a minimum of three (3), must be physically present at the final oral examination. The graduate student must also be physically present at the exam. (Thus for a five-person committee, two could participate via distance.) No more than one member may participate via telephone; a second member could participate via PicTel. The examination request and a request for exceptions must be submitted to the director of Graduate Enrollment Services for approval at least two weeks prior to the date of the exam. Special arrangements, i.e., requirements for meeting participation via distance, should be communicated to the student and the doctoral committee members well in advance of the examination.

A favorable vote of at least two-thirds of the members of the committee is required for passing a comprehensive or a final oral examination. If a candidate fails an examination, it is the responsibility of the doctoral committee to determine whether another examination may be taken.

The committee examines the dissertation, administers the final oral examination, and signs the approval page of the dissertation. At least two-thirds of the committee must approve the dissertation.

ENGLISH COMPETENCE

A candidate for the degree of Doctor of Philosophy is required to demonstrate high-level competence in the use of the English language, including reading, writing, and speaking, as part of the language and communication requirements for the Ph.D. Programs are expected to establish mechanisms for assessing and improving competence of both domestic and international students. Assessments should include pieces of original writing. Programs and advisers should identify any deficiencies before or at the candidacy examination and direct students into appropriate remedial activities. Competence must be formally attested by the program before the doctoral comprehensive examination is scheduled. (International students should note that passage of the minimal TOEFL or IELTS requirement does not demonstrate the level of competence expected of a Ph.D. from Penn State.)

COMMUNICATION AND FOREIGN LANGUAGE COMPETENCE

In addition to demonstrating competence in English as described above, each candidate for the Ph.D. must meet communication and foreign language requirements that have been established within the major program. The candidate should ascertain specific language requirements by contacting the professor in charge of the program, whose name appears with the program description under Graduate Programs, Faculty, and Courses.

Candidates for the Doctor of Education degree may be required to demonstrate competence in foreign languages.

CANDIDACY EXAMINATION

Every student who wishes to pursue a doctorate must take a candidacy examination administered by the Graduate Faculty in the graduate major program. The purpose of the candidacy examination should be to assess whether the student is capable of conducting doctoral research based on evidence of critical thinking or other measures that the Graduate Faculty of the program view as important to a successful doctoral student. It should be taken early in the student's program. The nature of the examination varies with the program and may be the master's examination if so prescribed by the program and understood by the student. The decision to admit or not to admit a student to candidacy must be made by the graduate faculty or a designated committee of graduate faculty in the program. For the Ph.D. student, the examination may be given after at least 18 credits have been earned in graduate courses beyond the baccalaureate. The examination must be taken within three semesters (summer sessions do not count) of entry into the doctoral program.

The student must be registered as a full-time or part-time degree student for the semester (excluding summer session) in which the candidacy examination is taken.

For the D.Ed. student, the examination should be given when the student has earned a total of about 30 credits, including the master's program and work done elsewhere. A student transferring from another graduate school with 30 or more transfer credits must take the candidacy examination prior to earning more than 25 credits at Penn State.

COMPREHENSIVE EXAMINATION

When a candidate for the Ph.D. or D.Ed. degree has substantially completed all course work, a comprehensive examination is given. The examination is intended to evaluate the candidate's mastery of the major (and if appropriate, minor) field. (Note: Some programs require students to pass various "area" examinations, "cumulative" examinations, and the like, or require presentation of a thesis proposal, prior to the comprehensive. These are matters of departmental or program policy, distinct from the general policies of the Graduate School described here.)

A candidate for the Ph.D. must have satisfied the English competence and the communication and foreign language requirement before taking the comprehensive examination.

All candidates are required to have a minimum grade-point average of 3.00 for work done at the University at the time the comprehensive examination is given, and may not have deferred or missing grades.

The student must be registered as a full-time or part-time student for the semester in which the comprehensive examination is taken.

The examination is scheduled and announced officially by the Office of Graduate Enrollment Services upon recommendation of the department or program head. Two weeks' notice is required by the Office of Graduate Enrollment Services for scheduling this examination, which may be open to the public at the department's discretion. It is given and evaluated by the entire doctoral committee and may be either written or oral, or both. A favorable vote of at least two-thirds of the members of the committee is required for passing. In case of failure, it is the responsibility of the doctoral committee to determine whether the candidate may take another examination. The results are reported to the Office of Graduate Enrollment Services.

The dissertation adviser, as well as the chair of the doctoral committee (if not the same individual as the dissertation adviser), along with additional members of the committee to total a minimum of three (3), must be physically present at the comprehensive examination. The graduate student must also be physically present at the exam. (Thus for a five-person committee, two could participate via distance.) No more than one member may participate via telephone; a second member could participate via PicTel. The examination request and a request for exceptions must be submitted to the director of Graduate Enrollment Services for approval at least two weeks prior to the date of the exam. Special arrangements, i.e., requirements for meeting participation via distance, should be communicated to the student and the doctoral committee members well in advance of the examination.

When a period of more than six years has elapsed between the passing of the comprehensive examination and the completion of the program, the student is required to pass a second comprehensive examination before the final oral examination will be scheduled.

FINAL ORAL EXAMINATION

The doctoral candidate who has satisfied all other requirements for the degree will be scheduled by the Office of Graduate Enrollment Services, on the recommendation of the department or program head, to take a final examination. Two weeks' notice is required by the Office of Graduate Enrollment Services for scheduling this examination. Normally the final oral examination may not be scheduled until at least three months have elapsed after the comprehensive examination was passed, although the director of Graduate Enrollment Services may grant a waiver in appropriate cases. It is the responsibility of the doctoral candidate to provide a copy of the dissertation to each member of the doctoral committee at least one week before the date of the scheduled examination.

Both the dissertation adviser and the student are responsible for ensuring the completion of a draft of the dissertation and for adequate consultation with members of the dissertation committee well in advance of the oral examination. Major revisions to the dissertation should be completed before this examination.

The dissertation should be in its final draft, with appropriate notes, bibliography, tables, etc., at the time of the oral examination; both the content and style should be correct and polished by the time this final draft of the dissertation is in the hands of the committee.

The final examination of the doctoral candidate is an oral examination administered and evaluated by the entire doctoral committee. It consists of an oral presentation of the dissertation by the candidate and a period of questions and responses. These will relate in large part to the dissertation, but may cover the candidate's entire program of study, because a major purpose of the examination is also to assess the general scholarly attainments of the candidate. The portion of the examination in which the dissertation is presented is open to the public.

The dissertation adviser, as well as the chair of the doctoral committee (if not the same individual as the dissertation adviser), along with additional members of the committee to total a minimum of three (3), must be physically present at the final oral examination. The graduate student must also be physically present at the exam. (Thus for a five-person committee, two could participate via distance.) No more than one member may participate via telephone; a second member could participate via PicTel. The examination request and a request for exceptions must be submitted to the director of Graduate Enrollment Services for approval at least three weeks prior to the date of the exam. Special arrangements, i.e., requirements for meeting participation via distance, should be communicated to the student and the doctoral committee members well in advance of the examination.

The student must be registered as a full-time or part-time degree student for the semester in which the final oral examination is taken.

A favorable vote of at least two-thirds of the members of the committee is required for passing. The results of the examination are reported to the Office of Graduate Enrollment Services. If a candidate fails, it is the responsibility of the doctoral committee to determine whether another examination may be taken.

DISSERTATION ACCEPTANCE

Completion of the requirements of a doctoral degree program entails acceptance of the dissertation, as indicated by the signatures of at least two-thirds of the doctoral committee, including the dissertation adviser, committee chair, and the program chair or department head on its approval page, and by its acceptance as meeting the editorial standards of the Graduate School, so that it constitutes a suitable archival document for inclusion in the University Libraries. Thus it is to be noted that passage of the final oral examination is necessary but not sufficient for award of the degree; the dissertation must be accepted, as the ultimate step.

Ph.D.--ADDITIONAL SPECIFIC REQUIREMENTS

The degree of Doctor of Philosophy is conferred in recognition of high attainment and productive scholarship in some special field of learning as evidenced by:

1. The satisfactory completion of a prescribed period of study and investigation;
2. The preparation and formal acceptance of a dissertation involving independent research;
3. The successful passing of examinations covering both the special subject and the general field of learning of which this subject forms a part.

Residence Requirements--There is no required minimum number of credits or semesters of study, but over some twelve-month period during the interval between admission to the Ph.D. program and completion of the Ph.D. program, the candidate must spend at least two semesters (summer sessions are not included) as a registered full-time student engaged in academic work at the University Park campus, the Penn State Milton S. Hershey Medical Center, or Penn State Harrisburg. Full-time University employees must be certified by the department as devoting half-time or more to graduate studies and/or thesis research to meet the degree requirements. Students should note that 601 cannot be used to meet the full-time residence requirement. (See Credit Loads and Academic Status.)

Continuous Registration--It is expected that all graduate students will be properly registered at a credit level appropriate to their degree of activity. (See Registration.) After a Ph.D. candidate has passed the comprehensive examination, the student must register continuously for each fall and spring semester until the final oral examination is passed. (Students who are in residence during summers must also register for summer sessions if they are using University facilities and/or faculty resources, except for Graduate Lecturers/Researchers, who are not required to enroll for any credits unless they are first-semester graduate students, or are required to be enrolled by their graduate program.)

Post-comprehensive Ph.D. students can maintain registration by registering for credits in the usual way, or by registering for noncredit 601 or 611, depending upon whether they are devoting full time or part time to thesis preparation. Students may take 601 plus up to 3 additional credits of course work for audit by paying only the dissertation fee. Students wishing to take up to 3 additional credits of course work for credit, i.e., 590, 602, etc., with 601 may do so by paying the dissertation fee and an additional flat fee. Enrolling for either 3 credits for audit or credit will be the maximum a student may take with SUBJ 601 without special approval by the Graduate School. NOTE: Registration for additional credits above this will incur an additional charge at the appropriate tuition per-credit rate (in state or out of state). Students wishing to take more than 3 additional credits of course work must register for 600 or 611 (i.e., not for 601, which is full-time thesis preparation).

Note that the least expensive way for a student to maintain full-time status while working on research and thesis preparation is to register for 601. This clearly is the procedure of choice for international students who need to maintain status as

full-time students for visa purposes.

If a Ph.D. student will not be in residence for an extended period for compelling reasons, the director of Graduate Enrollment Services will consider a petition for a waiver of the continuous registration requirement. The petition must come from the doctoral committee chair and carry the endorsement of the department or program chair.

Minor Field--A Ph.D. candidate is not required by the Graduate Faculty to have a minor field of study. However, a department or a committee in charge of a major field may require a candidate to offer work in a minor field, or a student may elect such a program with the permission of the doctoral committee.

A doctoral minor consists of no fewer than 15 graduate credits of integrated or articulated work in one field related to, but different from, that of the major. Programs should consider that a doctoral minor should represent curriculum and study that reflect graduate-level concepts and scholarship, with a preponderance of courses at the 500-level, however, at a minimum, 6 credits must be at the 500-level. A minor normally may be taken only in one of the approved graduate degree programs offered at Penn State, or in a formal graduate minor program that has been approved by the Graduate Council, such as the minors in comparative and international education; gerontology; high performance computing; literary theory, criticism, and aesthetics; linguistics; medieval studies; religious studies; science, technology, and society; second language acquisition; social thought; or women's studies. The minor field chosen must have the approval of the departments or committees responsible for both the major program and the minor field. If more than one minor is being proposed, a separate group of courses must be taken for each (i.e., none of the courses may be used concurrently). If the student received a master's minor in the same field as is being proposed for a doctoral minor, the 15 credits taken must be above and beyond those used for the master's minor. However, credits earned in the master's program over and above those applied to either the master's minor or major may be applied to a minor in the Ph.D. program.

At least one faculty member from the minor field must be on the candidate's doctoral committee.

Dissertation --The ability to do independent research and competence in scholarly exposition must be demonstrated by the preparation of a dissertation on some topic related to the major subject. It should represent a significant contribution to knowledge, be presented in a scholarly manner, reveal an ability on the part of the candidate to do independent research of high quality, and indicate considerable experience in using a variety of research techniques. The contents and conclusions of the dissertation must be defended at the time of the final oral examination.

When a complete draft of the dissertation has been compiled, the student must submit it to the Thesis Office for format review. Submission for format review must be made by the announced deadline for the semester/session in which the degree will be conferred. After a successful defense and after signed approval by the advisers and/or committee members and the department head or graduate

program chair, the final archival copy of the dissertation (incorporating any format changes requested by the Thesis Office), must be uploaded as an eTD (electronic dissertation) by the announced deadline for the semester/session in which the degree will be conferred. It is also expected that the student will provide a final archival copy of the dissertation to the office of the department or program head.

A Thesis Guide, which gives details concerning format and other requirements, can be accessed at: www.gradsch.psu.edu/current/thesis.html ([Opens New Window](#)).

D.Ed.--Additional Specific Requirements

The D.Ed. degree is conferred in recognition of advanced preparation of a high order for work in the profession of education as evidenced by:

1. Satisfactory completion of a prescribed period of study;
2. Ability to apply scientific principles to practitioner problems in a variety of education endeavors;
3. Preparation of dissertation demonstrating ability to undertake an educational problem with originality and independent thought;
4. Successful performance on major and minor examinations, showing a satisfactory grasp of the field of specialization and its relation to allied education areas.

Residence Requirement--A minimum of 90 credits, of which at least 30 credits must be earned in residence at University Park campus, or Penn State Harrisburg if the degree is offered at that location, is required for the D.Ed. degree. The D.Ed. candidate may meet the requirements by attending summer sessions unless the major department requires a period of registration during the regular academic year. A candidate may register for a maximum of 30 credits of research in absentia, but none of these may count toward the minimum of 30 credits that must be earned at the University Park campus or Penn State Harrisburg if the degree is offered at that location. It is expected that students will register for a minimum of 15 credits of thesis research.

Major Program and Minor Field--The program of study includes a major and either a minor or a group of general studies. A majority of the courses offered in fulfillment of the requirements must be in the major program of study.

A candidate choosing a major outside the fields of professional education (such as history) shall have a minor consisting of no fewer than 15 graduate credits in professional education, as recommended to the director of Graduate Enrollment Services early in the major program with the approval of a faculty adviser from the minor area.

A candidate choosing a major in one of the approved programs in professional education must also choose either a minor or a group of general studies with the approval of the major program chair. In this case, a minor consists of no fewer than 15 graduate credits in a field considered by the major program committee to provide valuable intellectual and/or professional depth and breadth for the candidate. There must be at least one faculty member from the minor field on the candidate's doctoral committee. The minor may include courses taken as part of a previous master's degree program, if the minor is in an area different from the master's, and if the courses were not a required part of the program, e.g., used to meet a total credit requirement.

An acceptable general studies group consists of at least 15 graduate credits, including those taken as part of a previous master's degree (up to 6 credits), considered by the major program committee to provide valuable intellectual

breadth for the candidate. (Note that a general studies group is not a minor and is not entered as such on the student's transcript.)

A candidate entering with a master's degree in a field that would normally be regarded as appropriate for a minor may petition the major program committee for a waiver of the minor requirement. If the program chair then approves, a request for a waiver may be submitted by the chair to the director of Graduate Enrollment Services. Waiving the minor requirement does not reduce the residence or total credit requirements for the D.Ed. degree.

Comprehensive Examination--In addition to demonstrating a high level of competence in the subject matter in the major program and minor field, each candidate must show, by a comprehensive examination, an understanding of current theories of education and the ability to apply the techniques and findings of educational research so far as they bear upon the teaching of the subject matter. The candidate must also be able to understand and contribute to the technical and professional literature in the field, and to criticize learned procedures in the light of historical trends and practices in this and other countries. Command of the tools for a thorough study of the problems of education is necessary and must include competence in the use of statistical methods. For certain students the requirements may include a reading knowledge of one or more foreign languages.

All candidates are required to have a minimum grade-point average of 3.00 for academic work done at the University at the time the comprehensive examination is given.

Dissertation--Evidence of a high degree of scholarship, competence in scholarly exposition, and ability to select, organize, and apply knowledge must be presented by the candidate in the form of a written dissertation. The candidate must demonstrate a capacity for independent thought, as well as ability and originality in the application of educational principles or in the development of a new generalization under scientific controls. A dissertation may be based upon a product or project of a professional nature, provided scholarly research is involved. For example, it may be based upon the solution of a professional problem concerned with the development of a curriculum, or a product of creative effort related to education. However, in order to be acceptable as a dissertation, professional project must be accompanied by a written discourse demonstrating the nature of the research and including such theories, experiments, and other rational processes as were used in effecting the final result. The topic and outline of the proposed dissertation must have the approval of the doctoral committee.

When a complete draft of the dissertation has been compiled, the student must submit it to the Thesis Office for format review. Submission for format review must be made by the announced deadline for the semester/session in which the degree will be conferred. After a successful defense and after signed approval by the advisers and/or committee members and the department head or graduate program chair, the final archival copy of the dissertation (incorporating any format changes requested by the Thesis Office), must be uploaded as an eTD (electronic dissertation) by the announced deadline for the semester/session in

which the degree will be conferred. It is also expected that the student will provide a final archival copy of the dissertation to the office of the department or program head.

A Thesis Guide, which gives details concerning format and other requirements, can be accessed at: www.gradsch.psu.edu/current/thesis.html ([Opens New Window](#)).

D.M.A.--Additional Specific Requirements

The Doctor of Musical Arts requires four semesters in residence. The degree is designed to provide students with a thorough background of preparation and experience in professional-level performance and in the literature of the instrument, while becoming sufficiently knowledgeable about the discipline of music as a whole, in order to teach at the collegiate or university level. This background knowledge would include, but not be limited to, music theory, analysis, and history. Sixty credits are required beyond the Master of Music; if an exceptional student is admitted before completion of a prior Master of Music degree, the student will complete a total of 30 credits in categories equivalent to those required for the M.Mus., in addition to the 60 required for the D.M.A. A candidacy examination will follow upon two semesters completed in residence. The comprehensive examination will occur upon the completion of course work, before the final recital. The culminating experience of the D.M.A. degree is a public performance: three memorized solo recitals are required (the final recital is prepared independently), and two recitals of chamber music. Although no written thesis is required, a lecture-recital is required, with a pre-approved monograph text.

Pennsylvania Department of Education Certificate Candidates

For information, see www.ed.psu.edu/certification ([Opens New Window](#)).

PROFESSIONAL DEVELOPMENT CERTIFICATES

Postbaccalaureate candidates who want to pursue course work simply for their professional development and/or a permanent Level II certificate should apply to the Graduate School as special nondegree graduate students.

Master's Degrees

The Graduate School recognizes a difference in purpose, which is reflected in the requirements, for two types of advanced degrees: academic and professional. Of the master's degrees conferred at the University, the Master of Arts and Master of Science are academic in nature. The Master of Arts and the Master of Science degrees have similar requirements, the general major area determining which degree is conferred. Programs for both degrees are strongly oriented towards research and the creation of new knowledge.

The professional master's degree emphasizes practical application of knowledge for solving problems. The professional graduate degrees currently conferred are Master of Accounting, Master of Agriculture, Master of Applied Statistics, Master of Architectural Engineering, Master of Architecture, Master of Biotechnology, Master of Business Administration, Master of Education, Master of Engineering, Master of Environmental Pollution Control, Master of Finance, Master of Fine Arts, Master of Forest Resources, Master of Geographic Information Systems, Master of Health Administration, Master of Homeland Security, Master of International Affairs, Master of Landscape Architecture, Master of Leadership Development, Master of Manufacturing Management, Master of Music, Master of Music Education, Master of Professional Studies, Master of Project Management, Master of Public Administration, and Master of Software Engineering.

For all master's degrees, a minimum of 30 credits is required. At least 18 credits at the 500-level or above (with at least 6 credits of 500-level in professional master's programs) must be included in the program and a significant culminating or "capstone" experience or other mechanism to demonstrate evidence of analytical ability and synthesis of material is required.

- For *academic* degrees, this culminating experience must include the completion of either a thesis or a suitable essay or paper.
- For *professional* degrees, the culminating experience may take other forms, including but not limited to an internship, an exhibition, a production, a comprehensive examination, or a capstone course. The specific form of the culminating experience is determined by the major program.

A degree is not conferred for a mere collection of credits. A well-balanced, unified, and complete program of study is required, including the preparation and acceptance of a high-quality written document (thesis, paper, or project report) or other approved culminating experience. The overall program of the student frequently will exceed the minimum requirements as specified under the Additional Specific Requirements for the degree title.

A student may meet the degree requirements by either full- or part-time enrollment and by attendance in any combination of semesters and summer sessions. The student who interrupts the continuity of registration faces the possibility of not being granted permission to return.

GRADE-POINT AVERAGE

A minimum grade-point average of 3.00 for work done at the University is required for graduation and to maintain good academic standing.

TIME LIMITATION

All requirements for a master's degree (including acceptance of a thesis, paper, or project report as may be specified), whether satisfied on the University Park campus or elsewhere, must be met within eight years of admission to degree status. Individual programs may set shorter time limits. Extensions may be granted by the Director of Graduate Enrollment Services in appropriate circumstances.

ADMISSION

In addition to the general University requirements for admission, adequate undergraduate preparation is required in the program in which the applicant expects to pursue advanced work. The specific courses and the total number of undergraduate credits required in various areas will be determined by the choice of program and can be ascertained from the descriptive statement appearing under the graduate program heading in the latter portion of this bulletin. An applicant who meets the necessary grade-point average but is deficient in course preparation may, under certain circumstances, be admitted to the Graduate School and be allowed to make up the undergraduate deficiencies. Under these circumstances the program will require more than the necessary period of residence. An applicant for admission to the M.Ed. program in most major programs is required to have had at least 18 credits in education and related psychology, and in certain major programs may be required to have had practice teaching.

Requirements concerning courses, language proficiency, minors, comprehensive examinations, and other matters are sometimes made by departments or programs in addition to (but not in conflict with) the regulations of the Graduate School. For details the student should consult the head of the major department or program.

ADVISING

After admission to a degree program, a student should confer with the head of the major department or program concerning the appointment of an adviser. The general guidance of a master's candidate is the responsibility of an adviser, who is a member of the Graduate Faculty, or of a committee appointed in a manner to be determined by the major department or program in which the student is specializing. The adviser or the committee assists the student in planning a program of study. Although the adviser is frequently the supervisor of the thesis,

this is not necessarily the case.

TRANSFER CREDIT

Subject to the limitations given, a maximum of 10 credits of high-quality graduate work done at a regionally accredited institution may be applied toward the requirements for the master's degree. However, credits earned to complete a previous master's degree may not be applied to a second master's degree program at Penn State.

The student should distinguish carefully between the transferability of credit and its applicability in a particular degree program. Approval to apply any transferred credits toward a degree program must be granted by the student's academic adviser and the Graduate School. Transferred academic work must have been completed within five years prior to the date of first degree registration at the Graduate School, must be equivalent to "B" quality (grades of B- are not transferrable) on Penn State's grading system, and must appear on an official graduate transcript. Course work to be transferred must appear on an official graduate transcript of an accredited or recognized degree-granting institution. Credits earned toward a previously **completed** postbaccalaureate professional degree program (law, medicine, etc.) are not transferrable. However, up to 10 credits can be transferred from a professional degree program if the degree has not been conferred.

All transfer credit must be substantiated by the former institution as having at least B quality whatever grading system is in place. Pass-fail grades are not transferable to an advanced degree program unless the "Pass" can be substantiated by the former institution as having at least B quality.

Forms for transfer of credit can be obtained from the Office of Graduate Enrollment Services, 114 Kern Building or the graduate program.

RESIDENCY REQUIREMENTS

Residency requirements have previously been met by a period of enrollment or the completion of a minimum number of credits that are administratively associated with a specific Penn State campus. In some cases this can allow students who never set foot on any Penn State campus to satisfy residency requirements by taking classes offered by distance means. In other cases, it can limit access to graduate education by imposing a burden on students who are location-bound or who can most effectively complete their graduate studies by combining courses offered at different Penn State locations.

For professional degree programs (M.Eng., M.Agr., M.Ed., etc.), it may not always be possible, desirable, or necessary to fulfill residency in the traditional manner. Availability of professional mentors and access to unique facilities at students' work sites or other locales may, in some instances, confer special advantages in

well-designed off-campus degree programs. Professional degree programs that are not "off-campus degree programs" (i.e., those in which less than half of the course credits consist of off-campus courses) implicitly have a substantial involvement of the students with the campus responsible for the program, thus fulfilling the majority of the functions of residency. However, professional degree programs that are offered off-campus must incorporate as many of the essential elements of residency as possible, including faculty–student and student–student interaction, access to instructional and other resources, exposure to and socialization in the field of study, and suitable academic advising.

Policies and guidelines pertaining to the offering of "off-campus" graduate degree programs are available through the dean of the Graduate School, 114 Kern Building, or at the following Web site:

www.gradsch.psu.edu/policies/faculty/offcampus.html (Opens New Window).

EXAMINATIONS

A candidate may be required to pass in a satisfactory manner written or oral examinations designated by the program. A candidate should consult the major department or program for special requirements.

Examinations to establish credit for work done in absentia or without formal class work may be used to remove undergraduate deficiencies, but not to earn credits toward an advanced degree. Arrangements are made by the student directly with the major department head or program chair.

M.A. and M.S.--Additional Specific Requirements

The Master of Arts and the Master of Science degrees have similar requirements, the general major area determining which degree is conferred. Programs for both degrees are strongly oriented toward research.

A minimum of 30 graduate credits is required, of which at least 20 must be earned at the established graduate campus/center of the University where the program is offered. Some graduate programs require additional credits; the exact number can be determined by consulting the specific program description in the subsequent section, Graduate Programs, Faculty, and Courses. A minor is not required of all candidates for the M.A. or M.S. degree. A department or committee in charge of a major program may require a candidate to offer work in a minor field, or the minor may be elected with the permission of the student's committee.

Any member of the Penn State faculty with at least assistant professor rank may participate in the guidance and examination of master's candidates and sign master's thesis signatory pages. Special signatories occasionally are requested and approved for master's thesis. The supervisor of the master's work must be a member of the Graduate Faculty.

A master's minor consists of no fewer than 6 credits of integrated or articulated work in one field related to, but different from, that of the major. Programs should consider that a minor at the graduate level should represent curriculum and study that reflect graduate-level concepts and scholarship, with a preponderance of courses at the 500-level, however, at a minimum, 3 credits must be at the 500-level. A minor program must be in one of the approved graduate degree programs offered at Penn State and must have the approval of the departments or committees responsible for both the major program and the minor field.

The major department or the committee in charge of the major program is the judge as to the suitability of a field for the minor and of its relevance to the major. The minor field department has the responsibility of accepting or rejecting students, advising on courses to be taken by the candidate in the field, examining the candidate in the area of studies undertaken in the field, and certifying that the minor requirements have been met.

At least 18 credits in the 500 and 600 series, combined, must be included in the program. A minimum of 12 credits in course work (400, 500, and 800 series), as contrasted with research, must be completed in the major program, with a minimum number of 800-level credits as appropriate to the degree and as approved by the graduate program to be applied to degree requirements. A thesis is required of many candidates for these degrees. Details are given in the introductory paragraphs under the major program headings in the latter part of this bulletin. If a student is required to write a thesis, at least 6 credits in thesis

research (600 or 610) must be included in the program. If no thesis is required, at least 18 credits must be in 500-level courses.

A thesis is prepared under the direction of the department or program in which the candidate's major work is taken. Under certain conditions a student may complete the thesis off campus. To do so, satisfactory arrangements must be made in advance with the adviser and the head of the major department or program.

When a complete draft of the thesis has been compiled, the student must submit it to the Thesis Office for format review. Submission for format review must be made by the announced deadline for the semester/session in which the degree will be conferred. After a successful defense and after signed approval by the advisers and/or committee members and the department head or graduate program chair, the final archival copy of the thesis (incorporating any format changes requested by the Thesis Office), must be deposited with the Thesis Office or uploaded to the eTD Web site by the announced deadline for the semester/session in which the degree will be conferred. It is also expected that the student will provide a final archival copy of the thesis to the office of the department or program head.

A Thesis Guide, which gives details concerning format and other requirements, can be accessed at: www.gradsch.psu.edu/current/thesis.html ([Opens New Window](#)).

Candidates who are not required to write a thesis must present a suitable essay or paper. Its nature and extent shall be determined by the major program. The department head or program chair shall report to the Office of Graduate Enrollment Services that the student has met the approved requirement. The department or program is responsible for ensuring that the work is finalized by the published deadline for the semester/session. The program head may require one or more copies of the essay for the program's library or files.

Some programs in the field of education offer the M.S. degree but prefer to admit students into the M.Ed. degree program. Other programs that emphasize research prefer to admit only students interested in pursuing the Ph.D. degree.

Requirements for the M.A. degree at Penn State Harrisburg differ somewhat from the above and are outlined under the major programs in American Studies, Humanities, Community Psychology and Social Change, and Applied Psychology. These programs are available only at Penn State Harrisburg.

M.F.R.--Additional Specific Requirements

The Master of Forest Resources (M.F.R.) is a professional degree designed for students who want to specialize in fields of wood products marketing or industries, forest management, silviculture, urban forestry, watershed management, or wildlife and fisheries management. This degree differs from the research-oriented Master of Science degree programs in the School of Forest Resources, because the M.F.R. emphasizes applications, analysis, and synthesis of knowledge rather than creating new information through more traditional types of research. This program is especially attractive to returning students interested in gaining state-of-the-art information rather than thesis research in their specialized field.

Students who have baccalaureate degrees in forestry, wood products, or wildlife and fisheries may complete the M.F.R. degree requirements in one year, whereas those with degrees in related fields generally require longer because of deficiencies in prerequisite undergraduate courses.

A minimum of 30 graduate credits (400- to 500-level courses) is required, of which 20 credits must be earned at an established graduate campus of the University, with at least 18 credits as formal courses (excluding paper writing, colloquia, and independent studies) related to forest resources, wood products, and wildlife and fisheries. At least 18 credits at the 500 level or above (with at least 6 credits in 500 level) must be included in the program, including 6 credits of formal courses. A paper (3 to 6 credits of FOR/W P/W F S 596) and formal oral presentation (1 credit of FOR/W P/WFS 596) are required as part of the 30 credits that demonstrate ability to apply the knowledge gained during the program to the specialized field of interest. The program must also include 3 credits of statistics at the graduate level.

M.G.I.S.--Additional Specific Requirements

The Master of Geographic Information Systems (M.G.I.S.) degree program is for adult professionals who aspire to leadership in the GIS profession but who are able to study only part-time and at a distance.

MGIS is a 35-credit program. Six to 9 credits are earned through an independent project that culminates in a formal public presentation attended by the student's academic adviser. The independent project demonstrates students' ability to apply advanced knowledge and skills in a way that makes a substantial contribution to their professional work.

Designed in consultation with an advisory board of experienced professionals in industry, government, and private practice, the MGIS curriculum nurtures not only technical competence but also the articulacy, analytical skills, and professionalism required for leadership in any organization.

Throughout the program students create and maintain personal e-portfolios that chronicle their achievements, outline long-term professional development strategies, and foster meaningful interactions among fellow students and faculty members.

M.H.A.--Additional Specific Requirements

Penn State's Department of Health Policy and Administration helps students prepare for positions in health care organizations, the nation's second-largest and fastest-growing industry. Master of Health Administration (MHA) graduates become executives in hospitals, health systems, skilled nursing facilities, insurance companies, consulting firms, home health agencies, federal regulating agencies, medical group practices, health maintenance organizations, public health agencies, mental health agencies, and clinics. The curriculum emphasizes strategic thinking, management, communication, and a broad understanding of the U.S. health care system. Areas of study include health law, epidemiology management, payment mechanisms, ethics, managed care, long-term care, health care technology, marketing, and strategic planning.

Satisfactory scores on either the Graduate Management Test (GMAT) or the Graduate Record Examinations (GRE) are required for admission. In addition, a junior/senior grade-point average of 3.00 or better, a relevant personal statement, and two letters of recommendation are necessary. Some work experience in health care is preferred, but not required.

The MHA program is designed to be completed in twenty-one months of full-time study, although it may be completed on a part-time basis. A minimum of 49 credits is required for completion of the degree. Students take 46 preselected Health Policy and Administration credits and 3 credits of electives selected in consultation with an adviser. Students are required to complete a ten-week residency in a health care practice setting. For full-time students, this is completed during the summer between the first and second years of academic study.

Penn State Harrisburg--Based on eight prescribed core courses defined as the foundation of administration in health care, the degree program is designed for part-time professional students already engaged in, or interested in, health administration careers. Three years of relevant experience is an admission requirement. If the applicant's GPA is less than 3.0, GRE or GMAT scores are required.

M.H.S.--Additional Specific Requirements

The M.H.S. is designed to provide students with broad training in issues surrounding homeland security. The target audience may include federal, state, and local public health officials, public affairs administrators, emergency management professionals, health care professionals, first responders, criminal justice and law enforcement personnel, military staff, and members of corporate security.

The Master of Homeland Security requires a minimum of 30 graduate credit hours, of which at least 18 must be in 500-level courses. Each candidate must complete a project report on a topic related to homeland security. The department head or program chair shall report, to the Office of Graduate Enrollment Services, the successful completion of the report and is responsible for ensuring that the work is finalized by the deadline for the semester in which the student intends to graduate.

M.L.A.--Additional Specific Requirements

The Master of Landscape Architecture program is structured as advanced scholarly inquiry within the professional discipline. The intent is to provide specialized expertise in a niche area of landscape architecture to individuals who already have completed a practice-oriented professional program. Prospective students must hold a degree from an accredited program (or foreign equivalent) in landscape architecture or architecture.

Penn State's MLA program offers particular opportunities for study in four expertise areas: community and urban design, through affiliation with the Hamer Center for Community Design Assistance; ecological issues with emphasis on watershed stewardship, through affiliation with the Center for Watershed Stewardship; design computing, through affiliation with the Stuckeman Center for Design Computing; and landscape history, through affiliation with the Historic Places Initiative.

Students may choose one of two curricular tracks in the MLA: a practicum-oriented option in one of the four centers, or pursuit of a unique independent study in conjunction with a center topic or faculty research. In both tracks, students pursue individual inquiry intended to contribute to advancement of the profession: a paper (or papers) in the option track, and in the independent track a major project that forms the focus of the student's curriculum.

A minimum of 44 credits is required, at least 34 credits at University Park campus: 19 credits are studio/research, 4 are in seminar, 21 are supporting electives. The majority of the course work must be at the 500 level.

M.L.D.--Additional Specific Requirements

The Master of Leadership Development is a 36-credit interdisciplinary professional graduate program that blends the social and behavioral sciences with ethical studies to develop outstanding organizational and community leaders. A series of cornerstone, competency, and context courses are required to provide all students with a common body of knowledge. All students must complete a capstone course (LEAD 582 Social Entrepreneurship and Community Leadership) that provides students with an opportunity to enact what is learned in the course work in the context of promoting a positive change in the community. The program is geared to individuals in mid- to upper levels of management and administration who have at least five years of related professional experience.

M.M.M.--Additional Specific Requirements

Master of Manufacturing Management (M.M.M.) is a professional degree conferred jointly by the College of Engineering and the Smeal College of Business, both national leaders in education and research. The M.M.M. degree is administered by the Quality and Manufacturing Management (QMM) program. The M.M.M. degree program is an integrated nine-month academic program (32 credits) with an enrollment limit of forty-five students, combining individuals with backgrounds in business, engineering, science, and industry.

While a student may enter the M.M.M. degree program immediately after completing a baccalaureate degree in engineering, business, or science, an internship with a manufacturing company in the summer before entering the program is required for students with no industrial experience. Upon starting the academic year in the fall, students with an engineering or science background are required to take an introductory core course in business principles, while those with a business background must take an introductory core course in engineering design principles. The introductory business or engineering course, together with the ten remaining core courses are completed over a two-semester period. All core courses have been specifically designed for this program, and most integrate engineering and business concepts in the classroom.

All applicants from industry must submit scores from the Graduate Record Examinations (GRE) or the Graduate Management Admission Test (GMAT). In addition, they must have a minimum of one year of relevant industry work experience and a baccalaureate degree in physical science, engineering, business, or management from an accredited university.

Applicants who are currently enrolled as undergraduates may apply for admission to the program in their senior year. They should have a minimum cumulative grade-point average of 3.0 at the time of application. Additionally, applicants must submit either GRE or GMAT scores. All students whose native language is not English must achieve a minimum score of 600 on the Test of English as a Foreign Language (TOEFL). The TOEFL requirement is waived for international students who have successfully completed undergraduate or graduate work in a U.S. or Canadian college or university.

All students entering the program must be competent in mathematics, statistics, and computer programming.

M.Mus.--Additional Specific Requirements

The program leading to the Master of Music degree provides training for increased professional competence in performance, pedagogy, conducting, composition. It should be distinguished carefully from the research-oriented program that leads to the academic degree of Master of Arts.

Admission requirements include an audition for performance and conducting applicants and submission of a composition portfolio for composition applicants.

A minimum of 36 credits is required, of which 30 must be earned at the University Park campus. At least one-half of the required credits must be at the 500 level.

Depending on the major option, a professional project in performance, conducting, or composition is required. A master's paper and a comprehensive examination also are required in certain areas.

M.M.E.--Additional Specific Requirements

The Master of Music Education degree provides opportunity for advanced study in the art of music, pedagogy, and systematic problem solving. In addition to the traditional academic year program, a "summer only" option is available.

A minimum of 30 credits is required, of which 20 must be earned at the University Park campus. At least 18 credits at the 500 level or above (with at least 6 credits in 500 level) must be included in the program.

Admission requires 12-15 credits in music education methods at the undergraduate level, successful teaching or student teaching experience, and a video taped demonstration of teaching and musical competence. Also required are a master's paper and a comprehensive examination.

M.P.A.--Additional Specific Requirements

The Master of Public Administration (MPA) program is intended for those with career interests in public management, health and human services, government, and other public service and nonprofit organizations. The MPA program is accredited by the National Association of Schools of Public Affairs and Administration. The M.P.A. degree is offered at Penn State Harrisburg.

The M.P.A. degree requires 36 graduate credits—18 in prescribed core courses, 15 in electives, and 3 for a professional master's project. In addition, a 9-credit internship is required of students who do not have at least three years of full-time, relevant work experience, which consists of supervisory, managerial, or professional work. The internship is waived for students with this experience before they enter the program or who gain it during the program.

M.Agr.--Additional Specific Requirements

The Master of Agriculture is a professional degree with an industrial orientation. A student, according to individual objectives, may obtain intensive training encompassing a wide spectrum of subject matter area or intensive training in a specialized area. The program emphasizes the development of professional skills in the communication of technical knowledge and its application to the solution of current and future technical, economic, and social problems of individuals and groups.

The head of the department or program chair appoints a three-member committee to guide and monitor the candidate's professional development. Members of this committee must represent at least two departments. The chair of the appointed committee serves as the candidate's adviser. The candidate will inform the committee of personal aspirations and background early in the program. The committee will suggest to the student how best to achieve these goals and the standard of professional competence required for the Master of Agriculture degree.

A minimum of 30 graduate credits is required, of which 18 credits must be at the 500 level or above. A maximum of 10 credits may be earned in special problem-type courses.

Students in the Master of Agriculture degree program can major in Agricultural Economics, Agronomy, Animal Science, Forest Resources, Horticulture, Plant Pathology, Rural Sociology, Soil Science, or Wildlife and Fisheries Science.

The candidate must present an acceptable paper on a selected professional problem or a report of internship training. Up to 3 graduate credits will be given for an acceptable paper. The candidate may be required to provide one or more copies of the paper for the University.

The candidate's committee shall report, through the department head or program chair, to the Office of Graduate Enrollment Services the title of the paper and that a draft of the work has been submitted by the published draft deadline for the semester. The department or program is responsible for ensuring that the work is finalized by the published deadline for the semester.

M.P.M.--Additional Specific Requirements

The Master of Project Management is a 30-credit graduate program that emphasizes all aspects of project management theory and practice. The M.P.M. is interdisciplinary and utilizes problem-based learning as well as a combination of face-to-face and Web-based instructional methods to transcend time and space, and to support effective teaching and learning. The M.P.M. curriculum requires the completion of eight courses (24 credits) in which students are required to apply course concepts to project management situations in their employing organizations. In addition, an applied research project (6 credits) focusing on some aspect of project management is required.

M.P.S. -- Additional Specific Requirements

The Master of Professional Studies is a professional degree. Programs leading to the M.P.S. degree provide opportunities for students to increase their knowledge and competencies in specific careers (as practitioners). The M.P.S. is often considered the "terminal" degree in the field and students entering often need not have undergraduate training in the field, as the curriculum provides foundation material assuming a diversity of backgrounds.

A minimum of 30 graduate credits is required, of which at least 18 credits must be at the 500-level and above, with a minimum of 6 credits of 500-level course work. A significant culminating or "capstone" experience or other mechanism to demonstrate evidence of analytical ability and synthesis of material is required. These may typically include, but are not limited to, a paper, an internship, an exhibition, a production, a comprehensive examination, or a capstone course. The specific form of the culminating experience is determined by the major program.

The department head or program chair shall report to the Office of Graduate Enrollment Services the nature of the culminating experience and is responsible for ensuring that the work is finalized by the deadline for the semester in which the student intends to graduate.

M.S.E.--Additional Specific Requirements

The Master of Software Engineering degree is a professional degree that focuses on exploring and examining software engineering practices and solutions that address emerging industry issues, such as e-commerce and enterprise integration.

The program is designed to meet the educational needs of technical professionals who want to build upon their software engineering knowledge.

Applicants for admission should hold an undergraduate degree in an appropriate technical field. Applicants not holding a technical degree should present a minimum of three years' work experience in the software profession. All applicants must have proficiency in a high-level language and in the principles of computer architecture, or complete prerequisite courses upon admission to the program.

The degree program requires completion of 36 credits of graduate course work, including a 3-credit advanced studio leading to the development of an actual software product, participation in a research institute, or a 3-credit professional paper.

For maximum career flexibility, students may broaden their study by selecting approved courses from allied fields, such as artificial intelligence, computer science and engineering, and management information systems.

Master of Accounting (M.Acc.)

The Master of Accounting is designed to prepare students to enter careers in public accounting, corporate accounting, management accounting, governmental accounting, financial analysis, and law enforcement. The program is designed to allow students to complete the educational requirements for becoming a certified public accountant in Pennsylvania as well as most other states. A minimum of 30 graduate credits is required, with a least 18 credits earned in courses at the 500- or 800-level of which at least 6 credits must be earned in 500-level courses. A capstone course (with a final project) integrating material learned in the other program courses is required.

M.E.M. -- Additional Specific Requirements

The Master of Engineering Management is developed for students with a background in engineering or science. Applicants with a four-year undergraduate degree in engineering, mathematics, physics, computer science, or a related discipline will be considered. All students in the Master of Engineering Management program must complete a minimum of 33 credits, including 18 credits in core courses at the 500 level and completion of the capstone course.

M.I.A. -- Additional Specific Requirements

Students admitted to the Master of International Affairs program must take a total of 30 graduate credits, including 18 credits of required core courses with the remaining credits chosen from elective courses that will cluster around areas of concentration designed by the program faculty. A minimum of 18 credits must be at the 500 level or above. In addition to the core curriculum and elective courses, degree candidates must complete either (1) a master's paper or (2) a supervised internship placement. The master's paper will involve integrating and showing mastery of the subject matter of the student's curricular emphasis; the supervised internship placement must be of sufficient depth and professionalism to allow the student to experience the integration of his/her curricular studies in a professional environment. A reflective paper will be submitted as a part of this credit requirement.

M.Arch.--Additional Specific Requirements

The Master of Architecture degree is a postprofessional degree intended for persons already holding an accredited Bachelor of Architecture degree.

(Postprofessional architecture degrees are not eligible for NAAB accreditation.)

The M.Arch. is a 30-credit program that requires 24 credits of course work and 6 credits of thesis or thesis project. At least 18 credits must be at the 500 or 600 levels, and at least 24 credits must be taken in residence at University Park. The core courses consist of a total of 12 credits. The capstone of the M.Arch. degree program is a master's thesis or thesis (design) project, requiring the student to identify and formulate an area of inquiry within which to do original research and then to complete a project or a written thesis.

M.A.S.--Additional Specific Requirements

The professional Master of Applied Statistics degree requires a minimum of 30 graduate credits of which 24 must be courses from the Department of Statistics. Twenty-one credits must be at the 500 level. The program has been approved for both in residence at University Park campus and online via the World Campus.

M.B.A.--Additional Specific Requirements

Master of Business Administration degree programs are offered at the University Park campus, Penn State Great Valley, Penn State Harrisburg, and Penn State Erie.

University Park Campus--The purpose of the MBA program at the University Park campus is to develop professional managerial knowledge and skills as these are applied to decisions in complex organizations. The curriculum was developed by the graduate business faculty to blend technical rigor, managerial theory, and integrative learning experiences through case studies and other teaching methods.

A minimum of 48 graduate credits is required, with a minimum of 42 credits at the 500 level. Twenty-six credits must be in specific core courses. Also required are 22 credits in portfolio and breadth electives. Work for this degree may be started in the fall semester only. Applications for this AACSB-accredited M.B.A. program must include the results of the Graduate Management Admission Test.

Penn State Harrisburg--The goals of the Harrisburg MBA program are to provide graduates with a foundation for personal and professional growth and lifelong learning; a firm grounding in the academic disciplines underlying the field of business; participative strengths; and decision making, problem solving, and critical thinking skills. Major emphasis is placed on the social, legal, and ethical context of business--particularly ethical values needed in the conduct of business. Program faculty place high value on teaching and currency of curriculum, an emphasis on oral and written communication, collaborative learning, and cross-functional integration of concepts. The students served by the MBA program are, primarily, employees of area business, government, and not-for-profit organizations who reside within the Capital Region and study on a part-time basis. However, either full- or part-time study is possible. The M.B.A. is also offered as a concurrent MBA/Ph.D. program with the College of Medicine at the Penn State Milton S. Hershey Medical Center Department of Pharmacology, and concurrent MBA/J.D. degree program with The Dickinson School of Law.

The M.B.A. requires a minimum of 30 graduate credits, and is offered at the college's Middletown campus and in Lancaster, Pennsylvania. Eighteen of these credits are in prescribed areas of business, including accounting, finance, management, marketing, and information systems. An additional 12 credits are elective, permitting students to select courses in such areas as e-business, human resource managements, financial analysis, or general business to meet their personal and professional goals. Depending on their level of preparation, some students may need to take additional course work beyond the baccalaureate to permit them to begin their advanced business studies with a common conceptual foundation and adequate understanding of the integrated nature of the business enterprise. Applications to this AACSB-accredited program must include results of the Graduate Management Admission Test and two letters of recommendation. In addition, applicants whose first language is not English or who have not

received a prior degree from an institution in which the language of instruction was English must provide scores on the Test of English as a Foreign Language (TOEFL).

Penn State Erie--The Penn State Erie M.B.A. is a general degree emphasizing development of the planning and problem-solving skills crucial in middle and upper management. Course work emphasizes the integration of business functions and the practical application of theory in the business world, using simulated problems and actual situations students are experiencing at work. Many students are fully employed professionals who bring a wealth of knowledge and experience to the classroom. Both full- and part-time study is possible and the program can be completed by attending evening classes. The Master of Business Administration degree program consists of three parts:

1. **Foundation Core Courses (18 credits):** The courses introduce students to the ethical, legal, social, political, technological, and societal environment of business, accounting, economics, finance, management, marketing, operations management, and the application of quantitative methods to the analysis of business problems. The foundation core is required of all applicants who have not completed an undergraduate degree in business or previous undergraduate or graduate course work relevant to the foundation core requirements.
2. **Advanced Required Courses (15 credits):** These courses build on the knowledge base established in the foundation core and provide greater depth of knowledge in the subject areas included. This component of the MBA program consists of five 3-credit courses that cover advanced topics in cost management, information systems management, managing a diverse workforce, global operations and supply chain management, and strategic management and business policy.
3. **Elective Courses (15 credits):** All students are required to take 15 credits of elective courses covering advanced topics of their choice. Electives must include at least 3 credits of community outreach-oriented and 3 credits of internationally focused course work from the program-approved list of courses.

Penn State Great Valley--The M.B.A. at Great Valley's School of Graduate Professional Studies is designed to meet the needs of the working professional desiring to advance her or his career. The M.B.A. requires 45 credits for degree completion. Courses are categorized into four groups: core, advanced, elective, and capstone. Students may be exempt from up to 15 credits from the core courses based on academic preparation and test scores. Students entering the program are expected to meet preprogram requirements that build a foundation for effective communication skills and quantitative analysis.

In addition to the general M.B.A. program, options are available in Biotechnology and Health Industry Management, and New Ventures and Entrepreneurial Studies. Classes are offered evenings and Saturdays in seven-week sessions, and the program may be completed in as little as 18 months. M.B.A. students are admitted year-round at the beginning of each of the seven-week sessions. Applications must include the results of a Graduate Management Admissions Test. For more

information, refer to the Web at <http://www.gv.psu.edu> (Opens New Window).

M.Ed.--Additional Specific Requirements

The programs leading to the degree of Master of Education provide preparation for increased professional competence in education. They should be distinguished carefully from the research-oriented programs that lead to the academic degrees of Master of Arts or Master of Science. In most major programs the requirements for admission include 18 credits in education and related fields.

A minimum of 30 graduate credits is required for the degree, of which at least 20 must be earned at the campus/center where the degree program is offered; at least 24 must be in course work. This degree is also offered in certain programs at Penn State Harrisburg and Penn State Great Valley.

Major Programs in the Fields of Education--A student can major in one of the approved programs in professional education and proceed under the guidance of a graduate faculty member of the appropriate major. At least 18 credits at the 500 level or above (with at least 6 credits in 500 level) must be included in the program. Most programs of this type require at least 6 credits to be earned outside the major as providing valuable breadth for the candidate. However, this policy differs among programs. Specific information about such requirements is found under the individual program listings in this bulletin or from the program's coordinator. It is important for potential students to obtain the degree requirements of the programs in which they are interested, because many programs specify degree requirements in excess of 30 credits and the manner in which credits are to be earned: required, elective, in or out of the major.

Major Programs Outside the Fields of Education--A student who wants to earn an M.Ed. in a specific subject-matter field, such as economics, mathematics, German, or a broader area, can choose such a program as a major and take a majority of work in it under the guidance of the department offering that major. The candidate is required to earn 6 credits in education as directed by the faculty of one of the approved graduate programs in professional education.

Culminating Experience--All M.Ed. programs require a significant culminating or "capstone" experience. Each program has established the specific manner for meeting the requirement, which may take the form of a thesis, production, paper, exhibition, comprehensive examination or other similar experience serving to demonstrate comprehensive and in-depth knowledge of the field of study. The nature and extent of this work and when it is to be undertaken within the program of study shall be determined by the major program and reported to the Office of Graduate Enrollment Services of the Graduate School.

Thesis or Paper--The thesis or paper must be of considerable proportion and must be clearly and definitively indicative of the capacity to describe a serious intellectual investigation, study, critical analysis, or evaluation; to acquire, integrate, and analyze information; to draw conclusions logically; and to present

the experience adequately and professionally in writing. The requirements of the Graduate School regarding a thesis must be met. Programs may impose other requirements regarding the master's paper, including submission of more than one copy for disposition at the program level.

Exhibition or Production--The capstone experience must be of comparable rigor as that required for a thesis or master's paper. While the format of the experience will differ among programs, all such capstone experiences must result in definitive evidence of satisfaction of the above noted qualities. Some tangible written report is required, although the length and nature of this report are to be left to the department or program.

Other Capstone Experience--If the program wishes to use some other mechanism to demonstrate culminating evidence of analytical ability and synthesis of material, it may do so upon approval by the Graduate Council. The program or department must report to Graduate Enrollment Services evidence that the student has met the approved requirement.

M.Eng.--Additional Specific Requirements

The Master of Engineering degree programs provide training for advanced professional competence in several fields of engineering. This professional master's degree emphasizes practical application of knowledge for solving problems and should be distinguished carefully from the research-oriented programs that lead to the academic degree of Master of Science. A minimum of 30 graduate credits is required, of which 20 must be earned at the campus/center where the degree program is offered. At least 18 credits must be earned in graduate courses (500 series).

Culminating Experience--All M.Eng. Programs require a significant culminating or "capstone" experience. Each program has established the specific manner for meeting the requirement, which may take the form of a paper, writing portfolio, or other similar experience serving to demonstrate comprehensive and in-depth knowledge of the field of study. The nature and extent of this work and when it is to be undertaken within the program of study shall be determined by the major program and reported to the Office of Graduate Enrollment Services of the Graduate School.

Work for this degree is not required to be done specifically at the University Park campus. A complete program of study can be pursued at Penn State Harrisburg or Penn State Great Valley.

M.E.P.C.--Additional Specific Requirements

The Master of Environmental Pollution Control (M.E.P.C.) is an intercollege professional degree program designed to improve competence in various fields of the control, management, and prevention of environmental pollution. The degree should be distinguished from the research-oriented program that leads to the academic degree of master of science, since the M.E.P.C. emphasizes application, analysis, and synthesis of knowledge rather than creating new information through traditional research.

A minimum of 30 graduate credits is required, of which 20 must be earned at the campus where the degree program is offered. Special requirements include 11½ credits of core courses covering air pollution, water quality, solid/hazardous waste management, and policy/risk assessment. At least 18 credits at the 500 level or above (with at least 6 credits in 500 level) must be included in the program, which includes 1 credit of E P C 590 and up to 3 paper-writing (596) credits offered through the student's department of affiliation.

A scholarly master's paper must be completed by all M.E.P.C. candidates. It must be of considerable proportion and must demonstrate the ability to formulate objectives, acquire and document relevant information, critically analyze, draw logical conclusions, and relate findings to professional problems and practices.

M.F.A.--Additional Specific Requirements

The programs leading to the Master of Fine Arts degree provide professional training in art, creative writing, and theatre. The M.F.A. is one of two terminal degrees in the arts. (The other is the research-oriented Ph.D.) The M.F.A. is a 48- to 60-credit degree and usually requires two to three years to complete.

The greater number of credits in the major should be at the 500 level, but the needs of the student will be considered in arranging the best combination of courses and research for preparing the candidate in a particular field.

A professional creative project is required. This project will include a monograph (an artist's statement for the M.F.A. in studio art) in support of the creative or interpretative aspect of the program. Continuance in the program is dependent upon the student's academic and artistic progress as evaluated at the end of each semester.

University Course Descriptions

COURSE-NUMBERING SYSTEM

UNDERGRADUATE COURSES (1 to 399): General courses accepted in fulfillment of requirements for the bachelor's degrees.

ADVANCED UNDERGRADUATE COURSES (400 to 499): Courses open to graduate students and to juniors and seniors and, with the special written permission of the head of the department or the chair of the program sponsoring the course, to qualified students in earlier semesters.

GRADUATE COURSES (500 to 699; 800 to 899): Courses restricted to students registered in the Graduate School, seniors with an average of at least 3.50, and other students who have been granted permission to enroll by the dean of the Graduate School. These courses are described in the Penn State *Graduate Degree Programs Bulletin*.

MEDICAL COURSES (700-799): Courses restricted to students registered in the College of Medicine.

LAW COURSES (900-999): Courses restricted to students registered in The Dickinson School of Law.

COMMON COURSE NUMBERS

The following courses for which students may register have been set up for common use by major programs to encourage innovation and provide flexibility in designing graduate programs. For courses 594, 595, 596, 597, 598, and 599, special titles may be requested by a graduate program for a given semester, through the Senate Curriculum Coordinator, 101 Kern Building, University Park campus.

590. COLLOQUIUM: Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

594. RESEARCH TOPICS--Supervised student activities on research projects identified on an individual or small-group basis. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

595. INTERNSHIP--Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc. Prerequisite: prior approval of proposed assignment by instructor.

596. INDIVIDUAL STUDIES--Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

597, 598. SPECIAL TOPICS--Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

599. FOREIGN STUDIES (1-2 per semester, maximum of 4) Courses offered in foreign countries by individual or group instruction. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes A, B, etc.

600, 610. THESIS RESEARCH--In registering for thesis research a student uses the appropriate number (600, 610) preceded by the abbreviation designating the major field. The numbers 600 (on campus) and 610 (off campus) are available for credit in thesis research in all graduate major programs. The bursar assesses charges for these courses at the current rate of tuition, according to the student's status at the time of registration.

601, 611. THESIS PREPARATION--The numbers 601 and 611, with associated special fees, are available to Ph.D. degree candidates who have passed the comprehensive examination and met the two-semester residence requirement. They may be used for thesis preparation work during its later stages, when the academic activity of the candidate consists partly (611) or solely (601) of work on the completion of research and writing of the dissertation. (See also Course-Numbering System.)

SUBJ 601 and SUBJ 611 do not carry academic credit. They are entered on the academic transcript to indicate the registration and the nature of the candidate's academic activity. A candidate registered for SUBJ 601 is classified as a full-time student, while one registered for SUBJ 611 is classified as a part-time student. (See also Thesis Preparation, in the General Information section of this bulletin.)

The numbers 600, 601, 610, and 611 may not appear in the Schedule of Courses for each semester.

602. SUPERVISED EXPERIENCE IN COLLEGE TEACHING--May be offered by any graduate program in a department that also offers undergraduate courses. A graduate program with no counterpart undergraduate program may offer SUBJ 602 when cooperative arrangements are made with an administrative unit that does not offer graduate degrees but that uses graduate assistants in its teaching. SUBJ 602 may be offered in any semester and is subject to the following restrictions:

1. SUBJ 602 will not be counted in fulfilling any specific credit requirement for an advanced degree.
2. SUBJ 602 will be graded (A, B, C, D, F). The grade will appear on the student's transcript.
3. SUBJ 602 will not be used in calculating grade-point averages.
4. SUBJ 602 shall be offered only in those graduate programs that want to provide opportunity for supervised and graded teaching experience. Enrollment will be restricted to students for whom the major program is prepared to

provide such experience.

5. SUBJ 602 will be counted as a part of the student's credit load unless the program specifies otherwise.

SUBJ 603. FOREIGN ACADEMIC EXPERIENCE (1-12)--Foreign study and/or research approved by the graduate program for students enrolled in a foreign university constituting progress toward the degree.

Accounting (ACCTG)

ACCTG 403 **Auditing** (3) Financial compliance, internal, and operational audits; standards and procedures; sampling; EDP auditing; professional issues; application of concepts through written responses.

Effective: Spring 2008

Prerequisite: ACCTG 371 or ACCTG 471

ACCTG 403W **Auditing** (3) Financial, compliance, internal, and operational audits; standards and procedures; sampling; EDP auditing; professional issues; application of concepts through written responses.

Effective: Spring 2008

Prerequisite: ACCTG 371 or ACCTG 471

ACCTG 404 **Managerial Accounting: Economic Perspective** (3) Accounting techniques as planning, control, and motivating devices in business and other organizations; accounting data for decision making and performance evaluation.

Effective: Spring 2011

Prerequisite: ACCTG 211, SCM 200 or STAT 200, ECON 102

ACCTG 405 **Principles of Taxation I** (3) Elements of tax policy and tax-planning concepts for personal and business decision making; with emphasis on taxation of individuals.

Effective: Spring 2008

Prerequisite: ACCTG 211; B A 301 or FIN 301

ACCTG 406 **Principles of Taxation II** (3) Impact of federal tax structure on business decisions, research methodology, tax planning; ethical considerations of tax practice.

Effective: Spring 2008

Prerequisite: ACCTG 405

ACCTG 410 **Federal Taxation II** (3) An examination of the rules and forms used to compute the federal tax liability of corporations and partners.

Effective: Spring 2008

Prerequisite: ACCTG 310

ACCTG 411 **Accounting Practicum: VITA** (3) Introduces students to practical aspects of tax preparation through the IRS' VITA program and completion of a tax research project.

Effective: Spring 2008

Prerequisite: ACCTG 310

ACCTG 422 **Accounting Systems** (3) Understanding flow and documentation of accounting information and internal controls in the context of accounting cycles.

Effective: Spring 2008

Prerequisite: ACCTG 312

ACCTG 426 **Financial Statement Analysis** (3) The exploration of conventional and advanced methods of analyzing financial statements, including the assessment of earnings quality.

Effective: Spring 2008

Prerequisite: FIN 301

ACCTG 431 **Advanced Auditing** (3) Examination of legal liability, EDP, statistical sampling, SEC reporting, internal control, and financial reporting in specialized industries.

Effective: Spring 2008

Prerequisite: ACCTG 403 or ACCTG 403W

ACCTG 432 **Accounting Information Systems** (3) Systems analysis tools and techniques; internal control concepts; development of computer control procedures.

Effective: Spring 2008

Prerequisite: ACCTG 371 or ACCTG 471, MIS 204

ACCTG 440 **Advanced Management Accounting** (3) Management accounting topics such as decision models, quantitative techniques, variance analysis, and their use in accounting.

Effective: Spring 2008

Prerequisite: ACCTG 340

ACCTG 450 **Advanced Accounting** (3) Accounting theory and practice for business combinations, branches, international operations, partnerships, consolidated financial statements, corporate liquidations, nonprofit organizations, estates, and trusts.

Effective: Spring 2008

Prerequisite: ACCTG 472

ACCTG 461 (IL) **International Accounting** (3) Study of international accounting issues with emphasis on need, use, and interpretation of financial accounting required in global business environment.

Effective: Spring 2008

Prerequisite: ACCTG 211

ACCTG 462 **Governmental and Not-for-Profit Accounting** (3) Provides an understanding of governmental and not-for-profit accounting theory, procedures, and financial statements.

Effective: Spring 2010

Prerequisite: ACCTG 311 or ACCTG 471

ACCTG 463 Accounting Theory (3) An analysis of the development of accounting theory and its current and future impact on accounting.
Effective: Spring 2008
Prerequisite: ACCTG 471

ACCTG 471 Intermediate Financial Accounting I (3) Theory and practice issues in income concepts and value measurement; GAAP; revenues, costs, assets, liabilities, and equities.
Effective: Spring 2008
Prerequisite: ACCTG 211 or ACCTG 311

ACCTG 472 Intermediate Financial Accounting II (3) Off-balance-sheet financing; special issues in cost capitalization, liabilities, and equities; matching; funds flow statements; statement analysis; inflation accounting.
Effective: Spring 2008
Prerequisite: ACCTG 371 or ACCTG 471

ACCTG 473 Advanced Financial Accounting (3) Reporting for multi-corporate enterprises, business combinations, quasi-reorganizations, and selected contemporary reporting problems.
Effective: Spring 2010
Prerequisite: ACCTG 472

ACCTG 481 Financial Statement Analysis: Accounting Based Evaluation and Decision Making (3) An accounting based evaluation and decision making approach to analyzing financial statements by studying business and firm valuation.
Effective: Spring 2008
Prerequisite: or concurrent: ACCTG 472

ACCTG 483 Forensic Accounting (3) Study of investigative accounting, consulting and litigation support activities undertaken in forensic accounting engagements.
Effective: Spring 2011
Prerequisite: or concurrent: ACCTG 472; ACCTG 403 or ACCTG 403W

ACCTG 489 Seminar in Accounting (3) New trends and concepts in accounting; applications and impact on problem solving and decision making.
Effective: Spring 2008
Prerequisite: permission of program

ACCTG 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2003

ACCTG 494H Research Project (1-3 per semester/maximum of 6) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2005

ACCTG 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008
Prerequisite: prior approval of proposed assignment by instructor

ACCTG 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

ACCTG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

ACCTG 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest. .
Effective: Summer 2003

ACCTG 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

ACCTG 501 Research Methods in Accounting (3) An introduction to the methods and techniques of contemporary research in accounting.
Effective: Fall 1992
Prerequisite: ACCTG 504, ACCTG 507 a course in statistical inference

ACCTG 503 Seminar in Auditing (3) The attest function of independent public accountants, verification of financial statements; problems of evidence, independence, ethics, professional responsibilities.
Effective: Fall 1992
Prerequisite: ACCTG 403W

ACCTG 504 Seminar in Managerial Accounting (3-6) Accounting and the managerial processes of planning, control, and

decision making.
Effective: Fall 1992

ACCTG 507 **Seminar in Financial Accounting** (3) Theoretical basis of financial accounting.
Effective: Fall 1992

ACCTG 508 **Contemporary Issues in Accounting** (3) Selected problems of current interest to the accounting profession.
Effective: Fall 1992

ACCTG 511 **Financial and Managerial Accounting** (3) Fundamental financial and managerial accounting concepts and issues from the viewpoint of the report user.
Effective: Fall 1992

ACCTG 512 **Financial Accounting Theory and Reporting Problems** (3) Measurement and reporting of financial information for external purposes, with particular attention to current problems in asset and income measurement.
Effective: Fall 1992
Prerequisite: ACCTG 511

ACCTG 514 **Seminar in Federal Taxation** (3) The federal tax structure, including legal, economic, and government implications; focusing on business decisions, research methodology, and tax planning.
Effective: Fall 1992

ACCTG 515 **Development of Accounting Thought** (3) Development of accounting thought from ancient civilization to the present.
Effective: Fall 1992

ACCTG 516 **Seminar in Not-For-Profit Accounting** (3) Measurement and structuring of financial information for managerial planning and control and external reporting.
Effective: Fall 1992

ACCTG 524 **Managerial Accounting** (3) Concepts and techniques of accounting for planning, control, and motivation.
Effective: Fall 1992
Prerequisite: ACCTG 511

ACCTG 550 **Taxation and Management Decisions** (2) Framework for understanding the effects of taxes on business decisions and for devising effective tax planning strategies.
Effective: Summer 2002
Prerequisite: B A 511, B A 521

ACCTG 560 **Accounting and Business Analysis** (2) Develop ability to assess the relation between accounting data in financial statements and the economic fundamentals represented.
Effective: Summer 2002
Prerequisite: B A 521

ACCTG 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1992

ACCTG 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992

ACCTG 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 1992

ACCTG 597A **Financial Statement Fraud** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ACCTG 597B **Partnership Taxation** (2) This course examines the income tax consequences of the formation, operation, and liquidation of a partnership, the classification of an entity as a partnership, distributions by a partnership, and sales of partnership interests.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ACCTG 597D **Research Methods in Accounting** (4) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ACCTG 597E Research in Analytical Modeling (4) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ACCTG 597K Advanced Empirical Research Seminar (4) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ACCTG 599 (IL) Foreign Study--Accounting (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite: acceptance in established exchange program

ACCTG 600 Thesis Research (1-15) No description.
Effective: Fall 1992

ACCTG 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1992

ACCTG 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) The student assists in teaching one of the following courses: Acctg. 16, 101, 104, 201, 202, 206, or 400.
Effective: Fall 1992

ACCTG 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1992

ACCTG 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1992

ACCTG 803 Forensic Accounting and Litigation Support (3) Study of investigative accounting, consulting and litigation support activities undertaken in forensic accounting engagements.
Effective: Summer 2009
Prerequisite: ACCTG 403W and ACCTG 472 Prerequisite or concurrent: ACCTG 881

ACCTG 806 Taxes and Business Planning (3) Effects of tax regimes on decision-making, tax planning and market outcomes. Also, ethics, tax research, and policy.
Effective: Summer 2009
Prerequisite: ACCTG 405

ACCTG 873 Advanced Topics in Financial Reporting (3) Financial disclosure and reporting for complex business enterprises and activities; current issues in financial reporting.
Effective: Summer 2009
Prerequisite: ACCTG 471 and ACCTG 472

ACCTG 881 Financial Statement Analysis (3) Analysis of financial reports to identify business strategy, assess performance and economic standing, and value claims.
Effective: Summer 2009
Prerequisite: ACCTG 471 and ACCTG 472 Prerequisite or concurrent: B A 531

Last Import from UCM: June 16, 2011 3:00 AM

Acoustics (ACS)

ACS 402 Introduction to Acoustics (3) Basic principles of acoustics and perception of sound; fundamentals of applications: electroacoustic transducers, noise measurement and control, architectural and building acoustics, underwater sound. Offered for science and engineering majors.

Effective: Fall 1983

Prerequisite: PHYS 203

ACS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

ACS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

ACS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 1996

ACS 501 Fundamentals of Acoustics I (2) Vibrational concepts of acoustics: natural frequency and modes, resonances of lumped parameter systems, strings, elastic rods, beams and membranes.

Effective: Spring 1991

Prerequisite: PHYS 202, PHYS 203 ; engineering mathematics including differential equations

ACS 502 Fundamentals of Acoustics II (2) Acoustical wave phenomena: propagation, transmission, reflection and energy; periodic and transient waves; plane, spherical, and standing waves.

Effective: Spring 1991

Prerequisite: PHYS 202, PHYS 203 ; engineering mathematics including differential equations

ACS 505 Experimental Techniques in Acoustics (2) Properties of acoustical and vibrational transducers, electronic and other instrumentation used in fundamental data measurement, acquisition and analysis.

Effective: Fall 1990

Prerequisite: ACS 501, ACS 502

ACS 506 Experimental Techniques in Ocean Acoustics (2) Development of measurement techniques and experimental procedures for making acoustic measurements in the ocean.

Effective: Summer 1991

Prerequisite: ACS 501, ACS 502, ACS 505

ACS 510 Fundamentals of Acoustics (5) In-depth presentation of the fundamental principles of acoustics; designed to prepare students to take advanced courses in acoustics.

Effective: Summer 1983

ACS 511 Underwater Sound Propagation (3) Theoretical and empirical treatment of sound propagation in the ocean, including effects of the environment, characteristics of targets, and transducers.

Effective: Winter 1978

ACS 512 Sonar Engineering (3) Theoretical and empirical treatment of problems related to the use of underwater sound in target detection and ranging.

Effective: Fall 1983

ACS 513 Digital Signal Processing (3) Discrete linear systems, transforms, digital filter design and applications, discrete fourier transforms, spectrum analysis.

Effective: Spring 1984

ACS 514 Electroacoustic Transducers (3) The theory, design, and calibration of passive, linear, reciprocal electroacoustic transducers for use in both air and water media.

Effective: Fall 1986

Prerequisite: PHYS 443 or ACS 510

ACS 515 Acoustics in Fluid Media (3) Wave propagation in stationary and moving fluids; acoustic radiation and scattering; standing waves in ducts and cavities.

Effective: Fall 1986

Prerequisite: E MCH 524A; PHYS 443 or ACS 510

ACS 516 Acoustical Data Measurement and Analysis (3) Presents the engineering applications of recent developments in correlation and spectral analysis to acoustical measurement problems.

Effective: Fall 1983

ACS 517 Techniques for Solving Acoustic Field Problems (3) Transient and time-harmonic acoustic radiation and scattering problems involving various boundary conditions, solved by exact, approximate, and numerical methods.
Effective: Fall 1983
Prerequisite: E MCH 524B, ACS 515

ACS 518 Adaptive Signal Processing (3) Basic concepts and application of adaptive signal processing techniques; adaptive filters, beamformers; optimum space/time processors and their adaptive implementation; adaptive algorithms.
Effective: Spring 2008
Prerequisite: E E 460 or MATH 409; E E 562

ACS 519 Sound-Structure Interaction (3) Acoustic radiation from and effects of fluid-loading on vibrating infinite and finite plates and shells. Acoustic transmission through and reflection from elastic plates and shells, acoustic excitation of elastic plates and coupling between panels and acoustic spaces.
Effective: Summer 1991
Prerequisite: ACS 501, ACS 502, E MCH 524B ; or E MCH 525

ACS 521 (E MCH 521) Stress Waves in Solids (3) Recent advances in Ultrasonic Nondestructive Evaluation: waves; reflection and refraction; horizontal shear; multi-layer structures; stress; viscoelastic media; testing principles.
Effective: Spring 1998
Prerequisite: E MCH 524A, E MCH 524B

ACS 530 Flow-Induced Noise (3) Introduction to the basic and applied aspects of flow-induced noise created by subsonic flows of various complexities.
Effective: Summer 2004
Prerequisite: ACS 501 and ACS 502

ACS 537 Noise Control Engineering I (3) As the first of three courses, this course provides an orientation to the program and covers fundamentals of noise control.
Effective: Spring 2003
Prerequisite: BS in engineering or related field or instructor approval

ACS 538 Noise Control Engineering II (3) This course applies fundamentals of noise control covered in Noise Control Engineering I to the noise generation, propagation, measurement and effects.
Effective: Spring 2003
Prerequisite: BS in engineering or related field or instructor approval

ACS 539 Noise Control Engineering III (3) This course covers advanced methods for the analyses of noise and vibration and treatments for control of noise and vibration.
Effective: Spring 2003
Prerequisite: BS in engineering or related field or instructor approval

ACS 573 (M E 573) Designing Quiet Structures (3) Course integrates structural dynamics, acoustics and optimization into unified method for designing quiet structures virtually for early product development.
Effective: Fall 2007
Prerequisite: M E 470 and ACS 502

ACS 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

ACS 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2005

ACS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

ACS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

ACS 597A Fundamentals of Acoustics (3) Vibrational concepts of acoustics: natural frequency and modes, resonances of lumped parameter systems, strings, elastic rods, beams, and membranes.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ACS 597B Acoustics in Fluid Media (3) Acoustical wave phenomena: propagation, transmission, reflection, and energy; periodic and transient waves; plane, spherical, and standing waves.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ACS 597C Nonlinear Acoustics (3) Nonlinear effect in acoustics. Nonlinear steepening, generation of overtones, weak shock formation during acoustic wave propagation. Burgers' equation, rise times, shock thicknesses, and other interactions of dissipative and nonlinear processes. Acoustic streaming, parametric arrays, and acoustic radiation pressure.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ACS 597D Research and Writing for Acousticians (1) Will help you to organize and outline information and communicate it effectively on technical papers, reports, thesis.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: Students who have completed or nearly completed their coursework and are ready to begin writing their M.Eng M.S. or Ph.D. papers.

ACS 597E Thermoacoustics (1) This course will provide an introduction to thermoacoustic transport processes and to the hardware required to harness such processes as well as the instrumentation techniques that facilitate accurate thermoacoustics measurements.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: ACS 502 or the consent of the program

ACS 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Spring 1996

ACS 600 Thesis Research (1-15) No description.

Effective: Fall 1983

ACS 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 1983

ACS 610 Thesis Research Off Campus (1-15) No description.

Effective: Fall 1983

ACS 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Adult Education (ADTED)

ADTED 456 Introduction to Family Literacy (3) Explores comprehensive family literacy models, focusing upon families, services, outcomes, and roles and responsibilities of individuals, organizations, and communities.

Effective: Spring 2008

Prerequisite: Associate Degree or 60 undergraduate credits

ADTED 457 Adult Literacy (3) Surveys adult basic and literacy education programs and best practices; applies recent research on adult and family literacy.

Effective: Spring 2008

Prerequisite: Associate Degree or 60 undergraduate credits

ADTED 458 Early Literacy Development and Parental Involvement (3) Focuses on young children's language and literacy development, including parental and staff support, grounded in scientifically based reading research.

Effective: Spring 2008

Prerequisite: Associate degree or 60 undergraduate credits

ADTED 459 Interactive Literacy: Parents and Children (3) Focuses on literacy and language interactions between parents and their young children (including English language learners), implementing intentional/planned learning.

Effective: Spring 2008

Prerequisite: Associate Degree or 60 undergraduate credits

ADTED 460 Introduction to Adult Education (3) History, methods, agencies, program areas, and problems of adult education in the United States.

Effective: Fall 2001

ADTED 470 (CI ED 470) Introduction to Distance Education (3) An introduction to the history, philosophy, organizations, learning theories, and instructional procedures used in American and foreign distance education.

Effective: Summer 1996

ADTED 496 Independent Studies (1-18) Creative projects supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1996

ADTED 497 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 1996

ADTED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 1996

ADTED 498A Teaching Adults Responsibly (3) Virtues operating in particular teaching situations are examined. Also examined are opportunities and challenges enabling and constraining those virtues along with elements of theory and practice.

Effective: Summer 2011 Ending: Summer 2011

ADTED 501 Foundations of Medical Education (3) This course provides an overview of medical education, and considers how it operates as a specific form of adult education.

Effective: Summer 2010

Prerequisite: ADTED 460

ADTED 502 Program and Instructional Design in Medical Education (3) This course focuses on program planning and instructional design in a medical setting with an emphasis on teaching with simulation.

Effective: Spring 2011

Prerequisite: ADTED 460

ADTED 505 The Teaching of Adults (3) Examination of direct and indirect teaching; contracts, application of current technology, andragogy, motivation, evaluation; knowledge of research.

Effective: Summer 1996

Prerequisite: ADTED 460

ADTED 506 Program Planning in Adult Education (3) Intensive study of theoretical foundations, policies, evaluation models, methods, and materials in program planning in adult education.

Effective: Summer 1996

Prerequisite: ADTED 460, ADTED 505

ADTED 507 Research and Evaluation in Adult Education (3) Guided discussion and reading in selected research and evaluation methods and trends as applied in adult education settings.

Effective: Summer 1996

Prerequisite: ADTED 460 ; introductory statistics course; introductory research design course

ADTED 508 (CI ED 508) **Globalization and Lifelong Learning** (3) Examination of globalization discourses and their relationships, implications and impacts on lifelong learning processes and contexts.
Effective: Summer 2004

ADTED 509 (CI ED 509) **Language, Literacy, Identity, and Culture in a Global Context** (3) Examines the relationship between issues of language, identity and culture for adult learners in an increasingly global context.
Effective: Spring 2004
Prerequisite: ADTED 508

ADTED 510 **Historical and Social Issues in Adult Education** (3) Social and historical foundations of adult education in the United States and selected nations.
Effective: Summer 1996
Prerequisite: ADTED 460

ADTED 531 **Course Design and Development in Distance Education** (3) In depth study of the practices of designing courses taught by print, broadcast, and telecommunications media to adult distance learners.
Effective: Summer 1996
Prerequisite: ADTED 470, INSYS 415

ADTED 532 **Research and Evaluation in Distance Education** (3) Study of previous, current, and needed research strategies, and issues concerning evaluation in distance education.
Effective: Fall 2001

ADTED 540 **Serving Adult Learners in Higher Education** (3) Seminar on the characteristics and needs of adult students in the higher education context: motivations, persistence, faculty development, advising/ counseling.
Effective: Summer 1996
Prerequisite: ADTED 460

ADTED 541 (WMNST 541) **Women and Minorities in Adult Education** (3) Seminar on women and minority adults as learners and leaders in the various contexts of adult education.
Effective: Spring 1998
Prerequisite: ADTED 460

ADTED 542 **Perspectives on Adult Learning Theory** (3) Introduction to adult education learning theory, principles, and models of adult learning by adults alone, in groups, and in communities.
Effective: Fall 1997

ADTED 549 (HI ED 549) **Community Junior College and the Technical Institute** (2-3) Distinctive contributions to meeting the need for postsecondary education; development, functions, curriculum and instruction, government, administration, and finance.
Effective: Summer 1996

ADTED 550 **Qualitative Research in Adult Education** (3) Introduction to the theory, principles, and practice of qualitative research.
Effective: Fall 1997

ADTED 551 **Qualitative Data Analysis** (3) Students learn to analyze data qualitatively by engaging in, and continuously reflecting on the process.
Effective: Summer 2004
Prerequisite: ADTED 550 and INSYS 574

ADTED 552 **Participatory Action Research** (3) Examines origins, historical development, main characteristics, methodological assumptions and models, practice of participatory action research adult education and community development.
Effective: Summer 2004

ADTED 560 (LL ED 560) **Teaching Reading to College Students and Adults** (3) Reading literacy for adults, including college reading, Adult Basic Education (ABE), and General Educational Development (GED) programs.
Effective: Summer 1996
Prerequisite: LL ED 440 or teaching experience

ADTED 561 **Family Literacy** (3) Examines the research related to the four components of family literacy, program effectiveness, and theoretical underpinnings.
Effective: Summer 2004

ADTED 562 **Politics, Language and Pedagogy: Applying Paulo Freire today** (3) Examines the work of Paulo Freire as it applies to community action projects.
Effective: Spring 2004 Ending: Summer 2011
Prerequisite: ADTED 508 and ADTED 509

ADTED 562 **Politics, Language and Pedagogy: Applying Paulo Freire today** (3) Examines the work of Paulo Freire as it applies to community action projects.
Effective: Fall 2011 Future: Fall 2011

ADTED 564 (CI ED 564) **Social and Cultural Contexts of Learning and Work** (3) Examines the relationship between learning and work with special attention given to how certain forms of learning are legitimized.

Effective: Summer 2004

Prerequisite: CI ED 500, ADTED 542

ADTED 570 (CI ED 570) **Comparative and International Adult Education** (3) Critical and comparative analysis of adult education theory and practice outside North America, including international agency involvement.

Effective: Summer 1996

Prerequisite: ADTED 460

ADTED 572 (CI ED 572) **Policy Studies in Lifelong Learning** (3) Examine lifelong learning policies and the relationship between lifelong learning issues and problems, policy development, policy actors and institutional structures.

Effective: Summer 2004

Prerequisite: ADTED 508

ADTED 575 **Administration of Adult Education** (3) Organization of a program of adult education; legal status, finances, selection of teachers, learning personnel, housing; other administrative problems.

Effective: Summer 1996

Prerequisite: ADTED 506 or EDLDR 480

ADTED 580 **Adult Education Research Seminar** (1-3) A seminar dealing with specific research topics and methods in adult education. Open to advanced students in adult education.

Effective: Summer 1996

Prerequisite: ADTED 507, EDPSY 400, EDPSY 475

ADTED 588 **Professional Seminar: Research and Adult Education** (3) Review of research in adult education, current and past, with analysis of its directions, effects, methodology, quality, financing, and prospects.

Effective: Summer 1996

Prerequisite: ADTED 460, ADTED 507

ADTED 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 1996

ADTED 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 1997

ADTED 595 **Internship in Adult Education** (3-9) Supervised student internship in adult education agency.

Effective: Summer 1996

Prerequisite: ADTED 460

ADTED 596 **Individual Studies** (1-9) Creative projects including non-thesis research, supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1996

ADTED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 1996

ADTED 597A (CI ED 597A) **Cross-Cultural Research Methods in Education** (3) This course will assist in conducting research with diverse ethnic-cultural groups. The goal is to understand the co-variation or causal relations between cultural (societal and ecological) and behavioral variables.

Effective: Summer 2011 Ending: Summer 2011

ADTED 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Summer 1996

ADTED 600 **Thesis Research** (1-15) No description.

Effective: Summer 1996

ADTED 601 **Dissertation Research** Ph.D. Dissertation research.

Effective: Summer 2004

Prerequisite: passing score on the Ph.D. comprehensive examination

ADTED 602 **College Teaching** (1-3) Experience in teaching in the Adult Education Program.

Effective: Fall 2006

Prerequisite: Advanced standing in the Adult Education graduate program.

ADTED 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Summer 1996

ADTED 611 **Dissertation Research** Ph.D. dissertation research
Effective: Summer 2004
Prerequisite: passing score on the Ph.D. comprehensive examination

Last Import from UCM: June 16, 2011 3:00 AM

Aerospace Engineering (AERSP)

AERSP 401A Spacecraft Design--Preliminary (3) Conceptual and preliminary design of a spacecraft, its constituent subsystems, and related systems, to satisfy a given set of specifications.

Effective: Spring 2007

Prerequisite: AERSP 309 . Prerequisite or concurrent:AERSP 450

AERSP 401B Spacecraft Design--Detailed (2) Detailed design of the constituent subsystems and related support systems for a spacecraft.

Effective: Spring 2007

Prerequisite: AERSP 301, AERSP 401A

AERSP 402A Aircraft Design--Preliminary (3) Conceptual and preliminary design of an aircraft, its constituent subsystems, and related systems, to satisfy a given set of specifications.

Effective: Spring 2007

Prerequisite: AERSP 306 . Prerequisite or concurrent:AERSP 413

AERSP 402B Aircraft Design--Detailed (2) Detailed design of the constituent subsystems and related support systems for an aircraft.

Effective: Spring 2007

Prerequisite: AERSP 301, AERSP 402A

AERSP 404H Flight Vehicle Design and Fabrication II (3 per semester/maximum of 12) Project management, design, fabrication, aerodynamic and structural testing, and flight evaluation of an advanced composite flight vehicle.

Effective: Spring 2000

Prerequisite: AERSP 204H

AERSP 406W Structures and Dynamics Laboratory (2) Experiments in static deformations and stresses, vibrations, and control of aerospace structures.

Effective: Spring 2007

Prerequisite: or concurrent:ENGL 202C

AERSP 407 Aerodynamics of V/STOL Aircraft (3) Rotary wing aircraft; VTOL and STOL performance; propeller-wing combinations; jet flap; high lift devices.

Effective: Fall 1984

Prerequisite: AERSP 312

AERSP 410 Aerospace Propulsion (3) Analysis and performance characteristics of reciprocating engine, turbo-jet, turbo-prop, turbo-fan, ram-jets, and chemical rockets. Aerothermodynamics of inlets, combustors, and turbomachinery.

Effective: Fall 1983

Prerequisite: AERSP 312

AERSP 412 Turbulent Flow (3) Homogeneous turbulence; spectral transfer of energy, viscous dissipation; turbulent shear flow: mixing-length theory, eddy viscosity, scaling laws, energy budget.

Effective: Winter 1978

Prerequisite: one course in fluid mechanics

AERSP 413 Stability and Control of Aircraft (3) Static and dynamic stability and control of aircraft; open and closed loop systems.

Effective: Fall 1989

Prerequisite: AERSP 304, AERSP 306

AERSP 420 Principles of Flight Testing (3) In-flight and analytical studies of airplane performance, stability, and control; reduction of data; instrumentation; flight test techniques.

Effective: Fall 1983

Prerequisite: AERSP 306

AERSP 423 Introduction to Numerical Methods in Fluid Dynamics (3) Finite difference methods applied to solving viscid/inviscid fluid dynamics problems, error control, numerical stability.

Effective: Spring 2008

Prerequisite: AERSP 312 orM E 320;MATH 250 orMATH 251;CMPSC 201 orCMPSC 202

AERSP 424 Advanced Computer Programming (3) Engineering and scientific programming topics: object oriented programming, parallel programming, and various modern languages (e.g. C++, Java, and Ada).

Effective: Spring 2008

Prerequisite: CMPSC 201 orCMPSC 202;MATH 220

AERSP 425 Theory of Flight (3) Advanced wing and airfoil theory, conformal mapping, slender body theory.

Effective: Spring 2001

Prerequisite: AERSP 306

AERSP 430 Space Propulsion and Power Systems (3) Analysis and performance of chemical and nuclear rockets, electric propulsion systems. Introduction to solar, chemical, thermoelectric, and nuclear power sources.

Effective: Fall 2007

Prerequisite: AERSP 410 orM E 432

AERSP 440 Introduction to Software Engineering for Aerospace Engineers (3) Software engineering for safety- and

mission-critical systems, including requirements, management, processes, designs, programming, validation/ verification, and other aspects of software development.

Effective: Spring 2008

Prerequisite: CMPSC 201 orCMPSC 202

AERSP 450 Orbit and Attitude Control of Spacecraft (3) Principles of mechanics and vector analysis applied to basic concepts of satellite motion and control, rocket ballistics, and gyroscopic instruments.

Effective: Fall 1987

Prerequisite: AERSP 304, AERSP 309

AERSP 460 Aerospace Control Systems (3) Design and analysis of feedback control systems for aerospace applications; stability, root locus, time- and frequency-domain, state-space methods.

Effective: Summer 2006

Prerequisite: AERSP 304

AERSP 470 Advanced Aerospace Structures (3) Design and analysis of aerospace structures. Plates and sandwich panels; composite materials; structural dynamics; aeroelasticity; damage tolerance.

Effective: Spring 2008

Prerequisite: AERSP 301 . Prerequisite or concurrent:AERSP 304, E MCH 315

AERSP 473 (E MCH 473) Composites Processing (3) An introduction to the principles of mechanics governing manufacturing, computer-aided design, and testing of composite materials and structures.

Effective: Summer 1988

Prerequisite: E MCH 471

AERSP 490 (E E 471, NUC E 490) Introduction to Plasmas (3) Plasma oscillations; collisional phenomena; transport properties; orbit theory; typical electric discharge phenomena.

Effective: Spring 2008

Prerequisite: E E 330 orPHYS 467

AERSP 492 (E E 472) Space Astronomy and Introduction to Space Science (3) The physical nature of the objects in the solar system; the earth's atmosphere, ionosphere, radiation belts, magnetosphere, and orbital mechanics.

Effective: Spring 2008

Prerequisite: E E 330 orPHYS 400

AERSP 494 Aerospace Undergraduate Thesis (1-3 per semester/maximum of 6) Individual problem investigations reported in written thesis and seminar lectures. Cooperative research with faculty guidance on topics of current interest.

Effective: Fall 1992

Prerequisite: seventh-semester standing

AERSP 494H Aerospace Undergraduate Thesis (1-3 per semester/maximum of 6) Individual problem investigations reported in written thesis and seminar lectures. Cooperative research with faculty guidance on topics of current interest.

Effective: Fall 2007

Prerequisite: seventh-semester standing

AERSP 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1992

AERSP 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 1983

AERSP 497A Advanced Orbital Mechanics (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

AERSP 497B Experimental Methods and Projects (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

AERSP 497D Special Topics in Aerodynamics (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

AERSP 497I Spacecraft/Environment Interactions (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

AERSP 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2006

AERSP 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2008

AERSP 504 Aerodynamics of V/STOL Aircraft (3) Jet wings, high lift devices, propellers and ducted propellers, circulation and boundary layer control, unsteady airfoil theory.

Effective: Fall 1983

Prerequisite: AERSP 407

AERSP 505 Aero- and Hydroelasticity (3) Interaction of elastic systems having several degrees of freedom with fluid flows in various configurations.

Effective: Winter 1978

AERSP 506 Rotorcraft Dynamics (3) Modeling and analysis techniques for dynamic response, vibration, aeroelastic stability, and aeromechanical stability of rotary-wing vehicles.

Effective: Fall 2007

Prerequisite: AERSP 504, E MCH 571

AERSP 507 Theory and Design of Turbomachinery (3) Theory and principles of machinery design: compressors, turbines, pumps, and rotating propulsors; opportunity to work out design examples.

Effective: Winter 1978

AERSP 508 Foundations of Fluid Mechanics (3) Mathematical review, fluid properties, kinematics, conservation laws, constitutive relations, similarity principles, the boundary layer, inviscid flow, vorticity dynamics, wave motion.

Effective: Spring 1972

AERSP 509 Dynamics of Ideal Fluids (3) Irrotational flow theory, two-dimensional and axisymmetric flows, airfoil theory, complex variables, unsteady phenomena; flow with vorticity, finite wing theory.

Effective: Winter 1978

Prerequisite: AERSP 508

AERSP 510 Compressible Flow (3) Classification and solution of compressible flow problems, high-speed gasdynamics, unsteady motion, transonic and hypersonic flows, atmospheric reentry.

Effective: Fall 1983

AERSP 511 Aerodynamically Induced Noise (3) Review of fluid mechanics. General theory of aerodynamic sound. Noise radiation from jets, boundary layers, rotors and fans. Structural response.

Effective: Winter 1978

AERSP 512 Viscous Flow (3) Stress-deformation relations; Newtonian fluids, Navier-Stokes equations; exact, asymptotic laminar solutions; instability, transition; similitude and turbulent boundary layer.

Effective: Winter 1978

AERSP 514 Stability of Laminar Flows (3) The stability of laminar motions in various geometries as influenced by boundary conditions and body forces of various kinds.

Effective: Winter 1978

AERSP 518 Dynamics and Control of Aerospace Vehicles (3) Dynamical problems of aircraft and missiles, including launch, trajectory, optimization, orbiting, reentry, stability and control, and automatic control.

Effective: Fall 1987

Prerequisite: AERSP 413 or AERSP 450

AERSP 524 (M E 524) Turbulence and Applications to CFD: DNS and LES (3) First of two courses: Scalings, decompositions, turbulence equations; scale representations, Direct and Large-Eddy Simulation modeling; pseudo-spectral methods; 3 computer projects.

Effective: Spring 2011

Prerequisite: AERSP 508 or M E 521

AERSP 525 (M E 525) Turbulence and Applications to CFD: RANS (3) Second in two courses: Scalings, decomposition, turbulence equations; Reynolds Averaged Navier Stokes (RANS) modeling; phenomenological models; 3 computer projects.

Effective: Spring 2011

Prerequisite: AERSP 508 or M E 521

AERSP 526 (M E 526) Computational Methods for Shear Layers (3) Study of numerical solution methods for steady and unsteady laminar or turbulent boundary-layer equations in two and three dimensions.

Effective: Fall 2007

Prerequisite: AERSP 423 or M E 523

AERSP 527 (M E 527) Computational Methods in Transonic Flow (3) Numerical solution of partial differential equations of mixed type, with emphasis on transonic flows and separating boundary layers.

Effective: Fall 2007

Prerequisite: AERSP 423 or M E 523

AERSP 528 (M E 528) Computational Methods for Recirculating Flows (3) Numerical solution techniques for

laminar/turbulent flow with large recirculation zones. Both primitive variable and stream function-vorticity equations used.

Effective: Fall 2007

Prerequisite: M E 523

AERSP 529 Advanced Analysis and Computation of Turbomachinery Flows (3) Review of numerical methods; three-dimensional inviscid flow computation, two- and three-dimensional viscous flow effects and computation; recent advances.

Effective: Fall 2007

Prerequisite: AERSP 423;AERSP 507 orM E 422

AERSP 530 Aerothermochemistry of Advanced Propulsion Systems (3) Physics and chemistry needed to analyze high performance rocket propulsion systems including reacting high temperature radiating gas and plasma flows.

Effective: Fall 2007

Prerequisite: AERSP 312 orM E 420

AERSP 535 (M E 535) Physics of Gases (3) An introduction to kinetic theory, statistical mechanics, quantum mechanics, atomic and molecular structure, chemical thermodynamics, and chemical kinetics of gases.

Effective: Spring 2010

AERSP 540 (E E 571, NUC E 540) Theory of Plasma Waves (3) Solutions of the Boltzmann equation; waves in bounded and unbounded plasmas; radiation and scattering from plasmas.

Effective: Spring 2008

Prerequisite: E E 471

AERSP 550 Astrodynamics (3) Applications of classical celestial mechanics to space flight planning. Determination and construction of orbital parameters by approximation methods. Perturbation techniques.

Effective: Fall 1987

Prerequisite: AERSP 450 orE MCH 410 orPHYS 419

AERSP 560 Finite Element Method in Fluid Mechanics and Heat Transfer (3) Application of finite element techniques to viscous/unsteady fluid flow/heat transfer problems.

Effective: Summer 2000

Prerequisite: AERSP 312, AERSP 313

AERSP 571 (E MCH 571, M E 571) Foundations of Structural Dynamics and Vibration (3) Modeling approaches and analysis methods of structural dynamics and vibration.

Effective: Fall 2007

Prerequisite: AERSP 304, E MCH 470, M E 450 orM E 470

AERSP 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 1987

AERSP 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

AERSP 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 1983

AERSP 597A Experimental Methods (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

AERSP 597B Rotorcraft Stability and Control (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

AERSP 597D Special Topics in Aerodynamics (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

AERSP 597F Smart Structures (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

AERSP 597G Theory and Application of Global Navigation Satellite Systems (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

AERSP 597I **Spacecraft/Environment Interactions** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

AERSP 599 **Foreign Studies** (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Fall 2008

AERSP 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

AERSP 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

AERSP 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Provides an opportunity for supervised and graded teaching experience in aerospace engineering courses.
Effective: Fall 1983

AERSP 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 2006

AERSP 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

AERSP 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

African and African American Studies (AAA S)

AAA S 401 **Afro-American Studies Seminar** (3) A seminar examining theoretical and methodological issues in Afro-American Studies.

Effective: Spring 2001

Prerequisite: AAA S 100, AAA S 101

AAA S 403 **South Africa Today** (3) A course examining the South African government's policy of apartheid: its history, why it exists, how it works, and the prospects for change.

Effective: Fall 2001

Prerequisite: AAA S 110

AAA S 405 **African Studies Methodologies** (3) Multidisciplinary research techniques for studying in and about Africa.

Effective: Spring 1997

AAA S 409 (US) (SOC 409) **Racial and Ethnic Inequality in America** (3) The impact of inequality and discrimination on individual and group identity among various racial and ethnic groups.

Effective: Summer 2005

Prerequisite: SOC 001

AAA S 409U (US) **Racial and Ethnic Inequality in America** (3) The impact of inequality and discrimination on individual and group identity among various racial and ethnic groups.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: SOC 001

AAA S 410 **Spirit, Space, Survival: Contemporary Black Women** (3) How recent Black women have used spirit and space to survive.

Effective: Summer 2011

Prerequisite: AAA S 101

AAA S 412 (US;IL) (THEA 412) **African American Theatre** (3) Exploration of the development of African American theatre from its roots in Africa through the Diaspora to the present time.

Effective: Summer 2005

Prerequisite: THEA 100

AAA S 416 (US;IL) (S T S 416, WMNST 416) **Race, Gender and Science** (3) The class will focus on race and gender as products of science, and how societal values shape scientific activity.

Effective: Summer 2008

Prerequisite: 6 credits in S T S WMNST or AAA S

AAA S 422 (US) (CAS 422) **Contemporary African American Communication** (3) A focused study on the continuities between African and African American culture and communication.

Effective: Summer 2005

Prerequisite: SPCOM 100

AAA S 431 (US;IL) (HIST 431) **Black Liberation and American Foreign Policy** (3) This course deals with American foreign policy and Black liberation in Africa since 1945.

Effective: Summer 2005

Prerequisite: AAA S 100, AAA S 192;PL SC 001 orPL SC 014

AAA S 432 (IL) (HIST 432) **Between Nation and Empire: The Caribbean in the 20th Century** (3) An exploration of the political evolution of the Caribbean Region over the course of the 20th Century.

Effective: Summer 2005

Prerequisite: AAA S 250

AAA S 434 (IL) (PL SC 434) **War and Development in Africa** (3) This course will examine the relationship between war and development in sub-Saharan Africa in the post colonial era.

Effective: Summer 2006

Prerequisite: PL SC 114 orPL SC 003 orAAA S 110

AAA S 440 (US;IL) (PL SC 440, I B 440) **Globalization and Its Implications** (3) This course explores the socioeconomic implications of globalization.

Effective: Spring 2008

Prerequisite: AAA S 100 orAAA S 110 orPL SC 003 orPL SC 014 orPL SC 020 orPL SC 022

AAA S 443 (IL) (PL SC 443) **Ethnic Conflict in Africa** (3) This course explores the various causes and impacts of ethnic conflicts in the African context.

Effective: Summer 2005

Prerequisite: AAA S 100, AAA S 110, PL SC 001, PL SC 003, PL SC 007, PL SC 014, PL SC 017, PL SC 020 orAFRAS 301

AAA S 445Y (US) (LER 445Y, PL SC 445Y) **Politics of Affirmative Action** (3) Examines history, politics, and economics of the use of special programs to advance racial interests in the U.S.

Effective: Spring 2008

Prerequisite: AAA S 100 level course andPL SC 001 orPL SC 007

AAA S 454 (IL) (PL SC 454) **Government and Politics of Africa** (3) Contemporary African Politics, institutions, and

ideologies; patterns of change, social forces, and nation building in selected African states.

Effective: Summer 2005

Prerequisite: 3 credits from:AAA S 110, PL SC 003, PL SC 020 orPL SC 022

AAA S 459 (IL) (PL SC 459) **Culture and World Politics** (3) Role of culture in world politics.

Effective: Summer 2006

Prerequisite: PL SC 014

AAA S 460 (US;IL) (PHIL 460) **African American Philosophy** (3) Major works by African American Philosophers, on topics of race, freedom, citizenship, nationhood, law and society.

Effective: Fall 2009

Prerequisite: AAA S 100 orPHIL 009 and 5th semester standing

AAA S 464 (IL) (PL SC 464) **Globalization, Extractive Industries, and Conflict in Africa** (3) Socioeconomic and environmental impacts of extractive industries in Africa.

Effective: Summer 2008

Prerequisite: AAA S 110 or at least one of the following:PL SC 003 orPL SC 014 orPL SC 022

AAA S 465 (US) (HIST 465) **Civil Rights and American Politics 1933-1968** (3) The civil rights struggle and its impact upon American politics.

Effective: Summer 2005

Prerequisite: AAA S 100, HIST 021, HIST 152, PL SC 001 orPL SC 002

AAA S 469 (US) (ENGL 469) **Slavery and the Literary Imagination** (3) The impact of slavery on the petitions, poetry, slave narratives, autobiographies, and novels of African Americans.

Effective: Summer 2005

Prerequisite: ENGL 015 orENGL 030

AAA S 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

AAA S 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

AAA S 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Fall 2001

Prerequisite: prior approval of proposed assignment by instructor

AAA S 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1994

AAA S 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 1994

AAA S 497A **Latin American and Caribbean Cultures** (3) This course examines historical and cultural constructions of race and gender in Latin America and the Caribbean.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

AAA S 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

AAA S 530 **Globalization in Africa** (3) Students will examine globalization and its socioeconomic implications in Africa.

Effective: Fall 2008

AAA S 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1996

AAA S 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Summer 1996

Last Import from UCM: June 16, 2011 3:00 AM

Agribusiness Management (AG BM)

AG BM 407 **Farm Planning and Financial Management** (3) Economic principles applied to the management of farms, with particular emphasis on the financial aspects of management.

Effective: Spring 2003

Prerequisite: AG BM 101, AG BM 106

AG BM 408 **Financial Decision Making for Agribusiness** (3) Develop financial management and business analysis skills, integrating previous course work and finance training; principles of financial management, planning, control.

Effective: Spring 2004

Prerequisite: AG BM 308W, B A 301

AG BM 420 **Agribusiness Markets & Prices** (3) Understand and forecast price level and volatility for commodities, differentiated products, services. Why markets work and why they may not.

Effective: Spring 2004

Prerequisite: 6 credits in Agribusiness Management Business Administration Agricultural Economics and/or Economics

AG BM 440 **Food Product Innovation Management** (3) A problem-based course designed to enhance decision-making skills in the context of industry's approach to developing new food products.

Effective: Fall 2003

Prerequisite: AG BM 302 or junior/senior standing in Food Science

AG BM 460 **Managing the Food System** (3) Firm management in the food system; coordination with suppliers and customers, including supply chain management, strategic thinking, risk management.

Effective: Spring 2003

Prerequisite: AG BM 320, AG BM 338

AG BM 495A **Internship in Agribusiness and Rural Development** (1-6) Supervised field experience in an agribusiness or rural development setting.

Effective: Spring 2003

Prerequisite: prior approval by department

AG BM 495B **Internship in International Agribusiness** (6) Supervised field experience related to student's major, minor, or option.

Effective: Spring 2003

Prerequisite: prior approval by department

AG BM 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2003

AG BM 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2004

AG BM 499 (IL) **Foreign Studies - Agribusiness Management** (1-12) Study in selected countries of agricultural economic institutions and current agricultural economic problems.

Effective: Spring 2006

Last Import from UCM: June 16, 2011 3:00 AM

Agricultural Communications (AGCOM)

AGCOM 462W **Advanced Agricultural Writing** (3) Practice in journalistic writing strategies to report scientific and technical information in the agricultural/environmental sciences to general audiences.

Effective: Spring 2001

Prerequisite: a grade of C or better required in COMM 260W or equivalent coursework

AGCOM 495 **Internship** (1-3) Supervised field experiences related to student's professional interest in agricultural communications; limited to minors in agricultural communications.

Effective: Summer 1993

Prerequisite: a grade of C or better required in COMM 260W ; and prior approval of the professor-in-charge of Minor

Last Import from UCM: June 16, 2011 3:00 AM

Agricultural Economics (AG EC)

AG EC 430 (CEDEV 430) **Principles of Community Economic Development** (3) Concepts, strategies and techniques of local economic analysis, planning and development; case studies and decision-making exercises.

Effective: Spring 2004

Prerequisite: introductory course in economics

Last Import from UCM: June 16, 2011 3:00 AM

Agricultural Science (AG SC)

AG SC 495 **Internship** (1-10) Independent study and supervised field experience related to the student's professional interest. Intended for Agricultural Science majors.

Effective: Summer 1985

Prerequisite: fifth-semester standing in the Agricultural Science major with a G.P.A. of 2.00 or greater and prior approval of proposed plan before registration

AG SC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1985

AG SC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 1992

AG SC 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 1992

Last Import from UCM: June 16, 2011 3:00 AM

Agricultural Systems Management (A S M)

A S M 420 Off-Road Power Units (3) Cabs, traction, power allocation, and electronic systems for tractors and other off-road vehicles; requirements for production agriculture, logging, and construction.

Effective: Spring 2008

Prerequisite: or concurrent: A B E 306 or A S M 320

A S M 422 Environmental Systems for Agricultural Buildings (3) Planning and layout of environmental control systems for agricultural production and storage buildings; functional planning of agricultural buildings.

Effective: Summer 1994

Prerequisite: A S M 221

A S M 424 Selection and Management of Agricultural Machinery (3) Function and operation of field and farmstead machines; energy, quality, and loss considerations; selection and utilization; precision agriculture technology.

Effective: Spring 2008

Prerequisite: or concurrent: A B E 306 or A S M 320

A S M 425 Physical Principles in Agricultural Processing (3) Dimensions and units, mass and energy balances, fluid flow, heat transfer in the context of specific agricultural process applications.

Effective: Spring 2010

Prerequisite: A S M 221

A S M 426 Management of Safety and Health Issues in Production Agriculture and Related Businesses (3)

Management of safe workplaces and workers, hazard identification, employee training, legal responsibilities, and program development for farms and related businesses.

Effective: Summer 2002

Prerequisite: A S M 326

A S M 428 Electric Power and Instrumentation in Agriculture (3) Basic principles and applications of electric circuits for power distribution, electric motors, automatic controls, and instrumentation used in agriculture.

Effective: Spring 2001

Prerequisite: A S M 221, A S M 310

A S M 429W Agricultural Systems Analysis and Management (3) Theory of systems thinking; optimization and quantitative techniques for analysis of agricultural production and processing systems.

Effective: Spring 2010

Prerequisite: A S M 422, A S M 425

A S M 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Summer 1994

Prerequisite: prior approval of proposed assignment by instructor

A S M 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1994

A S M 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 1994

Last Import from UCM: June 16, 2011 3:00 AM

Agricultural and Extension Education (AEE)

AEE 400 Educational Programs in Agriculture for Developing Countries (3) Development and implementation of educational programs in agriculture in developing countries.

Effective: Summer 1999

Prerequisite: INTAG 100 or INTAG 481

AEE 412 Methods of Teaching Agriculture and Environmental Science (4) Instructional strategies and media; directing individual and group learning activities; assessing student performance and quality of instruction in vocational agriculture.

Effective: Fall 2001

AEE 413 Program Planning and Instructional Development (3-4) A course in planning, developing, and organizing school-based curriculum, summer programs, advisory councils, and facilities for environmental/ agricultural education.

Effective: Fall 2001

AEE 424 Workforce Guidance in Agricultural Industry (1-4) Opportunities and developments in agricultural industry, on-farm agricultural work, professional agricultural positions, and off-farm, nonprofessional agricultural occupations.

Effective: Spring 2000

AEE 434 Agricultural and Environmental Development (1-6) Intensive professional and technical treatment of various subject-matter fields to aid teachers in maintaining competence.

Effective: Summer 1999

Prerequisite: senior-year standing or experience as a teacher or extension agent

AEE 437 (AN SC 437) Equine Facilitated Therapy (3) Equine Facilitated Therapy uses equine-related activities to contribute positively to the wellbeing of people with disabilities.

Effective: Spring 2002

AEE 440 Communication Methods and Media (3) Mass media techniques for reporting and promoting extension and related programs, including message preparation, presentation, and strategy development.

Effective: Spring 2001

Prerequisite: 3 credits in communication

AEE 450 Program Design and Delivery (3) Principles, methods, and practices of extension education in agriculture, community resource development, family living, environmental affairs, 4-H, and youth programs.

Effective: Spring 2004

Prerequisite: 6 credits in social or behavioral sciences

AEE 460 Foundations in Leadership Development (3) This course explores historical and contemporary leadership theories, models and perspectives within social, cross-cultural, and political contexts.

Effective: Spring 2001

Prerequisite: AEE 360

AEE 465 Leadership Practices: Power, Influences, and Impact (3) Explores the leader role as it relates to issues of purpose, social responsibility, political influences, and legal constraints.

Effective: Spring 2000

AEE 490 Colloquium (1-3) Seminars consisting of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 1999

AEE 495 Internship in Agricultural and Extension Education (1-15) Participation in the total program of instruction in agriculture in a selected high school.

Effective: Summer 1999

Prerequisite: AEE 412, AEE 413

AEE 495A Student Teaching in AG (1-12) Participation in the total program of instruction in agriculture in a selected high school.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: AEE 412, AEE 413

AEE 495C Student Teaching in Environmental Science (1-12) Participation in the total program of instruction in agriculture in a selected high school.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: AEE 412, AEE 413

AEE 495D Internship - Leadership (1-15) Participation in the total program of instruction in agriculture in a selected high school.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: AEE 412, AEE 413

AEE 495D Internship in Agricultural and Extension Education (1-15) Participation in the total program of instruction in

agriculture in a selected high school.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: AEE 412, AEE 413

AEE 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1999

AEE 496B McNair Scholar Research (3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

AEE 497 Special Topics (1-9) Formal courses given on topical or special interest subjects which may be offered infrequently.

Effective: Fall 1999

AEE 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 1999

AEE 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

AEE 501 Foundations of Agricultural and Extension Education (3) Historical development, social and philosophical foundations, and current status in relation to the total vocational-technical education program.

Effective: Spring 2000

AEE 502 Teaching Agriculture (3) Vocational education objectives, learning theory, class instruction, cooperative occupational experience, and evaluation.

Effective: Spring 2000

AEE 505 (CEDEV 505) Leadership Development (3) Exploration, understanding, and application of leadership roles, strategies, and principles in group and community settings.

Effective: Spring 2010

AEE 508 Administration and Supervision of Agricultural and Extension Education (3) Basics of vocational funding, supervision, leadership, and management for agricultural education.

Effective: Spring 2004

AEE 509 Contemporary Research in Agricultural and Extension Education (1-6) Analysis of contemporary research issues in agricultural education and extension education through lecture, review of literature, discussion, speakers, and active participation.

Effective: Spring 2004

AEE 511 Youth Leadership Development in the Agricultural and Life Sciences (3) This course will address youth leadership development theories and emphasize formal and nonformal youth programs in agricultural and life sciences.

Effective: Summer 2006

AEE 515 Engagement Through Outreach Scholarship in Higher Education (3) To develop an understanding of outreach scholarship as a nonformal educational system and its relationship to relevant social systems.

Effective: Summer 2011

Prerequisite: 9 credits in education communication and/or social sciences

AEE 520 Scientific Method in the Study of Agricultural and Extension Education (1-4) Methods of procedure in investigation and experimentation in education, accompanied by a critical examination of studies made in agricultural education.

Effective: Spring 2000

AEE 521 Basic Applied Data Analysis in Agricultural and Extension Education (1-4) Continuation of AEE 520; emphasis upon statistical techniques for students' individual problems.

Effective: Spring 2000

AEE 524 Change in Education (1-3) Analysis of occupational needs of students and employment prospects; organization of courses of study and other activities of teachers.

Effective: Spring 2000

AEE 530 Teaching and Learning in Agricultural Science (3-4) Organization, planning and delivery of effective college

teaching methods, matching/learning styles, evaluation of instruction and learning.
Effective: Spring 2000

AEE 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2000

AEE 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2007
Prerequisite: prior approval of proposed assignment by instructor

AEE 596 Individual Studies (1-9) Creative projects including non-thesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1999

AEE 596A Agriculture in the Classroom (1-3) Development of curriculum materials designed to integrate agricultural science concepts and principles into elementary and middle school curricula.
Effective: Summer 2011 Ending: Summer 2011

AEE 596B Research Writing for Educators (1) Students will learn the principles in conducting literature review for research studies.
Effective: Summer 2011 Ending: Summer 2011

AEE 596D Qualitative Methods and Analysis Overview (1-3) Overview of primary qualitative research approaches and methods and an overview of analyzing the information obtained from various approaches.
Effective: Summer 2011 Ending: Summer 2011

AEE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 1999

AEE 597B Multivariate Data Analysis Seminar (3) Survey of common multivariate data analysis techniques used in social science research.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

AEE 597C Integrating Academics in Ag Ed (3) Agricultural educators will investigate teaching strategies, curriculum planning, curriculum resources, and strategic partners to help integrate academics into their programs.
Effective: Summer 2011 Ending: Summer 2011

AEE 597D SPSS 19.0 Analysis for Multivariate Statistics (3) Utilization of SPSS 19.0 to analyze quantitative data.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: basic data analysis course or permission of program

AEE 597F Today's Food and Fiber Industry (3) This course will allow teachers and extension educators to experience first-hand the food and fiber industry and the benefits it provides to our society.
Effective: Summer 2011 Ending: Summer 2011

AEE 597G Developing Youth Leadership/FFA (3) An understanding how adolescents develop and emerge as leaders in their families, schools, organizations, and communities.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

AEE 600 Thesis Research (1-15) No description.
Effective: Fall 1999

AEE 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1999

AEE 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Involves experience in teaching undergraduate agricultural education courses under the supervision of the faculty.
Effective: Fall 1999

AEE 610 Thesis Research Off-Campus (1-15) No description.
Effective: Fall 1999

AEE 611 Ph.D. Dissertation Part-Time (0) No description.

Last Import from UCM: June 16, 2011 3:00 AM

Agriculture (AG)

AG 400 **Biometry/Statistics in the Life Sciences** (4) Application of statistical techniques to experimental and survey research in the life sciences.

Effective: Fall 1986

Prerequisite: 6 credits in the natural sciences

AG 494 **Research Project Courses** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 1994

AG 494H **Research Project Courses** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

AG 495 **Internship** (1-18) Independent study and supervised field experience related to the student's major. Written and oral critique of activity required.

Effective: Spring 1993

Prerequisite: approval of proposed assignment by instructor prior to advance registration deadline in semester preceding that semester in which the assignment is to be carried out

AG 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 1991

Last Import from UCM: June 16, 2011 3:00 AM

Agroecology (AGECO)

AGECO 418 (AN SC 418, SOILS 418) **Nutrient Management in Agricultural Systems** (3) Comprehensive review of nutrient flow in animal agricultural systems, environmental regulations, and environmental stewardship practices.
Effective: Summer 2003

AGECO 438 (AGRO 438) **Principles of Weed Management** (4) Weedy plant taxonomy, biology and ecology of weedy plant populations, and integration of biological, chemical, cultural and biological controls.
Effective: Fall 2009
Prerequisite: 6 credits in plant sciences

AGECO 457 (CI ED 457) **Principles of Integrated Pest Management** (3) Integrated study of pest complexes and their management, emphasizing ecological principles drawing on examples from a range of agricultural, forestry and urban systems. This course is designed for sixth, seventh, and eighth semester students and graduate students.
Effective: Spring 2010
Prerequisite: Must take two or more of the following: ENT 313 and/or PPATH 405 and/or PPATH 318 and/or HORT 238

AGECO 461 **Emerging Issues in Agroecosystem Management** (3) A discussion-based capstone course that elucidates the interdisciplinary issues facing agriculture today.
Effective: Fall 2009
Prerequisite: SOILS 101

AGECO 490 **Agroecology Colloquium** (3) Students will be discussing topics related to the major and develop presentations in consultation with the course instructor.
Effective: Spring 2006
Prerequisite: 3 credits in agroecosystems science

AGECO 495 **Agroecology Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2005

AGECO 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2006

AGECO 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2004

AGECO 499 (IL) **Foreign Studies** (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

AGECO 499A (IL) **AGECO/CED 499A Issues in Economic, Community and Agricultural Development in Kenya** (1-3) Develop viable economic and youth development options for vulnerable youth, culminating with three weeks in Kenya.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Last Import from UCM: June 16, 2011 3:00 AM

Agroecosystems Science (AGESS)

AGESS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1999

Last Import from UCM: June 16, 2011 3:00 AM

Agronomy (AGRO)

AGRO 410W Crop Science (4) Study of the relation of crop plants to their environment, crop ecology, and the physiology of crop growth.

Effective: Spring 1996 Ending: Summer 2011

Prerequisite: AGRO 028, BIOL 102

AGRO 410W Physiology of Agricultural Crops (4) Study of the relation of plants to their environment and the physiology of crop plant growth.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: AGRO 028

AGRO 423 Forage Crop Management (3) Application of agronomic, ecological, and physiological principles to the production and management of pasture and forage crops.

Effective: Winter 1978

Prerequisite: AGRO 028

AGRO 425 Field Crop Management (3) Application of agronomic, ecological, and physiological principles to management systems for the efficient production of the major field crops.

Effective: Winter 1978

Prerequisite: AGRO 028

AGRO 438 (AGECO 438) Principles of Weed Management (4) Weedy plant taxonomy, biology and ecology of weedy plant populations, and integration of biological, chemical, cultural and biological controls.

Effective: Fall 2009

Prerequisite: 6 credits in plant sciences

AGRO 460 (BIOTC 460) Advances and Applications of Plant Biotechnology (3) This course provides a comprehensive overview and current status of plant biotech research. The course provides knowledge of plant systems that fall in the category of GMOs.

Effective: Spring 2009

Prerequisite: BIOL 230W or B M B 251

AGRO 489 Supervised Experience in College Teaching (1-3) Participate with instructors in teaching an undergraduate agronomy course; assist with teaching, evaluation, and development of instructional materials.

Effective: Summer 1996

Prerequisite: AGRO 028 approval of instructor

AGRO 490 (SOILS 490) Colloquium (1) Continuing written and oral presentations developed by students in consultation with the course instructor.

Effective: Fall 1993

Prerequisite: seventh-semester standing

AGRO 495 Internship (1-5) Supervised field experience related to the student's major.

Effective: Fall 1981

Prerequisite: approval of proposed assignment by instructor prior to registration.

AGRO 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

AGRO 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

AGRO 497A Experiences in Crop Science Research (1) Students will become exposed to several research projects in crop science involving design, layout and data collection.

Effective: Summer 2011 Ending: Summer 2011

AGRO 501 Graduate Student Dialogue (1) Orientation discussion group for incoming graduate students. Review departmental policies and learn about the diverse faculty programs in the department.

Effective: Summer 2009

AGRO 510 Ecology of Agricultural Systems (3) Examination of ecological concepts and research on agroecosystem processes and dynamics via discussion and analysis of review and research papers.

Effective: Summer 2006

Prerequisite: BIOL 546 or HORT 445 or the equivalent (Classic Ecology Population Ecology or Plant Ecology)

AGRO 517 Crop Ecology and Physiology (3) Ecological and physiological factors affecting the productivity of crop plants.

Effective: Spring 1996

Prerequisite: AGRO 410W

AGRO 518 Responses of Crop Plants to Environmental Stress (3) Physiological and ecological aspects of the response

of crop plants to environmental stresses in establishment, persistence, and reproduction.

Effective: Spring 1996

Prerequisite: AGRO 410W

AGRO 555 Effective Scientific Communications (2) Instruction and practice in verbal communication of scientific information to technical and non-technical audiences through realistic exercises with invited audiences.

Effective: Spring 2011

AGRO 590 (SOILS 590) Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Fall 1993

AGRO 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

AGRO 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

AGRO 597B Models in Agriculture and Natural Systems (3) A graduate level course that focuses on modeling water, soil, and vegetation processes and in applying these models to study cases.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: MATH 110 or MATH 140 or PHYS 241 or PHYS 251

AGRO 600 Thesis Research (1-15) No description.

Effective: Fall 1983

AGRO 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 1983

AGRO 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised training in teaching methodology for classroom and laboratory type instruction. Supervision provided by faculty member responsible for course.

Effective: Fall 1983

AGRO 610 Thesis Research Off Campus (1-15) No description.

Effective: Fall 1983

AGRO 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Fall 1983

AGRO 851 Applied Plant Population Biology (3) Lectures and exercises designed to develop student competency in plant selection to promote ecological diversity and genetically superior plants.

Effective: Summer 2010

Last Import from UCM: June 16, 2011 3:00 AM

Air Force (AIR)

GENERAL MILITARY COURSE

AIR 451 National Security Affairs/Preparation for Active Duty I (3) This course examines the national security process, regional studies, advanced leadership ethics, and Air Force doctrine.
Effective: Spring 2000

AIR 452 National Security Affairs/Preparation for Active Duty II (3) Topics focus on preparation for military service after commissioning and current issues affecting the Air Force way of life.
Effective: Spring 2000

Last Import from UCM: June 16, 2011 3:00 AM

American Studies (AM ST)

AM ST 400 **Early America to 1765** (3) American society and culture in the colonial period.

Effective: Fall 2007

Prerequisite: 6 credits in American Studies or History

AM ST 401 **Revolution and Early Republic, 1765-1815** (3) American society and culture during the period of the Revolution and the Early Republic.

Effective: Fall 2007

Prerequisite: 6 credits of American Studies or History or 5th semester standing

AM ST 402 **Antebellum and Civil War Era, 1815-1876** (3) Social and cultural conditions, sectional rivalry, political crises, warfare, and Reconstruction from 1815 to 1876.

Effective: Fall 2007

Prerequisite: 6 credits in American Studies or History

AM ST 404 **Industrial America** (3) An analysis of American politics, literature, society, and economics from the 1870s to World War II.

Effective: Fall 2007

Prerequisite: 6 credits of American Studies or History

AM ST 405 **Cold War** (3) Examination of social and cultural currents in American life from World War II to 1990.

Effective: Fall 2007

Prerequisite: 6 credits of American Studies or History

AM ST 406 **Contemporary America** (3) A study of the historic and cultural currents of life in the United States during the recent past.

Effective: Fall 2007

Prerequisite: HIST 021 or 6 credits of American Studies

AM ST 412 **American Eras** (3) Examination in depth of various and distinctive American time periods; subtitle expresses specific content. (May be repeated for credit.)

Effective: Fall 2007

Prerequisite: 6 credits of American Studies or History

AM ST 417 **American Beliefs and Myths** (3) A study of symbols, beliefs, and myths in the American experience; subtitles express specific content. (May be repeated for credit.)

Effective: Fall 2007

Prerequisite: 6 credits of American Studies

AM ST 421 (PHIL 401) **American Philosophy** (3) Survey of key figures and movements in American thought, including the Transcendentalists, the Pragmatists, and contemporary developments.

Effective: Fall 2007

Prerequisite: 9 credits of philosophy or 6 credits of philosophy at the 200-level or 5th semester standing

AM ST 422 (RL ST 422) **Religion and American Culture** (3 per semester, maximum of 6) Selected topics, problems, or historical movements in American religion; relation between religion and American culture.

Effective: Summer 1996

AM ST 430 (US) (WOMST 430) **Women in American Society** (3) A historical study of women's roles and experiences in the United States.

Effective: Fall 2007

Prerequisite: 6 credits of American Studies Sociology or Women's Studies

AM ST 431 **National Character** (3) An examination of the characteristics of the American people and other national groups.

Effective: Fall 2007

Prerequisite: AM ST 301 or 6 credits in American Studies

AM ST 432 **Ethnicity and the American Experience** (3) Theoretical and conceptual framework of ethnic studies: examination of specific issues related to major American ethnic and racial groups.

Effective: Fall 2007

AM ST 435 **Americans at Work** (3) A study of occupational and organizational cultures in America.

Effective: Fall 2007

Prerequisite: 6 credits in American Studies or Labor and Industrial Relations or Sociology

AM ST 439 **American Regional Cultures** (3-6) An interdisciplinary study of the culture of a region of the United States, such as the south or the west.

Effective: Fall 2007

Prerequisite: seventh-semester standing

AM ST 441 (US) (KINES 441) **History of Sport in American Society** (3) Background, establishment, and growth of sport in America from colonial times to the present.

Effective: Fall 2007

Prerequisite: KINES 141 or 3 credits of United States history

AM ST 448 (ANTH 448) **Ethnography of the United States** (3) Ethnographic descriptions of various dimensions of life in the United States.

Effective: Fall 2007

Prerequisite: ANTH 045

AM ST 460 **American Art and Architecture of the Seventeenth and Eighteenth Centuries** (3) Survey of American painting, sculpture, decorative arts, and architecture of seventeenth and eighteenth centuries with special emphasis on non-British cultures.

Effective: Fall 2007

AM ST 461 **American Art and Architecture of the Nineteenth Century** (3) A survey of American painting, sculpture, decorative arts, and architecture of the nineteenth century.

Effective: Fall 2007

AM ST 462 **American Art and Architecture of the 20th Century** (3) A survey of American painting, sculpture, decorative arts, and architecture of the twentieth century.

Effective: Fall 2007

AM ST 472 (ENGL 434) **Topics in American Literature** (3) Focused study of a particular genre, theme, or problem in American literature. (May be repeated for credit.)

Effective: Fall 2007

Prerequisite: 6 credits of ENGL ENLSH or LIT

AM ST 475 (US) (ENGL 431) **Black American Writers** (3 per semester, maximum of 6) A particular genre or historical period in the development of Black American literature.

Effective: Fall 2007

Prerequisite: ENGL 015 or ENGL 030

AM ST 476 (ENGL 492, WMNST 491) **American Women Writers** (3) A study of selected American women writers.

Effective: Spring 2008

Prerequisite: 6 credits of ENGL

AM ST 479 **American Expressive Forms** (3) Examination in depth of various and distinctive American expressive forms; subtitle expresses specific content. (May be repeated for credit.)

Effective: Fall 2007

Prerequisite: 6 credits in American Studies

AM ST 480 **Museum Studies** (3) An introduction to the basic purposes, philosophies, and functions of a museum, with emphasis on the problems of museum administration. (May be repeated for credit.)

Effective: Fall 2007

Prerequisite: 6 credits in American Studies

AM ST 481 **Historic Preservation** (3) A study of preservation practices and programs in America.

Effective: Fall 2007

Prerequisite: 6 credits in American Studies

AM ST 482 **Public Heritage** (3) A study of public heritage practices and programs in America. (May be repeated for credit.)

Effective: Fall 2007

Prerequisite: 6 credits in American Studies

AM ST 483 **Oral History** (3) A study of oral history techniques and issues in America.

Effective: Fall 2007

Prerequisite: 6 credits in American Studies

AM ST 484 **Archives and Records Management** (3) A study of archives and records management in America.

Effective: Fall 2007

Prerequisite: 6 credits in American Studies

AM ST 491W **American Themes, American Eras** (3-6) Interdisciplinary American culture course on major themes and eras such as the American Revolutionary Era or the 1930s.

Effective: Fall 2007

Prerequisite: seventh-semester standing

AM ST 493 (ENGL 493) **The Folktale in American Literature** (3) A survey of the literary uses of the folktale and legendary materials, with particular concentration on the literature of America.

Effective: Spring 1986

Prerequisite: ENGL 015 or ENGL 030

AM ST 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

AM ST 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

AM ST 495 **Internship** (1-6) Supervised internship for undergraduate or graduate American Studies majors at a museum or another cultural, historical, or arts agency.

Effective: Fall 2007

Prerequisite: senior-level status for undergraduate students; 18 credits of course work in major for graduate students; approval of program required

AM ST 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

AM ST 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

AM ST 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

AM ST 500 **Theory and Methods** (3) Introduction to graduate work in American Studies through exploration of the approaches, materials, and interpretations of the field.

Effective: Fall 2007

AM ST 502 **Problems in American Studies** (3-6) A variable-content course, addressed each term to a specific problem, topic, or period in American culture.

Effective: Summer 1970

AM ST 510 **U.S. Literature and Culture** (3) Studies exploring the relationship between literature and culture in American Studies.

Effective: Summer 2007

AM ST 511 **Pivotal Books** (3-9) Exploration of a number of books which have been particularly influential in shaping thinking about American civilization.

Effective: Fall 2007

AM ST 520 **Topics in Popular Culture** (3) A detailed exploration of aspects of American popular culture, including popular culture's relationship to society and scholarship.

Effective: Summer 2007

AM ST 530 **Topics in American Folklore** (3) A detailed exploration of aspects of folklore and folklife in America.

Effective: Fall 2007

AM ST 531 **Material Culture and Folklife** (3) Investigation of American material culture and folklife, including topics such as traditional design, cultural landscape, architecture, art, craft and food.

Effective: Summer 2007

AM ST 533 **American Civilization in the Eighteenth Century** (3-9) Detailed investigation of specific topics in eighteenth-century American civilization.

Effective: Fall 2007

AM ST 534 **American Civilization in the Nineteenth Century** (3-9) Representative interdisciplinary investigation of social, historical, economic, and aesthetic forces predominant in nineteenth-century America.

Effective: Fall 2007

AM ST 535 **American Civilization in the Twentieth Century** (3-9) Detailed investigation of specific periods or topics in twentieth-century American civilization.

Effective: Fall 2007

AM ST 536 **American Civilization in the Twenty-first Century** (3) Detailed investigation of specific topics in twenty-first century American civilization.

Effective: Summer 2007

AM ST 540 **Ethnography and Society** (3) An advanced course on ethnographic theories, methods, and case studies, emphasizing current controversies and new strategies in field work.

Effective: Summer 2007

AM ST 550 **Seminar in Public Heritage** (3) A study of the ways Americans use and understand heritage in public settings.
Effective: Summer 2007
Prerequisite: AMSTD 482

AM ST 551 **Seminar in Local and Regional Studies** (3) Detailed investigation of local and regional historical themes and topics, emphasizing research methods.
Effective: Summer 2007

AM ST 560 **Seminar in Race and Ethnicity** (3) Studies exploring issues of race and ethnicity in America that can be addressed with theories and methods of American Studies.
Effective: Summer 2007

AM ST 561 **Seminar in Gender and Culture** (3) Thematic study of gender issues in American history and culture.
Effective: Summer 2007

AM ST 570 **Topics in American Art** (1-6) Various themes within the American arts will be explored under this rubric.
Effective: Fall 2007

AM ST 575 **Museum Internship** (3) A supervised museum internship experience featuring a "hands on" introduction into aspects of the curatorial profession.
Effective: Fall 2007

AM ST 579 **Readings in American Studies** (3-9) Directed readings in selected areas of American Studies.
Effective: Fall 2008
Prerequisite: AM ST 500

AM ST 580 **Projects in American Studies** (1-6) Independent exploration within American Studies; evidenced by major paper, film, exhibition or specialized examination.
Effective: Fall 2007

AM ST 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2007

AM ST 591 **Seminar in American Studies** (3) An advanced seminar covering particular themes and issues in American Studies.
Effective: Fall 2007
Prerequisite: AM ST 500

AM ST 592 **Field Experience in American Studies** (3) Field projects and study tours to off-campus sites using American Studies methodologies.
Effective: Summer 2007
Prerequisite: AMSTD 500

AM ST 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

AM ST 595 **Internship** (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Fall 2008

AM ST 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

AM ST 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2007

AM ST 600 **Thesis in American Studies** (6) A thesis supervised by the American Studies Program.
Effective: Summer 2007
Prerequisite: AMSTD 500

AM ST 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 2008

AM ST 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.

Effective: Fall 2008

Prerequisite: AM ST 500 and permission of the doctoral program director

AM ST 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 2008

AM ST 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Fall 2008

Last Import from UCM: June 16, 2011 3:00 AM

Animal Science (AN SC)

AN SC 400 Application of Management Principles (1) Students will learn to apply business management skills to the animal production environment through interactive discussions and assignments.

Effective: Summer 1998

Prerequisite: seventh-semester standing

AN SC 405 Advanced Canine Nutrition and Management (3) Application of biological principles to the care and nutrition of dogs; interactive discussions of contemporary nutrition and management issues.

Effective: Spring 2002

Prerequisite: AN SC 305 and AN SC 400 ; or permission of program

AN SC 407 Advanced Horse Management (3) Detailed study of anatomy and physiology of the horse as related to nutrition, reproduction, athletic ability, unsoundness and control of diseases and parasites. Detailed discussion of management practices, facility design and contemporary issues.

Effective: Summer 1999

Prerequisite: AN SC 327, AN SC 400

AN SC 410 Advanced Dairy Herd Management (4) Application of dairy herd management principles using case studies and actual dairy farm situations.

Effective: Spring 2004

Prerequisite: AN SC 310 . Prerequisite or concurrent: AN SC 400

AN SC 413 Transgenic Biology (3) The principles and concepts used to generate genetically engineered animals by pronuclear, knockout, and cloning methods; and applied biotechnology applications.

Effective: Summer 2002

Prerequisite: a course in Molecular Biology and/or Biochemistry and/or Genetics

AN SC 414 Comprehensive Animal Biotechnology (3) A comprehensive review of the multidisciplinary area of animal biotechnology examining historical developments, current progress, and future directions.

Effective: Spring 2003

Prerequisite: 3 credits in molecular biology genomics genetics or biotechnology courses

AN SC 417 Horse Judging (2) Evaluation and selection of halter and performance horses, and presentation of oral reasons.

Effective: Spring 2002

AN SC 418 (AGECO 418, SOILS 418) Nutrient Management in Agricultural Systems (3) Comprehensive review of nutrient flow in animal agricultural systems, environmental regulations, and environmental stewardship practices.

Effective: Summer 2003

AN SC 419W Applied Animal Welfare (3) Assessment of management practices impacting animal welfare; devoted to livestock species, companion animals, captive exotic species, and animals in research.

Effective: Spring 2009

Prerequisite: AN SC 201 or 6 credits of biology

AN SC 420 Animal Nutrition and Feed Technology (4) Feedstuff evaluation, quality control, handling, storage: life cycle feeding of beef cattle, dairy cattle, sheep, swine, horses, and poultry.

Effective: Spring 1994

Prerequisite: AN SC 301

AN SC 421 Poultry Evaluation and Selection (2) Introduction and application of standards and principles used to evaluate live poultry and poultry products.

Effective: Summer 2004

Prerequisite: permission of program

AN SC 422 Dairy Cattle Evaluation and Selection (3) Methods used in evaluation of production and type traits and their role in selecting dairy breeding stock domestically and internationally.

Effective: Summer 1998

Prerequisite: AN SC 322

AN SC 423 Comparative Physiology of Domestic Animals (3) A comparative approach to understanding body function in domesticated avian and mammalian species.

Effective: Summer 1999

Prerequisite: BIOL 110

AN SC 424 Livestock Breeding Evaluation and Selection (3) Evaluation and selection of beef cattle, sheep, swine, and horses; critical analysis of performance records and genetic evaluations.

Effective: Summer 1999

Prerequisite: AN SC 324

AN SC 425 (VB SC 425) Principles of Avian Diseases (3) Principles of pathogenesis and control of diseases in poultry and other avian populations. Case material used where appropriate.

Effective: Spring 2009

Prerequisite: AN SC 201, BIOL 110 4 credits in microbiology and 3 credits of anatomy and/or physiology

AN SC 426 Advanced Judging and Selection (2 per semester, maximum of 4) Development of critical thinking and communication skills through evaluation and selection of animals and animal products.

Effective: Summer 1998

Prerequisite: AN SC 322

AN SC 427 Milk Secretion (3) Development and physiology of the mammary gland and factors which affect the amount and composition of milk produced.

Effective: Spring 2009

Prerequisite: AN SC 201 3 additional credits in dairy science

AN SC 429 Advanced Beef Cattle Production (3) Application of scientific and business principles to practical production and management issues using case studies or selected live settings.

Effective: Summer 2010

Prerequisite: AN SC 309

AN SC 431W Physiology of Mammalian Reproduction (4) Physiological processes of reproduction in animals, including the use of current and emerging technologies.

Effective: Summer 1999

Prerequisite: 3 credits in animal physiology

AN SC 432 Techniques in Livestock Reproduction (2) Demonstration and practice in estrus detection, inseminating techniques, pregnancy detection, embryo recovery and transfer methods.

Effective: Fall 2008

Prerequisite: AN SC 431W

AN SC 437 (AEE 437) Equine Facilitated Therapy (3) Equine Facilitated Therapy uses equine-related activities to contribute positively to the wellbeing of people with disabilities.

Effective: Spring 2002

AN SC 442 Quantitative Inheritance and Animal Breeding (3) Genes in populations: additive and nonadditive gene effects; selection and mating systems.

Effective: Fall 1983

Prerequisite: 3 credits in genetics and breeding; 3 credits in statistics

AN SC 447 Applied Equine Behavior (3) Theory and application of behavior principles as they apply to horses in free-running and domestic situations.

Effective: Spring 2009

Prerequisite: AN SC 201, AN SC 327 and fifth-semester standing; or fifth-semester standing and six credits in biology; or permission of the instructor

AN SC 450 Dairy Farm Management Systems (3) Capstone course emphasizing integration of dairy farm management principles into whole farm systems.

Effective: Summer 1998

Prerequisite: AN SC 310, AN SC 400, AN SC 410

AN SC 451 Dairy Systems Analysis (1-2 per semester/maximum of 2) Students will evaluate all systems of a working dairy farm business.

Effective: Spring 2011

Prerequisite: AN SC 310 prerequisite or concurrent: AN SC 410 Concurrent: AN SC 450 prerequisite or concurrent: AN SC 410

AN SC 457 Equine Reproduction and Breeding Farm Management (3) Advanced aspects of equine reproduction will be covered, including collection of semen, processing it for shipment, and insemination of mares.

Effective: Summer 2008

Prerequisite: AN SC 327, AN SC 407

AN SC 467 Equine Nutrition and Feeding (3) Equine gastrointestinal anatomy and physiology; energy and nutrient requirements for body functions; applied interrelationships between nutrition, health, and performance.

Effective: Summer 2008 Ending: Fall 2011

Prerequisite: AN SC 301, AN SC 327

AN SC 467W Equine Nutrition and Feeding (3) Equine gastrointestinal anatomy and physiology; energy and nutrient requirements for body functions; applied interrelationships between nutrition, health, and performance.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: AN SC 301

AN SC 477 Riding Instructor Training (1) Management of equestrian riding lessons, teaching techniques, lesson plans, program planning, time management, and handling of mounted groups.

Effective: Spring 2011

Prerequisite: AN SC 327 ; a demonstrable level of horsemanship

AN SC 479 (BIOL 479) General Endocrinology (3) Endocrine mechanisms regulating the morphogenesis, homeostasis, and functional integration of animals.

Effective: Fall 2009

Prerequisite: BIOL 141 or BIOL 472

AN SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

AN SC 496A **Animal Science Teaching Assistant** (2) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

AN SC 496A **Animal Sciences Teaching Assistant** (2) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

AN SC 496H **AN SC Honors Independent Study** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

AN SC 496H **Animal Sciences Honors Independent Study** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

AN SC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

AN SC 497B **Animal Genomics** (3) Approaches and techniques used to sequence and analyze genomes and their application in animal breeding, production and technology.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

AN SC 497B **Companion Animal Behavior** (3) Genetic, physiological and environmental bases of canine and feline behavior with applications to management, welfare and behavior modification.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

AN SC 497C **Animal Biotech Lab** (2) Laboratory based course that exposes students to molecular biology techniques with applied emphasis on livestock agriculture and animal biotechnology.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

AN SC 497E **Livestock Marketing** (2) This is a Livestock Marketing course where the students will be able to plan and budget a livestock sale.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

AN SC 497E **The Clocks That Time US** (3) Biological clocks of varying time scales are found in all living organisms and directly control virtually every physiological and behavioral processes in the body. Consequently, the understanding of how clocks function is important to our understanding of biology itself. This class will examine the molecular, cellular and systems level mechanisms that animals utilize to adapt to rhythmic changes in the physical environment, in particular focusing on the mechanisms of biological clock function as they relate to real world outcomes.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

AN SC 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

AN SC 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

AN SC 500 **Foundation Readings in Animal Science** (1 per semester/maximum of 2) Scientific articles that have significantly impacted the animal sciences will be read and discussed.
Effective: Summer 2009

AN SC 502 **Scientific Scholarship** (2) Consideration of the scientific method and thinking relative to scholarship, grantsmanship, and the mechanism of grantsmanship.
Effective: Summer 1996

AN SC 506 (NUTRN 506) **Ruminology** (3) Physiological, biochemical, and microbiological activities occurring within the rumen and the relation of rumen function to animal response.
Effective: Summer 1987

Prerequisite: at least one course in each of the following areas: animal nutrition physiology microbiology and biochemistry

AN SC 510 **Animal Science Research Methods** (3) Application of scientific method; experimental design and procedures;

analyzing, interpreting, and reporting research results.

Effective: Fall 1983

Prerequisite: 3 credits of 400-level statistics

AN SC 514 Animal Growth and Development (3) Cellular, metabolic, and nutritional aspects of fetal and postnatal tissue growth; role of the endocrine system in regulation of animal growth.

Effective: Fall 1983

Prerequisite: 3 credits in biochemistry; 3 credits in physiology

AN SC 515 Advanced Physiology of Reproduction in Farm Animals (1-6) Advanced physiology of reproduction in farm animals.

Effective: Fall 1983

Prerequisite: 3 credits each of reproductive physiology systemic physiology and endocrinology

AN SC 590 Colloquium (1-9; 1 per semester) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 2009

AN SC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

AN SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

AN SC 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Summer 1995

AN SC 600 Thesis Research (1-15) No description.

Effective: Fall 1983

AN SC 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 1983

AN SC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Experience in developing, organizing, and conducting lectures/laboratories; evaluation and counseling students and related resident education activities.

Effective: Fall 1983

AN SC 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.

Effective: Fall 2008

AN SC 610 Thesis Research Off Campus (1-15) No description.

Effective: Fall 1983

AN SC 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Fall 1983

NOTE: Also see course listed under Animal Nutrition, Poultry Science, and Veterinary Science.

Last Import from UCM: June 16, 2011 3:00 AM

Anthropology (ANTH)

ANTH 401 Human Evolution: The Material Evidence (3) Human origins as seen in the fossil record and comparative biology of humans and their primate relatives.

Effective: Fall 1986

Prerequisite: ANTH 021

ANTH 405 Primatology (3) Nonhuman primate origins, evolution, comparative physical and behavioral characteristics, ecological context, phylogeny and taxonomy; and their importance in anthropology.

Effective: Spring 2001

Prerequisite: ANTH 021

ANTH 408 Anthropological Demography (3) Analysis of demographic studies in traditional and very small populations.

Effective: Fall 2003

Prerequisite: 3 credits in anthropology

ANTH 410 Osteology (4) Introduction to the systematic study of the human skeleton from an evolutionary developmental biological perspective.

Effective: Spring 2007

Prerequisite: 3 credits in anthropology 3 credits in the biological sciences or concurrent enrollment in ANTH 401 or ANTH 501

ANTH 411 Skeletal Forensic Anthropology (3) An introduction to anthropological forensic science with an emphasis on what can be learned from human skeletons and archaeological recovery methods.

Effective: Spring 2007

Prerequisite: ANTH 021 or ANTH 410 or Forensic Science major

ANTH 412 Settlement Demography (3) Examination of the demography and ecology of human settlement systems in the preindustrial past.

Effective: Summer 2008

Prerequisite: ANTH 408

ANTH 413 Molecular Forensic Anthropology (3) An introduction to the field of the application of DNA methods to estimating forensically useful phenotypes.

Effective: Summer 2006

Prerequisite: ANTH 021 or Forensic Science major

ANTH 420 (J ST 420) Archaeology of the Near East (3) Culture of the Near East and India from Paleolithic times through the Bronze Age.

Effective: Summer 1999

Prerequisite: ANTH 008, ANTH 009, ANTH 011 or ANTH 012

ANTH 421 Intro to Geospatial Science in Anthropology and Archaeology (3) This course is a practical, data driven, introduction to applications of Geospatial tools in anthropological and archaeological research.

Effective: Summer 2009

Prerequisite: ANTH 001 or ANTH 002

ANTH 422 Meso-American Archaeology and Ethnography (3) Survey of ethnohistorical and ethnographic patterns of Meso-American society; origin and development of ancient civilization in Mexico, Guatemala, and Honduras.

Effective: Spring 1999

Prerequisite: ANTH 008, ANTH 009, ANTH 011 or ANTH 012

ANTH 423 The Evolution of American Indian Culture (3) Historic and archaeological sources used to trace American Indian lifestyles from the first immigrants to the period of Euro-American contact.

Effective: Spring 1999

Prerequisite: 3 credits in anthropology

ANTH 424 Andean Ethnology and Archaeology (3) Cultures of the Andes from earliest settlements to Inka Empire; includes discussion of life in modern Andean communities.

Effective: Spring 2002

Prerequisite: ANTH 002, ANTH 045

ANTH 426W Archaeological Laboratory Analysis (3) Scientific laboratory methods used in the analysis of ceramic and lithic artifacts.

Effective: Summer 2004

Prerequisite: ANTH 007, ANTH 008, ANTH 009 or ANTH 011

ANTH 427W Forensic Archaeology (3) Application of archaeological techniques to crime scene investigations, with practical experience in field and laboratory contexts.

Effective: Summer 2007

Prerequisite: ANTH 002

ANTH 428 Archaeological Methods and Theory (3) Scientific methods as applied to archaeological data: evolution, ecology, diffusion, and cyclicalism theory.

Effective: Spring 1999

Prerequisite: ANTH 007, ANTH 008, ANTH 009, ANTH 011 or ANTH 012

- ANTH 429 **Paleoethnobotany** (3) Introductory course in paleoethnobotany, the study of the interrelationships between people of the past, natural environment, and plant resources.
Effective: Spring 2010
Prerequisite: ANTH 002
- ANTH 431 **Advanced Geospatial Science for Anthropologists and Archaeologists** (3) This course is an intensive, data driven, treatment of the use of geographic information systems in anthropological and archaeological research.
Effective: Summer 2009
Prerequisite: ANTH 421
- ANTH 432 **Environmental Archaeology** (3) Introductory course in Environmental Archaeology, with emphasis on method and theory in the subfields archaeobotany, pediaeology, and zooarchaeology.
Effective: Spring 2010
Prerequisite: ANTH 002
- ANTH 433 **Archaeological Ethics and Law** (3) Introductory course that examines prominent ethical and legal issues in archaeology integral to modern applied research and practice.
Effective: Spring 2010
Prerequisite: ANTH 002
- ANTH 440 **South American Tribal Societies** (3) Ethnographic survey of tribal societies in South America. Special emphasis on non-Andean area.
Effective: Fall 1986
- ANTH 441 (IL) **From Stone Ax to Uzi: Tradition and Change in the New Guinea Highlands** (3) This course explores cultural change and innovation among tribal peoples of Highland New Guinea from stone tool technology to globalization.
Effective: Fall 2009
Prerequisite: ANTH 045
- ANTH 444 **Primitive Warfare** (3) Critical overview of the ethnography and theory of primitive warfare.
Effective: Summer 2002
Prerequisite: ANTH 045 ; and ANTH 002 or ANTH 021
- ANTH 445W **Ethnographic Film** (3) Comparisons of written and visual ethnography; critical assessment of ethnographic film; cross-cultural variation.
Effective: Summer 2000
Prerequisite: ANTH 001 or ANTH 045
- ANTH 446 **Mating and Marriage** (3) An examination of human mating mainly from the viewpoint of behavioral ecology, centering on the species-typical institution of marriage.
Effective: Summer 2006
Prerequisite: ANTH 045, ANTH 021
- ANTH 448 (AM ST 448) **Ethnography of the United States** (3) Ethnographic descriptions of various dimensions of life in the United States.
Effective: Fall 2007
Prerequisite: ANTH 045
- ANTH 450 **Comparative Social Organization** (3) Social structure and cultural change among nonliterate societies.
Effective: Fall 1986
Prerequisite: ANTH 045
- ANTH 450W **Comparative Social Organization** (3) Social structure and cultural change among nonliterate societies.
Effective: Summer 1996
Prerequisite: ANTH 045
- ANTH 451 **Economic Anthropology** (3) Different approaches to the study of the economics of non-Western societies, emphasizing the interrelationships between noneconomic factors and economic behavior.
Effective: Fall 1986
Prerequisite: ANTH 045
- ANTH 453 **Anthropology of Religion** (3) Traditional and modern religions and historical and contemporary religious movements from an anthropological perspective.
Effective: Fall 2003
Prerequisite: ANTH 001 or ANTH 045
- ANTH 455 **Global Processes and Local Systems** (3) Ethnographic, comparative, historic, evolutionary treatment of global economic, political, and cultural processes and their consequences for local systems.
Effective: Fall 2001
Prerequisite: ANTH 045
- ANTH 456 **Cultural Ecology** (3) Survey of the methods and concepts of cultural ecology, focusing on the interaction between cultural and geographical systems.
Effective: Fall 1986
Prerequisite: 3 credits in anthropology
- ANTH 457 (US;IL) (J ST 457, SOC 457) **Jewish Communities: Identity, Survival, and Transformation in Unexpected Places** (3) Examines the global array of smaller Jewish communities that have flourished outside the main urban centers of Jewish settlement.
Effective: Summer 2006

Prerequisite: ANTH 001 or ANTH 045, HEBR 010, J ST 010, SOC 001, SOC 005, SOC 007, SOC 015

ANTH 458 **Ethnographic Field Methods** (3) Course introduces students to ethnographic field methods, includes student projects and simple analyses that don't require statistical sophistication.

Effective: Spring 2009

Prerequisite: ANTH 045

ANTH 459 **Applied Anthropology** (3) A survey of the development of applied anthropology and the current issues facing anthropologists working in non-academic settings.

Effective: Summer 2002

Prerequisite: ANTH 045

ANTH 460 (BIOL 460) **Human Genetics** (3) The human genome, its variation, origins, and relation to disease and other traits.

Effective: Fall 2007

Prerequisite: BIOL 230W or 3 credits in genetics

ANTH 460H (BIOL 460H) **Human Genetics** (4) Gene mapping in humans; molecular basis of genetic disease; genomic structure; immunogenetics; and genetic evidence for human evolutionary history.

Effective: Fall 2001

Prerequisite: 3 credits in genetics or ANTH 021 or BIOL 222 or BIOL 230W ; and 3 credits in statistics

ANTH 461 **Molecular Anthropology** (3) Provides framework to understand current issues in biology, genetics, and anthropology as they relate to the evolution of our species.

Effective: Spring 2005

Prerequisite: 3 credits in biological anthropology or 3 credits in biology

ANTH 463 **Quantitative Analysis of Morphological Data** (3) The application of morphometric methods to anthropological data: phenotypes of organisms, artifacts, and traits.

Effective: Fall 2004

Prerequisite: ANTH 002 or ANTH 021; STAT 200 ; 3 additional credits in anthropology

ANTH 464 (BIOL 464) **Sociobiology** (3) The study of the adaptive function of social behavior, the comparative analysis of social organization, and the ecology of sociality.

Effective: Fall 1986

Prerequisite: 6 credits in biology or anthropology

ANTH 465H **Fifteen Great Biology Papers** (3) Reading and discussion of the most influential papers in the history of biology that illustrate exceptional insight and elegant reasoning.

Effective: Spring 2003

Prerequisite: ANTH 021 or 3 credits in evolutionary biology or genetics and 3 credits in statistics

ANTH 466 **The Skull** (3) Survey of the mammalian skull from many perspectives including evolution, development, anatomy, function, and variability of the skull.

Effective: Spring 2003

Prerequisite: ANTH 021

ANTH 470H **Our Place in Nature** (3) An evolutionary and genetic consideration of our understanding of human beings as a part of the natural world.

Effective: Fall 2001

Prerequisite: 3 credits each in genetics evolutionary biology and statistics

ANTH 471H **Biology, Evolution, and Society** (3) Exploration of the genetic theory of evolution and development, its history and application within Biology and beyond.

Effective: Spring 2008

Prerequisite: ANTH 021, BIOL 222, BIOL 230, BIOL 322 or BIOL 460 ; 3 credits in statistics

ANTH 476W **Anthropology of Gender** (3) Cross-cultural construction of gender and sex roles; theories of gender construction; case studies and practical effects.

Effective: Summer 2011

Prerequisite: 3 credits in women's studies or anthropology

ANTH 477 (US;IL) **Language, Culture, and Society** (3) Relationships among language, culture and society, with an anthropological emphasis.

Effective: Spring 2007

Prerequisite: ANTH 045 or ANTH 001

ANTH 478 (IL) **Cannibalism** (3) Explores the cultural institution of cannibalism, uses of the "cannibal" label, and cannibalism's meaning among those who practiced it.

Effective: Spring 2010

Prerequisite: ANTH 045

ANTH 492 **Intermediate Field Methods** (3-6) On-site experience in collecting archaeological, behavioral, or biological data.

Effective: Spring 2001

Prerequisite: ANTH 002

ANTH 493 **Field Techniques** (3-6) Training in techniques involving analyses of archaeological, behavioral, or biological data.

Effective: Spring 2001

Prerequisite: ANTH 002

ANTH 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

ANTH 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

ANTH 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2000
Prerequisite: prior approval of proposed assignment by instructor

ANTH 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1986

ANTH 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1986

ANTH 497A **Evolution and Development and Humans Origins** (3) Will provide a developmental framework for studying how natural selection has shaped human evolution. Survey the basic embryology of key morphological systems.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ANTH 497A **Evolution of Human Walking** (3) This course will provide a multidisciplinary approach of the evolution of human bipedal walking and running and how it differs from that of our quadrupedal relatives.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ANTH 497B **The Aztec Heritage** (3) Students will learn about the prehistory of the Valley of Mexico which encompassed the ancient Aztec, Toltec, and Teotihuacan cultures and how Dr. Sander's work contributed to their exploration.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ANTH 497C **Social Organization of Traditional Societies** (3) Explores the ways in which individuals in traditional societies organize themselves as groups, the principles they use to determine membership in those groups and the way in which those groups work to fulfill the necessary functions of society.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ANTH 497D **Learning & Teaching Anthropology Using Video** (3) This class will focus on preparing students with the tools and skills they will need to write, film and edit short science educational videos. Students will use Final Cut Pro for editing videos learning about basic editing techniques.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ANTH 497E **The Evolution of Human Mating** (3) The goal of this course is to bring students in contact with the primary literature on human sexuality and sexual selection.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ANTH 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

ANTH 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

ANTH 499A (IL) (CAMS 499A, HIST 499A) **Archaeology, History, and Culture of Turkey's Aegean Coast** (3) The 2011 study tour will focus on Turkey's western coast, the location of Troy and the Trojan War of the heart of the Greco-Roman and Byzantine empires.
Effective: Summer 2011 Ending: Summer 2011

ANTH 499B (IL) (CAMS 499B, HIST 499B) **Foreign Study** (3) This course is offered as an option for students to earn an additional 3 credits, with the permission of the instructor. The students will be required to write a research paper on an approved topic.
Effective: Summer 2011 Ending: Summer 2011

ANTH 499C (IL) (CAMS 499C, HIST 499C, RL ST 499C) **Excavation, Survey and GIS for Archaeologists** (6) Entails excavation, intensive survey, and an introduction to GIS for archaeologists.

Effective: Summer 2011 Ending: Summer 2011

ANTH 499D (IL) (CAMS 499D, HIST 499D, RL ST 499D) **Israel Dig: Excavation, Conservation, and Public Archaeology** (6) Entails excavation, conservation, and public archaeology involved with the preservation and interpretation of Israel's archaeological sites.

Effective: Summer 2011 Ending: Summer 2011

ANTH 499E (IL) (CAMS 499E, HIST 499E) **Study Tour of Jordan: Petra, the Spice Route, Roman Palestine** (3) Entails an in-depth seminar with a focus on the archaeology and history of Roman Palestine.

Effective: Summer 2011 Ending: Summer 2011

ANTH 501 **Human Evolution: The Material Evidence** (3) Human origins as seen in the fossil record and comparative biology of humans and their primate relatives.

Effective: Spring 2002

Prerequisite: ANTH 401

ANTH 508 **Research Problems in Culture History** (3-9) No description.

Effective: Spring 1987

ANTH 509 **Research Design in Anthropological Fieldwork** (3) A survey of research design, sampling strategies, potential biases, confounding problems, and the limits of inference in anthropological fieldwork.

Effective: Summer 1990

Prerequisite: STAT 451

ANTH 521 **Current Literature in Archaeology** (1) Seminar designed to expand general knowledge of archaeology through exposure to current research and related issues in contemporary archaeology.

Effective: Fall 2000

ANTH 530 **Individual Readings in Anthropology** (1-6) Reading or research in selected aspects of general anthropology.

Effective: Spring 1987

ANTH 541 **Current Literature in Cultural Anthropology** (1) This seminar is designed to expand general knowledge of cultural anthropology through exposure to current research/related issues in contemporary cultural anthropology.

Effective: Spring 2002

ANTH 545 **Seminar in Anthropology** (1-9) Critical analysis of research in selected areas of anthropology.

Effective: Spring 1987

ANTH 556 **Social Organization of Traditional Societies** (3) Cultural bases of social organization of traditional societies.

Effective: Summer 1990

ANTH 559 **Human Ecology** (3) Ecological anthropology, emphasizing the adaptive aspects of subsistence, including foraging and settlement pattern.

Effective: Spring 2011

ANTH 560 **History of Anthropological Theory** (3) Survey of origin and development of anthropology in the Nineteenth Century and trends during the Twentieth Century.

Effective: Fall 1986

Prerequisite: ANTH 450

ANTH 561 **Field Methods in Anthropology** (3-9) Individual field work in any aspect of anthropology, supervised by staff of professional rank.

Effective: Spring 1987

ANTH 562 **Laboratory Methods in Anthropology** (3-9) Supervised laboratory research, utilizing materials from physical anthropology or archaeology or cultural anthropology.

Effective: Spring 1987

ANTH 563 **Current Literature in Biological Anthropology** (1) Seminar designed to expand general knowledge of Biological Anthropology through exposure to current research and issues in contemporary Biological Anthropology.

Effective: Fall 2001

ANTH 564 **Topics in Sociobiology and Behavioral Ecology** (3) Critical analysis of specialized topics in sociobiology and behavioral ecology.

Effective: Spring 2002

Prerequisite: an introductory course in anthropology or biology

ANTH 565 (WMNST 565) **Women and Development** (3) Interaction of women and development.

Effective: Spring 1994

ANTH 566 Infectious Diseases in Anthropological Populations (3) Surveys infectious diseases in history and prehistory; introduces concepts from microbiology, immunology, and epidemiology, applies them to past human populations.
Effective: Spring 2002

ANTH 571 Principles of Human Evolutionary Biology (3) Mechanisms and quantification of human genetic variation and survey of evolutionary aspects of human ecology, life cycle, and population biology.
Effective: Spring 2002

ANTH 575 Population, Food, and Traditional Farming (3) This course explores the relationship between demographic processes (fertility, mortality, migration) and traditional farming, especially farming near the subsistence level.
Effective: Summer 2009
Prerequisite: ANTH 408

ANTH 579 (SOC 579) Spatial Demography (3) This graduate course will expose students to spatial analysis tools and analytical methods applied to demographic research.
Effective: Spring 2008
Prerequisite: Graduate course in statistics i.e. SOC 574 or ANTH 509

ANTH 588 Method and Theory in Archaeology (3) Methodological strategies and tactics in archaeological research; major theories in cultural anthropology as applied to archaeological data.
Effective: Spring 2002

ANTH 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1987

ANTH 593 (BIOL 593, ENT 593) Tropical Field Studies (Organization for Tropical Studies) (8) An intensive field course concentrating on field problems, experimental design, and data analysis in tropical habitats.
Effective: Summer 1993
Prerequisite: approval by the Committee on Tropical Studies

ANTH 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2001

ANTH 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1987
Prerequisite: prior approval of proposed assignment by instructor

ANTH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

ANTH 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

ANTH 600 Thesis Research (1-15) No description.
Effective: Fall 1986

ANTH 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1986

ANTH 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at the Pennsylvania State University.
Effective: Fall 2003

ANTH 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2002

ANTH 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1986

ANTH 611 Ph.D. Dissertation Part-Time (0) No description.

Last Import from UCM: June 16, 2011 3:00 AM

Applied Linguistics (APLNG)

APLNG 410 Teaching American English Pronunciation (3) Study and application of principles of North American English phonetics and theories of teaching pronunciation.
Effective: Fall 2001

APLNG 412 Teaching Second Language Writing (3) This course provides opportunities for exploring various perspectives on theory, research, and pedagogical applications in second language writing.
Effective: Summer 2003

APLNG 482Y (IL) Introduction to Applied Linguistics (3) Application of theories of language to psycholinguistics, philosophy of language, anthropological linguistics, sociolinguistics, bi/multilingualism, second language acquisition and teaching.
Effective: Spring 2006

APLNG 484 Discourse-Functional Grammar (3) Develop a working knowledge of the structure of English and apply such knowledge to research and/or classroom situations.
Effective: Fall 2004

APLNG 491 Theory: Second Language Acquisition (3) An investigation into current issues in the theoretical bases of second language acquisition.
Effective: Fall 2006

APLNG 493 (IL) Teaching English as a Second Language (3) Theory, research, and pedagogy that focus on the teaching of English to speakers of other languages in varied contexts.
Effective: Spring 2006

APLNG 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2001

APLNG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2002

APLNG 500 Practice Teaching in ESL (3) Provides instructional support and professional mentoring for second language teachers during the practice teaching experience.
Effective: Fall 2009

APLNG 510 Health and Aging in Multilingual Contexts (3) This course focuses on anthropological approaches to health and aging in multilingual contexts.
Effective: Spring 2007

APLNG 511 Applied Linguistics and Health Sciences (3) A theoretical and practical introduction to concepts and methods associated with multilingualism and health care services and research.
Effective: Summer 2006

APLNG 512 Language and Adult Lifespan Development (3) The effects of adult cognitive development and decline on the production and comprehension of language in mono- and multilinguals.
Effective: Summer 2006

APLNG 570 Second Language Reading (3) Theoretical and practical introduction to concepts, methods and practices of research and instruction of second language reading development.
Effective: Summer 2006

APLNG 571 'Foreign' Language Materials Development (3) This course focuses on the development and critical analysis of 'foreign' language teaching materials in applied linguistics and language learning.
Effective: Summer 2005

APLNG 572 Communication in Second Language Classrooms (3) The study of communication in second language classrooms.
Effective: Spring 2002

APLNG 573 **Communicative Language Teaching** (3) Cognitive, linguistic, and sociocultural foundations of communicative language teaching (CLT) as reflected in current international language teaching policies/practices.
Effective: Fall 2001

APLNG 575 **Language Ideology** (3) This course is designed to offer a range of perspectives on language ideology as an analytical construct.
Effective: Summer 2006

APLNG 576 **Language Socialization across Home, School, and Community Contexts** (3) A survey of research on language socialization from a variety of sociocultural groups across a range of sociolinguistic contexts.
Effective: Summer 2006

APLNG 578 **Computational and Statistical Methods for Corpus Analysis** (3) A hands-on introduction to the core and advanced computational and statistical methods for analyzing corpus data.
Effective: Fall 2010

APLNG 580 **Proseminar in Applied Linguistics** (1) This team-taught seminar introduces PhD students to the scholarly areas and research perspectives in Applied Linguistics represented by department faculty.
Effective: Summer 2008

APLNG 581 (CAS 581) **Discourse Analysis** (3) Overview of theories and approaches to the analysis of spoken and/or written discourse.
Effective: Fall 2005

APLNG 583 **Methods of Language Assessment** (3) Introduces methodology for selecting, developing, applying, and analyzing tests and questionnaires for research and evaluation in communication and language education.
Effective: Spring 2002

APLNG 584 **Sociocultural Theory and Second Language Learning** (3) The course is an introduction to research on second language learning from a sociocultural theoretic perspective.
Effective: Spring 2004

APLNG 586 **Analyzing Classroom Discourse** (3) A theoretical and practical introduction to concepts and methods associated with the analysis of classroom discourse.
Effective: Summer 2006

APLNG 587 **Theory & Research in L2 Teacher Education** (3) Examines the historical and contemporary landscape of theory and research in second language teacher education.
Effective: Fall 2009

APLNG 588 **Design and Research of Technology-Mediated Language Learning** (3) Using computer and multimedia technologies to support materials development and second language acquisition research.
Effective: Spring 2010

APLNG 589 (CMLIT 589, FR 589, GER 589) **Technology in Foreign Language Education: An Overview** (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with SPAN 589)
Effective: Fall 2003

APLNG 591 **Seminar in Second Language Acquisition** (3) Seminar in second language acquisition by second/foreign language learners and implications for language pedagogy and assessment.
Effective: Spring 2002

APLNG 592 **Qualitative Research in Applied Linguistics** (3:2) This course offers an introduction to qualitative research methods in applied linguistics.
Effective: Spring 2009

APLNG 593 **Experimental Research on Language** (3) Standard methodologies for planning, conducting, interpreting, and reporting research in Applied Linguistics.
Effective: Spring 2009

APLNG 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Fall 2001
Prerequisite: prior approval of proposed assignment by instructor

APLNG 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2001

APLNG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2001

APLNG 597A Meaning in L2 Learning (3) The course will consider recent research on two important areas where meaning comes to the fore: figurative language (metaphor, metonymy and other tropes) and gesture (particularly gesture that synchronizes with speech).
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

APLNG 597B Multilingualism, Public Policy and State Security (3) The course will address the following issues: the opportunities and constraints which multilingualism plays in the state, the army, the police and judiciary. The course will conclude by exploring the applied linguistic implications of such multilingualism for language training.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

APLNG 597C Seminar in Language Use (3) This course prepares students for future in-depth study and research in a variety of language-related areas.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

APLNG 600 Thesis Research (1-15) No description.
Effective: Fall 2001

APLNG 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 2001

APLNG 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Students experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Fall 2001

APLNG 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 2003

APLNG 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 2001

APLNG 802 Focus on English: Teaching Form, Meaning and Use (3) Develops an understanding of the various domains of the English language as relevant for adult English language learning and teaching.
Effective: Summer 2010

APLNG 804 Focus on Learners: Identity, Community and Language Learning (3) Explores how individual identities shaped by cultural differences, social positioning, institutional roles and structures influence English language learning and teaching.
Effective: Summer 2010

APLNG 806 Focus on Classrooms: Planning and Supporting Language Learning (3) Develops a critical awareness of one's teaching practice and highlights instructional planning and classroom interactions with adult English language learners.
Effective: Summer 2010

APLNG 808 Focus on Instruction: Teaching and Assessing Language Learning (3) Develops an understanding of and ability to use effective teaching and assessment practices that support adult English language learning.
Effective: Summer 2010

Last Import from UCM: June 16, 2011 3:00 AM

Applied Youth, Family and Community Education (AYFCE)

AYFCE 438 (US) **Living in an Increasingly Diverse Society** (1-3) Students in this course will explore selected dimensions of diversity through lecture, discussion, speakers, active participation, and experiential learning.
Effective: Spring 2011

AYFCE 439 **Contemporary Youth Issues** (3) This course focuses on empirically-supported interventions that promote resiliency and reduce risk for problem behaviors among youth in community settings.
Effective: Spring 2011
Prerequisite: a minimum of six credits in courses that focus on youth and/or families

AYFCE 455 **Extension Youth Development Programs and Volunteer Management** (3) A study of 4-H/Extension youth programs and the variety of roles played by volunteer leaders.
Effective: Spring 2011
Prerequisite: 6 credits of social or behavioral sciences

AYFCE 470 **Consumer and Financial Skills** (3) Consumer and financial issues formal and non formal educators need to be informed about to function in today's society.
Effective: Spring 2011
Prerequisite: Six credits of social and behavioral sciences and six credits of quantification (math)

AYFCE 495 **Internship in Youth and Family Education Programs** (6-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships.
Effective: Spring 2011
Prerequisite: prior approval of proposed assignment by instructor

AYFCE 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2011

AYFCE 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2011

AYFCE 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2011

AYFCE 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2011

AYFCE 535 **Youth Civic Development** (3) This course critically examines processes enabling youth to become members of local communities and "citizens" of nations and global societies.
Effective: Spring 2011

AYFCE 550 **Program Development and Evaluation in Youth, Families and Communities** (3) Examination of concepts, theories, models, and procedures relative to program development and evaluation in youth, families and communities.
Effective: Spring 2011
Prerequisite: AEE 450;AEE 520

AYFCE 555 **Volunteer Program Management** (3) The study and application of concepts and principles of volunteerism and administration relevant to volunteer program management.
Effective: Spring 2011

AYFCE 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2011

AYFCE 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2011
Prerequisite: prior approval of proposed assignment by instructor

AYFCE 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2011

AYFCE 596A **Amandla-Voice for Freedom** (3) A three-week study abroad program allowing students to examine the

South African youth struggle/protest during and post-apartheid.
Effective: Summer 2011 Ending: Summer 2011

AYFCE 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 2011

AYFCE 597A **The Art and Science of Dissemination and Implementation: Taking Evidence toScale** (3) In this course, students will examine the implementation and sustainability of evidence-based interventions/practices in service systems (schools and community-based organizations).
Effective: Summer 2011 Ending: Summer 2011

AYFCE 600 **Thesis Research** (1-15) No description.
Effective: Spring 2011

AYFCE 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Spring 2011

AYFCE 840 **Applied Youth Development** (3) Background and current issues related to youth development programs in their application to actual youth programs in community settings.
Effective: Spring 2011

AYFCE 845 **Intergenerational Programs and Practices** (3) Background, intervention strategies, and issues related to developing intergenerational programs and practices aimed at addressing vital social and community issues.
Effective: Spring 2011 Ending: Summer 2011

AYFCE 845 (CI ED 845) **Intergenerational Programs and Practices** (3) Background, intervention strategies, and issues related to developing intergenerational programs and practices aimed at addressing vital social and community issues.
Effective: Fall 2011 Future: Fall 2011

Last Import from UCM: June 16, 2011 3:00 AM

Arabic (ARAB)

ARAB 401 (IL) **Advanced Language & Cultures I** (3) Fifth-semester Modern Standard Arabic: reading more complex texts, films, further development of conversation, composition skills, Arab cultures, current issues.

Effective: Spring 2008

Prerequisite: ARAB 110 or approval of program

ARAB 402 (IL) **Advanced Language & Cultures II** (3) Sixth-semester Modern Standard Arabic: reading more complex texts, films, further development of conversation, composition skills, Arab cultures, current issues.

Effective: Spring 2008

Prerequisite: ARAB 401 or approval of program

ARAB 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

ARAB 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

ARAB 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1986

ARAB 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 1986

ARAB 497G **Professional Development for Teachers of Arabic** (1-3) Professional development workshop to provide current and prospective teachers of Arabic with information about the practice in innovative teaching methodologies.

Effective: Summer 2011 Ending: Summer 2011

ARAB 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

ARAB 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

Architectural Engineering (A E)

A E 401 Design of Steel and Wood Structures for Buildings (3) Application of principles of engineering mechanics to layout, analysis, design, and detailing of structural elements in steel and wood of simple buildings.

Effective: Fall 2005

Prerequisite: A E 221, A E 222, A E 308

A E 402 Design of Concrete Structures for Buildings (3) Application of principles of engineering mechanics to layout, analysis, design, and detailing of structural elements in concrete of simple buildings.

Effective: Fall 2005

Prerequisite: A E 221, A E 222, A E 308

A E 403 Advanced Steel Design for Buildings (3) Continuation of A.E. 401. Advanced analysis, design, and detail of the structural elements in wood and steel.

Effective: Fall 2005

Prerequisite: A E 401, A E 430

A E 404 Building Structural Systems in Steel and Concrete (3) Basic analysis, design, and detailing of steel and concrete structural elements for buildings, emphasizing systems design and comparisons. A E 404 is not permitted for AE Structural Option students or for Architecture students.

Effective: Summer 2006

Prerequisite: A E 221, A E 222, A E 308

A E 421 Architectural Structural Systems I (3) Qualitative and quantitative analysis and design of architectural structures, force flow; structure configurations; measurement and experiments; design studio critique.

Effective: Spring 1990

Prerequisite: A E 210 3 credits in mathematics

A E 422 Architectural Structural Systems II (3) Continuation of A E 421, with emphasis on structural configuration and construction assemblies.

Effective: Spring 1990

Prerequisite: A E 421

A E 424 Environmental Control Systems I (3) Fundamental principles and applications of environmental systems in buildings. This course is intended for Architecture students.

Effective: Fall 2005

Prerequisite: A E 211

A E 430 Indeterminate Structures (3) Classical methods of analysis for beams, frames, arches, and secondary stresses as applied to buildings; introduction to modern methods.

Effective: Summer 1984

Prerequisite: A E 308

A E 431 Advanced Concrete Design for Buildings (3) Continuation of A.E. 402. Advanced analysis, design, and detail of concrete masonry, prestressed and reinforced concrete.

Effective: Fall 2005

Prerequisite: A E 402, A E 430

A E 432 Design of Masonry Structures (3) Analysis and design of unreinforced and reinforced masonry: non-bearing walls, bearing walls, shear walls, masonry building systems.

Effective: Spring 2005

Prerequisite: A E 402 or C E 341

A E 439 Modern Structural Systems (3) Analysis and design of building structures of unusual types.

Effective: Summer 1981

Prerequisite: A E 401, A E 402, A E 430

A E 444 Micro CADD Applications for Buildings (3) Application of microcomputer based CADD systems to architectural engineering problems including graphics, system customization, and AI programming techniques.

Effective: Spring 2008

Prerequisite: A E 222;CMPSC 201 orCMPSC 202

A E 454 Advanced Heating, Ventilating, and Air Conditioning (3) Engineering design and performance analysis procedures for complex commercial building systems, including energy conservation techniques; design project.

Effective: Fall 1986

Prerequisite: A E 310

A E 455 Advanced Heating, Ventilating, and Air Conditioning System Design (3) Design of several different systems for a course project building; control strategy; economic comparisons using life-cycle cost techniques.

Effective: Fall 1983

Prerequisite: A E 454

A E 456 Solar Energy Building System Design (3) Solar radiation, collectors, and thermal storage; design and analysis of a heating system using system-simulation computer program.

Effective: Summer 1984

Prerequisite: seventh-semester standing in Engineering

- A E 457 HVAC Control Systems (3)** Theory of automatic control. HVAC control applications. Control system components, control loops, development and documentation of control logic, control commissioning.
Effective: Summer 2006
Prerequisite: A E 454
- A E 458 Advanced Architectural Acoustics and Noise Control (3)** Advanced consideration of noise control in buildings; ventilating system noise and vibration; acoustic design variables.
Effective: Fall 1983
Prerequisite: A E 309
- A E 461 Architectural Illumination Systems & Design (3)** Lighting units & photometry; lighting equipment; design criteria, calculation methods; the design process; energy codes.
Effective: Fall 2005
Prerequisite: A E 311
- A E 464 Advanced Architectural Illumination Systems & Design (3)** Flux transfer theory; advanced lighting and control systems; emergency lighting; daylighting; visual performance issues; psychological aspects of lighting.
Effective: Fall 2005
Prerequisite: A E 461
- A E 466 Computer Aided Lighting Design (3)** Design and analysis for outdoor area; floodlighting; and interior applications, including design criteria; economic analysis; modeling algorithms; and visualization.
Effective: Fall 2005
Prerequisite: A E 444, A E 461
- A E 467 Advanced Building Electrical System Design (3)** Design of electrical systems for commercial and industrial facilities emphasizing design practice and integration with codes and standards.
Effective: Spring 2008
Prerequisite: A E 311, E E 211
- A E 470 Residential Building Design and Construction (3)** Managerial aspects; architectural and code considerations; cost estimating, design, and construction of structural, plumbing, HVAC, and electrical systems.
Effective: Spring 1989
Prerequisite: A E 372 or C E 331 ; seventh-semester standing in Architectural Engineering or Civil Engineering
- A E 472 Building Construction Planning and Management (3)** Construction organization and contracts; preconstruction services; estimating; scheduling; cash flow; site planning and preparation; building construction sequences; construction business presentations; value engineering.
Effective: Fall 2005
Prerequisite: seventh-semester standing in Architectural Engineering
- A E 473 Building Construction Management and Control (3)** Building construction project planning; construction cost, schedule, quality and safety control systems; project cost accounting; change management; construction company management.
Effective: Fall 2005
Prerequisite: A E 472
- A E 474 Building Construction Estimating (3)** Construction estimating and cost engineering fundamentals; quantity take off; pricing, bid preparation; estimating, cost accounting by computer.
Effective: Spring 2001
Prerequisite: A E 372
- A E 475 Building Construction Engineering I (3)** Project planning, supervision, inspection of architectural and structural operations in major buildings; mobilization, coordination of trades; offsite testing and fabrication.
Effective: Fall 2001
Prerequisite: A E 401 or A E 402
- A E 476 Building Construction Engineering II (3)** Construction of mechanical and electrical systems in major buildings; fire protection, sound control, elevating; trade coordination; manufacturers' developments; computer application.
Effective: Fall 1983
Prerequisite: A E 309, A E 475
- A E 481W Comprehensive Architectural Engineering Senior Project I (4)** Building project selection and preparation of overall plan; preliminary investigation of building design and construction issues; creation of individual Capstone Project Electronic Portfolio (CPEP) and project proposal required.
Effective: Fall 2005
Prerequisite: ARCH 441 fifth-year architectural engineering standing in major area of emphasis
- A E 482 Comprehensive Architectural Engineering Senior Project II (4)** Continuation of A E 481W. Engineering analysis of building systems; emphasis on analysis and design of building structural, mechanical, lighting/electrical, and construction related systems. Final written report, web-based project portfolio and verbal presentation are required.
Effective: Fall 2005
Prerequisite: A E 481W
- A E 486 Professional Engineering Practice (3)** A study of the influences which affect the practice of architectural engineering, particularly codes, ethics, legal considerations, and contract documents.
Effective: Fall 1983
Prerequisite: seventh-semester standing
- A E 496 Independent Studies (1-18)** Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

A E 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

A E 497D **Daylight Analysis of Roman Architecture** (3) Developing models of the time dependent loads on building system on the basis of fundamental conservation of energy and heat transfer relationships; energy utilization modeling skills that allow alternative building system designs to be explored.

Effective: Summer 2011 Ending: Summer 2011

A E 497F **Daylight Analysis of Roman Architecture** (3) Analysis of Roman architecture from the perspective of daylight. Topics include: solar geometry; bldg orientation & form; daylight design methods; characterization of interior & exterior lighting conditions. Offered on location in Rome.

Effective: Summer 2011 Ending: Summer 2011

A E 497F **Load/Energy Simulation** (3) Developing models of the time dependent loads on building system on the basis of fundamental conservation of energy and heat transfer relationships; energy utilization modeling skills that allow alternative building system designs to be explored.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

A E 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

A E 498B **AIHI Sustainable Housing Solutions** (0-1) Affordable sustainable housing in the applied context of American indian reservations. Includes a two-week summer experience in Montana. For students of 5th semester standing or higher.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: A E 498A

A E 498D **Photovoltaic Systems Design and Construction** (3) Design and construction requirements of residential and commercial scale photovoltaic systems.

Effective: Summer 2011 Ending: Summer 2011

A E 520 **Room and Building Acoustics** (4) Sound propagation in enclosures. Transmission through partitions. Design of spaces for optimum listening and industrial buildings for low noise.

Effective: Fall 1989

Prerequisite: A E 458, ACS 402

A E 530 **Computer Modeling of Building Structures** (3) Theory and application of structural analysis using the direct stiffness method. Modeling assumptions, validation, interpretation of computer output.

Effective: Summer 2011

Prerequisite: A E 401, A E 402 and A E 430

A E 534 **Analysis and Design of Steel Connections** (3) Connection analysis and design for steel buildings with an emphasis on the AISC Specification.

Effective: Summer 2005

Prerequisite: A E 401 and A E 430

A E 536 **Stability of Building Structures** (3) Elastic and inelastic buckling of beams, beam-columns, frames; applications to design of multi-story buildings.

Effective: Spring 1999

Prerequisite: A E 403 or C E 545

A E 537 **Building Performance Failures and Forensic Techniques** (3) This course provides a background in identification, evaluation, and analysis of a broad set of architectural and structural performance failures.

Effective: Summer 1999

Prerequisite: A E 401, A E 402, A E 430

A E 538 **Earthquake Resistant Design of Buildings** (3) Introductory engineering seismology, basic principles of structural dynamics, application of earthquake design provisions of model building codes to design of buildings.

Effective: Spring 2005

Prerequisite: A E 403, A E 430, A E 431

A E 541 **Computer Integrated Construction** (3) Design/development of information systems to support facility management, design construction, operations; information architectures, product/process models, advanced computer tools.

Effective: Spring 1994

Prerequisite: A E 570

A E 542 (C E 542) **Building Enclosure Science and Design** (3) The building enclosure: nature, importance, loadings; building science: control of heat, moisture, air, hygrothermal analysis; design: walls, windows, roofs, joints.

Effective: Summer 2002

A E 545 Architectural Engineering Seminar (1-6) Current literature and special problems in architectural engineering; presentation of technical papers.
Effective: Winter 1978

A E 551 Combined Heat and Power System Design for Buildings (3) Thermodynamic and thermo-economic analyses methods for determination of optimal, on-site, total energy systems for commercial buildings.
Effective: Fall 2008
Prerequisite: A E 454; A E 557 or A E 558

A E 552 Air Quality in Buildings (3) Indoor air pollutants, their sources and health effects; transport of pollutants; modelling of pollutant concentration in buildings.
Effective: Fall 2007
Prerequisite: A E 454, A E 455, M E 410

A E 553 Building Energy Analysis (3) Fundamentals of building energy dynamics and the simulation of energy flows in a building; validation of programs; practical applications.
Effective: Fall 2007
Prerequisite: A E 454, A E 455 and M E 410

A E 554 Building Thermal Systems Design and Optimization (3) A study of building thermal comfort systems emphasizing analytical peak and off-peak design performance modeling, simulation, optimization and economics.
Effective: Fall 1989
Prerequisite: A E 454

A E 555 Building Automation and Control Systems (3) Advanced techniques in the theoretical analysis and practical design of the automatic comfort controls used in building thermal systems.
Effective: Fall 1989 Ending: Summer 2011
Prerequisite: A E 554

A E 555 Building Automation and Control Systems (3) Advanced techniques in the theoretical analysis and practical design of the automatic comfort controls used in building thermal systems.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: A E 457

A E 556 Solar Engineering of Thermal Processes (3) Advanced quantitative methods of predicting transient active and passive solar process performance with an emphasis on building solar applications.
Effective: Fall 2007
Prerequisite: M E 410

A E 557 Centralized Cooling Production and Distribution Systems (3) Central cooling plant and distribution components and systems; thermal, hydraulic, and economic modeling for planning and design.
Effective: Fall 2007
Prerequisite: A E 454 ; or M E 411, M E 410

A E 558 Centralized Heating Production and Distribution Systems (3) Description and analysis of central heating plant and distribution components and systems; thermal and economic modeling for planning and design.
Effective: Fall 2007
Prerequisite: A E 454 ; or M E 411 and M E 410

A E 559 Computational Fluid Dynamics in Building Design (3) Theory and applications of building environmental modeling with Computational Fluid Dynamics (CFD).
Effective: Fall 2007
Prerequisite: A E 454, M E 410

A E 561 Science of Light Sources (3) In-depth scientific principles of light generation in modern electric light sources, and the resultant characteristics that influence their use for buildings.
Effective: Spring 1999
Prerequisite: A E 461

A E 562 Luminous Flux Transfer (3) Radiative transfer applied to lighting analysis; methods for computing direct and interreflected illumination; nearfield photometry.
Effective: Spring 2008
Prerequisite: A E 461, CMPSC 201 or CMPSC 202

A E 563 Luminaire Optics (3) Optical design of reflectors and refractors for lighting systems; manufacturing methods.
Effective: Spring 1999
Prerequisite: A E 464

A E 564 Lighting Design for Visual Appearance (3) Color; the impact of light on materials, architectural spaces, and human perception.
Effective: Summer 2007
Prerequisite: A E 461

A E 565 Daylighting (3) Design concepts, solar position, sky luminance distribution models, integration of daylighting and electric lighting controls, physical modeling, computer analysis techniques.
Effective: Fall 1996
Prerequisite: A E 461

A E 569 Research Topics in Illumination Engineering (3) Seminar on prior and current research in illumination engineering which define current recommendations and design practice.

Effective: Spring 1999

Prerequisite: or concurrent: A E 461

A E 570 Production Management in Construction (3) Applications of production management tools to capital facility projects; theory of production systems in construction; development of production control manual.

Effective: Fall 2007

Prerequisite: A E 475, A E 476 or C E 432

A E 571 International Construction Management and Planning (3) Evaluation of international project environments and participants, modeling and planning international projects.

Effective: Spring 2005

Prerequisite: A E 570

A E 572 Project Development and Delivery Planning (3) Methods employed by owners and developers to initiate capital facility projects; defining project objectives, constraints, participants, financing, and delivery methods.

Effective: Summer 2006

Prerequisite: A E 475, A E 476 or C E 432

A E 573 Strategic Management in Construction (3) Analysis tools and principles for design of effective construction organizations' strategy and structure in various markets.

Effective: Spring 2002

Prerequisite: A E 372, A E 475

A E 580 Architecture Design, Structural, and Environmental Systems Integration (3) Structural and environmental systems consultation with appropriate faculty to review and determine proper technical responses for the undergraduate fifth- year project.

Effective: Spring 2005

Prerequisite: A E 424 Concurrent: ARCH 530

A E 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 1987

A E 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis.

Effective: Spring 1987

A E 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

A E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Spring 1987

A E 597B Historical Methods of Structural Analysis (3) Quantitative investigation of historical methods of structural analysis. Graphic statics, arch, dome, vault analysis, indexing methods for trusses, Clayeyron's method.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

A E 597G Building Information Modeling Execution Planning (3) This course will focus on the skills and information needed to create a building information modeling execution plan for a building construction project.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

A E 597K Research Methods in Architectural Engineering (3) The course covers different research methods such as literature review, experiment design, and use of laboratory instrumentation. In addition, writing and presentation skills would be systematically built through lectures and term project.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

A E 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Spring 2006

A E 598C Sustainable Construction Project Management (3) Theory, methods, and practices of high performance building design and construction.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

A E 598D Legal Aspects of Engineering and Construction (3) Basic legal doctrines, contractual relations between parties, analysis of construction contract clauses, contract performance, and professional practice problems.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

A E 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

A E 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Spring 1993

A E 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the professional at the Pennsylvania State University.
Effective: Summer 2006

A E 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Summer 2004

A E 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

A E 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Spring 1993

A E 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2008

Last Import from UCM: June 16, 2011 3:00 AM

Architectural Engineering Technology (AE T)

No courses for department code **AE T** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Architecture (ARCH)

ARCH 417 The Language of Boundaries in Architecture and the Landscape (3) This course examines the development and significance of boundaries in the construction of human space and time. Students who have taken other courses from Architecture Visual Arts, Geography, or Philosophy that treat some aspect of spatial perception, conception, construction, or visualization, or who have completed equivalent study independently, may enroll with the permission of the program.
Effective: Summer 2009

Prerequisite: Students should have taken at least one of the following courses: ARCH 210, ARCH 130A, ARCH 131S, LARCH 060, LARCH 065, GEOG 020 or INART 003 or permission of program

ARCH 431 Architectural Design V (6) Continuation of ARCH 331 and 332, with design and research in program option areas.

Effective: Spring 2007 Ending: Summer 2011

Prerequisite: ARCH 332 fourth-year standing in Architecture curriculum

ARCH 431 Architectural Design V (6) Continuation of ARCH 331 and 332, with design and research in program option areas.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: Students must earn a C or better in: ARCH 332 and A E 424

ARCH 431A (IL) Architectural Design V--Foreign Study (6) A studio offered in Rome, Italy, which emphasizes urban planning and architectural design in an urban context.

Effective: Summer 2008 Ending: Summer 2011

Prerequisite: ARCH 332

ARCH 431A (IL) Architectural Design V--Foreign Study (6) A studio offered in Rome, Italy, which emphasizes urban planning and architectural design in an urban context.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: Students must earn a C or better in: ARCH 332 and A E 424 Concurrent: ARCH 499B and ARCH 499C

ARCH 432 Architectural Design VI (6) A continuation of ARCH 431, this course explores in greater depth urban planning and architectural design in an urban context.

Effective: Spring 2009 Ending: Summer 2011

Prerequisite: ARCH 431

ARCH 432 Architectural Design VI (6) A continuation of ARCH 431, this course explores in greater depth urban planning and architectural design in an urban context.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: Students must earn a C or better in: ARCH 431 or ARCH 431A

ARCH 432A (IL) Architectural Design VI--Foreign Study (6) A continuation of ARCH 431, this course explores urban planning and architectural design in an urban context in Rome, Italy.

Effective: Summer 2008 Ending: Summer 2011

Prerequisite: ARCH 431

ARCH 432A (IL) Architectural Design VI--Foreign Study (6) A continuation of ARCH 431, this course explores urban planning and architectural design in an urban context in Rome, Italy.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: Students must earn a C or better in: ARCH 431 Concurrent: ARCH 499B and ARCH 499C

ARCH 441 Architectural Design Analysis (3) Studies in principles and elements of design; planning for human use; the relationship of space to physical and social environment. Architectural Engineering majors only.

Effective: Spring 2008

Prerequisite: ARCH 130A

ARCH 442 Architectural Design Analysis (3) Continuation of ARCH 441, with emphasis on functional relationship of space, form, structure, and building groups. Architectural Engineering majors only.

Effective: Spring 2008

Prerequisite: ARCH 441

ARCH 443 Architectural Design Analysis Inspection Trip (1) Faculty guided trip to metropolitan areas to investigate noteworthy architecture and building construction and to visit professional offices.

Effective: Spring 2001

Prerequisite: fourth-year architectural engineering majors first priority others by faculty approval

ARCH 451 Architectural Professional Practice (3) A study of architectural practice in today's society: education, registration, office practice, codes, standards, construction industry, contracts, and legal documents.

Effective: Spring 2001 Ending: Summer 2011

Prerequisite: seventh-semester standing in Architecture curriculum

ARCH 451 Architectural Professional Practice (3) A study of architectural practice in today's society: education, registration, office practice, codes, standards, construction industry, contracts, and legal documents.

Effective: Fall 2011 Future: Fall 2011

Concurrent: ARCH 491

ARCH 480 Technical Systems Integration (3) Presentations of buildings' analyses from a multiplicity of viewpoints: architectural, spacial, environmental, mechanical, construction assembly.

Effective: Summer 1994 Ending: Summer 2011

Prerequisite: fifth-year standing in the Architecture curriculum or approval by the instructor

ARCH 480 Technical Systems Integration (3) Presentations of buildings' analyses from a multiplicity of viewpoints: architectural, spacial, environmental, mechanical, construction assembly.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: Students must earn a C or better in:ARCH 491 andARCH 203 andARCH 204 andA E 422 andA E 424

Concurrent: ARCH 492

ARCH 481 Digital Design Media (3) Advanced course in digital modeling, rendering, animation and non-linear video for architectural investigations.

Effective: Summer 2006

Prerequisite: approval by instructor

ARCH 491 Architectural Design VII-Thesis (6) Problems in architectural planning and design; programming and/or implementation methodologies and applications for various environmental design scales.

Effective: Spring 2007 Ending: Summer 2011

Prerequisite: ARCH 431 orARCH 432, ARCH 499A faculty review fifth-year standing in the Architecture curriculum

ARCH 491 Architectural Design VII-Thesis (6) Problems in architectural planning and design; programming and/or implementation methodologies and applications for various environmental design scales.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: Students must earn a C or better in:ARCH 432 orARCH 432A andARCH 311W Concurrent: ARCH 451

ARCH 492 Architectural Design VIII-Thesis (6) Continuation of ARCH 491 with concentration and specialization options.

Effective: Spring 2007 Ending: Summer 2011

Prerequisite: ARCH 491 fifth-year standing in the Architecture curriculum

ARCH 492 Architectural Design VIII-Thesis (6) Continuation of ARCH 491 with concentration and specialization options.

Effective: Fall 2011 Ending: Spring 2012 Future: Fall 2011

Prerequisite: Students must earn a C or better in:ARCH 491 Concurrent: ARCH 480

ARCH 492H Architectural Design VIII-Thesis (6) Continuation of ARCH 491 with concentration and specialization options.

Effective: Summer 2012 Future: Summer 2012

Prerequisite: Students must earn a C or better in:ARCH 491 Concurrent: ARCH 480

ARCH 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Summer 2007 Ending: Summer 2011

Prerequisite: prior approval of proposed assignment by instructor

ARCH 495 Advanced Architectural and Related Design/Construction Work Experience II (1-3 per semester/maximum of 6) Supervised off-campus, nongroup instruction including field experiences, practica, or architectural and related design/construction work experience.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: Grade of C or higher in:ARCH 332 ; instructor approval of work experience proposal including employment agreement with an approved supervisor.

ARCH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1986

ARCH 496H Independent Study - Honors (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2011

ARCH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 1986

ARCH 497A Digital Fabrication (3) This course investigates both the conceptual and practical implications of digital fabrication technologies in the process of design.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ARCH 497B Green Post-Green-Environmental Thinking in the Twenty First Century (3) Focusing on the effects of the environmental movement in art, architecture, and landscape design.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ARCH 497C Environmentally Conscious Design (3) The course investigates design principles for environmentally responsible architecture utilizing computational energy and environmental simulation tools.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ARCH 498 Special Topics (1-15) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2001

ARCH 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2006

Prerequisite: seventh-semester standing

ARCH 499A (IL) **Foreign Study--Architectural Design VI** (6) Individual or group instruction conducted in a foreign country.

Effective: Spring 2007

Prerequisite: ARCH 332 fourth-year standing in the architecture curriculum

ARCH 499B (IL) **Architectural Analysis** (3) Comparative study of architectural elements and building types through on-site drawing, recording, measurement, sketching and decomposition activity.

Effective: Spring 2009 Ending: Summer 2011

Prerequisite: ARCH 210 Concurrent: ARCH 499A ARCH 499C

ARCH 499B (IL) **Architectural Analysis** (3) Comparative study of architectural elements and building types through on-site drawing, recording, measurement, sketching and decomposition activity.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: Students must earn a C or better in:ART H 201 andART H 202 Concurrent: ARCH 431A or ARCH 432A and ARCH 499C

ARCH 499C (IL) **Urban Studies Topics** (3) A presentation of the history of Rome through the medium of its maps and walking tours of the city.

Effective: Spring 2009 Ending: Summer 2011

Prerequisite: ARCH 210 Concurrent: ARCH 499A ARCH 499B

ARCH 499C (IL) **Urban Studies Topics** (3) A presentation of the history of Rome through the medium of its maps and walking tours of the city.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: Students must earn a C or better in:ART H 201 andART H 202 Concurrent: ARCH 431A or ARCH 432A and ARCH 499B

ARCH 499D (IL) **Architectural Design and Studio** (4) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: seventh-semester standing

ARCH 499E (IL) **Cartography** (2) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: seventh-semester standing

ARCH 511 **Theoretical Perspectives in Architecture** (3) The impact of rationalism and romanticism on contemporary developments and theoretical postures in architectural design.

Effective: Summer 1992

ARCH 512 **Critical Theory in Architecture** (6) Inquiry into paradigms of critical theory in architecture theory, practice, and teaching. Evaluation of central texts, methods, theories, and outcomes.

Effective: Summer 2010

Prerequisite: admission into Ph.D. Program in Architecture or permission of instructor

ARCH 514 **Applying Environment-Behavior Research to Architecture and Urban Design** (3) Application of environment-behavior research to the design and evaluation of architectural and urban settings.

Effective: Summer 1992

Prerequisite: 6 credits in psychology sociology or related behavioral science courses

ARCH 520 **Methods of Inquiry in Architecture and Urban Design** (3) Introduction to the methods of research and inquiry commonly used in architecture and urban design.

Effective: Summer 1992

ARCH 522 **Computation Methods in Architectural Design** (3) Inquiry into the process of integrating computers in architectural design based on science, rationality, and language paradigms in architectural computing.

Effective: Summer 1992

ARCH 536 **Design-Inquiry** (1-12) Integration of research with the designing of architectural and urban settings.

Effective: Fall 1995

Prerequisite: ARCH 520 and approval of advisor

ARCH 541 **Topics in Theory** (3) A series of presentations on the development of contemporary architectural theory.

Effective: Summer 2002

Prerequisite: ARCH 511

ARCH 542 **Topics in Community and Urban Design** (3) Community and urban design as an area of design inquiry and interdisciplinary practice.

Effective: Summer 2002

Prerequisite: graduate standing or consent of instructor

ARCH 543 **Topics in Digital Design** (3) Inquiry into digital design paradigms of architecture and related disciplines; exploration design principles and operations supported in digital/virtual design environments.

Effective: Summer 2002

Prerequisite: graduate standing or consent of instructor

ARCH 545 **Pedagogical Practices in Architectural Education** (3) Review and application of pedagogical topics in studio teaching. Comparative evaluation of accepted and experimental practices.

Effective: Summer 2010

ARCH 550 **Ethics in Architecture** (3) Ethics in Architecture focuses on the nature of human interactions with natural and artificial worlds.

Effective: Summer 2002

Prerequisite: graduate standing or consent of instructor

ARCH 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 1995

ARCH 591 **Architectural Research** (2-12) Guided research project.

Effective: Winter 1978

ARCH 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

ARCH 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Fall 1983

ARCH 599 **Foreign Studies** (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2006

ARCH 600 **Thesis Research** (1-15) No description.

Effective: Fall 1983

ARCH 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.

Effective: Summer 2007

ARCH 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1983

ARCH 897 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject.

Effective: Spring 2011

Last Import from UCM: June 16, 2011 3:00 AM

Army (ARMY)

GENERAL MILITARY SCIENCE COURSE (NO OBLIGATION)

ARMY 401 **Organizational Behaviors: Interrelationships of Directing Staffs and Staff Functions** (3) Leadership; command and staff functions; ethics and professionalism; military writing; leadership laboratory.

Effective: Fall 1992

Prerequisite: ARMY 302

ARMY 402 **Army Personnel Management and Logistics** (3) Leadership; army personnel management; logistics system; personnel counseling; military justice; Soviet military; personal affairs; training management; army life; leadership laboratory.

Effective: Fall 1992

Prerequisite: ARMY 302

ARMY 496 **Independent Studies** (1-9) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1988

Last Import from UCM: June 16, 2011 3:00 AM

Art (ART)

- ART 402 Portfolio Design and Professional Practices** (3) This course emphasizes the development of presentation skills for digital artists in audience/client interactions.
Effective: Summer 2010
Prerequisite: ART 302
- ART 405 Advanced Studio Art** (3 per semester/maximum of 9) Advanced work in drawing and painting, with an emphasis on individual development.
Effective: Spring 2008
Prerequisite: 6 credits of ART or A ED or graduate level status or permission of program
- ART 409 (ART H 409) Museum Studies** (3) An introduction to the professional activities that occur in art museums.
Effective: Summer 2004
Prerequisite: 6 credits of ART H ART and/or A ED
- ART 411 (US) Seminar in Contemporary Art** (3 per semester/maximum of 6) Trends in contemporary art investigated within the framework of studio visitations, museum tours, and through other related avenues of encounter.
Effective: Fall 2006
Prerequisite: ART 122Y, ART H 111, ART H 112 and enrollment in the ART BA ART BFA Art Education or Integrative Arts degree program.
- ART 413 Performance Art** (3) The development, production, and presentation of performance art works, and the study of performance art theory and history.
Effective: Spring 2000
Prerequisite: 4 credits of 300-level art or graduate level status or permission of instructor
- ART 415 Integrating Media: Convergence in Practice** (4 per semester/maximum of 12) A studio course concentrating on the integration of new media technologies in contemporary art practice.
Effective: Fall 2006
Prerequisite: ART 315
- ART 416 Advanced Web and Net Art: Multimedia Publishing** (4 per semester/maximum of 12) A studio course concentrating on multimedia online "net art" practice and Web publishing.
Effective: Spring 2008
Prerequisite: ART 203, ART 315 and 8 credits of 300-level new media
- ART 417 Metal Art/Technology III** (4 per semester/maximum of 12) Advanced exploration of current and emerging metal art technologies and processes as medium for conceptual, aesthetic, and functional artworks.
Effective: Spring 2005
Prerequisite: ART 317
- ART 419 Advanced New Media: Capstone** (4 per semester/maximum of 8) A new media and digital arts capstone course concentrating on the integration of art and technology in advanced thesis projects.
Effective: Summer 2007
Prerequisite: ART 315, ART 203 or ART 416 and 12 credits of 300/400-level new media senior or graduate standing
- ART 421 Drawing** (4 per semester/maximum of 12) Drawing for advanced students, with total emphasis on sustained individual approaches.
Effective: Summer 1992
Prerequisite: ART 320
- ART 422 Advanced Figure Drawing** (4 per semester/maximum of 8) Concentrated work in recording and understanding the human figure.
Effective: Fall 1998
Prerequisite: ART 220 8 credits of 300-level art courses
- ART 430 Advanced Sculpture** (4 per semester/maximum of 12) Advanced work in sculpture, with an emphasis on individual development.
Effective: Summer 1992
Prerequisite: ART 330, ART 331 12 credits of 300-level sculpture
- ART 431 Installation Art** (4) Study and production of original visual statements through installation work as an art form.
Effective: Spring 1998
Prerequisite: 4 credits of 300-level art or graduate level status
- ART 440 Advanced Printmaking** (4 per semester/maximum of 12) Individual projects in one or more of the printmaking processes. Emphasis is on developing a portfolio of prints.
Effective: Fall 1998
Prerequisite: 4 credits of 300-level printmaking courses 8 credits total of 300-level art courses
- ART 446 Artists Books** (4) Study and production of original visual statements through the book as an art form.
Effective: Spring 2009
Prerequisite: ART 110S, ART 111, ART H 111, ART H 112 and enrollment in the ART BA ART BFA Art Education or Integrative Arts degree program
- ART 447 Photo Based Printmaking** (4) Study and production of original visual statements through photographic based

printmaking as an art form.

Effective: Spring 2000

Prerequisite: ART 240 4 credits of 300-level Art courses or graduate level status

ART 450 Advanced Painting (4 per semester/maximum of 12) Development of the artist through a series of commitments; each semester serves as a contractual agreement along professional lines.

Effective: Summer 1992

Prerequisite: ART 350

ART 455 Advanced Painting Critique (4 per semester/maximum of 8) The painter in relation to his peers and his profession.

Effective: Fall 1983

Prerequisite: senior or graduate standing

ART 465 Individual Approaches I (3) An advance studio where students are expected to explore personal themes and individual concepts in their art work.

Effective: Spring 2007

Prerequisite: ART 165, ART 166, ART 265, ART 266, ART 365, ART 366

ART 466W Individual Approaches II (6) An advance studio/lecture addressing the preparation for potential employment and/or entrance into graduate studies.

Effective: Summer 2007

Prerequisite: ART 165, ART 166, ART 265, ART 266, ART 365, ART 366, ART 465

ART 468 The Intermediate Digital Medium (3) An advanced studio course using the computer as an artistic media.

Effective: Spring 2007

Prerequisite: ART 165, ART 166, ART 168

ART 469 Methods and Materials II (3 per semester/maximum of 9) A studio course that focuses on specific media or techniques reflecting varied faculty expertise.

Effective: Spring 2007

Prerequisite: ART 165, ART 166, ART 265, ART 269

ART 475 (US) (ART H 475) Contemporary Women Artists (3) An interdisciplinary course that investigates women artists who were integral to the production of contemporary art primarily in the Americas, Europe, and Asia.

Effective: Spring 2009

Prerequisite: fifth-semester standing ART H 111, ART H 112 and enrollment in the ART BA ART BFA Art Education or Integrative Arts degree program.

ART 476 (ART H 476) History and Theory of Digital Art (3) History and theories of contemporary digital art emphasizing humanistic approaches to technology.

Effective: Spring 2007

Prerequisite: ART H 100 or ART H 112 or ART H 307 or ART H 325 or ART H 326 or ART 211

ART 480 Advanced Ceramic Arts (4 per semester/maximum of 12) Individual exploration of ceramic materials and construction leading to graduate study or career development as a professional potter.

Effective: Summer 1992

Prerequisite: ART 380

ART 481 Ceramic Materials and Glaze Calculation (3) The study of raw materials and their use in formulating clays and glazes.

Effective: Fall 2006

Prerequisite: ART 280, ART H 111, ART H 112 and enrollment in the ART BA ART BFA Art Education or Integrative Arts degree program.

ART 490 View Camera Photography (4) Experience with diverse camera formats and applications; particular emphasis on view camera.

Effective: Summer 2002

Prerequisite: ART 390

ART 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Summer 1995

Prerequisite: prior approval of proposed assignment by instructor

ART 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

ART 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

ART 497A Art, Consciousness and Deep Ecology (3) Art reconnects and deepens our conscious and unconscious perception of our environment and ourselves. (ART, PSYCHOLOGY, BIOLOGY, INTEGRATIVE HEALTH).

Effective: Summer 2011 Ending: Summer 2011

ART 497A Design for Mobile Devices (3) Designing for smartphones, tablets, and small touchscreen devices for their use

in teaching and learning.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ART 497B Advanced Sculpture: The Body (4) Advanced work in creating representations of the human body and related objects as a means of sculptural expression.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ART 497C Advanced Metal Casting and Mold-making (4) Advanced development of technical and conceptual skills through metal casting and mold-making processes.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ART 497D Painting, Emotional Intelligence and Health (3) Why make art? Art is a powerful vehicle for empowering a person, revitalizing back to the web of living pulsing earth!.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ART 497E Landscape Mindscape Dreamtime (3) This course involves are process and seminar dialogue. How do we change wilderness by calling it landscape?

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ART 499 (IL) Foreign Studies--Art (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

ART 501 Art Research (2-6) Original study and practice in art relating to material, concept, or technique.

Effective: Winter 1978

ART 505 Graduate Seminar (2 per semester, maximum of 8) Seminar covering special topics at the graduate level, emphasizing interdisciplinary discourse including criticism and review of graduate work.

Effective: Summer 1999

ART 511 Issues in Contemporary Art (1-3 per semester, maximum of 6) A critical survey of issues in contemporary art.

Effective: Summer 1999

ART 515 New Media Art I (1-7 per semester/maximum of 14) Individual problems in new media arts practice leading to development of a body of work representative of the artist.

Effective: Spring 2008

ART 516 New Media Art II (1-7 per semester/maximum of 14) Individual problems in new media arts practice leading to development of a body of work representative of the artist.

Effective: Spring 2008

Prerequisite: ART 515

ART 517 Metal Art I (1-7 per semester/maximum of 14) Individual problems in metal arts leading to the development of a collection or body of work representative of the artist.

Effective: Spring 2000

ART 518 Metal Art II (1-7 per semester, maximum of 14) Individual problems in metal arts leading to the resolution of a collection or body of work representative of the artist.

Effective: Summer 1999

Prerequisite: ART 517

ART 530 Sculpture I (1-7 per semester/maximum of 14) Individual problems in sculpture leading to the development of a collection or body of work representative of the artist.

Effective: Spring 2000

ART 531 Sculpture II (1-7 per semester, maximum of 14) Individual problems in sculpture leading to the resolution of a collection or body of work representative of the artist.

Effective: Summer 1999

Prerequisite: ART 530

ART 545 Printmaking I (1-7 per semester/maximum of 14) Individual problems in printmaking leading to the development of a collection or body of work representative of the artist.

Effective: Spring 2000

ART 546 Printmaking II (1-7 per semester, maximum of 14) Individual problems in printmaking leading to the resolution of a collection or body of work representative of the artist.

Effective: Summer 1999

Prerequisite: ART 545

ART 550 Painting I (1-7 per semester/maximum of 14) Individual problems in painting leading to the development of a collection or body of work representative of the artist.
Effective: Spring 2000

ART 551 Painting II (1-7 per semester, maximum of 14) Individual problems in painting leading to the resolution of a collection or body of work representative of the artist.
Effective: Summer 1999
Prerequisite: ART 550

ART 570 Graphic Design I (1-7 per semester/maximum of 14) Individual projects in design with special emphasis on specialized topics of graphic design.
Effective: Spring 2000

ART 571 Graphic Design II (1-7 per semester, maximum of 14) Individual problems in design, with special emphasis on professional practice in the area of graphic design.
Effective: Summer 1999
Prerequisite: ART 570

ART 580 Ceramics I (1-7 per semester/maximum of 14) Individual problems in ceramics leading to the development of a collection or body of work representative of the artist.
Effective: Spring 2000

ART 581 Ceramics II (1-7 per semester, maximum of 14) Individual problems in ceramics leading to the resolution of a collection or body of work representative of the artist.
Effective: Summer 1999
Prerequisite: ART 580

ART 592 Photography I (1-7 per semester/maximum of 14) Individual problems in photography leading to the development of a body of specialized work representative of the artist.
Effective: Spring 2000
Prerequisite: 12 credits of ART 492

ART 593 Photography II (1-7 per semester, maximum of 14) Individual problems in photography leading to the resolution of a collection or body of work representative of the artist.
Effective: Summer 1999
Prerequisite: ART 592

ART 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1988

ART 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1999

ART 600 Thesis Research (1-15) No description.
Effective: Fall 1983

ART 602 Supervised Experience and College Teaching (1-3 per semester/maximum of 6) Supervised and graded teaching experience.
Effective: Spring 1990

ART 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Art Education (A ED)

A ED 401 Curricula, Pedagogy, and Assessment in Art Education (3) Preparation of curricula, pedagogical, and assessment strategies for elementary/secondary school and museum art education programs.

Effective: Summer 2002

Prerequisite: A ED 101S, A ED 201W, A ED 211, A ED 212, A ED 225, A ED 322, A ED 323

A ED 440 Cultural Institutions (3) Role of the educator and educational programming in museums and other cultural institutions.

Effective: Spring 2003

Prerequisite: ANTH 100 or 3 credits of Art History courses from department list; A ED 401

A ED 488 Cultural Institutions Practicum (1-3) Supervised field experience in a museum or other cultural institution, including planning, implementation, and evaluation of an educational project.

Effective: Summer 2002

Prerequisite: ANTH 100 or 3 credits of art history courses from department list; A ED 401 Concurrent: A ED 490

A ED 489 Advanced Practicum (3) Supervised observation, unit planning, and teaching in Saturday Morning Arts School: analysis of creative expressions and art programs for learners.

Effective: Spring 2003

Prerequisite: A ED 401 Concurrent: A ED 490

A ED 490 Capstone Course in Art Education (3) Synthesis of preservice art education coursework; introduction to professional practices and standards; completion of teaching and learning portfolio.

Effective: Spring 2009

Prerequisite: admission to Teacher Preparation Program and successful completion of all required courses in the major except Student Teaching or final internship. Prerequisite or concurrent: A ED 488 for majors in the Museums and Cultural Institutions option Concurrent: A ED 489 majors in the Schools option

A ED 494 Schools and Museums (3) Museum education: issues, theories of aesthetic education and practices in schools, museums, and community art centers.

Effective: Winter 1978

Prerequisite: 12 credits in art education art art history or education

A ED 494H Schools and Museums (3) Museum education: issues, theories of aesthetic education and practices in schools, museums, and community art centers.

Effective: Fall 2007

Prerequisite: 12 credits in art education art art history or education

A ED 495 Internship in Art Experiences (15) Comprehensive instruction in craft, health, cultural, museum, studio, gallery or social agency. Students supervised by University personnel and arts personnel.

Effective: Spring 1989

Prerequisite: A ED 440 ; seventh- or eighth-semester standing

A ED 495A Art Education Student Teaching Practicum (7) The elementary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools.

Effective: Summer 2006

Prerequisite: A ED 489 ; eighth- or ninth-semester standing Concurrent: A ED 495B

A ED 495B Art Education Student Teaching Practicum (8) The secondary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools.

Effective: Summer 2006

Prerequisite: A ED 489 ; eighth- or ninth-semester standing Concurrent: A ED 495A

A ED 495C Art Education Student Teaching Practicum (7) The elementary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools.

Effective: Summer 2006

Prerequisite: A ED 489 ; eighth- or ninth-semester standing; Concurrent: A ED 495D

A ED 495D Art Education Student Teaching Practicum (8) The secondary student teaching practicum fulfills requirements for Pennsylvania certification to teach Art in both elementary and secondary schools.

Effective: Summer 2006

Prerequisite: A ED 489 ; eighth- or ninth-semester standing Concurrent: A ED 495A

A ED 495E Internship in Museums and Cultural Institutions (15) Twelve week, full time supervised internship in education in museums or other cultural institutions.

Effective: Summer 2006

Prerequisite: A ED 440 seventh- or eighth-semester standing.

A ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

A ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

A ED 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2006

A ED 502 **Research in Art Education** (3) Examination of past and present research in art education, an introduction to general methods of research, and critical evaluation of research in art education.
Effective: Summer 1995

A ED 505 **Foundations of Art Education** (3) An examination of classic theories in art education and their relevance to current developments.
Effective: Summer 1987

A ED 536 **Curriculum Development in Art Education** (3) Factors affecting art curriculum decisions, analysis, selection, organization, preparation of curriculum. Evaluation and sources of art curriculum improvement and innovation.
Effective: Winter 1978
Prerequisite: 6 credits of methods

A ED 541 **Theories of Child Art** (3) Study of current theories of child art; application of recent psychological and anthropological theories to understanding child art.
Effective: Winter 1978
Prerequisite: A ED 486

A ED 570 **Artistic Creation and Theories of Knowing** (3) A thematically organized course that makes connections between art-making and art as a way of knowing and inquiry.
Effective: Spring 1995

A ED 588 **History of Art Education** (3) Historical development of philosophies in art education in the United States and abroad.
Effective: Winter 1978

A ED 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

A ED 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1995

A ED 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Fall 1995

A ED 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1995

A ED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1995

A ED 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

A ED 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

A ED 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching of undergraduate art education classes under the supervision of two members of the graduate faculty.
Effective: Fall 1983
Prerequisite: doctoral candidate status in Art Education and program head permission

A ED 603 **Foreign Academic Experience** (1-12) Foreign study and/or research approved by the graduate program for students enrolled in a foreign university constituting progress toward the degree.
Effective: Fall 2003

A ED 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

A ED 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

A ED 811 **New Media and Pedagogy** (3) Exploration of relationships between communication technologies and beliefs about the nature of knowledge and the nature of art.
Effective: Summer 2010

A ED 812 **Diversity, Visual Culture, and Pedagogy** (3) Diversity issues in museum and K-12 art education contexts.
Effective: Summer 2010

A ED 813 **Public Pedagogy** (3) Inquiry into the public pedagogy of contemporary visual culture for relevancy to museum and K-12 art education contexts.
Effective: Summer 2010

A ED 814 **Informal Learning** (3) Pedagogy and contexts for learning in museums and other cultural institutions.
Effective: Summer 2010

A ED 815 **Action Research in Art Education** (3) Develop a reflective process to improve strategies, practices, and knowledge of the environments within which art education is practiced.
Effective: Summer 2010

Last Import from UCM: June 16, 2011 3:00 AM

Art History (ART H)

ART H 401 (IL) **Greek Art and Architecture** (3-9) Developments in Greek art and architecture, tenth century B.C. to first century B.C.; emphasis on the importance of Greek sanctuaries.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 111, ART H 201 or ART H 311

ART H 402 (IL) **The Illuminated Manuscript** (3) Specific stylistic periods in manuscript painting from A.D. 500-1500 in Western Europe and Byzantium.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 111, ART H 302 or ART H 312

ART H 405 (US;IL) **Pioneers of Modern Architecture** (3 per semester/maximum of 6) Selected period or theme in the development of modern architecture during the nineteenth and/or early twentieth centuries.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 112, ART H 202 or ART H 307

ART H 409 (ART 409) **Museum Studies** (3) An introduction to the professional activities that occur in art museums.

Effective: Summer 2004

Prerequisite: 6 credits of ART H ART and/or A ED

ART H 410 **Taste and Criticism in Art** (3) History and literature of art criticism demonstrating the varied philosophic, cultural, iconographic, technical, and visual approaches.

Effective: Summer 1999

Prerequisite: 6 credits of art history

ART H 411 (IL) **Roman Art** (3-9) Roman sculpture and painting from Augustus to Constantine.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 111, ART H 201 or ART H 311

ART H 412 (IL) **The Gothic Cathedral** (3) Specific aspects of Romanesque and Gothic church architecture of western Europe, especially France and England, between 1000-1500.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 111, ART H 201, ART H 302 or ART H 312

ART H 414 (IL) **Italian Baroque Painting** (3) Survey of Italian Baroque painting from sixteenth-century proto-Baroque masters to painters of the late Baroque and Rococo periods.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 112 or ART H 304

ART H 415 (US) **The Skyscraper** (3) Origin and evolution of the skyscraper as seen against the background of cultural conditions and technological factors.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 112, ART H 202 or ART H 307

ART H 416 (US) **American Painting: 1876-1913** (3) Art in the United States between 1876 and 1913; emergence of an American art and transition to the modern styles.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 112 or ART H 307

ART H 420 (IL) **Russian Architecture** (3) Russian architecture from the first Orthodox churches of the late tenth century to the end of the Soviet Union.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 111, ART H 112, ART H 201 or ART H 202

ART H 422 (IL) **Studies in Medieval Sculpture** (3-9) Specific studies of western European sculpture, 300-1500, with attention to sources, styles, type, and iconography.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 111, ART H 201, ART H 302 or ART H 312

ART H 423 (IL) **Studies in Italian Renaissance Art** (3-9) Specific studies of Italian Renaissance art, including the work of artists such as Leonardo da Vinci, Michaelangelo, and Raphael.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 112, ART H 202 or ART H 303

ART H 424 (IL) **Masters of Northern Baroque Art** (3) Seventeenth-century painters in Flanders and Holland, including the works of artists such as Rubens, Rembrandt, and Vermeer.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 112 or ART H 314

ART H 426 (US;IL) **Iconoclasm: Powerful Images and their Destruction** (3) Iconoclasm: exploring the political, religious, and social motivations behind the destruction of powerful imagery throughout history.

Effective: Summer 2009

Prerequisite: 3 credits of Art History in any area

ART H 429 (IL) **Studies in Baroque Art** (3) Selected topics in the painting, sculpture, and architecture of seventeenth-century Italy, France, Flanders, Holland, and Spain.

Effective: Spring 2009

Prerequisite: 6 credits in art history (ART H)

Effective: Spring 2006

Prerequisite: ART H 100, ART H 112, ART H 305, ART H 307 or ART H 325

ART H 440 (IL) (ASIA 440) **Monuments of Asia** (3-9 per semester/maximum of 9) An exploration of major Asian sites and monuments through a focus on their historical and cultural significance.

Effective: Summer 2010

Prerequisite: ART H 100 or ART H 120 or ART H 315 or ART H 320 or ART H 330 or ART H 340

ART H 442 (IL) **Late Antique and Early Christian Art** (3) Survey of the architecture, painting, and minor arts of Christian society from the beginning to the mid-sixth century.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 111, ART H 201 or ART H 302

ART H 450 (US;IL) **The History of Photography** (3) The history of photography from 1839, with particular emphasis on the relationship with the plastic arts.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 112, ART H 305, ART H 307 or ART H 325

ART H 452 (IL) **Byzantine Art** (3) Monumental and minor arts of Byzantium and related areas from the reign of Justinian to the Turkish conquest of Constantinople.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 111, ART H 201 or ART H 302

ART H 454 (IL) **Spanish Baroque Art** (3) Survey of seventeenth-century Spanish painting and sculpture, with an emphasis on Velasquez, Murillo, Ribera, and Zurbaran.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 112 or ART H 304

ART H 456 (IL) **Renaissance and Baroque Palaces** (3) This course examines palace architecture and decoration in Italy, France, England, and Germany from 1450-1700.

Effective: Spring 2011

Prerequisite: ART H 100 or ART H 112 or ART H 202 or ART H 303 or ART H 304

ART H 458 (IL) **Baroque Capitals of Europe** (3) This course examines the architecture and urbanism of European capital cities from 1600-1800.

Effective: Spring 2010

Prerequisite: ART H 100 or ART H 112 or ART H 202 or ART H 304 or ART H 314

ART H 464 (IL) **French Baroque Painting** (3) Examination of seventeenth-century French painting, including Italian influences; the provincial, Classical, and official styles in France.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 112 or ART H 304

ART H 470 (US) **American Painting and Sculpture Since 1940** (3) Painting and sculpture in the United States from the origins of Abstract Expressionism through the present.

Effective: Spring 2006

Prerequisite: ART H 100, ART H 112, ART H 307 or ART H 325

ART H 475 (US) (ART 475) **Contemporary Women Artists** (3) An interdisciplinary course that investigates women artists who are integral to the production of contemporary art primarily in the Americas, Europe, and Asia.

Effective: Spring 2009

Prerequisite: Fifth semester standing ART H 111, ART H 112 and enrollment in the ART BA ART BFA Art Education or Integrative Arts degree program

ART H 476 (ART 476) **History and Theory of Digital Art** (3) History and theories of contemporary digital art emphasizing humanistic approaches to technology.

Effective: Spring 2007

Prerequisite: ART H 100 or ART H 112 or ART H 307 or ART H 325 or ART H 326 or ART 211

ART H 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

ART H 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

ART H 497A **Art and Archaeology of Ancient Africa** (3) Survey of historical art traditions of sub-Saharan Africa. Topics include rock-art, Djenne, Nok, Igbo Ukwu, Ife, Benin and Great Zimbabwe.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ART H 497A **Studies in Latin American Art** (3) Specific studies of the visual and material culture created in Latin America from the Pre-Columbian through the modern era.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ART H 497B **Ancient Villas: Egyptian, Greek, Roman** (3) Villas appear in 17thc BCE Mediterranean and continue in Roman Empire, revealing cultural change and rising self-importance of elite.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ART H 497C **Problems in Connoisseurship** (3) Examines the history and practice of connoisseurship in the museum, with a particular focus on prints and drawings.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ART H 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

ART H 499 (IL) **Foreign Study--Art History** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

ART H 511 **Seminar in Ancient Art** (3-12) Selected topics from the history of Greek and Roman art.
Effective: Fall 1983

ART H 512 **Seminar in Medieval Art** (3-12) Original research into problems dealing with the art of the Middle Ages.
Effective: Fall 1983

ART H 513 **Seminar in Renaissance Art** (3-12) Investigations in the area of Renaissance art, centering around major masters and monuments.
Effective: Winter 1978

ART H 514 **Seminar in Baroque Art** (3-12) Investigations in the area of baroque art, centering around major masters and monuments.
Effective: Winter 1978

ART H 515 **Seminar in Modern Art** (3-12) Lectures, readings, reports, and discussions in the field of modern art.
Effective: Winter 1978

ART H 517 **Seminar in Eighteenth-Century Art** (3-12) Investigation into themes and problems dealing with eighteenth-century art.
Effective: Winter 1978

ART H 520 **Seminar in Spanish Baroque Painting** (3-6) Specific problems in the history of seventeenth-century Spanish painting.
Effective: Winter 1978

ART H 522 **Seminar in Byzantine Art** (3-12) Specific iconographical and stylistic problems in Byzantine art and its relation to classical antiquity, the medieval West, and Islam.
Effective: Winter 1978

ART H 525 **Seminar in Modern Architecture** (3-12) Investigation into the works and problems of modern architecture as they relate to the culture of our times.
Effective: Winter 1978

ART H 542 **The Illustration of the Apocalypse** (3-6) Studies in the illustration of the Apocalypse, iconographical and stylistic, from the early Christian period through Durer.
Effective: Winter 1978

ART H 551 **Historiography of Art History** (1-6) The relationship between the definition of, and approach to, art-historical problems from Vasari to the present.
Effective: Winter 1978

ART H 552 **Problems in Connoisseurship** (3) A study of the problems of authenticating, attributing, and dating paintings and sculpture through internal evidence.
Effective: Winter 1978

ART H 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

ART H 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Spring 1987

ART H 597A **Seminar: Sacred Spaces in the Age of Exploration** (3) This seminar closely examines the spatial practices enacted in the American continents during the pre-Columbian and later colonial periods.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ART H 597A **Seminar: Primitivism** (3) Examines how fascinations with all things "Primitive" have shaped Western art, revealing more about the Western Imagination than the "Other".

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ART H 597B **Methods of Research** (3) Preparation of graduate students for professional careers in academia and museum work, involving creation of publishable articles and grant writing.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ART H 600 **Thesis Research** (1-15) No description.

Effective: Fall 1983

ART H 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Fall 1983

ART H 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience for teaching assistants in art history.

Effective: Fall 1983

ART H 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1983

ART H 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Arts and Architecture (A&A)

A&A 401 International Arts Minor Final Project (1-3) The final project required for the International Arts Minor.
Effective: Summer 2004

Prerequisite: A&A 100 and completion of at least 12 credits toward the International Arts Minor

A&A 410 Interdisciplinary Digital Studio Capstone I (4) Provides arts and design students an opportunity to conceptualize a digital arts and design undergraduate thesis.

Effective: Summer 2006

Prerequisite: A&A 310 Prerequisite or concurrent:ART H 476

A&A 411 Interdisciplinary Digital Studio Capstone II (4) Provides arts and design students an opportunity to implement a digital art and design undergraduate thesis.

Effective: Summer 2006

Prerequisite: A&A 410

A&A 494 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 1994

A&A 494H Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

A&A 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 2004

A&A 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 2004

A&A 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

Asian American Studi (AAS)

AAS 428 (US) (ENGL 428) **Asian American Literatures** (3 per semester/maximum of 6) A seminar on the literatures and cultures of Asian America, with attention to forms of geographic, historical, and ethnic diversity.
Effective: Summer 2010

Last Import from UCM: June 16, 2011 3:00 AM

Asian Studies (ASIA)

ASIA 401 **East Asian Studies** (3-6) An interdisciplinary, variable content, lecture-discussion course on the history, culture, politics, and international relations of China, Japan, and Korea.

Effective: Spring 2010

Prerequisite: 6 credits from courses in the East Asian Studies program

ASIA 404 (IL) (CMLIT 404) **Topics in Asian Literature** (3) Selected works from the major poetry, fiction, and drama of such countries as India, China, Japan.

Effective: Fall 2010

Prerequisite: 3 credits in literature or related field appropriate to this course

ASIA 405Y (IL) **Seminar in Asian Studies** (3-6 per semester/maximum of 6) An advanced, writing-focused seminar in Asian Studies.

Effective: Fall 2009

Prerequisite: ASIA 100

ASIA 440 (IL) (ART H 440) **Monuments of Asia** (3-9 per semester/maximum of 9) An exploration of major Asian sites and monuments through a focus on their historical and cultural significance.

Effective: Summer 2010

Prerequisite: ART H 100 or ART H 120 or ART H 315 or ART H 320 or ART H 330 or ART H 340

ASIA 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2010

ASIA 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2010

ASIA 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Spring 2010

ASIA 501 **Proseminar in Asian Studies I** (1-3) A seminar for graduate students in the Asian Studies dual-degree PhD programs.

Effective: Summer 2009

ASIA 502 **Proseminar in Asian Studies II** (1-3) Introduction to theories, methods, and disciplines of Asian Studies.

Effective: Fall 2009

ASIA 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2009

ASIA 595 **Internship** (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Summer 2009

ASIA 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2009

ASIA 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 2009

ASIA 599 **Foreign Studies** (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2009

ASIA 600 **Thesis Research** (1-15 per semester/maximum of 99) No description.

Effective: Summer 2009

Last Import from UCM: June 16, 2011 3:00 AM

Astronomy and Astrophysics (ASTRO)

ASTRO 400H **Honors Seminar** (1 per semester, maximum of 2) Presentations of various branches and modes of modern astrophysical research, based on lectures, visits to telescopes and facilities, and discussions.

Effective: Spring 2003

Prerequisite: ASTRO 292

ASTRO 410 **Computational Astrophysics** (3) Applications of numerical methods and computer programming to astrophysics, including stellar physics and cosmology.

Effective: Spring 2008

Prerequisite: CMPSC 201 or CMPSC 121; PHYS 212, PHYS 213 and PHYS 214

ASTRO 414 **Stellar Structure and Evolution** (3) Theory of Stellar structure and evolution including energy generation and transport and an examination of stellar models.

Effective: Summer 2010

Prerequisite: ASTRO 292, MATH 230, PHYS 212, PHYS 213, PHYS 214, PHYS 237

ASTRO 420W **Planets and Planetary System Formation** (3) Solar system properties, star formation, protoplanetary disks and planet formation, solar system model, extrasolar planets, and astrobiology.

Effective: Summer 2004

Prerequisite: ASTRO 292

ASTRO 440 **Introduction to Astrophysics** (3) Theoretical investigation of physical processes in astronomical objects and systems; modern physical interpretation of astronomical phenomena.

Effective: Spring 1994

Prerequisite: MATH 230, PHYS 237

ASTRO 451 **Astronomical Techniques** (3) Practical methods of modern observational astronomy, detectors, filters, instrumentation for both ground-based and space observations, and data analysis.

Effective: Fall 2008

Prerequisite: PHYS 212, PHYS 213, PHYS 214

ASTRO 475W **Stars and Galaxies** (3) Astronomical studies concerning the distribution and evolution of stars and gas in our and other galaxies.

Effective: Fall 1993

Prerequisite: ASTRO 292

ASTRO 480 **Nebulae, Galaxies, and Cosmology** (3) Emission-line spectroscopy, structure and evolution of galaxies, physics of galactic nuclei and quasars, observational cosmology.

Effective: Spring 2002

Prerequisite: ASTRO 292, PHYS 212, PHYS 213, PHYS 214

ASTRO 485 **Introduction to High-Energy Astronomy** (3) The study of black holes, neutron stars, white dwarfs, supernova remnants, and extragalactic objects through x-ray and gamma ray observations.

Effective: Spring 1994

Prerequisite: PHYS 237

ASTRO 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1991

ASTRO 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 1991

ASTRO 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

ASTRO 501 **Fundamental Astronomy** (3) Concepts, tools and techniques, and essential background in stellar, Galactic, extragalactic astronomy and cosmology.

Effective: Fall 2008

ASTRO 502 **Fundamental Astrophysics** (3) Fundamental tools and results of modern astrophysical theory. Gravitation; gas dynamics; radiation processes; radiative transfer; atomic structure and transitions.

Effective: Fall 2008

ASTRO 504 **Extragalactic Astronomy** (3) Properties and evolution of galaxies including their stellar, interstellar, black hole and Dark Matter components.

Effective: Fall 2008

Prerequisite: ASTRO 501, ASTRO 502

ASTRO 513 **Observational Techniques in Astronomy** (3) Theoretical and practical aspects of modern multiwavelength

observational astrophysics including detector physics, imaging techniques, spectroscopic techniques, and data analysis principles.

Effective: Spring 2008

Prerequisite: ASTRO 501, ASTRO 502

ASTRO 527 (PHYS 527) **Computational Physics and Astrophysics** (3) Introduction to numerical methods for modeling physical phenomena in condensed matter, atomic and high energy physics, gravitation, cosmology and astrophysics.

Effective: Fall 2008

ASTRO 530 **Stellar Atmospheres** (3) The structure, physics and observational manifestations of atmospheres of stars.

Effective: Fall 2008

Prerequisite: ASTRO 501, ASTRO 502

ASTRO 534 **Stellar Structure and Evolution** (3) Physics of stellar interiors, stellar structure, and evolutionary changes of stars from pre-main sequence through final states.

Effective: Fall 2008

Prerequisite: ASTRO 501, ASTRO 502

ASTRO 542 **Interstellar Medium and Star Formation** (3) Theory and observation of the interstellar medium of our Galaxy and the process of star and planet formation.

Effective: Fall 2008 Ending: Fall 2011

Prerequisite: ASTRO 501, ASTRO 502

ASTRO 542 **Interstellar Medium and Star Formation** (3) Theory and observation of the interstellar medium of our Galaxy and the process of star and planet formation.

Effective: Spring 2012 Future: Spring 2012

ASTRO 545 (PHYS 545) **Cosmology** (3) Modern cosmology of the early universe, including inflation, the cosmic microwave background, nucleosynthesis, dark matter and energy.

Effective: Spring 2009

ASTRO 550 **High Energy Astrophysics** (3) Theory and observations of X-rays, gamma-rays and other high energy radiation from Galactic and extragalactic sources.

Effective: Fall 2008

Prerequisite: ASTRO 501, ASTRO 502

ASTRO 585 **Topics in Astronomy and Astrophysics** (3) Advanced study of issues in planetary, stellar, galactic, extragalactic and theoretical astronomy and astrophysics.

Effective: Summer 2008

Prerequisite: ASTRO 501, ASTRO 502

ASTRO 589 **Seminar in Current Astronomical Research** (1) Contemporary issues in instrumental, observational and theoretical astronomy and astrophysics.

Effective: Summer 2008

Prerequisite: ASTRO 501, ASTRO 502

ASTRO 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 1991

ASTRO 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1991

ASTRO 597 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 1991

ASTRO 600 **Thesis Research** (1-15) No description.

Effective: Summer 1991

ASTRO 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Summer 1991

ASTRO 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description.

Effective: Summer 1991

ASTRO 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Summer 1991

ASTRO 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Summer 1991

ASTRO 801 **Planets, Stars, Galaxies, and the Universe** (3) Overview of the structure, formation, and evolution of planets, stars, galaxies, and the universe.

Effective: Summer 2008

ASTRO 897 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 2007

ASTRO 897A **Black Holes: Gravity's Fatal Attraction** (2) Workshop for educators grades 9-12 with a content area focus on the study of black holes.

Effective: Summer 2011 Ending: Summer 2011

ASTRO 897B **Engaging Students in Astronomy** (2) Workshop for educators grades 5-9 to learn the Starry Night software package with interactive sky simulator; computer and hands-on activities.

Effective: Summer 2011 Ending: Summer 2011

Last Import from UCM: June 16, 2011 3:00 AM

Behavioral Sciences (BE SC)

BE SC 407 Small Groups Counseling (3) Intensive survey of research and theory on behavior in small groups, with emphasis on interdependence, cooperation, and attitude change.

Effective: Spring 2001

Prerequisite: general psychology general sociology or general behavioral science

BE SC 408 Group Facilitation and Leadership Skills (3) Skill training in group facilitation and leadership based on analyses of roles and interpersonal dynamics plus differences among impact population.

Effective: Spring 2001

Prerequisite: general psychology general sociology or general behavioral science

BE SC 459 BASIC COUNSELING SKILLS (3) Behavioral, cognitive, and expressive methods of assessing and enhancing life-coping skills.

Effective: Spring 2001

Prerequisite: general psychology general sociology or general behavioral science

BE SC 461 Theories and Models of Counseling (3) A survey of the various methods of counseling as well as the theories behind them.

Effective: Spring 2001

Prerequisite: general psychology general sociology or general behavioral science

BE SC 464 (US) (WMNST 464) Feminine/Masculine (3) Study of sex role learning; investigating feminine/masculine labeling; implications for contemporary society.

Effective: Spring 2008

Prerequisite: general psychology or general sociology

BE SC 468 Industrial Psychology: Significant Issues (3) A survey of major sociopsychological issues involved in the study of worker behavior and the industrial organization.

Effective: Spring 2001

Prerequisite: general psychology general sociology or general behavioral science

BE SC 494 Senior Thesis (3-9) Problem formulation, literature search, research design, data collection, analysis of results, and final write-up of a substantial research project.

Effective: Spring 2001

Prerequisite: permission of program

BE SC 494H Senior Thesis (3-9) Problem formulation, literature search, research design, data collection, analysis of results, and final write-up of a substantial research project.

Effective: Fall 2007

Prerequisite: permission of program

BE SC 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 1983

BE SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Berks-Lehigh Valley (BKLV)

BKLV 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2001

BKLV 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

BKLV 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Fall 2001
Prerequisite: prior approval of proposed assignment by instructor

BKLV 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2001

BKLV 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2001

BKLV 497A **Introductory Spanish for Educators** (3) The objective of this introductory Spanish language and culture class is to help educators communicate effectively with their students and parents who are not fluent in English.
Effective: Summer 2011 Ending: Summer 2011

BKLV 497B **Spanish for Educators** (3) Building upon the foundations of Introductory Spanish for Educators, the objectives of the class will be to continue to help educators communicate effectively in Spanish with their students and parents who are not fluent in English.
Effective: Summer 2011 Ending: Summer 2011

BKLV 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2001

BKLV 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

Biobehavioral Health (BB H)

BB H 402 (IL) African Health & Development (3) Course will address African health and development strategies in the context of health promotion programs.

Effective: Summer 2010

Prerequisite: BB H 305

BB H 407 (IL) Global Health Equity (3) Health, social disparities, and equity in the global environment.

Effective: Summer 2010

BB H 410 Developmental and Health Genetics (3) Discussion of genetic influences on development and the interrelationships between genetics and health.

Effective: Spring 2008

Prerequisite: BIOL 133 orBIOL 222;STAT 200, STAT 220 orSTAT 250

BB H 411W Research and Applications in Biobehavioral Health (3) Research methods, multi-level analyses, and applications in biobehavioral health.

Effective: Spring 2011

Prerequisite: BB H 101, BB H 310, STAT 200

BB H 416 Health Promotion II: Planning, Implementation, and Evaluation (3) Planning, implementation, and evaluation of health promotion, prevention, and intervention programs; emphasizing evaluation.

Effective: Fall 2010

Prerequisite: BB H 310, BB H 316

BB H 417 Advanced Applications in Health Promotion (3) Advanced learning experience in health promotion applications in which students will actively participate in planning, implementing, evaluating health programs.

Effective: Spring 2000

Prerequisite: BB H 416

BB H 420 Developing Stress Management Programs (3) Planning, developing, and implementing strategies for stress management programs for health education professionals in school, community, and corporate settings.

Effective: Spring 1998

BB H 432 Biobehavioral Aspects of Stress (3) Comprehensive discussion on the mechanisms of stress-induced diseases.

Effective: Fall 2010

Prerequisite: BB H 101, BIOL 141, BB H 310 or equivalent

BB H 440 (US;IL) (H P A 440) Principles of Epidemiology (3) Theory of epidemiology and significant case studies; potential applications to health care.

Effective: Fall 2008

Prerequisite: BB H 101 orBIOL 110 orH P A 310;STAT 200 orSTAT 250

BB H 440U (US;IL) Principles of Epidemiology (3) Theory of epidemiology and significant case studies; potential applications to health care.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: BB H 101 orBIOL 110 orH P A 310;STAT 200 orSTAT 250

BB H 446 Human Sexuality as a Health Concern (3) Examination of human sexuality as a integral part of basic health education and health care for persons of all ages.

Effective: Fall 2001

Prerequisite: BB H 101

BB H 451 Pharmacological Influences on Health (3) Biological and behavioral aspects of therapeutic and recreational drug use and misuse, and their relationships to health.

Effective: Fall 2001

Prerequisite: BB H 101

BB H 452 (US) (NURS 452, WMNST 452) Women's Health Issues (3) Exploration of major health issues concerning women today, with an emphasis on social, cultural, and medical influences.

Effective: Summer 2005

Prerequisite: BB H 101, BIOL 141

BB H 458 (WMNST 458) Critical Issues in Reproduction (3) Examination and analysis of the new reproductive technologies from the standpoint of medical ethics, feminism, and sociocultural influences.

Effective: Spring 2007

Prerequisite: BIOL 141 orPSYCH 100

BB H 468 Neuroanatomical Bases for Disorders of Behavior and Health (3) An examination of the anatomical/cellular/molecular bases for human central nervous system disorders and their impacts on victims/families/caregivers.

Effective: Spring 2007

Prerequisite: BB H 368, BB H 469 orPSYCH 260

BB H 469 (BIOL 469) Neurobiology (3) Comprehensive examination of neuroanatomy and physiology designed to

integrate the principles of neurochemistry, neuroendocrinology and molecular biology.

Effective: Fall 1994

Prerequisite: BIOL 240W

BB H 470 (BIOL 470) Functional and Integrative Neuroscience (3) Neurobiological function in motivated behaviors, motor and sensory function, learning and memory, development, sexual differentiation, and pathology.

Effective: Summer 1995

Prerequisite: BIOL 469

BB H 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1995

BB H 494H Senior Honors Thesis (1-6) Independent study related to a student's interests directed by a faculty supervisor and culminating in the production of a thesis.

Effective: Summer 2005

Prerequisite: approval of honors thesis advisor

BB H 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 1995

BB H 496H Independent Honors Study in BB H (1-3 per semester/maximum of 6) For non-thesis independent study/research by Schreyer Honors College scholars.

Effective: Summer 2011

BB H 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 1995

BB H 497A Clinic Volunteer Training (2-3) This course will be offered as a CE course.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

BB H 497B Health Works (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

BB H 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2009

BB H 501 Biobehavioral Systems in Health and Development: Theory and Processes (3) Examination of theories and basic processes for understanding individuals as dynamic biobehavioral complex systems functioning through continual inter- actions.

Effective: Spring 2001

Prerequisite: graduate status

BB H 502 (PSY 502) Health: Biobehavioral Perspectives (3) Introduction to the role of psychology in maintaining health and in treating nonpsychiatric disorders.

Effective: Spring 1992

BB H 503 Biobehavioral Systems in Health and Development: Processes and Integration (3) Examination and integration of basic processes for understanding individuals as dynamic biobehavioral complex systems functioning through continual interactions.

Effective: Spring 2001

Prerequisite: or concurrent:BB H 501

BB H 504 Behavioral Health Intervention Strategies (3) Evaluation of intervention strategies from a biobehavioral health context. Theories of change processes as they pertain to health are analyzed.

Effective: Spring 1991

Prerequisite: BB H 502, BB H 503

BB H 505 Behavioral Health Research Strategies (3) Research strategies in behavioral health investigations are examined. Designs and data analytic models relevant to biobehavioral research are included.

Effective: Spring 1991

Prerequisite: coursework in research design and/or introductory statistics

BB H 521 Structural Equatino Modeling (3) Structural Equation Modeling with LISREL and Amos. Confirmatory factor analysis; regression and path analysis with manifest/latent variables; special applications.

Effective: Summer 2002

Prerequisite: HD FS 519, HD FS 526

BB H 551 World Health Promotion (3) Analysis of the various health problems that affect humans throughout the world; emphasis will be placed on personal health issues.

Effective: Spring 1998

BB H 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 1991

BB H 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis.

Effective: Spring 1991

BB H 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Spring 1991

BB H 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1991

BB H 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Spring 1991

BB H 597K (NUTR 597K, FD SC 597K) Food Addiction: Fact or Fiction? (3) Original literature using both human subjects and animal models relevant to the topic of food addiction will be discussed.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

BB H 600 THESIS RESEARCH (1-15) NO DESCRIPTION.

Effective: Spring 1991

BB H 601 PH.D. DISSERTATION FULL-TIME (0) NO DESCRIPTION.

Effective: Spring 1991

BB H 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING (1-3 PER SEMESTER, MAXIMUM OF 6) NO DESCRIPTION.

Effective: Spring 1991

BB H 610 Thesis Research Off-Campus (1-15) No description.

Effective: Spring 1991

BB H 611 PH.D. DISSERTATION PART-TIME (0) NO DESCRIPTION.

Effective: Spring 1991

Last Import from UCM: June 16, 2011 3:00 AM

Biochemistry and Molecular Biology (B M B)

B M B 400 Molecular Biology of the Gene (2-3) Biochemistry of genetic phenomena, including the structure, replication and dynamics of genes and chromosomes, their expression and regulation.

Effective: Fall 2008

Prerequisite: BIOL 222 orBIOL 322;BIOL 230W orB M B 251;CHEM 212

B M B 401 General Biochemistry (3) Principles of the structure and function of biological molecules, including carbohydrates, lipids, membranes, proteins, and enzymes. Students may not receive credit for both CHEM 476 and B M B 401.

Effective: Fall 2009

Prerequisite: CHEM 212;B M B 251 orBIOL 230

B M B 401H General Biochemistry (3) Principles of the structure and function of biological molecules, including carbohydrates, lipids, membranes, proteins, and enzymes. Students may not receive credit for both CHEM 476 and B M B 401H.

Effective: Fall 2009

Prerequisite: CHEM 212;B M B 251 orBIOL 230W

B M B 402 General Biochemistry (3) Comprehensive survey of the pathways and regulation of intermediary metabolism.

Effective: Fall 2007

Prerequisite: B M B 401 orCHEM 476

B M B 402H General Biochemistry (3) Comprehensive survey of the pathways and regulation of intermediary metabolism.

Effective: Summer 2005

Prerequisite: B M B 401H

B M B 403 Biochemistry Laboratory (1) An introduction to techniques of experimental biochemistry, illustrating principles covered in B M B 402.

Effective: Spring 2010

Prerequisite: or concurrent:B M B 402

B M B 406 Molecular Biology (3) A discussion of current aspects of cell molecular biology with a laboratory emphasizing current biotechnology techniques.

Effective: Fall 2007

Prerequisite: BIOL 222 orBIOL 322;BIOL 230W orB M B 251;CHEM 039

B M B 408 Laboratory Instructional Practice (1-2) Participation in the instruction of undergraduate laboratory courses, including classroom preparation; discussion of principles and objectives of each exercise.

Effective: Spring 1995

Prerequisite: 10 credits in biochemistry and molecular biology and permission of the department

B M B 411 Survey of Biochemistry and Molecular Biology Literature (1) An introduction to readings and oral presentations in biochemistry and molecular biology.

Effective: Spring 1995

Prerequisite: B M B 401;B M B 400 orB M B 402

B M B 428 Physical Chemistry with Biological Applications (3) Chemical thermodynamics and kinetics with applications to biological problems.

Effective: Summer 2007

Prerequisite: CHEM 203 orCHEM 212;PHYS 203 orPHYS 251 ; 3 credits in cell biology

B M B 430 (BIOL 430, ENT 430) Developmental Biology (3) Molecular and genetic analyses of mechanisms involved in differentiation and determination in biological systems.

Effective: Summer 1994

Prerequisite: BIOL 222;B M B 252 orBIOL 230

B M B 432 (MICRB 432, VB SC 432) Advanced Immunology: Signaling in the Immune System (3) The study of signaling pathways that regulate the immune response.

Effective: Fall 2007

Prerequisite: B M B 400, MICRB 410

B M B 433 (VB SC 433) Molecular and Cellular Toxicology (3) In-depth coverage of processes by which drugs/chemicals interact with biological systems and the experimental approaches used to study these interactions.

Effective: Fall 2007

Prerequisite: B M B 401

B M B 435 (MICRB 435, VB SC 435) Viral Pathogenesis (2) A study of the molecular, immunological and pathological aspects of viral diseases as well as laboratory methods of diagnosis.

Effective: Fall 2007

Prerequisite: MICRB 201;B M B 251 andB M B 252 orBIOL 110 andBIOL 230W

B M B 437 Physiological Biochemistry (2) Physiological aspects of biochemistry, with emphasis on mammalian metabolism, specialized tissue and fluid functions, detoxification mechanisms, energetics, and physiological interrelationships.

Effective: Spring 1995

Prerequisite: B M B 402

B M B 442 (MICRB 442) Laboratory in Proteins, Nucleic Acids, and Molecular Cloning (3) Laboratory in enzyme purifications and assay techniques; nucleic acid isolation and characterization, including plasmid preparation.

Effective: Spring 2009

Prerequisite: B M B 251, BIOL 230W or MICRB 201; CHEM 202 or CHEM 210 . Prerequisite or concurrent: B M B 211 or B M B 401

B M B 443W Laboratory in Protein Purification and Enzymology (3) Laboratory in protein isolation methodology, enzyme kinetics, and physico-chemical properties of proteins.

Effective: Spring 2009

Prerequisite: B M B 442, B M B 401

B M B 444 Laboratory in Carbohydrates and Lipids (1) Laboratory in the isolation, quantification, and characterization of carbohydrates and lipids.

Effective: Spring 2009

Prerequisite: B M B 442, B M B 401

B M B 445W Laboratory in Molecular Genetics I (2) Laboratory in molecular techniques in gene analysis and microbial genetics, emphasizing in vitro methodologies.

Effective: Spring 2009

Prerequisite: B M B 442, B M B 400, MICRB 202

B M B 446 Laboratory in Molecular Genetics II (1) Laboratory in gene analysis and microbial genetics, emphasizing in vivo methodologies.

Effective: Spring 2009

Prerequisite: B M B 442, B M B 400, MICRB 202

B M B 450 (MICRB 450) Microbial/Molecular Genetics (2) Genetic phenomena, with emphasis on molecular mechanisms: gene transfer, recombination, gene conversion, gene fusion, suppression, transposons.

Effective: Fall 2010

Prerequisite: BIOL 222 or BIOL 322, MICRB 201

B M B 460 (MICRB 460) Cell Growth and Differentiation (3) Mechanisms and regulation of protein trafficking, organelle biosynthesis, cell development, signaling and cell cycle control. Emphasizes experimental design and analysis.

Effective: Spring 2006

Prerequisite: B M B 252

B M B 464 Molecular Medicine (3) An exploration of the impact of advances in molecular biology on understanding disease mechanisms, medical diagnosis, and therapeutics.

Effective: Spring 1999

Prerequisite: B M B 251

B M B 465 Protein Structure and Function (3) A study of the relationship between structure and function of proteins; internet analysis to predict structure and function is included.

Effective: Fall 2007

Prerequisite: BIOL 230W

B M B 474 Analytical Biochemistry (3) Physical/chemical theory and techniques that emphasize purification and characterization of biological macromolecules, including proteins, lipids and nucleic acids.

Effective: Fall 2008

Prerequisite: Prerequisite or concurrent: B M B 428 or CHEM 450

B M B 480 (MICRB 480) Tumor Viruses and Oncogenes (3) Oncogenes, DNA and RNA tumor viruses, and relevant experimental techniques with emphasis on molecular basis of carcinogenesis and gene regulation.

Effective: Spring 2001

Prerequisite: or concurrent: MICRB 415, MICRB 435 or MICRB 460

B M B 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1995

B M B 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 1995

B M B 497B Functional Genomics (3) Exploration of biochemical, genetic and evolutionary approaches to comprehensive discovery of functional DNA segments in genomes, including genes and the DNA sequences needed for regulating their expression.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: basic understanding of molecular genetics biochemistry and cell biology such as BMB/MICRB 251 and 252 or equivalent.

B M B 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 1995

B M B 498A (MICRB 498A) Antibiotics: Development and Resistance (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

B M B 498A (MICRB 498A) Antibiotics: Development and Resistance (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

B M B 498B Cell Biology Methods (2) Advanced laboratory in the visualization and analysis of organelles, genetic mechanisms, and metabolic processes in eukaryotes.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: MICRB 202, MICRB 252, MICRB 442

B M B 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

Bioengineering (BIOE)

BIOE 401 Introduction to Bioengineering Research and Design (3) Challenges and constraints of bioengineering research and design. Emphasis on immunoresponse, tissue mechanics, biological transport phenomena, and biomaterials.
Effective: Spring 2007

Prerequisite: BIOE 201, BIOE 303 Concurrent: BIOE 404

BIOE 402 Biomedical Instrumentation and Measurements (3) Biomedical measurements, including consideration of techniques, equipment, and safety.

Effective: Spring 2008

Prerequisite: MATH 250 or MATH 251; BIOE 301 or E 210 or E 212 or PHYS 402

BIOE 403 Biomedical Instrumentation Laboratory (1) Biomedical measurements laboratory including measurement of biopotentials, experiments in medical imaging techniques, and use of cardiovascular and pulmonary system instrumentation.

Effective: Spring 2007

Prerequisite: Prerequisite or concurrent: BIOE 402

BIOE 404 Data Analysis and Experiment Design (1) Statistical measures of data, and selection of experiment sample size to meet criteria.

Effective: Summer 2006

Prerequisite: BIOE 302 Concurrent: BIOE 401

BIOE 406 Medical Imaging (3) Physical principles and clinical applications of medical imaging methods.

Effective: Summer 2000

Prerequisite: PHYS 212

BIOE 409 Biofluid Mechanics (3) The fundamental relations in fluid mechanics and their application to biofluids including steady/unsteady flows, diseased states, devices and biorheology.

Effective: Summer 2006

Prerequisite: MATH 230, MATH 251, BIOE 303

BIOE 410 Biomedical Applications of Microfluidics (3) Study of fluid mechanics at small length scales. Low Reynolds number flow, electrokinetic flows, bioseparations in microfluidic devices.

Effective: Fall 2007

Prerequisite: BIOE 303 or M E 320

BIOE 413 Bioengineering Transport Phenomena (3) An integrated study of the fundamentals of mass transport processes with emphasis on the analysis of physiological systems.

Effective: Summer 2007

Prerequisite: BIOE 303, BIOE 313 or CHEM 450

BIOE 419 Artificial Organs and Prosthetic Devices (3) Analysis of function and consideration of design concerns for biomedical implants, including prosthetic joints, electrical stimulators, and cardiovascular pumps.

Effective: Fall 2007

Prerequisite: MATH 250 or MATH 251 . Prerequisite or concurrent: BIOL 141 or BIOL 472

BIOE 423 Reaction Kinetics of Biological Systems (3) Chemical kinetics and reaction equilibria with applications to the analysis of physiological function and the design of synthetic organs.

Effective: Spring 2007

Prerequisite: BIOL 141, BIOE 313 or CH E 210 . Prerequisite or concurrent: BIOE 413 or CH E 302 and CH E 413

BIOE 440 Clinical Corelations (1) Engineering analysis applied to common disease states and therapies.

Effective: Summer 2000

Prerequisite: BIOE 402

BIOE 443 (MATSE 403) Biomedical Materials (3) Describe properties of materials and composites and their in vivo interactions.

Effective: Spring 2007

Prerequisite: MATSE 201

BIOE 444 (IL) (MATSE 404) Surfaces and the Biological Response to Materials (3) Focus is on special properties of surface as an important causative and mediating agent in the biological response to materials.

Effective: Summer 2007

Prerequisite: CHEM 111, CHEM 113

BIOE 445 Tissue Engineering: Concepts, Calculations and Applications (3) Introduction to interdisciplinary tissue engineering concepts, associated biochemical and biomechanical engineering calculations, and cardiovascular, musculoskeletal, and other tissue application examples.

Effective: Spring 2011

Prerequisite: BIOE 201, BIOE 303

BIOE 450W Bioengineering Senior Design (3) Application of engineering and physiological principles to design of artificial organs and life supportive devices.

Effective: Spring 2009

Prerequisite: BIOE 403, BIOE 440, ENGL 202C senior standing

BIOE 490 Colloquium (1) Technical presentations related to research and industry concerns, and by students doing senior projects.

Effective: Summer 2000

Prerequisite: or concurrent: BIOE 450W

BIOE 494H Honors Thesis (1-3) Independent study research and design, leading towards honors thesis.

Effective: Summer 2006 Ending: Fall 2011

Prerequisite: Permission of program.

BIOE 494H Honors Thesis (1-3 per semester/maximum of 3) Independent study research and design, leading towards honors thesis.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: Permission of program.

BIOE 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

BIOE 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

BIOE 497K Bioengineering Mechanics and Techniques Laboratory (3) Experimental laboratory that includes measurements related to biomechanical phenomena (e.g. tissue viscoelasticity and blood flow) and cellular growth.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: BIOE 201 and BIOE 303

BIOE 499 Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2008

BIOE 501 (CH E 501) Bioengineering Transport Phenomena (3) Application of the equations of mass, energy, and momentum conservation to physiological phenomena and to the design of artificial organs.

Effective: Summer 1990

BIOE 502 Introduction to Bioelectric Phenomena (3) Electric phenomena in nerve and muscle, membrane potentials, Hodgkin-Huxley equations, volume conductor problem, applications to electrocardiography, electroencephalography, plethysmography.

Effective: Winter 1978

BIOE 503 (CH E 503) Fluid Mechanics of Bioengineering Systems (3) Cardiovascular system and blood flow, non-Newtonian fluid description, vessel flows, unsteady flows and wave motion, windkessel theory, transmission line theory.

Effective: Summer 1990

BIOE 504 Physiological Systems Analysis (3) Application of systems theory, control theory, and analytic modeling strategies to the study of physiological systems.

Effective: Summer 1985

Prerequisite: BIOL 472, MATH 250

BIOE 505 Bioengineering Mechanics (3) Passive and active mechanical properties of tissues, rheological materials, models of muscle contraction, pulmonary mechanics, forces in muscular- skeletal system.

Effective: Winter 1978

BIOE 506 Medical Imaging (3) Medical diagnostic imaging techniques, including generation and detection of ultrasound, x-ray, and nuclear radiation; instrumentation and biological effects.

Effective: Fall 1983

Prerequisite: PHYS 202

BIOE 507 Biomedical Signal Processing (3) Data acquisition and digital signal processing, focusing on biomedical signal processing issues, including linear-phase filters, spectral analysis, and wavelets.

Effective: Spring 1999

Prerequisite: BIOE 401, BIOE 402, BIOL 041 or BIOL 472; MATH 250

BIOE 508 (MATSE 508) Biomedical Materials (3) Properties and methods of producing metallic, ceramic, and polymeric materials used for biomedical applications.

Effective: Spring 2003

BIOE 510 Biomedical Applications of Microelectromechanical Systems (BioMEMS) and Bionanotechnology (3)

Introduction to BioMEMS and Bionanotechnology. Topics include: electromechanical and chemical biosensors, microfluidics microscale separations, and surface patterning for cellular engineering.

Effective: Spring 2008

Prerequisite: E E 441, BIOE 201

BIOE 512 Cell and Molecular Bioengineering (3) Graduate level cell and molecular biology course for engineers emphasizing molecular mechanisms.
Effective: Summer 2004

BIOE 513 Bioengineering Laboratory Techniques (3) Laboratory techniques in cell molecular biology, protein biochemistry and cell culture with an emphasis on engineering analysis and quantification.
Effective: Summer 2008
Prerequisite: BIOE 512

BIOE 515 Cell Mechanics and Biophysics (3) Advanced topics and recent developments in cellular engineering; applications of engineering science to cell biology.
Effective: Spring 1997
Prerequisite: BIOE 505

BIOE 516 Ultrasonic Imaging (3) Advanced topics and recent developments in ultrasonic imaging.
Effective: Spring 1991
Prerequisite: BIOE 506

BIOE 517 (MATSE 507) Biomaterials Surface Science (3) Special properties of surfaces as an important causative and mediating agent in the biological response to materials.
Effective: Spring 2003

BIOE 519 Artificial Organs Design (3) Basic techniques and principles of a multidiscipline approach to artificial organs design.
Effective: Spring 1991

BIOE 520 Biophotonics (3) Physical and engineering underpinning of different modalities of laser microscopy and spectroscopy in biophysics, biomedical engineering, and life science applications.
Effective: Fall 2007
Prerequisite: BIOE 512

BIOE 536 Ultrasonic Transducer Arrays (3) Theory, design, fabrication and testing of ultrasonic transducer arrays.
Effective: Spring 2001
Prerequisite: BIOE 506 or BIOE 516

BIOE 552 (I E 552) Mechanics of the Musculoskeletal System (3) Structure and biomechanics of bone, cartilage, and skeletal muscle; dynamics and control of musculoskeletal system models.
Effective: Summer 1998
Prerequisite: Consent of program. Prerequisite or concurrent: BIOL 472

BIOE 553 (I E 553) Engineering of Human Work (3) Physics and physiology of humans at work; models of muscle strength, dynamic movements; neural control; physical work capacity; rest allocation.
Effective: Summer 1985
Prerequisite: BIOL 141 or BIOL 472

BIOE 576 Bioengineering of the Cardiovascular System (3) Experimental and analytical studies of network branching patterns, regional blood flow, rheology and mechanics of blood cells and vessels.
Effective: Summer 1991
Prerequisite: BIOL 472

BIOE 580 Bioengineering Internship (3-6) Supervised experience at The Milton S. Hershey Medical Center, including rotation through services and work on a minor project.
Effective: Fall 1983
Prerequisite: BIOE 402 ; 3 credits in bioengineering at the 500 level

BIOE 590 Bioengineering Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1991

BIOE 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

BIOE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

BIOE 597E Quantitative Microscopy (3) Underlying theory of brightfield and fluorescence microscopy, image processing, and biophotonics with applications to cellular and molecular biology, bioengineering and physiology.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

BIOE 597I Ethics in Biomedical Engineering (1) Discussions focused on issues related to medical device development and marketing, responsible conduct of research, and meeting oversight requirements by Institutional Review Boards for human studies and IACUC oversight of animal experiments.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

BIOE 597K Regenerative Medicine (3) Introduction to Regenerative Medicine, the integration of cell biology with biomaterials and engineering to develop strategies for regeneration of tissues.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: BIOE 445 and BIOE 512

BIOE 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.

Effective: Fall 2008

BIOE 600 Thesis Research (1-15) No description.

Effective: Fall 1983

BIOE 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 1983

BIOE 610 Thesis Research Off Campus (1-15) No description.

Effective: Fall 1983

BIOE 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Bioethics and Medical Humanities (BMH)

BMH 490 **Bioethics and Medical Humanities Capstone Course** (3) Students will integrate knowledge from their BMH minor through discussion and writing a paper on some aspect of medical humanities.

Effective: Summer 2005

Prerequisite: PHIL 132

Last Import from UCM: June 16, 2011 3:00 AM

Bioinformatics (BIIFM)

BIIFM 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2004

BIIFM 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2003

BIIFM 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2003

BIIFM 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2003

BIIFM 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2003

Last Import from UCM: June 16, 2011 3:00 AM

Biological Engineering (B E)

B E 461 Design of Fluid Power Systems (3) Hydraulic systems, hydrostatic transmissions, electro-hydraulic systems in application to agricultural production and processing systems.

Effective: Fall 2008

Prerequisite: B E 306 orM E 360;C E 360 orM E 320

B E 462 Design of Wood Structures (3) Structural properties of wood; design of wood structural elements; design of wood structural systems; design of post-frame buildings.

Effective: Fall 2008

Prerequisite: B E 303, A E 308 orC E 340

B E 465 Food and Biological Process Engineering (3) Reactor design, kinetics, fluid flow, thermal processes, and other topics applied to the design of systems for the food and biological process industry.

Effective: Fall 2008

Prerequisite: B E 302

B E 466W Biological Engineering Design (3) This course focuses on a industry sponsored design project offered in conjunction with the College of Engineering Learning Factory.

Effective: Summer 2010

Prerequisite: B E 391 ; senior level standing in B E

B E 467 Design of Stormwater and Erosion Control Facilities (3) Design of best management practices for stormwater management, erosion and sediment control as applied to the agriculture-urban interface.

Effective: Spring 2010

Prerequisite: B E 307 orC E 461

B E 468 Microbiological Engineering (3) Application of basic engineering principles and designs in biochemical and biological processes.

Effective: Fall 2008

Prerequisite: B E 308 orB M B 211 andMICRB 201;PHYS 211 orPHYS 250

B E 469W Optimization of Biological Production and Processing Systems (3) Engineering and biological principles combined with economics and mathematical techniques to evaluate and optimize biological production and processing systems.

Effective: Fall 2008

Prerequisite: B E 302 and one B E 460 level course

B E 475 Food Engineering Equipment Design (3) Engineering analysis and operation of pilot-plant equipment, i.e., spray, freeze and deep bed dryers, evaporators, freezing tunnels, distillation columns.

Effective: Fall 2008

Prerequisite: B E 465

B E 477 Land-Based Waste Disposal (3) Analysis, design, and management of land-based systems for recycling and disposal of municipal, industrial, and agricultural wastes.

Effective: Fall 2008

Prerequisite: B E 307 orC E 370 orA S M 327

B E 487 Watershed Modeling for Water Quality Design (3) Application of common watershed models used to investigate design alternatives for flow and quality effects.

Effective: Summer 2010

Prerequisite: B E 307 orC E 461

B E 494 Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.

Effective: Fall 2008

B E 494H Senior Honors Thesis (1-6) Senior honors thesis.

Effective: Fall 2008

Prerequisite: junior or senior status in the University Scholar's program

B E 495 Agricultural Engineering Internship (1-6) Independent study and supervised cooperative education experience related to the student's career objective.

Effective: Fall 2008

B E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2008

B E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2008

B E 497A Biomass Energy Systems (3) Discuss fundamental theories, applied technologies used in production and

conservation of biomass into fuels, power, heat and other valued products.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

B E 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Fall 2010

Last Import from UCM: June 16, 2011 3:00 AM

Biological Science (BI SC)

No courses for department code **BI SC** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Biology (BIOL)

BIOL 400 Teaching in Biology (1-3) This course will train biology teaching assistants to teach in the laboratory/ recitation setting with emphasis on critical thinking skills. Enrollment will be limited to students of at least fifth semester standing that have been accepted as teaching assistants for biology.

Effective: Fall 2006

Prerequisite: Enrollment will be limited to students of at least fifth semester standing who are or have been accepted as teaching assistants in a life science course.

BIOL 402W Biological Experimental Design (3) Discussion of experimental design, analysis and presentation, with a practicum providing for student design, analysis and presentation of biological experiments. Students may not take this course if they have taken BIOBD 350W.

Effective: Fall 2007

Prerequisite: at least two of the following three courses:BIOL 220W, BIOL 230W, BIOL 240W;STAT 250

BIOL 404 Cellular Mechanisms in Vertebrate Physiology (3) This course considers cellular mechanisms governing physiological aspects of vertebrate cell signaling and their adaptation to particular organismal functions.

Effective: Spring 2001

Prerequisite: B M B 251 orBIOL 230W

BIOL 405 Molecular Evolution (3) Introduction to concepts and techniques of analysis of molecular sequence data from an evolutionary point of view.

Effective: Fall 1994

Prerequisite: BIOL 222 orBIOL 230W

BIOL 406 Symbiosis (3) This course covers a variety of different types of symbiotic relationships between unicellular symbionts and plants, fungi, or animals.

Effective: Summer 1998

Prerequisite: BIOL 110;BIOL 220W, BIOL 230W orBIOL 240W

BIOL 407 Plant Developmental Anatomy (3) This course will examine the development of basic vascular plant anatomical structures including leaves, stems, roots, and flowers.

Effective: Fall 2005

Prerequisite: BIOL 240W

BIOL 408 Contributions of Women to the Biological Sciences: Past and Present (3) A study of the contributions that women scientists have made and continue to make in the biological sciences.

Effective: Spring 2005

Prerequisite: BIOL 220W, BIOL 230W orBIOL 240W

BIOL 409 Biology of Aging (3) Mechanisms of the aging process, with special reference to man. Unfavorable progressive changes in molecules, cells, systems, and organisms.

Effective: Summer 1984

Prerequisite: 6 credits in biology

BIOL 411 Medical Embryology (3) Develops an understanding of human reproductive physiology, embryological processes, their time frames, and the development of major human body systems. The course emphasizes clinical correlations and the medical consequences of developmental abnormalities.

Effective: Summer 1998

Prerequisite: 6 credits of biology

BIOL 412 Ecology of Infectious Diseases (3) This course examines how ecological processes impact upon the epidemiology of infectious diseases.

Effective: Fall 2004

Prerequisite: BIOL 220W orH P A 440

BIOL 413 Cell Signaling and Regulation (3) Introduction to the themes of cellular signaling and regulation through critical review of primary literature.

Effective: Spring 1998

Prerequisite: BIOL 240W

BIOL 414 Taxonomy of Seed Plants (3) Basic principles and procedures in the practice of angiosperm systematics.

Effective: Fall 1994

Prerequisite: BIOL 240W

BIOL 415 Ecotoxicology (3) Major concepts and controversies in the interdisciplinary field of ecological toxicology; toxicity analysis, remediation, and case studies of environmental pollution.

Effective: Spring 1995

Prerequisite: BIOL 110, BIOL 220W;FOR 308 orW F S 209

BIOL 416 Biology of Cancer (3) This course intends to illustrate biological basis of cancer development, and discusses aspects on prevention, detection, and treatment of cancer.

Effective: Spring 1999

Prerequisite: BIOL 222 orBIOL 230W

BIOL 417 Invertebrate Zoology (4) Function and form of major invertebrate phyla.

Effective: Fall 1994

Prerequisite: BIOL 110

BIOL 419 Ecological and Environmental Problem Solving (3) Overview of processes involved in solving environmental problems. Provides students with toolkit for understanding ecological and environmental problems.

Effective: Spring 2004

Prerequisite: BIOL 220W

BIOL 420 (GEO SC 420) Paleobotany (3) Classification, morphology, phylogeny, and stratigraphic occurrence of fossil plants; practicum includes field trips and study of paleobotanical techniques and specimens.

Effective: Spring 2005

Prerequisite: any 3 credit introductory course in historical geology or plant biology

BIOL 421 (VB SC 421) Comparative Anatomy of Vertebrates (4) The comparative anatomy of representative vertebrate animals discussed from a descriptive and an evolutionary viewpoint.

Effective: Spring 2008

Prerequisite: BIOL 240W

BIOL 422 Advanced Genetics (3) Chromosomal mechanism of heredity; cytoplasmic and polygenic inheritance, chemical genetics, genomics, and experimental evolution.

Effective: Fall 2010

Prerequisite: one genetics or genetic based course including BIOL 133, BIOL 222, BIOL 322 or BIOL 230W

BIOL 424 Seeds of Change: The Uses of Plants (3) Interdisciplinary approach to the biology, chemistry, history, and culture of the interactions between plants and people.

Effective: Spring 2009

Prerequisite: BIOL 110; BIOL 220W, BIOL 230W or BIOL 240W

BIOL 425 (PPATH 425) Biology of Fungi (4) A survey of the biological diversity of fungi, stressing evolution, ecology, disease, morphology, life histories, and importance to human affairs.

Effective: Spring 2002

Prerequisite: fifth-semester or graduate standing in a biological sciences major with six credits completed in the major

BIOL 426 Developmental Neurobiology (3) Overview of basic developmental processes as they apply to the central nervous system.

Effective: Spring 2004

Prerequisite: BIOL 141 or BIOL 240

BIOL 427 Evolution (3) Selected topics on the evolution of life.

Effective: Spring 1995

Prerequisite: BIOL 220W, BIOL 230W

BIOL 428 Population Genetics (3) Mathematical formulation of evolution by natural selection, genetic equilibrium under selection, mutation, migration, random drift.

Effective: Spring 2001

Prerequisite: BIOL 220W, STAT 250; MATH 111 or MATH 141

BIOL 429 Animal Behavior (3) Physiological mechanisms, ecological relevance, and adaptive significance of animal behavior.

Effective: Spring 1999

Prerequisite: BIOL 110, BIOL 220W

BIOL 430 (B M B 430, ENT 430) Developmental Biology (3) Molecular and genetic analyses of mechanisms involved in differentiation and determination in biological systems.

Effective: Summer 1994

Prerequisite: B M B 252 ; or BIOL 222, BIOL 230W

BIOL 432 Developmental Genetics (3) An advanced course in developmental biology, focusing on the use of genetics techniques to study fundamental questions of animal development.

Effective: Summer 1998

Prerequisite: BIOL 230W ; or B M B 251, B M B 252

BIOL 435 Ecology of Lakes and Streams (3) Physical, chemical, and biological characteristics of freshwater environments, with special emphasis on factors regulating productivity in freshwater ecosystems.

Effective: Fall 1994

Prerequisite: BIOL 220W

BIOL 436 Population Ecology and Global Climate Change (3) Ecological responses of individuals, populations, and communities to environmental variation, with emphasis on climate change.

Effective: Spring 2004

Prerequisite: BIOL 220

BIOL 437 Histology (4) Microscopic structure of the tissue of the animal body.

Effective: Fall 1994

Prerequisite: BIOL 230W

BIOL 438 Theoretical Population Ecology (3) Theoretical discussions of demographics, population and metapopulation growth models, life histories, and species interactions such as competition, predation, host-parasitoid relationships.

Effective: Fall 2007

Prerequisite: BIOL 220W, MATH 140, STAT 250

BIOL 439 Practical Bioinformatics (3) Practical aspects of retrieving and analyzing biological information residing in

common databases.

Effective: Spring 2004

Prerequisite: BIOL 230 or B M B 251

BIOL 441 Plant Physiology (3) Classical and current concepts in plant constituents, mineral nutrition, water relations, respiration, photosynthesis, photoperiodism, plant hormones, growth, and development.

Effective: Spring 1995

Prerequisite: BIOL 230W, BIOL 240W

BIOL 443 Evo-devo: Evolution of Developmental Mechanisms (3) How evolution of animals and plants can be traced to changes in the regulation and/or interactions of genes controlling development.

Effective: Spring 2004

Prerequisite: BIOL 240

BIOL 444 Field Ecology (3) This field course will explore the flora and fauna of the mid-Atlantic area.

Effective: Fall 2007

Prerequisite: BIOL 220W

BIOL 446 Physiological Ecology (3) The physiological abilities of plants and animals to adapt to their abiotic environment.

Effective: Fall 1994

Prerequisite: BIOL 220W, BIOL 240W

BIOL 448 Ecology of Plant Reproduction (3) Analysis of the ecology, evolution, and natural history of angiosperm reproduction, including pollination, fruit-set, dispersal, and relevant plant- animal interactions.

Effective: Fall 1994

Prerequisite: BIOL 220W

BIOL 450W Experimental Field Biology (3-5) A practical introduction to modern experimental techniques for ecological study of terrestrial, marine, and fresh water habitats.

Effective: Fall 2007

Prerequisite: BIOL 220W, BIOL 240W

BIOL 459 (BIOTC 459, HORT 459) Plant Tissue Culture and Biotechnology (3) Principles and techniques for the in vitro culture, propagation, and genetic manipulations of plant cells.

Effective: Fall 1999

Prerequisite: BIOL 230W ; or B M B 251, B M B 252

BIOL 460 (ANTH 460) Human Genetics (3) The human genome, its variation, origins, and relation to disease and other traits.

Effective: Fall 2007

Prerequisite: BIOL 230W or 3 credits in genetics

BIOL 460H (ANTH 460H) Human Genetics (4) Gene mapping in humans; molecular basis of genetic disease; genomic structure; immunogenetics; and genetic evidence for human evolutionary history.

Effective: Fall 2001

Prerequisite: 3 credits in genetics or ANTH 021 or BIOL 222 or BIOL 230W ; and 3 credits in statistics

BIOL 461 Contemporary Issues in Science and Medicine (3) Current/classical issues relating to health, research, agriculture, environment, and biotechnology. Active exploration of the impact of science on society.

Effective: Spring 2003

Prerequisite: A 400-level Biology course.

BIOL 463 General Ecology (3) Illustrates science of ecology, from individual, population, and community- level perspectives, discusses applications of this science to issues of conservation of biodiversity.

Effective: Spring 2002

Prerequisite: BIOL 220

BIOL 464 (ANTH 464) Sociobiology (3) The study of the adaptive function of social behavior, the comparative analysis of social organization, and the ecology of sociality.

Effective: Spring 1987

Prerequisite: 6 credits in biology or anthropology

BIOL 465 General Cytology (3) Structure and function of organelles of plant and animal cells, mitosis, meiosis, cytological techniques.

Effective: Fall 1988

Prerequisite: 12 credits in biology and/or molecular and cell biology

BIOL 469 (BB H 469) Neurobiology (3) Comprehensive examination of neuroanatomy and physiology designed to integrate the principles of neurochemistry, neuroendocrinology, and molecular biology.

Effective: Spring 1995

Prerequisite: BIOL 240W

BIOL 470 (BB H 470) Functional and Integrative Neurosciences (3) Neurobiological function in motivated behaviors, motor and sensory functions, learning and memory development, sexual differentiation, and pathology.

Effective: Summer 1995

Prerequisite: BIOL 469

BIOL 471 Molecular Neurobiology/Cell Biology Laboratory (3) Introduction to modern molecular and cellular methodologies. The course is designed to integrate the principles of molecular cell biology with neurochemistry and neuroendocrinology.

Effective: Summer 1995

Prerequisite: BIOL 469

BIOL 472 Mammalian Physiology (3) Mechanisms concerned with normal animal function, with special emphasis on humans.

Effective: Summer 2007

Prerequisite: BIOL 240W, CHEM 203

BIOL 473 Laboratory in Mammalian Physiology (2) Laboratory experiments demonstrating fundamentals in physiology.

Effective: Summer 1985

Prerequisite: or concurrent:BIOL 472

BIOL 474 (GEOSC 474) Astrobiology (3) In depth treatment of principles/concepts of biochemical evolution, the origin/evolution of life; evaluation of distribution of life in the universe.

Effective: Summer 2007

Prerequisite: BIOL 110, CHEM 110

BIOL 479 (AN SC 479) General Endocrinology (3) Endocrine mechanisms regulating the morphogenesis, homeostasis, and functional integration of animals.

Effective: Fall 2009

Prerequisite: BIOL 141 orBIOL 472

BIOL 482 Coastal Biology (3-4) Marine organisms, their interactions with each other, and their relationships with several coastal habitats.

Effective: Spring 2010

Prerequisite: BIOL 220W

BIOL 492 Senior Seminar in Biology (1) Discussion of selected topics from recent biological literature; reports on current research or internship experiences.

Effective: Fall 2007

Prerequisite: 18 credits in Biology; seventh-semester standing

BIOL 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2010

BIOL 495 Internship in Biology (3-12) Practical off-campus experience in Biology under the supervision of a professional and a faculty member.

Effective: Fall 2007

BIOL 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

BIOL 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

BIOL 497A Biology of RNA (3) Explores the biological functions that RNA plays in diverse organisms, including transcription, translation, virology, and RNA- interference.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

BIOL 497A Evolution of Infectious Diseases (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: BIOL 220W

BIOL 497B Biology of Reproduction (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: BIOL 240W

BIOL 497C Comparative Neuroanatomy (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

BIOL 497D Pathobiology (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: BIOL 230W, BIOL 240W 6th semester standing

BIOL 497E Evolution of the Vertebrates (3) Covers evolution of vertebrate animals, with emphasis on adaptation and convergence within and among living representatives of each group.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: BIOL 220W andBIOL 240W

BIOL 497F Cell Development and Cancer Biology (3) This is an embedded course to be taught both in spring (Univ. Park) and early summer (Beijing, China). It focuses on molecular, cellular and developmental basis of tumorigenesis.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

BIOL 498 (ENT 498) Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1993

BIOL 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

BIOL 499A (IL) Tropical Field Ecology (3) An intensive introduction to tropical biodiversity to be taught in Belize, Central America.
Effective: Summer 2005
Prerequisite: BIOL 220W

BIOL 501 Ecological Genetics (3) This course will integrate concepts from genetics and ecology, discussing actual data interpreting them in a theoretical context.
Effective: Summer 1991
Prerequisite: BIOL 427

BIOL 505 Statistical Methods in Evolutionary Genetics (3) Statistical methods that are used for analyzing and interpreting genetic data in molecular evolution will be discussed.
Effective: Spring 1994
Prerequisite: BIOL 222, STAT 250

BIOL 510 Molecular Basis of Plant Development (2) Critical examination of topics related to plant growth and differentiation with an emphasis on plant mutants and genetic engineering.
Effective: Spring 1994
Prerequisite: BIOL 441

BIOL 511 Advanced Plant Physiology (3) Physiology of plants, including uptake of water and minerals, translocations, mineral nutrition, energy relations, respiration, and catabolism.
Effective: Summer 2011

BIOL 512 Advanced Plant Physiology (3) Continuation of BIOL 511. Physiology of plants, including photosynthesis, synthesis of cellular constituents, growth and development.
Effective: Fall 1983
Prerequisite: BIOL 442

BIOL 513 Plant Cellular Signaling (3) Introduction to themes of plant signaling through critical review of primary literature.
Effective: Spring 1996

BIOL 514 Topics in Systematics and Evolution (2) Discussion of pertinent current literature in systematic biology and evolution.
Effective: Spring 1995

BIOL 515 (PLPHY 515) Modern Techniques and Concepts in Plant Cell Biology (2) An intensive introduction to concepts of plant cell biology and modern techniques used in this field.
Effective: Summer 1998
Prerequisite: introductory course in plant physiology

BIOL 516 (PLPHY 516) Modern Techniques and Concepts in Plant Molecular Biology (2) An intensive introduction to contemporary molecular biology methods as applied to the study of plants.
Effective: Summer 1998
Prerequisite: general biology and plant physiology at the undergraduate level

BIOL 518 Special Problems (1-6) Prosecution of an assigned problem under the guidance of a staff member. Throughout the year as arranged. By appointment.
Effective: Winter 1978

BIOL 519 Ecological and Environmental Problem Solving (4) Overview of processes involved in solving environmental problems. Provides students with toolkit for understanding ecological and environmental problems.
Effective: Spring 2005
Prerequisite: BIOL 220 or an introductory ecology course

BIOL 524 Seminar in Genetics (1 per semester) No description.
Effective: Fall 1983

BIOL 526 (GEOSC 526) Problems in Palynology (1-6) Individual research projects in various aspects of palynology, especially palynostratigraphy and paleoecological palynology.
Effective: Summer 2011

BIOL 542 (ENT 542, W F S 542) **Systematics** (3) Principles and methods of classification, phylogeny, and speciation; taxonomic techniques; analysis of species; causal interpretation of animal diversity.
Effective: Summer 1990

BIOL 544 **Advanced Physiological Ecology** (4) The physiological abilities of plants and animals to adapt to their abiotic environment.
Effective: Fall 1983

BIOL 545 **Ecosystem Dynamics** (3) Survey and discussion of recent literature on ecosystem structure and function.
Effective: Spring 1988
Prerequisite: BIOL 210

BIOL 546 **Ecology of Populations** (3) Ecological responses of organisms to environmental variables (food, etc.) that determine population behavior. Demography, competition, predation, and community principles.
Effective: Summer 1991

BIOL 550 **Classic Ecology** (1) This course intends to illustrate the historical developments in the science of ecology and how these developments have shaped the current study of ecology.
Effective: Spring 2003
Prerequisite: BIOL 563

BIOL 563 **General Ecology** (3) Illustrates the science of ecology, from an individual/population/community level perspective; discusses applications of this science to issues related to conservation of biodiversity.
Effective: Summer 2002
Prerequisite: introductory Biology

BIOL 571 (PHSIO 571) **Animal Physiology** (3) Mammalian cardiovascular, respiratory, renal, and gastrointestinal systems.
Effective: Summer 1985
Prerequisite: BIOL 472

BIOL 572 (PHSIO 572) **Animal Physiology** (3) Mammalian nervous, endocrine, metabolic, and reproductive systems.
Effective: Summer 1985
Prerequisite: BIOL 473

BIOL 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2005

BIOL 591 **Molecular Evolutionary Biology Seminar** (1) Continuing seminars in Molecular Evolutionary Biology consisting of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1995

BIOL 592 **Critical Evaluation of Literature in Biology** (1) Weekly readings and critiques of recent papers from primary literature are used to teach independent thinking and effective scientific communication.
Effective: Fall 2001
Prerequisite: Departmentally controlled

BIOL 593 (ANTH 593, ENT 593) **Tropical Field Studies (Organization for Tropical Studies)** (8) An intensive field course concentrating on field problems, experimental design, and data analysis in tropical habitats.
Effective: Summer 1993
Prerequisite: approval by the Committee on Tropical Studies

BIOL 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1994

BIOL 596A **Izembek Biodiversity Assessment** (9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

BIOL 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1990

BIOL 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2001

BIOL 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

BIOL 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

BIOL 602 **Supervised Experience in College Teaching** (1-3) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 1997

BIOL 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

BIOL 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

BIOL 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2007

1 BIOL 220W GN, 230W GN, and 240W GN each carry only 1 credit to "Writing"; all three courses must be taken to meet the W requirement.

Last Import from UCM: June 16, 2011 3:00 AM

Biomedical Engineering Technology (BE T)

No courses for department code **BE T** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Biotechnology (BIOTC)

BIOTC 416 (MICRB 416) **Microbial Biotechnology** (2) Fundamentals of applied biotechnology; the use of microorganisms in the synthesis of biologically-important and industrially-useful products.

Effective: Spring 2009

Prerequisite: MICRB 201, MICRB 202; B M B 442 or MICRB 442

BIOTC 459 (HORT 459, BIOL 459) **Plant Tissue Culture and Biotechnology** (3) Principles and techniques for the in vitro culture, propagation, and genetic manipulations of plant cells.

Effective: Spring 2003

Prerequisite: BIOL 230W ; or B M B 251, B M B 252

BIOTC 460 (AGRO 460) **Advances and Applications of Plant Biotechnology** (3) This course provides a comprehensive overview and current status of plant biotech research. The course provides knowledge of plant systems that fall in the category of GMOs.

Effective: Spring 2009

Prerequisite: BIOL 230W, B M B 251 or equivalent

BIOTC 479 **Methods in Biofermentations** (3) Bioprocessing principles and development; uses and operation of biofermentors; determination of biomass; problems of scale-up.

Effective: Spring 2009

Prerequisite: MICRB 201, MICRB 202; B M B 251, B M B 252, B M B 442

BIOTC 489 (V SC 489) **Animal Cell Culture Methods** (3) An overview of animal cell culture methodology and its practical application in bioprocess technology.

Effective: Spring 1996

Prerequisite: MICRB 201, MICRB 202; BIOL 230W or B M B 251

Last Import from UCM: June 16, 2011 3:00 AM

Business Administration (B A)

B A 411 Analyzing Business and Industry (3) Prepares students to read, interpret, and analyze financial statements effectively in order to evaluate business entities and their industries.

Effective: Summer 2003 Ending: Summer 2011

Prerequisite: ACCTG 211, B A 301, B A 302, B A 303, B A 304

B A 411 Analyzing Business and Industry (3) Prepares students to obtain an enterprise-wide view of business and industry by integrating operational and financial decisions in a team and learning environment.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: ACCTG 211;B A 301 orFIN 301;B A 302 orSCM 301;B A 303 orMKTG 301;B A 304 orMGMT 301

B A 412H Honors Integration and Research (2-3) The integration of the business core into a detailed financial, strategy and market analysis of actual companies selected by student teams.

Effective: Spring 2011

Prerequisite: ACCTG 211;FIN 301 orB A 301;SCM 301 orB A 302;MKTG 301 orB A 303;MGMT 301 orB A 304

B A 420 Planning for Internship, Collaborative Project, and Research in Business (1) Planning, preparation, and decision making for students enrolling in either B A 495A, 495B, or 495C courses in their final semester.

Effective: Summer 2002

Prerequisite: B A 321 and sixth-semester standing

B A 421 Project Management and Planning for Business (1-2) Planning and preparation for field experience internship, senior thesis, or group project supplemented with exercises in project management.

Effective: Spring 2003

Prerequisite: B A 322

B A 422W Strategic Business Planning (3) Presentations and discussion of contemporary business issues by students and visiting professionals; emphasis on effective business communications.

Effective: Spring 2008

Prerequisite: B A 421, MGMT 301, MKTG 301, FIN 301 . Prerequisite or concurrent:B A 495A, B A 495B orB A 495C

B A 427 Risk and Decisions (3) Conceptualizing decisions involving risk, analyzing choices, estimating the risk, and communicating the analysis.

Effective: Spring 2007

Prerequisite: MATH 110 orMATH 140 and eitherSCM 200 orSTAT 200

B A 454H Business Honors Thesis/Project (3) An opportunity to pursue an advanced research thesis or project to integrate studies within Business Administration.

Effective: Spring 2008

Prerequisite: HONOR 301 senior standing and permission of the program

B A 462 Business Strategy (3) Interpretation of business concept in the analysis of problems related to the successful management of a company, institution, or organization.

Effective: Spring 2008

Prerequisite: FIN 301, MGMT 301, MKTG 301

B A 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2008

B A 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2008

B A 495A Internship in Business (3-9) Guided professional practicum in business administration involving an internship with a business organization; practice of business skills in field setting.

Effective: Spring 2003

Prerequisite: B A 322, B A 420

B A 495B Collaborative Project in Business (3-9) Guided professional practicum in business administration involving a group project; application of business skills in collaborative setting.

Effective: Spring 2003

Prerequisite: B A 322, B A 420

B A 495C Undergraduate Research in Business (3-9) Guided student research in business administration; application of analytical or research techniques to business problems.

Effective: Spring 2003

Prerequisite: B A 322, B A 420

B A 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

B A 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

B A 499 (IL) Foreign Study--Business Administration (1-18) Study in selected countries of business institutions, functions, and current business problems.
Effective: Spring 2011
Prerequisite: ACCTG 211;ECON 102, ECON 104;SCM 200

B A 500 Marketing Management (1-3) An examination of the role of the market place in company management.
Effective: Fall 2008

B A 501 Management (2) Examination and application of concepts of human behavior and organization to managing people in work organizations.
Effective: Spring 2002

B A 502 Team Process and Performance (1-3) Development of managerial skills and techniques for diagnosing, intervening and leading effective teams.
Effective: Fall 2008

B A 503 Seminar in Public Utilities (3) No description.
Effective: Fall 1983

B A 504 Ethical Leadership (2) This course introduces students to their ethical responsibilities as business leaders.
Effective: Fall 2008
Prerequisite: B A 501, B A 502

B A 505 Negotiation Theory and Skills (1-3) Development of managerial skills for distributive and integrative negotiations at the two-party and team levels.
Effective: Summer 2010

B A 510 Supply Chain and Operations Management (1-3) Introduction to the organizational processes and methods used to create and deliver goods and services.
Effective: Fall 2008

B A 511 Financial Accounting (1-3) Basic concepts and principles (i.e. the jargon) underlying financial accounting practices.
Effective: Fall 2008

B A 512 Quantitative Analysis for Managerial Decision Making (2) Construction and use of quantitative methods in business decision-making.
Effective: Summer 1995

B A 513 (PHIL 513, PSY 513) Philosophy of Social Science (3) Study of major methodological, normative, and theoretical issues in the social sciences, emphasizing the development of positivism and critical alternatives.
Effective: Fall 2004

B A 515 Business Statistics for Contemporary Decision Making (2) Conceptual understanding of statistics through both numerical and applied approach.
Effective: Summer 2008

B A 517 Communication Skills for Management (1-3) Development of communication skills required for management; audience awareness, style, individual and group presentations.
Effective: Fall 1983
Prerequisite: admission to the Master of Business Administration program

B A 521 Introduction to Managerial Accounting (2) Cost accounting and the design of management accounting systems for planning and controlling operations, and for motivating personnel.
Effective: Fall 2001

B A 523 IT Strategy (2) An introduction to information technologies critical to business organizations.
Effective: Spring 2009

B A 528 Business Simulation (1-3) A team-based course during which students will manage a simulated firm.
Effective: Summer 2008

B A 531 Introduction to Finance (1-3) An examination of the techniques available to aid the financial manager in

decision making.
Effective: Fall 2008

B A 532 Global Business Environment (1) An introduction to worldwide economic trends and economic problems with an emphasis on how businesses cope with global business problems.
Effective: Summer 2008

B A 533 Economics for Managers (2) An introduction to the tools of economic decision making and a consideration of firm, industry, and global economic influences on economic decision making.
Effective: Spring 2002

B A 535 Global Perspectives (1) An overview of the global business environment.
Effective: Fall 2001

B A 536 Global Immersion (1-3) Exploration of the opportunities and the challenges of doing business in another economic region.
Effective: Spring 2011

B A 545 Business, Government and International Economics (2) Understand how macroeconomic events and policies affect the global economy and business decisions.
Effective: Summer 2008

B A 560 Enterprise Consulting (3) Student groups engaging in consulting relationships with enterprises through use of managerial techniques for identification, analysis, and solution of managerial problems.
Effective: Spring 1984
Prerequisite: ACCTG 511, Q B A 510 and B A 533, B A 555, MGMT 501, Q B A 511

B A 565 Strategic Leadership (1-3) Presents a senior executive perspective on key opportunities and challenges faced by business leaders.
Effective: Summer 2008

B A 571 Strategic Management (1-3) Analysis and application of concepts and techniques aimed at successfully developing and implementing competitive strategy in a complex business environment.
Effective: Fall 2008

B A 572 Introduction to Business Research (3) An introduction to issues involved in framing, defending, and evaluating business research programs.
Effective: Spring 2004
Prerequisite: admission to the doctoral program in Business Administration

B A 574 Business Research (1-3) A project paper, comparable in quality and scope of work to a graduate thesis, on problems of a company.
Effective: Winter 1978
Prerequisite: 15 credits of 400- and 500-level courses in business administration

B A 575 Capstone Business Case (4) A team-based project course that requires students to analyze an actual business problem from a firm or nonprofit organization.
Effective: Summer 2008

B A 578 Entrepreneurship (3) Study of the development or acquisition of a business appropriate to the objectives and resources of the individual entrepreneur.
Effective: Winter 1978

B A 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

B A 591 Applied Communications (1) Develop oral and written communication strategies to succeed in professional and academic contexts.
Effective: Spring 2010
Prerequisite: admission to the doctoral program in Business Administration

B A 595 Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2008

B A 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

B A 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

B A 597D Advanced Microeconomic Analysis (3) Topics in advanced microeconomic analysis including competitive analysis, game theory, and mechanism design.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

B A 599 (IL) Foreign Study--Business Administration (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite: acceptance in established exchange program

B A 600 Thesis Research (1-15) No description.
Effective: Fall 1983

B A 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

B A 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 1999

B A 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

B A 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Business Law (B LAW)

B LAW 424 (R EST 424) **Real Estate Law** (3) Analyze contemporary law applicable to various types of ownership interests and rights, methods of transferring ownership, and use of real property.
Effective: Spring 2005 Ending: Summer 2011
Prerequisite: B LAW 346

B LAW 424 (R EST 424) **Real Estate Law** (3) Analyze contemporary law applicable to various types of ownership interests and rights, methods of transferring ownership, and use of real property.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: B LAW 441

B LAW 424 (R M 424) **Real Estate Law** (3) Analyze contemporary law applicable to various types of ownership interests and rights, methods of transferring ownership, and use of real property.
Effective: Spring 2012 Future: Spring 2012
Prerequisite: B LAW 341 or B LAW 243

B LAW 425 (R EST 425) **Environmental Law, Property, and Commerce** (3) Examines the impacts of major federal environmental laws on business relations and property interests.
Effective: Summer 1995 Ending: Fall 2011
Prerequisite: B A 243, B LAW 243 or E R M 151

B LAW 425 (R M 425) **Business and Environmental Regulation** (3) Examines the interplay between environmental regulation and commercial activities, including property interests.
Effective: Spring 2012 Future: Spring 2012
Prerequisite: B LAW 341 or B LAW 243

B LAW 441 **Business Law II: Agency, Employment and Business Structure** (3) An examination of the laws governing agency relationships, employment, and the various structures of commercial enterprises.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: B LAW 341; FIN 301 or B A 301

B LAW 444 **Advanced UCC and Commercial Transactions** (3) All articles of the Uniform Commercial Code, banking relationships, debtor- creditor law, and bankruptcy law.
Effective: Spring 2005 Ending: Summer 2011
Prerequisite: B A 241 or B A 243 and ACCTG 211 and B A 301 or FIN 100

B LAW 444 **Advanced UCC and Commercial Transactions** (3) All articles of the Uniform Commercial Code, banking relationships, debtor- creditor law, and bankruptcy law.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: B LAW 341, B A 241 or B A 243; ACCTG 211 ; and FIN 301 or B A 301

B LAW 445 **Intellectual Property & Competition Law** (3) Copyrights, trademarks, patents, and trade secrets followed by related topics in the regulation of competition.
Effective: Spring 2005 Ending: Summer 2011
Prerequisite: B LAW 346

B LAW 445 **Advanced Intellectual Property and Competition Law** (3) Copyrights, trademarks, patents, and trade secrets followed by related topics in the regulation of competition.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: B LAW 441

B LAW 471 (CRIMJ 471) **Legal Rights, Duties, Liabilities of Criminal Justice Personnel** (3) Civil law issues within a justice agency and between criminal justice agencies and members of the public.
Effective: Spring 2008
Prerequisite: CRIMJ 100

B LAW 473 (CRIMJ 473) **Criminal Procedure and Evidence in the Business Community** (3) Law of evidence and proof, constitutional constraints on police procedures (arrest, search, etc.) in society and the business community.
Effective: Spring 2008
Prerequisite: CRIMJ 100

B LAW 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2003

B LAW 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

B LAW 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

B LAW 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

B LAW 497A **Employment Law** (3) Intro to laws & regulations governing employment relationships.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

B LAW 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

B LAW 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

B LAW 521 **Cyberlaw** (2) Survey of legal, regulatory, and public policy issues related to information technology and eBusiness.
Effective: Summer 2002

B LAW 525 **Business Law for Innovation and Competition** (2) Nature of intellectual property rights, as well as process for obtaining and enforcing them.
Effective: Summer 2008

B LAW 575 **Legal Environment of the Securities Markets** (2) Impact of securities regulations on corporate finance, investment banking, mergers and acquisitions, venture capital and the securities industry.
Effective: Spring 2003

B LAW 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1990

B LAW 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1990

B LAW 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

B LAW 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Chemical Engineering (CH E)

CH E 410 **Mass Transfer Operations** (3) Introduction to principles and applications of mass transfer, with focus on the design of equilibrium stage and continuous contacting separation processes.

Effective: Spring 2006

Prerequisite: CH E 320, CH E 330, CH E 350

CH E 430 **Chemical Reaction Engineering** (3) Chemical reaction rates and equilibria, reactors, reactor design; emphasis on industrial chemical processes.

Effective: Spring 2006

Prerequisite: CH E 320, CH E 330, CH E 350, CH E 360

CH E 432 (F SC 432) **Petroleum Processing** (3) A study of physical and chemical processes to convert crude oil into desired products with an outlook from present to future.

Effective: Summer 2007

Prerequisite: CHEM 210

CH E 438 **Bioprocess Engineering** (3) Introduction to the biotechnology field including consideration of upstream and downstream processing of biochemicals.

Effective: Summer 2007

Prerequisite: CHEM 212

CH E 441 **Polymer Processing** (3) Application of principles of heat, mass, and momentum transfer to the analysis of polymer processing problems.

Effective: Spring 2006

Prerequisite: CH E 330, CH E 350 or MATSE 443

CH E 442 (MATSE 448) **Polymer Processing Technology** (3) Basic principles of polymer melt processing are reviewed and subsequently applied to the most important industrial processing operations.

Effective: Fall 2006

Prerequisite: MATSE 447 or CH E 330

CH E 446 **Transport Phenomena** (3) Fundamental treatment of mass, heat, and momentum transfer; emphasis on transport properties and mathematical models of chemical engineering transport processes.

Effective: Spring 2006

Prerequisite: CH E 330, CH E 350, CH E 360 ; prerequisite or concurrent: CH E 410

CH E 446H **Transport Phenomena** (3) Fundamental treatment of mass, heat, and momentum transfer; emphasis on transport properties and mathematical models of chemical engineering transport processes.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: CH E 330, CH E 350, CH E 360 ; prerequisite or concurrent: CH E 410

CH E 448 **Advanced Mass Transfer Operations** (3) Diffusion and mass transfer as applied to stagewise and continuous contact operations, including equipment design.

Effective: Spring 2006

Prerequisite: CH E 410

CH E 449 **Bioseparations** (3) Analysis and design of separation processes for the purification of biological molecules.

Effective: Spring 2006

Prerequisite: CH E 410

CH E 450 **Process Dynamics and Control** (3) Analysis of time-dependent variables in chemical process plants; reactor design and control; computer applications.

Effective: Spring 2006

Prerequisite: Prerequisite or concurrent: CH E 410, CH E 430

CH E 452 **Chemical Process Safety** (3) This course provides an overview of Process Safety in the Chemical Industry, focusing on the nature of chemical plant accidents.

Effective: Spring 2007

Prerequisite: Prerequisite or concurrent: CH E 410, CH E 430

CH E 465 **Design Projects in Chemical Engineering** (1-6) Problems in design and/or synthesis of chemical engineering processes and/or systems, including a final report on project results.

Effective: Spring 2006

Prerequisite: CH E 410, CH E 430

CH E 470 **Design of Chemical Plants** (3) Lectures and practicum on methods and calculations, including economic evaluations for the design of chemical plants; formal technical report required.

Effective: Spring 2006

Prerequisite: CH E 410, CH E 430

CH E 480M **Chemical Engineering Laboratory (Honors)** (3) Data interpretation and analysis from student-operated experiments on pilot-plant equipment. Individual written and oral technical reports.

Effective: Spring 2008

Prerequisite: ENGL 202C ; prerequisite or concurrent: CH E 410, CH E 430

CH E 480W **Chemical Engineering Laboratory** (3) Data interpretation and correlation from student-operated experiments

on pilot-plant equipment. Individual written and oral technical reports.

Effective: Spring 2006

Prerequisite: ENGL 202C ; prerequisite or concurrent:CH E 410, CH E 430

CH E 494 **Research Projects in Chemical Engineering** (1-6) An original problem, including a search of the literature, experimental investigation, and preparation in formal thesis form.

Effective: Fall 2007

Prerequisite: Permission of program

CH E 494H **Research Projects in Chemical Engineering (Honors)** (1-6) An original problem, including a search of the literature, experimental investigation, and preparation in formal thesis form.

Effective: Spring 2008

Prerequisite: Permission of program

CH E 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 1996

CH E 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

CH E 497A **Polymers** (3) Introduction to synthesis, structure, characterization and processing of polymers. Single molecule properties, polymer solutions, glasses, crystals and blends.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: CH E 320

CH E 497B **Chemical Energy Technology** (3) Survey of current and alternative chemical energy sources and conversion approaches.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: CH E 210 and CH E 220

CH E 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Fall 2007

CH E 501 (BIOE 501) **Bioengineering Transport Phenomena** (3) Application of the equations of mass, energy, and momentum conservation to physiological phenomena and to the design of artificial organs.

Effective: Summer 1990

CH E 503 (BIOE 503) **Fluid Mechanics of Bioengineering Systems** (3) Cardiovascular system and blood flow, non-Newtonian fluid description, vessel flows, unsteady flows and wave motion, windkessel theory, transmission line theory.

Effective: Summer 1990

CH E 524 **Chemical Engineering, Application of Thermodynamics** (3) Elements of thermochemistry and thermodynamics of greatest importance in chemical engineering.

Effective: Fall 1983

CH E 528 **Colloidal Forces and Thermodynamics** (3) Unified treatment of formation, growth and stability of colloids based on principles of intermolecular and colloidal forces and thermodynamics.

Effective: Summer 2007

Prerequisite: CHEM 450, CH E 320 or an equivalent background in chemical thermodynamics

CH E 535 **Chemical Reaction Engineering** (3) Optimal design of batch and continuous chemical reactors and reactor batteries; effect of mixing on reactor operation.

Effective: Winter 1978

CH E 536 **Heterogeneous Catalysis** (3) Thermodynamics and kinetics of adsorption and reactions on solid surfaces, heat and mass transfer effects, theory and correlations in catalysis.

Effective: Summer 2007

Prerequisite: CHEM 450, CHEM 452

CH E 544 **General Transport Phenomena** (3) Formulation and solution of transport problems involving momentum, heat, and mass transfer, with chemical engineering applications.

Effective: Spring 2007

Prerequisite: CH E 330, CH E 350, CH E 410

CH E 545 **Transport Phenomena I** (3) Momentum transport, laminar and turbulent flow, boundary layer analysis, non-Newtonian flow, mechanical energy balance, chemical engineering applications.

Effective: Fall 1982

CH E 546 **Transport Phenomena II** (3) Heat and mass transfer, steady and unsteady state, coupling, molecular diffusion, moving boundaries, transfer coefficients, chemical engineering applications.

Effective: Fall 1982

CH E 576 (C E 576) **Environmental Transport Processes** (3) Fundamentals of chemical transport in engineered environments, such as biofilm reactors, and natural systems including aquifers and rivers.

Effective: Fall 2001

Prerequisite: C E 475

CH E 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 1988

CH E 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2004

CH E 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

CH E 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

CH E 597A **Optimization in Biological Networks** (3) Introduction and application of optimization based techniques in the reconstruction, analysis and redesign of metabolic, signaling and regulatory networks.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CH E 597A **Surface Characterization** (3) This course study physical and chemical principles as well as applications of characterization techniques widely used in surface science and nanotechnology.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

CH E 597B **Research Topics in Chemical Engineering** (3) Lecture and discussion by visiting faculty and engineers on the most recent topics in Chemical Engineering.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CH E 597B **Research Topics in Chemical Engineering** (1) Lecture and discussion by visiting faculty and engineers on the most recent topics in Chemical Engineering.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

CH E 597C **Atomistic-scale simulation methods for engineers** (3) This course will introduce the theory and software related to various atomistic-scale simulations methods and demonstrate engineering applications.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CH E 599 **Foreign Studies** (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.

Effective: Fall 2007

CH E 600 **Thesis Research** (1-15) No description.

Effective: Fall 1983

CH E 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Fall 1983

CH E 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Opportunity for supervised and graded teaching experience for graduate students in chemical engineering.

Effective: Fall 1983

Prerequisite: At least one year of graduate study in chemical engineering.

CH E 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1983

CH E 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Chemistry (CHEM)

CHEM 400 Chemical Literature (1) Instruction in use of the library and of the literature of chemistry.

Effective: Summer 2007

Prerequisite: 12 credits of chemistry

CHEM 402 Chemistry in the Environment (3) Chemistry of the atmosphere, natural waters, and the land surface with particular focus on human influence on processes occurring therein.

Effective: Summer 2007

Prerequisite: CHEM 212 . Prerequisite or concurrent:CHEM 450 orCH E 320

CHEM 406 (NUC E 405) Nuclear and Radiochemistry (3) Theory of radioactive decay processes, nuclear properties and structure, nuclear reactions, interactions of radiation with matter, biological effects of radiation.

Effective: Summer 2007

Prerequisite: CHEM 452 orPHYS 237 orNUC E 301

CHEM 408 Computational Chemistry (3) Introduction to numerical and nonnumerical computer uses in physical science.

Effective: Summer 2007

Prerequisite: Prerequisite or concurrent:CHEM 452

CHEM 410 Inorganic Chemistry (3) Conceptual and descriptive aspects of nontransition elements, covering structural, thermodynamic, and kinetic features.

Effective: Summer 2007

Prerequisite: CHEM 112 andCHEM 202 orCHEM 210 . Prerequisite or concurrent:CHEM 450 orCHEM 452

CHEM 412 Transition Metal Chemistry (3) Structure and bonding of compounds containing transition metals.

Effective: Summer 2007

Prerequisite: CHEM 112 andCHEM 202 orCHEM 210 . Prerequisite or concurrent:CHEM 450 orCHEM 452

CHEM 413W Chemistry of the Elements (4) Theoretical and descriptive chemistry of the elements; laboratory synthesis and measurements in inorganic, coordination, and transition metal chemistry.

Effective: Summer 2007

Prerequisite: CHEM 213

CHEM 423W Chemical Spectroscopy (4) Modern methods and instruments of spectroscopy and their applications to problems of chemical structure and analysis.

Effective: Spring 2011

Prerequisite: CHEM 452, CHEM 457

CHEM 425 Chromatography and Electrochemistry (3) Gas, liquid, and other forms of chromatography; important techniques of electrochemistry.

Effective: Summer 2007

Prerequisite: CHEM 450 andCHEM 457

CHEM 427W (FRNSC 427W) Forensic Chemistry (4) Analytical and instrumental methods used in the forensic sciences with special emphasis on the analysis and characterization of trace evidence.

Effective: Spring 2008 Ending: Summer 2011

Prerequisite: CHEM 213 andCHEM 227

CHEM 427W (FRNSC 427W) Forensic Chemistry (4) Analytical and instrumental methods used in the forensic sciences with special emphasis on the analysis and characterization of trace evidence.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: CHEM 213, CHEM 227 andFRNSC 301 orCHEM 431W

CHEM 430 Structural Analysis of Organic Compounds (3) Spectroscopic methods as tools in gross and detailed structural analysis and interpretation within the framework of modern theory.

Effective: Fall 2010

Prerequisite: CHEM 210 andCHEM 213 Concurrent: CHEM 213

CHEM 431W Organic and Inorganic Preparations (4) Preparation, purification, and characterization of both organic and inorganic compounds by modern methods.

Effective: Fall 2010

Prerequisite: CHEM 213

CHEM 440 Instrumental Analysis (3) General instrumental theory and methods used in common atomic and molecular analyses.

Effective: Summer 2007

Prerequisite: CHEM 450 andCHEM 221

CHEM 441 Elemental Analysis and Instrumental Design Laboratory (1) An introduction to the use of modern instruments for problems in chemical structure and analysis.

Effective: Summer 2007

Prerequisite: or concurrent:CHEM 440

CHEM 443 Electrochemistry and Chromatography Laboratory (1) An introduction to the use of modern instruments for problems in chemical structure and analysis.

Effective: Summer 2007

Prerequisite: or concurrent:CHEM 440

CHEM 445 Atomic and Molecular Spectroscopy Laboratory (1) An introduction to the use of modern instruments for problems in chemical structure and analysis.

Effective: Summer 2007

Prerequisite: or concurrent:CHEM 440

CHEM 446 X-Ray Crystallography (3) Theoretical and practical aspects of structure determination using x-ray diffraction, from crystal growth to structure solution.

Effective: Summer 2007

Prerequisite: CHEM 210

CHEM 448 Surface Chemistry (3) Surface chemistry, emphasizing the physical and chemical aspects of surfaces important for applications in colloids, catalysis, microelectronics and biocompatibility.

Effective: Summer 2007

Prerequisite: CHEM 450 andCHEM 452

CHEM 450 Physical Chemistry - Thermodynamics (3) Introduction to physical chemistry with primary emphasis on chemical thermodynamics and its molecular interpretation. (Graduate credit not allowed for students majoring in Biochemistry and Molecular Biology, Chemistry, or Chemical Engineering.)

Effective: Summer 2007

Prerequisite: CHEM 112 andMATH 141, PHYS 211 orPHYS 212

CHEM 452 Physical Chemistry - Quantum Chemistry (3) Introduction to physical chemistry with primary emphasis on molecular structure, spectroscopy, and chemical kinetics. (Graduate credit not allowed for students majoring in Biochemistry and Molecular Biology, Chemistry, or Chemical Engineering.) **2**

Effective: Summer 2007

Prerequisite: CHEM 112 andMATH 141 andPHYS 211 orPHYS 212

CHEM 457 Experimental Physical Chemistry (2) Laboratory experiments designed to illustrate the principles of physical chemistry and teach techniques of error analysis and the presentation of quantitative data. (Graduate credit not allowed for students majoring in Biochemistry and Molecular Biology, Chemistry, or Chemical Engineering.) **2**

Effective: Summer 2007

Prerequisite: or concurrent:CHEM 450 orCH E 320

CHEM 459W Advanced Experimental Physical Chemistry (4) Laboratory experiments and projects for students interested in advanced study in physical chemistry.

Effective: Summer 2010

Prerequisite: CHEM 450, CHEM 457 Prerequisite or concurrent:CHEM 452

CHEM 460 Advanced Thermodynamics (3) Chemical thermodynamics, with applications to pure phases, solutions, and chemical reactions.

Effective: Spring 2009

Prerequisite: CH E 220 orCHEM 450

CHEM 462 Advanced Quantum Chemistry (3) Introduction to quantum chemistry, with emphasis on atomic and molecular structure.

Effective: Summer 2007

Prerequisite: CHEM 452

CHEM 464 Chemical Kinetics and Dynamics (3) Introduction to chemical kinetics and molecular dynamics.

Effective: Spring 2009

Prerequisite: CHEM 450 orCH E 220 andCHEM 452

CHEM 466 Molecular Thermodynamics (3) Introduction to physical chemistry with a primary emphasis on the statistical and molecular interpretation of thermodynamics.

Effective: Summer 2007

Prerequisite: CHEM 450 orCH E 220

CHEM 472 General Biochemistry I (3) Basic structure and function of cellular components; principles of enzyme kinetics and regulation.

Effective: Summer 2007

Prerequisite: CHEM 212

CHEM 474 Organic Synthesis (3) Theory and methodology of organic synthesis applied to complex organic molecules.

Effective: Spring 2007

Prerequisite: CHEM 212

CHEM 476 Biological Chemistry (3) Fundamentals of Biochemistry for Chemists. Students cannot receive credit for both CHEM 476 and B M B 401.

Effective: Fall 2009

Prerequisite: CHEM 212 andCHEM 450 Concurrent: CHEM 452

CHEM 494 Chemical Research (1-10 per semester/maximum of 20) Experimental investigation of an original research problem. Preparation of a formal thesis is optional. (Credit not allowed for graduate students in Biochemistry, Chemistry or Chemical Engineering.)

Effective: Summer 2007

CHEM 494H Chemical Research (1-10 per semester/maximum of 20) Experimental investigation of an original research problem. Preparation of a formal thesis is optional. (Credit not allowed for graduate students in Biochemistry, Chemistry

or Chemical Engineering.)
Effective: Fall 2007

CHEM 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2007
Prerequisite: prior approval of proposed assignment by instructor

CHEM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1988

CHEM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1982

CHEM 497A Organic Reaction Mechanisms (3) This course focuses on the study and analysis of selected electron-pushing mechanisms or organic reactions.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: CHEM 212

CHEM 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

CHEM 500 Seminar in Chemistry (1-2 per semester) No description.
Effective: Spring 2001

CHEM 516 Inorganic Chemistry (3) Systematic treatment of inorganic chemistry in terms of modern concepts.
Effective: Winter 1978

CHEM 517 Organometallic Chemistry (3) Organometallic compounds and their use in catalysis and organic synthesis.
Effective: Summer 1990

CHEM 518 Physical Methods in Inorganic Chemistry (3 per semester) Elements of group theory, transition metal electronic spectroscopy, vibrational spectroscopy, magnetic resonance, magnetism, x-ray and photoelectron spectroscopy, x-ray structure.
Effective: Summer 1990

CHEM 524 Electroanalytical Chemistry (3) Modern instrumental methods of analysis; electrochemistry.
Effective: Spring 1987

CHEM 525 Analytical Separations (3) Modern instrumental analysis, including chromatography and other separation methods.
Effective: Spring 1987

CHEM 526 Spectroscopic Analysis (3) Modern instrumental analysis, including absorption, emission, electronic, and magnetic spectroscopies.
Effective: Spring 1987

CHEM 527 Special Topics in Analytical Chemistry (2-12) No description.
Effective: Fall 1983

CHEM 531 Special Topics in Organic Chemistry (3-12) No description.
Effective: Fall 1983
Prerequisite: CHEM 536

CHEM 535 Organic Reaction Mechanisms I (3) Reaction mechanisms and their determination by kinetic and nonkinetic methods. Reactive intermediates.
Effective: Spring 2009
Prerequisite: CHEM 212

CHEM 536 Organic Reaction Mechanisms II (3) Reaction mechanisms and their determination by kinetic and nonkinetic methods. Reactive intermediates.
Effective: Summer 2007
Prerequisite: CHEM 430

CHEM 537 Synthesis in Organic Chemistry (3) Theory and methods of directed syntheses, including stereospecific and stereoselected schemes; biologically inspired syntheses.
Effective: Winter 1978

Prerequisite: CHEM 536

CHEM 539 **Mechanistic Bioorganic Chemistry** (3) Advanced organic reaction mechanisms, particularly those applicable to biological systems.

Effective: Fall 1983

Prerequisite: CHEM 535, BIOCH 401

CHEM 540 **Biophysical Chemistry** (3) Structure of biomacromolecules, physical techniques for the study of structure and function, thermodynamic and kinetic studies of biomacromolecules in solution.

Effective: Summer 1991

Prerequisite: CHEM 452

CHEM 543 (MATSE 543) **Polymer Chemistry** (3) This graduate course discusses the new advances in polymer chemistry that leads to new polymeric materials with interesting structures and properties.

Effective: Spring 2005

Prerequisite: MATSE 441 or approval of program

CHEM 544 **Chemical Thermodynamics** (3) Development of thermodynamic theory, with special reference to common physical changes and chemical reactions.

Effective: Fall 1984

Prerequisite: CHEM 452

CHEM 545 **Statistical Thermodynamics** (3) Basic principles of statistical mechanics with application to the calculation of thermodynamic properties of gases and condensed phases.

Effective: Summer 2007

Prerequisite: CHEM 450, CHEM 452

CHEM 560 **Topics in Physical Chemistry** (2-6) No description.

Effective: Fall 1983

CHEM 563 **Chemical Dynamics** (3) Molecular dynamics of chemical reaction, energy transfer, and scattering. Reaction rate theory and experiment.

Effective: Fall 1986

Prerequisite: CHEM 565

CHEM 565 **Quantum Chemistry I** (3) An introduction to the principles of quantum mechanics and their applications to chemistry.

Effective: Fall 1986

Prerequisite: CHEM 452

CHEM 566 **Quantum Chemistry II** (3) Modern techniques in quantum mechanics, with applications to problems in molecular structure and interactions.

Effective: Fall 1986

Prerequisite: CHEM 565

CHEM 567 **Molecular Spectroscopy** (3) Principles and methods of molecular spectroscopy and their applications to chemical problems.

Effective: Fall 1986

Prerequisite: CHEM 565

CHEM 589 **Studies in Chemistry** (1-9) Theoretical research, experimental research, or a critical survey of the literature in an area of chemistry.

Effective: Winter 1978

CHEM 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Spring 1987

CHEM 597A **Medicinal Chemistry and Chemical Biology** (3) Principles of conventional medicinal Chemistry, case studies of new drug discovery and latest development in chemical biology will be covered in this course.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: CHEM 212

CHEM 597B (BMMB 597B) **Bioinorganic Chemistry** (3) This course will cover principles of biochemistry for chemists, principles of coordination chemistry of biochemists, spectroscopy, and metallobiochemistry.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CHEM 597C **Biological NMR** (3) Biological NMR instruction.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

CHEM 597D **Transition Metal Chemistry - Synthesis, Structure, and Applications** (3) This course covers the fundamental chemistry of elements including coordination chemistry, bonding, molecular structure, and reaction chemistry, and shows how all three aspects underlie the use of transition elements in materials science and other applications.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: CHEM 516

CHEM 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

CHEM 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

CHEM 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching of chemistry undergraduate laboratory and recitation classes with senior faculty instruction supervision.
Effective: Fall 1983

CHEM 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

CHEM 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

1 GN To receive Natural Sciences General Education (GN) credit for certain chemistry courses requires both lecture and laboratory courses be taken. These courses are: (CHEM 106 or CHEM 110 or CHEM 110H) and CHEM 111; (CHEM 112 or CHEM 112H) and (CHEM 113 or CHEM 113B).

2 Graduate credit not allowed for student majoring in BioChemistry, Chemistry, or Chemical Engineering.

3 Students may take only one course for General Education credit from CHEM 101 GN or CHEM 110 GN.

Last Import from UCM: June 16, 2011 3:00 AM

Chinese (CHNS)

CHNS 401 (IL) **Level Three Chinese A** (4) Emphasis on oral proficiency through discussions of aspects of contemporary Chinese culture.

Effective: Spring 2011

Prerequisite: CHNS 110

CHNS 402 (IL) **Level Three Chinese B** (4) Readings in representative works of traditional and modern literature; practice in composition; study of aspects of Chinese culture.

Effective: Spring 2011

Prerequisite: CHNS 401 OR EQUIVALENT

CHNS 403W **Practical Written Communication: Chinese for Professional and Academic Purposes** (3) Discussions, presentations, readings, and compositions emphasizing written styles used in newspapers, magazines, business reports, academic writing, and other texts.

Effective: Spring 2010

Prerequisite: CHNS 401

CHNS 421 (IL) **China Beyond China** (3) Study of modern and contemporary Chinese culture in its diversity and its intercultural contexts.

Effective: Summer 2011

Prerequisite: 3 credits in literature or other fields relevant to this course

CHNS 422 (IL) **Gender and Sexuality in China** (3) Study of gender roles and the imaginary of sexuality in the literary, filmic, and artistic production of modern China.

Effective: Summer 2011

Prerequisite: 3 credits in literature or other fields relevant to this course

CHNS 426 (IL) **The Chinese Rhetorical Tradition** (3 per semester/maximum of 6) Study of the rhetorical works in ancient China as well as multiple facets of modern Chinese rhetoric.

Effective: Summer 2011

Prerequisite: 3 credits in ENGL 015 Concurrent: ENGL 471

CHNS 452 (IL) **Contemporary China: Culture and Trends** (3 per semester/maximum of 6) Survey of aspects of the contemporary Chinese-speaking world. Includes readings from Chinese newspapers, magazines, and fiction. Topics may vary each semester.

Effective: Spring 2010

Prerequisite: CHNS 401

CHNS 453 (IL) **Chinese Film** (3 per semester/maximum of 6) Selected films and directors representing various aspects of Chinese culture and cinema. Topics may vary each semester. Taught in Chinese.

Effective: Spring 2010

Prerequisite: CHNS 401

CHNS 454 (IL) **Introduction to Classical Chinese** (3 per semester/maximum of 6) Basic patterns and structures of Classical Chinese to the first millennium B.C. to the 19th century.

Effective: Spring 2010

Prerequisite: CHNS 401 or equivalent (such as study abroad credit)

CHNS 455 (IL) **Masterpieces of Traditional Chinese Literature** (3) Survey of traditional Chinese literature, including poetry, historical narratives, philosophical texts, and drama and novel.

Effective: Spring 2010

Prerequisite: CHNS 401 or equivalent

CHNS 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2010

CHNS 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2010

CHNS 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2010

CHNS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2010

CHNS 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2010

CHNS 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2010

CHNS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1997

CHNS 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

CHNS 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

Civic and Community Engagement (CIVCM)

No courses for department code **CIVCM** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Civil Engineering (C E)

C E 410W Sustainable Residential Subdivision Design (3) Residential subdivision process; site selection; conservation and neo- traditional design; utility design and layout; best management practices for erosion and stormwater.
Effective: Fall 2001

Prerequisite: A E 372 or C E 332 ; seventh-semester standing in Architectural or Civil Engineering

C E 421W Transportation Design (3) Design of streets and highway facilities; emphasis on geometric elements, intersections and interchanges, roadway drainage, and pavement design.

Effective: Spring 2002

Prerequisite: C E 321

C E 422 Transportation Planning (3) Transportation systems planning, programming, and management; modeling and simulation, data collection, analysis, and forecasting.

Effective: Spring 2002

Prerequisite: 3 credits in probability or statistics

C E 423 Traffic Operations (3) The highway capacity manual, concepts and analyses, freeway operations, signalized and unsignalized intersections, signal coordination, traffic impact studies.

Effective: Spring 1997

Prerequisite: C E 321

C E 432 Construction Project Management (3) Fundamentals of project management, construction scheduling using the CPM technique, construction project preplanning, and control of quality, safety, and costs.

Effective: Fall 2007

Prerequisite: C E 332

C E 435 Foundation Engineering (3) Bearing capacity, settlement, and structural design of shallow foundations; lateral earth pressure; retaining and sheet-pile walls; introduction to deep foundations

Effective: Fall 2001

Prerequisite: C E 335 . Prerequisite or concurrent: C E 341

C E 436 Construction Engineering Materials (3) Design, production, application, specification, and quality control of construction materials unique to civil engineering.

Effective: Fall 2001

Prerequisite: C E 336, STAT 401

C E 438W Construction Engineering Capstone Design (3) Construction project integrating geotechnical reports; materials specifications; quality control; equipment; estimation; scheduling; design details: excavations, foundations, retaining walls, formwork, pavements.

Effective: Fall 2007

Prerequisite: C E 432 and C E 435 or C E 436

C E 441 Structural Design of Foundations (3) Design of concentrically and eccentrically loaded square, rectangular, and combined footings; analysis and design of mat foundations; retaining walls; piles caps; flexible retaining design, and caissons.

Effective: Summer 2009

Prerequisite: C E 335, C E 341 Concurrent: C E 342

C E 445 Advanced Structural Analysis (3) Analysis of trusses and frame stiffness matrix method of analysis. Analysis of indeterminate beams, trusses, and frames using classical methods.

Effective: Spring 2008

Prerequisite: C E T 430

C E 447 Structural Analysis by Matrix Methods (3) Analysis of truss and frame structures using flexibility and stiffness methods of matrix analysis. Computer applications.

Effective: Fall 1992

Prerequisite: C E 340

C E 448W Advanced Structural Design (3) Wind, snow, seismic, bridge loads; building design using steel, concrete, and prestressed concrete; advanced steel connections; capstone project; computer applications.

Effective: Spring 2002

Prerequisite: C E 341, C E 342, C E 435

C E 449 Advanced Structural Design (3) Special systems, frames and bracing in steel, wood and reinforced or precast concrete. Introduction to composite construction.

Effective: Spring 2008

Prerequisite: C E T 430, C E T 431, C E T 432

C E 454 Safety (3) This course will focus on safety issues as they relate to OSHA.

Effective: Spring 2008

Prerequisite: permission of program

C E 456 Planning and Scheduling (3) Theory and practice used in planning and scheduling projects; defining task and resources, creating logic diagrams, and monitoring the projects.

Effective: Spring 2008

Prerequisite: C E 333W, C E T 435, I E 303

C E 458 Construction Management II (3) Procedures in construction organization including procurement, ethics, field supervision, legal and managerial problems, personnel, cost accounting, and construction business practices.

Effective: Spring 2008

Prerequisite: C E 333W, C E 456

C E 461 Water-resource Engineering (3) Qualitative and quantitative description of the hydrologic cycle, flood and drought frequency analysis, climate and land use change impacts, risk analysis and uncertainty, water resource management at regional, national and global scale.

Effective: Spring 2010

Prerequisite: C E 360

C E 462 Open Channel Hydraulics (3) Free surface flow in rivers, canals, steep chutes, stilling basins, and transitions.

Effective: Spring 2002

Prerequisite: C E 360

C E 465W Water Resources Capstone Course (3) Hydraulic design of river structures and open channels including supercritical and spatially varied flow; hydrologic/hydraulic computer modeling; design project.

Effective: Fall 2007

Prerequisite: C E 361 . Prerequisite or concurrent:C E 462

C E 472W Environmental Engineering Capstone Design (3) Principles and design of unit operations for water; domestic and industrial wastewater treatment; equipment selection and application.

Effective: Spring 2002

Prerequisite: C E 370, C E 371

C E 475 Water Quality Chemistry (4) Chemistry applicable to the understanding and analysis of water quality, pollution, and treatment.

Effective: Spring 2011

Prerequisite: C E 370, CHEM 110, CHEM 111

C E 476 Solid and Hazardous Wastes (3) Characteristics and treatment of solid wastes and hazardous wastes.

Effective: Spring 2002

Prerequisite: C E 370, C E 371

C E 479 Environmental Microbiology for Engineers (3) Intro microbiology for engineers; microbe structure, function, and diversity; environmental ecosystems; diagnostic labs.

Effective: Spring 2011

Prerequisite: CHEM 111, C E 370

C E 488C Capstone Project - Construction (4) This course consists of a project either selected by the students with approval or assigned by the instructor.

Effective: Spring 2008

Prerequisite: eighth-semester Structural Design and Construction Engineering Technology student. Previous or concurrent:CET 430, CET 431, CET 432, CET 435, C E 456

C E 488D Capstone Project - Structural Design (4) This course consists of a structural design project either selected by the students with approval or assigned by the instructor.

Effective: Spring 2008

Prerequisite: eighth-semester Structural Design and Construction Engineering Technology student. Previous or concurrent:CET 430, CET 431, CET 432 andCET 435

C E 494 Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.

Effective: Fall 1992

C E 494H Honors Senior Thesis (1-6) Investigation of an original project in the area of Civil Engineering.

Effective: Summer 2006

C E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1992

C E 496A Residential Construction Management (3) Project management issues related to the housing industry.

Planning, executing and controlling residential construction projects.

Effective: Summer 2011 Ending: Summer 2011

C E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

C E 497A Road Safety Analysis (3) Introduction to concepts, data and methods used in road safety analysis; references from literature will be used.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C E 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2007

C E 511 Engineering Soil Characteristics (3) Applications of physico-chemical principles in soil engineering; soil composition; factors influencing engineering soil properties.

Effective: Fall 1992

Prerequisite: C E 335

C E 512 Soil Mechanics II (2-5) Evaluation of strength parameters and compressibility of soils; elastic analysis of stress and strain; techniques of forecasting foundation settlement; slope stability analysis.

Effective: Fall 1992

C E 513 Advanced Foundation Engineering (3) Practical applications of soil mechanics principles to geotechnical engineering problems; dewatering techniques; design of deep foundations and retaining structures.

Effective: Fall 1992

Prerequisite: C E 335

C E 521 Transportation Networks and Systems Analysis (3) Techniques of transportation network, user, stochastic user, and variable demand equilibrium; transportation activity system; computer simulation techniques and forecasting methods.

Effective: Fall 1992

Prerequisite: 3 credits of computer science

C E 522 Traffic Simulation and Control (3) Simulation theory, traffic modeling using GPSS, traffic signal optimization using TEXAS, EVIPAS, PASSERII, TRANSYT-7F, TRAF-NETSIM, FRESIM and CORFLO.

Effective: Summer 1997

Prerequisite: C E 423

C E 523 Analysis of Transportation Demand (3) Theories of travel behavior, least squares and maximum likelihood, estimation methods, continuous dependent variable models, utility maximization, discrete econometric techniques.

Effective: Fall 1992

Prerequisite: 3 credits of probability and statistics

C E 524 Advanced Problems in Civil Engineering Materials (2-6) Study in the literature and by laboratory investigation of selected topics on field-controlled civil engineering materials.

Effective: Summer 2011

C E 525 Traffic Flow Theory (3) Microscopic and macroscopic traffic flow characteristics; traffic stream models; shockwaves and queuing for traffic operations.

Effective: Spring 1997

Prerequisite: C E 423

C E 526 Highway and Street Design (3) Technical analysis of the design elements of roadways, alignment, cross-section features, and intersection and interchange design considerations.

Effective: Spring 1994

Prerequisite: C E 421

C E 527 Roadside Design and Management (3) Roadside safety and design, safety management, pavement management, lighting, signs, signals, and markings, clear zone, guiderail, impact attenuators.

Effective: Spring 1996

Prerequisite: C E 421W

C E 528 Transportation Safety Analysis (3) Issues and methods in transportation safety analysis; factors contributing to crashes; crash causation; modeling accident occurrence; identifying sites for treatment.

Effective: Spring 2005

Prerequisite: STAT 401

C E 531 Legal Aspects of Engineering and Construction (3) Basic legal doctrines, contractual relationships between parties, analysis of construction contract clauses, contract performance, and professional practice problems.

Effective: Fall 2001

Prerequisite: C E 431W

C E 533 Construction Productivity Analysis and Performance Evaluation (3) Construction productivity concepts and models; productivity measurement, control, and forecasting; analysis of factors affecting productivity; methods improvement techniques.

Effective: Fall 1992

Prerequisite: STAT 401; C E 431 or A E 474

C E 539 Approximate Methods of Structural Analysis (3) Structural analysis through the application of initial-value methods, Newmark's method, Fourier series, finite difference techniques, and work and energy procedures.

Effective: Fall 1992

Prerequisite: C E 340

C E 540 Statically Indeterminate Structures (3) Analysis of statically indeterminate straight/curved beams, grids, 2D/3D frames, arches, cables, and shells using classical and modern techniques.

Effective: Spring 2005

C E 541 Structural Analysis (3) Theory of various finite elements as applied to civil engineering structures. Term paper

required.

Effective: Fall 1992

Prerequisite: C E 447

C E 542 (A E 542) Building Enclosure Science and Design (3) The building enclosure: nature, importance, loadings; building science: control of heat, moisture, air, hygrothermal analysis; design: walls, windows, roofs, joints.
Effective: Summer 2002

C E 543 Prestressed Concrete Behavior and Design (3) Design and behavior of prestressed concrete structures: materials and systems losses, flexure, shear, bond, deflections, partial prestressing, continuous beams.

Effective: Summer 2003

Prerequisite: C E 341, A E 402 or approved equivalent

C E 544 Design of Reinforced Concrete Structures (3) Advanced topics in design of reinforced concrete structures. Torsion and shear; beam moment-curvature; two-way slab systems; slender columns; strut- and-tie methodology.

Effective: Spring 2007

C E 545 Metal Structure Behavior and Design (3) Design philosophies and basis; seismic loading; fatigue; bending, column, plate, and beam-column stability; tapered members; torsion; connections; bracing; frame stability.

Effective: Spring 2007

C E 546 Reinforced Concrete Slabs (3) Behavior, analysis, and design of floor systems; elastic, ACI Code method, yield line theory; two-way, flat slab, flat plate.

Effective: Fall 1992

Prerequisite: C E 341

C E 548 Structural Design for Dynamic Loads (3) Dynamic behavior of structural systems of one and more degrees of freedom; earthquake, blast-resistant analysis, and design of structures.

Effective: Spring 2008

Prerequisite: E MCH 212, C E 340

C E 549 Bridge Engineering I (3) Engineering of modern steel and concrete bridge structures; loading; analysis; design.

Effective: Spring 2000

Prerequisite: C E 448W

C E 550 Engineering Construction Management (3) Management fundamentals for construction contracting; organization, project planning, scheduling and control, bonding and insurance, labor legislation and regulation, cost and control.

Effective: Fall 1992

Prerequisite: C E 431

C E 551 Random Processes in Hydrologic Systems (3) Hydrologic systems analysis, simulation; design using probability, time series and dynamical systems; formulating models, parameter estimation, environmental impact, resource assessment.

Effective: Summer 1996

Prerequisite: C E 361 ; introductory probability and statistics

C E 552 Coastal and Nearshore Processes (3) Hydrodynamics of the near-shore environment, including waves, currents, and storm surges. Coastal response, sediment transport, engineering structures.

Effective: Summer 2004

Prerequisite: C E 360

C E 555 Groundwater Hydrology: Analysis and Modeling (3) Introduction to groundwater resource analysis, model formulation, simulation, and design of water resource systems using symbolic and numerical methods.

Effective: Spring 1996

Prerequisite: MATH 251

C E 556 Tracer and Contaminant Transport in Groundwater Systems (3) Introduction to mathematical models for tracer and contaminant transport in groundwater. Topics include formulation, visualization, environmental tracers, and remediation.

Effective: Spring 1996

Prerequisite: MATH 251

C E 561 Surface Hydrology (3) Quantification of the processes that govern the movement and storage of water near the land-surface including precipitation, evapotranspiration, and runoff.

Effective: Spring 2005

C E 563 Systems Optimization Using Evolutionary Algorithms (3) Comprehensive introduction to genetic and evolutionary computation: genetic algorithms, evolutionary strategies, multi-objective optimization, parallelization approaches, and fitness approximation.

Effective: Spring 2005

C E 564 Sediment Transport in Alluvial Streams (3) River flow, river channel formation, the physical characteristics of rivers, responses of rivers to natural and human-made changes.

Effective: Spring 2005

Prerequisite: C E 462

C E 566 Uncertainty and Reliability in Civil Engineering (3) Introduction to probabilistic modeling, simulation, uncertainty analysis, and reliability estimates applied to civil engineering.
Effective: Spring 2005

C E 567 River Engineering (3) Introduction to river mechanics and fluvial geomorphology applied to problems of sediment transport and channel morphology.
Effective: Fall 1999

C E 570 Environmental Aquatic Chemistry (3) Speciation, reactivity, and distribution of contaminants in water, with emphasis in inorganic chemicals.
Effective: Fall 1992
Prerequisite: C E 475

C E 571 Physical-Chemical Treatment Processes (3) The theory of physical-chemical processes used in the treatment of potable water and municipal and industrial wastewaters.
Effective: Fall 1992
Prerequisite: C E 472, C E 475

C E 572 Biological Treatment Processes (3) The theory and application of biological processes to treat organic wastes, including wastewater, solid residuals, and toxic priority pollutants.
Effective: Summer 2011
Prerequisite: or concurrent: C E 475

C E 573 Environmental Organic Chemistry (3) Theory, measurement, and estimation of the characteristics and environmental transformations of hazardous materials.
Effective: Spring 2000
Prerequisite: C E 475

C E 574 Laboratory Analyses in Water Quality Control (3) Experiments illustrating current chemical and biochemical methods of water and waste treatment and analytical methods used in research and control.
Effective: Fall 1992
Prerequisite: C E 475

C E 575 Industrial Waste Management (3) Surveys and analysis, pollution prevention, regulatory requirements, treatment and disposal of liquid, gaseous and solid residues.
Effective: Spring 1997
Prerequisite: C E 472

C E 576 (CH E 576) Environmental Transport Processes (3) Fundamentals of chemical transport in engineered environments, such as biofilm reactors, and natural systems including aquifers and rivers.
Effective: Fall 2001
Prerequisite: C E 475

C E 577 Treatment Plant Design (1-6) Design of works for the treatment of water and wastewater for municipalities and industries.
Effective: Fall 1992
Prerequisite: C E 472 ; 3 credits in hydraulics

C E 578 Groundwater Remediation (3) Application of fundamental physical/chemical/biological processes in natural and engineered systems for remediation of contaminated soil and groundwater.
Effective: Summer 2011
Prerequisite: C E 475

C E 579 Environmental Pollution Microbiology (3) Fundamentals of microorganisms in water and wastewater treatment; indicators of pollution; activities of microorganisms in polluted waters, including biogeochemical cycles.
Effective: Summer 2011

C E 580 Hydrodynamic Mixing Processes (3) Physical mixing processes in rivers, estuaries, lakes, and oceans. Analytic methods and computational modeling.
Effective: Spring 2005

C E 581 Pavement Management and Rehabilitation (3) Techniques of network and project level pavement management, field evaluation methods and equipment, maintenance and rehabilitation strategies, overlay design procedures.
Effective: Fall 1992
Prerequisite: C E 421

C E 582 Pavement Design and Analysis (3) Viscoelastic analysis; non-linear analysis; fatigue and permanent deformation; back-calculation of layer moduli; mechanistic-empirical design methods.
Effective: Summer 1998

C E 583 Bituminous Materials and Mixtures (3) Composition, physical behavior, production, and performance of bituminous materials and mixtures.
Effective: Spring 1998

C E 584 Concrete Materials and Properties (3) Study of concrete properties and associated variables, prediction models, testing, preventative measures, pozzolans, admixtures.

Effective: Spring 1997

Prerequisite: A E 221 or C E 336

C E 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Fall 1992

C E 591 Environmental Engineering Seminar (1) Seminar topics selected by faculty and students based on research interests on topics related to environmental engineering and science.

Effective: Spring 2005

C E 592 Environmental Engineering & Science Topics (1) Current topics in environmental engineering and science.

Effective: Spring 2005

C E 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1992

C E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 1992

C E 597A How to Initiate Your Academic Career (1) This class will prepare students to generate competitive application materials for academic positions and educate them about the academic hiring process.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C E 597A Infrastructure Health Monitoring (3) Processes that help identify load(s) placed onto a structure; assesses damage resulting from those loads and how fast that damage accumulates; determines the future performance of the structure as that damage continues to grow at different rates.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

C E 597B Modeling Complex Environmental Systems (3) Introduction to key concepts of dynamical modeling of complex hydrological and environmental systems.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C E 597B Geotechnical and Materials Engineering Seminar (1) Graduate student seminar with topical discussions on Geotechnical and Materials Engineering.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

C E 597C Geotechnical and Materials Engineering Seminar (1) Grad student seminar with topical discussions on Geotechnical and Materials Engineering.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C E 597D Human Factors in Transportation (3) Special topics in transportation engineering.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C E 597E Infrastructure Health Monitoring (3) Processes that help identify load(s) placed onto a structure; assesses damage resulting from those loads and how fast that damage accumulates.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C E 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Summer 1996

C E 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.

Effective: Spring 2008

C E 600 Thesis Research (1-15) No description.

Effective: Fall 1992

C E 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 1992

C E 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1992

C E 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1992

Last Import from UCM: June 16, 2011 3:00 AM

Civil Engineering Technology (CET)

CET 430 Structural Analysis (3) Analysis of determinate structures; use of influence lines; deflection of structures; classical methods of analysis of statically indeterminate structures.

Effective: Spring 2008

Prerequisite: Statics Strength of Materials MATH 140

CET 431 Structural Design-Steel (3) Design of steel beams, columns, truss members, decks, bar joists and selected connections.

Effective: Spring 2008

Prerequisite: Statics Strength of Materials MATH 140 Concurrent: CET 430

CET 432 Structural Design-Reinforced Concrete (3) Design of reinforced concrete beams, columns, slabs, and selected framing systems for bending and shear. Introduction to formwork design.

Effective: Spring 2008

Prerequisite: Statics Strength of Materials MATH 140 Concurrent: CET 430

CET 434 Foundations (3) Analysis and design of footings, piling, retaining walls; consideration of construction problems involving soils and foundations of structures.

Effective: Spring 2008

Prerequisite: CET 343, CET 430, CET 432

CET 435 Construction Estimating (3) Methods and techniques used in estimating construction cost; practice in takeoffs, costing and final bid preparation; microcomputer applications/class projects.

Effective: Spring 2008

Prerequisite: ED&G 100, ET 200, C E 333W

CET 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Spring 2008

CET 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2008

Last Import from UCM: June 16, 2011 3:00 AM

Classics and Ancient Mediterranean Studies (CAMS)

CAMS 400W Comparative Study of the Ancient Mediterranean World (3) Comparative study of ancient Mediterranean civilizations.

Effective: Spring 2001

Prerequisite: 3 credits in Classics and Ancient Mediterranean Studies

CAMS 405 (IL) Law & Economy in the Ancient Near East (3) This course is an overview of the legal and economic texts and institutions in the Ancient Near East.

Effective: Spring 2009

Prerequisite: 6 credits in any undergraduate CAMS courses.

CAMS 410 Classical Epic (3) Homer, Hellenistic Epic, and Vergil; influences on later epic.

Effective: Spring 1998

CAMS 411W Classical Drama (3) Masterpieces of Greek tragedy (Aeschylus, Sophocles, Euripides) and comedy (Aristophanes, Menander); their influence on Roman writers.

Effective: Spring 2001

CAMS 420 Introductory Targumic Aramaic (3) Fundamentals of Aramaic grammar, syntax, and vocabulary.

Effective: Spring 2007

CAMS 421 Introductory Syriac (3) Fundamentals of Syriac grammar, syntax, and vocabulary.

Effective: Spring 2007

CAMS 440W Studies in Classical and Ancient Mediterranean Archaeology (3-6) Selected topics in the literary sources and material evidence for classical and ancient Mediterranean society.

Effective: Summer 2000

Prerequisite: 3 credits from: ANTH 002, ART H 311, CAMS 010, CAMS 020, CAMS 025, CAMS 033, CAMS 140, CAMS 150, HIST 100, HIST 101

CAMS 442 (IL) (KINES 442) Sport in Ancient Greece and Rome (3) An examination of the continuity of sport in Greek and Roman societies.

Effective: Spring 2008

Prerequisite: CAMS 025, CAMS 033, CAMS 140, CAMS 150, CAMS 100, CAMS 101 or KINES 141

CAMS 470 (IL) Languages and Cultures of the Ancient Near East (3) This course is an overview of the languages and cultures that populated the Ancient Near East.

Effective: Spring 2009

Prerequisite: 6 credits in any undergraduate CAMS courses.

CAMS 471 Sumerian (3) Introduction to the Sumerian language and the cuneiform writing system.

Effective: Spring 2009

Prerequisite: 6 credits in any undergraduate CAMS course.

CAMS 472 Akkadian (3) Introduction to the Akkadian language (Babylonian & Assyrian) and the cuneiform writing system.

Effective: Spring 2009

Prerequisite: 6 credits in any undergraduate CAMS courses

CAMS 480 (J ST 480) Greeks and Persians (3) Development and achievements of the Achaemenid kingdom; relationships between Persians and Greeks.

Effective: Spring 2001

Prerequisite: CAMS 010, CAMS 025 or CAMS 100

CAMS 490 Ancient Mediterranean Languages (3-6) Variable topic study of an ancient language of the Mediterranean basin and related areas, other than Greek, Latin, or Hebrew.

Effective: Summer 2011

Prerequisite: LATIN 003

CAMS 492 Intermediate Field Methods (3-6) On-site experience in archaeological fieldwork in the ancient Mediterranean region.

Effective: Spring 2000

Prerequisite: approval by field school director

CAMS 493 Intermediate Field Analysis (3-6) On-site experience in archaeological analysis in the ancient Mediterranean region.

Effective: Spring 2000

Prerequisite: approval by field school director

CAMS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 1997

CAMS 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2001

CAMS 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1999

CAMS 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 1996

CAMS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1997

CAMS 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

CAMS 499A (IL) (HIST 499A, ANTH 499A) **Archaeology, History, and Culture of Turkey's Aegean Coast** (3) The 2011 study tour will focus on Turkey's western coast, the location of Troy and the Trojan War of the heart of the Greco-Roman and Byzantine empires.
Effective: Summer 2011 Ending: Summer 2011

CAMS 499B (IL) (HIST 499B, ANTH 499B) **Foreign Study** (3) This course is offered as an option for students to earn an additional 3 credits, with the permission of the instructor. The students will be required to write a research paper on an approved topic.
Effective: Summer 2011 Ending: Summer 2011

CAMS 499C (IL) (HIST 499C, ANTH 499C, RL ST 499C) **Excavation, Survey and GIS for Archaeologists** (6) Entails excavation, intensive survey, and an introduction to GIS for archaeologists.
Effective: Summer 2011 Ending: Summer 2011

CAMS 499D (IL) (ANTH 499D, HIST 499D, RL ST 499D) **Israel Dig: Excavation, Conservation, and Public Archaeology** (6) Entails excavation, conservation, and public archaeology involved with the preservation and interpretation of Israel's archaeological sites.
Effective: Summer 2011 Ending: Summer 2011

CAMS 499E (IL) (HIST 499E, ANTH 499E) **Study Tour of Jordan: Petra, the Spice Route, Roman Palestine** (3) Entails an in-depth seminar with a focus on the archaeology and history of Roman Palestine.
Effective: Summer 2011 Ending: Summer 2011

CAMS 501 **Comparative Greek and Latin Grammar** (3) The evolution of the phonological, morphological, syntactic and lexical structures of Greek and Latin from Proto-Indo-European.
Effective: Summer 2011
Prerequisite: LATIN 003

CAMS 502 **The Sanskrit Language** (3) An introduction to the structure and history of Sanskrit, with special emphasis on reading and translating.
Effective: Summer 2011
Prerequisite: LATIN 003

CAMS 503 **Seminar on Ancient Mediterranean Languages** (3 per semester, maximum of 6) An in-depth examination of the ancient languages of the Mediterranean basin, including Indo-European and non-Indo-European languages.
Effective: Summer 2011
Prerequisite: LATIN 003, LING 502

CAMS 504 **Topography of Ancient Rome** (3) Lectures and readings on physical development of the ancient city of Rome from earliest habitation to time of later empire.
Effective: Spring 2007

CAMS 520 **Advanced Sumerian** (3) Advanced study of Sumerian grammar and cuneiform writing through the reading of Sumerian literary texts.
Effective: Summer 2009

CAMS 521 **Advanced Akkadian** (3) Advanced study of Akkadian grammar and the cuneiform script through the reading of texts in various dialects.
Effective: Summer 2009

CAMS 522 **Comparative Semitics** (3) Overview of the Semitic language family and introduction to its comparative linguistic study.
Effective: Summer 2009

CAMS 592 **Proseminar** (3) Introduction to the history, research methods, historiography of modern scholarship on ancient Mediterranean studies.
Effective: Summer 2008

CAMS 593 **Research Seminar** (3-6) Significant research experience in the fields represented by CAMS; guided supervision in the preparation of a scholarly article.
Effective: Summer 2008
Prerequisite: CAMS 592

CAMS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1997

CAMS 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2001

CAMS 599 (IL) **Foreign Studies** (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

CAMS 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2002

Last Import from UCM: June 16, 2011 3:00 AM

College Student Affs (CSA)

CSA 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2009

CSA 501 Introduction to Student Affairs (3) An introduction to student affairs in higher education with consideration of various functional areas of the profession.
Effective: Spring 2004

CSA 502 Organization and Administration in Student Affairs (3) Formulation of policies as guides to the student personnel service programs; integration of program elements; research; current problems and trends.
Effective: Spring 2004

CSA 503 Student Development in College Environments (3) This course covers the knowledge and methods of human development theories and their applications in college settings.
Effective: Fall 2003

CSA 504 Research and Assessment in Student Affairs (3) This course provides the basic knowledge and skills necessary to plan, design, implement, and evaluation assessment programs in student affairs.
Effective: Fall 2003

CSA 505 Capstone Seminar (2) This seminar provides advanced students an opportunity to apply concepts from previous course work to current issues facing student affairs.
Effective: Summer 2004

CSA 506 Campus Environments (3) Examination of theoretical concepts and empirical findings that describe the college environment and explain its impact on students and staff.
Effective: Summer 2009

CSA 507 Social Justice Issues in Higher Education (3) Exploration of diverse student population, their different experiences, and the value university communities place on these differences.
Effective: Fall 2010

CSA 594 Research Topics (1-9) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2005

CSA 595 Internship (1-9) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 2005

CSA 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2005

CSA 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2005

CSA 597A (HI ED 597A) Advanced Student Development in College (3) This seminar-style course offers advance study of human development theories and their applications in college settings.
Effective: Summer 2011 Ending: Summer 2011
Prerequisite: CSA 503 or HI ED 556 or by permission of program

CSA 597A The Role of Fund-Raising and Development in Higher Education (1) This course is designed to give future leaders in higher education an overview of how development operations function, as well as an understanding of the philosophies and challenges that successful programs must implement or overcome in order to be successful at maximizing gift support within an academic setting.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CSA 597B Peer Mentoring (3) Designed to prepare graduate students in developing successful practice as mentors for undergraduate students. This course will provide prospective mentors with the trusted ally to be an effective mentor. The knowledge gained will assist them as they empower students in successfully transitioning to and persisting in the

university environment.

Effective: Summer 2011 Ending: Summer 2011

Concurrent: HI ED 597C

CSA 597C Practicum in Student Affairs (3) Creative projects, including non-thesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2011 Ending: Summer 2011

Last Import from UCM: June 16, 2011 3:00 AM

Commonwealth College (CWC)

CWC 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Summer 2000

CWC 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Fall 2007

CWC 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2000
Prerequisite: prior approval of proposed assignment by instructor

CWC 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2000

CWC 496A Counseling Incoming College Students (3) This is the capstone experience for a student in Mont Alto's 4LASCC major who intends to go on to a graduate program in college student life and/or advising.
Effective: Summer 2011 Ending: Summer 2011

CWC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2000

CWC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2000

CWC 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

Communication Arts and Sciences (CAS)

CAS 402 Speech and Human Behavior (3) General semantics, thought, and human behavior; not offered at University Park campus.

Effective: Spring 2003

CAS 403 Interpersonal Communication Theory and Research (3) Examining behavior within interpersonal encounters, with emphasis on both theoretical/applied explanations for how and why people act during such interactions.

Effective: Spring 2003

Prerequisite: CAS 203

CAS 404 Conflict Resolution and Negotiation (3) Theories and strategies important for conceptualizing, developing, and managing conflict negotiation, mediation, and third-party intervention.

Effective: Spring 2003

Prerequisite: CAS 100

CAS 405 Family Communication Theory and Research (3) Explores the nature and functions of communication in family life; emphasis on meaning, patterns, and styles of family communication.

Effective: Summer 2002

Prerequisite: CAS 101, CAS 202

CAS 406H Honors Course in Communication Arts and Sciences (3) Individual study and seminar in selected areas or issues of speech communication.

Effective: Spring 2003

Prerequisite: an all-University average of B; approval of the departmental Honors Committee

CAS 410W Mother-Daughter Communication (3) Explores the mother-daughter relationship with an emphasis on understanding mother-daughter communication.

Effective: Summer 2010

Prerequisite: CAS 202

CAS 411 Rhetorical Criticism (3) Principles of rhetorical criticism examined through analysis of selected texts and critics.

Effective: Spring 2003

Prerequisite: CAS 201 orCAS 100

CAS 415 Rhetoric of Film and Television (3) Rhetorical analysis of the artistic forms and cultural structures of film and television; intensive study of selected examples.

Effective: Spring 2003

Prerequisite: CAS 100 orCOMM 150

CAS 420 Rhetorical Theory (3) Ancient, medieval, Renaissance, Enlightenment, and contemporary theories of rhetoric.

Effective: Spring 2003

Prerequisite: CAS 201

CAS 421 Communication and Aging (3) Concentrates on the pivotal role that communication plays in the social process of aging.

Effective: Summer 2007

Prerequisite: Three credits of CAS

CAS 422 (US) (AAA S 422) Contemporary African American Communication (3) A focused study on the continuities between African and African American culture and communication.

Effective: Summer 2005

Prerequisite: CAS 100

CAS 426W Communication Ethics (3) Ethical issues in public and private communication; role of communication in expressing and realizing individual and social values.

Effective: Spring 2003

Prerequisite: CAS 100

CAS 438 Rhetoric of Documentary (3) Rhetorical analysis of the documentary in film, television, and other media; historical and critical analysis of functions and form.

Effective: Spring 2003

Prerequisite: CAS 201

CAS 450W Group Communication Theory and Research (3) Selected theories of problem solving through group discussion emphasizing participation and leadership.

Effective: Spring 2003

Prerequisite: CAS 100 orCAS 250

CAS 452 Organizational Communication Theory and Research (3) Explores the nature and functions of communication in organizations; emphasis on concepts, tools, and skills for effective management of communication.

Effective: Spring 2003

Prerequisite: CAS 202 orCAS 252

CAS 452W Organizational Communication Theory and Research (3) Explores the nature and functions of communication in organizations; emphasis on writing and exploring concepts, tools, and skills for effective management

of communication.

Effective: Spring 2004

Prerequisite: CAS 202 or CAS 252

CAS 453 Health Communication Theory and Research (3) Principles of communication about health across the lifespan and within health-care contexts.

Effective: Spring 2006

Prerequisite: CAS 100

CAS 455 (US) (WMNST 455) Gender Roles in Communication (3) Explores the literature on gender research in the discipline of human communication.

Effective: Summer 2005

Prerequisite: CAS 202

CAS 470 Nonverbal Communication (3) Examining ways nonverbal messages, such as gestures, posture, vocal intonation, and facial expressions, affect us on a daily basis.

Effective: Spring 2003

Prerequisite: 6 credits in Communication Arts and Sciences

CAS 471 (US;IL) Intercultural Communication Theory and Research (3) Intercultural and cross-cultural communication research theory and practice as applied within and across national boundaries.

Effective: Summer 2005

Prerequisite: CAS 271

CAS 475 Studies in Public Address (3) History and criticism of public discourse; intensive analysis of selected public addresses and social movements.

Effective: Spring 2003

Prerequisite: CAS 100

CAS 478 Contemporary American Political Rhetoric (3) Analysis of selected speeches, debates, and persuasive campaigns and movements in recent American political history.

Effective: Spring 2003

Prerequisite: CAS 100

CAS 480 Group Performance of Literature (3) Applying storytelling skills and performance theory to the group presentation of literature; criticism of literature through group presentations.

Effective: Spring 2003

Prerequisite: CAS 100

CAS 483 Communication and Information Technology II (3) Theory and application of interactive internet-based communication and information management; for students who want a Liberal Arts approach.

Effective: Fall 2003

Prerequisite: CAS 283

CAS 494 Research Topics (1-12) Supervised student activities on research projects identified on an individual or small group basis.

Effective: Fall 2003

Prerequisite: prior approval of proposed assignment by instructor

CAS 494H Research Topics (1-12) Supervised student activities on research projects identified on an individual or small group basis.

Effective: Summer 2008

Prerequisite: prior approval of proposed assignment by instructor

CAS 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2003

Prerequisite: prior approval of proposed assignment by instructor

CAS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2002

CAS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2002

CAS 497A Communication and Leadership in Decision-Making Groups (3) Focuses on how leaders via their communicative behavior assure that the members of decision-making groups fulfill all essential task requirements.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

CAS 497H Introduction to Research Topics in Methodologies in Communication Arts and Sciences (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CAS 497H Introduction to Research Topics and Methodologies in Communication Arts and Sciences (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special

interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

CAS 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2002

CAS 499 (IL) **Foreign Studies** (1-9) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

CAS 500 **Historical Public Address** (3 per semester, maximum of 9) Special topics in American public address, 1765-1900; emphasis on rhetoric of revolution, reform, and reaction.

Effective: Spring 2003

CAS 503 **Rhetorical Criticism** (3 per semester/maximum of 6) An advanced seminar in the history, theory, methods, and practice of rhetorical criticism.

Effective: Spring 2003

Prerequisite: CAS 411

CAS 504 **Contemporary Public Address** (3 per semester, maximum of 9) Special topics in recent history of American public address, including speeches, debates, persuasive campaigns, and social movements in America 1900-present.

Effective: Summer 2002

CAS 505 **Historical Development of Rhetorical Theory** (3 per semester/maximum of 9) Study of one or more periods of rhetorical theory from Greek antiquity to 1900.

Effective: Spring 2005

Prerequisite: CAS 420

CAS 506 **Contemporary Rhetorical Theory** (3 per semester/maximum of 6) A study of rhetorical theory from 1930 to the present, focusing on semantic, political, sociological, symbolic, and philosophical perspectives.

Effective: Spring 2005

Prerequisite: CAS 411, CAS 505

CAS 507 **Issues in Rhetorical Theory** (3 per semester, maximum of 6) Theoretical, analytical, philosophical, and critical problems in human communication, with application of humanistic and social scientific research framework.

Effective: Fall 2003

Prerequisite: CAS 420

CAS 510 **Pedagogy in Communication Education** (3) Philosophical, theoretical, and practical issues faced by the beginning college instructor.

Effective: Spring 2003

Prerequisite: SPCOM 502 and 9 additional credits at the 400 or 500 level in speech communication clinical speech or theatre arts

CAS 515 **Rhetoric and Media** (3 per semester, maximum of 9) Seminar in the application of rhetorical theory and criticism to television, film, and other media.

Effective: Spring 2003

CAS 530 **Political Communication and Media** (3) Study of rhetorical and communicative dimensions of contemporary political communication with particular attention to electronic media.

Effective: Spring 2004

CAS 550 **Social Influence** (3 per semester/maximum of 6) Theory and devices of persuasion; analysis of persuasive discourse.

Effective: Spring 2003

Prerequisite: 6 credits in Communication Arts and Sciences

CAS 552 **Organizational Communication** (3) Seminar that explores the major theoretical perspectives and research findings within formal and informal organizations.

Effective: Fall 2003

CAS 553 (PHP 553, HLS 553) **Disaster Communication** (3) This seminar provides students with a comprehensive understanding of the multifaceted nature of disaster communication across phases of a disaster.

Effective: Spring 2011

CAS 554 **Small Group Communication** (3 per semester/maximum of 6) Communication variables in small groups. Experimental research and innovations in communication in vocational, therapeutic, and educational groups.

Effective: Fall 2003

CAS 555 **Interpersonal Communication** (3 per semester/maximum of 6) Investigation of the communicative management of ongoing relationships; examination of how communication both creates and responds to exigencies of friendship.

Effective: Spring 2003
Prerequisite: CAS 403

CAS 556 Relational Communication (3) Examines theories and research focused on understanding communication in intimate (or potentially intimate) relationships.

Effective: Spring 2003
Prerequisite: CAS 403

CAS 557 Health Communication (3) Provides experience in making decisions about planning, implementing, and evaluating communication in community-based health campaigns to achieve health promotion/education.

Effective: Summer 2002
Prerequisite: CAS 453

CAS 558 Family Communication (3) Examines theories and research focused on understanding communication in family contexts.

Effective: Spring 2003
Prerequisite: CAS 405

CAS 559 Lifespan Communication (3) How various communication processes such as language skills, interpersonal relationship definition and management, social support change cross the lifespan.

Effective: Spring 2003
Prerequisite: CAS 403 or equivalent

CAS 560 Communication Theory (3) This course introduces graduate students to the philosophical underpinnings of communication research and develops skills in theory construction.

Effective: Summer 2002
Prerequisite: CAS 403

CAS 561 Quantitative Research Methods (3) Introduces graduate students to principles, issues, and design considerations underlying social scientific methodology; material is applied to communication research.

Effective: Summer 2002
Prerequisite: CAS 403

CAS 562 Qualitative Research Methods (3) Qualitative approaches to investigating human experience using tools such as interviewing and observation.

Effective: Spring 2008

CAS 571 Intercultural Communication (3) Detailed investigation into intercultural communication, focusing on differences in systems and potential areas of miscommunication.

Effective: Spring 2003
Prerequisite: CAS 471

CAS 581 (APLNG 581) Discourse Analysis (3) Overview of theories and approaches to the analysis of spoken and/or written discourse.

Effective: Spring 2004

CAS 582 Communication and Information Technology (3) An examination of communication and information technologies in social, professional, commercial, and educational contexts.

Effective: Summer 2002
Prerequisite: CAS 483

CAS 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 2004

CAS 594 Research Topics (1-12) Supervised student activities on research projects identified on an individual or small group basis.

Effective: Spring 2004
Prerequisite: prior approval of proposed assignment by instructor

CAS 595 Internship (1-9) Supervised off-campus, nongroup instruction.

Effective: Spring 2004
Prerequisite: prior approval of proposed assignment by instructor

CAS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2004

CAS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Fall 2002

CAS 597A Rhetoric, Race and Culture (3) This seminar considers the implications of contemporary theories of racial identity and political action for rhetorical theory and practice.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

CAS 597B Persuasive Message (3) Examines social scientific research on message form and processing including cognitive and emotional responding, message framing, narrative, and message rejection.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

CAS 597C Interdependent Data (3) This course familiarizes students with meta-analysis, dyadic analysis, and social network analysis. Assumes completion of basic statistics and SAS/SPSS familiarity.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

CAS 600 Thesis Research (1-15) No description.
Effective: Spring 2004

CAS 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 2004

CAS 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Students enrolled will, under supervision, teach SPCOM 100--introduction to speech communication: formal speaking, group discussion, analysis and evaluation of messages.
Effective: Spring 2004

CAS 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2004

CAS 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 2004

CAS 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 2004

Last Import from UCM: June 16, 2011 3:00 AM

Communication Sciences and Disorders (CSD)

CSD 433 Aural Rehabilitation (3) Methods for improving receptive skills of persons with hearing impairments; clinical observation and practice.

Effective: Fall 2003

Prerequisite: CSD 230

CSD 442 Introduction to Disorders of Articulation and Phonology (3) Etiology, diagnosis, and treatment of articulation disorders.

Effective: Fall 2010

Prerequisite: CSD 300, CSD 311 plus 3 additional CSD credits at the 300-level

CSD 444 Introduction to Organic Disorders of Speech and Language (3) Etiology, diagnosis, and principles of treatment of stuttering, and of speech- language disorders having organic bases.

Effective: Fall 2010

Prerequisite: CSD 301, CSD 331 plus 3 additional credits in CSD at the 300-level

CSD 451 An Introduction to Augmentative and Alternative Communication (3) Examination of assessment and intervention issues in augmentative and alternative communication techniques with persons with severe communication disorders.

Effective: Fall 2010

Prerequisite: CSD 300 plus 6 additional CSD credits at the 300-level

CSD 459W Principles of Clinical Management in Communication Disorders (3) Survey of principles and practices for diagnosing, interviewing, counseling, treating, reporting, and programming in Communication Disorders.

Effective: Fall 2010

Prerequisite: CSD 300, CSD 230 plus 3 additional credits in CSD at the 300-level

CSD 462 (US;IL) Clinical Bases of Language Disorders (3) Description of pathological language and cognitive development, and principles of assessment and remediation among individuals with communication disorders.

Effective: Fall 2010

Prerequisite: CSD 300 plus 6 additional credits in CSD at the 300-level

CSD 494H Senior Honors Thesis (1-6) Independent study related to a student's interests directed by a faculty super supervisor and culminating in the production of a thesis.

Effective: Spring 2006

Prerequisite: Approval of honors thesis advisor.

CSD 495A Speech Therapy Practicum (1-6) Demonstration and practice in examination, diagnosis, and treatment of speech problems.

Effective: Fall 2003

Prerequisite: CSD 395W, CSD 442

CSD 495B Audiology Practicum (1-5) Demonstration and practice in examination, diagnosis, and treatment of hearing impairment problems.

Effective: Fall 2003

Prerequisite: CSD 395W, CSD 433

CSD 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2003

CSD 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2003

CSD 500 Research Methods in Communication Sciences and Disorders (3) Methodology necessary for understanding and conducting research in communication disorders.

Effective: Spring 2004

Prerequisite: 15 credits in communication sciences and disorders

CSD 520 Physiologic and Acoustic Issues in Speech Science (3) Seminar in the physiologic and acoustic aspect of normal and disordered speech production.

Effective: Spring 2004

Prerequisite: 12 credits in communication sciences and disorders

CSD 531 Hearing Aids (4) Hearing aid circuitry, electroacoustic and real-ear measurements, hearing aid evaluation, follow-up procedures, and new advances for infants, children, and adults.

Effective: Spring 2004

Prerequisite: CSD 535

CSD 532 Instrumentation I (3) Acoustical instrumentation used for research in hearing, programs of hearing conservation, and noise control, including clinical and industrial applications.

Effective: Spring 2004

Prerequisite: 6 credits in acoustics audiology experimental psychology or speech science at the 400 level

- CSD 534 Noise and Hearing** (2) Noise-induced hearing problems; interference with communication; annoyance and community problems caused by acoustic energy; regulations and standards.
Effective: Spring 2004
Prerequisite: CMDIS 230, CMDIS 433 ; six credits in speech pathology and audiology
- CSD 535 Pure Tone Audiometry and Immitance Measures** (4) Techniques, interpretation, and differential diagnosis of hearing by pure tone audiometry, immitance measures, and related techniques.
Effective: Spring 2004
Prerequisite: CSD 230
- CSD 540 Phonological Disabilities** (3) Speech-sound production disorders in children and adults; methods of examination, diagnosis, and treatment.
Effective: Spring 2006
Prerequisite: CSD 442
- CSD 541 The Voice and Its Disorders** (3) Physical, physiological, and psychological bases of voice production; causes, nature, and symptoms of its disorders; current clinical methods in voice improvement.
Effective: Spring 2006
Prerequisite: CSD 444
- CSD 542 Stuttering** (3) Modern theories of causes of disorders of rhythm; methods of examination, diagnosis, and treatment.
Effective: Spring 2004
Prerequisite: CSD 442, CSD 495A
- CSD 545 Neuromotor Disorders of Speech** (3) Etiology and symptomatology of dysarthric and apraxic speech: diagnosis, treatment, and the team rehabilitative program approach to these disorders.
Effective: Spring 2006
Prerequisite: CSD 444
- CSD 546 Language Disorders in Adults** (3) Nature, etiology, diagnosis, and management of language disorders in adults.
Effective: Spring 2004
Prerequisite: 9 credits in communication sciences and disorders or related fields such as psychology linguistics or human development.
- CSD 547 Language Disorders in Children** (3) Nature, etiologies, diagnosis, and management of language disorders in children.
Effective: Spring 2006
Prerequisite: CSD 300
- CSD 548 Dysphagia** (3) Understanding the process of the swallowing mechanism and the management and treatment of swallowing disorders.
Effective: Summer 2006
Prerequisite: CSD 444 or equivalent
- CSD 549 Speech-Language Pathologists in the Schools** (3) Topics concerning service delivery in the school setting; legislation related to service delivery, special education enrollment, collaboration, caseload management, special populations.
Effective: Summer 2006
- CSD 550 Seminar in Communication Sciences and Disorders** (1-6) Advanced study of special problems and new developments in communication sciences and disorders.
Effective: Spring 2006
- CSD 551 Assessment and Intervention in Augmentative and Alternative Communication** (3) Research results in augmentative and alternative communication (AAC); implications for assessment, prescription of AAC systems, and intervention planning in AAC.
Effective: Spring 2006
- CSD 567 Audiology for Hearing and Speech Clinicians** (3) Etiology, measurement, and differential diagnosis of hearing loss; overview of aural rehabilitation, including hearing aids and auditory training systems.
Effective: Spring 2004
Prerequisite: CSD 230, CSD 433 ; 6 credits in communication sciences and disorders.
- CSD 572 Psychoacoustics in Communication Sciences and Disorders** (4) Perceptual phenomena of normal audition supported by reviews of methods and principles of psycho-physical measurement and of hearing theory.
Effective: Spring 2004
Prerequisite: 6 credits of acoustics or communication sciences and disorders
- CSD 574 Pediatric Audiology** (3) Etiology, differential diagnosis, habilitation, and rehabilitation of hearing loss associated with infants, preschool, and school-age children.
Effective: Spring 2004
Prerequisite: CSD 535 or CSD 567
- CSD 575 Speech and Special Audiological Tests** (4) Theory, administration, and interpretation of special audiological tests to determine the site of lesion of a hearing loss.
Effective: Spring 2004

Prerequisite: CSD 230

CSD 595A Speech/Language Intervention (1-3) Instruction in and application of therapy procedures, including a weekly class and direct therapeutic intervention with individuals across the lifespan.
Effective: Spring 2006

CSD 595C Speech/Language Therapy Externship (7-15) Full-time clinical experience in speech/language intervention and assessment procedures at an off-campus site.
Effective: Spring 2006
Prerequisite: 45 credits in communication sciences and disorders and accrual of >200 clinical hours

CSD 595E Audiology Practicum (1-5) No description.
Effective: Spring 2004
Prerequisite: CSD 531

CSD 595G Speech/Language Diagnostics Practicum (1-2) Instruction in and application of assessment procedures, including pre- and post-evaluation meetings and direct assessment with individuals across the lifespan.
Effective: Spring 2006

CSD 595I Speech Pathology Mini-Placement (1-6) Part-time clinical experience in speech/language intervention and assessment procedures at an off-campus site.
Effective: Spring 2006

CSD 595J Audiology Third Site (1-2) Internship course.
Effective: Spring 2004

CSD 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2004

CSD 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2003

CSD 597B Advanced Phonological Processing and Disorders (2) Advanced study of disordered speech sound production including phonological processing and articulation disorders.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CSD 597D AAC Research and Clinical Issues (1-5) This seminar will focus on augmentative and alternative (AAC) research and clinical issues for speech-language pathologists.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CSD 597K MOSAIC: Clinical Issues for SLPs Working with Immigrant Children (1-5) This seminar will focus on issues for speech-language pathologists serving children who are English Language Learners with communication disabilities.
Effective: Summer 2011 Ending: Summer 2011

CSD 597K MOSAIC: Clinical Issues for SLPs Working with Immigrant Children (1-5) This seminar will focus on issues for speech-language pathologists serving children who are English Language Learners with communication disabilities.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CSD 600 Thesis Research (1-15) No description.
Effective: Spring 2005

CSD 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 2005

CSD 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) No description.
Effective: Spring 2005
Prerequisite: 40 graduate credits in CMDIS

Last Import from UCM: June 16, 2011 3:00 AM

Communications (COMM)

COMM 401 Mass Media in History (3) Relationship of news media to social, economic, and political developments in the Western world.
Effective: Fall 1986

COMM 402 International Reporting (3) International Reporting is an advanced level course in the College of Communications designed to give student journalists experience in reporting the news in a foreign country.
Effective: Summer 2011
Prerequisite: COMM 260W, COMM 360, COMM 465 and permission of program

COMM 403 Law of Mass Communications (3) Nature and theories of law; the Supreme Court and press freedom; legal problems of the mass media.
Effective: Fall 1986

COMM 403H Law of Mass Communications (3) Nature and theories of law; the Supreme Court and press freedom; legal problems of the mass media.
Effective: Spring 2006

COMM 405 Political Economy of Communications (3) Structure and functions of American and other mass communications systems and their relationship to political and economic systems.
Effective: Spring 2011
Prerequisite: ECON 102

COMM 405H Political Economy of Communications (3) Structure and functions of American and other mass communications systems and their relationship to political and economic systems.
Effective: Spring 2011
Prerequisite: ECON 102

COMM 406 Electronic News Gathering and Editing (3) Intermediate level skills in creating and editing television news packages.
Effective: Spring 2008
Prerequisite: COMM 315 or COMM 283W

COMM 408 (S T S 408) Cultural Foundations of Communications (3) Examination of oral, scribal, print, industrial, and electronic cultures; analysis of impact of technology on communications and social structure.
Effective: Spring 2009
Prerequisite: select 3 credits from COMM 100, COMM 110, COMM 118, COMM 150, COMM 180, COMM 251, COMM 260W, COMM 320, COMM 370 ; or 3 credits of S T S

COMM 409 News Media Ethics (3) Ethical problems in the practice of journalism; principal public criticisms of news media; case study approach.
Effective: Fall 2006

COMM 409H News Media Ethics (3) Ethical problems in the practice of journalism; principal public criticisms of news media; case study approach.
Effective: Fall 2006

COMM 410 (IL) International Mass Communications (3) The role of international media in communication among and between nations and people. Complement to COMM 419.
Effective: Spring 2009
Prerequisite: select 3 credits from the following COMM 100, COMM 110, COMM 118, COMM 150, COMM 180, COMM 251, COMM 260W, COMM 320 or COMM 370

COMM 411 Cultural Aspects of the Mass Media (3) The mass media as creators and critics of mass culture in American life; relationships between the media and mass culture.
Effective: Spring 2009
Prerequisite: 6 credits in the arts or the humanities; and 3 credits selected from the following COMM 100, COMM 110, COMM 118, COMM 150, COMM 180, COMM 251, COMM 260W, COMM 320 or COMM 370

COMM 411H Cultural Aspects of the Mass Media (3) The mass media as creators and critics of mass culture in American life; relationships between the media and mass culture.
Effective: Spring 2009
Prerequisite: 6 credits in the arts or the humanities; and 3 credits selected from the following COMM 100, COMM 110, COMM 118, COMM 150, COMM 180, COMM 260W, COMM 320 or COMM 370

COMM 412 Sports, Media and Society (3) Sport and media relationship in American culture.
Effective: Summer 2006

COMM 413 The Mass Media and the Public (3) Nature of mass communications, relationships between mass media and public, media influences on opinion; social pressures on the media.

Effective: Spring 2009

Prerequisite: 3 credits selected from the following: COMM 100, COMM 110, COMM 118, COMM 150, COMM 180, COMM 251, COMM 260W, COMM 320 or COMM 370

COMM 413W The Mass Media and the Public (3) Social-level and political theories of the relationships between media and public; media influences on public opinion; social pressure on the media; political communications.

Effective: Spring 2011

Prerequisite: select 3 credits from the following: COMM 100, COMM 118, COMM 150, COMM 180, COMM 251, COMM 260W, COMM 320 or COMM 370 and select 3 credits from the following: COMM 304, COMM 420

COMM 414 Media Management (3) Theoretical bases and practical approaches for management and administration of communications projects, organizations, and resources.

Effective: Spring 2008

Prerequisite: COMM 100 or COMM 251

COMM 415 Advanced Photography for Communications (3) Advanced applications in documentary photography emphasizing the narrative qualities of imagery, and utilizing digital technologies.

Effective: Fall 2010

Prerequisite: COMM 215 or COMM 269 and permission of program

COMM 417 Ethics and Regulation in Advertising and Public Relations (3) Ethical issues in practice of advertising and public relations; legal and regulatory issues; case studies.

Effective: Spring 2007

Prerequisite: COMM 320 or COMM 370

COMM 418 Media Effects: Theory and Research (3) Investigation of social and psychological effects of media messages and technologies via theories and empirical evidence pertaining to processes of effects.

Effective: Spring 2007

Prerequisite: COMM 118 and COMM 304 or equivalent

COMM 419 (US;IL) World Media Systems (3) Comparative study of modern media systems of mass communications in selected foreign countries.

Effective: Spring 2009

Prerequisite: select 6 credits in the arts or the humanities; and 3 credits from the following: COMM 100, COMM 110, COMM 118, COMM 150, COMM 180, COMM 251, COMM 260W, COMM 320 or COMM 370

COMM 419H (US;IL) World Media Systems (3) Comparative study of modern media systems of mass communications in selected foreign countries.

Effective: Spring 2009

Prerequisite: select 6 credits in the arts or the humanities; and 3 credits from the following: COMM 100, COMM 110, COMM 118, COMM 150, COMM 180, COMM 251, COMM 260W, COMM 320 or COMM 370

COMM 420 Research Methods in Advertising and Public Relations (3) Primary and secondary research methods used in the development of solutions to advertising and public relations problems.

Effective: Summer 2002

Prerequisite: COMM 320 or COMM 370; STAT 200

COMM 421W Advertising Creative Strategies (3) Planning, designing, writing advertisements; introduction to graphics and production techniques and processes; layout and copywriting practice and critiques.

Effective: Spring 2004

Prerequisite: COMM 320

COMM 422 Advertising Media Planning (3) Analysis, selection, and scheduling of advertising media; examination of algorithms, technologies, and software used in media planning.

Effective: Fall 1986

Prerequisite: COMM 320

COMM 424 Advertising Campaigns (3) Advertising campaign problems from the viewpoint of the national advertiser and advertising agency; production of a complete advertising campaign.

Effective: Spring 2007

Prerequisite: COMM 420 or COMM 304; COMM 421W, COMM 422

COMM 425 Advertising Message Strategy (3) Advanced work in developing message strategies for advertising campaigns; presentation and defense of strategic plans; extensive practice in creating advertisements.

Effective: Spring 2001

Prerequisite: COMM 421W, COMM 422

COMM 426 International and Intercultural Strategic Communication (3) Advertising and public relations in the international and intercultural arenas; multicultural strategic communications strategies.

Effective: Summer 2006

Prerequisite: COMM 320 or COMM 370

COMM 427 Client/Agency Relations (3) Building and maintaining client/agency relationships in advertising, public relations and direct response agency business functions.

Effective: Summer 2006

Prerequisite: Advertising Option - Prerequisite or concurrent - One can be taken concurrently: COMM 421, COMM 422 .
Public Relations Option - Prerequisite: COMM 471 Prerequisite or concurrent: COMM 473

COMM 430 Mass Media and Politics (3) Study of mass media as institutions and the effects of the mass media on politics, public policy, and citizens.

Effective: Spring 2008

Prerequisite: COMM 100 or COMM 251

COMM 433 Film History for Filmmakers II: The Development of the Cinema from 1960 to the Present (3) History of the art, industry, economics, culture, and technology of cinema from 1960 to the present.

Effective: Summer 2010

Prerequisite: COMM 333

COMM 436 Advanced Audio Production (3) Advanced concepts and techniques of audio production in analog and digital formats with hands-on experience in recording, mixing and editing.

Effective: Spring 2008

Prerequisite: COMM 374

COMM 437 Advanced Documentary Production (3 per semester/maximum of 6) Advanced exploration of documentary production techniques and aesthetics through the completion of a short video project.

Effective: Spring 2011

Prerequisite: COMM 337W, COMM 340, COMM 342W

COMM 438 Advanced Narrative Production (3 per semester/maximum of 6) Advanced exploration of narrative production techniques and aesthetics through the completion of a short film or video project.

Effective: Spring 2011

Prerequisite: COMM 338, COMM 340, COMM 342W

COMM 439 Advanced Alternative Production (3 per semester/maximum of 6) Advanced exploration in experimental and animation forms through the production of a film or video project.

Effective: Spring 2011

Prerequisite: COMM 339, COMM 340, COMM 342W

COMM 440 Advanced Cinematography and Lighting Techniques (3) Advanced exploration in camera, lighting, audio, and color-grading techniques, emphasizing technical skills as well as aesthetics.

Effective: Spring 2011

Prerequisite: COMM 340, COMM 342W and two of the following: COMM 337, COMM 338 or COMM 339 or permission of program

COMM 441 Advanced Graphic Design for Communications (3) Theory and practice designing graphic visual communication in commercial, non-commercial, and fine art formats for print and on-line media.

Effective: Spring 2011

Prerequisite: COMM 241 or COMM 371

COMM 442 Advanced Audio Video Production (3) Advanced techniques in video production applied to narrative, non-narrative and short documentary formats.

Effective: Summer 2011

COMM 443 Producing Workshop (3) This course will immerse students in the language and practice of producing film and video projects.

Effective: Spring 2011

Prerequisite: COMM 340, COMM 342W and two of either: COMM 337W, COMM 338 or COMM 339

COMM 444 Advanced Post-Production Techniques (3) This course offers intensive practical experience in editing, motion graphics and sound mixing techniques, emphasizing both technical skills and aesthetics.

Effective: Summer 2010

Prerequisite: COMM 340, COMM 342W and two of the following: COMM 337, COMM 338 or COMM 339

COMM 445 Directing Workshop (3) An advanced aesthetic and skill production course in directing for the screen.

Effective: Spring 2011

Prerequisite: COMM 340, COMM 342W and two of the following: COMM 337, COMM 338 or COMM 339

COMM 446 Writing for the Screen II (3) An advanced course in screenwriting that further develops elements of storytelling technique.

Effective: Spring 1994

Prerequisite: COMM 346

COMM 448 Advanced Group Production I (3) A two semester advanced production course emphasizing intensive collaborative film-video production from script through post-production.

Effective: Spring 2011

Prerequisite: COMM 340, COMM 342W and two of the following: COMM 337, COMM 338 or COMM 339 and permission of program

COMM 449 Advanced Group Production II (3) Continuation of advanced production course emphasizing intensive collaborative film-video production from script through post-production.

Effective: Spring 2011

Prerequisite: COMM 448

COMM 451 Topics in American Film (3 per semester, maximum of 6) Critical and historical studies of American films. Analysis of directing, cinematography, editing, screenwriting, and acting.

Effective: Summer 1989

Prerequisite: COMM 250

COMM 452 Topics in International Cinema (3 per semester, maximum of 6) Critical and historical studies of topics in non-American film. Analysis of theory, direction, cinematography, editing, and screenwriting.

Effective: Summer 1989

Prerequisite: COMM 250

COMM 453 (IL) (CMLIT 453) **Narrative Theory: Film and Literature** (3) Comparative study of the aesthetics and techniques of film and literature; close analyses of masters of each art form.

Effective: Fall 2006

Prerequisite: COMM 150 or 3 credits in literature

COMM 454 **Documentary in Film and Television** (3 per semester, maximum of 6) Study of representative films from various documentary movements, examining form, technique, trends, and audience objectives.

Effective: Spring 2001

Prerequisite: fourth-semester standing

COMM 455 **Advanced Film Theory and Criticism** (3 per semester, maximum of 6) Close examination of classic and contemporary film theory and critical perspectives.

Effective: Summer 1989

Prerequisite: COMM 250

COMM 456 **Media Criticism and Theory** (3) Critical and theoretical approaches to the analysis of media and communication.

Effective: Spring 2008

Prerequisite: COMM 371

COMM 457 **Media Audiences and Contexts** (3) Survey of the ways media attempt to influence audience reception and how audiences hold sway over media content.

Effective: Spring 2008

Prerequisite: COMM 100 or COMM 251

COMM 458 **Media Law and Ethics** (3) The study and practice of key issues in media law and ethics, including libel law, conflict of interest, truth in advertising.

Effective: Spring 2008

Prerequisite: COMM 100 or COMM 251

COMM 459 **Cultural Effects of Interactive and Online Media** (3) Study of the global social impact and rhetorical limitations of converging media, emphasizing cross-cultural media influences.

Effective: Spring 2008

Prerequisite: COMMS 251

COMM 460W **Reporting Methods** (3) Techniques in reporting news and trends at the local, regional, and county levels. Emphasis on both deadline and interpretive reporting.

Effective: Fall 1990

Prerequisite: COMM 260W

COMM 461 **Professional Journalism Seminar** (3 per semester/maximum of 6) Problems of research, content, and form in journalistic specializations; topics of specialization announced each semester course is offered.

Effective: Spring 1988

Prerequisite: COMM 260W

COMM 462 **Feature Writing** (3) Reporting and writing the human interest article for newspapers and magazines.

Effective: Spring 2008

Prerequisite: COMM 260W

COMM 463 **Newspaper Design** (3) This course will cover newspaper design. Students will learn to solve design problems, edit photos, and work with industry software.

Effective: Spring 2009

Prerequisite: COMM 160, COMM 260, COMM 467 or permission of program

COMM 464W **Editorial, Opinion and Commentary Writing** (3) Introduces techniques of editorial, opinion and commentary writing.

Effective: Spring 2008

Prerequisite: COMM 260W

COMM 465 **Television Reporting** (3) Television news reporting and production.

Effective: Spring 2008

Prerequisite: COMM 360

COMM 466 **Public Affairs Broadcasting** (3) Producing radio and television magazine programs featuring individually-produced mini-documentaries and public affairs interviews.

Effective: Summer 1990

Prerequisite: COMM 383 or COMM 465

COMM 467 **News Editing and Evaluation** (3) Concepts and procedures involved in processing news for various news media, but with emphasis on print media editing.

Effective: Spring 2001

Prerequisite: COMM 260W

COMM 468 **Graphic Applications in Print Communications** (3) Issues, concepts, and practice identified with contemporary design strategies for print journalism, advertising, and public relations.

Effective: Summer 1988

Prerequisite: COMM 260W or COMM 320

COMM 469 **Photography for the Mass Media** (3) Development of an informed and critical approach to

photocommunication; individual and team projects, seminars, and critiques.

Effective: Fall 1986

Prerequisite: COMM 269

COMM 470A Convergent Media News Service: Newspaper Production (3) Practicum emphasizing newsgathering and reporting for newspaper and for additional media formats.

Effective: Summer 2002

Prerequisite: COMM 260W

COMM 470B Convergent Media News Service: TV (3) Practicum emphasizing television news package production for periodic campus news program and for additional media formats.

Effective: Summer 2002

Prerequisite: COMM 260W

COMM 470C Convergent Media News Service: Radio and Online Publications (3) Practicum emphasizing streaming radio news package production or production of news pieces for online publications and for additional media formats.

Effective: Fall 2008

Prerequisite: COMM 242 or COMM 374 and COMM 260W

COMM 471 Public Relations Media and Methods (3) Analyzing media and audiences for public relations purposes; planning, designing, and writing public relations communications; press relations and publicity methods.

Effective: Spring 2004

Prerequisite: COMM 260W and COMM 370

COMM 472 Public Relations Event Planning (3) Effective planning, organization, implementation and evaluation of events planning.

Effective: Spring 2008

Prerequisite: COMM 370

COMM 473 Public Relations Campaigns (3) Case studies and problems in publicity and public relations in industry, government, and institutions.

Effective: Spring 2007 Ending: Fall 2011

Prerequisite: COMM 370, COMM 420 or COMM 304 and COMM 471

COMM 473 Public Relations Campaigns (3) Case studies and problems in publicity and public relations in industry, government, and institutions.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: COMM 370, COMM 420 or COMM 304 and COMM 471

COMM 474 Depth Reporting (3) Exploration of strategies for developing indepth newspaper or magazine articles, with an emphasis on gathering information and long-form writing.

Effective: Spring 2004

Prerequisite: COMM 260W

COMM 475 Issues for Newsroom Managers (3) Newspaper and television management, the state of the industry and topics that prospective employees should know about.

Effective: Spring 2004

Prerequisite: COMM 260W

COMM 476 Sports Writing (3) Techniques in sports reporting and writing for newspapers and magazines.

Effective: Summer 2005

Prerequisite: COMM 260, COMM 460

COMM 477 Sports Broadcasting (3) Techniques of sports broadcasting for radio and television.

Effective: Summer 2005

Prerequisite: COMM 260, COMM 360

COMM 478 Sports Information (3) Techniques of effective media relations used in a sports information office.

Effective: Summer 2005

Prerequisite: COMM 260

COMM 479 Telecommunication Networks (3) Economic, regulatory/business issues in the design/operation of large-scale telecommunication networks such as telephone, cable, wireless, and computer networks.

Effective: Spring 2011 Ending: Summer 2011

Prerequisite: COMM 180 and ECON 102 or ECON 014

COMM 479 Telecommunication Economics (3) Economic, regulatory/business issues in the design/operation of large-scale telecommunication networks such as telephone, cable, wireless, and computer networks.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: COMM 180 and ECON 102 or ECON 014

COMM 480 Television News (3) Produce a weekly television newscast.

Effective: Summer 2007 Ending: Summer 2011

Prerequisite: COMM 360, COMM 465 permission of program

COMM 480 Television News (6) Produce a weekly television newscast.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: COMM 360, COMM 465 permission of program

COMM 481 Advanced Multimedia Production (3) Advanced work in multimedia production using web authoring, video editing, audio editing, image editing and animation software.

Effective: Fall 2010

Prerequisite: COMM 270 or COMM 260W plus one of the following: COMM 269, COMM 360, COMM 460, COMM 462 or permission of program

COMM 482 Advanced Communication Workshop (4) Conceptualization, planning, and execution of a visual product on a selected topic utilizing an intensive group project-oriented laboratory approach.

Effective: Spring 2008

Prerequisite: COMM 371

COMM 483 Wireless Communications Industry (3) A broad examination of the wireless phone industry including its development, current structure and future.

Effective: Spring 2011

Prerequisite: COMM 381 and COMM 387

COMM 484 Emerging Telecommunications Technologies (3) Overview of technology of electronic media and related societal issues.

Effective: Spring 1992

Prerequisite: COMM 180

COMM 484H Emerging Telecommunications Technologies (3) Overview of technology of electronic media and related societal issues.

Effective: Spring 2005

Prerequisite: COMM 180

COMM 485 Analysis of Broadcast-Cable Policy (3) Analysis of current policy issues in Broadcast/Cable. Standards and methods for evaluating telecomm policy processes and outcomes.

Effective: Fall 2001

Prerequisite: COMM 381 or COMM 483

COMM 486 Telecommunications Ethics (3) Drawing on normative theory and political philosophy, this course explores problems in ethics and social responsibility in telecommunications.

Effective: Summer 2011

Prerequisite: COMM 180

COMM 487 Telecommunication Administration (3) Operation/administration decision-making for broadcasting, broadband, telecommunications, and information firms including sales, marketing, programming, customer service, technology adoption, finance and capital investment.

Effective: Spring 2002 Ending: Summer 2011

Prerequisite: COMM 387

COMM 487 Advanced Telecommunications Management and Leadership (3) Strategic management, leadership and ethics issues including marketing, financing, entrepreneurship, and innovation.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: COMM 387

COMM 488 Writers' Seminar (3) Workshop designed for advanced students interested in professional writing, involving extensive mutual and self-criticism.

Effective: Spring 2008

Prerequisite: COMM 230W or COMM 260W

COMM 489W Media and Information Industries (3) The structure, conduct and performance of firms and industries in the electronic media and information sectors.

Effective: Spring 2004

Prerequisite: COMM 387 or equivalent

COMM 490 Issues in Electronic Commerce: Policy and Implementation (3) Analysis of policy, strategic issues, and implications raised by the rapid growth of electronic commerce over the Internet.

Effective: Fall 2001

Prerequisite: COMM 180 for telecom major; permission of instructor for non-telecom majors

COMM 490A Convergent Media Seminar (3) This seminar examines media convergence issues, trends, and effects on society through discussions, presentations, and creation of a capstone project.

Effective: Summer 2002

Prerequisite: seventh- or eighth-semester standing and 3 credits of COMM 470A, COMM 470B or COMM 470C

COMM 491 International Telecommunications and Trade Policy (3) Development in the law, policy, and business of international telecommunications; emphasis on multilateral forums--International Telecommunications Union and World Trade Organization.

Effective: Fall 2001

Prerequisite: COMM 180

COMM 492 Internet Law and Policy (3) Development in the law, policy, and business of Internet-mediated communications and commerce; emphasis on impact on existing legal, regulatory, and economic models.

Effective: Fall 2001

Prerequisite: COMM 180

COMM 493 Entrepreneurship in the Information Age: Senior Seminar (3) Provides students with knowledge/tools to take their innovation/technology idea through the business planning, capital, and operations budgeting processes.

Effective: Fall 2001

Prerequisite: COMM 387

COMM 494 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1994

COMM 494H Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

COMM 495 Internship (1-3 per semester/maximum of 6) Supervised practicum with newspapers, broadcasting stations, public relations, and advertising agencies.
Effective: Spring 2008
Prerequisite: continuing student majors in the College of Communications; departmental approval

COMM 495A Internship (1-6 per semester/maximum of 6) Supervised practicum with newspapers, broadcasting stations, public relations, and advertising agencies.
Effective: Spring 2008
Prerequisite: continuing student majors in the College of Communications; departmental approval

COMM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1986

COMM 496A Analysis of American Cinema (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

COMM 496H Honors Independent Studies (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

COMM 496H Honors Independent Studies (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

COMM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1986

COMM 497A Social Media for Public Relations (3) This course will explore social media technologies and how to effectively use social media to communicate strategic public relations messages.
Effective: Summer 2011 Ending: Summer 2011

COMM 497A Public Relations Social Media (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

COMM 497B (INART 497B) 3D Computer-Generated Imagery (3) Introduces core concepts in 3D CGI including modeling, animation, cameras, lighting and texturing with a focus on industry needs.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

COMM 497B Bateman Public Relations Competition (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

COMM 497C Globalization and the Media (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

COMM 497C Special Topics: AAF National Students Advertising Competition (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

COMM 497D Media and Government (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

COMM 497F Perspectives on American Journalism (3) Formal courses given infrequently to explore, in depth, a

comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

COMM 497G Joe Paterno: Communications and the Media (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

COMM 497K Wireless Communication (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

COMM 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2001

COMM 498A Communications for Investor Relations (3) This course focuses on understanding the communications environment involved in creating a dialogue between publicly held companies and their investors and financial community.
Effective: Summer 2011 Ending: Summer 2011

COMM 498A In the Game (3) Produce half-hour sports magazine style show to air on College HD channel and Web. Students will produce, report, anchor and direct the show. Registration by application.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

COMM 498A In The Game (3) Produce half-hour sports magazine style show to air on College HD channel and Web. Student will produce, report, anchor and direct the show. Registration by application.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

COMM 498B Webcast Production (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

COMM 498C Public Relations Crisis Communications (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

COMM 498E Big 10 Network (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

COMM 498E Big 10 Network (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

COMM 499 (IL) Foreign Study--Mass Communications (1-12) Study of mass communication systems and practices in selected foreign countries.
Effective: Summer 2005
Prerequisite: departmental approval

COMM 501 Proseminar in Mass Communications (3 per semester/maximum of 99) Overview of paradigms in mass communications research
Effective: Spring 2003
Prerequisite: admission to doctoral program

COMM 502 Pedagogy in Communications (3) The purpose of this seminar is to train doctoral students to teach in the communications discipline at the college/university level.
Effective: Spring 2004

COMM 504 Seminar in the History of Mass Communication (3) No description.
Effective: Fall 1986

COMM 505 International Communication Problems (3) Legal and communications problems of the international flow of news and opinion; international press codes.
Effective: Fall 1986

COMM 506 Introduction to Mass Communications Research (3) The scientific method; survey of basic concepts of theoretical and empirical research; variety of methodology; criteria for adequate research.

Effective: Fall 1986

COMM 507 News Media and Public Opinion (3) Problems in the function, techniques, and responsibilities of press, radio, and television in forming and interpreting opinion.

Effective: Fall 1986

COMM 508 The Literature of Journalism (3) No description.

Effective: Fall 1986

COMM 509 Journalism Ethics (3) Evolving ethics, standards, and social responsibility in American journalism; business nature of news media; case studies.

Effective: Fall 1986

COMM 510 Comparative Theories of Press Systems (3) Institutional structure and normative functions of press systems in modern societies, as shaped by prevailing world view and social organization.

Effective: Fall 1986

COMM 511 Mass Communications Research Methods II (3) Problems of bibliographical research; evaluation of sources and materials in mass communications history, biography, structure, ethics, and other areas.

Effective: Fall 1986

Prerequisite: COMM 506

COMM 512 Government and Mass Communications (3) Problems of freedom of information; governmental efforts to control mass communication agencies; government news coverage; public information agencies.

Effective: Fall 1986

COMM 513 Constitutional Problems of the News Media (3) Problems involving conflict between guarantees of press freedom in the First and Fourteenth Amendments and rights and privileges of others.

Effective: Fall 1986

COMM 514 Political Economy of Communications (3) Structure and functions of United States and global media systems and their relationship to political and economic systems.

Effective: Fall 2003

COMM 515 MA Proseminar in Mass Communications (3) An introduction to graduate studies for MA students in Media Studies and Telecommunications Studies.

Effective: Fall 2003

Prerequisite: First semester enrollment in MEDIA or TELECOM M.A. programs

COMM 516 Introduction to Data Analysis in Communications (3) To understand and be able to use data analysis techniques common to research in communications.

Effective: Spring 2004

Prerequisite: COMM 506 or consent of program

COMM 517 Psychological Aspects of Communication Technology (3) Investigation of psychological aspects of human-computer interaction (HCI) and computer-mediated communication (CMC).

Effective: Spring 2007

Prerequisite: COMM 304 or COMM 506

COMM 518 Media Effects (3) Advanced study of the effects of media messages and technologies via theories and empirical evidence pertaining to processes of effects.

Effective: Spring 2005

Prerequisite: COMM 506 or permission of instructor

COMM 520 Seminar in Advertising Problems (3) No description.

Effective: Fall 1986

COMM 521 Advertising Perspectives (3) An overview of advertising in industrial societies including institutional issues; socio-demographic issues; public policy issues; and ethical issues.

Effective: Spring 1992

COMM 522 Social and Cultural Aspects of Advertising (3) Analysis of advertising from a cultural/literary perspective; emphasis on semiotic and hermeneutic analysis; advertising as social communication.

Effective: Spring 1992

COMM 540 Studio in Directing for the Screen (6 per semester/maximum of 12) Conceptualizing, breaking-down, planning, direction, and editing of narrative, documentary, or experimental films and videos.

Effective: Summer 1990

COMM 542 **Studio in Screenwriting** (6 per semester/maximum of 12) Conception, development, and polishing of screenplays and treatments for narrative, documentary or experimental films and videos.
Effective: Summer 1990

COMM 544 **Studio in Production** (6 per semester/maximum of 12) Conception, development, and polishing of a production specialty.
Effective: Summer 1990

COMM 545 **Studio in Project Development** (4) Conception, development, and polishing of a project proposal.
Effective: Spring 1990

COMM 549 **Combined Seminar in Filmmaking** (2 per semester, maximum of 8) Critical examination of student's work as it relates to the project as a whole.
Effective: Spring 1991
Concurrent: COMM 540 COMM 542 OR COMM 544

COMM 550 **Film Theory and Criticism** (3) Studies in traditional and contemporary film theory and criticism.
Effective: Spring 2005

COMM 553 **Special Problems in Film and TV** (1-3) No description.
Effective: Fall 1986

COMM 556 **Close Textual Analysis--Film and Video** (3) Using theoretically-informed, close textual analysis approach, course will explore the way films and videos generate meaning.
Effective: Spring 1990
Prerequisite: COMM 501

COMM 580 **Seminar in Telecommunications** (3) Study of the historical and contemporary issues and problems in telecommunications.
Effective: Fall 1986

COMM 581 **History of Electrical, Electronic, and Optical Communications** (3) Study of the historical development of the telecommunications industries.
Effective: Fall 2001

COMM 582 **Ethics and Emerging Communications Technology** (3) Identification and analysis of ethical issues raised by electronic communications technologies.
Effective: Spring 2004

COMM 583 **Seminar on United States Telecommunications Policy** (3) Examination of the United States telecommunications policy process and current issues.
Effective: Spring 2004

COMM 584 **International Telecommunications and Trade Policy** (3) An interdisciplinary perspective that investigates contemporary debates and ongoing or anticipated conflicts in international telecommunications and trade policy.
Effective: Fall 2000

COMM 585 **Media & Telecommunications Industries** (3) Study the structure and performance of media, telecommunications and information industries applying principles and ideas from microeconomics, finance and communications.
Effective: Spring 2005

COMM 586 **Issues E-Commerce Policy** (3) To research, understand and analyze selected issues in e-commerce policy.
Effective: Summer 2003

COMM 587 **Internet Law and Policy** (3) Examination of legal, policy and business developments in Internet-mediated communications emphasizing the impact on existing regulatory and economic models.
Effective: Summer 2003

COMM 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

COMM 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2000

- COMM 594A Telecommunications Studies Masters Paper (3)** A significant research paper completed under the direction of a faculty adviser.
Effective: Spring 2002
Prerequisite: admission to the Telecommunications Masters Program
- COMM 594B Research Project Apprenticeship (1-3 per semester, maximum of 3)** Provides opportunities for doctoral students to enhance their knowledge of comparative research methods by working on established faculty research projects.
Effective: Spring 2002
Prerequisite: doctoral level standing
- COMM 595 Internship (1-18)** Supervised off-campus, non-group instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2000
- COMM 596 Individual Studies (1-9)** Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1986
- COMM 597 Special Topics (1-9)** Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987
- COMM 597A The Cultural Industries (3)** This course will consider the development of social theory and research methodologies as they intersect scholarship related to the cultural industries.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
- COMM 597B Advanced Data Analysis (3)** An examination of advanced data analytic techniques in communications, with an emphasis on applied understanding and hands-on application of data-analysis software.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
- COMM 597C Public Relations Theory (3)** This class provides an overview of the theoretical body of knowledge in public relations including theories pertaining to audience segmentation, relationship building, agenda setting, ethics, and crisis communication. Special attention will be given to theory building and development in the field. Research from a number of content areas will be discussed including social responsibility, advocacy, health, and international communication.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
- COMM 597D Cultural Work (3)** Cultural Work focuses primarily on the microsocial processes or organizational creative labor, using the work of scholars including Hesmondhalgh & Baker, Banks, Beck, Deuze, Ryan, Bourdieu, Toynbee, Mayer, Caldwell, Sennett, and Brewerton.
Effective: Summer 2011 Ending: Summer 2011
- COMM 597E Seminar on U.S. and International Telecommunications Policy (3)** An interdisciplinary perspective employing a variety of social science methods and approaches that investigates contemporary debates, current issues and ongoing or anticipated conflicts in both U.S. and international telecommunications policy. Students will be introduced to both mainstream and alternative viewpoints regarding the study of policy and the role communications policy plays in social life.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
- COMM 597F Media and Culture (3)** This course will examine the ongoing effort to theorize the complex relationship between media and culture during the 20th Century and into our own. We will begin with seminal thinkers like Adorno and Benjamin who framed the debate, and work our way toward contemporary theorists like Zizek and Ranciere who have continued to problematize how different forms of media exert their forces on individuals and the cultures in which they live.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012
- COMM 600 Thesis Research (1-15)** No description.
Effective: Fall 1986
- COMM 601 Ph.D. Dissertation Full-Time (0)** No description.
Effective: Fall 1990
- COMM 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6)** Teaching or assisting in School of Communication courses by graduate students with previous news-editorial, advertising, and broadcasting experience.
Effective: Fall 1986
- COMM 610 Thesis Research Off Campus (1-15)** No description.
Effective: Fall 1986

COMM 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1990

Last Import from UCM: June 16, 2011 3:00 AM

Communications-CI (COMMS)

COMMS 438 **Magazine Editing** (3) Study and practice of the editing and design of magazines and newsletters.
Effective: Spring 2008

COMMS 500 **Communications and Cultural Theory** (3) This course is designed to provide students a broad background in communications and cultural theory.
Effective: Summer 2011

COMMS 503 **Research Methods in Communications** (3) This course prepares students to conduct research in communications using both qualitative and quantitative research methods.
Effective: Summer 2011

COMMS 519 **Communication Technology and Culture in History** (3) An advanced study of various interpretive approaches and methodological tools that are central to the analysis of cultural artifacts.
Effective: Summer 2011

COMMS 525 **Advanced Writer's Seminar** (3-9 per semester/maximum of 9) This course supports the development of advanced writing projects in a range of different genres.
Effective: Summer 2011

COMMS 555 **Media Discourse Analysis** (3) This course provides students with advanced theoretical approaches and methodological tools to analyze a variety of media discourses.
Effective: Summer 2011

COMMS 560 **Seminar on Global Culture and Communication** (3) This course explores the globalization of communication and communication technologies within a broad political, economic and cultural context.
Effective: Summer 2011

COMMS 568 **Media Production Workshop** (3-9 per semester/maximum of 9) This course prepares students for the creation of advanced media projects in traditional and digital media.
Effective: Summer 2011

COMMS 580 **Communications Master's Project** (3-6 per semester/maximum of 6) An original master's paper or creative production with critical paper.
Effective: Summer 2011
Prerequisite: COMMS 500;COMMS 503 ; 27 credits towards Master's in Communications

COMMS 600 **Thesis Research** (1-15 per semester/maximum of 99) No description.
Effective: Fall 2010

COMMS 610 **Thesis Research** (1-15 per semester/maximum of 99) No description.
Effective: Fall 2010

Last Import from UCM: June 16, 2011 3:00 AM

Community and Economic Development (CEDEV)

CEDEV 430 (AG EC 430) **Principles of Community Economic Development** (3) Concepts, strategies, and techniques of local economic analysis, planning, and development; case studies and decision-making exercises.

Effective: Spring 2004

Prerequisite: introductory course in economics

CEDEV 452 (R SOC 452) **Rural Organization** (3) Social organization and change in rural communities; use of sociological principles in analysis of rural problems and rural development.

Effective: Fall 2000 Ending: Fall 2011

Prerequisite: 6 credits in rural sociology sociology or psychology

CEDEV 452 **Rural Organization** (3) Social organization and change in rural communities; use of sociological principles in analysis of rural problems and rural development.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: 6 credits in rural sociology sociology or psychology

CEDEV 500 **Community & Economic Development and Leadership** (3) Understanding principles and strategies of community and economic development in relation to general systems theory, community decision making, and leadership strategies and roles in group and community settings.

Effective: Spring 2004

Prerequisite: graduate standing

CEDEV 505 (R SOC 505, AEE 505) **Leadership Development** (3) Exploration, understanding, and application of leadership roles, strategies, and principles in group and community settings.

Effective: Spring 2010

CEDEV 509 **Population, Land Use, and Municipal Finance** (3) Understanding the interaction of population characteristics, land use, municipal funds, and taxation in a locality and how they impact the operation and management of government jurisdictions.

Effective: Fall 2000

Prerequisite: graduate standing

CEDEV 516 (R SOC 516) **Change in Rural Society** (3) Social change in rural society, emphasizing prediction and control of the change process; even years.

Effective: Fall 2000

Prerequisite: graduate standing

CEDEV 517 (R SOC 517) **International Rural Social Change** (3) Implications of planned change for international rural societies, considering basic structural constraints, known institutional linkages, and potential synergetic consequences.

Effective: Fall 2000

Prerequisite: graduate standing

CEDEV 533 (AEREC 533) **Rural Development Research Methods and Topics** (3) Advanced theories and methods for rural economic development research.

Effective: Spring 2011

Prerequisite: ECON 521

CEDEV 575 **Methods and Techniques for Community and Economic Development** (3) Understanding and applying methods and hands-on experience with techniques used in community and economic development. Lab.

Effective: Fall 2000

Prerequisite: graduate standing and approval of the instructor

CEDEV 576 **Applications and Practices for Community and Economic Development** (1-6) Consideration of community and economic development applications in communities and practices of public and private organizations and agencies.

Effective: Fall 2000

Prerequisite: graduate standing and approval of the instructor

CEDEV 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Fall 2000

CEDEV 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2000

CEDEV 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Fall 2000

CEDEV 599 (IL) **Foreign Studies** (1-12, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.

Effective: Summer 2005

CEDEV 600 **Thesis Research** (1-15) No description.
Effective: Fall 2000

CEDEV 602 **Supervised Experience in College Teaching** (1-3) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Fall 2000

CEDEV 610 **Thesis Research** (1-15) No description.
Effective: Fall 2000

Last Import from UCM: June 16, 2011 3:00 AM

Community, Environment and Development (CED)

CED 404 Survey Research Methods (3) Students will learn empirical research methodology in the areas of environmental and natural resource economics.

Effective: Fall 2010

Prerequisite: CED 201 orECON 302, ECON 428

CED 409 Land Use Planning and Procedure (3) General land use planning laws and procedures.

Effective: Spring 2007

Prerequisite: 6 credits of B LAW CED ECON E R M E RRE PL SC R EST SOC S T S (any combination)

CED 410 The Global Seminar (3) Exploration of critical global issues relevant to sustainable development and the environment. Collaborative with other universities worldwide.

Effective: Spring 2011

Prerequisite: ECON 102 orECON 104;R SOC 011 orSOC 001

CED 417 (R SOC 417) Power, Conflict, and Community Decision Making (3) Impact of institutions on human interdependence and behavior, the structure of power, and community decision making and public policy.

Effective: Spring 2010

Prerequisite: R SOC 011 orSOC 001

CED 420 (US;IL) (R SOC 420, WMNST 420) Women in Developing Countries (3) Analysis of women's work, experiences, and development policies and practices in Africa, Asia, and Latin America.

Effective: Fall 2009

Prerequisite: 5th semester standing or above

CED 425 International Community and Economic Development (3) International community and economic development.

Effective: Spring 2007

Prerequisite: CED 152

CED 427W (S T S 427W, SOC 427W) Society and Natural Resource (3) Analysis of the relationships between societal development and enhancement and natural resources.

Effective: Summer 2008

Prerequisite: R SOC 011 orSOC 001

CED 429 Natural Resource Economics (3) Optimal management of resources; roles of markets and other institutions; resources and economic development; public policy.

Effective: Fall 2010

Prerequisite: ECON 302

CED 431W Economic Analysis of Environmental and Resource Policies (3) Economic analysis of environmental and natural resource policies, benefit-cost analysis, non-market valuation techniques; resource damage assessment.

Effective: Fall 2010

Prerequisite: ECON 302

CED 450 (IL) International Development, Renewable Resources, and the Environment (3) Theories of agricultural and economic development, with particular attention to interactions between development, renewable resources, and the environment.

Effective: Fall 2010

Prerequisite: 6 credits in agricultural economics or economics

CED 475 CED Integrated Capstone Experience (3) An experiential-learning course that provides a capstone learning experience for seniors graduating from the Community, Environment and Development major.

Effective: Spring 2007

Prerequisite: senior status only

CED 495A Internship in Community, Environment, and Development (1-15) Supervised field experience in an environmental setting.

Effective: Fall 2009

Prerequisite: prior approval of program

CED 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 2009

CED 497 Special Topics (1-18) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2009

CED 497A Community, Local Knowledge and Democracy (3) Understanding community decision making citizen-expert interactions and methods for resolving seemingly intractable local issues.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: ECON 102 andECON 104

CED 497B Population Dynamics and Analysis (3) Measurement and analysis of population dynamics and social trends such as fertility, mortality, migration, families and households, and economic wellbeing.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CED 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2011

CED 499A (IL) Issues in Economic, Community and Agricultural Development in Kenya (1-3) Develop viable economic and youth development options for vulnerable youth, culminating with three weeks in Kenya.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Last Import from UCM: June 16, 2011 3:00 AM

Comparative Literature (CMLIT)

CMLIT 400Y (US;IL) **Senior Seminar in Literary Criticism and Theory** (3) Discussions of theories of literature, of literary criticism, and particularly of the distinct methods of comparative study; individual projects.

Effective: Spring 2006

Prerequisite: seventh-semester standing; 18 credits in literature

CMLIT 401Y (IL) **The Western Literary Heritage I** (3) Major literary movements and authors in the literature of the Western world from the beginnings through the early Renaissance.

Effective: Spring 2006

Prerequisite: 3 credits in literature or history

CMLIT 402Y (US;IL) **The Western Literary Heritage II** (3) Major literary movements and authors in the literature of the Western world from the late Renaissance to the present time.

Effective: Spring 2006

Prerequisite: 3 credits in literature or history

CMLIT 403 (US) (LTNST 403) **Latino/a Literature and Culture** (3) Literary and other forms of cultural expression (film, music, art, and theater) are compared across different Latina/o communities.

Effective: Spring 2011

Prerequisite: 3 credits in the humanities or in any LTNST course or 4th-semester proficiency in Spanish

CMLIT 404 (IL) (ASIA 404) **Topics in Asian Literature** (3) Selected works from the major poetry, fiction, and drama of such countries as India, China, Japan.

Effective: Spring 2011

Prerequisite: 3 credits in literature or related field appropriate to this course

CMLIT 405 (US;IL) **Inter-American Literature** (3) This course examines the development of literature in Canada, the United States, Spanish America, the Caribbean area, and Brazil.

Effective: Spring 2006

Prerequisite: 3 credits in literature

CMLIT 406 (IL) **Women and World Literature** (3) Literature written by women, especially women from non-Western cultures; the spectrum of genres in which women writers have excelled.

Effective: Spring 2006

Prerequisite: 3 credits in literature or in women's studies

CMLIT 408 (IL) **Heroic Literature** (3) Traditional heroes, their traits and adventures; typical themes and examples chosen from the epics and sagas of world literature.

Effective: Spring 2006

Prerequisite: 3 credits in literature or folklore

CMLIT 410 (IL) **Literary Translation: Theory and Practice** (3) Emphasizing literary translation, a study of the theoretical and practical problems encountered in the processes of translation, transmission, and interpretation.

Effective: Spring 2011

Prerequisite: 18 credits in a foreign language

CMLIT 415 (GH;US;IL) **World Graphic Novels** (3) Critical analyses of form, genre, medium, and discourse of the graphic novel and its historical precedents in an international and comparative context.

Effective: Summer 2010

Prerequisite: 3 credits in literature

CMLIT 422 (IL) **African Drama** (3) Traditional and popular drama forms; modern anglophone and francophone drama; nationalism and social criticism in contemporary African drama.

Effective: Spring 2006

CMLIT 423 (IL) **African Novel** (3) From traditional oral narratives to modern autobiographical, historical, satirical, sociological, and allegorical forms; novelist as social critic.

Effective: Spring 2006

CMLIT 429 (ENGL 429) **New Media and Literature** (3) New media literary genres; critical discussion of creative works in digital media.

Effective: Summer 2010

CMLIT 430 (IL) **Global Modernisms** (3) A comparative investigation of global Modernisms, with an emphasis on the relations between modernism, modernity, and modernization.

Effective: Summer 2010

Prerequisite: 3 credits in literature

CMLIT 435 (IL) **Cultures of Globalization** (3) Cultural and literary effects of the process of globalization, with an emphasis on world literatures and transnationalism.

Effective: Summer 2010

Prerequisite: 3 credits of literature

CMLIT 438 (IL) **Fantastic Worlds: International and Comparative Perspectives** (3) A comparative, international study of fantastic worlds in literature and visual culture.

Effective: Summer 2010

Prerequisite: 3 credits in literature

CMLIT 443 (US;IL) **Transatlantic Literature** (3 per semester/maximum of 6) Comparative literary and cultural relations across the Atlantic Ocean; may include Europe, Africa, the Americas, and/or the Caribbean.

Effective: Spring 2011

Prerequisite: 3 credits in literature

CMLIT 446 (IL) **Postcolonial Literature and Culture** (3) Postcolonial literature and theory in a comparative and international context.

Effective: Summer 2010

Prerequisite: 3 credits in the study of literature

CMLIT 448 (IL) **Literary Cultures of Buddhism** (3) Comparative exploration of various Buddhist literary cultures, from the classical Indian subcontinent to modern movements like the Beats and dalit writing.

Effective: Summer 2010

Prerequisite: 3 credits in literature

CMLIT 449 (IL) **Literary Cultures of Islam** (3) Comparative discussion of the literary cultures of Islam from the seventh century to the present.

Effective: Summer 2010

Prerequisite: 3 credits in the study of literature

CMLIT 453 (IL) (COMM 453) **Narrative Theory: Film and Literature** (3) Comparative study of the aesthetics and techniques of film and literature; close analyses of masters of each art form.

Effective: Fall 2006

Prerequisite: COMM 150 or 3 credits in literature

CMLIT 455 (IL) **Ethics, Justice, and Rights in World Literature** (3) Concepts of ethics, justice, and rights, appearing in world literature and/or film.

Effective: Summer 2010

Prerequisite: 3 credits in the study of literature

CMLIT 459 **Topics in Theory** (3) Selected topics in this history of theory and literary criticism within a global, comparative context.

Effective: Summer 2010

Prerequisite: 3 credits in literature

CMLIT 470 (IL) **The Modern Novel** (3) Major novels of Joyce, Proust, Kafka, Thomas Mann, Nabokov, and others; their contributions to the art of the novel.

Effective: Spring 2011

Prerequisite: 3 credits in literature

CMLIT 471 (IL) **Poetry and Poetics** (3) Theoretical and practical concepts in the comparative, global history of poetry and/or poetics.

Effective: Summer 2010

Prerequisite: 3 credits in literature

CMLIT 480 (IL) **The International Folktale** (3) Traditional tales from various parts of the world: their origin, characteristics, forms; their transmission as oral narrative and written literature.

Effective: Spring 2006

Prerequisite: 3 credits in literature or folklore

CMLIT 486 (IL) **Tragedy** (3) Development of tragic drama and its relationship to social background and philosophical theory.

Effective: Spring 2006

CMLIT 487 (IL) **Comedy** (3) Development of comic drama and its relationship to social background and philosophical theory.

Effective: Spring 2006

CMLIT 488 (IL) (ENGL 488) **Modern Continental Drama** (3) From Ibsen to the drama of today: Strindberg, Chekhov, Hauptmann, Pirandello, Ionesco, Beckett, Genet, and others.

Effective: Spring 2006

Prerequisite: ENGL 015 or ENGL 030

CMLIT 490 **Video Game Studies** (3) A comparative look at the nature and history of video games as cultural artifacts, from Pong to online role-playing.

Effective: Summer 2010

Prerequisite: 3 credits in literature

CMLIT 491 (IL) **Literary Adaptation: International and Comparative Perspectives** (3) A comparative, international study of adaptations between literature and other media (film, theater, photography, music).

Effective: Summer 2010

Prerequisite: 3 credits in literature or other fields relevant to this course

CMLIT 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or

small-group basis.
Effective: Summer 1995

CMLIT 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

CMLIT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1995

CMLIT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1995

CMLIT 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1995

CMLIT 499 (IL) Foreign Study--Comparative Literature (3-6) Advanced courses offered on comparative literary topics as part of a foreign-study program.
Effective: Summer 2005
Prerequisite: 18 credits or equivalent in the appropriate foreign language; 6 credits in literature or related field appropriate to this course

CMLIT 501 Comparative Method in Literary Studies (3) Bibliography, research methods, and studies in comparative literature.
Effective: Summer 1995

CMLIT 502 Comparative Criticism I: Classical to Neoclassical (3) Issues in literary criticism from Plato and Aristotle to the mid-eighteenth century.
Effective: Summer 1995

CMLIT 503 Comparative Criticism II: Romantic to Contemporary (3) Principles and theories of literary criticism from eighteenth- and nineteenth- century beginnings to twentieth-century expansion and application.
Effective: Summer 1995

CMLIT 504 Studies in Literary Genres (3-6) The concept of genre and the evolution of genre theory; application to a specific genre, e.g., the lyric or the novel.
Effective: Summer 1995

CMLIT 505 Studies in Literary Periods and Movements (3-6) Comparative approaches to cohesive units within literary history, e.g., the Renaissance, the Enlightenment, Romanticism, Surrealism.
Effective: Summer 1995

CMLIT 506 Studies in Literary Themes and Motifs (3-6) Comparative approaches to recurrent literary themes and motifs; application to a specific example, e.g., literary Utopias or the Faust theme.
Effective: Summer 1995

CMLIT 507 Comparative Poetics (3 per semester/maximum of 6) Theoretical and practical concepts in the comparative, global history of poetry and/or poetics.
Effective: Summer 2010

CMLIT 510 Theory and Practice of Translation (3) Theories of translation and interpretation; importance of translation in literary transmission; application of theoretical concepts to individual translation projects.
Effective: Summer 1995
Prerequisite: 24 credits in a foreign language

CMLIT 521 Comparative Seminar in Inter-American Literatures (1-12) Comparative topics presenting literary works of the Americas--North America, South America, and the Caribbean--from early to present times.
Effective: Summer 2000

CMLIT 522 Comparative Seminar in Asian Literatures (1-12) Comparative topics presenting literary works of Asia, from the origins of literature in Asia to the present time.
Effective: Summer 2000

CMLIT 523 Comparative Seminar in African Literatures (1-12) Comparative topics presenting literary works of Africa,

from the origins of literature in Africa to the present time.
Effective: Summer 2000

CMLIT 543 **Literary Relations** (3 per semester/maximum of 6) Mutual influences among specific literatures and cultures; for example, German-American, French-American, Inter-American, or East-West literary relations.
Effective: Summer 1995

CMLIT 570 **Forces in Contemporary Literature** (3-6) Intellectual currents and experimental forms in contemporary world literature.
Effective: Summer 1995

CMLIT 580 **Contemporary Literary Theory** (3) Major issues in contemporary literary theory and their significance for criticism, with emphasis on continental European theorists and their influence.
Effective: Summer 1995

CMLIT 589 (FR 589, GER 589, SPAN 589) **Technology in Foreign Language Education: An Overview** (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with APLNG 589)
Effective: Spring 2004

CMLIT 590 **Colloquium** (1-3) Continuing seminars which consist of a series of lectures by faculty, students or outside speakers.
Effective: Summer 1995

CMLIT 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1995

CMLIT 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1995

CMLIT 597A **Pre-modern Foundations** (1) An introduction to the classical foundations of comparative criticism and theory through readings from the pre-modern period.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CMLIT 597B **Medieval Theories of Rhetoric and Ethical Reading** (1) 1-credit short course on medieval texts that deal with two topics of continued interest today: 1) how to write, rewrite, adapt and persuade, including the traditional figures and tropes; and 2) how to read for moral, ethical and aesthetic purposes.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CMLIT 597C **What is an Archive?** (1) Graduate seminar exploring the ambiguities between the Greek and Roman roots of contemporary thinking about archives.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CMLIT 599 (IL) **Foreign Study--Comparative Literature** (1-12) Graduate-level courses offered on comparative literary topics as part of a foreign-study experience approved by the program head.
Effective: Summer 2005
Prerequisite: 24 credits in the appropriate foreign language(s); 18 credits in literature or relevant related fields

CMLIT 600 **Thesis Research** (1-15) No description.
Effective: Summer 1995

CMLIT 601 **Ph.D. Dissertation Full Time** (0) No description.
Effective: Summer 1995

CMLIT 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) Supervision of teaching; consideration of instructional aims and objectives, methods of lecturing and leading discussions, evaluation of student work.
Effective: Summer 1995

CMLIT 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2000

CMLIT 610 **Thesis Research Off Campus** (1-15) No description.

Graduate Bulletin Archive - 2011

2010 - 2011

Effective: Summer 1995

CMLIT 611 **PH.D. Dissertation Part-Time** (0) No description.

Effective: Summer 1995

Last Import from UCM: June 16, 2011 3:00 AM

Comparative and International Education (CI ED)

CI ED 401 (IL) (EDTHP 401) **Introduction to Comparative Education** (3) Origins, nature, scope, basic literature, and methodology of comparative education. Study of sample topics.

Effective: Fall 2007

Prerequisite: 5th semester standing or higher

CI ED 440 (EDTHP 440) **Introduction to Philosophy of Education** (3) Introduction to the examination of educational theory and practice from philosophical perspectives, classical and contemporary.

Effective: Fall 2007

Prerequisite: EDTHP 115

CI ED 444 (WL ED 444) **Language, Culture and the Classroom: Issues for Practitioners** (3) Critical understanding of cultural linguistic diversity to facilitate the inclusion of English Language Learners in a globalized classroom.

Effective: Fall 2007

Prerequisite: WL ED 300 or WL ED 400

CI ED 457 (AGECO 457) **Principles of Integrated Pest Management** (3) Integrated study of pest complexes and their management, emphasizing ecological principles drawing on examples from a range of agricultural, forestry and urban systems. This course is designed for sixth, seventh, and eighth semester and graduate students.

Effective: Spring 2010

Prerequisite: Must take two or more of the following: ENT 313 and/or PPATH 405 and/or PPATH 318 and/or HORT 238

CI ED 470 (ADTED 470) **Introduction to Distance Education** (3) An introduction to the history, theory, organization, technologies, and instructional procedures used in American and foreign distance education.

Effective: Summer 1995

CI ED 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 1998

CI ED 497A **Introduction to Educational Leadership** (3) Critical study of the nature and purposes of educational authority, power, and leadership in the U.S. and globally.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CI ED 500 **Comparative Education Proseminar I** (3) Methods of comparative education and case studies of governance and administration; first of two part sequence.

Effective: Spring 1995

CI ED 501 **Comparative Education Proseminar II** (3) Second course of two-part sequence; causes and consequences of increased schooling world-wide.

Effective: Spring 1995

CI ED 503 (EDTHP 507, HI ED 503) **Ethnicity, National Identity, and Education** (3) Surveys group-oriented education policies internationally, especially comparing those of Britain, Taiwan, India.

Effective: Summer 1995

CI ED 504 (C I 504) **Perspectives in African Education** (3) Educational systems in selected african countries are examined with respect to colonial history, social, political, and cultural factors.

Effective: Spring 1995

CI ED 508 (ADTED 508) **Globalization and Lifelong Learning** (3) Examination of globalization discourses and their relationships, implications and impacts on lifelong learning processes and contexts.

Effective: Summer 2004

CI ED 509 (ADTED 509) **Language, Literacy, Identity, and Culture in a Global Context** (3) Examines the relationship between issues of language, identity, and culture for adult learners in an increasingly global context.

Effective: Spring 2004

Prerequisite: CI ED 508

CI ED 516 (EDTHP 516) **Education and Demographic Change in the United States and Abroad** (3) Interrelationship between schooling and employment, marriage, fertility, and migration. Focus comparatively on the United States and developing countries.

Effective: Spring 1998

CI ED 541 (EDTHP 541) **Contemporary Philosophies of Education** (3) Educational theory and practice in relation to contemporary movements in philosophy.

Effective: Spring 2008

CI ED 542 (LL ED 542) **Issues in Literacy Education** (3) Discussion of philosophical, sociological, historical, and curricular issues in literacy education.
Effective: Spring 1997

CI ED 553 (EDTHP 553, HI ED 553, SOC 553) **Educational Mobility in Comparative Perspective** (3) Role of education in social mobility, using quantitative, qualitative, and historical methods; focuses comparatively on Britain, East Asia, and South America.
Effective: Spring 2003

CI ED 555 (EDPSY 555) **Validity of Assessment Results** (3) Concepts, issues, and methods of validation of educational and psychological assessment including models and approaches to validation, bias, and utility.
Effective: Spring 2008
Prerequisite: EDPSY 406, EDPSY 450

CI ED 564 (ADTED 564) **Social and Cultural Contexts of Learning and Work** (3) Examines the relationship between learning and work with special attention given to how certain forms of learning are legitimized.
Effective: Summer 2004
Prerequisite: CI ED 500, ADTED 542

CI ED 570 (ADTED 570) **Comparative and International Adult Education** (3) Critical and comparative analysis of adult education theory and practice outside North America, including international agency involvement.
Effective: Spring 1995
Prerequisite: ADTED 460

CI ED 571 (HI ED 571) **Comparative Higher Education** (3) Comparative methods of studying structural variations in systems of higher education in principal industrialized nations and other selected countries.
Effective: Spring 1995

CI ED 572 (ADTED 572) **Policy Studies in Lifelong Learning** (3) Examine lifelong learning policies and the relationship between lifelong learning issues and problems, policy development, policy actors and institutional structures.
Effective: Summer 2004
Prerequisite: CI ED 508

CI ED 587 (C & S 587, E C E 587) **Curriculum, Culture, and Child Development** (3) Examines human development and cultural factors in planning, designing, and implementing curriculum and instruction in early childhood and childhood education.
Effective: Fall 2001
Prerequisite: HD FS 429

CI ED 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1995

CI ED 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1995

CI ED 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1995

CI ED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1995

CI ED 597A (ADTED 597A) **Cross-Cultural Research Methods in Education** (3) This course will assist in conducting research with diverse ethnic/cultural groups. The goal is to understand the co-variation or causal relations between cultural (societal and ecological) and behavioral variables.
Effective: Summer 2011 Ending: Summer 2011

CI ED 597A (E C E 597A) **Video Ethnography of Education** (3) Show students how to use video ethnography in education research. Course is rooted in Preschool in Three Cultures method (formally known as video-cued multivocal ethnography).
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CI ED 597B **Politics, Language and Pedagogy: Applying Paulo Freire Today** (3) This course examines the tenets, critiques, and application of Paulo Freire's educational philosophy in diverse international settings.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CI ED 597C (EDTHP 597C) **Comparative Education Policy Analysis** (3) Examines international processes in policy

formation and current education policy trends worldwide.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

CI ED 845 (AYFCE 845) **Intergenerational Programs and Practices** (3) Background, intervention strategies, and issues related to developing intergenerational programs and practices aimed at addressing vital social and community issues.
Effective: Fall 2011 Future: Fall 2011

Last Import from UCM: June 16, 2011 3:00 AM

Computer Engineering (CMPEH)

CMPEH 449 **VLSI Digital Circuits** (3) Modern approaches to using VLSI technology; logic circuits, cell layout and design on CAD systems.

Effective: Spring 2008

CMPEH 472 **Microprocessors** (4) Principles of microprocessors, hardware architecture, assembly language, programming, interfacing, and applications of microprocessors will be studied.

Effective: Spring 2008

Prerequisite: CMPEN 271, CMPEN 275, E E 310

Last Import from UCM: June 16, 2011 3:00 AM

Computer Engineering (CMPEN)

CMPEN 411 VLSI Digital Circuits (3) Basic building blocks of CMOS design, design rules, chip planning, layout design, system power and timing, simulation of VLSI structures.

Effective: Spring 2008

Prerequisite: CMPEN 371 orCMPEN 471;E E 310

CMPEN 416 (E E 416) Digital Integrated Circuits (3) Analyses and design of digital integrated circuit building blocks, including logic gates, flip-flops, memory elements, analog switches, multiplexers, and converters.

Effective: Spring 2008

Prerequisite: E E 310

CMPEN 417 (E E 417) Digital Design Using Field Programmable Devices (3) Field programmable device architectures and technologies; rapid prototyping using top down design techniques; quick response systems.

Effective: Spring 2008

Prerequisite: CMPEN 331

CMPEN 431 Introduction to Computer Architecture (3) Introduction to computer architecture. Memory hierarchy and design, CPU design, pipelining, multiprocessor architecture.

Effective: Spring 2008

Prerequisite: CMPEN 331 orCMPEN 371

CMPEN 431H Honors Introduction to Computer Architecture (3) Honors course in principles of computer architecture: memory hierarchies and design, I/O organization and design, CPU design and advanced processors.

Effective: Spring 2008

Prerequisite: CMPEN 331

CMPEN 441 Operating Systems (3) Resource management in computer systems. Process scheduling, memory management, file system design, I/O management, Unix operating system.

Effective: Spring 2008

Prerequisite: CMPSC 360

CMPEN 454 (E E 454) Fundamentals of Computer Vision (3) Introduction to topics such as image formation, segmentation, feature extraction, matching, shape recovery, object recognition, and dynamic scene analysis.

Effective: Spring 2008

Prerequisite: MATH 230 orMATH 231;CMPSC 121 orCMPSC 201

CMPEN 455 (E E 455) Digital Image Processing (3) Overview of digital image processing techniques and their applications, image sampling, enhancement, restoration, and analysis; computer projects.

Effective: Spring 2008

Prerequisite: E E 353 orE E 350;CMPSC 121 orCMPSC 201

CMPEN 461 Communication Networks (3) Data transmission, encoding, link control techniques, network architecture, design, protocols, and multiple access.

Effective: Spring 2008 Ending: Summer 2011

Prerequisite: CMPEN 271;E E 380

CMPEN 461 Communication Networks (3) Data transmission, encoding, link control techniques, network architecture, design, protocols, and multiple access.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: CMPEN 271;CMPSC 121 orCMPSC 201

CMPEN 471 Logical Design of Digital Systems (3) Basic switching theory and design of digital circuits, including combinational, synchronous sequential, and asynchronous sequential circuits.

Effective: Spring 2008

Prerequisite: CMPEN 331

CMPEN 472 Microprocessors and Embedded Systems (3) Microprocessors: architecture, design, assembly language, programming, interfacing, bus structure, and interface circuits and their use in embedded systems.

Effective: Spring 2008

Prerequisite: CMPEN 331

CMPEN 472H Honors Microprocessors and Embedded Systems (3) Honors course in microprocessors: architecture, design, assembly language, programming, interfacing, bus structure, and interface circuits and their use in embedded systems.

Effective: Spring 2008

Prerequisite: CMPEN 331

CMPEN 473 Microcomputer Laboratory (3) Design of digital systems using microprocessors.

Effective: Spring 2008

Prerequisite: CMPEN 472

CMPEN 475 Functional Verification (3) Introduce concepts, methods, and technology for effective functional verification of modern electronic systems.

Effective: Summer 2008

Prerequisite: CMPEN 331

CMPEN 480 Computer Engineering Design (3) Engineering design and modeling, engineering economy, project planning, capstone project selections, and technical communication skills.

Effective: Spring 2008

Prerequisite: CMPEN 352W;CMPEN 431

CMPEN 481 Computer Engineering Project (3) Group or individual design projects in the area of computer engineering.

Effective: Spring 2008

Prerequisite: CMPEN 480

CMPEN 482W Computer Engineering Project Design (3) Computer engineering design project, project management, documentation, reporting, and group and individual communication skills.

Effective: Spring 2008

Prerequisite: E E 310;E E 353;CMPSC 473;ENGL 202C

CMPEN 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2008

CMPEN 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2008

CMPEN 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2008

Prerequisite: prior approval of proposed assignment by instructor

CMPEN 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Spring 2008

CMPEN 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2008

CMPEN 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2010

Last Import from UCM: June 16, 2011 3:00 AM

Computer Engineering Technology (CMPET)

CMPET 401 Data Communication and Networking (3) Signal representations, communication techniques, interfacing, serial and parallel communication, modems, error detection, LAN and WAN protocols.

Effective: Spring 2008

Prerequisite: CSE 271 or EET 117

CMPET 402 Data Communication and Networking Laboratory (1) Network operating systems, LAN and WAN protocols, serial and parallel communications, modems, FAX, and other interfacing methods.

Effective: Spring 2001

Prerequisite: or concurrent: CMPET 401

CMPET 403 Switching Circuit Design (4) Analysis and design of advanced combinational and sequential circuits using IC logic devices and PLD's while promoting the use of software development tools.

Effective: Spring 2008

Prerequisite: CMPEN 271 or EET 117; CMPEN 275 or EET 120

CMPET 412 Microcomputers (4) Design, architecture, programming, and interfacing of microprocessors, enhanced by lab experiments.

Effective: Spring 2008

Prerequisite: CMPEN 271 or EET 117; CMPEN 275 or EET 120

CMPET 456 Advanced Microprocessors, High Level Interfacing (3) Operating systems; systems programming; high-level application programming; high-level hardware and software protocols; serial and parallel digital communications.

Effective: Spring 2007

Prerequisite: CMPET 355

CMPET 457 Software Engineering (3) Application of modern techniques in software development, including program design based on new methods and tools.

Effective: Spring 2007

Prerequisite: CMPET 355

Last Import from UCM: June 16, 2011 3:00 AM

Computer Information Systems (CINSY)

CINSY 446 **Database Management** (3) Designed to provide students with explanation, comparison of techniques, methodology of systems, limitations, application of various database management systems.

Effective: Summer 2011

Prerequisite: 3 credits in programming

CINSY 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 1999

Last Import from UCM: June 16, 2011 3:00 AM

Computer Science (CMPSC)

CMPSC 402 UNIX and C (3) UNIX OS including file system, utilities, and shell scripting; C programming, including I/O, pointers, arrays, dynamic memory, macros, and libraries.

Effective: Fall 2010

Prerequisite: CMPSC 121

CMPSC 421 Net-centric Computing (3) This course introduces JavaScript and AJAX for creating Rich Internet Applications, and XML for client-server communication and Web Services.

Effective: Spring 2011

Prerequisite: CMPSC 221 or SWENG 311

CMPSC 425 Advanced Object-Oriented Programming (3) Advanced object-oriented programming paradigm, exception handling, application programming interface, secure programming, network programming, threads and synchronization.

Effective: Spring 2010

Prerequisite: CMPSC 122

CMPSC 426 Object-oriented Design (3) Object-oriented analysis and design; design patterns such as creational, structural, and behavioral patterns; UML; and unified process.

Effective: Fall 2010

Prerequisite: CMPSC 425, CMPSC 462

CMPSC 428 Programming in Ada (3) Structured program design using Ada; strong typing, data abstraction, packages, subprograms, separate compilation, visibility, exceptions, generic units.

Effective: Fall 2010

Prerequisite: CMPSC 121

CMPSC 430 Database Design (3) Relational database model, query languages, integrity, reliability, normal forms for design.

Effective: Fall 2010

Prerequisite: CMPSC 462

CMPSC 431 Database Management Systems (3) Database system concepts: file organizations and retrieval algorithms; the three data models (relational, hierarchical, and network) and their database implementations.

Effective: Spring 2008

Prerequisite: CMPSC 221; ENGL 202C

CMPSC 431W Database Management Systems (3) Database system concepts: file organizations and retrieval algorithms; the three data models (relational, hierarchical, and network) and their database implementations.

Effective: Spring 2008

Prerequisite: CMPSC 221; ENGL 202C

CMPSC 436 Communications and Networking (3) Data transmission, basic signaling, data encoding, error control, communication protocols, security, network topologies, routing, switching, internetworking, emerging high speed networks.

Effective: Spring 2008

Prerequisite: CMPSC 312

CMPSC 437 Network Operations and Management (3) Study of local area network (LAN) and wide area network (WAN) topologies, operations, and management.

Effective: Spring 2008

Prerequisite: CMPSC 335

CMPSC 438 Computer Network Architecture and Programming (3) Network architectures, communication protocols, internetworking, network security, client-server computing, web application development, programming with APIs.

Effective: Spring 2010

Prerequisite: CMPSC 312, CMPSC 425

CMPSC 441 Artificial Intelligence (3) Problem solving, search techniques including local search and genetic algorithms, knowledge representation, planning, learning, and neural networks.

Effective: Fall 2010

Prerequisite: CMPSC 122; MATH 315

CMPSC 442 Artificial Intelligence (3) Introduction to the theory, research paradigms, implementation techniques, and philosophies of artificial intelligence.

Effective: Spring 2008

Prerequisite: CMPSC 122 or equivalent Concurrent: CMPSC 465

CMPSC 443 Introduction to Computer and Network Security (3) Introduction to theory and practice of computer security with an emphasis on Internet and operating system applications.

Effective: Spring 2008

Prerequisite: CMPSC 473, CMPEN 362

CMPSC 450 Concurrent Scientific Programming (3) Problems of synchronization, concurrent execution, and their solution techniques. Design and implementation of concurrent software in a distributed system.

Effective: Spring 2008

Prerequisite: CMPSC 121, CMPSC 201 or CMPSC 202; MATH 220; MATH 230 or MATH 231

CMPS 451 (MATH 451) Numerical Computations (3) Algorithms for interpolation, approximation, integration, nonlinear equations, linear systems, fast FOURIER transform, and differential equations emphasizing computational properties and implementation. Students may take only one course for credit from CSE/MATH 451 and CSE/MATH 455.

Effective: Spring 2008

Prerequisite: 3 credits of programming; MATH 230 or MATH 231

CMPS 452 Numerical Analysis (3) Algorithm efficiency and accuracy, function interpolation and polynomial approximation, numerical differentiation and integration, initial-value problems, and approximation of eigenvalues.

Effective: Fall 2010

Prerequisite: MATH 220

CMPS 455 (MATH 455) Introduction to Numerical Analysis I (3) Floating point computation, numerical rootfinding, interpolation, numerical quadrature, direct methods for linear systems. Students may take only one course for credit from CMPS (MATH) 451 and CMPS (MATH) 455.

Effective: Spring 2008

Prerequisite: MATH 220; MATH 230 or MATH 231 ; and 3 credits of programming

CMPS 456 (MATH 456) Introduction to Numerical Analysis II (3) Polynomials and piecewise polynomial approximation; matrix least square problems; numerical solution of eigenvalue problems; numerical solutions of ordinary differential equations.

Effective: Spring 2008

Prerequisite: CMPS 455

CMPS 457 Computer Graphics Algorithms (3) Graphics systems/hardware, color models, transformations, projections, clipping, hidden line/surface removal, aliasing, parametric curves/surfaces, 3D modeling animation.

Effective: Fall 2010

Prerequisite: CMPS 122; MATH 220

CMPS 458 Fundamentals of Computer Graphics (3) Fundamentals of computer graphics: input/output devices, transformation, projection, clipping, hidden line/surface elimination.

Effective: Spring 2008

Prerequisite: CMPS 311; MATH 220; MATH 230 or MATH 231

CMPS 459 Scientific Visualization (3) Visualization techniques for data analysis and presentation. Applying visualization and perceptual theory. Using extending platform independent visualization software.

Effective: Spring 2008

Prerequisite: CMPS 122

CMPS 460 Principles of Programming Languages (3) Design and implementation of high level programming languages and survey of language paradigms including imperative, functional, and object-oriented programming.

Effective: Fall 2010

Prerequisite: CMPS 312; CMPS 462; CMPS 469

CMPS 461 Programming Language Concepts (3) Fundamental concepts of programming language design, specifications, and implementation; programming language paradigms and features; program verification.

Effective: Spring 2008

Prerequisite: CMPS 221; CMPS 360

CMPS 461H Honors Programming Language Concepts (3) Honors course in fundamental concepts of programming language design, specification, and implementation; programming language paradigms and features; program verification.

Effective: Spring 2008

Prerequisite: CMPS 465

CMPS 462 Data Structures (3) In-depth theoretical study of data structures such as balanced trees, hash tables, priority queues, B-trees, binomial heaps, and Fibonacci heaps.

Effective: Fall 2010

Prerequisite: CMPS 360 Concurrent: MATH 315

CMPS 463 Design and Analysis of Algorithms (3) Recurrences, algorithms design techniques, searching, sorting, selection, graph algorithms, NP-completeness, approximation algorithms, local optimization algorithms.

Effective: Fall 2010

Prerequisite: CMPS 462 Concurrent: MATH 414 or STAT 301

CMPS 464 Introduction to the Theory of Computation (3) Computability/Complexity: finite automata, regular & context-free languages, Turing machines, Church-Turing Thesis, undecidability, reducibility, completeness, time/space complexity, P versus NP.

Effective: Fall 2009

Prerequisite: CMPS 465

CMPS 465 Data Structures and Algorithms (3) Fundamental concepts of computer science: data structures, analysis of algorithms, recursion, trees, sets, graphs, sorting.

Effective: Spring 2008

Prerequisite: CMPS 360 or MATH 311W

CMPS 467 (MATH 467) Factorization and Primality Testing (3) Prime sieves, factoring, computer numeration systems, congruences, multiplicative functions, primitive roots, cryptography, quadratic residues. Students who have passed MATH 465 may not schedule this course.

Effective: Spring 2008

Prerequisite: CMPS 360 or MATH 311W

CMPSC 468 Theory of Automata, Languages, and Computability (3) Language theory: regular and context-free languages; computability: Turing machines, halting problem, undecidable language problems; complexity theory: NP-complete problems.

Effective: Spring 2008

Prerequisite: CMPSC 122;MATH 315, MATH 311W orCMPSC 360

CMPSC 469 Formal Languages with Applications (3) Regular, context free, recursive, and recursively enumerable languages; associated machine models; applications.

Effective: Fall 2010

Prerequisite: CMPSC 360;MATH 315

CMPSC 470 Compiler Construction (3) Compiler design and implementation; scanning, parsing, semantic analysis, optimization (including static analysis), code generation, garbage collection, and error detection.

Effective: Fall 2010

Prerequisite: CMPSC 312;CMPSC 425;CMPSC 462;CMPSC 469

CMPSC 471 Introduction to Compiler Construction (3) Design and implementation of compilers; lexical analysis, parsing, semantic actions, optimization, and code generation.

Effective: Spring 2008

Prerequisite: CMPSC 461

CMPSC 472 Operating System Concepts (3) Theoretical and practical issues of operating systems design and implementation, process management, concurrent programming, memory management, scheduling, I/O, and security.

Effective: Fall 2010

Prerequisite: CMPSC 312;CMPSC 462

CMPSC 473 Operating Systems Design & Construction (3) Design and implementation of computer operating systems; management of various system resources: processes, memory, processors, files, input/output devices.

Effective: Spring 2008

Prerequisite: CMPSC 311;CMPEN 331

CMPSC 474 Operating System & Systems Programming (3) Operating Systems overview and principles; processes and signals; concurrency and synchronization; memory and file management; client-server computing; scripts; systems-programming.

Effective: Spring 2008

Prerequisite: CMPSC 122;CMPSC 312

CMPSC 479 Language Translation (3) Design and implementation of compilers, lexical analysis, syntax/semantic analysis, optimization, and code generation.

Effective: Spring 2008

Prerequisite: CMPSC 465

CMPSC 483W Software Design Methods (3) Applications of scientific knowledge and methods in the design and construction of computer software using engineering concepts.

Effective: Spring 2008

Prerequisite: CMPSC 221;CMPSC 465;ENGL 202C

CMPSC 484 Computer Science Senior Project I (2) Computer science capstone project with documentation emphasis.

Effective: Spring 2008

Prerequisite: ENGL 202C;CMPSC 221;CMPSC 465

CMPSC 485W Computer Science Senior Project II (3) Computer science capstone project with documentation emphasis.

Effective: Spring 2008

Prerequisite: CMPSC 484

CMPSC 487W Software Engineering and Design (3) Software development process, life cycle; requirements analysis, specification, design, prototyping, testing, project management, and documentation.

Effective: Fall 2010

Prerequisite: ENGL 202C, CMPSC 425, CMPSC 462

CMPSC 494H Senior Honors Thesis (1-6) Supervised Honors thesis research in computer science and engineering.

Effective: Spring 2008

Prerequisite: approval of a thesis adviser in the department

CMPSC 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experience, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2008

Prerequisite: prior approval of proposed assignment by instructor

CMPSC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2008

CMPSC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2008

CMPSC 497A Applications Programming (3) Development of application software for computing devices including smart

phones and tablet computers.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: CMPSC 311 and CMPSC 465

CMPSC 497B Contest Problems (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CMPSC 497B Machine Learning (3) Machine learning is a subfield of AI that studies how a computer system can learn from data. It is a key tool for automating tasks that are typically done by humans. This course will provide an introduction to this field.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

CMPSC 497C Data Structures Lab (1) Programming with common data structures; recursion; stacks queues, dictionaries, priority queues, sets; string searching and manipulation; sorting; trees; combinatorics.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Concurrent: CMPSC 462

CMPSC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2008

CMPSC 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

CMPSC 512 Computer Systems Performance Evaluation (3) Theory and practice of computer system performance evaluation; measurement, simulation, and analytical techniques with strong emphasis on analytical modeling.

Effective: Spring 1987

Prerequisite: CMPSC 511, MATH 414

CMPSC 524 Design and Specification of Distributed Systems (3) Specification of distributed systems; safety and liveness properties; temporal logics; trace semantics; logic programs; specification and verification of distributed algorithms.

Effective: Spring 1998

Prerequisite: CSE 520

CMPSC 541 Database Management Systems (4) Computer system organization for the management of data, data models, and implementation; primary and secondary key retrieval algorithms.

Effective: Fall 1986

Prerequisite: CMPSC 435 or CMPSC 534

CMPSC 574 Contemporary Computer Architectures (3) Contemporary computer organizations and operations; parallel systems: pipelines, array, multiprocessors; shared memory and message passing architectures; data flow architectures.

Effective: Spring 1994

Prerequisite: a course in operating systems

CMPSC 576 Digital Integrated Systems Design (3) Introduction to VLSI design and fabrication, design methodologies and CAD tools, system case studies.

Effective: Spring 1994

CMPSC 577 VLSI Systems Design (3) Design of VLSI circuits, systems, and CAD tools; study of advanced VLSI architectures, CAD tools for design, and evolving design techniques.

Effective: Fall 1995

Prerequisite: CMPSC 576

CMPSC 581 Machine Intelligence and Heuristic Programming (3) Methods for making machines behave intelligently; problem solving, theorem proving, game playing, question answering, learning induction; specialized languages and data structures.

Effective: Spring 1985

Prerequisite: CMPSC 481

CMPSC 587 Introduction to Computational Linguistics (3) An introduction to the computational approach to linguistics, covering natural language parsing, meaning representation and inference, and natural language generation.

Effective: Spring 1988

Prerequisite: CMPSC 481

CMPSC 598 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest; several different topics may be taught in one year or semester.

Effective: Summer 1993

CMPSC 600 Thesis Research (1-15) No description.

Effective: Fall 1995

CMPSC 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 1995

CMPSC 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) Teaching of computer science undergraduate sections with senior faculty instruction supervision.

Effective: Fall 1989

Prerequisite: permission of the Department Head

CMPSC 610 Thesis Research Off Campus (1-15) No description.

Effective: Fall 1983

CMPSC 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Corporate Communication (CC)

CC 401 Corporate, Non-Profit, and Government Public Relations (3) Explores issues affecting profit and non-profit public relations, including crisis management, consumer and employee affairs, environmental problems and global concerns.

Effective: Summer 2002

Prerequisite: MKTG 310 and sixth-semester standing

CC 402 The Media and Public Relations (3) Publicity strategies involving a variety of media resources.

Effective: Summer 2002

Prerequisite: MKTG 310 and sixth-semester standing

CC 403W Studies in Public Relations (3) Capstone course for the major in Corporate Communication; focuses on case studies in public relations: problems and solutions.

Effective: Summer 2002

Prerequisite: MKTG 310 and sixth-semester standing

CC 495A Internship in Corporate Communication (3) Internship in a business or agency appropriate for a major in Corporate Communication.

Effective: Summer 2002

Prerequisite: MKTG 310 and sixth-semester standing

Last Import from UCM: June 16, 2011 3:00 AM

Counseling Psychology (CNPSY)

CNPSY 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2008

CNPSY 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1990

CNPSY 497A **Observational Research** (1-3) Counseling psychology research, including observation of at-risk families and use of a variety of coding systems to study parenting processes, and self/emotion regulation in children and adults, and supervised on an individual basis.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CNPSY 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

CNPSY 502 (CN ED 502) **Advanced Counseling Theory and Method** (3) Assessment, intervention, and evaluation procedures for counseling problems frequently encountered in school, college, and rehabilitation settings.
Effective: Spring 2004
Prerequisite: CN ED 501

CNPSY 503 **Current Topics in Counseling Psychology** (2) Presentation, readings, and discussion of treatment issues; unique concerns of client groups and professional issues that counselors should consider.
Effective: Summer 1994

CNPSY 511 **Modifying Conjugal Life** (1-9) Conceptual foundations, research procedures, and practicum experience in teaching effective communication and problem-solving skills in the marriage relationship.
Effective: Fall 2001
Prerequisite: 6 credits in individual development or psychology; 3 credits in statistics

CNPSY 512 **Filial Relationship Modification** (1-9) Theory, research, and practicum in teaching parents to resolve developmental problems in their own children.
Effective: Fall 2001
Prerequisite: 6 credits in individual development or psychology; 3 credits in statistics

CNPSY 515 **Family Systems Therapy: Theory, Research and Practice** (3) Examines theory, research, and interventions grounded in family systems framework (e.g., Bowenian, Structural Strategic, etc.) from a psychological perspective.
Effective: Summer 2006
Prerequisite: graduate standing; 6 credits in psychological development (e.g. HD FS 429 or equivalent) and/or counseling theory (e.g. CN ED 503 or equivalent).

CNPSY 554 (CN ED 554) **Cross-Cultural Counseling** (3) Examines theory, research, and models of counseling relationships between counselors and clients of different racial and sociocultural backgrounds.
Effective: Spring 2004
Prerequisite: CN ED 507, CN ED 595A or CNPSY 595A

CNPSY 555 (CN ED 555) **Career Counseling** (3) The examination of historical, legislative, and current models of career counseling and the development of pertinent individual and group techniques.
Effective: Spring 2004
Prerequisite: CN ED 505

CNPSY 582 (CN ED 582) **Advanced Group Psychotherapy** (3) Study of group psychotherapy and interventions, with an experiential component. Available only to majors in CN ED and CNPSY.
Effective: Fall 2003

CNPSY 589 (CN ED 589) **Seminar on Counseling Supervision** (1) Study of research about and theoretical models of clinical supervision of counselors; includes preparation for a practicum in counseling supervision.
Effective: Fall 2001
Prerequisite: available only to doctoral-level majors in CN ED and CNPSY

CNPSY 591 **Seminar in Counseling: History and Trends** (1) Discussion of the history of guidance and counseling, emphasizing how the past has shaped the present and portends the future.
Effective: Summer 1990
Prerequisite: 9 credits in counselor education

CNPSY 592 **Legal and Ethical Issues in Counseling** (3) Study and discussion of legal, ethical, and professional concerns of counselors; philosophical underpinnings; and models of ethical decision-making.
Effective: Summer 1994

Prerequisite: 9 credits in counselor education or counseling psychology

CNPSY 593 **Seminar in Counseling: Philosophy** (1) Study and discussion of such philosophical foundations of counseling as phenomenology, idealism, realism, existentialism, and daseinanalytic, theological, and other contemporary thoughts.

Effective: Summer 1990

Prerequisite: 9 credits in counselor education

CNPSY 594 **Research in Counseling** (2-6) The design, implementation, and evaluation of counseling research projects.

Effective: Fall 2001

CNPSY 595A **Counseling Psychology Practicum** (1-3 per semester, maximum of 12) Practice in the application of counseling psychology principles and methods to cases counseled under supervision; case conferences.

Effective: Fall 2001

Prerequisite: available only to majors in CNPSY

CNPSY 595D (CN ED 595D) **Supervision of Counselors** (3-9) Practical experience in supervising and evaluating work of counselors.

Effective: Summer 1992

Prerequisite: CN ED 595A or CN ED 595B; available only to majors in CN ED and CNPSY

CNPSY 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1990

CNPSY 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 1990

CNPSY 597C (CN ED 597C) **Diagnosis of Counselors** (3) Course examines the rudiments of diagnosis for counselors.

Focuses on role of identification and assessment of symptoms and behaviors in determining.

Effective: Summer 2011 Ending: Summer 2011

CNPSY 597D (CN ED 597D) **Grief and Loss Counseling** (3) Course designed to teach counselors how to work with clients with a variety of grief and loss issues.

Effective: Summer 2011 Ending: Summer 2011

CNPSY 600 **THESIS RESEARCH** (1-15) NO DESCRIPTION.

Effective: Spring 1992

CNPSY 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Summer 1990

CNPSY 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description available.

Effective: Summer 1990

CNPSY 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Summer 1990

Last Import from UCM: June 16, 2011 3:00 AM

Counselor Education (CN ED)

CN ED 401 Foundations of Chemical Dependency Counseling (3) An overview of diagnosis and assessment, models for chemical dependency prevention, counseling, and recovery; contexts of chemical dependency treatment.

Effective: Spring 1994

Prerequisite: 3 credits in general psychology

CN ED 404 Group Procedures in Guidance and Counseling (3) The nature and functioning of groups in educational and agency settings. Provides prospective counselors with experience in the group process.

Effective: Summer 1990

Prerequisite: 6 credits in counselor education; 6 credits in psychology sociology or individual and family studies

CN ED 415 Counseling Adults (3) Roles of counselors and counseling in the resolution of educational and career problems and opportunities of adults.

Effective: Summer 1990

Prerequisite: COM S 448, HD FS 249, HD FS 445 or SOC 435

CN ED 416 Interpersonal Relationships and Alcohol and Other Drugs (AOD) Dependency (3) This course examines families with chemically dependent members, dynamics, appropriate interventions, and treatment.

Effective: Spring 2009

Prerequisite: CN ED 401 or RHS 301

CN ED 420 Chemical Dependency: Youth at Risk (3) Study of youth who are at-risk of developing chemical dependency including the characteristics and factors related to chemical dependency.

Effective: Spring 1994

Prerequisite: CN ED 401

CN ED 421 Counseling Strategies for Preventing Chemical Dependency (3) Examines helping professional's role in primary and secondary prevention of substance abuse, and related problems like delinquency, suicide, and pregnancy.

Effective: Spring 1994

Prerequisite: CN ED 401

CN ED 422 Foundations of Addictions Counseling (3) Study of the fundamental principles of counseling individuals with a wide variety of addictions.

Effective: Spring 2009

Prerequisite: a minimum of 12 hours of coursework in sociology psychology education or family studies.

CN ED 423 Student Assistance Programs (3) Exploration of early stages of adolescent "at-risk" behavior and skills for student assessment and intervention within schools and communities.

Effective: Spring 1994

Prerequisite: CN ED 401

CN ED 430 Couples and Family Counseling (3) The theory and practice of counseling with couples and families emphasizing family development and major intervention approaches.

Effective: Spring 2009

Prerequisite: A minimum of 12 hours of coursework in sociology psychology education or family studies.

CN ED 431 Counseling and Teaching Youth at Risk (3) This course is focused on how to counsel and/or teach youth at risk for a variety of social, emotions, and educational problems.

Effective: Spring 2009

Prerequisite: A minimum of 12 hours of coursework in sociology psychology education or family studies.

CN ED 432 Ethical, Legal, and Professional Issues in Counseling (3) Examination of the current ethical and legal issues related to professional counselors and counseling.

Effective: Spring 2009

Prerequisite: A minimum of 12 hours of coursework in sociology psychology education or family studies.

CN ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1990

CN ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 1990

CN ED 497A Adoption Issues (3) This class will deal with the social, emotional and developmental issues facing triad members throughout the adoption process.

Effective: Summer 2011 Ending: Summer 2011

CN ED 497A Interpersonal Relationships in Early Childhood Contexts (3) Interpersonal relationships in young children's development; practice to promote positive relationships (e.g., parent-child, teacher-child, teacher- parent, supervisor-teacher, and child-peer relationships).

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CN ED 497B **Bullying, Hate Language, and the Power of Words** (1) An overview of information on issues of bullying and hate language, and their impact to children and adolescents.
Effective: Summer 2011 Ending: Summer 2011

CN ED 497C **Counseling the Suicidal Child and Adolescent** (1) This course includes risk factor for suicide; suicidal assessment; ethical and legal issues surrounding suicide; and counseling techniques with children.
Effective: Summer 2011 Ending: Summer 2011

CN ED 497D **Suicide Prevention in the Schools** (1) This course provides training for school counselors, crisis team members, teachers, administrators, and staff to assist those at risk of suicide.
Effective: Summer 2011 Ending: Summer 2011

CN ED 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

CN ED 498A (WF ED 498C) **Facilitating Career Development** (3) Facilitating Career Development - Students acquire 12 career development facilitation competencies. Upon successful completion, students may apply for the GCDF certification.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CN ED 498A (WF ED 498A) **Facilitating Career Development** (3) Facilitating Career Development - Students acquire 12 career development facilitation competencies. Upon completion, students may apply for the GCDF certification.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

CN ED 500 **Introduction to Counseling and Development** (3) Introduces students to the profession of counseling and to the major models of human growth and development.
Effective: Summer 2007

CN ED 501 **Counseling Theory and Method** (3) Survey of psychodynamic, humanistic, behavioral and cognitive-behavioral approaches to counseling individuals.
Effective: Spring 1991

CN ED 502 (CNPSY 502) **Advanced Counseling Theory and Method** (3) Assessment, intervention, and evaluation procedures for counseling problems frequently encountered in school, college, and rehabilitation settings.
Effective: Summer 2003
Prerequisite: CN ED 501 course open only to CN ED and CNPSY doctoral students.

CN ED 503 **Guidance Services in Elementary Education** (3) Guidance services to elementary school students; guidance opportunities for elementary teachers and principals.
Effective: Summer 1990

CN ED 504 **Guidance Services in Secondary Education** (3) Nature and scope of guidance in secondary schools--services, models, and strategies; the counselor as an agent of change.
Effective: Summer 1990

CN ED 505 **Foundations of Career Development and Counseling Information** (3) Accelerating change in economic, psychological, social, educational influences upon counselees. Utilization of information systems in effecting counselee change.
Effective: Summer 1990

CN ED 506 **Individual Counseling Procedures** (3) Training in listening, responding, challenging skills, and action-oriented techniques for individual counseling.
Effective: Fall 2001
Prerequisite: or concurrent:CN ED 501 ; available only to majors in CN ED and CNPSY

CN ED 507 **Multicultural Counseling: Foundations** (3) Provide foundational information that controverts, complements and extends traditional psychology and counseling theory and practice.
Effective: Spring 2011

CN ED 508 **Organization and Administration of Pupil Services** (3) Principles, organization, personnel, functions, integration with school programs, evaluation.
Effective: Spring 1993
Prerequisite: A G.P.A. of 3.00 or better in 27 credits of previous course work covering any three of the following five areas: economics sociology psychology education and anatomy and physiology.

CN ED 509 **Introduction to Rehabilitation Counseling** (3) Provides information about rehabilitation history, legislation, philosophy, and agencies, as well as an overview of a variety of disabling conditions.
Effective: Spring 2001

CN ED 516 **Helping Skills for Student Affairs Professionals** (3) Develop beginning content knowledge and skills related to practice of active listening, attending, and referral necessary for student affairs work.

Effective: Summer 2009

Prerequisite: CN ED 501 Concurrent: CN ED 501

CN ED 523 **Counseling Children** (3) Provides school and clinic approaches for school counselors and others mental health professionals to help children with developmental problems.

Effective: Summer 2009

CN ED 524 **Counseling Adolescents** (3) Provides approaches for school counselors and others working with a variety of adolescent obstacles and developmental needs

Effective: Fall 2009

CN ED 525 **Applied Testing in Counseling** (3) Using counseling assessments effectively and ethically in applied settings, with an emphasis on test analysis and evaluation of psychometric properties.

Effective: Summer 2000

Prerequisite: 3 credits of upper-level statistics

CN ED 526 **Research in Counselor Education** (3) Evaluating counselor education research from scientist-practitioner perspective; emphasis on how to develop and use research with an applied focus.

Effective: Spring 2002

CN ED 530 **Family Counseling: Theory and Practice** (3) Conceptualization and application of family counseling frameworks to EC-12 school settings are learned in this course.

Effective: Summer 2003

Prerequisite: CN ED 501

CN ED 541 **Counseling Addicted Clients** (3) This course addresses theories and methods of counseling clients experiencing addiction, as well as professional issues for addiction counselors.

Effective: Spring 2003

CN ED 542 **Dual Diagnosis** (3) Examines issues related to diagnosis and treatment of individuals who have both a mental disorder and a substance abuse disorder.

Effective: Spring 2003

CN ED 554 (CNPSY 554) **Multicultural Counseling** (3) Examines theory, research, and models of counseling relationships between counselors and clients of different racial and sociocultural backgrounds.

Effective: Summer 2003

Prerequisite: CN ED 507, CN ED 595A or CNPSY 595A

CN ED 555 (CNPSY 555) **Career Counseling** (3) The examination of historical, legislative, and current models of career counseling and the development of pertinent individual and group techniques.

Effective: Summer 2003

Prerequisite: CN ED 505

CN ED 560 **Psychosocial Aspects of Disability** (3) Psychological models of reaction to disability and social consequences in adulthood; generalizations to other life crises; implications for counselor interventions.

Effective: Summer 1990

Prerequisite: 9 credits in counselor education or related area

CN ED 561 **Job Development and Employment of Persons with Disabilities** (3) Assessing client readiness for work, job-seeking skills training, job placement strategies, modifications to the worksite, methods for employer development.

Effective: Fall 1999

Prerequisite: CN ED 509, CN ED 525

CN ED 562 **Current Issues in Rehabilitation Counseling** (3) Forum for advanced graduate students in rehabilitation counseling and related fields to discuss, review, analyze current trends in rehabilitation.

Effective: Spring 1993

Prerequisite: available only to majors in Counselor Education or Counseling Psychology

CN ED 563 **Rehabilitation Administration and Supervision** (3) Focuses on administration and supervision in rehabilitation; emphasis on personnel, facility management, program planning, and administrative and clinical supervision.

Effective: Summer 1999

Prerequisite: CN ED 509

CN ED 580 **Foundations: History and Trends in Counselor Education** (3) Overview of the foundations and issues relevant to the counseling profession and counselor education. Course available only to majors in CN ED.

Effective: Fall 2003

CN ED 581 **Professional Issues in Counselor Education** (3) Forum for doctoral students to examine and analyze issues relevant for counselor educators. Available only to majors in CN ED.

Effective: Fall 2003

Prerequisite: CN ED 580

CN ED 582 (CNPSY 582) **Advanced Group Psychotherapy (3)** Study of group psychotherapy and interventions, with an experiential component. Available only to majors in CN ED and CNPSY.
Effective: Fall 2003

CN ED 589 (CNPSY 589) **Seminar on Counseling Supervision (1)** Study of research about and theoretical models of clinical supervision of counselors; includes preparation for a practicum in counseling supervision.
Effective: Fall 2001

Prerequisite: available only to doctoral-level majors in CN ED and CNPSY

CN ED 595A **Counseling Practicum (1-6)** Practice in the application of guidance principles and methods to cases counseled under supervision; case conferences; seminar in guidance techniques.
Effective: Fall 2001

Prerequisite: CN ED 505, CN ED 506, CN ED 525 ; available only to majors in CN ED and CNPSY

CN ED 595B **Supervised Practicum in Rehabilitation Counseling (1-6)** Application of principles and techniques of rehabilitation counseling to cases involving people with disabilities.
Effective: Fall 1999

Prerequisite: CN ED 505, CN ED 506, CN ED 509, CN ED 525 ; available only to majors in CN ED and CNPSY

CN ED 595C **Professional Experience in Rehabilitation Counseling (1-15)** Supervised internship, with responsibility for a regular case load.

Effective: Spring 2009

Prerequisite: RHS 403, CN ED 595B ; available only to majors in CN ED and CNPSY

CN ED 595D (CNPSY 595D) **Supervision of Counselors (3-9)** Practical experience in supervising and evaluating work of counselors.

Effective: Summer 1992

Prerequisite: CN ED 595A or CN ED 595B ; available only to majors in CN ED and CNPSY

CN ED 595E **Elementary School Counseling Internship and Seminar (1-3 PER SEMESTER/MAXIMUM OF 6)** Off-campus, supervised internships in elementary school settings with supplementary related topics, discussion, and skills training in on-campus seminars.

Effective: Spring 1993

Prerequisite: or concurrent: CN ED 503 ; available only to majors in CN ED and CNPSY

CN ED 595F **Secondary School Counseling Internship and Seminar (1-3 PER SEMESTER/MAXIMUM OF 6)** Off-campus, supervised internships in secondary school settings with supplementary related topics, discussion, and skills training seminars.

Effective: Spring 1993

Prerequisite: or concurrent: CN ED 504 ; available only to majors in CN ED and CNPSY

CN ED 595G **Student Personnel Internship and Integrative Seminar (1-6 per semester/maximum of 9)** Off-campus, supervised internships in postsecondary/related college student personnel settings with pertinent topics, discussion; skills training seminars on campus.

Effective: Summer 1990

Prerequisite: or concurrent: CSA 551 ; available only to majors in CN ED and CNPSY

CN ED 595I **Counselor Education Doctoral Teaching Internship (3)** Practical experience in undergraduate and graduate level teaching under supervision. Available only to CN ED doctoral students.

Effective: Summer 2009

Prerequisite: CN ED 581

CN ED 595K **Counselor Education Doctoral Counseling Internship (3)** Supervised internship, with responsibility for a regular counseling caseload. Available only to CN ED doctoral Students.

Effective: Summer 2009

Prerequisite: CN ED 595P

CN ED 595P **Counselor Education Doctoral Counseling Practicum (3)** Practice in the application of counselor education principles and methods to cases counseled under supervision; case conferences. Available only to CN ED doctoral students.

Effective: Fall 2003

CN ED 596 **Individual Studies (1-9)** Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1990

CN ED 597 **Special Topics (1-9)** Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 1990

CN ED 597C (CNPSY 597C) **Diagnosis for Counselors (3)** Course examines the rudiments of diagnosis for counselors. Focuses on role of identification and assessment of symptoms and behaviors in determining appropriate diagnoses.

Effective: Summer 2011 Ending: Summer 2011

CN ED 597D (CNPSY 597D) **Grief and Loss Counseling** (3) Course designed to teach counselors how to work with clients with a variety of grief and loss issues.
Effective: Summer 2011 Ending: Summer 2011

CN ED 600 **Thesis Research** (1-15) No description.
Effective: Summer 1990

CN ED 601 **Thesis Preparation** No description.
Effective: Fall 2004

CN ED 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching of counselor education laboratory, clinical practice, and recitation classes under senior faculty supervision.
Effective: Summer 1990

CN ED 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 1990

CN ED 840 **Trends and Issues in Addiction Counseling** (3) This course provides an overview of current professional and ethical issues facing the addictions field.
Effective: Fall 2009

CN ED 843 (S PSY 843) **Prevention Strategies and Programming** (3) Addresses prevention program development, implementation, and evaluation, along with theoretical and empirical underpinnings, ethical and multicultural issues related to prevention.
Effective: Fall 2010

Last Import from UCM: June 16, 2011 3:00 AM

Criminal Justice (CRIMJ)

CRIMJ 406 (SOC 406, CRIM 406) **Sociology of Deviance** (3) Theory and research concerning behaviors and lifestyles viewed as significant departures from a group's normative expectations.

Effective: Spring 2008

Prerequisite: CRIMJ 100 and CRIMJ 113 and CRIMJ 230 or permission of program

CRIMJ 407 (US) (CRIM 407) **Victimology** (3) This course will explore the legal, emotional, and social responses to the process of victimization by offenders and third parties.

Effective: Spring 2008

CRIMJ 408 **Police Administration** (3) Principles of administration as they relate to a police organization; and policy development.

Effective: Spring 2008

Prerequisite: CRIMJ 100 or CRIM 100 and CRIMJ 210 or CRIM 210

CRIMJ 410 **The Pennsylvania Court System** (3) Tracing the steps of criminal cases through the investigative stage, arrest, trial, sentencing and appellate review in Pennsylvania.

Effective: Spring 2004

Prerequisite: CRIMJ 100, CRIMJ 113

CRIMJ 412 (SOC 412, CRIM 412) **Crime, Social Control, and the Legal System** (3) Legal and extralegal control; public opinion on crime; criminal justice and correctional processes; legal sanctions; control strategies. Field trip.

Effective: Spring 2008

Prerequisite: CRIMJ 012, CRIMJ 013 or SOC 005

CRIMJ 413 (CRIM 413, SOC 413) **Advanced Criminological Theory** (3) This course provides an in-depth look at theories of crime and examines influential empirical studies designed to these theories.

Effective: Spring 2008

Prerequisite: CRIMJ 012, CRIMJ 250W

CRIMJ 414 (SOC 414, CRIM 414) **Criminal Careers and the Organization of Crime** (3) Research on and theory of criminal careers and crime organizations, emphasizing recruitment and disengagement; offender characteristics and lifestyles; policy implications.

Effective: Spring 2008

Prerequisite: CRIMJ 012 or CRIMJ 013 or SOC 005

CRIMJ 415 (PUBPL 415) **Drug Control Policy in Comparative Perspective** (3) Examines the history of drug control policy in the United States; comparisons and contrasts with other countries' experiences.

Effective: Summer 2004

Prerequisite: CRIMJ 200 or PL SC 001 or PL SC 014 or SOC 001

CRIMJ 420 **Criminal Law and Procedure** (3) Common law and statutory crimes; constitutional rights of accused persons, liability of criminal justice professionals.

Effective: Spring 2008

Prerequisite: CRIMJ 113

CRIMJ 421 (CRIM 421) **Violent Crime in the United States** (3) The impact of violent crime on victims, their families, and communities; the police process as it relates to violent crime.

Effective: Spring 2008

Prerequisite: CRIMJ 012

CRIMJ 421W **Violent Crime in the United States** (3) The impact of violent crime on victims, their families, and communities; the police process as it relates to violent crime.

Effective: Spring 2008

Prerequisite: CRIMJ 012

CRIMJ 422 (CRIM 422) **Victimization** (3) Examines the history, how victimization is measured/studied in social sciences, public policy implications of victimization movement in U.S.

Effective: Spring 2008

Prerequisite: CRIMJ 250W

CRIMJ 423 (US) (WMNST 423, CRIM 423) **Sexual and Domestic Violence** (3) Legal, sociological, and psychological perspectives on sexual and domestic violence.

Effective: Spring 2008

Prerequisite: CRIMJ 100

CRIMJ 424 (CRIM 424) **Drugs and Crime** (3) Analysis of international narcotics trafficking in the twentieth century.

Effective: Spring 2008

Prerequisite: CRIMJ 100

CRIMJ 424W **Drugs and Crime** (3) Analysis of international narcotics trafficking in the twentieth century.

Effective: Spring 2008

Prerequisite: CRIMJ 100

CRIMJ 425 (CRIM 425) **Organized Crime** (3) This course examines organized crime in terms of historical antecedents,

structure, related theories, and policy issues.

Effective: Spring 2008

Prerequisite: CRIMJ 100 or permission of program

CRIMJ 426 **Special Offender Types** (3-6) Study of special offender types; relationships with criminal justice system (drug abuse, victimless crime, white collar crime considered different semesters).

Effective: Spring 2008

Prerequisite: 3 credits in Criminal Justice or permission of program

CRIMJ 430 **Alternatives to Incarceration** (3) Control and treatment of offenders in the community, probation and parole organizations, diversion programs, innovative sentences, supervision techniques.

Effective: Spring 2008

Prerequisite: CRIMJ 100 and CRIMJ 113 and CRIMJ 230 or permission of program

CRIMJ 431 **Offender and Prisoner Rights** (3) The identification of correctional problems and the setting of objectives as reflective of court rulings, legislative change, and administrative law.

Effective: Spring 2008

Prerequisite: CRIMJ 100, CRIMJ 113, CRIMJ 230 or permission of program

CRIMJ 432 (CRIM 432) **Crime and the American Court System** (3) This course examines the American court system including structure and the way courts process offenders with special focus on sentencing.

Effective: Spring 2008

Prerequisite: CRIM 100

CRIMJ 435 **Border Security** (3) This course provides knowledge about government organizations charged with American border security, guiding laws and policies.

Effective: Summer 2011

Prerequisite: 6th semester standing

CRIMJ 439 (PL SC 439) **The Politics of Terrorism** (3) Analysis of political terrorism as a violent alternative for peaceful change and traditional warfare in the nuclear age.

Effective: Spring 2008

Prerequisite: CRIMJ 100 or PL SC 014 or permission of program

CRIMJ 441 (US) (CRIM 441) **The Juvenile Justice System** (3) Historical and contemporary view of the juvenile justice system. Focus on analyzing components of the system, their interactions, processing, and handling of youths.

Effective: Spring 2008

Prerequisite: CRIMJ 100

CRIMJ 441W **The Juvenile Justice System** (3) Historical and contemporary view of the juvenile justice system. Focus on analyzing components of the system, their interactions, processing, and handling of youths.

Effective: Spring 2008

Prerequisite: CRIMJ 100 or permission of program

CRIMJ 450W **Senior Seminar** (3 per semester/maximum of 6) Capstone course exploring past, current and future developments in criminal justice.

Effective: Spring 2008

Prerequisite: CRIMJ 100 or CRIM 100 and sixth semester standing or permission of program.

CRIMJ 451 (US) (CRIM 451) **Race, Crime, and Justice** (3) This course focuses on the significance of race, class, and ethnicity to criminal justice processing and criminal offending.

Effective: Spring 2008

Prerequisite: CRIMJ 100

CRIMJ 453 (US) (WMNST 453, CRIM 453) **Women and the Criminal Justice System** (3) This course focuses on the experiences of women as offenders, victims, and professionals in the criminal justice system.

Effective: Spring 2008

Prerequisite: CRIMJ 100 or WMNST 001

CRIMJ 460 **History and Function of Criminal Justice Components** (3) Historical development of criminal justice system components (police, courts, corrections) related to formulation and function of the state.

Effective: Spring 2008

CRIMJ 462 **Comparative Criminal Justice Systems** (3) A comparison of American and selected foreign justice systems to illustrate the variety of possible responses to crime.

Effective: Spring 2008

Prerequisite: CRIMJ 100 or permission of program

CRIMJ 465 **Ethics in Criminal Justice** (3) Ethical behavior in the criminal justice system.

Effective: Spring 2008

Prerequisite: CRIMJ 100 or permission of program

CRIMJ 467 (SOC 467, CRIM 467) **Law and Society** (3) Law and society studies the social origins of law and legal systems; occupational careers, and decision-making of legal officials.

Effective: Spring 2008

Prerequisite: CRIMJ 100 or CRIMJ 113 or permission of program

CRIMJ 469 (HIST 469) **Drugs and Drug Policy in the United States** (3) Examines the history and dimensions of drug use and analyzes the impact of drug policy.

Effective: Spring 2008

Prerequisite: CRIMJ 100 or HIST 021

CRIMJ 471 (B LAW 471) **Legal Rights, Duties, Liabilities of Criminal Justice Personnel** (3) Civil law issues within a justice agency and between criminal justice agencies and members of the public.

Effective: Spring 2008

Prerequisite: CRIMJ 100

CRIMJ 473 (B LAW 473) **Criminal Procedure and Evidence in the Business Community** (3) Law of evidence and proof, constitutional constraints on police procedures (arrest, search, etc.) in society and the business community.

Effective: Spring 2008

Prerequisite: CRIMJ 100

CRIMJ 482 (CRIM 482) **Seminar, Criminal Justice Agency Administration** (3) Relates organizational and public policy management approaches to police, courts, and correctional institutions.

Effective: Spring 2008

Prerequisite: CRIMJ 100

CRIMJ 489W **Victimology: Predatory Crime** (3) This course uses medical, social scientific and legal research to study the complexities of predatory crime.

Effective: Spring 2004

Prerequisite: CRIMJ 407

CRIMJ 494 **Research Topics** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2002

CRIMJ 494H **Research Topics** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

CRIMJ 495 **Internship in Criminal Justice** (3-12) Experience with a criminal justice agency coordinated through readings and discussion.

Effective: Spring 2008

Prerequisite: CRIMJ 100

CRIMJ 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 1987

CRIMJ 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 1987

CRIMJ 497A **Death Penalty in America** (3) An historical overview of US death penalty practices; pertinent court cases and contemporary issues will be examined.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

CRIMJ 499 (IL) **Foreign Studies** (6) Courses offered in foreign countries by individual or group instruction.

Effective: Spring 2008

CRIMJ 500 **Advanced Criminological Theory** (3) This course reviews and critiques the major theories of crime causation.

Effective: Summer 2002

Prerequisite: admission to CRIMJ graduate program or permission of program

CRIMJ 501 **Quantitative Methods for Criminal Justice** (3) Advanced research methodology for criminal justice and criminology.

Effective: Summer 2002

Concurrent: CRIMJ 503

CRIMJ 502 **Public Policy and the Criminal Justice System** (3) This course studies the concepts and methods of political and legal activity within the criminal justice system and their impact on society.

Effective: Summer 2002

Prerequisite: a baccalaureate in Criminal Justice or Behavioral related Sciences and admission to graduate study

CRIMJ 503 **Advanced Statistics in Criminal Justice** (3) Advanced statistics in criminal justice and criminology.

Effective: Summer 2002

Concurrent: CRIMJ 501

CRIMJ 504 **Criminal Justice Organization and Management** (3) The course will be a broad overview of the structure and management of criminal justice organizations.

Effective: Summer 2002

Prerequisite: admission to graduate study and permission of program

CRIMJ 563 **Concepts and Practices in Police Administration** (3) Discusses application of police research and management principles to the contemporary policing context.

Effective: Spring 2006

Prerequisite: permission of program

CRIMJ 564 Administrative and Legal Aspects of Corrections (3) This course addresses historical and contemporary correctional policy, accountability, and possible remedial alternatives.

Effective: Spring 2006

Prerequisite: permission of program

CRIMJ 565 Courts in the Criminal Justice System (3) An analysis of the function and role of the courts and the personnel involved in the American criminal justice system.

Effective: Spring 2006

Prerequisite: permission of program

CRIMJ 567 Juvenile Justice: Issues and Practice (3) The systematic application of the juvenile justice system and issues related to juvenile delinquency and constitutional law.

Effective: Summer 2002

Prerequisite: permission of program

CRIMJ 568 Qualitative Methods for Criminal Justice (3) This course examines the many facets of qualitative research methodology.

Effective: Fall 2002

Prerequisite: Admission to a graduate program or permission of program.

CRIMJ 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 2002

CRIMJ 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2002

CRIMJ 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Spring 2006

Prerequisite: The applicant must have complete CRIMJ 500, CRIMJ 502, CRIMJ 504 plus three other Masters credits. The applicant also must have a GPA of at least 3.25

CRIMJ 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2002

CRIMJ 600 Thesis Research (1-15) No description.

Effective: Summer 2002

CRIMJ 610 Thesis Research Off Campus (1-15) No description.

Effective: Summer 2002

Last Import from UCM: June 16, 2011 3:00 AM

Criminology (CRIM)

CRIM 406 (CRIMJ 406, SOC 406) **Sociology of Deviance** (3) Theory and research concerning behaviors and lifestyles viewed as significant departures from a group's normative expectations.

Effective: Spring 2008

Prerequisite: CRIM 012

CRIM 407 (CRIMJ 407) **Victimology** (3) This course will explore the legal, emotional, and social responses to the process of victimization by offenders and third parties.

Effective: Spring 2008

CRIM 412 (CRIMJ 412) **Crime, Social Control, and the Legal System** (3) Legal and extralegal control; public opinion on crime; criminal justice and correctional processes; legal sanctions; control strategies. Field trip.

Effective: Spring 2008

Prerequisite: CRIM 012, CRIM 013 orSOC 005

CRIM 413 (SOC 413, CRIMJ 413) **Advanced Criminological Theory** (3) This course provides an in-depth look at theories of crime and examines influential empirical studies designed to these theories.

Effective: Spring 2008

Prerequisite: CRIM 012, CRIM 250W

CRIM 414 (CRIM 414, CRIMJ 414) **Criminal Careers and the Organization of Crime** (3) Research on and theory of criminal careers and crime organizations, emphasizing recruitment and disengagement; offender characteristics and lifestyles; policy implications.

Effective: Spring 2008

Prerequisite: SOC 012 orSOC 013 orSOC 005

CRIM 421 (CRIMJ 421) **Violent Crime** (3) Examines the nature and causes of violence. Several theoretical perspectives are reviewed including biological, psychological, social, and cultural.

Effective: Spring 2008

Prerequisite: CRIM 100, CRIM 250W

CRIM 422 (CRIMJ 422) **Victimization** (3) Examines the history, how victimization is measured/studied in social sciences, public policy implications of victimization movement in U.S.

Effective: Spring 2008

Prerequisite: CRIM 250W

CRIM 423 (US) (CRIMJ 423, WMNST 423) **Sexual and Domestic Violence** (3) Legal, sociological, and psychological perspectives on sexual and domestic violence.

Effective: Spring 2008

Prerequisite: CRIMJ 100 orWMNST 001

CRIM 424 (CRIMJ 424) **Drugs and Crime** (3) Analysis of international narcotics trafficking in the twentieth century.

Effective: Spring 2008

Prerequisite: CRIM 100 orWMNST 001

CRIM 425 (CRIMJ 425) **Organized Crime** (3) This course examines organized crime in terms of historical antecedents, structure, related theories, and policy issues.

Effective: Spring 2008

Prerequisite: CRIM 100

CRIM 429 **Seminar in Criminal Behavior** (3-4 per semester/maximum of 7) This course explores the study of the application of criminological theories to our understanding of various forms of criminal behavior.

Effective: Spring 2008

Prerequisite: CRIM 012

CRIM 430 **American Correctional System** (3) Study of corrections from probation, intermediate punishment, adult and juvenile correctional institutions to parole.

Effective: Spring 2008

Prerequisite: CRIM 100, CRIM 250W

CRIM 432 (CRIMJ 432) **Crime and the American Court System** (3) This course examines the American court system including structure and the way courts process offenders with special focus on sentencing.

Effective: Spring 2008

Prerequisite: CRIM 100

CRIM 433 **Sentencing** (3) This course studies sentencing from prosecutorial charging decisions through revocation of probation, and the complex goals and responsibilities at sentencing.

Effective: Spring 2008

Prerequisite: CRIM 100, CRIM 250W

CRIM 435 **Policing in America** (3) This course will focus on current, historical (3), theoretical, and research issues surrounding law enforcement in the United States.

Effective: Spring 2008

Prerequisite: CRIM 100, CRIM 250W

CRIM 441 (US) (CRIMJ 441) **Delinquency and Juvenile Justice** (3) Course examines delinquency and the juvenile justice system including delinquency's nature, causes, and prevention and the processing of juveniles.

Effective: Spring 2008

Prerequisite: CRIM 100

CRIM 449 **Seminar in Criminal Justice** (3-4 per semester/maximum of 7) Examines criminal justice decision-making and operation such as the role of contemporary movements in law enforcement, the courts and corrections.

Effective: Spring 2008

Prerequisite: CRIM 100, CRIM 113, CRIM 250W

CRIM 451 (US) (CRIMJ 451) **Race, Crime, and Justice** (3) This course focuses on the significance of race, class, and ethnicity to criminal justice processing and criminal offending.

Effective: Spring 2008

Prerequisite: CRIM 100

CRIM 453 (US) (WMNST 453, CRIMJ 453) **Women and the Criminal Justice System** (3) This course focuses on the experiences of women as offenders, victims, and professionals in the criminal justice system.

Effective: Spring 2008

Prerequisite: CRIM 100 or WMNST 001

CRIM 467 (CRIMJ 467, SOC 467) **Law and Society** (3) Law and society studies the social origins of law and legal systems; occupational careers, and decision-making of legal officials.

Effective: Spring 2008

Prerequisite: CRIM 100, CRIMJ 113 or permission of program

CRIM 469 **Seminar in the Law** (3-4 per semester/maximum of 7) The focus of this seminar is the law such as the laws of sentencing, appellate course decisions and their impact.

Effective: Spring 2008

Prerequisite: CRIM 113

CRIM 480H **Research Topics in Crime, Law, and Justice** (1) Students are exposed to a variety of research topics related to crime, law, and justice.

Effective: Spring 2008

Prerequisite: CLJ major and admission to the Schreyer Honors College

CRIM 481H **Information Literacy in Crime, Law, and Justice** (1) Students are exposed to a variety of information sources related to crime, law, and justice.

Effective: Spring 2008

Prerequisite: CLJ 480H

CRIM 482 (CRIMJ 482) **Seminar, Criminal Justice Agency Administration** (3) Relates organizational and public policy management approaches to police, courts, and correctional institutions.

Effective: Spring 2008

Prerequisite: CRIM 100

CRIM 490 **Crime Policy** (3) This course focuses on criminal justice policy and the factors that influence policy development and implementation.

Effective: Spring 2008

Prerequisite: CRIM 100, CRIM 113, CRIM 250W 6 credits of 400-level CRIMJ courses and 7th semester standing

CRIM 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2008

CRIM 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Spring 2008

CRIM 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2008

CRIM 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Spring 2008

CRIM 805 (HLS 805) **Violence, Threats, Terror, and Insurgency** (3) This course provides an overview of the domestic and global issues related to homeland security.

Effective: Summer 2010

Last Import from UCM: June 16, 2011 3:00 AM

Curriculum and Instruction (C I)

C I 400 Introduction to Research Literature (3) Introduction to research literature and methodology; stress on interpretation, sources, and research reporting.

Effective: Fall 1981

Prerequisite: student teaching or teaching experience

C I 405 (EDLR 405) Strategies in Classroom Management (3) Managing and coping with disruptive student behavior in instructional settings so that they support the teaching/learning process.

Effective: Fall 2008

Prerequisite: teaching experience or supervised practicum experience

C I 412W Secondary Teaching (3) Study of the teacher's responsibilities, steps in planning instruction, and various strategies for implementing and assessing teaching.

Effective: Spring 2007

Prerequisite: C I 295, EDPSY 014, EDTHP 115

C I 494H Research Techniques in Curriculum and Instruction (1-3) Examination, application, assessment, and presentation of research modes and techniques in Curriculum and Instruction. Limited to University scholars in the College of Education.

Effective: Spring 1988

Prerequisite: second-semester standing

C I 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Fall 2001

Prerequisite: prior approval of proposed assignment by instructor

C I 495A Clinical Application of Instruction--Early Childhood Education (3) Practicum situation for demonstration of selected instructional strategies and management skills acquired in professional training. To be offered only for Satisfactory/Unsatisfactory grading.

Effective: Spring 1997

Prerequisite: C I 295, EDPSY 014, EDTHP 115 . Official clearances required. See:

<http://www.ed.psu.edu/preservice/clearance.htm> Concurrent: regular professional methods courses in area of certification.

C I 495B Clinical Application of Instruction--Elementary and Kindergarten Education (3) Practicum situation for demonstration of selected instructional strategies and management skills acquired in professional training. To be offered only for Satisfactory/Unsatisfactory grading.

Effective: Spring 1997

Prerequisite: C I 295, EDPSY 014, EDTHP 115 . Official clearances required. See:

<http://www.ed.psu.edu/preservice/clearance.htm> Concurrent: MTHED 420 SCIED 458 SS ED 430W

C I 495C Clinical Application of Instruction--Secondary Education (3) Practicum situation for demonstration of selected instructional strategies and management skills acquired in professional training. To be offered only for Satisfactory/Unsatisfactory grading.

Effective: Spring 1997

Prerequisite: C I 295, EDPSY 014, EDTHP 115 . Official clearances required. See:

<http://www.ed.psu.edu/preservice/clearance.htm> Concurrent: C I 412 and special methods course(s) in area of certification

C I 495D Practicum in Student Teaching--Elementary and Kindergarten Education (12) Full-time classroom instruction in early childhood and elementary education. Students supervised by University personnel and practicing teachers. No concurrent courses other than C I 495F permitted.

Effective: Spring 1997

Prerequisite: C I 495A or C I 495B ; a grade of C or higher in all specified and professional courses. Official clearances required. See: <http://www.ed.psu.edu/preservice/clearance.htm>

C I 495E Practicum in Student Teaching--Secondary Education (15) Full-time classroom instruction in secondary education. Students supervised by university personnel and practicing teachers. No concurrent courses permitted.

Effective: Spring 1997

Prerequisite: C I 495C seventh-semester standing and grade of C or higher in all specified and professional courses. Official clearances required. See: <http://www.ed.psu.edu/preservice/clearance.htm>

C I 495F Professional Development Practicum (3) Instruction concurrent with student teaching practicum. Students focus on the solution of instructional problems identified at the practicum site.

Effective: Spring 1997

Prerequisite: Official clearances required. See: <http://www.ed.psu.edu/preservice/clearance.htm> Concurrent: C I 495D

C I 495G Practicum in Student Teaching - Secondary Education (9) Full-time professional development internship in secondary English education. Students supervised by University personnel and practicing teachers.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: prior approval of proposed assignment by instructor

C I 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

C I 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

C I 497B Elementary Education Disciplinary Block (12) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C I 497B Elementary Education Disciplinar Block (12) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

C I 497D Preparing for Overseas Student Teaching (1) This seminar prepares students for the short term student teaching abroad program. To be taken semester prior to student teaching.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C I 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

C I 498A Curriculum and Instruction that Engages and Motivates Adolescent Learners (3) This course explores the cultures of curriculum and the importance of curriculum research to construct a workable philosophy; applications; outcomes.

Effective: Summer 2011 Ending: Summer 2011

C I 498B Curriculum Design for 21st Century Skills: Open-ended Student Inquiry (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 2011 Ending: Summer 2011

C I 500 Multiple and Mixed Methods in Curriculum Inquiry (3) Multiple and mixed methods of inquiry to investigate problems in the practice of curriculum and instruction.

Effective: Summer 2007

C I 501 Teaching as Inquiry (3) Course guides teachers to develop systematic inquires into effective teaching and learning.

Effective: Summer 1998

C I 502 Qualitative Research in Curriculum and Instruction I (3) Presentation of theoretical and practical issues related to designing and proposing qualitative research concerning curriculum, teaching and/or learning.

Effective: Summer 1998

Prerequisite: admission to a doctoral program

C I 503 Qualitative Research in Curriculum and Instruction II (3) Considers forms of qualitative data, data analyses, procedures to generate data relationships, interpretation, and presentation of data.

Effective: Summer 1998

Prerequisite: C I 502

C I 504 (CI ED 504) Perspectives in African Education (3) Educational systems in selected African countries are examined with respect to colonial history, social, political, and cultural factors.

Effective: Spring 1995

C I 534 Historical Research in the Curriculum (3) The course addresses the practice of historical research in curriculum, burrowing from the techniques of historians, journalists, and educators.

Effective: Spring 1999

C I 550 Overview of Contemporary School Curriculum (3) Current school programs and options and their impact on pupils; problems in introducing new content into the curriculum.

Effective: Fall 1981

Prerequisite: 12 credits in education and psychology or teaching experience

C I 577 (LL ED 577) Multicultural Issues in Literacy Education (3) Explores research questions, and theoretical frameworks, and analyzes multicultural issues in popular media in the context of American schools.

Effective: Spring 1997

Prerequisite: LL ED 542

C I 580 (LL ED 580) Media Literacy, Language, and Literacy in Schools (3) Theories of media literacy, issues of non-print technology in language and literacy.

Effective: Spring 1997
Prerequisite: LL ED 480

C I 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

C I 595 Internship in Curriculum, Supervision, or Instruction (1-6) Internship in schools or other educational settings under supervision of graduate faculty in student's area of specialization.
Effective: Spring 1987
Prerequisite: approval by program head and at least 15 graduate-level credits in Education

C I 596 Individual Studies (1-9) Creative projects including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

C I 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered frequently.
Effective: Spring 1987

C I 597A Writing the Research Article in C & I (3) Doctoral students will revise existing work into a journal article for publication. Intensive writing workshop addressing genre and style.
Effective: Summer 2011 Ending: Summer 2011
Prerequisite: Doctoral student or consent of instructor

C I 597A Foundations of Educational Research (3) Overview of competing assumptions among research perspectives with the field of education.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C I 597A Key Issues in English Language Learners Teacher Education (3) The course examines key issues of preparing teachers for teaching English language learners.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

C I 597B Reforming Public Schools (3) This course will historically examine the public school reform movement and critique the idea of "failing schools".
Effective: Summer 2011 Ending: Summer 2011

C I 597B Girls, Girl Culture and Girlhood Studies: Towards Mapping the Field (3) This interdisciplinary course will examine issues around girls, girl culture, and the nature of girlhood across time, cultures and geopolitical spaces.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C I 597B Analyzing Interaction in Educational Contexts (3) Understanding and employing various research approaches to capture and analyze verbal and embodied aspects of interaction in educational settings.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

C I 597C (INSYS 597C) Technology in Teacher Education, A Critical Consideration (3) This seminar has been designed to consider how technologies have been used in teacher preparation programs and what we as teacher educators can do to take more control over the use of appropriate technologies in our classrooms.
Effective: Summer 2011 Ending: Summer 2011

C I 597C Dis/Ability Studies in Literacy Education (3) How are literacy abilities and disabilities constructed and performed in specific contexts? Ethnographic and discursive data explored.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C I 597C Narrative Inquiry as Decolonizing Methodology: Contributions Controversies Concerns (3) Utilizes interdisciplinary readings and student inquiry to construct a sense of affordances and constraints of narrative as a decolonizing methodology.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

C I 597D Introduction to Language, Culture and Society Doctoral Studies (3) Introduction to doctoral studies within the Language, Culture and Society emphasis area of Curriculum and Instruction. Preparation for Candidacy.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: admission to doctoral program

C I 597D Writing the Research Article in C & I (3) Doctoral students will revise existing work into a journal article for publication. Intensive writing workshop addressing genre and style.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

C I 597E Core Readings in Vygotsky (3) Reading original seminal texts by Vygotsky and colleagues to understand this highly influential theoretical perspective on human learning and development.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C I 597E Service-Learning: Practice & Theory (3) This interdisciplinary course explores service-learning, community, power, privilege and social justice. Service projects merge theory and practice throughout the semester.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

C I 597F Teaching Reading and Writing for English Language Learners (3) The course focuses on effective ways to teach reading and writing for English language learners in the United States.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C I 597F Children's Books as Material Culture (3) This course studies historical children's books as material culture by combining book history approaches with material culture history.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

C I 597G (WMNST 597A) Girls and Popular Culture: From Nancy Drew to Webkinz (3) Seminar explores girls and popular culture in different textual & artifactual forms, from books to media to toys. It uses a historical approach and draws on theories of feminist cultural studies. Key questions include whether girls' popular culture is a contemporary, North American phenomenon; whether girls are only consumers but not also producers of culture; and issues such as moral panics & hegemonic femininity. Key readings include those by Driscoll, Forman-Brunell, Harris, Lord, McRobbie, Peers, Walkerdine, Willett & Wills, among others.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C I 597G New Media, Literacy & Child/Adolescent Popular Culture (3) Introduction to cultural studies, new literacies, children/adolescents engagement with media. Participants undertake applied media work.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

C I 597I Theories of Childhood (3) The study of childhood from cultural, historical, psychological and philosophical perspectives.
Effective: Summer 2011 Ending: Summer 2011

C I 597I Theories of Childhood (3) The study of childhood from cultural, historical, psychological and philosophical perspectives.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C I 597I Theories of Childhood (3) The study of childhood from cultural, historical, psychological and philosophical perspectives.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

C I 597K Semiotics of Critical Literacy (3) Semiotic theories applied to the design and interpretation of multimodal texts within critical literacy practices.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C I 597K Art Across the Curriculum (3) Topics include aesthetic foundations, theory, and research in education and the role of the arts in social and cultural transformation.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

C I 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2005

C I 598A Assessing Student Learning (3) For College of Education Graduate Students interested in applying formative assessment strategies to the design of curriculum, instruction & assessment models.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C I 598B Reforming Public Schools (3) This course will historically examine the public school reform movement and critique the idea of "failing schools."
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C I 600 Thesis Research (1-15) No description.
Effective: Fall 1983

C I 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

C I 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Teaching experience in

Curriculum and Instruction undergraduate faculty supervision.

Effective: Fall 1983

Prerequisite: admission to C&I doctoral program and program head permission

C I 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.

Effective: Summer 2000

C I 610 Thesis Research Off Campus (1-15) No description.

Effective: Fall 1983

C I 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Curriculum and Supervision (C & S)

C & S 470 Workshop in Selected Studies in Curriculum (1-6) Intensive work on selected current problems in curriculum.
Effective: Winter 1978

Prerequisite: 12 credits in education and teaching experience

C & S 497A Classroom Instruction That Works (3) Designed for educators interested in learning about teaching strategies that, when used effectively, have a measurable difference in student achievement.

Effective: Summer 2011 Ending: Summer 2011

C & S 497B Responsive Classroom Learning Environments (3) This course engages practicing teachers in discussions and activities focused on creating classroom learning environments that support academic and social learning.

Effective: Summer 2011 Ending: Summer 2011

C & S 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

C & S 498A Classroom Instruction That Works (3) This course is designed for K-12 educators interested in learning about teaching strategies that have positive effects on student learning.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

C & S 551 (EDLDR 551) Curriculum Design: Theory and Practice (3) The analysis and use of the foundations which underlie models of curriculum design.

Effective: Spring 2011

Prerequisite: C I 550

C & S 553 (EDLDR 553) Issues in Curriculum (3 per semester/maximum of 6) In-depth study of issues and trends in the understanding and practice of curriculum.

Effective: Spring 2011

Prerequisite: formal acceptance as a doctoral student in the Curriculum and Supervision option area

C & S 554 Long-Range Planning for School Programs (3) Strategies and techniques for conducting long-range planning of educational programs.

Effective: Fall 1981

Prerequisite: C I 550 or EDLDR 551

C & S 555 (EDLDR 555) Development of Teacher Education Programs (3) Study of the components and design of teacher education programs within the constraints of institutional, professional, and legal contexts.

Effective: Spring 2011

Prerequisite: C I 550 or EDLDR 551

C & S 557 (EDLDR 557) Seminar in Curriculum Research (3) Analysis of particular curriculum studies, methods and paradigms, and the general status of current research in the general curriculum field.

Effective: Spring 2011

Prerequisite: C I 400, C I 550

C & S 558 (EDLDR 558) Standard Works in Curriculum and Instruction (3) Study of significant empirical, historical, evaluative, philosophical, and critical works having an impact on curriculum and instruction practice.

Effective: Spring 2011

Prerequisite: EDLDR 551

C & S 560 (EDLDR 560) Principles of Instructional Supervision (3) Social and institutional settings for instructional supervision; functions, activities, and practices of supervision; supervisory case studies.

Effective: Spring 2011

Prerequisite: teaching or school administrative experience; 18 credits in education at least 5 of which are methods of teaching

C & S 562 (EDLDR 562) Methods of Classroom Supervision and Coaching (3) Strategies and techniques for supervision/coaching of instruction intended to enhance teacher reflection, self-direction, and autonomy.

Effective: Spring 2011

Prerequisite: EDLDR 560 teaching administrative or other professional education work experience

C & S 563 (EDLDR 563) Designing Staff Development Programs (3) Designing, implementing, and evaluating effective staff development programs for personnel in educational settings.

Effective: Spring 2011

Prerequisite: EDLDR 560

C & S 564 (EDLDR 564) Supervision Theory (3) Critical analysis of alternative theories of instructional supervision and in-depth examination of trends and issues in supervision.

Effective: Spring 2011

Prerequisite: EDLDR 560

C & S 587 (CI ED 587, E C E 587) **Curriculum, Culture, and Child Development** (3) Examines human development and cultural factors in planning, designing, and implementing curriculum and instruction in early childhood and childhood education.

Effective: Fall 2001

Prerequisite: HD FS 429

C & S 597A **Projects and Readings in Curriculum and Supervision** (1-3) This course provides graduate students in C & S opportunities for in-depth study of specific issues and topics.

Effective: Summer 2011 Ending: Summer 2011

C & S 597B **Colloquium in Curriculum and Supervision** (1) This course introduces doctoral students to the resources and literature that support inquiry in broad fields of curriculum and supervision.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Last Import from UCM: June 16, 2011 3:00 AM

Dance (DANCE)

DANCE 431 **Advanced Ballet I** (1.5) An advanced ballet training course.

Effective: Spring 2006

Prerequisite: DANCE 232

DANCE 432 **Advanced Ballet II** (1.5) A continuation of Advanced Ballet I to augment technical proficiency.

Effective: Spring 2006

Prerequisite: DANCE 431

DANCE 441 **Advanced Jazz I** (1.5) An advanced course in the techniques of jazz dance.

Effective: Spring 2006

Prerequisite: DANCE 242

DANCE 442 **Advanced Jazz II** (1.5) A continuation of Advanced Jazz I to augment technical proficiency.

Effective: Spring 2006

Prerequisite: DANCE 441

DANCE 451 **Advanced Tap I** (1.5) An advanced course in the techniques of tap dance.

Effective: Spring 2006

Prerequisite: DANCE 252

DANCE 452 **Advanced Tap II** (1.5) A continuation of Advanced Tap I to augment technical proficiency.

Effective: Spring 2006

Prerequisite: DANCE 451

DANCE 461 **Advanced Modern Dance I** (1.5) Development of dance technique and movement combinations on the advanced level.

Effective: Spring 2006

Prerequisite: DANCE 262

DANCE 462 **Advanced Modern Dance II** (1.5) A continuation of Advanced Modern Dance I to augment technical proficiency.

Effective: Spring 2006

Prerequisite: DANCE 461

DANCE 480 **Choreographic Projects** (2) Choreographic practicum experiences for concert performances.

Effective: Spring 2006

Prerequisite: DANCE 381

DANCE 482 **Introduction to Laban Movement Analysis** (3) Observe and analyze movement elements by exploring concepts of Body, Effort, Shape, and Space to increase personal communication and expression.

Effective: Summer 1999

DANCE 484 (US;IL) **Dance History** (3) Survey of dance history concerning perspectives of culture, race, and gender with a focus on Nineteenth and Twentieth centuries.

Effective: Fall 2006

DANCE 485 **Contemporary Dance Repertory** (1-2) An advanced dance course in the choreographic process with emphasis on original choreography in performance.

Effective: Spring 2006

DANCE 487 **Advanced Hip Hop Dance** (1.5) Advanced Hip Hop Dance reinforces and expands concepts from Beginning Hip Hop Dance. Free expression of the body, freestyle, and choreography are emphasized.

Effective: Summer 2007

Prerequisite: DANCE 283

DANCE 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Spring 1999

DANCE 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 1999

Last Import from UCM: June 16, 2011 3:00 AM

Early Childhood Education (E C E)

E C E 451 Instruction in Early Childhood Education Derived from Development Theories (3) Curriculum and instruction for early childhood education; program practice with pluralistic theoretical foundations for early childhood education.
Effective: Spring 2007

Prerequisite: HD FS 229, HD FS 428, HD FS 429 or PSYCH 212

E C E 452 Approaches to Contemporary Early Childhood Education Programs (3) Description and analysis of early childhood programs; cycles, trends, progressions in early childhood education.

Effective: Spring 1992

Prerequisite: E C E 451

E C E 453 parent Involvement in Home, Center, and Classroom Instruction (2-3) Parent involvement, programs, and methodologies that strengthen bonds between home and community for educators of children.

Effective: Spring 1992

Prerequisite: 6 credits in education

E C E 454 (HD FS 454) Development and Administration of Child Service Programs (3) Planning, administering, and evaluating child service programs at several administrative levels using methods from relevant disciplines.

Effective: Spring 1992

Prerequisite: HD FS 453; C I 295 or HD FS 330

E C E 479 The Young Child's Play as Educative Processes (3) Young child's play as educative processes and uses of materials in curricular settings are examined.

Effective: Spring 2007

Prerequisite: E C E 451; HD FS 229 or HD FS 429 or PSYCH 415

E C E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1991

E C E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 1991

E C E 497A Documentary Filmmaking and Childhood Studies (3) Students will learn about, watch & create documentary film about children & childhood. Seminar explores investigative documentary filmmaking as medium for research and critical advocacy on children and childhood.

Effective: Summer 2011 Ending: Summer 2011

E C E 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 1992

E C E 572 Issues and Trends in Early Childhood Education (3 per semester/maximum of 9) Research, experimental programs, and emerging trends in early childhood education; relationships between educational experiences and later intellectual and emotional development.

Effective: Spring 1992

Prerequisite: E C E 452, EDPSY 400

E C E 580 Young Multilingual/Multicultural Learners (3) Multilingual/multicultural dimensions of young learners; language, cultural- ethnic social milieu and family, school, community, religious impacts, and acculturation philosophies.

Effective: Summer 1993

Prerequisite: E C E 452 or E C E 479 or E C E 453

E C E 587 (C & S 587, CI ED 587) Curriculum, Culture, and Child Development (3) Examines human development and cultural factors in planning, designing, and implementing curriculum and instruction in early childhood and childhood education.

Effective: Fall 2001

Prerequisite: HD FS 429

E C E 588 Educational Role of the Family (3) Parent-child-teacher relationships, cognitive socialization, and academic attainments; proximal/distal variables: family structure, history, processes, content, community, culture.

Effective: Summer 1992

Prerequisite: E C E 453, HD FS 418 or SOC 315

E C E 589 Play and Early Childhood Education (3) Developmental significance of play, processes, and development; role of the adult in child's play; educational practices.

Effective: Spring 2007

Prerequisite: HD FS 429 or PSYCH 415

E C E 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 1995

E C E 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1991

E C E 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 1991

E C E 597A (CI ED 597A) **Video Ethnography of Education** (3) Show students how to use video ethnography in education research. Course is rooted in Preschool in Three Cultures method (formally known as video-cued Multivocal ethnography).

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

E C E 597A **Bakhtin and Education** (3) Doctoral seminar w/readings from Bakhtin, Medvedev & Voloshinov & from researchers/theorists who use Bakhtin to investigate schools/schooling & education research.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Last Import from UCM: June 16, 2011 3:00 AM

Earth Sciences (EARTH)

EARTH 400 Earth Sciences Seminar (3) Interdisciplinary study of environmental problems in the earth sciences.
Effective: Spring 2001

Prerequisite: seventh-semester standing in the Earth major

EARTH 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2001

Prerequisite: prior approval of proposed assignment by instructor

EARTH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

EARTH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

EARTH 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

EARTH 500 Earth Sciences Research (1-6) Relationships between the earth sciences revealed by theory, analytical methods, or a selected problem.

Effective: Winter 1978

EARTH 501 Contemporary Controversies in the Earth Sciences (3) Exploration of current areas of research in the Earth Sciences.

Effective: Summer 2008

EARTH 520 Plate Tectonics and People: Foundations of Solid Earth Science (3) Solid Earth geophysics and geological hazards presented within the grand unifying theory of plate tectonics.

Effective: Summer 2008

EARTH 530 Earth Surface Processes in the Critical Zone (3) Introduction to Earth surface processes including weathering and soils, geomorphology, erosion and sedimentation, hydrogeology, low-temperature geochemistry and Earth systems.

Effective: Summer 2008

EARTH 540 Essentials of Oceanography for Educators (3) Chemical and physical principles of the oceans and their interaction with the biosphere, atmosphere and the solid Earth.

Effective: Summer 2008

EARTH 591 Individual Studies: Research Project (3) Development of a capstone project, supervised on an individual basis outside the scope of formal courses.

Effective: Summer 2008

Prerequisite: 24 credits in the Master's Degree program in Earth Science Education

EARTH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Summer 1994

EARTH 597A Hurricanes & The Atmosphere (2) Help your students explore weather, atmospheric science and climate by predicting hurricane tracks using statistics.

Effective: Summer 2011 Ending: Summer 2011

EARTH 597B Climate & Climate Change (2) This workshop is designed to help teachers integrate classroom activities and practice with the national principles of climate literacy and the Pennsylvania Standards Aligned System.

Effective: Summer 2011 Ending: Summer 2011

EARTH 597C Plate Tectonics (2) This workshop will help educators plan and deliver a range of classroom activities that are age-appropriate and accessible for many audiences, and that provide an integrated view of the processes that form and modify our planet.

Effective: Summer 2011 Ending: Summer 2011

Graduate Bulletin Archive - 2011

2010 - 2011

EARTH 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

EARTH 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Earth and Mineral Sciences (EM SC)

EM SC 420 (SOC 420, S T S 420) **Energy and Modern Society** (3) Technology and economics of energy resources, production, and consumption; environmental factors, exhaustion, new technology.
Effective: Fall 1986

EM SC 440 **Science Diving** (3) Advanced scuba diving skills applied to underwater research.
Effective: Summer 2003 Ending: Fall 2011
Prerequisite: basic and second level open water scuba certification from an internationally recognized certification agency and a minimum of 20 additional logged dives beyond the basic certification dives.

EM SC 440 **Science Diving** (4) Advanced scuba diving skills applied to underwater research.
Effective: Spring 2012 Future: Spring 2012
Prerequisite: basic open water SCUBA certification and approval of program

EM SC 441 **Advanced Science Diving** (4) Advanced scuba diving skills applied to underwater data collection and research.
Effective: Summer 2011
Prerequisite: successful completion of EM SC 440 or waiver by University Dive Safety Officer based on acceptable demonstration of practical and academic dive experience

EM SC 470W **Undergraduate Collaborative Research in Earth and Materials Sciences** (3-6) Interdisciplinary research seminar involving students in the process of discovery, writing, and debate on issues of broad interest to Earth and Materials Sciences.
Effective: Spring 1998

EM SC 494 **Research Project Courses** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1994

EM SC 494H **Research Project Courses** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

EM SC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2003

EM SC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

EM SC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

EM SC 602 **Supervised Experience in College Teaching** (2-3) Students enrolled will lead discussion sections, grade papers and examinations, give an occasional lecture, and assist instructors in planning survey level courses.
Effective: Fall 2004

Last Import from UCM: June 16, 2011 3:00 AM

Economics (ECON)

ECON 400M Honors Seminar in Economics (3-12) Readings, discussion, and oral and written reports on selected topics in economics.

Effective: Spring 1993

Prerequisite: ECON 302, ECON 304 fifth-semester standing admission into Honors program

ECON 401 History of Economic Thought (3) Survey of economic ideas from Greco-Roman times to the present.

Effective: Spring 2001

Prerequisite: ECON 302 or ECON 304

ECON 402 Decision Making and Strategy in Economics (3) Development and application of the tools for decision making under uncertainty and for game theoretic analysis of economic problems.

Effective: Spring 2007

Prerequisite: ECON 302; SCM 200 or STAT 200

ECON 403W The Economics of Arts and Entertainment (3) Supply and demand of creative goods and services; industry structure; role of information; policy issues.

Effective: Summer 2008

Prerequisite: ECON 302 and ECON 490

ECON 404W Current Economic Issues (3) An analytical survey of significant problems of current economic policy and the application of economic analysis to important social issues.

Effective: Spring 1993

Prerequisite: ECON 302 or ECON 304

ECON 406W The Economics of Social Conflict (3) Economic theory of the resolution of social conflicts: social choice theory, voting, noncooperative games, voluntary trade, and allocation by force.

Effective: Summer 2008

Prerequisite: ECON 402 and MATH 110 or MATH 140

ECON 407W Political Economy (3) Applications of the tools of game theory to analyze topics in collective decision making.

Effective: Summer 2008

Prerequisite: ECON 402

ECON 408W Intellectual Property (3) A comparative and cost-benefit analysis of intellectual property that examines patents, copyrights, government supported research, and prizes.

Effective: Summer 2008

Prerequisite: ECON 402 or ECON 444

ECON 409W Economics of Terrorism (3) Terrorism throughout history; economic causes, costs, sources, and consequences.

Effective: Summer 2008

Prerequisite: ECON 402

ECON 410 Economics of Labor Markets (3) Economic analysis of the employment relationship from the microeconomic perspective, with emphasis on current labor-market problems and public policy issues.

Effective: Spring 2011

Prerequisite: ECON 102

ECON 411W Behavioral Economics (3) Topics in behavioral economics; selected games; evolutionary models of social behavior; culture and social behavior; herding; overconfidence.

Effective: Summer 2008

Prerequisite: ECON 402 or ECON 444

ECON 412 Labor Economics and Labor Markets: Theory, Evidence, and Policy (3) Advanced topics in labor economics: theory, empirical evidence, and policy.

Effective: Spring 2009

Prerequisite: ECON 302 or ECON 315

ECON 413W Economic Growth and the Challenge of World Poverty (3) Economic prosperity in historical perspective; recent successes (East Asia, China, India); ongoing challenges (the bottom billion; sub-Saharan Africa).

Effective: Summer 2008

Prerequisite: ECON 471

ECON 414W The Economic Way of Looking at Life (3) Economics/life according to Gary Becker: criminal behavior; economics of the family (marriage, divorce, intrahousehold resource allocation, bequests), policy issues.

Effective: Summer 2008

Prerequisite: ECON 412

ECON 415W The Economics of Global Climate Change (3) Evidence on climate change; economic models of the environment and market failure; cost-benefit analysis of policy options; carbon markets.

Effective: Summer 2008

Prerequisite: ECON 428

ECON 417W The Economics of Uncertainty (3) Uncertainty is examined in contracts, with an emphasis on limited liability.

Asymmetric information and economic puzzles are also considered.

Effective: Summer 2008

Prerequisite: ECON 402 orECON 444

ECON 418W A Comparative and Cost-Benefit Analysis of State Government Activities (3) This course examines federalism with a particular focus on the activities undertaken by the state of Pennsylvania.

Effective: Summer 2008

Prerequisite: ECON 490

ECON 421 Analysis of Economic Data (3) Economic analysis of data: sources, variable definitions, miscodings, missing observations, censoring and truncation, applications.

Effective: Summer 2008

Prerequisite: ECON 402 orECON 451;ECON 490

ECON 422W Applying Monetary Theory to Monetary History (3) Monetary history is examined. Special attention is paid to commodity-based systems, private money, and government monopolies on currency.

Effective: Summer 2008

Prerequisite: ECON 451

ECON 424 Income Distribution (3) Inequality and poverty in the United States, measurement problems, determinants of inequality, arguments for and against equality, impact of redistributive policies.

Effective: Fall 1992

Prerequisite: ECON 302, ECON 315 orECON 323

ECON 425 Economics of Public Expenditures (3) Analytic and policy aspects of public expenditure decisions; applications from areas of contemporary public interest.

Effective: Summer 1992

Prerequisite: ECON 302 orECON 323

ECON 428 Environmental Economics (3) Environmental pollution, the market economy, and optimal resource allocation; alternative control procedures; levels of environmental protection and public policy.

Effective: Summer 1992

Prerequisite: ECON 302 orECON 323

ECON 429 Public Finance and Fiscal Policy (3) Analysis of public revenue and expenditure structure primarily at the federal level; federalism; fiscal policy and public debt.

Effective: Fall 1983

Prerequisite: ECON 323;ECON 302 orECON 304

ECON 430 Regional Economic Analysis (3) Analysis of personal and industrial location decisions, regional economic growth, migration patterns, and regional policy; emphasis on tools and techniques.

Effective: Spring 2011

Prerequisite: ECON 102 orECON 104

ECON 432 Urban Economics (3) Theories and methods for economic analysis of such urban problems as housing, segregation, government services, and transportation.

Effective: Summer 1992

Prerequisite: ECON 302 orECON 323

ECON 433 Advanced International Trade Theory and Policy (3) Causes/consequences of trade; effects of tariffs and quotas; strategic trade policy; political economy of trade restrictions and other topics.

Effective: Summer 1992

Prerequisite: ECON 302 orECON 333

ECON 434 International Finance and Open Economy Macroeconomics (3) Trade balance movements, exchange rate determination; monetary and fiscal policies in open economies; international policy coordination; the world monetary system.

Effective: Spring 1992

Prerequisite: ECON 304 orECON 333

ECON 436W (US) Economics of Discrimination (3) Analysis of the economic characteristics of women and minorities, with examination of race and sex discrimination and related government policies.

Effective: Fall 2007

Prerequisite: ECON 302 orECON 315

ECON 437W Multinationals and the Globalization of Production (3) This course will focus on trade, multinationals and offshoring, and explore their implications for the U.S. and developing countries.

Effective: Summer 2008

Prerequisite: ECON 433

ECON 438W Winners and Losers from Globalization (3) The economic effects of globalization on individuals, governments, nation- states and business.

Effective: Summer 2008

Prerequisite: ECON 433 andECON 490

ECON 439 Economics of Technology Diffusion (3) Technology Diffusion: Globalization, productivity measurement, intellectual property.

Effective: Summer 2008

Prerequisite: ECON 433

ECON 440 Trade and Labor Markets (3) International trade and its impacts on markets in industrialized and development

economies; low-skilled workers in the emerging global economy.

Effective: Summer 2008

Prerequisite: ECON 433

ECON 442 Managerial Economics (3) Application of economic theory to managerial decision making; risk, uncertainty; models and statistical techniques.

Effective: Spring 2011

Prerequisite: ECON 102

ECON 443 Economics of Law and Regulation (3) An economic analysis of property rights, contractual arrangements, illegal activities, and regulation; competitive problems due to externalities and market failure.

Effective: Summer 1992

Prerequisite: ECON 302 orECON 342

ECON 444 Economics of the Corporation (3) Coordination and incentive issues within a corporation. Topics include employment contracts, performance incentives and pricing of financial assets.

Effective: Summer 1997

Prerequisite: ECON 302

ECON 445 (H P A 445) Health Economics (3) Economic analysis of U.S. health care system; planning, organization, and financing; current public policy issues and alternatives.

Effective: Spring 1994

Prerequisite: ECON 302, ECON 315 orECON 323

ECON 445W (H P A 445W) Health Economics (3) Economic analysis of U.S. health care system; planning, organization, and financing; current public policy issues and alternatives.

Effective: Spring 2008

Prerequisite: ECON 302, ECON 315 orECON 323

ECON 446W Economics of Industry Evolution (3) Dynamics of industry evolution; empirical evidence and theoretical modeling of firm entry, growth, and exit; entrepreneurship; investment and strategic behavior.

Effective: Summer 2008

Prerequisite: ECON 444 andECON 490

ECON 447W Economics of Sports (3) Examination of economic issues pertaining to professional and collegiate sports, including analysis of industrial organization, labor markets, and local economies.

Effective: Spring 2009

Prerequisite: ECON 302 andECON 490

ECON 448W Economics of Auctions and Procurements (3) Theoretical and empirical analyses of auctions and procurements; different modeling environments; econometric analysis of auction and procurement data.

Effective: Summer 2008

Prerequisite: ECON 402 orECON 444 andECON 490

ECON 449W Economics of Collusion (3) Theoretical and empirical analysis of collusion among firms, case studies of cartel behavior, bidding behavior at auctions and procurements.

Effective: Spring 2008

Prerequisite: ECON 302 orECON 342 andECON 490 or permission of instructor

ECON 450 The Business Cycle (3) Measurement and theories of the business cycle; stabilization policies; forecasting.

Effective: Summer 1992

Prerequisite: ECON 304 orECON 351

ECON 451 Monetary Theory and Policy (3) Monetary and income theory; monetary and fiscal policy.

Effective: Winter 1978

Prerequisite: ECON 304 orECON 351

ECON 452W Financial Crises (3) Examination of causes and consequences of financial crises; asset pricing theory, market efficiency, speculative bubbles; policy considerations.

Effective: Summer 2008

Prerequisite: ECON 451

ECON 453 Monopolization and Vertical Restraints (3) Monopolization and vertical restraints: exclusive dealing, bundling, tying, predation and entry deterrence; empirical evaluation.

Effective: Summer 2008

Prerequisite: ECON 444 andECON 490

ECON 454 Economics of Mergers (3) Economic analysis of horizontal and vertical mergers; econometric issues in measurement of unilateral and coordinated effects; policy issues.

Effective: Summer 2008

Prerequisite: ECON 444 andECON 490

ECON 455W Economics of the Internet (3) Economics of the Internet; electronic commerce and network economics; pricing issues; intellectual property.

Effective: Summer 2008

Prerequisite: ECON 402 orECON 444

ECON 457W Economics of Organizations (3) An advanced course in the economics of organizations. The focus is on coordination, incentives, contracts, and information in corporations.

Effective: Summer 2008

Prerequisite: ECON 402 orECON 444

ECON 463 (IL) Economic Demography (3) Microeconomics of demographic behavior; interrelationships between demographic and economic factors, in developing and industrialized economies; economic welfare and policy implications.

Effective: Spring 2006

Prerequisite: ECON 302 or ECON 304 ; or 9 credits in demography

ECON 463W Economic Demography (3) Microeconomics of demographic behavior; interrelationships between demographic and economic factors, in developing and industrialized economies; economic welfare and policy implications.

Effective: Summer 2008

Prerequisite: ECON 412 or ECON 471 or 9 credits in demography

ECON 465W Cross Sectional Econometrics (3) Discrete choice models, censored and truncated regression models, longitudinal models, applications.

Effective: Summer 2008

Prerequisite: ECON 302 and ECON 490

ECON 466W Panel Data Models (3) Random and fixed effects, endogeneity, balanced and unbalanced panels, censoring of spells, differences in differences, applications.

Effective: Summer 2008

Prerequisite: ECON 302 and ECON 490

ECON 470 (IL) International Trade and Finance (3) Economic analysis of why nations trade, barriers to trade, the international monetary system, and macroeconomic policy in an open economy.

Effective: Spring 2011

Prerequisite: ECON 102 or ECON 104

ECON 471 Growth and Development (3) Problems of capital formation, institutional considerations, theories of economic growth.

Effective: Summer 2011

Prerequisite: ECON 302 or ECON 304 or ECON 372

ECON 472 Transition to Market Economies (3) Economics of transition to a market economy; problems of former Soviet-type economies; privatization, stabilization, and institutional change.

Effective: Fall 2005

Prerequisite: ECON 302 or ECON 304

ECON 473 (IL) China in the Global Economy: History, Culture, and Society (3) Analysis of China's role in the global economy and the impact on U.S. as well as global business and society.

Effective: Spring 2011

Prerequisite: ECON 102 or ECON 104 or permission of program

ECON 475W Migration and Development (3) Human Capital Approach to Migration; Economics of Family Migration; Evidence: Micro and Macro Perspectives; Migration Policies.

Effective: Summer 2008

Prerequisite: ECON 471 or ECON 412; ECON 490

ECON 476W The Economics of Fertility in the Developing World (3) Demand for children, supply of children, and costs of fertility regulation; fertility transition; public policies to affect fertility.

Effective: Summer 2008

Prerequisite: ECON 471 and ECON 490

ECON 477 Labor Markets in Developing Countries (3) Labor demand and supply in developing countries; urban and rural labor markets, modern and informal sectors; policy issues.

Effective: Summer 2008

Prerequisite: ECON 471 or ECON 412

ECON 478 Incomplete Markets (3) Rural land markets, fragmented credit markets, risk and insurance, human capital and labor markets, innovation and technology spillovers, coordination failures.

Effective: Summer 2008

Prerequisite: ECON 471

ECON 479W Economics of Matching (3) Economic application of matching to employment, marriage, organ markets, and medical residents.

Effective: Summer 2008

Prerequisite: ECON 402 or ECON 412 or ECON 444

ECON 480 Mathematical Economics (3) Mathematical techniques employed in economic analysis; formal development of economic relationships.

Effective: Summer 1992

Prerequisite: ECON 302, ECON 304, MATH 110

ECON 481 Business Forecasting Techniques (3) A survey of contemporary business forecasting techniques, with emphasis on smoothing, decomposition, and regression techniques.

Effective: Spring 2008

Prerequisite: SCM 200 or STAT 200

ECON 483 Economic Forecasting (3) Forecasting time series, using linear regression models and econometric software; useful forecasting models; financial and seasonal time series; trends.

Effective: Summer 2008

Prerequisite: ECON 490

ECON 485 Econometric Techniques (3) Applying statistical techniques to test and explain economic relationships; integration of economic theory with observed economic phenomena.

Effective: Spring 2011

Prerequisite: ECON 102 orECON 104;SCM 200 orSTAT 200

ECON 489M Honors Thesis (1-6) No description.

Effective: Spring 1993

Prerequisite: ECON 302, ECON 304 and admission into the departmental honors program

ECON 490 Introduction to Econometrics (3) Use of simple and multiple regression models in measuring and testing economic relationships. Problems including multicollinearity, hetroskedasticity, and serial correlation.

Effective: Summer 2000

Prerequisite: MATH 110, ECON 390

ECON 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

ECON 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

ECON 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Summer 1995

Prerequisite: prior approval of proposed assignment by instructor

ECON 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

ECON 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

ECON 497A Economics of Energy and Energy Security (3) Study of energy supply and security, energy markets, enviromental impacts of energy use, and prospects for energy transitions.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: ECON 302 andECON 304

ECON 497B Economics of Sports (3) Examination of economics issues pertaining to professional and collegiate sports, including analysis of industrial organization, labor markets, and local economies.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: ECON 302

ECON 497B Housing Markets and Housing Policy (3) This course will review the economics of housing markets, at both the local and national levels, and past and current housing policies. The financial enviromental, and societal contexts of housing will be emphasized, along with housing's role in the 2007-9 crash, and policy going forward.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: ECON 002 orECON 102

ECON 499 (IL) Foreign Study--Economics (2-6) Study in selected countries of economic institutions and current economic problems.

Effective: Spring 2011

Prerequisite: ECON 102, ECON 104

ECON 500 Introduction to Mathematical Economics (3) Mathematical Economics: Applications of Mathematical Techniques to Economics.

Effective: Spring 1990

ECON 501 Econometrics (3) Econometrics: Applications of Statistical Techniques to Economics

Effective: Summer 1989

ECON 502 Microeconomic Analysis (3) Economic behavior under pure and imperfect competition; price and output determination in product markets; prices and employment in factor markets.

Effective: Winter 1978

ECON 503 Macroeconomic Analysis (3) National income accounts; determination of income, employment, interest rates, and the price level; stabilization policy.

Effective: Winter 1978

ECON 506 Problems in Economics (1-12) Planned projects involving library, laboratory, or field work.
Effective: Winter 1978

ECON 507 International Trade (3-6) Theory of international trade and investment; effect of commercial policy on trade and income distribution; multinational corporations and international trade.
Effective: Spring 1993

ECON 510 Econometrics I (3) General linear model, multicollinearity, specification error, autocorrelation, heteroskedasticity, restricted least squares, functional form, dummy variables, limited dependent variables.
Effective: Fall 2003
Prerequisite: ECON 501 or STAT 462 or STAT 501

ECON 511 Econometrics II (3) Stochastic regressors, distributed lag models, pooling cross-section and time-series data, simultaneous equation models.
Effective: Fall 2003
Prerequisite: ECON 510

ECON 515 Labor Economics I (3) Labor supply and income maintenance; human capital, job search and training; labor demand, minimum wage, and discrimination.
Effective: Fall 1983

ECON 516 Labor Economics II (3) Earnings differentials, unemployment, and related policy. Institutional aspects of labor economics, including dual labor markets, collective bargaining, and unionism.
Effective: Fall 1983

ECON 517 Open Economy Macroeconomics and International Finance (3-6) The balance of payments, portfolio allocation, monetary and fiscal policy in an open economy, exchange rate regimes, selected policy issues.
Effective: Spring 1993

ECON 521 Advanced Microeconomic Theory (3-6) Theory of consumer behavior; theory of the firm; price determination in product and factor markets; introduction to welfare economics.
Effective: Fall 1983

ECON 522 Advanced Macroeconomic Theory (3-6) Measurement of income; theories of consumption, investment, and money holdings; static determination of income and employment; introduction to dynamic analysis.
Effective: Winter 1978

ECON 524 Applied Welfare Economics and Income Distribution (3-6) Public resource allocation problems; alternative collective policies and organizations; income and wealth distribution; measuring inequality; income dynamics; poverty; public policy.
Effective: Spring 1993

ECON 525 Technological Change and Research and Development Policy (3) Theoretical, empirical, and policy analysis of investments in research and development; effects of research and development on profitability, economic growth, international competition.
Effective: Spring 1998

ECON 529 Public Finance (3-6) Effects of taxes, expenditures, debt on allocation, employment, distribution; cost-benefit analysis; collective decision mechanisms; fiscal federalism; current fiscal policy problems.
Effective: Fall 1983

ECON 532 Urban Economics (3) Urban structure; migration of capital and households; urban public finance.
Effective: Fall 1983

ECON 534 Game Theory (3) Foundations of current research in game theory.
Effective: Summer 2006
Prerequisite: ECON 521 or permission of program

ECON 543 Industrial Organization and Public Policy (3-6) The structure of American industry; performance and behavior; public policies toward business.
Effective: Summer 1980

ECON 550 Economic Fluctuations (3) Analysis of the various theories of economic fluctuations; their methodological premises.
Effective: Winter 1978

ECON 558 Development of Monetary Theory (3) Classical and neoclassical quantity theories of money and contemporary criticism; Keynesian monetary theory and its critics.

Effective: Fall 1983

ECON 559 Current Monetary Theory and Policy (3) Post-Keynesian reformulation of quantity and Keynesian theories of money; liquidity and general equilibrium approaches; current issues in theory and policy.

Effective: Fall 1983

ECON 570 Development Economics (3-6) Resources and institutions; quantitative measures; theories of economic growth in developing areas; developmental policies.

Effective: Summer 1997

ECON 571 Economics of Transition (3-6) Problems of transition to a market economy. Economic problems of former Soviet-type economies. Economics of privatization, stabilization and restructuring.

Effective: Summer 1997

ECON 572 Soviet and Other Centrally Planned Economies (3-6) Principles, structure, and performance of centrally planned economies, with special emphasis on the Soviet Union.

Effective: Fall 1983

ECON 589 Seminar in Econometric Theory (3) Theories and methods relevant to the application of statistical methods to economics.

Effective: Fall 2003

Prerequisite: ECON 510, ECON 511

ECON 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

ECON 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

ECON 600 Thesis Research (1-15) No description.

Effective: Fall 1983

ECON 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 1983

ECON 610 Thesis Research Off Campus (1-15) No description.

Effective: Fall 1983

ECON 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Educ Leadership Prog (EDLDR)

EDLDR 405 (C I 405) Strategies in Classroom Management (3) Managing and coping with disruptive student behavior in instructional settings so that they support the teaching/learning process.

Effective: Fall 2008

Prerequisite: teaching experience or supervised practicum experience

EDLDR 409 Leadership Studies in Popular Film (3) In-depth analysis of leadership dynamics revealed in popular film. Focus on cinematic depictions of theory and practical application of leadership.

Effective: Summer 2006

Prerequisite: EDTHP 115 junior standing or permission of program

EDLDR 427 Economics of Education (3) Theoretical and empirical concepts in economics applied to education.

Effective: Summer 2011

Prerequisite: ECON 302, ECON 315 or EDLDR 480

EDLDR 476 The Teacher and the Law (3) An introduction to education law as it affects the teacher.

Effective: Fall 2004

Prerequisite: 9 credits in education or the social sciences

EDLDR 480 Introduction to Educational Leadership (3) Development of educational leadership. Relationships among local, state, and federal agencies. Introduction to current concepts and theories.

Effective: Fall 2004

Prerequisite: 3 credits in social science sociology anthropology community development business administration or political science

EDLDR 485 Principal as Instructional Leader (3) Knowledge and skills principals need to lead instructional design and implementation.

Effective: Fall 2004

Prerequisite: EDLDR 480

EDLDR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2004

EDLDR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2004

EDLDR 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2004

EDLDR 498A The Law and Education Institute for Teachers (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 2011 Ending: Summer 2011

EDLDR 528 Educational Politics in the United States (3) Social and institutional forces which shape the public school system and determine national, state, and local educational policy and politics.

Effective: Fall 2004

EDLDR 530 Leadership for Inclusive Education (3) In-depth analysis and discussion of the school leaders's role in creating and sustaining an inclusive learning environment for all.

Effective: Summer 2009

EDLDR 531 Leadership and Diversity (3) This course examines what it means to lead educational organizations in an increasingly diverse society.

Effective: Spring 2011

EDLDR 533 The Politics of Local School Districts (3) Theory and practice of the politics and governance of local school districts; issues and methods in studying political decision making.

Effective: Fall 2004

EDLDR 535 Interagency Relations in Education (3) This course examines historical and contemporary relationships between schools and other service agencies interacting with the education of American youth.

Effective: Summer 2011

EDLDR 536 Federal Role in Education (3) This course examines the Federal role in education, emphasizing relationships

between the Federal government and states, tribes and schools.
Effective: Summer 2011

EDLDR 540 Technology Applications in Educational Leadership (3) Development and use of information technology applications to analyze common problems faced by educational administrators.
Effective: Spring 2008

EDLDR 549 School District Improvement and Systemic Change (3) This course focuses on understanding and leading systemic district improvement efforts.
Effective: Spring 2010
Prerequisite: EDLDR 559 or EDLDR 578

EDLDR 551 (C & S 551) Curriculum Design: Theory and Practice (3) The analysis and use of the foundations which underlie models of curriculum design.
Effective: Spring 2011
Prerequisite: C I 550

EDLDR 553 (C & S 553) Issues in Curriculum (3 per semester/maximum of 6) In-depth study of issues and trends in the understanding and practice of curriculum.
Effective: Spring 2011
Prerequisite: formal acceptance as a doctoral student in the Curriculum and Supervision option area

EDLDR 555 (C & S 555) Development of Teacher Education Programs (3) Study of the components and design of teacher education programs within the constraints of institutional, professional, and legal contexts.
Effective: Spring 2011
Prerequisite: C I 550 or EDLDR 551

EDLDR 557 (C & S 557) Seminar in Curriculum Research (3) Analysis of particular curriculum studies, methods and paradigms, and the general status of current research in the general curriculum field.
Effective: Spring 2011
Prerequisite: C I 400, C I 550

EDLDR 558 (C & S 558) Standard Works in Curriculum and Instruction (3) Study of significant empirical, historical, evaluative, philosophical, and critical works having an impact on curriculum and instruction practice.
Effective: Spring 2011
Prerequisite: EDLDR 551

EDLDR 559 School Improvement (3) The course examines how educational leaders at all levels can determine, promote, support, and achieve successful school improvement.
Effective: Spring 2005

EDLDR 560 (C & S 560) Principles of Instructional Supervision (3) Social and institutional settings for instructional supervision; functions, activities, and practices of supervision; supervisory case studies.
Effective: Spring 2011
Prerequisite: teaching or school administrative experience; 18 credits in education at least 5 of which are methods of teaching

EDLDR 562 (C & S 562) Methods of Classroom Supervision and Coaching (3) Strategies and techniques for supervision/coaching of instruction intended to enhance teacher reflection, self-direction, and autonomy.
Effective: Spring 2011
Prerequisite: EDLDR 560 teaching administrative or other professional educational work experience

EDLDR 563 (C & S 563) Designing Staff Development Programs (3) Designing, implementing, and evaluating effective staff development programs for personnel in educational settings.
Effective: Spring 2011
Prerequisite: EDLDR 560

EDLDR 564 (C & S 564) Supervision Theory (3) Critical analysis of alternative theories of instructional supervision and in-depth examination of trends and issues in supervision.
Effective: Spring 2011
Prerequisite: EDLDR 560

EDLDR 565 Personnel Management and Contract Administration (3) Practice and theory of personnel supervision at the central office and building level, including contract administration and grievance handling.
Effective: Fall 2004
Prerequisite: 18 credits in education and three years' teaching experience

EDLDR 567 Organizational Supervision (3) Principles and practices of supervision in schools related to instructional and support personnel.
Effective: Fall 2004
Prerequisite: EDLDR 480

EDLDR 568 The Principalship (3) Principles and practices of administration of elementary and secondary schools.
Effective: Fall 2004

EDLDR 569 Decision Making in Educational Organizations (3) Decision making in organizational and environmental contexts; case studies of administrative problems; application of decision making models.

Effective: Fall 2004

Prerequisite: EDLDR 480 or teaching supervisory or administrative experience or permission of program.

EDLDR 571 Educational Facilities Planning (3) Educational facilities planning, including use of demographic, curriculum, resource, energy data, and state building construction guidelines.

Effective: Fall 2004

Prerequisite: EDLDR 480

EDLDR 573 Public School Finance (3) Financing of public education, including values underlying system, revenue sources and taxation, school funding formulas, equity, and school finance reform.

Effective: Fall 2004

Prerequisite: EDLDR 480 or teaching administrative or supervisory experience

EDLDR 574 Theory and Current Issues in Public Bargaining (3) Theories of bargaining; legal basis for public bargaining; state and federal labor relations agencies; supervisory bargaining.

Effective: Summer 2011

EDLDR 575 Ethics in Educational Leadership (3) Course explores the moral and ethical dimensions of the work of educational leaders.

Effective: Spring 2008

EDLDR 576 The Law and Education (3) Legal bases for education; rights and responsibilities of school board members, administrators, teachers, students, and parents; due process.

Effective: Fall 2004

Prerequisite: EDLDR 480 or teaching or administrative or supervisory experience

EDLDR 577 Law and Ethics in Education (3) Course focuses on legal and ethical dimensions issues for educational leaders and their impact on best interests of the students.

Effective: Spring 2008

EDLDR 578 Schools as Organizations (3) Intraorganizational relationships; administration and the school in its organizational and environmental contexts.

Effective: Fall 2004

Prerequisite: EDLDR 480 or teaching or administrative or supervisory experience

EDLDR 579 Financial Management for Schools (3) Financial management concepts and techniques for educators: district and school level budgeting process, hands-on budget preparation workshop, and budget management.

Effective: Spring 2008

Prerequisite: EDLDR 480 or teaching administrative or supervisory experience

EDLDR 580 The Use of Theory in Educational Administration (3) Critical analysis of current theories; problem finding and hypothesis formulation.

Effective: Fall 2004

Prerequisite: EDLDR 480 6 credits in educational leadership

EDLDR 581 Field Research in Educational Leadership (3) Field study and qualitative methods in research on educational organizations.

Effective: Fall 2004

Prerequisite: EDLDR 480 6 credits in educational leadership

EDLDR 583 Current Administrative Practice (3) Practice oriented skills and experiences facilitating effective administration.

Effective: Fall 2004

Prerequisite: EDLDR 480

EDLDR 584 Evaluation in Educational Organizations (3) Naturalistic and empirical evaluation methods and procedures for educational organizations.

Effective: Fall 2004

Prerequisite: a course in educational administration; a course in basic statistics.

EDLDR 585 (EDTHP 585, HI ED 585) Research Design: Implications for Decisions in Higher Education (3) A capstone course on research design and analytical approaches to support decision-making in administration and policy-making.

Effective: Fall 2004

Prerequisite: EDPSY 400, EDPSY 406 ; or AG 400, R SOC 573

EDLDR 586 (EDTHP 586, HI ED 586) Qualitative Methods in Educational Research (3) Exploration of the theoretical framework undergirding qualitative research and its attendant practices and techniques.

Effective: Fall 2004

EDLDR 587 (EDTHP 587, HI ED 587) Education Policy and Politics (3) The political economy and bureaucratic politics of educational organizations, with special attention to the policy making, implementation, and evaluation processes.

Effective: Fall 2004

EDLDR 588 (EDTHP 588, HI ED 588) Qualitative Methods in Educational Research II (3) Advanced study of methods involved in executing and analyzing qualitative research in education.

Effective: Summer 2007

Prerequisite: EDLDR 586

EDLDR 589 Mixed Methods in Educational and Social Scientific Research (3) This course considers the epistemological and paradigmatic implications of mixed methods research within educational and other social scientific research contexts.
Effective: Fall 2009

EDLDR 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2004

EDLDR 594 Seminar in School Law (3) Research in substantive issues in school law.
Effective: Fall 2004
Prerequisite: EDLDR 576

EDLDR 595 Internship (1-15) Guided experience in a school or other educational organization in which the student is not regularly employed, under supervision of a graduate faculty member.
Effective: Fall 2004
Prerequisite: EDLDR 480 teaching experience and a professional certificate

EDLDR 595A The Principal Internship (3-6) Internship field experience required for a PA Dept of Ed administrative certificate. Student works with a principal of schools.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: EDLDR 480 teaching experience and a professional certificate

EDLDR 595B The Superintendent Internship (3) Internship field experience required for a PA Dept of Ed administrative certificate. Student works with a superintendent of schools.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: EDLDR 480 teaching experience and a professional certificate

EDLDR 596 Individual Studies (1-9) Creative projects including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2004

EDLDR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2004

EDLDR 597A Superintendency Seminar (3) Course will explore the knowledge, skills and core values required to successfully fulfill the role as superintendent.
Effective: Summer 2011 Ending: Summer 2011

EDLDR 597A Educational Leadership Pro Seminar (3) The seminar is designed as an orientation to doctoral students in educational leadership, includes all requirements, comprehensive exams, presenting at professional conferences, developing a curriculum vita, scholarship and research integrity, and job searching.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDLDR 597B The Law and Education Institute (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2011 Ending: Summer 2011

EDLDR 597B Mixed Methods in Social Science (3) This course explores research design, epistemological debates and the emerging use of mixed methods in educational and social science research.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDLDR 597C Advanced Seminar in Educational Policy Topic (3) This class will involve original research in an Ed policy topic. Student must be engaged in an educational policy research project.
Effective: Summer 2011 Ending: Summer 2011

EDLDR 597C (HI ED 597C, EDTHP 597C) Foundations of Research (3) This course is designed to begin a reading of the history and philosophies of educational research.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDLDR 597D (EDTHP 597D, HI ED 597D) Reviewing and Educational Policy and Research Journals (3) Provide advanced doctoral students with a systematic introduction to reviewing and editing journals in the field of education (Blind, peer-reviews, plagiarism and academic merit and confidentiality).
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDLDR 600 Thesis Research (1-15) No description.
Effective: Fall 2004

EDLDR 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 2004

EDLDR 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 2004

EDLDR 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 2004

EDLDR 801 **Introduction to Teacher Leadership** (3) This course focuses on understanding teacher leadership and its function with the school system.
Effective: Summer 2011

EDLDR 802 **How Schools Work** (3) Course focuses on understanding schools as learning organizations and how teacher leadership works in such organizations.
Effective: Summer 2011

EDLDR 894A **Capstone Inquiry Project** (3) Completion and public presentation of an inquiry project reflecting an understanding of the five leadership strands.
Effective: Summer 2011
Prerequisite: completion of all Teacher Leadership option courses

Last Import from UCM: June 16, 2011 3:00 AM

Education (EDUC)

EDUC 400 Diversity and Cultural Awareness Practices in the K-12 Classroom (3) This course addresses diversity, cultural awareness and sensitivity about cultures, concepts and methods in society, communities and educational settings.
Effective: Summer 2008

EDUC 401 Early Childhood Education (3) Organization, methodology, and materials for nursery school and kindergarten programs.
Effective: Winter 1981

EDUC 402 Language Development, Self-Expression, and Literature in Early Childhood Education (3) Examining the development of language and self-expression in young children, and the role of children's literature in facilitating development.
Effective: Winter 1981

EDUC 403 Curriculum for Early Childhood (3) Examining early childhood programs and methodology, focusing on areas of social studies, mathematics, and science.
Effective: Winter 1981

EDUC 404 Young Children's Behavior: Observation and Evaluation (3) Observation, recording and evaluation of student behaviors, and the use of prescription techniques for early childhood students with special needs.
Effective: Winter 1981

EDUC 405 Early Childhood Education: Infancy and Toddlerhood (3) Models of infant development with focus on the first three years of life--cognitive and socio-emotional milestones will be analyzed.
Effective: Spring 2005

EDUC 406 Human Sexuality (3) Examination of physiology, diseases, attitudes, morality, and controversial topics related to sexuality. Consideration of sex education in the school curriculum.
Effective: Winter 1981

EDUC 408 Administration of Early Childhood Education Programs (3) The role of the early childhood administrator as it relates to regulations, staffing, management, funding and curriculum.
Effective: Winter 1981
Prerequisite: EDUC 401

EDUC 410 The Child and Social Institutions (3) The effects of the family on a child's development, especially in the infancy and preschool years.
Effective: Winter 1981

EDUC 412 Early Literacy Intervention I (3) Participants will better understand factors affecting early reading behavior through diagnostic techniques, observation techniques, and literacy intervention strategies.
Effective: Summer 1996
Prerequisite: permission of the program

EDUC 413 Early Literacy Intervention II (3) Participants will continue to learn skills, knowledge, and experience processes to implement the early literacy intervention program.
Effective: Summer 1996
Prerequisite: EDUC 412

EDUC 415 Teaching Secondary Social Studies (3) Study of the objectives, content, methods, and evaluation of procedures of social studies. Students design units and lesson plans.
Effective: Spring 2011
Prerequisite: EDUC 314, EDUC 315W and admission into Secondary Social Studies Certification Program

EDUC 416 Teaching Secondary English and the Humanities (3) Study of the objectives, content, and methods of English and humanities courses.
Effective: Spring 2011
Prerequisite: EDUC 314, EDUC 315W and admission into Secondary English Certification Program

EDUC 417 Teaching Secondary Mathematics (3) Study of the objectives, content, methods, and evaluation procedures of mathematics.
Effective: Spring 2011
Prerequisite: EDUC 314, EDUC 315W and admission into Secondary Mathematics Certification Program

EDUC 418 Positive Classroom Climate for Positive Attitudes About Learning (3) Participants will learn strategies for creating classroom climates which encourage positive attitudes toward learning while preventing and correcting student misbehavior.
Effective: Summer 1995

Prerequisite: permission of program

EDUC 421 Children's Literature (3) Knowledge of literature appropriate for elementary school children and utilization of literature-related activities in teaching reading.

Effective: Spring 2001

Prerequisite: admission into Elementary Education Major

EDUC 422 Literature for Children and Adolescents (3) Literature for children and adolescents, approaches for using such literature in the school curriculum.

Effective: Fall 2008

EDUC 424 Folk and Fairy Tales (3) In this course students will examine the social and psychological significance of folk tales, make cross-cultural comparisons, and study story grammars of these stories.

Effective: Summer 1991

Prerequisite: 6 credits in humanities

EDUC 425 Literacy Assessment (3) This course emphasizes alternative literacy measures focusing on portfolio assessment and performance assessments.

Effective: Spring 1997

Prerequisite: permission of the program

EDUC 432 Children's Literature in Teaching Writing (3) Introduction to introduces methods for transferring writing skills and literary devices from literature to student writing in all subject areas.

Effective: Summer 2008

EDUC 435 Addressing the Needs of Special Learners (1) An examination of attitudes toward, barriers experienced by, and special needs of special learners in the schools.

Effective: Spring 2001

Prerequisite: eighth-semester standing in Secondary Teacher Certification Program

EDUC 436 Inclusion Practices in Education (3) The educational, social, and political foundations for inclusion practices in public education.

Effective: Summer 1995

Prerequisite: permission of program

EDUC 440 Educational Statistics and Measurements (3) Descriptive statistics, correlation, reliability, validity, scaling techniques, and introduction to item analysis.

Effective: Winter 1981

EDUC 450 Current Topics in Education (1-15) No description.

Effective: Fall 1983

EDUC 452 Teaching Writing (3) Techniques for teaching the writing process, kindergarten through grade 12, including writing in content areas; workshop format.

Effective: Fall 1983

EDUC 458 Behavior Management Strategies for Inclusive Classrooms (3) Provides knowledge and skills essential for designing positive learning environments in secondary classrooms with the inclusion of exceptional learners.

Effective: Summer 2009

Prerequisite: admission to teacher education

EDUC 459 Strategies for Effective Teaching in Inclusive Classrooms (3) Course examines effective strategies for accommodating and adapting instruction for exceptional learners in secondary classrooms.

Effective: Spring 2011

Prerequisite: EDUC 285

EDUC 460 Field Study in Ecology (4) Study and analysis of the ecology of various regions of the world. May be repeated for credit.

Effective: Summer 1995

Prerequisite: EDSCI 454

EDUC 462 Computers for Classroom Teachers (3) An introduction: microcomputers and their educational applications.

Effective: Spring 2001

Prerequisite: admission into Elementary Education Major

EDUC 463 The Internet and K-12 Education (3) Relates educational theory and practice to applications of the Internet, applying content from educational foundations, curriculum, and research.

Effective: Spring 2003

Prerequisite: EDUC 462 or approval of program.

EDUC 464 Technology and the Learning Process (3) Evaluates the relationship between technology-based resources and learning theories through design, implementation, and evaluation of online instructional modules.

Effective: Spring 2003

Prerequisite: EDUC 462 or EDUC 463 or permission of program

EDUC 465 Serving Culturally and Linguistically Diverse (CLD) Learners (3) The course provides teachers with

knowledge, understandings, and skills to engage culturally and linguistically diverse (CLD) students in mainstream classrooms.

Effective: Spring 2009

EDUC 466 Foundations of Teaching English as a Second Language (3) Overview of various legal, historical, and socio-cultural implications of teaching and learning English as a Second Language.

Effective: Summer 2006

Prerequisite: permission of program

EDUC 467 English Language Structure for English as a Second Language Teachers (3) An in-depth study and review of general linguistic concepts and their application to ESL pedagogy.

Effective: Summer 2006

Prerequisite: EDUC 466 or permission of program

EDUC 468 Language Acquisition for English as a Second Language Teachers (3) Study of the theory, research, and processes involved in first and second language development, acquisition, and assessment.

Effective: Summer 2006

Prerequisite: EDUC 466 and EDUC 467 or permission of program

EDUC 469 Teaching Methods and Assessment of English as a Second Language (3) Integration of theory, research, and practice about ESL curriculum, instructional methods, assessment, and literacy development.

Effective: Summer 2006

Prerequisite: EDUC 466, EDUC 467, EDUC 468 or permission of program

EDUC 470W Higher-Order Thinking for Educators (3) Presentation of strategies, techniques, and principles of higher-order thinking which are grounded in relevant research and practice will be presented.

Effective: Fall 2006

Prerequisite: admission into Elementary Education Major

EDUC 471 Best Practices in Literacy (3) An application of best literacy practices to classroom instruction and assessment of reading, writing, listening, and speaking.

Effective: Spring 2003

Prerequisite: EDUC 320 or EDUC 321

EDUC 472 Teaching Reading Through the Content Areas (3) Designed to enable teachers of content areas to improve the reading/study skills needed by their students.

Effective: Winter 1981

EDUC 475 ESL Leadership, Research and Advocacy (3) Teachers will develop their skills as instructional leaders and researchers by conducting school-based action research projects.

Effective: Summer 2010

Prerequisite: EDUC 469

EDUC 477 Teaching Struggling Readers and Writers (3) A comprehensive overview of learning problems and effective strategies for teaching K-12 students who have difficulties reading and writing.

Effective: Spring 2008

EDUC 484 School Law for Teachers (3) This course will focus on increasing teacher awareness of law and how it impacts on daily performance and job security.

Effective: Summer 1995

Prerequisite: permission of program

EDUC 490 Student Teaching (1-12) Observation and teaching in selected elementary or secondary schools under direction of cooperating classroom teachers and University supervisors. Regular seminars. GPA 3.0 or higher. Passing scores on required Praxis I tests.

Effective: Fall 2003

Prerequisite: eight semester standing approval of program

EDUC 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 1994

EDUC 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

EDUC 495 Internship (1-15) Supervised off-campus, non-group instruction including individual field experiences, practicums or internships. Written and oral critique of activity required.

Effective: Fall 1983

Prerequisite: prior approval of proposed assignment by instructor

EDUC 495A Junior Field Experience (1) Second semester juniors assigned to a suburban elementary school for the purpose of actively participating in classroom activities.

Effective: Summer 2003

Prerequisite: prior approval of proposed placement by instructor.

EDUC 495B Senior Field Experience (1) First semester seniors assigned to an urban elementary school for the purpose of actively participating in classroom activities.

Effective: Summer 2003

Prerequisite: prior approval of proposed placement by instructor.

EDUC 495C Early Childhood Field Experience (1) First semester seniors assigned to an urban elementary school for the purpose of actively participating in an early childhood classroom.

Effective: Summer 2003

Prerequisite: prior approval of proposed placement by instructor and completion of all four early childhood prerequisite courses.

EDUC 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 1983

EDUC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 1983

EDUC 497A Technology and the Learning Process (3) Focus on how the internet and technology tools can become an integral tool in the teaching and learning process.

Effective: Summer 2011 Ending: Summer 2011

EDUC 497A Action Research Reporting for Secondary Science Teachers (2) This on-line course will prepare secondary science teachers participating in the SEPA grant project to analyze data and prepare reports on their action research.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDUC 497B Literacy Assessment (3) Discover what the field's leaders learned about differentiated instruction, assessment, and tiered intervention.

Effective: Summer 2011 Ending: Summer 2011

EDUC 497B Differentiated Instruction in Reading: Methods for Teaching Intermediate (3) A focus on research-based methods and instructional strategies used to provide literacy instruction to intermediate and advanced readers.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDUC 497C The Hispanic Experience (3) Provide teachers of Spanish language classes/ESL instruction with relevant background information regarding the culture and education of Hispanic students.

Effective: Summer 2011 Ending: Summer 2011

EDUC 497D Successful Approaches to RTII (3) This course will focus on literacy Response to Instruction and Intervention. Models for starting and sustaining reform will be highlighted.

Effective: Summer 2011 Ending: Summer 2011

EDUC 497E Action Research Project for Secondary Science Teachers (2) This on-line course will lead secondary science teachers in the SEPA grant through the IRB process and data collection for a classroom-based action research project.

Effective: Summer 2011 Ending: Summer 2011

EDUC 497F Science Curriculum for Secondary Teachers (3) This course is a required element for teachers participating in the NIH-SEPA grant in collaboration with the College of Medicine. The dates for this course will be set with the COM faculty in conjunction with their summer program for high school students.

Effective: Summer 2011 Ending: Summer 2011

EDUC 497G Science Assessment for Secondary Teachers (3) This course is a required element for teachers participating in the NIH-SEPA grant in collaboration with the College of Medicine. The dates for this course will be set with the COM faculty in conjunction with their summer program for high school students.

Effective: Summer 2011 Ending: Summer 2011

EDUC 497I Myths and Truths: American History for the Classroom (3) Examination of myths/controversies in American history and how teaching it has changed over the past century for K-12 teachers.

Effective: Summer 2011 Ending: Summer 2011

EDUC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 1995

EDUC 499 (IL) Foreign Studies (1-12) Study of educational topics in a country other than the United States.

Effective: Summer 2007

Prerequisite: permission of instructor

- EDUC 500 Professional Learning Communities** (3) Defines elements of effective learning communities and explores educators' roles as consumers and creators of research, theory, and best practices.
Effective: Spring 2008
Prerequisite: admission to program
- EDUC 501 History of American Education** (3) An examination of the rise and transformation of American public schools from pre-colonial America to the present.
Effective: Spring 1998
Prerequisite: approval of program
- EDUC 503 Cultural and Ethnic Groups Education** (3) Approaches to teaching in an environment of differing cultures and ethnic groups.
Effective: Spring 1998
Prerequisite: approval of program
- EDUC 505 Curriculum Foundations** (3) Provides a comprehensive overview of the philosophical, historical, psychological, and social foundations that affect the school curriculum.
Effective: Spring 2010
Prerequisite: EDUC 520
- EDUC 506 Curriculum Development and Instructional Design** (3) Examination of theory, issues, problems, organization, and application of instructional design in planning and developing a curriculum.
Effective: Fall 2008
Prerequisite: EDUC 505
- EDUC 508 Teaching Gifted Students in Heterogeneous Groups** (3) This course is designed to help regular classroom teachers to meet the needs of gifted students in a heterogeneous classroom.
Effective: Summer 1997
Prerequisite: approval of program
- EDUC 520 Learning Theory for the Classroom** (3) An application of learning theories from psychological, sociological, and physiological disciplines to educational settings for children and adolescents.
Effective: Spring 2011
Prerequisite: admission to program
- EDUC 539 Educational Assessment** (3) This course will prepare students with the knowledge and skills necessary to monitor, assess, and report student achievement.
Effective: Fall 2008
Prerequisite: EDUC 520
- EDUC 560 Classroom Management** (3) Analysis of teaching styles, classroom behavior and interaction, organization and correlation of classroom activities and subject areas. (Requires practical application in an actual teaching situation.)
Effective: Winter 1981
- EDUC 561 Psychology of Reading** (3) Examination of the theoretical bases for reading which have direct practical implication for teaching reading.
Effective: Fall 2008
Prerequisite: EDUC 471, EDUC 425, EDUC 477
- EDUC 562 Diagnostic Evaluation of Reading Problems** (3) Utilization of formal and informal instruments and techniques appropriate in analyzing reading disabilities, grade K through 12; includes practicum.
Effective: Spring 2009
Prerequisite: EDUC 561
- EDUC 563 Methods in Teaching Reading** (3) Development of advanced diagnostic and instructional techniques for teaching reading, with emphasis on individual and small group instruction.
Effective: Fall 2008
Prerequisite: EDUC 562
- EDUC 564 Reading Clinic** (6) Culminating course for the M.Ed. degree in literacy education requiring demonstration of competency in working with children possessing reading problems.
Effective: Fall 2008
Prerequisite: EDUC 565
- EDUC 565 Literacy and Leadership** (3) Principles of supervision, organization, management, and evaluation of literacy programs will be presented.
Effective: Spring 2009
Prerequisite: EDUC 466, EDUC 563
- EDUC 571 Great Teachers** (3) Study of one or more great teachers, e.g., Socrates, Comenius, Locke, Rousseau, Pestalozzi, Herbart, Froebel, Dewey, Kilpatrick.
Effective: Winter 1981
- EDUC 572 Comparative Education: World Perspectives** (3) An evaluative comparison of American education with Western and non-Western educational systems.
Effective: Winter 1981

EDUC 582 (HLHED 582) **Spirituality and Culture in Health and Education Professions** (3) This course focuses on the cultural aspects of spirituality and its place in the health and education professions.
Effective: Summer 2009

EDUC 583 **Problems in Teaching: Selected Subject Areas** (3) An analysis of a teaching problem with review of research literature to seek solutions to that problem.
Effective: Fall 1983

EDUC 584 **Analysis of Research: Selected Topics** (3) A review and analysis of research in a specified area.
Effective: Fall 1983
Prerequisite: EDUC 586

EDUC 586 **Educational Research Designs** (3) Focuses on methods of research in educational settings to help participants become informed consumers of the educational research literature.
Effective: Fall 2008
Prerequisite: EDUC 539 ; orTRDEV 418 andTRDEV 460

EDUC 587 **Master's Project** (3) The development of an original master's project (paper, essay, production, practicum) supervised and judged by an appropriate faculty committee.
Effective: Fall 1983

EDUC 589 **Problems in Urban Education** (3) Independent study of selected topics related to urban education.
Effective: Fall 1983

EDUC 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

EDUC 591 **Education Seminar** (1-6) The capstone seminar course for the M.Ed. degree requiring an appropriate scholarly term paper.
Effective: Spring 2011
Prerequisite: EDUC 506, EDUC 586 and completion of 27 credits in the Teaching and Curriculum program or approval of program

EDUC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

EDUC 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

Last Import from UCM: June 16, 2011 3:00 AM

Education Abroad (ED AB)

No courses for department code **ED AB** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Education Mathematics (EDMTH)

EDMTH 432 Diagnostic and Prescriptive Mathematics: Basic Principles (3) Examination of the basic principles of diagnostic and prescriptive mathematics for elementary and secondary teachers.
Effective: Spring 1990

EDMTH 433 Diagnostic and Prescriptive Mathematics: Classroom Applications (3) The application of the diagnostic and prescriptive skills of DP Math in a practical setting and administering a laboratory program.
Effective: Spring 1990
Prerequisite: EDMTH 432

EDMTH 441 Geometry and Measurement Across the K-12 Curriculum (3) The course presents participants with investigations of reports, research, and recent trends related to teaching geometry and measurement.
Effective: Spring 2008
Prerequisite: permission of program

EDMTH 442 Algebra and Functions Across the K-12 Curriculum (3) The course presents participants with investigations of reports, research, and recent trends related to teaching algebra and function concepts.
Effective: Spring 2008
Prerequisite: permission of program

EDMTH 443 Data Analysis and Probability Across the K-12 Curriculum (3) The course presents participants with investigations of reports, research, and recent trends to teaching data analysis and probability concepts.
Effective: Spring 2008
Prerequisite: permission of program

EDMTH 444 Numbers and Operations Across the Curriculum (3) The course focuses on investigating reports, research, and recent trends related to teaching number and operation concepts K-12. A student who has passed MATH 200 may not take EDMTH 444 for credit.
Effective: Summer 2009

EDMTH 455 Current Issues in Mathematics Education (3) An examination and analysis of contemporary trends and concerns in the teaching of mathematics.
Effective: Fall 1983
Prerequisite: EDMTH 302 or EDUC 417

EDMTH 497 Special Topics (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1990

Last Import from UCM: June 16, 2011 3:00 AM

Education Science (EDSCI)

EDSCI 454 **Modern Elementary Science Education** (3) Introduction of content, methods, and materials used in modern elementary science with emphasis upon modern elementary science programs.

Effective: Spring 2001

Prerequisite: seventh-semester standing in Elementary Education Major

EDSCI 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 1985

Last Import from UCM: June 16, 2011 3:00 AM

Educational Psychology (EDPSY)

EDPSY 400 Introduction to Statistics in Educational Research (3) The foundations of statistical techniques used in educational research; distributions, central tendency, variability, correlation, regression, probability, sampling, hypothesis testing.

Effective: Summer 1990

EDPSY 406 Applied Statistical Inference for the Behavioral Sciences (3) Common techniques (parametric) covered through two-factor analysis of variance (independent samples); hypothesis testing, confidence interval, power, robustness; MINITAB frequently used.

Effective: Spring 1991

Prerequisite: EDPSY 400 or STAT 200

EDPSY 408 (SPLED 408) Meeting Instructional Needs of English Language Learners with Special Needs (3) The course content and activities focus on instruction and assessment for English Language Learners with special needs.

Effective: Spring 2011

Prerequisite: EDPSY 010, EDPSY 014 Prerequisite or concurrent: SPLED 395W, SPLED 425

EDPSY 421 Learning Processes in Relation to Educational Practices (3) An introduction to the empirical study of variables and conditions that influence school learning.

Effective: Spring 2007

Prerequisite: EDPSY 014 or PSYCH 212

EDPSY 450 (PSYCH 404) Principles of Measurement (3) Scale transformation, norms, standardization, validation procedures, estimation of reliability.

Effective: Spring 2007

Prerequisite: EDPSY 400 or PSYCH 200 or PSYCH 100; STAT 200

EDPSY 475 Introduction to Educational Research (3) Scientific method; classes of variables in educational research; the measurement of classroom behavior; survey, predictive, and experimental studies.

Effective: Summer 1990

Prerequisite: EDPSY 400

EDPSY 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1990

EDPSY 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 1990

EDPSY 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

EDPSY 506 Advanced Techniques for Analyzing Educational Experiments (3) Analytical and experimental control considerations for designs involving nested and/or crossed subjects. Analysis of variance and multiple comparisons via computers.

Effective: Spring 2007

Prerequisite: EDPSY 406 or PSYCH 400

EDPSY 507 Multivariate Procedures in Educational Research (3) Introduction to matrix algebra, computer programming, multiple regression analysis, multiple and canonical correlation, multiple discriminant analysis, classification procedures, factor analysis.

Effective: Spring 2007

Prerequisite: EDPSY 406 or PSYCH 400

EDPSY 512 Group Processes in the Classroom (3) Basic concepts and perspectives in the study of group processes; instructional group interaction; analysis of classroom behavior.

Effective: Spring 1998

EDPSY 513 Individual and Group Differences (3) Description, causes, and interpretation of individual variation over the life-span, with application to school and institutional practices.

Effective: Summer 1990

Prerequisite: EDPSY 400 or EDPSY 450

EDPSY 520 Problems in the Education of the Mentally Gifted (2-4) Analysis of educational needs of the mentally gifted; curriculum construction and curricular materials.

Effective: Summer 1994

Prerequisite: teaching experience

EDPSY 523 Concept Learning and Problem Solving (3-4) Theoretical-empirical trends in concept learning, problem

solving, and creativity related to instructional psychology.

Effective: Summer 1990

Prerequisite: EDPSY 421

EDPSY 524 Theories of Learning and Instruction (3) Study of major classical theories of learning and recent developments in learning and instructional theory.

Effective: Summer 1990

Prerequisite: EDPSY 421

EDPSY 526 (LL ED 526) The Psychology of Reading (3) Psychological principles underlying the process of reading and comprehending, with application to instruction.

Effective: Spring 1993

Prerequisite: EDPSY 421

EDPSY 527 Psychology of Adults as Learners (3) Psychological principles related to learning by adults, with application to instruction and other educational practices.

Effective: Summer 1990

Prerequisite: EDPSY 421

EDPSY 528 Instructional Psychology (3) Application to instructional design of current developments in research on human development, information processing, learning strategies, memory structures, instructional processes.

Effective: Summer 1990

Prerequisite: EDPSY 421

EDPSY 530 Achievement Motivation (3) Within a seminar format, this course addresses both theoretical and empirical approaches to motivation and other related affective constructs.

Effective: Summer 2009

Prerequisite: EDPSY 421

EDPSY 550 Design and Construction of Psychological Measures (3) Lecture-practicum involving planning, construction, administration, and analysis of a psychological test; lectures stress construct validity, item analysis, and predictive validity.

Effective: Summer 1990

Prerequisite: EDPSY 450

EDPSY 554 Theories of Psychological Measurement (3) Basic true-score and error models; their extensions to test reliability and test validity; problems of item analysis and weighting.

Effective: Summer 1990

Prerequisite: EDPSY 450

EDPSY 555 (CI ED 555) Validity of Assessment Results (3) Concepts, issues, and methods of validation of educational and psychological assessment including models and approaches to validation, bias, and utility.

Effective: Spring 2008

Prerequisite: EDPSY 406, EDPSY 450

EDPSY 556 Foundations and Applications of Item Response Theory (3) Unidimensional models for dichotomously scored and polytomously scored items and their applications in instrument/test development.

Effective: Summer 2009

Prerequisite: EDPSY 450 and EDPSY 507

EDPSY 560 Contemporary Issues in the Evaluation of Educational Programs (3) Practical and theoretical issues in the planning, execution, and interpretation of program evaluations.

Effective: Spring 1993

Prerequisite: EDPSY 450, EDPSY 475

EDPSY 575 Seminar in Educational Psychology (1-6) A seminar dealing with specific topics in educational psychology.

Open to advanced students in the behavioral sciences.

Effective: Summer 1999

EDPSY 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1990

EDPSY 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 1990

EDPSY 597A Data Analysis Workshop (3) This course is designed for students with a desire to increase their conceptual understanding of basic statistics and their proficiency with analytical techniques. This course will be held in a computer lab and the primary statistical analysis package used will be SPSS.

Effective: Summer 2011 Ending: Summer 2011

EDPSY 597A Cognitive Processes in Multimedia Learning (3) Multimedia instructional materials, those in which information is presented in both verbal and nonverbal representations, are prevalent in educational settings. In this course, we explore the cognitive demands created by multimedia and promising research on ways to support students' learning from and with these representations.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDPSY 597B **Structural Equation Modeling** (3) This course covers basic issues in Structural Equation Modeling (SEM).
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDPSY 597C **Conducting Cluster Randomized Trials in Schools: Evaluating Social Contextual Interventions** (2) This course focuses on the design of cluster randomized trials that include a focus on classroom and school social contexts.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDPSY 597D **Seminar on Professional Development Issues in Interdisciplinary Educational Research** (1) This course focuses on professional development issues for individuals who are trained to work outside their standard discipline.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDPSY 600 **Thesis Research** (1-15) No description.
Effective: Summer 1990

EDPSY 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 1990

EDPSY 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching of Educational Psychology classes under senior faculty supervision.
Effective: Summer 1990

EDPSY 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 1990

EDPSY 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Summer 1990

Last Import from UCM: June 16, 2011 3:00 AM

Educational Technology (EDTEC)

EDTEC 400 Introduction to Instructional Technology for Educators (1-3) Use of microcomputers, video, and other media in education; models use technologies including video, audio, print, computer, and telephone.

Effective: Fall 2005

Prerequisite: EDPSY 014

EDTEC 440 Educational Technology Integration (3) Technology integration in educational settings.

Effective: Fall 2008

Prerequisite: EDPSY 014 and 6th semester standing

EDTEC 448 Using the Internet in the Classroom (3) This course introduces students to methods and models of using the Internet effectively in their classroom.

Effective: Fall 2005

Prerequisite: EDTEC 400 or demonstrated Internet awareness

EDTEC 449 Video and Hypermedia in the Classroom (3) Skills and knowledge needed to direct the use of learning technologies in educational settings.

Effective: Fall 2005 Ending: Summer 2011

Prerequisite: INSYS 415

EDTEC 449 Using Video in the Classroom (3) Skills and knowledge needed to direct the use of video technologies in educational settings.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: 7th semester standing or higher

EDTEC 461 Designing Computer Networks for Education (3) Applying fundamental concepts of computer networking to design effective networks for educational purposes.

Effective: Fall 2005

Prerequisite: EDTEC 448

EDTEC 462 Coordinating Technology Use in Education (3) Skills and knowledge needed to direct the use of learning technologies in educational settings.

Effective: Fall 2005

Prerequisite: EDTEC 448

EDTEC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2010

EDTEC 498A Emerging Web 2.0 Technologies and Learning (3) This course examines emerging Web 2.0 technologies and explores their application to learning and education.

Effective: Summer 2011 Ending: Summer 2011

EDTEC 498A Emerging Web 2.0 Technologies and Learning (3) this course examines emerging Web 2.0 technologies and explores their application to learning and education.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDTEC 561 Measuring the Impact of Technology on Learning (3) Prepares teachers to evaluate the effects of technology use.

Effective: Summer 2005

Prerequisite: EDPSY 421 or equivalent and AEE 521 or equivalent

EDTEC 562 Effective Technology Use in My Classroom (3) Develop, implement, and evaluate technology innovations in schools.

Effective: Summer 2005

Prerequisite: EDTEC 561

EDTEC 566 Computers as Learning Tools (3) Amplifying thinking or organizing mental functions with computers.

Effective: Fall 2006

Prerequisite: EDPSY 421, EDTEC 561

EDTEC 567 Technology and Higher-Order Learning (3) Research technology on higher-order skills.

Effective: Summer 2005

Prerequisite: EDTEC 561

EDTEC 594 Research Topics (1-9) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2010

Prerequisite: EDTEC 566 or EDTEC 567

EDTEC 594A Data Collection for EdTec 566 Research Studies (1) Implement EdTec 566 research study, collect data, and begin data analysis. IRB approval of research proposal is required.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: EDTEC 566 or EDTEC 567

EDTEC 594A Data Collection for EDTEC 566 Research Studies (1) Implement EDTEC 566 research study, collect data, and then begin data analysis. IRB approval of research proposal is required.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: EDTEC 566 or EDTEC 567

EDTEC 594B Data Analysis for EdTec 566 Research Studies (1) Complete data analysis for EdTec 566 research study and begin writing research reports.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: EDTEC 566 or EDTEC 567

EDTEC 594B Data Analysis for EDTEC 566 Research Studies (1) Complete data analysis for EDTEC 566 research study and begin writing research reports.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: EDTEC 566 or EDTEC 567

EDTEC 594C Research Reports for EdTec 566 Research Studies (1) Complete research reports for EdTec 566 research study.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: EDTEC 566 or EDTEC 567

EDTEC 594C Research Reports for EDTEC 566 Research Studies (1) Complete research reports for EDTEC 566 research study.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: EDTEC 566 or EDTEC 567

EDTEC 594D Data Collection for EdTec 567 Research Studies (1) Implement EdTec 567 research study, collect data, and begin data analysis. IRB approval of research proposal is required.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: EDTEC 566 or EDTEC 567

EDTEC 594D Data Collection for EDTEC 567 Research Studies (1) Implement EDTEC 567 research study, collect data, and begin data analysis. IRB approval of research proposal is required.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: EDTEC 566 or EDTEC 567

EDTEC 594E Data Analysis for EdTec 567 Research Studies (1) Complete data analysis of EdTec 567 research study and begin writing research reports.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: EDTEC 566 or EDTEC 567

EDTEC 594E Data Analysis for EDTEC 567 Research Studies (1) Complete data analysis for EDTEC 567 research study and begin writing research reports.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: EDTEC 566 or EDTEC 567

EDTEC 594F Research Reports for EdTec 567 Research Studies (1) Complete research report for EdTec 567 research study.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: EDTEC 566 or EDTEC 567

EDTEC 594F Research Reports for EDTEC 567 Research Studies (1) Complete research report for EDTEC 567 research study.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: EDTEC 566 or EDTEC 567

EDTEC 595 Internship (1-9) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships.

Effective: Summer 2010

EDTEC 596 Independent Studies (1-9) Creative projects, including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2010

Last Import from UCM: June 16, 2011 3:00 AM

Educational Theory and Policy (EDTHP)

EDTHP 401 (IL) (CI ED 401) **Introduction to Comparative Education** (3) Origins, nature, scope, basic literature, and methodology of comparative education. Study of sample topics.

Effective: Fall 2007

Prerequisite: 5th semester standing or higher

EDTHP 411 (US) **Ethnic Minorities and Schools in the United States** (3) Analysis of the social and cultural factors which affect educational outcomes among minority pupils, especially Blacks, Hispanics, and Indians.

Effective: Spring 2006

EDTHP 412 (WMNST 412) **Education and the Status of Women** (3) An examination of the relationship of education to the status of women in American society.

Effective: Spring 2005

EDTHP 416 (US) (SOC 416) **Sociology of Education** (3) The theoretical, conceptual, and descriptive contributions of sociology to education.

Effective: Spring 2006

EDTHP 420 **Education and Public Policy** (3) Focus on the development and analysis of education policy, and policy's influence on schools.

Effective: Spring 2006 Ending: Summer 2011

Prerequisite: EDTHP 115 or six credits in social/behavioral sciences.

EDTHP 420 **Education and Public Policy** (3) Focus on the development and analysis of education policy, and policy's influence on schools.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: six credits in social/behavioral sciences

EDTHP 425 **Anthropology of Education** (3) This course will review the origins and development of anthropology of education and its role in educational research and reform.

Effective: Summer 2007

Prerequisite: EDTHP 115 or 6 credits in the social or behavioral sciences

EDTHP 427 **Intelligence and Educational Policy** (3) This course explores the concept of intelligence and its assessment from historical, psychological, educational and policy perspectives.

Effective: Spring 2006

Prerequisite: EDTHP 115 or 6 credits in social/behavioral sciences

EDTHP 430 **History of Education in the United States** (3) American educational ideas and practice critically examined in terms of their historical development and contemporary significance.

Effective: Summer 1995

EDTHP 434H **Honors Teaching Experience in Leadership Jumpstart** (1) Guided instruction and practical experience for teaching assistants to the Honors Leadership Jumpstart course (EDTHP 234H).

Effective: Fall 2006

Prerequisite: EDTHP 234H and permission of program

EDTHP 440 (CI ED 440) **Introduction to Philosophy of Education** (3) Introduction to the examination of educational theory and practice from philosophical perspectives, classical and contemporary.

Effective: Fall 2007

Prerequisite: EDTHP 115

EDTHP 441 **Education, Schooling, and Values** (3) Studies in education and schooling as problems in value; axiological problems and positions; examination of practical applications, including moral education.

Effective: Summer 1995

EDTHP 496 **Individual Studies** (1-18) Creative projects supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1995

EDTHP 497 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 1995

EDTHP 497A **Preparing Educators for Family & Community Engagement** (3) This course will explore effective family and community engagement strategies identified through research, policy and practice.

Effective: Summer 2011 Ending: Summer 2011

EDTHP 497B Immigration, Ethnicity and the School (3) This class is an introduction to theories and empirical research on various immigrant and race/ethnic groups and their schooling experiences.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

EDTHP 498 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1995

EDTHP 500 Proseminar in Educational Theory and Policy (3) An introduction to disciplinary and interdisciplinary studies in educational theory and policy.
Effective: Spring 2002

EDTHP 501 Education in Developing Countries (3) The meaning of development and the role of education in the development process: theories, agents, trends, and case studies.
Effective: Summer 1995

EDTHP 505 Nationality Policy and Education (3) Education and national integration; problems of cultural dominance in multinational states.
Effective: Summer 1995

EDTHP 507 (CI ED 503, HI ED 503) Ethnicity, National Identity, and Education (3) Surveys group-oriented education policies internationally, especially comparing those of Britain, Taiwan, India.
Effective: Summer 1995

EDTHP 511 Education and Political Socialization (3) An examination of the studies which examine the function of schools in socializing the young for adult political roles.
Effective: Summer 1995

EDTHP 512 Education and the Social Structure (3) An examination of the relationships between educational opportunities and social structure.
Effective: Summer 1995

EDTHP 514 Social Change, Cultural Dynamics, and Education (3) The role of the school in promoting either social change or stability.
Effective: Summer 1995

EDTHP 516 (CI ED 516) Education and Demographic Change in the United State and Abroad (3) Interrelationship between schooling and employment, marriage, fertility, and migration. Focus comparatively on the United States and developing countries.
Effective: Spring 1998

EDTHP 518 Analysis of U. S. Educational Policy (3) The interaction between educational theory and social structure, focusing on the role of practicing intellectuals in contemporary institutional settings.
Effective: Summer 1995

EDTHP 520 Perspectives on Contemporary School Reform (3) Examination of contemporary U.S. school reform, with a focus on contrasting theoretical perspectives and the application of policy analysis principles.
Effective: Spring 2006

EDTHP 525 Alternative Assessment of National Educational and Health Policies (3) Overview of alternative research strategies in education, nursing and health education studies used to study impact of national policies.
Effective: Spring 2006

EDTHP 527 Testing and Educational Equity (3) This course considers testing, the reasons that policymakers have widely adopted testing, and implications of testing for educational equity.
Effective: Spring 2006

EDTHP 530 The Development of the American School (3) American schooling critically examined institutionally from an historical perspective in social-cultural context. Emphasis on theories of interpretation and change.
Effective: Summer 1995

EDTHP 533 Social History and Education Policy (3) Historical study of social dimensions in the formation of education policy.
Effective: Summer 1995

EDTHP 536 **Studies in Educational Thought** (3) Studies in the historical development of educational theory.
Effective: Summer 1995

EDTHP 537 **History of American Indian Education Policy** (3) Focusing on the relationship between American Indians and the United States, this course examines historical and contemporary federal education policy.
Effective: Summer 1995

EDTHP 538 (SOC 538) **Sociology of Education** (3) Provides students with an overview of dominant sociological theoretical perspectives on schools, schooling, and education in modern society.
Effective: Spring 2008

EDTHP 540 **Dewey and the Pragmatic-Instrumentalist Educational Tradition** (3) Critical examination of John Dewey's educational thought in the context of pragmatic philosophy and progressivism in American education.
Effective: Summer 1995

EDTHP 541 (CI ED 541) **Contemporary Philosophies of Education** (3) Educational theory and practice in relation to contemporary movements in philosophy.
Effective: Spring 2008

EDTHP 553 (CI ED 553, HI ED 553, SOC 553) **Educational Mobility in Comparative Perspective** (3) Role of education in social mobility, using quantitative, qualitative, and historical methods; focuses comparatively on Britain, East Asia, and South America.
Effective: Spring 2003

EDTHP 557 (HI ED 557, SOC 557) **Sociology of Higher Education** (3) Reviews theory and current sociology research on student access, achievement, and governance in postsecondary education, with applications to policy analysis.
Effective: Fall 2000
Prerequisite: graduate students only except with permission of instructor; EDTHP/SOC 416 is recommended

EDTHP 580 **Improving Educational Writing** (3) Focus on components of high quality academic writing for educational research, with a special emphasis on improving the writing process.
Effective: Summer 2009

EDTHP 585 (EDLDR 585, HI ED 585) **Research Design: Implications for Decisions in Higher Education** (3) A capstone course on research design and analytical approaches to support decision-making in administration and policy-making.
Effective: Fall 2004
Prerequisite: EDPSY 400, EDPSY 406 ; or AG 400, R SOC 573

EDTHP 586 (EDLDR 586, HI ED 586) **Qualitative Methods in Educational Research** (3) Exploration of the theoretical framework undergirding qualitative research and its attendant practices and techniques.
Effective: Fall 2004

EDTHP 587 (EDLDR 587, HI ED 587) **Education Policy and Politics** (3) The political economy and bureaucratic politics of educational organizations, with special attention to the policy-making, implementation, and evaluation process.
Effective: Fall 2004

EDTHP 588 (EDLDR 588, HI ED 588) **Qualitative Methods in Educational Research II** (3) Advanced study of methods involved in executing and analyzing qualitative research in education.
Effective: Summer 2007
Prerequisite: EDTHP 586

EDTHP 596 **Individual Studies** (1-9) Creative projects including non-thesis research, supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1995

EDTHP 596A **Supervised Teaching Experience** (1) Course for teaching assistants in EDTHP 115.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDTHP 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1995

EDTHP 597A **Research in Educational History** (3) This seminar provides students an opportunity to engage in significant, in-depth educational research, focusing on the history of American education.
Effective: Summer 2011 Ending: Summer 2011

EDTHP 597A **Quantitative Studies of Education** (3) Reviews existing quantitative studies in education with emphasis on methods used, theoretical and practical implications.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDTHP 597B Data Analysis for Education Research (3) This course bridges applied statistics and practical work with real data. It emphasizes hands-on data preparation and analysis.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: EDPSY 400 and EDPSY 406

EDTHP 597B Education of Immigrants' Children (3) This course is designed to give students a broad familiarity with sociological perspectives and research on immigration and schooling for children.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

EDTHP 597C (HI ED 597C, EDLDR 597C) Foundations of Research (3) This course is designed to begin a reading of the history and philosophies of education research.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDTHP 597C (CI ED 597C) Comparative Education Policy Analysis (3) Examines international processes in policy formation and current education policy trends worldwide.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

EDTHP 597D (EDLDR 597D, HI ED 597D) Reviewing and Editing Education Policy and Research Journals (3) Provide advanced doctoral students with a systematic introduction to reviewing and editing policy and research journals in the field of education.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDTHP 600 Thesis Research (1-15) No description.

Effective: Summer 1995

EDTHP 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Summer 1995

EDTHP 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.

Effective: Summer 2002

EDTHP 610 Thesis Research Off Campus (1-15) No description.

Effective: Summer 1995

EDTHP 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Summer 1995

Last Import from UCM: June 16, 2011 3:00 AM

Elect Engr Technolgy (EE T)

No courses for department code **EE T** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Electrical Engineering (E E)

E E 400 Engineering Design Concepts (3) Engineering design and modelling, engineering economy, project planning, capstone project selection, and technical communication skills.

Effective: Spring 2008

Prerequisite: E E 313W;E E 316;E E 352;E E 380 ; seventh-semester standing

E E 401 Electrical Design Projects (3) Group design projects in the areas of electronics and electrical/computer systems.

Effective: Spring 2008

Prerequisite: E E 400 ; eighth-semester standing

E E 402W Senior Project Design in Electromagnetics (3) Project designs of antenna and microwave systems, with an emphasis on technical communications skills. Lab.

Effective: Spring 2001

Prerequisite: E E 330 . Prerequisite or concurrent:ENGL 202C

E E 403M Senior Project Design (3) Project designs of electrical engineering systems, encompassing various subdisciplines within Electrical Engineering, with an emphasis on technical communications skills.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: E E 330;E E 350;E E 316 ; and the completion of two Electrical Engineering technical electives Concurrent: ENGL 202C

E E 403M Senior Project Design (3) Project designs of electrical engineering systems, encompassing various subdisciplines within Electrical Engineering, with an emphasis on technical communications skills.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: E E 330;E E 350;E E 316 ; and the completion of two Electrical Engineering technical electives Concurrent: ENGL 202C

E E 403W Senior Project Design (3) Project designs of electrical engineering systems, encompassing various subdisciplines within Electrical Engineering, with an emphasis on technical communications skills.

Effective: Spring 2008

Prerequisite: E E 330;E E 350;E E 316 ; and the completion of two Electrical Engineering technical electives Concurrent: ENGL 202C

E E 405 Capstone Proposal Preparation (1) Performing the initial research needed for the capstone course, and the preparation of the written project proposal.

Effective: Spring 2008

Prerequisite: senior level standing

E E 406W Electrical Engineering Capstone Design (3) Project designs of analog and digital systems, interfacing, and relevant electronic circuits, with an emphasis on technical communications skills.

Effective: Spring 2008

Prerequisite: E E 311;E E 405;ENGL 202C

E E 410 Linear Electronic Design (3) Linear circuit design via integrated circuit processes; A/D converters, switched capacitor filters, phase lock loops, multipliers, and voltage- controlled oscillators.

Effective: Spring 2008

Prerequisite: E E 311

E E 413 Power Electronics (3) Switch-mode electrical power converters. Electrical characteristics and thermal limits of semiconductor switches.

Effective: Spring 2008

Prerequisite: E E 310;E E 350 orE E 312 orE E 314 orE E 315

E E 416 (CMPEN 416) Digital Integrated Circuits (3) Analyses and design of digital integrated circuit building blocks, including logic gates, flip-flops, memory elements, analog switches, multiplexers, and converters.

Effective: Spring 2008

Prerequisite: E E 310

E E 417 (CMPEN 417) Digital Design Using Field Programmable Devices (3) Field programmable device architectures and technologies; rapid prototyping using top down design techniques; quick response systems.

Effective: Spring 2008

Prerequisite: CMPEN 331

E E 420 Electro-optics: Principles and Devices (3) Spatially linear system and transform; diffraction theory, partial coherence theory, optical image detection, storage and display, holography.

Effective: Spring 1997

Prerequisite: E E 320

E E 421 Optical Fiber Communications (3) Operational principles of optical components, including sources, fibers and detectors, and the whole systems in optical fiber communications.

Effective: Spring 2008

Prerequisite: E E 320, E E 350, E SC 314

E E 422 Optical Engineering Laboratory (3) Hands-on experience covering areas of optical transforms, electro-optics devices, signal processing, fiber optics transmission, and holography.

Effective: Fall 1993

Prerequisite: E E 320

E E 424 Principles and Applications of Lasers (3) Principles of lasers--generation, propagation, detection and modulation; applications in fiber optics communication, remote sensing, holography, optical switching and processing.

Effective: Spring 2008

Prerequisite: E E 330, E SC 400H orPHYS 400

E E 430 Principles of Electromagnetic Fields (3) Laws of electrodynamics, boundary value problems, relativistic effects, waves in dielectrics and ferrites, diffraction and equivalence theorems.

Effective: Spring 2008

Prerequisite: E E 330

E E 432 UHF and Microwave Engineering (3) Transmission line and wave guide characteristics and components; design of UHF-microwave amplifiers, oscillators, and filters; measurement techniques; design projects.

Effective: Spring 1998

Prerequisite: E E 310, E E 330

E E 438 Antenna Engineering (3) Radiation from small antennas, linear antenna characteristics, arrays of antennas, impedance concepts and measurements, multifrequency antennas, and aperture antennas.

Effective: Spring 2001

Prerequisite: E E 330

E E 439 Radiowave Propagation in Communications (3) Radiowave propagation in mobile, terrestrial, and satellite communications; applications at microwave and lower frequencies.

Effective: Spring 2008

Prerequisite: E E 330

E E 441 Semiconductor Integrated Circuit Technology (3) An overview of fundamentals of processes involved in silicon integrated circuit fabrication through class lectures and hands-on laboratory.

Effective: Spring 2008

Prerequisite: E E 310, E SC 314

E E 442 Solid State Devices (3) The physics of semiconductors as related to the characteristics and design of solid state electronic devices.

Effective: Spring 2008

Prerequisite: E E 310, E SC 314

E E 450 Signal and Image Processing (3) Linear system analysis in one-dimension and two-dimensions, emphasis on filtering; multi-dimensional signal analysis; image enhancement and reconstruction; computer simulation applications.

Effective: Spring 2008

Prerequisite: E E 352

E E 453 Fundamentals of Digital Signal Processing (3) Design of FIR and IIR filters; DFT and its computation via FFT; applications of DFT; filter implementation; finite arithmetic effects.

Effective: Spring 2008

Prerequisite: E E 351 orE E 352 orE E 353

E E 454 (CMPEN 454) Fundamentals of Computer Vision (3) Introduction to topics such as image formation, segmentation, feature extraction, shape recovery, object recognition, and dynamic scene analysis.

Effective: Spring 2008

Prerequisite: MATH 230 orMATH 231;CMPSC 201 orCMPSC 121

E E 455 (CMPEN 455) An Introduction to Digital Image Processing (3) Overview of digital image processing techniques and their applications; image sampling, enhancement, restoration, and analysis; computer projects.

Effective: Spring 2008

Prerequisite: E E 350 orE E 353;CMPSC 201 orCMPSC 121

E E 456 (E SC 456, EGEE 456) Introduction to Neural Networks (3) Artificial Neural Networks as a solving tool for difficult problems for which conventional methods are not applicable.

Effective: Spring 2008

Prerequisite: CMPSC 201 orCMPSC 202;MATH 220

E E 458 Digital Image Processing and Computer Vision (3) Principles of DSP and computer vision, including sensing preprocessing, segmentation, description, recognition, and interpretation.

Effective: Spring 2008

Prerequisite: E E 352

E E 460 Communication Systems II (3) Probability fundamentals, digital/analog modulation/demodulation, system noise analysis, SNR and BER calculations, optimal receiver design concepts, introductory information theory.

Effective: Spring 2008

Prerequisite: E E 360

E E 461 Communications I (4) Element of analog and digital communication systems, AM, FM, and digital modulation techniques, receivers, transmitters, and transmission systems, noise.

Effective: Spring 2008

Prerequisite: E E 352

E E 471 (AERSP 490, NUC E 490) Introduction to Plasmas (3) Plasma oscillations; collisional phenomena; transport properties; orbit theory; typical electric discharge phenomena.

Effective: Spring 2008

Prerequisite: E E 330

E E 472 (AERSP 492) Space Astronomy and Introduction to Space Science (3) The physical nature of the objects in the solar system; the earth's atmosphere, ionosphere, radiation belts, magnetosphere, and orbital mechanics.

Effective: Spring 2008

Prerequisite: E E 330 orPHYS 400

E E 474 Satellite Communications Systems (3) Overview of satellite communications systems, principles, space platforms, orbital mechanics, up/down links and link budgets, modulation techniques.

Effective: Spring 2008

Prerequisite: E E 330 andE E 360

E E 477 (METEO 477) Fundamentals of Remote Sensing Systems (3) The review of fundamental physical properties leads into discussions of various techniques, including imaging, spectroscopy, radiometry, and active sensing.

Effective: Spring 2008

Prerequisite: E E 330 orMETEO 436

E E 480 Linear Systems: Time Domain and Transform Analysis (3) Signals and systems representations, classifications, and analysis using; Difference and Differential equations, Laplace transform, z-transform, Fourier series, FT, FFT, DFT.

Effective: Spring 2008

Prerequisite: graduate standing

E E 481 Control Systems (4) Classical/modern approaches to system analysis/design; time/frequency domain modeling, stability, response, optimization, and compensation.

Effective: Spring 2008

Prerequisite: E MCH 211;PHYS 211;E E 352

E E 482 Introduction to Digital Control Systems (3) Sampling and hold operations; A/D and D/A conversions; modeling of digital systems; response evaluation; stability; basis of digital control; examples.

Effective: Spring 2008

Prerequisite: E E 380;E E 351 orE E 352

E E 483 Introduction to Automation and Robotics Systems (3) Introduction to robotics systems with emphasis on robotic motion and control, and robotic components such as actuators and sensors.

Effective: Summer 2008

Prerequisite: E E 481

E E 484 Control System Design (3) Analysis and design of automatic control systems using time, frequency domain and state variable methods.

Effective: Spring 2008

Prerequisite: E E 481

E E 485 Energy Systems and Conversion (3) Overview of energy alternatives available, and study of theory of operation and models of major energy conversion devices.

Effective: Spring 2008

Prerequisite: E E 314 orE E 315;MATH 250

E E 487 Electric Machinery and Drives (3) Analysis of variable-speed drives comprised of AC electric machines, power converters, and control systems.

Effective: Summer 2007

Prerequisite: E E 387

E E 488 Power Systems Analysis I (3) Fundamentals, power transformers, transmission lines, power flow, fault calculations, power system controls.

Effective: Spring 2008

Prerequisite: E E 387 orE E 485

E E 489 Power Systems Analysis II (3) Symmetrical components, unbalanced networks, unsymmetrical faults, unbalanced operation of rotating machines, transient transmission line modeling, system protection.

Effective: Spring 2008

Prerequisite: E E 488

E E 494 Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.

Effective: Fall 1993

E E 494H Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.

Effective: Spring 2008

E E 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2008

Prerequisite: prior approval of proposed assignment by instructor

E E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1993

E E 496A Digital and Analog Communications (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2011 Ending: Summer 2011

E E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1993

E E 497A IC Based Electronics Design (3) Design and applications of electronic circuits and systems using operational amplifiers and analog integrated circuits.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: CMPEN 271, E E 310 Concurrent: E E 311

E E 497B Probability and Stochastic Processes for Electrical Engineers (3) Statistics elective for Electrical Engineering majors with strong emphasis on Electrical Engineering applications.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012
Prerequisite: E E 350

E E 497E Space Systems Engineering Seminar (1) This 1-credit seminar is for students completing the Space Systems Engineering certificate.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

E E 497E Software-defined Radio (3) Radio communication system where traditional hardware components (mixers, amplifiers, demodulators, etc.) are implemented via software using digital signal processing.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012
Prerequisite: E E 351 or E E 353

E E 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

E E 500 Colloquium (1) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2008

E E 510 Linear Integrated Circuits (3) Design of monolithic, thin-film, and hybrid linear integrated circuits; D.C., video, tuned, r.f., and microwave applications. Emphasis on reliability.
Effective: Spring 2008
Prerequisite: E E 410; E E 441

E E 520 Electro Optics--Systems and Computing (3) Synthetic aperture radar, spatial light modulators, optical interconnection, optical computing, neural networks, and medical optics imaging.
Effective: Summer 1997
Prerequisite: E E 420

E E 521 Fiber Optics and Integrated Optics (3) Theories and applications of linear and nonlinear optical phenomena in optical fibers and integrated optical devices.
Effective: Spring 2008
Prerequisite: E E 421

E E 522 Electro-Optics Laboratory (3) Basic concepts and fundamentals of light diffraction, optical signal processing, and holography.
Effective: Fall 1993
Prerequisite: E E 420

E E 524 Lasers and Optical Electronics (3) Study of several advanced nonlinear optical phenomena, laser propagation, optical and optoelectronic devices, principles, and applications.
Effective: Spring 2008
Prerequisite: E E 424

E E 526 (MATSE 526) Nonlinear Optical Materials (3) Mechanisms of polarization nonlinearity, nonlinear optical processes and analyses, optoelectronic materials and their device application.
Effective: Spring 2006
Prerequisite: E E 420 or MATSE 435

E E 531 Engineering Electromagnetics (3) Electromagnetic field theory fundamentals with application to transmission lines, waveguides, cavities, antennas, radar, and radio propagation.
Effective: Spring 2008
Prerequisite: E E 430

E E 534 Conformal Antennas (3) Introduction to advanced analysis and design techniques as well as applications for conformal antennas mounted on planar and curved surfaces.
Effective: Spring 2008
Prerequisite: E E 538

E E 535 Boundary Value Methods of Electromagnetics (3) Theory and application of boundary value problems in engineering electromagnetics; topics include microwave and optical waveguides, radiation, and scattering.
Effective: Spring 2008
Prerequisite: E E 430 or E E 432 or E E 438 or E E 439

- E E 537 Numerical and Asymptotic Methods of Electromagnetics** (3) Finite difference time domain, geometric theory of diffraction and method of moments applied to antennas and scattering.
Effective: Summer 1995
- E E 538 Antenna Engineering** (3) In-depth studies of synthesis methods, aperture sources, broadband antennas, and signal-processing arrays.
Effective: Fall 1993
Prerequisite: E E 438
- E E 541 Manufacturing Methods in Microelectronics** (3) Methods, tools, and materials used to process advanced silicon integrated circuits.
Effective: Spring 2008
Prerequisite: E E 441
- E E 542 Semiconductor Devices** (3) Characteristics and limitations of bipolar transistors, diodes, transit time, and bulk-effect devices.
Effective: Spring 2008
Prerequisite: E E 442
- E E 543 Ferroelectric Devices** (3) Theoretical background of ferroelectric devices, practical materials, device designs, drive/control techniques, and typical applications.
Effective: Summer 2009
- E E 544 Micromechatronics** (3) Theoretical background of solid state actuators, practical materials, device designs, drive/control techniques and typical applications.
Effective: Summer 2009
- E E 545 Semiconductor Device Reliability** (3) Introduction to principles and methods of reliability engineering, application to modern semiconductor component design, and device reliability.
Effective: Spring 2008
Prerequisite: E E 441 or E E 442; STAT 418
- E E 546 Field-Effect Devices** (3) The physical background, characteristics, and limitations of surface field-effect and junction field-effect devices and related structures.
Effective: Spring 2008
Prerequisite: E E 442
- E E 547 Dielectric Devices** (3) Applications of insulator physics and devices based on insulator properties.
Effective: Spring 2008
Prerequisite: E E 442
- E E 549 Acoustic Wave Devices** (3) Examines materials commonly used for acoustic wave devices, fundamentals of acoustic waves and resonance modes, and characteristics of these devices.
Effective: Fall 2008
Prerequisite: E E 310 and E E 442
- E E 551 Wavelets, Filter Banks, and Multi-resolution Analysis** (3) Gram-Schmidt orthogonalization and orthonormal bases, filter banks, orthogonal wavelets and multiresolution analysis, fast wavelet transforms, various applications.
Effective: Spring 2008
Prerequisite: E E 453, MATH 220
- E E 552 (CSE 583) Pattern Recognition--Principles and Applications** (3) Principles and applications decision-theoretic classification, discriminant functions, pattern processing and feature selection, syntactic pattern recognition, shape analysis and recognition.
Effective: Spring 2008
- E E 553 Topics in Digital Signal Processing** (3) Parametric modeling, spectral estimation, efficient transforms and convolution algorithms, multirate processing, and selected applications involving non-linear and time-variant filters.
Effective: Fall 1993
Prerequisite: E E 453
- E E 554 (CSE 586) Topics in Computer Vision** (3) Discussion of recent advances and current research trends in computer vision theory, algorithms, and their applications.
Effective: Spring 2008
Prerequisite: E E 454 or CMPEN 454
- E E 555 (CSE 585) Digital Image Processing II** (3) Advanced treatment of image processing techniques; image restoration, image segmentation, texture, and mathematical morphology.
Effective: Spring 2008
Prerequisite: E E 455 or CMPEN 455
- E E 556 Graphs, Algorithms, and Neural Networks** (3) Examine neural networks by exploiting graph theory for offering alternate solutions to classical problems in signal processing and control.
Effective: Spring 1996

E E 557 Multidimensional Signal Processing (3) Multidimensional sampling, weak causality, recursibility, multidimensional transforms, stability, global and local state-space models, multidimensional filters, and multidimensional spectrum estimation.

Effective: Fall 1993

Prerequisite: E E 453

E E 560 Probability, Random Variables, and Stochastic Processes (3) Review of probability theory and random variables; mathematical description of random signals; linear system response; Wiener, Kalman, and other filtering.

Effective: Spring 2008

Prerequisite: E E 350;STAT 418

E E 561 Information Theory (3) Mathematical measurement of information; information transfer in discrete systems; redundancy, efficiency, and channel capacity; encoding systems.

Effective: Spring 2008

Prerequisite: E E 460;STAT 418

E E 562 Detection and Estimation Theory (3) Detection decision theory, Bayes and Neyman-Pearson criteria, optimal receivers, classical estimation theory, signal-noise representations, optimum linear signal parameters estimation.

Effective: Summer 2000

Prerequisite: E E 560

E E 564 (CSE 554) Error Correcting Codes for Computers and Communication (3) Block, cyclic and convolutional codes; circuits and algorithms for decoding; application to reliable communication and fault-tolerant computing.

Effective: Spring 2008

Prerequisite: Communication Networks

E E 565 (CSE 515) Reliable Data Communications (3) Discussion of problems and solutions for ensuring reliable and efficient communication over wired and wireless links and data networks.

Effective: Spring 2008

Prerequisite: Communication Networks;STAT 418

E E 567 Wireless and Mobile Communications (3) Development of key wireless networks systems analysis and design tools utilizing telecommunications principles; current and emerging mobile wireless techniques.

Effective: Spring 2008

Prerequisite: E E 460;E E 560

E E 568 Digital Communications I (3) Linear and nonlinear digital modulation techniques; performance in additive Gaussian noise channel; continuous phase modulation; carrier acquisition and recovery.

Effective: Spring 2008

Prerequisite: E E 460 Concurrent: E E 560

E E 569 Digital Communications II (3) Baseband pulse transmission; baseband systems optimization; bandlimited channels performance in ISI; equalization; MLSE and ISI; fading channels; diversity; CDMA.

Effective: Spring 2008

Prerequisite: E E 560;E E 568

E E 571 (NUC E 540, AERSP 540) Theory of Plasma Waves (3) Solutions of the Boltzmann equation; waves in bounded and unbounded plasmas; radiation and scattering from plasmas.

Effective: Spring 2008

Prerequisite: E E 471

E E 572 (NUC E 541) Plasma Theory (3) Advanced topics in kinetic theory, fluctuation theory, microinstability, and turbulence.

Effective: Spring 2008

Prerequisite: E E 471 orNUC E 490

E E 573 Constitution of the Ionosphere (3) Properties of neutral and ionized atmosphere above 60 km; photochemical processes; solar, meteoric perturbations of the ionosphere; large-scale movements in ionization.

Effective: Spring 2008

E E 574 Propagation Through Random Media (3) RF/optical wave propagation through turbulent, turbid, and heterogeneous media (atmosphere/ionosphere/sea). Impacts and mitigation discussed for various scenarios.

Effective: Spring 2008

Prerequisite: E E 430 orE E 439 orE E 477 orPHYS 457

E E 576 Inversion Techniques in Remote Sensing (3) Introduce skills to address a wide variety of inverse problems such as found in atmospheric sensing, geosciences, and acoustics.

Effective: Spring 2008

Prerequisite: E E 430 orE E 439 orE E 477;STAT 418

E E 579 Microwave Radar Remote Sensing (3) Scientific and engineering principles of microwave radar remote sensing of land, sea, and the atmosphere.

Effective: Spring 2008

Prerequisite: E E 430 orE E 438 orE E 439 orE E 473

E E 580 Linear Control Systems (3) Continuous and discrete-time linear control systems; state variable models; analytical design for deterministic and random inputs; time-varying systems stability.

Effective: Spring 2008

Prerequisite: E E 380

E E 581 Optimal Control (3) Variational methods in control system design; classical calculus of variations, dynamic programming, maximum principle; optimal digital control systems; state estimation.

Effective: Spring 2008

Prerequisite: E E 580

E E 582 Adaptive and Learning Systems (3) Adaptive and learning control systems; system identification; performance indices; gradient, stochastic approximation, controlled random search methods; introduction to pattern recognition.

Effective: Spring 2008

Prerequisite: E E 580

E E 584 (M E 558) Robust Control Theory (3) Fundamentals of Robust Control Theory with emphasis on stability, performance analysis, and design.

Effective: Spring 2008

Prerequisite: E E 580 or M E 555

E E 587 (M E 559) Nonlinear Control and Stability (3) Design of nonlinear automatic control systems; phase-plane methods; describing functions; optimum switched systems; Liapunov stability; special topics in stability.

Effective: Spring 2008

Prerequisite: E E 380

E E 588 Power System Control and Operation (3) Steady-state and dynamic model of synchronous machines, excitation systems, unit commitment, control of generation, optimal power flow.

Effective: Spring 2008

Prerequisite: E E 488

E E 594 Research Projects (1-3) Supervision of individual research projects leading to M.S. or M.Eng. papers. Written and oral reports are required.

Effective: Summer 1998

E E 596 Individual Studies (1-9) Creative projects including non-thesis research which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1993

E E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Fall 1993

E E 597A Emerging Radar Techniques: Compressive Sensing, Cognitive Radars, and Beyond (3) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: STAT 418, E E 430, E E 453

E E 597A Plasma-assisted Materials Processing (3) Theory of partially ionized plasmas and the principles of plasma-assisted materials processing.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: E E 471 or AERSP 490 or NUC E 490

E E 597B (CSE 598F) Probability and Limit Theorems (3) A formal (measure theoretic) approach to modeling uncertainty, with rigorous statements about widely applied limit theorems in probability. We will begin with an overview of measure-theoretic probability conditionally expectation and different notions of convergence (strong, weak, L₀, distribution). Focusing on scaled sums of random variables, we will cover the weak and strong laws of large numbers, central limit theorem, laws of the iterated logarithm, and large deviations principles. Along the way, we will establish rates of convergence. Examples will be drawn from signals and systems in electrical engineering and random algorithms in computer science.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: STAT 418

E E 597B Ultrafast Optics (3) Pulse and beam propagation; femtosecond optics; generation, diagnostics and manipulation of femtosecond pulses; application of femtosignal technology.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: E E 420 or E E 424

E E 597C (MATSE 597A) Semiconductor Characterization (3) This course is designed to familiarize graduate students with fundamental concepts and techniques in the characterization of semiconductor materials.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

E E 597C Current Issues in Geophysical Radar Scattering: Bragg and Beyond (3) Examples of geophysical radar scattering phenomena of current community research interest and, in some cases, long-standing mystery.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: E E 430

E E 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.

Effective: Spring 2008

E E 600 Thesis Research (1-15) No description.

Effective: Fall 1993

E E 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Fall 1993

E E 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1993

E E 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Fall 1993

Last Import from UCM: June 16, 2011 3:00 AM

Electrical Engineering Technology (EET)

EET 402 High-Frequency Circuit Design (4) Electromagnetic theory as applied to the design of antennas, waveguides, and high-frequency components.

Effective: Fall 2007

Prerequisite: senior standing in Electrical Engineering Technology

EET 408 Communication System Design (4) Communication system principles including modulation techniques, encoding and decoding, noise, and elementary probability.

Effective: Fall 2007

Prerequisite: senior standing in Electrical Engineering Technology

EET 409 Power System Analysis I (4) Analysis and applications study of power utility electrical equipment such as: synchronous machines, transformers, capacitors and transmission lines.

Effective: Fall 2007

Prerequisite: senior standing in Electrical Engineering Technology

EET 410 Power System Analysis II (4) Principles of load studies, fault analysis, stability and protection of the public electrical power system.

Effective: Fall 2007

Prerequisite: senior standing in Electrical Engineering Technology

EET 413 Optoelectronics (4) Principles and applications of optoelectronics including sources, detectors, imagers, transmitters, fiber optics, systems and integrated optics.

Effective: Fall 2007

Prerequisite: senior standing in Electrical Engineering Technology

EET 414 Biomedical Instrumentation (4) Introduction to transducers and circuits used to detect and process medical physiological data with focus on cardiovascular and respiratory systems.

Effective: Fall 2007

Prerequisite: EET 312, EET 331

EET 416 Fluid and Thermal Design in Electrical Systems (3) Introduction to basic electrical engineering technology concepts and applications of thermodynamics, heat transfer, and fluid power in electrical/ electronic systems.

Effective: Fall 2007

Prerequisite: EET 315; MATH 211 or MATH 231, MATH 250

EET 419 Project Proposal Preparation (1) Performing the initial research needed for the senior project course, and the preparation of the written project proposal.

Effective: Fall 2007

Prerequisite: senior standing

EET 420W Electrical Design Project (3) Design, construction, and testing of a project either selected by the students with approval or assigned by the instructor.

Effective: Spring 2008

Prerequisite: EET 312, EET 331, EET 419, ENGL 202C

EET 431 Advanced Electronic Design (4) Applications of analog and digital integrated circuits; introduction to analog and digital communication techniques.

Effective: Fall 2007

Prerequisite: EET 331

EET 433 Control System Analysis and Design (4) Classical and modern control analysis and design approaches, such as Laplace and state-space, aided by analog and digital computers.

Effective: Fall 2007

Prerequisite: EET 312

EET 437 Advanced Communications, Telecommunications (3) Telecommunication systems, telephone, television, data networks, computer networks, integrated voice and data.

Effective: Fall 2007

Prerequisite: EET 330, CMPET 355

EET 440 Applied Feedback Controls (3) Analysis and design of analog and digital feedback control systems.

Effective: Fall 2007

Prerequisite: EET 315

EET 450 Manufacturing Related Topics in Electrical Systems (3) Manufacturing methods, including reliability and quality control considerations as applied to electrical and electronic systems.

Effective: Fall 2007

Prerequisite: MATH 211 ; or MATH 231, MATH 250

EET 456 Automation and Robotics (4) Introduction to robotic systems and automation. Emphasis includes robot motion, control, and components, as well as programming PLCs.

Effective: Spring 2008

Prerequisite: EET 331, CMPET 403 ; Prerequisite or concurrent: MATH 220; EET 433

EET 458 Digital Signal Processing (3) Continuous and discrete time signals, Fourier series and transform, z-transform,

sampling, FIR and IIR filters, FFT, DFT, and applications.

Effective: Fall 2007

Prerequisite: EET 315, CMPET 355

EET 461 Power Electronics (3) Fundamentals of power electronic circuits, semiconductor power devices, power conversion equipment. Circuit topologies, closed-loop control strategies, equipment design consideration.

Effective: Fall 2007

Prerequisite: EET 213W, EET 216, EET 315

EET 475 Intermediate Programmable Logic Controllers (3) Application of programmable logic controllers (PLCs) to data acquisition, automation and process control.

Effective: Fall 2007

Prerequisite: EET 220 or EET 275 and EET 315

EET 478 Digital Communication Systems (4) Discrete signal analysis, A/D conversion, digital modulation techniques, encoding, decoding, data communication, noise.

Effective: Fall 2007

Prerequisite: CMPET 403

EET 480 Electrical and Computer Systems Senior Seminar (1) Concepts of career development; project management; engineering design documentation; industrial design examples.

Effective: Spring 2011

Prerequisite: EET 341, EET 330 or CMPET 333, CMPET 355, ENGL 202C . Prerequisite or concurrent: ECON 102 or ECON 104

EET 490W Electrical/Computer Senior Design Project (3) Individual or group design projects in electrical and computer engineering technology.

Effective: Fall 2007

Prerequisite: EET 480 . Prerequisite or concurrent: EET 450

EET 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experience, practica or internships. Written and oral critique of activity required.

Effective: Fall 2007

Prerequisite: prior approval of proposed assignment by instructor

EET 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2007

EET 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2007

Last Import from UCM: June 16, 2011 3:00 AM

Electro-Mechanical Engineering Technology (EMET)

EMET 401 Engineering Technology Career Development (1) Career planning, preparation, and decision making for students enrolled in an Engineering Technology baccalaureate degree program.

Effective: Spring 2008

Prerequisite: seventh semester standing

EMET 402 Fundamentals of Engineering Review (2) Overview of the topics covered on the Fundamentals of Engineering Exam administered by the NCEES for the purpose of earning a Professional Engineering license.

Effective: Spring 2008

Prerequisite: seventh semester standing

EMET 403 Electromechanical Design Project Preparation (1) This course involves the planning and preliminary design activities for the capstone electro-mechanical design project.

Effective: Spring 2008

Prerequisite: seventh semester standing

EMET 405 Fluid Mechanics and Thermodynamics (3) Introduction to the principles of fluid mechanics, thermodynamics, and heat transfer with emphasis on the applications to practical problems.

Effective: Fall 2008 Ending: Fall 2011

Prerequisite: EMET 326 and MATH 211 or MATH 250

EMET 405 Fluid Mechanics and Thermodynamics (4) Introduction to the principles of fluid mechanics, thermodynamics, and heat transfer with emphasis on the applications to practical problems.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: EMET 326 and MATH 211 or MATH 250

EMET 410 Automated Control Systems (4) Introduction to analog feedback control theory and computer simulation and analysis using Matlab; laboratory study of feedback systems.

Effective: Fall 2008

Prerequisite: EMET 330

EMET 430 Programmable Logic Controls II (3) A second course in PLCs covering sequencing/shift instructions, program flow control, data and math instructions, PID loops, and machine communication.

Effective: Fall 2007 Ending: Fall 2011

Prerequisite: EET 220

EMET 430 Programmable Logic Controls II (3) A second course in PLCs covering sequencing/shift instructions, program flow control, data and math instructions, PID loops, and machine communication.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: EET 220 or EET 275

EMET 432 Electromechanical Devices for Biomedical Instrumentation (3) A study of electromechanical devices, transducers, and instrumentation used in the biomedical field.

Effective: Summer 2006

Prerequisite: EMET 330; PHYS 151 or PHYS 212 or PHYS 251 or equivalent

EMET 440 Electro-Mechanical Project Design (3) Planning, development, and implementation of electro-mechanical design project; includes formal report writing, project documentation, group presentations, project demonstrations.

Effective: Fall 2008

Prerequisite: EMET 325; EMET 326; EMET 410

EMET 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2002

Prerequisite: prior approval of proposed assignment by instructor

EMET 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 2001

EMET 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2002

Last Import from UCM: June 16, 2011 3:00 AM

Elementary Education in Multicultural Settings (ELEDM)

ELEDM 400 Schools, Families and Communities (3) Cultural and ethnic dimensions of family-school-community communications and the resultant impact on student-teacher relations.

Effective: Spring 2005

Prerequisite: C I 295, EDPSY 014, EDTHP 115 6 credits of social/behavioral sciences Concurrent: EDTHP 411 ELEDM 395W

ELEDM 401A Teaching Reading in Multicultural Elementary Schools (3) An exploration of current research, practices, strategies and materials in the development of reading skills in multicultural schools.

Effective: Summer 2005

Prerequisite: ELEDM 400 Concurrent: ELEDM 395W ELEDM 401B ELEDM 401C

ELEDM 401B Teaching Language Arts in Multicultural Elementary Schools (3) An exploration of current research, practices, strategies and materials in the development of language arts skills in multicultural schools.

Effective: Summer 2005

Prerequisite: ELEDM 400 Concurrent: ELEDM 395W ELEDM 401A ELEDM 401C

ELEDM 401C Teaching Children's Literature in Multicultural Elementary Schools (3) Survey of children's literature with an emphasis on multicultural literature and its application in multicultural elementary classrooms.

Effective: Summer 2005

Prerequisite: ELEDM 400 Concurrent: ELEDM 395W ELEDM 401A ELEDM 401B

ELEDM 402 Teaching and Assessment in Multicultural Elementary Schools (3) Multicultural education; elementary education; pluralistic pedagogical foundations, assessment, child's play, instrumental activities, State/Federal initiatives, and parent programs.

Effective: Spring 2006

Prerequisite: A ED 303;MUSIC 241, ELEDM 400 Concurrent: ELEDM 395W

ELEDM 403 Using Science and Mathematics Knowledge and Assessment in Urban Settings (6) Knowledge, skills, and assessment pertaining to science and mathematics education in urban schools.

Effective: Spring 2005

Prerequisite: CMPSC 101, MATH 200, ELEDM 400 and 9 credits of natural sciences Concurrent: ELEDM 395W

ELEDM 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Spring 2005

ELEDM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

Energy Bus & Finance (E B F)

E B F 401 Strategic Corporate Finance for the Earth, Energy, and Materials Industries (3) Financial decisions corporations in the earth science area make and the tools and analyses used to make these decisions.

Effective: Fall 2010

Prerequisite: E B F 200, E B F 301 and junior or senior standing

E B F 472 Quantitative Analysis in Earth Sciences (3) Quantitative analysis of decision making in atmospheric/geophysical sciences: exploratory data analysis, quantification of uncertainty, parametric/non- parametric testing, forecasting, time series analysis.

Effective: Fall 2010

Prerequisite: MATH 110 orMATH 140

E B F 473 Risk Management in Energy Industries (3) Analysis of strategies for mitigating business risk from market, atmospheric, geophysical uncertainties including the use of energy/mineral commodity futures/options, weather derivatives, and insurance.

Effective: Fall 2010

Prerequisite: MSIS 200 orSTAT 200 orE B F 472

E B F 484 Energy Economics (3) Economics of energy demand, production, storage, and pricing; advanced energy policy issues including regulation, climate change, new energy technology.

Effective: Spring 2011

Prerequisite: ECON 102 orE B F 200;MATH 110 orMATH 140

Last Import from UCM: June 16, 2011 3:00 AM

Energy and Geo-Environmental Engineering (EGEE)

EGEE 401 Energy in a Changing World (3) Energy is in transition, with increased international energy demand and increasing environmental pressures. Energy transitions, approaches, and outcomes are addressed.

Effective: Spring 2008

Prerequisite: EGEE 101 or EGEE 102 or CHEM 112

EGEE 411 Energy Science and Engineering Lab (3) A comprehensive introduction to classic and modern laboratory skills and experimentation of relevance to energy science and engineering practice.

Effective: Spring 2008

Prerequisite: F SC 401 or EGEE 302 or permission of program

EGEE 412 Green Engineering & Environmental Compliance (3) Material and energy flows as they relate to industrial systems, environmental concerns, pollution prevention, and the development of clean technologies.

Effective: Summer 2007

Prerequisite: EGEE 302

EGEE 420 Hydrogen and Fuel Cells (3) Course will cover the fundamental principles of electrochemical engineering, hydrogen production and storage, and the design and application of the main types of fuel cells.

Effective: Fall 2009

Prerequisite: EME 301

EGEE 430 (M E 430) Introduction to Combustion (3) Concepts related to laminar and turbulent premixed and nonpremixed combustion with applications to propulsion and stationary systems.

Effective: Fall 2009

Prerequisite: M E 201 or M E 300 or EME 301

EGEE 433 Physical Processes in Energy Engineering (3) Introduces fluid flow, heat transfer, phase equilibrium and mass transport phenomena in energy separation processes.

Effective: Summer 2007

Prerequisite: EGEE 304 or concurrent

EGEE 436 Modern Thermodynamics for Energy Systems (3) Thermodynamics of external fields, theory of stability and fluctuations, irreversible and non-linear thermodynamics, and bifurcation theory and their applications in energy and environmental processes are discussed.

Effective: Fall 2009

Prerequisite: EME 301, EGEE 302, MATH 231 and MATH 251

EGEE 437 Design of Solar Energy Conversion Systems (3) A review of fundamental concepts in solar energy conversion including photovoltaic (PV) and solar thermal conversion systems.

Effective: Spring 2010

Prerequisite: EGEE 304 or permission of program

EGEE 438 Sustainable Energy Options (3) Principles and operation of sustainable energy conversion units with emphasis on wind, water, and geothermal energy.

Effective: Fall 2009 Ending: Fall 2011

Prerequisite: EME 301 and EGEE 302

EGEE 438 Wind and Hydropower Energy Conversion (3) Principles of sustainability and renewable energy conversion with emphasis on wind and hydrokinetic energy resources.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: EGEE 302, EME 303

EGEE 441 Electrochemical Energy Conversion (3) Course covers fundamental principles of electrochemistry, including electrochemical thermodynamics, kinetics, catalysis, and corrosion and focuses on applications such as fuel cells, batteries, and photovoltaics. Each application covers: principles of method, criteria determining performance, present state of development, and advantages/disadvantages. Laboratory demonstration of the performance (current-voltage) measurements of an electrochemical converter is scheduled in this course.

Effective: Fall 2009

Prerequisite: EME 301, EGEE 302

EGEE 451 Energy Conversion Processes (3) Emphasizes processes for conversion of fossil fuels, nuclear and biomass to other fuel forms as transportation fuels and electricity.

Effective: Summer 2007

Prerequisite: F SC 431

EGEE 455 Materials for Energy Applications (3) Overview of key principles and technologies for materials relevant to energy applications, including membranes, catalysis, supercapacitors, adsorbents, and semi-conductors.

Effective: Summer 2007

Prerequisite: EGEE 302, MATSE 201

EGEE 456 (E E 456, E SC 456) Introduction to Neural Networks (3) Artificial Neural Networks as a solving tool for difficult problems for which conventional methods are not applicable.

Effective: Spring 2008

Prerequisite: CMPSC 201 or CMPSC 202; MATH 220

EGEE 464W Energy Design Project (3) A team and capstone design project on an industrial energy-related problem.

Effective: Spring 2008

Prerequisite: seventh-semester standing in energy engineering or chemical engineering ENGL 202C

EGEE 470 Air Pollutants from Combustion Sources (3) Generation of pollutants in combustion chambers; reduction by combustion control; pre- and post-combustion treatment of fuels and effluents.

Effective: Fall 2009

Prerequisite: EME 301

EGEE 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1999

EGEE 494A Research Project (2) Supervised research on a selected topic of energy science and engineering and preparation of written and oral presentation of the research results.

Effective: Summer 2007

Prerequisite: Seventh semester standing in energy engineering

EGEE 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

EGEE 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Summer 1999

EGEE 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 1999

EGEE 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 1999

EGEE 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 1999

EGEE 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

EGEE 500 Engineering Physics of Energy and Geo-Environmental Systems (3) Momentum, heat and mass transport phenomena in fluids and solids, including phase equilibria.

Effective: Spring 2005

Prerequisite: consent of instructor

EGEE 510 Engineering Chemistry of Energy and Geo-Environmental Systems (3) Chemical and electrochemical equilibria, surface and interfacial phenomena and chemical kinetics, in natural and engineered systems.

Effective: Spring 2005

Prerequisite: consent of instructor

EGEE 520 Mathematical Modeling of Energy and Geo-Environmental Systems (3) Physical and reactive chemical modeling, model formulation and solution, validation and verification.

Effective: Spring 2005

Prerequisite: EGEE 500, EGEE 510

EGEE 594 Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1999

EGEE 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Summer 1999

EGEE 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1999

EGEE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Summer 1999

EGEE 597A Electrochemical Methods (3) This class will cover a number of electrochemical techniques to be carried out by students in EME laboratory. The lab topics will include: electrolysis, electrical conductivity, potentiometry, pH measurements, electrochemical impedance spectroscopy, and rotating disc electrode.
Effective: Summer 2011 Ending: Summer 2011
Prerequisite: EGEE 441 or equivalent

EGEE 597B Solar Energy Conversion (3) A review of fundamental concepts and systems dynamics simulations in solar energy conversion including photovoltaic and solar thermal systems.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EGEE 597C Nanoengineering Materials: Energy and Environmental Applications (3) The course will cover the synthesis, characterization and applications of nanomaterials to energy generation, storage, conversion, conservation control and environmental engineering. Selected topics in health and environmental applications will be included.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EGEE 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1999

EGEE 599 (IL) Foreign Studies (1-2 per semester, maximum of 24) Full-time graduate-level foreign study at overseas.
Effective: Summer 2005

EGEE 600 Thesis Research (1-15) No description.
Effective: Summer 2005

EGEE 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 2004

EGEE 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 2006

Last Import from UCM: June 16, 2011 3:00 AM

Energy and Mineral Engineering (EME)

EME 432 (GEOG 432) **Energy Policy** (3) Analysis, formulation, implementation, and impacts of energy-related policies, regulations, and initiatives.

Effective: Summer 2010

Prerequisite: E B F 200, EGEE 120, PL SC 490

EME 444 **Global Energy Enterprise** (3) Industry perspective on the resources, technologies, engineering approaches and externalities involved in satisfying worldwide energy demand profitably and sustainably.

Effective: Summer 2010

Prerequisite: ECON 004 or equivalent EGEE 102, EGEE 120

EME 460 **Geo-resource Evaluation and Investment Analysis** (3) The course covers engineering evaluation of geo-resources, present value and rate of return analysis, mineral property and reserve estimation, and cost estimation and engineering economy concepts applied to geo-resources including energy and minerals.

Effective: Spring 2011

Prerequisite: 5th semester or higher

EME 466 **Energy and Sustainability in Society** (3) Capstone course in energy technology and policy options for reduced-carbon communities. Covering agent/stakeholder relations, sustainability, communication and public engagement.

Effective: Summer 2010

Prerequisite: GEOG 030, METEO 469, EME 432

EME 500 **Energy and Mineral Project Investment Evaluation** (3) Emphasizes enterprise level cost review, estimation, and prediction methodology and investment evaluation as a means for project engineering management.

Effective: Spring 2009

EME 510 **Health and Safety Engineering** (3) Develop the ability to use scientific and engineering principles to evaluate and control health and safety hazards in the workplace.

Effective: Spring 2009

EME 525 **Theory and Practice of Policy Analysis for Engineers** (3) The course provides a broad introduction to analytical methods commonly used in science, technology, and energy policy analysis.

Effective: Summer 2008

EME 570 (MATSE 570) **Catalytic Materials** (3) Preparation and characterization of solid catalytic materials and the relationships between their surface, defect, and electronic properties and catalytic activity.

Effective: Summer 2008

Prerequisite: CHEM 452 or similar course in chemical materials or energy sciences and engineering

EME 580 **Integrative Design of EME Systems** (5) Problem-based, integrative, and collaborative learning to solve interdisciplinary problems on energy and mineral systems based on engineering and business principles.

Effective: Spring 2009

Prerequisite: Students must have completed required option courses in EME or be in the second semester

EME 590 (F SC 590, MNG 590, P N G 590) **Colloquium** (1-3) Continuing seminars that consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.

Effective: Spring 2009

EME 600 **Thesis Research** (1-12) Thesis research culminating into the doctoral degree in Energy and Mineral Engineering.

Effective: Summer 2008

EME 601 **Thesis Preparation** (0) Thesis research after successful comprehensive exam culminating into the doctoral degree in Energy and Mineral Engineering.

Effective: Summer 2008

Last Import from UCM: June 16, 2011 3:00 AM

Energy, Environmental, and Mineral Economics (ENNEC)

ENNEC 401 **Case Studies of Industrial Ecology** (1-3) The objective of this course is to introduce life cycle analysis and design for the environment.

Effective: Fall 2001

Prerequisite: junior or senior standing with background in earth and environmental studies

ENNEC 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Spring 2002

Prerequisite: prior approval of proposed assignment by instructor

ENNEC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2002

ENNEC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2001

ENNEC 499 (IL) **Foreign Study--Mineral Industries** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

ENNEC 500 **Mineral and Energy Economics** (3) This course introduces students to rigorous economic analysis of policy and planning issues in mineral resource economics.

Effective: Spring 2002

ENNEC 501 **Economics of Minerals and Environment** (3) Advanced principles of welfare economics, cost-benefit analysis, and non-renewable resource exhaustion with applications to mining and energy use.

Effective: Spring 2002

Prerequisite: ENNEC 500 or ECON 502

ENNEC 520 **The Econometrics of Natural Resources** (3) Applies econometric analysis to contemporary planning and policy issues facing energy and materials industries.

Effective: Spring 2002

Prerequisite: ECON 501, ECON 502

ENNEC 530 **Mineral Commodity Prices** (3) Discussion of advanced models in natural resource economics.

Effective: Spring 2002

Prerequisite: ENNEC 520, ECON 501, ECON 502

ENNEC 531 **Applied General Equilibrium Analysis of Mineral Development** (3) Analysis of the role of natural resource in international trade and economic development by use of applied general equilibrium models (CGE, SAM, I-O).

Effective: Spring 2002

Prerequisite: approval of the department

ENNEC 540 **Economic Analysis of Energy Markets** (3) This course uses economic analysis to explain the history of world energy and its regulation since 1945.

Effective: Spring 2002

Prerequisite: ECON 502

ENNEC 541 **Economics of Energy and the Environment** (3) Economic analysis of topics such as global warming, alternative energy sources and new technologies, and resources and sustainable development.

Effective: Spring 2002

Prerequisite: approval of the department

ENNEC 542 **Geology and Economics of Industrial Minerals** (3) Occurrence, origin, and marketing of the industrial minerals and evaluation of deposits. Chemical and ceramic raw materials emphasized.

Effective: Spring 2003

Prerequisite: introductory courses in geology mineralogy and petrology

ENNEC 550 **Environmental Economics: Theory and Policy** (3) Theories and applied methods used in the economic analysis of resource and environmental issues.

Effective: Spring 2002

Prerequisite: ENNEC 500, ENNEC 501, ECON 502

ENNEC 551 **Environmental Economics: Application/Methods** (3) Introduction to methods for measuring environmental and natural resource values, including hedonic methods, travel cost, random utility models and contingent valuation.

Effective: Spring 2011

ENNEC 560 **Mineral and Energy Finance I** (3) Introduction to theory of finance and application of financial tools to

commodity market analysis. Emphasis on mineral and energy markets.

Effective: Spring 2002

Prerequisite: approval of the department

ENNEC 561 **Theory and Methods in Mineral and Energy Finance** (3) Theory and contemporary methods in mineral and energy finance; particular emphasis on project evaluation, financing, and risk management in metals and energy markets.

Effective: Spring 2002

Prerequisite: ENNEC 560

ENNEC 585 **Seminar in Energy, Environmental, and Mineral Economics** (1-3) Research presented by faculty, visiting scholars, industry leaders, and students.

Effective: Spring 2002

ENNEC 590 (I H S 590) **Colloquium** (1-3) Continuing seminars which consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.

Effective: Spring 2009

ENNEC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2002

ENNEC 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Spring 2002

ENNEC 600 **Thesis Research** (1-15) No description.

Effective: Spring 2002

ENNEC 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Spring 2002

ENNEC 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised and graded teaching experience.

Effective: Spring 2002

ENNEC 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Spring 2002

ENNEC 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Spring 2002

Last Import from UCM: June 16, 2011 3:00 AM

Engineering (ENGR)

ENGR 407 Technology-Based Entrepreneurship (3) Technology innovation coupled with business planning and development.

Effective: Spring 2011

Prerequisite: ECON 102 or ECON 104

ENGR 408 (US) Leadership Principles (2) An introduction to an exploration of theories and principles of leadership, supplemented by presentations given by industry and government leaders.

Effective: Spring 2006

ENGR 409 (US) Leadership in Organizations (3) Development of leadership skills essential for engineers to guide colleagues or an organization in a productive direction.

Effective: Spring 2006

ENGR 411 Entrepreneurship Business Basics (3) Three critical entrepreneurship skills are covered for non-business majors: business finance, intellectual property, and marketing.

Effective: Summer 2002

Prerequisite: three credits in economics or economics-related course

ENGR 420Y (US;IL) Design for Global Society (3) An interdisciplinary study of the engineering design process and the influence of society and culture on design.

Effective: Spring 2008 Ending: Fall 2011

Prerequisite: ENGL 202

ENGR 421 Materials Properties Measurements II (4) Materials powder characterization, compaction and densification techniques, density measurements, micro structural evaluation, thermal and electrical properties of materials.

Effective: Summer 2010

Prerequisite: ENGR 320, MATSE 201, MATSE 400

ENGR 425 (IST 425, MGMT 425) New Venture Creation (3) Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans, and present to investors.

Effective: Spring 2011

Prerequisite: ECON 102 or ECON 104 or ECON 014; CAS 100

ENGR 426 (IST 426, MGMT 426) Invention Commercialization (3) Working with Penn State inventions selected by the Intellectual Property Office, student teams define an optimum commercialization path each technology.

Effective: Spring 2011

Prerequisite: ECON 102 or ECON 104 or ECON 014; CAS 100

ENGR 490W Senior Design I (1) Analysis of environmental impacts on a design, designing products for the global environment and discussion on engineering ethics and professionalism.

Effective: Summer 2010

Prerequisite: ENGR 350, E MCH 407 or E MCH 461

ENGR 491W Senior Design II (3) Capstone of research projects from conception to prototype through industry sponsored collaboration on common technical interests between faculty and student.

Effective: Summer 2010

Prerequisite: ENGR 490W

ENGR 493 Individual Leadership Experience (1) Approved individual project or internship for students to practice the leadership skills developed in the Engineering Leadership Development Minor.

Effective: Fall 2007

Prerequisite: Prerequisite or concurrent: ENGR 408

ENGR 494 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 1994

ENGR 494H Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

ENGR 495 Engineering Co-Op Work Experience III (1-3) A supervised work experience where the student is employed in an engineering position in industry or government. (To be offered only for SA/Un grading.)

Effective: Fall 1987

Prerequisite: ENGR 395

ENGR 495A Engineering Cooperative Education (1-3 per semester) A supervised work experience in research, industry or government relevant to a student's major.

Effective: Summer 2003

Prerequisite: ENGR 395A or ENGR 395I

ENGR 495I (IL) Engineering International Cooperative Education (1-3 per semester) A supervised work experience in research, industry or government relevant to a student's major.

Effective: Spring 2006

Prerequisite: ENGR 395A or ENGR 395I

ENGR 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Spring 1993

ENGR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1988

ENGR 497A HESE Reflection and Research Dissemination (3) This post-travel course focuses on reflection on topics related to HESE ethics and grassroots diplomacy and workshops on research dissemination.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: EDSGN 497A

ENGR 497A Engineering Entrepreneurship Capstone (3) Capstone course in the E-ship minor; teams define new product/service, do market, develop business model, and write business plan.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ENGR 497B International Leadership Practicum - Hungary (0.5) Hosted by Corvinus University in Budapest, students attend presentations on Entrepreneurship/Leadership/Business by invited lecturers, tours of local businesses etc., and collaborative activities by PSU and Corvinus University students.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: B or better completion of

ENGR 497C (SCIED 497C) Exploring the Science and Engineering of Robotics (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 2011 Ending: Summer 2011

ENGR 497C Global Engineering Teams (1) Preparation for a career in international business. Prerequisite for students traveling internationally with the Engineering Leadership Development Program.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: ENGR 408 and ENGR 493

ENGR 497D International Leadership Practicum -- Hungary/Benin (0.5) The Hungary component is hosted by Corvinus University in Budapest; students attend presentations on Entrepreneurship/Leadership/Business by invited lecturers, tours of local businesses and collaborative activities by PSU and Corvinus University students. The Benin component is hosted by the Faculty of Agronomy Cotonou and the Association Baobab, Pingou; students perform beta testing of a mechanical baobab processor design.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: B or better completion of: ENGR 408 and ENGR 493 ; Global Engineering Teams Seminar

ENGR 497F (SCIED 497F) Fundamentals of Science, Technology, and Engineering (3) A course focusing on physics content, engineering design principles, and elementary science education pedagogy.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENGR 497I Engineering Teaching Intern (0.5) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENGR 497K Social Entrepreneurship (3) Explore intricacies of social innovation. Work in teams to develop feasibility plans for social ventures in the US, Asia and Africa.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENGR 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2007

ENGR 594 Master's Paper Research (1-3) Investigation of a specific engineering problem and development of a scholarly written report in partial fulfillment of requirements for a master's degree in engineering.

Effective: Fall 1985

ENGR 595 Engineering Internship (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Spring 2011

ENGR 595A Engineering Internship (1 per semester/maximum of 4) A supervised work experience in a professionally relevant position in research, industry, or government.

Effective: Spring 2005

ENGR 595I **International Engineering Internship** (1 per semester/maximum of 4) A supervised work experience in a professionally relevant position in research, industry, or government.
Effective: Spring 2005

ENGR 596 **Independent Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2011

ENGR 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1993

ENGR 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2011

ENGR 599 **Foreign Studies** (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

ENGR 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

ENGR 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Opportunity for supervised and graded experience for graduate students in the College of Engineering.
Effective: Fall 1983

ENGR 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

ENGR 888 **Seminar for Engineering Teaching Assistants** (1) Study of recently established knowledge and methodologies as applied to practice. Significant interaction among students and with instructor is expected.
Effective: Fall 2009

ENGR 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2008

Last Import from UCM: June 16, 2011 3:00 AM

Engineering Design (EDSGN)

EDSGN 452 Projects in Community Service Engineering (1-2) Students engage in research and design of appropriate solutions to real-life community-based problems and project management of such projects.

Effective: Summer 2008

Prerequisite: EDSGN 352 ; 5th semester standing

EDSGN 479 (I E 479) Human Centered Product Design and Innovation (3) Consumer product design for a global market, incorporating human factors principles and user desires in a multicultural perspective.

Effective: Summer 2010

Prerequisite: I E 408 or I E 419 or equivalent

EDSGN 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2004

EDSGN 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

EDSGN 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Summer 2004

EDSGN 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 2004

EDSGN 496A Solidworks Fundamentals (3) Fundamentals of solidworks.

Effective: Summer 2011 Ending: Summer 2011

EDSGN 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 2004

EDSGN 497A HESE Field Experience (0.5) The HESE Field Experience is a hands-on integrated learning, research and entrepreneurial engagement experience for students that have been working on various HESE ventures in the Spring semester.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: EDSGN 497C, EDSGN 452 or BIOE 401 or ENGL 202C

EDSGN 497B Fundamentals of Solidworks (3) Students will use the latest version of AutoCAD as a design tool for 2D and 3D applications in a variety of disciplines.

Effective: Summer 2011 Ending: Summer 2011

EDSGN 497B Fundamentals of Solidworks (3) Students will use the latest version of AutoCAD as a design tool for 2D and 3D applications in a variety of disciplines.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDSGN 497C Open Source Rapid Prototyping (3) Students build and test open-source rapid prototypers, make models for real customers, and study design modeling theory.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: junior standing or permission of program

EDSGN 497D Multidisciplinary Capstone Design Project (3) The course focuses on multidisciplinary industry-sponsored and community service-based design projects offered in conjunction with the College of Engineering's Learning Factory.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: senior level standing in BIO CMPEN EE IE or ME; BIOE 440 or E E 350 or E E 316 or I E 302 or I E 305 or I E 323 or I E 327 or I E 330 or I E 405

EDSGN 497E Sensor and Controller System Integration (3) Hands-on course covers the interfacing of various sensors and actuators to computers to build proof-of-concept prototypes of innovative products.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDSGN 497F Sensor and Controller System Practicum (3) Hands-on course covers the interfacing of various sensors and actuators to computers build proof-of-concept prototypes of innovative products.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDSGN 497G Current CAD Applications (3) Students will use the latest version of AutoCAD as a design tool for 2D and 3D applications in a variety of disciplines.
Effective: Summer 2011 Ending: Summer 2011

EDSGN 497G Current CAD Applications (3) Students will use the latest version of AutoCAD as a design tool for 2D and 3D applications in a variety of disciplines.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDSGN 497I Global Innovations (3) Matching the best ideas to the biggest problems through collaborative dialog and design.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDSGN 497K Engineering Design and Analysis with CATIA (3) The first part of the course covers the fundamentals of CATIA V5 in solid modeling, part design and assembly design prototyping, and design documentation. The second part of this course covers the basic FEA (finite element analysis) capabilities in CATIA V5. Students will learn how to quickly generate a finite element model for surface and/or solid parts and how to perform analysis using the finite elements method with CATIA V5.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

EDSGN 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2008

EDSGN 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

EDSGN 547 (M E 547) Designing for Human Variability (3) Statistics, optimization, and robust design methodologies to design products and environments that are robust to variability in users.
Effective: Summer 2009

EDSGN 549 (I E 549) Design Decision Making (3) Complexity of design-making; state-of-the-art methods and tools.
Effective: Summer 2011

EDSGN 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2004

EDSGN 594 Research Topics (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2004

EDSGN 595 Internship (1-9) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 2004

EDSGN 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2004

EDSGN 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2004

EDSGN 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2004

EDSGN 599 (IL) Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

Engineering Graphics Technology (EG T)

No courses for department code **EG T** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Engineering Mechanics (E MCH)

E MCH 400 Advanced Strength of Materials and Design (3) Combined stresses; energy methods; special problems in bending and torsion; plates; thin-walled structures; buckling and stability; design projects.

Effective: Spring 2008

Prerequisite: E MCH 213, E MCH 210H or E MCH 210

E MCH 402 Applied and Experimental Stress Analysis (3) Experimental design of structural and machine components; photoelasticity, electrical resistance strain gauge techniques, Moire techniques, interferometry, holography.

Effective: Spring 2008

Prerequisite: E MCH 213, E MCH 210H or E MCH 210

E MCH 403 Strength Design in Materials and Structures (4) Determination, interpretation, significance, and application of mechanical properties such as plastic flow, fatigue strength, creep resistance, and dynamic properties.

Effective: Spring 2008

Prerequisite: E MCH 315, E MCH 316

E MCH 407 Computer Methods in Engineering Design (3) Computer methods in mechanical design: solid modeling, graphics, surface smoothing/interpolation and underlying numerics: simultaneous equations, quadrature, eigen problems, discrete models.

Effective: Spring 2008

Prerequisite: CMPSC 201, CMPSC 202 or E SC 261M; E MCH 213, E MCH 210H or E MCH 210

E MCH 409 Advanced Mechanics (3) Continuation of E MCH 012; Euler's equations for the rotation of a rigid body, gyroscopic motion, impulsive motion, Lagrangian mechanics.

Effective: Spring 2008

Prerequisite: E MCH 212 or E MCH 212H; MATH 230

E MCH 412 Experimental Methods in Vibrations (3) Systems of one or more degrees of freedom, mechanical vibrations, vibration properties of materials, vibration techniques in nondestructive testing.

Effective: Fall 2007

Prerequisite: E MCH 470

E MCH 416H Failure and Failure Analysis of Solids (3) Examination and analysis of the various modes of failure of solid materials.

Effective: Spring 2008

Prerequisite: E MCH 213, E MCH 210 or E MCH 210H

E MCH 440 (MATSE 440) Nondestructive Evaluation of Flaws (3) Methods and limitations of nondestructive evaluation of mechanical flaws; optical, acoustical, electromagnetic, x-ray, radiography, thermography, and dye techniques.

Effective: Spring 2008

Prerequisite: E MCH 213, E MCH 210H or E MCH 210

E MCH 446 Mechanics of Viscoelastic Materials (3) Nature of viscoelastic materials, constitutive relations, thermorheological materials, viscoelastic stress analysis, rubber elasticity, viscoelastic liquids, experimental techniques for material characterization.

Effective: Spring 2008

Prerequisite: E MCH 315, E MCH 316

E MCH 461 (M E 461) Finite Elements in Engineering (3) Computer modeling and fundamental analysis of solid, fluid, and heat flow problems using existing computer codes.

Effective: Spring 2011

Prerequisite: E MCH 213, E MCH 210H or E MCH 210; CMPSC 200, CMPSC 201 or CMPSC 202

E MCH 470 (M E 470) Analysis and Design in Vibration Engineering (3) Application of Lagrange's equations to mechanical system modeling, multiple-degree-of-freedom systems, experimental and computer methods; some emphasis on design applications.

Effective: Spring 2008

Prerequisite: E MCH 212 or E MCH 212H; M E 370 or E SC 407H

E MCH 471 Engineering Composite Materials (3) Properties, manufacture, forms of composites; micromechanics; orthotropic lamina properties; laminate analysis; theories; failure analysis; thermal, environmental effects.

Effective: Spring 2008

Prerequisite: E MCH 213, E MCH 210H or E MCH 210; E MCH 315, E SC 414M or MATSE 201

E MCH 473 (AERSP 473) Composites Processing (3) An introduction to the principles of mechanics governing manufacturing, computer-aided design, and testing of composite materials and structures.

Effective: Summer 1988

Prerequisite: E MCH 471

E MCH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

E MCH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

E MCH 497A Sensor Technology for Condition Monitoring (3) Course will offer a survey of sensor devices including piezoelectric, MEMS(LOC), biomimetic, capacitive, thermal, fiber optic, electric, laser, infrared ultrasonic.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: Statics and Dynamics

E MCH 500 (M E 560) Solid Mechanics (3) Introduction to continuum mechanics, variational methods, and finite element formulations; application to bars, beams, cylinders, disks, and plates.

Effective: Fall 2007

E MCH 506 Experimental Stress Analysis (3) Experimental methods of stress determination, including photoelasticity, stress coat, and electric strain gauge techniques; stress analogies; strain rosettes for combined stress determinations.

Effective: Summer 2011

Prerequisite: E MCH 507

E MCH 507 Theory of Elasticity and Applications (3) Equations of equilibrium and compatibility; stresses and strains in beams, curved members, rotating discs, thick cylinders, torsion and structural members.

Effective: Spring 2008

Prerequisite: E MCH 213

E MCH 509 Theory of Plates and Shells (3) Bending and buckling of plates; elastic foundations; deformation of shells, multilayer shells, stress and stability analysis, weight optimization, application problems.

Effective: Spring 2008

Prerequisite: E MCH 213

E MCH 514 (E SC 514) Engineering Science and Mechanics Seminar (1 per semester) Current literature and special problems in engineering mechanics.

Effective: Spring 1999

E MCH 516 Mathematical Theory of Elasticity (3) Fundamental equations and problems of elasticity theory; uniqueness theorems and variational principles; methods of stress functions and displacement potential; applications.

Effective: Winter 1978

Prerequisite: E MCH 540

E MCH 520 Advanced Dynamics (3) Dynamics of a particle and of rigid bodies; Newtonian equations in moving coordinate systems; Lagrange's and Hamilton's equations of motion; special problems in vibrations and dynamics.

Effective: Spring 2008

Prerequisite: E MCH 212, MATH 250

E MCH 521 (ACS 521) Stress Waves in Solids (3) Recent advances in Ultrasonic Nondestructive Evaluation: waves; reflection and refraction; horizontal shear; multi-layer structures; stress; viscoelastic media; testing principles.

Effective: Spring 1998

Prerequisite: E MCH 524A, E MCH 524B

E MCH 523 Ultrasonic Nondestructive Evaluation (3) Methods, techniques, applications of Ultrasonic Nondestructive Evaluation wave propagation; signal processing and pattern recognition applied to UNDE; practical laboratory demonstrations.

Effective: Spring 1998

E MCH 524A Mathematical Methods in Engineering (3) Special functions, boundary value problems, eigenfunctions and eigenvalue problems; applications to engineering systems in mechanics, vibrations, and other fields.

Effective: Spring 1999

Prerequisite: MATH 250 or MATH 251

E MCH 524B Mathematical Methods in Engineering (3) Boundary-value problems in curvilinear coordinates, integral transforms; application to diffusion, vibration, Laplace and Helmholtz equations in engineering systems.

Effective: Spring 1999

Prerequisite: E MCH 524A, E SC 404 or MATH 411

E MCH 524C Mathematical Methods in Engineering (3) Green's functions applied to problems in potentials, vibration, wave propagation and diffusion with special emphasis on asymptotic methods.

Effective: Spring 1999

Prerequisite: E MCH 524B, E SC 406H or MATH 412

E MCH 525 Structural Vibration and Radiation (3) Vibration response, propagation, transmission, and reflection in elastic structures, internal and external damping; fluid loading; impedance discontinuities; acoustic radiation.

Effective: Fall 2007

Prerequisite: ACS 510 or E MCH 571 Concurrent: E MCH 524B

E MCH 527 Structural Dynamics (3) Dynamic behavior of structural systems; normal modes; input spectra; finite element representation of frameworks, plates, and shells; impedance; elastic-plastic response.

Effective: Fall 2007

Prerequisite: E MCH 470 or E MCH 571

E MCH 528 Experimental Methods in Vibrations (3) Investigation of one or more degrees of freedom, free and forced mechanical vibrations, vibration properties of materials, nondestructive testing.

Effective: Fall 2007

Prerequisite: E MCH 470 orE MCH 571

E MCH 530 **Mechanical Behavior of Materials** (3) Engineering materials mechanical responses; stress/strain in service context of temperature, time, chemical environment; mechanical testing characterization; design applications.

Effective: Spring 1989

E MCH 531 **Theory of Plasticity and Applications** (3) Yield condition; plastic stress-strain relations; theory of slip-line fields; applications to bending, torsion, axially symmetric bodies, metal processing.

Effective: Winter 1978

Prerequisite: E MCH 507

E MCH 532 **Fracture Mechanics** (3) Stress analysis of cracks; stable and unstable crack growth in structures and materials; materials fracture resistance.

Effective: Fall 1983

Prerequisite: E MCH 500

E MCH 533 **Scanned Image Microscopy** (3) Imaging principles, quantitative data acquisition techniques, and applications for scanned image microscopy are discussed.

Effective: Summer 2003

Prerequisite: E MCH 440

E MCH 534 (MATSE 563) **Micromechanisms of Fracture** (3) Mechanisms of fracture and their relationship to loading conditions, environment, flow behavior, processing history, and microstructure.

Effective: Spring 2003

Prerequisite: E SC 414M, MATSE 424

E MCH 535 (MATSE 564) **Deformation Mechanisms in Materials** (3) Deformation of crystalline/amorphous solids and relationship to structure; elastic, viscoelastic and plastic response over a range of temperatures and strain rates.

Effective: Fall 2004

Prerequisite: E SC 414M orMATSE 436

E MCH 540 **Introduction to Continuum Mechanics** (3) Algebra and analysis of tensors; balance equations of classical physics; the linear theories of continuum mechanics.

Effective: Winter 1978

E MCH 546 **Theory of Viscoelasticity and Applications** (3) Linear and nonlinear viscoelastic theories; generalized isotropic and anisotropic viscoelastic stress-strain relations.

Effective: Winter 1978

Prerequisite: E MCH 507

E MCH 550 **Variational and Energy Methods in Engineering** (3) Application of variational calculus and Hamilton's principle to various conservative and nonconservative systems; closed form and approximate technique.

Effective: Spring 1984

Prerequisite: MATH 251

E MCH 560 **Finite Element Analysis** (3) General theory; application to statics and dynamics of solids, structures, fluids, and heat flow; use of existing computer codes.

Effective: Spring 2008

Prerequisite: E MCH 213

E MCH 562 (A B E 562) **Boundary Element Analysis** (3) Numerical solution of boundary value problems using fundamental solutions; application to problems in potential theory, diffusion, and elastostatics.

Effective: Spring 1996

Prerequisite: A B E 513 orE MCH 461 orE MCH 560

E MCH 563 (M E 563) **Nonlinear Finite Elements** (3) Advanced theory of semidiscrete formulations for continua and structures; emphasizes dynamic and nonlinear problems.

Effective: Spring 1996

Prerequisite: A B E 513, E MCH 461 orE MCH 560

E MCH 570 **Random Vibrations in Structural Mechanics** (3) Probability theory applied to random vibrations of linear and nonlinear systems; excitation by ground motion, turbulence, and noise; acoustic damping.

Effective: Summer 2011

Prerequisite: E MCH 470 orE MCH 571

E MCH 571 (AERSP 571, M E 571) **Foundations of Structural Dynamics and Vibration** (3) Modeling approaches and analysis methods of structural dynamics and vibration.

Effective: Fall 2007

Prerequisite: AERSP 304, E MCH 470, M E 450 orM E 470

E MCH 581 **Micromechanics of Composites** (3) A rigorous application of mechanics to the understanding of relationships between microstructure and thermomechanical properties of composites.

Effective: Summer 2011

Prerequisite: CERSC 414 orCERSC 502 orE MCH 471 orE MCH 507

E MCH 582 **Metal Matrix Composites** (3) Processing and properties of metal matrix composites, with emphasis on fabrication techniques, interfaces, fatigue, fracture, and micromechanics.

Effective: Fall 1988

Prerequisite: E MCH 471

E MCH 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1996

E MCH 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

E MCH 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

E MCH 597A **Thermo-mechanics of Shape Memory Alloys** (3) Shape memory behavior is introduced based on multi-scale structure-property relationships and the application of thermodynamics and micromechanics based constitutive relationships.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

E MCH 597B **Geometric Mechanics with Applications** (3) This course will present those elements of modern differential geometry that are used in current research in continuum mechanics and dynamical systems.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

E MCH 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

E MCH 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

E MCH 602 (E SC 602) **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description.
Effective: Fall 2003

E MCH 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

E MCH 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Engineering Science (E SC)

E SC 400H Electromagnetic Fields (3) Irrotational and solenoidal fields, potentials, vector and scalar field and wave equations, harmonic and wave functions in various coordinates, radiation.

Effective: Fall 2003

Prerequisite: E E 210, MATH 250

E SC 404H Analysis in Engineering Science (3) Unified application of coordinate transformations; Laplace's, heat, and wave equations to boundary value problems and problems of continua in engineering.

Effective: Spring 2001

Prerequisite: MATH 250 or MATH 251

E SC 406H Analysis in Engineering Science II, Honors (3) Application of complex variable theory, integral equations, and the calculus of variations to engineering problems.

Effective: Fall 1983

Prerequisite: E SC 404H

E SC 407H Computer Methods in Engineering Science, Honors (3) Numerical solution of differential equations including fundamentals: roots of single nonlinear and simultaneous (Matrix) equations, least squares fitting and statistical goodness, interpolation, finite differences, differentiation, integration, eigensolutions.

Effective: Spring 2007

Prerequisite: CMPSC 201C or CMPSC 201F or E SC 261M Concurrent: MATH 220

E SC 410H Senior Design Project, Honors (3) Design and synthesis in the context of a specific design project undertaken during the senior year.

Effective: Summer 1998

Prerequisite: E SC 407H

E SC 411H Senior Research and Design Project II, Honors (3) Design and synthesis in the context of a specific design project undertaken during the senior year.

Effective: Spring 2007

Prerequisite: E SC 410H

E SC 414M Elements of Material Engineering (3) Structure and imperfections in engineered materials; their influence on properties, behavior, and processing. Applications of metals, ceramics, polymers, and composites.

Effective: Spring 2008

Prerequisite: E MCH 213, E MCH 210H or E MCH 210. Prerequisite or concurrent: E SC 312 or PHYS 237

E SC 417 (MATSE 417) Electrical and Magnetic Properties (3) Electrical conductivity, dielectric properties, piezoelectric and ferroelectric phenomena; magnetic properties of ceramics.

Effective: Summer 2006

Prerequisite: MATSE 400, MATSE 402, PHYS 214

E SC 419 Electronic Properties and Applications of Materials (3) The course covers the electrical, optoelectronic, dielectric, and other electron-based properties of solids, semiconductors in particular, and their engineering/ device applications.

Effective: Summer 2006

Prerequisite: E SC 312

E SC 433H Engineering Science Research Laboratory Experience (1) Hands-on lab experience and exposure to campus-wide interdisciplinary experimental research. Experimental probability and statistics. Applications across all Engineering Science disciplines.

Effective: Spring 2007

Prerequisite: MATH 251

E SC 445 Semiconductor Optoelectronic Devices (3) The course will present the basic engineering science and technology involved in modern semiconductor optoelectronic devices.

Effective: Spring 2007

Prerequisite: E SC 419 or E SC 314 or E E 368

E SC 450 (MATSE 450) Synthesis and Processing of Electronic and Photonic Materials (3) The materials science of applying thin film coatings, etching, and bulk crystal growth; includes materials transport, accumulation, epitaxy, and defects.

Effective: Fall 2005

Prerequisite: MATSE 201 or E SC 414H sixth semester standing

E SC 455 (MATSE 428) Electrochemical Methods in Corrosion Science and Engineering (3) The objective of the course is to give students hands-on experience in assessing environmental degradation of engineering materials.

Effective: Spring 2003

Prerequisite: E SC 414M or MATSE 259; MATSE 420 or MATSE 421

E SC 456 (E E 456, EGEE 456) Introduction to Neural Networks (3) Artificial Neural Networks as a solving tool for difficult problems for which conventional methods are not available.

Effective: Spring 2008

Prerequisite: CMPSC 201 or CMPSC 202; MATH 220

E SC 475 (MATSE 475) Particulate Materials Processing (3) Fundamentals of processing particulate materials including

production, characterization, handling, compaction, and sintering of metal, carbide, intermetallic, and composite powders.

Effective: Spring 2008

Prerequisite: E MCH 315, E SC 414 or MATSE 259

E SC 481 Elements of Nano/Micro-electromechanical Systems Processing and Design (3) Interdisciplinary fundamentals of nano/microelectromechanical systems (NEMS/ MEMS), including design, fabrication and machining of miniature systems. Draws from mechanics, science and materials.

Effective: Spring 2008

Prerequisite: E MCH 213 or E MCH 315 or E SC 312

E SC 482 Micro-Optoelectromechanical Systems (MOEMS) and Nanophotonics (3) Principles and applications of Micro-Optoelectromechanical and Nanophotonic devices and systems.

Effective: Summer 2006

Prerequisite: PHYS 212, PHYS 214

E SC 483 (MATSE 483) Simulation and Design of Nanostructures (3) Introduction to computer simulation techniques and their applications at the physical/life sciences interface.

Effective: Fall 2007

Prerequisite: PHYS 214 or E SC 312, MATH 230

E SC 484 Biologically Inspired Nanomaterials (3) Advances in biomolecular-based Science and technology at the physical/life sciences interface.

Effective: Summer 2006

Prerequisite: PHYS 214, MATH 230

E SC 494 Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.

Effective: Summer 1986

E SC 494H Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.

Effective: Fall 2007

E SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

E SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

E SC 501 Solid State Energy Conversion (3) Principles of solid state energy conversion and their utilization in engineering devices. Emphasis on current research and development efforts.

Effective: Spring 2008

Prerequisite: E E 442 or PHYS 412

E SC 502 Semiconductor Heterojunctions and Applications (3) Theory, fabrication techniques, and electronic applications of semiconductor heterojunctions, including metal-semiconductor and electrolyte-semiconductor junctions.

Effective: Fall 1989

Prerequisite: E SC 314 or E SC 414M

E SC 511 Engineering Materials for Energy Conversion and Storage (3) This course treats engineering materials and systems employed in conventional and unconventional direct energy conversion and energy storage.

Effective: Summer 1981

E SC 514 (E MCH 514) Engineering Science and Mechanics Seminar (1 per semester) Current literature and special problems in engineering mechanics.

Effective: Summer 1998

E SC 536 Wave Propagation and Scattering (4) Survey of analytical and numerical methods for solving acoustic, electromagnetic and elastic wave propagation and scattering problems.

Effective: Spring 1988

Prerequisite: E MCH 524A or E MCH 524B

E SC 537 Multiple Scattering Theories and Dynamic Properties of Composite Materials (3) Acoustic, dielectric, elastic dynamic properties; periodic, random composites; wave propagation and scattering; attenuation, dispersion; super-viscous absorption; sonar, optical, ultrasonic applications.

Effective: Summer 1988

E SC 540 Laser Optics Fundamentals (3) Selected topics in optics and laser physics, and their application in laser-materials processing.

Effective: Spring 2005

E SC 541 Laser-Materials Interactions (3) Laser beam interactions with metallic, ceramic, polymeric and biological

materials; effects of wavelength, power, spatial and temporal distributions of intensity.
Effective: Spring 2005

E SC 542 **Laser-Integrated Manufacturing** (3) Integration of lasers into manufacturing processes: laser-assisted surface modifications; laser joining; laser-based material shaping processes.
Effective: Spring 2005
Prerequisite: E SC 540, E SC 541

E SC 543 **Laser Microprocessing** (3) Laser microprocessing of engineered and biological materials for electronic, opto-electronic, MEMS and medical/therapeutic applications.
Effective: Spring 2005
Prerequisite: E SC 540, E SC 541

E SC 544 **Laser Laboratory** (3) Laser systems for materials processing, safety, critical processing parameters, diagnostic measurements, automation, sensing and control.
Effective: Spring 2005
Prerequisite: E SC 540, E SC 541

E SC 577 **Engineered Thin Films** (3) Broad overview of the preparation-characterization-property relations for thin films used in a wide range of industrial applications.
Effective: Spring 1993
Prerequisite: MATH 251, PHYS 237

E SC 578 (M E 578) **Theory and Applications of Wavelets** (3) Theory and physical interpretation of continuous and discrete wavelet transforms for applications in different engineering disciplines.
Effective: Summer 1999
Prerequisite: M E 550

E SC 581 **Microelectromechanical Systems/Smart Structures** (3) Methods of micromachining, smart structure fabrication. Design, modeling for physical, chemical, biomedical microsensors/actuators. Smart structures and microsystems packaging/integration.
Effective: Spring 1998
Prerequisite: E SC 414

E SC 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1996

E SC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

E SC 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

E SC 597A **Electron Paramagnetic Resonance in Solid** (3) This course will provide an introduction to electron paramagnetic resonance (EPR) in solids, both theory and experiment.
Effective: Summer 2011 Ending: Summer 2011
Prerequisite: E SC 312 or E SC 314, E SC 414, CHEM 565 and E E 442

E SC 597A **Nanomaterials and Biointerfaces** (3) Introduce materials science aspects of biointerfaces, such as structure, dynamics, thermodynamics, reactions which were developed in the last decade.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

E SC 597B **Microwave Materials Interactions: Theory and Practice** (3) This course will focus on theory and how it is applied to process a variety of materials for diverse applications.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

E SC 597C **Brain Computer Interfaces** (3) Students will record EEG (electroencephalograms) and program real-time analysis to control computers, video games, and robots.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

E SC 597D **Neural Engineering: Fundamentals of Interfacing with Brain** (3) This will give an overview of the field of neural engineering with a focus on the fundamentals of neural interfaces and their applications.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

E SC 597E **Neural Control Engineering** (3) This course will explore the cutting edge of state estimation of neuronal systems, and the construction of control algorithm.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

E SC 597F **Data Analysis in Neuroscience** (3) This course will introduce modern mathematical and computational

techniques used to analyze electrophysiological and optical neural data.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

E SC 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

E SC 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

E SC 602 (E MCH 602) **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description.
Effective: Fall 2003

E SC 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

E SC 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Engineering Technology (ET)

ET 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written or oral critique of activity required.

Effective: Fall 2007

Prerequisite: prior approval of proposed assignment by instructor

ET 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 2007

ET 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2007

Last Import from UCM: June 16, 2011 3:00 AM

English (ENGL)

ENGL 400 Authors, Texts, Contexts (3 per semester, maximum of 6) Styles, cultural milieus, critical perspectives toward particular English- language authors and/or movements they represent, and the idea of authorship. (Section subtitles may appear in the Schedule of Courses.)

Effective: Fall 1997

Prerequisite: ENGL 015 orENGL 030

ENGL 401 Studies in Genre (3 per semester, maximum of 6) English-language texts exemplifying particular genres, with attention to critical theories, historical development, rhetorical strategies, and social, cultural, and aesthetic values. (Section subtitles may appear in the Schedule of Courses.)

Effective: Fall 1997

Prerequisite: ENGL 015 orENGL 030

ENGL 401W Creative Writing Theory (3) Theories of art and creativity which inform the making of literary works.

Effective: Fall 2007

Prerequisite: ENGL 200;ELISH 201, ELISH 209, ENGL 212 orENGL 213

ENGL 402 Literature and Society (3 per semester, maximum of 6) Texts confronting social, political, technological, or other issues in the English-speaking world. (Section subtitles may appear in the Schedule of Courses.)

Effective: Fall 1997

Prerequisite: ENGL 015 orENGL 030

ENGL 403 Literature and Culture (3 per semester, maximum of 6) Historical, theoretical, and practical issues within cultural studies in relation to English-speaking texts. (Section subtitles may appear in the Schedule of Courses.)

Effective: Fall 1997

Prerequisite: ENGL 015 orENGL 030

ENGL 404 Mapping Identity, Difference, and Place (3 per semester, maximum of 6) Ethnicity, gender, class, race with reference to theoretical inquiry into identity, difference, and place in English-language literatures. (Section subtitles may appear in the Schedule of Courses.)

Effective: Fall 1997

Prerequisite: ENGL 015 orENGL 030

ENGL 405 Taking Shakespeare From Page to Stage (3) Students experience a Shakespeare play as a text to be explicated and as a script to be performed.

Effective: Summer 2003

Prerequisite: permission of program

ENGL 407 History of the English Language (3) Historical and structural study of developments in English sounds, forms, inflections, syntax, derivations, and meanings.

Effective: Spring 1987

Prerequisite: ENGL 100;ENGL 202A, ENGL 202B, ENGL 202C orENGL 202D

ENGL 409 Composition Theory and Practice for Teachers (3) An overview of the theory and practice of writing for teachers, with emphasis on the writing process.

Effective: Summer 2000

Prerequisite: permission of the program Concurrent: EDUC 452

ENGL 412 Advanced Fiction Writing (3 per semester/maximum of 6) Advanced study of the techniques of fiction writing; regular practice in writing the short story; group discussion of student work.

Effective: Spring 1992

Prerequisite: ENGL 212 and permission of the department

ENGL 413 Advanced Poetry Writing (3 per semester/maximum of 6) Advanced study of the techniques of poetic composition; regular practice in writing poetry; group discussion of student work.

Effective: Spring 1992

Prerequisite: ENGL 213 and permission of the department

ENGL 414 Biographical Writing (3) Writing of biography and autobiography, character sketches, "profiles," and literary portraits; analysis and interpretations of source materials.

Effective: Spring 1987

Prerequisite: ENGL 200, ENGL 202B, ENGL 210, ENGL 212 orENGL 215

ENGL 415 Advanced Nonfiction Writing (3 per semester/maximum of 6) Advanced study of the principles of nonfiction; substantial practice in writing and submitting magazine articles for publication.

Effective: Spring 1992

Prerequisite: ENGL 215 and permission of the department

ENGL 416 Science Writing (3 per semester/maximum of 6) Prepares scientists and writers to gather, interpret, and present scientific information to the layman with clarity and accuracy.

Effective: Spring 2001

Prerequisite: COMM 260W, ENGL 202C, ENGL 210, ENGL 215 orENGL 421

ENGL 417 The Editorial Process (3) The process of editing from typescript through final proof.

Effective: Summer 2011

Prerequisite: ENGL 202A, ENGL 202B, ENGL 202C, ENGL 202D, ENGL 210, ENGL 215

ENGL 418 Advanced Technical Writing and Editing (3 per semester/maximum of 6) Preparing and editing professional papers for subject specialists and for others interested in careers as writers or editors.

Effective: Fall 1987

Prerequisite: ENGL 202A, ENGL 202B, ENGL 202C, ENGL 202D or ENGL 215

ENGL 419 Advanced Business Writing (3) Preparing and editing reports and presentations common to business, industry, and government.

Effective: Fall 1987

Prerequisite: ENGL 202A, ENGL 202B, ENGL 202C or ENGL 202D

ENGL 420 Writing for the Web (3) Analysis and composition of informative, persuasive, and "creative" Web texts, based on rhetorical principles; no prior Web writing experience required.

Effective: Spring 2002

Prerequisite: ENGL 015 or ENGL 030

ENGL 421 Advanced Expository Writing (3) Develops skill in writing expository essays, with particular attention to style. Intended for liberal arts majors.

Effective: Spring 1987

Prerequisite: ENGL 202A, ENGL 202B, ENGL 202C or ENGL 202D

ENGL 422 Fiction Workshop (3 per semester/maximum of 6) Practice and criticism in the composition of the short story and the novel.

Effective: Spring 1985

Prerequisite: ENGL 412

ENGL 423 Poetry Writing Workshop (3 per semester/maximum of 6) Extensive practice in writing poetry; consideration of contemporary poetic forms; selected readings.

Effective: Spring 1985

Prerequisite: ENGL 413

ENGL 424 (ENVST 424) Creative Writing and the Natural World (3) Creative writing workshop focused on the environment and related issues.

Effective: Summer 2011

Prerequisite: ENGL 050 or ENVST 100

ENGL 425 Nonfiction Workshop (3 per semester/maximum of 6) Extensive writing of nonfiction for publication; an introduction to the principles of writing the nonfiction book.

Effective: Spring 1985

Prerequisite: ENGL 415

ENGL 426 (US) (LTNST 426) Chicana and Chicano Cultural Production: Literature, Film, Music (3) An in-depth study of Chicana/Chicano literature, film, and music from the inception of the Chicano Movement (1965-1975) to the present.

Effective: Spring 2007

Prerequisite: 3 credits in English

ENGL 427 (J ST 427) Topics in Jewish American Literature (3) An in-depth examination of important themes, writers, and/or historical developments in Jewish Literature of the United States.

Effective: Spring 2009

Prerequisite: ENGL 015 or ENGL 030; J ST 132 or CMLIT 110

ENGL 428 (US) (AAS 428) Asian American Literatures (3 per semester/maximum of 6) A seminar on the literatures and cultures of Asian America, with attention to forms of geographic, historical, and ethnic diversity.

Effective: Summer 2010

ENGL 429 (CMLIT 429) New Media and Literature (3) New media literary genres; critical discussion of creative works in digital media.

Effective: Summer 2010

ENGL 430 The American Renaissance (3) Studies in the works and the interrelationships of writers such as Emerson, Hawthorne, Poe, Thoreau, Whitman, Melville, and Dickinson.

Effective: Spring 1995

Prerequisite: ENGL 015 or ENGL 030

ENGL 431 (US) (AM ST 475) Black American Writers (3 per semester, maximum of 6) A particular genre or historical period in the development of Black American literature.

Effective: Fall 2007

Prerequisite: ENGL 015 or ENGL 030

ENGL 432 The American Novel to 1900 (3) Such writers as Hawthorne, Melville, Stowe, Mark Twain, James, Crane, Chopin, and others.

Effective: Spring 1992

Prerequisite: ENGL 015 or ENGL 030

ENGL 433 The American Novel: 1900-1945 (3) Such writers as Wharton, Dreiser, Cather, Fitzgerald, Faulkner, Hemingway, Hurston, Wright, and others.

Effective: Spring 1992

Prerequisite: ENGL 015 or ENGL 030

ENGL 434 (AM ST 472) Topics in American Literature (3 per semester) Focused study of a particular genre, theme, or problem in American literature. (May be repeated for credit.)

Effective: Fall 2007

Prerequisite: 6 credits of ENGL ENLSH or LIT

ENGL 435 The American Short Story (3) Development of the short story as a recognized art form, with emphasis on major writers.

Effective: Spring 1984

Prerequisite: ENGL 015 or ENGL 030

ENGL 436 American Fiction Since 1945 (3) Representative fiction by such writers as Barth, Bellow, Ellison, Heller, Mailer, Morrison, Nabokov, Oates, O'Connor, Pynchon, Updike, Walker.

Effective: Spring 1992

Prerequisite: ENGL 015 or ENGL 030

ENGL 437 The Poet in America (3) American poets such as Bradstreet, Taylor, Poe, Emerson, Whitman, Dickinson, Frost, Eliot, Stevens, Hughes, Brooks, Moore, Williams, Plath, Rich, Lowell.

Effective: Spring 1992

Prerequisite: ENGL 015 or ENGL 030

ENGL 438 American Drama (3) Development from the colonial period to playwrights such as O'Neill, Wilder, Hellman, Miller, Williams, Albee, Shepard, Norman, Wilson, and others.

Effective: Spring 1992

Prerequisite: ENGL 015 or ENGL 030

ENGL 439 American Nonfiction Prose (3) Major prose writers such as Franklin, Emerson, Thoreau, Fuller, Henry Adams, Mailer, Baldwin, McCarthy, Dillard, Didion, Angelou, and others.

Effective: Spring 1992

Prerequisite: ENGL 015 or ENGL 030

ENGL 440 Studies in Shakespeare (3) Intensive study of a single genre, topic, or critical approach to selected plays.

Effective: Summer 1991

Prerequisite: ENGL 015 or ENGL 030

ENGL 441 Chaucer (3) The principal narrative poems and their background.

Effective: Spring 1984

Prerequisite: ENGL 015 or ENGL 030

ENGL 442 Medieval English Literature (3) Study of major works and genres of medieval English literature, exclusive of Chaucer.

Effective: Spring 1992

Prerequisite: ENGL 015 or ENGL 030

ENGL 443 The English Renaissance (3) Such writers as More, Sidney, Spenser, Shakespeare, Donne, Jonson, Bacon, and Marvell.

Effective: Spring 1984

Prerequisite: ENGL 015 or ENGL 030

ENGL 444 Shakespeare (3) Selected tragedies, comedies, and histories.

Effective: Spring 1984

Prerequisite: ENGL 015 or ENGL 030

ENGL 445 Shakespeare's Contemporaries (3) Selected plays by Shakespeare's major predecessors and contemporaries: Kyd, Marlowe, Jonson, Webster, Marston, Middleton, and others.

Effective: Spring 1984

Prerequisite: ENGL 015 or ENGL 030

ENGL 446 Milton (3) Analysis of principal poems and their background.

Effective: Spring 1984

Prerequisite: ENGL 015 or ENGL 030

ENGL 447 The Restoration and the Eighteenth Century (3) The neoclassical age (1660-1776). Such writers as Dryden, Congreve, Swift, Pope, Fielding, Goldsmith, Sheridan, Boswell, Johnson.

Effective: Spring 1995

Prerequisite: ENGL 015 or ENGL 030

ENGL 448 The English Novel to Jane Austen (3) Novelists such as Defoe, Richardson, Fielding, Smollett, Sterne, and Austen.

Effective: Spring 1995

Prerequisite: ENGL 015 or ENGL 030

ENGL 449 (US;IL) Women Poets (3) Study of major writings by women poets; instructor chooses emphasis, language, and period.

Effective: Fall 2007

Prerequisite: ENGL 002 or ENGL 003 or ENGL 167 or ENGL 194; ENGL 015 or ENGL 030

ENGL 450 The Romantics (3) Poets such as Blake, Wordsworth, Coleridge, Keats, Shelley, and Byron; also prose by writers such as Hazlitt, Lamb, and DeQuincey.

Effective: Spring 1995

Prerequisite: ENGL 015 or ENGL 030

ENGL 451 Literary Modernism in English (3) Survey of literary modernism in English and English translation in a variety of genres, including poetry, fiction, and drama.

Effective: Fall 2007

Prerequisite: ENGL 015 or ENGL 030; ENGL 200, ELISH 300 or ELISH 301

ENGL 452 The Victorians (3) Poets such as Tennyson, Browning, Arnold, and Hopkins; also prose by writers such as Carlyle, Mill, Ruskin, and Arnold.

Effective: Spring 1995

Prerequisite: ENGL 015 or ENGL 030

ENGL 453 Victorian Novel (3) Novelists such as the Brontes, Thackeray, Dickens, George Eliot, Meredith, and Hardy.

Effective: Spring 1995

Prerequisite: ENGL 015 or ENGL 030

ENGL 454 Modern British and Irish Drama (3) From Wilde and Shaw to the present season.

Effective: Fall 2004

Prerequisite: ENGL 015 or ENGL 030

ENGL 455 Topics in British Literature (3) Focused study of a particular genre, theme, or problem in British literature. (May be repeated for credit.)

Effective: Fall 2001

Prerequisite: 6 credits of ENGL ENLSH or LIT

ENGL 456 British Fiction, 1900-1945 (3) Major writers such as Conrad, Lawrence, Mansfield, Forster, Joyce, Woolf, Waugh, Greene, Bowen, Beckett, and others.

Effective: Spring 1995

Prerequisite: ENGL 015 or ENGL 030

ENGL 457 British Fiction Since 1945 (3) Readings in British fiction since World War II.

Effective: Spring 1995

Prerequisite: ENGL 015 or ENGL 030

ENGL 458 Twentieth-Century Poetry (3) Poets writing in English such as Yeats, Pound, Eliot, Frost, Auden, Stevens, Plath, Bishop, Brooks, H.D., and others.

Effective: Spring 1995

Prerequisite: ENGL 015 or ENGL 030

ENGL 461 (US) The Vernacular Roots of African American Literature (3) The relationship between oral tradition and literary texts and the double consciousness of African American voice in "print."

Effective: Summer 2005

Prerequisite: ENGL 015 or ENGL 030

ENGL 462 (US) (WMNST 462) Reading Black, Reading Feminist (3) Female identity and its construction in textual representations of gender, class, color, and cultural difference in English-language literatures.

Effective: Summer 2005

Prerequisite: ENGL 015 or ENGL 030

ENGL 463 (US) African American Autobiography (3) The African American literary quest for identity and its adaptation to Euro-American culture and autobiographies.

Effective: Summer 2005

Prerequisite: ENGL 015 or ENGL 030

ENGL 466 (US) African American Novel I (3) Thematic, structural, and stylistic characteristics of the African American novel from residually oral forms to satiric realism.

Effective: Summer 2005

Prerequisite: ENGL 015 or ENGL 030

ENGL 467 (US) African American Novel II (3) Thematic, stylistic, and structural characteristics of the African American novel from naturalism to modernism and postmodernism.

Effective: Summer 2005

Prerequisite: ENGL 015 or ENGL 030

ENGL 468 (US) African American Poetry (3) African American poetry within the contexts of the black oral tradition and transformed European literary tradition.

Effective: Summer 2005

Prerequisite: ENGL 015 or ENGL 030

ENGL 469 (US) (AAA S 469) Slavery and the Literary Imagination (3) The impact of slavery on the petitions, poetry, slave narratives, autobiographies, and novels of African Americans.

Effective: Summer 2005

Prerequisite: ENGL 015 or ENGL 030

ENGL 470 Rhetorical Theory and Practice (3) Application of certain rhetorical principles to problems in composition. Writing exercise. Designed as preparation for the teaching of composition.

Effective: Spring 1995

Prerequisite: ENGL 015 or ENGL 030

ENGL 471 Rhetorical Traditions (3 per semester, maximum of 6) Introduces major traditions of rhetorical inquiry and their relevance for English studies. (Section subtitles may appear in the Schedule of Courses.)

Effective: Fall 1997

Prerequisite: ENGL 015 or ENGL 030

- ENGL 472 Current Theories of Writing and Reading** (3 per semester, maximum of 6) Investigates models of textual production and reception current within English studies. (Section subtitles may appear in the Schedule of Courses.)
Effective: Fall 1997
Prerequisite: ENGL 015 or ENGL 030
- ENGL 473 Rhetorical Approaches to Discourse** (3 per semester, maximum of 6) Practices the criticism of written texts from selected rhetorical perspectives. (Section subtitles may appear in the Schedule of Courses.)
Effective: Fall 1997
Prerequisite: ENGL 015 or ENGL 030
- ENGL 474 Issues in Rhetoric and Composition** (3 per semester, maximum of 6) Examines selected topics in the field of rhetoric and composition. (Section subtitles may appear in the Schedule of Courses.)
Effective: Fall 1997
Prerequisite: ENGL 015 or ENGL 030
- ENGL 477 Teaching Children's Literature** (3) Teaching Children's Literature in light of recent literary pedagogy, the history of childhood, and critical approaches to Children's Literature.
Effective: Fall 2007
Prerequisite: ENGL 202
- ENGL 479 Business or Technical Writing Practicum** (1-3) Practical experience applying business or technical writing principles, working with advanced business, science, or engineering students on classroom projects.
Effective: Fall 2007
Prerequisite: Prerequisite or concurrent: ENGL 418 or ENGL 419
- ENGL 480 Communication Design for Writers** (3) This course explores visual design, non-verbal communication, and software packages used in professional settings to most effectively present written communications.
Effective: Summer 2005
Prerequisite: ENGL 015 or ENGL 030; ENGL 202A, ENGL 202B, ENGL 202C or ENGL 202D ; 7th semester standing or higher
- ENGL 481 Literary Theory: Historical Perspectives** (3) Selected topics in the history of literary criticism and theory within the English-language tradition.
Effective: Summer 1994
Prerequisite: ENGL 015 or ENGL 030
- ENGL 482 Contemporary Literary Theory and Practice** (3 per semester, maximum of 6) Contemporary literary theories and their implication for critical practice as applied to British, American, and other English-language literary works.
Effective: Summer 1992
Prerequisite: ENGL 015 or ENGL 030
- ENGL 482W Contemporary Literary and Cultural Theory** (3) Contemporary literary and cultural theories and their implication for critical practice as applied to a variety of texts, e.g. literary, linguistic, visual, multimedia, and/or popular.
Effective: Fall 2007
Prerequisite: ENGL 015 or ENGL 030H; ENGL 200
- ENGL 483 Problems in Critical Theory and Practice** (3) Intensive study of one or more recent theoretical approaches as applied to British, American, and other English-language literary works.
Effective: Summer 1994
Prerequisite: ENGL 015 or ENGL 030
- ENGL 484 James Joyce** (3) Analysis of principal works and their background.
Effective: Fall 2007
Prerequisite: ENGL 002; ENGL 015 or ENGL 030
- ENGL 485 Australian and New Zealand Literature and Culture** (3) Questions of nationality, identity, gender, race, class, colonialism, and postcolonialism in these literatures.
Effective: Summer 1995
Prerequisite: ENGL 015 or ENGL 030
- ENGL 486 (IL) The World Novel in English** (3) Studies in the novel, written in English, by writers outside of the United States and Great Britain.
Effective: Fall 2007
Prerequisite: ENGL 002; ENGL 015 or ENGL 030
- ENGL 487W Senior Seminar** (3) Issues, themes, periods, critical theories, etc., that invite students to use prior English studies, limited to seniors majoring in English.
Effective: Summer 1997
Prerequisite: six credits of 400-level courses in English
- ENGL 488 (IL) (CMLIT 488) Modern Continental Drama** (3) From Ibsen to the drama of today: Strindberg, Chekhov, Hauptmann, Pirandello, Ionesco, Beckett, Genet, and others.
Effective: Spring 2006
Prerequisite: ENGL 015 or ENGL 030
- ENGL 489 (WMNST 489) British Women Writers** (3) A study of selected British women writers.
Effective: Spring 2008
Prerequisite: 6 credits of ENGL
- ENGL 490 (US;IL) (WMNST 490) Women Writers and Their Worlds** (3) American and British literature written from the perspective of women.

Effective: Summer 2005
Prerequisite: ENGL 015 or ENGL 030

ENGL 491 The Capstone Course in Professional Writing (3) This culminating course for Professional Writing majors concentrates on reflective analyses, design, and presentation of documents in the development of professional portfolios.
Effective: Summer 2004
Prerequisite: ENGL 015 or ENGL 030; ENGL 202A, ENGL 202B, ENGL 202C or ENGL 202D ; seventh-semester standing or higher; enrollment in Professional Writing major

ENGL 492 (AM ST 476, WMNST 491) American Women Writers (3) A study of selected American women writers.
Effective: Spring 2008
Prerequisite: 6 credits of ENGL

ENGL 493 (AM ST 493) The Folktale in American Literature (3) A survey of the literary uses of the folktale and legendary materials, with particular concentration on the literature of America.
Effective: Spring 1986
Prerequisite: ENGL 015 or ENGL 030

ENGL 494 Senior Thesis in English (1-6) Senior English (ELISH) majors write a thesis arranged with in-charge person and submit it to a faculty committee for appraisal.
Effective: Fall 2007
Prerequisite: seventh-semester standing

ENGL 494H Senior Thesis in English (1-6) Senior English (ELISH) majors write a thesis arranged with in-charge person and submit it to a faculty committee for appraisal.
Effective: Fall 2007
Prerequisite: seventh-semester standing

ENGL 495 Internship (3-12) Supervised practicum in fields appropriate to the English major.
Effective: Spring 2001

ENGL 496 Independent Studies (1-18) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

ENGL 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

ENGL 497A The Zombie in Film and Society (3) Course examines the cultural role of the zombie in the twentieth and twenty-first textual and cinematic forms.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENGL 497A Writer in the Community (3) This is a service learning course that involves graduate and undergraduate students in the teaching and practice of writing in non-university settings.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ENGL 497B (S T S 497A) Being Humans (3) This course will examine conceptualizations of the human and the processes by which "the human" is defined in a variety of ways.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENGL 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

ENGL 499 (IL) Foreign Study--English (3-6) Studies abroad in English language and/or literature.
Effective: Summer 2005

ENGL 501 Materials and Methods of Research (3) Materials and techniques of research in English and American literary history; form and content of these. Required of all graduate students with an English major.
Effective: Fall 1983

ENGL 502 Theory and Teaching of Composition (3) Study of grammar, logic, rhetoric, and style in their applicability to teaching composition.
Effective: Winter 1978

ENGL 503 (LL ED 503) Research Methods in Composition (3) Introduction to the issues and methods of empirical research in composition.
Effective: Fall 1993

ENGL 504 Rhetoric and Poetics (3) Historical relations between rhetorical theory and poetics; approaches to rhetorical criticism of poetic discourse.
Effective: Summer 1995

ENGL 506 The English Language (3) A problem-centered approach to literary and oral forms of English, utilizing historical and analytic perspectives.
Effective: Winter 1978

ENGL 507 English Composition Studies (3) An overview of composition studies, with particular attention to the schools of writing pedagogy.
Effective: Spring 2001
Prerequisite: EDUC 452, ENGL 409 Bachelor's degree permission of the program

ENGL 508 Computer Applications for Writers and Humanities Scholars (3) Computer applications for writers and humanities scholars: introduction to terminal-editing, retrieval, bibliographic, and textual analysis systems.
Effective: Fall 1983

ENGL 510 Scholarly Editing: Theory and Practice (3) Study of editorial theory from McKerrow and Greg to the present; experience in scholarly editing and manuscript study.
Effective: Fall 1989
Prerequisite: ENGL 501

ENGL 511 Thesis Workshop and Professional Writing (3) Professional writing for graduate students.
Effective: Summer 2008

ENGL 512 The Writing of Fiction (3 per semester/maximum of 15) Supervised workshop in advanced techniques of writing fiction.
Effective: Fall 1996

ENGL 513 The Writing of Poetry (3 per semester/maximum of 15) For the student with considerable experience in writing poetry; a workshop devoted to advanced poetic technique.
Effective: Fall 1996

ENGL 515 The Writing of Nonfiction (3 per semester/maximum of 15) Supervised workshop in advanced nonfiction techniques.
Effective: Fall 1996

ENGL 518 Business and Technical Writing: Current Theory (3) Intensive examination of current theories and practice in business and technical communication; written projects exploring specific theories and problems.
Effective: Fall 1982

ENGL 521 Old English Language (3) An introduction to the main features of the Old English language; readings in simple Old English prose and poetry.
Effective: Winter 1978

ENGL 522 Beowulf (3) Reading and critical analysis.
Effective: Winter 1978
Prerequisite: ENGL 521

ENGL 530 The Literature of Biography and Autobiography (1-3 per semester, maximum of 6) Study of biographical and autobiographical theory and practice through analysis of major English and American works in each genre.
Effective: Spring 1992

ENGL 540 Studies in Elizabethan Prose and Poetry (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include figures such as Spenser and Sidney.
Effective: Summer 1997

ENGL 541 Medieval Studies (1-3 per semester, maximum of 12) Studies in medieval English literature. Topics studied might include medieval romances, drama, or major figures aside from Chaucer.
Effective: Summer 1997

ENGL 542 Middle English Literature (3) Introduction to Middle English and its dialects; study of the literature of the period exclusive of Chaucer.
Effective: Winter 1978

ENGL 543 Studies in Early Seventeenth-Century Literature (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Donne, Herbert, Jonson, Bacon.
Effective: Summer 1997

ENGL 545 **Chaucer** (1-3 per semester, maximum of 12) Major and minor works of Geoffrey Chaucer. The works studied will vary from year to year.
Effective: Summer 1997

ENGL 546 **Milton** (3) The poetry and prose of John Milton.
Effective: Winter 1978

ENGL 548 **Elizabethan and Jacobean Drama** (1-3 per semester, maximum of 12) English drama from 1558 to 1642, exclusive of Shakespeare.
Effective: Summer 1997

ENGL 549 **Shakespeare** (1-3 per semester, maximum of 12) Special problems of sources, chronology, text, characterization, and motivation in the drama.
Effective: Summer 1997

ENGL 550 **English Literature 1660-1800** (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Dryden, Swift, Pope, Johnson, Fielding, Gibbon.
Effective: Summer 1997

ENGL 551 **English Drama 1660-1800** (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Wycherley, Farquahar, Dryden, Congreve, Etherege.
Effective: Summer 1997

ENGL 553 **Literacy Studies** (3) An overview of current research on literacy, with particular attention to language, thought, and learning and their applications to writing.
Effective: Spring 2001
Prerequisite: EDUC 452 or ENGL 409 ; Bachelor's Degree and permission of program

ENGL 554 **Studies in Early American Literature** (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Bradstreet, Taylor, Mather, Franklin, Edwards, Paine.
Effective: Summer 1997

ENGL 556 **Eighteenth-Century British Fiction** (1-3 per semester, maximum of 12) Major figures studied might include Defoe, Smollet, Fielding, Richardson, Sterne.
Effective: Summer 1997

ENGL 558 **Nineteenth-Century British Fiction** (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Dickens, Thackeray, the Brontes, George Eliot, Hardy.
Effective: Summer 1997

ENGL 559 **Studies in Twentieth-Century British Fiction** (1-3 per semester, maximum of 12) Major figures studies will vary from year to year. Writers studied might include Conrad, Lawrence, Woolf, Huxley, Green, Fowles.
Effective: Summer 1997

ENGL 560 **American Romanticism** (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Hawthorne, Melville, Emerson, Thoreau, Whitman.
Effective: Summer 1997

ENGL 561 **Studies in the Romantic Movement** (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Blake, Wordsworth, Coleridge, Byron, Shelley, Keats.
Effective: Summer 1997

ENGL 562 **Studies in the Literature of Victorian England** (1-3 per semester, maximum of 12) Figures will vary from year to year. Writers studied might include Tennyson, Browning, Arnold, Newman, Ruskin, Trollope.
Effective: Summer 1997

ENGL 563 **Composition Research Methodology and Methods** (3) Current methodology and methods for composition research.
Effective: Spring 2001
Prerequisite: EDUC 452, ENGL 409, ENGL 507, ENGL 553 permission of the program

ENGL 564 **Studies in Nineteenth-Century American Literature** (1-3 per semester, maximum of 12) Writers will vary from year to year. Writers studied might include Cooper, Poe, Dickinson, Twain, James.
Effective: Summer 1997

ENGL 565 Period Studies in African-American Literature (3 per semester/maximum of 9) Studies of periods in African-American literature. Periods might include the Harlem Renaissance or the Black Arts Movement.
Effective: Spring 1998

ENGL 566 Genre Studies in African-American Literature (3 per semester/maximum of 9) Genre will vary from year to year, but will include categories such as poetry, fiction, essays, sermons, autobiographies, short stories.
Effective: Spring 1998

ENGL 567 Thematic Studies in African-American Literature (3 per semester/maximum of 9) Exploration of key concepts in African-American culture as manifested in various literary discourses.
Effective: Spring 1998

ENGL 568 Gender Issues in African-American Literature (3 per semester/maximum of 9) Gender issues in African-American literature and culture. Issues may include the Black woman writer or Gay and Lesbian writers.
Effective: Spring 1998

ENGL 570 The Writer as Critic: Reviewing Contemporary Poetry, Fiction, and Non-Fiction (3) Students will write and revise book reviews of poetry, fiction, and non-fiction for a variety of newspapers and literary magazines.
Effective: Summer 2002

ENGL 571 Writer in the Community (3) Students study the theory and practice of creative writing pedagogy in non-university settings.
Effective: Summer 2009

ENGL 573 Studies in Twentieth-Century British Literature (1-3 per semester, maximum of 12) Major figures studied will vary from year to year. Writers studied might include Yeats, Conrad, Joyce, Shaw, Lawrence, Auden.
Effective: Summer 1997

ENGL 574 Studies in Twentieth-Century American Literature (1-3 per semester, maximum of 12) Figures studied will vary from year to year. Writers studied might include Dreiser, Wharton, Eliot, Hemingway, Fitzgerald, Faulkner, O'Neill, Williams.
Effective: Summer 1997

ENGL 575 Experimentation and Modernism in Twentieth-Century British and American Fiction (1-3 per semester, maximum of 12) Figures studied will be drawn from the era of Joyce and Virginia Woolf to the present.
Effective: Summer 1997

ENGL 576 Studies in Twentieth-Century American Fiction (1-3 per semester, maximum of 12) Concentrated study in such major American writers as Hemingway, Faulkner, and Fitzgerald.
Effective: Summer 1997

ENGL 577 Contemporary Fiction (1-3 per semester, maximum of 12) Exploration of contemporary English language fiction.
Effective: Summer 1997

ENGL 578 Studies in Modern British Drama (1-3 per semester, maximum of 12) Figures studied will be drawn from the era of Shaw and Wilde to the present.
Effective: Summer 1997

ENGL 581 Modern American and British Criticism to 1965 (1-3 per semester, maximum of 12) Study of modern literary criticism to 1965, with emphasis on such figures as Winters, Richards, Eliot, and Frye.
Effective: Summer 1997

ENGL 582 Survey of Contemporary Literary Theory (3) Exploration of the dimensions of discourse as reflected in recent theories of rhetoric, poetics, and literary criticism.
Effective: Summer 1990

ENGL 583 Studies in Critical Theory (1-3 per semester/maximum of 12) Study of specific contemporary critical approaches to literature and application to English and/or American literary works.
Effective: Summer 1997

ENGL 584 Studies in Rhetoric (1-3 per semester/maximum of 12) Specific rhetorical problems, issues, or figures; topics will change from year to year.
Effective: Summer 1997

ENGL 585 **Studies in British Fiction** (1-3 per semester, maximum of 6) No description.
Effective: Spring 1988

ENGL 585 **Studies in British Fiction** (1-3 per semester, maximum of 12) No description.
Effective: Spring 1997

ENGL 586 **Readings in Literature** (1-12) Programs of readings designed to meet specific needs of individual students.
Effective: Winter 1978

ENGL 588 **Studies in American Fiction** (1-3 per semester, maximum of 12) No description.
Effective: Summer 1997

ENGL 589 **Studies in American Poetry** (1-3 per semester, maximum of 12) No description.
Effective: Summer 1997

ENGL 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1996

ENGL 596 **Individual Studies** (1-12) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2009

ENGL 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

ENGL 597A **Classics and Commercials** (3) This course will invite students to consider both "classic" and undervalued America texts from the 19th and 20th centuries.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENGL 597A **Oceanic American Studies** (3) This course asks what happens if our scholarly perspective is reoriented from the perspective of the sea.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ENGL 597B **Critical Studies in Caribbean Literatures: Poetics of Relation** (3) The course discusses Caribbean literature and how it has evolved.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENGL 597B **Theatre, History, and Performance** (3) This is a survey course in the history and performance of drama.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ENGL 597C **Film and Genre** (3) This course will focus on the formation of the Hollywood studio system and its adaptation of various literary genres.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENGL 597C **Translingual Writing and Transnational Communication in Globalization** (3) The global flows of capital, information, cultural products, and people have increasingly made us aware of our multilingual reality.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ENGL 597D **Critical Pedagogy** (3) Critical pedagogy is an approach to teaching and curriculum informed by critical social theory.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ENGL 597E **The New Environmental Non-Fiction** (3) This course examines the many provocative questions new environmental non-fiction raises.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ENGL 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

ENGL 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

ENGL 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Fall 1983

ENGL 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2000

ENGL 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

ENGL 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

English as a Second Language (ESL)

ESL 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2004

ESL 497B **Academic Presentations for Non-native English-speakers** (3) This course is designed to help non-native English-speaking graduate students in planning and conducting oral presentations in academic settings.
Effective: Summer 2011 Ending: Summer 2011

Last Import from UCM: June 16, 2011 3:00 AM

Entomology (ENT)

ENT 402W (VB SC 402W) **Biology of Animal Parasites** (3) An introduction to animal parasitology. Emphasizes placed on host/parasite interactions, parasites of zoonotic importance, control programs and taxonomy.

Effective: Spring 2010

Prerequisite: BIOL 110

ENT 410 **Insect Structure and Function** (3) Integrated physiology and anatomy of insects; emphasis on unique adaptations, genetic regulation of development, insects as model systems, environmental physiology.

Effective: Summer 1994

Prerequisite: BIOL 110, BIOL 220W, BIOL 230W, BIOL 240W

ENT 420 **Introduction to Population Dynamics** (3) Principles of population regulation, demographic analysis, modeling of dynamic processes are discussed; laboratories involve the exploration of population growth models.

Effective: Summer 1994

Prerequisite: BIOL 110, BIOL 220W

ENT 425 **Freshwater Entomology** (3) Collection and identification of insects and other arthropods in freshwater ecosystems; field study of habitats.

Effective: Fall 2000

ENT 430 (BIOL 430, B M B 430) **Developmental Biology** (3) Molecular and genetic analyses of mechanisms involved in differentiation and determination in biological systems.

Effective: Summer 1994

Prerequisite: BIOL 222; B M B 252 or BIOL 230W

ENT 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

ENT 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

ENT 497A **The Evolutionary Biology of the Insects** (3) Insects are the dominant animal life on the planet. In this course we will take a systematic view of insect diversity. We will integrate phylogenetics, functional morphology,

alpha-taxonomy, paleobiology, ecology and behavior to understand why insect diversity is so great.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENT 497A **Evolution and Insect Societies** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ENT 497B **Sensory Biology of Insects** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ENT 539 **Chemical Ecology of Insects** (3) Interactions of insects with environmental chemicals, including natural and synthetic compounds; host finding and other behavior modifying cues.

Effective: Spring 1986

ENT 542 (W F S 542, BIOL 542) **Systematics** (3) Principles and methods of classification, phylogeny, and speciation; taxonomic techniques; analysis of species; causal interpretation of animal diversity.

Effective: Summer 1990

ENT 543 **Biological Control and Pathology of Insects** (3) Arthropod population control by entomogenous insects and microorganisms.

Effective: Spring 1986

Prerequisite: Consent of program

ENT 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 1987

ENT 593 (ANTH 593, BIOL 593) **Tropical Field Studies (Organization for Tropical Studies)** (8) An intensive field course concentrating on field problems, experimental design, and data analysis in tropical habitats.

Effective: Summer 1993

Prerequisite: approval by the Committee on Tropical Studies

ENT 595 Internship (10-12) Supervised field experience and study related to the student's major professional interest. Written and oral critique of activity required. Limited to Master of Agriculture degree in entomology.

Effective: Spring 1987

Prerequisite: approval of proposed assignment by adviser prior to registration; cumulative GPA of 3.0 or higher; completion of entomology core courses

ENT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses

Effective: Spring 1987

ENT 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

ENT 597A Frontiers in Insect Science (4) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENT 597A Professional Development (6) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ENT 597D Debate Team (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENT 597E Insect Natural History (2) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENT 597G Applied Statistic Technology (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENT 597K Advanced Topics in Entomology (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENT 597K Advanced Topics in Entomology (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

ENT 600 Thesis Research (1-15) No description.

Effective: Fall 1983

ENT 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 1983

ENT 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in development of instructional materials, organizing and conducting lectures, laboratories, and evaluating students in Entomology courses (1-599).

Effective: Fall 1983

ENT 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.

Effective: Fall 2008

ENT 610 Thesis Research Off Campus (1-15) No description.

Effective: Fall 1983

ENT 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Entrepreneurship (ENTR)

ENTR 400 Financing Entrepreneurial Ventures (3) Overview of alternative forms of financing including seed capital, valuing a company, going public, partnerships, and acquisitions.
Effective: Summer 2000

Prerequisite: B A 243 or B LAW 243; ENTR 320, FIN 301

ENTR 410 Entrepreneurial Marketing (3) Principles of Internet marketing and strategies for marketing new ventures on the Web.

Effective: Spring 2007

Prerequisite: ENTR 320, MIS 204, MKTG 301

ENTR 420 Leadership and Growth of New Ventures (3) Leadership of an entrepreneurial organization, including organizational effectiveness, stages of entrepreneurial growth, strategies for the future, and developing people.

Effective: Summer 2000

Prerequisite: ENTR 320; MGMT 100 or MGMT 301

ENTR 430 Entrepreneurship and New Product Development (3) Examines the process of designing, testing and launching new products, and developing a strategy for commercialization of the technology.

Effective: Summer 2000

Prerequisite: ENTR 300

ENTR 440 Entrepreneurship and Franchising (3) Overview of the entire franchising process with a focus on licensing and distributorship, trade marks, strategy, and growing the enterprise.

Effective: Summer 2000

Prerequisite: ENTR 300

ENTR 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 2000

ENTR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 2000

ENTR 497A Sheetz Fellows I (1) This course is an introduction to the Sheetz Fellows Program. It prepares students with an entrepreneurial mindset for leadership roles by providing them with mentoring opportunities, academic challenges, and resources. Topic areas include; servant leadership, business networking, social networking, study abroad exploration, and resume development. The Sheetz Fellows experience offers "an education for leadership" in the best tradition of the Business program. It molds well-rounded students who are ready for the world and prepares students for citizenship and for life-long learning.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENTR 497A Special Topics - E-Recycling and Product Design in Kenya (3) This course explores the topics of electronic recycling and new product design in Kenya. Travel to Kenya in early summer to collaborate with Kenyan students will be a part of the course. Students must earn a B or better to qualify for travel.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: ENGR 310

ENTR 500 Innovation and Entrepreneurship (1-3) Practical and theoretical insights into analyzing a new business opportunity that you have created.

Effective: Summer 2008

ENTR 501 Opportunity Creation and Launch (2) Identify a new opportunity, quantify its potential, understand key competitive factors, and develop presentations to secure venture financing.

Effective: Summer 2002

ENTR 502 Starting and Growing a New Business (2) An overview of traditional entrepreneurship considerations including competition, management teams, financing, and exit plans.

Effective: Summer 2002

ENTR 503 Garber Venture Capital Practicum (1-2) Structure investment opportunities, conduct due diligence, and potentially invest funds from the Smeal College of Business Garber Venture Capital Fund.

Effective: Summer 2002

ENTR 504 Essentials of Business Planning (2) Create a concise and coherent business plan for a start-up or a new corporate initiative.

Effective: Spring 2011

ENTR 571 Strategic Innovation in Corporate Networks (2) Capstone course integrating themes related to innovation by exploring entrepreneurship as strategic force throughout a full range of corporate entities.
Effective: Spring 2010

ENTR 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2002

ENTR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2002

ENTR 597E Creating Value Through Social Entrepreneurship (2) Gain a toolkit of social-entrepreneur tactics for creating change; apply this toolkit to startup contexts as well as traditional managerial roles.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

ENTR 597I Business Model Innovation (2) Using business models to obtain competitive advantage in emerging and established companies.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Last Import from UCM: June 16, 2011 3:00 AM

Environ System Engin (ENVSE)

ENVSE 404W **Surface and Interfacial Phenomena in Environmental Systems** (3) Principles underlying surface and interfacial phenomena with application to mineral processing and environmental systems.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: or concurrent:CHEM 110, MATH 141, PHYS 212, EME 301

ENVSE 406 **Sampling and Monitoring of the Geo-Environment** (3) Issues of sampling, analysis, monitoring and control techniques for effective environmental management in the extractive industries.

Effective: Summer 2012 Future: Summer 2012

Prerequisite: Prerequisite or concurrent:MN PR 301

ENVSE 412 **Environmental Systems Engineering Laboratory** (1) A laboratory study of the principles involved in the characterization and remediation of process wastes with an emphasis on physical separations.

Effective: Summer 2012 Future: Summer 2012

Prerequisite: or concurrent:MN PR 301

ENVSE 420 **Fire Safety Engineering** (3) Overview of the history and behavior of fire, hazards and risk identification, detection and suppression systems, and emergency evacuation procedures.

Effective: Summer 2012 Future: Summer 2012

Prerequisite: CHEM 110, MATH 141, PHYS 212

ENVSE 427 **Pollution Control in the Process Industries** (3) Development of multimedia pollution control strategies for the mineral, metallurgical processing, and fossil fuel industries.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: CHEM 110, CHEM 112, MATH 141, MN PR 301

ENVSE 440 **Industrial Ventilation for Contaminant Control** (3) Ventilation system design and analysis for control of industrial contaminants; measurements, dilution and local exhaust ventilation strategies; laboratory demonstrations included.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: MATH 141, PHYS 212, CHEM 110

ENVSE 450 **Environmental Health and Safety** (3) Overview of toxicology, epidemiology, exposure assessment, industrial hygiene, environmental laws, and engineering approaches to protecting workers and the environment.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: CHEM 110

ENVSE 457 **Industrial Hygiene Measurements** (4) Introduction to industrial hygiene methods used in evaluating occupational exposures, and in designing and evaluating control systems; laboratory work included.

Effective: Summer 2012 Future: Summer 2012

Prerequisite: ENVSE 450

ENVSE 470 **Systems Safety and Risk Engineering** (3) Quantitative methods of systems analysis, risk analysis and tolerance, as well as accident cose and cost-benefit analysis are covered.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: MATH 251

ENVSE 480 **Environmental Systems Engineering Process Design** (3) An integrated problem-based learning experience that utilizes fundamental concepts covered in the curriculum to design a geo-environmental system.

Effective: Summer 2012 Future: Summer 2012

Prerequisite: GEOEE 427 minimum of seventh-semester standing in Environmental Systems Engineering

ENVSE 494H **Senior Thesis** (1-6) Independent research and/or design projects under the supervision of the Environmental Systems Engineering program.

Effective: Summer 2012 Future: Summer 2012

Prerequisite: seventh-semester standing in Environmental Systems Engineering

ENVSE 495 **Environmental Health and Safety Engineering Internship** (2) Students work with an advisor to prepare technical memos and a final report summarizing the experiential education gained through employment in inustry.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: junior or senior standing

ENVSE 496 **Independent Studies** (1-18) Creative projects, including research and design,that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 2012 Future: Summer 2012

ENVSE 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2012 Future: Spring 2012

Last Import from UCM: June 16, 2011 3:00 AM

Environmental Engineering (ENVE)

ENVE 401 Occupational Safety and Environmental Health (1) Regulations, management practices, hazard identification, exposure assessment, monitoring, employee protection, and program management for occupational safety and health.
Effective: Summer 2007 Ending: Summer 2011
Prerequisite: CHEM 110

ENVE 401 Occupational Safety and Environmental Health (1) Regulations, management practices, hazard identification, exposure assessment, monitoring, employee protection, and program management for occupational safety and health.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: CHEM 301 and ENVE 301W

ENVE 411 Water Supply and Pollution Control (3) Water supply, wastewater characteristics, design of unit processes for water and wastewater treatment, sludge processing, and related new technologies.
Effective: Summer 2007
Prerequisite: CHEM 301, ENVE 301W

ENVE 413W Operation and Control of Treatment Systems (3) Wastewater treatment, water treatment, solids handling, hazardous waste site control and operations, operator certification, report writing.
Effective: Spring 2002 Ending: Summer 2011
Prerequisite: ENVE 411, ENVE 424 Concurrent: ENVE 416

ENVE 413W Operation and Control of Treatment Systems (3) Wastewater treatment, water treatment, solids handling, hazardous waste site control and operations, operator certification, report writing.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: ENVE 411 Concurrent: ENVE 416

ENVE 415 Hydrology (3) Watershed response to rainfall events; hydrologic systems, ground water flow.
Effective: Spring 2007
Prerequisite: ENVE 361, MATH 446

ENVE 416 Treatment Plant Design (3) Design of treatment facilities for water and waste water based on regulatory requirements and standards.
Effective: Spring 1999
Prerequisite: ENVE 411

ENVE 417 Hydraulic Design (3) Design of water and waste water conveyance systems and storage facilities.
Effective: Spring 1999
Prerequisite: ENVE 415

ENVE 424 Solid Waste Management (3) Solid waste collection and disposal techniques; recycling and design optimization; including content analysis, legislation, and planning.
Effective: Fall 1998
Prerequisite: seventh-semester standing

ENVE 425 Hazardous Waste Management (3) Overview of regulations, risk assessment, waste minimization and pollution prevention, treatment of hazardous waste, and remediation of contaminated sites.
Effective: Spring 2008
Prerequisite: CHEM 301

ENVE 430 Sustainable Engineering (3) A course on engineering which uses ecological principles to minimize waste and maximally use input materials.
Effective: Summer 2003
Prerequisite: Permission of program

ENVE 442 Wastewater Treatment Plant Design and Operation (4) Covers wastewater generation, design and operation of unit operations for wastewater treatment, sludge handling and disposal options, related new technologies.
Effective: Summer 2007
Prerequisite: CHEM 301, ENVE 301W

ENVE 460 Environmental Law (3) This course provides a survey of Federal and State environmental laws, including statutory, common and administrative law. May not be taken for graduate credit by Dickinson School of Law students in the concurrent J.D./EPC programs.
Effective: Summer 2003
Prerequisite: senior standing graduate standing or permission of program.

ENVE 470 Air Quality (3) Overview of air quality issues with regard to the sources, measurements, effects, transport and control of potential air contaminants.
Effective: Fall 2007
Prerequisite: CHEM 301

ENVE 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2005

ENVE 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or

small-group basis.
Effective: Fall 2007

ENVE 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2005

ENVE 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1996

ENVE 550 **Chemical Fate and Transport** (3) Chemical fate and transport modeling of environmental systems as applied to ecological systems, treatment technologies, and human health exposure assessments.
Effective: Summer 2004

ENVE 551 **Environmental Modeling Applications** (3) Software applications for environmental engineers/scientists in: air quality; groundwater; soil (vadose zone); treatment processes; water/wastewater systems.
Effective: Summer 2005
Prerequisite: permission of program

ENVE 569 **Environmental Risk Assessment** (3) Overview of ecological and human risk, including hazard identification, dose response, exposure assessment, and risk characterization.
Effective: Fall 1996

ENVE 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2003

ENVE 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2003

ENVE 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2001

ENVE 599 (IL) **Foreign Studies** (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2005

Last Import from UCM: June 16, 2011 3:00 AM

Environmental Resource Management (E R M)

E R M 411 Legal Aspects of Resource Management (3) Legal systems and lawmaking processes; property rights in land, water, and wildlife resources; jurisdictional problems in planning resource use.

Effective: Summer 1996

Prerequisite: E R M 151

E R M 412 Resource Systems Analysis (3) The concept of systems; techniques of analysis, including input/output, mathematical programming, and simulation; application to resource systems.

Effective: Spring 2001

Prerequisite: BIOL 220W, E R M 151, E R M 300 and STAT 240; MATH 111 or MATH 141

E R M 413W Case Studies in Ecosystem Management (3) Application of biological, physical, and social science principles to ecosystem management problems; introduction to environmental impact analysis and review.

Effective: Spring 2010

Prerequisite: BIOL 220W, SOILS 101W . Prerequisite or concurrent: E R M 412

E R M 430 (PPATH 430) Air Pollution Impacts to Terrestrial Ecosystems (3) Overview of the direct and indirect effects of air pollutants on terrestrial plants and ecosystems.

Effective: Summer 2004

Prerequisite: BIOL 220W or FOR 308

E R M 431 (VB SC 431) Environmental Toxicology (3) Effects of pollutants on animal health at the chemical, physical, and cellular level.

Effective: Spring 2011

Prerequisite: BIOL 110, CHEM 110, CHEM 112

E R M 433 Transformation of Pollutants in Soils (3) Processes regulating fate and transport of metals, organics, nutrients, salts, pathogens, and radionuclides in soil systems.

Effective: Summer 2007

Prerequisite: CHEM 112, CHEM 111, SOILS 101

E R M 435 (W F S 435) Limnology (3) Biogeochemistry and natural history of freshwater ecosystems.

Effective: Summer 2007

Prerequisite: BIOL 110, BIOL 220W, CHEM 110

E R M 436 (W F S 436) Limnological Methods (3) Application of current methodologies to evaluate the biological, chemical, and physical characteristics of aquatic ecosystems.

Effective: Spring 2010

Prerequisite: BIOL 110 and CHEM 110

E R M 447 Stream Restoration (3) Stream restoration including fluvial geomorphology, stream classification, impairment, sediment transport, stable stream design, and watershed assessment.

Effective: Summer 2008

Prerequisite: A S M 327 or A B E 307 or C E 361

E R M 450 (W F S 450) Wetland Conservation (3) Wetland types, classification, functions and values; hydrology, soils, and plants; introduction to wetland identification and delineation; wetland regulations.

Effective: Spring 2002

Prerequisite: E R M 300 or W F S 209

E R M 494H Honors Thesis (1-6) Independent study directed by a faculty supervisor that culminates in the production of an ERM honors thesis.

Effective: Summer 2009

Prerequisite: Junior or senior status in the Schreyer Honors College and permission of the ERM honors advisor

E R M 495 Internship (1-12) A supervised practicum in the environmental field. To be offered only for SA/UN grading.

Effective: Summer 1996

Prerequisite: prior approval of assignment by instructor

E R M 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1996

E R M 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 1996

E R M 497A Environmental Biophysics (3) Analysis of the interaction of living organisms and their microenvironment by applying biophysical principles and engineering methods.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: 3 credits of Biology MATH 110 or MATH 140 or PHYS 211 or PHYS 251

E R M 499 (IL) Foreign Studies (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Last Import from UCM: June 16, 2011 3:00 AM

Environmental Studies (ENVST)

ENVST 400W **Senior Seminar in Environmental Studies** (3) Writing-intensive study of a specified topic in environmental studies integrating approaches and research from a variety of disciplines.

Effective: Spring 2000

Prerequisite: ENVST 200

ENVST 424 (ENGL 424) **Creative Writing and the Natural World** (3) Creative writing workshop focused on the environment and related issues.

Effective: Summer 2011

Prerequisite: ENGL 050 or ENVST 100

ENVST 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Spring 2000

Last Import from UCM: June 16, 2011 3:00 AM

Finance (FIN)

FIN 405 Advanced Financial Management (3) An examination of the development and application of decision rules for major long-term financial and investment problems of the firm.

Effective: Summer 1993

Prerequisite: FIN 305W

FIN 406 Security Analysis and Portfolio Management (3) Advanced valuation theory; fundamentals of security analysis; portfolio construction and management.

Effective: Spring 2011

Prerequisite: B A 301 or FIN 301

FIN 406H Security Analysis and Portfolio Management (Honors) (3) Advanced valuation theory; fundamentals of security analysis; portfolio construction and management.

Effective: Summer 2011

Prerequisite: B A 301 or FIN 301

FIN 407 Multinational Financial Management (3) Analysis of the international aspects of managerial finance; emphasis on the impact of the international financial environment on firm operations.

Effective: Spring 2005

Prerequisite: FIN 305W

FIN 408 Financial Markets and Institutions (3) Functional analysis of major credit institutions; sources and uses of funds; impact of government regulation.

Effective: Fall 1994

Prerequisite: B A 301 or FIN 301

FIN 408H Financial Markets and Institutions (3) Functional analysis of major credit institutions; sources and uses of funds; impact of government regulation.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: B A 301 or FIN 301

FIN 408H Financial Markets and Institutions (Honors) (3) Introduction to bonds, equities, derivatives, and financial institutions including insurance, pension funds and mutual funds.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: B A 301 or FIN 301

FIN 409 Real Estate Finance and Investment (3) The sources and uses of credit; instruments and methods of financing; the theory and practice or real estate investment analysis.

Effective: Summer 2011

Prerequisite: B A 301 or FIN 301

FIN 410 Derivative Markets (3) Functions, techniques, and impact of speculation conducted through forward markets; the nature of speculative transactions, pricing, and methods of trading.

Effective: Spring 2011

Prerequisite: FIN 406

FIN 412 Commercial Bank Management (3) Fundamental principles underlying management of a commercial bank; capital funds; asset and liability management; value maximization; legal and operational constraints.

Effective: Fall 1994

Prerequisite: FIN 305W, FIN 408

FIN 413 Risk Management of Financial Institutions (3) Measuring and managing risk faced by financial institutions.

Effective: Summer 2007

Prerequisite: B A 301 or FIN 301

FIN 414 Financial Trading and Applications (3) This course focuses on financial modeling and analysis of trading strategies. Bloomberg, Reuters, spreadsheets and trading simulations are used extensively.

Effective: Summer 2007

Prerequisite: FIN 305W, FIN 406 or FIN 301

FIN 415 Advanced Financial Modeling (3) Develop financial models using spreadsheets, VBA programming, and trading room applications such as Bloomberg and @Risk.

Effective: Spring 2011

Prerequisite: FIN 406

FIN 420 Investment and Portfolio Analysis (3) Investment and risk, types of security investments, sources of investment information, the broker, the stock market, portfolio management.

Effective: Spring 2008

Prerequisite: FIN 301

FIN 427 Derivative Securities (3) Introduction to futures contracts and options, leading to a working understanding of their importance in financial management applications.

Effective: Spring 2008

Prerequisite: FIN 420 or approval of program

FIN 430 Estate Planning (3) Liquidity planning, titling and transfer of property, trusts, federal unified tax system, gifting,

incapacity planning, legal documents.

Effective: Spring 2008

Prerequisite: ACCTG 310 and FIN 340

FIN 450 Retirement Planning (3) Retirement planning: qualified and non-qualified plans, characteristics, provisions, regulations administration, application approach with case studies.

Effective: Spring 2008

FIN 451 Intermediate Financial Management (3) Case studies are used to develop skills in solving a variety of financial management problems.

Effective: Spring 2010

Prerequisite: FIN 301

FIN 456 (IL) International Capital Markets (3) This course develops understanding of international capital markets by striking a balance between institutional details, theoretical foundation and practical application.

Effective: Spring 2008

Prerequisite: FIN 301

FIN 460 (R EST 460) Real Estate Financial Analysis (3) Debt and equity financing, capital structure, "creative financing," risk analysis, corporate asset management.

Effective: Summer 2005 Ending: Fall 2011

Prerequisite: FIN 305W

FIN 460 (R M 460) Real Estate Financial Analysis (3) Debt and equity financing, capital structure, "creative financing," risk analysis, corporate asset management.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: FIN 305W or R M 303 or R M 330W

FIN 461 Investments (3) Analysis and valuation of equity, debt, and alternative investments.

Effective: Spring 2010 Ending: Summer 2011

Prerequisite: FIN 301

FIN 461 Portfolio Management and Analysis (3) Investment policy and process, modern portfolio theory, portfolio construction, and portfolio performance measurement and evaluation.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: FIN 420

FIN 470 (R EST 470) Real Estate and Capital Markets (3) Analysis of publicly-traded real estate of both the equity, (REITs) and debt (MBSs) sides. The course also provides international perspectives.

Effective: Summer 2005 Ending: Fall 2011

Prerequisite: FIN 305W

FIN 470 (R M 470) Real Estate and Capital Markets (3) Analysis of publicly-traded real estate of both the equity, (REITs) and debt (MBSs) sides. The course also provides international perspectives.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: FIN 305W or R M 303 or R M 330W

FIN 471 International Finance (3) Financial decision making in an international environment. Emphasis on topics relevant to small businesses and entrepreneurs.

Effective: Spring 2010

Prerequisite: FIN 301

FIN 475 Financial Decision Making (3) Problems and cases in financial decision making for non-financial corporations and financial institutions.

Effective: Fall 2009

Prerequisite: FIN 302, FIN 420 and senior standing

FIN 481 Advanced Financial Analysis (3) Capstone course integrating financial analysis coursework. This course is based on the case study method which provides a challenging setting in which to apply business concepts.

Effective: Spring 2009

Prerequisite: ACCTG 426, FIN 405

FIN 489 Seminar in Finance (3) In-depth study of new trends, concepts, and practices in financial or portfolio management.

Effective: Spring 2008

Prerequisite: FIN 301 or equivalent; 3 additional credits of course work in Finance

FIN 494 Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2003

FIN 494H Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2008

FIN 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2008

Prerequisite: prior approval of proposed assignment by instructor

FIN 495A Nittany Lion Fund -- Lead Fund Manager Practicum (3 per semester/maximum of 6) Advanced work with the Nittany Lion Fund. Lead Fund Managers are accountable for sector and stock performance as well as reports. Students delegate work to Associate Fund Managers while focusing a great amount of attention to all aspects of stock pitches, weekly and quarterly reports, along with conducting weekly training session for new analysts.

Effective: Summer 2011

Prerequisite: FIN 395A and permission of program

FIN 495B Nittany Lion Fund - Executive Board Practicum (3 per semester/maximum of 6) Oversight of the Nittany Lion Fund (NLF) and its overall performance. Executive Board members and Directors are accountable for all aspects of the Nittany Lion Fund. Students interact with investors and are responsible for delivering professionally developed performance reports, weekly information updates, and annual shareholder meetings. Executive Board members assume specific duties within the NLF associated with their position, along with a shared responsibility for being a spokesperson for the fund.

Effective: Summer 2011

FIN 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

FIN 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

FIN 497D Trading Room Intern (1) Students work with financial databases in the Smeal Trading Room helping develop educational materials and assisting users.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

FIN 497E Entrepreneurial Finance (3) The most difficult task facing an entrepreneur when starting a new company is to acquire sufficient funds to grow the company. Entrepreneurial finance has little relationship to corporate finance and this course explores the unique options open to an entrepreneur to meet funding needs at different early stages. Students will interact with real companies to help them develop their financing plans including bootstrapping, grants, corporate partnering, angels, venture capital etc. The course is suitable for seniors with an ambition to start their own companies.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

FIN 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 2003

FIN 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2007

FIN 504 Problems in Finance (3-6) Planned individual projects involving library, laboratory, or field work.

Effective: Winter 1978

FIN 505 (I B 505) Multinational Managerial Finance (3) Analysis of the international aspects of managerial finance. Emphasis on the environmental and institutional factors influencing capital acquisition and allocation.

Effective: Winter 1978

Prerequisite: B A 531

FIN 506 Portfolio Theory and Policy (3) Rigorous examination and analysis of asset-holder behavior under conditions of risk and uncertainty.

Effective: Winter 1978

FIN 508 Analysis of Financial Markets (3) Analysis of factors affecting price determination in financial markets.

Effective: Winter 1978

FIN 510 Contemporary Issues in Financial Institutions (3) Critical investigation of problems of current interest in the market structure and internal operations of financial institutions.

Effective: Winter 1978

FIN 513 Speculative Markets (3) Analysis of derivative securities covering options, forwards, futures, OTC derivatives; topics include valuation, trading, hedging. Involves computer analysis.

Effective: Spring 1998

Prerequisite: B A 531

FIN 515 Nittany Lion Fund Manager (3) Focuses on applied issues and topics in the management of investments.

Effective: Summer 2008

FIN 531 Financial Management (3) An intensive examination of techniques available to aid the financial manager in decision making.

Effective: Spring 2006

Prerequisite: ACCTG 511 or ACCTG 512; B A 533, SC&IS 535

FIN 532 Financial Decision Processes (3) Financial decision making under uncertainty; positive and normative models and current issues in financial management.

Effective: Winter 1978

FIN 541 Security Analysis (3) Discussion and application of analytical techniques in security valuation, including use of computers.

Effective: Winter 1978

FIN 550 Financial Analysis and Valuation (2) Builds upon and reinforces the theoretical and institutional finance frameworks learned in introductory business finance.

Effective: Summer 2002

Prerequisite: B A 531

FIN 553 Financial Modeling (1) Develops technical financial modeling skills applying spreadsheets and simulation modeling software.

Effective: Summer 2002

Prerequisite: B A 531, FIN 550

FIN 555 (I B 555) Global Finance (1-3) Analyze international business finance problems, impact of evolving international payment systems on business, financial management in modern multinational enterprise.

Effective: Fall 2008

Prerequisite: FIN 550

FIN 561 Seminar in Finance (3-6) Comparative analysis of research in the theories of finance; relationships to business management practices.

Effective: Winter 1978

FIN 563 Financial Management Simulation and Corporate Interaction (2) An immersion experience in financial decision-making through a simulation exercise and interaction with senior financial officers.

Effective: Summer 2002

Prerequisite: FIN 571

FIN 565 Investment Management Portfolio Analysis Immersion (2) An intensive familiarization with the Smeal College Trading Room in combination with a visit to Wall Street trading rooms.

Effective: Summer 2002

Prerequisite: B A 550

FIN 570 Financial Modeling (2) Introduces and applies equity, debt, derivative models and computational techniques using Excel and Visual Basic for Applications.

Effective: Summer 2008

FIN 571 Strategic Financial Management (2) Comprehensive course in corporate finance and the strategic implications of various financial decisions.

Effective: Summer 2002

Prerequisite: B A 531, FIN 550

FIN 575 Venture Capital and Private Equity (2) An introduction to and an in-depth analysis of venture capital and private equity.

Effective: Summer 2002

Prerequisite: FIN 550

FIN 577 Financial Engineering and Corporate Strategy (2) Study and application of derivative strategies, financial innovation, and modern financial techniques to re-engineer risk exposure and enhance strategic opportunities.

Effective: Summer 2002

Prerequisite: FIN 571

FIN 581 Fundamentals of Financial Markets (2) Operation, structure of money, bond markets and concepts; and techniques used in evaluating and managing fixed income portfolios.

Effective: Summer 2002

Prerequisite: FIN 550

FIN 583 Modern Portfolio Management: Theory and Practice (2) Theoretical foundations and tools needed for structuring, managing, and monitoring the performance of an investment portfolio.

Effective: Summer 2002

Prerequisite: FIN 550, FIN 553, FIN 581

FIN 585 Financial Innovation and Portfolio Risk Management (2) Introduction to fundamental derivatives, standard valuation models, and practical applications to portfolio management; recognition, measurement, and management of portfolio risk.

Effective: Summer 2002

Prerequisite: FIN 550, FIN 553, FIN 581, FIN 583, FIN 587

FIN 587 Investment Management I (1) Applied issues and topics in the management of investments.
Effective: Summer 2002
Prerequisite: FIN 550

FIN 588 Investment Management II (1) Complex applied issues and topics in the management of investments.
Effective: Summer 2002
Prerequisite: FIN 550, FIN 587

FIN 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

FIN 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

FIN 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

FIN 597A Asset Pricing Theory (3) This course develops the theory of financial markets; topics include intertemporal portfolio choice, asset and option pricing models and determinants of cross-sectional stock returns.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

FIN 597C Research Methods (3) The class focuses on the empirical research methods, data, and econometrics used in the asset pricing subfields of financial economics.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

FIN 599 (IL) FOREIGN STUDY--FINANCE (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite: acceptance in established exchange program

FIN 600 Thesis Research (1-15) No description.
Effective: Fall 1983

FIN 601 PH.D. DISSERTATION FULL-TIME (0) NO DESCRIPTION.
Effective: Summer 1993

FIN 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Graduate students will be assigned on a selective basis teaching responsibilities in FIN 301, 305, and 306.
Effective: Spring 1984

FIN 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

FIN 611 PH.D. DISSERTATION PART-TIME (0) NO DESCRIPTION.
Effective: Summer 1993

Last Import from UCM: June 16, 2011 3:00 AM

Financial Services (FINSV)

FINSV 400 Investment Valuation for the Financial Services Professional (3) Approaches to investment strategies, investment decisions, and the valuation of corporate securities.

Effective: Summer 2002

Prerequisite: FIN 301

FINSV 411 Federal Income Taxation for the Financial Services Professional (3) Tax regulations, tax policy, tax determination, and tax planning applicable for personal/business decision making; emphasis on taxation of individuals.

Effective: Summer 2002

Prerequisite: ACCTG 211

FINSV 420 Estate Planning for the Financial Services Professional (3) Studies the processes relating to the use, conservation, and transfer of an individual's wealth; emphasizing investments, insurance and taxation.

Effective: Summer 2002

Prerequisite: FINSV 400, FINSV 411, INS 301

Last Import from UCM: June 16, 2011 3:00 AM

First-Year Seminar (CAP)

No courses for department code **CAP** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Food Science (FD SC)

FD SC 400 **Food Chemistry** (4) Chemical properties of food constituents as influenced by processing and storage.

Effective: Fall 2009

Prerequisite: CHEM 202 . Prerequisite or concurrent: B M B 211, B M B 212

FD SC 404 **Sensory Evaluation of Foods** (3) Sensory evaluation of food, methods of test analyses, panel selection and training, taste sensation theory, consumer testing methods.

Effective: Spring 2001

Prerequisite: STAT 250 Junior standing

FD SC 405 **Food Engineering Principles** (3) Engineering principles of importance to food manufacturing, including units, dimensions, mass and energy balance, fluid flow, rheology, heat transfer, and psychrometrics.

Effective: Spring 2009

Prerequisite: MATH 110, PHYS 250

FD SC 406 **Physiology of Nutrition** (3) Physiological mechanisms involved in thirst and appetite, digestion, absorption, utilization of nutrients, respiration, and body temperature regulation.

Effective: Spring 2001

Prerequisite: B M B 211

FD SC 407 **Food Toxins** (2) Microbiological and chemical aspects of food poisoning; toxicological principles; case histories and prevention of problems.

Effective: Winter 1978

Prerequisite: senior standing in food science or related majors

FD SC 408 **Food Microbiology** (2) Significance of microorganisms in food commodities, microbial spoilage, food-borne infections, and intoxication; methods of preservation, processing, and control.

Effective: Fall 2009

Prerequisite: MICRB 201, MICRB 202

FD SC 409W **Laboratory in Food Microbiology** (3) Methods of isolation, detection of spoilage, pathogenic microorganisms in foods; effects of processing and preservation on survival of food microorganisms.

Effective: Fall 2009

Prerequisite: MICRB 202 . Prerequisite or concurrent: FD SC 408

FD SC 410 **Chemical Methods of Food Analysis** (3) Qualitative and quantitative determinations of food constituents.

Effective: Spring 2001

Prerequisite: B M B 212, FD SC 400

FD SC 411 **Managing Food Quality** (2) Principles and applications of Hazard Analysis Critical Control Points. Statistical tools for the control and improvement of food quality.

Effective: Summer 1999

Prerequisite: FD SC 408, STAT 250

FD SC 413 **Science and Technology of Plant Foods** (3) Physical and chemical behavior of plant-based raw materials and ingredients, with emphasis on parameters influencing finished product quality.

Effective: Fall 2009

Prerequisite: FD SC 405, FD SC 400, FD SC 408, FD SC 410

FD SC 414 **Science and Technology of Dairy Foods** (3) Physical and chemical behavior of dairy-based raw materials and ingredients, with emphasis on parameters influencing finished product specifications.

Effective: Fall 2009

Prerequisite: FD SC 405, FD SC 400, FD SC 408, FD SC 410

FD SC 415 **Science and Technology of Muscle Foods** (3) Physical and chemical properties of muscle food commodities, with emphasis on muscle-based ingredients in formulated foods.

Effective: Fall 2009

Prerequisite: FD SC 405, FD SC 400, FD SC 408, FD SC 410

FD SC 417 **Food Laws and Regulations** (2) Historic and current aspects of government control of doing business with food (emphasis on the Food, Drug, and Cosmetic Act).

Effective: Summer 1989

Prerequisite: FD SC 200

FD SC 430 **Unit Operations in Food Processing** (3) Thermal processing, refrigeration, freezing, dehydration, and concentration in the food industry, including effects on food quality; food packaging; waste management.

Effective: Fall 2009

Prerequisite: FD SC 405, FD SC 400, FD SC 408

FD SC 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Summer 1992

Prerequisite: prior approval of proposed assignment by instructor

FD SC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

FD SC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

FD SC 497A **Bioactive Components in Foods** (2) Lecture course covering the occurrence, evidence for activity, potential uses, and safety of important classes of non-nutrient biologically-active food components.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

FD SC 500A **Fundamentals of Food Science - Microbiology** (1) Overview of the field of Food Science with the focus on microbiology.

Effective: Spring 2011

FD SC 500B **Fundamentals of Food Science - Engineering** (1) Overview of the field of Food Science with the focus on engineering.

Effective: Spring 2011

FD SC 500C **Fundamentals of Food Science - Chemistry** (1) Overview of the field of Food Science with the focus on chemistry.

Effective: Spring 2011

FD SC 500D **Fundamentals of Food Science - Nutrition** (1) Overview of the applications of nutrition in the field of Food Science.

Effective: Spring 2011

FD SC 501 **Research Methods in Food Science** (2) Planning and conducting research in food science including: problem definition, experimental design, collecting and recording data, and effective communication.

Effective: Summer 2002

FD SC 505 **Concepts of Product Development** (2) Procedures and problems encountered in the development of new and modified food products. Idea generation through development, testing, and commercialization.

Effective: Winter 1980

FD SC 506 **Flavor Chemistry** (3) Formation, analysis and release of flavors in food systems.

Effective: Fall 2003

Prerequisite: FD SC 400

FD SC 507 **Advanced Food Microbiology** (3) Roles of microorganisms in food preservation, spoilage, health and disease. Recent advances in detection, tracking and control of foodborne pathogens.

Effective: Spring 2004 Ending: Summer 2011

Prerequisite: FD SC 408 or FD SC 500 and a 400-level course either biochemistry or molecular biology

FD SC 507 **Advanced Food Microbiology** (3) Roles of microorganisms in food preservation, spoilage, health and disease. Recent advances in detection, tracking and control of foodborne pathogens.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: FD SC 408 or FD SC 500A and a 400-level course either biochemistry or molecular biology

FD SC 508 **Food Proteins** (3) Properties and uses of proteins in food systems.

Effective: Spring 1987

Prerequisite: BIOCH 401, FD SC 400

FD SC 510 **Carbohydrate Hydrocolloids** (3) Physicochemical behavior of edible carbohydrate hydrocolloids, with emphasis on starch and selected exudates, extracts, flours, and fermentation products.

Effective: Fall 1988

Prerequisite: BIOCH 401

FD SC 512 **Concepts in Food Microbiology** (3) In-depth analysis of the microbial response to environmental challenges including temperature, water activity, PH, atmosphere, and food preservatives.

Effective: Spring 1992

Prerequisite: FD SC 408

FD SC 514 **Food Physical Chemistry** (3) Physical principles underlying food structure and quality.

Effective: Summer 2004 Ending: Summer 2011

Prerequisite: FD SC 400 or FD SC 500

FD SC 514 **Food Physical Chemistry** (3) Physical principles underlying food structure and quality.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: FD SC 400 or FD SC 500C

FD SC 521 (AGBIO 521) **Food Defense: Prevention Planning for Food Processors** (3) Course prepares current and aspiring professionals to learn, recognize and apply measures to prevent intentional contamination of the food supply.

Effective: Summer 2010
Prerequisite: AGBIO 520

FD SC 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers.
Effective: Spring 1987

FD SC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on individual basis and fall outside the scope of formal courses.
Effective: Spring 1987

FD SC 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

FD SC 597G (NUTRN 597G) **Readings in Ingestive Behavior** (1) Students lead discussion of original research in the field of ingestive behavior with a focus on food intake in particular.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

FD SC 597G (NUTR 597G) **Readings in Ingestive Behavior** (1) Students lead discussion of original research in the field of ingestive behavior with a focus on food intake in particular.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

FD SC 597K (BB H 597K, NUTR 597K) **Food Addition: Fact or Fiction?** (3) Original literature using both human subjects and animal models relevant to the topic of food addiction will be discussed.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

FD SC 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

FD SC 601 **Ph.D. Dissertation Full Time** (0) No description.
Effective: Fall 1983

FD SC 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in the development of instructional materials, the organization and conduct of lectures/laboratories, the evaluation and counseling of students.
Effective: Fall 1983

FD SC 603 **Foreign Academic Experience** (1-12) Foreign study and/or research approved by the food science program constituting progress toward the degree.
Effective: Fall 2010

FD SC 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

FD SC 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Forensic Science (FRNSC)

FRNSC 400 Courtroom Proceedings and Testimony (1) Introduction to courtroom proceedings and testimony as they related to forensic science.

Effective: Spring 2008 Ending: Summer 2011

Prerequisite: FRNSC 201W andFRNSC 301 prerequisite or concurrent:FRNSC 401W

FRNSC 400 Courtroom Proceedings and Testimony (1) Introduction to courtroom proceedings and testimony as they related to forensic science.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: FRNSC 301 andFRNSC 302

FRNSC 401W Criminalistics II - Advanced Analysis and Crime Scene Investigation (4) Advanced concepts in criminalistics as they apply to criminal and civil investigations.

Effective: Spring 2011

Prerequisite: FRNSC 302 andFRNSC 421W or prerequisite or concurrentFRNSC 427W

FRNSC 421W Forensic Molecular Biology (3) Concepts and application of serology of molecular biology techniques to analyze biological evidence collected at crime scenes.

Effective: Spring 2009 Ending: Summer 2011

Prerequisite: B M B 442, B M B 400, B M B 401;FRNSC 302 or a 400-level biology or B M B course

FRNSC 421W Forensic Molecular Biology (3) Concepts and application of serology of molecular biology techniques to analyze biological evidence collected at crime scenes.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: B M B 442, B M B 400, B M B 401 andFRNSC 302 prerequisite or concurrentFRNSC 400

FRNSC 427W (CHEM 427W) Forensic Chemistry (4) Analytical and instrumental methods used in the forensic sciences with special emphasis on the analysis and characterization of trace evidence.

Effective: Spring 2008 Ending: Summer 2011

Prerequisite: CHEM 213 andCHEM 227

FRNSC 427W (CHEM 427W) Forensic Chemistry (4) Analytical and instrumental methods used in the forensic sciences with special emphasis on the analysis and characterization of trace evidence.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: CHEM 213, CHEM 227 andFRNSC 301 orCHEM 431W

FRNSC 475 Forensic Science Seminar (1) Presentation and discussion of special issues in forensic science; extension and application of background knowledge to unusual topics and cases.

Effective: Spring 2008

Prerequisite: Prerequisite or concurrent:FRNSC 401W

FRNSC 494 Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2008

FRNSC 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Spring 2008

FRNSC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2006

FRNSC 500 Principles of CSI and Criminalistics I (6) Principles of crime scene investigation and processing evidence in the laboratory; lecture, hands-on training exercises, and courtroom testimony preparation.

Effective: Spring 2007

Prerequisite: Admission into the Master of Professional Studies (MPS) in Forensic Science program

FRNSC 501 Criminalistics II (4) CSI investigation, criminalistics, and scene reconstruction with mock courtroom testimony.

Effective: Spring 2007 Ending: Fall 2011

Prerequisite: FRNSC 500

FRNSC 501 Criminalistics IIA (3) Advanced concepts of criminalistics and the role of the criminalist in a forensic investigation.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: FRNSC 500

FRNSC 502 Criminalistics IIB (3) Advanced laboratory analysis of biological evidence obtained from crime scenes and the role of a forensic biologist in forensic investigation.

Effective: Summer 2011

Prerequisite: FRNSC 500

FRNSC 532 Drug Chemistry and Toxicology (3) Chemical and toxicological properties of therapeutic and non-therapeutic drugs and the analytical and instrumental methods of their identification and quantification.
Effective: Spring 2010

FRNSC 541 Forensic Seminar Series (1) Advanced concepts in forensic science through presentation of journal articles, case studies, and research findings.
Effective: Spring 2009

FRNSC 561 Ethics in forensic Science (1) The ethics of forensic science, including issues of evidence handling, data analysis, and courtroom testimony.
Effective: Spring 2009

FRNSC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2006

FRNSC 801 Criminalistics III (4) Advanced CSI investigation, criminalistics, and scene reconstruction with mock courtroom testimony.
Effective: Spring 2011
Prerequisite: FRNSC 500 and FRNSC 501 or FRNSC 500

FRNSC 821 Forensic Molecular Biology II (4) Advanced concepts and application of molecular biology techniques to the analysis of biological evidence collected at crime scenes.
Effective: Spring 2008
Prerequisite: FRNSC 421W and FRNSC 500

FRNSC 831 Forensic Chemistry II (3) Advanced chemical techniques in forensic science, including examination of complex trace evidence and advanced instrumental analysis.
Effective: Spring 2008
Prerequisite: CHEM 427W and FRNSC 500

FRNSC 832 Forensic Drug Chemistry (3) Advanced chemical techniques in forensic science, including analytical and instrumental methods used in the analysis and characterization of drugs.
Effective: Spring 2007
Prerequisite: Prerequisite or concurrent: FRNSC 831

FRNSC 833 Forensic Toxicology (3) Advanced chemical techniques in forensic science, including the elements of industrial and environmental toxicology.
Effective: Spring 2007
Prerequisite: Prerequisite or concurrent: FRNSC 831

FRNSC 894 Research Projects in Forensic Science (1-12) Supervised student research projects identified on an individual or small-group basis.
Effective: Spring 2007

FRNSC 895 Internship (1-6) Supervised off-campus, non-group instruction, including field experiences, a practicum, or internships; written and oral critique of activity required.
Effective: Spring 2007

FRNSC 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 2007

Last Import from UCM: June 16, 2011 3:00 AM

Forest Technology (FORT)

No courses for department code **FORT** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Forestry (FOR)

FOR 401 Urban Forest Management (3) Uses and values of urban vegetation, open space, and wildlife; planning, financing, support, management, and administration of urban forestry programs.

Effective: Summer 1992

Prerequisite: three credits in business management or economics and six credits in biology forestry or plant materials

FOR 409 Tree Physiology (2) Fundamentals of the relationship of the basic physiological functions of forest trees to form.

Effective: Spring 1995

Prerequisite: BIOL 240W

FOR 410 Elements of Forest Ecosystem Management (3) Fundamentals of forest ecosystem management for goods and services.

Effective: Summer 1995

Prerequisite: 3 credits in both ecology and biology

FOR 416 Forest Recreation (3) The management and administration of multiple-use forest lands and wilderness for forest recreational experiences, with emphasis on public forests.

Effective: Spring 2001

Prerequisite: 3 credits in social or behavioral sciences

FOR 418 (US;IL) Agroforestry: Science, Design, and Practice (3) Agroforestry integrates trees in agricultural landscapes, and/or agriculture products into forested areas for multiple benefits.

Effective: Spring 2006

FOR 421 Silviculture (3) The application of the principles of forest ecology to control of establishment, composition, and growth of forest stands.

Effective: Fall 1984

Prerequisite: FOR 308, FOR 366

FOR 430 (W F S 430) Conservation Biology (3) The application of biological principles to issues in the conservation of biodiversity.

Effective: Spring 1995

Prerequisite: BIOL 220W or FOR 308

FOR 440 Forest Economics and Finance (3) The application of economic theory to forest resources systems, with emphasis on production and investment analyses.

Effective: Spring 2011

Prerequisite: ECON 102 or ECON 104

FOR 451 Artificial Intelligence and Expert Systems for Agriculture and Natural Resource Management (3) Application of artificial intelligence in agriculture and natural resources, with emphasis on expert systems.

Effective: Summer 2011

Prerequisite: one course in computer science or computer applications

FOR 455 Remote Sensing and Spatial Data Handling (3) Remote sensing systems, with emphasis on application to forest ecosystem analysis. Includes introduction to computer systems for spatial data handling.

Effective: Summer 2000

Prerequisite: MATH 110 3 credits in computer science 6 credits in ecological and/or geological sciences

FOR 466W Forest Resource Management (3) Optimum use of forest's tangible and intangible resources by application of financial and administrative management principles and management science techniques.

Effective: Spring 2001

Prerequisite: FOR 421 . Prerequisite or concurrent:FOR 440

FOR 470 Watershed Management (3) Management of wild land watersheds for control of the amount and timing of water yield, water quality, erosion, and sedimentation.

Effective: Summer 2000

Prerequisite: 3 credits in Soils

FOR 471 Watershed Management Laboratory (1) Introduction to hydrologic and climatic measurements and computations useful in watershed management.

Effective: Spring 1992

Prerequisite: or concurrent:FOR 470

FOR 475 Principles of Forest Soils Management (3) Effect of current forest management practices on the properties and productive capacity of forest soils.

Effective: Spring 1985

Prerequisite: FOR 308 3 credits in soils

FOR 480 Policy and Administration (3) Forest resources policy objectives; criteria and goals of society; policy implementation by ownership classes; planning, administration, and evaluation of programs.

Effective: Spring 2001

Prerequisite: FOR 200W 3 credits of social or behavioral science

FOR 488Y (IL) **International Forestry** (3) Forestry in global context, emphasizing developing countries: ecological, economic, technological, and political aspects.

Effective: Spring 2006

Prerequisite: E R M 413W, FOR 421 or INTAG 100

FOR 494 **Forestry Research** (3) Introduction to the theory, principles, and practices of forestry research; supervised research experience.

Effective: Summer 1995

Prerequisite: FOR 350, STAT 250

FOR 494H **Forestry Research** (3) Introduction to the theory, principles, and practices of forestry research; supervised research experience.

Effective: Fall 2007

Prerequisite: FOR 350, STAT 250

FOR 495 **Forestry Internship** (1-6) Supervised field experience related to the student's major.

Effective: Fall 1981

Prerequisite: approval of proposed assignment by instructor prior to registration.

FOR 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

FOR 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

FOR 497A **History of Logging Era in North Central Pennsylvania, Part I** (3) This course will focus on the rich history of the logging era in northcentral Pennsylvania from the 1850s to 1940.

Effective: Summer 2011 Ending: Summer 2011

FOR 497C **Environmental Science/Forestry** (3) This course will focus on skills used in the practice of forestry and will include hands-on activities in the field.

Effective: Summer 2011 Ending: Summer 2011

FOR 497D **History of Logging Era in North Central Pennsylvania, Part II** (3) This follows up to the History of Logging Era Part I covers the same time period but the emphasis shifts to specific topics.

Effective: Summer 2011 Ending: Summer 2011

FOR 497F **Forestry Management II** (3) This course deals with basic chain saw safety and harvesting techniques.

Effective: Summer 2011 Ending: Summer 2011

FOR 497F **Invasive Forest Plants** (3) A survey of common nonnative (exotic) herbs, forbs, shrubs, trees and vines that invade forested habitats, including riparian forests, in Pennsylvania and the region. Field identification, life history traits, ecosystem related challenges and problems, and control/management options are reviewed.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

FOR 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

FOR 508 **Forest Ecology** (3) The forest ecosystem, variations in space and time, classification, ordination techniques, dynamic aspects such as energy flow and nutrient cycling.

Effective: Winter 1978

FOR 512 **Forest Genetics** (3) Qualitative and quantitative genetic principles and research methods applied in tree breeding.

Effective: Winter 1978

FOR 517 **Forest Microclimatology** (3) A quantitative treatment of climate near the ground, with special reference to the role of forests and terrain.

Effective: Fall 2001

Prerequisite: three credits of physics

FOR 519 **Forest Hydrology** (3) Influence of forest cover on the disposition of precipitation and the application of hydrologic principles and techniques to forest watersheds.

Effective: Spring 1985

Prerequisite: FOR 308, C E 361

FOR 520 **Snow Hydrology** (2) Role of snow and ice in the hydrologic cycle, with special emphasis on effects of forests and land use.

Effective: Fall 1983

Prerequisite: FOR 470 or 3 credits of hydrology

FOR 521 **Advanced Silviculture** (3) Specific silvicultural practices for the establishment and manipulation of forest stands with respect to recent developments and research needs.

Effective: Fall 1984

Prerequisite: FOR 421

FOR 530 **Conservation Genetics** (3) Discussion of the use of genetic principles and technologies in the conservation and management of biological diversity.

Effective: Spring 2005

Prerequisite: FOR 430

FOR 550 **Multivariate Analysis in Forestry Research** (3) Analysis and interpretation of research data involving several response variables. Includes computational considerations for large data sets.

Effective: Fall 1983

FOR 555 **Multispectral Remote Sensing** (3) Computer analysis of data from nonimaging remote sensors as applied to mapping of natural resources and land use.

Effective: Fall 2001

Prerequisite: three credits of remote sensing

FOR 565 **GIS Based Socio-Ecological Landscape Analysis** (3) GIS-based socio-ecological analysis of landscape context for natural resources in relations to present and prospective patterns of land use.

Effective: Spring 2009

Prerequisite: one course each in intro GIS and statistics

FOR 570 **Watershed Stewardship Practicum I** (3) Application of integrated community-based watershed planning for water resources management.

Effective: Spring 2000

Prerequisite: enrollment in the Graduate Option in Watershed Stewardship

FOR 571 **Watershed Stewardship Practicum II** (3) Application of integrated community-based watershed planning for water resources management.

Effective: Spring 2000

Prerequisite: FOR 570 and enrollment in the Graduate Option in Watershed Stewardship

FOR 590 (W F S 590) **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Fall 2007

FOR 591A **Seminar in Watershed Stewardship Issues** (1) Exploration of watershed stewardship issues.

Effective: Spring 2000

Prerequisite: enrollment in the Graduate Option in Watershed Stewardship or by permission of the instructors

FOR 591B **Seminar in Watershed Stewardship Planning** (1) Exploration of watershed stewardship planning processes.

Effective: Spring 2000

Prerequisite: enrollment in the Graduate Option in Watershed Stewardship or by permission of the instructors

FOR 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

FOR 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

FOR 600 **Thesis Research** (1-15) No description.

Effective: Fall 1983

FOR 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Fall 1983

FOR 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Provides an opportunity for supervised and graded teaching experience in forestry courses.

Effective: Fall 1983

FOR 603 **Foreign Academic Experience** (1-12) Foreign study and/or research approved by the graduate program for students enrolled in a foreign university constituting progress toward the degree.

Effective: Spring 2011

FOR 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1983

FOR 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

1 This course is offered only at the Mont Alto Campus as part of the two-year Forest Technology major.

2 This course is offered only at the DuBois and Mont Alto Campus as part of the two-year Forest Technology and Wildlife Technology majors.

Last Import from UCM: June 16, 2011 3:00 AM

French (FR)

FR 401 (IL) **Advanced Oral Communication** (3) Emphasis on speaking and listening comprehension through discussion of current issues, using journalistic materials.

Effective: Spring 2006

Prerequisite: FR 201, FR 202

FR 402Y (IL) **Advanced Grammar and Writing** (3) Advanced study of the structure of the French language. Intensive essay writing.

Effective: Spring 2006

Prerequisite: FR 201, FR 202

FR 407 (IL) **Business Writing in French** (3) Common forms of business communication; writing of reports and abstracts.

Effective: Spring 2007

Prerequisite: FR 331 or FR 332

FR 408 (IL) **French-American Business Translation** (3) Translation from French to English of actual documents from the business world; theoretical consideration and systematic vocabulary building.

Effective: Spring 2007

Prerequisite: FR 407

FR 409 (IL) **Commercial and Technical Translation** (3) Translation from English to French of commercial and technical materials; vocabulary building; writing of abstracts and summaries.

Effective: Spring 2006

Prerequisite: FR 402Y

FR 410 (IL) **French Press** (3) Extensive readings of selected French daily and weekly newspapers and magazines, along with newscast viewings.

Effective: Spring 2007

Prerequisite: FR 331 or FR 332

FR 416 (IL) **Introduction to French Linguistics** (3) Introduction to the theory and methods of linguistics as they apply to the major subfields.

Effective: Spring 2006

FR 417 (IL) **French Phonology** (3) A formal study of the sound pattern of French.

Effective: Spring 2007

Prerequisite: FR 201, FR 202

FR 418 (IL) **French Syntax** (3) A formal theory of word order and related issues in French grammar.

Effective: Spring 2006

Prerequisite: FR 201 and FR 202

FR 419 **French Seminar** (3) The study of meaning in human language with a special focus on how it is encoded in French.

Effective: Summer 2011

Prerequisite: FR 316

FR 422 (IL) **Old French Literature** (3) Medieval masterpieces in original and modern French versions.

Effective: Fall 2006

Prerequisite: FR 351 or FR 352

FR 426Y (IL) **French Literature of the Renaissance** (3) Survey of key texts from sixteenth century France, with attention to historical and philosophical currents of French social thought.

Effective: Fall 2006

Prerequisite: FR 351 or FR 352

FR 430 (IL) **Contemporary France** (3) Study of contemporary French society, politics, and culture from 1870 to the present.

Effective: Spring 2006

Prerequisite: FR 330

FR 436Y (IL) **Readings in Seventeenth-Century French Literature** (3) Baroque and classicism: reappraisal of major and lesser-known 17th-century texts and theories.

Effective: Fall 2006

Prerequisite: FR 351 or FR 352

FR 440 (IL) **Teaching of Romance Languages** (3) Theories of second language acquisition. Current classroom practices in the teaching of Romance languages.

Effective: Spring 2006

Prerequisite: 15 credits beyond the elementary level

FR 445Y (IL) **Self and Society in Eighteenth-Century France** (3) The changing relationship of the individual to society in pre-Revolutionary France will be explored in texts by major writers.

Effective: Spring 2006

Prerequisite: FR 351 . Prerequisite or concurrent: FR 352

FR 452Y (IL) **Nineteenth-Century French Literature** (3) Selected readings in romanticism, realism, and symbolism,

including Balzac, Stendhal, Sand, Baudelaire, and others, with emphasis on cultural issues.

Effective: Fall 2006

Prerequisite: FR 351 orFR 352

FR 453Y (IL) **La Belle Epoque: Politics, Society, and Culture in France, 1880-1914** (3) Interdisciplinary perspectives on the politics, society, and culture of France, 1880-1914.

Effective: Fall 2006

Prerequisite: FR 330 orFR 351 orFR 352

FR 458 (IL) **African Literature of French Expression** (3) Genesis of Franco-African literature in the 1930s; phases of the negritude movement; colonial and national literature.

Effective: Fall 2006

Prerequisite: FR 351 orFR 352

FR 460 (IL) **Contemporary French Literature** (3) Major authors and movements in French novel, drama, and poetry from Proust to the present.

Effective: Fall 2006

Prerequisite: FR 351 orFR 352

FR 470 (IL) **Race and Gender Issues in Literatures in French** (3) A critical presentation, taught in French, of changing ideas and values on race and gender in French and Francophone literatures.

Effective: Summer 2005

Prerequisite: FR 351 orFR 352

FR 471 (IL) **Francophone Women in Literature and Culture** (3) Women's issues in literatures and cultures of French-speaking countries in Europe, the mediterranean, Africa, the Caribbean, and Quebec.

Effective: Summer 2005

Prerequisite: FR 351 orFR 352

FR 487 (IL) **Topics in French Film History and Theory I: 1895-1945** (3) Provide background needed to understand the broad outlines of French film history and theory in their first fifty years (1895-1945).

Effective: Spring 2006

Prerequisite: FR 351 andFR 352 orCOMM 250

FR 488 (IL) **Topics in French Film History and Theory II: 1945-2002** (3) Provide background needed to understand the broad outlines of French film history and theory in their second half-century (1945-2002).

Effective: Spring 2006

Prerequisite: FR 351 andFR 352 orCOMM 250

FR 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

FR 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

FR 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Summer 1998

Prerequisite: prior approval of proposed assignment by instructor

FR 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

FR 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

FR 499 (IL) **Foreign Study--French** (3-12) Advanced studies in French language and literature.

Effective: Summer 2005

Prerequisite: FR 201, FR 202

FR 500 **History of the French Language** (3) Evolution of French from its origins to the present-day, with emphasis on Old French philology.

Effective: Fall 1984

FR 502 **Introduction to French Linguistics** (3) An overview of the major subfields of linguistics as they apply to the French language.

Effective: Spring 1997

FR 503 **French Phonology** (3) A theoretical approach to the sound structure of French.

Effective: Spring 2007

FR 504 **French Syntax** (3) An in-depth study of sentence structure in the French language.
Effective: Fall 2004

FR 505 **Semantics of French** (3) An in-depth study of how meaning is computed based on French data.
Effective: Spring 2007

FR 508 **French Business Communications** (3 per semester/maximum of 6) Written and oral elements of French commerce and industry.
Effective: Fall 1983
Prerequisite: FR 510

FR 510 **Stylistique Avancee** (3) An introduction to literary creativity through practice of textual analysis, interpretation, and to basic concepts of contemporary poetics.
Effective: Summer 1999

FR 511 **Readings in Old French** (3 per semester/maximum of 6) A survey of French literature to 1300, focusing in alternate semesters on either the twelfth or the thirteenth century.
Effective: Fall 1983

FR 518 **Medieval French Drama** (3) The development of French drama from its liturgical origins to the flourishing comic theatre of the late Middle Ages.
Effective: Winter 1978

FR 526 **Age of Rabelais** (3) Notions of literary creativity in the context of early sixteenth-century French Humanism; readings from Rabelais, Marguerite de Navarre, Sceve.
Effective: Fall 1983

FR 528 **Age of Montaigne** (3) Literary culture of Renaissance France in the context of social and political crisis; readings from Montaigne, DuBellay, Ronsard, and Sponde.
Effective: Winter 1978

FR 529 **Seminar in Renaissance Literature** (3 per semester/maximum of 6) Intensive study of various French Renaissance writers in relation to selected artistic issues of the period.
Effective: Fall 1983

FR 530 **La France Contemporaine** (3) A comprehensive cross-sectional view of French society and its institutions since World War II.
Effective: Winter 1980

FR 531 **Francophone Culture** (3 per semester/maximum of 6) Concept of francophone; French minorities in Europe and North America; role of French language in Africa, Middle East, Far East.
Effective: Fall 1983

FR 532 **French Regions and Regionalisms** (3) Interdisciplinary perspectives on the culture, history, and geography of the French regions and their regionalist identity movements.
Effective: Spring 1992

FR 533 **Baroque Aesthetics in Seventeenth-Century French Literature and Intellectual History** (3) Based on the Foucauldian notion of episteme, the course analyzes major literary texts and intellectual trends.
Effective: Fall 1999

FR 534 **Seventeenth-Century French Drama** (3) Theories and practice of theater through analysis of dramatic texts by Rotrou, Corneille, Moliere, Racine et les autres.
Effective: Summer 1999

FR 535 **Texts and Performances** (3) Based upon current theories of theater, the course focuses on problematics of French drama from the Seventeenth-Century to the present.
Effective: Summer 1999

FR 540 **Eighteenth-Century French Novel** (3) Examination of the rise of the genre including formal considerations of narrative technique as well as historical context.
Effective: Summer 1999

FR 541 **The Encyclopedie and Knowledge in 18th-Century France** (3) Exploration of intellectual currents in epistemology, metaphysics, social and political thought, ethics, and aesthetics in eighteenth-century France.

Effective: Fall 1999

FR 543 Seminar: Studies in the Enlightenment (3 per semester/maximum of 6) Discourse and thematic analysis of selected works of French Enlightenment genres: essay, drama, fiction, poetry.

Effective: Fall 1983

FR 545 Analysis of French Civilization (3 per semester/maximum of 6) French cultural aspects, other than language and literature, conducted in French with the collaboration of specialists outside the French department.

Effective: Summer 1990

FR 547 Modernism and Postmodernism (3-6) Interdisciplinary approaches to these concepts, with a focus on artistic and literary objects in the French context.

Effective: Spring 1994

Prerequisite: FR 545 or FR 571 or FR 580

FR 558 African Novel in French (3) Development of novel in French from colonial era to independence; Africanization of genre with African verbal artforms.

Effective: Spring 1986

FR 559 Issues in Francophone Literatures (3) Diversity issues in Francophone literatures explored through various literary genres: variable focus may combine genre and topic.

Effective: Spring 1997

FR 562 French Romanticism and Realism (3) Romanticism, realism, and their variations in the context of social and political revolution.

Effective: Spring 1998

FR 564 Figures of Alterity in Nineteenth-Century French Literature (3) Representations of otherness in nineteenth-century French literature examined through race, gender, religion, and class paradigms.

Effective: Spring 1998

FR 565 Seminar: Nineteenth-Century Studies (1-6) Various nineteenth-century French writers considered in relation to selected esthetic and cultural problems raised during the period.

Effective: Fall 1983

FR 566 Women Writers in Nineteenth-Century France (3) Women's literary production in nineteenth-century France, including novels, poetry, travel narratives, children's literature, and essays.

Effective: Spring 1995

FR 569 Major Texts of Twentieth-Century French Literature (3-6) Established contemporary literary texts, figures, and aesthetic movements in various genres from Proust to Sartre and from Genet to Conde.

Effective: Summer 1999

FR 570 Modern French Poetry (3 per semester/maximum of 6) Exploration of the poetic genre and its diversification through poetic prose, free verse, and metaphorical narrative, from Baudelaire to Cixous.

Effective: Summer 1999

FR 571 French Literary Theory and Criticism (3) Major trends in contemporary theory and criticism from genre debates to socio-political approaches to literature, post-structuralism, deconstruction, and reception theories.

Effective: Summer 1999

FR 572 Seminar: Twentieth-Century French Literature (3 per semester/maximum of 6) Specialized consideration of contemporary writers; for advanced students.

Effective: Fall 1983

FR 574 French Folklore and Popular Culture (3) Historical survey of French folklore and popular culture, with an emphasis on the modern period.

Effective: Summer 1993

FR 580 Approaches to French Civilization (3) French interdisciplinary methods of cultural analysis and cultural history, with applications to French cultural artifacts.

Effective: Spring 1992

FR 581 Theory and Techniques of Teaching French (1-6) No description.

Effective: Fall 1983

FR 583 Reading and Foreign Language Acquisition: Research and Practice (3) Approaches to the study and teaching of reading in University departments of French; materials development practicum.
Effective: Spring 1992

FR 584 Testing French as a Foreign Language: Research and Practice (3) Theoretical and practical approaches to problems in the testing of undergraduate French as a foreign language.
Effective: Spring 1992

FR 585 The Curriculum in the Pedagogy and Acquisition of French as a Foreign Language (3) Approaches to the study and development of the undergraduate curriculum of French as a foreign language.
Effective: Spring 1992

FR 586 Research Methods and Bibliography in French Civilization (1) Introduction to research resources and skills in interdisciplinary French cultural studies and specific subfields of French and Francophone culture/ civilization.
Effective: Spring 1992

FR 587 Research Techniques and Bibliography in French Language and Literature (1-3) No description.
Effective: Fall 1983

FR 589 (CMLIT 589, GER 589, SPAN 589) Technology in Foreign Language Education: An Overview (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with APLNG 589)
Effective: Spring 2004

FR 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

FR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

FR 600 Thesis Research (1-15) No description.
Effective: Fall 1983

FR 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

FR 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Activities to be included in the teaching assignment will be lecturing, leading discussions, conducting recitations, correcting and grading student papers and examinations.
Effective: Fall 1983

FR 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 1999

FR 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

FR 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Fuel Science (F SC)

F SC 401 Introduction to Fuel Technology (3) An introduction to the scientific and engineering principles of fuel technology. For non-fuel science majors; fuel science majors will not receive credit.

Effective: Summer 2007

Prerequisite: CHEM 112, PHYS 211

F SC 431 The Chemistry of Fuels (3) Nature and properties of fossil and other fuels, including aerospace, in relation to use; preparation of fuels; by-products; fuel analysis.

Effective: Spring 2008

Prerequisite: CHEM 210; EGEE 302 or equivalent

F SC 432 (CH E 432) Petroleum Processing (3) A study of physical and chemical processes to convert crude oil into desired products with an outlook from present to future.

Effective: Summer 2007

Prerequisite: CHEM 210

F SC 435 Industrial Organic Chemistry (3) Chemistry and processes for producing organic chemicals and materials in existing and emerging new manufacturing sectors of organic chemical industry.

Effective: Summer 2011

Prerequisite: CHEM 210

F SC 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2000

F SC 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

F SC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1999

F SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 1999

F SC 503 Analytical Methods in Fuel Science (3) Analytical and characterization methods used in fuel science and applied to fuel processing, combustion, and conversion are emphasized.

Effective: Spring 2009

Prerequisite: EGEE 430, F SC 431 or equivalent

F SC 504 Problems in Fuels Engineering (3) A problem-based, active learning course on the utilization of fossil fuels and renewable energy.

Effective: Fall 2009

Prerequisite: EGEE 430 and F SC 431

F SC 506 Carbon Reactions (3) Current approaches to heterogeneous reactions in combustion and gasification of carbonaceous solids, including those derived from coal and petroleum sources.

Effective: Spring 1999

Prerequisite: CHEM 452

F SC 590 (EME 590, MNG 590, P N G 590) Colloquium (1-3) Continuing seminars which consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.

Effective: Spring 2009

F SC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1999

F SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1999

F SC 600 Thesis Research (1-15) No description.

Effective: Spring 1999

F SC 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Spring 1999

F SC 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Spring 1999

F SC 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Spring 1999

Last Import from UCM: June 16, 2011 3:00 AM

Geo-Environmental Engineering (GEOEE)

GEOEE 404W Surface and Interfacial Phenomena in Geo-Environmental Systems (3) Principles underlying surface and interfacial phenomena with application to mineral processing and geo-environmental systems.

Effective: Fall 2009 Ending: Fall 2011

Prerequisite: or concurrent: EME 301 or MATSE 401; GEOEE 412

GEOEE 406 Sampling and Monitoring of the Geo-Environment (3) Issues of sampling, analysis, monitoring and control techniques for effective environmental management in the extractive industries.

Effective: Spring 1999 Ending: Spring 2012

Prerequisite: MN PR 301, MNG 401, P N G 411

GEOEE 408 Contaminant Hydrology (3) Groundwater flow and transport; agents of contamination; aquifer characterization and remediation; case studies.

Effective: Spring 2002

Prerequisite: GEOSC 452

GEOEE 412 Geo-Environmental Engineering Laboratory (1) A laboratory study of the principles involved in the characterization and remediation of process wastes. Those students who are scheduled for MN PR 413 may not take this course.

Effective: Spring 1999 Ending: Spring 2012

Prerequisite: or concurrent: MN PR 301

GEOEE 427 Pollution Control in the Process Industries (3) Development of multimedia pollution control strategies for the mineral, metallurgical processing, and fossil fuel industries.

Effective: Summer 2007 Ending: Fall 2011

Prerequisite: or concurrent: CHEM 112, MATH 250 or MATH 251, MN PR 301

GEOEE 480 GeoEnvironmental Engineering Process Design (3) An integrated problem-based learning experience that utilizes fundamental concepts covered in the curriculum to design a geo-environmental system.

Effective: Fall 2004 Ending: Spring 2012

Prerequisite: GEOEE 427 minimum of seventh-semester standing in Environmental Systems Engineering

GEOEE 494 Senior Thesis (1-6) Independent research and/or design projects under the supervision of the interdisciplinary Environmental Systems Engineering program.

Effective: Fall 2004 Ending: Spring 2012

Prerequisite: seventh-semester standing in Environmental Systems Engineering

GEOEE 494H Senior Thesis (1-6) Independent research and/or design projects under the supervision of the interdisciplinary Environmental Systems Engineering program.

Effective: Fall 2007 Ending: Spring 2012

Prerequisite: seventh-semester standing in Environmental Systems Engineering

GEOEE 557 (MNG 557) Computational Geomechanics I (3) Finite element and boundary element analysis of rock mechanics, groundwater flow, and mass transport.

Effective: Summer 2002

GEOEE 559 (MNG 559) Consolidation of Porous Media (2) Coupled fluid flow and deformation behavior of geologic media. Theory and applications in geological, environmental, and petroleum engineering.

Effective: Summer 2002

Prerequisite: MNG 557

GEOEE 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 1999

GEOEE 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1999

GEOEE 597 Special Topics (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1999

GEOEE 600 Thesis Research (1-15) No description.

Effective: Spring 2000

GEOEE 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Spring 2000

GEOEE 610 Thesis Research Off-Campus (1-15) No description.

Graduate Bulletin Archive - 2011

2010 - 2011

Effective: Spring 2000

GEOEE 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Spring 2000

Last Import from UCM: June 16, 2011 3:00 AM

Geography (GEOG)

GEOG 407 (HIST 453) American Environmental History (3) The history of the ways Americans have used and thought about the environment since 1500.

Effective: Spring 1998

Prerequisite: GEOG 030, LARCH 003 ; and HIST 020 or HIST 021 ; or 6 credits in the humanities or social sciences

GEOG 411 Forest Geography (3) This course studies processes that control spatial and temporal change in forests.

Effective: Fall 2007

Prerequisite: GEOG 010, GEOG 111 ; or BIOL 220W

GEOG 411W Forest Geography (3) This course studies processes that control spatial and temporal change in forests.

Effective: Fall 2007

Prerequisite: GEOG 010, GEOG 111 ; or BIOL 220W

GEOG 412W Climatic Change and Variability (3) Theories and observations of past, present, and future climatic change and variability; introduction to techniques used in climatic change research.

Effective: Spring 2007

Prerequisite: GEOG 110 or METEO 003

GEOG 417 Satellite Climatology (3) A discussion of the application of satellite data to current and planned large-scale climate experiments.

Effective: Spring 2007

Prerequisite: GEOG 362

GEOG 420Y (US;IL) Metropolitan Analysis (3) Theory and practice of regional and metropolitan analysis.

Effective: Spring 2007 Ending: Summer 2011

Prerequisite: GEOG 120, GEOG 160

GEOG 420Y (US;IL) Comparative Urbanism (3) This course investigates selected urban issues through the lens of comparative urbanism.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: GEOG 120, GEOG 160

GEOG 423Y (US) Historical Geography of North America (3) Exploration, settlement, and changing patterns of human occupancy from the seventeenth century to the 1930's.

Effective: Spring 2007 Ending: Summer 2011

Prerequisite: GEOG 122 3 additional credits in geography or 6 credits

GEOG 423Y (US) Historical Geography of North America (3) Exploration, settlement, and changing patterns of human occupancy from the seventeenth century to the 1930's.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: GEOG 122 3 additional credits in geography or 6 credits American history

GEOG 424 (US;IL) Geography of the Global Economy (3) Focus on industrial location theory, factors in industrial location, studies of selected industries and problems of industrial development.

Effective: Spring 2011

Prerequisite: ECON 102, ECON 104, GEOG 126

GEOG 425 Geography of Race, Class, and Poverty in America (3) This class will study the geography of race, class, and poverty in America today.

Effective: Spring 2007 Ending: Summer 2011

Prerequisite: GEOG 126 and ECON 002 and ECON 004

GEOG 425 (US) Geography of Race, Class, and Poverty in America (3) This class examines the spatial interactions of race, class and poverty in the United States.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: GEOG 126; ECON 102 or ECON 104

GEOG 426Y (US;IL) (WMNST 426Y) Gender and Geography (3) Description and explanation of the links between gender relations and spatial structures.

Effective: Summer 2011

Prerequisite: GEOG 020 or GEOG 126 or GEOG 120 or WMNST 001

GEOG 427 (US;IL) Urban Historical Geography (3) Study of the development and transformation of the historical urban built environment.

Effective: Spring 2007

Prerequisite: 6 credits in geography humanities or social sciences

GEOG 428 (US) Political Geography (3) Geographical foundations of political phenomena; significant geographic factors in growth and development of states, boundary problems, population distribution, colonies, and internal and international regional problems.

Effective: Spring 2007

Prerequisite: 6 credits in history or 6 credits in political science

GEOG 429 (US) Global Urbanization (3) This course reflects critically on a number of issues related to global urbanization, including the culture and political economy of urban space.

Effective: Spring 2007 Ending: Fall 2011
Prerequisite: GEOG 020, GEOG 126 or GEOG 120

GEOG 429 (US;IL) Geographic Perspectives on Global Urbanization (3) This course reflects critically on a number of issues related to global urbanization, including the culture and political economy of urban space.
Effective: Spring 2012 Future: Spring 2012
Prerequisite: GEOG 020, GEOG 126 or GEOG 120

GEOG 430 Human Use of Environment (3) The human use of resources and ecosystems and social causes and consequences of environmental degradation in different parts of the world; development of environmental policy and management strategies.
Effective: Fall 2008
Prerequisite: GEOG 010 or GEOG 020 or GEOG 030 or GEOG 040 or GEOG 130 or permission of the program

GEOG 431 Geography of Water Resources (3) Perspectives on water as a resource and hazard for human society; water resource issues in environmental and regional planning.
Effective: Spring 2007
Prerequisite: 6 credits in geography or natural sciences

GEOG 432 (EME 432) Energy Policy (3) Analysis, formulation, implementation, and impacts of energy-related policies, regulations, and initiatives.
Effective: Summer 2010
Prerequisite: E B F 200, EGEE 120, PL SC 490

GEOG 434 Politics of the Environment (3) This course explores politics related to the use, transformation, valuation, and representation of the environment.
Effective: Spring 2007
Prerequisite: 6 credits in social sciences or humanities

GEOG 435H (IL) Global Change and Sustainability - Bulgaria (3) Sustainability in the context of climate change, global socioeconomic change and regional transformation in Bulgaria; embedded foreign fieldwork (honors).
Effective: Summer 2008
Prerequisite: sophomore standing or above; departmental permission required

GEOG 436 Ecology, Economy, and Society (3) Analyses of major themes in ecology and economic development, poverty-alleviation, and sustainability.
Effective: Summer 2006
Prerequisite: upper-division standing

GEOG 438W Human Dimensions of Global Warming (3) Human dimensions of global environmental change: human causes; human adaptations; and policy implications of global warming.
Effective: Fall 2008 Ending: Fall 2011
Prerequisite: EARTH 002, GEOG 010 or METEO 003; GEOG 030

GEOG 438W Human Dimensions of Global Warming (3) Human dimensions of climate change: human causes, human consequences, and policy implications of global warming.
Effective: Spring 2012 Future: Spring 2012
Prerequisite: EARTH 002, GEOG 010 or METEO 003; GEOG 030

GEOG 439 Property and the Global Environment (3) This course reviews theoretical and empirical relationships between multiple legal, economic, and cultural approaches to property, and environmental quality and conflicts.
Effective: Summer 2006
Prerequisite: 6 credits in geography humanities or social sciences

GEOG 440 Topics in Regional Geography (3) Analysis of historical, contemporary and future environmental and societal issues in a specified world region from a geographical perspective.
Effective: Summer 2006
Prerequisite: 3 credits in physical geography 3 credits in human geography

GEOG 444 African Resources and Development (3) Ecological and cultural factors in the geography of Africa; natural resources and development.
Effective: Spring 2001
Prerequisite: GEOG 010, GEOG 020, GEOG 030 or GEOG 124

GEOG 461W Dynamic Cartographic Representation (3) Theory and practice of mapping and geo-representation in a dynamic media context. Applications in science, policy, travel, and education.
Effective: Spring 2010
Prerequisite: GEOG 361 or GEOG 362 or GEOG 363

GEOG 463 Geospatial Information Management (3) This course examines geospatial data representations and algorithmic techniques that apply to spatially-organized data in digital form.
Effective: Spring 2007 Ending: Summer 2011
Prerequisite: any earth science computer application course; familiarization with databases and information systems

GEOG 463 Geospatial Information Management (3) This course examines geospatial data representations and algorithmic techniques that apply to spatially-organized data in digital form.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: GEOG 363

GEOG 464 Analysis and GIS (3) Normative and probabilistic models of spatial behavior; adaptive systems in geographic space; interaction and system stability.

Effective: Spring 2007 Ending: Fall 2011
Prerequisite: GEOG 364

GEOG 464 Advanced Spatial Analysis (3) Skills and knowledge for applying quantitative methods to analyze information with spatial distributions.

Effective: Spring 2012 Future: Spring 2012
Prerequisite: GEOG 364

GEOG 467 Applied Cartographic Design (3) Applied computer-assisted map production methods with emphasis on geographic information design and color use for multiple presentation media.

Effective: Spring 2007 Ending: Summer 2011
Prerequisite: GEOG 361

GEOG 467 Applied Cartographic Design (3) Project-based map production problems with emphasis on map design and advanced mapping tools in geographic information systems.

Effective: Fall 2011 Future: Fall 2011
Prerequisite: GEOG 361

GEOG 468 Geographic Information Systems Design and Evaluation (3) Design and evaluation of Geographic Information Systems and other forms of integrated spatial data systems.

Effective: Spring 2007
Prerequisite: GEOG 363

GEOG 469 Energy Industry Applications of GIS (3) Roles of geographic information systems in energy siting decisions focusing on electric energy transmission networks.

Effective: Summer 2010
Prerequisite: GEOG 030, EGEE 102, EME 444

GEOG 475H (LER 475H) Labor in the Global Economy: U.S. and South African Perspectives (3) This course focuses on how the nature of work is changing in the global economy, and the implications for economic opportunity and inequality in both.

Effective: Spring 2008
Prerequisite: a minimum of 12 GEOG or LER credits before taking the course (or permission of the program).

GEOG 482 The Nature of Geographic Information (2) Orientation to the properties of geographic data and the practice of distance learning.

Effective: Summer 2004
Prerequisite: admission to the Master of GIS program or Certificate Program in GIS

GEOG 483 Problem-Solving with GIS (3) How geographic information systems facilitate data analysis and communication to address common geographic problems.

Effective: Summer 2004
Prerequisite: GEOG 482

GEOG 484 GIS Database Development (3) Database design, creation, maintenance, and data integration using desktop GIS software.

Effective: Summer 2004
Prerequisite: GEOG 483

GEOG 485 GIS Programming and Customization (3) Customizing GIS software to extend its built-in functionality and to automate repetitive tasks.

Effective: Fall 2007
Prerequisite: GEOG 363 or GEOG 484; CMPSC 101 or equivalent

GEOG 486 Cartography and Visualization (3) Theory and practice of cartographic design emphasizing effective visual thinking and visual communication with geographic information systems.

Effective: Summer 2004
Prerequisite: GEOG 484

GEOG 487 Environmental Applications of GIS (3) Real-world applications of GIS and spatial analysis to investigate a variety of current environmental issues.

Effective: Spring 2010
Prerequisite: GEOG 484

GEOG 488 Acquiring and Integrating Geospatial Data (3) Advanced technical, legal, ethical and institutional problems related to data acquisition for geospatial information systems.

Effective: Summer 2004
Prerequisite: GEOG 484

GEOG 489 GIS Application Development (3) Advanced topics in GIS customization, including the Systems Development Life Cycle, packaging and deployment, and consuming Web services.

Effective: Summer 2004
Prerequisite: GEOG 485

GEOG 493 Service Learning (3-12) Classroom instruction with supervised student activity on a group community service project.

Effective: Summer 2006
Prerequisite: sophomore standing; 6 credits of social or environmental science

GEOG 494 Research Project in Geography (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2006

Prerequisite: prior approval of program

GEOG 494H Research Project in Geography (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

Prerequisite: prior approval of program

GEOG 495 Internship (1-13) Supervised off-campus, non-group instruction including individual field experience, practicums, or internships. Written and oral critique of activity required.

Effective: Fall 1981

Prerequisite: prior approval of proposed assignment by instructor

GEOG 495B Geography Teaching Internship (1-10) Supervised undergraduate teaching experience in which students serve as peer tutors, laboratory assistants, or course material developers.

Effective: Summer 2004

GEOG 495C Internship Supervision and Mentoring (1) Candidates for the Master of GIS degree sponsor a GIS-related internship for students in Penn State's resident undergraduate program.

Effective: Summer 2004

GEOG 495G Giscience Internship (1-10) Supervised research experience within the Department of Geography's GeoVISTA Center, Gould Center, or an appropriate external agency.

Effective: Spring 2007

Prerequisite: GEOG 160

GEOG 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

GEOG 496C Individual Studies (3) Individual project work supervised by a faculty member on a topic of mutual interest in geography and geographic information science in areas in which the department does not normally offer coursework.

Effective: Summer 2011 Ending: Summer 2011

GEOG 496C Individual Studies (3) Individual project work supervised by a faculty member on a topic of mutual interest in geography and geographic information science in areas in which the department does not normally offer coursework.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

GEOG 497A Neogeography Using Google Earth and GigaPan (3) Neogeography provides an understanding of the role and purpose of new technologies (Google Earth, GigaPan) and their abilities to be used for research and outreach purposes in a geospatial context.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOG 497D Lidar Technology and Applications (3) Understanding lidar systems' design, operation, data processing techniques, and product generation to address typical application scenarios faced by the geospatial professional.

Effective: Summer 2011 Ending: Summer 2011

GEOG 497D Lidar Technology and Applications (3) Understanding lidar systems' design, operation, data processing techniques, and products generation to address typical application scenarios faced by the geospatial professional.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOG 497D Lidar Technology and Applications (3) Understanding lidar systems' design, operation, data processing techniques, and product generation to address typical application scenarios faced by the geospatial professional.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

GEOG 497F Conceptual Modeling & Programming in G.I.Science (3) Project-based course introducing major modeling paradigms, design decisions, and object-oriented programming from a Geographic Information Science perspective.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: GEOG 363 ; and little/no programming experience

GEOG 497G Human Factors in Geographic Information Science (3) Introduction to the increasingly important aspects of human factors (also called cognitive ergonomics) in Geographic Information Science.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOG 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1998

GEOG 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2006

Prerequisite: prior approval of program

GEOG 500 Introduction to Geographic Research (1-3) No description.

Effective: Spring 1981

GEOG 501A Research Perspectives in Physical Geography (1) This course presents contemporary perspectives on Physical Geography, emphasizing the major issues and integrative themes of the sub-discipline.

Effective: Summer 2008

GEOG 501B Research Perspectives in Human Geography (1) This course presents contemporary perspectives on Human Geography, emphasizing the major issues and integrative themes of the sub-discipline.

Effective: Fall 2007

GEOG 501C Research Perspectives in Human-Environment Geography (1) Contemporary perspectives on Human-Environment Geography, emphasizing major issues and integrative themes of the sub-discipline.

Effective: Summer 2008

GEOG 501D Research Perspectives in GIScience (1) This course presents contemporary perspectives on Geographic Information Science, emphasizing the major issues and integrative themes of the sub-discipline.

Effective: Summer 2008

GEOG 502 Research Scholarship in Geography (3) Learning the craft of scholarly research in geography.

Effective: Summer 2008

Prerequisite: GEOG 500

GEOG 503 Seminar in Climatology (3-6) Selected topics in climatology, emphasizing global-scale and man-climate interactions; individual and group projects.

Effective: Spring 1987

Prerequisite: GEOG 433

GEOG 506 Seminar in Social Geography (3) Graduate level research seminar examining theory and methods in social geography.

Effective: Spring 1993

GEOG 507 Human-Environment Seminar (3) Theory and method in human-environment interaction subfields; may be re-taken when topics vary; readings, discussions, research.

Effective: Spring 1998

GEOG 508 Cultural Geography Seminar (3-6) The exploration of current problems and theory in cultural geography through critical discussion of the literature and original student research.

Effective: Winter 1978

GEOG 512 Seminar in Cartography (3-6) The exploration of current problems and theory in cartography through critical discussion of the literature and original student research.

Effective: Spring 1987

Prerequisite: 6 credits in cartography

GEOG 515 (WMNST 515) Gender and Geography (3) Explanations of the links between gender relations and spatial structures.

Effective: Spring 1995

GEOG 518 Geographic Perspectives of Space and Time (3) Examination of concepts and approaches for representing geographic space/ spatial processes through critical discussion of literature and original student research.

Effective: Spring 1995

GEOG 520 Seminar in Urban Geography (3) Analysis of current literature in urban geography focusing on theoretical and methodological debates.

Effective: Summer 1991

GEOG 521 Map Symbolization and Design Theory (3) Introduction to theoretical issues in map design and symbolization with emphasis on current research trends and practical application of research. Students who have passed GEOG 421 may not schedule this course for credit.

Effective: Spring 2007

Prerequisite: GEOG 361, GEOG 364

GEOG 557 Geographic Information Systems (3) Principles and use of geographic information systems; emphasis is on practical use of GIS as a research methodology for geographic data handling and geographic analysis.
Effective: Spring 1998

GEOG 580 Spatial Data Structures and Algorithms (3) In-depth examination of geographic information system components; representation and storage of spatial data, spatial algorithms, input-output considerations. Students who have passed GEOG 480 may not schedule this course for credit.
Effective: Summer 1987
Prerequisite: GEOG 456, GEOG 457

GEOG 581 Geographic Information Systems Design and Evaluation (3) Graduate-level examination of Geographic Information System and other forms of integrated spatial data system design.
Effective: Summer 1987
Prerequisite: GEOG 580

GEOG 583 Geospatial System Analysis and Design (3) Systematic approach to requirements acquisition, specification, design and implementation of geospatial information systems.
Effective: Summer 2004
Prerequisite: GEOG 484

GEOG 584 Geospatial Technology Project Management (3) Principles of effective project management applied to the design and implementation of geospatial information systems.
Effective: Summer 2004
Prerequisite: GEOG 583

GEOG 585 Open Web Mapping (3) Design, development, and implementation of web mapping applications using OGC standards and open source software.
Effective: Spring 2008
Prerequisite: GEOG 485

GEOG 586 Geographical Information Analysis (3) Choosing and applying analytical methods for geospatial data, including point pattern analysis, interpolation, surface analysis, overlay analysis, and spatial autocorrelation.
Effective: Summer 2004
Prerequisite: GEOG 485 or GEOG 486 or GEOG 487

GEOG 587 Conservation GIS (3) Conservation GIS applies geospatial problem solving to ecological research and resource management issues to enhance conservation planning.
Effective: Summer 2009
Prerequisite: GEOG 487

GEOG 588 Planning GIS for Emergency Management (3) Requirements analysis and proposal writing to plan and implement GIS solutions supporting emergency management activities of government agencies and contractors.
Effective: Summer 2008
Prerequisite: GEOG 583, GEOG 584 ; GEOG 488 recommended

GEOG 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

GEOG 594A Culminating Experiences in Geospatial Intelligence (1-3 per semester/maximum of 3) Culminating experiences in current professional and ethical problems facing the geospatial intelligence professional.
Effective: Spring 2011
Prerequisite: GEOG 882, GEOG 883, GEOG 884, GEOG 885 or equivalent courses

GEOG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

GEOG 596A Individual Studies--Peer Review (3) Preparation and presentation of a proposal for an individual capstone project, and reviews of presentation by student peers.
Effective: Summer 2011 Ending: Summer 2011

GEOG 596A Individual Studies--Peer Review (3) Preparation and presentation of a proposal for an individual capstone project, and reviews of presentation by student peers.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOG 596A Individual Studies--Peer Review (3) Preparation and presentation of a proposal for an individual capstone project, and reviews of presentation by student peers.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

GEOG 596B Individual Studies--Capstone Project (3) Preparation and delivery of a formal professional presentation of the results of an individual capstone project.
Effective: Summer 2011 Ending: Summer 2011

GEOG 596B Individual Studies--Capstone Project (3) Preparation and delivery of a formal professional presentation of the results of an individual capstone project.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOG 596B Individual Studies--Capstone Project (3) Preparation and delivery of a formal professional presentation of the results of an individual capstone project.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

GEOG 596C Individual Studies (3) Individual project work supervised by a graduate faculty adviser.
Effective: Summer 2011 Ending: Summer 2011

GEOG 596C Individual Studies (3) Individual project work supervised by a graduate faculty adviser.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOG 596C Individual Studies (3) Individual project work supervised by a graduate faculty adviser.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

GEOG 596I Independent Study in Geospatial Intelligence (1-3) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

GEOG 596I Independent Study in Geospatial Intelligence (3) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOG 596I Independent Study in Geospatial Intelligence (3) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

GEOG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

GEOG 597K GIS for Analysis of Health (3) The role of geographic information systems in understanding disease, including relevant spatial analysis and cartographic visualization techniques.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOG 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2006

GEOG 600 Thesis Research (1-15) No description.
Effective: Fall 1983

GEOG 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

GEOG 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Theoretical and practical aspects of undergraduate instruction in geography.
Effective: Fall 1983
Prerequisite: concurrent status as graduate teaching assistant

GEOG 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 2001

GEOG 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

GEOG 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

GEOG 860 Comparative GIS (3) Formal methodology for evaluating, comparing, and recommending geospatial software solutions for a variety of professional uses.
Effective: Summer 2009

Prerequisite: GEOG 484

GEOG 861 Map Projections for Geospatial Professionals (1) Cultivates a working knowledge of map projections that professionals need to process geospatial data effectively for mapping and analysis.

Effective: Spring 2008

Prerequisite: GEOG 484

GEOG 862 GPS and GNSS for Geospatial Professionals (3) Cultivates a working knowledge of current and future capabilities of GPS and the emerging Global Navigation Satellite System.

Effective: Spring 2010

GEOG 863 GIS Mashups for Geospatial Professionals (3) Cultivates a working knowledge of how and why geospatial professionals develop web mapping applications that combine data from multiple sources.

Effective: Spring 2010

Prerequisite: GEOG 485

GEOG 864 Professionalism in Geographic Information Science and Technology (2) Prepares current and aspiring professionals to recognize, analyze and address legal and ethical issues in the GIS&T (geospatial) field.

Effective: Summer 2009

GEOG 882 Geographic Foundations of Geospatial Intelligence (3) Orientation to the geographic foundations of geospatial intelligence and its applications in national security, international relief work, and disaster management.

Effective: Summer 2008

GEOG 883 Remote Sensing for the Geospatial Intelligence Professional (3) Understanding remote sensing systems' operation, data products, and processing techniques to address typical problem scenarios faced by the GEOINT professional.

Effective: Summer 2008

Prerequisite: GEOG 882

GEOG 884 Geographic Information Systems for the Geospatial Intelligence Professional (3) How geographic information systems facilitate data analysis and communication to address common geographic problems faced by the geospatial intelligence professional.

Effective: Summer 2008

Prerequisite: GEOG 882

GEOG 885 Advanced Analytic Methods in Geospatial Intelligence (3) Prepares current and aspiring geospatial intelligence professionals to apply and interpret results of non-quantitative analysis and modeling techniques.

Effective: Summer 2009

Prerequisite: GEOG 882

GEOG 889 Seminar in Geospatial Intelligence (2) Culminating experience that synthesizes topics addressed in earlier classes and explores emerging topics and methods of geospatial intelligence analysis.

Effective: Spring 2010

Prerequisite: GEOG 882, GEOG 883, GEOG 884

GEOG 897 Special Topics (1-9) Formal courses given on a topical or special interest subject.

Effective: Summer 2009

GEOG 897A Cultural Intelligence, Applied Geography, and Homeland Security (3) The process of geographically analyzing social, political, economic, and demographic information to understand human history, institutions, beliefs, and behaviors.

Effective: Summer 2011 Ending: Summer 2011

GEOG 897A Cultural Intelligence, Applied Geography, and Homeland Security (3) The process of geographically analyzing social, political, economic, and demographic information to understand human history, institutions, beliefs, and behaviors.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOG 897B Special Topics/GIS (3) Formal courses given on a topical or special interest subject.

Effective: Summer 2011 Ending: Summer 2011

GEOG 897B Special Topics/GIS (3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOG 897G Trends in Geospatial Technology (3) Developing life-long learning skills to take advantage of the changing tools of geospatial technology.

Effective: Summer 2011 Ending: Summer 2011

Last Import from UCM: June 16, 2011 3:00 AM

Geosciences (GEOSC)

GEOSC 402Y (IL) **Natural Disasters** (3) Case studies of the causes and consequences of natural disasters; analysis of disaster impact in different economic, cultural, and social conditions.

Effective: Summer 2005

Prerequisite: fourth-semester standing

GEOSC 405 (SOILS 405) **Hydropedology** (3) Soil and water interactions across scales, integrated studies of landscape-soil-water relationships, fundamental processes of water flow and chemical transport.

Effective: Spring 2008

Prerequisite: SOILS 101

GEOSC 409W **Geomicrobiology** (3) Investigation of modern and ancient microbial interactions with soils, sediments, the atmosphere, minerals, rocks, nutrients, and pollutants.

Effective: Summer 2008

Prerequisite: CHEM 112;GEOSC 001, GEOSC 020, GEOSC 040, EARTH 002, BIOL 110 orMICRB 201

GEOSC 410 **Marine Biogeochemistry** (3) Exploration of the ways in which life influences and is influenced by chemical, physical, and geological processes in the ocean.

Effective: Summer 2007

Prerequisite: CHEM 112;EARTH 002 orGEOSC 001, GEOSC 020, GEOSC 040 orMETEO 022

GEOSC 412 **Water Resources Geochemistry** (3) Aqueous geochemistry of silica, alumina, carbonate minerals, and selected metals; organic species in water; isotope geochemistry applied to water.

Effective: Summer 2007

Prerequisite: CHEM 110, CHEM 112

GEOSC 413W **Techniques in Environmental Geochemistry** (3) This course teaches techniques needed for the collection, chemical analysis, and data analysis of environmental geochemical measurements. This course has one or more required field trips for which a fee is charged to the student.

Effective: Spring 2002

Prerequisite: one of the following: C E 475, CHEM 402, GEOSC 202, GEOSC 412, SOILS 419

GEOSC 415 **Geochemistry** (3) Element abundance and genesis, application of chemical principles to earth materials, element fractionation in geologic processes.

Effective: Summer 2007

Prerequisite: CHEM 112, GEOSC 004 orGEOSC 201

GEOSC 416 **Stable and Radioactive Isotopes in Geosciences: Introduction** (3) Discussions on theories for natural isotopic and element variations and their applications to the solution of geologic and cosmologic problems.

Effective: Summer 2007

Prerequisite: CHEM 110, CHEM 112, CHEM 111, CHEM 113;GEOSC 001 orGEOSC 020

GEOSC 418 (SOILS 419) **Soil Environmental Chemistry** (3) Introduction to chemical constituents and processes occurring in soils. Topics include mineral weathering, soil solution chemistry and adsorption of solutes.

Effective: Summer 2007

Prerequisite: CHEM 112, SOILS 101

GEOSC 419 **The Organic Geochemistry of Natural Waters and Sediments** (3) Composition, sources, and fates of particulate and dissolved organic matter in natural environments; biogeochemical processes; organic geochemistry of anthropogenic contaminants.

Effective: Summer 2007

Prerequisite: CHEM 110, CHEM 112

GEOSC 420 (BIOL 420) **Paleobotany** (3) Classification, morphology, phylogeny, and stratigraphic occurrence of fossil plants; practicum includes field trips and study of paleobotanical techniques and specimens.

Effective: Spring 2005

Prerequisite: any 3-credit introductory course in historical geology or plant biology

GEOSC 422 **Vertebrate Paleontology** (3) Course covers scientific thinking and skills in scientific writing, the history of vertebrates, and modern evolutionary theory applied to vertebrates. 1

Effective: Spring 2009

Prerequisite: GEOSC 001 andBIOL 110

GEOSC 424 **Paleontology and Fossils** (3) Concepts and procedures using fossils to solve problems in systematics, evolution, biostratigraphy, correlation, sedimentation, paleoecology, and global change.

Effective: Spring 2001

Prerequisite: GEOSC 001 orGEOSC 020

GEOSC 428 **Micropaleontology** (4) Biology and ecology of microfaunas and microfloras (e.g., foraminifera, coccolithophores, radiolaria, diatoms, dinoflagellates) and applications in biostratigraphy and paleoenvironmental reconstruction.

Effective: Summer 2004

Prerequisite: GEOSC 204

GEOSC 434 **Volcanology** (3) Phenomena and products of volcanic eruptions; physical characteristics of lava and pyroclastic material.

Effective: Spring 1996

Prerequisite: GEOSC 004 or GEOSC 201

GEOSC 439 Principles of Stratigraphy (3) An introduction to the description and genesis of sedimentary rock bodies, the determination of their stratal geometries, and their correlation. (This course includes from one to several field trips for which an additional charge will be made to cover transportation.) 1

Effective: Spring 2001

Prerequisite: GEOSC 201

GEOSC 440 Marine Geology (3) Chemical and physical processes affecting the topography and sediments of the sea floor.

Effective: Spring 2001

Prerequisite: fourth-semester standing

GEOSC 444 Matlab Applications for Geoscience (2) An introduction to Matlab: m-file development, descriptive statistics, bootstrapping, Fourier transforms, regression, interpolation, least-squares, differentiation, integration, differential equations, signal analysis, graphics.

Effective: Spring 2009

Prerequisite: MATH 110 or MATH 140

GEOSC 445 Coastal Geology (4) A field course dealing with the processes operative in the environmental systems of a segment of the mid-Atlantic coast.

Effective: Spring 2001

Prerequisite: fifth-semester standing

GEOSC 450 Risk Analysis in the Earth Sciences (3) An introduction to concepts and methods of quantitative risk analysis with focus on water, climate, and energy related risks.

Effective: Spring 2010

Prerequisite: MATH 140 or MATH 110 Introductory Earth Science or Geoscience class Introductory Statistics class (e.g. STATS 200 or STATS 301 or ENNEC 473) or permission of program

GEOSC 451 Natural Resources: Origins, Economics and Environmental Impact (3) Geologic, economic and environmental issues related to exploitation of non-renewable natural resources (metals, minerals, rocks, and fossil fuels).

Effective: Fall 2006

Prerequisite: GEOSC 001 or GEOSC 020

GEOSC 452 Hydrogeology (3) Hydrologic cycle: occurrence, movement, quality, and quantity of groundwater; solute transport; quantitative hydrogeologic methods; role of water in geologic processes. This course has one or more required field trips for which a fee may be charged to the student.

Effective: Spring 2008

Prerequisite: CHEM 112; GEOSC 001, GEOSC 020 or GEOSC 071; MATH 140 or MATH 110

GEOSC 454 Geology of Oil and Gas (3) Properties, origin, migration, and occurrence of oil and gas. This course has one or more required field trips for which a fee is charged to the student.

Effective: Spring 2002

Prerequisite: GEOSC 001

GEOSC 461 Geology of North America (3) Evolution of structural-stratigraphic framework of continent; interpretation of relevant data obtained from field, experimental, and geophysical observation.

Effective: Spring 2001

Prerequisite: GEOSC 001, GEOSC 020 or GEOSC 071

GEOSC 465 Structural Geology (4) Effects and mechanics of deformation of the earth's crust; practicum includes field trips and studies of maps and structural problems. This course has one or more field trips for which a fee is charged to the student.

Effective: Spring 2002

Prerequisite: or concurrent: GEOSC 203, GEOSC 310

GEOSC 470W Introduction to Field Geology (3) Field interpretation of geologic features; principles and techniques of geologic mapping; interpretation of geologic maps and diagrams. This course has one or more required field trips for which a fee is charged to the student.

Effective: Spring 2002

Prerequisite: GEOSC 001 ; fifth-semester standing

GEOSC 472A Field Geology I (Introduction to Field Methods) (3) Introduction to geologic field methods and the 3-D characterization of earth structure and the reconstruction of geologic histories. This course includes travel outside the University for which an additional charge will be made to cover transportation, food, and lodging.

Effective: Summer 2005

Prerequisite: GEOSC 310

GEOSC 472B Field Geology II (Advanced Field Methods) (3) Advanced application of geologic field methods to the 3-D characterization of earth structure and the reconstruction of geologic histories. This course includes travel outside the University for which an additional charge will be made to cover transportation, food, and lodging.

Effective: Summer 2005

Prerequisite: GEOSC 310, GEOSC 465 . Prerequisite or concurrent: GEOSC 472A

GEOSC 474 (BIOL 474) Astrobiology (3) In depth treatment of principles/concepts of biochemical evolution, the origin/evolution of life; evaluation of distribution of life in the universe.

Effective: Summer 2007

Prerequisite: BIOL 110, CHEM 110

GEOSC 475W (METEO 475W) Global Biogeochemical Cycles (3) The study of earth's major global biogeochemical cycles

(carbon, oxygen, nitrogen, phosphorus, and sulfur) in the context of the climate system.

Effective: Summer 2007

Prerequisite: MATH 110 and MATH 111 or MATH 140 and MATH 141 and CHEM 110

GEOSC 479 Advanced Stratigraphy (3) Modern topics of sequence stratigraphy are addressed, with a heavy emphasis on field and laboratory data analysis and interpretation.

Effective: Spring 1999

Prerequisite: GEOSC 439

GEOSC 481 Solid Earth and Planetary Geophysics (3) Structure, composition, origin, and evolution of the Earth and Solar System.

Effective: Fall 2001

Prerequisite: PHYS 204 or PHYS 214

GEOSC 483 Environmental Geophysics (3) This course presents the principles and applications of the variety of techniques geophysicists use to address environmental problems.

Effective: Fall 2001

Prerequisite: PHYS 211, PHYS 212

GEOSC 487 Analysis of Time Series (3) Nonstatistical approach to data analysis; spectral and correlation analysis; filter theory; signal-to-noise improvement applied to geoscience data.

Effective: Fall 2010

Prerequisite: MATH 140 and MATH 141

GEOSC 488 An Introduction to Seismology (4) An overview of the observations, methods, and frameworks used in seismogram analysis for earthquake and earth-structure investigations (includes laboratory).

Effective: Spring 2003

Prerequisite: MATH 140, MATH 141

GEOSC 489 Dynamics of the Earth (4) Constitution and dynamics of the solid earth; mechanics and consequences of Plate Tectonic processes.

Effective: Fall 2001

Prerequisite: GEOSC 203, GEOSC 310, PHYS 211

GEOSC 494M Senior Thesis (1-4) Supervised student activities on research projects identified on an individual or small group basis.

Effective: Fall 2007

Prerequisite: seventh-semester standing

GEOSC 494W Senior Thesis (1-4) Supervised student activities on research projects identified on an individual or small group basis.

Effective: Spring 2001

Prerequisite: seventh-semester standing

GEOSC 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2001

GEOSC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

GEOSC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

GEOSC 497A Geoscience Scholarship (3) Topics in Research Scholarship.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOSC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 1997

GEOSC 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

GEOSC 500 Issues in Geosciences (3) Introduction of first year graduate students to issues in geosciences.

Effective: Summer 2003

Prerequisite: admission to the Geosciences Graduate Program

GEOSC 501 Frontiers in Geosciences (1) Current research problems and activities in the geosciences. Pass/fail grades are used for evaluation.

Effective: Fall 1989

GEOSC 502 Evolution of the Biosphere (4) The geologic history of the co-evolution of life and the surface environment is examined from a systems perspective.

Effective: Spring 1999

Prerequisite: undergraduate-level coursework in biology and geology

GEOSC 505 Quantitative Physical Sedimentology (3) Principles of fluid mechanics and mathematical modeling; their use in describing sediment transport, sedimentary structures, and sedimentary environments.

Effective: Summer 1996

GEOSC 507A Seismology (3) Basic theory; seismic methods for inferring structure of planetary interiors; observational techniques; seismic event location, magnitude, and damage potential.

Effective: Fall 1989

GEOSC 507B Seismology (3) Advanced wave propagation theory; mathematical representation of seismic sources; inversion theory; computational methods.

Effective: Fall 1989

GEOSC 508 Mechanics of Earthquakes and Faulting (3) An in-depth treatment of fundamental concepts in brittle faulting and earthquake mechanics with emphasis on physical processes.

Effective: Spring 2005

Prerequisite: GEOSC 465, GEOSC 489, MATH 251

GEOSC 511A (MATSE 511A) Powder X-Ray Diffraction (1) Compound identification, lattice parameter measurement, and other applications of the powder diffraction method.

Effective: Spring 2005

GEOSC 511B (MATSE 511B) Transmission Electron Microscopy (1) Principles and practice of transmission electron microscope operation. Students undertake individual projects.

Effective: Spring 2005

GEOSC 511C (MATSE 511C) Spectroscopy (1) Emission spectrographic analysis of powders and atomic absorption analysis of solutions.

Effective: Spring 2005

GEOSC 511D (MATSE 511D) Electron Microprobe Analysis (1) Qualitative and quantitative elemental analysis of microvolumes within solids. Emphasis on individual student project.

Effective: Spring 2005

GEOSC 511E (MATSE 511E) Scanning Electron Microscopy (1) Principles and practice of scanning electron microscope operation. Students undertake individual projects.

Effective: Spring 2005

GEOSC 511G (MATSE 511G) Analytical Electron Microscopy (1) Modern analytical electron microscope techniques: scanning transmission electron microscopy; electron energy loss spectroscopy; energy dispersive analysis of x-rays.

Effective: Spring 2005

Prerequisite: GEOSC 511B

GEOSC 512 (MATSE 512) Principles of Crystal Chemistry (3) Relation of structure to ionic size and nature; influence of pressure and temperature on structure; chemical-structural defects, crystalline solutions, phase-transitions.

Effective: Spring 2003

GEOSC 513 (SOILS 513) Soil Environmental Chemistry (3) Chemical constituents and processes occurring in soils. Discussion of soil components, reactions at the solid-solution interface, and soil chemical processes.

Effective: Fall 2010

Prerequisite: CHEM 450

GEOSC 514 Data Inversion in the Earth Sciences (3) This course focuses on how one finds theoretical parameters to explain observed data using discrete inverse theory.

Effective: Spring 1999

Prerequisite: MATH 220

GEOSC 515 Ore Petrology (3) Optical and hardness measurements and phase equilibria as used in identification and interpretation of textures of ore minerals.

Effective: Fall 1989

GEOSC 518 Stable Isotope Geochemistry (3) Theory of isotope fractionation mechanisms; its application to a wide range of problems in the earth and planetary sciences.

Effective: Fall 1989

GEOSC 519 Mineral Equilibria (3) A thermodynamic treatment of minerals and their reactions under geochemically

important conditions of temperature and pressure.

Effective: Summer 2007

Prerequisite: CHEM 450

GEOSC 521 Thermal State of the Earth (2-3) Analytical and numerical solutions to earth-related heat conduction and convection problems; geothermal energy; earth's heat flow and temperature.

Effective: Spring 1998

GEOSC 522 Geochemistry of Aqueous Systems (2-3) Ionic and molecular equilibria related to stabilities and solubilities of minerals, with applications to ground water, sea water, and hydrothermal fluids.

Effective: Summer 2007

Prerequisite: CHEM 450, CHEM 452

GEOSC 523 Sedimentary Geochemistry (2) Kinetics and thermodynamics of low-temperature processes in sediments. Applications to weathering processes, natural waters, deposition of sediments, and diagenesis.

Effective: Summer 1996

GEOSC 526 (BIOL 526) Problems in Palynology (1-6) Individual research projects in various aspects of palynology, especially palynostratigraphy and paleoecological palynology.

Effective: Summer 2011

GEOSC 527 Advanced Mineralogy (3) Detailed study of the crystal structures and crystal chemistry of minerals.

Effective: Fall 1989

GEOSC 528 Coal Petrology (1-6) Microscopy, source materials, coalification, constitution, classification of peats, lignites, bituminous coal, anthracite.

Effective: Fall 1989

GEOSC 529 Paleontology (1-6 per semester/maximum of 9) Morphology and distribution of significant fossil groups; sampling, preparation, and applications to biostratigraphy, evolution, paleoecology, sedimentation, and petrography.

Effective: Fall 1989

GEOSC 531 Origin of the Earth and Moon (3) This course will be part lecture, part seminar; each student is required to prepare and present one or two lecture topics during the course of the semester.

Effective: Spring 1995

GEOSC 532 Crystal Structure Analysis (2) Experimental techniques for, and the theory of crystal structure determination.

Effective: Fall 1989

GEOSC 533 Principles of Geochemistry (3) A comprehensive treatment of the principles of geochemistry applied to a wide variety of geologic settings and scales.

Effective: Summer 2007

Prerequisite: CHEM 450

GEOSC 540 Ore Deposits I (3) Geochemistry and geology of ore deposits formed by igneous and high-temperature hydrothermal processes.

Effective: Fall 1989

Prerequisite: GEOSC 451

GEOSC 541 Ore Deposits II (3) Geochemistry and geology of ore deposits formed by low-temperature hydrothermal, sedimentary, and metamorphic processes; continuation of GEOSC 540.

Effective: Fall 1989

Prerequisite: GEOSC 540

GEOSC 542 Quantitative Methods in Hydrogeology (1-4) Investigation of groundwater systems and resources, emphasizing both the practical use and limitations of modeling techniques.

Effective: Fall 1989

Prerequisite: GEOSC 452

GEOSC 543 Environmental Geology (1-3) A multidisciplinary study of the impact of man-induced stress on the environment.

Effective: Fall 1989

Prerequisite: GEOSC 452

GEOSC 545 Glacial Geology (3) Glaciers: their characteristics, causes, deposits, landforms, effects in periglacial regions.

Effective: Fall 1989

GEOSC 546 Principles of Photogeology (3) Use of aerial photographs and mosaics in structural, geomorphic, and rock distribution studies and in compilation of maps.

Effective: Fall 1989

Prerequisite: GEOSC 462, GEOSC 465

GEOSC 548 Surface Processes (3) Principles, application, and interpretation of Quaternary geochronology, surface process studies, and landscape evolution.

Effective: Spring 1999

Prerequisite: GEOSC 340

GEOSC 550 Igneous and Metamorphic Petrology (4) Analysis of controls of mineralogy, elemental, and isotopic compositions of igneous rock series and of metamorphic rocks.

Effective: Summer 1996

GEOSC 552 Igneous Petrology (3) Analysis of igneous rocks of the earth and other planetary bodies.

Effective: Fall 1989

Prerequisite: GEOSC 520, GEOSC 550

GEOSC 553 Metamorphic Petrology (3) Seminar with directed reading on controls and processes in the evolution of metamorphic rocks.

Effective: Fall 1989

Prerequisite: GEOSC 519, GEOSC 520

GEOSC 555 Advanced Structure and Petrofabrics (1-3) Macroscopic and mesoscopic recognition, measurement, and interpretation of small-scale rock structures and mineral orientation patterns in deformed rocks.

Effective: Fall 1989

GEOSC 558 Multi-channel Seismic Processing and Interpretation (4) This course covers the basics of seismic energy propagation, modern 2- and 3-D multi-channel seismic data acquisition methods, and data processing.

Effective: Spring 1999

Prerequisite: GEOSC 454

GEOSC 559 Seismology II (3) Rigorously covers the methods of computing wave fields for point and distributed seismic sources in vertically inhomogeneous elastic media.

Effective: Spring 2005

Prerequisite: E MCH 524A, E MCH 524B or MATH 405, MATH 406

GEOSC 560 Kinetics of Geological Processes (3) General development of the kinetic theory of crystal growth, diffusion, irreversible thermodynamics, and heterogeneous reactions needed for geosciences and related fields with applications to current problems.

Effective: Summer 2007

Prerequisite: CHEM 450, GEOSC 519

GEOSC 561 Mathematical Modeling in the Geosciences (4) The process of transforming a conceptual geoscience model into a numerical model is presented; students create and solve numerical models.

Effective: Spring 2000

Prerequisite: undergraduate-level calculus and geology coursework is required; experience in computer programming and coursework in differential equations is recommended; or consent of instructor

GEOSC 565 Tectonic Geomorphology (3) Tectonic geomorphology examines interactions between tectonic and surface processes, paleoseismology, geodesy, structure, active deformation, and landform evolution.

Effective: Summer 1998

Prerequisite: GEOSC 340, GEOSC 465

GEOSC 571 Field Problems in Appalachian Geology (3) Geologic history of the central Appalachians as deduced from field studies.

Effective: Fall 1989

GEOSC 572 Field Stratigraphy (1-2) This course introduces students to field techniques used by stratigraphers, with the capstone experience being a field trip during May.

Effective: Fall 2005

Prerequisite: GEOSC 439, GEOSC 472A, GEOSC 472B, GEOSC 479

GEOSC 584 Clastic Depositional Environments (3) Readings, group discussions, and field work on processes and sedimentary responses of common rock-forming environments.

Effective: Fall 1989

Prerequisite: GEOSC 439

GEOSC 585 Sedimentary Geology (3) An integrated approach to the study of modern and ancient sedimentary environments and their deposits.

Effective: Spring 2000

Prerequisite: undergraduate coursework in sedimentology or consent of instructor

GEOSC 587 Preparing for an Academic Career in the Geosciences (3) The course focuses on successful strategies for the academic job market and for launching an academic career.

Effective: Spring 2009

Prerequisite: Students must have passed their comprehensive exam and be within a year from receiving their Ph.D. degree.

GEOSC 588 (METEO 588) Oceans and Climate Seminar (2) A focussed discussion on some aspect of the ocean's role in the climate system. Theme to vary from semester to semester.

Effective: Summer 1998

GEOSC 589 Seminar in Aqueous Geochemistry (1) A seminar aimed at reading current articles in aqueous geochemistry and biogeochemistry.
Effective: Fall 2001
Prerequisite: GEOSC 522

GEOSC 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1989

GEOSC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1989

GEOSC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1988

GEOSC 597A Earth Systems Science (2) Issues in Earth Systems Science.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOSC 597A Topics in Earth System Science (2) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

GEOSC 597B Multivariate Analysis in Geosciences (3) Multivariate Analysis in Geosciences with Dr. Patskowsky.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOSC 597C Paleobiology Seminar (1) Paleobiology Seminar with Dr. Wilf, Dr. Patskowsky, and Dr. Grapham.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOSC 597D Nature of Soil Minerals (3) Constituent minerals of soils: modern methods for identification; relations to soil formation and agricultural practices.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOSC 597E Experimental Methods in Petrology and Rock Mechanics (2) This class introduces novel and traditional methods in experimental petrology, rock mechanics, and geochemistry.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

GEOSC 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 1999

GEOSC 600 Thesis Research (1-15) No description.
Effective: Spring 1989

GEOSC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1989

GEOSC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching geosciences courses.
Effective: Fall 1983

GEOSC 610 Thesis Research Off Campus (1-15) No description.
Effective: Spring 1989

GEOSC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Spring 1989

GEOSC 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2008

GEOSC 897A Astrobiology: The Interdisciplinary Search for Life in the Cosmos (2) A week-long workshop for educators grades 5-9 to examine how scientists work to detect and characterize life on the early Earth, in extreme environments and in extraterrestrial settings.

Effective: Summer 2011 Ending: Summer 2011

GEOSC 897B Understanding Global Warming: Delving into Earth's Past (1) A 3 day-long workshop for educators grades 6-12 that will introduce a major global warming event that took place 55 million years ago at the boundary between the Paleocene and Eocene epochs. Initiated by rapid emission of greenhouse gases, the event provides a basis to understand the potential effects of future global warming on environment and life on Earth.
Effective: Summer 2011 Ending: Summer 2011

1 This course contains from one to several field trips for which an additional charge will be made to cover transportation.

Last Import from UCM: June 16, 2011 3:00 AM

German (GER)

GER 401Y (IL) **Advanced Composition** (3) Intensive practice in writing different text types in German.
Effective: Spring 2006 Ending: Fall 2011
Prerequisite: GER 301

GER 401Y (IL) **Advanced Composition** (3) Intensive practice in writing different text types in German.
Effective: Spring 2012 Future: Spring 2012
Prerequisite: GER 301 and GER 302W

GER 408 (IL) **Advanced German Business Communications** (3) Study of German business organization, forms of business communications, business terminology; writing of reports and abstracts.
Effective: Spring 2006
Prerequisite: GER 308

GER 411 **The Teaching of German** (3) Theory, methods, techniques, materials, bibliography; use of inter-active media; contributions of linguistics or psychology to language learning.
Effective: Summer 1994
Prerequisite: or concurrent: GER 401

GER 412 (IL) **Contrastive Analysis of Modern German and English** (3) Structural comparison of the German and English grammatical systems: morphology, syntax, phonology.
Effective: Spring 2006
Prerequisite: or concurrent: GER 401

GER 420 (IL) **Genre** (3-9) Special studies in a particular literary genre in German literature, such as lyrical poetry, drama, or narrative prose.
Effective: Spring 2006
Prerequisite: GER 310, GER 401

GER 430 (IL) **History of the German Language** (3) Development of German from its earliest stages, including historical and cultural aspects.
Effective: Fall 2007
Prerequisite: or concurrent: GER 401Y

GER 431 (IL) **History of German Literature and Culture I** (3) Significant works of German literature before the mid-eighteenth century considered in their cultural context.
Effective: Spring 2006
Prerequisite: GER 310 . Prerequisite or concurrent: GER 401

GER 432 (IL) **History of German Literature and Culture II** (3) Significant works of German literature from the mid-eighteenth century to the present considered in their cultural context.
Effective: Spring 2006
Prerequisite: GER 310 . Prerequisite or concurrent: GER 401

GER 440 (IL) **Seminar in German Culture** (3-6) Seminar devoted to a special topic in the field of German culture and civilization.
Effective: Spring 2006
Prerequisite: or concurrent: GER 401

GER 470 (IL) **Goethe** (3) A study of Goethe's life and works especially his lyric poetry, novels, and dramas.
Effective: Spring 2006
Prerequisite: or concurrent: GER 431 or GER 432

GER 472 (IL) **Romanticism** (3) A study of both early and late romanticism, including such writers as Novalis, the Schlegels, E.T.A. Hoffmann, and Heine.
Effective: Spring 2006
Prerequisite: or concurrent: GER 431 or GER 432

GER 489 **Introduction to German Film History and Theory in Context** (3) Introduces films in German since the 1960s and addresses issues relevant to German and European cultures and politics.
Effective: Spring 2005
Prerequisite: GER 310 or COMM 250

GER 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

GER 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

GER 495 **Internship** (3-9) Supervised off-campus, non-group instruction including individual field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 1981

Prerequisite: prior approval of proposed assignment by instructor

GER 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

GER 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1985

GER 499 (IL) **Foreign Study--German** (3-12) Advanced studies in German language, literature, and culture.
Effective: Summer 2005
Prerequisite: any 300-level course in German

GER 500 **Bibliography and Research Techniques** (2) Introduction to tools and methods of research, designed for students preparing for independent investigation of problems in German literature and language.
Effective: Fall 1993

GER 501 **German Conversation and Composition** (1) Advanced study of German conversation and composition, with emphasis on syntax, style, and idiomatic constructions.
Effective: Fall 1997

GER 508 **German Business Communications** (3) Practices and problems in the administration of German business organizations. Writing letters, reports, and other types of business communications.
Effective: Fall 1997

GER 510 **Literary Theory: An Introduction** (3) Introduction to the major theoretical approaches to the contemporary study of culture (literature, film, art and politics).
Effective: Spring 2004

GER 511 **The Teaching of College German** (3) Theory, methods, techniques, materials, bibliography contributions of linguistics and psychology to language learning; methods of teaching post- secondary German.
Effective: Fall 2005

GER 512 **Introduction to German Linguistics** (3) An overview of the major subfields of linguistics as they apply to the German language.
Effective: Summer 2002

GER 513 **German Phonetics and Phonology** (3) This course examines German speech sounds and their organization into a linguistic system.
Effective: Spring 2009

GER 514 **German Syntax** (3) This course provides an overview of morphosyntactic processes in German.
Effective: Spring 2009

GER 515 **Introduction to German Applied Linguistics** (3) Introduction to the major areas of the broad field of Applied Linguistics as relevant to the study of German.
Effective: Spring 2003

GER 516 **The Acquisition of German and Dutch** (3) This course examines how children and adult learners acquire German and Dutch in naturalistic settings (i.e. non-classroom situations).
Effective: Spring 2009

GER 520 **Introduction to Middle High German** (3) Descriptive and historical grammar; readings in simple Middle High German texts.
Effective: Winter 1978

GER 521 **Readings in Middle High German** (3) Intensive reading in Middle High German literature, especially of the Blutezeit.
Effective: Winter 1978
Prerequisite: GER 520

GER 522 **Old High German** (3) Essentials of the grammar, with special treatment of the High German sound shift and of ablaut and umlaut; reading of works written before 1100 A.D.
Effective: Fall 1983

GER 523 **Gothic** (3) Introduction to the historical and comparative Germanic grammar; emphasis on the Gothic language

and texts. Suitable for advanced students in English.
Effective: Winter 1978

GER 525 **Old Icelandic** (3) Introduction to Old Icelandic grammar; readings in Old Icelandic prose. Suitable for advanced students in English.
Effective: Winter 1978

GER 531 **German Literature of the Middle Ages--800 to 1400** (3) Intensive survey and review of medieval German literature.
Effective: Fall 1997

GER 540 **Seminar in German Culture and Civilization** (3-12) Examination of special problems in German culture and civilization.
Effective: Fall 1997

GER 541 **German Literature of the Renaissance and Baroque** (3) Intensive survey and review of German literature between 1450 and 1700.
Effective: Fall 1997

GER 551 **German Literature from the Early Enlightenment to Storm and Stress** (3) Advanced overview of major developments in German literature from the early to the late 18th century.
Effective: Fall 1997

GER 552 **German Classicism and Romanticism** (3) Intensive survey of German literature from the late 18th through the first third of the 19th centuries.
Effective: Spring 1997

GER 561 **German Literature of the 19th Century--From Beidermeier to Realism** (3) Survey of major developments in German literature from the mid- to the late-19th century.
Effective: Fall 1997

GER 571 **German Literature from the Turn of the Century to 1945** (3) Advanced survey of German literature from the era of Naturalism to that of Exile literature.
Effective: Fall 1997

GER 572 **Post-War and Contemporary German Literature** (3) Intensive survey of German literature from Gruppe 47 through the literature of the GDR and down to the present.
Effective: Spring 1997

GER 581 **Topics in Literary Genres** (3-12) Special studies in the German lyric, drama, short story, and novel.
Effective: Fall 1997

GER 582 **Topics in Germanic Philology and German Linguistics** (3 per semester, maximum of 12) Special studies of modern or older Germanic languages.
Effective: Summer 1997

GER 589 (CMLIT 589, FR 589, SPAN 589) **Technology in Foreign Language Education: An Overview** (3) Approaches to the uses and research applications of multimedia and other educational technologies applied to the teaching of foreign languages. (also crosslisted with APLNG 589)
Effective: Spring 2004

GER 591 **German Literary Theory and Criticism** (3-6) Examination of major movements in literary theory and criticism with special reference to German literary thought.
Effective: Fall 1997

GER 592 **Seminar in German Literature** (3 per semester, maximum of 12) Focused investigation of a major figure or theme in German literature.
Effective: Summer 1997

GER 593 **Seminar in German Philology and German Linguistics** (3 per semester, maximum of 12) Focused investigation of a major topic in Germanic philology or linguistics.
Effective: Summer 1997

GER 596 **Individual Studies** (1-9) Creative projects including nonthesis research, supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

GER 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

GER 600 Thesis Research (1-15) No description.

Effective: Fall 1983

GER 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 1983

GER 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Instruction of lower division German courses with observation by the supervisor and attendance at regular meetings to discuss classroom techniques.

Effective: Fall 1983

GER 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.

Effective: Spring 2000

GER 610 Thesis Research Off Campus (1-15) No description.

Effective: Fall 1983

GER 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Graphic Design (GD)

GD 400 **Time and Sequence** (4) Development of visual sequence as replies to graphic design problems.
Effective: Fall 2006
Prerequisite: GD 302

GD 401 **Package Design** (3) Orientation to packaging designs as it relates to the consumer, client, and to societal and environmental concerns.
Effective: Fall 2006
Prerequisite: GD 302

GD 402 **Senior Problems** (4) Development of visual replies to graphic design problems.
Effective: Fall 2006
Prerequisite: GD 400, GD 401

GD 403W **Graphic Design Seminar** (3) A seminar on subjects which relate to the field of graphic design.
Effective: Fall 2007
Prerequisite: GD 302

GD 404 **Book Design** (3) Writing, designing, illustrating and production (printing) of a book.
Effective: Fall 2006
Prerequisite: GD 302

GD 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2006

GD 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

GD 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2006

GD 496 **Independent Study** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2006

GD 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2006

GD 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2006

Last Import from UCM: June 16, 2011 3:00 AM

Greek (GREEK)

Knowledge of Greek or Latin not required. See also CLASSICS AND ANCIENT MEDITERRANEAN STUDIES and LATIN,

GREEK 401 Introductory Reading in Greek Literature (3-6) Analysis of selected passages of ancient Greek literature; attention will be paid to grammatical as well as literary details.

Effective: Summer 2011
Prerequisite: GREEK 102

GREEK 420 Greek Prose Authors (3-6) Readings in representative authors.

Effective: Summer 2011

GREEK 425 Greek Historians (3-6) Translation and study of one or more of the ancient Greek historians.

Effective: Summer 2011
Prerequisite: GREEK 102

GREEK 430 Greek Poetry (3-6) Translation and analysis of selected readings in Greek poetry.

Effective: Summer 2011
Prerequisite: GREEK 102

GREEK 440 Greek Drama (3-6) Translation and study of a selected play.

Effective: Summer 2011
Prerequisite: GREEK 102

GREEK 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

GREEK 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

GREEK 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

GREEK 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

GREEK 499 (IL) Foreign Studies (12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

GREEK 509 Greek Seminar (3-9) No description.

Effective: Fall 1983

GREEK 517 Greek Research (1-6) Prosecution of an assigned problem under the guidance of a member of the department.

Effective: Winter 1978

GREEK 520 Greek Mythography (3) This graduate seminar focuses on ancient Greek mythographic authors from the beginnings of the genre (6th C.B.C.E.) to the Roman period.

Effective: Fall 2008

GREEK 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2000

GREEK 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.

Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

Health (HLTH)

No courses for department code **HLTH** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Health Care Management (H C M)

H C M 462 **Health Care Administration** (3) Organizational perspectives, managerial techniques and political aspects of health care planning, administration and control.

Effective: Fall 1985

Prerequisite: H C M 361

H C M 463 **Legal Aspects of Health Care** (3) An examination of legal rights and liabilities of patients, professionals, and health care institutions. Emphasis is given to medical malpractice.

Effective: Fall 1983

H C M 464 **Health Care Finance and Economics** (3) Integration of financial and economic aspects of health care systems, including financing, mechanisms, economic theory, and regulatory constraints.

Effective: Spring 2008

Prerequisite: FIN 301 6 credits economics (micro and macro)

H C M 465 **Health Care Insurance** (3) A study of insurance as it relates to health care from the public and private sector viewpoints.

Effective: Fall 1983

H C M 467 **Methods of Health Care Planning and Evaluation** (3) Health care planning, epidemiological concepts, forecasting procedures, and methods of health care evaluation.

Effective: Fall 1988

Prerequisite: 3 credits in statistics

H C M 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Summer 1990

Prerequisite: prior approval of proposed assignment by instructor

H C M 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 1983

H C M 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Health Education (HL ED)

HL ED 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

HL ED 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

HL ED 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1993

HL ED 530 **Research Techniques in Health Education** (3) Research techniques, including methods, research design, techniques for data collection, as applied to relevant problems in the health education field.
Effective: Fall 1991
Prerequisite: 3-credit 400-level statistics course

HL ED 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1992

HL ED 596 **Individual Studies** (1-9) Individual studies course.
Effective: Spring 1987

HL ED 597 **Special Topics** (1-9) Special topics course.
Effective: Spring 1987

HL ED 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

HL ED 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

HL ED 602 **Supervised Experience in College Teaching** (1-3 per semester maximum of 6) Preparation and presentation of materials in lecture and laboratory classes under the supervision of a full-time faculty member.
Effective: Fall 1983
Prerequisite: Appointment as a graduate assistant in health education

HL ED 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

HL ED 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Health Education (HLHED)

HLHED 415 **Planning and Developing Health Education Programs** (3) Premises and strategies for planning, implementing, and evaluating wellness programs in corporate, hospital, and community agency settings.

Effective: Fall 1997

Prerequisite: permission of program

HLHED 420 **Development of Stress Management Programs for Health Education** (3) Planning, development, and implementing strategies for stress management programs for health education professionals in school, community, and corporate settings.

Effective: Fall 1997

Prerequisite: permission of program

HLHED 443 **Alcohol and Drug Education** (3) Principles of integration and coordination of alcohol and drug education programs for health education and other social service professions.

Effective: Fall 1997

Prerequisite: permission of program

HLHED 456 **Advanced Techniques in School and Community Health Education** (3) Public health, mental health, nutrition, dental school health, physical education, accident prevention, health teaching; projects, consultation, visitation, discussions, and resources.

Effective: Fall 1997

Prerequisite: permission of program

HLHED 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 1997

HLHED 501 **World Health Promotion** (3) Analysis of the various health problems that affect humans throughout the world; emphasis will be placed on personal health issues.

Effective: Fall 1997

HLHED 516 **Evaluation of Health Education and Promotion Programs** (3) Criteria and strategies to assess the impact of health education and health promotion programs in school, community, and corporate settings.

Effective: Fall 1997

HLHED 530 **Research Techniques in Health Education** (3) Research techniques, including methods, research design, techniques for data collection, as applied to relevant problems in the health education field.

Effective: Fall 1997

HLHED 552 **Current Health Education Issues** (3) Analysis of scientific and political foundations of current issues within health education tasks, with emphasis on research and action implications.

Effective: Fall 1997

HLHED 553 **Multicultural Health Issues** (3) This course is designed to explore cultural factors influencing the health status among racial/ethnic groups in the United States.

Effective: Summer 2002

HLHED 582 (EDUC 582) **Spirituality and Culture in Health and Education Professions** (3) This course focuses on the cultural aspects of spirituality and its place in the health and education professions.

Effective: Summer 2009

HLHED 587 **Master's Project** (3) The development of an original master's project (paper or production) supervised by an appropriate faculty member.

Effective: Fall 1997

HLHED 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Fall 1997

HLHED 591 **Capstone Seminar in Health Education** (3) Culminating or capstone experience for students in the M. Ed. program in Health Education.

Effective: Fall 1997

Prerequisite: completion of 15 credits in the program and permission of advisor

HLHED 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1997

HLHED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 1997

Last Import from UCM: June 16, 2011 3:00 AM

Health Policy and Administration (H P A)

H P A 401 (IL) **Comparative Health Systems** (3) Comparative analysis of health services in selected developed and developing countries.
Effective: Summer 2011

H P A 410 **Principles of Public Health Administration** (3) The rationale for, and the patterns of, public health service at all levels of government in the United States.
Effective: Summer 2011

H P A 420 **Principles of Managed Care** (3) Survey of managed health care, including history, typology, current issues, management challenges, and impacts on patients, providers, and special populations.
Effective: Summer 2011

H P A 433 **Administration of Hospital and Health Service Systems** (3) Analysis of administrative structures and interorganizational arrangements among hospitals and other health care organizations.
Effective: Spring 1998
Prerequisite: H P A 332

H P A 440 (US;IL) (BB H 440) **Principles of Epidemiology** (3) Theory of epidemiology and significant case studies. Potential application to health care.
Effective: Fall 2008
Prerequisite: BB H 101 orBIOL 110 orH P A 310;STAT 200 orSTAT 250

H P A 440U (US;IL) **Principles of Epidemiology** (3) Theory of epidemiology and significant case studies. Potential application to health care.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012
Prerequisite: BB H 101 orBIOL 110 orH P A 310;STAT 200 orSTAT 250

H P A 442 **Long-Term Care Management** (3) Management and policy issues for institutional, community, and home settings for chronic care services.
Effective: Spring 1998
Prerequisite: H P A 332

H P A 445 (ECON 445) **Health Economics** (3) Economic analysis of U.S. health care system; planning, organization, and financing; current public policy issues and alternatives.
Effective: Spring 1994
Prerequisite: ECON 302, ECON 315 orECON 323

H P A 445W (ECON 445W) **Health Economics** (3) Economic analysis of U.S. health care system; planning, organization, and financing; current public policy issues and alternatives.
Effective: Spring 2008
Prerequisite: ECON 302, ECON 315 orECON 323

H P A 447 **Financing Health Care** (3) Analysis of financial flows, third party payment programs, and reimbursement practices in the health services sector.
Effective: Summer 2011
Prerequisite: FIN 100 orINS 301;H P A 332

H P A 450 **Healthcare Policies and Politics** (3) Survey of health care's political contexts: formulation, implementation, and modification stages of policy process; politics of private interests (associations) at national and state levels.
Effective: Summer 2011
Prerequisite: H P A 101, PL SC 001

H P A 455 **Strategic Planning and Marketing for Health Services** (3) Introduction to principles and methods of strategic planning and marketing.
Effective: Spring 1998
Prerequisite: H P A 332

H P A 460 **Human Resource Management in Health Care Organizations** (3) Foundations of human resource management applied to health care organizations, including hospitals, long-term care facilities, and community health organizations.
Effective: Spring 1998
Prerequisite: H P A 332

H P A 470 **Health Care Information Management** (3) This course introduces information systems terminology, data structures, software applications, and their management functions in health services organizations.
Effective: Summer 2000
Prerequisite: H P A 332, IST 210, IST 220

H P A 494H **Senior Honors Thesis** (1-6) Independent study related to student's interests directed by a faculty supervisor and culminating in the production of a thesis.
Effective: Summer 2006
Prerequisite: approval of honors thesis advisor

H P A 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

H P A 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

H P A 497A ISS Healthcare Quality (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

H P A 497A Health Care Leadership I (3) Identified as one of the core competencies improve the U.S. Health care system and one of the challenges to solving the problems of cost, quality and access.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

H P A 497A Physician Practice Management (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

H P A 497B Physician Practice Management (3) This course is a comprehensive examination of physician practice management topics and the role physicians play in the US health care industry past, present and the future.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

H P A 497B Healthcare Leadership II (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

H P A 497C Introduction to Health Insurance and Payment (3) This course covers basic concepts and issues related to health insurance and payment for health care providers.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

H P A 503 Health Services Organizational Behavior (3) A systematic application of the principles of organizational behavior to understanding professional roles in health services organizations.
Effective: Spring 2011

H P A 504 Interorganizational Relations (3) Interorganizational concepts and their application to analysis of policies, programs, and service delivery concerns involving health and human service organizations.
Effective: Spring 2011

H P A 510 Health Services Financing and Policy (3) Introduction to health policy focusing on health services financing, insurance and other current health policy topics.
Effective: Spring 2011

H P A 511 Research Seminar on Health Services Financing and Policy (3) An examination of seminal and current research on health services financing, insurance and health policy.
Effective: Spring 2011
Prerequisite: H P A 510 Concurrent: H P A 510

H P A 520 Introduction to Health Services Organizations and Delivery (3) Introduction to health systems, health services organization and health care delivery focused on trends, problems and issues.
Effective: Spring 2011

H P A 521 Research Seminar on Health Services Organization and Delivery (3) An examination of seminal and current research on health services organization and delivery, emphasizing costs, access and quality.
Effective: Spring 2011
Prerequisite: H P A 520 Concurrent: H P A 520

H P A 523 Managerial Epidemiology (3) Introduction to the principles and methods of managerial epidemiology and its application to health care.
Effective: Spring 2011
Prerequisite: H P A 521

H P A 524 Management of Health Services Organizations (3) A systematic study of the roles of health services managers and the organizational and environmental context within which they work.
Effective: Spring 2011

H P A 527 Approaches to Health Planning (3) A systematic exploration of approaches to health planning and an application of health planning techniques.

Effective: Summer 1987

Prerequisite: CSP D 531

H P A 528 Health Data Analysis for Research (3) Introduction to data sources and use of software for data management and analysis in health services research.

Effective: Spring 2011

Prerequisite: STAT 500 or equivalent preparation in probability and statistics

H P A 530 Health Care Human Resources Management (3) The scope and significance of human resource management roles, issues, and skills in health care delivery systems.

Effective: Summer 1992

Prerequisite: H P A 520, H P A 524

H P A 531 Health Problem Analysis (3) Logic of empirical inquiry in study of community problems in health; integration of theory and practice, technical data, and values.

Effective: Summer 1995

H P A 540 Epidemiological Applications in Health Services Research (3) The course emphasizes theoretical as well as practical issues relating to applying advanced methods of epidemiology in health services research.

Effective: Fall 2001

Prerequisite: H P A 440, H P A 528

H P A 541 Poverty, Race, Ethnicity and Child Health (3) Seminar focusing on disparities in infant, child, and adolescent health, and policies and programs impacting these disparities.

Effective: Spring 2011

H P A 545 Introduction to Health Economics (3) Survey of the application of economics to the roles of markets and government in health care.

Effective: Spring 2011

H P A 547 Health Services Reimbursement (3) Analysis of third party reimbursement of health care providers.

Effective: Summer 1992

Prerequisite: H P A 520

H P A 551 Quality Improvement in Healthcare (3) Examination of major approaches to performance improvement in contemporary healthcare systems.

Effective: Summer 2010

H P A 556 Strategy Development in Health Services Organization (3) Integration of prior course work in the program to develop a strategic plan for a health services organization.

Effective: Spring 2011

Prerequisite: H P A 523, H P A 524, H P A 835

H P A 561 Introduction to Research Design in Health Services Research (3) Review and critical analysis of state-of-the-art health services research methods.

Effective: Summer 1999

H P A 562 Economics Applications in Health Services Research (3) Application of theoretical and empirical tools of microeconomics to issues in health services utilization and delivery.

Effective: Spring 2011

Prerequisite: H P A 445 or H P A 545

H P A 563 Organizational Studies in Health Services Research (3) Applications of theoretical and empirical tools of organizational studies in the delivery of health care.

Effective: Spring 2011

Prerequisite: H P A 503

H P A 564 Research Methods in Health Services Research (3) Introduction to regression models in health services research, including violations and tests of model assumptions and solutions for those violations.

Effective: Spring 2011

Prerequisite: STAT 500

H P A 566 Advanced Methods in Health Services Research I (3) Advanced topics course focusing on extensions of the ordinary least squares regression model and nonlinear methods in health services research.

Effective: Summer 2010

Prerequisite: H P A 564

H P A 590 Colloquium (1-3) Introduction to the field of health services research.

Effective: Summer 1998

H P A 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Summer 1990

Prerequisite: prior approval of proposed assignment by instructor

H P A 596 (CSP D 596) **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1987

H P A 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 1987

H P A 597A **Program Evaluation** (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

H P A 600 **THESIS RESEARCH** (1-15) NO DESCRIPTION.
Effective: Summer 1992

H P A 601 **PH.D. DISSERTATION FULL-TIME** (0) NO DESCRIPTION.
Effective: Summer 1992

H P A 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) Supervised and graded teaching experience in selected undergraduate Health Policy and Administration courses.
Effective: Fall 1989
Prerequisite: completion of minimum of three semesters of graduate work in health policy and administration

H P A 610 **THESIS RESEARCH OFF-CAMPUS** (1-15) NO DESCRIPTION.
Effective: Summer 1992

H P A 611 **PH.D. DISSERTATION PART-TIME** (0) NO DESCRIPTION.
Effective: Summer 1992

H P A 805 **Change Leadership in Health Services Organizations** (3) Exploration of diagnostic and intervention strategies employed in planned change in health services organizations and programs.
Effective: Spring 2011

H P A 822 **Clinical Issues for Health Services Management** (3) Introduction to current clinical issues in health services organizations focusing on the role of managers.
Effective: Spring 2011

H P A 835 **Financial Management in Health Institutions** (3) The financial environment of health institutions; financial aspects of management decision making; emphasis on revenue sources, budgeting, and cost control.
Effective: Fall 2009
Prerequisite: H P A 447

H P A 836 **Health Law** (3) The legal process as it applies to the health administrator, health organization, medical provider, and patient.
Effective: Spring 2011
Prerequisite: H P A 520

H P A 850 **Health Care Marketing** (3) Introduction to the theory, concepts, skills, and principles of marketing applied to health related organizations and networks.
Effective: Spring 2011
Prerequisite: H P A 520

H P A 855 **Information Systems in Health Services Administration** (3) Foundations of information systems for supporting clinical services, quality improvement, and administrative functions in health services management.
Effective: Summer 2010
Prerequisite: H P A 520

H P A 895 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 2010

H P A 896 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2009

H P A 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2008

Last Import from UCM: June 16, 2011 3:00 AM

Health and Human Development (H&HD)

H&HD 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2006

H&HD 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2002

H&HD 497A **Women's Leadership Initiative** (2) Women's Leadership Initiative.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

H&HD 497B **Global Leadership** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

H&HD 497H **Special Topics--Honors** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2002

H&HD 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

H&HD 499H (IL) **Foreign Studies-Honors** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

Hebrew (HEBR)

HEBR 401 **Advanced Hebrew--Conversation Emphasis** (3 per semester, maximum of 6) Development of oral proficiency through discussions focusing on issues in contemporary Jewish culture.
Effective: Summer 2011

HEBR 402 **Advanced Hebrew--Reading Emphasis** (3 per semester, maximum of 6) Readings in representative works of traditional and modern literature; practice in composition; study of aspects of Jewish culture.
Effective: Summer 2011

HEBR 451 **Advanced Biblical Hebrew** (3) Translation and analysis of selected readings in Biblical Hebrew texts; attention will be paid to grammatical as well as literary details.
Effective: Spring 2007
Prerequisite: HEBR 152 or equivalent

HEBR 452 **Readings in Biblical Hebrew** (3) Translation and analysis of selected readings in Biblical Hebrew texts; attention will be paid to grammatical as well as literary details.
Effective: Spring 2007
Prerequisite: HEBR 451 or equivalent

HEBR 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

HEBR 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

HEBR 496 **Independent Studies** (1-18) Creative projects including research and design which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1982

HEBR 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1983

HEBR 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

HEBR 499 (IL) **Foreign Study--Advanced Hebrew** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

HEBR 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1997

HEBR 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2003

HEBR 597A **Seminar in International Human Resources** (3) This course will explore the practice of human resource management in an international context.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Last Import from UCM: June 16, 2011 3:00 AM

Higher Education (HI ED)

HI ED 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1995

HI ED 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1995

HI ED 503 (CI ED 503, EDTHP 507) **Ethnicity, National Identity, and Education** (3) Surveys group-oriented education policies internationally, especially comparing those of Britain, Taiwan, India.
Effective: Summer 1995

HI ED 545 **Higher Education in the United States** (3) Introduction to the educational context and major organizational and academic characteristics of postsecondary education; analysis of issues and future trends.
Effective: Summer 1995

HI ED 546 **College Teaching** (2-3) Principles involved in teaching at the college level; effective use of teaching aids; criteria used in evaluation.
Effective: Summer 1995

HI ED 548 **Curriculums in Higher Education** (2-3) Various types of curriculums and philosophies underlying them; ways in which curriculums are developed; elective versus required courses; evaluation of achievement.
Effective: Summer 1995

HI ED 549 (ADTED 549) **Community Junior College and the Technical Institute** (2-3) Distinctive contributions to meeting the need for postsecondary education; development, functions, curriculum and instruction, government, administration, and finance.
Effective: Summer 1995

HI ED 552 **Administration in Higher Education** (3) Philosophy of administration; principles of scientific management and their application in colleges and universities; case studies of administrative problems.
Effective: Summer 1995
Prerequisite: courses or experience in higher education

HI ED 553 (CI ED 553, EDTHP 553, SOC 553) **Educational Mobility in Comparative Perspective** (3) Role of education in social mobility, using quantitative, qualitative, and historical methods; focuses comparatively on Britain, East Asia, and South America.
Effective: Spring 2003

HI ED 554 **The History of American Higher Education** (3) An examination of the development of American higher education against the background of influential social, political, economic, and intellectual issues.
Effective: Summer 1995

HI ED 556 **Higher Education Students and Clientele** (3) Characteristics of higher postsecondary education students and other clientele; changes during postsecondary education years and during college; educational challenges and responses.
Effective: Summer 1995

HI ED 557 (EDTHP 557, SOC 557) **Sociology of Higher Education** (3) Reviews theory and current sociology research on student access, achievement, and governance in postsecondary education, with applications to policy analysis.
Effective: Fall 2000
Prerequisite: graduate students only except with permission of instructor; EDTHP/SOC 416 is recommended.

HI ED 560 **Legal Issues in Higher Education** (3) A process for analyzing case law on issues of access, student rights, employment, collective bargaining, church/state, private sector, and liability.
Effective: Summer 1995

HI ED 562 **Organizational Theory and Higher Education** (3) Application of social science theory and research to postsecondary education organizations and administration; use of research in administrative practice.
Effective: Summer 1995
Prerequisite: HI ED 552

HI ED 571 (CI ED 571) **Comparative Higher Education** (3) Comparative methods of studying structural variations in systems of higher education in principal industrialized nations and other selected countries.
Effective: Spring 1995

HI ED 585 (EDLDR 585, EDTHP 585) **Research Design: Implications for Decisions in Higher Education** (3) A capstone course on research design and analytical approaches to support decision-making in administration and policy-making.
Effective: Fall 2004
Prerequisite: EDPSY 400, EDPSY 406 ; or AG 400, R SOC 573

HI ED 586 (EDLDR 586, EDTHP 586) **Qualitative Methods in Educational Research** (3) Exploration of the theoretical framework undergirding qualitative research and its attendant practices and techniques.
Effective: Fall 2004
Prerequisite: completion of core courses in higher education

HI ED 587 (EDLDR 587, EDTHP 587) **Education Policy and Politics** (3) The political economy and bureaucratic politics of educational organizations, with special attention to the policy-making, implementation, and evaluation processes.
Effective: Fall 2004

HI ED 588 (EDLDR 588, EDTHP 588) **Qualitative Methods in Educational Research II** (3) Advanced study of methods involved in executing and analyzing qualitative research in education.
Effective: Summer 2007
Prerequisite: EDTHP 586

HI ED 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1995

HI ED 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1995

HI ED 595 **Internship in Higher Education** (1-9) Supervised experience in administrative offices, in research, on instructional teams, and in college teaching.
Effective: Summer 1995

HI ED 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and fall outside the scope of formal courses.
Effective: Summer 1995

HI ED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 1995

HI ED 597A (CSA 597A) **Advanced Student Development in College** (3) This seminar-style course offers advance study of human development theories and their applications in college settings.
Effective: Summer 2011 Ending: Summer 2011
Prerequisite: CSA 503 or HI ED 556 or by permission of program

HI ED 597A **Campus Environment** (3) This course is intended to show how environment can have a powerful, and often an unconscious influence.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HI ED 597B **Planning, Budgeting and Strategic Management** (3) This course is intended to develop a working knowledge of strategic planning and resource management in colleges and universities.
Effective: Summer 2011 Ending: Summer 2011

HI ED 597B **Pro Seminar: Topics in the Study of Higher Education for HIED MED Students** (3) An orientation to graduate study in HIED, exploration of foundational topics in HIED, the identification of careers for HIED MED.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HI ED 597C **Peer Mentoring** (3) Designed to prepare graduate students in developing successful practices as mentors for undergraduate students. This course will provide prospective mentors with the trusted ally to be an effective mentor. The knowledge gained will assist them as they empower students in successfully transitioning to and persisting in the university environment.
Effective: Summer 2011 Ending: Summer 2011
Concurrent: CSA 597B

HI ED 597C (EDLDR 597C, EDTHP 597C) **Foundations of Research** (3) This course is designed to begin a reading of the history and philosophies of education research.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HI ED 597D (EDLDR 597D, EDTHP 597D) **Reviewing and Editing Education Policy and Research Journals** (3) Provide advanced doctoral students with a systematic introduction to reviewing and editing policy and research journals in the

field of education. Students will learn how to handle blind, peer-reviews, reviewer confidentiality, plagiarism and academic merit.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HI ED 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 2005

HI ED 600 **Thesis Research** (1-15) No description.

Effective: Summer 1995

HI ED 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Summer 1995

HI ED 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Summer 1995

HI ED 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Summer 1995

HI ED 801 **Foundations of Institutional Research** (3) Survey course explores fundamental methods and research on campus decisions, enrollment management, faculty work analysis, institutional effectiveness, accreditation, student outcomes.

Effective: Spring 2010

HI ED 810 **Planning and Resource Management in Higher Education** (3) Strategic planning and resource management in higher education through institutional research.

Effective: Spring 2010

HI ED 820 **Studying Students & Student Affairs Program** (3) Studying the relationship of college activities to academic success by students.

Effective: Spring 2010

HI ED 830 **Designing Institutional Research Studies** (3) Develop skills to design and execute IR studies using quantitative and qualitative research methods.

Effective: Spring 2010

HI ED 840 **Assessing Student Outcomes & Evaluating Academic Programs** (3) Academic program assessment/student outcomes in accountability and accreditation processes.

Effective: Spring 2010

HI ED 850 **Analyzing Faculty Workload, Performance, and Compensation** (3) Develop research skills to analyze faculty workload and performance in teaching, research, outreach, and compensation.

Effective: Spring 2010

HI ED 860 **Conducting Enrollment Management Studies** (3) Studies three stages of enrollment management: Pre-admission, initial student experience, and student success and completion.

Effective: Spring 2010

Last Import from UCM: June 16, 2011 3:00 AM

History (HIST)

HIST 400 Research in Ancient Sources (3) Guided research in the literature of ancient Mediterranean civilizations.
Effective: Spring 2008
Prerequisite: HIST 001

HIST 401 (IL) (J ST 401) Ancient Technologies and Socio-cultural History in the Ancient Levant (3) Social and intellectual development in the Ancient Levant as they affected and were affected by technological development.
Effective: Spring 2006
Prerequisite: RL ST 110

HIST 402 (IL) The Rise of the Greek Polis (3) Development of the Greek city-state from Homeric times to the fifth century B.C.; special references to Athenian society.
Effective: Spring 2006
Prerequisite: HIST 100

HIST 403 (IL) Alexander the Great and the Hellenistic World (3) The career of Alexander, his impact on his own time, and the Hellenistic legacy.
Effective: Spring 2006
Prerequisite: HIST 100

HIST 404Y (IL) Rome and Hellenism (3) The impact of traditional Greek culture on ancient Italian society in the age (ca. 300-30 B.C.) of Roman imperial expansion.
Effective: Spring 2006
Prerequisite: HIST 100, HIST 101 or CAMS 033

HIST 405Y (IL) The Roman Empire (3) The political and social history of the Roman empire; economic institutions and religious groups which influenced Roman administration.
Effective: Spring 2006
Prerequisite: HIST 001, HIST 101 or 3 credits in classical studies

HIST 406W Research in Medieval Sources (3) Guided research in the literature of medieval Europe.
Effective: Spring 2008
Prerequisite: HIST 001

HIST 407 (IL) Early Medieval Society (3) Rise of European nations and evolution of their social and political institutions from the time of Constantine to the Crusades.
Effective: Spring 2006
Prerequisite: HIST 107

HIST 408 (IL) Church and State in the High Middle Ages (3) European political, institutional, and social history in light of church- state tensions from the Crusades to the Renaissance.
Effective: Spring 2006
Prerequisite: HIST 107

HIST 409Y (IL) (J ST 409Y, RL ST 407Y) European Anti-Semitism from Antiquity to the Present (3) Surveys the history of anti-Semitism in Europe from antiquity through the Middle Ages to the present.
Effective: Summer 2005

HIST 410 (US;IL) (J ST 410, RL ST 410) Jews in the Medieval World (3) Trends in medieval Jewish society under Islam and Western Christendom.
Effective: Spring 2006

HIST 411 (IL) (MEDVL 411) Medieval Britain (3) Political, cultural, and economic history of Britain from circa 400 to 1485 with an emphasis on the kingdom of England.
Effective: Spring 2006
Prerequisite: 6 credits in European history or medieval studies

HIST 412 (IL) Intellectual History of the Middle Ages (3) Intensive study of selected topics, such as philosophy, mysticism, heresy, the church, literary and artistic expression, and science.
Effective: Spring 2006
Prerequisite: HIST 107

HIST 413 (IL) (MEDVL 413) Medieval Celtic Studies (3) Celtic civilization from antiquity to the end of the middle ages.
Effective: Spring 2006
Prerequisite: 3 credits in medieval studies or in language literature or European history of the medieval period

HIST 414 (IL) Renaissance and Reformation (3) The transformation of consciousness from medieval to modern times, with special emphasis on Renaissance Italy and Reformation Germany.
Effective: Spring 2006
Prerequisite: HIST 001

HIST 415 (US;IL) Race, Gender, and Politics in the United States and South Africa (3) This thematic course will compare key issues, figures, and events in the historical development of the United States and South Africa.
Effective: Summer 2011

Prerequisite: AAA S 100, AAA S 102, AAA S 110, AAA S 192 or HIST 152

HIST 416 (J ST 416) **Zionist History 1890-1948** (3) History of Zionist thought and politics to the foundation of Esrael 1948.

Effective: Summer 1997

HIST 417 (IL) **The Age of Absolutism** (3) Seventeenth- and eighteenth-century royal absolutism in France, Prussia, and Austria; concurrent economic, social, and scientific developments; the Enlightenment.

Effective: Spring 2006

Prerequisite: HIST 001

HIST 418 (IL) **The French Revolution and the Napoleonic Era** (3) Development of revolutionary France and the First French Empire and their impact on Europe from 1789 to the Vienna settlement.

Effective: Spring 2006

Prerequisite: HIST 002

HIST 418W (IL) **The French Revolution and the Napoleonic Era** (3) Developments of revolutionary France and the First French Empire and their impact on Europe from 1789 to the Vienna settlement.

Effective: Spring 2008

Prerequisite: HIST 002

HIST 419 (US;IL) **The History of Feminist Thought** (3) A critical analysis of European and United States feminist thought from the renaissance to the present.

Effective: Summer 2011

Prerequisite: HIST 116, HIST 117, WMNST 001 or WMNST 003

HIST 420 (IL) **Recent European History** (3) Impact of two World Wars in twentieth century; social conflict and economic catastrophe; political radicalism; post-1945 recovery and cooperation.

Effective: Spring 2006

Prerequisite: 3 credits in European history

HIST 420W (IL) **Recent European History** (3) Impact of two World Wars in twentieth century; social conflict and economic catastrophe; political radicalism; post-1945 recovery and cooperation.

Effective: Spring 2008

Prerequisite: 3 credits in European history

HIST 421 (IL) (WMNST 421) **The History of European Women** (3) European women's lives from the Middle Ages to the present.

Effective: Spring 2006

Prerequisite: HIST 116, HIST 117, WMNST 001 or WMNST 003

HIST 422 (IL) **Modernity and Its Critics: European Thought Since 1870** (3) Perceptions and critiques of modernity as seen in works of European cultural criticism, social theory, philosophy, and literature.

Effective: Spring 2006

Prerequisite: HIST 002, HIST 120 or 3 credits in modern literature or philosophy or political or social theory

HIST 424H (J ST 424H, RL ST 424H, PHIL 434H) **Monotheism and the Birth of the West** (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.

Effective: Spring 2002

Prerequisite: CAMS 004, CAMS 110, CAMS 120 or HIST 102

HIST 426 (US) (ADM J 426, J ST 426) **Jewish/American Organized Crime in New York City** (3) History of Jewish/American organized crime in New York City from 1890 through the Great Depression.

Effective: Spring 2006

HIST 427 (IL) **Germany Since 1860** (3) Bismarckian power-state; rise to economic dominance; welfare and warfare under Weimar republic and Hitler; post-1945 reconstruction and democracy.

Effective: Spring 2006

Prerequisite: 3 credits in European history

HIST 428 (IL) (S T S 428) **The Darwinian Revolution** (3) The origins and implications of evolutionary theory.

Effective: Spring 2006

Prerequisite: an introductory science course and a history course

HIST 429 **Europe in the Age of Nationalism, 1789-1914** (3) Emphasizing the role of nationalism in European cultural, diplomatic and imperial developments; concurrent economic and social changes.

Effective: Spring 2008

Prerequisite: HIST 002

HIST 430 (IL) **Eastern Europe in Modern Times** (3) Influence of geography, economic conditions, and nationalism upon the Eastern European and Balkan peoples; Pan-Slavism, conflicting interests of the great powers.

Effective: Spring 2006

Prerequisite: HIST 001 or HIST 002

HIST 431 (US;IL) (AAA S 431) **Black Liberation and American Foreign Policy** (3) This course deals with American foreign policy and Black liberation in Africa since 1945.

Effective: Summer 2005

Prerequisite: 3 credits in African history; 3 credits in African political science; or 3 credits in American political science

HIST 432 (IL) (AAA S 432) **Between Nation and Empire: The Caribbean in the 20th Century** (3) An exploration of the political evolution of the Caribbean Region over the course of the 20th Century.

Effective: Summer 2005

Prerequisite: HIST 250

HIST 433 (IL) **Imperial Russia, 1700-1917** (3) Enlightened absolutism, mercantilism, westernization; economic progress, liberal reforms, and revolutionary movement; major intellectual and cultural trends; Russia as great power.

Effective: Spring 2006

Prerequisite: HIST 141

HIST 434 (IL) **History of the Soviet Union** (3) Revolution; social, political, economic, and cultural continuity and change in the U.S.S.R. since 1917.

Effective: Spring 2006

Prerequisite: HIST 141 or HIST 142

HIST 435 **Topics in European History** (3 per semester/maximum of 9) Study of a particular period or country in European history, its significance and relation to other areas and the present. (May be repeated for credit.)

Effective: Spring 2008

Prerequisite: HIST 001 or HIST 002

HIST 436 (IL) **Great Britain Under the Tudors and Stuarts, 1485-1688** (3) Religious, political, and constitutional developments in the British Isles.

Effective: Spring 2006

Prerequisite: HIST 001 or HIST 002

HIST 437 (IL) **Great Britain 1688-1867** (3) Social, economic, and political history of Great Britain from late Stuart times until the mid-Victorian era.

Effective: Spring 2006

Prerequisite: HIST 001 or HIST 002

HIST 438 (IL) **Great Britain 1867-Present** (3) Social, economic, and political history of Great Britain from the mid-Victorian era to the present.

Effective: Spring 2006

Prerequisite: HIST 001 or HIST 002

HIST 440 (US) **Colonial America to 1753** (3) Background, establishment, and growth of the American colonies, including economic, political, social, religious, and intellectual developments.

Effective: Spring 2006

Prerequisite: HIST 020 3 additional credits in history

HIST 441 (US) **Revolutionary America, 1753-1783** (3) Forces in Great Britain and America causing withdrawal of thirteen colonies from the British Empire and the Revolutionary War.

Effective: Spring 2006

Prerequisite: HIST 020 3 additional credits in history

HIST 442 (US) **The Early American Republic, 1783-1850** (3) Confederation and Constitution; the Federalist and Jeffersonian periods; "the Era of Good Feelings"; "the Age of Jackson."

Effective: Spring 2006

Prerequisite: 3 credits in American history

HIST 444 (US) **The United States in Civil War and Reconstruction--1850-1877** (3) Causes of the Civil War; conduct of the war, North and South; impact of the war; problems of Reconstruction.

Effective: Spring 2006

Prerequisite: HIST 130

HIST 444W (US) **The United States in Civil War and Reconstruction--1850-1877** (3) Causes of the Civil War; conduct of the war, North and South; impact of the war; problems of reconstruction.

Effective: Spring 2008

Prerequisite: HIST 130 or HIST 020

HIST 445 (US) **The Emergence of Modern America** (3) Economic, social, political history of the United States, 1877-1919, emphasizing growth of industrialism and development as a modern nation.

Effective: Spring 2006

Prerequisite: HIST 021 3 additional credits in history economics or political science

HIST 446 (US) **America Between the Wars** (3) The Roaring Twenties, the Great Crash, Depression, and New Deal; war debts, reparations, isolationism, and World War II.

Effective: Spring 2006

HIST 447 (US) **Recent American History** (3) Contemporary economic, social, and political aspects of the United States and its role as a world power since 1945.

Effective: Spring 2006

Prerequisite: HIST 021 3 additional credits in history economics or political science

HIST 448 (US) **America in the 1960s** (3) Social, political, and cultural themes in the United States in the 1960s.

Effective: Spring 2006

Prerequisite: HIST 021

HIST 449 (US) **Constitutional History of the United States to 1877** (3) Colonial background; framing and adoption of the constitution; development of the court under Marshall and Taney; sectionalism, Civil War, Reconstruction.

Effective: Spring 2006

Prerequisite: HIST 020 or HIST 021 3 additional credits in history or political science

HIST 450 (US) Constitutional History of the United States Since 1877 (3) Constitutional developments from laissez-faire to the welfare state; imperialism, war, internationalism; the contemporary court, civil liberties, and civil rights.

Effective: Spring 2006

Prerequisite: HIST 020 or HIST 021 3 additional credits in history or political science

HIST 451 (US) The Consumer Revolution (3) The origins and impact of American consumer society since 1870.

Effective: Spring 2006

Prerequisite: three credits in history marketing or advertising

HIST 452 (US;IL) History of U.S. Foreign Relations (3) History of U.S. foreign relations since 1789; emphasis on twentieth century.

Effective: Spring 2006

Prerequisite: HIST 020 or HIST 021

HIST 453 (GEOG 407) American Environmental History (3) The history of the ways Americans have used and thought about the environment since 1500.

Effective: Summer 2011

Prerequisite: GEOG 030 ; and HIST 020, HIST 021 ; or 6 credits in the humanities or social sciences

HIST 454 (US) American Military History (3) Development of U.S. military policy, 1776 to the present, emphasizing the conduct of our wars, interrelationship of civil and military authority.

Effective: Spring 2006

Prerequisite: HIST 020 or HIST 021

HIST 456Y (US) The Social History of American Vernacular Building, 1607-1980 (3) Social, historical, and cultural context of American building including settlements, housing, workplaces, stores, recreational facilities; changes over time.

Effective: Spring 2006

Prerequisite: 3 credits in American history

HIST 457 (US;IL) (S T S 457, WMNST 457) The History of Women in Science (3) Critical analysis of the roles women, gender, and minorities have played in natural sciences.

Effective: Spring 2006 Ending: Summer 2011

Prerequisite: HIST 116, HIST 117, WMNST 001, WMNST 003 or WMNST 005

HIST 457 (US;IL) (S T S 457, WMNST 457) The History of Women in Science (3) Critical analysis of the roles women, gender, and minorities have played in natural sciences.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: HIST 116, HIST 117, WMNST 001, WMNST 003 or WMNST 157

HIST 458Y (US) (LER 458Y) History of Work in America (3) A study of selected problems in the history of work in the United States, especially since 1877.

Effective: Spring 2008

Prerequisite: HIST 021, HIST 156 or LER 100

HIST 459Y (US) Social and Cultural History of the United States Since 1783 (3) Role of immigration, social reform movements, religion, education, science, literature, and the arts in American history.

Effective: Spring 2006

HIST 460 (US;IL) United States Foreign Intelligence (3) Aims, methods, and organization of U.S. foreign intelligence from the American Revolution to the Cold War and beyond.

Effective: Spring 2006

HIST 461 (US;IL) The Emergence of the American City: 1100-1880 (3) The growth of American cities from their urban origins in Europe and the Native-American Southwest to 1880.

Effective: Spring 2006

HIST 462 (US;IL) The Twentieth Century City (3) Political, economic, social, and cultural transformations in American cities from 1880 to 2000.

Effective: Spring 2006

HIST 463 (US) American Thought to 1865 (3) Introduction to, scholarly commentary on, major documents of American Intellectual history, early colonial period to end of the Civil War.

Effective: Spring 2006

Prerequisite: any American history course at the college freshman level

HIST 464 (US) American Thought from 1865 (3) Introduction to, scholarly commentary on, major documents of American Intellectual history from end of the Civil War to the present.

Effective: Spring 2006

Prerequisite: any American history course at the college freshman level

HIST 465 (US) (AAA S 465) Civil Rights and American Politics 1933-1968 (3) The civil rights struggle and its impact upon American politics.

Effective: Summer 2005

Prerequisite: AAA S 100, HIST 021, HIST 152, PL SC 001 or PL SC 002

HIST 466 (US;IL) (WMNST 466) **Lesbian and Gay History** (3) Critical exploration of the history of sexuality, focusing especially on the emergence of modern lesbian and gay identities.

Effective: Summer 2005

Prerequisite: HIST 117, WMNST 001

HIST 467 (US;IL) (LTNST 467) **Latin America and the United States** (3) Historical development of policies of the United States with regard to Latin- American affairs from colonial times to the present.

Effective: Fall 2008

HIST 468 (IL) **Mexico and the Caribbean Nations in the Twentieth Century** (3) Political, economic, and social development in Mexico and the Caribbean since 1900. Emphasis on Mexican, Guatemalan, and Cuban revolutions.

Effective: Spring 2006

HIST 469 (CRIMJ 469) **Drugs and Drug Policy in the United States** (3) Examines the history and dimensions of drug use and analyzes the impact of drug policy.

Effective: Spring 2008

Prerequisite: CRIMJ 100 or HIST 021

HIST 470 **Modern Bondage: Slavery in the Americas, 1492-1888** (3) The work, culture, ideology, and political economy of slavery in the Americas between 1500 and 1888.

Effective: Summer 2007

Prerequisite: HIST 011, HIST 020, HIST 152, HIST 178 or HIST 192

HIST 471Y (IL) (RL ST 471Y) **Classical Islamic Civilization, 600-1258** (3) Pre-Islamic Arabia; Muhammad; Arab conquests; Islamic beliefs and institutions; literary, artistic, and scientific achievements; relations with Europe; breakdown of unity.

Effective: Fall 2006

HIST 472 (IL) **The Ottoman Empire and Other Muslim States** (3) Turkish and Mongol invasions; Mamluks; Ottoman expansion and institutions; Safavid Persia; disintegration and reform; emergence of modern Turkey and Iran.

Effective: Spring 2006

Prerequisite: HIST 181

HIST 473 (IL) **The Contemporary Middle East** (3) Political, economic, and social changes in Turkey, Iran, Israel, and the Arab countries in the twentieth century; Arab-Israeli conflict.

Effective: Spring 2006

HIST 475Y (IL) **The Making and Emergence of Modern India** (3) India's transition to social, economic, and political modernity through the experience of British colonial rule and the nationalist struggle.

Effective: Spring 2006

Prerequisite: HIST 010, HIST 011, HIST 172, HIST 175, HIST 176, HIST 181 or HIST 191

HIST 477 **American Military History to 1900** (3) Development of United States military policy, 1776-1900, emphasizing conduct of wars, interrelationship of civil and military authority.

Effective: Spring 2008

Prerequisite: 3 credits in history

HIST 478 **American Military History Since 1900** (3) Development of United States military policy in the 20th and 21st centuries, emphasizing conduct of wars, interrelationship of civil and military authority.

Effective: Spring 2008

Prerequisite: 3 credits in history

HIST 479 (IL) **History of Imperialism and Nationalism in Africa** (3) Theories and types of imperialism; varied patterns of colonial administration; initial African responses; nationalism; decolonization and independence.

Effective: Spring 2006

Prerequisite: HIST 191

HIST 480 (IL) **Medieval Japan** (3) An overview of Japan between 1150-1550, a period of political decentralization, cultural efflorescence, and social change.

Effective: Spring 2006

Prerequisite: HIST 107, HIST 172, HIST 174 or HIST 407

HIST 481 (IL) **Modern Japan Since 1800** (3) The transformation of Japan from a pre-modern, isolated, and agricultural nation into a highly industrialized world power.

Effective: Spring 2006

Prerequisite: HIST 172, HIST 174 or HIST 175

HIST 483 (IL) **Chinese Society and Culture to 1800** (3) The social, political, and cultural issues and developments from ancient to the late-imperial times.

Effective: Spring 2006

Prerequisite: HIST 174

HIST 484Y (IL) **History of Chinese Thought** (3) A study of the dynamic historical development of Chinese thought with its diverse expressions from antiquity to the present.

Effective: Spring 2006

Prerequisite: HIST 174 or HIST 175

HIST 485Y (IL) Nineteenth-Century China (3) Ch'ing society and institutions; "opening" to the west; imperialism; domestic upheaval and its effect upon Chinese society; reform movements.

Effective: Spring 2006

Prerequisite: HIST 175 or HIST 300H (Honors in East Asian history)

HIST 486 (IL) Twentieth-Century China (3) China from the Republican Revolution of 1911 to the present; nationalism, cultural change; development of communism.

Effective: Spring 2006

Prerequisite: HIST 175 or HIST 300H (Honors in East Asian History)

HIST 487 American Diplomacy, 1776-1914 (3) Developments in the foreign policy of the United States from independence to the eve of World War I.

Effective: Spring 2008

Prerequisite: HIST 002 or HIST 020

HIST 488 American Diplomacy Since 1914 (3) Developments in the foreign policy of the United States since the eve of World War I.

Effective: Spring 2008

Prerequisite: HIST 002 or HIST 021

HIST 490 (L ST 490) Archival Management (1-3) Introduction to the principles and procedures in the management of archives and historical manuscripts.

Effective: Fall 1978

HIST 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

HIST 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

HIST 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships.

Effective: Summer 1986

Prerequisite: prior written approval of proposed assignment by instructor

HIST 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

HIST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

HIST 497A The Spanish-Speaking Caribbean and Its Diaspora (3) This course will examine the nineteenth and twentieth century history of Cuba, Santo Domingo, and Puerto Rico, including the emigration and founding of Spanish-Caribbean diasporas in the United States.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HIST 497B (J ST 497B, RL ST 497B) German Antisemitism from the Middel Ages to the Holocaust (3) German and Jewish history are interpreted in an integrated approach which examines the fundamental problem of continuity through the lens of antisemitism.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HIST 497C Technology and Society in Modern Japan (3) Examine the role of technology in Japan's modernization and foreign relations from the mid-19th century to the present day.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HIST 497H Major Interpretations in US History (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HIST 499 (IL) Foreign Study--History (1-6) Study in selected foreign countries of various periods and topics in history.

Effective: Summer 2005

Prerequisite: 3 credits in the appropriate introductory history course for the geographic location specified

HIST 499A (IL) (CAMS 499A, ANTH 499A) Archaeology, History, and Culture of Turkey's Aegean Coast (3) The 2011 study tour will focus on Turkey's western coast, the location of Troy and the Trojan War and the heart of the Greco-Roman and Byzantine empires.

Effective: Summer 2011 Ending: Summer 2011

HIST 499B (IL) (CAMS 499B, ANTH 499B) **Foreign Study** (3) This course is offered as an option for students to earn an additional 3 credits, with the permission of the instructor. The students will be required to write a research paper on an approved topic.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: 3 credits in the appropriate introductory history course for the geographic location specified

HIST 499C (IL) (RL ST 499C, CAMS 499C, ANTH 499C) **Excavation, Survey and GIS for Archaeologists** (6) Entails excavation, intensive survey, and an introduction to GIS for archaeologists.

Effective: Summer 2011 Ending: Summer 2011

HIST 499D (IL) (RL ST 499D, CAMS 499D, ANTH 499D) **Israel Dig: Excavation, Conservation, and Public Archaeology** (6) Entails excavation, conservation, and public archaeology involved with the preservation and interpretation of Israel's archaeological sites.

Effective: Summer 2011 Ending: Summer 2011

HIST 499E (IL) (CAMS 499E, ANTH 499E) **Study Tour of Jordan: Petra, the Spice Route, Roman Palestine** (3) Entails an in-depth seminar with a focus on the archaeology and history of Roman Palestine.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: 3 credits in the appropriate introductory history course for the geographic location specified

HIST 501 **Historical Method** (3) No description.

Effective: Winter 1978

HIST 502 **Historiography** (3) No description.

Effective: Winter 1978

HIST 503 **Studies in Greek History** (3-6) No description.

Effective: Winter 1978

HIST 504 **Studies in Roman History** (3-6) No description.

Effective: Winter 1978

HIST 505 (J ST 505) **Biblical Historiography in its Ancient Setting** (3 per semester/maximum of 6) Methods of historical reconstruction in Biblical and other historiography from the earliest Mesopotamian records through those of the 6th century B.C.E.

Effective: Spring 1995

Prerequisite: HIST 102

HIST 508 (J ST 508) **Antisemitisms in Historical Context** (3) Historical and comparative analysis of occurrences of antisemitism from antiquity to the present.

Effective: Spring 1995

HIST 509 **Medieval Civilization** (3-9) No description.

Effective: Winter 1978

HIST 510 (RL ST 510) **Topics in Medieval Church History** (3 per semester, maximum of 6) Institutional and doctrinal development of the Christian Church in medieval Europe.

Effective: Spring 1995

HIST 511 **Topics in Medieval Britain** (3 per semester, maximum of 6) Readings and research in major themes of the history of medieval Britain.

Effective: Summer 1994

HIST 515 **Early Modern Europe** (3-6) A graduate seminar examining selected topics in early modern European history through readings, discussions, and research papers.

Effective: Spring 1987

HIST 516 (WMNST 516) **Topics in Gender History** (3) A critical analysis of gender and theories of gender in selected historical contexts.

Effective: Summer 1992

HIST 517 **Studies in Modern European Social History** (3-6) A graduate seminar examining the literature and methodologies of European social history since 1750 through readings, discussions, and research papers.

Effective: Spring 1987

HIST 518 **Topics in Modern German History** (3 per semester, maximum of 6) Readings and research in the history of

Germany since 1740.
Effective: Summer 1994

HIST 520 Studies in Twentieth-Century Europe (3-6) No description.
Effective: Winter 1978

HIST 522 Studies in Modern European Intellectual History (3-6) A seminar examining developments in modern European intellectual history through readings, class discussions, and research papers.
Effective: Summer 1986

HIST 523 Twentieth Century Theories of History (3) Studies in twentieth-century theories of history and historical methods.
Effective: Spring 1995

HIST 528 Topics in Modern European Diplomatic History (3 per semester, maximum of 6) Readings and research in European diplomatic history since the Congress of Vienna.
Effective: Summer 1994

HIST 529 Methods in Modern Social History (3 per semester, maximum of 6) Sources, interpretations, research methods, and current debates in modern social history.
Effective: Summer 1994

HIST 530 Methods in the History of Science and Technology (3 per semester, maximum of 6) Modern research methods and historiographical controversies in the history of science and technology.
Effective: Summer 1994

HIST 533 Studies in Russian and Soviet History (3-6) No description.
Effective: Winter 1978

HIST 537 Studies in British History (3-6) No description.
Effective: Winter 1978

HIST 538 Topics in Rural History (3 per semester, maximum of 9) Historical analysis of rural societies, including cultural patterns, agricultural practices, social structures, environmental issues; research methodologies.
Effective: Summer 1994

HIST 539 Topics in Military History (3 per semester, maximum of 9) Studies in the history of wars and of the political, social, economic, diplomatic, and theoretical foundations of warfare.
Effective: Summer 1994

HIST 540 Studies in Colonial and Revolutionary America (3-6) No description.
Effective: Fall 1983

HIST 543 Topics in Antebellum America (3 per semester, maximum of 6) Social, intellectual, and cultural developments from the period after the nation's founding until the start of the Civil War.
Effective: Summer 1994

HIST 544 Topics in the Civil War and Reconstruction (3 per semester, maximum of 6) Background and impact of the Civil War and the two succeeding decades, with emphasis on historiography and selected topics.
Effective: Summer 1994

HIST 545 Topics in Gilded Age and Progressive Era America, 1877-1919 (3 per semester, maximum of 6) Social, political, economic, and cultural history of the United States from the Gilded Age through Progressivism and World War I.
Effective: Summer 1994

HIST 546 Topics in United States History Since 1919 (3 per semester, maximum of 6) Readings and research in major themes of the history of the United States in the twentieth century.
Effective: Summer 1994

HIST 548 Topics in United States South (3 per semester, maximum of 6) Major themes of southern United States history.
Effective: Summer 1994

HIST 549 Topics in African-American History (3 per semester, maximum of 6) Readings, research, and methods in the study of African-American history.

Effective: Summer 1994

HIST 550 Studies in Constitutional History (3-9) A graduate seminar examining constitutional developments in their historical context through readings, class discussions, and research papers.
Effective: Fall 1983

HIST 553 Diplomatic History of the United States (3-6) No description.
Effective: Winter 1978

HIST 555 (L I R 555) Topics in American Labor History (3 per semester/maximum of 6) American working-class experience from its artisanal and agricultural roots through the rise, maturation, and transformations of industrial capitalism.
Effective: Spring 1995

HIST 559 Cultural History of the United States (3-6) No description.
Effective: Winter 1978

HIST 560 (RL ST 560) Topics in American Religion (3 per semester, maximum of 6) The social, political, and intellectual contexts of American religious thought.
Effective: Spring 1995

HIST 561 (RL ST 561) Topics in Western Religion (3 per semester, maximum of 6) Major issues and themes in the historical development of Christianity and Judaism.
Effective: Spring 1995

HIST 562 (RL ST 562) Topics in Comparative Religion (3 per semester, maximum of 6) Comparative studies of world religions.
Effective: Spring 1995

HIST 563 (RL ST 563) Religion and Society (3 per semester, maximum of 6) Social and political implications of religious belief and practice.
Effective: Spring 1995

HIST 564 (RL ST 564) Topics in Asian Religions (3 per semester, maximum of 6) Topics in Asian religions.
Effective: Spring 1995

HIST 565 (RL ST 565) Research in Religious Studies (3) Approaches and methodologies in the critical study of religion.
Effective: Summer 1995

HIST 566 (RL ST 566) Islamic Studies (3) Studies in Islamic history, historiography, theology, law, and religious life.
Effective: Spring 1997

HIST 569 Seminar in Latin-American History (3-6) No description.
Effective: Winter 1978

HIST 573 Studies in Middle Eastern History (3-6) No description.
Effective: Winter 1978

HIST 583 Topics in Traditional East Asian History (3 per semester, maximum of 6) Critical examination of historiography and methodological and interpretive approaches in traditional East Asian history.
Effective: Summer 1994

HIST 584 Topics in Modern East Asian History (3 per semester, maximum of 6) Research and readings in the history of East Asia since the early nineteenth century.
Effective: Summer 1994

HIST 587 Topics in Modern South Asian History (3 per semester, maximum of 6) Research and readings in the history of South Asia since the late eighteenth century.
Effective: Summer 1994

HIST 591 Archives Practicum (3-6) Training and supervised work experience in archival activities--Option A: Archival Management; Option B: Oral History.
Effective: Winter 1978
Prerequisite: HIST 490

HIST 592 **Proseminar** (3-9) Readings in fundamental historical works; different sections will treat such topics as United States History and Early Modern History.
Effective: Summer 1998

HIST 593 **Research Seminar** (3) Seminar in research methods of the discipline.
Effective: Summer 2009
Prerequisite: HIST 592

HIST 595 **Internship** (1-12) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 1987
Prerequisite: prior written approval of proposed assignment by instructor

HIST 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

HIST 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

HIST 597A **Late Imperial and Modern China** (3) This course exposes students to a survey of the historical scholarship on late imperial and modern China, providing students with an overview of the themes, theories, and debates within the field of late imperial and modern Chinese history.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HIST 597B **Medieval Developments in Church and State** (3) Course will examine a number of aspects of medieval power and authority.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HIST 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

HIST 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

HIST 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Students enrolled will lead discussion sections, grade papers and examinations, given an occasional lecture, and assist instructors in planning survey level courses.
Effective: Fall 1983

HIST 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2002

HIST 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

HIST 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Homeland Security (HLS)

HLS 410 (PHP 410) Public Health Preparedness for Disaster and Terrorist Emergencies I (3) Analyzes the history of terrorism and explores the preparation and response to specific terrorist threats, natural disasters, and conventional catastrophes.

Effective: Spring 2011

Prerequisite: Undergraduate Students BIOL 011 and BIOL 012 or CHEM 110 and CHEM 111 or MICRB 106 and MICRB 107 ; Graduate Students - Enrollment in the MHS program the Post- Baccalaureate Credit Certificate in Homeland Security or permission from the instructor.

HLS 510 (PHP 510) Public Health Preparedness for Disaster and Terrorist Emergencies II (3) A public health perspective on the preparation necessary to develop a coordinated response to a disaster or terrorist emergency.

Effective: Spring 2011

Prerequisite: permission of the instructor

HLS 520 (AGBIO 520) Agricultural Biosecurity: Protecting a Key Infrastructure (3) Course will explore intentional and unintentional threats to the agriculture- food system, history and current approaches for safeguarding this key infrastructure.

Effective: Summer 2005

Prerequisite: HLS 510 or permission of the instructor

HLS 527 (PHP 527) Public Health Evaluation of Disasters and Bioterrorism (3) Introduces students to the design of exposure assessment and health effect studies applicable to disasters and terrorism.

Effective: Spring 2011

Prerequisite: HLS 510 or permission of the instructor

HLS 530 (PHP 530) Critical Infrastructure Protection of Health Care Delivery Systems (3) Investigates the impact that terrorist incidents may have on healthcare facilities or their ability to deliver healthcare services.

Effective: Spring 2011

Prerequisite: HLS 510 permission of the instructor

HLS 553 (CAS 553, PHP 553) Disaster Communication (3) This seminar provides students with a comprehensive understanding of the multifaceted nature of disaster communication across phases of a disaster.

Effective: Spring 2011

HLS 558 (PSY 558, PHP 558) Disaster Psychology (3) Explores psychological impact of disasters and terrorist attacks on victims, families, rescuers, and society and methods of reducing negative effects.

Effective: Spring 2011

Prerequisite: HLS 510 or permission of the instructor

HLS 594 (PHP 594) Research Topics (1-15) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2011

Prerequisite: Completion of at least 15 credits in the program including HLS 510 and HLS 527 or permission of the instructor

HLS 801 (P ADM 801) Homeland Security Administration: Policies and Programs (3) Foundation for understanding homeland security history, the development of homeland security policies and organizations, and current management approaches.

Effective: Summer 2010

HLS 803 (PHIL 803) Homeland Security: Social and Ethical Issues (3) This course will examine the social, political, legal, and ethical issues that arise in the context of homeland security.

Effective: Summer 2010

HLS 805 (CRIM 805) Violence, Threats, Terror, and Insurgency (3) This course provides overview of the domestic and global issues related to homeland security.

Effective: Summer 2010

Last Import from UCM: June 16, 2011 3:00 AM

Honors (HONOR)

HONOR 401H Honors Seminar (3-6 per semester/maximum of 6) In-depth honors-level exploration of a topic or theme that crosses disciplinary boundaries; may be repeated for credit.

Effective: Fall 2010

Prerequisite: admission to an honors program belonging to the Penn State Honors Consortium

HONOR 493H Honors Service Learning (1-3) A supervised honors experience doing service for campus or community welfare and analyzing related issues.

Effective: Fall 2010

Prerequisite: admission to an honors program belonging to the Penn State Honors Consortium

HONOR 494M Interdisciplinary Writing and Thesis Formulation (2) Seminar to help students with interdisciplinary analysis, writing, and formulation of honors projects and proposals.

Effective: Fall 2010

Prerequisite: admission to an honors program belonging to the Penn State Honors Consortium

HONOR 495H Research Studies (1) A capstone seminar for honors students working on honors theses and projects to work together and learn about their research interests.

Effective: Fall 2010

Prerequisite: HONOR 301H and enrollment in an honors program belonging to the Penn State Honors Consortium

HONOR 496H Honors Thesis (3) Research, creative activities, and writing necessary for pursuit and completion of an interdisciplinary honors thesis.

Effective: Fall 2010

Prerequisite: HONOR 301H senior standing and enrollment in an honors program belonging to the Penn State Honors Consortium

Last Import from UCM: June 16, 2011 3:00 AM

Horticulture (HORT)

HORT 402W Plant Nutrition (3) Mineral nutrition of higher plants, including nutrient acquisition, transport, metabolism, and practical implications.

Effective: Spring 2003

Prerequisite: HORT 315 orBIOL 441, SOILS 101

HORT 407 Plant Breeding (3) The scientific principles and techniques of utilizing genetic variability in improving the heredity of plants for specific purposes.

Effective: Spring 2003

HORT 408 Landscape Plant Establishment and Maintenance (4) The principles and practices involved in the establishment of plants in the landscape, and their subsequent maintenance.

Effective: Summer 1998

Prerequisite: HORT 137 orHORT 138;SOILS 101

HORT 409 Landscape Plant Establishment and Maintenance Laboratory (1) Students will actively participate in the practices involved in the establishment of plants in the landscape, and their subsequent maintenance.

Effective: Summer 1998

Prerequisite: HORT 408

HORT 410W Issues in Landscape Contracting (3) This will be a survey of business management, regulatory, and environmental issues facing the landscape contracting profession. Laboratory.

Effective: Summer 1998

Prerequisite: HORT 408

HORT 412W Post-Harvest Physiology (3) Harvesting, handling, storage, and transportation of horticultural crops; primary emphasis on physiological response to pre- and post-harvest environmental factors.

Effective: Spring 2001

Prerequisite: 6 credits in horticulture or other plant sciences

HORT 420 Plant Growth Regulators (3) Plant growth regulators, their chemical and physical properties; general principles, practices, and applications in regulating plant growth and development.

Effective: Spring 2001

Prerequisite: BIOL 110 orHORT 101

HORT 431 Small Fruit Culture (3) Cultural requirements and production practices of the principal small fruit crops: strawberries, grapes, blueberries, brambles, and cranberries.

Effective: Spring 2001

Prerequisite: HORT 101, HORT 315

HORT 432 Deciduous Tree Fruits (3) Science, art, and techniques of regulated cropping; orchard designs and management systems.

Effective: Spring 2001

Prerequisite: HORT 101, HORT 315

HORT 433 Vegetable Crops (3) Cultural requirements of important vegetable crops in conjunction with physiological processes and problems related to commercial production.

Effective: Spring 2001

Prerequisite: HORT 101, HORT 315

HORT 440W Plant Water Relations (3) Fundamentals of plant water relations including acquisition, transport, conservation, response to drought, measurement of water status, relationship to productivity, interaction with mineral nutrition, and use of equipment.

Effective: Spring 2003

Prerequisite: BIOL 441 orBIOL 446 or permission of department

HORT 445 Plant Ecology (3) Advanced lectures on plant ecology which stress integration of physiological, population-level and community-level phenomena, and ecology in agriculture.

Effective: Fall 1999

Prerequisite: BIOL 220W, FOR 308 orHORT 315

HORT 450 Greenhouse Management (3) Maintenance and manipulation of the greenhouse production systems including structures, covers, light, temperature, carbon dioxide, water, growing media, fertilizer and greenhouse cost accounting.

Effective: Spring 2001

Prerequisite: HORT 101, HORT 315

HORT 453 Flower Crop Production and Management (3) Production of greenhouse flower and foliage plants; development of management skills for a greenhouse business.

Effective: Spring 2001

Prerequisite: HORT 101, HORT 315

HORT 455 Retail Horticulture Business Management (3) The nature, operation, and management of retail horticulture business, emphasizing retail greenhouses, nurseries, and flower shops.

Effective: Spring 2001

Prerequisite: HORT 131, HORT 137 orHORT 138 ; 3 credits of marketing

HORT 457 Interior Landscaping (3) Foliage identification, environmental factors affecting plants, concepts of interior plant design, installation and maintenance.

Effective: Summer 2004

Prerequisite: HORT 101; HORT 202 or HORT 250 or HORT 269

HORT 459 (BIOTC 459, BIOL 459) Plant Tissue Culture and Biotechnology (3) Principles and techniques for the in vitro culture, propagation, and genetic manipulations of plant cells.

Effective: Fall 2003

Prerequisite: BIOL 230W ; or B M B 251, B M B 252

HORT 464 Landscape Construction I (4) Standards, processes, and computations for site grading, drainage, earthwork, vehicular circulation, parking; detailing, and finishing of landscape construction materials.

Effective: Spring 2001

Prerequisite: HORT 269

HORT 466 Landscape Construction II (5) Project scheduling methods, plant installation techniques, and field layout principles and practices. Implications of site preparation.

Effective: Summer 1988

Prerequisite: HORT 464

HORT 468 Landscape Estimating and Bidding (2) Reading and interpreting contract drawings and specifications, quantity take-offs, cost estimating, and bid document preparation.

Effective: Spring 2001

Prerequisite: HORT 409 or HORT 466

HORT 490 Senior Seminar (1) Exploration of the interrelationships of horticulture, science, and society; evaluation of attributes and abilities related to various career opportunities.

Effective: Spring 1993

Prerequisite: HORT 390 seventh-semester standing

HORT 495 Internship (1-13) Supervised off campus experience in a public or commercial horticultural enterprise. Written and oral critique of activity required.

Effective: Fall 1983

Prerequisite: approval of proposed assignment required prior to registration

HORT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

HORT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

HORT 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

HORT 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

HORT 514 (PLBIO 514) Modern Techniques and Concepts in Plant Ecophysiology (2) An intensive introduction to concepts of plant ecophysiology and modern techniques used in this field.

Effective: Spring 2007

Prerequisite: BIOL 220W

HORT 517 (PLPHY 517) Ecology of Plant Roots (2) Form and function of roots from an ecological perspective using examples from both wild and crop plants.

Effective: Spring 1999

HORT 520 Advanced Plant Growth Regulators (2) Advanced topics in plant growth regulators, their chemical and physical properties; physiological, biochemical and molecular regulation of plant growth and development.

Effective: Spring 1998

Prerequisite: HORT 420

HORT 524 Experimental Procedures in Plant Science Research (3) Experimental methods, computer techniques, interpretation of statistical analyses, and communication of research results.

Effective: Fall 1983

Prerequisite: 3 credits in 400-level statistics or AGRO 512

HORT 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 1990

HORT 596 Individual Studies (1-9) Creative projects including non-thesis research, supervised on an individual basis and

which fall outside the scope of formal courses.
Effective: Spring 1987

HORT 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

HORT 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

HORT 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

HORT 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Provides an opportunity for horticulture graduate students to gain experience in teaching under the supervision of a faculty member.
Effective: Fall 1983

HORT 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2009

HORT 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

HORT 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Hotel, Restaurant, and Institutional Management (HRIM)

HRIM 411 Beverage Management and Wine Selection (3) Management issues in beverage service and products. Students taste wines, brews, and distilled spirits.

Effective: Spring 2004

Prerequisite: students must be at least 21 years old

HRIM 413 New Product Development for Commercial Foodservice (3) This course introduces students to a new product development process that requires coordination, communication, and integration throughout the organization.

Effective: Spring 2010

Prerequisite: a grade of "C" or better for HRIM 329

HRIM 415 International Cuisine (3) Cooking and eating practices of cultures around the world, including historical, religious, cultural, geographic, and political influences on each cuisine.

Effective: Spring 2007

Prerequisite: A grade of "C" or better required for HRIM 201, NUTR 100, NUTR 119

HRIM 430 Advanced Food Production and Service Management (3) Simulation and application of technical, conceptual, interpersonal skills. Emphasis on group dynamics; improvement in managerial skills; management team functions.

Effective: Spring 2007

Prerequisite: A grade of "C" or better required for HRIM 330

HRIM 435 Financial Management in Hospitality Operations (3) Fiscal techniques in the development, management, and control of hospitality establishments.

Effective: Spring 2011

Prerequisite: A grade of "C" or better required for ECON 102 or ECON 014 and HRIM 336. Prerequisite or concurrent: HRIM 350

HRIM 437 Hospitality Project Evaluation and Funding (3) Current techniques for project evaluation in the hospitality industry; trends in hospitality project funding.

Effective: Spring 2004

Prerequisite: HRIM 435

HRIM 438 Cases in Financial Analysis (3) Financial analysis and decision making is examined through a series of hospitality-oriented cases.

Effective: Spring 2004

Prerequisite: HRIM 435

HRIM 442 Hospitality Marketing (3) Marketing management in the hospitality industry, including analyzing the market through market research and developing a marketing plan.

Effective: Fall 2010

Prerequisite: A grade of "C" or better required for HRIM 201, MKTG 221

HRIM 443 Sales Planning and Advertising for Hospitality Operations (3) Elements of sales management, advertising, promotion, and public relations as applied to hospitality organizations.

Effective: Fall 2010

Prerequisite: a grade of "C" or better for HRIM 442

HRIM 456 Casino Operations Management (3) Historical and current perspective of the gaming industry. Management principles of casino operations, including coordination with traditional hospitality services.

Effective: Spring 2004

HRIM 466 (US) Human Resource Management in the Hospitality Industry (3) Recruitment, selection, training, performance appraisal, and compensation of hospitality human resources in today's culturally diverse work force.

Effective: Fall 2010

Prerequisite: A grade of "C" or better required for HRIM 201, HRIM 365

HRIM 467 Management of Hotel and Restaurant Employee Relations (3) Survey and analysis of managerial strategies for employee relations in hospitality operations.

Effective: Fall 2010

Prerequisite: a grade of "C" or better for HRIM 466

HRIM 470 Hospitality Management Information Systems (3) Design, implementation, and analyses of information systems for strategic, tactical, and operational functions of hospitality management.

Effective: Spring 2007

Prerequisite: A grade of "C" or better required for HRIM 350

HRIM 471 Evaluation of Hospitality Technology (3) This course provides students with an understanding of the variety of information technologies used in the hospitality industry.

Effective: Spring 2007

Prerequisite: A grade of "C" or better required for HRIM 350, HRIM 470

HRIM 480 Advanced Hotel Management (3) Advanced hotel operations, internal control systems, and service philosophy. Integrates management, departmental operations, law, technology applications, marketing and managerial accounting.

Effective: Spring 2007

Prerequisite: A grade of "C" or better required for HRIM 336, HRIM 380

HRIM 482 Hospitality Real Estate (3) The course focuses on commercial real estate concepts related to the hospitality industry.

Effective: Fall 2010

Prerequisite: A grade of "C" or better required for HRIM 336, HRIM 380

HRIM 483 Revenue Management (3) Students learn how to effectively implement revenue management strategies and techniques in the hospitality industry.

Effective: Spring 2011

Prerequisite: a grade of C or better in HRIM 350

HRIM 486 Casino Marketing (3) Students will learn marketing techniques for casinos which take into account the external environment, individual consumer choices, and ethical considerations.

Effective: Summer 2010

Prerequisite: "C" or better in MKTG 221, HRIM 387, HRIM 388 and HRIM 495 Concurrent: HRIM 487

HRIM 487 Casino Operations and Societal Impact of Gaming (3) Students will learn the structure, culture, and ethical responsibility toward disordered gambling and other lifestyle issues of modern casinos.

Effective: Summer 2010

Prerequisite: "C" or better in HRIM 387, HRIM 388 and HRIM 495 Concurrent: HRIM 486

HRIM 490W Strategic Hospitality Management (3) This capstone writing-intensive class integrates content from throughout the previous curriculum, focusing on strategic application to current industry issues.

Effective: Fall 2010

Prerequisite: a grade of "C" or better for HRIM 365, HRIM 435, HRIM 442

HRIM 492 Advanced Professional Seminar in Hotel, Restaurant and Institutional Management (1) Course prepares senior HR&IM students to assume leadership positions in the hospitality industry (Focus on careers, leadership, ethics, lifelong learning).

Effective: Spring 2004

Prerequisite: 1000 hours of work experience in the hotel restaurant and institutional management industry Concurrent: HRIM 430 HRIM 466 HRIM 490

HRIM 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2004

Prerequisite: prior approval of proposed assignment by instructor

HRIM 495A Hotel Internships-PS Hospitality Services Internship (3) Students will participate in a supervised internship with Penn State Hospitality Services.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: prior approval of proposed assignment by instructor

HRIM 495A Hotel Internships-PS Hospitality Services Internship (3) Students will participate in a supervised internship with Penn State Hospitality Services.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: prior approval of proposed assignment by instructor

HRIM 495B Executive Internship-NLI (3) Students will participate in a supervised internship with the Nittany Lion Inn.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: prior approval of proposed assignment by instructor

HRIM 495B Executive Internships-NLI (3) Students will participate in a supervised internship with the Nittany Lion Inn.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: prior approval of proposed assignment by instructor

HRIM 495D HRIM Teaching Assistant (1-6) Student performs as a teaching assistant for an HRIM course. Assists faculty member with class.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: prior approval of proposed assignment by instructor

HRIM 495D HRIM Teaching Assistant (1-6) Student performs as a teaching assistant for an HRIM course. Assists faculty member with class.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: prior approval of proposed assignment by instructor

HRIM 495D HRIM Teaching Assistant (1-6) Student performs as a teaching assistant for an HRIM course. Assists faculty member with class.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: prior approval of proposed assignment by instructor

HRIM 495E External/Off Campus Internship (1-6) Students will participate in a supervised internship with an approved site participant. Internships are typically one semester in length.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: prior approval of proposed assignment by instructor

HRIM 495E External/Off Campus Internship (1-6) Students will participate in a supervised internship with a approved site participant. Internships are typically one semester in length.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: prior approval of proposed assignment by instructor

HRIM 495E External/Off Campus Internship (1-6) Students will participate in a supervised internship with an approved site participant. Internships are typically one semester in length.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012
Prerequisite: prior approval of proposed assignment by instructor

HRIM 495F Housing & Food Service Internship (3) Students will participate in a supervised internship with a facility within PSU Housing & Food Service.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: prior approval of proposed assignment by instructor

HRIM 495F Housing & Food Service Internship (3) Students will participate in a supervised internship with a faculty within PSU Housing & Food Service.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012
Prerequisite: prior approval of proposed assignment by instructor

HRIM 495G Supervisory Internship (6) Students will participate in a supervised internship with an approved site location.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: prior approval of proposed assignment by instructor

HRIM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2004

HRIM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2004

HRIM 497A Meeting and Events I (3) Students will learn concepts and applications to Event & Meeting Planning.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HRIM 497A Meeting & Events I (3) Students will learn concepts and applications to Event & Meeting planning.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

HRIM 497B Special Topics in Hotel Management (3) Students, through research and on-line activities, will discuss special or current interest in the hotel industry.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HRIM 497C Advanced Issues in Managing Continuing Care Retirement Communities (3) This course encompasses information on hospitality services designed to meet and exceed the expectations of mature consumers residing in CCRCs.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HRIM 497D Managing Continuing Care Retirement Communities (3) Managing Continuing Care Retirement Communities.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

HRIM 497E Business Ethics and Corporate Social Responsibility (3) Examines the role of ethics and corporate social responsibility in hospitality including the concepts of management, sustainability, and leadership.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HRIM 497F Entrepreneurship in the Hospitality Industry (3) This course will explore the characteristics of the successful entrepreneur and the process of starting a new business venture.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HRIM 497I Special Topics in Restaurant Management (3) Students learn about special or current issues in the restaurant and foodservice industry through library research, on-line activities, class presentations.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

HRIM 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2008

HRIM 498A International Hospitality Management (2-3) International hospitality management, organization, practices and structures, cultural influences, and managing in an international environment. Includes international trip during spring break.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

HRIM 498B Strategic International Human Capital Management (3) This capstone writing-intensive class integrates content from throughout the previous curriculum, focusing on international Human Capital applications.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HRIM 498C Spanish for Hospitality International (1-4) This course is designed to expose students to international hospitality management, organization, practices, and structures in a Caribbean setting.
Effective: Summer 2011 Ending: Summer 2011

HRIM 498D International Hospitality Management/Puerto Rico (3) This course is designed to expose students to international hospitality management, organization, practices, and structures in a Caribbean setting.
Effective: Summer 2011 Ending: Summer 2011

HRIM 498F International Food Service Management and Cuisine (3) This course is designed to cover major European cuisines and oenology in a European setting.
Effective: Summer 2011 Ending: Summer 2011

HRIM 498G French Cuisine and Culture (3) Program will include intensive classes on language and culture, products, cuisine, wine, and also design and atmosphere.
Effective: Summer 2011 Ending: Summer 2011

HRIM 498I International Hospitality Management/Europe (3) This course is designed to expose students to international hospitality management, organization, practices, and structures in a European setting.
Effective: Summer 2011 Ending: Summer 2011

HRIM 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Fall 2007

HRIM 501 Hospitality Corporate Strategy (3) This course focuses on advanced strategic theories and concepts oriented towards hospitality organization corporate-level management.
Effective: Spring 2003

HRIM 502 HRI Facilities Planning and Design Evaluation (3) The planning, design, evaluation, and management of the physical plant of a hotel, restaurant, and institutional facility.
Effective: Fall 2003

HRIM 503 Research Methods in Hotel, Restaurant, and Institutional Management (3) An introduction to the process of research; problem-solving approaches; the research proposal and the development of the research question.
Effective: Fall 2003
Prerequisite: STAT 451

HRIM 504 Leading Hospitality Organizations in a Changing World (3) Leading and managing hospitality firms through the industry's changeable environments--both political and economic.
Effective: Summer 2002

HRIM 505 Managing Hospitality Knowledge Systems (3) Managing hospitality knowledge systems as a strategic asset to mold competitive strategies and change organizational processes.
Effective: Summer 2002

HRIM 507 Managing Hospitality Human Resources for Organizational Success (3) Managing hospitality human resources, including individual behavior and job design, group behavior and team building, and HR functions.
Effective: Spring 2003

HRIM 509 Hospitality Decision Making Using Business Data (3) Management of hospitality business data including decision-making tools such as flexible budgeting, variance analysis, Balance Scorecard and Economic Value added.
Effective: Spring 2003

HRIM 510 Nonthesis Research (1-6) This course provides for the development of non-thesis student research under the guidance of a faculty member.
Effective: Fall 2003

HRIM 511 Services Marketing for the Hospitality Industry (3) Hospitality services marketing.
Effective: Spring 2003

HRIM 515 Hospitality Financial Decision-making (3) Principles and applications of financial decision-making.
Effective: Spring 2003
Prerequisite: HRIM 505, HRIM 509

HRIM 517 Managing Service Delivery in Hospitality Operations (3) Managing the design and delivery of quality service

in hospitality operations.

Effective: Spring 2003

Prerequisite: HRIM 511, HRIM 515

HRIM 519 Managing Hospitality Operations in a Regulated World (3) Managing hospitality operations and government regulations of employment, the environment, tourism, business operations.

Effective: Summer 2002

HRIM 521 Envisioning Future Hospitality (3) This course focuses on theories, strategies, and methods for envisioning and managing the future of hospitality organizations.

Effective: Summer 2002

Prerequisite: HRIM 517, HRIM 519

HRIM 525 Institutional Food Service Management (3) The development of a working comprehension and integration of institutional management into the hotel, restaurant, and institutional field.

Effective: Fall 2003

Prerequisite: HRIM 310

HRIM 526 Hospitality Strategic and Operational Simulation (3) Course integrating hospitality marketing, human resources, finance, operations management, law e-commerce, global perspectives, communications, and leadership.

Effective: Summer 2003

Prerequisite: completion of MHRIM core courses

HRIM 585 Seminar in Hotel, Restaurant, and Institutional Management (1-9) This course is a doctoral seminar in HR&IM that addresses the conceptual foundations of the HR&IM knowledge base.

Effective: Fall 2003

HRIM 586 Research Methods and Evaluation in Hotel, Restaurant, and Institutional Management (1-9) This course is a doctoral seminar in HR&IM that addresses various research methodologies and evaluation procedures that are applicable to HR&IM.

Effective: Fall 2003

HRIM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Fall 2003

HRIM 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis.

Effective: Fall 2003

HRIM 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Fall 2003

HRIM 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2003

HRIM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Fall 2003

HRIM 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.

Effective: Fall 2007

HRIM 600 Thesis Research (1-15) No description.

Effective: Fall 2004

HRIM 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 2004

HRIM 602 Supervised Experience in College Teaching (1-3 per semester, maximum of 6) No description.

Effective: Fall 2004

HRIM 610 Thesis Research Off Campus (1-15) No description.

Effective: Fall 2004

Graduate Bulletin Archive - 2011

2010 - 2011

HRIM 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 2004

Last Import from UCM: June 16, 2011 3:00 AM

Human Development and Family Studies (HD FS)

HD FS 401 Project Planning, Implementation, and Evaluation in the Human Services (3) Exercises and activities related to the design, planning, implementation and management, and evaluation of projects and programs in the human services.

Effective: Fall 2006

Prerequisite: HD FS 312W ; approval by internship coordinator. Prerequisite or concurrent:HD FS 411

HD FS 402 Human Services Seminar (4) Presentations and discussion of contemporary human issues by students and visiting professionals.

Effective: Summer 1997

Prerequisite: HD FS 401

HD FS 405 (US) Gender and Social Development (3) A review of gender-related patterns of social development over the lifespan, as influenced by biological, sociological, and psychological factors.

Effective: Spring 2006

Prerequisite: HD FS 129, HD FS 312W ; or 6 credits in social sciences

HD FS 410 Communities and Families (3) Family and community interaction, emphasizing strategies for intervention to solve family-community problems.

Effective: Spring 1996

Prerequisite: HD FS 312W ; 3 credits of social/behavioral sciences

HD FS 411 The Helping Relationship (3) Theory and research related to interpersonal conditions which facilitate personal growth; intensive interpersonal competency training.

Effective: Spring 1996

Prerequisite: HD FS 311;HD FS 312W ; or 6 credits in Human Development and Family Studies or psychology

HD FS 412 Adult-Child Relationships (3) Theories, research, and application of adult behavior for maximizing adult-child relationships and optimizing child socialization and self-development.

Effective: Spring 2007

Prerequisite: HD FS 229 orPSYCH 212;HD FS 311;HD FS 315 orHD FS 315W;HD FS 312W

HD FS 413 Developmental Problems in Adulthood (3) Analysis of individual developmental problems from young adulthood through old age and their prevention and modification.

Effective: Spring 2001

Prerequisite: HD FS 129;HD FS 249;HD FS 312W

HD FS 414 Resolving Human Development and Family Problems (3) Strategies for, and roles of professional specialists in, the solution of problems in human development and family functioning.

Effective: Spring 1996

Prerequisite: HD FS 312W ; 6 credits in Human Development and Family Studies or psychology

HD FS 415 Program Development in Family Relationships (3) Methods for planning, developing, and evaluating human service programs for families across the life span.

Effective: Spring 2001

Prerequisite: HD FS 311;HD FS 312W;HD FS 315 orHD FS 315W

HD FS 416 (US) (SOC 411) Racial and Ethnic Diversity and the American Family (3) This course will explore the nature and determinants of racial and ethnic variation in family processes in the United States.

Effective: Spring 2005

Prerequisite: 3 credits in sociology

HD FS 417 (US;IL) Biocultural Studies of Family Organization (3) Study of variability in family organization with an emphasis on cultural and economic factors influencing household organization and family roles.

Effective: Spring 2006

Prerequisite: HD FS 129;HD FS 312W;HD FS 315 orHD FS 315W ; or 6 credits in sociology or anthropology

HD FS 418 Family Relationships (3) Dynamics of family interaction; effects of parenthood, sibling and intergeneration relationships on family solidarity.

Effective: Spring 2001

Prerequisite: HD FS 312W;HD FS 315 orHD FS 315W

HD FS 420 Laboratory in Individual and Family Enhancement (3) Supervised practice in methods of assessment, intervention, and evaluation to enhance individual and family development.

Effective: Spring 1996

Prerequisite: HD FS 312W;HD FS 411 ; 6 additional credits in Human Development and Family Studies

HD FS 424 (US) Family Development in an Economic Context (3) Economic conditions influencing family functioning; familial effects on the economy; strategies to enhance work-family relations.

Effective: Spring 2006

Prerequisite: HD FS 312W;HD FS 315 orHD FS 315W

HD FS 425 (US) Work as a Context for Human Development (3) Theory and research on role of work in adult development; interrelationships between work and family; workplace interventions to enhance development.

Effective: Spring 2006

Prerequisite: HD FS 312W ; 3 credits in social and behavioral sciences

HD FS 427 (KINES 427) **Developmental Sport & Exercise Psychology** (3) Developmental changes in the antecedents and consequences of physical activity across the lifespan.

Effective: Spring 2008

Prerequisite: PSYCH 100 and KINES 321 or HD FS 129 or PSYCH 212

HD FS 428 **Infant Development** (3) Conceptual analysis, assessment, and empirical investigation of normal and deviant development, prenatal through first two years of life.

Effective: Spring 2007

Prerequisite: HD FS 229 or PSYCH 212; HD FS 312W

HD FS 429 **Advanced Child Development** (3) Processes of development during childhood from birth to adolescence. Emphasis upon theory, method, and empirical research.

Effective: Spring 2007

Prerequisite: HD FS 229 or PSYCH 212; HD FS 312W

HD FS 430 **Experience in Preschool Groups** (6) Guided practicum experience in planning and facilitating developmentally appropriate activities for young children.

Effective: Spring 2007

Prerequisite: HD FS 229 or PSYCH 212; HD FS 312W; HD FS 330

HD FS 431 (SOC 431) **Family Disorganization: Stress Points in the Contemporary Family** (3) Focuses on divorce, remarriage, incest, family violence as well as problems associated with family formation and parent-child relations.

Effective: Spring 1996

Prerequisite: HD FS 312W ; 6 credits of Human Development and Family Studies psychology sociology

HD FS 432 **Developmental Problems in Childhood and Adolescence** (3) Analysis of problems in individual development from infancy through adolescence; prevention and modification of developmental difficulties.

Effective: Spring 2007

Prerequisite: HD FS 229; HD FS 239 or PSYCH 212; HD FS 312W

HD FS 433 **Developmental Transition to Adulthood** (3) Conceptual analysis and empirical investigation of interrelationships between developmental processes during the period of pubertal growth.

Effective: Spring 1996

Prerequisite: HD FS 239; HD FS 312W

HD FS 434 (SOC 435) **Perspectives on Aging** (3) An analysis of the demographic, social, and cultural factors affecting the aged population in American society.

Effective: Fall 2007

Prerequisite: HD FS 312W ; 6 credits in sociology

HD FS 440 (SOC 440) **Family Policy** (3) An in-depth examination of family policy.

Effective: Spring 2007

Prerequisite: 3 credits of SOC or HD FS

HD FS 445 (PSYCH 416) **Development Throughout Adulthood** (3) Processes of development and change of behavior from early adulthood through old age, emphasizing theory, method, and empirical research.

Effective: Spring 2007

Prerequisite: HD FS 249 or PSYCH 100; HD FS 312W or PSYCH 301W; PSYCH 200, STAT 200 or 3 credits of statistics ; 6 credits in HD FS PSYCH or SOC.

HD FS 446 **Programs and Services in Gerontology** (3) Theoretical and historical views of the conceptualization and delivery of programs and services to older persons within a multidisciplinary developmental framework.

Effective: Spring 1996

Prerequisite: HD FS 249 or HD FS 445; HD FS 312W

HD FS 447 **Issues in Gerontology** (3) Analysis of major issues in adulthood and aging, with an emphasis on integration of theory and research.

Effective: Spring 1996

Prerequisite: HD FS 249 or HD FS 445; HD FS 312W

HD FS 450 **Developmental Child Programs and Services** (3) Current and historical views of the conceptualization and delivery of child programs and services within a multidisciplinary developmental framework.

Effective: Spring 2007

Prerequisite: HD FS 229 or PSYCH 212; HD FS 312W

HD FS 453 **Family Participation and Involvement in Child Services** (3) Current and historical perspectives of roles and functions of family members in designing, delivering, and evaluating of child service programs.

Effective: Spring 2001

Prerequisite: HD FS 229; HD FS 312W; HD FS 315 or HD FS 315W

HD FS 454 (E C E 454) **Development and Administration of Child Service Programs** (3) Planning, administering, and evaluating child service programs at several administrative levels using methods from relevant disciplines.

Effective: Spring 1996

Prerequisite: HD FS 312W; HD FS 453; C I 295 or HD FS 330

HD FS 455 **Development and Administration of Human Services Programs** (3) Fundamentals of program development and administration of human service programs in community settings; emphasis given to program content, strategies, and the overall planning process.

Effective: Fall 2009

Prerequisite: HD FS 311

HD FS 468 Biological Bases of Behavioral Development (3) Biological, genetic, and experiential influences in development through the lifespan.

Effective: Spring 2007

Prerequisite: HD FS 129 or PSYCH 100; HD FS 312W ; 3 credits in human biology

HD FS 469U (IL) Family Change in the Global Economy (3) Exploration of how family life, quality, and structures in each region of the world are affected by the new global economy.

Effective: Fall 2005

Prerequisite: HD FS 315 or SOC 030

HD FS 477 Analysis of Family Problems (3) Analysis of families' behavioral, managerial, interpersonal, and financial problems and their interrelationships.

Effective: Spring 2001

Prerequisite: HD FS 312W; HD FS 315 or HD FS 315W ; 3 credits in social sciences

HD FS 490 Introduction to Internship Experience (2) Planning and preparation for field experience in human service setting. Analysis of human service system and arrangement of site.

Effective: Spring 1996

Prerequisite: HD FS 312W ; approval by internship coordinator. Prerequisite or concurrent: HD FS 411

HD FS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2000

HD FS 494A Research Practicum (3) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2011 Ending: Summer 2011

HD FS 494A Research Practicum (3) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 494B Research Paper (3) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2011 Ending: Summer 2011

HD FS 494B Research Paper (3) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 494H Senior Honors Thesis (1-6) Independent study under the direction of the thesis advisor of topics related to the interests of the student, culminating in presentation of a thesis.

Effective: Summer 1997

Prerequisite: approval of honors thesis advisor

HD FS 495A Internship: Advanced Experience (9) Full-time, one semester experiential training in human service settings. Open to HD FS majors only.

Effective: Fall 2006

Prerequisite: HD FS 490 ; permission of internship coordinator

HD FS 495B Internship: Advanced Project (3) Implementation of internship projects or scholarly paper. Open to HD FS majors only.

Effective: Fall 2006

Prerequisite: or concurrent: HD FS 495A

HD FS 495C Professional Practicum in Human Services (3-8) Guided professional practicum in human services, usually in the form of a project related to a human services issue.

Effective: Summer 1997

Prerequisite: HD FS 401 or HD FS 490

HD FS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1990

HD FS 496B Infant Temperament (1-3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 496D Project Siesta (1-3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2011 Ending: Summer 2011

HD FS 496D **Project SIESTA** (1-3) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1990

HD FS 497A **Child Maltreatment** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 497B **Parenting** (3) Course will focus on the determinants of parenting in the diverse cultures within the US.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 497C **Peer and Consultation** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

HD FS 497C **Peer and Consultation** (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 497H **Professional Development** (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

HD FS 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Fall 2007

HD FS 499A (IL) **Early Childhood In Italy** (3) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2011 Ending: Summer 2011

HD FS 499B (IL) **Historical Roots of the Modern Italian Family** (3) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2011 Ending: Summer 2011

HD FS 499C (IL) **Italian Relationships: Both Cultural and Familial** (3) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2011 Ending: Summer 2011

HD FS 500 **Nonthesis Research** (1-9) No description.
Effective: Summer 1990

HD FS 501 **Human Development Across the Lifespan** (3) Multidisciplinary study of theories and research on human development across the lifespan.
Effective: Spring 2002

HD FS 503 **Human Development Intervention: Analysis of Theories and Approaches** (3) Theoretical and empirical analyses of multilevel approaches for enhancing development of individuals and families.
Effective: Spring 1993
Prerequisite: graduate status in HD FS or related fields; 1st in a sequence

HD FS 504 **Consultation in Human Development Intervention** (3) Principles of consultative and collaborative practice with human development intervention programs in formal or informal community settings.
Effective: Spring 1993
Prerequisite: HD FS 503

HD FS 505 **Assessment in Human Development** (3) Overview of methods and procedures used for the assessment of families and the development of individuals across the lifespan.
Effective: Spring 1993
Prerequisite: at least one course in measurement test construction or assessment

HD FS 506 **Design and Evaluation of Prevention Programs Across the Life Span** (3) An introduction to the theory and application of program evaluation; both process and outcome evaluation strategies are addressed.

Effective: Spring 2002

Prerequisite: HD FS 503, HD FS 516

HD FS 507 **Women, Families, and Society** (3) Analysis and critique of research and theory on women's development and role in family and society.

Effective: Spring 2002

HD FS 508 **Best Practices in Preventive Intervention** (1-6) Implementing empirically validated preventative programs; discussion and evaluation of theory and techniques.

Effective: Spring 2002

Prerequisite: HD FS 503

HD FS 509 **Nature-Nurture Issues in Human Development** (3) Introduction to nature-nurture interactions in life-span development; biological, psychological, and cultural factors in ontogeny and phylogeny.

Effective: Spring 1999

HD FS 515 **Professional Issues in Human Development and Family Studies** (1-6) Overview of issues in professional development for careers in human development and family studies.

Effective: Spring 2002

HD FS 516 **Methods of Research in Human Development** (3) Review of basic research methods and statistics as applied to human development and family studies.

Effective: Fall 2001

HD FS 517 **Multivariate Study of Change and Human Development** (3) Models of development and change derived from empirical research utilizing multivariate research design and procedures.

Effective: Spring 1992

Prerequisite: at least three statistics courses including correlation and regression analysis

HD FS 518 **Applied Statistics Laboratory** (1) This course provides graduate students with practical skills in data entry, data management, and applied statistical analyses.

Effective: Fall 2001

HD FS 519 **Methods of Statistical Analysis in Human Development** (3) An overview of basic statistical concepts, models, and methods for the analysis of development and change.

Effective: Summer 1990

Prerequisite: H DEV 516, introductory statistics

HD FS 520 **Seminar in Prenatal and Infant Development** (1-6) Prenatal and infant development, with emphasis on multiple determinants of early development and their relationship to later behavior.

Effective: Summer 1990

Prerequisite: 6 graduate credits in individual development psychology or biological science; 3 credits in statistics

HD FS 521 **Qualitative Methods in Human Development and Family Studies** (3) Introduction to interdisciplinary qualitative methods, principles and theory of interpretation, methodologies, data collection and analysis.

Effective: Spring 1992

HD FS 522 **Risk and Resilience in Human Development: Foundation for Prevention** (3) Reviews the concepts of risk, protection, resilience, and competence; examines these concepts in intervention and longitudinal studies.

Effective: Spring 2002

Prerequisite: HD FS 503

HD FS 523 **Strategies for Data Analysis in Developmental Research** (3) This course provides the skills necessary to confront the data analytic issues presented in the Human Development and Family Studies methodology core curriculum.

Effective: Spring 1996

Prerequisite: HD FS 519 or STAT 501

HD FS 524 **Work as a Context for Human Development** (3) The interconnections between work, family life, and individual development.

Effective: Spring 2002

Prerequisite: HD FS 525

HD FS 525 **Introduction to Family Studies** (3) Introduction to current theory and research about micro and macro forces related to family relationships and development.

Effective: Spring 2002

HD FS 526 (PSY 526) **Measurement in Human Development** (3) Principles and methods for assessment of human developmental processes across the life span.

Effective: Spring 2007

Prerequisite: EDPSY 450 or PSYCH 404; HD FS 519

HD FS 527 **Social Epidemiology** (3) Application of epidemiological methods to issues in the study of human development.

Effective: Fall 2001

Prerequisite: HD FS 503, HD FS 516

HD FS 528 (PSY 528) **Observational Methodologies for Development** (3) Design and application of observational methods in developmental research.

Effective: Spring 1994

Prerequisite: graduate student standing in HD FS or psychology

HD FS 529 (PSY 529) **Seminar in Child Development** (1-6) Readings and reports on recent findings in child development.

Effective: Summer 1990

Prerequisite: 6 graduate credits in child development child psychology or educational psychology; 3 in statistics

HD FS 531 (SOC 531) **Family Disorganization: Stress Points in the Contemporary Family** (3) Focuses on divorce, remarriage, incest, family violence as well as problems associated with family formation and parent-child relations.

Effective: Summer 1994

HD FS 536 (PSY 536) **Research Methods in Developmental Processes** (3) Methodological issues in research on varying stages of development across the individual life span.

Effective: Spring 1995

Prerequisite: 6 credits in individual development or psychology and a course in statistics

HD FS 537 (SOC 537) **Biosocial Perspectives on the Family** (3) The implications of knowledge from behavioral endocrinology, behavior genetics, and evolutionary psychology for understanding family relationships and child development.

Effective: Summer 2002

HD FS 539 **Seminar in Adolescent Development** (1-6) Cultural, psychological, and biological aspects of the developmental transition to adulthood.

Effective: Summer 1990

Prerequisite: 6 credits in individual development or psychology; 3 credits in sociology and statistics

HD FS 544 **Seminar in Dysfunctional Patterns in Family Organization** (1-6) Processes of familial dysfunction and disorganization and their explanation in economic, social-psychological, and managerial terms.

Effective: Summer 1990

Prerequisite: I F S 418 or I F S 424 or SOC 430

HD FS 545 **Families and Socioeconomic Systems** (1-6) Functional interrelationships between families and social and economic systems.

Effective: Summer 1990

Prerequisite: I F S 418, I F S 424

HD FS 546 **Seminar in Family Relationships** (1-9) Interpersonal interaction within family systems throughout the life cycle.

Effective: Summer 1990

Prerequisite: I F S 418

HD FS 549 (PSY 549) **Developmental Theory** (3) Conceptual frameworks and major contributions to the study of individual development across the life-span.

Effective: Summer 1990

Prerequisite: 6 credits at the 400 level in individual development or psychology

HD FS 565 **Developmental Behavioral Genetics** (3) Theories and methods of developmental behavioral genetics and their application to human life-span development.

Effective: Spring 1990

HD FS 569 **Seminar on Development in Middle Age** (1-6) Interdisciplinary approach to study of human development in middle age, including psychological, cultural, and biological aspects.

Effective: Fall 2001

Prerequisite: HD FS 501

HD FS 577 **Poverty, Policies, and Child Development** (3) Focuses on interrelationships among families, poverty, and social policies.

Effective: Fall 2001

Prerequisite: HD FS 525

HD FS 579 **Seminar in Adult Development and Aging** (1-9) A seminar dealing with specific topics concerning adult development and aging.

Effective: Summer 1990

Prerequisite: I F S 445 statistics

HD FS 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 1990

HD FS 595 **Field Projects in Individual and Family Studies** (1-9) Supervised research or internship in human services program.

Effective: Summer 1990

Prerequisite: instructor's approval of proposed project

HD FS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1990

Prerequisite: instructor's approval of proposed study

HD FS 596A **Graduate Student Orientation** (1) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: instructor's approval of proposed study

HD FS 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Summer 1990

HD FS 597A **Aging in a Welfare State** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Summer 2011 Ending: Summer 2011

HD FS 597A **Type II Reading Seminar** (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 597B **Person-Specific** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 597C **Quantitative Methods for Intervention Science** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: HD FS 519 or equivalent

HD FS 597D **Human Development Neuroscience** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 597E **Conducting Cluster Randomized Trials in Schools: Evaluating Social Contextual Interventions** (2) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 597F **Seminar on Professional Development Issues in Interdisciplinary Educational Research** (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 597F **Obesity Cause and Treatment** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

HD FS 597G **TIES Fellowship Seminar: Evaluation of School Intervention** (2) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 597I **EEG Coherency** (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

HD FS 600 **Thesis Research** (1-15) No description.

Effective: Summer 1990

HD FS 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Summer 1990

HD FS 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.

Effective: Summer 2004

HD FS 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 2006

HD FS 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 1990

HD FS 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Summer 1990

1 Student may take only one course for General Education credits from HD FS 129 GS or SOC 030 GS.

Last Import from UCM: June 16, 2011 3:00 AM

Humanities and Social Sciences (H&SS)

H&SS 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1989

H&SS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1989

Last Import from UCM: June 16, 2011 3:00 AM

Industrial Engineering (I E)

I E 402 Advanced Engineering Economy (3) Concepts and techniques of analyses useful in evaluating engineering projects under deterministic and uncertain conditions.

Effective: Summer 1995

Prerequisite: I E 302, I E 322, I E 405

I E 405 Linear Programming (3) An introduction to the theory and application of the simplex method in solving the linear programming and dual problem.

Effective: Spring 2001

Prerequisite: MATH 220

I E 408 Cognitive Work Design (3) Design and evaluation of cognitive work, including the human/computer interface, visual displays, software design, and automated system monitoring, with emphasis on human performance.

Effective: Spring 2006

Prerequisite: I E 327

I E 418 Human/Computer Interface Design (3) Design and evaluation of the human/computer interface, including human performance, visual displays, software design, and automated system monitoring.

Effective: Spring 2008

Prerequisite: I E 330

I E 419 Work Design - Productivity and Safety (3) Methods improvement, physical work design, productivity, work measurement; principles and practice of safety.

Effective: Spring 2006

Prerequisite: I E 327

I E 423 Quality Control and Reliability (3) Application of statistical methods to the control of quality, sampling inspection, and reliability engineering.

Effective: Summer 1995

Prerequisite: I E 323

I E 424 Process Quality Engineering (3) Statistical methods for engineering process characterization and improvement. For non-Industrial Engineering majors.

Effective: Summer 1994

Prerequisite: MATH 141, MATH 220

I E 425 Introduction to Operations Research (3) An introduction to the method and techniques of mathematical decision making, including inventory, replacement, allocation, and waiting line problems.

Effective: Spring 2006

Prerequisite: I E 322 Concurrent: I E 405

I E 428 Metal Casting (3) Application of engineering principles to the design of castings; casting of ferrous and nonferrous alloys; laboratory and simulation projects.

Effective: Summer 1995

Prerequisite: I E 311, I E 312 or METAL 408W

I E 430 Industrial Project (3) A project is carried out in conjunction with an industrial company and supplemented by tutorials.

Effective: Fall 1992

Prerequisite: I E 302, I E 327, I E 328

I E 433 Regression Analysis and Design of Experiments (3) Theory and Application of Regression Analysis and Design of Experiments to build models and optimize process and product parameters.

Effective: Summer 2005

Prerequisite: I E 323

I E 434 Statistical Quality Control (3) Statistical techniques for univariate and multivariate monitoring of independent and autocorrelated processes; foundations of quality control and improvement.

Effective: Summer 2007

Prerequisite: I E 323

I E 436 Six Sigma Methodology (3) Techniques for structured problem-solving to improve the quality and cost of products and processes.

Effective: Spring 2010

Prerequisite: I E 323

I E 450 Manufacturing Systems Engineering (3) Components of automated manufacturing systems (CNC, robots, programmable logic controllers). Design, analysis and operational issues related to improved productivity in modern manufacturing systems.

Effective: Spring 2008

Prerequisite: CMPSC 201 and I E 328

I E 453 Simulation Modeling for Decision Support (3) Introduction of concepts of simulation modeling and analysis, with application to manufacturing and production systems.

Effective: Fall 2009

Prerequisite: CMPSC 200, CMPSC 201 or CMPSC 202 and I E 323 and I E 425

I E 454 Applied Decision Analysis (3) Theory and practice of decision analysis applied to engineering problems.
Effective: Fall 1992
Prerequisite: I E 322

I E 455 Production Planning and Control (3) Production planning/control methods from aggregate to detailed levels; includes underlying theories and principles and industrial applications.
Effective: Spring 2001
Prerequisite: I E 322 . Prerequisite or concurrent: I E 405

I E 456 (M E 456) Industrial Robot Applications (3) Introduction to robotics, with emphasis on robot selection, programming, and economic justification for manufacturing applications.
Effective: Spring 2011
Prerequisite: MATH 220; MATH 250 or MATH 251; I E 305 or M E 360; CMPSC 200 or CMPSC 201

I E 460 Service Systems Engineering (3) Use of quantitative models and methods for analysis, design and control of service systems.
Effective: Spring 2011
Prerequisite: I E 322 and I E 405

I E 462 Introduction to Expert Systems (3) Building expert systems in general; emphasis on knowledge representation and inference mechanisms in the manufacturing domain.
Effective: Fall 2009
Prerequisite: CMPSC 200, CMPSC 201 or CMPSC 202 and I E 323

I E 463 Computer Aided Design and Manufacturing (3) Three dimensional modeling and manufacture of parts and assemblies using Computer Aided Design and manufacturing software, and numerically controlled machines.
Effective: Spring 2008
Prerequisite: Any IE Manufacturing Process elective

I E 464 Assembly of Printed Circuit Boards (3) Manufacturing processes and principles for assembly of printed circuit boards with surface mount and through-hole technology.
Effective: Spring 2008
Prerequisite: PHYS 212, I E 305

I E 466 Concurrent Engineering (3) Concurrent engineering methods for product/process development, capturing customer requirements, insuring manufacturability and serviceability.
Effective: Summer 1996
Prerequisite: MATH 141, MATH 220

I E 467 Facility Layout and Material Handling (3) Analytical, simulation and computer-aided graphical methods to generate effective layout designs; design and integration of material handling systems and equipment. For Industrial Engineering majors.
Effective: Fall 2007
Prerequisite: I E 302, I E 327

I E 468 Optimization Modeling and Methods (3) Mathematical modeling of linear, integer, and nonlinear programming problems and computational methods for solving these classes of problems.
Effective: Fall 2001
Prerequisite: I E 405, MATH 231

I E 469 Global Industrial Engineering Experience (1) Students will learn how to prepare for a short term, professional exchange in a foreign nation. Students will then travel to a designated university within a foreign nation for the purpose of a five day cultural and professional exchange.
Effective: Summer 2009
Prerequisite: 5th semester standing or higher

I E 470 Manufacturing System Design and Analysis (3) Contemporary design and analysis methodologies used to organize systems for economic manufacture of products.
Effective: Summer 2005 Ending: Fall 2011
Prerequisite: I E 310, I E 311, I E 464 or an approved course in any manufacturing process

I E 470 Manufacturing System Design and Analysis (3) Contemporary design and analysis methodologies used to organize systems for economic manufacture of products.
Effective: Spring 2012 Future: Spring 2012
Prerequisite: any manufacturing process elective (refer to department list)

I E 477 Computer Control of Manufacturing Machines and Processes (3) Elements of computer control and discrete-time modeling. Design and analysis of digital controls for manufacturing machines and processes.
Effective: Fall 2009
Prerequisite: MATH 141, CMPSC 200, CMPSC 201 or CMPSC 202 and I E 305

I E 478 Retail Services Engineering (3) Introduction to retail services operations, process models, and application of information technologies to enhance productivity and profitability.
Effective: Spring 2010
Prerequisite: I E 330

I E 479 (EDSGN 479) Human Centered Product Design and Innovation (3) Consumer product design for a global market, incorporating human factors principles and user desires in a multicultural perspective.
Effective: Summer 2010
Prerequisite: I E 408 or I E 419 or equivalent

I E 480W Capstone Design Project (3) Industry-based senior capstone design project emphasizing manufacturing systems, service systems, and information systems in an interdisciplinary setting.

Effective: Spring 2009

Prerequisite: I E 302, I E 327, I E 323, I E 305, I E 330, I E 405

I E 494H Senior Honors Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.

Effective: Spring 2000

I E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1992

I E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

I E 497A Data Envelopment Analysis (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

I E 497D Micro/nano Fabrication (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

I E 499 (IL) Foreign Studies--Industrial Engineering (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

I E 505 Linear Programming (3) An accelerated treatment of the main theorems of linear programming and duality structures plus introduction to numerical and computational aspects of solving large-scale problems.

Effective: Fall 1992

Prerequisite: I E 405

I E 507 Operations Research: Scheduling Models (3) Scheduling models with simultaneous job arrival and probabilistic job arrival, network scheduling, and scheduling simulation techniques.

Effective: Fall 1992

Prerequisite: I E 425

I E 508 Operations Research: Inventory Models (3) A study of inventory theory, deterministic models, probabilistic models, multiproduct models for both single and multiperiod models.

Effective: Spring 1994

Prerequisite: I E 516

I E 509 Operations Research: Waiting Line Models (3) Waiting line models including models with infinite queues, finite queues, single and multiple servers under various priorities and disciplines.

Effective: Spring 1994

Prerequisite: I E 516

I E 510 Integer Programming (3) Study of advanced topics in mathematical programming; emphasis on large-scale systems involving integer variables.

Effective: Spring 1994

Prerequisite: I E 405

I E 511 Experimental Design in Engineering (3) Statistical design and analysis of experiments in engineering; experimental models and experimental designs using the analysis of variance.

Effective: Fall 1992

Prerequisite: I E 323

I E 512 Graph Theory and Networks in Management (3) Graph and network theory; application to problems of flows in networks, transportation and assignment problems, pert/CPM, facilities planning.

Effective: Spring 1994

Prerequisite: I E 405

I E 513 Real-Time Microcomputer Applications (3) Study of real-time industrial engineering microcomputer applications, including the hardware and software techniques necessary to implement these systems.

Effective: Summer 2011

I E 514 Data Management Systems Design (3) Computer-based technology and design requirements for data acquisition and entry, data communications, transaction management, data-base management, and data utilization.

Effective: Fall 1992

Prerequisite: I E 513

I E 515 Complex Linear Flow Models (3) Application of complex linear flow models in engineering and management

science, including static and dynamic system simulations.

Effective: Fall 1992

Prerequisite: I E 405

I E 516 (SC&IS 516) **Applied Stochastic Processes** (3) Study of stochastic processes and their applications to engineering and supply chain and information systems.

Effective: Spring 2006

Prerequisite: I E 322 or STAT 318

I E 518 **Materials, Forming Processes, and Quality** (3) Study of the principles and mechanisms of conventional and developing manufacturing processes and the methods of determining work piece quality and properties.

Effective: Summer 1995

Prerequisite: I E 310, I E 311 or I E 312

I E 519 (SC&IS 519) **Dynamic Programming** (3) Theory and application of dynamic programming; Markov decision processes with emphasis on applications in engineering systems, supply chain and information systems.

Effective: Spring 2006

Prerequisite: I E 516 or SC&IS 516 or equivalent

I E 520 **Multiple Criteria Optimization** (3) Study of concepts and methods in analysis of systems involving multiple objectives with applications to engineering, economic, and environmental systems.

Effective: Spring 2000

Prerequisite: I E 405 or B A 450

I E 521 **Nonlinear Programming** (3) Fundamental theory of optimization including classical optimization, convex analysis, optimality conditions and duality, algorithmic solution strategies, variational methods in optimization.

Effective: Spring 1994

Prerequisite: I E 505

I E 522 **Discrete Event Systems Simulation** (3) Fundamentals of discrete event simulation, including event scheduling, time advance mechanisms, random variate generation, and output analysis.

Effective: Spring 2002

Prerequisite: I E 425

I E 528 **Metal Cutting Theory** (3) Study of the theory of metal cutting, contemporary and future problems of metal removal processes; critical analysis of current literature.

Effective: Summer 2011

I E 530 **Financial Engineering** (3) Financial option pricing and portfolio design relevant to investment decision making.

Effective: Fall 2010

Prerequisite: I E 516

I E 532 **Reliability Engineering** (3) Mathematical definition of concepts in reliability engineering; methods of system reliability calculation; reliability modeling, estimation, and acceptance testing procedures.

Effective: Fall 1992

Prerequisite: I E 323 or 3 credits in probability and statistics with a prerequisite of calculus

I E 538 **Experimental Investigations in Materials Processing** (3) Experimental investigation on selected subjects in processing involving instrumentation, methods, and analysis.

Effective: Fall 1992

Prerequisite: I E 528

I E 540 **Manufacturing Systems Simulation** (3) Use of simulation in design and process improvement of manufacturing systems. Analysis of simulation language structure. Readings in current literature.

Effective: Spring 1998

Prerequisite: I E 453

I E 546 (M E 546) **Designing Product Families** (3) Product families, product platforms, mass customization, product variety, modularity, commonality, robust design, product architectures.

Effective: Fall 2007

Prerequisite: M E 414 or M E 415 or I E 430 or I E 466

I E 547 (EDSGN 547, M E 547) **Designing for Human Variability** (3) Statistics, optimization, and robust design methodologies to design products and environments that are robust to variability in users.

Effective: Summer 2009

I E 549 (EDSGN 549) **Design Decision Making** (3) Complexity of design decision-making; state-of-the-art methods and tools.

Effective: Summer 2011

I E 550 **Manufacturing Systems** (3) Fundamental theory for analyzing manufacturing systems including structural analysis, optimization and economics of manufacturing systems, automated and computer-aided manufacturing.

Effective: Fall 1992

Prerequisite: I E 450

I E 551 **Computer Control of Manufacturing Systems** (3) Analysis of microprocessor-controlled servo loops, adaptive control, stochastic methods in control; analysis of NC machines, robots, and their controllers.

Effective: Summer 2011

I E 552 (BIOE 552) **Mechanics of the Musculoskeletal System** (3) Structure and biomechanics of bone, cartilage, and skeletal muscle; dynamics and control of musculoskeletal system models.

Effective: Summer 1998

Prerequisite: Consent of program. Prerequisite or concurrent:BIOL 472

I E 553 (BIOE 553) **Engineering of Human Work** (3) Physics and physiology of humans at work; models of muscle strength, dynamic movements; neural control; physical work capacity; rest allocation.

Effective: Fall 1992

Prerequisite: BIOL 141 orBIOL 472

I E 554 **Production, Planning, and Control** (3) Analysis of research literature for topics including scheduling, capacity planning, and lot sizing applied to manufacturing and production.

Effective: Spring 1996

Prerequisite: I E 455, I E 507

I E 555 **Statistical Process Monitoring and Analysis** (3) Statistical techniques for univariate and multivariate monitoring of dependent and autocorrelated processes; theoretical and numerical approaches for analyzing performance.

Effective: Spring 2008

I E 556 (M E 556) **Robotic Concepts** (3) Analysis of robotic systems; end effectors, vision systems, sensors, stability and control, off-line programming, simulation of robotic systems.

Effective: Fall 1992

Prerequisite: I E 456 orM E 456

I E 557 **Human-in-the-Loop Simulation** (3) Design and programming of simulations that facilitate human control, real-time discrete-event simulation, supervisory control of dynamic system.

Effective: Spring 2009

Prerequisite: I E 418 andI E 453

I E 558 **Engineering of Cognitive Work** (3) Information processing and decision making models of the human in the modern workplace, emphasizing visual inspection and other industrial applications.

Effective: Fall 1992

Prerequisite: I E 323 andI E 408

I E 559 **Law and Technology: Products Liability** (3) A seminar course on one area of law and technology, products liability.

Effective: Spring 2008

I E 560 **Material Handling Systems** (3) Modeling, analysis, and design of handling systems in manufacturing with emphasis on flow, storage, control, automation, and integration.

Effective: Spring 1996

Prerequisite: I E 405, I E 450

I E 561 **Weld Design** (3) Weld design examining joint configuration, loading conditions, weld size, to avoid brittle fracture and fatigue failure in weldments.

Effective: Summer 2011

I E 562 **Expert Systems Design in Industrial Engineering** (3) Methodological aspects of expert systems design and review of some existing systems with emphasis on manufacturing and industrial engineering.

Effective: Fall 1992

Prerequisite: I E 450 background in one programming language would be useful

I E 563 **Computer-Aided Design for Manufacturing** (3) Study of CAD systems and concepts including 3D wireframe and solid modeling systems, emphasizing manufacturing applications.

Effective: Fall 1992

Prerequisite: I E 463

I E 565 **Manufacturing Facilities Design** (3) Study of the factors which influence the selection and design of facilities for manufacturing.

Effective: Fall 1992

Prerequisite: I E 327, I E 425

I E 566 **Quality Control** (3) Advanced quality assurance and control topics, including multivariate methods, economic design for control and acceptance, dimensioning, tolerancing, and error analysis.

Effective: Fall 1992

Prerequisite: I E 423

I E 567 **Distributed Systems and Control** (3) Advances in distributed control and decision-making in enterprises and supply chains with emphasis on computing, algorithms, and dynamics.

Effective: Spring 2006

I E 570 (SC&IS 570) **Operations Research in Supply Chains** (3) Use of operations research models and methods for solving problems in supply chain systems.

Effective: Summer 2006

Prerequisite: I E 405, I E 425 orSC&IS 510

- I E 571 Distributive Process Control and Factory Communications** (3) Analysis and design of distributive systems which incorporates data flows associated with sensors, machine control, networks, protocols, and interface resolution.
Effective: Spring 1993
Prerequisite: I E 513, I E 514
- I E 575 Technology of Modern Machine Tool Systems** (3) Mechanics and technologies useful in evaluating, monitoring, and controlling automated machine tool systems in modern manufacturing environment.
Effective: Summer 2011
Prerequisite: I E 328, I E 528 . Prerequisite or concurrent: I E 551
- I E 576 Computer-Aided Tolerancing in Design and Manufacturing** (3) A comprehensive treatment of dimensional and geometric tolerances with computer applications for design, manufacturing, assembly, and inspection.
Effective: Fall 1992
Prerequisite: I E 450
- I E 578 Using Simulation Models for Design** (3) Use of case study computer simulation (CAD) models for yield analysis, sensitivity analysis, performance optimization, and yield optimization.
Effective: Spring 1994
Prerequisite: I E 323
- I E 580 Analysis of Machining Precision** (3) The objective of this course is to instruct techniques for analysing the impact of tool design and machining process parameters on workpiece geometric error.
Effective: Spring 1995
Prerequisite: I E 328
- I E 582 Information Technology for Industrial and Manufacturing Engineering** (3) Students will learn advanced information technology concepts, tools, and techniques for designing and implementing manufacturing systems.
Effective: Spring 2008
Prerequisite: CMPSC 201, CMPSC 121 or MIS 432
- I E 583 Response Surface Methodology and Process Optimization** (3) Response Surface Methodologies used for sequential experimentation and optimization of production processes. Statistical design and analysis of such experiments.
Effective: Spring 2002
Prerequisite: I E 511 or STAT 501
- I E 584 Time Series Control and Process Adjustment** (3) Design of Time Series-based process controllers for Quality Engineering. Study of the effect of autocorrelation on control chart performance.
Effective: Spring 2002
Prerequisite: I E 423
- I E 588 Nonlinear Networks and the Price of Anarchy** (3) Introduction to congestion games, including elements of non-cooperative game theory, equilibrium network flows, Braess paradox, and the price of anarchy.
Effective: Fall 2010
Prerequisite: I E 505
- I E 589 Dynamic Optimization and Differential Games** (3) Dynamic optimization and dynamic non-cooperative games emphasizing industrial applications.
Effective: Fall 2007
Prerequisite: I E 425 and I E 505 Concurrent: I E 521
- I E 590 I E Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1993
Prerequisite: graduate standing in Industrial Engineering
- I E 591 Academic Career Preparation Seminar** (1) This seminar will assist Ph.D. students in preparing for careers in research and teaching.
Effective: Spring 1996
Prerequisite: completed candidacy exam
- I E 594A Technical Paper Presentation** (1) Preparation of a paper in a technical journal format based upon the student's course work project.
Effective: Spring 2000
Prerequisite: I E 511, I E 550
- I E 596 Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1992
- I E 597 Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992
- I E 597A Financial Services Engineering** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

I E 597A Measurement System Design (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

I E 597B Healthcare Systems Engineering (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

I E 597B Manufacturing with Materials (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

I E 597C Global Manufacturing (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

I E 597E Work Force Engineering (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

I E 597F Financial Engineering (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

I E 600 Thesis Research (1-15) No description.
Effective: Fall 1992

I E 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1992

I E 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1992

I E 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1992

Last Import from UCM: June 16, 2011 3:00 AM

Industrial Engineering Technology (IET)

IET 402 **Production Management** (3) Principles and practices of managing the manufacturing operations of companies. Topics include management structure, physical plant, quality control, work sampling.

Effective: Fall 2007

Prerequisite: IET 321

IET 405 **Quality Control and Reliability Engineering** (3) Application of statistical methods to the control of quality, sampling inspection, and reliability engineering.

Effective: Fall 2007

Prerequisite: E T 313

IET 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2007

IET 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2007

Last Import from UCM: June 16, 2011 3:00 AM

Industrial Health and Safety (I H S)

I H S 400 Safety Engineering (3) An examination of the engineering aspects of the safety discipline and its management in the work environment.

Effective: Fall 2009

Prerequisite: CHEM 110, E MCH 210, MATH 141, PSYCH 100

I H S 420 Fire Protection Engineering (3) Overview of the behavior of fire, fire hazards, suppression systems, alarms and detection systems, and fire safe design and prevention.

Effective: Fall 2009 Ending: Spring 2012

Prerequisite: CHEM 110, CHEM 111, MATH 141, PHYS 212

I H S 440 Ventilation for Contaminant Control (3) Ventilation design and analysis for removal and control of industrial contaminants; measurement, isolation, dilution, and exhaust strategies; laboratory work included.

Effective: Fall 2009 Ending: Fall 2011

Prerequisite: MATH 141, PHYS 212, CHEM 110

I H S 447 Industrial Hygiene Measurements (4) Introduction to industrial hygiene measurement techniques for evaluating occupational exposure to chemical, physical, and biological hazards; laboratory work included.

Effective: Fall 2003 Ending: Spring 2012

Prerequisite: I H S 445

I H S 450 Environmental Health and Safety (3) Overview of toxicology, exposure assessment, industrial hygiene, environmental laws, and contemporary issues in environmental health and safety.

Effective: Fall 2009 Ending: Fall 2011

Prerequisite: CHEM 110

I H S 470 Systems Engineering in Process Safety (3) Quantitative methods of systems analysis, risk analysis and tolerance, as well as accident cost and cost-benefit analysis are covered.

Effective: Fall 2009 Ending: Fall 2011

Prerequisite: MATH 251

I H S 495W Industrial Health and Safety Internship (2) The preparation of a technical report on hazard assessment and control, resulting from experiential education gained at industrial worksites.

Effective: Fall 2009 Ending: Fall 2011

Prerequisite: junior or senior standing

I H S 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 2002 Ending: Spring 2012

I H S 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2000 Ending: Fall 2011

I H S 500 Occupational Safety Engineering (3) Provides a basis to assist students in understanding/applying the scientific and engineering principles associated with the field of safety.

Effective: Summer 2002

Prerequisite: undergraduate science or engineering degree with previous exposure to occupational safety

I H S 510 Occupational Health (3) Introduction to Occupational Health including history, general concepts, hazardous workplace exposures, occupational disorders, and prevention of occupational disease.

Effective: Summer 2002

Prerequisite: undergraduate science or engineering degree with previous exposure to occupational safety and health and toxicology

I H S 520 Contemporary Issues in Industrial Health and Safety (3) Evaluation of industrial processes, hazards, labor, and corporate structure, so that hazard control programs and implementation plans can be formulated.

Effective: Summer 2002

Prerequisite: undergraduate science or engineering degree with previous exposure to occupational safety and health

I H S 590 (ENNEC 590) Colloquium (1-3) Continuing seminars that consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.

Effective: Spring 2009

I H S 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2002

I H S 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Summer 2002

I H S 600 **Thesis Research** (1-15) No description.
Effective: Summer 2002

I H S 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 2002

Last Import from UCM: June 16, 2011 3:00 AM

Information Science (IN SC)

IN SC 431 Information Systems Architecture (3) Principles and priorities of enterprise system design, middleware and service-oriented architectures and web services.
Effective: Summer 2005

IN SC 463 Languages of the Web (3) Taxonomy of programming languages and frameworks used in the development of web-based information systems.
Effective: Summer 2005

IN SC 480 Software Development Lifecycle (3) Modern Software Development Techniques and Processes. Software Paradigms including OO and lifecycle modeling and improvement.
Effective: Summer 2005

IN SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that they may be topical or of special interest.
Effective: Spring 1998

IN SC 497A Business Intelligence (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that they may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

IN SC 497B Fundamentals of Information Security (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that they may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

IN SC 521 Database Design Concepts (3) The requirements capture, design, and development of relational database applications; analysis of business requirements and development of appropriate database systems.
Effective: Summer 2002
Prerequisite: completion of all IN SC or SWENG core courses or with instructor or division approval

IN SC 525 Applied Data Mining (3) Functional overviews of algorithms used in data mining will be presented and contemporary data mining software used to conduct a project.
Effective: Spring 2006
Prerequisite: SC&IS 535 or with instructor or division approval

IN SC 531 Information Technology Law (3) Examines the legal concepts/issues applicable to the field of information technology and to information technology, software engineering, and computer professionals.
Effective: Summer 2002
Prerequisite: completion of all IN SC core courses or with instructor or division approval

IN SC 533 Cyberlaw (3) Course examines the legal concepts and issues applicable to the Internet and Internet-related activities.
Effective: Summer 2002
Prerequisite: students should have taken IN SC 531 or have a basic understanding of the concepts discussed in that course

IN SC 535 Information Technology: Economic Aspects (3) Course examines how changes in information technology affect established organizations and the development of new firms, products, and markets.
Effective: Summer 2002
Prerequisite: completion of IN SC core courses or with instructor or division approval

IN SC 536 Information Technology: Economic Aspects Seminar (3) Course examines the start up of new technology firms or the transformation of old economy companies into Internet companies.
Effective: Fall 2003
Prerequisite: Completion of IN SC core courses or with approval of program.

IN SC 539 IT Systems Seminar (3) A culminating, integrative capstone experience for IN SC students, including a formal technical paper and in-class presentation.
Effective: Spring 2001
Prerequisite: taken as the final course in the Master of Science in Information Science degree or with instructor's permission

IN SC 561 Web Security and Privacy (3) A web-centric look at the latest techniques and practices in computer security as they apply to the Internet.
Effective: Spring 2010
Prerequisite: CSE 543 or IST 515

IN SC 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1999

IN SC 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1999

IN SC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

IN SC 596A **Individual Study: Internship** (1) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

IN SC 597 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998

Last Import from UCM: June 16, 2011 3:00 AM

Information Sciences And Technology (IST)

IST 402 Emerging Issues and Technologies (3 per semester/maximum of 9) Introduction to emerging issues, technology forecasting and analysis; overview of emerging issues and leading technologies in IST and how they impact information systems, users, the IT labor force and society.

Effective: Fall 2006

Prerequisite: IST 210, IST 220

IST 402H Emerging Issues and Technologies (3 per semester/maximum of 9) Introduction to emerging issues, technology forecasting and analysis; overview of emerging issues and leading technologies in IST and how they impact information systems, users, the IT labor force and society.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: IST 210, IST 220

IST 411 Distributed-Object Computing (3) Introduction to distributed-object computing and its use in client/server and real-world computing applications.

Effective: Summer 1999

Prerequisite: IST 311

IST 412 The Engineering of Complex Software Systems (3) Introduction to the engineering of complex software systems including software system specification, design and implementation, integration and test, and evolution.

Effective: Summer 1999

Prerequisite: IST 311

IST 413 Usability Engineering (3) This course addresses activities in the system development process that ensure usability. It considers the emerging concept of usability, requirements gathering and analysis, activity design, information design, interaction design, documentation design, user testing and usability evaluation.

Effective: Spring 2007

Prerequisite: IST 331

IST 420 Fundamentals of Systems and Enterprise Integration (3) Introductory course on integration of information technology into different venues, including the planning, development, and implementation of the integration.

Effective: Summer 2003

Prerequisite: IST 240, IST 301, IST 302

IST 421 Advanced Enterprise Integration: Technologies and Applications (3) Advanced course on the integration of information technology into systems applications.

Effective: Spring 2004

Prerequisite: IST 420

IST 425 (MGMT 425, ENGR 425) New Venture Creation (3) Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans, and present to investors.

Effective: Spring 2011

Prerequisite: ECON 102 orECON 104 orECON 014;CAS 100

IST 426 (ENGR 426, MGMT 426) Invention Commercialization (3) Working with Penn State inventions selected by the Intellectual Property Office, student teams define an optimum commercialization path each technology.

Effective: Spring 2011

Prerequisite: ECON 102 orECON 104 orECON 014;CAS 100

IST 431 The Information Environment (3) Survey of social environment of information technology themes: Community, sovereignty, privacy, ethics, economics, and knowledge management.

Effective: Fall 2004

Prerequisite: IST 210, IST 220

IST 432 Legal and Regulatory Environment of Information Science and Technology (3) Legal environment of information technology, constitutional/political issues, intellectual property, management, e-commerce, privacy, access, computer contracting, cyberspace regulation.

Effective: Spring 2007

Prerequisite: IST 301 orSRA 231 or equivalent

IST 440W Information Sciences and Technology Integration and Problem Solving (3) Problem-based approach to technology integration by focussing on real-life problems faced by an organization.

Effective: Fall 2002

Prerequisite: ENGL 202C orENGL 202D seventh-semester standing (this course is intended for seniors) and the five common course requirements plus at least three of the required courses in an option

IST 441 Information Retrieval and Organization (3) Introductory course for seniors and graduate students covering the practices, issues, and theoretical foundations of organizing and analyzing information and information content for the purpose of providing access to textual and nontextual information resources. Introduces students to the principles of information storage and retrieval systems and databases.

Effective: Spring 2004

Prerequisite: IST 210, IST 240

IST 442 (IL) Information Technology in an International Context (3) International concepts to improve strategies for the design, dissemination, and use of information technology.

Effective: Summer 2006

Prerequisite: IST 110

IST 443 IT Professional Services Theory and Practice (3) Explores and applies the basic concepts, methodologies, tools, and techniques of consulting and professional service organizations in information sciences and technology.

Effective: Spring 2006

Prerequisite: IST 210, IST 220 . Prerequisite or concurrent:IST 302 orIST 412

IST 444 Advanced IT Professional Services (3) Explores advanced IT professional services topics, and the unique application of consulting methods in various industry sectors.

Effective: Summer 2005

Prerequisite: IST 443

IST 445H Globalization Trends and World Issues (3) This course covers trends in globalization and their influence on U.S. policy making as well as the role of the U.S. in international issues.

Effective: Summer 2005

Prerequisite: 6 credits of honors course work

IST 446 An Introduction to Building Computer/Video Games (3) An interdisciplinary course that introduces students to process and techniques involved in developing a video or computer game.

Effective: Summer 2006

Prerequisite: IST 311, IST 331 or approval of program

IST 451 Network Security (3) Fundamental issues and concepts of network security, network security technologies and protocols, and emerging technologies in network security.

Effective: Summer 2004 Ending: Fall 2011

Prerequisite: IST 220

IST 451 Network Security (3) Fundamental issues and concepts of network security, network security technologies and protocols, and emerging technologies in network security.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: IST 220, SRA 221

IST 452 Legal and Regulatory Environment of Privacy and Security (3) Exploration of legal, regulatory, public policy, and ethical issues related to security and privacy for information technology professionals in public institutions, private enterprise, and IT services.

Effective: Spring 2007 Ending: Fall 2011

Prerequisite: IST 301 orSRA 231 or equivalent

IST 452 Legal and Regulatory Environment of Privacy and Security (3) Exploration of legal, regulatory, public policy, and ethical issues related to security and privacy for information technology professionals in public institutions, private enterprise, and IT services.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: IST 432

IST 453 Legal, Regulatory, Policy Environment of Cyber Forensics (3) Legal, regulatory and public policy environment of computer and network forensics that constrain investigatory and monitoring activities in computer and network environments.

Effective: Summer 2006

Prerequisite: IST 110 and 6th-semester standing or higher

IST 454 Computer and Cyber Forensics (3) Fundamental issues and concepts of computer forensics; aspects of computer and cyber crime; methods to uncover, protect, exploit, and document digital evidence; tools, techniques, and procedure to perform computer and cyber crime investigation.

Effective: Summer 2006 Ending: Fall 2011

Prerequisite: IST 220

IST 454 Computer and Cyber Forensics (3) Fundamental issues and concepts of computer forensics; aspects of computer and cyber crime; methods to uncover, protect, exploit, and document digital evidence; tools, techniques, and procedure to perform computer and cyber crime investigation.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: IST 220, SRA 221

IST 456 Security and Risk Management (3) Contemporary Security Issues; security management processes, architecture and models; risk analysis and management; security planning, analysis and safeguards; security policies development and administration; contingency planning, incidence handling and response; and security standards and certification processes.

Effective: Summer 2006 Ending: Fall 2011

Prerequisite: IST 220

IST 456 Security and Risk Management (3) Contemporary Security Issues; security management processes, architecture and models; risk analysis and management; security planning, analysis and safeguards; security policies development and administration; contingency planning, incidence handling and response; and security standards and certification processes.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: IST 220, SRA 221

IST 461 Database Management and Administration (3) Introduces advanced topics in database management systems that are fundamental to effective administration of enterprise information systems.

Effective: Spring 2006

Prerequisite: IST 210, IST 240

IST 462 Database Modeling and Applications (3) This course introduces advanced topics in database modeling and applications.

Effective: Spring 2006

Prerequisite: IST 210, IST 240

IST 489H Research Methods for the Information Sciences and Technology (3) Seminar course focused on approaches to studying information and communication technologies and writing theses and other research reports.

Effective: Summer 2006

Prerequisite: IST 110 honors standing or permission of program

IST 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Fall 1999

Prerequisite: prior approval of proposed assignment by instructor

IST 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Spring 2000

IST 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2000

IST 497A Introduction to Enterprise Architecture (2) Provides a first exposure to Enterprise Architecture and sets a common language and understanding of EA and its business value.

Effective: Summer 2011 Ending: Summer 2011

IST 497A Introduction to Enterprise Architecture (2) Provides a first exposure to Enterprise Architecture and sets a common language and understanding of EA and its business value.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

IST 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2001

IST 501 Integrative Theories and Methods of the Information Sciences and Technology (3) An integrative treatment of research and theories on how technologies are used to meet information needs at multiple levels of analysis.

Effective: Fall 2001

IST 503 Foundations for IST Research (3) Study of major methodological, normative, and theoretical issues in philosophy of science related to research in information sciences and technology.

Effective: Spring 2007

Concurrent: IST 501

IST 511 Information Management: Information and Technology (3) Introduction to theoretical, computational, and practical issues involved in managing textual, spatial, temporal, and multimedia information in a computerized system.

Effective: Fall 2001

Prerequisite: IST 501

IST 512 Information Processing Architecture and Technology (3) This course introduces the core theories, concepts, and methods regarding information and technology from an information processing point of view.

Effective: Summer 2005

IST 515 Information Security and Assurance (3) This course covers theoretical, conceptual, and methodological foundations of information security and assurance.

Effective: Spring 2011

Prerequisite: IST 511 or IST 512 or IST 554

IST 516 Web and Internet Information Retrieval (3) The course addresses aspects of searching, retrieving and modeling the Web/ Internet as information repositories using mathematical and probabilistic treatments.

Effective: Spring 2007

Prerequisite: IST 511 or IST 512

IST 521 Human-Computer Interaction: The User and Technology (3) Users, models of users, developing the models, technology for creating interfaces; examples of good research and implications for Human-Computer Interface (HCI) design.

Effective: Fall 2001

Prerequisite: IST 501

IST 522 Models and Theories of Human-Computer Interaction (3) This course covers the theoretical foundations of human-computer interaction that prepares students in planning and conducting research in HCI.

Effective: Summer 2005

IST 525 Computer-Supported Cooperative Work (3) IST 525 introduces theories, empirical findings, evaluation methods, and design frameworks in computer-supported cooperative work.

Effective: Spring 2007

Prerequisite: IST 521 or IST 522

IST 526 Development Tools and Visualizations for Human-Computer Interaction (3) IST 526 addresses concepts and tools for developing working user interface software and prototypes to provide effective information visualizations.

Effective: Spring 2007

Prerequisite: IST 521 or IST 522

IST 531 Human Information Behavior: Information and the User (3) Introduction to research into the nature of human information and communication processes at the individual, social, and organizational levels.

Effective: Fall 2001

Prerequisite: IST 501

IST 532 Organizational Informatics (3) Researching Information and Information Systems in Organizations.

Effective: Summer 2005

Prerequisite: IST 501

IST 535 Information Technology Valuation, Markets and Innovation (3) This course covers the economic aspects of information technology and innovations.

Effective: Summer 2006

Prerequisite: IST 501

IST 536 Public and Community Informatics (3) Theories and uses of ICT in public sector and community organizations.

Effective: Spring 2007

Prerequisite: IST 501

IST 541 Qualitative Research in Information Sciences and Technology (3) Assists IST researchers in their efforts to learn about and employ appropriate qualitative methods in their research.

Effective: Spring 2004

Prerequisite: IST 501

IST 552 Data and Knowledge Management (3) This course introduces the computational foundations, methodologies and tools for data and knowledge management.

Effective: Summer 2009

IST 554 Network Management and Security (3) Essential skills and knowledge for effectively utilizing networks and Internet technologies to facilitate, manage and secure data communications and applications.

Effective: Summer 2009

IST 555 Intelligent Agents and Distributed Decision Making (3) Distributed decision making theories and agent-based technologies, models and systems with applications in command and control, emergency and resource management.

Effective: Summer 2009

IST 557 (STAT 557) Data Mining I (3) This course introduces data mining and statistical/machine learning, and their applications in information retrieval, database management, and image analysis.

Effective: Summer 2009

Prerequisite: STAT 318 or STAT 416 and basic programming skills

IST 558 (STAT 558) Data Mining II (3) Advanced data mining techniques: temporal pattern mining, network mining, boosting, discriminative models, generative models, data warehouse, and choosing mining algorithms.

Effective: Summer 2010

Prerequisite: STAT 557 or IST 557

IST 562 Theoretical Foundations of Information Science (3) This course introduces the theoretical foundations of information science, with applications in communication, signal processing, machine learning, and pattern recognition.

Effective: Summer 2009

Prerequisite: Familiarity with college-level linear algebra calculus and probability theory or consent of the instructor

IST 564 Crisis, Disaster and Risk Management (3) This course examines the fundamental elements of crisis, disaster, risk and emergency management.

Effective: Summer 2009

IST 571 (M I S 571) Information Technology Strategy (2) Examines link between firm's corporate strategy and vision, and information technology strategy; covers how information technology transforms and enables business.

Effective: Summer 2002

IST 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Fall 2000

IST 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis.

Effective: Fall 2001

IST 594A **Principles of Scholarship** (1) Students will address the issues and challenges inherent in pursuing a PhD in the role of university faculty member.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

IST 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2000

IST 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 2000

IST 597A **Information & Intelligence Policy** (3) This course examines how U.S. policies and practices regarding information and intelligence relate to overall U.S. national security policy objectives.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

IST 597B **Social Network Analysis and Agent-based Modeling** (3) This course introduces theories, techniques, and tools (e.g., agent-based modeling) for analyzing, modeling, and simulating the dynamic behaviors of large-scale social networks.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

IST 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2001

IST 600 **Thesis Research** (1-15) No description.
Effective: Fall 2001

IST 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 2001

IST 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) No description.
Effective: Fall 2001

IST 610 **Thesis Research Off-Campus** (1-15) No description.
Effective: Fall 2001

IST 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 2001

IST 841 **Search Engines & Information Retrieval** (3) Introductory course on search engines and information retrieval. Search, indexing, ranking, and search evaluation are formally defined, explained, and used.
Effective: Summer 2010

IST 868 **Topics in Visual Analytics for Security Intelligence** (3) Introduce visual analytic techniques for security informatics and intelligence. Survey technical approaches for data analysis, threats and vulnerability, communicating risk.
Effective: Fall 2010
Prerequisite: IST 516 or IST 552 or IST 554 or IST 562

IST 885 **Introduction to Multisensor Data Fusion** (3) Understanding the concepts, techniques, and issues surrounding the fusion of information from multiple sensors and sources of data.
Effective: Summer 2009

IST 896 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011

IST 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2011

IST 898 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2011

Last Import from UCM: June 16, 2011 3:00 AM

Instructional Systems (INSYS)

INSYS 411 Orientation to Instructional Systems (2-3) An orientation to selection, utilization, and curricular integration of instructional media.

Effective: Summer 1996

Prerequisite: EDPSY 014

INSYS 415 Systematic Instructional Development (3) Preparation in the use of a nine-step model for systematically analyzing instructional problems and developing validated, practical solutions.

Effective: Summer 1996

INSYS 441 Design, Development, and Evaluation of Internet Resources (3) Design, production, and evaluation of instructional materials for delivery on the Internet.

Effective: Fall 2001

INSYS 442 Innovative Instructional Applications of Microcomputer Technology (3) Educators experience and develop innovative instructional applications of text-processing, database management, spreadsheet, and telecommunication software in their classrooms.

Effective: Fall 2008

Prerequisite: EDTEC 440

INSYS 447 Instructional Design for Multimedia Technologies (3) State of the art multimedia technology hardware such as interactive video, CD-ROM and digitizing audio and video.

Effective: Fall 2001

INSYS 471 Introduction to Educational System Design (3) Investigates systems theory and how components of educational systems interact; develops insights on current issues and models in Educational System Design.

Effective: Summer 1996

INSYS 472 Communication and Educational Systems Design (3) Develops communication and technology-based presentation skills in educational systems designers.

Effective: Spring 2001

Prerequisite: INSYS 471

INSYS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1996

INSYS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 1996

INSYS 497A Literacy, Learning, and Creativity: Digital Storytelling with New Media (3) Participants will use an instructional design process various media tools to design, develop, present and assess digital stories.

Effective: Summer 2011 Ending: Summer 2011

INSYS 497B Playing Games in School (3) In this course, we'll explore and debate the merits of using video games and other interactive systems for educational purposes.

Effective: Summer 2011 Ending: Summer 2011

INSYS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 1996

INSYS 511 Organization and Administration of Instructional Systems (3) Procedures and considerations necessary for the effective organization, management, and evaluation of instructional systems.

Effective: Summer 1996

Prerequisite: INSYS 411

INSYS 521 Instructional Systems Analysis (3) Conducting needs analysis, performance analysis, task analysis, learner analysis, and environmental analysis in preparation for instructional design.

Effective: Fall 2001

Prerequisite: INSYS 415

INSYS 522 Analyzing Outcomes and Learners (3) Analyzing instructional outcomes, analyzing tasks, and writing objectives for the instructional design; analyzing learners characteristics.

Effective: Summer 1998

Prerequisite: INSYS 415

- INSYS 525 Instructional Design Models, Strategies, and Tactics** (3) Application of instructional design models and design of appropriate instructional strategies and tactics.
Effective: Spring 1999
Prerequisite: EDPSY 421, INSYS 415
- INSYS 527 Designing Constructivist Learning Environments** (3) Designing learning environments based on constructivist principles of learning that provide modeling, coaching, and scaffolding.
Effective: Summer 1996
Prerequisite: EDPSY 421, INSYS 415
- INSYS 540 Methods and Models of Interactive Design** (3) Instructional design principles and practices related to creating interactive learning environments for computerized and multimedia instruction.
Effective: Summer 1996
Prerequisite: INSYS 441
- INSYS 542 Evaluating Authoring Systems** (3) Evaluation and selection of current authoring systems based on instructional design requirements.
Effective: Spring 1996
Prerequisite: INSYS 441
- INSYS 543 Designing Information Systems** (3) The design and production of information systems that go beyond traditional instructional systems, such as performance support systems.
Effective: Summer 1996
Prerequisite: INSYS 415, INSYS 521
- INSYS 544 Designing Video for Instruction and Training** (3) The application of theory to the design of visual instruction for multimedia instruction.
Effective: Summer 1996
Prerequisite: INSYS 447
- INSYS 545 Research in Instructional Computing** (3) The critical analysis of research in instructional computing and the application of research methodologies in instructional computing research.
Effective: Fall 2001
Prerequisite: EDPSY 475 or INSYS 575
- INSYS 547 Artificial Intelligence in Education and Training** (3) Designing computer based instructional and informational systems based upon principles of artificial intelligence.
Effective: Summer 1996
Prerequisite: EDPSY 421, INSYS 415
- INSYS 549 Current Topics in Emerging Technologies** (3) An in-depth seminar on the instructional and training design implications of specific new technologies as they emerge.
Effective: Fall 2001
Prerequisite: INSYS 415
- INSYS 551 Performance Technology for Instructional Designers** (3) Methods of identifying human performance problems in organizations and developing instructional and non-instructional interventions.
Effective: Summer 1996
Prerequisite: INSYS 415
- INSYS 553 Managing and Consulting for Instructional Development** (3) Knowledge and skills in managing and coordinating an instructional development project and consulting with subject matter experts and clients.
Effective: Summer 1996
Prerequisite: INSYS 525
- INSYS 571 Advanced Educational Systems Design** (3) In depth investigation of the process of designing innovative educational systems.
Effective: Spring 1999
Prerequisite: INSYS 471
- INSYS 574 Applied Qualitative Research for Work Practice, Innovation, and Systems Design** (3) Investigates qualitative research paradigms and methodologies; develops skills in use of ethnographic methods in work practice, innovation and systems design.
Effective: Summer 2000
Prerequisite: any introductory research design course or with instructor permission for example: ADTED 550
- INSYS 575 Designing Experimental Research in Instructional Systems** (3) Designing research studies in Instructional Systems of a quantitative and experimental nature. Will result in a research proposal.
Effective: Spring 2007
- INSYS 581 Theoretical Foundations of Instructional Systems** (3) Analysis of theoretical foundations of the instructional systems (systems and cybernetics, communications, cognitive psychology, sociological, constructivist, ecological) for doctoral students.
Effective: Summer 1996
Prerequisite: PH.D. or D.ED. candidacy
- INSYS 582 Comparative Instructional Design Models** (3) Analyzing different instructional design models, such as elaboration theory, component design theory, Gagne-Briggs, algorithmic, conversation theory, cognitive flexibility theory.
Effective: Summer 1996

Prerequisite: PH.D. or ED.D. candidacy

INSYS 583 Survey of Research in Instructional Systems and Technology (3) Analysis and evaluation of research in domains of instructional systems and technology.

Effective: Summer 1996

Prerequisite: PH.D. or ED.D. candidacy

INSYS 586 Diffusion and Adoption of Innovations (3) Understanding change process in educational contexts, comparing various models, tailoring them to individual needs, and creating personalized model of change.

Effective: Summer 1998

Prerequisite: admission into INSYS doctoral program

INSYS 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 1996

INSYS 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small group basis.

Effective: Fall 2003

INSYS 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Summer 1996

INSYS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1996

INSYS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 1996

INSYS 597A Current Topics in Learning Technology (3) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 2011 Ending: Summer 2011

INSYS 597A (SCIED 597D) Learning Sciences Research Foundations (3) Learning Sciences Research Frameworks examines the foundational domains of Learning Sciences approach to educational research design.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: course in Learning in a Discipline Learning Theory or Cognition

INSYS 597B Design Studio (3) Designing and developing multimedia projects for education.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

INSYS 597C (C I 597C) Technology in Teacher Education, a Critical Consideration (3) This seminar has been designed to consider how technologies have been used in teacher preparation programs and what we as teacher educators can do to take more control over the use of appropriate technologies in our classrooms.

Effective: Summer 2011 Ending: Summer 2011

INSYS 597D Design Based Research Methods Applications for Educational Research (3) This course is designed to acquaint students with methods of research collectively referred to as design-based research. One of the distinguishing features of design-based research is that development and deployment are active components of a research agenda. Whereas many research methods seek to minimize researcher "intrusion" in the sites of research (e.g., the adoption of an observational stance), design-based researchers actively and purposively engage in the construction of learning environments in which their research is conducted. This course is intended to understand the strengths and limitations of design base research methods in educational settings.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

INSYS 600 Thesis Research (1-15) No description.

Effective: Summer 1996

INSYS 601 PH.D. DISSERTATION FULL-TIME (0) NO DESCRIPTION.

Effective: Summer 1996

INSYS 602 SUPERVISED EXPERIENCE IN COLLEGE TEACHING (1-3 PER SEMESTER, MAXIMUM OF 6) NO DESCRIPTION.

Effective: Summer 1996

INSYS 610 THESIS RESEARCH OFF-CAMPUS (1-15) NO DESCRIPTION.

Effective: Summer 1996

INSYS 611 **PH.D. DISSERTATION PART-TIME** (0) NO DESCRIPTION.
Effective: Summer 1996

Last Import from UCM: June 16, 2011 3:00 AM

Insurance (INS)

INS 401 Fundamentals of Private Pensions (3) Analysis of pension regulation, funding, vesting, retirement annuities under insured and self-insured plans, actuarial cost analysis, plan termination insurance.

Effective: Spring 2011 Ending: Fall 2011

Prerequisite: ACCTG 211; B A 301 or FIN 301; ECON 102 ; and SCM 200 or STAT 200

INS 405 Corporate Risk Management (3) Insurance management for corporate organizations; self-insurance, risk transfer, and other alternatives to insurance.

Effective: Spring 2011 Ending: Fall 2011

Prerequisite: B A 301, FIN 301 or INS 301

INS 410 Compound Interest and Annuities--Certain (3) Compound interest and annuity functions; equations of value; determination of yield rates; construction of tables.

Effective: Spring 2001 Ending: Fall 2011

Prerequisite: MATH 141

INS 411 Life Contingencies I (3) A study of the mathematical theory of life contingencies; single-life functions and their applications.

Effective: Fall 1989 Ending: Fall 2011

Prerequisite: INS 410; STAT 414 or MATH 414

INS 412 Life Contingencies II (3) Joint-life and survivor-life functions, population life tables, and multiple decrement theory, with applications to disability and retirement problems.

Effective: Summer 1984 Ending: Fall 2011

Prerequisite: INS 411

INS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2003 Ending: Fall 2011

INS 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2008 Ending: Fall 2011

INS 496 Independent Studies (1-18) Creative Projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983 Ending: Fall 2011

INS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983 Ending: Fall 2011

INS 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2007 Ending: Fall 2011

INS 500 Management of the Insurance Enterprise (3) Management planning associated with risk bearing; pricing, reserving, reinsurance, and regulation; Lloyds and other significant world insurance markets; insurance intermediaries.

Effective: Fall 1983

INS 504 Problems in Insurance (3) Planned individual projects involving library, laboratory, or field work.

Effective: Winter 1978

INS 510 Risk Management (3) Analysis of managerial problems and responsibilities of risk analysis, removal or reduction, and allocation of corporate resources to provide indemnity.

Effective: Winter 1978

INS 575 Risk Management (2) Develop an understanding of the risks facing corporations and the methods available to deal with those risks.

Effective: Summer 2002

Prerequisite: B A 531

INS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

INS 599 (IL) Foreign Study--Insurance (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.

Graduate Bulletin Archive - 2011

2010 - 2011

Effective: Summer 2005

Prerequisite: acceptance in established exchange program

INS 600 **Thesis Research** (1-15) No description.

Effective: Fall 1983

INS 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Integrative Arts (INART)

INART 410 **Early Pennsylvania Decorative Arts and Furniture** (3) The study of Pennsylvania and related furniture, pottery, paintings, and decorative arts of the seventeenth, eighteenth, and early nineteenth centuries.
Effective: Summer 2011

INART 415 **Nineteenth Century Pennsylvania Architecture and Restoration** (3) Interior and exterior design of early Pennsylvania architecture; understanding and evaluation of and experience in restoration.
Effective: Summer 2011
Prerequisite: INART 410

INART 494 **Research Projects** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 1996

INART 494H **Research Projects** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

INART 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Summer 1995
Prerequisite: prior approval of proposed assignment by instructor

INART 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1996

INART 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1996

INART 497A **Ivyside Pride Advanced** (3) Exploration and performance of choral music in a variety of genres. By audition only.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

INART 497B (COMM 497B) **3D Computer-Generated Imagery** (3) Introduces core concepts in 3D CGI including modeling, animation, cameras, lighting and texturing with a focus on industry needs.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

INART 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1996

INART 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

Integrative Biosc (IBIOS)

IBIOS 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 1997

IBIOS 511 (BMMB 511, VB SC 511) **Molecular Immunology** (2) The study of molecular and biochemical events that influence immune responses and define current questions in immunology.
Effective: Spring 2008
Prerequisite: B M B 400, MICRB 410

IBIOS 530 (VB SC 530) **Regulation of gene expression by xenobiotics** (3) The mechanisms by which foreign chemicals alter gene expression and the techniques used to examine this effect are examined.
Effective: Spring 2008
Prerequisite: B M B 401 or equivalent vb sc 433/b m b 433 recommended

IBIOS 532 (VB SC 532) **Developmental and Reproductive Toxicology** (3) Effects of environmental chemicals, nutrients and drugs on embryo/fetal development and maternal/paternal toxicity.
Effective: Spring 2008
Prerequisite: B M B 402

IBIOS 551 (BMMB 551) **Genomics** (3) Structure and function of genomes including use of some current web-based tools and resources for studies and research in genomics.
Effective: Summer 2007

IBIOS 570 **Molecular Toxicology Seminar Series** (2) This course provides an opportunity for students in the Cellular and Molecular Mechanisms of Toxicity program to interact with leading scientists.
Effective: Spring 1999

IBIOS 571 **Current Issues in Biotechnology** (2) Lecture-discussion series by academic and industry experts on the cutting-edge of science, business, intellectual property, legal, social, and ethical issues in biotechnology. The course also requires a group project, involving case studies or market research on various areas of biotechnology.
Effective: Spring 2006

IBIOS 572 **Benchmark Papers** (2) Discussion of current literature on molecular, cellular and developmental biology.
Effective: Summer 2007

IBIOS 580 **Critical Reading in Immunobiology** (1) Literature review of cellular, molecular, genetic and biochemical analysis of in vitro and in vivo immunology.
Effective: Summer 2004
Prerequisite: Past or concurrent enrollment in:MICRO 554

IBIOS 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 1997

IBIOS 591 **Ethics in the Life Sciences** (1) An examination of integrity and misconduct in life sciences research, including issues of data collection, publication, authorship, and peer review.
Effective: Spring 1999

IBIOS 592 **Current Research Seminar** (2) This course uses a weekly biological seminar as a springboard for discussion of a research topic of high current interest.
Effective: Spring 1999

IBIOS 593 **Molecular biology Laboratory** (3) An intensive laboratory course on the principles and techniques of nucleic acid purification, analysis by restriction enzymes, gel electrophoresis, nucleic acid labeling and hybridization, cloning, sequencing, PCR amplification, and analysis of cloned heterologous gene expression by western blotting.
Effective: Spring 2000

IBIOS 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2000

IBIOS 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 1997

IBIOS 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1997

IBIOS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1997

IBIOS 597A Neuroanatomy (4) This graduate-level course examines the structural-functional organization of central nervous system. While emphasis is placed on the human brain and spinal cord, comparative neuroanatomy and the evolutionary principles that guide the phylogenetic development of the vertebrate nervous system is discussed. Course topics are covered in lectures and laboratory sessions. The laboratory provides an opportunity to perform gross dissections of the human brain and to view neural structures at both the macro- and microscopic level. Reading assignments will include textbook chapters and articles from the primary literature.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

IBIOS 597C Advances in Lab Techniques (1-3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

IBIOS 597C Advanced Laboratory Techniques (1-3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

IBIOS 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1999

IBIOS 598A Neuroscience Seminar (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

IBIOS 598A Neuroscience Seminar (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

IBIOS 598C Current Topics in Neuroscience (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

IBIOS 598C Current Topics in Neurosciences (1) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

IBIOS 598E Genomics Journal Club (1) This is a course run in journal club format that is open to the PSU community. The class meets weekly to discuss current papers. The course focuses on understanding advanced in genomics and bioinformatics, although specific topics vary.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

IBIOS 598E Genomics Journal Club (1) A weekly review of current literature related, but not limited, to the area of genomics research.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

IBIOS 600 Thesis Research (1-15) No description.
Effective: Spring 1998

IBIOS 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Spring 1998

IBIOS 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 1997

IBIOS 610 Thesis Research Off Campus (1-15) No description.
Effective: Summer 2002

IBIOS 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Summer 2002

Last Import from UCM: June 16, 2011 3:00 AM

Interdisciplinary Humanities (I HUM)

I HUM 400 Expressions in the Humanities (3) Capstone course for School of Humanities majors: students synthesize and apply approaches to a topic in creative expression and knowledge.

Effective: Fall 2001

Prerequisite: I HUM 300W seventh-semester standing

I HUM 410 (IL) Religion and Culture (3) A comparative examination of several world religions in their social and cultural contexts.

Effective: Summer 2005

Prerequisite: sixth-semester standing

I HUM 430 Philosophy and Literature (3) The study of philosophical viewpoints in literature.

Effective: Spring 2002

Prerequisite: fifth-semester standing

I HUM 453 Texts and Culture (3) Study of art, literature, film, and other creative genres to illustrate the interrelationships between creative expression and cultural practices.

Effective: Spring 2002

Prerequisite: fifth-semester standing

I HUM 460 Thematic Studies (3) Analysis of a group of related ideas in art, music, literature, and/or philosophy. (May be repeated for credit.)

Effective: Spring 2002

Prerequisite: fifth-semester standing

I HUM 461 (IL) Selected Periods in the Humanities (3) Interdisciplinary studies dealing with selected periods of world culture. (May be repeated for credit.)

Effective: Summer 2005

Prerequisite: fifth-semester standing

I HUM 491 Seminar in Interdisciplinary Humanities (3) Interdisciplinary studies dealing with selected periods of world culture. (May be repeated for credit.)

Effective: Fall 2001

Prerequisite: I HUM 300W seventh-semester standing

I HUM 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2002

I HUM 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

I HUM 495 Internship (1-6) Supervised internship for undergraduate or graduate Humanities majors in state offices, educational institutions, arts agencies, community organizations, or humanities councils.

Effective: Spring 2002

Prerequisite: senior-level status for undergraduate students; 18 credits of course work for graduate students; approval of program required

I HUM 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Spring 2002

I HUM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2002

I HUM 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

International Agriculture (INTAG)

INTAG 481 **Problems in Agriculture in Tropical Areas** (3) Students apply their "expertise" to problems in agriculture. An integral component is a trip to tropical areas at their expense.

Effective: Spring 1983

Prerequisite: completion of six credits in applicant's major and successful completion of interview

INTAG 495 **Internship in International Agriculture** (1-3) Observation of and participation in the operation and management of a University-approved international agricultural firm or international agricultural development agency.

Effective: Spring 1986

Prerequisite: Prior approval of proposed internship plan

INTAG 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1986

INTAG 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 1986

INTAG 497A **Comparing US/French Agricultural Systems** (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

INTAG 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

INTAG 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

International Business (I B)

I B 403 International Business and National Policies (3) Evaluation of national economic policies in the light of international economic theory; their impacts on operations of the international business firm.

Effective: Spring 2008

Prerequisite: ACCTG 211, B A 301 orFIN 301

I B 404 Contemporary Issues in International Business (3) Investigation of issues in international business practice interpreted from the foundations of the social sciences. Topics will be chosen from contemporary issues in global business and economics.

Effective: Spring 2008

Prerequisite: ACCTG 211, B A 301 orFIN 301

I B 440 (US;IL) (PL SC 440, AAA S 440) Globalization and Its Implications (3) This course explores the socioeconomic implications of globalization.

Effective: Spring 2008

Prerequisite: AAA S 100 orAAA S 110 orPL SC 003 orPL SC 014 orPL SC 020 orPL SC 022

I B 450 The Business Environment of Europe (3) This course provides an overview of the economic, institutional, and regulatory environment in Europe at the EU and national levels.

Effective: Summer 2007

Prerequisite: ACCTG 211, B A 301 orFIN 301

I B 460 International Business in Emerging Nations (3) An overview of international business strategies and economic environments of emerging nations with a specific focus on markets in China, India, and Southeast Asia.

Effective: Summer 2011

Prerequisite: ACCTG 211;FIN 301 orB A 301 Concurrent: I B 303

I B 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2011

Prerequisite: permission of the program

I B 494H Honors Research Project (1-3 per semester/maximum of 6) Supervised honors student research projects identified on an individual or small-group basis.

Effective: Summer 2011

Prerequisite: permission of the program

I B 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2002

I B 497 Special Topics (1-9) Formal courses given infrequently to explore in depth, a comparatively narrow subject interest.

Effective: Fall 1991

I B 497A Business in China (3) Familiarize students to doing business in China from macro, meso and micro levels.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

I B 497B Urban Property Rights (3) A senior-level seminar dealing with international aspects of the economics of urban property rights.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

I B 497C Chinese for International Business (4) Formal courses given infrequently to explore in depth, a comparatively narrow subject interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

I B 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2007

I B 500 International Business Management (3) Concepts and institutions affecting the international conduct of business; interface between nations and international firms; alternative policies businesses employ internationally.

Effective: Fall 1991

I B 501 Comparative Business Systems (3) Conceptual approach analyzing and predicting influences of social, political, and economic norms and values upon diverse societies' managerial decision making.

Effective: Fall 1991

I B 502 International Business Macro Analysis (3) International economic, trade, political, and monetary tools are applied

to national policy issues and international business operations.

Effective: Fall 1991

Prerequisite: I B 500

I B 503 International Business Policy (3) Analysis of the internal operations of multinational firms; design of optimal strategies of operation under varying environmental conditions.

Effective: Fall 1991

Prerequisite: I B 500

I B 504 Seminar in International Business (3-6) Seminar in techniques applied to selected topics; market structures; capital budgeting, investment; comparisons of foreign norms and values; multinational organization characteristics.

Effective: Fall 1991

I B 505 (FIN 505) Multinational Managerial Finance (3) Analysis of the international aspects of managerial finance.

Emphasis on the environmental and institutional factors influencing capital acquisition and allocation.

Effective: Fall 1991

Prerequisite: B A 531

I B 515 (R EST 515) Property Rights in a Global Economy (2) Analysis of economic, financial, legal, and political factors affecting international real estate decision making.

Effective: Spring 2009

I B 518 (MKTG 518) Global Marketing (3) Role of international marketing in the global business environment; development of marketing plans and implementation strategies under differing socio-economic conditions.

Effective: Fall 1991

Prerequisite: MKTG 500

I B 555 (FIN 555) Global Finance (1-3) Analyze international business finance problems, impact of evolving international payment systems on business, financial management in modern multinational enterprise.

Effective: Fall 2008

Prerequisite: FIN 550

I B 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Fall 1991

I B 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1991

I B 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 1991

I B 599 (IL) Foreign Study--International Business (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.

Effective: Summer 2005

Prerequisite: acceptance in established exchange program

Last Import from UCM: June 16, 2011 3:00 AM

International Studies (INTST)

INTST 400 (IL) **Seminar in International Studies** (3) An upper-division seminar focusing on one or two critical international issues from an interdisciplinary perspective; individual projects.

Effective: Spring 2007

Prerequisite: INTST 100

INTST 493 **International Studies** (3) Selected topics in International Studies.

Effective: Spring 2008

Prerequisite: prior participation in an Education Abroad program or international work experience and enrollment in the International Studies major

INTST 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 1994

INTST 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

INTST 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written or oral critique of activity required.

Effective: Spring 2008

Prerequisite: Approval by International Studies or Global Studies Advisor

INTST 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 1994

INTST 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 1994

Last Import from UCM: June 16, 2011 3:00 AM

Internship (INTSP)

INTSP 495A **Internship in Business for non-Business Students** (1-6) Supervised off-campus, non-group instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2011

Prerequisite: senior standing; minimum 2.0 GPA; ENGL 015, MATH 021, ECON 102 or ECON 104, MGMT 301, MKTG 301, INTSP 370, ACCTG 211 or substitute approved by the instructor; prior approval of proposed assignment(s) by instructor

Last Import from UCM: June 16, 2011 3:00 AM

Italian (IT)

IT 412 **Theory and Practice of Translation** (3) Advanced practicum in Italian explores the technical, artistic, and practical applications of translation between Italian and American cultures.

Effective: Summer 2004

Prerequisite: any 300-level course in Italian

IT 415 **Dante** (3) Readings in the Divina Commedia and the related lesser works of Dante Alighieri.

Effective: Summer 2011

IT 422 **Topics in the Italian Renaissance** (3) Topics vary by year and may include "Theories of Love," "Magic, Witchcraft, Alchemy, and the Emergence of Modern Science," etc.

Effective: Fall 2005

Prerequisite: any Italian course at the 300-level

IT 450 **Nineteenth-Century Italian Literature** (3) Italian romanticism, Verismo and neoclassicism, their origin and development in the novel, poetry, and drama.

Effective: Winter 1978

Prerequisite: IT 351

IT 460 **Twentieth-Century Italian Literature** (3) Modern and contemporary Italian prose, drama, and poetry.

Effective: Winter 1978

Prerequisite: IT 351

IT 475 **Modern Italian Literature and Cinema** (3) Focus on silent films, fascism, WWII, Resistance, Neorealism, and reactions against Neorealism.

Effective: Spring 2003

IT 480 **Italian Women Writers Through the Centuries** (3) Analysis of the works of women authors in their historical and literary contexts.

Effective: Spring 2005

Prerequisite: any 300-level Italian course

IT 485 **Italian-American Cultural Studies** (3) In-depth exploration of Italian-American cultural contributions.

Effective: Spring 2005

Prerequisite: any 300-level Italian course

IT 490 **Dante in Translation** (3) The reading of Dante's Divine Comedy and selected minor works.

Effective: Fall 1983

Prerequisite: junior standing or permission of instructor

IT 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

IT 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

IT 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

IT 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

IT 588 **Seminar in Italian Literature** (3-12) Common and individual research in special problems.

Effective: Winter 1978

IT 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

IT 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 1988

IT 600 **Thesis Research** (1-15) No description.

Effective: Fall 1983

IT 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1983

IT 801 **Fundamentals of Reading Italian for Research** (3) This course provides the fundamental skills for reading Italian prose to graduate students with special interests in conducting research using Italian materials.

Effective: Spring 2010

Last Import from UCM: June 16, 2011 3:00 AM

Japanese (JAPNS)

JAPNS 401 (IL) **Level Three Japanese A** (4) Further acquisition of the four language skills in Japanese--reading, writing, speaking and listening comprehension.

Effective: Spring 2011

Prerequisite: JAPNS 110

JAPNS 402 (IL) **Level Three Japanese B** (4) Exclusively for study abroad returnees. To further develop Japanese proficiency in speaking, listening, reading, and writing.

Effective: Spring 2011

Prerequisite: JAPNS 401

JAPNS 403Y (IL) **Practical Written Communication: Japanese for Professional and Academic Purposes I** (3) Discussions, presentations, readings, and compositions emphasizing written styles used in newspapers, magazines, business reports, academic writing, and other texts.

Effective: Spring 2010

Prerequisite: JAPNS 402

JAPNS 404 (IL) **Practical Written Communication: Japanese for Professional and Academic Purposes II** (3) Continuation of emphasis on written styles used in newspapers, magazines, business reports, academic writing, and other texts; aspects of translation.

Effective: Spring 2010

Prerequisite: JAPNS 403Y

JAPNS 422 (IL) **War and the Warrior in Japan** (3) Survey of the role of warfare and the warrior in Japan, with attention to changing cultural settings. Taught in English.

Effective: Summer 2011

Prerequisite: JAPNS 120 or JAPNS 121 or HIST 172

JAPNS 423 (IL) **Men, Women, and Animals** (3) Japanese history and culture through the lens of relations between men and women and between humans and animals.

Effective: Summer 2011

Prerequisite: HIST 172, JAPNS 120 or JAPNS 121

JAPNS 425 **Beyond Anime** (3) Selected works from the history of illustrated narrative from scrolls to chapbook, through film and anime; topics may vary. This seminar-style study of Japanese visual culture will help students see Japanese visual arts in terms that are local to Japanese aesthetics and through those that transcend local cultures.

Effective: Spring 2011

Prerequisite: HIST 172, JAPNS 120 or JAPNS 121

JAPNS 452 (IL) **Contemporary Japan: Cultures, Lifestyles, Trends** (3 per semester/maximum of 6) Survey of aspects of modern Japanese society; includes readings from Japanese newspapers, magazines, and fiction; topics may vary each semester.

Effective: Spring 2010

Prerequisite: JAPNS 401

JAPNS 453 (IL) **Japanese Film** (3 per semester/maximum of 6) Selected films and directors representing various aspects of Japanese culture and cinema; topics may vary each semester.

Effective: Spring 2010

Prerequisite: JAPNS 401

JAPNS 454 (IL) **Japanese Literature** (3 per semester/maximum of 6) Selected works from important Japanese texts representing genres such as autobiography, poetry, fiction, and drama; topics may vary each semester.

Effective: Spring 2010

Prerequisite: JAPNS 401

JAPNS 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2010

JAPNS 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2010

JAPNS 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2010

JAPNS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 1995

JAPNS 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject

which may be topical or of special interest.
Effective: Spring 2010

JAPNS 499 (IL) **Foreign Study--Advanced Japanese** (1-15) Small group instruction in spoken and written modern Japanese at the advanced level.
Effective: Spring 2010
Prerequisite: JAPNS 110 or JAPNS 299

JAPNS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1997

JAPNS 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2003

Last Import from UCM: June 16, 2011 3:00 AM

Jewish Studies (J ST)

J ST 401 (IL) (HIST 401) **Ancient Technologies and Socio-cultural History in the Ancient Levant** (3) Social and intellectual development in the Ancient Levant as they affected and were affected by technological development.
Effective: Spring 2006
Prerequisite: RL ST 110

J ST 409Y (IL) (HIST 409Y, RL ST 407Y) **European Anti-Semitism from Antiquity to the Present** (3) Surveys the history of anti-Semitism in Europe from antiquity through the Middle Ages to the present.
Effective: Summer 2005

J ST 410 (US;IL) (HIST 410, RL ST 410) **Jews in the Medieval World** (3) Trends in medieval Jewish society under Islam and Western Christendom.
Effective: Spring 2006

J ST 411 (US;IL) (RL ST 411) **Jewish Studies** (3) Study of the life and thought of a particular period or movement in the history of Judaism.
Effective: Spring 2006
Prerequisite: 3 credits in religious studies

J ST 412 (RL ST 412) **American Judaism** (3) The development of Jewish religion and culture in America from the colonial era to the present.
Effective: Summer 1999
Prerequisite: HEBR 010 or J ST 010

J ST 416 (HIST 416) **Zionist History 1890-1948** (3) History of Zionist thought and politics to the foundation of Israel 1948.
Effective: Summer 1997

J ST 420 (ANTH 420) **Archaeology of the Near East** (3) Culture of the Near East and India from Paleolithic times through the Bronze Age.
Effective: Spring 1999
Prerequisite: ANTH 008, ANTH 009, ANTH 011 or ANTH 012

J ST 424H (HIST 424H, PHIL 434H, RL ST 424H) **Monotheism and the Birth of the West** (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.
Effective: Spring 2002
Prerequisite: J ST 004, J ST 102, J ST 110 or J ST 120

J ST 426 (US) (ADM J 426, HIST 426) **Jewish/American Organized Crime in New York City** (3) History of Jewish/American organized crime in New York City from 1890 through the Great Depression.
Effective: Spring 2006

J ST 427 (ENGL 427) **Topics in Jewish American Literature** (3) An in-depth examination of important themes, writers, and/or historical developments in Jewish Literature of the United States.
Effective: Spring 2009
Prerequisite: ENGL 015 or ENGL 030; J ST 132 or CMLIT 110

J ST 433 **Introduction to Jewish Music and Art** (3) Introduction to the study of Jewish music and art from antiquity to the present.
Effective: Summer 2011
Prerequisite: 5th semester standing and one of the following: a previous course in art music or literature or else J ST 010

J ST 434 **Media and the American Jewish Experience** (3) Study of United States Jewish history through film and accompanying written text.
Effective: Summer 2011
Prerequisite: 5th semester standing and one of the following: a previous course in art music or literature or else J ST 115

J ST 457 (US;IL) (ANTH 457, SOC 457) **Jewish Communities: Identity, Survival, and Transformation in Unexpected Places** (3) Examines the global array of smaller Jewish communities that have flourished outside the main urban centers of Jewish settlement.
Effective: Summer 2006
Prerequisite: ANTH 001 or ANTH 045, HEBR 010, J ST 010, SOC 001, SOC 005, SOC 007, SOC 015

J ST 468 (PHIL 468) **Modern Jewish Philosophy** (3) Explores the major figures in modern Jewish philosophy and their influences on contemporary philosophy.
Effective: Summer 2004
Prerequisite: one course in Philosophy and/or Jewish Studies

J ST 478 (PHIL 478, RL ST 478) **Ethics After the Holocaust** (3) Explores the philosophical effects of the Holocaust for thinking about the primary question: Is ethics possible?
Effective: Spring 2005
Prerequisite: one course in Jewish Studies or Philosophy

J ST 480 (CAMS 480) **Greeks and Persians** (3) Development and achievements of the Achaemenid kingdom; relationships between Persians and Greeks.
Effective: Spring 2001
Prerequisite: CAMS 010, CAMS 025 or CAMS 100

J ST 494 **Research Projects** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1998

J ST 494H **Research Projects** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

J ST 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 1998
Prerequisite: prior approval of proposed assignment by instructor

J ST 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 1994

J ST 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1994

J ST 497A **The Israeli Kibbutz** (3) This course will explore the ideologies, goals, and history of the kibbutzim.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

J ST 497B (HIST 497B, RL ST 497B) **German Antisemitism from the Middel Ages to the Holocaust** (3) German and Jewish history are interpreted in an integrated approach which examines the fundamental problem of continuity through the lens of antisemitism.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

J ST 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998

J ST 499 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

J ST 505 (HIST 505) **Biblical Historiography in its Ancient Setting** (3 per semester/maximum of 6) Methods of historical reconstruction in Biblical and other historiography from the earliest Mesopotamian records through those of the 6th century B.C.E.
Effective: Spring 1995
Prerequisite: HIST 102

J ST 508 (HIST 508) **Antisemitisms in Historical Context** (3) Historical and comparative analysis of occurrences of antisemitism from antiquity to the present.
Effective: Spring 1995

J ST 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1998

J ST 597 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1998

Last Import from UCM: June 16, 2011 3:00 AM

Kinesiology (KINES)

PROFESSIONAL COURSES

The following courses are designed for the major in Kinesiology and related disciplines as designated in the various curricular programs. They are pedagogically oriented and do not fulfill the Health Sciences and Physical Education (GPE) component of General Education.

KINES 400 Adapted Physical Education (3) Basic concepts of planning and conducting physical education programs for children with physical, sensory, and/or intellectual impairments.

Effective: Fall 2001

Prerequisite: KINES 202

KINES 403 Emergency Medical Technology (4) Theoretical and practical aspects of emergency medical techniques as applied in the pre-hospital environment.

Effective: Spring 1998

Prerequisite: KINES 303 and/or current advanced first aid and cardiopulmonary resuscitation certification

KINES 404 Emergency Medical Technology Instructor (2) Educational concepts and skills necessary to present instruction in emergency care; lesson planning, methods of instruction, and evaluation techniques.

Effective: Summer 1997

Prerequisite: KINES 403 with current Pennsylvania Emergency Medical Technician certification

KINES 411 Introduction to Musculoskeletal Injury and Rehabilitation (3) This course is designed to provide an overview of common musculoskeletal injuries and rehabilitation for pre-allied health and fitness professionals.

Effective: Summer 2011

Prerequisite: KINES 202

KINES 420 Psychosocial Dimensions of Physical Activity (3) Discussion of theoretical and empirical findings, structuring a frame of reference for exploring man's involvement in physical activity.

Effective: Spring 2001

Prerequisite: KINES 321 or 3 credits in psychology or sociology

KINES 421 Exercise Psychology (3) Psychological antecedents and consequences of physical activity behaviors.

Effective: Spring 2008

Prerequisite: KINES 321 or PSYCH 100

KINES 422 Physical Activity Interventions (3) Principles of designing, planning, and implementing theory- and evidence-based physical activity interventions.

Effective: Spring 2008

Prerequisite: KINES 321 or PSYCH 100

KINES 423 Psychology of Sports Injuries (3) Psychological causes and consequences of sports related injuries in athletes.

Effective: Spring 2008

Prerequisite: KINES 321

KINES 424 (US) (WMNST 424) Women and Sport (3) An interdisciplinary approach to contemporary issues related to women and sport from historical, physiological, psychological, and sociological perspectives.

Effective: Spring 2007

Prerequisite: PSYCH 100, PSYCH 231, PSYCH 479, SOC 001 or WMNST 001

KINES 427 (HD FS 427) Developmental Sport & Exercise Psychology (3) Developmental changes in the antecedents and consequences of physical activity across the lifespan.

Effective: Spring 2008

Prerequisite: PSYCH 100 and KINES 321 or HD FS 129 or PSYCH 212

KINES 428 Motivation and Emotion in Movement (3) Theories of motivational and emotional processes and their applications in movement settings.

Effective: Spring 2008

Prerequisite: KINES 321 or PSYCH 100

KINES 429 Psychology of Sport Performance (3) Psychological theories of talent development and performance enhancement in sport.

Effective: Spring 2008

Prerequisite: KINES 321 or PSYCH 100

KINES 434 Rehabilitation of Injuries to the Lower Extremities (3) Theoretical foundation and laboratory experience in manual therapy techniques and therapeutic exercises for the lower extremities.

Effective: Fall 2006

Prerequisite: KINES 334 Concurrent: KINES 335 KINES 395F

KINES 435 Rehabilitation of Injuries to the Trunk and Upper Extremities (3) Theoretical foundation and laboratory experience in manual therapy techniques and therapeutic exercises for the trunk and upper extremities.

Effective: Fall 2006

Prerequisite: KINES 434 Concurrent: KINES 336 KINES 435 KINES 395G

KINES 436 Therapeutic Modalities in Athletic Training (4) Lecture and laboratory course exploring physiological principles and clinical evidence to the use of therapeutic modalities in athletic training.

Effective: Fall 2006

Prerequisite: KINES 434 Concurrent: KINES 336 KINES 435 ; KINES 395G

KINES 438W Administration and Issues in Athletic Training (3) Theoretical and practical aspects for management of an Athletic Training professional practice and identifying contemporary issues related to the profession.

Effective: Fall 2006

Prerequisite: KINES 436 Concurrent: KINES 395I

KINES 439W Ethics in Sport and Sport Management (3) Analysis of moral dilemmas in sport and sport management utilizing the tools of ethics.

Effective: Spring 2001

Prerequisite: KINES 345 or 3 credits in humanities

KINES 440 Philosophy and Sport (3) An examination of human nature from the perspective of our participation in sport.

Effective: Spring 2001

Prerequisite: KINES 345 or 3 credits in philosophy

KINES 441 (US) (AM ST 441) History of Sport in American Society (3) Background, establishment, and growth of sport in America from colonial times to the present.

Effective: Fall 2007

Prerequisite: KINES 141 or 3 credits of United States history

KINES 442 (IL) (CAMS 442) Sport in Ancient Greece and Rome (3) An examination of the continuity of sport in ancient Greek and Roman societies.

Effective: Spring 2008

Prerequisite: CAMS 025, CAMS 033, CAMS 140, CAMS 150, CAMS 100, CAMS 101 or KINES 141

KINES 443 (IL) The Modern Olympic Games (3) An analysis of the modern Olympic Games from their inception through the current festival.

Effective: Spring 2006

Prerequisite: KINES 141 or 3 credits of history or philosophy

KINES 444 (US) History of Athletics in Higher Education (3) Origin and development of athletics in American higher education from colonial times to the present.

Effective: Spring 2006

Prerequisite: KINES 141 or 3 credits of American history

KINES 445 Alcohol and Drug Education (3) Principles of integration and coordination of alcohol and drug education programs for health education and other health related professions.

Effective: Spring 1998

Prerequisite: 9 credits of health science and/or psychology

KINES 446 (IL) History of Sport in the Modern World (3) History of sport in modern world, ca. A.D. 1500 to present; concentrates on role of sport in societies outside United States.

Effective: Summer 2005

Prerequisite: KINES 141 or 3 credits of non-United States history

KINES 448 Coping with Life After Sport (1) Psychosocial concerns affecting student-athletes as they enter the transition period following sport disengagement, focusing on coping interventions.

Effective: Summer 2002

Prerequisite: seventh-semester standing or higher; major or minor in Kinesiology or intercollegiate sport participation

KINES 450 Physiological Limits in Exercise (3) This course examines physiological function during the stress of maximal or prolonged exercise in conjunction with environmental stress.

Effective: Summer 2000

Prerequisite: KINES 350

KINES 452 Applied Cardiovascular Physiology (3) In-depth study of cardiovascular regulation during postural, environmental, and exercise stress.

Effective: Spring 2010

Prerequisite: KINES 350

KINES 454 Women's Health and Exercise Across the Lifespan (3) In-depth study of the physiological role of exercise in modulating the health of girls and women during different phases of the lifespan.

Effective: Summer 2010

Prerequisite: KINES 350

KINES 456 Physical Fitness Appraisal (4) The basic components of physical fitness, how it can be measured, and how it can be developed.

Effective: Summer 1996

Prerequisite: or concurrent: KINES 350 3 credits in statistics

KINES 457 Exercise Prescription and Case Studies (3) Principles of exercise prescription; application of fitness appraisal based on current practices using evaluation and discussion of case studies.

Effective: Spring 2002

Prerequisite: KINES 350, KINES 456

KINES 459 Laboratory Experience in Physical Fitness Assessment (3) A hands-on experience in a fitness assessment laboratory. Prepares students for certification and employment in the fitness industry.

Effective: Spring 2005

Prerequisite: KINES 456

- KINES 460 Movement Disorders (3)** Major peripheral and central movement disorders and methods of their treatment.
Effective: Summer 1999
Prerequisite: KINES 360, KINES 384
- KINES 461W Preparation for Research Project (2)** Planning and preparation for research project.
Effective: Fall 2006
Prerequisite: KINES 180, KINES 260, STAT 200, KINES 321, KINES 345, KINES 350, KINES 360, KINES 384
- KINES 462W Research Project (2)** Completion of research topic.
Effective: Fall 2006
Prerequisite: KINES 461W
- KINES 463 Acquisition of Motor Skills (3)** Examination of principles of motor learning; the application of strategic factors such as: practice types, schedules, augmented information, and motivation.
Effective: Summer 2000
Prerequisite: KINES 360
- KINES 464 Children's Physical Education Curriculum and Practicum (3)** Curriculum for elementary school physical education emphasizing the skill theme approach.
Effective: Fall 2006
Prerequisite: KINES 362, KINES 364, KINES 366
- KINES 465 Neurobiology of Sensorimotor Stroke Rehabilitation (3)** This course is designed to expose students to the recent topics in motor stroke rehabilitation research through literature.
Effective: Spring 2011
Prerequisite: KINES 360, KINES 384
- KINES 466 Assessment and Evaluation in Physical Education and Health Education (2)** Explores measurement as an important and distinct component in a variety of physical education and health education contexts.
Effective: Spring 2006
Prerequisite: KINES 362, KINES 364, KINES 366
- KINES 468 Health Instruction in the School--Content and Method (3)** Methods, materials, and units of instruction.
Effective: Fall 2006
Prerequisite: KINES 362, KINES 364 and KINES 366
- KINES 469W Curriculum Development in Health and Physical Education (3)** The content and process of K-12 school health and physical education curriculum development for public school students.
Effective: Fall 2006
Prerequisite: KINES 362, KINES 364, KINES 366
- KINES 481W Scientific Basis of Exercise for Older Adults (3)** Study of age-associated physical changes and the effects of exercise on the aging process.
Effective: Spring 2001
Prerequisite: KINES 350
- KINES 483 Motor Patterns of Children (3)** Development of motor patterns. Fundamentals of movement, basic motor skills, and adaptation of the body to external forces.
Effective: Summer 1996
Prerequisite: KINES 202
- KINES 484 Advanced Biomechanics (3)** The use of advanced biomechanics to provide an in-depth understanding of the principles which underpin human movement.
Effective: Spring 1999
Prerequisite: KINES 384
- KINES 485 Science of Training Athletes (3)** Application of scientific data knowledge to analyze sport training.
Effective: Fall 1996
Prerequisite: KINES 350, KINES 384
- KINES 486 Legal Issues in Sport (3)** Contemporary legal issues in sport and their implications for sport managers.
Effective: Summer 1996
Prerequisite: seventh-semester standing
- KINES 488 Mechanics of Locomotion (3)** This course examines the forces and motions characteristic of locomotion, with emphasis on walking, the most common human activity.
Effective: Summer 2002
Prerequisite: KINES 384 or previous coursework in biomechanics (or mechanics) and musculoskeletal anatomy
- KINES 492W Programming for Business and Agencies (3)** Fundamentals of program development applied to corporate and private physical fitness businesses.
Effective: Fall 2006
Prerequisite: KINES 395B
- KINES 493 Principles and Ethics of Coaching (3)** Integration of the practical and theoretical knowledge necessary for effective coaching through classroom and field experiences.
Effective: Fall 2006
Prerequisite: KINES 180 or KINES 366
- KINES 494H Senior Honors Thesis (1-6)** Independent study directed by a faculty supervisor that culminates in the production of a thesis.

Effective: Summer 2008

Prerequisite: Approval of honors thesis advisor

KINES 495A Practicum in Student Teaching (12) Supervised teaching of health and physical education in K-12 public schools with seminars focused on transition from student to professional.

Effective: Fall 2006

Prerequisite: A grade of C or higher in all required courses in the Teacher Preparation Option

KINES 495B Field and/or Research Practicum in Kinesiology (6) Participation under supervision in a field or research practicum.

Effective: Fall 2006

Prerequisite: KINES 395B seventh-semester standing 9 credits of 400-level KINES courses 2.00 cumulative GPA

KINES 495C Exercise Science Practicum (3 per semester/maximum of 6) Participation under supervision in a health and fitness setting.

Effective: Fall 2006

Prerequisite: KINES 141, KINES 180, KINES 200, KINES 202 and fifth semester standing

KINES 495D Expanded Field and/or Research Practicum in Kinesiology (1-6) Additional participation under supervision in a field or research practicum.

Effective: Spring 2006

Concurrent: KINES 495B

KINES 495F Field Practicum in Athletic Training (3) Participation under supervision in a field practicum.

Effective: Summer 1996

Prerequisite: KINES 395I

KINES 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 1996

KINES 496A Independent Study Athletic Training (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 2011 Ending: Summer 2011

KINES 496A Independent Study Athletic Training (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 496B Independent Study Biomechanics (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 2011 Ending: Summer 2011

KINES 496B Independent Study Biomechanics (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 496C Independent Study Exercise Physiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 2011 Ending: Summer 2011

KINES 496C Independent Study Exercise Physiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 496D Independent Study History and Philosophy (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 2011 Ending: Summer 2011

KINES 496D Independent Study History and Philosophy of Sport (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 496E Independent Study Motor Control (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 2011 Ending: Summer 2011

KINES 496E Independent Study Motor Control (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 496F Independent Study Psychology of Movement (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 496F Independent Study Psychology of Movement and Sport (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 496G Independent Study Teaching/Coaching (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 496G Independent Study Teaching and Coaching (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 496K Independent Study Applied Kinesiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 496K Independent Study Applied Kinesiology (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

KINES 497A Cadaver Anatomy: A Musculoskeletal Dissection (3) Provide students with the basic concepts and applications of human cadaver dissection.
Effective: Summer 2011 Ending: Summer 2011
Prerequisite: KINES 202 or equivalent

KINES 497A Genetics and Human Performance (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 497B Environmental Physiology (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: KINES 350

KINES 497B Exercise as Medicine (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012
Prerequisite: KINES 350

KINES 497C Physical Activity in Diverse Populations (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 497C Special Topics in Kinesiology (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012
Prerequisite: KINES 180 or permission of program

KINES 497D Ergogenic Aids (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: KINES 345 and KINES 350, BIOL 141, CHEM 110 and CHEM 111

KINES 497E Musculoskeletal Sysfunction for Allied Health and Fitness Professionals (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: KINES 202

KINES 497F Physical Activity and Public Health (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: KINES 321

KINES 497F Physical Activity and Public Health (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012
Prerequisite: KINES 321

KINES 497G Reel Sports: Physical Culture, Cultural Studies (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 497G Reel Sports: Physical Culture, Cultural Studies (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

KINES 497K Marathon (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1996

KINES 498A EMS Assistant Instructor (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 498B EMS Teaching Practicum (1-2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 498C Introduction to Ambulance Operations (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 498D EVOC (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 498E EMS Field Practicum (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 498F ALS Assistant Technology (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2011

KINES 509 (PHSIO 509) Inflammatory Responses to Injury and Environmental Stress (3) An examination of mechanisms involved in the inflammatory response and their relationship to general health, injury, and environmental adaptation.
Effective: Summer 1996
Prerequisite: B M B 221, BIOL 472, BIOL 473

KINES 530 Experimental Design and Methodology in Kinesiology (3) Research techniques, including methods, research design, techniques for data collection, as applied to relevant problems in Kinesiology.
Effective: Spring 1999
Prerequisite: 3-credit 400-level statistics course

KINES 531 Issues in Athletic Training (3) Analysis of professional/academic issues related to athletic training; includes medical considerations, legal and professional developments, and current research.
Effective: Spring 2000

KINES 532 Pathoetiology of Musculoskeletal Injuries (3) In-depth study of physiological, mechanical, and neuromuscular mechanisms of common musculoskeletal injuries with applications for injury prevention, evaluation, and treatment.
Effective: Summer 2000
Prerequisite: KINES 202

KINES 562 Motor Control: A Behavioral Approach (3) An analysis of the theoretical and empirical basis for the

psychological mechanisms underlying movement control.

Effective: Fall 1996

Prerequisite: KINES 463

KINES 563 Motor Learning (3) Analysis of research evidence related to motor skills; characteristics of beginning and advanced performers; relevant learning principles.

Effective: Fall 1996

KINES 564 Multidisciplinary Approaches in Motor Control (3) The course introduces major theoretical advances to questions of motor control, both by a general overview and a paper-based discussion.

Effective: Spring 2002

KINES 565 Neurophysiological Basis of Movement (3) The basic understanding of neurophysiological structures and mechanisms involved in the generation of human voluntary movement.

Effective: Spring 1997

KINES 566 Psychophysiology of Movement (3) Basic concepts and principles of psychophysiology and their application for analyses of human movements.

Effective: Summer 1997

KINES 567 (PHSIO 567) Advanced Exercise Physiology (3) Physiological changes during exercise with emphasis on the effects of physical conditioning and training.

Effective: Fall 1996

Prerequisite: BIOL 472, KINES 480

KINES 574 Modeling in Biomechanics (3) Examination of the philosophies and tools used in biomechanical modeling and the insights into the musculo-skeletal system these provide.

Effective: Spring 2000

Prerequisite: KINES 484

KINES 575 Experimental Methods in Biomechanics and Motor Control (3) Introduces the theory and practice behind the primary experimental methods used in biomechanics and motor control.

Effective: Summer 2005

Prerequisite: 3-credit 400-level biomechanics or motor control class

KINES 577 (PHSIO 577) Cardiovascular Physiology (3) In-depth study of the heart and circulatory system with emphasis on the effects of exercise on cardiovascular function.

Effective: Fall 1997

Prerequisite: KINES 484

KINES 578 (PHSIO 578) Physiology and Mechanical Behavior of Skeletal Tissues (3) In-depth examination of the structure, composition, and material behavior of the basic skeletal tissues, including bone, cartilage, tendon, and ligament.

Effective: Spring 1999

Prerequisite: BIOL 421, BIOL 472

KINES 579 Advanced Biomechanics of Human Motion (3) Biomechanical foundation of human movement and injury prevention.

Effective: Summer 1997

Prerequisite: KINES 484; MATH 141 or MATH 220

KINES 588 Scientific Writing in Kinesiology (3) Instruct students in writing grant proposals, abstracts, manuscripts, and effective presentations in their respective scientific fields of study in Kinesiology.

Effective: Spring 2005

KINES 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students or outside speakers.

Effective: Fall 1996

KINES 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2008

KINES 594F Research Readings in Psychology of Movement & Sport (1) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 594F Research Readings in Psychology of Movement and Sport (1) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

KINES 596 Individual Studies (1-9) Creative projects, nonthesis research, which are supervised on an individual basis and

which fall outside the scope of formal courses.
Effective: Fall 1996

KINES 596A Independent Study in Athletic Training (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 596A Independent Study Athletic Training (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 596A Independent Study in Athletic Training (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

KINES 596B Independent Study in Biomechanics (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 596B Independent Study Biomechanics (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 596B Independent Study in Biomechanics (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

KINES 596C Independent Study in Exercise Physiology (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 596C Independent Study Exercise Physiology (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 596C Independent Study in Exercise Physiology (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

KINES 596D Independent Study in History and Philosophy of Sport (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 596D Independent Study History and Philosophy of Sport (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 596D Independent Study in History and Philosophy of Sport (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

KINES 596E Independent Study in Motor Control (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 2011 Ending: Summer 2011

KINES 596E Independent Study Motor Control (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 596E Independent Study in Motor Control (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

KINES 596F Independent Study in Psychology of Movement and Sport (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2011 Ending: Summer 2011

KINES 596F Independent Study Psychology of Movement and Sport (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 596F Independent Study in Psychology of Movement & Sport (1-18) Creative projects, nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

KINES 597 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1996

KINES 597A NoII Colloquium (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 597A NoII Seminar (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

KINES 597D Gender, Sexuality & Sporting Bodies (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

KINES 597K Human Intellect and Movement (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

KINES 600 Thesis Research (1-15) No description.
Effective: Fall 1996

KINES 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1996

KINES 602 Supervised Experience in College Teaching (1-2 per semester, maximum of 6) Preparation and presentation of materials in lecture and laboratory classes under the supervision of a full time faculty member.
Effective: Fall 1996
Prerequisite: appointment as a Graduate Teaching Assistant in Health and Physical Education

KINES 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1996

KINES 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1996

Last Import from UCM: June 16, 2011 3:00 AM

Korean (KOR)

KOR 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

KOR 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2010

KOR 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2010

KOR 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2010

KOR 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2010

Last Import from UCM: June 16, 2011 3:00 AM

Labor Studies and Employment Relations (LER)

LER 400 (IL) Comparative Employment Relations Systems (3) Analysis of structure and elements of employment relations systems in developed and developing areas.

Effective: Spring 2008

Prerequisite: 3 credits in Labor and Employment Relations

LER 401 The Law of Labor-Management Relations (3) Development of Anglo-American law regulating collective bargaining, with emphasis on American labor-management relations under Wagner, Taft-Hartley, and other acts.

Effective: Spring 2008

Prerequisite: 3 credits in Labor and Employment Relations or Political Science

LER 414W Labor and Employment Relations Theory (3) Content and implications of major and minor theories of Labor and Employment Relations.

Effective: Spring 2008

Prerequisite: 6 credits in Labor and Employment Relations

LER 424 Employment Compensation (3) Development and management of employee compensation systems.

Effective: Spring 2008

Prerequisite: LER 201 and sixth-semester standing

LER 425 Employee Benefits (3) The examination of employee benefits programs used by employers to meet the welfare needs of employees and their families.

Effective: Spring 2008

Prerequisite: LER 201 and 6th semester standing

LER 426 Staffing and Training Strategies in Organizations (3) This course focuses on the theory and practice of human resource staffing and training in organizations.

Effective: Spring 2011

Prerequisite: 3 credits in Labor and Employment Relations (LER) or Human Resources and Employment Relations (HRER)

LER 434 Collective Bargaining and Contract Administration (3) Theory, practice, and economic impact of collective bargaining, including administration of the collective bargaining agreement.

Effective: Spring 2008

Prerequisite: LER 100

LER 435 Labor Relations in the Public Sector (3) Analysis of labor relations problems within different areas of public employment.

Effective: Spring 2008

Prerequisite: 3 credits in Labor and Employment Relations

LER 437 Workplace Dispute Resolution (3) Dispute resolution practices and procedures used in the workplace and employment law settings.

Effective: Spring 2008

Prerequisite: LER 100

LER 437W Work Dispute Resolution (3) Dispute resolution practices and procedures used in the workplace and employment law settings.

Effective: Spring 2008

Prerequisite: LER 100

LER 444 Occupational Health: Policy and Practice (3) The role of employees, unions, employers, and government in dealing with work-related health issues.

Effective: Spring 2008

Prerequisite: LER 100 or sixth-semester standing

LER 445Y (US) (PL SC 445Y, AAA S 445Y) Politics of Affirmative Action (3) Examines history, politics, and economics of the use of special programs to advance racial interests in the U.S.

Effective: Spring 2008

Prerequisite: AAA S 100 level course and PL SC 001 or PL SC 007

LER 458Y (US) (HIST 458Y) History of Work in America (3) A study of selected problems in the history of work in the United States, especially since 1877.

Effective: Spring 2008

Prerequisite: HIST 021, HIST 156 or LER 100

LER 460 Human Resources Ethics (3) Ethics of human resources management.

Effective: Spring 2011

Prerequisite: Take one of the following courses: ARMY 402, H P A 460, HRIM 466, MGMT 341, MGMT 441, NAVSC 402, NURS 432, PSYCH 281 3 credits in Labor and Employment Relations (LER) or Human Resources and Employment Relations (HRER)

LER 464 Communication Skills for Leaders in Groups and Organizations (3) Theory- and research-based communication skills for leaders dealing with work-related problems in contemporary groups and organizations.

Effective: Spring 2008

LER 465 **Collective Decision Making** (3) Application of theories of decision making to work-related issues in groups and organizations requiring collective resolution and action.
Effective: Spring 2008

LER 470 **Employee Involvement** (3) Historical, theoretical, legal, and industrial relations aspects of employee involvement in the United States and other countries.
Effective: Spring 2008
Prerequisite: LER 100

LER 472 (WMNST 472) **Work-Life Practices and Policies** (3) Explore the causes and consequences of conflicts between work, family, and other life commitments, and how these may be resolved.
Effective: Spring 2008
Prerequisite: 3 credits of LER

LER 475H (GEOG 475H) **Labor in the Global Economy: U.S. and South African Perspectives** (3) This course focuses on how the nature of work is changing in the global economy, and the implications for economic opportunity and inequality in both .
Effective: Spring 2008
Prerequisite: A minimum of 12 GEOG or LER credits before taking the course (or the permission of the program).

LER 480 **Current Issues in Human Resources** (3) Examines current issues in the field of human resource management, including innovative work schedules, telecommuting, non-traditional office environments, etc.
Effective: Spring 2008
Prerequisite: 3 credits of LER

LER 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

LER 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 2008

LER 495 **Labor Studies Internship** (1-12) Supervised practicum in labor relations setting with union, management, or government agency.
Effective: Spring 2008
Prerequisite: prior approval by department

LER 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2008

LER 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2008

LER 497A **Collective Bargaining in Pro Sports** (3) This course examines collective bargaining in the four major pro sports in North America--NFL, NBA, MLB, and NHL.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

LER 497B **Seminar in American Unions** (3) This course will examine the current state of American unions.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

LER 499 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2008

Last Import from UCM: June 16, 2011 3:00 AM

Landscape Architecture (LARCH)

LARCH 400 Introduction to Design and Theory (IUG) (5) Introductory landscape architectural design and applied theory for IUG students.

Effective: Summer 1998

Prerequisite: admission to the IUG program Concurrent: LARCH 400A

LARCH 400A Introduction to Design Theory Seminar (IUG) (1) Introductory landscape architectural design theory seminar for IUG students.

Effective: Spring 2001

Prerequisite: admission to the IUG program Concurrent: LARCH 400

LARCH 414 Design and Theory V: Advanced Landscape Architectural Design (5 per semester/maximum of 15) Review of landscape architectural theories and issues; supports development of comprehensive design study and/or independent honors (Thesis-Based) design projects. LARCH Majors only.

Effective: Spring 2007

Prerequisite: LARCH 312, LARCH 322

LARCH 424 Design Theory Seminar (1-3 per semester/maximum of 3) Inquiry-based reading and discussion of design theory literature relevant to the focus and content of the associated design studio course, LARCH 414.

Effective: Spring 2007 Ending: Fall 2011

Prerequisite: LARCH 312, LARCH 322

LARCH 424 Design Theory Seminar (3 per semester/maximum of 9) Inquiry-based reading and discussion of design theory literature relevant to contemporary landscape architecture issues. Topics vary each semester.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: LARCH 312, LARCH 322

LARCH 431 Landscape Architectural Design Implementation III (3) Introduces the principles and techniques of stormwater management and drainage design, including instruction in proper construction documentation, calculations and estimations. For Landscape Architecture majors only.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: LARCH 332, LARCH 312

LARCH 450 Interactive Digital Design: Information Technology for Designers (3) A student centered paperless interactive digital design studio.

Effective: Spring 2007

LARCH 495 Internship (1-13) Supervised off-campus, non-group instruction including individual field experiences, practicums or internships. Written and oral critique of activity required.

Effective: Fall 1981

Prerequisite: prior approval of proposed assignment by instructor

LARCH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

LARCH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

LARCH 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

LARCH 499A (IL) Design Theory Seminar (1) Inquiry-based reading and discussion of design theory literature relevant to the focus and content of the associated design studio course, LARCH 499B. LARCH majors only.

Effective: Spring 2007

Prerequisite: LARCH 361W Concurrent: LARCH 499B LARCH 499C LARCH 499D

LARCH 499B (IL) Design and Theory VI: Contemporary/International Landscape Architectural Design Issues (4) Study of and design for sites, programs, and social groups associated with ongoing contemporary landscape architectural concerns. LARCH majors only.

Effective: Spring 2007 Ending: Fall 2011

Prerequisite: LARCH 361W Concurrent: LARCH 499A LARCH 499C LARCH 499D

LARCH 499B (IL) Design and Theory VI: Contemporary/International Landscape Architectural Design Issues (5) Study of and design for sites, programs, and social groups associated with ongoing contemporary landscape architectural concerns. LARCH majors only.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: LARCH 312, LARCH 361W Concurrent: LARCH 499A LARCH 499C LARCH 499D

LARCH 499D (IL) Contemporary/International Special Topics (4) Special topics related to, and study in conjunction with, LARCH 499A, 499B, and 499C. Landscape Architecture majors only.

Effective: Spring 2007 Ending: Fall 2011

Prerequisite: LARCH 361W Concurrent: LARCH 499A LARCH 499B LARCH 499C

LARCH 499D (IL) **Contemporary/International Special Topics** (3) Special topics related to, and study in conjunction with 499B. Landscape Architecture majors only.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: LARCH 361W Concurrent: LARCH 499B

LARCH 499E (IL) **Seminar: People and Protected Areas** (3) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2011 Ending: Summer 2011

LARCH 499F (IL) **Studio: Community Design in the Vicinity of Udzungwa Mountains National Park** (5) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2011 Ending: Summer 2011

LARCH 499G (IL) **Colloquium: The Contribution of Service-Learning to Students and Community** (1) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2011 Ending: Summer 2011

LARCH 500 **Environmental and Ecological Conditions in Regional Landscape** (1) Landscape architectural field trips within the Centre Region.

Effective: Summer 1996

Prerequisite: graduate standing in the department of landscape architecture

LARCH 501 **Research and Writing in Landscape Architecture** (3) Landscape architectural research methods and writing techniques.

Effective: Fall 2009

LARCH 502 **Intellectual History and Theory of Landscape Architecture** (3) Introductory theory seminar covering the intellectual history of landscape architecture and theoretical contributions from related disciplines.

Effective: Spring 2009

LARCH 510 **Graduate Seminar in Landscape Architecture** (1 per semester, maximum of 6) Landscape architectural theory exploration through readings and discussions.

Effective: Summer 1996 Ending: Summer 2011

Prerequisite: graduate standing in the department of landscape architecture

LARCH 510 **Graduate Seminar in Landscape Architecture** (3) Landscape architectural theory exploration through readings and discussions.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: graduate standing in the department of landscape architecture

LARCH 515 **Design and Theory I: Introduction** (5) Introductory landscape architectural design and applied theory for MLA students.

Effective: Summer 2011

LARCH 520 **Graduate Studio I** (4) Landscape architectural research and design inquiry.

Effective: Spring 1997 Ending: Fall 2011

Prerequisite: admission to program

LARCH 520 **Design and Theory II: Introduction to Issues of Place** (5) Studio design with a focus in addressing issues of nature and culture.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: LARCH 515

LARCH 530 **Graduate Studio II** (4) Landscape architectural research or research and design inquiry.

Effective: Summer 1996 Ending: Fall 2011

Prerequisite: LARCH 520

LARCH 530 **Design and Theory III: Landscape Systems** (5) An introduction to regional planning, management, and design.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: LARCH 520

LARCH 531 **Option Studio I** (4) Studio inquiry in community and urban design.

Effective: Spring 2006

Prerequisite: LARCH 520

LARCH 532 **OPTION INQUIRY I** (1) Independent study in community and/or urban design, the first in a series of three independent inquiry courses in the CUD Option.

Effective: Spring 2006

Prerequisite: LARCH 520

LARCH 540 **Graduate Studio III** (4) Landscape architectural research or research and design inquiry.

Effective: Summer 1996 Ending: Fall 2011
Prerequisite: LARCH 530

LARCH 540 Design and Theory IV: Site and Community Design (5) Large site and Community Design.
Effective: Spring 2012 Future: Spring 2012
Prerequisite: LARCH 530

LARCH 541 OPTION STUDIO II (4) Continued studio inquiry in community and urban design.
Effective: Spring 2006
Prerequisite: LARCH 531 and LARCH 532

LARCH 542 Option Inquiry II (1) Independent study in community and/or urban design, the second in a series of three independent inquiry courses in the Option.
Effective: Spring 2006
Prerequisite: LARCH 531 and LARCH 532

LARCH 550 Graduate Studio IV (7) Landscape architectural research or research and design inquiry.
Effective: Summer 1996
Prerequisite: LARCH 540

LARCH 552 Option Inquiry III (5) Capstone independent study in community and/or urban design, the last in a series of three inquiry courses in the CUD Option.
Effective: Spring 2006
Prerequisite: LARCH 541 and LARCH 542

LARCH 560 Landscape Architecture Inquiry (1-9) Research, planning, and/or design inquiry into landscape architectural issues.
Effective: Summer 1996
Prerequisite: graduate standing in landscape architecture and approval of a member of the landscape architecture graduate faculty

LARCH 590 Colloquium (1-3 per semester/maximum of 6) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1988

LARCH 596 Independent Studies (1-9) Independent study opportunities open for graduate students covering topics which fall outside the scope of formal courses (non thesis).
Effective: Spring 2009

LARCH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

LARCH 599 Foreign Studies (1-2 per semester/maximum of 4) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2006

LARCH 600 Thesis Research (On Campus) (1-15) No description.
Effective: Spring 1988

LARCH 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Opportunity for students to obtain supervised and graded teaching experience.
Effective: Spring 1988

LARCH 610 Thesis Research (Off Campus) (1-15) No description.
Effective: Spring 1988

1 Students may take only one course for General Education credit from LARCH 003 GA or 060 GA.

Last Import from UCM: June 16, 2011 3:00 AM

Language and Literacy Education (LL ED)

LL ED 400 Teaching Reading in the Elementary School (3) Introduction to the reading program; acquaintance with materials and techniques; observations of reading instruction; correlation with human growth and development.

Effective: Spring 2007

Prerequisite: C I 295 for EK ED majors;EDPSY 014, PSYCH 212;EDTHP 115 or EDTHP selection Concurrent: LL ED 402 for EK ED majors LL ED 401

LL ED 401 Teaching Language arts in Elementary School (3) Principles, problems, materials, and techniques involved in teaching speaking, listening, writing, and reading in the elementary school.

Effective: Spring 2007

Prerequisite: C I 295 for EK ED majors;EDPSY 014, PSYCH 212;EDTHP 115 or EDTHP selection Concurrent: LL ED 400 LL ED 402 for EK ED majors

LL ED 402 Teaching Children's Literature (3) Survey of children's literature with an emphasis on the importance of literature in the development of the elementary school curriculum.

Effective: Spring 2007

Prerequisite: C I 295 for EK ED majors;EDPSY 014, PSYCH 212;EDTHP 115 or EDTHP selection. Concurrent: LL ED 400 LL ED 401 for EK ED majors.

LL ED 411 Teaching Language Arts in Secondary Schools I (3) Exploration of language, literacy, and culture and development of curricular designs for teaching language arts in secondary schools.

Effective: Spring 1994

Prerequisite: ENGL 200 or 200-level literature course ENGL 444 Concurrent: LL ED 420

LL ED 412W Teaching Language Arts in Secondary Schools II (3) Exploration of language, literacy, and culture and development of curricular designs for teaching language arts in secondary schools.

Effective: Summer 2010

Prerequisite: LL ED 411 Concurrent: C I 412W

LL ED 420 Adolescent Literature and Literacy (3) Exploration of adolescent literacy and curricular designs for using the diversity of cultural voices in adolescent literature in secondary schools.

Effective: Spring 1992

Concurrent: LL ED 411

LL ED 445 Teaching English in Bilingual/Dialectal Education (3) Theories, techniques, materials for teaching English speaking, reading, and writing to bilingual and nonnative speakers in elementary and secondary schools.

Effective: Summer 2011

LL ED 450 Content Area Reading (3) Study of reading skills and materials for specific content areas; diagnostic and instructional procedures for classroom teachers.

Effective: Spring 2007

Prerequisite: EDPSY 014 or PSYCH 212 or teaching experience

LL ED 462 The Art of the Picturebook 3 An in-depth study of picturebooks as art objects providing aesthetic experiences and contributing to our aesthetic development in literacy education.

Effective: Summer 2009

Prerequisite: ENGL 015 and 5th semester standing or higher

LL ED 465 Fantasy Literature for Children (3) A study of fantasy literature for children looking at a variety of fantasy stories and examining them from different perspectives.

Effective: Summer 2010

Prerequisite: ENGL 015 and 5th semester standing or higher

LL ED 480 Media Literacy in the Classroom (3) Exploration of media languages and literacy in classrooms, learning in an electronic age; issues, ideas, and teaching strategies.

Effective: Spring 2005

Concurrent: LL ED 411 LL ED 420

LL ED 495 School Practicum in Reading (1-18) Supervised practicum providing field experiences at any grade level, with opportunities to assume various teaching roles.

Effective: Spring 1992

Prerequisite: LL ED 400

LL ED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1992

LL ED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 1992

LL ED 497A Art and Literacy Block (15) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 2011 Ending: Summer 2011

LL ED 497A Elementary Education Literacy Block (15) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

LL ED 497A Elementary Education Literacy Block (15) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

LL ED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

LL ED 498A AP English Literature (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

LL ED 498B AP Spanish (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

LL ED 498C Summer Invitational Writing Institute (3-6) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

LL ED 500 The Reading and Writing Classroom (3) Analysis of reading and writing processes and the development of integrated language arts programs for elementary schools.
Effective: Summer 1993
Prerequisite: LL ED 400

LL ED 501 Teaching Writing in Elementary and Secondary Schools (3) In depth examination of writing development and the development of writing components of language arts programs K-12.
Effective: Summer 1993
Prerequisite: LL ED 500 or LL ED 512

LL ED 502 Studies in Literature for Children (3) Study of various genres of children's literature from various critical perspectives; emphasis on role of literature in children's lives.
Effective: Summer 1992
Prerequisite: LL ED 402

LL ED 503 (ENGL 503) Research Methods in Composition (3) Introduction to the issues and methods of empirical research in composition.
Effective: Fall 1993

LL ED 512 Teaching Language, Literacy, and Literature in Secondary Schools (3) Collaborative inquiry into the curricular design and experience of language, literacy, media, and literature in adolescents' personal and social lives.
Effective: Summer 2010
Prerequisite: LL ED 412W

LL ED 520 Literature for Adolescents (3) Critical study of adolescent literature, its diversity of cultural voices, and designs for its use in secondary school classrooms.
Effective: Summer 1992
Prerequisite: LL ED 420

LL ED 526 (EDPSY 526) The Psychology of Reading (3) Psychological principles underlying the process of reading and comprehending, with application to instruction.
Effective: Spring 1993
Prerequisite: EDPSY 421

LL ED 541 Adolescent and Children's Literature Related to Ethnic and Social Issues (3) Literature, K-12; study of literary symbolism, ethnic literature, issues, e.g., sex, death, adoption, divorce in trade books.
Effective: Summer 1993
Prerequisite: LL ED 402

LL ED 542 (CI ED 542) Issues in Literacy Education (3 per semester/maximum of 6) Discussion of philosophical, sociological, historical, and curricular issues in literacy education.
Effective: Fall 1997

LL ED 544 Cross-Cultural Research in Bilingual Education (3) Analysis of cross-cultural research methodology in bilingual education.
Effective: Spring 1993

Prerequisite: 12 credits in education and/or psychology; 3 credits in statistics

LL ED 545 **LITERACY AND LANGUAGE ASSESSMENT FOR INSTRUCTIONAL DECISIONS** (3) Diagnosis of reading difficulties; genesis of reading problems; achievement, diagnostic, and capacity tests; application in simulation activities.
Effective: Summer 1993

Prerequisite: EDPSY 450, LL ED 500

LL ED 550 **Theory and Practicum in Assessment and Remediation of Reading Difficulties** (3) Links theory and practice in supervised practicum involving design and analysis of appropriate assessment and instructional procedures for elementary and secondary students.

Effective: Fall 1993

Prerequisite: LL ED 500, LL ED 545

LL ED 560 (ADTED 560) **Teaching Reading to College Students and Adults** (3) Reading literacy for adults, including college reading, Adult Basic Education (ABE), and General Educational Development (GED) programs.

Effective: Spring 1993

Prerequisite: LL ED 500 or teaching experience

LL ED 563 **Myths and Folktales in Children's Literature** (3) An in-depth study of myths and folktales shared with children and how these stories are remade and disseminated today.

Effective: Spring 2010

Prerequisite: LL ED 402

LL ED 565 **Analysis of Theory and Practice in Bilingual Education Program** (3) Classroom analysis, observation, and research of instructional procedures, materials, and evaluation strategies used in bilingual education.

Effective: Summer 2011

Prerequisite: 12 credits in education and psychology

LL ED 566 **Bilingual Education and the Hispanic Child** (3) Analysis of the research and literature related to teaching bilingual Hispanic students; examines problems, issues, and strategies.

Effective: Spring 1993

Prerequisite: 12 credits in education and/or psychology

LL ED 567 **Politics of Bilingual Education** (3) To critically analyze the contemporary and historical political context of an education that is bilingual and bicultural.

Effective: Spring 2000

LL ED 568 **Doing Research in Children's Literature** (3) An examination of research traditions used to frame research in children's literature studies and preparation to write the master's paper.

Effective: Summer 2010

Prerequisite: LL ED 402

LL ED 577 (C I 577) **Multicultural Issues in Literacy Education** (3) Explores research questions, and theoretical frameworks, and analyzes multicultural issues in popular media in the context of American schools.

Effective: Spring 1997

Prerequisite: LL ED 542

LL ED 580 (C I 580) **Media Literacy, Language, and Literacy in Schools** (3) Theories of media literacy, issues of non-print technology in language and literacy.

Effective: Spring 1997

Prerequisite: LL ED 480

LL ED 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Fall 1996

LL ED 594 **Research in Language and Literacy Education** (3) Cooperative design and study of research in language and literacy education.

Effective: Spring 1993

Prerequisite: C I 400 or EDPSY 400

LL ED 595A **Practicum: Remedial Procedures and Diagnosis** (3-6) Advanced practicum; diagnostic testing and remedial instruction of more severe types of reading disability; supervisory experiences, if appropriate.

Effective: Summer 1993

Prerequisite: LL ED 545

LL ED 595B **Advanced Practicum in Bilingual Education** (1-6) Advanced internship in curriculum, supervision, and instruction in a bilingual education setting.

Effective: Spring 1993

Prerequisite: 12 credits in education and/or psychology; 12 credits in bilingual education

LL ED 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1993

LL ED 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1993

LL ED 597A **Projects & Readings in LL ED (1-3)** Projects and readings in teacher education in secondary language and literacy education, with a focus on adolescent literature and literacy.
Effective: Summer 2011 Ending: Summer 2011

LL ED 597D **Differentiated Instruction with Digital Learning Tools (3)** Project based course to design curriculum using multimedia and communication technologies to differentiate and engage diverse learning needs and interests.
Effective: Summer 2011 Ending: Summer 2011

LL ED 597E **Cultural Pluralism in Children's & Adolescent Literature (3)** A critical exploration of literature that addresses multicultural issues; emphasis on cultural diversity in children's lives.
Effective: Summer 2011 Ending: Summer 2011

LL ED 597E **Cultural Pluralism in Children's & Adolescent Literature (3)** A critical exploration of literature that addresses multicultural issues; emphasis on cultural diversity in children's lives.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

LL ED 597E **Cultural Pluralism in Children's & Adolescent Literature (3)** A critical exploration of literature that addresses multicultural issues; emphasis on cultural diversity in children's lives.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

LL ED 597G **Writing for Children (3)** Supervised workshop in the craft and techniques of creating picture books, short stories, longer fiction and nonfiction literature for children.
Effective: Summer 2011 Ending: Summer 2011

LL ED 597G **Writing for Children (3)** Supervised workshop in the craft and techniques of creating picture books, short stories, longer fiction and nonfiction literature for children.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

LL ED 597G **Writing for Children (3)** Supervised workshop in the craft and techniques of creating picture books, short stories, longer fiction and nonfiction literature for children.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

LL ED 597I **Theories of Childhood (3)** The study of childhood from cultural, historical, psychological and philosophical perspectives.
Effective: Summer 2011 Ending: Summer 2011

Last Import from UCM: June 16, 2011 3:00 AM

Languages (LANG)

LANG 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2007

LANG 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2007

LANG 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

LANG 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2007

Last Import from UCM: June 16, 2011 3:00 AM

Latin (LATIN)

Knowledge of Greek or Latin not required. See also CLASSICS AND ANCIENT MEDITERRANEAN STUDIES and GREEK.

LATIN 402 Republican Literature (3-12) Selected works by Plautus, Lucretius, Catullus, Cicero (content varies).

Effective: Summer 1995

Prerequisite: LATIN 003

LATIN 403 Augustan Age Literature (3-12) Selected works by Virgil, Horace, Propertius, Tibullus, Ovid, Livy (content varies).

Effective: Summer 1995

Prerequisite: LATIN 003

LATIN 404 Silver Age Literature (3-12) Selected works by Petronius, Seneca, Tacitus, Juvenal, Martial, Pliny the Younger (content varies).

Effective: Summer 1995

Prerequisite: LATIN 003

LATIN 420 Medieval Latin Literature (3-6) Survey of Medieval Latin literature.

Effective: Spring 1995

Prerequisite: LATIN 003

LATIN 450W History of Latin (3) History of the Latin language and its speakers, from their origins to the 2nd century C.E.

Effective: Summer 1994

Prerequisite: LING 102;LATIN 401, LATIN 402 orLATIN 403

LATIN 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

LATIN 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

LATIN 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

LATIN 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

LATIN 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

LATIN 510 Latin Seminar (3-6) No description.

Effective: Winter 1978

LATIN 518 Latin Research (1-6) Prosecution of an assigned problem under the guidance of a member of the department.

Effective: Winter 1978

LATIN 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2000

LATIN 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.

Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

Latin American Studies (LATAM)

No courses for department code **LATAM** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Latina and Latino Studies (LTNST)

LTNST 403 (US) (CMLIT 403) **Latina/o Literature and Culture** (3) Literary and other forms of cultural expression (film, music, art, and theater) are compared across different Latina/o communities.

Effective: Spring 2011

Prerequisite: 3 credits in the humanities or in any LTNST course or 4th-semester proficiency in Spanish

LTNST 426 (US) (ENGL 426) **Chicana and Chicano Cultural Production: Literature, Film, Music** (3) An in-depth study of Chicana/Chicano literature, film, and music from the inception of the Chicano Movement (1965-1975) to the present.

Effective: Spring 2007

Prerequisite: 3 credits in English

LTNST 467 (US;IL) (HIST 467) **Latin America and the United States** (3) Historical development of policies of the United States with regard to Latin- American affairs from colonial times to the present.

Effective: Fall 2008

LTNST 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Summer 2006

LTNST 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 2006

LTNST 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 2006

Last Import from UCM: June 16, 2011 3:00 AM

Liberal Arts (L A)

L A 401 Professional Development for the Liberal Arts Student (1) Provides Liberal Arts students with the techniques and information necessary to specify and implement postgraduation educational and career plans.
Effective: Fall 1983

L A 494 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis. (No course under L A 294/494 may be offered without approval of the associate dean of liberal arts. All courses must have a specific title and letter suffix.)
Effective: Spring 1994

L A 494H Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis. (No course under L A 294/494 may be offered without approval of the associate dean of liberal arts. All courses must have a specific title and letter suffix.)
Effective: Fall 2007

L A 495 Undergraduate Field Experience or Practicum (1-12) Approved experience, related to student career objectives, in agencies external to University.
Effective: Fall 1981

L A 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

L A 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

L A 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1994

L A 498H Honors Leadership Mentor (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

L A 499 (IL) Foreign Study--Liberal Arts (1-9) Study in selected foreign countries of the cultural, institutional, and/or social development of the host country.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

Library Studies (L ST)

L ST 490 (HIST 490) **Archival Management** (1-3) Introduction to the principles and procedures in the management of archives and historical manuscripts.
Effective: Fall 1978

L ST 495 **Internship** (1-9) Directed internship in library studies, archival administration, rare books curation and/or preservation.
Effective: Summer 1995
Prerequisite: L ST 490 or L ST 496

L ST 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses. Students may not register for these courses without prior written approval of a faculty member in the department in which the courses are listed.
Effective: Fall 1983

L ST 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Linguistics (LING)

LING 402 **Syntax I** (3) Principles of grammatical analysis in the generative framework; an overview of syntactic structures across languages.
Effective: Fall 2001

LING 404 **Phonology I** (3) The analysis of the sound systems of human languages; focus on common phonological processes across languages and on phonetics-phonology interface.
Effective: Fall 2001

LING 429 (PSYCH 426) **Language and Thought** (3) Relations between language and cognition; cognitive implications of normal and impaired language development; cognition and bilingualism.
Effective: Spring 2007
Prerequisite: PSYCH 100, LING 001 or LING 100

LING 446 (PSYCH 427) **L1 Acquisition** (3) How children learn their first language; psycholinguistic aspects of lexical, syntactic, semantic, and phonological development.
Effective: Spring 2010
Prerequisite: LING 100 or PSYCH 002 or permission of program

LING 447 **Bilingualism** (3) Explores the social and psychological aspects of bilingualism; topics include languages in contact, transference, maintenance, and loss.
Effective: Fall 2001

LING 448 **Sociolinguistics** (3) Issues in the study of language in its sociocultural context; analysis of social dialects and speech styles.
Effective: Fall 2001

LING 449 **Semantics I** (3) The study of meaning in human language; methods of analysis; study of sense, reference, compositionality, quantification, presupposition, and sentence-level meaning.
Effective: Fall 2001

LING 493 **Field Methods** (3) Primary linguistic investigation of a language different from English; field work with a native speaker; data gathering; linguistic analysis.
Effective: Fall 2001

LING 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 1994

LING 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

LING 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

LING 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1983

LING 497B **Language Islands and Contact Linguistics** (3) The course explores the phenomenon of language contact, with a particular focus on language "islands," i.e., communities who speak a moribund or endangered language under constant pressure from another dominant language.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

LING 497C **Psychology of Language** (3) Overview of psychological research and theory on language processes, including speech perception, word recognition, meaning representation, comprehension, and language acquisition.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

LING 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be taught in one year or semester.
Effective: Fall 1992

LING 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

LING 500 **Syntax II** (3) Advanced topics in syntactic analysis and theory.
Effective: Spring 2002

LING 502 **Historical Linguistics** (3) Principles of comparative linguistics; language families; reconstruction of lost languages.
Effective: Spring 2002

LING 504 **Phonology II** (3) Advanced topics in phonological analysis and theory.
Effective: Spring 2002

LING 520 (PSY 520) **Seminar in Psycholinguistics** (3 per semester/maximum of 9) Consideration of theoretical and research issues relevant to psychological aspects of language sounds, syntax and semantics, and other cognitive support.
Effective: Spring 2004

LING 521 **Proseminar in the Language Science of Bilingualism** (3) This course provides a cross-disciplinary overview of language science approaches to bilingualism and second language learning.
Effective: Spring 2010

LING 522 **Proseminar in Professional Issues in Language Science** (3) This course addresses issues of professional development in the language sciences with special attention to cross-disciplinary research.
Effective: Spring 2010

LING 525 **Experimental Research Methods in Psycholinguistics** (3) This course provides an overview of experimental research techniques used in language science.
Effective: Spring 2010

LING 529 (PHIL 529) **Philosophy of Language Seminar** (3 per semester/maximum of 6) Examines topics in the philosophy of language including the nature of meaning, and semantic theories, pragmatics, interpretation, and poetic language.
Effective: Spring 2002

LING 545 **Morphology** (3) The study of word-formation in the world's languages; examines interaction of phonological, structural, and semantic aspects of the lexicon.
Effective: Spring 2002

LING 548 **Sociolinguistics** (3) Study of social and linguistic aspects of language change, varieties, policy, social inequality, language communities, language, society, and thought.
Effective: Spring 2002

LING 570 **History of Modern Linguistics** (3) A historical survey of views on language; examination of linguistic thought in various historical periods.
Effective: Spring 2002

LING 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

LING 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

LING 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

LING 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Management (MGMT)

MGMT 400 Organization Development (3) A study of organizational change and methodologies related with change and improvement. Examination of planned change on processes, strategies, people and culture in organizations.

Effective: Spring 2008

Prerequisite: MGMT 301

MGMT 401 Contemporary Issues in Management (3) Advanced treatment of topics of current managerial significance. Issues examined will differ by instructor, section, and semester. Consult departmental office.

Effective: Spring 2008

Prerequisite: MGMT 321, MGMT 331 ; orMGMT 326

MGMT 402 Experiences in Organizational Relations (3) An experiential approach to study of behavior in organizations, applying concepts and theories of management to interpersonal situations.

Effective: Spring 2008

Prerequisite: MGMT 301

MGMT 409 Project Management for Engineers (3) The course provides a real-time experience to students in engineering and engineering technology in project management with a focus on leadership behavior and decision making.

Effective: Spring 2008

Prerequisite: 7th semester standing

MGMT 410 Project Management (3) A problem-based, interdisciplinary course in project management skills and techniques needed to manage projects in a modern business environment.

Effective: Spring 2008

Prerequisite: MGMT 301, SCM 310

MGMT 420 Negotiation and Conflict Management (3) An exploration of the sources of interpersonal conflict and strategies of resolution in the managerial context.

Effective: Fall 2010

Prerequisite: MGMT 301 orB A 304

MGMT 424 Interpersonal Relationships in Organizations (3) Developing individual skills in interpersonal and group settings and experience-based and conceptual training in relating effectively to other people.

Effective: Spring 2008

Prerequisite: MGMT 321 orMGMT 326

MGMT 425 (IST 425, ENGR 425) New Venture Creation (3) Via problem-based learning, teams define new business ventures to meet current market needs, develop business plans, and present to investors.

Effective: Spring 2011

Prerequisite: ECON 102 orECON 104 orECON 014;CAS 100

MGMT 426 (ENGR 426, IST 426) Invention Commercialization (3) Working with Penn State inventions selected by the Intellectual Property Office, student teams define an optimum commercialization path each technology.

Effective: Spring 2011

Prerequisite: ECON 102 orECON 104 orECON 014;CAS 100

MGMT 427 Managing an Entrepreneurial Start-Up Company (3) Exploration of the tensions and experiences of starting and growing a new company.

Effective: Spring 2011

Prerequisite: ECON 102 orECON 104 orECON 014;CAS 100 ; 5th semester standing

MGMT 431 Entrepreneurship and Small Business Management (3) Entrepreneurship, new ventures, and management of small firms.

Effective: Spring 2008

Prerequisite: ACCTG 211, MGMT 301, MKTG 301

MGMT 432 Small Business Field Study (3) Supervised field study with a small firm.

Effective: Spring 2008

Prerequisite: MGMT 431

MGMT 433 Leadership and Team Building (3) Team-based learning approach to developing conceptual knowledge, skills sets, and personal competencies needed for leading and managing organizations.

Effective: Spring 2008

Prerequisite: MGMT 301

MGMT 440 Advanced Human Resource Management (3) In depth study of human resource management and personnel administration functions and processes.

Effective: Spring 2008

Prerequisite: MGMT 341

MGMT 441 Organizational Staffing and Development (3) This course focuses on the skills and methods managers need to manage staffing and development activities in organizations.

Effective: Spring 2011

Prerequisite: MGMT 341

MGMT 443 Performance Management (3) This course focuses on skills and methods managers need to enhance the

contribution of employees to organizational performance and effectiveness.

Effective: Spring 2011

Prerequisite: MGMT 341

MGMT 445 (US) Managing Differences in Organizations (3) This course focuses on developing knowledge and skills for dealing with demographic, functional, occupational and identity-based differences within and among organizations.

Effective: Spring 2008

Prerequisite: B A 304 orMGMT 301;MGMT 341

MGMT 450 Labor Management Relations (3) Study of the key concepts and processes involved in current American labor/management relations.

Effective: Spring 2008

Prerequisite: MGMT 301

MGMT 451W Business, Ethics, and Society (3) Advanced examination of social, ethical, legal, economic, equity, environmental, public policy, and political influences on managerial decisions and strategies.

Effective: Spring 2004

Prerequisite: B A 241 andB A 242 orB A 243

MGMT 453 Creativity and Innovation (3) Analysis of the process of innovation in organizations and of how creativity and other variables influence the process.

Effective: Summer 2007

Prerequisite: MGMT 301

MGMT 461 (IL) International Management (3) Examines issues of nations and cultures including motivation, communication, negotiation, leadership, ethics and social responsibility, and women in management.

Effective: Spring 2008

Prerequisite: B A 304 orMGMT 301

MGMT 466 Organizational Learning and Knowledge Management (3) Examination of the social processes through which organizations continuously develop, acquire, interpret, and apply information and knowledge for performance enhancement and continuous improvement.

Effective: Spring 2008

Prerequisite: MGMT 301

MGMT 471 Strategic Management (3) Issues that influence the competitive performance of the firm are identified and examined.

Effective: Spring 2004

Prerequisite: MGMT 326, B A 411 or taken concurrently

MGMT 471W Strategic Management and Business Policy (3) Study of strategic management and business policy formulation and implementation processes.

Effective: Spring 2008

Prerequisite: MGMT 301, MKTG 301, FIN 301, SCM 301

MGMT 475W Strategic Product Development (3) Study of an organization, industry, and evaluation of the introduction to a new product. Preparation of proposal for industry product.

Effective: Summer 2008

Prerequisite: 7th semester standing;MGMT 300;FIN 301;SCM 310;MKTG 301;M E 300 orMET 330;MCH T 213 orE MCH 213;EET 101 orE E 211

MGMT 476 Product Realization Capstone (3) Study of an organization, industry, and evaluation of the introduction of a new product. Preparation of proposal for industry product.

Effective: Summer 2008

Prerequisite: MGMT 475W ; 8th semester standing

MGMT 483 Compliance and Fairness in Organizations (3) Compliance with employment laws with respect to managing human resources and fair treatment in employer-employee relationships.

Effective: Summer 2007

Prerequisite: MGMT 341

MGMT 489 Seminar in Management (3) A capstone course in management for students of high academic achievement. Emphasis on in-depth research of current interest.

Effective: Spring 2008

Prerequisite: MGMT 301 and at least senior status

MGMT 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2003

MGMT 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

MGMT 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2008

Prerequisite: prior approval of proposed assignment by instructor

MGMT 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1989

MGMT 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1989

MGMT 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 2003

MGMT 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

MGMT 501 Behavioral Science in Business (3) Application of behavioral science concepts and analytical methods to problems in business organizations. Analysis of administrative behavior and decision making.
Effective: Fall 1989

MGMT 505 Management of Advanced Technology (3) An analysis of the strategic, organizational, and human resource issues firms must face in order to implement advanced manufacturing technology and practices.
Effective: Spring 1990

MGMT 511 Engagement and Project Management (2) Basic techniques and skills for organizing, defining, and conducting a consulting project.
Effective: Summer 2002
Prerequisite: B A 501

MGMT 520 Team Facilitation (2) To gain an in-depth understanding of team dynamics and develop skills for facilitating teams to achieve effective performance.
Effective: Summer 2002

MGMT 521 Complex Negotiations (2) Develop concepts and strategies for analyzing and conducting multiparty negotiations.
Effective: Spring 2003

MGMT 523 Organizational Change: Theory and Practice (3) Analysis of research, theory, and practice in dynamics of organizational change. Research literature reviewed for evaluation of concepts and methods.
Effective: Fall 1989

MGMT 528 Seminar in Organizational Behavior (3) Current theoretical and research issues applicable to the study of individual and group behavior within organizational settings.
Effective: Fall 1989

MGMT 531 Strategy Implementation and Organizational Change (2) Assess gap between current organization and that needed to implement new strategy or execute change; identify process for closing gap.
Effective: Summer 2002

MGMT 534 Leadership and Change in Organizations (2) Understanding yourself as a leader, particularly as a leader in organizations and especially a leader of organizations undergoing change.
Effective: Summer 2008

MGMT 535 The Upper Echelons Perspective: Theory and Research (3) To learn to evaluate and conduct research on top executives and their influence on organizational strategy, structure and performance.
Effective: Summer 2004
Prerequisite: admission to a doctoral program at PSU

MGMT 538 Seminar in Organization Theory (3) Current theoretical and research issues applicable to the study of design and management of complex organizations.
Effective: Fall 1989

MGMT 539 Seminar in Organizational Social Networks (3) Learn theory, concepts and methods for research on organizational social networks.
Effective: Summer 2004
Prerequisite: admission to a doctoral program at PSU

MGMT 541 Human Resource Management (3) An in-depth examination of the strategic planning and implementation of human resource management, including staffing, development, appraisal, and rewards.

Effective: Summer 1990

MGMT 548 Seminar in Human Resource Management (3) Current theoretical and methodological issues applicable to the design, implementation, and evaluation of human resource practices and programs.

Effective: Summer 1990

MGMT 551 Growth and Innovation Strategy (2) Identify opportunities for growth and profitability through technological and organizational innovations and market independently or with strategic partners.

Effective: Summer 2002

Prerequisite: B A 571

MGMT 558 Seminar in Organizational Decision Making (3) An in-depth examination of decision making, including bounded rationality, political behaviors, choice and post-decision processes.

Effective: Spring 1990

MGMT 561 Global Strategy and Organization (1-3) Course focuses on three major aspects of international business: competitive strategy, organization design, and management processes.

Effective: Fall 2008

Prerequisite: second year of MBA Program or graduate status in another program

MGMT 565 Power and Influence (2) Provides a pragmatic and ethical framework for analyzing the sources of power in organizations and its effective use.

Effective: Summer 2008

MGMT 570 Consulting Practicum (2) Conduct a strategic consulting project engagement from initial contact through to final recommendations and acceptance.

Effective: Summer 2002

Prerequisite: MGMT 511, MGMT 531 permission of program Concurrent: MGMT 520

MGMT 571 Strategic Management (3) This capstone course provides analysis and application of strategy concepts and techniques in business organizations.

Effective: Spring 2002

Prerequisite: only available to students enrolled in the M.B.A. program

MGMT 573 Corporate Innovation Strategies (3) Survey of managerial issues involved in formulating and implementing a corporate innovation or technology strategy.

Effective: Summer 1991

MGMT 578 Seminar in Corporate Strategy (3) Current theoretical and research issues applicable to the study of corporate strategy formulation and implementation.

Effective: Fall 1989

MGMT 588 Seminar in Multi-Level Organizational Research (3) The seminar addresses theory, research, and methodological issues surrounding the multi-level integration of micro- and macro-organizational concepts.

Effective: Spring 1990

Prerequisite: MGMT 528, MGMT 538 or equivalent

MGMT 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Fall 1989

MGMT 591 Organizational Research Design (3) Experience in designing research for organizational science, to maximize the validity of eventual conclusions; methodological choices, constraints, and compromises (tradeoffs).

Effective: Summer 2004

Prerequisite: admission to a doctoral program at Penn State; graduate-level statistics (linear model) course (e.g. STAT 501: Applied Regression Analysis).

MGMT 592 Qualitative Research Methods (3) This course provides students with an introduction to and experience with qualitative research methods employed in organizational contexts.

Effective: Summer 2004

Prerequisite: admission to a doctoral program at Penn State

MGMT 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1989

MGMT 597 Special Topics (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1989

MGMT 597B Team Facilitation Team Labs (1) Lab to work with 1st year MBA teams.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MGMT 599 (IL) **FOREIGN STUDY--MANAGEMENT** (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.

Effective: Summer 2005

Prerequisite: acceptance in established exchange program

MGMT 600 **Thesis Research** (1-15) No description.

Effective: Fall 1989

MGMT 601 **PH.D. DISSERTATION FULL-TIME** (0) NO DESCRIPTION.

Effective: Summer 1991

MGMT 602 **SUPERVISED EXPERIENCE IN COLLEGE TEACHING** (1-3 PER SEMESTER, MAXIMUM OF 6) COURSE INVOLVES SERVING AS A TEACHING ASSISTANT IN A SPECIFIED UNDERGRADUATE COURSE UNDER THE SUPERVISION OF A FACULTY MEMBER. REQUIRES PLANNING, DISCUSSION, AND APPLICATION OF ITS APPROACH.

Effective: Spring 1991

MGMT 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1989

MGMT 611 **PH.D. DISSERTATION PART-TIME** (0) NO DESCRIPTION.

Effective: Summer 1991

Last Import from UCM: June 16, 2011 3:00 AM

Mangt Info Systems (MIS)

MIS 404 Introduction to ERP and Business Processes (3) A problem-based, interdisciplinary course on Enterprise Resource Planning (ERP) concepts and business processes.

Effective: Summer 2010

Prerequisite: MIS 204 or 1st Level Programming Course or with the permission of the program

MIS 405 Supply Chain Information Systemes with Oracle (3) Strategic design and implementation of Oracle supply chain management information systems in an ERP environment.

Effective: Summer 2010

Prerequisite: SCM 301, MIS 204

MIS 406 Customer Information Systems with Oracle (3) A technology-based exploration of the various Oracle Order Management and Customer Relationship Management tools.

Effective: Summer 2010

Prerequisite: MIS 405

MIS 407 Enterprise Integration with Oracle (3) This is a technology course focusing on software development in an Oracle eBusiness ERP Environment.

Effective: Summer 2010

Prerequisite: MIS 336 and MIS 405

MIS 413 Interface design for Information Systems Applications (3) The study of interface design emphasizing application and user requirements, development and testing techniques, and information processing issues.

Effective: Spring 2007

Prerequisite: MIS 307, MIS 465

MIS 430 Systems Analysis (3) Information analysis and the logical specification of the system.

Effective: Spring 2007

Prerequisite: Prerequisite or concurrent: MIS 336

MIS 431 Business Data Management (3) The architecture of business information processing systems and technical aspects of database management.

Effective: Spring 2007

Prerequisite: MIS 204 Concurrent: SCM 301

MIS 432 Business Information System Analysis (3) The analysis of business information systems and the requirements specifications of redesigned systems.

Effective: Spring 2007

Prerequisite: MIS 431

MIS 434 Internet Technologies (3) Technical foundations of the eBusiness environment and web applications development to support internet-based commerce.

Effective: Spring 2007

Prerequisite: MIS 431 Concurrent: M I S 432

MIS 435 Systems Design and Implementation (3) Logical and physical design of information systems and implementation.

Effective: Spring 2010

Prerequisite: MIS 430 and a second-level programming course

MIS 436 Business Data Communications (3) Introduction to the principles and techniques of business data communication encompassing transmission concepts, network analysis, design, implementation, and administration.

Effective: Spring 2007

Prerequisite: MIS 431

MIS 442 Business Information Systems Design (3) Object-oriented concepts such as: object, instance, class, inheritance, polymorphism; application of these methodologies and design patterns to business system analysis.

Effective: Summer 2007

Prerequisite: MIS 432

MIS 445 Management Reporting Systems (4) Develops insights and skills required to analyze current management reporting systems, propose improvements, and develop reports using a report generator.

Effective: Fall 2009 Ending: Fall 2011

Prerequisite: MIS 336

MIS 445 Business Intelligence (4) Develops insights and skills related to Business Intelligence, Data Warehousing, Data Mining, Analytics, OLAP, and report generators.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: MIS 336

MIS 446 Information Technology and Business Strategy (3) Strategic use and management of information technology in digital global economy.

Effective: Spring 2008

Prerequisite: MIS 390

MIS 448 Business Telecommunications (3) Introduces telecommunication concepts, its evolution, and present

applications in business. Discusses the software and hardware components of telecommunication networks.

Effective: Spring 2007

Prerequisite: MIS 390

MIS 450 System Design Project (3) A project in the design, specification, and programming of a system in an application area.

Effective: Spring 2009

Prerequisite: MIS 307, MIS 465;MIS 448 ; 3 additional credits of MIS at the 300- or 400-level; seventh or eighth semester standing

MIS 461 Web Technologies (3) Fundamentals of Web development for e-business and related project management.

Effective: Spring 2007

Prerequisite: MIS 307 andMIS 465

MIS 465 DataBase Management (3) Provides a comparison of techniques, methodology of systems, limitatins, and applications of various data base management systems.

Effective: Spring 2008

Prerequisite: CMPSC 102 orCMPSC 101 orCMPSC 121 andMIS 390

MIS 466 Business Programming for the WEB (3) Advanced programming for WEB-based applications.

Effective: Spring 2007

Prerequisite: MIS 307

MIS 470 Advanced Applications Development (4) Focus on concepts and practice of advanced tools and techniques such as application generators, object-oriented methods, and client/server development.

Effective: Fall 2009

Prerequisite: MIS 435 orCMPSC 122 orCMPSC 302

MIS 479 Management of Operations Information/ERP (3) Management and implementation of enterprise information systems for business integration and supply chain management.

Effective: Summer 2007

Prerequisite: MIS 390 orMIS 431

MIS 479W Management of Operations Information/ERP (3) Management and implementation of enterprise information systems for business integration and supply chain management.

Effective: Spring 2008

Prerequisite: MIS 390 orMIS 431

MIS 489 Seminar in Information Systems (3) Covers new trends and concepts in information/processing technology and their applications and impact on computer information systems.

Effective: Spring 2007

Prerequisite: MIS 307 andMIS 465

MIS 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2007

MIS 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2008

MIS 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2007

Prerequisite: prior approval of proposed assignment by instructor

MIS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2007

MIS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2007

MIS 497B System Design Lab (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MIS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2007

MIS 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2007

Last Import from UCM: June 16, 2011 3:00 AM

Marketing (MKTG)

MKTG 410 Personal Selling (3) Principles underlying the selling process and practical application of these principles to selling situations.

Effective: Spring 2008
Prerequisite: MKTG 301

MKTG 420 Direct Marketing (3) Applies principles of marketing management to the direct marketing of products by mail, telephone, print, and broadcast media.

Effective: Spring 2002
Prerequisite: MKTG 330, MKTG 342

MKTG 422 Advertising and Sales Promotion Management (3) Perspectives and models of the key decisions involved in managing advertising and sales promotion campaigns.

Effective: Spring 2008
Prerequisite: MKTG 330 or MKTG 342

MKTG 426 Business Marketing (3) Developing marketing strategies and programs. The course emphasizes the special nature of the business and organizational markets.

Effective: Spring 2002
Prerequisite: MKTG 330, MKTG 342

MKTG 428 Advanced Sales Management (3) Approaches to planning, organizing, staffing, training, directing, and controlling the sales force in support of marketing objectives.

Effective: Spring 2008
Prerequisite: MKTG 330, MKTG 342

MKTG 435 Marketing and Society (3) Analysis of marketing's impact on and obligation to social and environmental issues, marketing and ethics, and the regulation of marketing.

Effective: Spring 2002
Prerequisite: MKTG 330, MKTG 342

MKTG 437 Advanced Retailing and Merchandise Management (3) Analyzing planning and controlling the retail merchandising effort, including procurement, resource selection, vendor relations, product presentation, inventory control.

Effective: Spring 2002
Prerequisite: MKTG 330, MKTG 342

MKTG 440 Services Marketing (3) Marketing theory and methods applied to profit and nonprofit service industries such as health care, finance, transportation, tourism, arts and consulting.

Effective: Spring 2002
Prerequisite: MKTG 330, MKTG 342

MKTG 443 Sports Marketing (3) This course will focus on how companies develop, execute and measure marketing strategies and tactics to use sports teams, families, leagues and other organizations to market their products and services domestically and internationally to consumers and business partners. The course will examine the marketing strategies employed by sports teams and leagues.

Effective: Summer 2010
Prerequisite: B A 303 or MKTG 301

MKTG 445 (IL) Global Marketing (3) Role of international marketing in the global environment; political, economic, geographic, historical, cultural conditions; developing and implementing international marketing strategies.

Effective: Spring 2008
Prerequisite: B A 303 or MKTG 301

MKTG 450W Marketing Strategy (3) Market-oriented problems of the firm; identification and selection of market opportunities; formulation of competitive strategies; marketing policies and programs.

Effective: Spring 2008
Prerequisite: MKTG 330, MKTG 342

MKTG 475 Innovation and Product Management (3) This course is an application-oriented interdisciplinary course on new product development concepts, and innovation management.

Effective: Spring 2011
Prerequisite: MKTG 301

MKTG 476 Sales Management (3) Application of modern management principles to field sales force planning, organization, and administration; selection, training, and compensation plans.

Effective: Spring 2008
Prerequisite: MKTG 301 and MGMT 301

MKTG 478 Services Marketing Management (3) Conceptual understanding of services and the analytical tools that are used in solving strategic services marketing problems.

Effective: Spring 2008
Prerequisite: MKTG 301

MKTG 485 Business-to-Business Marketing (3) Application of marketing principles to commercial enterprises, industrial firms, government, and other non-profit institutions.

Effective: Spring 2008
Prerequisite: MKTG 301

MKTG 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2003

MKTG 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2008

MKTG 495 Internship (1-18) Supervised off campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.
Effective: Spring 2008
Prerequisite: B A 303 ORMKTG 301

MKTG 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

MKTG 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

MKTG 497A Non-Profit and Public Marketing (3) To apply marketing principles to services and programs offered in public and non-profit settings. To understand the dynamics of social marketing campaigns to achieve public sector initiatives. To explore how businesses can work with non-profits in an effective manner to achieve mutual goals.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MKTG 497A Retail Institutions (3) Management of marketing institutions in distribution channels from producers to consumers. Emphasis on retail institutions: location, personnel, merchandising, control and promotion.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012
Prerequisite: MKTG 330 or MKTG 342

MKTG 497B Sustainability for Consumers, Firms, and Societies (3) This course will introduce the audience to the role of sustainability in business, such as innovation.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MKTG 497B Sports Business (3) This course explores how the sports business operates. The class teaches students the business operations of teams, leagues, agencies and media companies including cable, wireless and digital. Both traditional and new marketing and revenues will be studied including products, promotion, pricing, distribution, and single revenue and revenue-sharing models. Sports business activities are included through instructor presentations, dialogue, student study of media coverage and reading a sports business trade journal. Student presentations will be created based on current sports business topics.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MKTG 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2003

MKTG 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2007

MKTG 500 Marketing Management (3) Development of a marketing management focus, including market analysis, competition analysis, and decisions in pricing, product, promotion, and distribution channels.
Effective: Spring 2002
Prerequisite: ACCTG 511 or ACCTG 512; B A 533

MKTG 510 Planning Marketing Strategy and Programs (3) Development of marketing strategy consistent with corporate plans, including integrated marketing mix programs based on environmental, customer, and competitive analysis.
Effective: Fall 1983
Prerequisite: MKTG 500

MKTG 511 Quantitative Analysis for Marketing Decisions (3) Application of quantitative and analytical tools for marketing decisions in forecasting, new product development, advertising, promotions, pricing, and personal selling.
Effective: Fall 1983
Prerequisite: MKTG 500

MKTG 512 Consumer and Market Behavior (3) Application of buyer behavior concepts from the behavioral sciences, including utility, culture, life cycle, personality, attitudes, learning, decision making.
Effective: Fall 1983
Prerequisite: MKTG 500

- MKTG 513 Market Research (3)** User-oriented analysis of marketing research process, including problem definition, design, data collection, data analysis, interpretation, and presentation.
Effective: Fall 1983
Prerequisite: MKTG 500
- MKTG 514 Management of Marketing Communications (3)** Management of advertising, sales promotion, and personal selling programs. Topics: segmentation; copy, media, budget decisions; sales territory; and management issues.
Effective: Fall 1983
Prerequisite: MKTG 500
- MKTG 515 Business Marketing (3)** Study of marketing of goods and services to business, institutions, and government. Focus on organizational buying, market planning and analysis, and development of marketing mix.
Effective: Summer 1984
Prerequisite: MKTG 500
- MKTG 516 Product Development and Management (3)** Marketing and product strategies for new and old products are covered in this course.
Effective: Fall 1987
Prerequisite: MKTG 500
- MKTG 517 (MS&IS 517) Bargaining and Procurement in a Market Context (3)** Bargaining and procurement arrangements between purchasers of goods and services and potential suppliers; includes discussion of government procurement.
Effective: Spring 1998
Prerequisite: first year MBA core requirements
- MKTG 518 (I B 518) Global Marketing (3)** Role of international marketing in the global business environment; development of marketing plans and implementation strategies under differing socio-economic conditions.
Effective: Spring 1991
Prerequisite: MKTG 500
- MKTG 521 Scientific Marketing Analysis and Implementation (2)** An introduction to the tools used, rationale for, and the practice and implementation of a variety of current marketing techniques.
Effective: Spring 2003
Prerequisite: B A 500
- MKTG 531 Gathering and Using Information for Marketing Decisions (2)** Tools and techniques required to carry out a marketing research project.
Effective: Summer 2002
Prerequisite: B A 500
- MKTG 532 Brand Management (2)** To examine and understand the processes of building, designing, measuring, and maintaining brand equity.
Effective: Summer 2002
Prerequisite: B A 500
- MKTG 533 Business Marketing (2)** Study of marketing of goods and services to business, institutions, and government.
Effective: Summer 2002
Prerequisite: B A 500
- MKTG 534 Integrated Market Communications (2)** Provides the frameworks for thinking, tools, language, and skills for strategic management of integrated market communications.
Effective: Summer 2002
Prerequisite: B A 500
- MKTG 541 Consumer Behavior (2)** Introduce theories and concepts from psychology, sociology, economics, and other disciplines that are useful in understanding and marketing to consumers.
Effective: Summer 2002
Prerequisite: B A 500
- MKTG 542 New Product Development and Management (2)** Identify business opportunity, understand potential customer needs, and develop a new product from concept to virtual prototype.
Effective: Summer 2002
Prerequisite: B A 500
- MKTG 543 (EBIZ 543) e-Marketing (2)** Using the Internet and related technologies to enhance and transform marketing functions and processes.
Effective: Summer 2002
Prerequisite: EBIZ 501
- MKTG 551 Theoretical Perspectives on Buyer Behavior (3)** Review of marketing and social sciences research related to understanding consumer and market behavior.
Effective: Fall 1983
- MKTG 552 Marketing Theory (3)** Theory building in marketing; the intricate relation of theory and research.
Effective: Fall 1983
- MKTG 553 Development of Marketing Thought (1)** Analysis of major contributions to the development of marketing thought.

Effective: Fall 1983

MKTG 554 Research Methods in Marketing (3) Philosophical, methodological, and measurement issues involved in designing, conducting, analyzing, and interpreting research in marketing.
Effective: Fall 1983

MKTG 555 (MS&IS 555) Marketing Models (3) Topics in the model building approach to marketing decision making, focusing on current research issues.
Effective: Spring 1998

MKTG 556 Marketing Management (3) To explore the conceptual and applied dimensions of marketing management.
Effective: Summer 2008
Prerequisite: MKTG 551 Concurrent: MKTG 555

MKTG 571 Marketing Strategy (2) Examines business-level marketing issues and solutions to problems in competitive business environments.
Effective: Summer 2002
Prerequisite: B A 500

MKTG 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Summer 2008

MKTG 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MKTG 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

MKTG 597A Market Intelligence (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MKTG 597A Special Topics in Advanced Consumer Behavior (3) The purpose of this graduate seminar is to investigate special topics in consumer behavior.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012
Prerequisite: MKTG 551

MKTG 599 (IL) Foreign Study--Marketing (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005
Prerequisite: acceptance in established exchange program

MKTG 600 Thesis Research (1-15) No description.
Effective: Fall 1983

MKTG 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Summer 1983

MKTG 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) No description available.
Effective: Fall 1982

MKTG 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

1 Smeal College of Business Administration course numbered 150 to 199 are not acceptable for the B.S. degree in Business at the University Park program.

Last Import from UCM: June 16, 2011 3:00 AM

Materials Engineering Technology (MAE T)

No courses for department code **MAE T** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Materials Science and Engineering (MATSE)

MATSE 400 Crystal Chemistry (3) Principles of crystal chemistry applied to structures, structural defects and properties of organic, inorganic, intermetallic, and metallic crystals.

Effective: Summer 2007

Prerequisite: CHEM 112, CHEM 113, MATH 231, MATH 251, PHYS 214

MATSE 401 Thermodynamics of Materials (3) Review of equilibrium thermodynamics and applications to metallurgical and material systems.

Effective: Summer 2007

Prerequisite: CHEM 112, PHYS 214

MATSE 402 Materials Process Kinetics (3) A treatment of process kinetics including chemical reaction kinetics and momentum, energy and mass transport.

Effective: Spring 2001

Prerequisite: MATH 251, PHYS 214

MATSE 403 (BIOE 443) Biomedical Materials (3) Describe properties of materials and composites and their in vivo interactions.

Effective: Spring 2007

Prerequisite: MATSE 201

MATSE 404 (IL) (BIOE 444) Surfaces and the Biological Response to Materials (3) Focus is on the special properties of surfaces as an important causative and mediating agent in the biological response to materials.

Effective: Summer 2007

Prerequisite: CHEM 111, CHEM 113

MATSE 409 (NUC E 409) Nuclear Materials (3) Nuclear reactor materials: relationship between changes in material properties and microstructural evolution of nuclear cladding and fuel under irradiation.

Effective: Summer 2002

Prerequisite: PHYS 214

MATSE 410 Phase Relations in Materials Systems (3) Phase rule; construction and interpretations of equilibrium diagrams; importance of nonequilibrium in materials.

Effective: Fall 2006

Prerequisite: MATSE 201, MATSE 401 Concurrent: MATSE 201 MATSE 400 MATSE 430

MATSE 411 Processing of Ceramics (3) Principles of ceramic processing, including powder preparation and characterization, forming operations, and the basic phenomena underlying these operations.

Effective: Fall 2005

Prerequisite: MATSE 400, MATSE 402

MATSE 412 Thermal Properties of Materials (3) Generation of high temperatures, measurement of temperature, heat transfer and furnace design, thermal stability of ceramic materials, applied thermodynamics.

Effective: Fall 2005

Prerequisite: MATSE 259 or MATSE 201 Concurrent: MATSE 401

MATSE 413 Solid-State Materials (3) Structures of metallic, ionic, and covalent solids, amorphous materials, and surfaces; electronic structure; electronic properties of solids and their manipulation.

Effective: Spring 2001

Prerequisite: or concurrent: MATSE 201

MATSE 415 Introduction to Glass Science (3) Composition, melting, fabrication, properties, and uses of glass; combinations of glass with metals and other materials.

Effective: Summer 2002

Prerequisite: MATSE 400, MATSE 401, MATSE 402, MATSE 462

MATSE 417 (E SC 417) Electrical and Magnetic Properties (3) Electrical conductivity, dielectric properties, piezoelectric and ferroelectric phenomena; magnetic properties of ceramics.

Effective: Spring 2007

Prerequisite: MATSE 400, MATSE 402, PHYS 214

MATSE 421 Corrosion Engineering (3) Industrial forms of corrosion and preventive methods, and their description in terms of basic thermodynamic and kinetic considerations.

Effective: Summer 2007

Prerequisite: CHEM 112, PHYS 212

MATSE 422 Thermochemical Processing (3) Physico-chemical aspects of high temperature extraction and processing of metals and alloys. Design and evaluation of processes and process options.

Effective: Summer 2002

Prerequisite: MATSE 401, MATSE 402

MATSE 424 Materials Selection and Design (1) Introduction to the selection and design of materials for structural applications.

Effective: Summer 2002

Prerequisite: MATSE 201 or MATSE 259

MATSE 425 Processing of Metals (3) Modern methods of shaping metals in liquid and solid states: casting, joining, powder and deformation processing. Design of new technology.

Effective: Fall 2006

Prerequisite: MATSE 402, MATSE 410

MATSE 426 (MN PR 426) Aqueous Processing (3) A study of the chemical and engineering principles pertinent to metal processing in aqueous systems: hydrometallurgical extraction, plating, materials preparation.

Effective: Fall 2009

Prerequisite: EME 301 or MATSE 401

MATSE 430 Materials Characterization (3) Elements of crystallography and the characterization of crystalline and non-crystalline materials using x-ray diffraction, electron microscopic, and other instrumental techniques.

Effective: Spring 2001

Prerequisite: PHYS 214

MATSE 435 Optical Properties of Materials (3) Electromagnetic spectrum, interaction of light with materials, color, thin film optical coatings, electro-, integrated and nonlinear optics.

Effective: Spring 1996

Prerequisite: MATSE 400

MATSE 436 Mechanical Properties of Materials (3) Fundamental relationships between structure and mechanical behavior of materials.

Effective: Summer 2002

Prerequisite: MATH 231, MATH 250 or MATH 251, PHYS 214, MATSE 201 or MATSE 259 or E SC 314

MATSE 440 (E MCH 440) Nondestructive Evaluation of Flaws (3) Methods and limitations of nondestructive evaluation of mechanical flaws; optical, acoustical, electromagnetic, x-ray, radiography, thermography, and dye techniques.

Effective: Spring 2008

Prerequisite: E MCH 213 or E MCH 210H or E MCH 210

MATSE 441 Polymeric Materials I (3) Manufacture of industrially significant polymers together with discussion of their major chemical, physical, and mechanical properties.

Effective: Summer 2007

Prerequisite: CHEM 210, MATH 231, PHYS 214

MATSE 443 Introduction to the Materials Science of Polymers (3) Introduction to the nature and structure of high polymers. Characteristics of polymers and polymer systems.

Effective: Summer 2007

Prerequisite: CHEM 210, MATH 231, PHYS 214

MATSE 444 Solid State Properties of Polymeric Materials (3) Structure/property relationships in the bulk solid state of polymers. Characterization of bulk properties and structure.

Effective: Spring 2003

Prerequisite: MATSE 443

MATSE 445 Thermodynamics, Microstructure, and Characterization of Polymers (3) The properties of individual polymer chains. Theoretical and experimental techniques pertaining to the characterization of polymeric microstructure.

Effective: Fall 2002

Prerequisite: MATSE 443

MATSE 446 Mechanical and Electrical Properties of Polymers and Composites (3) The mechanical (viscoelastic) and electric properties of polymers and poly-based composites.

Effective: Spring 2003

Prerequisite: MATSE 443

MATSE 447 Rheology and Processing of Polymers (3) This course deals with the fluid mechanics, rheology, and processing of polymeric materials.

Effective: Fall 2002

Prerequisite: MATSE 443

MATSE 448 (CH E 442) Polymer Processing Technology (3) Basic principles of polymer melt processing are reviewed and subsequently applied to the most important industrial processing operations.

Effective: Spring 2006

Prerequisite: MATSE 447 or CH E 302A

MATSE 450 (E SC 450) Synthesis and Processing of Electronic and Photonic Materials (3) The materials science of applying thin film coatings, etching, and bulk crystal growth; includes materials transport, accumulation, epitaxy, and defects.

Effective: Fall 2005

Prerequisite: MATSE 201 or E SC 414H sixth semester standing

MATSE 455 Properties and Characterization of Electronic and Photonic Materials (3) Materials characterization in general; electrical properties of crystals, contacts, films; optical properties of single phase materials, waveguide, and multilayer stacks.

Effective: Fall 2005

Prerequisite: MATSE 201 or E SC 414M, E SC 314

MATSE 460 Introductory Laboratory in Materials (1) An introduction to comparative physical properties and characteristics of various materials including mechanical, electrical thermal, and structure/ morphology.

Effective: Spring 2001

Prerequisite: or concurrent: MATSE 201

MATSE 462 General Properties Laboratory in Materials (1) An introduction to comparative physical properties of various materials including mechanical, thermal electrical properties and the measurement of said properties.

Effective: Spring 2005

Prerequisite: MATSE 460

MATSE 463 Characterization and Processing of Electronic and Photonic Materials Laboratory (1) Provides experience with key processing methods for EPM materials and advanced characterization methods for EPM materials and simple device structures.

Effective: Spring 2009

Prerequisite: MATSE 400, MATSE 430, MATSE 450, MATSE 455, MATSE 460 Concurrent: MATSE 450 MATSE 455

MATSE 468 Ceramics Laboratory III (1) Cermaic processing and powder characteristics.

Effective: Spring 2009

Prerequisite: MATSE 462

MATSE 471 Metallurgy Laboratory I (1) A laboratory integrating experimental aspects of material contained in MATSE 402, 413, and 410, e.g. phase diagram determination, solidification micro- structures, etc.

Effective: Fall 2005

Prerequisite: MATSE 430

MATSE 472 Metallurgy Laboratory II (1) Application of principles of mechanical metallurgy, pyroprocessing, corrosion and metal processing.

Effective: Fall 2006

Prerequisite: MATSE 410, MATSE 471

MATSE 473 Polymeric Materials Laboratory--Synthesis (1) Principles and practices of polymerization, including condensation, free radical (bulk, solution, suspension, emulsion), ionic, and Zeigler-Natta procedures.

Effective: Spring 2003

Prerequisite: MATSE 443

MATSE 474 Polymeric Materials Laboratory--Characterization (1) Principles and practices involved in determination of properties, structure and morphology, employing thermal, mechanical, spectroscopic, viscometric and computer techniques.

Effective: Spring 2003

Prerequisite: MATSE 443

MATSE 475 (E SC 475) Particulate Materials Processing (3) Fundamentals of processing particulate materials including production, characterization, handling, compaction, and sintering of metal, carbide, intermetallic, and composite powders.

Effective: Spring 2008

Prerequisite: E MCH 315, E SC 414 or MATSE 259

MATSE 483 (E SC 483) Simulation and Design of Nanostructures (3) Introduction to computer simulation techniques and their applications at the physical/life sciences interface.

Effective: Fall 2007

Prerequisite: PHYS 214 or E SC 312, MATH 230

MATSE 484W (IL) International Internship in Materials: Research Definition and Methodology (3) A course focused on international research, specific design and methodology, facilitated through the International Internship in Materials and Program.

Effective: Summer 2006

Prerequisite: Sixth-semester standing in Materials Science and Engineering; MATSE 201, MATSE 460, MATSE 492W satisfactory completion of cultural class from Office of Education Abroad

MATSE 485W (IL) International Internship in Materials: Experimentation and Documentation (3) A course focused on international research, specifically experimentation and documentation, facilitated through the International Internship in Materials Program.

Effective: Summer 2006

Prerequisite: Seventh-semester standing in Materials Science and Engineering; MATSE 484W ; satisfactory completion of cultural class from Office of Education Abroad

MATSE 492W Materials Engineering Methodology and Design (3) Designed to familiarize students with the literature and technology developments in the use of, and design with, materials in industrial applications.

Effective: Fall 2005

Prerequisite: sixth semester standing in Materials Science and Engineering

MATSE 494M Research and Design Senior Project (1-3) Continuation of a research problem in materials culminating in a bound thesis describing the work.

Effective: Fall 2007

MATSE 494W Research and Design Senior Project (1-3) Continuation of a research problem in materials culminating in a bound thesis describing the work.

Effective: Spring 2006

MATSE 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1994

MATSE 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1994

MATSE 497B Materials Sustainability and the Environment (3) The goal of this course is to educate students about the process of LCA, used as a problem solving tool, in the context of the history of environmental movements and legislation and the availability of resources to create materials and useful products in a sustainable manner.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MATSE 497C Research and Design Senior Group Project (3) The objective of the course is to provide "real-world" industry project experience.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: MATSE 492W

MATSE 497C Research and Design Senior Group Project (3) The objective of the course is to provide "real-world" industry project experience.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012
Prerequisite: MATSE 492W

MATSE 501 Thermodynamics of Materials (3) Application of thermodynamics to materials equilibria and processes, including solution theory, electrochemical processes, capillarity, and the effect of stresses.
Effective: Spring 2004
Prerequisite: MATSE 401 or equivalent

MATSE 503 Kinetics of Materials Processes (3) Introduction to application of transition state theory and mass transfer to the kinetics of materials and mineral processes.
Effective: Summer 2007
Prerequisite: MATH 250, CHEM 450; GEOSC 521 or MATSC 501

MATSE 505 Irreversible and Statistical Thermodynamics of Materials (3) Introduction to statistical and irreversible thermodynamics as applied to chemical and materials systems.
Effective: Spring 2007
Prerequisite: MATSE 401, MATSE 501 or instructor's permission

MATSE 506 Interfacial Electrochemical Processes (3) Survey of thermodynamic and kinetic fundamentals of electrochemical processes at interfaces.
Effective: Spring 2006

MATSE 507 (BIOE 517) Biomaterials Surface Science (3) Special properties of surfaces as an important causative and mediating agent in the biological response to materials.
Effective: Fall 2003

MATSE 508 (BIOE 508) Biomedical Materials (3) Properties and methods of producing metallic, ceramic, and polymeric materials used for biomedical applications.
Effective: Spring 2003

MATSE 511 Instrumental Techniques Applied to Materials and Mineral Sciences Problems (1-7) See units A through G for description.
Effective: Spring 2007

MATSE 511A (GEOSC 511A) Powder X-Ray Diffraction (1) Compound identification, lattice parameter measurement, and other applications of the powder diffraction method.
Effective: Spring 2005

MATSE 511B (GEOSC 511B) Transmission Electron Microscopy (1) Principles and practice of transmission electron microscope operation. Students undertake individual projects.
Effective: Spring 2005

MATSE 511C (GEOSC 511C) Spectroscopy (1) Emission spectrographic analysis of powders and atomic absorption analysis of solutions.
Effective: Spring 2005

MATSE 511D (GEOSC 511D) Electron Microprobe Analysis (1) Qualitative and quantitative elemental analysis of microvolumes within solids. Emphasis on individual student project.
Effective: Spring 2005

MATSE 511E (GEOSC 511E) Scanning Electron Microscopy (1) Principles and practice of scanning electron microscope operation. Students undertake individual projects.
Effective: Spring 2005

MATSE 511G (GEOSC 511G) Analytical Electron Microscopy (1) Modern analytical electron microscope techniques: scanning transmission electron microscopy; electron energy loss spectroscopy; energy dispersive analysis of x-rays.
Effective: Spring 2005
Prerequisite: MATSE 511B

MATSE 512 (GEOSC 512) Principles of Crystal Chemistry (3) Relation of structure to ionic size and nature; influence of pressure and temperature on structure; chemical-structural defects, crystalline solutions, phase-transitions.
Effective: Spring 2004

MATSE 514 Characterization of Materials (3) Classical and new (microprobe, scanning microscope, magnetic resonance, and Mossbauer) techniques for the characterization of composition, structure, defects, and surfaces.
Effective: Fall 2003

MATSE 518 Wetting Properties of Materials: Theory and Practice (3) Fundamentals of water wetting phenomenon are developed with special emphasis on thermodynamics of absorption and adhesion.
Effective: Summer 2004

MATSE 519 Environmental Degradation of Materials in Nuclear Power Plants (3) Degradation of materials performance when exposed to the combination of high temperature, neutron irradiation and aggressive electrochemistry found in nuclear reactors.
Effective: Fall 2003
Prerequisite: MATSE 409 or MATSE 420

MATSE 523 (NUC E 523) Environmental Degradation of Materials in Nuclear Power Plants (3) Degradation of materials performance when exposed to the combination of high temperature, neutron irradiation, and aggressive electrochemistry found in nuclear reactors.
Effective: Spring 2007
Prerequisite: MATSE 409 or MATSE 420

MATSE 526 (E E 526) Nonlinear Optical Materials (3) Mechanisms of polarization nonlinearity, nonlinearity, nonlinear optical processes and analyses, optoelectronic materials and their device application.
Effective: Spring 2006
Prerequisite: E E 420 or MATSE 435

MATSE 530 X-Ray Crystallography and Diffraction (3) Reciprocal lattices and the Ewald sphere construction; crystal structure determination by powder and single crystal techniques; space groups.
Effective: Fall 2003
Prerequisite: MATSE 430

MATSE 531 Transmission Electron Microscopy (3) Diffraction pattern analysis and simple contrast theory applied to the structures of materials; analytical techniques in the microscope.
Effective: Fall 2003

MATSE 535 Geometrical Crystallography (3) Derivation of lattices, types, point groups, and space groups; and group theory applied to crystallography and spectroscopy.
Effective: Spring 2003

MATSE 536 Techniques for Surface Analysis (3) Electron spectroscopy, low-energy ion-beam techniques, high-energy ion-beam techniques, low-energy electron diffraction, and ellipsometry.
Effective: Spring 2007
Prerequisite: PHYS 203 or PHYS 204

MATSE 540 Crystal Anisotropy (3) Symmetry aspects of crystals and physical properties. Matrix and tensor methods.
Effective: Spring 2003
Prerequisite: PHYS 412

MATSE 542 Polymeric Materials: The Solid State (3) Introduction to the fundamental concepts necessary to understand solid state structure and properties of polymer materials.
Effective: Summer 2004
Prerequisite: MATSE 443 and MATSE 445 or equivalent

MATSE 543 (CHEM 543) Polymer Chemistry (3) This graduate course discusses recent advances in polymer chemistry that leads to new polymeric materials with interesting structures and properties.
Effective: Spring 2005
Prerequisite: MATSE 441 or approval of program

MATSE 544 Computational Materials Science of Soft Materials (3) Pursue applications of computational modeling methods to soft materials; explore use of these methods to different research areas.
Effective: Summer 2009

MATSE 545 Mechanical Properties of Ceramics I (3) Theoretical considerations of the crystallographic and microstructural aspects of the elastic properties and fracture characteristics of ceramics.
Effective: Spring 2003

MATSE 547 Thermophysical Properties of Ceramics (3) Heat capacity, heat of fusion, thermal conductivity, and thermal expansion in relation to macroscopic measurements and basic atomic concepts applied to ceramic materials.
Effective: Spring 2003

MATSE 548 Dielectric and Other Electroceramics (3) Preparation and properties of ceramic semiconductors, dielectrics, and magnetic materials.
Effective: Spring 2003

MATSE 549 Composite Materials (3) Manufacturing processes, atomic and molecular background, and topological relationships of macro- and microstructure to the physical properties of composites.
Effective: Spring 2003

MATSE 551 Chemical Routes to Engineered Materials (3) Formation of ceramics by reaction bonding, sol-gel processing, hydrothermal synthesis, controlled oxidation processes, biological mineralization; relevant multicomponent phase equilibria and interfacial phenomena.
Effective: Spring 2003

MATSE 552 Sintering of Ceramics (3) Design and interpretation of ceramic microstructures through an understanding of the physics and chemistry of sintering and grain growth.
Effective: Spring 2003
Prerequisite: MATSE 411

MATSE 554 Electronic Spectra of Materials (3) Crystallographic and thermodynamic applications of crystal field theory. Electronic spectra of crystals and glasses. Luminescent spectra and phosphor characterization.
Effective: Spring 2003
Prerequisite: PHYS 471

MATSE 555 (PHYS 555) Polymer Physics I (3) Introduction to the fundamental concepts needed to understand the physics applicable to polymer melts, solutions and gels.
Effective: Spring 2006

MATSE 560 (MN PR 507) Hydrometallurgical Processing (3) Fundamental physico-chemical factors underlying the aqueous extraction and recovery of metals and nonmetals from ores, minerals, and scrap metal.
Effective: Fall 2003
Prerequisite: MATSE 426

MATSE 561 Metal Electrode Reactions (2-3) Evaluation of electrode reaction mechanisms and kinetics at metal/electrolyte interfaces relevant to corrosion and industrial electrolyte processes.
Effective: Spring 2003
Prerequisite: MATSE 421

MATSE 562 Solid to Solid Phase Transformations (3) Mechanisms and rate-determining factors in solid-phase reactions in metals; diffusion processes, nucleation theory, precipitations from solid solution, eutectoid decomposition and order-disorder phenomena.
Effective: Spring 2003

MATSE 563 (E MCH 534) Micromechanisms of Fracture (3) Mechanisms of fracture and their relationship to loading conditions, environment, flow behavior, processing history, and microstructure.
Effective: Spring 2003
Prerequisite: E SC 414M, MATSE 424

MATSE 564 (E MCH 535) Deformation Mechanisms in Materials (3) Deformation of crystalline/amorphous solids and relationship to structure; elastic, viscoelastic and plastic response over a range of temperatures and strain rates.
Effective: Fall 2004
Prerequisite: E SC 414M or MATSE 436

MATSE 565 Metals in Electronics (3) Processing and performance of metals in electronics, covering electrical resistivity, metal film deposition, metal/semiconductor contacts, interconnects, and electronic packaging.
Effective: Summer 2002

MATSE 570 (EME 570) Catalytic Materials (3) Preparation and characterization of solid catalytic materials and the relationships between their surface, defect, and electronic properties and catalytic activity.
Effective: Fall 2008
Prerequisite: CHEM 452 or similar course in chemical materials or energy sciences and engineering

MATSE 575 Functional Polymeric Materials (3) In-depth discussions of structure/property relationships in functional polymers and modern concepts of polymerization methods.
Effective: Spring 2006

MATSE 580 Computational Thermodynamics (3) The integration of fundamental principles and advanced computational approaches in the thermodynamics of materials, including hands-on computation, theory and application.
Effective: Summer 2007

Prerequisite: MATSE 501 or equivalent

MATSE 581 Computational Materials Science II: Continuum, Mesoscale Simulations (3) This course will focus on computational techniques and fundamentals of phase transformation simulations on the continuum, mesoscale level.

Effective: Spring 2008

Prerequisite: MATSE 501 and MATSE 503

MATSE 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 2004

MATSE 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2004

MATSE 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Spring 2003

MATSE 597A Future Faculty Seminar (1) Seminars, panel discussions, and short assignments to help prepare students for a career in academia.

Effective: Summer 2011 Ending: Summer 2011

MATSE 597A (E E 597C) Semiconductor Characterization (3) This course is designed to familiarize graduate students with fundamental concepts and techniques in the characterization of semiconductor materials.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATSE 597A Dispersion of Inorganic Powders in Liquids (3) Principles of colloid and interfacial science used to disperse ceramic and metal powders in liquids with practical examples.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MATSE 597B Microwave Processing of Materials: Theory and Practice (3) It is the new developments (and innovative ideas) in the area of materials processing which have had the most profound and wide-ranging impacts on satisfying the growing and challenging demands for better performance and cheaper products in various fields.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATSE 597C Quantum Mechanics for Materials Scientists and Engineers (3) Introduction to the concepts of quantum mechanics and application to problems in materials science with emphasis on solid state materials.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATSE 597D Professional Development (1) Professional principles in the conduct and ethics of research management, research dissemination/publication, and intellectual property.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MATSE 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Spring 2003

MATSE 600 Thesis Research (1-15) No description.

Effective: Spring 2004

MATSE 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Spring 2004

MATSE 602 Supervised experience in college teaching (1-3 per semester/maximum of 6) Supervised assistance with the teaching program in metallurgy.

Effective: Spring 2004

MATSE 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Spring 2007

MATSE 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 2008

Last Import from UCM: June 16, 2011 3:00 AM

Mathematics (MATH)

MATH 401 Introduction to Analysis I (3) Review of calculus, properties of real numbers, infinite series, uniform convergence, power series. Students who have passed Math. 403 may not schedule this course.

Effective: Fall 1983

Prerequisite: MATH 230 or MATH 231

MATH 403 Classical Analysis I (3) Topology of \mathbb{R}^n , compactness, continuity of functions, uniform convergence, Arzela-Ascoli theorem in the plane, Stone-Weierstrass theorem.

Effective: Spring 1996

Prerequisite: MATH 312

MATH 403H Honors Classical Analysis I (3) Development of a thorough understanding and technical mastery of foundations of classical analysis in the framework of metric spaces.

Effective: Spring 2010

Prerequisite: MATH 311M, MATH 312H

MATH 404 Classical Analysis II (3) Differentiation of functions from \mathbb{R}^n to \mathbb{R}^m , implicit function theorem, Riemann integration, Fubini's theorem, Fourier analysis.

Effective: Fall 1985

Prerequisite: MATH 403

MATH 405 Advanced Calculus for Engineers and Scientists I (3) Vector calculus, linear algebra, ordinary and partial differential equations. Students who have passed MATH 411 or 412 may not take this course for credit.

Effective: Spring 1994

Prerequisite: MATH 231; MATH 250 or MATH 251

MATH 406 Advanced Calculus for Engineers and Scientists II (3) Complex analytic functions, sequences and series, residues, Fourier and Laplace transforms. Students who have passed MATH 421 may not take this course for credit.

Effective: Spring 1994

Prerequisite: MATH 405

MATH 408 Advanced Calculus (3) Differential and integral calculus of functions of several variables, line and surface integrals, infinite series, series of functions, power series.

Effective: Spring 2007

Prerequisite: MATH 141

MATH 411 Ordinary Differential Equations (3) Linear ordinary differential equations; existence and uniqueness questions; series solutions; special functions; eigenvalue problems; Laplace transforms; additional topics and applications.

Effective: Fall 1983

Prerequisite: MATH 230 or MATH 231; MATH 250 or MATH 251

MATH 412 Fourier Series and Partial Differential Equations (3) Orthogonal systems and Fourier series; derivation and classification of partial differential equations; eigenvalue function method and its applications; additional topics.

Effective: Spring 2009

Prerequisite: MATH 230; MATH 250 or MATH 251

MATH 414 (STAT 414) Introduction to Probability Theory (3) Probability spaces, discrete and continuous random variables, transformations, expectations, generating functions, conditional distributions, law of large numbers, central limit theorems. Students may take only one course from MATH(STAT) 414 and 418 for credit.

Effective: Fall 2001

Prerequisite: MATH 230 or MATH 231

MATH 415 (STAT 415) Introduction to Mathematical Statistics (3) A theoretical treatment of statistical inference, including sufficiency, estimation, testing, regression, analysis of variance, and chi-square tests.

Effective: Fall 1989

Prerequisite: MATH 414

MATH 416 (STAT 416) Stochastic Modeling (3) Review of distribution models, probability generating functions, transforms, convolutions, Markov chains, equilibrium distributions, Poisson process, birth and death processes, estimation.

Effective: Spring 1984

Prerequisite: MATH 318 or MATH 414; MATH 230

MATH 417 Qualitative Theory of Differential Equations (3) Linear differential equations, stability of stationary solutions, ordinary bifurcation, exchange of stability, Hopf bifurcation, stability of periodic solutions, applications.

Effective: Spring 2009

Prerequisite: MATH 220; MATH 250 or MATH 251

MATH 418 (STAT 418) Probability (3) Fundamentals and axioms, combinatorial probability, conditional probability and independence, probability laws, random variables, expectation; Chebyshev's inequality. Students may take only one course from MATH(STAT) 414 and 418 for credit.

Effective: Fall 2001 Ending: Summer 2011

Prerequisite: MATH 230 or MATH 231

MATH 418 (STAT 418) Introduction to Probability and Stochastic Processes for Engineering (3) Introduction to probability axioms, combinatorics, random variables, limit laws, and stochastic processes.

Effective: Fall 2011 Future: Fall 2011
Prerequisite: MATH 230 or MATH 231

MATH 419 (PHYS 419) Theoretical Mechanics (3) Principles of Newtonian, Lagrangian, and Hamiltonian mechanics of particles with applications to vibrations, rotations, orbital motion, and collisions.

Effective: Spring 2007

Prerequisite: MATH 230 or MATH 231; MATH 250 or MATH 251; PHYS 212, PHYS 213 and PHYS 214

MATH 421 Complex Analysis (3) Infinite sequences and series; algebra and geometry of complex numbers; analytic functions; integration; power series; residue calculus; conformal mapping, applications.

Effective: Summer 1993

Prerequisite: MATH 230, MATH 232 or MATH 405; MATH 401 or MATH 403

MATH 422 Wavelets and Fourier Analysis: Theory and Applications (3) Fundamental mathematical issues of the theory of wavelets for senior undergraduate and graduate students in mathematics, engineering, physics, and computer science.

Effective: Summer 2000

Prerequisite: complete one of the following: MATH 312, MATH 401, MATH 403, MATH 405 or MATH 412

MATH 425 Introduction to Operations Research (3) Nature of operations research, problem formulation, model construction, deriving solution from models, allocation problems, general linear allocation problem, inventory problems.

Effective: Spring 2007 Ending: Fall 2011

Prerequisite: MATH 141

MATH 425 Introduction to Operations Research (3) Nature of operations research, problem formulation, model construction, deriving solution from models, allocation problems, general linear allocation problem, inventory problems.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: MATH 141 and MATH 220

MATH 426 Introduction to Modern Geometry (3) Plane and space curves; space surfaces; curvature; intrinsic geometry of surfaces; Gauss-Bonnet theorem; covariant differentiation; tensor analysis.

Effective: Spring 1994

Prerequisite: MATH 401 or MATH 403

MATH 427 Foundations of Geometry (3) Euclidean and various non-Euclidean geometries and their development from postulate systems. Students who have passed MATH 427 may not schedule MATH 471.

Effective: Spring 1994

Prerequisite: MATH 230 or MATH 231

MATH 428 Geometry for Teachers (1) Research in mathematics education using ideas from Euclidean and non-Euclidean geometry. Students who have passed MATH 471 may not schedule MTHBD 478.

Effective: Spring 2007

Prerequisite: MATH 311W. Prerequisite or concurrent: MATH 427

MATH 429 Introduction to Topology (3) Metric spaces, topological spaces, separation axioms, product spaces, identification spaces, compactness, connectedness, fundamental group.

Effective: Spring 1994

Prerequisite: MATH 311W

MATH 430 Linear Algebra and Discrete Models I (3) Vector spaces, linear transformations, matrices determinants, characteristic values and vectors, systems of linear equations, applications to discrete models.

Effective: Spring 2010

Prerequisite: MATH 220

MATH 431 Linear Algebra and Discrete Models II (3) Vector spaces and linear transformations, matrices, determinants, characteristic values and vectors, systems of linear equations, applications to discrete models.

Effective: Spring 2007

Prerequisite: MATH 430

MATH 435 Basic Abstract Algebra (3) Elementary theory of groups, rings, and fields. Students who have passed MATH 435 may not schedule MATH 470.

Effective: Fall 1983

Prerequisite: MATH 311W

MATH 435 Basic Abstract Algebra (3) Elementary theory of groups, rings, and fields. Students who have passed MATH 435 may not schedule MATH 470.

Effective: Spring 2010

Prerequisite: MATH 311W or MATH 315

MATH 436 Linear Algebra (3) Vector spaces and linear transformations, canonical forms of matrices, elementary divisors, invariant factors; applications. Students who have passed MATH 436 may not schedule MATH 441.

Effective: Fall 1983

Prerequisite: MATH 311W

MATH 437 Algebraic Geometry (3) Study of curves in the plane defined by polynomial equations $p(x,y) = 0$. Projective equivalence, singular points, classification of cubics.

Effective: Spring 2009

Prerequisite: MATH 230 or MATH 231; MATH 311W

MATH 441 Matrix Algebra (3) Determinants, matrices, linear equations, characteristic roots, quadratic forms, vector spaces. Students who have passed Math 436 may not schedule this course.

Effective: Fall 1985

Prerequisite: MATH 220

MATH 444 Mathematical Statistics and Applications I (3) Distributions of random variables, special distributions, limiting distributions, sampling, statistical inference, point and interval estimation, orthogonal polynomials, and least squares.

Effective: Spring 2007

Prerequisite: MATH 141

MATH 445 Mathematical Statistics and Applications II (3) Further topics in point estimation, statistical hypotheses, other statistical tests, nonparametric methods.

Effective: Spring 2007

Prerequisite: MATH 444

MATH 446 Introduction to Applied Statistics I (3) Descriptive statistics, probability theory, discrete and continuous probability distributions, statistical inferences for means and proportions.

Effective: Spring 2007

Prerequisite: MATH 022 or MATH 040

MATH 447 Introduction to Applied Statistics II (3) Regression, correlation, analysis of variance, contingency tables, nonparametric methods, time series, index numbers.

Effective: Spring 2007

MATH 448 Sampling Methods and Practice and Experimental Design (3) An introduction to the procedures and techniques of statistical sampling methods and experimental design.

Effective: Spring 2007

Prerequisite: MATH 444, MATH 445

MATH 449 Applied Ordinary Differential Equations (3) Differential and difference equations and their application to biology, chemistry, and physics; techniques in dynamical systems theory.

Effective: Spring 2007

Prerequisite: MATH 250 or MATH 251

MATH 450 Mathematical Modeling (3) Constructing mathematical models of physical phenomena; topics include pendulum motion, polymer fluids, chemical reactions, waves, flight, and chaos.

Effective: Spring 2007

Prerequisite: MATH 315 and MATH 430 or MATH 405 or MATH 412

MATH 451 (CMPSC 451) Numerical Computations (3) Algorithms for interpolation, approximation, integration, nonlinear equations, linear systems, fast FOURIER transform, and differential equations emphasizing computational properties and implementation. Students may take only one course for credit from MATH 451 and 455.

Effective: Spring 2008

Prerequisite: 3 credits of programming; MATH 230 or MATH 231

MATH 455 (CMPSC 455) Introduction to Numerical Analysis I (3) Floating point computation, numerical rootfinding, interpolation, numerical quadrature, direct methods for linear systems. Students may take only one course for credit from MATH 451 and MATH 455.

Effective: Spring 2008

Prerequisite: CMPSC 201, CMPSC 202 or CMPSC 121; MATH 220; MATH 230 or MATH 231

MATH 456 (CMPSC 456) Introduction to Numerical Analysis II (3) Polynomial and piecewise polynomial approximation, matrix least squares problems, numerical solution of eigenvalue problems, numerical solution of ordinary differential equations.

Effective: Spring 2008

Prerequisite: MATH 455

MATH 457 Introduction to Mathematical Logic (3) Propositional logic, first-order predicate logic, axioms and rules of inference, structures, models, definability, completeness, compactness.

Effective: Summer 2011

Prerequisite: MATH 311W ; 3 additional credits in philosophy

MATH 461 (PHYS 461) Theoretical Mechanics (3) Continuation of Math.(Phys.) 419. Theoretical treatment of dynamics of a rigid body, theory of elasticity, aggregates of particles, wave motion, mechanics of fluids.

Effective: Fall 1986

Prerequisite: MATH 419

MATH 465 Number Theory (3) Elements, divisibility of numbers, congruences, residues, and forms.

Effective: Spring 2009

Prerequisite: MATH 311W

MATH 467 (CMPSC 467) Factorization and Primality Testing (3) Prime sieves, factoring, computer numeration systems, congruences, multiplicative functions, primitive roots, cryptography, quadratic residues. Students who have passed MATH 465 may not schedule this course.

Effective: Spring 1995

Prerequisite: MATH 311W

MATH 468 Mathematical Coding Theory (3) Shannon's theorem, block codes, linear codes, Hamming codes, Hadamard codes, Golay codes, Reed-Muller codes, bounds on codes, cyclic codes.

Effective: Fall 1983

Prerequisite: MATH 311W ; advanced calculus

MATH 470 Algebra for Teachers (3) An introduction to algebraic structures and to the axiomatic approach, including the elements of linear algebra. Designed for teachers and prospective teachers. Students who have passed Math 435 may not schedule this course.

Effective: Fall 1988

Prerequisite: MATH 311W

MATH 471 Geometry for Teachers (4) Problem solving oriented introduction to Euclidean and non-Euclidean geometries; construction problems and geometrical transformations via "Geometer's Sketchpad" software. Intended primarily for those seeking teacher certification in secondary mathematics. Students who have passed MATH 427 may not schedule this course.

Effective: Spring 1996

Prerequisite: MATH 311W

MATH 475 (US;IL) Introduction to the History of Mathematics (3) A global survey of the history of mathematics as viewed as a human response to cultural, political, economic, and societal pressures.

Effective: Spring 2010

Prerequisite: CMATH 221 or MATH 141

MATH 475W (US;IL) History of Mathematics (3) A global survey of the history of mathematics as viewed as a human response to cultural, political, economic, and societal pressures.

Effective: Spring 2010 Ending: Fall 2011

Prerequisite: MATH 141

MATH 475W (US;IL) History of Mathematics (3) A global survey of the history of mathematics as viewed as a human response to cultural, political, economic, and societal pressures.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: MATH 315 or MATH 311W

MATH 479 (PHYS 479) Special and General Relativity (3) Mathematical description, physical concepts, and experimental tests of special and general relativity.

Effective: Spring 2007

Prerequisite: PHYS 237, PHYS 400, PHYS 419; MATH 250 or MATH 251; MATH 230 or MATH 231

MATH 482 Mathematical Methods of Operations Research (3) Survey of linear and nonlinear programming; mathematics of optimization; queues; simulation.

Effective: Spring 2007

Prerequisite: MATH 220, MATH 230, STAT 301

MATH 484 Linear Programs and Related Problems (3) Introduction to theory and applications of linear programming; the simplex algorithm and newer methods of solution; duality theory.

Effective: Spring 1987

Prerequisite: MATH 220; MATH 230 or MATH 231

MATH 485 Graph Theory (3) Introduction to the theory and applications of graphs and directed graphs. Emphasis on the fundamental theorems and their proofs.

Effective: Spring 1987

Prerequisite: MATH 311W

MATH 486 Mathematical Theory of Games (3) Basic theorems, concepts, and methods in the mathematical study of games of strategy; determination of optimal play when possible.

Effective: Spring 2006

Prerequisite: MATH 220

MATH 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 1995

MATH 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

MATH 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2007

Prerequisite: prior approval of proposed assignment by instructor

MATH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

MATH 496A Sheffer Sequences (1-6) Investigating the Sheffer Sequences.

Effective: Summer 2011 Ending: Summer 2011

MATH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

MATH 497A Introduction to Ramsey Theory (4) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 497B Spaces: From Analysis to Geometry and Back (4) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 497C From Euclid to Alexandrov; A Guided Tour (4) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 497D MASS Interdisciplinary Seminar (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 497E MASS Colloquium (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

MATH 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

MATH 501 Complex and Real Analysis I (3) Cauchy's theorem, Laurent expansion, residue calculus, harmonic functions, conformal mapping, measure and integration, convergence theorems, LP spaces, Hilbert spaces.
Effective: Spring 1994
Prerequisite: MATH 404

MATH 502 Complex and Real Analysis II (3) Fourier analysis, Fubini's theorem, Hahn-Banach theorem, open mapping theorem, uniform boundedness principle, dual spaces, selected topics from functional analysis.
Effective: Spring 1992
Prerequisite: MATH 501

MATH 503 Functional Analysis (3) Topological vector spaces, completeness, convexity, duality, Banach algebras, bounded operators on Hilbert space, the spectral theorem, unbounded operators, applications.
Effective: Spring 1992
Prerequisite: MATH 502

MATH 504 Analysis in Euclidean Space (3) The Fourier transform in L^1 and L^2 and applications, interpolation of operators, Riesz and Marcinkiewicz theorems, singular integral operators.
Effective: Spring 1992
Prerequisite: MATH 502

MATH 505 Mathematical Fluid Mechanics (3) Kinematics, balance laws, constitutive equations; ideal fluids, viscous flows, boundary layers, lubrication; gas dynamics.
Effective: Spring 1992
Prerequisite: MATH 402 or MATH 404

MATH 506 Ergodic Theory (3) Measure-preserving transformations and flows, ergodic theorems, ergodicity, mixing, weak mixing, spectral invariants, measurable partitions, entropy, Ornstein isomorphism theory.
Effective: Spring 1992
Prerequisite: MATH 502

MATH 507 Dynamical Systems I (3) Fundamental concepts; extensive survey of examples; equivalence and classification of dynamical systems, principal classes of asymptotic invariants, circle maps.
Effective: Spring 1992
Prerequisite: MATH 502

MATH 508 Dynamical Systems II (3) Hyperbolic theory; stable manifolds, hyperbolic sets, attractors, Anosov systems, shadowing, structural stability, entropy, pressure, Lyapunov characteristic exponents and non-uniform hyperbolicity.
Effective: Spring 1992
Prerequisite: MATH 507

MATH 509 Linear Analysis and Applications I (3) Vector spaces, linear transformations, integration, Fourier and Laplace transforms, distributions, differential operators.
Effective: Spring 1992
Prerequisite: MATH 401, MATH 411 or MATH 412

MATH 510 Linear Analysis and Applications II (3) Integral equations, compact operators, variational methods, partial

differential equations.
Effective: Spring 1992
Prerequisite: MATH 509

MATH 511 Ordinary Differential Equations I (3) Existence and uniqueness, linear systems, series methods, Poincare-Bendixson theory, stability.
Effective: Spring 1992
Prerequisite: MATH 411 or MATH 412

MATH 512 Ordinary Differential Equations II (3) Floquet theory, regular and singular boundary value problems, Green's functions, eigenfunction expansions.
Effective: Spring 1992
Prerequisite: MATH 511

MATH 513 Partial Differential Equations I (3) First order equations, the Cauchy problem, Cauchy-Kowalevski theorem, Laplace equation, wave equation, heat equation.
Effective: Spring 1992
Prerequisite: MATH 411 or MATH 412

MATH 514 Partial Differential Equations II (3) Sobolev spaces and Elliptic boundary value problems, Schauder estimates. Quasilinear symmetric hyperbolic systems, conservation laws.
Effective: Spring 1992
Prerequisite: MATH 502, MATH 513

MATH 515 Classical Mechanics and Variational Methods (3) Introduction to the calculus of variations, variational formulation of Lagrangian mechanics, symmetry in mechanical systems, Legendre transformation, Hamiltonian mechanics, completely integrable systems.
Effective: Spring 1992
Prerequisite: MATH 401, MATH 411 or MATH 412

MATH 516 Stochastic Processes (3) Markov chains; generating functions; limit theorems; continuous time and renewal processes; martingales, submartingales, and supermartingales; diffusion processes; applications.
Effective: Summer 1995
Prerequisite: MATH 416

MATH 517 (STAT 517) Probability Theory (3) Measure theoretic foundation of probability, distribution functions and laws, types of convergence, central limit problem, conditional probability, special topics.
Effective: Summer 2000
Prerequisite: MATH 403

MATH 518 (STAT 518) Probability Theory (3) Measure theoretic foundation of probability, distribution functions and laws, types of convergence, central limit problem, conditional probability, special topics.
Effective: Fall 1983
Prerequisite: STAT 517

MATH 519 (STAT 519) Topics in Stochastic Processes (3) Selected topics in stochastic processes, including Markov and Wiener processes; stochastic integrals, optimization, and control; optimal filtering.
Effective: Fall 1984
Prerequisite: STAT 516, STAT 517

MATH 521 Complex Analysis: Theory and Applications I (3) Conformal mappings, Schwarz-Cristoffel transformations, Dirichlet and Neumann problems, electrostatics and fluid flow, transform methods, asymptotic methods, Runge approximation theorems.
Effective: Spring 1992
Prerequisite: MATH 502

MATH 522 Complex Analysis: Theory and Applications II (3) Factorization theorems, prime number theorem, Mittag-Leffler theorem, Nevanlinna theory, Riemann surfaces, Hartog's theorems holomorphic mappings and automorphisms of bounded domains.
Effective: Spring 1992
Prerequisite: MATH 521

MATH 523 Numerical Analysis I (3) Approximation and interpolation, numerical quadrature, direct methods of numerical linear algebra, numerical solutions of nonlinear systems and optimization.
Effective: Summer 2002
Prerequisite: MATH 456

MATH 524 Numerical Analysis II (3) Iterative methods in linear algebra, numerical solution of ordinary and partial differential equations.
Effective: Summer 2002
Prerequisite: MATH 523

MATH 525 Theory of Functions of Several Complex Variables (3) Fundamental properties of holomorphic functions, reproducing kernels, integral representations, domain of holomorphy and pseudoconvexity, Weierstrass preparation theorem, complex manifolds.
Effective: Spring 1992
Prerequisite: MATH 502

MATH 527 Geometry and Topology I (3) Topological spaces and continuous mappings, connectedness, compactness and separation, fundamental groups, Jordan curve theorem, singular homology, Brouwer fixed point theorem.
Effective: Spring 1992

Prerequisite: MATH 429

MATH 528 Geometry and Topology II (3) Manifolds, differentiable structures, implicit function theorem, vector fields and differential equations, differential forms, Poincare Lemma, integration, Stokes theorem, DeRham's theorem.

Effective: Spring 1992

Prerequisite: MATH 527

MATH 529 Algebraic Topology (3) Manifolds, Poincare duality, vector bundles, Thom isomorphism, characteristic classes, classifying spaces for vector bundles, discussion of bordism, as time allows.

Effective: Spring 1992

Prerequisite: MATH 528

MATH 530 Differential Geometry (3) Distributions and Frobenius theorem, curvature of curves and surfaces, Riemannian geometry, connections, curvature, Gauss-Bonnet theorem, geodesic and completeness.

Effective: Spring 1992

Prerequisite: MATH 528

MATH 531 Differential Topology (3) DeRham's theorem, geometry of smooth mappings, critical values, Sard's theorem, Morse functions, degree of mappings, smooth fiber bundles.

Effective: Spring 1992

Prerequisite: MATH 528

MATH 533 Lie Theory I (3) Lie groups, lie algebras, exponential mappings, subgroups, subalgebras, simply connected groups, adjoint representation, semisimple groups, infinitesimal theory, Cartan's criterion.

Effective: Spring 1992

Prerequisite: MATH 528

MATH 534 Lie Theory II (3) Representations of compact lie groups and semisimple lie algebras, characters, orthogonality, Peter-Weyl theorem, Cartan-Weyl highest weight theory.

Effective: Spring 1992

Prerequisite: MATH 533

MATH 535 Algebra (3) Permutation groups, Sylow theorems, Jordan-Holder theorem, polynomial rings, unique factorization domains, algebraic and transcendental field extensions, Galois theory.

Effective: Fall 1983

Prerequisite: MATH 435 and a course in linear algebra

MATH 536 Algebra (3) Permutation groups, Sylow theorems, Jordan-Holder theorem, polynomial rings, unique factorization domains, algebraic and transcendental field extensions, Galois theory.

Effective: Fall 1983

Prerequisite: MATH 535

MATH 537 Field Theory (3) Finite and infinite algebraic extensions; cyclotomic fields; transcendental extensions; bases of transcendence, Luroth's theorem, ordered fields, valuations; formally real fields.

Effective: Fall 1983

Prerequisite: MATH 536

MATH 538 Commutative Algebra (3) Topics selected from Noetherian rings and modules, primary decompositions, Dedekind domains and ideal theory, other special types of commutative rings or fields.

Effective: Winter 1978

Prerequisite: MATH 536

MATH 539 Ring Theory (3) Selected topics including Noetherian and Artinian modules and rings, semisimple rings, Wedderburn theorems, Jacobson radical and density theorem.

Effective: Fall 1983

Prerequisite: MATH 536

MATH 540 Ring Theory (3) Selected topics including Noetherian and Artinian modules and rings, semisimple rings, Wedderburn theorems, Jacobson radical and density theorem.

Effective: Fall 1983

Prerequisite: MATH 539

MATH 542 Group Theory I (3) Topics selected by instructor from abelian, solvable, and nilpotent groups; finite presentations; free products; group extensions; group representations.

Effective: Fall 1983

Prerequisite: MATH 535

MATH 543 Group Theory II (3) Topics selected by instructor from abelian, solvable, and nilpotent groups; finite presentations; free products; group extensions; group representations.

Effective: Fall 1983

Prerequisite: MATH 542

MATH 544 Applied Algebra (3) Basic algorithms of algebra, application to number theory, group theory, field theory, linear algebra, and combinatorics.

Effective: Spring 1992

Prerequisite: MATH 435, MATH 436 ability to use a computer

MATH 546 Semigroup Theory and Applications (3) Basic algebraic properties of semigroups, finite transformation semigroups, free semigroups. Applications to automata theory, formal languages, and combinatorics.

Effective: Fall 1983

Prerequisite: MATH 435, MATH 535

MATH 547 Algebraic Geometry I (3) Affine and projective algebraic varieties; Zariski topology; Hilbert Nullstellensatz; regular functions and maps; birationality; smooth varieties normalization; dimension.
Effective: Spring 1992
Prerequisite: MATH 536

MATH 548 Algebraic Geometry II (3) Topics may include algebraic curves, Riemann-Roch theorem, linear systems and divisors, intersection theory, schemes, sheaf cohomology, algebraic groups.
Effective: Spring 1992
Prerequisite: MATH 547

MATH 549 Mathematical Programming (3) Quadratic and convex programming, integer and combinatorial programming, dynamic and stochastic programming.
Effective: Spring 1992
Prerequisite: MATH 484

MATH 550 (CSE 550) Numerical Linear Algebra (3) Solution of linear systems, sparse matrix techniques, linear least squares, singular value decomposition, numerical computation of eigenvalues and eigenvectors.
Effective: Summer 1996
Prerequisite: MATH 441 or MATH 456

MATH 551 (CSE 551) Numerical Solution of Ordinary Differential Equations (3) Methods for initial value and boundary value problems; convergence and stability analysis, automatic error control, stiff systems, boundary value problems.
Effective: Summer 1996
Prerequisite: MATH 451 or MATH 456

MATH 552 (CSE 552) Numerical Solution of Partial Differential Equations (3) Finite difference methods for elliptic, parabolic, and hyperbolic differential equations; solutions techniques for discretized systems; finite element methods for elliptic problems.
Effective: Summer 1996
Prerequisite: MATH 402 or MATH 404; MATH 451 or MATH 456

MATH 553 (CSE 553) Introduction to Approximation Theory (3) Interpolation; remainder theory; approximation of functions; error analysis; orthogonal polynomials; approximation of linear functionals; functional analysis applied to numerical analysis.
Effective: Summer 1996
Prerequisite: MATH 401 3 credits of computer science and engineering

MATH 554 Approximation Theory (3) Approximation in normed spaces; existence, uniqueness, characterization, computation of best approximations; error bounds; degree of approximation; approximation of linear functionals.
Effective: Spring 1992
Prerequisite: MATH 451 or MATH 456; MATH 501

MATH 555 (CSE 555) Numerical Optimization Techniques (3) unconstrained and constrained optimization methods, linear and quadratic programming, software issues, ellipsoid and Karmarkar's algorithm, global optimization, parallelism in optimization.
Effective: Summer 1996
Prerequisite: MATH 456

MATH 556 (CSE 556) Finite Element Methods (3) Sobolev spaces, variational formulations of boundary value problems; piecewise polynomial approximation theory, convergence and stability, special methods and applications.
Effective: Summer 1996
Prerequisite: MATH 502, MATH 552

MATH 557 Mathematical Logic (3) The predicate calculus; completeness and compactness; Godel's first and second incompleteness theorems; introduction to model theory; introduction to proof theory.
Effective: Spring 1992
Prerequisite: MATH 435 or MATH 457

MATH 558 Foundations of Mathematics I (3) Decidability of the real numbers; computability; undecidability of the natural numbers; models of set theory; axiom of choice; continuum hypothesis.
Effective: Spring 1992
Prerequisite: any 400 level math course

MATH 559 Recursion Theory I (3) Recursive functions; degrees of unsolvability; hyperarithmetic theory; applications to Borel combinatorics. Computational complexity. Combinatory logic and the Lambda calculus.
Effective: Summer 2011
Prerequisite: MATH 557 or MATH 558

MATH 560 Recursion Theory II (3) Recursive functions; degrees of unsolvability. Hyperarithmetic theory; applications to Borel combinatorics. Computational complexity. Combinatory logic and the Lambda calculus.
Effective: Summer 2011
Prerequisite: MATH 557 or MATH 558

MATH 561 Set Theory I (3) Models of set theory. Inner models, forcing, large cardinals, determinacy. Descriptive set theory. Applications to analysis.
Effective: Spring 1992
Prerequisite: MATH 557 or MATH 558

MATH 562 Set Theory II (3) Models of set theory. Inner models, forcing, large cardinals, determinacy. Descriptive set theory. Applications to analysis.

Effective: Spring 1992

Prerequisite: MATH 557 or MATH 558

MATH 563 Model Theory I (3) Interpolation and definability; prime and saturated models; stability; additional topics; applications to algebra.

Effective: Spring 1992

Prerequisite: MATH 557

MATH 564 MODEL THEORY II (3) Interpolation and definability; prime and saturated models; stability; additional topics; applications to algebra.

Effective: Spring 1992

Prerequisite: MATH 557

MATH 565 Foundations of Mathematics II (3) Subsystems of second order arithmetic; set existence axioms; reverse mathematics; foundations of analysis and algebra.

Effective: Spring 1992

Prerequisite: MATH 557, MATH 558

MATH 567 Number Theory I (3) Congruences, quadratic residues, arithmetic functions, partitions, classical multiplicative ideal theory, valuations and p-adic numbers; primes in arithmetic progression, distribution of primes.

Effective: Spring 1994

Prerequisite: MATH 421

MATH 568 Number Theory II (3) Congruences, quadratic residues, arithmetic functions, partitions, classical multiplicative ideal theory, valuations and p-adic numbers; primes in arithmetic progression, distribution of primes.

Effective: Spring 1994

Prerequisite: MATH 421

MATH 569 Algebraic Number Theory I (3) Dedekind rings; cyclotomic and Kummer extensions; valuations; ramification, decomposition, inertial groups; Galois extensions; locally compact groups of number theory.

Effective: Spring 1992

Prerequisite: MATH 536, MATH 568

MATH 570 Algebraic Number Theory II (3) Topics chosen from class field theory; integral quadratic forms; algebraic and arithmetic groups; algebraic function of one variable.

Effective: Spring 1992

Prerequisite: MATH 569

MATH 571 Analytic Number Theory I (3) Improvements of the prime number theorem, L-functions and class numbers, asymptotic and arithmetic properties of coefficients of modular forms.

Effective: Spring 1994

Prerequisite: MATH 421

MATH 572 Analytic Number Theory II (3) Distribution of primes, analytic number theory in algebraic number fields, transcendental numbers, advanced theory of partitions.

Effective: Spring 1992

Prerequisite: MATH 571

MATH 574 Topics in Logic and Foundations (3-6 per semester) Topics in mathematical logic and the foundations of mathematics.

Effective: Spring 1992

Prerequisite: MATH 558

MATH 577 (M E 577) Stochastic Systems for Science and Engineering (3) The course develops the theory of stochastic processes and linear and nonlinear stochastic differential equations for applications to science and engineering.

Effective: Summer 1998

Prerequisite: MATH 414 or MATH 418; M E 550 or MATH 501

MATH 580 Introduction to Applied Mathematics I (3) A graduate course of fundamental techniques including tensor, ordinary and partial differential equations, and linear transforms.

Effective: Fall 2003

Prerequisite: Basic knowledge of linear algebra vector calculus and ODE MATH 405

MATH 581 Introduction to Applied Mathematics II (3) A graduate course of fundamental techniques including Ordinary, Partial, and Stochastic Differential Equations, Wavelet Analysis, and Perturbation Theory.

Effective: Summer 2003

Prerequisite: MATH 580 or consent of instructor

MATH 582 Introduction to C* Algebra Theory (3) Basic properties of C* algebras, representation theory, group C* algebras and crossed products, tensor products, nuclearity and exactness.

Effective: Summer 2006

Prerequisite: MATH 503

MATH 583 Introduction to K-Theory (3) K-theory groups for compact spaces and C*-algebras. Long exact sequences, Bott periodicity, index theory and the Pimsner-Voiculescu theorem.

Effective: Summer 2006

Prerequisite: MATH 503

MATH 584 Introduction to von Neumann Algebras (3) Comparison of projections, traces, tensor products, ITPFI factors and crossed products, the Jones index, modular theory, free probability.

Effective: Summer 2006

Prerequisite: MATH 503

MATH 588 (CSE 588) Complexity in Computer Algebra (3) Complexity of integer multiplication, polynomial multiplication, fast Fourier transform, division, calculating the greatest common divisor of polynomials.

Effective: Spring 2008

Prerequisite: CMPSC 465

MATH 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 1987

MATH 591 Mathematics Seminar (1-6) Selected topics from recent mathematical developments.

Effective: Fall 1983

MATH 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

MATH 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

MATH 597A Representation Theory (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 597A Graduate Student Seminar (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MATH 597B Toric Varieties (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 597B Modular Forms (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MATH 597C Introduction to Continuum Mechanics/Calculus of Variations (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 597C Representation Theory (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MATH 597D Multigrid (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MATH 597D Multiscale Modeling & Analysis (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MATH 597E Advanced Topics in Logic (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MATH 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Spring 1994

MATH 599 (IL) Foreign Studies (1-12 per semester, maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.

Effective: Summer 2005

MATH 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

MATH 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Winter 1978

MATH 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching of mathematics undergraduate recitation classes with senior faculty instruction supervision.
Effective: Fall 1983

MATH 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

MATH 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Winter 1978

NOTE: Courses in computer science and statistics are listed separately.

Last Import from UCM: June 16, 2011 3:00 AM

Mathematics Education (MTHED)

MTHED 411 Teaching Secondary Mathematics I (3) Conditions for learning mathematics; problem solving; subject matter types; curriculum; learning goals; nature and history of mathematics at secondary level

Effective: Spring 2007

Prerequisite: acceptance into Secondary Education/Mathematics Option certification program; C I 295 ; a grade of C or better in CMPSC 101, MATH 140, MATH 141, MATH 220, MATH 230, MATH 311W Concurrent: MTHED 427

MTHED 412W Teaching Secondary Mathematics II (3) Assessing learning and instruction; methods of evaluation and grading; long-term planning; accommodating needs of diverse learners; connecting theory and practice.

Effective: Summer 2010

Prerequisite: a grade of C or better in MTHED 411 Concurrent: C I 495C C I 412W

MTHED 420 Teaching Mathematics in the Elementary Schools (3) Strategies for teaching mathematics at the elementary school level; analysis of the philosophy and content of contemporary programs of instruction.

Effective: Spring 2007

Prerequisite: LL ED 400, LL ED 401, LL ED 402 ; a grade of C or better required in MATH 200; PSYCH 212 Concurrent: C I 495B ; C I 495A or SS ED 430W SCIED 458

MTHED 424 Contemporary School Mathematics Programs (3) In-depth analysis of school mathematics programs and the factors and forces influencing them; contemporary curriculum developments.

Effective: Summer 2010

Prerequisite: MTHED 412W or MTHED 420

MTHED 427 Teaching Mathematics in Technology-Intensive Environments (3) Interaction among pedagogy, content, and technology in mathematics teaching and learning in technology-intensive environments; secondary, early college curricula; laboratory experience.

Effective: Spring 2007

Prerequisite: acceptance into Secondary Education/Mathematics Option certification program; C I 295 ; a grade of C or better in CMPSC 101, MATH 140, MATH 141, MATH 220, MATH 230, MATH 311W Concurrent: MTHED 411

MTHED 430 Students' Mathematical Thinking (3 per semester, maximum of 6) Develop abilities in planning, conducting, and interpreting mathematics interviews to gain an understanding of students' thinking processes and current knowledge.

Effective: Summer 1994

Prerequisite: C I 495D, C I 495E or experience teaching mathematics

MTHED 431 Data Analysis in Secondary School Mathematics (3) Intense development of foundations of data analysis for secondary mathematics as a process using statistical concepts for predictions and inferences.

Effective: Summer 2006

Prerequisite: CMPSC 101 or equivalent; at least 18 credits of mathematics at or above the calculus level; acceptance into secondary mathematics certification program or permission of program

MTHED 432 Mathematical Modeling in Secondary School Mathematics (3) Students work from teaching and curricular perspective to explore and apply school and undergraduate mathematics to model real-world phenomena.

Effective: Summer 2006

Prerequisite: CMPSC 101 or equivalent; at least 18 credits of mathematics at or above the calculus level; acceptance into secondary mathematics certification program or permission of program

MTHED 433 Function Concept in Secondary School Mathematics (3) This course develops the concept of function as an essential topic that underlies and connects school and collegiate mathematics.

Effective: Summer 2006

Prerequisite: CMPSC 101 or equivalent; at least 18 credits of mathematics at or above the calculus level; acceptance into secondary mathematics certification program or permission of program

MTHED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

MTHED 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

MTHED 497A Reasoning-and-Proving in Secondary Mathematics (3) What is reasoning-and-proving? How do grades 6-12 students benefit from, and teachers support, students' capacity to R&P?

Effective: Summer 2011 Ending: Summer 2011

MTHED 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

MTHED 498A AP Statistics (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 2011 Ending: Summer 2011

MTHED 498B AP Calculus AB (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

MTHED 501 Foundations of Mathematics Education I: Learning (3) This course focuses on understanding and application of theories of mathematical thinking and learning in research and practice.
Effective: Summer 2007
Prerequisite: acceptance in Mathematics Education Emphasis Area/Curriculum and Instruction Ph.D. program

MTHED 502 Foundations of Mathematics Education II: Teaching (3) Teaching is the object of study encountered through connections among classical and contemporary theories of teaching and research on teaching.
Effective: Summer 2007
Prerequisite: acceptance in Mathematics Education Emphasis Area/Curriculum and Instruction Ph.D.

MTHED 503 Foundations of Mathematics Education III: Curriculum (3) Study of mathematics curriculum blends historical trends and current issues with research literature and techniques to study effects of innovations.
Effective: Summer 2007
Prerequisite: acceptance in Mathematics Education Emphasis Area/Curriculum and Instruction Ph.D.

MTHED 504 Foundations of Mathematics IV: Teacher Development and Policy (3) Nature and study of teacher education and professional development programs and projects coupled with policy and impact in mathematics education.
Effective: Summer 2007
Prerequisite: acceptance in Mathematics Education Emphasis Area/Curriculum and Instruction Ph.D.

MTHED 520 Analysis of Research in Mathematics Education (3) Survey of the status of knowledge about mathematics learning and instruction, K-12; analysis of research procedures; instruments for evaluating research.
Effective: Summer 2010
Prerequisite: MTHED 412W or MTHED 420 ; 3 credits in statistics; teaching experience

MTHED 523 Projects in Mathematics Education Research, Curriculum Development, and Evaluation (1-3 per semester, maximum of 24) Conceptualizing, designing, conducting, and reporting mathematics education research, curriculum development and/or evaluation projects.
Effective: Spring 1997
Prerequisite: enrollment in Curriculum and Instruction graduate program and by permission of the Mathematics Education emphasis area; course in psychological foundations and course in qualitative or quantitative research foundation

MTHED 525 Research Participation in School Mathematics Curriculum Construction (3) Development of theoretical bases for the construction of instructional materials in mathematics; research participation in preparing and testing curriculum materials.
Effective: Fall 1983

MTHED 527 Research on the Use of Technology in Mathematics Education (3) Reviewing, critiquing, designing, and conducting research on mathematics learning and teaching in technology intensive environments.
Effective: Spring 1997
Prerequisite: MTHED 427

MTHED 530 Mathematical Thinking at the Secondary and Early College Levels (3) Exploring and applying theories of advanced mathematical thinking; reviewing, conducting research on mathematical thinking at secondary and early college levels.
Effective: Spring 1997
Prerequisite: enrollment in Curriculum and Instruction doctoral program with Mathematics Education emphasis; mathematics background equivalent to a Bachelors' degree in mathematics

MTHED 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 1996

MTHED 595 Advanced Clinical Internship in Mathematics Learning (3) Supervised internship in advanced procedures for the implementation of diagnostic/prescriptive approaches as a strategy for improving mathematics learning.
Effective: Spring 1987
Prerequisite: 6 credits in mathematics education

MTHED 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MTHED 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

MTHED 597A Readings in Math Education (1-6) Students engage in reading research about mathematics preservice teacher education and examine materials for use in secondary mathematics education courses.
Effective: Summer 2011 Ending: Summer 2011

Last Import from UCM: June 16, 2011 3:00 AM

Mechanical Engineering (M E)

M E 400 Thermodynamics of Propulsion and Power Systems (3) Analysis and modeling of propulsion and power systems, including combustion, compressible flow through nozzles, chemical equilibrium, and moist air systems.
Effective: Fall 2007

Prerequisite: M E 300 and M E 320 ; Prerequisite or concurrent: M E 410

M E 401 Refrigeration and Air Conditioning (3) Theoretical principles, design, performance, and selection of various refrigeration and air-conditioning systems; building heat and cooling loads; solar heating.

Effective: Fall 2007

Prerequisite: M E 410

M E 402 Power Plants (3) A study of fossil-fuel steam generation and utility plants, including cogeneration, gas turbine, and combined cycles.

Effective: Fall 2007

Prerequisite: M E 410

M E 403 Polymer Electrolyte Fuel Cell Engines (3) Introduction to Fundamentals of Polymer Electrolyte Fuel Cells (PEFCs). Includes fundamentals of electrochemistry, thermodynamics, fluid mechanics, heat transfer materials, and manufacturing issues of PEFCs. A brief survey of other fuel cell types is also included.

Effective: Spring 2011

Prerequisite: M E 300 Prerequisite or concurrent: M E 320 Concurrent: M E 410 or equivalent

M E 404 Gas Turbines (3) Thermodynamic cycles relating to gas turbines; analysis and performance of compressors, combustion chambers, single- and multi-stage turbines; recent developments.

Effective: Fall 2007

Prerequisite: M E 320 or M E 302

M E 405 Indoor Air Quality Engineering (3) Prediction of the motion of contaminants (both gaseous particulate) in gas streams; analysis of ventilation systems and air pollution control systems; comparison of experimental sampling techniques.

Effective: Fall 2007

Prerequisite: M E 320 or equivalent

M E 406 (NUC E 406) Introduction to Statistical Thermodynamics (3) Statistical description of systems composed of large numbers of particles in the context of classical and quantum mechanics; basic concepts of probability theory and thermodynamics as they relate to statistical mechanics.

Effective: Fall 2007

Prerequisite: M E 300 or M E 201 or M E 302 or CH E 303; MATH 230 or MATH 231

M E 408 Energy Systems (3) Theory, analysis, design, selection, and application of energy conversion systems.

Effective: Fall 2007 Ending: Summer 2011

Prerequisite: M E 320, M E 410, M E 347

M E 408 Energy Systems (3) Theory, analysis, design, selection, and application of energy conversion systems.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: M E 320, M E 410

M E 410 Heat Transfer (3) Thermal energy transfer mechanisms: conduction (steady, transient), convection (internal, external), radiation; lumped parameter method; heat exchangers; introduction to numerical methods.

Effective: Spring 2011

Prerequisite: AERSP 308, AERSP 311, C E 360 or M E 320; CMPSC 200 or CMPSC 202; MATH 220 or NUC E 309; MATH 251

M E 411 Heat-Exchanger Design (3) Thermal design and application of different heat-exchanger types, including surface selection and design optimization.

Effective: Fall 2007

Prerequisite: M E 410

M E 420 Compressible Flow I (3) Introductory compressible flow (gas dynamics), mathematical background, and physical concepts of isentropic flow, shock waves, expansion waves, and applications.

Effective: Fall 2007

Prerequisite: M E 320

M E 421 Viscous Flow Analysis and Computation (3) Apply analytical and computational methods to solve the differential equations describing fluid flow. Incompressible external flows past objects and internal flows in pipes and ducts are some problems considered.

Effective: Spring 2011

Prerequisite: M E 201, M E 320, AERSP 308, AERSP 311 or C E 361; CMPSC 200 or CMPSC 201 or CMPSC 202; MATH 220; MATH 250 or MATH 251

M E 422 Principles of Turbomachinery (3) Application of Newton's laws of motion and basic laws of thermodynamics to analysis of fluid flow in turbomachinery.

Effective: Fall 2007

Prerequisite: M E 320

M E 427 Incompressible Aerodynamics (3) Analysis of lift and drag using potential flow theory, effects of viscosity on potential flow calculations, wind tunnel testing.

Effective: Fall 2007
Prerequisite: M E 320

M E 428 Applied Computational Fluid Dynamics (3) Introduction to theory and application of computational techniques for solving fluid flow and heat transfer.
Effective: Fall 2007 Ending: Summer 2011
Prerequisite: M E 320, M E 410, M E 347

M E 428 Applied Computational Fluid Dynamics (3) Introduction to theory and application of computational techniques for solving fluid flow and heat transfer.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: M E 320, M E 410

M E 430 (EGEE 430) Introduction to Combustion (3) Concepts related to laminar and turbulent premixed and nonpremixed combustion with applications to propulsion and stationary systems.
Effective: Fall 2009
Prerequisite: M E 201 or M E 300 or EME 301

M E 431 Internal Combustion Engines (3) Thermodynamic aspects of internal combustion engine design and performance; two- and four-stroke cycle, supercharged and non-supercharged, diesel and spark-ignition types.
Effective: Fall 2007
Prerequisite: M E 302

M E 432 Rocket Propulsion (3) Design and performance of rocket propulsion components and systems; thermodynamics, solid and liquid fuels, heat transfer, materials, controls, and instrumentation.
Effective: Fall 2007
Prerequisite: M E 320, M E 410

M E 433 Fundamentals of Air Pollution (3) Natural and man-made sources of pollution; atmospheric dispersion; biological and health effects; control systems; legislation and regulations.
Effective: Fall 2007
Prerequisite: M E 201 or M E 300

M E 440W Mechanical Systems Design Project (3) Design and analysis of mechanical components and systems. Application of fundamental design and analysis methods to open ended engineering problems.
Effective: Fall 2007
Prerequisite: ENGL 202C, I E 312, M E 360, M E 370, M E 340

M E 441W Thermal Systems Design Project (3) Design of thermal systems through component design and/or selection, system simulation and optimization. Assessment of system economics and energy efficiency.
Effective: Fall 2007
Prerequisite: ENGL 202C, M E 340, M E 410

M E 442W Advanced Vehicle Design I (2) Part one of a two course sequence; applications of design and analysis methods to open-ended advanced transportation vehicles. Two semester course; satisfies Senior Design or ME Technical Elective requirements (when combined with M E 443W).
Effective: Summer 2010
Prerequisite: ENGL 202C, I E 312, M E 340, M E 360, M E 370 Concurrent: M E 410

M E 443W Advanced Vehicle Design II (1) Part two of a two course sequence; applications of design and analysis methods to open-ended advanced transportation vehicles. Two semester course; satisfies Senior Design or ME Technical Elective requirements (when combined with M E 442W).
Effective: Summer 2010
Prerequisite: M E 442W

M E 444 Engineering Optimization (3) Problem formulation, algorithms and computer solution of various engineering optimization problems.
Effective: Spring 2010
Prerequisite: MATH 220, MATH 230 or MATH 231, CMPSC 201 or CMPSC 202 or CMPSC 200

M E 445 Microcomputer Interfacing for Mechanical Engineers (4) Interfacing of electro-mechanical systems to microcomputers for data acquisition, data analysis and digital control.
Effective: Fall 2007
Prerequisite: M E 345 and seventh-semester standing

M E 446 (NUC E 446) Reliability and Risk Concepts in Design (3) Introduction to reliability mathematics. Failure data collection and analysis. Components and systems reliability prediction. Effects of maintenance on reliability. Risk Analysis. Case studies in engineering applications.
Effective: Spring 2011
Prerequisite: MATH 250 or MATH 251; M E 345 or NUC E 309

M E 448 Engineering Design Concepts (3) Engineering design and modelling, engineering economic analysis techniques, technical communication skills, project planning and design.
Effective: Spring 2009 Ending: Summer 2011
Prerequisite: M E 380 seventh-semester standing Concurrent: M E 367 M E 410

M E 448 Engineering Design Concepts (3) Engineering design and modelling, engineering economic analysis techniques, technical communication skills, project planning and design.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: M E 380 seventh-semester standing. Prerequisite or concurrent: M E 367, M E 410 Concurrent: M E 367 M E 410

- M E 449 Mechanical Design Projects** (3) Group or individual design projects in the areas of mechanical engineering.
Effective: Fall 2007
Prerequisite: M E 448, eighth-semester standing
- M E 450 Modeling of Dynamic Systems** (3) Modeling and analysis of dynamic interactions in engineering systems. Classical and state variable methods; digital simulation; stability and dynamic response.
Effective: Fall 2007
Prerequisite: M E 370, M E 345
- M E 452 Vehicle Road Dynamics** (3) Investigations of three-dimensional dynamics and design into the study of vehicle dynamics including tire forces, suspension, and stability.
Effective: Fall 2007
Prerequisite: M E 370
- M E 455 Automatic Control Systems** (3) Dynamic analysis of systems involving automatic control of position, speed, power, flow, pressure, temperature, and other physical quantities.
Effective: Fall 2007
Prerequisite: M E 320, M E 450
- M E 456 (I E 456) Industrial Robot Applications** (3) Introduction to robotics, with emphasis on robot selection, programming, and economic justification for manufacturing applications.
Effective: Spring 2011
Prerequisite: MATH 220;MATH 250 orMATH 251;I E 305 orM E 360;CMPSC 200 orCMPSC 201
- M E 460 Advanced Machine Design Problems** (3) Special machine design problems in unusual types of springs; gear problems and involutometry; cam design and application; multiple diameter shaft deflections and ball bearings.
Effective: Fall 2007
Prerequisite: M E 360, M E 370
- M E 461 (E MCH 461) Finite Elements in Engineering** (3) Computer modeling and fundamental analysis of solid, fluid, and heat flow problems using existing computer codes.
Effective: Spring 2011
Prerequisite: E MCH 213, E MCH 210H orE MCH 210;CMPSC 200, CMPSC 201 orCMPSC 202
- M E 462 Lubrication in Machine Design** (3) Lubricants and lubrication with applications to design aspects of machines and mechanisms including bearings, gears, cams, and automotive engines.
Effective: Fall 2007
Prerequisite: MATH 251, M E 360
- M E 465 Introduction to Manufacturing Laboratory** (1) A laboratory-based introduction to manufacturing processes including material removal, forming, casting and joining for metals and non-metals.
Effective: Summer 2008 Ending: Summer 2011
Concurrent: M E 468
- M E 465 Introduction to Manufacturing Laboratory** (1) A laboratory-based introduction to manufacturing processes including material removal, forming, casting and joining for metals and non-metals.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: Prerequisite or concurrent:M E 468 Concurrent: M E 468
- M E 467 Applied Finite Element Analysis** (3) Review of matrix algebra; discretization; finite element formulation; application of finite element computer codes.
Effective: Fall 2007 Ending: Summer 2011
Prerequisite: M E 410, M E 347
- M E 467 Applied Finite Element Analysis** (3) Review of matrix algebra; discretization; finite element formulation; application of finite element computer codes.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: M E 410 andM E 349
- M E 468 Engineering for Manufacturing** (3) Manufacturability, the selection of the most effective materials and processes, and quality assurance.
Effective: Spring 2009
Prerequisite: MATSE 259
- M E 469 Metallic Manufacturing Processes** (3) Principles of metal working and introduction to current theories; analysis of deformation, joining, and metal removal processes.
Effective: Summer 2008 Ending: Summer 2011
Prerequisite: Prerequisite or concurrent:M E 468
- M E 469 Metallic Manufacturing Processes** (3) Principles of metal working and introduction to current theories; analysis of deformation, joining, and metal removal processes.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: M E 349 . Prerequisite or concurrent:M E 468
- M E 470 (E MCH 470) Analysis and Design in Vibration Engineering** (3) Application of Lagrange's equations to mechanical system modeling, multiple- degree-of-freedom systems, experimental and computer methods; some emphasis on design applications.
Effective: Spring 2008
Prerequisite: E MCH 212 orE MCH 212H;M E 370 orE SC 407H

M E 471 Noise Control in Machinery (3) Nature of noise sources in machine elements and systems. Propagation and reduction of noise. Effects of noise on man.

Effective: Fall 2007

Prerequisite: M E 320, M E 370

M E 480 Mechanism Design and Analysis (3) Design and analysis of mechanical linkages including kinematic synthesis and dynamic analysis. Linkages for a variety of applications are considered.

Effective: Spring 2011

Prerequisite: E MCH 212 . Prerequisite or Concurrent: CMPSC 200

M E 481 Introduction to Computer-Aided Analysis of Machine Dynamics (3) Techniques and formulations for computer based kinematic and dynamic analyses of machines.

Effective: Spring 2011

Prerequisite: E MCH 212 ; Prerequisite or concurrent: CMPSC 200

M E 491 Bioengineering Applications of Mechanical Engineering (3) Application of mechanical engineering knowledge in the context of life sciences.

Effective: Summer 2008 Ending: Summer 2011

Prerequisite: E E 211, M E 320, M E 357, E MCH 213 or permission of program

M E 491 Bioengineering Applications of Mechanical Engineering (3) Application of mechanical engineering knowledge in the context of life sciences.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: E E 211, M E 320, M E 357, E MCH 213, M E 349 or permission of program

M E 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

M E 494H Senior Thesis (1-9) Students must have approval of a thesis adviser before scheduling this course.

Effective: Spring 2007

Prerequisite: Junior or senior status in the University Scholars Program

M E 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Fall 2007

Prerequisite: prior approval of proposed assignment by instructor

M E 496 Independent Studies (1-18) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

M E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

M E 497C (NUC E 497C) Dynamic Modeling of Energy Systems (3) To provide engineers with information about energy supplies, their future prospects, and how each can be used most effectively.

Effective: Summer 2011 Ending: Summer 2011

M E 497C (NUC E 497C) Dynamic Modeling of Energy Systems (3) To provide engineers with information about energy supplies, their future prospects, and how each can be used most effectively.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

M E 497D Automotive Engineering (3) Introduces students to the analysis and design of automotive components and systems.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: M E 367, M E 357, M E 380

M E 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2008

M E 504 Advanced Engineering Thermodynamics (3) Pure and applied thermodynamics including its application to advanced engineering problems; collateral reading and discussion of the classical works on the subject.

Effective: Fall 2007

M E 505 Design of Air Pollution Control Systems (3) Advanced principles of design drawn from professional literature, including mechanical collectors, electrostatic precipitators, filters, scrubbers, and industrial ventilation systems.

Effective: Fall 1983

Prerequisite: M E 405

M E 512 Heat Transfer--Conduction (3) One- and two-dimensional conduction heat transfer for steady state and transient systems with varying boundary conditions.

Effective: Fall 1983

M E 513 Heat Transfer--Convection (3) Laminar and turbulent flow heat transfer in natural and forced convection systems.
Effective: Fall 1983

M E 514 Heat Transfer--Radiation (3) Thermal radiation fundamentals; specular and diffuse systems; differential and integral methods; numerical techniques; industrial applications.
Effective: Fall 1983

M E 515 Two-Phase Heat Transfer (3) Heat transfer processes involving evaporation, boiling, and condensation.
Effective: Winter 1978

M E 517 Techniques for Heat Transfer Enhancement (3) Study of advanced concepts in convective and two-phase heat transfer, with emphasis on techniques of heat transfer enhancement.
Effective: Fall 2007
Prerequisite: M E 320, M E 410

M E 518 Applied Heat and Mass Transfer (3) Application of theoretical fundamentals to the design of heat exchange equipment, and the analysis of simultaneous heat and mass transfer processes.
Effective: Fall 2007
Prerequisite: M E 320 or M E 410

M E 520 Compressible Flow II (3) Two-dimensional subsonic flow; similarity rules; theory of characteristics; supersonic and hypersonic flows; nonsteady flow; oblique shock waves.
Effective: Fall 2007
Prerequisite: M E 420

M E 521 Foundations of Fluid Mechanics I (3) First semester of core sequence in fluid mechanics; Navier-Stokes equations, potential flow, low Re flow, laminar boundary layers.
Effective: Fall 2007
Prerequisite: M E 300, M E 320

M E 522 Foundations of Fluid Mechanics II (3) Second semester of core sequence in fluid mechanics; continuation of boundary layers, stability, transition, turbulence, turbulent boundary layers, turbulence models.
Effective: Summer 1990
Prerequisite: M E 421 or M E 521

M E 523 Numerical Solutions Applied to Heat Transfer and Fluid Mechanics Problems (3) Application of finite difference methods to the study of potential and viscous flows and conduction and convection heat transfer.
Effective: Fall 2007

M E 524 (AERSP 524) Turbulence and Applications to CFD: DNS and LES (3) First of two courses: Scalings, decompositions, turbulence equations; scale representations, Direct and Large-Eddy Simulation; modeling; pseudo-spectral methods; 3 computer projects.
Effective: Spring 2011
Prerequisite: M E 521 or AERSP 508

M E 525 (AERSP 525) Turbulence and Applications to CFD: RANS (3) Second of two courses: Scalings, decomposition, turbulence equations; Reynolds Averaged Navier Stokes (RANS) modeling; phenomenological models; 3 computer projects.
Effective: Spring 2011
Prerequisite: M E 521 or AERSP 508

M E 526 (AERSP 526) Computational Methods for Shear Layers (3) Study of numerical solution methods for steady and unsteady laminar or turbulent boundary-layer equations in two and three dimensions.
Effective: Fall 2007
Prerequisite: AERSP 423 or M E 523

M E 527 (AERSP 527) Computational Methods in Transonic Flow (3) Numerical solution of partial differential equations of mixed type, with emphasis on transonic flows and separating boundary layers.
Effective: Fall 2007
Prerequisite: AERSP 423 or M E 523

M E 528 (AERSP 528) Computational Methods for Recirculating Flows (3) Numerical solution techniques for laminar/turbulent flow with large recirculation zones. Both primitive variable and stream function-vorticity equations used.
Effective: Fall 2007
Prerequisite: M E 523

M E 530 Fundamentals of Combustion (3) Theoretical formulations and methods of solution of engineering problems and physical/chemical processes in various propulsion systems.
Effective: Fall 2007

M E 531 Species Measurements in Combustion Systems (1-3) Study of modern instrumentation techniques for determination of species concentrations in combustion systems.
Effective: Fall 2007

M E 532 Turbulent and Two-Phase Combustion (3) Fundamentals of chemically reacting turbulent flows in homogeneous systems including turbulent flames, spray combustion, ignition, reacting boundary layers.

Effective: Fall 2007

Prerequisite: F SC 421 or M E 430 or M E 531

M E 533 Solid Propellant Combustion (3) Introduction to phenomena of solid propellant combustion, analytical techniques for modeling propellant ignition and combustion behavior, experimental methods.

Effective: Fall 2007

Prerequisite: M E 410

M E 535 (AERSP 535) Physics of Gases (3) An introduction to kinetic theory, statistical mechanics, quantum mechanics, atomic and molecular structure, chemical thermodynamics, and chemical kinetics of gases.

Effective: Spring 2010

M E 537 Laser Diagnostics for Combustion (3) A study of laser-based techniques for measuring gas temperature and concentration in chemically reacting flows.

Effective: Summer 1990

Prerequisite: M E 535

M E 546 (I E 546) Designing Product Families (3) Product families, product platforms, mass customization, product variety, modularity, commonality, robust design, product architectures.

Effective: Fall 2007

Prerequisite: M E 414 or M E 415 or I E 430 or I E 466

M E 547 (EDSGN 547, I E 547) Designing for Human Variability (3) Statistics, optimization and robust design methodologies to design products and environments that are robust to variability in users.

Effective: Summer 2009

M E 550 Foundations of Engineering Systems Analysis (3) Analytical methods are developed using the vector space approach for solving control and estimation problems; examples from different engineering applications.

Effective: Fall 1996

Prerequisite: MATH 436

M E 554 Digital Process Control (3) Analysis and design of control systems with digital controllers, including PID, finite settling time, state feedback, and minimum variance algorithms.

Effective: Fall 2007

Prerequisite: M E 450, M E 455

M E 555 Automatic Control Systems (3) Advanced problems and techniques in the design of automatic control systems with emphasis on stability, controller design, and optimum performance.

Effective: Winter 1978

Prerequisite: M E 455

M E 556 (I E 556) Robotic Concepts (3) Analysis of robotic systems; end effectors, vision systems, sensors, stability and control, off-line programming, simulation of robotic systems.

Effective: Fall 1983

Prerequisite: I E 456 or M E 456

M E 558 (E E 584) Robust Control Theory (3) Fundamentals of Robust Control Theory with emphasis on stability and performance analysis and design.

Effective: Spring 2008

Prerequisite: E E 580 or M E 555

M E 559 (E E 587) Nonlinear Control and Stability (3) Design of nonlinear automatic control systems; phase-plane methods; describing functions; optimum switched systems; Liapunov stability; special topics in stability.

Effective: Spring 2008

Prerequisite: E E 380

M E 560 (E MCH 500) Solid Mechanics (3) Introduction to continuum mechanics, variational methods, and finite element formulations; application to bars, beams, cylinders, disks, and plates.

Effective: Fall 2007

M E 561 Structural Optimization Using Variational and Numerical Methods (3) Shape and size optimization of elastic structures, continuous and discrete solution methods and numerical algorithms, design of compliant mechanisms.

Effective: Summer 2004

Prerequisite: M E 461

M E 563 (E MCH 563) Nonlinear Finite Elements (3) Advanced theory of semidiscrete formulations for continua and structures; emphasizes dynamic and nonlinear problems.

Effective: Spring 1996

Prerequisite: A B E 513, E MCH 461 or E MCH 560

M E 564 Elastic and Dynamic Stability of Structures (3) An introduction to the concept and analysis methods of structural stability; structures under static/dynamic loading and high speed conditions.

Effective: Spring 2008

Prerequisite: E MCH 213, M E 450 ; students need to have basic understanding of mechanical behavior of materials to

follow the equations in this course and basic concepts of "system stability" to expand them to elastic structures

M E 565 Optimal Design of Mechanical and Structural Systems (3) Application of numerical optimization techniques to design mechanical and structural systems; design sensitivity analysis.
Effective: Summer 1988

M E 571 (AERSP 571, E MCH 571) Foundations of Structural Dynamics and Vibration (3) Modeling approaches and analysis methods of structural dynamics and vibration.
Effective: Fall 2007
Prerequisite: AERSP 304, E MCH 470, M E 450 or M E 570

M E 572 Experimental Modal Analysis (3) The development of structural dynamic models from experimental data, analytical and experimental vibration, analysis methods, laboratory techniques.
Effective: Fall 2007
Prerequisite: M E 450

M E 573 (ACS 573) Designing Quiet Structures (3) Course integrates structural dynamics, acoustics and optimization into unified method for designing quiet structures virtually for early product development.
Effective: Fall 2007
Prerequisite: M E 470 and ACS 502

M E 577 (MATH 577) Stochastic Systems for Science and Engineering (3) The course develops the theory of stochastic processes and linear and nonlinear stochastic differential equations for applications to science and engineering.
Effective: Summer 1998
Prerequisite: MATH 414 or MATH 418; M E 550 or MATH 501

M E 578 (E SC 578) Theory and Applications of Wavelets (3) Theory and physical interpretation of continuous and discrete wavelet transforms for applications in different engineering disciplines.
Effective: Summer 1999
Prerequisite: M E 550

M E 580 Advanced Dynamics of Machines (3) Linear and torsional vibrations in and balancing of rotating and reciprocating machinery; exact analysis of stresses produced by these and other dynamic forces in machine parts.
Effective: Spring 2008
Prerequisite: E MCH 212, M E 370

M E 581 Simulation of Mechanical Systems (3) Introduces computational fundamentals, including digital logic; programming language, basic numerical analysis and data processing, as applied to mechanical simulation techniques.
Effective: Fall 2007
Prerequisite: M E 480

M E 582 Mechanism Synthesis (3) Geometrical and algebraic methods for synthesizing planar and spatial mechanisms, dynamics of spatial mechanism.
Effective: Fall 2007

M E 590 Colloquium (1) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Fall 2009

M E 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

M E 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

M E 597A Atomistic-scale Simulation Methods for Engineers (3) This course will introduce the theory and software related to various atomistic-scale simulations methods and demonstrate engineering applications.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

M E 597B Optimal Control of Energy Systems (3) Optimal control theory and application to energy generation, storage, transmission, and management systems.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

M E 597C Nanotechnology in Mechanical Engineering (3) Micro/nano scale science and technology from a mechanical engineering perspective.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

M E 597C Battery Systems Engineering (3) This course presents a self-contained, first principles of study of the dynamic modeling, analysis, design, estimation, and control of battery systems. Recommended Expertise: PDEs and Controls.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

M E 597D Mechatronics (3) This class will facilitate hands-on investigation and learning of mechatronic systems via a problem-based approach. The course material will consist of lectures, lab activities, and major projects focused on the myriad areas of mechatronics.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

M E 597F Vehicle Hardware in the Loops Methods (3) This course is required for the Graduate Automotive Technology Education (GATE) Program in High Power, In-Vehicle Energy Storage.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

M E 597K High-Power Energy Storage (3) One of two required core courses in the Penn State Graduate Automotive Technology Education (GATE) curriculum leading to a GATE certificate.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

M E 600 Thesis Research (1-15) No description.
Effective: Fall 1983

M E 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

M E 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) For graduate students helping to teach the beginning thermodynamics course, M.E. 22. Must have taken M.E. 504.
Effective: Fall 1983

M E 603 Foreign Academic Experience (1 per semester/maximum of 12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Fall 2002

M E 610 Thesis Research Off Campus (1-15) No Description.
Effective: Fall 1983

M E 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Mechanical Engineering Technology (MET)

MET 403 Advanced Mechanical Design (3) Continuation of strength of materials and machine design, with emphasis on advanced methods of design and analysis of machine elements.

Effective: Spring 2007

Prerequisite: MET 365

MET 415 Finite Element Analysis Applications I (3) Solutions of advanced engineering design problems using finite elements. Intended for engineering technologists.

Effective: Spring 2007

Prerequisite: MET 320 ; Concurrent:MET 306

MET 417 Finite Element Analysis (3) Formulation and computer implementation of finite element models for solving problems in heat transfer, fluid flow, and solid mechanics.

Effective: Spring 2007

Prerequisite: MET 365

MET 418 Finite Element Analysis for Plastics Design (3) Solutions of advanced engineering problems using finite element and finite difference techniques; advanced topics in computer-aided manufacturing; problems in optimization and design.

Effective: Spring 2007

Prerequisite: MCH T 213, PL ET 232, PL ET 235 . Prerequisite or concurrent:PL ET 350

MET 425 Finite Element Analysis Applications II (3) Solutions of advanced engineering design problems using finite element methods.

Effective: Spring 2007

Prerequisite: MET 415

MET 431 Heat Transfer (3) Basic principles of conduction, convection, and radiation with applications.

Effective: Spring 2007

Prerequisite: MET 332

MET 432 Fluid Power (3) Principles of fluid flow, hydraulic components, and hydraulic circuits having application to industry.

Effective: Fall 2007

Prerequisite: M E 300 orMET 330;MET 331W

MET 435 Building Energy Systems (3) Analysis and design of components and systems for building heating and cooling; emphasis on applying the thermal sciences.

Effective: Spring 2007

Prerequisite: MET 332, MET 336

MET 438 Thermal Engineering B (3) Applied thermodynamics of power cycles; refrigeration and air conditioning cycles; combustion; psychometrics; and gas mixtures.

Effective: Spring 2007

Prerequisite: MET 332

MET 440 Vibrations for Technologists (3:) Principles of basic vibration theory, vibration measurement, data acquisition and analysis, and the effective presentation of vibration data.

Effective: Spring 2008 Ending: Summer 2011

Prerequisite: E MCH 212 orMET 206;MATH 231 andMATH 250 orMATH 211;MET 341;MET 415

MET 440 Vibrations for Technologists (3:) Principles of basic vibration theory, vibration measurement, data acquisition and analysis, and the effective presentation of vibration data.

Effective: Fall 2011 Future: Fall 2011

Prerequisite: MET 206 orE MCH 212;MATH 211 orMATH 250;MET 341 . Prerequisite or concurrent:MET 415

MET 441 Vibration Analysis (4) Analysis of motion arising from lateral and torsional vibrations of systems; free and forced vibrations; damping; isolation; balancing.

Effective: Spring 2008

Prerequisite: E MCH 212, MET 321

MET 448 Mechanical Engineering Technology Laboratory B (2) Laboratory exercises in the areas of instrumentation, strength of materials, fluid flow, vibrations, thermodynamics, etc.

Effective: Spring 2007

Prerequisite: MET 336, MET 342, ENGL 202C and senior standing

MET 450 Manufacturing Engineering (3) Design, analysis and operational issues related to improved productivity and efficiency in modern manufacturing systems.

Effective: Spring 2007

Prerequisite: MET 358

MET 452 Rapid Prototyping (3) Introduction to the production of prototypes directly from computer models.

Effective: Fall 2007

Prerequisite: IET 216, MET 306

MET 454 Automatic Controls (3) An introduction to basic automatic control theory, practical applications of automatic

controls to typical industrial machinery, HVAC equipment, etc.
Effective: Spring 2008 Ending: Fall 2011
Prerequisite: E MCH 212, MET 321

MET 454 Automatic Controls (3) An introduction to basic automatic control theory, practical applications of automatic controls to typical industrial machinery, HVAC equipment, etc.
Effective: Spring 2012 Future: Spring 2012
Prerequisite: E MCH 212 or ET 321 or MET 206 and MET 321

MET 455 Mechatronics (3) Integration of mechanical and electronic systems implemented using data acquisition systems, sensors, actuators, signal conditioning, feedback controls, and programmable logic controllers.
Effective: Spring 2011
Prerequisite: EET 100 or EET 105 or EET 101 or E E 211; MET 210W or M E 367; MET 341 or M E 345W; MET 432 or M E 320

MET 457 Lean Manufacturing (3) Principles and methods of Lean Manufacturing currently used in modern industries.
Effective: Summer 2007
Prerequisite: 7th semester standing; and I E T 215 or M E 468 or permission of program

MET 461 Advanced Machine Design (3) Stress analysis, material selection, design of machine elements, design of connections, and computer-aided design.
Effective: Spring 2007
Prerequisite: MET 210W, MET 415

MET 462 Internal Combustion Engine Design (3) The effect of operation requirements on design and construction of internal combustion engines; study of support systems and emissions control.
Effective: Spring 2007
Prerequisite: MET 332

MET 470 Materials Engineering (3) Study of material selection, material properties, material test methods, and special topics.
Effective: Summer 2007 Ending: Summer 2011
Prerequisite: CHEM 110, CHEM 111, MET 320

MET 470 Materials Engineering (3) Study of material selection, material properties, material test methods, and special topics.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: CHEM 110, CHEM 111 . Prerequisite or concurrent: MET 415

MET 480 Senior Capstone (1) Career and professional topics; development of year-long senior project with industry.
Effective: Fall 2007 Ending: Summer 2011
Prerequisite: M E 300 or MET 330; MET 415

MET 480 Senior Capstone (1) Career and professional topics; development of year-long senior project with industry.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: M E 300 or MET 330 . Prerequisite or concurrent: MET 415

MET 481 Project Design (1) Design of system or machine, including decision making, engineering analysis, layout, detail drawings, specifications, construction.
Effective: Spring 2007
Prerequisite: MET 365, MET 431 and senior standing

MET 485 Senior Industrial Project (3) Individual or group design projects in mechanical design or materials.
Effective: Spring 2007 Ending: Summer 2011
Prerequisite: MET 425, MET 470, MET 480

MET 485 Senior Industrial Project (3) Individual or group design projects in mechanical design or materials.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: MET 331W, MET 470, MET 480 . Prerequisite or concurrent: MET 425

MET 486 Project Design (3) Design of system or machine, including decision making, engineering analysis, layout, detail drawings, specifications, construction.
Effective: Spring 2007
Prerequisite: MET 365, MET 431, MET 481 and senior standing

MET 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica or internships. Written and oral critique of activity required.
Effective: Spring 2007
Prerequisite: prior approval of proposed assignment by instructor

MET 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2007

MET 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2007

MET 497B Energy Conservation Systems (3) Analyze processes and systems for energy conversion, including power, refrigeration and air conditioning cycles, thermoelectric, and fuel cells.

Graduate Bulletin Archive - 2011
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: MET 330

2010 - 2011

Last Import from UCM: June 16, 2011 3:00 AM

Mechanical Technology (MCH T)

No courses for department code **MCH T** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Medieval Studies (MEDVL)

MEDVL 411 (IL) (HIST 411) **Medieval Britain** (3) Political, cultural, and economic history of Britain from circa 400 to 1485 with an emphasis on the kingdom of England.

Effective: Spring 2006

Prerequisite: 6 credits in European history or medieval studies

MEDVL 413 (IL) (HIST 413) **Medieval Celtic Studies** (3) Celtic civilization from antiquity to the end of the middle ages.

Effective: Spring 2006

Prerequisite: 3 credits in medieval studies or in language literature or European history of the medieval period

MEDVL 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

MEDVL 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

MEDVL 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Summer 2002

Prerequisite: prior approval of proposed assignments by instructor

MEDVL 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Spring 1995

MEDVL 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 1995

MEDVL 499 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

MEDVL 590 **Colloquium** (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 2002

MEDVL 594 **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 2002

MEDVL 595 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Summer 2002

MEDVL 596 **Individual Studies** (1-9) Creative projects, including nonthesis research that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2002

MEDVL 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Summer 2002

MEDVL 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Summer 2002

MEDVL 599 (IL) **Foreign Studies** (1-12 per semester; maximum of 24) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

MEDVL 600 **Thesis Research** (1-15) No description.

Effective: Summer 2002

MEDVL 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Summer 2002

MEDVL 602 **Supervised Experience in College Teaching** (1-3 per semester, maximum of 6) Students experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Summer 2002

MEDVL 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Summer 2002

MEDVL 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Summer 2002

MEDVL 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Summer 2002

Last Import from UCM: June 16, 2011 3:00 AM

Meteorology (METEO)

METEO 410 Advanced Topics in Weather Forecasting (3) Exploring highly specialized topics and techniques in weather forecasting that span from mesoscale to planetary spatial scales and short-term to long-range time scales.

Effective: Spring 2004

Prerequisite: METEO 101, METEO 241, METEO 361

METEO 411 Synoptic Meteorology Laboratory (4) Techniques of analyzing synoptic scale weather situations; introduction to weather forecasting.

Effective: Spring 2004

Prerequisite: METEO 101 or METEO 200A and METEO 200B or METEO 201; MATH 230 or MATH 231
Prerequisite or concurrent: METEO 421 and METEO 431

METEO 413 Map Analysis (3) Analysis of actual surface weather observations, with emphasis on the Norwegian cyclone model, missing or bad data, and mesoscale phenomena.

Effective: Fall 2002

Prerequisite: METEO 411

METEO 414 Mesoscale Meteorology (4) A survey of conceptual models and analysis techniques for mesoscale atmospheric features.

Effective: Summer 1996

Prerequisite: METEO 411

METEO 415 Forecasting Practicum (3) Modern techniques in weather analysis and forecasting.

Effective: Spring 2011

Prerequisite: METEO 411

METEO 416 Advanced Forecasting (3) Competitive, simulated, operational, real-time forecasting is covered.

Effective: Spring 1998

Prerequisite: METEO 414, METEO 415

METEO 418W Topics in Mesoscale Meteorology (3) Topics in mesoscale meteorology will be investigated in an independent study environment through computer-based modules, papers, and semester project.

Effective: Fall 1995

Prerequisite: METEO 414

METEO 419 Air Quality Forecasting (3) Issues relating to the prediction and dispersion of air pollutants as discussed.

Effective: Summer 2010

Prerequisite: CHEM 110 and METEO 003 or METEO 101 or METEO 200A and METEO 201B or METEO 201

METEO 421 Atmospheric Dynamics (4) Balanced and unbalanced flows, vorticity, circulation and potential vorticity, an introduction to wave dynamics and stability analysis, and a quantitative discussion of the general circulation.

Effective: Fall 2009

Prerequisite: METEO 300; MATH 230 or MATH 231 and MATH 232
Concurrent: METEO 431 MATH 251 PHYS 212

METEO 422 Advanced Atmospheric Dynamics (3) Survey of advanced dynamical topics including instabilities, numerical modeling, and others of current interest.

Effective: Fall 2009

Prerequisite: METEO 421

METEO 431 Atmospheric Thermodynamics (3) Classical thermodynamics applied to both the dry and the moist atmosphere.

Effective: Spring 2001

Prerequisite: PHYS 212

METEO 434 Radar Meteorology (3) Fundamental operating principles of radars, with application to observation of meteorological phenomena.

Effective: Fall 2001

Prerequisite: METEO 437
Concurrent: METEO 414

METEO 436 Radiation and Climate (3) Elements of earth-sun geometry, radiative transfer, photochemistry, remote sensing of the atmosphere, physical climatology, climate forcing.

Effective: Fall 2009

Concurrent: METEO 431

METEO 437 Atmospheric Chemistry and Cloud Physics (3) Properties of aerosols and clouds, cloud nucleation and precipitation processes, atmospheric electricity, cloud and precipitation chemistry, biogeochemical cycles.

Effective: Fall 2009

Prerequisite: METEO 431

METEO 440W Principles of Atmospheric Measurements (3) Theory and practices used in measurement and analysis of meteorological variables.

Effective: Fall 2010

Prerequisite: METEO 300, METEO 431, STAT 301 or STAT 401 or E B F 472

METEO 445 Laboratory in Atmospheric Physics I (1) Measurement practices, data analysis and management, radiometry lidars and radars, trace gas measurements.

Effective: Spring 1991

Prerequisite: or concurrent:METEO 436

METEO 446 Laboratory in Atmospheric Physics II (1) Experimental practices in cloud and aerosol physics, atmospheric electricity, atmospheric chemistry, radar meteorology.

Effective: Spring 1991

Prerequisite: or concurrent:METEO 437

METEO 448 Stormwater Hydrology (3) Relationship between surface runoff, rainfall and water chemistry during rainfall events for the purpose of assessing urbanization, non-point source contamination.

Effective: Spring 2002

METEO 451 Introduction to Physical Oceanography (3) Air-sea interaction, wind-driven and thermohaline circulations, upwelling, El Nino, waves, and tides.

Effective: Spring 2007

Prerequisite: METEO 421

METEO 452 Tropical Meteorology (3) Atmospheric processes in the tropics; mass, heat, energy, momentum, and water vapor budgets, cumulus convection, hurricanes and other disturbances.

Effective: Fall 1983

Prerequisite: METEO 411, METEO 421

METEO 454 Introduction to Micrometeorology (3) Physical processes and their measurement in the lowest layers of the atmosphere; application to hydrology, plant systems, and air pollution.

Effective: Fall 2009

Prerequisite: METEO 421 andMETEO 431 orEME 301

METEO 455 Atmospheric Dispersion (3) The basic principles of atmospheric flow, introduction to the modeling of turbulent diffusion, and the use of EPA dispersion models.

Effective: Fall 2009

Prerequisite: EME 301, C E 360, M E 320, METEO 454, METEO 456 orEGEE 470

METEO 460 Weather Risk and Financial Markets (3) This course will introduce the role that weather plays as a source of financial and operational risk for businesses, market and other institutions.

Effective: Fall 2010 Ending: Fall 2011

Prerequisite: METEO 411;E B F 472;E B F 301 orEM SC 473

METEO 460 Weather Risk and Financial Markets (3) This course will introduce the role that weather plays as a source of financial and operational risk for businesses, market and other institutions.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: METEO 411;E B F 472 orSTAT 301 orSTAT 401;E B F 301 orE B F 473

METEO 465 Middle Atmosphere Meteorology (3) A topical survey of physical, chemical, and dynamical processes at work in the stratosphere and mesosphere (middle atmosphere).

Effective: Spring 1988

Prerequisite: METEO 421, METEO 431

METEO 466 Planetary Atmospheres (3) A survey of planetary atmospheres and the chemical and physical processes by which they form and evolve.

Effective: Spring 2001

Prerequisite: MATH 141, PHYS 211

METEO 469 From Meteorology to Mitigation: Understanding Global Warming (3) Introduction to global warming and climate change: the basic, science, projected impacts, and approaches to mitigation.

Effective: Summer 2010

Prerequisite: MATH 110

METEO 470 Climate Dynamics (3) The fundamental principles that govern Earth's climate and their relevance to past and future climate change.

Effective: Spring 2002

Prerequisite: METEO 300, METEO 421, METEO 431 Concurrent: METEO 436

METEO 471W Observing Meteorological Phenomena (3) Teaching the observational and interpretative skills needed to read the sky.

Effective: Spring 1999

Prerequisite: METEO 421 . Prerequisite or concurrent:METEO 436

METEO 473 Application of Computers to Meteorology (3) Application of statistical and numerical methods to practical problems in meteorology.

Effective: Spring 2008

Prerequisite: CMPSC 101, CMPSC 201 orCMPSC 202

METEO 474 Computer Methods of Meteorological Analysis and Forecasting (3) Distribution of scalars and vectors; sampling; regression and correlation in two and three dimensions; time series, statistical forecasting; forecast verification.

Effective: Summer 2010

Prerequisite: STAT 301 orSTAT 401 orE B F 472

METEO 477 (E E 477) Fundamentals of Remote Sensing Systems (3) The review of fundamental physical properties leads into discussions of various techniques, including imaging, spectroscopy, radiometry, and active sensing.

Effective: Spring 2008

Prerequisite: E E 330 or METEO 436

METEO 480M Undergraduate Research (3) A research thesis will be prepared. A written and oral presentation required.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: junior or senior standing as a Meteorology Major

METEO 480M Undergraduate Research (3) A research thesis will be prepared. A written and oral presentation required.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012
Prerequisite: junior or senior standing as a Meteorology Major

METEO 480W Undergraduate Research (3) A research thesis will be prepared. A written and oral presentation required.
Effective: Summer 1991
Prerequisite: junior or senior standing as a Meteorology Major

METEO 481 Weather Communications I (3) Multi-instructor weather communications survey including forecasting, science teaching and writing, television and radio broadcasting, climate studies, forensics, industrial applications.
Effective: Spring 2004
Prerequisite: METEO 201 or METEO 101

METEO 482 Weather Communications II (3) Multi-instructor workshop designed to mimic real-life applications of weather communications in industry, broadcasting, the courtroom, and the classroom.
Effective: Spring 2002
Prerequisite: METEO 481

METEO 483 Weather Communications III (3) Individualized course designed for in-depth study of weather communications in industry, broadcasting, the courtroom and/or the classroom.
Effective: Spring 2002
Prerequisite: METEO 411, METEO 482

METEO 484 Weather Communications Apprenticeship (3) Mentor-led course that focuses on a specific issue of problem in weather communications related to broadcasting, climate or industry.
Effective: Summer 2003
Prerequisite: METEO 481, METEO 482 and METEO 483

METEO 485 National Weather Service Operations (2-3) Joint instruction with lead personnel from the State College National Weather Service Office on a variety of operational weather topics.
Effective: Summer 2003
Prerequisite: prerequisite or concurrent: METEO 481, METEO 415

METEO 486 Pennsylvania Climate Studies (1-2 per semester/maximum of 3) An overview of the Pennsylvania State Climate Office and an introduction to various aspects of its operations.
Effective: Spring 2011
Prerequisite: METEO 101 or METEO 200A and METEO 200B or METEO 201

METEO 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Summer 2010

METEO 495A Meteorology Communications Internship (3 per semester/maximum of 6) Internship focusing on communication of weather forecasts or other meteorological information.
Effective: Summer 2010
Prerequisite: METEO 411

METEO 495B Meteorology Private Sector Internship (3 per semester/maximum of 6) Internship focusing on meteorological problems and applications pursued by private sector companies.
Effective: Summer 2010
Prerequisite: METEO 411

METEO 495C Meteorological Operations Internship (3 per semester/maximum of 6) Internship focusing on time-sensitive meteorological applications such as weather or climate forecasts that are produced.
Effective: Summer 2010
Prerequisite: METEO 411

METEO 495D Meteorological International Internship (3 per semester/maximum of 6) Meteorological internship in an international setting.
Effective: Summer 2010
Prerequisite: 6 credits of 400-level Meteorology coursework

METEO 495E Meteorological Off-Campus Research Internship (3 per semester/maximum of 6) Off-campus meteorological internship focusing on a research project.
Effective: Summer 2010
Prerequisite: 9 credits of 400-level Meteorology coursework

METEO 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

METEO 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

METEO 497A Television Meteorology (1) The main objective of this 7-week course will be to hone presentation skills while applying meteorological knowledge.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

METEO 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1992

METEO 498K Supervised Teaching (1) Select undergraduate help prepare lessons and get in front of the classroom.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

METEO 501 Atmospheric Phenomena (3) Overview of the complex interactions within the atmosphere, ranging from molecular to global scale.

Effective: Spring 1998

METEO 511 The Weather From Global to Micro Scales (3) Conceptual models and underlying physics for weather phenomena on scales from the global general circulation to turbulence.

Effective: Fall 2010

Prerequisite: METEO 520, METEO 521, METEO 531

METEO 512 Topics in Synoptic Meteorology (3) Application of atmospheric dynamics to the diagnosis and prediction of synoptic-scale weather.

Effective: Spring 2011

Prerequisite: METEO 411, METEO 501

METEO 516 Mesoscale Forecasting (3) Competitive, simulated, operational, real-time forecasting is covered.

Effective: Summer 2005

Prerequisite: METEO 414 or METEO 415

METEO 520 Geophysical Fluid Dynamics (3) Fundamentals of fluid dynamics with an emphasis on basic concepts that are important for atmospheric and oceanic flows.

Effective: Spring 2009

Prerequisite: Vector calculus differential equations

METEO 521 Dynamic Meteorology (3) An overview of the major large-scale atmospheric motions of weather and climate.

Effective: Spring 1996

Prerequisite: METEO 520

METEO 523 Modeling the Climate System (3) An introduction to the mathematical description and modeling of atmospheric and oceanic motions.

Effective: Summer 2005

METEO 526 Numerical Weather Prediction (3) Finite difference and spectral methods, barotropic and baroclinic models, filtered and primitive equation models, synoptic-scale and mesoscale models.

Effective: Fall 1983

Prerequisite: METEO 422 or METEO 522

METEO 527 Atmospheric Wave Motion (3) From classical and physical hydrodynamics to the numerical prediction of wave motion in a baroclinic atmosphere.

Effective: Spring 1988

Prerequisite: METEO 521

METEO 529 Mesoscale Dynamics (3) A survey of concepts of mesoscale systems including frontogenesis, symmetric instability, mountain waves, wave CISK, and frontal waves.

Effective: Spring 1988

Prerequisite: METEO 521

METEO 531 Atmospheric Thermal Physics (3) Advanced treatment of thermodynamic principles as they relate to atmospheric cloud physics, radiation and dynamics.

Effective: Fall 2010

METEO 532 Chemistry of the Atmosphere (3) Review of chemical principles in gaseous and multiphase environments; characteristics of key atmospheric components and chemical systems in the lower and middle atmosphere.

Effective: Summer 2007

Prerequisite: CHEM 110

METEO 533 Cloud Physics (3) Overview of cloud systems; theories of phase changes in clouds and micro-physical mechanisms of precipitation formation; cloud electrification.

Effective: Fall 1993

Prerequisite: METEO 431

METEO 535 Radiative Transfer (3) Fundamentals of electromagnetic radiation and its interaction with matter; radiation

and climate, atmospheric remote sensing, and observable atmospheric optical phenomena.
Effective: Spring 1996

METEO 537 Radar Meteorology (3) Weather radar principles; single- and dual-Doppler radar analysis techniques; multiparameter (dual polarization, dual wavelength) radar analysis; introduction to NEXRAD.
Effective: Spring 1996
Prerequisite: METEO 421, PHYS 204

METEO 538 Atmospheric Convection (3) Properties of shallow and deep atmospheric convection and interactions between convection, the boundary layer, and larger-scale weather systems.
Effective: Summer 1995

METEO 554 Atmospheric Turbulence (3) An introduction to the physics, structure, modeling, representation, and measurement of atmospheric turbulence.
Effective: Spring 1996
Prerequisite: METEO 520

METEO 555 Atmospheric Diffusion (3) The theory of molecular and turbulent diffusion; experiments, theory, and practical implications of air pollution problems.
Effective: Spring 1996
Prerequisite: METEO 520

METEO 563 Bioclimatology (3) Climatic phenomena in their relation to life.
Effective: Fall 1988

METEO 565 Physics of the Upper Atmosphere (3) Graduate version of material that is covered in METEO 465.
Effective: Fall 1983
Prerequisite: METEO 421, METEO 431

METEO 574 Atmospheric Dynamics Seminar (1-3 per semester/maximum of 15) A weekly seminar course that focuses on current and past research problems in dynamic meteorology and oceanography.
Effective: Spring 1988

METEO 575 Climate Dynamics Seminar (1-3 per semester/maximum of 15) Review of evolving climate dynamics and earth system science, including ongoing departmental research.
Effective: Spring 1988

METEO 580 Communication of Meteorological Research (1) Methods for effective written and oral presentation of meteorological research are reviewed.
Effective: Spring 1994

METEO 581 Topics in Atmospheric Chemistry (1-3 per semester/maximum of 15) Discussion of recent research papers in, and concepts pertinent to, acidic deposition, photochemical air pollution, and global chemical budgets.
Effective: Spring 1988

METEO 582 Ice and Snow Physics (1-3 per semester/maximum of 15) Structure of ice and its electrical, optical, mechanical, and surface properties; snow formation in the atmosphere.
Effective: Fall 1991

METEO 587 Topics in Atmospheric Physics (1-3 per semester, maximum of 15) Seminar discussion of physical processes in the atmosphere including cloud life cycles, radiative transfer, remote sensing, and hydrologic cycle.
Effective: Spring 1989

METEO 588 (GEOSC 588) Oceans and Climate Seminar (2) A focussed discussion on some aspect of the ocean's role in the climate system. Theme to vary from semester to semester.
Effective: Summer 1998

METEO 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1988

METEO 591 Development and Ethics in the Atmospheric Sciences (1) Provide a forum for discussion of scholarship and research integrity as well as critical components of professional development.
Effective: Fall 2010

METEO 592 Research Proposal Preparation in the Atmospheric Sciences (1) This course familiarizes graduate students with research rigor, proposals, and processes.
Effective: Fall 2010

METEO 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

METEO 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

METEO 597A Tropical Meteorology (3) Recent research and fundamental topics in tropical meteorology will be discussed.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

METEO 597A Global Carbon Cycle (3) A research-literature based review of the processes governing atmospheric CO₂. Terrestrial, oceanic, and anthropogenic processes will be considered.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

METEO 597B Climate Dynamics of the Earth (3) Fundamental principles that govern earth's climate and their relevance to past and future climate change.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

METEO 600 Thesis Research (1-15) No description.
Effective: Fall 1983

METEO 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

METEO 602 Supervised Experiences in College Teaching (1-3 per semester/maximum of 6) No description.
Effective: Fall 1983

METEO 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

METEO 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

METEO 801 Understanding Weather Forecasting for Educators (3) Fundamental principles of synoptic and physical meteorology, remote sensing and data analysis in the setting of mid-latitude weather forecasting.
Effective: Summer 2008

METEO 802 Fundamentals of Tropical Forecasting for Educators (3) Applying atmospheric principles to the tropics, with an emphasis on the development, structure, prediction, and destructive impact of hurricanes.
Effective: Summer 2008
Prerequisite: METEO 801

METEO 803 Fundamentals of Mesoscale Weather Forecasting for Educators (3) Applying atmospheric principles to small-scale weather systems, with an emphasis on the conceptual modeling and short-range prediction of severe thunderstorms.
Effective: Summer 2008
Prerequisite: METEO 801

METEO 804 Special Topics in Weather Forecasting for Educators (3) Exploring specialized weather forecasting topics and techniques spanning from mesoscale to planetary spatial scales and short-term to long-range time scales.
Effective: Summer 2008
Prerequisite: METEO 801;METEO 802;METEO 803

METEO 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2007

Last Import from UCM: June 16, 2011 3:00 AM

Microbiology (MICRB)

MICRB 401 Microbial Physiology and Structure (3) Physiology and structure of bacteria important in microbiological research. Designed for science majors.

Effective: Summer 2007

Prerequisite: CHEM 202 or CHEM 210; MICRB 201, MICRB 202

MICRB 405A Seminar and Practicum in Medical Technology (8) Chemistry. Fundamental principles and the quantitative measurement of chemical components in the blood and other body fluids.

Effective: Fall 1987

MICRB 405B Seminar and Practicum in Medical Technology (1) Urinalysis. Identification of cellular and noncellular urinary sediments. Qualitative chemical analysis of urine.

Effective: Fall 1988

MICRB 405C Seminar and Practicum in Medical Technology (6) Hematology. Principles of red and white blood cell development. Identification of normal and pathological conditions.

Effective: Fall 1988

MICRB 405D Seminar and Practicum in Medical Technology (5) Immunohematology. Immunologic and genetic principles governing the transfusion of blood and blood products.

Effective: Fall 1987

MICRB 405E Seminar and Practicum in Medical Technology (7) Microbiology. Identification of normal and abnormal microbial flora from various locations on and within the human body.

Effective: Fall 1987

MICRB 405F Seminar and Practicum in Medical Technology (3) Serology-Immunology. Immunological principles and their application in the identification of present or past disease states of the human.

Effective: Fall 1987

MICRB 408 Laboratory Instructional Practice (1-2) Participation in the instruction of undergraduate laboratory courses, including classroom preparation; discussion of principles and objectives of each exercise.

Effective: Spring 1994

Prerequisite: 8 credits in microbiology and permission of department head

MICRB 410 Principles of Immunology (3) Theories of immunity; focuses on the basis for the acquired immune response at the organ, cell, and molecular levels.

Effective: Summer 1998

Prerequisite: B M B 251, MICRB 201 or MICRB 251

MICRB 411 Survey of Microbiology Literature (1 per semester) An introduction to readings and oral presentations in microbiology.

Effective: Spring 1994

Prerequisite: 8 credits in microbiology courses

MICRB 412 Medical Microbiology (3) Characteristics, methods of identification, and pathogenesis of bacteria that cause human disease; principles of disease dynamics and control.

Effective: Fall 1993

Prerequisite: MICRB 201

MICRB 413 Microbial Diversity (2) survey of microorganisms having special adaptive mechanisms for life in common and unique environments; topics include ecology, evolution, and bioremediation.

Effective: Spring 1997

Prerequisite: MICRB 201, MICRB 202

MICRB 415 General Virology: Bacterial and Animal Viruses (3) The interaction of different types of viruses with bacterial and animal cells, including mechanisms of infection and viral synthesis.

Effective: Summer 2000

Prerequisite: B M B 251, B M B 252 or BIOL 110, BIOL 230W; MICRB 201

MICRB 416 (BIOTC 416) Microbial Biotechnology (2) Fundamentals of applied biotechnology; the use of microorganisms in the synthesis of biologically-important and industrially-useful products.

Effective: Spring 2009

Prerequisite: MICRB 201, MICRB 202; B M B 442 or MICRB 442

MICRB 421W Laboratory of General and Applied Microbiology (3) Laboratory exercises demonstrating fundamental techniques and principles of experimentation of general and applied microbiology.

Effective: Spring 2001

Prerequisite: MICRB 201, MICRB 202

MICRB 422 **Medical Microbiology Laboratory** (2) Laboratory exercises demonstrating properties and classification of medically important microorganisms and techniques used in their identification.

Effective: Fall 1993

Prerequisite: MICRB 202 Concurrent: MICRB 412

MICRB 432 (B M B 432, VB SC 432) **Advanced Immunology: Signaling in the Immune System** (3) The study of signaling pathways that regulate the immune response.

Effective: Fall 2007

Prerequisite: B M B 400, MICRB 410

MICRB 435 (B M B 435, VB SC 435) **Viral Pathogenesis** (2) A study of the molecular, immunological and pathological aspects of viral diseases as well as laboratory methods of diagnosis.

Effective: Fall 2007

Prerequisite: MICRB 201; B M B 251 and B M B 252 or BIOL 110 and BIOL 230W

MICRB 442 (B M B 442) **Laboratory in Proteins, Nucleic Acids, and Molecular Cloning** (3) Laboratory in enzyme purifications and assay techniques; nucleic acid isolation and characterization, including plasmid preparation.

Effective: Spring 2009

Prerequisite: B M B 251, BIOL 230W or MICRB 201; CHEM 202 or CHEM 210 . Prerequisite or concurrent: B M B 211 or B M B 401

MICRB 447 **Laboratory in Molecular Immunology** (1) Laboratory in molecular techniques to assay antigens, antibodies, and receptor sites.

Effective: Fall 1995

Prerequisite: MICRB 410

MICRB 450 (B M B 450) **Microbial/Molecular Genetics** (2) Genetic phenomena, with emphasis on molecular mechanisms: gene transfer, recombination, gene conversion, gene fusion, suppression, transposons.

Effective: Fall 2010

Prerequisite: BIOL 222 or BIOL 322, MICRB 201

MICRB 460 (B M B 460) **Cell Growth and Differentiation** (3) Mechanisms and regulation of protein trafficking, organelle biosynthesis, cell development, signaling and cell cycle control. Emphasizes experimental design and analysis.

Effective: Spring 2006

Prerequisite: B M B 252

MICRB 480 (B M B 480) **Tumor Viruses and Oncogenes** (3) Oncogenes, DNA and RNA tumor viruses, and relevant experimental techniques with emphasis on molecular basis of carcinogenesis and gene regulation.

Effective: Spring 2001

Prerequisite: or concurrent: MICRB 415, MICRB 435 or MICRB 460

MICRB 496 **Independent Studies** (1-18) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

MICRB 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1995

MICRB 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 1995

MICRB 498A (B M B 498A) **Antibiotics: Development and Resistance** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MICRB 498A (B M B 498A) **Antibiotics: Development and Resistance** (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MICRB 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

1 Students must take a combination of MICRB 106 GN and 107 GN to receive General Education credit in biology.

Last Import from UCM: June 16, 2011 3:00 AM

Mineral Engineering (MIN E)

MIN E 415 Management in the Mineral Industries for Environmental, Legal, and Health and Safety Problems (3)
Mineral industries management and labor structure analyzed, with emphasis on environmental, health and safety, and legal aspects.

Effective: Spring 1999

Prerequisite: sixth-semester standing

MIN E 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1999

MIN E 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 1999

Last Import from UCM: June 16, 2011 3:00 AM

Mineral Processing (MN PR)

MN PR 401 Mineral Process Engineering (3) Unit operations for processing particulate materials: comminution, screening, classification, slurry pumping, thickening, filtration, etc.; application to mineral processing plant design.
Effective: Spring 2001
Prerequisite: MN PR 301, MATH 250 or MATH 251

MN PR 413 Mineral Processing Laboratory (1) A laboratory study of the chemical and physical principles involved in practical mineral processing operations.
Effective: Spring 1999
Prerequisite: or concurrent: MN PR 301

MN PR 424 Coal Preparation (3) Unit operations, flowsheets, and testing methods used in preparation of coal.
Effective: Spring 1999
Prerequisite: MN PR 301

MN PR 425 Interfacial Phenomena and Flotation (3) Surface and interfacial phenomena related to flotation agglomeration, flocculation, and dispersion of particles. Application to mineral separation and related processes.
Effective: Fall 2009
Prerequisite: EME 301; MATH 250 or MATH 251; MN PR 301

MN PR 426 (MATSE 426) Aqueous Processing (3) A study of the chemical and engineering principles pertinent to metal processing in aqueous systems: hydrometallurgical extraction, plating, materials preparation.
Effective: Fall 2009
Prerequisite: EME 301 or MATSE 401

MN PR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

MN PR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 1999

MN PR 501 Interfacial Phenomena in Mineral Systems (3) Applications of surface phenomena to mineral engineering systems. Thermodynamics of surfaces, flotation, adsorption of detergents, electrical double layer, flocculation, dispersion.
Effective: Summer 2007
Prerequisite: CHEM 450

MN PR 502 Froth Flotation and Agglomeration (3) Intensive study of theory and applications of froth flotation and agglomeration.
Effective: Spring 1999
Prerequisite: MN PR 501

MN PR 503 Colloid Phenomena (3) Flotation microkinetics; shear, carrier, and selective flocculation; aerosols, foams, and emulsions; spherical agglomeration and emulsion flotation; colloids in hydrometallurgy.
Effective: Summer 2007
Prerequisite: CHEM 450

MN PR 505 Physical Separations in Mineral Processing (3) Intensive study of theory and applications of gravity, magnetic, electrostatic, centrifugal, and other methods of mineral processing.
Effective: Spring 1999
Prerequisite: MN PR 401

MN PR 506 Mineral Process Plant Design (3-10) Process design and economy. Development and quantification of flow sheets. Integration of unit operations. Plant layout, equipment selection, and instrumentation.
Effective: Spring 1999
Prerequisite: MN PR 401

MN PR 507 (MATSE 560) Hydrometallurgical Processing (3) Fundamental physico-chemical factors underlying the aqueous extraction and recovery of metals and nonmetals from ores, minerals, and scrap metal.
Effective: Spring 2003
Prerequisite: MATSE 426

MN PR 508 Mineral Particle Systems (3) Creation, characterization, separation, and agglomeration of particles. Comminution, sizing, fractionation of powders; surface area, pore size determinations. Agglomeration and balling.
Effective: Spring 1999

MN PR 509 Particle-Fluid Dynamics (3) Movement of particles in fluids, rheology of non-Newtonian mineral suspensions, design of concentrating devices, fluidized beds, electrodynamic, magnetic separations.
Effective: Spring 1999

MN PR 510 **Size Reduction** (3) Review of the state of the art in precise design of size reduction devices; their incorporation into mineral processing circuits.
Effective: Spring 1999

MN PR 520 **Mathematical Modeling for Mineral Process Engineers** (3) Techniques for setting up mathematical models of physical processes of interest in mineral process engineering; analytical and computational methods of solution.
Effective: Spring 1999
Prerequisite: MATH 250

MN PR 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1999

MN PR 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

MN PR 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1999

MN PR 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1999

MN PR 600 **Thesis Research** (1-15) No description.
Effective: Spring 1999

MN PR 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Spring 1999

MN PR 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in development of instructional materials, organizing and conducting lectures and laboratories and evaluating students in undergraduate level courses (1-499).
Effective: Spring 1999

MN PR 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Spring 1999

MN PR 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Spring 1999

Last Import from UCM: June 16, 2011 3:00 AM

Mining (MNG)

MNG 401 Introduction to Mining Operations (1) An introduction to underground and surface mining methods; selection of extraction equipment; relevant auxiliary operations. Not intended for Mining Engineering majors.

Effective: Spring 2008

Prerequisite: E MCH 211

MNG 404 Mine Materials Handling Systems (2) Analysis and design of materials-handling systems in mining, such as belt conveyors, locomotives, and hoisting.

Effective: Spring 1999

Prerequisite: MNG 402

MNG 410 Underground Coal Extraction (2) Underground coal-mine design; extraction techniques; description of the various auxiliary operations as they relate to the mining methods.

Effective: Spring 1999

Prerequisite: MNG 404, MNG 422, MNG 431

MNG 411 Mine Systems Engineering (2) Applied operations research and systems methods for decision making in mine operations; time and systems studies to improve productivity.

Effective: Spring 1999

Prerequisite: MNG 404

MNG 412 Mineral Property Evaluation (3) Ore reserve estimation using statistics and geostatistics, mine cost estimation, engineering economy concepts applied to mineral deposits.

Effective: Spring 1999

Prerequisite: MNG 030

MNG 422 Mine Ventilation and Air Conditioning (3) Quality, quantity, and temperature-humidity control of the mine atmosphere; general mine environmental control.

Effective: Fall 2007

Prerequisite: C E 360, MNG 030 . Prerequisite or concurrent: M E 300

MNG 431 Rock Mechanics (3) Ground stresses, laboratory rock properties, laboratory and field instrumentation, rock mass characteristics, subsidence, slope stability, design of mine workings.

Effective: Fall 2003

Prerequisite: E MCH 210

MNG 441 Surface Mining Systems and Design (3) Design of surface mining for noncoal and coal minerals; emphasis on quarry and strip mining planning parameters: unit operations, systems, haulroads, draglines, spoil stability, reclamation, legal requirements, and health and safety.

Effective: Spring 1999

Prerequisite: MN PR 301, MNG 030

MNG 451W Mining Engineering Project (1-5) Independent and integrative design and report of specific mine evaluation, layout, equipment selection, environmental control, permitting, and financial analysis.

Effective: Spring 1999

Prerequisite: seventh-semester standing in mining engineering plus six months of mining work experience

MNG 460 Mine Maintenance Engineering (3) Mine maintenance system design; maintenance planning and management; safety and cost analysis of maintenance programs.

Effective: Spring 1999

MNG 470 Mining and Geologic Structures (3) Study of geologic structures and their impacts on mining operations.

Effective: Summer 2009

Prerequisite: GEOSC 001, GEOSC 201

MNG 497 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 2008

MNG 515 Mine Systems Simulation (3) Principles and practices of probabilistic and deterministic simulation in the analysis of operating systems related to mills and mines.

Effective: Spring 1999

Prerequisite: MNG 411

MNG 541 Surface Mine Equipment Selection Analysis (3) Design analysis and selection criteria for principal surface mine equipment, their interaction in operation, and auxiliary equipment requirements.

Effective: Spring 1999

Prerequisite: C E 360, MNG 441

MNG 554 Rock Mechanics Design (3) Engineering design process; design of mines, tunnels, slopes, and underground chambers; guided design concept; creativity and innovation; group design project.

Effective: Spring 1999

Prerequisite: MNG 543

MNG 557 (GEOEE 557) **Computational Geomechanics I** (3) Finite element and boundary element analysis of rock mechanics, groundwater flow, and mass transport.
Effective: Summer 2002

MNG 559 (GEOEE 559) **Consolidation of Porous Media** (2) Coupled fluid flow and deformation behavior of geologic media. Theory and applications in geological, environmental, and petroleum engineering.
Effective: Summer 2002
Prerequisite: MNG 557

MNG 590 (EME 590, F SC 590, P N G 590) **Colloquium** (1-3) Continuing seminars which consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.
Effective: Spring 2009

MNG 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1999

MNG 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1999

MNG 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Spring 1999

MNG 599 (IL) **Foreign Study** (1-12 maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.
Effective: Summer 2005

MNG 600 **Thesis Research** (1-15) No description.
Effective: Spring 1999

MNG 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Spring 1999

MNG 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Spring 1999

MNG 611 **Ph.D. Dissertation Part Time** (0) No description.
Effective: Spring 1999

Mining Technology (MNG T)

No courses for department code **MNG T** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Music (MUSIC)

Individual instruction in technique, literature, and pedagogy is offered in six categories covering eighteen instruments:

BRASS: Trumpet, French horn, trombone, euphonium, tuba

KEYBOARD: Piano, organ

STRINGS: Violin, viola, violoncello, doublebass

WOODWINDS: Flute, oboe, clarinet, bassoon, saxophone

PERCUSSION

VOICE

For each instrument individual instruction is offered to different types of students at different levels:

Primary instrument: Student in B.A. (Music) and B.S. (Music Ed) Levels I-VII

Performance instrument: Students in B.Mus. Level I-VII

Secondary instrument: Nonmajor students or others using this as secondary instrument.

The courses are designated according to a particular pattern for identification on the student's transcript and in the *Schedule of Classes*. Applied music fees are required for individualized instruction: \$175 for a 1-credit course; \$250 for a 2-credit course; \$250 for a 3-credit course. Examples of listings:

Course Abbrev	Number & Suffix	Instrument	Type of Student	Level	Credit	Fee
BRASS	100J	TRUMPET:	Secondary:		1	\$175
	110J	TRUMPET:	Secondary:		2	\$250
BRASS	120J	TRUMPET:	Primary:	Level I	2	\$250
	170J	TRUMPET:	Primary:	Level II	2	\$250
BRASS	200J	TRUMPET:	Primary:	Level III	2	\$250
	270J	TRUMPET:	Primary:	Level IV	2	\$250
BRASS	320J	TRUMPET:	Primary:	Level V	2	\$250
	370J	TRUMPET:	Primary:	Level VI	2	\$250
BRASS	420J	TRUMPET:	Primary:	Level VII	2	\$250
	470J	TRUMPET:	Primary:	Level VIII	2	\$250
BRASS	130J	TRUMPET:	Performance:	Level I	3	\$250
	180J	TRUMPET:	Performance:	Level II	3	\$250

	280J	TRUMPET:	Performance:	Level IV	3	\$250
BRASS	330J	TRUMPET:	Performance:	Level V	3	\$250
	380J	TRUMPET:	Performance:	Level VI	3	\$250
BRASS	430J	TRUMPET:	Performance:	Level VII	3	\$250
	480J	TRUMPET:	Performance:	Level VIII	3	\$250

MUSIC 400 **Solo Recital** (1) Required recital for Performer's Certificate.

Effective: Spring 1994

Prerequisite: permission of the director of the school of music

MUSIC 412 **Jazz Pedagogy** (2) The development of advanced skills in pedagogy for teaching jazz bands.

Effective: Summer 1994

Prerequisite: admission to the Music Education program or certification

MUSIC 414 **String Pedagogy** (1-2) The development of skills in pedagogy for teaching strings.

Effective: Spring 1992

Prerequisite: completion of 300-level strings course

MUSIC 415 **Woodwind Pedagogy** (1-2) The development of skills in pedagogy for teaching woodwinds.

Effective: Spring 1992

Prerequisite: completion of 300-level woodwind course

MUSIC 416 Brass Pedagogy (1-2) The development of skills in pedagogy for teaching brass.

Effective: Spring 1992

Prerequisite: completion of 300-level brass course

MUSIC 417 Percussion Pedagogy (1-2) The development of advanced skills in pedagogy for teaching percussion.

Effective: Summer 1992

Prerequisite: MUSIC 152;PERCN 320J orPERCN 330J or permission of instructor

MUSIC 418 Voice Pedagogy (2) Analysis of techniques of teaching voice and studies of related music literature and pedagogical writings.

Effective: Spring 2004

Prerequisite: VOICE 270J orVOICE 280J ; or four semesters ofVOICE 100J orVOICE 110J

MUSIC 419 Piano Pedagogy I (2) Analysis of beginning teaching methods and teaching strategies for children.

Effective: Spring 1997

Prerequisite: KEYBD 270 orKEYBD 280;MUSIC 331

MUSIC 420 Song Writing and Recording (3) Song composition, arranging and recording in a variety of style genres.

Effective: Spring 2011

Prerequisite: INART 258, MUSIC 232

MUSIC 421 Jazz Combo Class (1) Study and performance of small group jazz.

Effective: Summer 1994

Prerequisite: MUSIC 181

MUSIC 422 Jazz Harmony and Arranging (3) Analysis and composition of jazz tunes and chord progressions; instrumental and vocal arranging in the jazz idiom.

Effective: Fall 1983

Prerequisite: MUSIC 222, MUSIC 232

MUSIC 424 Piano Pedagogy II (2) Analysis of techniques of teaching intermediate-early advanced level piano and studies of music literature and pedagogical writings.

Effective: Spring 1997

Prerequisite: KEYBD 270 orKEYBD 280;MUSIC 331

MUSIC 425 Advanced Voice Pedagogy (2) Analysis of techniques of teaching voice, supervised teaching, studies of studio materials and related topics.

Effective: Spring 2004

Prerequisite: MUSIC 418

MUSIC 427 Masters of Music (3) An intensive investigation of the works of a major composer in Western music history. (May be repeated for credit.)

Effective: Spring 2007

MUSIC 428 Graduate Review of Tonal Analysis (2) Application of analytical techniques to music from Bach to Brahms.

Effective: Spring 1997

Prerequisite: undergraduate core in music theory and literature at an accredited university or elementary analysis; MUSIC 429 and 430 if indicated on entering competency exam

MUSIC 429 Aural Review for Graduate Students (1) An intensive review of the aural skills required for a theoretical understanding of 18th- and 19th-century music.

Effective: Summer 1994

Prerequisite: MUSIC 221 or undergraduate core in music theory at an accredited university

MUSIC 431 ADVANCED TONAL ANALYSIS (2-3) Advanced techniques of musical analysis.

Effective: Fall 1996

Prerequisite: MUSIC 331

MUSIC 432 Graduate Review of Twentieth-Century Analysis (2-3) The theory and analysis of style in music of the twentieth century.

Effective: Fall 1997

Prerequisite: MUSIC 262, MUSIC 331

MUSIC 433 Advanced Analysis of Twentieth Century Music (2-3) In-depth studies of selected twentieth-century repertoires and/or analytical models.

Effective: Summer 1996

Prerequisite: MUSIC 262, MUSIC 332

MUSIC 435 Score Reading (1) Introduction in score reading at the keyboard.

Effective: Spring 1991

Prerequisite: MUSIC 232 ; piano proficiency passed

MUSIC 441W Emphasis in Elementary General and Choral Music (3) Selection and application of materials, methods, teaching and assessment strategies for elementary general and choral music settings.

Effective: Spring 2011

Prerequisite: MUSIC 345, MUSIC 395B

MUSIC 442W Capstone Experience in Middle School General and Choral Music (3) Capstone experience to teaching in

general and choral middle school settings.

Effective: Fall 2007

Prerequisite: Limited to Music Education Majors. MUSIC 345, MUSIC 395B

MUSIC 444W Emphasis in Elementary and Intermediate Band (3) Examination and application of teaching strategies and materials for students planning to teach band in the elementary and middle schools.

Effective: Spring 2011

Prerequisite: MUSIC 345, MUSIC 395A, MUSIC 366 piano proficiency passes

MUSIC 445W Emphasis in High School Band (3) Examination and application of teaching strategies and materials for students planning to teach high school bands.

Effective: Spring 2011

Prerequisite: MUSIC 345, MUSIC 395B

MUSIC 446W Emphasis in Strings and Orchestra (3) Development of teaching techniques for instructing elementary and secondary string/orchestra student musicians for music education majors.

Effective: Spring 2011

Prerequisite: MUSIC 345, MUSIC 395B

MUSIC 450 Teaching Marching Band (2) Traditional and contemporary drill design principles, show development strategies, instructional techniques, and organizational procedures involved in teaching marching band.

Effective: Fall 2007

Prerequisite: MUSIC 345 or three years collegiate marching band experience or permission of program

MUSIC 451 Computer Programming for Musicians (3 per semester/maximum of 12) In-depth study of music programming techniques.

Effective: Spring 2011

Prerequisite: INART 258A, MUSIC 455 or permission of program

MUSIC 455 Technology in Music (1-3:1.5:1.5) Survey of how musical information is stored and processed in computer systems.

Effective: Spring 2008

Prerequisite: CMPSC 100, CMPSC 101, CMPSC 121 or MUSIC 231

MUSIC 458 Electronic Music Composition (3) An introduction to the art of composition in the electronic audio medium.

Effective: Spring 2011

Prerequisite: INART 258A

MUSIC 460 Teaching Musical Cultures (2) Exploration of the world's musical cultures and the implication of and procedures for teaching multicultural music. Limited to upper division music majors or permission of program.

Effective: Summer 2006

Prerequisite: MUSIC 262 or permission of program

MUSIC 461W Studies in Music History: Antiquity to 1600 (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from antiquity to 1600, with emphasis on writing and research.

Effective: Fall 2010

Prerequisite: MUSIC 261, MUSIC 331

MUSIC 462W Studies in Music History: 1550-1750 (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from 1550-1750, with emphasis on writing and research.

Effective: Fall 2010

Prerequisite: MUSIC 261, MUSIC 331

MUSIC 463W Studies in Music History: 1700-1900 (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from 1700-1900, with emphasis on writing and research.

Effective: Fall 2010

Prerequisite: MUSIC 262, MUSIC 331

MUSIC 464W Studies in Music History: 1850-Present (3 per semester/maximum of 6) In-depth study of selected aspects of music and culture from 1850 to the present, with emphasis on writing and research.

Effective: Fall 2010

Prerequisite: MUSIC 262, MUSIC 332

MUSIC 465 Advanced Conducting I (3) Advanced instruction in conducting; conducting techniques specific to instrumental or choral music; emphasis on score study and rehearsal technique.

Effective: Summer 1994

Prerequisite: MUSIC 366

MUSIC 466 Advanced Conducting II (2 per semester/maximum of 8) Standard scores of symphonies, tone poems, operas, oratorios, and shorter vocal and instrumental works studied from the viewpoint of the conductor.

Effective: Spring 1995

Prerequisite: MUSIC 465

MUSIC 467 Opera Workshop (1-3 per semester/maximum of 6) History, analysis, and production of operas from sixteenth century to present.

Effective: Spring 2001

Prerequisite: audition

MUSIC 468 Acting for Singers (2 per semester/maximum of 4) To help students develop authentic and specific characters/portrayals on stage through physical and emotional awareness.

Effective: Fall 2008

Prerequisite: Must be currently enrolled for voice jury track at the level of V220J or higher or register with permission of the program

MUSIC 471 Structural and Sixteenth-Century Counterpoint (2) Advanced species counterpoint and its application to the sixteenth-century style.

Effective: Fall 1983

Prerequisite: MUSIC 222, MUSIC 232

MUSIC 472 Eighteenth-Century Counterpoint (2) Imitative and nonimitative counterpoint in the style of Bach.

Effective: Fall 1983

Prerequisite: MUSIC 222, MUSIC 232

MUSIC 473 Composition VII (3) Composition instruction for fourth-year composition majors.

Effective: Spring 1998

Prerequisite: MUSIC 374

MUSIC 474 Composition VIII (3) Composition instruction for fourth-year composition majors.

Effective: Spring 1998

Prerequisite: MUSIC 473

MUSIC 476W B.A. Senior Project (3) A semester project appropriate to student's option in B.A. program (e.g., research paper, performance with program notes, or related paper).

Effective: Spring 1992

Prerequisite: seventh-semester standing

MUSIC 478 Vocal Literature (3) Introduction to the literature for solo voice in opera, oratorio, cantata, art song, and chamber music from the baroque to the present.

Effective: Spring 1997

Prerequisite: MUSIC 262, MUSIC 331

MUSIC 480 Opera Literature (3) Studies in the development of the opera from 1600 to the present, treating both libretto and music.

Effective: Spring 1997

Prerequisite: MUSIC 262, MUSIC 331

MUSIC 481 Keyboard Literature (3) Studies in the development of keyboard music and instruments; a survey of all eras using listening, analysis, and performance.

Effective: Spring 1997

Prerequisite: MUSIC 262, MUSIC 331

MUSIC 483 Seminar in Voice Pedagogy (2) Survey of literature relevant to the teaching of voice from historical sources through recent pedagogical scholarship.

Effective: Spring 2004

Prerequisite: MUSIC 418

MUSIC 485 Chamber Music Literature (3) Survey of chamber music for strings, winds, and brass instruments from the mid-16th century to the present day.

Effective: Spring 1997

Prerequisite: MUSIC 262, MUSIC 331

MUSIC 487 Orchestral Literature (3) Survey of orchestral literature.

Effective: Spring 1997

Prerequisite: MUSIC 262, MUSIC 331

MUSIC 488 Studies in the Major Performance Area (1-2) Selected studies in music literature specific to the student's major performance area. Will include research, analysis and performance.

Effective: Spring 2011

MUSIC 489 Studio and Recital Accompaniment (1 per semester/maximum of 4) Advanced keyboard accompaniment of student soloists in the studio and in public performance under faculty supervision.

Effective: Fall 1983

Prerequisite: MUSIC 194 or permission of instructor

MUSIC 493 Sonata Duos (1 per semester/maximum of 4) Preparation for performance of advanced sonata literature for various individual instruments with keyboard.

Effective: Fall 1983

Prerequisite: MUSIC 193 or equivalent; permission of instructor

MUSIC 494 Research Topics (1-3) Supervised research leading to senior thesis or project.

Effective: Fall 1983

MUSIC 494H Research Topics (1-3) Supervised research leading to senior thesis or project.

Effective: Fall 2007

MUSIC 495A Student Teaching: General Music (5-7) Observation and teaching under supervision.

Effective: Fall 2001

Prerequisite: completion of all courses in the major with a grade of "C" or better Concurrent: MUSIC 442

MUSIC 495B Student Teaching: Choral Music (5-7) Observation and teaching under supervision.

Effective: Fall 2001

Prerequisite: completion of all courses in the major with a grade of "C" or better Concurrent: MUSIC 443

MUSIC 495C Student Teaching: Instrumental Music (5-7) Observation and teaching under supervision.

Effective: Fall 2001

Prerequisite: completion of all courses in the major with a grade of "C" or better Concurrent: MUSIC 444

MUSIC 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

MUSIC 496H Independent Studies - Honors (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2011

MUSIC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

MUSIC 497A Survey Music History (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497A Survey Music History (3) For graduate students who need remedial work in music history.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MUSIC 497B Oriana Singers (1) Performs music written for treble voices.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497B Viola Orchestral Excerpts (1) An introduction to excerpts from the viola parts of standard orchestral literature required for professional orchestral audition.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MUSIC 497C Women's Chorale (1) Performs selected treble repertoire from the past five centuries.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497C Clarinet Literature (1-2) Selected studies in Music Literature specific to the clarinet. Will include research, analysis and performance.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MUSIC 497D University Choir (1) Presents both major large-scale choral works and appropriate shorter work. 18th, 19th, and 20th century major works.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497D Business of Music (1) Survey of topics related to a career in music performance - including auditions, competitions, finances, work abroad, etc. Guest lecturers included.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MUSIC 497E Song Writing (3) This course will take the student through the process of composing and producing a recorded song. Topics covered in addition to music composition will include form, lyric writing, arranging, audio recording and sequencing. Familiarity with basic audio sequencing software and music theory concepts is important.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: permission of program required

MUSIC 497F Essence of Joy (3) Ensemble to perform sacred and secular repertoire from the African American traditions.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497G Glee Club (1) Male voices singing music from the renaissance through the twentieth-century.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497I Hi-Lo's (1) Select Group Performing Choral Chamber Music.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497J Mallet Ensemble (1) Study and performance of music for keyboard percussion instruments.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 497K Viola Orchestral Excerpts (1) An introduction to excerpts from the viola parts of standard orchestral

literature required for professional orchestral auditions.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

MUSIC 498A Review of Harmony/Analysis (2) Devoted to in-depth study of tonal harmony and analysis, beginning with a review of diatonic progressions and continuing with chromatic harmony.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 498A The Music of the Beatles (2-3) This course will examine the music of the Beatles by tracing the development of John Lennon, Paul McCartney, and George Harrison as songwriters.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

MUSIC 498B Early Childhood Practicum (1) Students will plan and deliver weekly music classes for preschool children at the Bennett Center. Will complete a case study on one child they observe throughout the semester.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 498C Bass Orchestral Excerpts (1) This course is designed to study in depth a series of double bass excerpts from the standard orchestral and opera repertoire. We will look at how to prepare a mock audition behind a screen at the end of the semester.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 498D iEnsemble (1) Theoretical, compositional, and application of i technology.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

MUSIC 500 Introduction to Music Reference and Research Materials (2) A study of musicological reference and research materials in English and Western European languages, with exercises in their use.
Effective: Fall 1983

MUSIC 502 Early Music Ensemble (1) Ensemble for the performance and study of Renaissance and Baroque music on instruments of the era.
Effective: Summer 2002
Prerequisite: placement audition

MUSIC 503 Concert Choir (1 per semester, maximum of 4) Rehearsal and performance of choral repertoire appropriate to mixed-voice ensemble of approximately sixty voices.
Effective: Spring 1993
Prerequisite: admission by audition

MUSIC 504 Chamber Singers (1 per semester, maximum of 4) Rehearsal and performance of choral repertoire appropriate to mixed-voice ensemble of approximately twenty-four voices.
Effective: Spring 1993
Prerequisite: admission by audition

MUSIC 505 symphonic Wind Ensemble (1 per semester, maximum of 4) Rehearsal and performance of wind repertoire and concert band literature.
Effective: Spring 1993
Prerequisite: admission by audition

MUSIC 506 Symphonic Band (1 per semester, maximum of 4) Rehearsal and performance of symphonic band literature. A select group using standard instrumentation.
Effective: Spring 1993
Prerequisite: admission by audition

MUSIC 507 Philharmonic Orchestra (1 per semester, maximum of 4) Orchestra rehearsal and performance.
Effective: Spring 1993
Prerequisite: admission by audition

MUSIC 508 Chamber Orchestra (1 per semester, maximum of 4) Chamber orchestra rehearsal and performance.
Effective: Spring 1993
Prerequisite: admission by audition

MUSIC 509 Centre Dimensions (1 per semester, maximum of 4) The rehearsal and performance of large jaza band literature ("charts") along with individualized formal study of jaza improvisation.
Effective: Spring 1993
Prerequisite: admission by audition

MUSIC 510 Brass Choir (1 per semester, maximum of 4) Rehearsal and performance of literature involving brass instruments.

Effective: Spring 1993

Prerequisite: admission by audition

MUSIC 511 Percussion Ensemble (1 per semester, maximum of 4) Study and performance of percussion chamber music in various instrumental combinations focusing on the classical and contemporary repertoire.

Effective: Spring 1993

Prerequisite: admission by audition

MUSIC 519 Graduate Seminar in Intermediate Piano Pedagogy (2) Graduate seminar in intermediate teaching repertoire and strategies for piano from the Baroque to the 21st century.

Effective: Summer 2008

Prerequisite: MUSIC 424, MUSIC 589

MUSIC 520 Chamber Music for Strings (1 per semester, maximum of 4) Preparation for performance of (advanced) chamber music literature involving primarily stringed instruments--quartets and quintets.

Effective: Spring 1993

Prerequisite: admission by audition

MUSIC 521 Chamber Music for Woodwinds (1 per semester, maximum of 4) Preparation for performance of (advanced) chamber music literature involving primarily woodwind instruments--quartets and quintets.

Effective: Spring 1993

Prerequisite: admission by audition

MUSIC 522 Chamber Music for Brass (1 per semester, maximum of 4) Preparation for performance of (advanced) chamber music literature involving primarily brass instruments--quartets and quintets.

Effective: Spring 1993

Prerequisite: admission by audition

MUSIC 523 Sonata Duos (1 per semester, maximum of 4) Preparation for performance of (advanced) sonata literature for various individual instruments with keyboard.

Effective: Spring 1993

Prerequisite: admission by audition

MUSIC 524 Graduate Seminar in Advanced Piano Pedagogy (2) Graduate seminar in advanced repertoire, history of piano pedagogy, and strategies for piano from the Baroque to the 21st century.

Effective: Summer 2008

Prerequisite: MUSIC 424, MUSIC 589

MUSIC 531 Analytical Techniques (3) Twentieth-century theories of tonal music other than Schenker; emphasis on motivic, thematic, metric, and rhythmic analysis.

Effective: Spring 1992

Prerequisite: MUSIC 331

MUSIC 532 Schenkerian Analysis (3) An intensive introduction to the analytical method developed by the Twentieth-century Austrian theorist and musicologist, Heinrich Schenker.

Effective: Summer 2011

Prerequisite: satisfactory performance on the graduate theory placement examination

MUSIC 533 The Pedagogy of Undergraduate Theory and History (2) A study of approaches to the teaching and learning of music theory (written and aural skills) and history.

Effective: Summer 1995

Prerequisite: MUSIC 262, MUSIC 331

MUSIC 535 Composition (1-4) Composition of vocal, instrumental, and electronic media and preparation of compositions for performance.

Effective: Fall 1998

Prerequisite: MUSIC 474

MUSIC 547 The Materials of Appreciation (3) Examination of written and recorded materials and appropriate techniques for developing appreciation of music at elementary, secondary, and college levels.

Effective: Fall 1983

MUSIC 551 Administration and Supervision of School Music (3) Examination of procedures for effective supervision of music instruction and administration of school music programs.

Effective: Summer 1984

Prerequisite: 5 years of music teaching in public schools

MUSIC 552 Internship in Music Supervision (3-6) Internship in schools under supervision of graduate faculty in music education.

Effective: Fall 1984

Prerequisite: EDLDR 560, MUSIC 551

MUSIC 560 Choral Conducting (2-4 per semester, maximum of 16) Study of choral conducting techniques, comprehensive score analysis, and supervised rehearsal and performance practicum.

Effective: Summer 1995

Prerequisite: MUSIC 466 or admission by audition

MUSIC 561 Orchestral Conducting (2-4 per semester, maximum of 8) Study of orchestral conducting technique,

comprehensive score analysis, and supervised rehearsal and performance practicum.

Effective: Spring 2008

Prerequisite: MUSIC 466 or admission by audition

MUSIC 562 Band/Wind Ensemble Conducting (2-4 per semester, maximum of 16) Study of band and wind ensemble conducting, comprehensive score analysis, and supervised rehearsal and performance practicum.

Effective: Summer 1998

MUSIC 565 Studio and Recital Accompaniment (1 per semester, maximum of 4) Keyboard accompaniment of student soloists in the studio and in public performance, under faculty supervision.

Effective: Spring 1993

Prerequisite: admission by audition

MUSIC 572 Seminar in Musicology (3 per semester/maximum of 9) Research in selected areas of music history.

Effective: Fall 1983

MUSIC 573 Integrative Seminar in Music Theory and History (3 per semester/maximum of 9) Special topics (composer, style, genre) taught from both theoretical and historical perspectives.

Effective: Fall 2000

Prerequisite: MUSIC 262, MUSIC 331

MUSIC 574 Seminar in Music Theory (3) Study of analytical techniques, aesthetics, writings, in music theory, music cognition, musical sketches, and mathematical models taught from a theory perspective.

Effective: Spring 2001

Prerequisite: MUSIC 428, MUSIC 432

MUSIC 575 Integrative Conducting Seminar (1 per semester/maximum of 2) A seminar for choral, orchestral, and band/wind ensemble graduate conducting majors, taught by conducting faculty in all three areas.

Effective: Summer 1998

MUSIC 580 Studies in Orchestral Literature (1-3 per semester/maximum of 8) Selected studies in orchestral literature from the seventeenth century to the present.

Effective: Spring 2008

MUSIC 582 Studies in Band/Wind Ensemble Literature (2-3 per semester/maximum of 8) Selected studies in band and wind ensemble literature from the Renaissance to the present.

Effective: Summer 1998

MUSIC 583 Studies in Choral Literature (2-3 per semester, maximum of 20) Selected studies in choral literature of all types from the Renaissance to the present.

Effective: Spring 1992

MUSIC 585 Graduate Seminar in Keyboard Music 1710 to 1820 (2) Seminar in music for keyboards (organ, harpsichord, pianoforte) from the early works of J.S. Bach (c. 1710) to late Beethoven.

Effective: Summer 2008

Prerequisite: MUSIC 481

MUSIC 586 Graduate Seminar in Piano Music 1820-1920 (2) Seminar in music for pianoforte from the early works of Schubert, circa 1820, to Rachmaninoff (Romantic and post-Romantic).

Effective: Summer 2008

Prerequisite: MUSIC 481

MUSIC 587 Graduate Seminar in Piano Music 1890-Present (2) Seminar in modern music for pianoforte from the early works of Debussy (circa 1890) to the present day.

Effective: Summer 2008

Prerequisite: MUSIC 481

MUSIC 588 Seminar in Music Literature of the Major Performance Area (1-3) Selected studies in music literature specific to the student's major performance area. Will include research, analysis, and performance.

Effective: Summer 1991

MUSIC 589 Seminar in Piano Pedagogy (2) Selected variable topics in piano pedagogy; includes research, performance and discussion of appropriate literature, and class participation.

Effective: Summer 1992

Prerequisite: MUSIC 419, MUSIC 424

MUSIC 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 1995

MUSIC 591 Graduate Degree Performance (1) A juried recital performance for students majoring in performance, composition, or conducting.

Effective: Spring 1985

Prerequisite: consent of department

MUSIC 594 Master's Paper Research (1-6) Investigation of a specific problem in music or music education.
Effective: Fall 1983

MUSIC 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 1994
Prerequisite: MUSIC 419, MUSIC 424, MUSIC 589

MUSIC 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

MUSIC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

MUSIC 597A Jazz (2) Five day jazz instructional and pedagogical workshop to study with jazz masters and educators. Jazz principles, history, methods, materials and improvisational techniques for practical applications in classrooms.
Effective: Summer 2011 Ending: Summer 2011

MUSIC 597A Philosophy of Music Education (3) Philosophy of music education will focus on both major and minor philosophical premises in music education including historical works, current philosophies, and new directions for the future of this field. This course contains a significant amount of reading and preparation for discussion.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011
Prerequisite: doctoral students only or permission of program

MUSIC 598D iEnsemble (1) Theoretical, compositional, and application of i technology.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

MUSIC 600 Thesis Research (1-15) No description.
Effective: Fall 1983

MUSIC 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

MUSIC 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Supervised experience for teaching assistants in music.
Effective: Fall 1983

MUSIC 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

MUSIC 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

MUSIC 801 Doctoral Solo Recital (DMA) (2 per semester/maximum of 4) Culminating solo recital(s) of artist-level repertoire; may be repeated with different repertoire.
Effective: Summer 2008
Prerequisite: Completion of at least one semester of KEYBD 580J (lessons doctoral/artist level)

MUSIC 802 DMA Lecture-Recital Monograph (1) Preparation of a monograph to be text of the DMA lecture-recital; must be approved prior to performance.
Effective: Summer 2008
Prerequisite: Candidacy for the DMA; previous completion of one MUSIC 801 recital

MUSIC 803 Performance of the DMA Lecture-Recital (2) Performance of the D.M.A. lecture-recital (the lecture monograph to be pre-approved as MUSIC 802).
Effective: Summer 2008
Prerequisite: Candidacy for the Doctor of Musical Arts degree; MUSIC 802

MUSIC 804 Chamber Music Recital (DMA) (1 per semester/maximum of 2) Recital devoted to chamber music (including song groups or cycles for voice and piano). May be repeated.
Effective: Summer 2008
Prerequisite: Candidacy for the Doctor of Musical Arts degree

MUSIC 805 DMA Final Recital (3) Final, culminating solo recital of artist-level repertoire; independently prepared.
Effective: Summer 2008
Prerequisite: Completion of all other course work; Comprehensive Examination for the degree Doctor of Musical Arts

Music - Brass (BRASS)

BRASS 420J Trumpet: Primary VII (2) Individual instruction in trumpet one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: BRASS 370J and permission of faculty jury

BRASS 421J French Horn: Primary VII (2) Individual instruction in French horn one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: BRASS 321J and permission of faculty jury

BRASS 422J Trombone: Primary VII (2) Individual instruction in trombone one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: BRASS 372J and permission of faculty jury

BRASS 423J Euphonium: Primary VII (2) Individual instruction in euphonium/baritone one hour per week. For School of Music B.A. and B.S. majors; other qualified students.

Effective: Fall 1983

Prerequisite: BRASS 373J and permission of faculty jury

BRASS 424J Tuba: Primary VII (2) Individual instruction in tuba one hour per week. For School of Music B.A. and B.S. majors; other qualified students.

Effective: Fall 1983

Prerequisite: BRASS 374J and permission of faculty jury

BRASS 430J Trumpet: Performance VII (3) Individual instruction in trumpet one hour per week. For B.Mus. trumpet performance majors.

Effective: Fall 1983

Prerequisite: BRASS 380J and permission of faculty jury

BRASS 431J French Horn: Performance VII (3) Individual instruction in French horn one hour per week. For B.Mus. French horn performance majors.

Effective: Fall 1983

Prerequisite: BRASS 381J and permission of faculty jury

BRASS 432J Trombone: Performance VII (3) Individual instruction in trombone one hour per week. For B.Mus. trombone majors.

Effective: Fall 1983

Prerequisite: BRASS 382J and permission of faculty jury

BRASS 433J Euphonium: Performance VII (3) Individual instruction in euphonium/baritone one hour per week. For B.Mus. euphonium/baritone majors.

Effective: Fall 1983

Prerequisite: BRASS 383J and permission of faculty jury

BRASS 434J Tuba: Performance VII (3) Individual instruction in tuba one hour per week. For B.Mus. tuba majors.

Effective: Fall 1983

Prerequisite: BRASS 384J and permission of faculty jury

BRASS 470J Trumpet: Primary VIII (2) Individual instruction in trumpet one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: BRASS 420J and permission of faculty jury

BRASS 471J French Horn: Primary VIII (2) Individual instruction in French horn one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: BRASS 421J and permission of faculty jury

BRASS 472J Trombone: Primary VIII (2) Individual instruction in trombone one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: BRASS 422J and permission of faculty jury

BRASS 473J Euphonium: Primary VIII (2) Individual instruction in euphonium/baritone one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: BRASS 423J and permission of faculty jury

BRASS 474J Tuba: Primary VIII (2) Individual instruction in tuba one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: BRASS 424J and permission of faculty jury

BRASS 480J Trumpet: Performance VIII (3) Individual instruction in trumpet one hour per week. For B.Mus. trumpet

performance majors.

Effective: Fall 1983

Prerequisite: BRASS 430J and permission of faculty jury

BRASS 481J French Horn: Performance VIII (3) Individual instruction in French horn one hour per week. For B.Mus. French horn performance majors.

Effective: Fall 1983

Prerequisite: BRASS 431J and permission of faculty jury

BRASS 482J Trombone: Performance VIII (3) Individual instruction in trombone one hour per week. For B.Mus. trombone majors.

Effective: Fall 1983

Prerequisite: BRASS 432J and permission of faculty jury

BRASS 483J Euphonium: Performance VIII (3) Individual instruction in euphonium/baritone one hour per week. For B.Mus. euphonium/baritone majors.

Effective: Fall 1983

Prerequisite: BRASS 433J and permission of faculty jury

BRASS 484J Tuba: Performance VIII (3) Individual instruction in tuba one hour per week. For B.Mus. tuba majors.

Effective: Fall 1983

Prerequisite: BRASS 434J and permission of faculty jury

BRASS 500J Trumpet: Secondary (1) Individual instruction in trumpet one-half hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

BRASS 501J French Horn: Secondary (1) Individual instruction in French horn one-half hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

BRASS 502J Trombone: Secondary (1) Individual instruction in trombone one-half hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

BRASS 503J Euphonium: Secondary (1) Individual instruction in euphonium/baritone one-half hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

BRASS 504J Tuba: Secondary (1) Individual instruction in tuba one-half hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

BRASS 510J Trumpet: Secondary (2) Individual instruction in trumpet one hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

BRASS 511J French Horn: Secondary (2) Individual instruction in French horn one hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

BRASS 512J Trombone: Secondary (2) Individual instruction in trombone one hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

BRASS 513J Euphonium: Secondary (2) Individual instruction in euphonium/baritone one hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

BRASS 514J Tuba: Secondary (2) Individual instruction in tuba one hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

BRASS 530J Trumpet: Performance (4 per semester/maximum of 16) Individual instruction in trumpet one hour per week. For graduate trumpet performance majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

BRASS 531J French Horn: Performance (4 per semester/maximum of 16) Individual instruction in French Horn one hour per week. For graduate French horn performance majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

BRASS 532J Trombone: Performance (4 per semester/maximum of 16) Individual instruction in trombone one hour per week. For graduate trombone majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

BRASS 533J Euphonium: Performance (4 per semester, maximum of 16) Individual instruction in euphonium one hour per week. For graduate euphonium majors.

Effective: Spring 1992

Prerequisite: acceptance into program by faculty jury

BRASS 534J Tuba: Performance (4 per semester/maximum of 16) Individual instruction in tuba two sessions per week. For graduate tuba performance majors.

Effective: Fall 1986

Prerequisite: acceptance into major by faculty jury

Last Import from UCM: June 16, 2011 3:00 AM

Music - Keyboard (KEYBD)

KEYBD 420J Piano: Primary VII (2) Individual instruction in piano one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: KEYBD 370J and permission of faculty jury

KEYBD 430J Piano: Performance VII (3) Individual instruction in piano one hour per week. For B.Mus. piano performance majors.

Effective: Fall 1983

Prerequisite: KEYBD 380J and permission of faculty jury

KEYBD 470J Piano: Primary VIII (2) Individual instruction in piano one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: KEYBD 420J and permission of faculty jury

KEYBD 480J Piano: Performance VIII (3) Individual instruction in piano one hour per week. For B.Mus. piano performance majors.

Effective: Fall 1983

Prerequisite: KEYBD 430J and permission of faculty jury

KEYBD 500J Piano: Secondary (1) Individual instruction in piano one-half hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

KEYBD 501J Organ: Secondary (1) Individual instruction in pipe organ one-half hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

KEYBD 502J Harpsichord: Secondary (1) Individual instruction in harpsichord one-half hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

KEYBD 510J Piano: Secondary (1) Individual instruction in piano one hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

KEYBD 511J Organ: Secondary (2) Individual instruction in pipe organ one hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

KEYBD 512J Harpsichord: Secondary (2) Individual instruction in harpsichord one hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

KEYBD 530J Piano: Performance (4 per semester/maximum of 16) Individual instruction in piano one hour per week. For graduate piano performance majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

KEYBD 531J Organ: Performance (4 per semester/maximum of 16) Individual instruction in pipe organ one hour per week. For graduate organ performance majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

KEYBD 532J Harpsichord: Performance (4 per semester/maximum of 16) Individual instruction in harpsichord one hour per week. For graduate harpsichord performance major.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

KEYBD 580J Piano Performance Doctoral/Artist Level (4) One-hour weekly piano lessons with jury examination at end of each semester; repeatable course; four semesters required.

Effective: Summer 2008

Last Import from UCM: June 16, 2011 3:00 AM

Music - Percussion (PERCN)

PERCN 420J **Percussion: Primary VII** (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: PERCN 370J and permission of faculty jury

PERCN 430J **Percussion: Performance VII** (3) Individual instruction in percussion one hour per week. For B.Mus. percussion majors.

Effective: Fall 1983

Prerequisite: PERCN 380J and permission of faculty jury

PERCN 470J **Percussion: Primary VIII** (2) Individual instruction in percussion one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: PERCN 420J and permission of faculty jury

PERCN 480J **Percussion: Performance VIII** (3) Individual instruction in percussion one hour per week. For B.Mus. percussion majors.

Effective: Fall 1983

Prerequisite: PERCN 430J and permission of faculty jury

PERCN 500J **Percussion: Secondary** (1) Individual instruction in percussion one-half hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

PERCN 510J **Percussion: Secondary** (2) Individual instruction in percussion one hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

PERCN 530J **Percussion: Performance** (4 per semester/maximum of 16) Individual instruction in percussion one hour per week. For graduate percussion performance majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

Last Import from UCM: June 16, 2011 3:00 AM

Music - String (STRNG)

STRNG 420J Violin: Primary VII (2) Individual instruction in violin one hour per week. For School of Music B.A. and B.S. majors; other qualified students.

Effective: Fall 1983

Prerequisite: STRNG 370J and permission of faculty jury

STRNG 421J Viola: Primary VII (2) Individual instruction in viola one hour per week. For School of Music B.A. and B.S. majors; other qualified students.

Effective: Fall 1983

Prerequisite: STRNG 371J and permission of faculty jury

STRNG 422J Violoncello: Primary VII (2) Individual instruction in violoncello one hour per week. For School of Music B.A. and B.S. majors; other qualified students.

Effective: Fall 1983

Prerequisite: STRNG 372J and permission of faculty jury

STRNG 423J Double Bass: Primary VII (2) Individual instruction in double bass one hour per week. For School of Music B.A. and B.S. majors; other qualified students.

Effective: Fall 1983

Prerequisite: STRNG 373J and permission of faculty jury

STRNG 430J Violin: Performance VII (3) Individual instruction in violin one hour per week. For B.Mus. violin performance majors.

Effective: Fall 1983

Prerequisite: STRNG 380J and permission of faculty jury

STRNG 431J Viola: Performance VII (3) Individual instruction in viola one hour per week. For B.Mus. viola performance majors.

Effective: Fall 1983

Prerequisite: STRNG 381J and permission of faculty jury

STRNG 432J Violoncello: Performance VII (3) Individual instruction in violoncello one hour per week. For B.Mus. violoncello performance majors.

Effective: Fall 1983

Prerequisite: STRNG 382J and permission of faculty jury

STRNG 433J Double Bass: Performance VII (3) Individual instruction in double bass one hour per week. For B.Mus. double bass performance majors.

Effective: Fall 1983

Prerequisite: STRNG 383J and permission of faculty jury

STRNG 470J Violin: Primary VIII (2) Individual instruction in violin one hour per week. For School of Music B.A. and B.S. majors; other qualified students.

Effective: Fall 1983

Prerequisite: STRNG 420J and permission of faculty jury

STRNG 471J Viola: Primary VIII (2) Individual instruction in viola one hour per week. For School of Music B.A. and B.S. majors; other qualified students.

Effective: Fall 1983

Prerequisite: STRNG 421J and permission of faculty jury

STRNG 472J Violoncello: Primary VIII (2) Individual instruction in violoncello one hour per week. For School of Music B.A. and B.S. majors; other qualified students.

Effective: Fall 1983

Prerequisite: STRNG 422J and permission of faculty jury

STRNG 473J Double Bass: Primary VIII (2) Individual instruction in double bass one hour per week. For School of Music B.A. and B.S. majors; other qualified students.

Effective: Fall 1983

Prerequisite: STRNG 423J and permission of faculty jury

STRNG 480J Violin: Performance VIII (3) Individual instruction in violin one hour per week. For B.Mus. violin performance majors.

Effective: Fall 1983

Prerequisite: STRNG 430J and permission of faculty jury

STRNG 481J Viola: Performance VIII (3) Individual instruction in viola one hour per week. For B.Mus. viola performance majors.

Effective: Fall 1983

Prerequisite: STRNG 431J and permission of faculty jury

STRNG 482J Violoncello: Performance VIII (3) Individual instruction in violoncello one hour per week. For B.Mus. violoncello performance majors.

Effective: Fall 1983

Prerequisite: STRNG 432J and permission of faculty jury

STRNG 483J **Double Bass: Performance VIII** (3) Individual instruction in double bass one hour per week. For B.Mus. double bass performance majors.

Effective: Fall 1983

Prerequisite: STRNG 433J and permission of faculty jury

STRNG 500J **Violin: Secondary** (1) Individual instruction in violin one-half hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

STRNG 501J **Viola: Secondary** (1) Individual instruction in viola one-half hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

STRNG 502J **Violoncello: Secondary** (1) Individual instruction in violoncello one-half hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

STRNG 503J **Double Bass: Secondary** (1) Individual instruction in double bass one-half hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

STRNG 510J **Violin: Secondary** (2) Individual instruction in violin one hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

STRNG 511J **Viola: Secondary** (2) Individual instruction in viola one hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

STRNG 512J **Violoncello: Secondary** (2) Individual instruction in violoncello one hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

STRNG 513J **Double Bass: Secondary** (2) Individual instruction in double bass one hour per week. For students who qualify.

Effective: Fall 1983

Prerequisite: permission of instructor

STRNG 530J **Violin: Performance** (4 per semester/maximum of 16) Individual instruction in violin one hour per week. For graduate violin performance majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

STRNG 531J **Viola: Performance** (4 per semester/maximum of 16) Individual instruction in viola one hour per week. For graduate viola performance majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

STRNG 532J **Violoncello: Performance** (4 per semester/maximum of 16) Individual instruction in violoncello one hour per week. For graduate violoncello performance majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

STRNG 533J **Double Bass: Performance** (4 per semester/maximum of 16) Individual instruction in double bass one hour per week. For graduate double bass performance majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

Last Import from UCM: June 16, 2011 3:00 AM

Music - Voice (VOICE)

VOICE 412J **Musical Theatre Voice V** (2) Individual instruction in voice. Intended for Theatre BFA in Music Theatre students.

Effective: Fall 2006

Prerequisite: admission into Theatre BFA in Musical Theatre

VOICE 420J **Voice: Primary VII** (2) Individual instruction in voice one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: VOICE 370J and permission of faculty jury

VOICE 430J **Voice: Performance VII** (3) Individual instruction in voice one hour per week. For B.Mus. voice performance majors.

Effective: Fall 1983

Prerequisite: VOICE 380J and permission of faculty jury

VOICE 462J **Musical Theatre Voice VI** (2) Individual instruction in voice. Intended for Theatre BFA in Music Theatre students.

Effective: Fall 2006

Prerequisite: Admission into Theatre BFA in Musical Theatre

VOICE 470J **Voice: Primary VIII** (2) Individual instruction in voice one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: VOICE 420J and permission of faculty jury

VOICE 480J **Voice: Performance VIII** (3) Individual instruction in voice one hour per week. For B.Mus. voice performance majors.

Effective: Fall 1983

Prerequisite: VOICE 430J and permission of faculty jury

VOICE 500J **Voice: Secondary** (1) Individual instruction in voice one-half hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

VOICE 510J **Voice: Secondary** (2) Individual instruction in voice one hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

VOICE 530J **Voice: Performance** (4 per semester/maximum of 16) Individual instruction in voice one and one-half hours per week. For graduate voice performance majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

Last Import from UCM: June 16, 2011 3:00 AM

Music - Woodwinds (WWNDS)

WWNDS 420J **Flute: Primary VII** (2) Individual instruction in flute one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: WWNDS 370J and permission of faculty jury

WWNDS 421J **Oboe: Primary VII** (2) Individual instruction in oboe one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: WWNDS 371J and permission of faculty jury

WWNDS 422J **Clarinet: Primary VII** (2) Individual instruction in clarinet one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: WWNDS 372J and permission of faculty jury

WWNDS 423J **Bassoon: Primary VII** (2) Individual instruction in bassoon one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: WWNDS 373J and permission of faculty jury

WWNDS 424J **Saxophone: Primary VII** (2) Individual instruction in saxophone one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: WWNDS 374J and permission of faculty jury

WWNDS 430J **Flute: Performance VII** (3) Individual instruction in flute one hour per week. For B.Mus. flute performance majors.

Effective: Fall 1983

Prerequisite: WWNDS 380J and permission of faculty jury

WWNDS 431J **Oboe: Performance VII** (3) Individual instruction in oboe one hour per week. For B.Mus. oboe majors.

Effective: Fall 1983

Prerequisite: WWNDS 381J and permission of faculty jury

WWNDS 432J **Clarinet: Performance VII** (3) Individual instruction in clarinet one hour per week. For B.Mus. clarinet majors.

Effective: Fall 1983

Prerequisite: WWNDS 382J and permission of faculty jury

WWNDS 433J **Bassoon: Performance VII** (3) Individual instruction in bassoon one hour per week. For B.Mus. bassoon performance majors.

Effective: Fall 1983

Prerequisite: WWNDS 383J and permission of faculty jury

WWNDS 434J **Saxophone: Performance VII** (3) Individual instruction in saxophone one hour per week. For B.Mus. saxophone performance majors.

Effective: Fall 1983

Prerequisite: WWNDS 384J and permission of faculty jury

WWNDS 470J **Flute: Primary VIII** (2) Individual instruction in flute one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: WWNDS 420J and permission of faculty jury

WWNDS 471J **Oboe: Primary VIII** (2) Individual instruction in oboe one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: WWNDS 421J and permission of faculty jury

WWNDS 472J **Clarinet: Primary VIII** (2) Individual instruction in clarinet one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: WWNDS 422J and permission of faculty jury

WWNDS 473J **Bassoon: Primary VIII** (2) Individual instruction in bassoon one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: WWNDS 423J and permission of faculty jury

WWNDS 474J **Saxophone: Primary VIII** (2) Individual instruction in saxophone one hour per week. For School of Music B.A. and B.S. majors.

Effective: Fall 1983

Prerequisite: WWNDS 424J and permission of faculty jury

WWNDS 480J **Flute: Performance VIII** (3) Individual instruction in flute one hour per week. For B.Mus. flute performance majors.

Effective: Fall 1983

Prerequisite: WWNDS 430J and permission of faculty jury

WWNDS 481J **Oboe: Performance VIII** (3) Individual instruction in oboe one hour per week. For B.Mus. oboe majors.

Effective: Fall 1983

Prerequisite: WWNDS 431J and permission of faculty jury

WWNDS 482J **Clarinet: Performance VIII** (3) Individual instruction in clarinet one hour per week. For B.Mus. clarinet majors.

Effective: Fall 1983

Prerequisite: WWNDS 432J and permission of faculty jury

WWNDS 483J **Bassoon: Performance VIII** (3) Individual instruction in bassoon one hour per week. For B.Mus. bassoon performance majors.

Effective: Fall 1983

Prerequisite: WWNDS 433J and permission of faculty jury

WWNDS 484J **Saxophone: Performance VIII** (3) Individual instruction in saxophone one hour per week. For B.Mus. saxophone performance majors.

Effective: Fall 1983

Prerequisite: WWNDS 434J and permission of faculty jury

WWNDS 500J **Flute: Secondary** (1) Individual instruction in flute one-half hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

WWNDS 501J **Oboe: Secondary** (1) Individual instruction in oboe one-half hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

WWNDS 502J **Clarinet: Secondary** (1) Individual instruction in clarinet one-half hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

WWNDS 503J **Bassoon: Secondary** (1) Individual instruction in bassoon one-half hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

WWNDS 504J **Saxophone: Secondary** (1) Individual instruction in saxophone one-half hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

WWNDS 510J **Flute: Secondary** (2) Individual instruction in flute one hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

WWNDS 511J **Oboe: Secondary** (2) Individual instruction in oboe one hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

WWNDS 512J **Clarinet: Secondary** (2) Individual instruction in clarinet one hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

WWNDS 513J **Bassoon: Secondary** (2) Individual instruction in bassoon one hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

WWNDS 514J **Saxophone: Secondary** (2) Individual instruction in saxophone one hour per week.

Effective: Fall 1983

Prerequisite: permission of instructor

WWNDS 530J **Flute: Performance** (4 per semester/maximum of 16) Individual instruction in flute one and one-half hour per week. For graduate flute performance majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

WWNDS 531J **Oboe: Performance** (4 per semester/maximum of 16) Individual instruction in oboe one hour per week. For graduate oboe performance majors.

Effective: Fall 1986

Prerequisite: permission of faculty jury

WWNDS 532J **Clarinet: Performance** (4 per semester/maximum of 16) Individual instruction in clarinet one hour per week. For graduate clarinet performance majors.

Effective: Fall 1986

Prerequisite: permission of faculty jury

WWNDS 533J **Bassoon: Performance** (4 per semester/maximum of 16) Individual instruction in bassoon one hour per week. For graduate bassoon performance majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

WWNDS 534J **Saxophone: Performance** (4 per semester/maximum of 16) Individual instruction in saxophone one hour per week. For graduate saxophone performance majors.

Effective: Fall 1986

Prerequisite: acceptance into program by faculty jury

Last Import from UCM: June 16, 2011 3:00 AM

Music Education (MU ED)

MU ED 440 Music Learning and Development (2) Psychological principles related to music learning processes and applications of those to teaching music.

Effective: Spring 2010

Prerequisite: permission of program

MU ED 540 Reflective Practice and Inquiry I (2) This course will develop students' reflection in and on teaching through gaining understanding of systematic inquiry and reflection paradigms.

Effective: Spring 2010

MU ED 541 Developing Music Curricula (2) Introduction to the process for developing music curricula for grades K-12 that reflects current theories/research data as well as state/national guidelines.

Effective: Fall 2009

MU ED 545 Psychological Foundations of Musical Behavior (3) Study of psychoacoustical effects of musical stimuli; emphasis on responses affecting learning musical ability, musical taste, and aesthetic reactions.

Effective: Fall 2009

MU ED 546 Assessment of Music Learning (2) Exploration of the unique processes, techniques, and challenges involved in the assessment of music learning.

Effective: Fall 2009

MU ED 547 Mentoring Novice Teachers (1 per semester/maximum of 2) Strategies for mentoring novice music teachers in peer teaching experiences and in K-12 school field experiences.

Effective: Summer 2010

MU ED 550 Reflective Practice and Inquiry II (2) This course will use systematic inquiry and reflection to assist students' in understanding the relevance of research methods in music education.

Effective: Spring 2010

Prerequisite: MU ED 540

MU ED 555 Doctoral Seminar in Music Education (1 per semester, maximum of 6) Forum for the discussion of problems in theory and design encountered in individual and group research projects.

Effective: Fall 2009

Prerequisite: admission to doctoral candidacy

MU ED 557 Readings in the History of American Music Education (2) Intensive reading course on the history of American music education and the social, theological, and educational influences on the profession.

Effective: Fall 2009

MU ED 559 Contemporary Issues in Music Education (1-2) Consideration of the current political and pedagogical issues that influence curriculum development, teaching, and administration of K-12 music programs.

Effective: Fall 2009

Last Import from UCM: June 16, 2011 3:00 AM

Nanofabrication Manufacturing Technology (NMT)

No courses for department code **NMT** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Navy (NAVSC)

NAVSC 401 **Naval Operations and Seamanship** (3) Introduction to naval operations; the theory and principles of the rules of the road; use of the maneuvering board.

Effective: Fall 2006

Prerequisite: NAVSC 205

NAVSC 402 **Leadership and Management II** (2) The Navy's Resource Management Program (personnel management), counseling techniques, military justice, prevention of substance abuse, and naval correspondence and publications.

Effective: Fall 1983

Prerequisite: NAVSC 401

NAVSC 411 **Amphibious Warfare** (2) A historical survey and evaluation of twentieth-century amphibious warfare operations.

Effective: Fall 1992

Prerequisite: 6 credits of Navy ROTC courses

NOTE: Candidates for regular commission in the Navy will gain practicum work during two afloat summer cruises.

Candidates for Regular commission in the Marine Corps will gain practicum work during one afloat summer cruise and one Marine Corps cruise at a Marine Corps base.

Additionally, the summer between the sophomore and junior years includes career orientation and training on vocational specialties in the Navy and Marine Corps.

Candidates for Reserve commissions in the navy and the Marine Corps will gain practicum work during one afloat summer cruise or one cruise at a Marine Corps base, respectively.

Last Import from UCM: June 16, 2011 3:00 AM

Nuclear Engineering (NUC E)

NUC E 401 Introduction to Nuclear Engineering (3) Fundamental concepts of nuclear engineering, including fission, reactor theory, shielding, and radioisotopes; intended for other than nuclear engineering students.

Effective: Fall 2001

Prerequisite: MATH 250 or MATH 251

NUC E 403 Advanced Reactor Design (3) Physical principles and computational methods for reactor analysis and design. Multigroup diffusion theory; determination of fast and thermal group constants; cell calculations for heterogeneous core lattices.

Effective: Fall 1983

Prerequisite: NUC E 302

NUC E 405 (CHEM 406) Nuclear and Radiochemistry (3) Theory of radioactive decay processes, nuclear properties and structure, nuclear reactions, interactions of radiation with matter, biological effects of radiation.

Effective: Spring 2007

Prerequisite: CHEM 452 or PHYS 237 or NUC E 301

NUC E 406 (M E 406) Introduction to Statistical Thermodynamics (3) Statistical description of systems composed of large numbers of particles in the context of classical and quantum mechanics; basic concepts of probability theory and thermodynamics as they relate to statistical mechanics.

Effective: Fall 2007

Prerequisite: M E 300 or M E 201 or M E 202 or CH E 303; MATH 230 or MATH 231

NUC E 408 Radiation Shielding (3) Radiation sources in reactor systems; attenuation of gamma rays and neutrons; point kernel methods; deep penetration theories; Monte Carlo methods.

Effective: Spring 1985

Prerequisite: NUC E 301

NUC E 409 (MATSE 409) Nuclear Materials (3) Nuclear reactor materials: relationship between changes in material properties and microstructural evolution of nuclear cladding and fuel under irradiation.

Effective: Spring 2003

Prerequisite: PHYS 214

NUC E 420 Radiological Safety (3) Ionizing radiation, biological effects, radiation measurement, dose computational techniques, local and federal regulations, exposure control.

Effective: Spring 1997

Prerequisite: NUC E 301 or NUC E 405

NUC E 428 Radioactive Waste Control (3) Nature, sources, and control of radioactive wastes; theory and practice of disposal processes.

Effective: Spring 1997

Prerequisite: NUC E 301 or NUC E 405

NUC E 430 Design Principles of Reactor Systems (3) Nuclear power cycles; heat removal problems; kinetic behavior of nuclear systems; material and structural design problems.

Effective: Fall 2007

Prerequisite: M E 410; NUC E 301 or NUC E 401

NUC E 431W Nuclear Reactor Core Design Synthesis (4) Technical and economic optimization of nuclear systems.

Effective: Spring 1994

Prerequisite: ENGL 202C; NUC E 403, NUC E 430

NUC E 444 Nuclear Reactor Operations Laboratory (1) Correlation of reactor physics and reactor theory with practical reactor situations that will be controlled by the student.

Effective: Fall 1983

Prerequisite: or concurrent: NUC E 302

NUC E 445 Nuclear Digital Instrumentation (3) Interfacing nuclear instruments to microprocessors and computers.

Effective: Spring 2008

Prerequisite: E E 212

NUC E 446 (M E 446) Reliability and Risk Concepts in Design (3) Introduction to reliability mathematics. Failure data collection and analysis. Components and systems reliability prediction. Effects of maintenance on reliability. Risk Analysis. Case studies in engineering applications.

Effective: Spring 2011

Prerequisite: MATH 250 or MATH 251; M E 345 or NUC E 309

NUC E 450 Radiation Detection and Measurement (3) Theory and laboratory applications of radiation detectors, including proton, neutron, charged particle detectors, NIM devices, and pulse-height analysis.

Effective: Spring 2001

Prerequisite: NUC E 301 or NUC E 405; NUC E 309

NUC E 451 Experiments in Reactor Physics (3) Acquisition and processing of nuclear and atomic data; application to nucleonic phenomena of importance in nuclear engineering.

Effective: Spring 2008

Prerequisite: E E 212, NUC E 450

NUC E 470 **Power Plant Simulation** (3) Basic knowledge necessary for intelligent simulation and interpretation of simulations of transients in nuclear power plants.

Effective: Fall 2007

Prerequisite: M E 320, MATH 251, NUC E 302

NUC E 490 (E E 471, AERSP 490) **Introduction to Plasmas** (3) Plasma oscillations; collisional phenomena; transport properties; orbit theory; typical electric discharge phenomena.

Effective: Spring 2008

Prerequisite: E E 361 or PHYS 467

NUC E 494H **Senior Thesis** (1-9) Students must have approval of a thesis adviser before scheduling this course.

Effective: Spring 2007

Prerequisite: Junior or senior status in the University Scholars Program

NUC E 496 **Independent studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

NUC E 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

NUC E 497A **Fundamentals of Nuclear Engineering** (3) An intensive course providing introduction to Nuclear Engineering to undergraduate co-op students, non-NucE graduate, and returning students.

Effective: Summer 2011 Ending: Summer 2011

NUC E 497A **Fundamentals of Nuclear Engineering** (3) An intensive course providing introduction to NucE to undergraduate co-op students, non-NucE graduate, and returning students.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

NUC E 497A **Fundamentals of Nuclear Engineering** (3) An intensive course providing introduction to Nuclear Engineering to undergraduate co-op students, non-NucE graduate, and returning students.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

NUC E 497C **Dynamic Modeling of Energy Systems** (3) To provide engineers with information about energy supplies, their future prospects, and how each can be used most effectively.

Effective: Summer 2011 Ending: Summer 2011

NUC E 497C (M E 497C) **Dynamic Modeling of Energy Systems** (3) To provide engineers with information about energy supplies, their future prospects, and how each can be used most effectively.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

NUC E 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2008

NUC E 501 **Reactor Engineering** (3) Thermal hydraulic fundamentals applied to power reactors, thermal analysis of fuel elements and two-phase heat transfer in heated channels.

Effective: Spring 1992

Prerequisite: NUC E 430

NUC E 502 **Reactor Core Thermal-Hydraulics** (3) In-depth analysis of the reactor core thermal hydraulics; computational methods and practical applications.

Effective: Fall 2010

Prerequisite: NUC E 430

NUC E 505 **Reactor Instrumentation and Control** (3) Reactor control principles; classical control methods; operational control problems; control simulation using modern mainframe and microcomputer software packages; reactor instrumentation.

Effective: Spring 1992

Prerequisite: NUC E 302 or NUC E 401

NUC E 506 **Nuclear Chemistry** (3) Energetics, kinematics, and models of nuclear reactions; nuclear processes as chemical probes, mossbauer effect and perturbed angular correlation spectroscopy.

Effective: Summer 1991

NUC E 511 **Nuclear Reactor Kinetics and Dynamics** (3) Analytical kinetics and dynamics modeling for reactivity-induced transients; reactor accident kinetics methods for simple and complex geometries; experimental methods.

Effective: Spring 2011

Prerequisite: NUC E 301; NUC E 302

NUC E 512 **Nuclear Fuel Management** (3) Nuclear fuel inventory determination and economic value through the fuel

cycle. Emphasis on calculational techniques in reactor, optimization, and design.

Effective: Fall 1983

Prerequisite: NUC E 302

NUC E 521 **Neutron Transport Theory** (3) Derivation of Boltzmann equation for neutron transport; techniques of approximate and exact solution for the monoenergetic and spectrum regenerating cases.

Effective: Fall 1986

Prerequisite: NUC E 403 or PHYS 406

NUC E 523 (MATSE 523) **Environmental Degradation of Materials in Nuclear Power Plants** (3) Degradation of materials performance when exposed to the combination of high temperature, neutron irradiation, and aggressive electrochemistry found in nuclear reactors.

Effective: Spring 2007

Prerequisite: MATSE 420 or NUC E 409

NUC E 525 **Monte Carlo Methods** (3) Fundamentals of the probability theory and statistics, analog and non-analog Monte Carlo methods and their applications, random processes, and numbers.

Effective: Summer 1993

Prerequisite: MATH 141, PHYS 237, STAT 401

NUC E 530 **Parallel/Vector Algorithms for Scientific Applications** (3) Development/analysis of parallel/vector algorithms (finite-differencing of PDEs and Monte Carlo methods) for engineering/scientific applications for shared and distributed memory architectures.

Effective: Spring 2008

Prerequisite: AERSP 424 or CMPSC 450

NUC E 540 (E E 571, AERSP 540) **Theory of Plasma Waves** (3) Solutions of the Boltzmann equation; waves in bounded and unbounded plasmas; radiation and scattering from plasmas.

Effective: Spring 2008

Prerequisite: E E 471

NUC E 541 (E E 572) **Plasma Theory** (3) Advanced topics in kinetic theory, fluctuation theory, microinstability, and turbulence.

Effective: Spring 2008

Prerequisite: E E 471 or NUC E 490

NUC E 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 1991

NUC E 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

NUC E 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

NUC E 597C **Professional Topics** (3) This is a special topics course where the student picks an adviser from the faculty and an adviser from work and writes a professional paper on a topic chosen by the student.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

NUC E 600 **Thesis Research** (1-15) No description.

Effective: Fall 1983

NUC E 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Fall 1983

NUC E 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Graduate assistants receive credit for teaching lower level courses while under the direct supervision of a graduate faculty member.

Effective: Fall 1983

Prerequisite: graduate student standing in nuclear engineering

NUC E 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1983

NUC E 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Nursing (NURS)

NURS 401 (IL) Concepts of Health (3) Exploration of current and ancient concepts of health and their respective modes of intervention.

Effective: Fall 2008

Prerequisite: PSYCH 100 or SOC 001

NURS 402 (US;IL) Holistic Health (3) Examination of emerging conceptualizations of health and therapy based on a holistic view of human beings.

Effective: Fall 2008

Prerequisite: NURS 401

NURS 403 School Health and Emergency Care of Children and Adolescents (3) Techniques for higher-level care for school health and emergency situations and application-based education.

Effective: Spring 2010

Prerequisite: BIOL 129, BIOL 141, HD FS 129

NURS 404 Cardiac Dysrhythmias: Interpretation, Treatment, and Nursing Management (1) An introductory course with a focus on dysrhythmia recognition and interpretation of abnormal 12-lead electrocardiograms (EKG, ECG).

Effective: Fall 2008

Prerequisite: BIOL 141, BIOL 129 or equivalent or approval of program

NURS 405A Nursing Care of the Adult Client with Complex Health Problems: Part A (4) In-depth study of care of patients with acute and complex health problems, utilizing evidence based practice.

Effective: Spring 2011

Prerequisite: NURS 350

NURS 405B Nursing Care of the Adult Client with Complex Health Problems: Part B (4) In-depth study of care of patients with acute and complex health problems, utilizing evidence based practice.

Effective: Summer 2010

Prerequisite: NURS 350

NURS 407 Drugs of Abuse and Mental Health Issues (3) Examines the health care needs across the lifespan of clients who have an alcohol or other drug disorder.

Effective: Fall 2008

Prerequisite: BB H 143 or PSYCH 100 or approval of program

NURS 408 Clinical Application of Pharmacological Concepts (1) Study of the application of pharmacological concepts to the clinical setting.

Effective: Spring 2011

Prerequisite: NURS 305, NURS 301, NURS 310, NURS 320

NURS 409 Introduction to Forensic Nursing (3) Provides an introduction to the forensic health sciences, forensic nursing, and the nursing role in the scientific investigation of violence.

Effective: Spring 2011

Prerequisite: NURS 250, NURS 225, NURS 230

NURS 415 (US;IL) Community and Family Health Nursing (4) Therapeutic nursing care and health promotion concepts to families, groups and populations in the community.

Effective: Spring 2011

Prerequisite: NURS 350

NURS 417 (US;IL) Family and Community Health Concepts (4) Study of the concepts of family and community based nursing care emphasizing multicultural influences on health practices.

Effective: Fall 2008

Prerequisite: NURS 390 and current and valid RN license; Prerequisite or concurrent: NURS 357

NURS 420 Mental Health Nursing (4) Emphasizes clinical application of mental health theory in nursing care of patients with acute and chronic mental health problems.

Effective: Spring 2011

Prerequisite: NURS 350

NURS 430 Organization and Administration for the Nurse Manager (3) Introduction to organizational theory and principles of practice in the administration of nursing services and patient care.

Effective: Spring 2011

Prerequisite: NURS 301, NURS 310, NURS 320 ; or current and valid RN license for RN to BS majors

NURS 431 Data Management for Nurse Managers (3) Analysis of information systems to manage nursing service organizations; includes financial management, the budgeting processes, and productivity measurement.

Effective: Spring 2011

Prerequisite: NURS 301, NURS 310, NURS 320 ; or current and valid RN license for RN to BS majors

NURS 432 Nursing Management of Human Resources (3) Human resource management and related factors in nursing service organizations.

Effective: Spring 2011

Prerequisite: NURS 301, NURS 310, NURS 320 ; or current and valid RN license for RN to BS majors

- NURS 433 Seminar for Nurse Managers (3)** Course focuses on the application of management principles in the role of the nurse manager.
Effective: Spring 2011
Prerequisite: NURS 301, NURS 310, NURS 320 ; or current and valid RN license for RN to BS majors
- NURS 440 Trauma/Critical Care Nursing (3)** Focuses on the impact of and the nursing care of persons experiencing acute trauma and/or critical illness.
Effective: Spring 2011
Prerequisite: NURS 301, NURS 310, NURS 320 or approval of nursing program
- NURS 450A Professional Role Development III: Leadership and Management (2)** Study of leadership roles and various styles of nursing management and their implications for the professional nurse.
Effective: Spring 2011
Prerequisite: NURS 350
- NURS 450B Professional Role Development III: Clinical Capstone (3)** Senior level clinical capstone course that emphasizes the integration and application of theory and evidence based practice.
Effective: Summer 2010
Prerequisite: NURS 450A
- NURS 452 (US) (BB H 452, WMNST 452) Women's Health Issues (3)** Exploration of major health issues concerning women today, with an emphasis on social, cultural, and medical influences.
Effective: Fall 2008
Prerequisite: BIOL 141 or PSYCH 100
- NURS 458 Ethical Challenges in Healthcare Informatics (3)** A case based collaboratory designed for the exploration and analysis of the ethical dilemmas facing healthcare informatics practitioners.
Effective: Spring 2011
- NURS 459 Legal and Professional Issues in School Nursing (3)** Legal and professional issues of school nurses and delivery impact of health care in school environment.
Effective: Spring 2010
Prerequisite: PSYCH 100 or SOC 001 or HD FS 129
- NURS 461 Perioperative Nursing (4)** Comprehensive introduction regarding fundamental principles and practices of the Operating Room Nurse when managing the care of the surgical patient.
Effective: Summer 2011
Prerequisite: RN license required
- NURS 462 Psychotropic Drugs and Children/Adolescents (1)** Study of psychotropic medications used to treat children and adolescents, including indications, actions, adverse reactions and implications for school nurses.
Effective: Summer 2011
Prerequisite: Rn license or permission of program
- NURS 463 Compassionate Counseling for Children/Adolescents Dealing with Dying, Death, Other Life Crises (3)** Compassionate Counseling for Children and Adolescents Dealing with Dying, Death, and Other Life Crises.
Effective: Spring 2010
Prerequisite: PSYCH 100 or SOC 001 or HD FS 129
- NURS 464 (US;IL) Dying and Death (3)** Explores attitudes toward death and dying; concept of grief; responsibilities to the dying person and the family.
Effective: Fall 2008
Prerequisite: PSYCH 100 or SOC 001
- NURS 465 Health Concepts for Adults with Complex Health Care Needs (3)** In-depth study and application of the theoretical principles and roles of adult clients and families with complex healthcare needs.
Effective: Spring 2011
Prerequisite: NURS 390 and current and valid RN license; Prerequisite or concurrent: NURS 357
- NURS 467 Medication Update and Health Teaching Interventions for School Nurses (1)** Study of current pharmacologic concepts, including health teaching, prescribed for acute and chronic conditions commonly encountered in school nursing.
Effective: Summer 2011
Prerequisite: RN license or permission of program
- NURS 468 Client Education Strategies for Nurses and Other Health Care Providers (3)** Explores current and emerging roles of client education in the knowledge era.
Effective: Summer 2011
Prerequisite: PSYCH 100 or SOC 001 or HD FS 129 300-level standing or approval of the program
- NURS 475 Integrated Concepts in Nursing Practice (3)** Project-based capstone course for application of nursing concepts to health promotion/disease prevention in populations.
Effective: Spring 2011
Prerequisite: NURS 417 ; and current and valid RN license
- NURS 492 Emergency Care and Safety (3)** A comprehensive first aid course designed to provide knowledge of prehospital emergency care at the First Responder level.
Effective: Fall 2008
Prerequisite: BIOL 141, BIOL 129 or equivalent or approval of program

NURS 494H Honors Thesis (1-6 per semester/maximum of 6) Independent honors research project related to student's interests directed by faculty supervisor and culminating in production of thesis.

Effective: Summer 2010

Prerequisite: approval of honors thesis adviser

NURS 495 Nursing study in Specialized Setting (1-12) Designed to provide student with in-depth study and practice in clinical specialty area of choice.

Effective: Fall 2008

Prerequisite: seventh-semester standing

NURS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2008

NURS 496A Severe Sepsis Protocol Compliance-Impact on Patient Outcome (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2011 Ending: Summer 2011

NURS 496D Progressive Care Certification (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

NURS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2008

NURS 497A Autism Spectrum Disorders: Care Overview (1) An overview of autism spectrum disorders.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: PSYCH 100 orSOC 001 orHD FS 129 or program approval

NURS 497A Relational Aggression in the Healthcare Setting (3) Explores issue of relational aggression in healthcare workforce with specific focus on nursing profession. Examine research/impact of this problem.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: PSYCH 100 ; NURN NURS or 2NURS majors only

NURS 497B Bullying: Identification and Intervention (1) Explores the impact of bullying on individuals, schools, teachers, families of the target and the bully.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: PSYCH 100 orSOC 001 orHD FS 129 or program approval

NURS 497C Mental Health Movies & Madness (3) Clinical application of mental health theory in nursing care of patients with acute/chronic mental health problems and use of film technology.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: PSYCH 100 and eligibility for the NURN major

NURS 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2008

NURS 499 (IL) Foreign Study--Nursing (1-9) Study of nursing issues in a foreign country.

Effective: Fall 2008

NURS 501 Issues in Nursing and Health Care (3) Analysis and evaluation of the health care system with emphasis on health policy and economic issues affecting nursing practice.

Effective: Fall 2008

NURS 502 Physical Assessment Across the Life Span (3) Advanced assessment and diagnosis of physical, psychosocial, and developmental health throughout the life span in advanced practice.

Effective: Fall 2008

NURS 503 Pathophysiology (3) Integration of advanced physiology, genetics, and pathophysiology as related to specific disease entities and alterations in functioning.

Effective: Fall 2008

NURS 504 Pharmacologic Therapy (3) Use of pharmacologic therapies in advanced practice nursing.

Effective: Fall 2008

NURS 508 Perspectives in Population-Based Health (3) Theories and strategies for promoting health in community aggregates with emphasis on vulnerable and underserved populations of diverse backgrounds.

Effective: Fall 2008

NURS 510 Theoretical Foundations of Nursing (3) Current conceptual and theoretical models in nursing including relationship to practice and research in development of nursing science.
Effective: Fall 2008

NURS 512 Nursing Research (3) A nursing research course with emphasis on research design, data collection methods, and evaluation of research studies.
Effective: Fall 2008
Prerequisite: NURS 510

NURS 518 Clinical Nurse Specialist I: Concepts and Theory (4) Development of a conceptual foundation for advanced nursing practice as a Clinical Nurse Specialist.
Effective: Fall 2008
Prerequisite: NURS 510 or taken concurrently

NURS 519 Clinical Nurse Specialist II: Analysis and Application (4) Analysis and application of nursing interventions for individuals, families, and aggregate groups in varied health care delivery settings.
Effective: Fall 2008
Prerequisite: NURS 510, NURS 518

NURS 521 Nursing Practicum: Clinical Nurse Specialist (4-8) Integration and synthesis of specialty knowledge and theories into advanced practice nursing.
Effective: Fall 2008
Prerequisite: NURS 501, NURS 512, NURS 518, NURS 519 completion of graduate minor or intensive concentration

NURS 522 Comprehensive Assessment of the Older Adult (3) Advanced nursing assessment of biological, physical, clinical, functional, cognitive, psychological, and social changes associated with aging.
Effective: Summer 2009
Prerequisite: basic background in principles of pharmacology

NURS 523 Interventions for Common Health Problems in Older Adults (3) Discussion of common acute and chronic health problems experienced by older adults and development of evidence-based interventions for management.
Effective: Summer 2009
Prerequisite: NURS 518;NURS 519;NURS 522

NURS 527 Promoting Healthy Lifestyles in the School-Age Population (3) This course will focus on promoting health lifestyles for the school age population.
Effective: Summer 2011

NURS 570 Nursing Partnership with Healthy Individuals and Families (3) Nurse Practitioner role with individuals and families to promote health, prevent illness, and manage common, acute, or episodic health problems.
Effective: Fall 2008
Prerequisite: NURS 502, NURS 503, NURS 504 Concurrent: NURS 572

NURS 571 Nursing Partnership with Individuals and Families with Complex/Chronic Health Problems (4) Nurse Practitioner role with individuals and families to promote health, prevent illness, and manage complex/chronic health problems.
Effective: Fall 2008
Prerequisite: NURS 570, NURS 572; Concurrent: NURS 573

NURS 572 Nurse Practitioner Practicum I (3) Advanced nursing practicum in assessment and management of healthy individuals and families experiencing common, acute, or episodic health problems.
Effective: Fall 2008
Prerequisite: NURS 502, NURS 503, NURS 504; Concurrent: NURS 570

NURS 573 Nurse Practitioner Practicum II (4) Advanced nursing practicum with individuals and families experiencing complex/chronic health problems.
Effective: Fall 2008
Prerequisite: NURS 570, NURS 572 Concurrent: NURS 571

NURS 574 Family Nurse Practitioner Rural Integrative Practicum (2-8 per semester/maximum of 8) Advanced nursing practicum with individuals and families integrating community and specialty content.
Effective: Fall 2008
Prerequisite: NURS 570, NURS 571, NURS 572, NURS 573, NURS 575, NURS 576

NURS 574A Adult Nurse Practitioner Integrative Practicum (3-6 per semester/maximum of 6) Advanced nursing practicum in the health care of adolescents and adults within the family context, integrating community/specialty content.
Effective: Fall 2008
Prerequisite: NURS 570, NURS 571, NURS 572, NURS 573

NURS 575 Nursing Partnership with Children and their Families (2) Nurse Practitioner role with children and their families to promote health, prevent illness, and manage acute or chronic health problems.
Effective: Fall 2008
Prerequisite: NURS 502, NURS 503, NURS 504; Concurrent: NURS 576

NURS 576 Nurse Practitioner Practicum in Child Health (2) Advanced nursing practicum with healthy children and children experiencing acute or chronic health problems.
Effective: Fall 2008

Prerequisite: NURS 502, NURS 503, NURS 504; Concurrent: NURS 575

NURS 580 Epistemology of Nursing Science (3) Examines the development and organization of nursing knowledge; nursing theories are critically analyzed in relationship to the substantive structure of nursing science.

Effective: Fall 2008

Prerequisite: NURS 510 or an equivalent nursing theory course; Master's degree in Nursing

NURS 581 Developing Theoretical Constructs Relevant to Nursing (3) This course provides experience in concept analysis as one mechanism facilitating the development of nursing knowledge.

Effective: Fall 2008

Prerequisite: NURS 580

NURS 582 Scientific Basis for Nursing Practice (3) Critical appraisal of the scientific basis of selected areas of nursing practice.

Effective: Fall 2008

Prerequisite: NURS 581

NURS 583 Advanced Seminar in Nursing Science (3) Intense interactive seminar for synthesizing prior content into the design of dissertation research.

Effective: Fall 2008

Prerequisite: NURS 582, NURS 585, NURS 586

NURS 585 Qualitative Methods in Health Research (3) Provides an overview of advanced qualitative research methodologies useful in the conduct of social and behavioral health research.

Effective: Fall 2008

Prerequisite: Master of Science degree

NURS 586 Quantitative Methods in Nursing Research (3) An overview of advanced methodological considerations specific to quantitative research in nursing.

Effective: Fall 2008

NURS 587 Ethics in Nursing Research (1) Provides the theoretical and practical knowledge needed to design and conduct ethically responsible social and behavioral health research.

Effective: Fall 2008

Prerequisite: Master of Science degree

NURS 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Fall 2008

NURS 594 Research Topics (1-18) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2008

NURS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2008

NURS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Fall 2008

NURS 597A Advanced Health Assessment of Pediatric Populations (1) Advanced nursing assessment and diagnosis of physical, psychosocial and developmental health for individuals and families across the pediatric age spectrum.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

NURS 597K Research with Faculty (1-6) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Summer 2011 Ending: Summer 2011

NURS 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Fall 2008

NURS 600 Thesis Research (1-15) No description.

Effective: Fall 2008

NURS 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 2008

NURS 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Provides an opportunity for

supervised and graded teaching experience in undergraduate nursing courses.
Effective: Fall 2008

NURS 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 2008

NURS 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 2008

Last Import from UCM: June 16, 2011 3:00 AM

Nutrition (NUTR)

NUTR 400 Introduction to Nutrition Counseling (1) No description.

Effective: Fall 1998

Prerequisite: NUTR 358 . Prerequisite or concurrent:NUTR 446

NUTR 401 Nutrition Clinic Practicum (1-3) To provide qualified nutrition students with the opportunity to practically apply nutrition counseling skills in a supervised environment.

Effective: Spring 2002

Prerequisite: NUTR 400

NUTR 421 (US;IL) Food Culture and Health Trends (3) Social-political, historic, and geographic roots of food patterns, featuring specific cuisine areas and nutritional disease patterns; includes foods laboratory.

Effective: Summer 2005

Prerequisite: NUTR 119 orNUTR 120;NUTR 151 orNUTR 251

NUTR 430 (IL) (S T S 430) Global Food Strategies: Problems and Prospects for Reducing World Hunger (3)

Technological, social, and political solutions to providing basic food needs; food resources, population, and the environment; current issues.

Effective: Summer 2005

NUTR 445 Nutrient Metabolism I (3) Nutrients, their sources, metabolism, interrelationships and requirements with focus on carbohydrates, lipids, and proteins.

Effective: Spring 2001

Prerequisite: B M B 211, BIOL 141, NUTR 251

NUTR 446 Nutrient Metabolism II (3) Continuation of NUTR 445; nutrients, their sources, metabolism, inter- relationships and requirements with focus on vitamins and minerals.

Effective: Summer 1994

Prerequisite: NUTR 445

NUTR 451 Nutrition throughout the Life Cycle (3) Application of basic principles of nutrition to nutritional and physiological needs throughout the life cycle from prenatal to aging.

Effective: Spring 2001

Prerequisite: NUTR 358, NUTR 445 . Prerequisite or concurrent:NUTR 446

NUTR 452 Nutritional Aspects of Disease (3) Disturbances in metabolism related to human disease processes; principles of nutrition in therapy.

Effective: Spring 1995

Prerequisite: NUTR 446

NUTR 453 Diet in Disease (3) Nutrient and energy controlled diet programs. Implications for nutrition counseling and education.

Effective: Spring 1995

Prerequisite: or concurrent:NUTR 452

NUTR 456 Community Nutrition (2) Programs and policies of nutrition-related activities of community agencies; factors pertinent to nutrition education.

Effective: Spring 1992

Prerequisite: NUTR 251

NUTR 490W Nutrition Seminar (3) Use of selected materials from the scientific literature to prepare a term paper and an oral report.

Effective: Spring 1995

Prerequisite: or concurrent:NUTR 452

NUTR 494H Senior Honors Thesis (1-6) Independent study related to a student's interests directed by a faculty supervisor and culminating in the production of a thesis.

Effective: Summer 2006

Prerequisite: approval of honors thesis advisor

NUTR 495 Advanced Field Experience in Nutrition (1-6) Supervised off-campus, non-group instruction including individual field experiences, practicums or internships. Written and oral critique of activity is required.

Effective: Spring 2001

Prerequisite: NUTR 456

NUTR 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1992

NUTR 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 1992

NUTR 497B Nutrition and Physical Activity and Exercise and Health (3) To understand the role that nutrients play in supporting optimal physical performance in both recreational exercisers and competitive athletes.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

NUTR 497C Topics in International Nutrition (3) Examines nutrition-related health problems facing developing country populations, particularly women and children, and interventions meant to alleviate these problems.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

NUTR 497G (S T S 497G) Community Food Security (3) Through active learning, students explore how communities can reshape food systems, increasing access to wholesome food while increasing economic opportunities.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

NUTR 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1992

NUTR 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

NUTR 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2012 Future: Spring 2012

NUTR 597D Critical Readings in Molecular Nutrition (1.5) Critical Readings in Molecular Nutrition uses a guided readings approach to critically evaluate current topics in molecular nutrition.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

NUTR 597F Obesity: Causes, Consequences and Treatment (3) Using a participatory format, students will learn about the causes, consequences and treatment strategies for obesity across the lifespan.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

NUTR 597G (FD SC 597G) Readings in Ingestive Behavior (1) Students lead discussions of original research in the field of ingestive behavior with a focus on food intake in particular.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

NUTR 597K (BB H 597K, FD SC 597K) Food Auction: Fact or Fiction? (3) Original literature using both human subjects and animal models relevant to the topic of food addiction will be discussed.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Last Import from UCM: June 16, 2011 3:00 AM

Occupational Therapy (O T)

O T 401 Conceptual Foundations of Occupational Therapy and Occupational Adaptations (2) Analysis of philosophies and frames of reference for occupational therapy practice, emphasizing occupational functioning, the adaptation process, and occupational environments. Occupational Therapy majors only.
Effective: Spring 2000

O T 410 Environmental and Technological Influences on Occupational Adaptation and Performance (3) Impact of occupational environments on functioning and technological adaptation for mastery over the environment.
Effective: Summer 2011

O T 411 Occupational Therapy Management and Professional Ethics (3) Ethical, managerial, fiscal, and legal responsibilities of program administration, supervision, practice, delivery, and professional development.
Effective: Spring 2000
Prerequisite: O T 401

O T 412W Introduction to Research (3) Introduction to quantitative and qualitative research process relative to occupational therapy.
Effective: Summer 2011
Prerequisite: STAT 200 or STAT 250

O T 495A Level I Fieldwork Experience (1 per semester, maximum of 3) Practicum in 3 of 5 areas: occupational therapy evaluation procedures; environmental and technological adaptation; program design; management issues; selected topics.
Effective: Spring 2000
Prerequisite: concurrent with occupational therapy didactic course work

O T 495B Fieldwork Level II Part 1 (6) Three month practical educational experience facilitating clinical reasoning and application of professional knowledge, behaviors, values, and skills.
Effective: Spring 2000
Prerequisite: completion of O T 495A and all didactic course work

O T 495C Fieldwork Level II Part 2 (6) Three month practical educational experience facilitating clinical reasoning and application of professional knowledge, behaviors, values, and skills.
Effective: Spring 2000
Prerequisite: successful completing of O T 495B

O T 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.
Effective: Spring 2000

O T 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 2000

Last Import from UCM: June 16, 2011 3:00 AM

Penn State First-Year Seminar (PSU)

No courses for department code **PSU** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Petroleum and Natural Gas Engineering (P N G)

P N G 405 Rock and Fluid Properties (3) Reservoir rock properties, rock and fluid properties (interaction between rock and fluids), flow behavior in reservoir, and fluid properties.

Effective: Spring 2002
Prerequisite: PHYS 211

P N G 406 Rock and Fluid Laboratory (1) Systematic study of oil reservoir rocks and fluids; their interrelation applied to petroleum engineering.

Effective: Spring 2001
Prerequisite: PHYS 211 Concurrent: P N G 405

P N G 410 Applied Reservoir Engineering (3) Analysis and prediction of reservoir performance by use of material balance and steady and nonsteady state flow equations.

Effective: Spring 2001
Prerequisite: P N G 405, P N G 406, PHYS 211

P N G 411 Introduction to Petroleum and Natural Gas Extraction (1) Introduction to the design and implementation of the systems used in the extraction of oil and gas. Not intended for petroleum and natural gas engineering majors.

Effective: Spring 2001
Prerequisite: PHYS 211

P N G 420 Applied Reservoir Analysis and Secondary Recovery (4) Application of material balance equations/transient flow solutions to water influx problems; displacement theory as it applies to design/behavior of flooding.

Effective: Spring 2008
Prerequisite: P N G 410;CMPSC 201 orCMPSC 202

P N G 425 Principles of Well Testing and Evaluation (3) Mathematical basis for pressure analysis. Theory and practice of pressure testing techniques.

Effective: Spring 1999
Prerequisite: MATH 251, P N G 420

P N G 430 Reservoir Modeling (3) The numerical simulation of petroleum reservoir processes by the use of models; scaling criteria and network flow.

Effective: Spring 2008
Prerequisite: MATH 251, P N G 410;CMPSC 201 orCMPSC 202

P N G 440W Formation Evaluation (3) Study of those methods used to evaluate the engineering properties of oil and gas bearing reservoir formations.

Effective: Spring 1999
Prerequisite: P N G 405, P N G 406

P N G 450 Drilling Design and Production Engineering (3) Design and analysis of oil-field drilling operations and equipment.

Effective: Spring 2001
Prerequisite: C E 360, E MCH 210

P N G 451 Oil Well Drilling Laboratory (1) Practice in well-control procedures. Measurement of drilling fluid properties.

Effective: Spring 2001
Prerequisite: C E 360, E MCH 210 Concurrent: P N G 450

P N G 475 Petroleum Engineering Design (3) Design and selection of mechanical components used in the production of fluids from subsurface reservoirs.

Effective: Spring 2001
Prerequisite: E MCH 210

P N G 480 Production Process Engineering (3) Analysis and evaluation of surface production processes, fluid separation, storage, measurement, treating, custody transfer, transmission, disposal, corrosion, and other operations.

Effective: Fall 2007
Prerequisite: C E 360;M E 201 orM E 300

P N G 482 Production Engineering Laboratory (1) Measurement and analyses of the physical and chemical properties of hydrocarbon fluid systems in a production environment.

Effective: Fall 2007
Prerequisite: C E 360;M E 201 orM E 300 Concurrent: P N G 480

P N G 489 Engineering Evaluation of Oil and Gas Properties (3) Application of present worth and rate-of-return analysis; reserve calculations; decline curve analysis; uncertainty and risk analysis to engineering project design and evaluation.

Effective: Spring 2011
Prerequisite: ECON 102

P N G 490 Introduction to Petroleum Engineering Design (1) Introduction to the concepts of engineering design as applied to petroleum and natural gas projects.

Effective: Spring 2011
Prerequisite: ECON 102, P N G 405, P N G 489

P N G 491 Reservoir Engineering Design (1) Application of the concepts of reservoir and drilling engineering to petroleum engineering design projects.

Effective: Spring 2011

Prerequisite: ECON 102, P N G 410, P N G 450, P N G 490

P N G 492 Petroleum Engineering Capstone Design (1) Integration of petroleum and natural gas engineering concepts to project design.

Effective: Fall 2001

Prerequisite: P N G 491

P N G 494 Thesis (1-6) A problem in petroleum engineering involving review of the literature and experimental data obtained in the field or laboratory.

Effective: Spring 1999

P N G 494H Thesis (1-6) A problem in petroleum engineering involving review of the literature and experimental data obtained in the field or laboratory.

Effective: Fall 2007

P N G 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 2007

P N G 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 1999

P N G 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 1999

P N G 501 Steady State Flow in Porous Media (3) The formulation and analytical solution of the problems of steady state fluid flow in porous media.

Effective: Spring 1999

P N G 502 Unsteady Flow in Porous Media (3) The formulation and analytical solution of the transient fluid flow in porous media.

Effective: Spring 1999

Prerequisite: P N G 501

P N G 503 Reservoir Engineering Problems (3) Identification, formulation, and solution of advanced problems in reservoir engineering, e.g., cross-flow problems, dual porosity problems, etc.

Effective: Spring 1999

Prerequisite: P N G 502

P N G 511 Numerical Solution of the Partial Differential Equations of Flow in Porous Media (3) Differencing schemes for the partial differential equations of single-phase flow; application to flow of gas and mixing in porous media.

Effective: Spring 1999

P N G 512 Numerical Reservoir Simulation (3) Mathematical analysis of complex reservoir behavior and combination drives; numerical methods for the solution of behavior equations; recent developments.

Effective: Spring 1999

P N G 513 Advanced Numerical Reservoir Simulation (3) Compositional simulation; history-matching theory; simulation of basic processes involving heat and mass transfer in porous media.

Effective: Spring 1999

Prerequisite: P N G 512

P N G 514 Optimization of Petroleum Recovery Processes (3) Optimum search methods, linear programming, nonlinear programming, dynamic programming, application to water-flooding, depletion drive, steam injection, gas cycling, miscible displacement.

Effective: Spring 1999

Prerequisite: P N G 410

P N G 515 Advanced Oil Recovery Techniques (3) Advanced oil recovery techniques including water flooding, in situ combustion, steam injection, hot-water injection, and miscible-phase displacement.

Effective: Spring 1999

P N G 518 Design of Miscible Recovery Projects (3) Theory and design of miscible methods of oil recovery, current field applications, including hydrocarbon, CO₂, micellar/polymer, alkaline, and inert gas.

Effective: Spring 1999

P N G 519 Design of Thermal Recovery Projects (3) Suitability of reservoirs for thermal oil recovery; case histories; design of in situ combustion and steamfloods; thermal stimulation; shale oil recovery.

Effective: Spring 1999

Prerequisite: P N G 515

P N G 520 Phase Relations in Reservoir Engineering (3) Phase relations as applied to condensate and retrograde condensate reservoirs and to other problems in petroleum production.

Effective: Spring 1999

P N G 530 Natural Gas Engineering (1-3) Flow in producing or storage reservoirs; gas well testing; transmission systems; storage cycle; current developments.

Effective: Spring 1999

Prerequisite: P N G 481

P N G 531 Natural Gas Storage Engineering (3) Engineering design of natural gas storage; identification of reservoirs, optimization of facilities.

Effective: Summer 2002

Prerequisite: P N G 530

P N G 532 Natural Gas Transmission and Distribution Engineering (3) Engineering design of natural gas transmission and distribution pipeline systems; optimization of load distribution.

Effective: Summer 2002

Prerequisite: P N G 520, P N G 530

P N G 533 Gas-to-Liquid Processing Technology (3) The major gas-to-liquid processes, including NGL, LPG, and LNG.

Effective: Summer 2002

Prerequisite: P N G 520

P N G 550 Advanced Engineering Evaluation in Oil and Gas Management (3) Selected topics of current research and development interest in formation evaluation, geophysical well logging, and production economics.

Effective: Spring 2003

Prerequisite: P N G 440, P N G 489

P N G 555 Drilling Optimization (3) Procedures for optimizing fluid properties, hydraulics, bit weight and selection.

Balanced drilling conditions are stressed.

Effective: Spring 1999

P N G 575 Gas Lift Design and Optimization (3) Design of continuous and intermittent gas lift systems; multiphase flow and inflow well performance.

Effective: Spring 1999

P N G 576 Production Operations (3) Exploration of recent practical and theoretical developments in well logging, fracture stimulation and sand control.

Effective: Spring 1999

P N G 580 Advanced Natural Gas Production Engineering (3) An advanced study of the total system associated with production and transportation of natural gases.

Effective: Summer 2002

Prerequisite: P N G 480

P N G 590 (EME 590, F SC 590, MNG 590) Colloquium (1-3) Continuing seminars which consist of individual lectures by faculty, students or outside speakers on energy and mineral engineering issues.

Effective: Spring 2009

P N G 595 Internship (1-15) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Summer 2004

Prerequisite: approval of internship by instructor prior to registration

P N G 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1999

P N G 597 Special Topics (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1999

P N G 597A Reactive Transport Processes in Subsurface (3) This class will cover basic principles of reactive transport modeling for applications including geological CO₂ sequestration, enhanced oil recovery, and environmental remediation.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

P N G 598 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Spring 1999

P N G 600 Thesis Research (1-15) No description.

Effective: Spring 1999

P N G 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Spring 1999

P N G 610 Thesis Research Off Campus (1-15) No description.

Effective: Spring 1999

P N G 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Spring 1999

NOTE: Courses in the use of X-ray diffraction, electron microscopy, and spectroscopy in petroleum and natural gas studies are listed under MATERIALS SCIENCE and GEOLOGICAL SCIENCES.

Last Import from UCM: June 16, 2011 3:00 AM

Philosophy (PHIL)

PHIL 401 (AM ST 421) American Philosophy (3) Survey of key figures and movements in American thought including the Transcendentalists, the Pragmatists, and contemporary developments.

Effective: Fall 2007

Prerequisite: 9 credits of philosophy or 6 credits of philosophy at the 200-level or 5th semester standing

PHIL 402 European Philosophy (3 per semester, maximum of 6) Survey of key figures and movements of Europe, including phenomenology, existentialism, structuralism and post-structuralism, and critical theory.

Effective: Fall 2007

Prerequisite: PHIL 102 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 403 Environmental Ethics (3) Examines ethical theories, justice, rights, community, and human values revolving around such issues as preservation, conservation, pollution, sustainability, and population.

Effective: Fall 2007

Prerequisite: 9 credits of philosophy including PHIL 103 or 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 405 Philosophy of Law (3) Examines philosophical views of the nature of law, legal ethics, law and society through questions regarding definition, interpretation, and institutions.

Effective: Fall 2007

Prerequisite: 9 credits of philosophy including PHIL 105 or 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 406 Business Ethics (3) Examines the moral justification of business practices and economic systems through critical analyses of case studies and applied ethical theories.

Effective: Summer 1998

Prerequisite: fifth-semester standing

PHIL 407 (S T S 407) Technology and Human Values (3) Interrelationships of twentieth-century technological change and human values. Emphasis on the social and ethical aspects of technological progress.

Effective: Spring 1999

Prerequisite: 9 credits of philosophy including PHIL 107 or 6 credits of philosophy at the 200 level

PHIL 408W Social and Political Philosophy (3) Historical and philosophical foundations of political organization, authority, and justice, and contemporary issues of rights, community, and culture.

Effective: Fall 1998

Prerequisite: 9 credits in philosophy including PHIL 108 or 6 credits at the 200 level

PHIL 409 Aesthetics (3) Studies concepts of beauty, truth, value, representation, production and reproduction, and reality through philosophical theory and works of art.

Effective: Fall 2007

Prerequisite: 9 credits of philosophy including PHIL 109 or 6 credits of philosophy at the 200 level or 3 credits of art or 5th semester standing

PHIL 410 Philosophy of Science (3) Historical and contemporary foundational and methodological issues such as causality, relativity and epistemological relativism, teleology, and the nature of reality.

Effective: Fall 1998

Prerequisite: 9 credits of philosophy including PHIL 110 or 6 credits of philosophy at the 200 level

PHIL 413 Philosophy of Literature (3) Discusses truth, belief, illusion, imagination and creativity through philosophical literature, as well as problems of philosophical writing.

Effective: Fall 1998

Prerequisite: 9 credits of philosophy including PHIL 113 or 6 credits of philosophy at the 200 level

PHIL 416 Philosophy of Social Science (3) Examines the philosophical nature and foundations of methodology, structures and objects, value-neutrality and objectivity in the social sciences.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including PHIL 116 or 6 credits of philosophy at the 200 level

PHIL 418 Ethics (3) Examines ethical theories, justice, rights, community, and human values revolving around such issues as preservation, conservation, pollution, sustainability, and population.

Effective: Fall 2007

Prerequisite: 9 credits of philosophy including PHIL 103 or 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 418W Ethics (3) Examines ethical theories, justice, rights, community, and human values revolving around such issues as preservation, conservation, pollution, sustainability, and population.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including PHIL 103 or 6 credits of philosophy at the 200 level

PHIL 422 Philosophy of History (3) Philosophical investigation of history as content and knowledge, objectivity and relativism in historical analysis, historical laws, interpretation, explanation and narrativity.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including PHIL 122 or 6 credits of philosophy at the 200 level

PHIL 424 Philosophy of Religion (3) Examines the relation between faith and reason, the nature of religious experience,

the problem of evil, the existence of God.

Effective: Fall 2007

Prerequisite: 9 credits of philosophy including PHIL 124 or 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 425W Epistemology (3) The nature of cognition and perception, the conditions of experience, and the justification and truth of belief.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including PHIL 125 or 6 credits of philosophy at the 200 level; in addition to ENGL 015 or ENGL 030

PHIL 426W Metaphysics (3) Examines the nature of reality, the existence of freedom, and the nature of matter, mind, and values.

Effective: Summer 1998

Prerequisite: 9 credits in philosophy including PHIL 126 or 6 credits of philosophy at the 200 level

PHIL 427 Philosophy of Mind (3) Investigates problems of mind from the standpoint of traditional metaphysical views, modern scientific psychology, neuroscience, and artificial intelligence.

Effective: Spring 1999

Prerequisite: 9 credits of philosophy including PHIL 127 or 6 credits of philosophy at the 200 level

PHIL 427H Philosophy of Mind (3) Investigates problems of mind from the standpoint of traditional metaphysical views, modern scientific psychology, neuroscience, and artificial intelligence.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: 9 credits of philosophy including PHIL 127 or 6 credits of philosophy at the 200 level

PHIL 432 (S T S 432) Medical and Health Care Ethics (3) Examines ethical, political, and social issues in the research, implementation, and practice of medicine, medical technologies, and healthcare.

Effective: Fall 1998

Prerequisite: fifth-semester standing

PHIL 433 (S T S 433) Ethics in Science and Engineering (3) Ethical issues arising in the practice of science and engineering and their philosophical analysis.

Effective: Fall 1995

PHIL 434H (HIST 424H, J ST 424H, RL ST 424H) Monotheism and the Birth of the West (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.

Effective: Spring 2002

Prerequisite: CAMS 004, CAMS 110, CAMS 120 or HIST 102

PHIL 435 (S T S 435) The Interrelation of Science, Philosophy, and Religion (3) The historical and transformative interactions between science and Western philosophical and religious views of nature, humanity, and God.

Effective: Spring 1996

PHIL 437 (IL) World Philosophies and Cultures (3) Philosophical traditions, problems, and authors in African, Asian, Middle- Eastern, Native American, or other non-Western cultures and intellectual traditions.

Effective: Fall 2007

Prerequisite: 9 credits of philosophy including 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 438 (WMNST 438) Feminist Philosophy (3) Examines the central currents of feminist philosophy, selected problems and concepts regarding difference, gender and sex, identity, and political culture.

Effective: Fall 2007

Prerequisite: 9 credits of philosophy including 6 credits of philosophy at the 200-level or 5th semester standing

PHIL 439 (IL) Asian Philosophies and Issues (3) Exploration of the traditions, problems, and authors of one or more of the philosophical systems of Buddhism, Hinduism, Taoism, and Confucianism.

Effective: Fall 2007

Prerequisite: PHIL 007 9 credits in philosophy including PHIL 007 or 5th semester standing

PHIL 441 Capstone Course in Philosophy (3) This course is intended as the Capstone Course for Philosophy majors and is to be taken during their senior year or during the last semester of their junior year.

Effective: Spring 2011

Prerequisite: 6th semester standing and up

PHIL 453 Topics in Ancient Philosophy (3 per semester, maximum of 6) Examines the philosophy of central figures in ancient philosophy from the pre-Socratics to the post-Aristotelians and Neoplatonists.

Effective: Fall 1998

Prerequisite: 9 credits of philosophy including PHIL 200 or 6 credits of philosophy at the 200 level

PHIL 455 Topics in Modern Philosophy (3 per semester, maximum of 6) Descartes to Kant, including mind and reality, space and time, God and nature, morality and autonomy.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including PHIL 202 or 6 credits of philosophy at the 200 level

PHIL 456 Topics in Nineteenth Century Philosophy (3 per semester, maximum of 6) Hegel to Nietzsche, including nature and spirit, history and human nature, ideology and morality.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including PHIL 203 or 6 credits of philosophy at the 200 level

PHIL 457 Topics in Twentieth Century Philosophy (3 per semester, maximum of 6) Topics in the philosophy of figures such as Husserl, James, Russell, Wittgenstein, Heidegger, Merleau-Ponty, and Dewey.

Effective: Fall 2007

Prerequisite: 9 credits of philosophy including PHIL 204 or 6 credits of philosophy at the 200 level or 5th semester standing

PHIL 458 Topics in Contemporary Philosophy (3 per semester, maximum of 6) Topics in the philosophy of contemporary figures such as Foucault, Habermas, Rorty, Derrida, Rawls, Davidson, and MacIntyre.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including PHIL 208 or 6 credits of philosophy at the 200 level

PHIL 460 (US;IL) (AAA S 460) African American Philosophy (3) Major works by African American Philosophers, on topics of race, freedom, citizenship, nationhood, law and society.

Effective: Fall 2009

Prerequisite: AAA S 100 or PHIL 009 and 5th semester standing

PHIL 461 Plato (3 per semester, maximum of 6) Examines the metaphysics, epistemology, politics, aesthetics, and moral theory of this central figure in the history of philosophy.

Effective: Spring 1999

Prerequisite: 9 credits of philosophy including PHIL 200 or 6 credits of philosophy at the 200 level

PHIL 462 Aristotle (3 per semester, maximum of 6) Epistemology, metaphysics, natural science, moral and political theory of this central figure in the history of philosophy.

Effective: Spring 1999

Prerequisite: 9 credits of philosophy including PHIL 200 or 6 credits of philosophy at the 200 level

PHIL 468 (J ST 468) Modern Jewish Philosophy (3) Explores the major figures in modern Jewish philosophy and their influences on contemporary philosophy.

Effective: Summer 2004

Prerequisite: one course in Philosophy and/or Jewish Studies

PHIL 470 Rationalism (3 per semester, maximum of 6) Examines the epistemological emphasis on reason over experience in rationalist philosophers such as Descartes, Leibniz, and Spinoza.

Effective: Fall 1998

Prerequisite: 9 credits in philosophy including PHIL 202 and 3 other credits of philosophy at the 200 level

PHIL 471 Empiricism (3 per semester, maximum of 6) Examines the epistemological emphasis on experience over reason in empiricist philosophers such as Locke, Hume, Berkeley, and contemporary philosophers.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including PHIL 202 or 6 credits of philosophy at the 200 level

PHIL 472 Enlightenment (3 per semester, maximum of 6) Examines Enlightenment views on reason, history, individuals, belief, and science through study of Locke, Voltaire, Diderot, Kant, and their critics.

Effective: Fall 1998

Prerequisite: 9 credits in philosophy including PHIL 202 or 6 credits of philosophy at the 200 level

PHIL 473 German Idealism (3 per semester, maximum of 6) Critically examines the philosophy of central German idealists, including Kant, Fichte, Schelling, and Hegel, and its impact on later philosophy.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including either PHIL 202 or PHIL 203 or 6 credits of philosophy at the 200 level

PHIL 474 Kant (3 per semester, maximum of 6) Critical examination of the metaphysics, epistemology, aesthetics, legal and moral philosophy, and influence of Immanuel Kant.

Effective: Fall 1998

Prerequisite: 9 credits in philosophy including PHIL 202 or 6 credits of philosophy at the 200 level

PHIL 475 Fichte and Schelling (3 per semester, maximum of 6) The transformation of post-Kantian idealism before Hegel through Fichte's and Schelling's works on nature, history, reason, morality, and spirit.

Effective: Fall 1998

Prerequisite: 9 credits of philosophy including PHIL 202 or 6 credits of philosophy at the 200 level

PHIL 476 Hegel (3 per semester, maximum of 6) Critical examination of the metaphysics, moral theory, epistemology, and philosophy of history of this central figure of 19th-century philosophy.

Effective: Fall 1998

Prerequisite: 9 credits of philosophy including PHIL 203 or 6 credits of philosophy at the 200 level

PHIL 477 Kierkegaard (3 per semester, maximum of 6) Studies this 19th-century thinker's ideas on ethical and aesthetic values, despair and selfhood, institutions and individuals, reality, and faith.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including either PHIL 203 or 6 credits of philosophy at the 200 level

PHIL 478 (J ST 478, RL ST 478) Ethics After the Holocaust (3) Explores the philosophical effects of the Holocaust for thinking about the primary question: Is ethics possible?

Effective: Spring 2005

Prerequisite: one course in Jewish Studies or Philosophy

PHIL 479 Critical Theory (3 per semester, maximum of 6) Examines the ontology, political and social thought of the Frankfurt School from Horkheimer and Adorno to Marcuse and Habermas.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including either PHIL 203 or 6 credits of philosophy at the 200 level

PHIL 481 Nietzsche (3 per semester, maximum of 6) Friedrich Nietzsche's basic ideas, including master and slave morality, the will to power, eternal recurrence, genealogical inquiry, and naturalism.

Effective: Fall 1998

Prerequisite: 9 credits of philosophy including PHIL 203 or 6 credits of philosophy at the 200 level

PHIL 483 James (3 per semester, maximum of 6) James' psychology, pluralistic metaphysics, theories of truth and meaning, radical empiricism, and idea of religious experience.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including PHIL 401 or 6 credits of philosophy at the 200 level

PHIL 485 Heidegger (3 per semester, maximum of 6) Studies Heidegger's metaphysical thought from his early to later works regarding being, history, subjectivity, aesthetics, language, and his influence.

Effective: Fall 1998

Prerequisite: 9 credits of philosophy including PHIL 402 or 6 credits of philosophy at the 200 level

PHIL 486 Wittgenstein (3 per semester, maximum of 6) Examines Wittgenstein's early and late work, including logical atomism, meaning, language games, forms of life, and the private-language argument.

Effective: Fall 1998

Prerequisite: 9 credits of philosophy including PHIL 204 or 6 credits of philosophy at the 200 level

PHIL 487 Analytic Philosophy (3 per semester, maximum of 6) Analytic philosophy's founding by Frege, Russell, Moore, Wittgenstein; and its contemporary development by Quine, Kripke, Dummett, and Davidson.

Effective: Fall 1998

Prerequisite: 9 credits of philosophy including PHIL 202 or PHIL 204 along with 3 credits of philosophy at the 200 level

PHIL 490 Dewey (3 per semester, maximum of 6) Critically examines the metaphysics, epistemology, ethics, logic, aesthetics, education theory, and social and political philosophy of this major American pragmatist.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including PHIL 401 or 6 credits of philosophy at the 200-level

PHIL 491 Merleau-Ponty (3 per semester, maximum of 6) Merleau-Ponty's phenomenological anti-dualism through his studies on the body and the flesh, aesthetics, political philosophy, and late ontology.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including PHIL 402 or 6 credits of philosophy at the 200-level

PHIL 493 Phenomenology and Hermeneutics (3 per semester, maximum of 6) Studies major figures and issues in phenomenology and hermeneutics, focussing on the work of Husserl, Gadamer, Heidegger, Merleau-Ponty, and Levinas.

Effective: Summer 1998

Prerequisite: 9 credits of philosophy including PHIL 202 and PHIL 204

PHIL 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

PHIL 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

PHIL 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

PHIL 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

PHIL 497A The History of the Idea of Nature (3) This course will examine the origins of the idea of nature in Western philosophy. Special focus will be given to the emergence of this idea in ancient Greek thought.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PHIL 498 Special topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2001

PHIL 499 (IL) Foreign Study--Philosophy (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

PHIL 501 American Philosophy Seminar (3 per semester/maximum of 6) Critically examines central figures in American philosophy including Emerson, Thoreau, Pierce, James, Royce, Dewey, Santayana, Mead, Quine, Davidson, and Rorty.

Effective: Spring 2000

PHIL 502 European Philosophy Seminar (3 per semester/maximum of 6) Critically examines central European philosophers including Husserl, Heidegger, Sartre, Merleau-Ponty, Gadamer, Levinas, Foucault, and Derrida; course

content varies with instructor.
Effective: Summer 2000

PHIL 503 **Ethics Seminar** (3 per semester/maximum of 6) Critical investigation of philosophical problems in ethics, and viability of historical and contemporary ethical positions; course content varies with instructor.
Effective: Summer 2000

PHIL 508 **Social and Political Philosophy Seminar** (3 per semester, maximum of 6) Critical examination of social and political philosophies, their historical context and relation to philosophic method; course content varies with instructor.
Effective: Summer 2000

PHIL 510 **Philosophy of Science Seminar** (3 per semester, maximum of 6) Critical examination of specific problems in philosophy of science including, theory, method, and practice; course content varies with instructor.
Effective: Summer 2000

PHIL 512 **Seminar in Logic** (3) This course covers topics in first-order symbolic logic with identity and advanced special topics in metatheory.
Effective: Summer 2009

PHIL 513 (B A 513, PSY 513) **Philosophy of Social Science** (3) Study of major methodological, normative, and theoretical issues in the social sciences, emphasizing the development of positivism and critical alternatives.
Effective: Fall 2004

PHIL 516 **Aesthetic Seminar** (3 per semester, maximum of 6) Critical examination of problems in philosophy of art including beauty, taste, value, politics, culture, interpretation; course content varies with instructor.
Effective: Summer 2000

PHIL 517 **Philosophy of Mathematics Seminar** (3 per semester/maximum of 6) Examines central philosophies of mathematics including logicalism, formalism, intuitionism, and non-foundationalist positions; content varies with instructor.
Effective: Spring 2000

PHIL 525 **Epistemology Seminar** (3 per semester/maximum of 6) Studies problems, figures, and movements in epistemology from the ancient philosophers to contemporary thinkers; course content varies with instructor.
Effective: Spring 2000

PHIL 526 **Metaphysics Seminar** (3 per semester, maximum of 6) Problems, figures, and movements in metaphysics and anti-metaphysics from ancient philosophers to contemporary thinkers; course content varies with instructor.
Effective: Summer 2000

PHIL 527 **Philosophy of Mind Seminar** (3 per semester/maximum of 6) Examines central topics in philosophy of mind: causation, personhood, consciousness, intentionality, artificial intelligence, neuroscientific explanations; course content varies with instructor.
Effective: Spring 2000

PHIL 529 (LING 529) **Philosophy of Language Seminar** (3 per semester/maximum of 6) Examines topics in the philosophy of language including the nature of meaning, and semantic theories, pragmatics, interpretation, and poetic language.
Effective: Spring 2002

PHIL 538 (WMNST 538) **Feminist Philosophy Seminar** (3) Critically examines feminist approaches to ethics, epistemology, philosophy of science, metaphysics, social/political philosophy, and the history of philosophy.
Effective: Summer 2005

PHIL 553 **Ancient Philosophy Seminar** (3 per semester/maximum of 6) Analyzes specific concerns and texts of ancient philosophy including those of Plato and Aristotle; course content varies with instructor.
Effective: Summer 2000

PHIL 554 **Medieval Philosophy Seminar** (3 per semester/maximum of 6) Critical examination of medieval texts and philosophers, including Augustine, Anselm, Aquinas, Duns Scotus, and Ockham; course content varies with instructor.
Effective: Summer 2000

PHIL 555 **Modern Philosophy Seminar** (3 per semester/maximum of 6) Examines rationalism, empiricism, and other philosophical movements from Bacon and Descartes to Kant and Mill; course content varies with instructor.
Effective: Summer 2000

PHIL 556 19th-Century Philosophy Seminar (3 per semester, maximum of 6) Examination of philosophy from Hegel to Nietzsche on history, dialectic, ideology, existence, science, and art; course content varies with instructor.
Effective: Summer 2000

PHIL 557 20th Century Philosophy Seminar (3 per semester/maximum of 6) Central problems in works of twentieth-century philosophers including Russell, Dewey, Wittgenstein, Heidegger, Foucault, Levinas; course content varies with instructor.
Effective: Spring 2000

PHIL 558 Contemporary Philosophy Seminar (3 per semester, maximum of 6) Critically investigates diverse recent figures and problems of continental, pragmatic, and analytic philosophy; course content varies with instructor.
Effective: Summer 2000

PHIL 580 Phenomenology (3 per semester/maximum of 6) A critical study of one or more thinkers, ideas, or movements in modern phenomenology.
Effective: Fall 1983

PHIL 581 Hermeneutics (3 per semester/maximum of 6) Hermeneutic philosophy and aspects of its methodological significance for human studies, philology, history, sociology and psychology, and philosophy of science.
Effective: Fall 1983

PHIL 589 Philosophical Translation Seminar (2) Studies philosophical works in their original (non-English) languages; course content varies with instructor.
Effective: Spring 2001
Prerequisite: appropriate language proficiency demonstrated by satisfactory completion of departmental translation exam in given language

PHIL 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

PHIL 594 Research Technique (1) A course utilizing research sources and techniques relevant to philosophical studies. Taken in the first semester of graduate study.
Effective: Spring 1987

PHIL 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

PHIL 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

PHIL 600 Thesis Research (1-15) No description.
Effective: Fall 1983

PHIL 601 Ph.D. Dissertation Full-Time (0) No description.
Effective: Fall 1983

PHIL 602 Supervised Experience in College Teaching (1-3 per semester/maximum of 6) Students will teach introductory logic course--i.e., Phil 1--and other introductory level courses as required by staffing.
Effective: Fall 1983

PHIL 603 Foreign Academic Experience (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2000

PHIL 610 Thesis Research Off Campus (1-15) No description.
Effective: Fall 1983

PHIL 611 Ph.D. Dissertation Part-Time (0) No description.
Effective: Fall 1983

PHIL 803 (HLS 803) Homeland Security: Social and Ethical Issues (3) This course will examine the social, political, legal, and ethical issues that arise in the context of homeland security.
Effective: Summer 2010

1 Students may take only one course for General Education credit from PHIL 001 GH or 004 GH.

Last Import from UCM: June 16, 2011 3:00 AM

Photography (PHOTO)

PHOTO 400 Digital Photography in the Studio (4) Concepts and technology of the digital photography studio; large format digital cameras, electronic studio lighting and digital printing.

Effective: Fall 2006

Prerequisite: PHOTO 200

PHOTO 401 New Materials and Methods in Applied Digital Imaging (4 per semester) Advanced course where student teams use digital photography, video, and scanning to present story ideas using World Wide Web and gallery exhibition.

Effective: Fall 2006

Prerequisite: PHOTO 200

PHOTO 402 Photographic Narratives (4 per semester/maximum of 8) The development of a photographic project that leads to the creation of a handmade book.

Effective: Fall 2006

Prerequisite: PHOTO 200

PHOTO 403 Photo Assemblage (4) Collage making through collecting and assembling found materials, including photography; origins of photographic manipulation and contemporary uses.

Effective: Fall 2006

PHOTO 405 Creative Projects in Photography (4 per semester/maximum of 8) Special individual problems related to photographic vision.

Effective: Fall 2006

Prerequisite: PHOTO 201, PHOTO 300

PHOTO 406 Product Photography (2) This advanced level course will explore the practices of photographing products for print and product advertising.

Effective: Summer 2011

Prerequisite: PHOTO 200

PHOTO 407 Portrait Photography (2) This advanced level course investigates contemporary portrait photography and traditional and modern styles of photographic lighting.

Effective: Summer 2011

Prerequisite: PHOTO 200

PHOTO 410 Photographing Motion and Athletic Events (2) A practicum course in photographing sports and athletic events.

Effective: Summer 2007

Prerequisite: PHOTO 200

PHOTO 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Summer 2006

PHOTO 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 2006

PHOTO 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 2006

PHOTO 497A Portrait Photography (2) This advanced level course will investigate what portrait photography is, and styles of photographic lighting will be explored as well. Seven week course 8/23/2011 - 10/6/2011.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PHOTO 497B Product Photography (2) This advanced level course will introduce the practice of photography products for print and/or web catalog and for product advertising. Seven week course 10/11/2011 - 12/9/2011.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Last Import from UCM: June 16, 2011 3:00 AM

Physical Science (PH SC)

PH SC 410 **Quantum Mechanics of Atoms, Molecules, and Solids** (3) The physical concepts underlying the properties of materials are covered. Quantum mechanics is applied to problems in atomic, molecular, and solid- state physics.

Effective: Summer 2003

Prerequisite: PHYS 237

PH SC 440 **Applied Solid State and Optical Processes** (3) This course covers the solid state physics and material science prerequisite to understand today microelectronic and optoelectronic devices.

Effective: Summer 2003

Prerequisite: PHYS 237, PH SC 410 orPHYS 410

Last Import from UCM: June 16, 2011 3:00 AM

Physical Therapy (P T)

No courses for department code **P T** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Physics (PHYS)

PHYS 400 Intermediate Electricity and Magnetism I (3) Electrostatics, steady-state magnetic field; electrical and magnetic properties of matter; Maxwell's equations, boundary-value problems, and wave propagation.

Effective: Spring 2007

Prerequisite: MATH 250 or MATH 251; MATH 230 or MATH 231; PHYS 212, PHYS 213 and PHYS 214 Concurrent: MATH 230 OR MATH 231 ; PHYS 204

PHYS 402 Electronics for Scientists (4) Circuit and network theory; active devices; amplifiers; introduction to digital electronics; noise theory.

Effective: Spring 2007

Prerequisite: MATH 250 or MATH 251; PHYS 212, PHYS 213 and PHYS 214

PHYS 406 Subatomic Physics (3) Introductory treatment of elementary particles, fundamental strong and electroweak interactions, nuclear structure, accelerators, particle detection, nuclear astrophysics.

Effective: Spring 1995

Prerequisite: PHYS 410

PHYS 410 Introduction to Quantum Mechanics I (3-4) Basic postulates; Schrodinger wave equation; stationary states; variational method; scattering in one dimension; orbital angular momentum; hydrogen atom; numerical methods.

Effective: Spring 2007

Prerequisite: MATH 250 or MATH 251; MATH 230 or MATH 231; PHYS 237

PHYS 411 Introduction to Quantum Mechanics II (3) General theory of angular momentum; approximation methods; scattering theory; radiation theory; applications to atomic, molecular, condensed matter, nuclear and particle physics.

Effective: Spring 1994

Prerequisite: PHYS 410

PHYS 412 Solid State Physics I (3) Crystal symmetry, x-ray structure analysis, lattice vibrations, thermal properties, free electron transport theory, elementary one-electron quantum theory of solids.

Effective: Fall 1986

Prerequisite: MATH 230 or MATH 231 Concurrent: PHYS 410

PHYS 413 Solid State Physics II (3) Quantum theory of electronic and optical properties of solids, semiconductors, dielectrics, magnetic properties, crystal imperfections, low- temperature effects, and superconductivity.

Effective: Fall 1986

Prerequisite: PHYS 412

PHYS 414 Solid State Physics (3) Crystal structure; reciprocal lattice; X-ray diffraction; lattice vibrations; thermal properties; free electron gas model; energy bands; semiconductors; magnetism.

Effective: Spring 2007

Prerequisite: MATH 230, PHYS 237

PHYS 419 (MATH 419) Theoretical Mechanics (3) Principles of Newtonian, Lagrangian, and Hamiltonian mechanics of particles with applications to vibrations, rotations, orbital motion, and collisions.

Effective: Spring 2007

Prerequisite: MATH 230 or MATH 231; MATH 250 or MATH 251; PHYS 212, PHYS 213 and PHYS 214

PHYS 420 Thermal Physics (3) Basic postulates of statistical mechanics and thermodynamics, microscopic quantum states and macroscopic parameters; partition functions; Maxwell- Boltzmann and quantum statistics.

Effective: Spring 2007

Prerequisite: MATH 230 or MATH 231; MATH 250 or MATH 251; PHYS 237

PHYS 421W Research Methods in Physics (3) Methodology focusing on the theory of measurement and experiment design.

Effective: Spring 2007

Prerequisite: PHYS 237

PHYS 443 Intermediate Acoustics (3) Vibration and simple vibrating systems, sound wave propagation, acoustic instruments, recent developments.

Effective: Fall 1999

Prerequisite: MATH 251, PHYS 212, PHYS 213 and PHYS 214 ; or PHYS 203 or PHYS 204

PHYS 444 Topics in Contemporary Physics (2) Modern research topics and career opportunities in physics; employment, graduate education, and tailoring the physics curriculum to meet career goals.

Effective: Spring 2007

Prerequisite: PHYS 237 and 3 credits of physics at the 400 level

PHYS 445 Nanoscience Seminar (1) Advanced nanoscience seminar required of Behrend College students for completion of the nanoscience minor.

Effective: Summer 2007

Prerequisite: CHEM 112, E SC 211, E SC 212, E SC 213, E SC 214, E SC 215, E SC 216, MATH 140, PHYS 211 or PHYS 250

PHYS 446 The Year in Physics: A Seminar on the Latest Research (1) Discussion recent research in physics.

Effective: Spring 2007

Prerequisite: PHYS 211

PHYS 457 Experimental Physics (1-3) Selected experiments in various fields of physics.

Effective: Spring 2007

Prerequisite: PHYS 212 rPHYS 213, PHYS 214 andPHYS 237

PHYS 457W Experimental Physics (3) Selected experiments in various fields in physics.

Effective: Spring 2007

Prerequisite: PHYS 212, PHYS 213, PHYS 214 andPHYS 237

PHYS 458 Intermediate Optics (4) Geometrical and physical optics: theory of lens systems, aberrations, apertures, interference, diffraction, polarization.

Effective: Spring 2007

Prerequisite: PHYS 212, PHYS 213, PHYS 214;MATH 250 orMATH 251;MATH 230 orMATH 231

PHYS 461 (MATH 461) Theoretical Mechanics (3) Continuation of Math.(Phys.) 419. Theoretical treatment of dynamics of a rigid body, theory of elasticity, aggregates of particles, wave motion, mechanics of fluids.

Effective: Fall 1986

Prerequisite: MATH 419

PHYS 462 Applications of Physics in Medicine (3) Applications of physics in human physiology and in instrumentation for medical diagnosis and treatment.

Effective: Summer 2002

Prerequisite: PHYS 211, PHYS 212, PHYS 213 andPHYS 214 ; orPHYS 250, PHYS 251

PHYS 479 (MATH 479) Special and General Relativity (3) Mathematical description, physical concepts, and experimental tests of special and general relativity.

Effective: Spring 2007

Prerequisite: PHYS 237, PHYS 400, PHYS 419;MATH 250 orMATH 251;MATH 230 orMATH 231

PHYS 494 Physics Research Project (1-12) Investigation of an original research problem, including a literature search.

Preparation of a formal thesis is optional.

Effective: Spring 2007

PHYS 494H Physics Research Project (1-12) Investigation of an original research problem, including a literature search.

Preparation of a formal thesis is optional.

Effective: Fall 2007

PHYS 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2007

Prerequisite: prior approval of proposed assignment by instructor

PHYS 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

PHYS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

PHYS 497A Applications of Modern Physics in Medicine (3) This course is an overview of the applications of nuclear physics in medicine. Methods of diagnostics using X-rays, radioisotopes and nuclear resonance are reviewed. Various radiation therapy applications are reviewed and compared. (This course is appropriate for students interested in nuclear and medical physics as well as for premed student).

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

PHYS 497B Systems Biology & Networks (3) Introduce elements of network theory used to describe and model complex networks; focus on biological networks and systems biology.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

PHYS 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

PHYS 510 General Relativity I (3) Foundations of general relativity, elements of differential geometry, Einstein's equation, Newtonian limit, gravity waves, Friedmann cosmologies and Schwarzschild solution.

Effective: Spring 1996

Prerequisite: PHYS 557

PHYS 511 Topics in General Relativity (3) Selected topics from: Cauchy problem, Hamiltonian formulation, positive energy theorems, asymptotics, gravitational radiation, singularity theorems, black-holes, cosmology, observational tests.

Effective: Spring 1996

Prerequisite: PHYS 510

PHYS 512 Quantum Theory of Solids I (3) Electrons in periodic potentials; single electron approximations; lattice dynamics; electrical, optical, and magnetic properties of solids; transport theory.

Effective: Spring 1996

Prerequisite: PHYS 412 Concurrent: PHYS 517

PHYS 513 Quantum Theory of Solids II (3) Electron-phonon interaction, BCS theory; Landau Fermi-liquid theory; disorder and localized states; spin-wave theory; many-body theory.

Effective: Spring 1996

Prerequisite: PHYS 512

PHYS 514 Physics of Surfaces, Interfaces, and Thin Films (3) This course focuses on interfacial and surface phenomena; structural, electronic, vibrational and thermodynamic properties; physisorption and chemisorption; phase transitions and ultrathin film nucleation; and growth phenomena.

Effective: Summer 1995

Prerequisite: PHYS 412

PHYS 517 Statistical Mechanics (3) Thermodynamics, classical and quantum statistics; Bose and Fermi gases; Boltzmann transport equation; phase transitions, critical phenomena; Ising model.

Effective: Spring 1996

Prerequisite: PHYS 561

PHYS 518 Critical Phenomena and Field Theory (3) Critical phenomena using field theoretical and renormalization group techniques; solvable statistical models and conformal field theory; fluctuations and random processes.

Effective: Spring 2011

Prerequisite: PHYS 517

PHYS 524 Physics of Semiconductors and Devices (3) Electronic structure, optical and transport properties of crystalline and amorphous semiconductors, quantum wells, superlattices; quantum devices; quantum Hall effect.

Effective: Spring 1996

Prerequisite: PHYS 412

PHYS 525 Methods of Theoretical Physics I (3) Complex variables, Hilbert spaces, linear operators, calculus of variations, Fourier analysis, Green's functions, distributions, differential equations, and special functions.

Effective: Spring 1996

PHYS 526 Methods of Theoretical Physics II (3) Finite and Lie groups, representations and application to condensed matter and particle physics; selected topics from differential geometry.

Effective: Spring 1996

Prerequisite: PHYS 525

PHYS 527 (ASTRO 527) Computational Physics and Astrophysics (3) Introduction to numerical methods for modeling physical phenomena in condensed matter, atomic and high energy physics, gravitation, cosmology and astrophysics.

Effective: Fall 2008

PHYS 530 Theoretical Mechanics (3) Newtonian mechanics, noninertial coordinate system, Lagrangian mechanics, small oscillations, Hamiltonian formulation, canonical transformations, Hamilton-Jacobi theory, dynamical systems.

Effective: Spring 1996

Prerequisite: PHYS 419

PHYS 533 Theoretical Acoustics (3) Wave propagation in complex systems and materials: viscoelastic fluids, superfluids, elastic solids, periodic and random media, nonlinear media.

Effective: Spring 1996

PHYS 541 Elementary Particle Phenomenology (3) Baryons and mesons; leptons and quarks; electromagnetic and weak interactions and their unification; quantum chromodynamics; experimental techniques.

Effective: Spring 1996

Prerequisite: PHYS 562

PHYS 542 Standard Model of Elementary Particles Physics (3) Weinberg-Salam model of electroweak interactions, spontaneous symmetry breaking, quantum chromodynamics; selected topics from grand unified theories and superstring theory.

Effective: Summer 1995

Prerequisite: PHYS 564

PHYS 545 (ASTRO 545) Cosmology (3) Modern cosmology of the early universe, including inflation, the cosmic microwave background, nucleosynthesis, dark matter and energy.

Effective: Spring 2009

PHYS 555 (MATSE 555) Polymer Physics I (3) Introduction to the fundamental concepts needed to understand the physics applicable to polymer melts, solutions and gels.

Effective: Spring 2006

PHYS 557 Electrodynamics (3) Special relativity, electromagnetic fields, Maxwell's equations, conservation laws, electrostatics and magnetostatics.

Effective: Spring 2011

Prerequisite: PHYS 400

PHYS 559 Graduate Laboratory (2) Study and applications of techniques and instrumentation used in modern physics

laboratories.

Effective: Spring 1996

PHYS 561 Quantum Mechanics I (3) Postulates of quantum mechanics, Hilbert space methods, one dimensional potentials, spin systems, Harmonic oscillator, angular momentum, Hydrogen atom.

Effective: Spring 1996

Prerequisite: PHYS 410

PHYS 562 Quantum Mechanics II (3) Addition of angular momenta, perturbation theory, variational principle, scattering theory, density matrices, identical particles, interpretations of quantum mechanics, Dirac theory.

Effective: Spring 1996

Prerequisite: PHYS 561

PHYS 563 Quantum Field Theory I (3) Canonical and functional integral quantization of relativistic and non-relativistic field theories; Feynman diagrams; spontaneous symmetry breaking; renormalization group.

Effective: Spring 1996

Prerequisite: PHYS 562

PHYS 564 Quantum Field Theory II (3) Abelian and non-Abelian gauge theories; renormalization group and operator product expansions; BRST quantization; scattering theory, other related topics.

Effective: Spring 1996

Prerequisite: PHYS 563

PHYS 565 Interface of General Relativity and Quantum Physics (3) Limitations of perturbative methods, conceptual problems; selected topics from black hole thermodynamics, canonical quantum gravity, loop space methods and string-theory.

Effective: Summer 1995

Prerequisite: PHYS 510, PHYS 563

PHYS 571 Modern Atomic Physics (3) Light-atom interactions, atomic structure, laser cooling and trapping, interferometry, and Bose-Einstein condensation.

Effective: Spring 2011

Prerequisite: PHYS 411, PHYS 561 or CHEM 565

PHYS 572 Laser Physics and Quantum Optics (3) Theory of modern lasers, non-linear and quantum optics, photon statistics, laser spectroscopies, pulsed lasers.

Effective: Spring 2011

Prerequisite: PHYS 410, PHYS 561 or CHEM 565

PHYS 580 Elements of Network Science and Its Applications (3) Introduction to elements of network theory used to describe and model complex networks; applications in social, biological, and technological networks.

Effective: Spring 2011

Prerequisite: knowledge of basis calculus

PHYS 590 Colloquium (1-3) Continuing seminars that consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Summer 1997

PHYS 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

PHYS 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Spring 1987

PHYS 597A Thermodynamics, Information Theory, and Chaotic Systems (3) Thermodynamics, Information Theory, and Chaotic Systems Interconnections among Thermodynamics, Information Theory, and Dynamical Systems. Emphasis on Chaos and Fractals.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: graduate standing in Science or Engineering

PHYS 597C Introduction to Supergravity (3) Constructions of supergravity theories in various space-time dimensions and their applications, in particular to AdS/CFT dualities, will be studied.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: basic knowledge of general relativity quantum field theory and Lie group theory

PHYS 597D Introduction to String Theory and Supergravity (3) String theory and supergravity are discussed, focusing both on foundations and recent developments. Topics: Bosonic strings; Superstrings; Supergravity; Actions; Dualities

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: basic knowledge of general relativity quantum field theory and Lie group theory.

PHYS 600 Thesis Research (1-15) No description.

Effective: Fall 1983

PHYS 601 Ph.D. Dissertation Full-Time (0) No description.

Effective: Fall 1983

PHYS 610 Thesis Research Off Campus (1-15) No description.

Effective: Fall 1983

PHYS 611 Ph.D. Dissertation Part-Time (0) No description.

Effective: Fall 1983

PHYS 897 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Effective: Summer 2007

PHYS 897A Hands-on Particle Astrophysics (2) A week-long workshop in the science and techniques of particle astrophysics research to study high-energy cosmic phenomena.

Effective: Summer 2011 Ending: Summer 2011

Prerequisite: must be a high-school teacher in a scientific discipline.

Last Import from UCM: June 16, 2011 3:00 AM

Plant Pathology (PPATH)

PPATH 405 Microbe-Plant Interactions: Plant Disease and Biological Control (3) Survey of microbe-plant interactions causing plant disease, mechanisms of pathogenesis, disease control, and microbial and molecular biological control strategies.

Effective: Spring 1999
Prerequisite: BIOL 110

PPATH 412 Turfgrass Disease Management (3) Introduction to biology of turfgrass pathogens and management of cool- and warm-season turfgrass disease.

Effective: Spring 2008
Prerequisite: TURF 230, TURF 235, CHEM 101 or CHEM 110, BIOL 127

PPATH 416 Plant Virology: Molecules to Populations (3) An exploration of the molecular biology and population dynamics of the virus-plant interaction.

Effective: Fall 2005
Prerequisite: BIOL 110, BIOL 120

PPATH 417 Phytobacteriology (3) Lecture and lab coverage of how bacteria cause plant diseases.

Effective: Fall 2009
Prerequisite: BIOL 110; BIOL 222 or BIOL 322; B M B 211 or MICRB 201 or MICRB 251 or B M B 251

PPATH 419 Plant Nematology (2) The biology of plant pathogenic nematodes, the diseases they cause, and their control.

Effective: Fall 2009
Prerequisite: BIOL 110, BIOL 120

PPATH 425 (BIOL 425) Biology of Fungi (4) A survey of the biological diversity of fungi, stressing evolution, ecology, disease, morphology, life histories, and importance to humans.

Effective: Spring 2002
Prerequisite: fifth-semester or graduate standing in a biological sciences major with six credits completed in the major

PPATH 427 Mycotoxins: Effects of Fungal Toxins on Human and Animal Health (3) Description and history of mycotoxicoses. Mycotoxin formation, occurrence, control, economic and social impacts, and regulatory issues.

Effective: Summer 2007
Prerequisite: BIOL 110 or BIOL 011 and BIOL 012; CHEM 112, CHEM 113 ; course can also be taken with approval of the department

PPATH 430 (E R M 430) Air Pollution Impacts to Terrestrial Ecosystems (3) An overview of direct and indirect effects of air pollution on terrestrial plants and ecosystems.

Effective: Summer 2004
Prerequisite: BIOL 220W, FOR 308

PPATH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

PPATH 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

PPATH 502 Plant Disease Diagnosis (3) Field and laboratory techniques used in diagnosing plant diseases caused by various types of pathogens with emphasis on fungi.

Effective: Summer 2005
Prerequisite: PPATH 401

PPATH 505 Fundamentals of Phytopathology (2) An in-depth tutorial of the fundamental theories and concepts of plant pathology.

Effective: Spring 2004
Prerequisite: PPATH 405 or equivalent

PPATH 533 Molecular Genetics of Plant-Pathogen Interactions (3) In depth discussion/review of the primary literature on the mechanisms of plant-pathogen interactions at the molecular and cellular levels.

Effective: Summer 2003
Prerequisite: PPATH 405 or equivalent and B M B 400 or equivalent

PPATH 540 Plant Disease Control (3) Principles of plant disease control, including theoretical considerations involved in control by chemical and nonchemical means.

Effective: Winter 1978

PPATH 542 Epidemiology of Plant Diseases (3) Disease development in populations of plants, with emphasis on the impact of environment and control practices on rate of development.

Effective: Spring 1984
Prerequisite: PPATH 401; MATH 111 or MATH 141 or 3 credits in statistics

PPATH 543 **Pathogen Variation and Host Resistance** (3) Mechanisms and implications of genetic variation in plant pathogens related to breeding for disease resistance in plants by genetic means.

Effective: Fall 1983

Prerequisite: PPATH 401 or AGRO 411 or HORT 407

PPATH 544 **Fungal Genetics** (4) Fungal breeding systems, mating types, asexual restrictions and recombination, tetrad analysis, gene conversion and extra genetic elements.

Effective: Summer 2003

Prerequisite: 3 credits of mycology and introductory genetics

PPATH 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Fall 2008

PPATH 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

PPATH 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

PPATH 600 **Thesis Research** (1-15) No description.

Effective: Fall 1983

PPATH 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Fall 1983

PPATH 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised preparation and presentation of materials in lectures and laboratories, preparation and supervision of exams and student consultation and evaluation.

Effective: Fall 1983

PPATH 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1983

PPATH 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Fall 1983

PPATH 802 (AGBIO 802) **Plant Protection: Responding to Introductions of Threatening Pests and Pathogens** (3) This course provides knowledge of plant biosecurity, plant disease, regulations, and technologies using case study examples.

Effective: Summer 2010

Prerequisite: AGBIO 520

PPATH 853 (TURF 853) **Interpreting Turfgrass Science Literature** (3) Introduction to turfgrass research publications, interpretation of the data, and discussion of the significance of the results.

Effective: Summer 2010

Last Import from UCM: June 16, 2011 3:00 AM

Plastics Engineering Technology (PL ET)

PL ET 400 Plastics Management Issues (3) Study of business management topics as they relate to the plastics industry.
Effective: Summer 1996 Ending: Fall 2011
Prerequisite: PL ET 350, PL ET 370

PL ET 400 Plastics Management Issues (3) Study of business management topics as they relate to the plastics industry.
Effective: Spring 2012 Future: Spring 2012
Prerequisite: PL ET 350

PL ET 429 Plastics Packaging (3) Introduction to plastics packaging including production methods, economic concerns, aesthetics, color and transparency, environmental concerns, and package lifetimes.
Effective: Summer 1996
Prerequisite: PL ET 350

PL ET 430 Packaging Design & Materials (2) Study of design and materials for plastic packaging including blow molded, thermoformed and extruded products.
Effective: Summer 2005
Prerequisite: Prerequisite or concurrent: PL ET 304, PL ET 330

PL ET 440 Advanced Mold Design Technologies (4) This is the second course in mold design; focuses on mechanical aspects of designing and building a mold; includes CAD, CAM, and CAE technologies.
Effective: Spring 2007
Prerequisite: MCH T 213, MET 306, METBD 366, PL ET 340

PL ET 460 Advanced Computer Applications in Plastics Design (3) Advanced applications of computer-aided design, computer-aided manufacturing, computer-aided engineering, and finite element analysis to plastic product development.
Effective: Summer 1996
Prerequisite: PL ET 350 . Prerequisite or concurrent: PL ET 440

PL ET 462 Advanced Injection Molding (3) New and advanced injection molding technologies, implementing statistical methods such as design of experiments.
Effective: Summer 2005
Prerequisite: PL ET 225, PL ET 227, PL ET 330

PL ET 464 Plastics Failure Analysis (3) Fundamentals of Plastics Materials Process and Design Failure Analysis.
Effective: Summer 2005
Prerequisite: PL ET 304

PL ET 465 Advanced CAE for Plastics II (3) Advanced Computer-Aided Engineering techniques for plastic part design.
Effective: Spring 2007
Prerequisite: PL ET 345, PL ET 350, MET 418

PL ET 467 Secondary Operations (3) Fundamentals of decoration and assembly methods used in the plastics industry.
Effective: Summer 2005
Prerequisite: Seventh semester standing

PL ET 468 Rapid Commercialization (3) Techniques to help get plastic products to market quicker and to build solids and surface modeling skills.
Effective: Summer 2005
Prerequisite: PL ET 350

PL ET 481 Plastic Product Development (3) This course provides students with an in-depth overview of the integrated new product development process.
Effective: Summer 2011
Prerequisite: PL ET 350

PL ET 482 Medical Product Development (1) This course provides students with medical device development requirements and processes. The course is to be taken in conjunction with PL ET 481 as both courses will utilize a semester project to invent and design a new product. Over the course of the semester students will review the FDA classifications, filing requirements, and recommended practices for medical device development. This knowledge will be applied and practiced through the semester projects. Students will learn techniques for Failure Modes and Effects Analysis and how to properly document and manage product change through the development process.
Effective: Summer 2011
Prerequisite: PL ET 380, PL ET 350 Concurrent: PL ET 481

PL ET 483 Plastics in Medical Applications (3) This course focuses on plastics materials and properties and how they meet the unique medical application and device requirements.
Effective: Summer 2011
Prerequisite: PL ET 304, PL ET 380

PL ET 484 Medical Manufacturing Methods (3) This course provides instruction in the methods and practices used in the manufacturing of plastic devices in the medical industry.
Effective: Summer 2011
Prerequisite: PL ET 380

PL ET 494A Plastics Projects (1-12) Supervised student activities on research and/or design projects identified on an

individual or small group basis. A specific title may be used in each instance and will be entered on the student's transcript.

Effective: Spring 2007 Ending: Fall 2011

Prerequisite: or concurrent: MET 418, PL ET 350, PL ET 370

PL ET 494A **Plastics Projects** (1-12) Supervised student activities on research and/or design projects identified on an individual or small group basis. A specific title may be used in each instance and will be entered on the student's transcript.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: or concurrent: MET 418, PL ET 350, PL ET 323

PL ET 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica or internships. Written and oral critique of activity required.

Effective: Summer 1992

Prerequisite: prior approval of proposed assignment by instructor

PL ET 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1992

PL ET 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Summer 1992

PL ET 497C **Plastic Product Development** (3) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: PL ET 350

PL ET 497D **Medical Product Development** (1) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: PL ET 380, PL ET 481

PL ET 497E **Plastics in Medical Applications** (3) Formal courses given infrequently to explore, in-depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: PL ET 304, PL ET 380

PL ET 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2010

Last Import from UCM: June 16, 2011 3:00 AM

Polish (POL)

POL 499 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Summer 2005

Last Import from UCM: June 16, 2011 3:00 AM

Political Science (PL SC)

PL SC 403 **The Legislative Process** (3) Analysis of the policy process within the legislative system; the effects of environmental factors on policy alternatives and legislative decision making.

Effective: Spring 2001

Prerequisite: PL SC 001 or PL SC 003

PL SC 405 **The American Presidency** (3) An examination of the selection methods for, and powers of, the American presidency, as well as other chief executives.

Effective: Fall 1983

Prerequisite: PL SC 001

PL SC 410 **Game Theory in International Relations** (3) Game theoretic approaches to the study of international relations.

Effective: Spring 2005

Prerequisite: PL SC 014

PL SC 411W **Principles of International Cooperation** (3) An exploration of the forces that make conflict, or cooperation, more likely in international relations.

Effective: Summer 2006

Prerequisite: PL SC 014

PL SC 412 **International Political Economy** (3) The transnational politics of trade, investment, aid, raw materials, and the environment; nation-states, multinational corporations, and the U.N.

Effective: Spring 2011

Prerequisite: ECON 102, ECON 104, ECON 014, I B 303 or BUS 364

PL SC 413 **The Rise and Fall of the Soviet Union** (3) Background, organization, and operation of the Communist Party and the government of the Soviet Union.

Effective: Spring 2001

Prerequisite: 3 credits from: PL SC 003, PL SC 014, PL SC 155 or RUS 100

PL SC 414 **Dictators and Their Demise** (3) Dictators and Their Demise examines the political economy of authoritarian rule.

Effective: Summer 2011

Prerequisite: PL SC 003

PL SC 415 **International Organization: Political and Security Functions** (3) Theory and evolution of international organization; political and security functions of the United Nations and regional organizations.

Effective: Spring 2003

Prerequisite: PL SC 014

PL SC 416 **International Negotiations** (3) The study of international negotiations from a strategic perspective.

Effective: Summer 2005

Prerequisite: PL SC 014

PL SC 417 **American Local Government and Administration** (3) Organization, powers, functions, and problems of American cities and metropolitan areas; modern trends and developments.

Effective: Winter 1978

Prerequisite: PL SC 001

PL SC 418 **International Relations Theory** (3) A survey of traditional and contemporary conceptual frameworks and theoretical approaches for the analysis of international relations.

Effective: Winter 1978

Prerequisite: PL SC 014

PL SC 418W **International Relations Theory** (3) A survey of traditional and contemporary conceptual frameworks and theoretical approaches for the analysis of international relations.

Effective: Spring 1999

Prerequisite: PL SC 014

PL SC 419 **The Bureaucratic State** (3) Overview of structural, technological, decision-making, behavioral, and political subsystems of bureaucracy; emphasis on bureaucratic dynamics within larger environmental, interorganizational contexts.

Effective: Fall 2007

Prerequisite: PL SC 001, PL SC 002 or PUBPL 304W

PL SC 422 **Comparative Urban Politics** (3) Relationships between structure and evolution of city systems and patterns of political behavior.

Effective: Spring 2001

Prerequisite: PL SC 003, PL SC 020, PL SC 022 or PL SC 417

PL SC 423 **Post-Soviet Politics** (3) Aspects of political transition and institutions of the fifteen Soviet successor republics; emphasis on Russia and republican confederation.

Effective: Fall 2007

Prerequisite: PL SC 003, PL SC 155 or RUS 100

PL SC 424 **Topics in Comparative Government and Institutions** (3) Topics in the comparative analysis of representative contemporary Western and non-Western governmental institutions.

Effective: Fall 2007

Prerequisite: 3 credits from PL SC 003, PL SC 020, PL SC 022

PL SC 425 Government and Politics of the American States (3) Comparative analysis of political processes; executive, legislative, and judicial decision making and behavior; examination of systems functioning; selected public policies.

Effective: Winter 1978

Prerequisite: PL SC 001

PL SC 426 Political Parties and Interest Groups (3) Interest group basis of American politics, analysis of party and group behavior in electoral politics and the policy process.

Effective: Fall 1983

Prerequisite: PL SC 001

PL SC 427 Political Opinion (3) Nature and development of mass attitudes and opinions; political socialization; voting behavior; relation between opinions and public policy.

Effective: Spring 2001

Prerequisite: PL SC 001

PL SC 428 (US;IL) (WMNST 428) Gender and Politics (3) Gender in politics in the United States and around the world; major areas of women and politics research.

Effective: Fall 2007

Prerequisite: 3 credits in political science or women's studies

PL SC 429 Analysis of Electoral Politics (3) The new politics, its technology, and the strategic perspectives that underlie it.

Effective: Spring 2007

Prerequisite: PL SC 001

PL SC 430 Selected Works in the History of Political Theory (3) Detailed examination and analysis of a selected major work, thinker, or tradition in the history of political theory.

Effective: Spring 1998

Prerequisite: PL SC 017 or PL SC 007

PL SC 430W Selected Works in the History of Political Theory (3) Detailed examination and analysis of a selected major work, thinker, or tradition in the history of political theory.

Effective: Spring 2008

Prerequisite: PL SC 017 or PL SC 007

PL SC 431 Ancient, Medieval, and Renaissance Political Theories (3) Political theories of Plato and Aristotle; selected Greek, Roman, medieval, and Renaissance theorists through Machiavelli.

Effective: Spring 2003

Prerequisite: PL SC 017 or PL SC 007

PL SC 432 Modern and Contemporary Political Theories (3) Political theories of the seventeenth through the twentieth centuries, including Hobbes, Locke, Rousseau, Marx, Mill, Mosca, Weber, and selected theorists.

Effective: Spring 2003

Prerequisite: PL SC 017 or PL SC 007

PL SC 433 Political Foundations of the Early American Republic (3) The course introduces students to the major political and philosophical movements that influenced the founders of the early American republic.

Effective: Summer 2008

Prerequisite: PL SC 001 or HIST 020 or PL SC 017

PL SC 434 (IL) (AAA S 434) War and Development in Africa (3) This course will examine the relationship between war and development in sub-Saharan Africa in the post colonial era.

Effective: Spring 2008

Prerequisite: PL SC 114, PL SC 003, AAA S 110

PL SC 435 Foundations of American Political Theory (3) Political theories of colonial, revolutionary, and constitutional periods presented through works of selected thinkers and analysis of particular political problems.

Effective: Spring 2001

Prerequisite: PL SC 001, PL SC 017 or PL SC 007

PL SC 435W Foundations of American Political Theory (3) Political theories of the revolutionary and constitutional periods presented through works of selected political thinkers and political issues.

Effective: Spring 2001

Prerequisite: PL SC 001, PL SC 017 or PL SC 007

PL SC 437 War in World Politics (3) Causes, resolution, and consequences of crises and wars; testing theories of conflict using both case and statistical studies.

Effective: Summer 1997

Prerequisite: PL SC 014

PL SC 438 National Security Policies (3) Impact of national security on U.S. government and foreign policy; roles and interaction of President, Congress, government agencies, interest groups.

Effective: Spring 2001

Prerequisite: PL SC 001 or PL SC 014

PL SC 439 (CRIMJ 439) The Politics of Terrorism (3) Analysis of political terrorism as a violent alternative for peaceful change and traditional warfare in the nuclear age.

Effective: Spring 2008

Prerequisite: CRIMJ 100 or PL SC 014 or permission of program

PL SC 440 (US;IL) (AAA S 440, I B 440) **Globalization and Its Implications** (3) This course explores the socioeconomic implications of globalization.

Effective: Spring 2008

Prerequisite: AAA S 100 or AAA S 110 or PL SC 003 or PL SC 014 or PL SC 020 or PL SC 022

PL SC 441 **Transnational Corporations and Other Organizations in International Relations** (3) Analysis of the effects of transnational actor behavior on international relations.

Effective: Fall 2007

Prerequisite: ECON 333, I B 303, PL SC 014 or BUS 364

PL SC 442 **American Foreign Policy** (3) Principles of American foreign policy; processes of policy formulation; roles of the President, Congress, the State Department, and other government agencies.

Effective: Spring 2001

Prerequisite: PL SC 014

PL SC 443 (IL) (AAA S 443) **Ethnic Conflict in Africa** (3) This course explores the various causes and impacts of ethnic conflicts in the African context.

Effective: Spring 2008

Prerequisite: AAA S 100, AAA S 110, PL SC 001, PL SC 003, PL SC 007, PL SC 014, PL SC 017, PL SC 020 or AFRAS 301

PL SC 444 **Government and the Economy** (3) Interactions of governmental and economic activity in American life. Survey of governmental (national, state, local) promotional, regulatory, and ownership policies.

Effective: Winter 1978

Prerequisite: 3 credits in political science or economics

PL SC 445Y (US) (AAA S 445Y, LER 445Y) **Politics of Affirmative Action** (3) Examines history, politics, and economics of the use of special programs to advance racial interests in the U.S.

Effective: Spring 2008

Prerequisite: AAA S 100 level course and PL SC 001 or PL SC 007

PL SC 452 **Government and Politics of Central Europe** (3) Politics and society in the Communist Era, the revolutions of 1989, and problems of adjustment to democracy and market.

Effective: Fall 2007

Prerequisite: PL SC 003, PL SC 020, PL SC 022 or PL SC 155

PL SC 453 (IL) **Political Processes in Underdeveloped Systems** (3) Comparative analysis of the political, social, and economic problems characteristic of underdeveloped systems.

Effective: Fall 2007

Prerequisite: PL SC 003, PL SC 020 or PL SC 022

PL SC 454 (IL) (AAA S 454) **Government and Politics of Africa** (3) Contemporary African politics, institutions, and ideologies; patterns of change, social forces, and nation building in selected African states.

Effective: Summer 2005

Prerequisite: 3 credits from: AAA S 110, PL SC 003, PL SC 020 or PL SC 022

PL SC 455 **Governments and Politics of Western Europe** (3) Comparative analysis of political and governmental structures of major West European nations; main functions and processes of such structures.

Effective: Spring 2001

Prerequisite: PL SC 003 or PL SC 020

PL SC 456 **Politics and Institutions of Latin-American Nations** (3) Social forces and processes, governmental institutions, foreign policies of major states of Latin America.

Effective: Spring 2001

Prerequisite: HIST 179, PL SC 003, PL SC 020 or PL SC 022

PL SC 457 **International Politics of Latin America** (3-6) Relationships among the nations of Latin America and the social forces which determine and shape their direction.

Effective: Spring 2001

Prerequisite: HIST 179, PL SC 003, PL SC 014, PL SC 020 or PL SC 022

PL SC 458 **Government and Politics of East Asia** (3-6) Examination of political institutions, democratic and communist revolution, political leadership, political processes of major states of East Asia.

Effective: Summer 1996

Prerequisite: 3 credits from PL SC 003, PL SC 020, PL SC 022

PL SC 459 (IL) (AAA S 459) **Culture and World Politics** (3) Role of culture in world politics.

Effective: Summer 2006

PL SC 460 (S T S 460) **Science, Technology, and Public Policy** (3) The all-pervasive importance of science and technology policy in modern societies and mechanisms and processes by which it is made.

Effective: Spring 1995

Prerequisite: 3 credits in natural sciences or engineering 3 credits in social and behavioral sciences

PL SC 461 (IL) **Politics of the European Union** (3) This course introduces students to the history, institutions and politics of the European Union.

Effective: Spring 2011

Prerequisite: PL SC 003 or PL SC 020

PL SC 462 **Marxist and Socialist Political Theory** (3) Analysis of major problems and key works in the Marxist and Socialist tradition; dialectical materialism, alienation, class warfare, etc.

Effective: Spring 2001

Prerequisite: PL SC 017, PL SC 007, PL SC 413 or PL SC 452

PL SC 464 (IL) (AAA S 464) **Globalization, Extractive Industries, and Conflict in Africa** (3) Socioeconomic and environmental impacts of extractive industries in Africa.

Effective: Summer 2008

Prerequisite: AAA S 110 or at least one of the following: PL SC 003 or PL SC 014 or PL SC 022

PL SC 467 **International Relations of the Middle East** (3) The international relations of the Middle East, stressing national security policies of regional and outside actors, and major contemporary conflicts.

Effective: Spring 1985

Prerequisite: PL SC 014 or HIST 181

PL SC 470W **Legal Brief Writing** (3) Writing of legal briefs as practiced in American courts.

Effective: Spring 1998

Prerequisite: PL SC 001

PL SC 471 **American Constitutional Law** (3) The origins of judicial review, landmark decisions of the Supreme Court, and their impact on the American form of government.

Effective: Fall 2007

Prerequisite: PL SC 001

PL SC 472 **The American Legal Process** (3) Analysis of the roles, procedures, and policies characterizing the American legal system.

Effective: Spring 2001

Prerequisite: PL SC 001

PL SC 473 **American Judicial Behavior** (3) Analyzes behavior of judges and other participants in the legal process; examines how and why courts function as policymaking bodies.

Effective: Fall 2007

Prerequisite: PL SC 001

PL SC 474 **Civil Liberties and Due Process** (3) Fundamental problems relating to civil liberties and due process.

Effective: Fall 2007

Prerequisite: PL SC 001

PL SC 480W **Congress and the Presidency** (3) Basic characteristics and processes of the national legislature and executive; roles and interaction of these institutions in the policy process.

Effective: Fall 2007

Prerequisite: PL SC 001

PL SC 481 **Global Political Economy** (3) This course examines states, markets, power, production, and the relations between the various transnational agents who act in these areas. Students may not receive credit for PL SC 481 and PL SC 412.

Effective: Spring 2007

Prerequisite: PL SC 014 or INTST 100

PL SC 482 **American State and Urban Politics** (3) Explores basic characteristics and processes of American state and urban politics; nature of intergovernmental relations involving these governmental levels.

Effective: Fall 2007

Prerequisite: PL SC 001

PL SC 484W **The Foreign Policy of Soviet Successor States** (3) Relations between Russia and The Newly Independent States (NIS); Russia's relations with selected foreign states and political institutions; regional impact of the NIS in Baltic, Asian, and Central Asian areas.

Effective: Fall 2007

Prerequisite: PL SC 003

PL SC 487 **International Law and Organizations** (3) Major topics and issues of international law with special attention to institutional arrangements (international organizations) through which that law operates.

Effective: Fall 2007

Prerequisite: PL SC 003 or PL SC 014

PL SC 488 **Comparative Public Policy** (3) Comparative methodology and public policy implementation in postindustrial societies; selected case studies of policy output.

Effective: Fall 2007

Prerequisite: PL SC 003

PL SC 489 **Public Administration** (3) A survey of the major approaches to the management of most governmental agencies.

Effective: Fall 2007

Prerequisite: PL SC 001

PL SC 490 **Policy Making and Evaluation** (3) Advanced analysis of public policy, emphasizing policy evaluation and the factors that determine policy success and failure.

Effective: Fall 2007

Prerequisite: PL SC 001, PL SC 002 or PUBPL 304W

PL SC 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or

small-group basis.
Effective: Summer 1994

PL SC 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

PL SC 495 **Political Science Internship** (1-6) Combining experience in government offices, related agencies, or law firms, with appropriate readings and a research paper/report.
Effective: Fall 2007

Prerequisite: prior consent of supervisor adviser or department head; applicable departmental internship requirements such as satisfactory completion of required 300- or 400-level courses appropriate for the internship program selected

PL SC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 1983

PL SC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 1983

PL SC 497A **Political Representation** (3) This course explores critical thinking about the representation of citizens' interests and the responsiveness of government to citizen preferences.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497A **Civil Rights and US Foreign Policy** (3) This course examines the relationship between US foreign policy and the modern Civil Rights Movement in the U.S.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

PL SC 497B **Democratization in Asia** (3) This seminar addresses the literature on democracy and democratization and then applies it in Asia.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497B **Religion and War in World Politics** (3) The course will examine the relationship between religion and war in world politics in the modern era.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

PL SC 497C **Civil Wars** (3) In this course we examine recent research about the factors that lead to the onset, duration, and termination of civil wars.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497C **Political Violence** (3) This course examines what causes people in a country to try to use violence, such as riots, coups, or civil wars, to change their political process.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

PL SC 497D **Racism in World Politics** (3) Examines the role of racism in world politics and of its impact on the two major paradigms, realism and idealism/liberalism.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497D **Dictators and Their Demise** (3) This course examines the political economy of authoritarian rule.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

PL SC 497E **Comparative Politics of Business-Government Relations** (3) In this class we will study what drives the structure and behavior of business relations with governments in various kinds of political systems.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497E **Foreign Policy and Dictators** (3) This course examines how foreign policy tools such as foreign aid, economic sanctions, human rights shaming, and foreign military intervention affect political stability in authoritarian countries.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

PL SC 497F **Political Economy of China** (3) This class will provide a framework for understanding the politics of economic policy in China, focusing especially on post-1978 economic reforms.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497F **Voting Rights and the Electoral Process** (3) This course is intended to give students a basic understanding of the themes in the legal regulation of elections and politics.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

PL SC 497G Agenda Setting in American Politics (3) The objective of this course is to think critically about agenda setting in politics that is, how social and political problems are identified and defined.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497I Politics of the American South (3) Course about the government and policies of the American South during the 20th & 21st centuries.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 497K Diplomacy: Institutions and Practice (3) We will learn about diplomacy in the abstract, and learn how diplomacy actually takes place, how institutions regulate it, and how diplomats conduct themselves.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 499 (IL) Foreign Study--Government (1-12) Study, in selected foreign countries, of political institutions.
Effective: Summer 2005
Prerequisite: PL SC 003 3 credits in economics history political science or sociology

PL SC 501 Methods of Political Analysis (3) Survey of important methods and approaches to the study of politics; introduction to research design.
Effective: Fall 1995

PL SC 502 Statistical Methods for Political Research (3) Basic concepts of statistics and their use in political research; data analysis, casual inference, regression analysis, computer applications.
Effective: Spring 1995

PL SC 503 Multivariate Analysis for Political Research (3) Analysis of selected issues in quantitative political analysis; introduction to advanced multivariate analysis techniques.
Effective: Spring 2003
Prerequisite: PL SC 501, PL SC 502

PL SC 511 Professional Norms in Political Science (1.5) An introduction to professional norms, the fundamentals of good research, and the basic skills necessary for good teaching.
Effective: Spring 2007

PL SC 513 Writing and Professional Development in Political Science (1.5) Professional development focusing on publishing research, writing dissertations, and professional issues of advanced graduate students.
Effective: Fall 2007
Prerequisite: 3rd year standing in Political Science Ph.D. program

PL SC 518 (SOC 518) Survey Methods I: Survey Design (3) Research design of social, behavioral and health surveys.
Effective: Fall 2007

PL SC 519 (SOC 519) Survey Methods II: Analysis of Survey Data (3) Intermediate course on the statistical analysis of survey data: topics include weighting, complex surveys, missing data, and contextual analysis.
Effective: Spring 2008
Prerequisite: PL SC 503 or SOC 575

PL SC 540 American Government and Politics (3) Survey of basic literature in major fields of U.S. government: public opinion, parties, voting, interest groups, presidency, congress, judiciary.
Effective: Fall 1995

PL SC 541 American Political Institutions (3-9) Research on a selected topic in United States political institutions such as the presidency, the courts, congress, bureaucracy, state governments.
Effective: Spring 1995

PL SC 542 American Political Behavior (3 per semester/maximum of 9) Research on a selected topic in United States political behavior such as public opinion, voting, parties, socialization, judicial behavior.
Effective: Spring 1995

PL SC 543 American Public Policy (3 per semester/maximum of 9) Research on topics in United States public policy and public law, such as environmental policy, development policy, individual and minority rights.
Effective: Spring 1995

PL SC 550 Comparative Politics: Theory and Methodology (3) Survey of basic literature and major research efforts in comparative political analysis.
Effective: Fall 1995

PL SC 551 **Comparative Political Institutions** (3 per semester/maximum of 9) Comparative study of the institutional structures of different political systems: the state, party systems, administrative structures.
Effective: Spring 1995

PL SC 552 **Comparative Political Behavior** (3 per semester, maximum of 9) Research on aspects of comparative political behavior, such as political culture, political change and development, interest groups, public opinion.
Effective: Spring 2003

PL SC 553 **Studies in Regional Politics** (3 per semester/maximum of 9) Research on political systems in selected regions of the world, such as Europe, Latin America, East and South Asia.
Effective: Spring 1995

PL SC 554 **The Politics of Development** (3) The course explores the origins of modernity, its proliferation globally, and problems associated with initiating and sustaining development.
Effective: Summer 2005

PL SC 560 **International Relations: Theory and Methodology** (3) Survey of major traditional and contemporary theory-building efforts and contemporary research techniques and orientations in international relations.
Effective: Summer 1995

PL SC 561 **American Foreign Policy** (3 per semester/maximum of 9) Research on the institutions, dynamics, and major themes of United States foreign policy.
Effective: Spring 2003

PL SC 562 **National Security Studies** (3 per semester/maximum of 6) Research on classical and modern conventional strategy, nuclear strategy, arms control, conflict management, and non-traditional security problems.
Effective: Spring 1995

PL SC 563 **International Political Economy** (3 per semester, maximum of 9) Research on international political economy with a focus on theory building; analysis of political causes and consequences of economic behavior.
Effective: Spring 2003

PL SC 564 **International Organization** (3 per semester/maximum of 6) Research on international governmental and non-governmental organizations in the international system, emphasizing the United Nations and collective security.
Effective: Spring 1995
Prerequisite: PL SC 415

PL SC 565 **International Conflict** (3) Research into the causes and consequences of international crises and wars, using various methodologies for theory assessment.
Effective: Spring 1996
Prerequisite: PL SC 560

PL SC 566 **Conflict Management, Termination, and Bargaining** (3) Research on termination and resolution of international conflicts, focusing on theory building and empirical assessment of theories of conflict resolution.
Effective: Fall 2008
Prerequisite: PL SC 560

PL SC 580 **Modern Democratic Political Theory** (3) Survey of major themes and problems in modern theories of democratic politics.
Effective: Spring 2003

PL SC 581 **History of Political Theory** (3 per semester/maximum of 9) Research on selected political theorists or historical traditions of political thought.
Effective: Spring 2003

PL SC 582 **Analytic Political Theory** (3 per semester/maximum of 6) Research on problems in contemporary theory construction.
Effective: Spring 1995
Prerequisite: PL SC 431 or PL SC 432

PL SC 583 **Modern Political and Social Theory** (3 per semester/maximum of 9) Research on major developments and issues in modern political and social theory, such as critical theory, modernism, and postmodernism.
Effective: Spring 2003

PL SC 586 **Theory of Bureaucratic and Administrative Politics** (3 per semester/maximum of 6) The role of the executive in government and politics; theories of administrative organization, organization behavior, and decision-making processes.
Effective: Spring 1998

PL SC 594 **Research in Political Science** (1-6) Supervised student activities on research projects identified on an individual or small group basis.
Effective: Summer 1988

PL SC 595 **Internship in Political Science** (1-9) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Summer 1987

Prerequisite: Prior consent of supervisor advisor or department head; applicable departmental internship requirements such as satisfactory completion of required upper level courses appropriate for the internship program selected.

PL SC 595A (SOC 595A) **Survey Research Practicum** (1-6 per semester/maximum of 6) Practicum in Survey Research data collection or management.

Effective: Summer 2011

Prerequisite: PL SC 518 orSOC 518 andPL SC 519 orSOC 519

PL SC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses. A specific title may be used in each instance and will be entered on the student's transcript.

Effective: Spring 1987

PL SC 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

PL SC 597A **Domestic Sources of Foreign Policy** (3) This course will look at the effects of domestic politics on states international behavior.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 597A **International and Comparative Environmental Politics** (3) This course will explore topics of global environmental politics such as the nature/causes of environmental problems, green social movement, etc.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

PL SC 597B **Comparative Authoritarianism** (3) The course begins with a brief introduction to classical theories of authoritarian rule, and then surveys the current literature on comparative authoritarianism.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PL SC 597B **Game Theory, Part I** (3) This course aims to give students an entry-level understanding of the basic concepts of game theory.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

PL SC 597C **Time Series Analysis** (3) The course introduces students to time series methods and to the applications of these methods in political science.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

PL SC 598 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Spring 1995

PL SC 599 (IL) **Foreign Studies** (1-12 per semester/maximum of 24) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.

Effective: Summer 2005

PL SC 600 **Thesis Research** (1-15) No description.

Effective: Fall 1983

PL SC 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Fall 1983

PL SC 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description.

Effective: Spring 1995

PL SC 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.

Effective: Spring 2000

PL SC 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1983

PL SC 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Portuguese (PORT)

PORT 405 **Advanced Composition and Conversation** (3) Intended to strengthen the advanced student's ability to speak, read, and write in modern Brazilian Portuguese.

Effective: Summer 1981

Prerequisite: PORT 003

PORT 456 **Brazilian Literature in English Translation** (3) Selected topics in the history of Brazilian literature, supplemented by readings, discussion, and lectures on cultural or literary questions.

Effective: Winter 1978

PORT 476 **Brazilian Literature, The Modern Era (1880 to the Present)** (3) A survey of the major texts of Brazilian literature from romanticism to the present.

Effective: Summer 1991

Prerequisite: PORT 003

PORT 480 **The Brazilian Novel** (3) A survey of the Brazilian novel from its origins to the present.

Effective: Spring 1993

Prerequisite: PORT 003, PORT 405

PORT 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

PORT 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

PORT 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

PORT 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

PORT 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

PORT 588 **Seminar in Portuguese and Brazilian Literature** (3-12) Common and individual research in special problems.

Effective: Winter 1978

PORT 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

PORT 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.

Psychology (PSYCH)

PSYCH 400 Intermediate Experimental Design (3) Design and analysis of experiments on human and animal behavior, including application of the t, F, chi-square, and binomial distributions.

Effective: Spring 2007

Prerequisite: PSYCH 200 or STAT 200

PSYCH 404 (EDPSY 450) Principles of Measurement (3) Scale transformation, norms, standardization, validation procedures, estimation of reliability.

Effective: Spring 2007

Prerequisite: EDPSY 400, PSYCH 100 or PSYCH 200; STAT 200

PSYCH 405 Mathematical Psychology (3) Formalized psychological theories including models of social, biological, cognitive, and learning phenomena.

Effective: Spring 2007

Prerequisite: MATH 040 or equivalent PSYCH 200 or STAT 200

PSYCH 406W Advanced Research Projects in Psychology (4) Advanced methodology focusing on the logic and practice of research culminating in the completion of a student designed research project.

Effective: Spring 2007

Prerequisite: PSYCH 301W

PSYCH 407 Advanced Research Methods in Psychology (3) Advanced methodology focusing on the logic and practice of research in a selected content area of psychology.

Effective: Spring 2007

Prerequisite: PSYCH 100; PSYCH 200 or STAT 200; PSYCH 301W

PSYCH 408 Program Evaluation (3) Examination of the theories and practice of program evaluation; emphasis on applied work utilizing a wide range of evaluation approaches.

Effective: Spring 2007

Prerequisite: PSYCH 100 or SOC 001; PSYCH 200 or STAT 200; PSYCH 301W

PSYCH 410 Child Development (3) Study of the psychology of the growing person from conception through adolescence, focusing more on periods up to middle childhood.

Effective: Spring 2007

Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 412 Adolescence (3) Physical, cognitive, and personality development during adolescence.

Effective: Spring 2007

Prerequisite: PSYCH 100

PSYCH 413 Cognitive Development (3) Development of reasoning and related cognitive skills, such as perception and language.

Effective: Spring 2007

Prerequisite: PSYCH 100, PSYCH 212

PSYCH 414 Social and Personality Development (3) Development of social and personality attributes.

Effective: Spring 2007

Prerequisite: PSYCH 100, PSYCH 212

PSYCH 415 Topics in Developmental Psychology (3) Special topics in developmental psychology.

Effective: Spring 2007

Prerequisite: PSYCH 413 or PSYCH 414

PSYCH 416 (HD FS 445) Development Throughout Adulthood (3) Processes of development and change of behavior from early adulthood through old age, emphasizing theory, method, and empirical research.

Effective: Spring 2007

Prerequisite: HD FS 249 or PSYCH 100; HD FS 312W or PSYCH 301W; PSYCH 200, STAT 200 or 3 credits of statistics ; 6 credits in HD FS PSYCH or SOC.

PSYCH 419 Psychology and a Sustainable World (3) Students study relationships between humans and the natural world and psychological factors contributing to environmental problems and sustainable solutions.

Effective: Summer 2011

Prerequisite: PSYCH 100, PSYCH 221

PSYCH 420 Advanced Social Psychology (3) In depth study of selected research areas in human social behavior.

Effective: Spring 2007

Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 421 Self and Social Judgment (3) Individual's perceptions, evaluations, and decision-making strategies about themselves, others, and social situations or issues.

Effective: Spring 2007

Prerequisite: PSYCH 100, PSYCH 221

PSYCH 422 Human Sexuality (3) Psychological influences on human sexual behavior such as love, sexual orientation, gender, intercourse, contraception, sexually transmitted diseases, dysfunctions, and paraphilias.

Effective: Spring 2007

Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 423 Social Psychology of Interpersonal/Intergroup Relationships (3) In-depth study of relationships among individuals (e.g., intimate relationships) or groups (e.g., prejudice, cooperation, competition, aggression, and negotiation).

Effective: Spring 2007

Prerequisite: PSYCH 100, PSYCH 221

PSYCH 424 Applied Social Psychology (3) Application of social psychological theories and research methods to field settings and to the study of social issues.

Effective: Spring 2007

Prerequisite: PSYCH 100, PSYCH 221

PSYCH 425 Psychology of Human Emotion (3) Reviews, critiques, and applies major historical and contemporary psychological theories of emotion experience, understanding, and expression.

Effective: Spring 2007

Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 426 (LING 429) Language and Thought (3) Relations between language and cognition; cognitive implications of normal and impaired language development; cognition and bilingualism.

Effective: Spring 2007

Prerequisite: PSYCH 100 or LING 001 or LING 100

PSYCH 427 (LING 446) L1 Acquisition (3) How children learn their first language; psycholinguistic aspects of lexical, syntactic, semantic, and phonological development.

Effective: Spring 2010

Prerequisite: LING 100 or PSYCH 002 or permission of program

PSYCH 432 (US) Multicultural Psychology in America (3) This course focuses on the central role of culture, race, and ethnicity in the human condition.

Effective: Spring 2007

Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 436 (RL ST 414) Humanistic, Existential, and Religious Approaches to Psychology (3) Existential, humanistic, and religious approaches to the psychology of experience, consciousness and will.

Effective: Spring 2007

Prerequisite: PSYCH 100 or RL ST 001

PSYCH 438 Personality Theory (3) Personality theories and their application to social and personality development and personality dynamics.

Effective: Spring 2007

Prerequisite: PSYCH 100 6 additional credits PSYCH

PSYCH 439 History and Systems of Psychology (3) Historical antecedents to scientific psychology; development of contemporary psychological theories and research areas from the formal establishment of psychology.

Effective: Spring 2007

Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 441 Health Psychology (3) Overview of the field with an emphasis on how psychological research contributes to an understanding of health and behavior.

Effective: Spring 2007

Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 443 Treatment and Education in Developmental Disabilities (3) Covers etiology, classification, intervention (treatment and education), ethical and legal issues related to individuals with developmental disabilities.

Effective: Spring 2007

Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 444 Engineering Psychology (3) Methods and results of experimental psychology pertinent to problems which involve man-machine relationships.

Effective: Spring 2007

Prerequisite: PSYCH 100 6 additional credits of GQ or PSYCH

PSYCH 445 Forensic Psychology (3) Relations between psychological theory and research and the law, legal processes, and social policy.

Effective: Spring 2007

Prerequisite: PSYCH 100; PSYCH 238, PSYCH 243 or PSYCH 270

PSYCH 447 Psychology of Discipline (3) Provides theory and practice for effective discipline of children in a variety of situations.

Effective: Spring 2007

Prerequisite: PSYCH 100 6 additional credits PSYCH

PSYCH 450 Psychology of Consciousness (3) Introduction to psychological and physiological aspects of consciousness as related to brain function and clinical psychology.

Effective: Spring 2007

Prerequisite: PSYCH 100 6 additional credits of PSYCH

PSYCH 451 Psychology of Action (3) Basic and applied science of action, from psychological, computational, and physiological perspectives.

Effective: Spring 2007

Prerequisite: PSYCH 100, PSYCH 256

- PSYCH 452 Learning and Memory (3)** General survey of learning and memory processes as revealed in experimental work with animals and humans.
Effective: Spring 2007
Prerequisite: PSYCH 100, PSYCH 256
- PSYCH 456 Advanced Cognitive Psychology (3)** In depth study of complex mental processes: thinking, problem-solving, imagery, symbolic behavior, information-processing, attention, artificial intelligence, and language.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH
- PSYCH 457 Psychology of Language (3)** Overview of psychological research and theory on language processes, including speech perception, word recognition, meaning representation, comprehension, and language acquisition.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH
- PSYCH 458 Visual Cognition (3)** Overview of concepts and methods in cognitive visual-spatial processing.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH
- PSYCH 459 Attention and Information Processing (3)** An examination of attentional processes. Contemporary informational processing approaches will be emphasized.
Effective: Spring 2007
Prerequisite: PSYCH 100; PSYCH 200 or STAT 200 ; 3 credits 400-level PSYCH
- PSYCH 460 Comparative Psychology (3)** Behavior from standpoint of phylogenetic growth and development; biological implications; comparison of different types of animals, including man.
Effective: Spring 2007
Prerequisite: PSYCH 100; PSYCH 260
- PSYCH 461 Advanced Conditioning and Learning (3)** An examination of basic learning processes that have been determined within the context of classical, instrumental, and operant learning situations.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH
- PSYCH 462 Physiological Psychology (3)** Study of the biological bases of behavior and experience, including the anatomy and physiology of the brain and nervous system.
Effective: Spring 2007
Prerequisite: PSYCH 100; PSYCH 260 or 3 credits of BIOL
- PSYCH 463 Developmental Biopsychology (3)** Developmental neuroanatomy and neurophysiology of vertebrates as they relate to behavior; emphasis on early postnatal development of birds and mammals.
Effective: Spring 2007
Prerequisite: PSYCH 260
- PSYCH 464 Behavior Genetics (3)** Survey of gene mechanisms and gene-environment interactions in the determination of behavior; emphasis on deviant human behavior.
Effective: Spring 2008
Prerequisite: PSYCH 100; ANTH 021, BI SC 002, BIOL 133 or BIOL 222
- PSYCH 470 Abnormal Psychology (3)** Causes, dynamics, symptoms, and treatment of neuroses, psychoses, personality disorders, and other psychological disorders of adulthood.
Effective: Spring 2007
Prerequisite: PSYCH 100; PSYCH 238, PSYCH 243 or PSYCH 270
- PSYCH 471 Psychology of Adjustment and Social Relationships (3)** Theory and application of psychological principles to problems in personal and social adjustment.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH
- PSYCH 473 Behavior Modification (3)** Principles of advanced behavior modification techniques.
Effective: Spring 2007
Prerequisite: PSYCH 100 6 additional credits of PSYCH
- PSYCH 474 Psychological Intervention in Childhood (3)** Psychology of personal relationships in school situations.
Effective: Spring 2007
Prerequisite: PSYCH 100; PSYCH 212, PSYCH 238, PSYCH 243 or PSYCH 270
- PSYCH 475 Psychology of Fear and Stress (3)** Description and evaluation of major trends in research on stress and fear in humans and other animals.
Effective: Spring 2007
Prerequisite: PSYCH 100 3 credits of BIOL statistics PSYCH 200 or STAT 200
- PSYCH 476 Child Psychopathology (3)** Etiology, diagnosis, and facilitation of adjustment of the mentally retarded, gifted, physically handicapped, and emotionally disturbed child.
Effective: Spring 2007
Prerequisite: PSYCH 100; PSYCH 212, PSYCH 238, PSYCH 243 or PSYCH 270
- PSYCH 477 Mental Health Practicum with Children (3)** Overview of interventions for children at risk for mental health disorders; emphasis on intervention strategies, program evaluation, and applied skills.
Effective: Spring 2007

Prerequisite: PSYCH 100 permission of program

PSYCH 478 Clinical Neuropsychology (3) Overview of functional human neuroanatomy and clinical neuropsychology, with emphasis on origin, assessment, and treatment of human brain damage.

Effective: Spring 2007

Prerequisite: PSYCH 100, PSYCH 260

PSYCH 479 (US) (WMNST 471) The Psychology of Gender (3) Theories and research on gender differences and gender roles. Emphasis on women's and men's current positions in society.

Effective: Spring 2007

Prerequisite: PSYCH 100, PSYCH 221

PSYCH 481 Introduction to Clinical Psychology (3) Diagnostic procedures, treatment approaches, occupational settings, and ethical considerations relevant to the profession of the clinical psychologist.

Effective: Spring 2007

Prerequisite: PSYCH 100; PSYCH 238, PSYCH 243 or PSYCH 270

PSYCH 482 Selection and Assessment in Organizations (3) Background in personnel testing, performance measurement, selection strategies, with emphasis on validity and measurement reliability.

Effective: Spring 2007

Prerequisite: PSYCH 100, PSYCH 200 or STAT 200, PSYCH 281

PSYCH 484 Work Attitudes and Motivation (3) Survey of theory and research with respect to attitudes, morale, and motivation of employees and management.

Effective: Spring 2007

Prerequisite: PSYCH 100; PSYCH 200 or STAT 200 or 6 credits of GQ

PSYCH 485 Leadership in Work Settings (3) Review of research and application of behavior principles in the areas of management and supervision.

Effective: Spring 2007

Prerequisite: PSYCH 100; PSYCH 281 or 3 credits MGMT

PSYCH 490 Senior Seminar in Psychology (3) Capstone experience for senior psychology majors; review of current research literature; topics vary.

Effective: Spring 2007

Prerequisite: PSYCH 301W 6 credits 400-level PSY senior Psychology major

PSYCH 491H Honors Thesis (3) An opportunity to pursue an advanced research thesis or project to integrate studies within psychology.

Effective: Spring 2007

Prerequisite: HONOR 301H senior standing and permission of the program

PSYCH 492 Current Topics in Psychology (3) Current topics addressing significant contemporary developments in psychology.

Effective: Spring 2007

Prerequisite: PSYCH 100

PSYCH 493 Senior Thesis (3-6) Supervised senior thesis research in psychology.

Effective: Spring 2007

Prerequisite: approval of a thesis adviser in the department seventh-semester standing

PSYCH 494 Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2007

PSYCH 494H Research Projects (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

PSYCH 495 Internship (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Summer 1998

Prerequisite: prior approval of proposed assignment by instructor

PSYCH 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1985

PSYCH 496A MCE/Wise Coordinator/Counselor (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 2011 Ending: Summer 2011

PSYCH 496A Intervention of Risky Behavior (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PSYCH 496B **Family Factors and Adolescent Adjustment** (6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PSYCH 496C **Teaching Assistant PSYCH 100H** (1-6) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PSYCH 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1991

PSYCH 497A (S PSY 497A) **Child Development, Health and Education in Nepal** (3) This course will educate students about the impact of demographic factors, economic indicators, educational access, social expectations on child health, academic and socio-emotional competencies.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

PSYCH 499 (IL) **Foreign Studies** (12) Courses offered in foreign countries by individual or group instruction.
Effective: Spring 2007

Last Import from UCM: June 16, 2011 3:00 AM

Public Administration (P ADM)

P ADM 401 Introduction to Homeland Security (3) This course provides foundational knowledge about homeland security, including policy, organization, and legal issues in the American context.
Effective: Summer 2008

P ADM 404 Homeland Security and Defense in Practice (3) This course analyzes, evaluates, and critiques homeland security plans in practice.
Effective: Summer 2008
Prerequisite: P ADM 401

P ADM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Summer 1993

P ADM 500 Public Organization and Management (3) Development of basic concepts and issues in public administration; administrative theory and public policy processes.
Effective: Spring 2003

P ADM 502 Governmental Fiscal Decision Making (3) Nature, function, and technique of governmental budgeting viewed as mechanism for allocating resources among alternative public uses.
Effective: Spring 2003
Prerequisite: P ADM 500

P ADM 503 (H ADM 503) Research Methods (1-3) Examination of research methodologies relevant to administration, planning, and public policy.
Effective: Spring 2006
Prerequisite: 3 credits statistics or permission of program and a demonstrated working knowledge of SPSS

P ADM 505 Human Resources in the Public and Nonprofit Sectors (3) Concepts and approaches contributing to effective use of human resources in public and non-profit organizations; legal issues and requirements.
Effective: Spring 2002
Prerequisite: P ADM 500

P ADM 506 (H ADM 506) Management Information Systems for Public and Health Administration (3) The design, implementation, and purpose of computerized management information systems in public and non-profit organizations.
Effective: Spring 2003

P ADM 507 Introduction to Public Policy Analysis (3) Introduction to the analysis of public policy within its organizational and political contexts, including an emphasis on an economic perspective.
Effective: Summer 2004
Prerequisite: 3 credits of American government and 3 credits of basic economics

P ADM 510 (H ADM 510) Organizational Behavior (3) Examination of concepts of human behavior in formal organizations, systems analysis, conceptual models, and decision processes.
Effective: Spring 2003

P ADM 511 Organizational Change and Development (3) Theory of organizational change and development; case analysis of applications in actual situations.
Effective: Spring 2003
Prerequisite: H ADM 510 or P ADM 510

P ADM 512 Issues in Human Resources (3) A survey of major human resource issues such as job stress, burnout, and the many forms of discrimination in organizations.
Effective: Spring 2003
Prerequisite: P ADM 505 ; and H ADM 510 or P ADM 510

P ADM 514 Public Organization and Managerial Consultation (3) This course will review the theories, approaches, methods, and expected outcomes of organization and management consultation.
Effective: Spring 2003
Prerequisite: P ADM 500 and either H ADM 510 or P ADM 510

P ADM 515 (MNGMT 515) Labor Management Relations (3) Labor relations issues; collective bargaining agreement, negotiations, and administration; legal framework of collective bargaining; labor relations in larger social context.
Effective: Spring 2003 Ending: Summer 2011
Prerequisite: P ADM 505

P ADM 515 (MNGMT 515) Labor Management Relations (3) Labor relations issues; collective bargaining agreement, negotiations, and administration; legal framework of collective bargaining; labor relations in larger social context.
Effective: Fall 2011 Future: Fall 2011
Prerequisite: admission to MBA/MSIS Program

P ADM 516 **Strategic Planning** (3) A survey of strategic planning purposes, approaches and methods, and expected outcomes in small and large organizations.

Effective: Summer 1999

Prerequisite: P ADM 500

P ADM 517 **Nonprofit Organizations: History and Evolution** (3) A study of the history, development and current role of nonprofit organizations as a distinguishing feature of American society.

Effective: Spring 2003

Prerequisite: Permission of Program.

P ADM 518 **Nonprofit Organizations: Management and Leadership** (3) A study of the theoretical and practical issues involved in management and leadership of nonprofit organizations.

Effective: Spring 2003

Prerequisite: Permission of Program.

P ADM 519 **Nonprofit Organizations: Resource Development and Management** (3) Process by which nonprofit organizations assure that resources are obtained and used effectively and efficiently toward the achievement of objectives.

Effective: Summer 2003

P ADM 522 **Government Financial Management** (3) Theories and techniques of financial planning and control, with emphasis on their application in government and nonprofit agencies.

Effective: Spring 2003

Prerequisite: P ADM 502

P ADM 523 **Governmental and Nonprofit Accounting** (3) Accounting, reporting, and auditing principles and procedures for public sector agencies and nonprofit organizations.

Effective: Summer 1998

Prerequisite: P ADM 502

P ADM 524 **Administrative Law** (3) Statutory and judicial controls upon administrative discretion. Administration of rule making, rate setting, licensing, adjudication. Judicial review and citizen advocacy.

Effective: Spring 2003

Prerequisite: P ADM 500

P ADM 531 **Environmental Policy** (3) The course examines contemporary environmental and natural resources policies at every level within the United States government and at the global level.

Effective: Spring 2003

P ADM 532 **Urban Government** (3) Administrative processes and policy problems associated with managing urban communities; political, intergovernmental, fiscal, structural, and analytical concepts in urban government.

Effective: Winter 1978

P ADM 533 **Local Planning Law and Administration** (3) Structure and function of local and regional government from perspective of local planning law and its administration.

Effective: Spring 2003

Prerequisite: P ADM 500

P ADM 534 **Managing Economic Development** (3) Theoretical and operational aspects of economic development emphasizing the role of local and regional government.

Effective: Spring 2003

Prerequisite: permission of program

P ADM 535 **Policy Analysis and Planning** (3) The course will cover the theoretical issues in and basic methods of policy analysis and planning (prospective policy analysis).

Effective: Summer 2004

Prerequisite: P ADM 503

P ADM 550 **Policy and Program Evaluation** (3) The course will cover the theoretical issues in and basic methods of policy and program evaluation (retrospective policy analysis).

Effective: Spring 2005

Prerequisite: P ADM 503

P ADM 554 **Master's Project** (1-3) Student independently executes an applied professional or research project involving the analysis of a management or a public policy problem.

Effective: Winter 1981

Prerequisite: P ADM 503

P ADM 556 **State Government Administration** (3) Study of structures, systems, processes, problems, and issues affecting state government administration; case studies, field observations, and research.

Effective: Spring 2003

Prerequisite: P ADM 500

P ADM 557 **Federalism and Intergovernmental Relations** (3) Study of the impact of a federal system of government on the administration of public functions. National-state-local dimensions.

Effective: Spring 2003

Prerequisite: P ADM 500

P ADM 558 **Legislative Processes** (3) Legislatures in American government, emphasizing comparative state legislatures: constitutional patterns; organization, administration; interaction with bureaucracy, constituencies, and organized interests.

Effective: Spring 2003
Prerequisite: P ADM 500

P ADM 570 **Scope and Methods of Public Administration** (3) Examination of theoretical approaches to public administration and the role of theory in the field.

Effective: Spring 2005
Prerequisite: P ADM 500, P ADM 503, P ADM 507, P ADM 510

P ADM 571 **Seminar in Organizational Theory** (3) Selected theories of organizations and their applications to the study of public organizations.

Effective: Spring 1988
Prerequisite: P ADM 570

P ADM 572 **Research and Theory in Political Institutions** (3) Selected research paradigms and their application in the study of political institutions.

Effective: Spring 1988
Prerequisite: P ADM 570

P ADM 573 **Research and Theory in Public Policy and Governance** (3) An introduction to policy analysis, the stages of the policy process, and key theoretical issues. applications to real world problems.

Effective: Spring 2005
Prerequisite: P ADM 570 or permission of program

P ADM 574 **Research and Theory in Public Management** (3) Theoretical and empirical bases for selected functions of public managers.

Effective: Spring 1988
Prerequisite: P ADM 570

P ADM 575 **Advanced Research Design** (3) Experimental, quasi-experimental, survey, aggregate, and other research designs applied to organizational, managerial, and policy analysis research problems.

Effective: Spring 1988
Prerequisite: P ADM 570

P ADM 576 **Multivariate Statistical Methods** (3) Multivariate statistical methods, with special emphasis on their use in organizational, managerial, and policy analysis research settings.

Effective: Spring 1988
Prerequisite: P ADM 575

P ADM 577 **Design for Effective Public/Nonprofit Organizations: Seminar in Advanced Organization Theory** (3) Theories, research, and process of designing effective organizations.

Effective: Spring 2005
Prerequisite: P ADM 570 and P ADM 571 or permission of program

P ADM 578 **Topics in Policy Analysis and Governance** (3) Topics in policy analysis and governance, culminating in a substantial research paper.

Effective: Summer 2004
Prerequisite: P ADM 570 and P ADM 573

P ADM 579 **Public Leadership and Ethics** (3) Examination of theory and research in leadership and public ethics, and their application to the field of Public Management.

Effective: Summer 2004
Prerequisite: P ADM 570 and P ADM 574 or permission of program

P ADM 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.

Effective: Spring 1987

P ADM 591 **Readings in Public Administration** (3) Directed readings in selected areas of public administration.

Effective: Spring 1999
Prerequisite: P ADM 570 and permission of program

P ADM 594 **Research Topics** (1-18) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 1996

P ADM 595 **Internship** (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.

Effective: Summer 1995

P ADM 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

P ADM 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered

infrequently; several different topics may be taught in one year or term.
Effective: Spring 1987

P ADM 600 **Thesis Research** (1-15) No description.
Effective: Spring 1990

P ADM 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 2000

P ADM 801 (HLS 801) **Homeland Security Administration: Policies and Programs** (3) Foundation for understanding homeland security history, the development of homeland security policies and organizations, and current management approaches.
Effective: Summer 2010

P ADM 802 **Multifaceted Approaches to Homeland Security** (3) Examination of the roles of the public and private sectors and the military in preparing, mitigating, and responding to disasters.
Effective: Fall 2008
Prerequisite: P ADM 401

P ADM 803 **Strategic Planning and Organizational Imperatives in Homeland Defense and Security** (3) The Homeland Security framework depends on strategic planning and organization. This course examines the key issues associated with these.
Effective: Fall 2008
Prerequisite: P ADM 401

P ADM 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2007

P ADM 897A **Public Administration Research Topics** (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Summer 2011 Ending: Summer 2011

Last Import from UCM: June 16, 2011 3:00 AM

Public Health Preparedness (PHP)

PHP 410 (HLS 410) **Public Health Preparedness for Disaster and Terrorist Emergencies I** (3) Analyzes the history of terrorism and explores the preparation and response to specific terrorist threats, natural disasters, and conventional catastrophes.

Effective: Fall 2010

Prerequisite: Undergraduate Students BIOL 011 and BIOL 012 or CHEM 110 and CHEM 111 or MICRB 106 and MICRB 107 ; Graduate Students - Enrollment in the MHS program the Post- Baccalaureate Credit Certificate in Homeland Security or permission from the instructor.

PHP 510 (HLS 510) **Public Health Preparedness for Disaster and Terrorist Emergencies II** (3) A public health perspective on the preparation necessary to develop a coordinated response to a disaster or terrorist emergency.

Effective: Fall 2010

Prerequisite: permission of the instructor

PHP 527 (HLS 527) **Public Health Evaluation of Disasters and Bioterrorism** (3) Introduces students to the design of exposure assessment and health effect studies applicable to disasters and terrorism.

Effective: Spring 2011

Prerequisite: HLS 510 or permission of the instructor

PHP 530 (HLS 530) **Critical Infrastructure Protection of Health Care Delivery Systems** (3) Investigates the impact that terrorist incidents may have on healthcare facilities or their ability to deliver healthcare services.

Effective: Spring 2011

Prerequisite: HLS 510 permission of the instructor

PHP 553 (CAS 553, HLS 553) **Disaster Communication** (3) This seminar provides students with a comprehensive understanding of the multifaceted nature of disaster communication across phases of a disaster.

Effective: Fall 2010

PHP 558 (PSY 558, HLS 558) **Disaster Psychology** (3) Explores psychological impact of disasters and terrorist attacks on victims, families, rescuers, and society and methods of reducing negative effects.

Effective: Fall 2010

Prerequisite: HLS 510 or permission of the instructor

PHP 594 (HLS 594) **Research Topics** (1-15) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2011

Prerequisite: Completion of at least 15 credits in the program including HLS 510 and HLS 527 or permission of the instructor

Last Import from UCM: June 16, 2011 3:00 AM

Public Policy (PUBPL)

PUBPL 415 (CRIMJ 415) Drug Control Policy in Comparative Perspective (3) Examines the history of drug control policy in the United States; comparisons and contrasts with other countries' experiences.

Effective: Summer 2004

Prerequisite: CRIMJ 200 orPL SC 001 orPL SC 014 orSOC 001

PUBPL 419 Western Constitutional Traditions (3) This course reviews the major political, economic and social movements that shaped the development of the US Constitution.

Effective: Summer 2011

Prerequisite: HIST 001, HIST 002, I HUM 311, PL SC 001, PUBPL 420 orPUBPL 421

PUBPL 475 Critical Infrastructure Protection (3) This course provides knowledge about protection of critical infrastructure as an aspect of homeland security.

Effective: Summer 2011

Prerequisite: 5th semester standing

PUBPL 480 Seminar in Urban Policy (3) Work in this course will focus upon governmental institutions and public policy problems in metropolitan areas.

Effective: Fall 1998

Prerequisite: seventh-semester standing

PUBPL 481 Seminar in Environmental Policy (3) Fundamentals of evolution; impacts on natural resources; interaction of environmental issues, current decision-making process policy, enforcement mechanisms; future actions.

Effective: Fall 1983

Prerequisite: seventh-semester standing

PUBPL 482 Seminar in Health Policy (3) Introduction to policy analysis of issues of current interest and importance to public administrators in the health industry.

Effective: Fall 1983

Prerequisite: seventh-semester standing

PUBPL 483 Seminar in National Security Policy (3) Course will examine the inter-relationship of foreign, military and economic policy.

Effective: Fall 1983

Prerequisite: seventh-semester standing

PUBPL 485 Seminar in Welfare Policy (3) Course examines the origins, development, and impact of welfare programs.

Effective: Fall 1998

Prerequisite: seventh-semester standing

PUBPL 490 Seminar in Public Policy (3) A survey of the major policy issues, actors and institutions involved in the policy-making system of contemporary society. (May be repeated for credit.)

Effective: Fall 1983

Prerequisite: seventh-semester standing

PUBPL 495 Internship (3-12) Experience in a public service agency related to knowledge gained through academic course work, reading, and discussion.

Effective: Fall 1983

Prerequisite: seventh-semester standing

PUBPL 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Fall 1983

PUBPL 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 2010

Last Import from UCM: June 16, 2011 3:00 AM

Quality Control (Q C)

Q C 450 **Quality Control and Quality Improvement** (3) Review of quality control and improvement methods including SPC applications, acceptance sampling, regression analysis, and design of experiments.

Effective: Spring 2007

Prerequisite: MATH 141 or MATH 210

Q C 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 1992

Last Import from UCM: June 16, 2011 3:00 AM

Quality and Manufacturing Management (QMM)

QMM 491 Introduction to Business Concepts for Manufacturing (3) Introduction to business, topics in marketing, accounting, and finance for nonbusiness students in manufacturing management.

Effective: Fall 2001

Prerequisite: students taking this course CAN NOT be a Business major and must be in their senior year

QMM 492 Introduction to Engineering Design Principles (3) Engineering principles including different engineering fields, graphics, design, solid modeling and failure analysis.

Effective: Fall 2001

Prerequisite: students taking this course CAN NOT be an Engineering major and must be in their senior year

QMM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2008

QMM 552 Applied Statistical Process Control and Experimental Design (3) Concepts and techniques of statistical process control and the design of experiments.

Effective: Fall 2008

Prerequisite: QMM 851

QMM 561 Manufacturing Systems Planning and Control I (3) Systems, components and configurations, flow of material and information in a manufacturing system.

Effective: Spring 1996

Prerequisite: admission to the QMM program

QMM 562 Manufacturing Systems Planning and Control II (3) Flow of material and information in a manufacturing system; emphasis on systems integration.

Effective: Spring 1996

Prerequisite: QMM 561

QMM 581 Manufacturing Processes of Materials (3) Characteristics of materials with respect to their properties and associated choices of processing to create a range of products.

Effective: Spring 1996

Prerequisite: admission to the QMM program

QMM 582 Manufacturing and Supply Chain Strategy (3) Strategic decision context of manufacturing and its supply chains with linkage to corporate and business strategy.

Effective: Fall 2001

Prerequisite: enrollment in the QMM program

QMM 593 Field Experience in Manufacturing (1-2) Experiential learning through the firsthand study of manufacturing plants and by interacting with manufacturing leaders.

Effective: Spring 2001

Prerequisite: admission to the Quality and Manufacturing Management (QMM) Program

QMM 596 Individual Studies (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1997

QMM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.

Effective: Spring 1997

QMM 851 Quality Management (3) Concepts of design, assessment, and improvement of quality systems; customer needs analysis, identification of opportunities for application of measurement techniques.

Effective: Fall 2008

Prerequisite: admission to the QMM program

QMM 871 Design Practice for Manufacturing I (3) Contemporary concepts in design and design practice with emphasis on engineering, business, and human strategic issues.

Effective: Fall 2008

Prerequisite: or concurrent: QMM 491 or QMM 492

QMM 872 Design Practice for Manufacturing II (3) Contemporary concepts in design and design practice with emphasis on logistics, risk, design and manufacturing readiness, and production.

Effective: Spring 2009

Prerequisite: QMM 871

QMM 891 Communication and Leadership Skills for Manufacturing Managers (1-3) Applied principles of managerial, visual, and written communication that support the needs of manufacturing leaders.

Effective: Fall 2008

Prerequisite: admission to the QMM Program

QMM 897 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Fall 2007

Last Import from UCM: June 16, 2011 3:00 AM

Quantification (QUANT)

No courses for department code **QUANT** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Radiological Sciences (RADSC)

No courses for department code **RADSC** were found. It's possible that the code has changed, there aren't any listed courses, or that the URL you're using has become mangled.

Ralrd Transp Enginer (RTE)

RTE 402 **Railroad Operations Practicum** (3) Practicum (lectures, supervised field work, laboratories) exploring practical problems in rail operations and safety.

Effective: Spring 2011

Prerequisite: RTE 303, RTE 305

RTE 403 **Railroad Track Practicum** (3) Practicum (lectures, labs, supervised field experiences) exploring the construction and repair of track.

Effective: Spring 2011

Prerequisite: RTE 302, C E 310 Concurrent: C E 333W C E 335

RTE 404 **Railroad Mechanical Practicum** (3) Practicum (lectures, labs, supervised field experiences) examining the repair of locomotives and cars.

Effective: Spring 2011

Prerequisite: RTE 303, PHYS 211, PHYS 212, E MCH 213

RTE 406 **Railroad Capstone Project** (4) Capstone project to integrate course knowledge in a team-based project.

Effective: Spring 2011

Prerequisite: C E 333W, RTE 305, RTE 402, RTE 403, RTE 404, C E 332 7th semester standing

RTE 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2011

RTE 495 **Internship** (1-18) Supervised off-campus, nongroup instruction including field experiences, practica, or internships. Written and oral critique of activity required.

Effective: Spring 2011

RTE 496 **Independent Studies** (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Spring 2011

RTE 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2011

RTE 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Spring 2011

Last Import from UCM: June 16, 2011 3:00 AM

Real Estate (R EST)

R EST 420 Analysis of Real Estate Markets (3) Historical performance, land use issues, market valuation, real estate development, public policy issues.

Effective: Summer 2005 Ending: Fall 2011

Prerequisite: R EST 301 or R EST 460 or R EST 470

R EST 424 (B LAW 424) Real Estate Law (3) Analysis of contemporary law applicable to various types of ownership interests and rights, methods of transferring ownership, and use of real property.

Effective: Spring 2005 Ending: Summer 2011

Prerequisite: B LAW 346

R EST 424 (B LAW 424) Real Estate Law (3) Analysis of contemporary law applicable to various types of ownership interests and rights, methods of transferring ownership, and use of real property.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Prerequisite: B LAW 441

R EST 425 (B LAW 425) Environmental Law, Property, and Commerce (3) Examines the impacts of major federal environmental laws on business relations and property interests.

Effective: Summer 1995 Ending: Fall 2011

Prerequisite: B A 243, B LAW 243 or E R M 151

R EST 450 Urban Property Rights and Land Use Issues (3) International perspectives on real estate as property, evaluation of land use regulations, and differences in real estate markets across countries.

Effective: Spring 2011 Ending: Fall 2011

Prerequisite: B A 301 or FIN 301

R EST 460 (FIN 460) Real Estate Financial Analysis (3) Debt and equity financing capital structure, "creative financing," risk analysis, corporate asset management.

Effective: Summer 2005 Ending: Fall 2011

Prerequisite: FIN 305W

R EST 470 (FIN 470) Real Estate and Capital Markets (3) Analysis of publicly-traded real estate of both the equity, (REITs) and debt (MBSs) sides. The course also provides international perspectives.

Effective: Summer 2005 Ending: Fall 2011

Prerequisite: FIN 305W

R EST 494H Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007 Ending: Fall 2011

R EST 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983 Ending: Fall 2011

R EST 497A Real Estate Case Competitions (2) This course provides skills and expertise in analyzing actual real estate cases in preparation for national case competitions.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

R EST 510 Real Estate Financial Analysis (3) Real estate finance and investment analysis. Topics include housing; demand and supply of credit, and real estate investment strategies.

Effective: Fall 1983

R EST 515 (I B 515) Property Rights in a Global Economy (2) Analysis of economic, financial, legal, and political factors affecting international real estate decision making.

Effective: Spring 2009

R EST 525 Environmental Law (3) Analysis of legal, economic, and social factors affecting the environmental quality of real property and its associated rights.

Effective: Spring 1998

R EST 540 Real Estate Financial Analysis II (3) Theories and methods of advanced real estate financial analysis.

Effective: Summer 1995

R EST 560 Real Estate Financial Analysis (2) This course provides a modern framework for the valuation and analysis of real property using both theoretical and empirical approaches.

Effective: Summer 2002

Prerequisite: B A 531

R EST 570 Institutional Real Estate Investment (2) A survey of the latest developments of real estate as an institutional

investment.

Effective: Summer 2002

Prerequisite: B A 531

R EST 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 1987

R EST 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.

Effective: Spring 1987

R EST 599 (IL) **Foreign Study--Real Estate** (1-12) Full-time graduate-level foreign study at an overseas institution with whom linkages have been established.

Effective: Summer 2005

Prerequisite: acceptance in established exchange program

R EST 600 **Thesis Research** (1-15) No description.

Effective: Fall 1983

R EST 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Spring 2005

R EST 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) No description.

Effective: Summer 1985

R EST 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Recreation, Park and Tourism Management (RPTM)

RPTM 410 Marketing of Recreation Services (3) Theoretical/practical application of marketing/advertising strategies in the development/delivery of recreation services.

Effective: Spring 2005

Prerequisite: fifth-semester standing or above

RPTM 415 Commercial Recreation Management (3) Planning, developing, and managing profit-oriented recreation opportunities.

Effective: Spring 2005

Prerequisite: RPTM 210 and RPTM 410

RPTM 425 Principles of Interpretive Materials (3) Principles, practices, application of non-personal interpretive activities common to natural/cultural history, including exhibits, audio-visual and illustrative materials.

Effective: Spring 2005

Prerequisite: RPTM 325

RPTM 430 Environmental Education Methods and Materials (3) Methods and materials for developing, implementing, and evaluating environmental education programs within formal and non-formal educational settings.

Effective: Summer 2011

Prerequisite: AEE 100 or RPTM 325

RPTM 433W Program Evaluation and Research in Recreation Services (3) Systematic, structured problem-solving process for decision making in recreation and parks. Research techniques/evaluation procedures; quantitative, qualitative methodologies; deductive, inductive reasoning.

Effective: Spring 2005

Prerequisite: RPTM 356 3 credits in statistics

RPTM 435 Recreation Facilities Planning and Management (3) Planning and management of selected facilities with emphasis upon maintenance, activity, and support provisions.

Effective: Spring 2005

Prerequisite: fifth-semester standing or above

RPTM 440 Adventure-based Programming and Administration (3) Utilization of wilderness/backcountry environments and participant challenge; history, models, theories; survey of organizations; program design, administration; and issues.

Effective: Spring 2005

Prerequisite: or concurrent: RPTM 330 or RPTM 356

RPTM 460 Political and Legal Aspects of Recreation Services (3) Role of local, state, federal government in provision of recreation services. Legislative and judicial systems.

Effective: Spring 2005

Prerequisite: RPTM 101

RPTM 470 Recreation and Park Management (3) Management of recreation and park services in public/non-profit settings; planning, budgeting fiscal development, resources allocation, decision-making, computer applications.

Effective: Spring 2005

Prerequisite: RPTM 320

RPTM 476 Leisure Education in Therapeutic Recreation (3) Theoretical and practical application of leisure education in the therapeutic recreation process.

Effective: Spring 2005

Prerequisite: RPTM 277 and RPTM 386

RPTM 480 Senior Management Seminar (1) Current management issues will be examined relative to professional management strategies, ethics, and leadership in leisure services.

Effective: Spring 2005

Prerequisite: sixth-semester standing in RPTM

RPTM 486 Facilitation Techniques in Therapeutic Recreation (3) Intervention strategies, therapeutic approaches, and group facilitation techniques in therapeutic recreation.

Effective: Summer 2011

Prerequisite: RPTM 386

RPTM 490 Management and Issues in Therapeutic Recreation Services (3) Topics related to management and professional issues in therapeutic recreation services in both clinical and community settings.

Effective: Summer 2011

Prerequisite: RPTM 386

RPTM 494H Senior Honors Thesis (1-6 per semester/maximum of 6) Senior Honors Thesis

Effective: Summer 2011

RPTM 495A Internship in Recreation Services (12) Meet educational objectives through participation in organized practical experience; direct observation and professional supervision in full-time work experience.

Effective: Spring 2005

Prerequisite: RPTM 394 ; seventh-semester standing; 300 hours practical experience; and a 2.0 grade-point average; current and valid certification in advanced first aid and cardiopulmonary resuscitation

RPTM 495B Internship in Golf Management (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings.
Effective: Spring 2005
Prerequisite: RPTM 395B ; 2.00 cumulative grade point average; current and valid certification in advanced first aid and cardiopulmonary resuscitation

RPTM 495C Internship in Golf Management (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings.
Effective: Spring 2005
Prerequisite: RPTM 495B ; 2.00 cumulative grade point average

RPTM 495D Internship in Golf Management (1-4) Observation and participation under supervision in golf operations in public, private, municipal, or military settings.
Effective: Spring 2005
Prerequisite: RPTM 495C ; 2.00 cumulative grade point average

RPTM 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2005

RPTM 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2005

RPTM 497A Sport Tourism (3) The primary objective of this course is to provide students with an overview of the continuously expanding niche market of sport tourism with a focus on the historical influences, economic aspects, and sport-specific starting points. This course explores marine tourism, winter sport tourism, golf tourism, sport event tourism, and spa tourism; Sport related travel such as health/medical and adventure are also investigated. Supplemental objectives of this course are to (a) synthesize the social and economic impacts of a mass sporting event and (b) explore the impact of the internet on the sport tourism industry with regard to both spectators and participants who travel for sport.
Effective: Summer 2011 Ending: Summer 2011

RPTM 497B Introduction to Arena Management (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 2011 Ending: Summer 2011

RPTM 497B Introduction to Arena Management (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 497C Outdoor Consortium (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

RPTM 497D Ecological Investigations (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 497E Event Planning (3) The course covers a broad overview of the processes involved in planning and implementing meetings, special events, and conferences by focusing on the basic procedures of developing, planning, coordinating, implementing and evaluating. Throughout the course, we will identify the skill set of the successful Meeting and Event Professional, as well as how meetings and events fit in the grand scheme of modern business.
Effective: Summer 2011 Ending: Summer 2011

RPTM 497E Outdoor and Experiential Education (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 497F National Curricula Workshop (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 497F National Curricular Workshops (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

RPTM 497F National Curricula Workshop (1-2 per semester/maximum of 2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 497I Canoeing Leadership (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 497I Canoeing Leadership (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

RPTM 497I Canoeing Leadership (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 497K Administrative Golf Operation III (1) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 497K Discovery Trip (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

RPTM 497S Economics of Sport Tourism (3) Students in this course will examine the principles of tourism, the growth of the industry, and the importance of tourism to local, state and national economics. Students will explore the impact of television and the internet on the Tourism industry, and take an in-depth look at the consumers who travel for sport and recreational opportunities.

Effective: Summer 2011 Ending: Summer 2011

RPTM 498 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2006

RPTM 498B Wilderness First Responder (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

RPTM 498C National Association of Interpretation Certification Class (1-3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

RPTM 498D Backpacking Leadership (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 498D Back Packing Leadership (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

RPTM 498D Backpacking Leadership (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 498F Rock Climbing Leadership (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 498F Rock Climbing Leadership (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

RPTM 498F Rock Climbing Leadership (3) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Fall 2012 Ending: Fall 2012 Future: Fall 2012

RPTM 501 Leisure Studies Foundations (3) This course provides general background knowledge about the literature and

research methods central to the field of leisure studies.
Effective: Spring 2008

RPTM 510 Tourism Behavior: An interdisciplinary Approach (3) An exploration of the various approaches that have been taken in the social sciences to understand tourism behavior.
Effective: Spring 2008
Prerequisite: 3 credits in statistics; 3 credits in behavioral science

RPTM 515 Program Development and Evaluation (3) Critical analysis of political and social determinants of recreation program development; research and evaluation procedures.
Effective: Spring 2008

RPTM 525 Behavioral Patterns of the Outdoor Recreationist (3) Patterns of time and space use; user characteristics; meaning of participation; facilitation of environment-use enhancement.
Effective: Spring 2008

RPTM 527 Social Psychology of Leisure (3) Application of the methods, constructs, and theory of social psychology to the study of leisure, outdoor recreation, and therapeutic recreation.
Effective: Spring 2008
Prerequisite: PSYCH 420, SOC 403

RPTM 530 Research Methods in Leisure Studies (3) Research techniques, including methods, research design, techniques for data collection, as applied to relevant problems in the leisure studies field.
Effective: Spring 2008

RPTM 533 Leisure Studies, Surveys, and Appraisals (3) Advanced procedures related to leisure, recreation, and park research.
Effective: Spring 2008
Prerequisite: RPTM 530 ; 3 credits in statistics

RPTM 540 Public and Private Recreation Lands and Waters (3) Public and private roles and interactions, allocation of resources, use policies, open space concepts, private enterprise developments, legal controls.
Effective: Spring 2008

RPTM 545 Philosophical and Social Bases of Leisure (3) Philosophical and social bases of leisure; analysis of critical issues of leisure for philosophical and social implications.
Effective: Spring 2008

RPTM 550 Seminar in Leisure Studies (1-6) No description.
Effective: Spring 2008

RPTM 560 Administrative Problems of Leisure Service Organizations (3) Special problems of recreation and park departments; legal powers and liability; departmental organization, financing, personnel policies, and staff development.
Effective: Spring 2008

RPTM 570 Conceptual Bases for Therapeutic Recreation (3) Issues in the application of concepts in therapeutic recreation from a multidisciplinary perspective; evaluation and research.
Effective: Spring 2008
Prerequisite: R P M 477

RPTM 590 Colloquium (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 2008

RPTM 596 Individual Studies (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 2008

RPTM 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Spring 2008

RPTM 597A Foundations of Tourism (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 597C Leisure & Culture (3) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or term.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RPTM 600 **Thesis Research** (1-15) No description.
Effective: Spring 2008

RPTM 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Spring 2008

RPTM 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Supervised experience in teaching and orientation to other selected aspects of the profession at The Pennsylvania State University.
Effective: Spring 2010

RPTM 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Spring 2008

RPTM 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Spring 2008

Last Import from UCM: June 16, 2011 3:00 AM

Rehabilitation (REHAB)

REHAB 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Fall 2003

Last Import from UCM: June 16, 2011 3:00 AM

Rehabilitation and Human Services (RHS)

RHS 400W Case Management and Communication Skills (3) Principles and practices of obtaining, recording, evaluating, and utilizing case data in rehabilitation planning; implementation of rehabilitation plans.

Effective: Spring 2009

Prerequisite: RHS 300

RHS 401 Community Mental Health Practice and Services (3) Community mental health roles, historical points, current trends, and ethical standards; funding and impact on service provision.

Effective: Spring 2009

Prerequisite: 6 credits in psychology and/or sociology

RHS 402 Children and Families in Rehabilitation Settings and Human Services (3) Contemporary family issues, child development, legal considerations, cultural and familial factors within rehabilitation and human services practice will be addressed.

Effective: Summer 2008

Prerequisite: RHS 301

RHS 403 Medical Aspects of Disability (3) Common disabling illnesses, injuries, and congenital defects; their symptomatology, prognosis, and treatment; implications for personal, social, and vocational adjustment.

Effective: Spring 2009

Prerequisite: 6 credits in psychology and/or sociology

RHS 495A Rehabilitation and Human Services Internship (15) Full-time practicum in rehabilitation and related human services agencies and institutions providing psychosocial, vocational, educational, and/or residential services to people with disabilities.

Effective: Spring 2009

Prerequisite: students must have successfully completed all other required coursework for the major (grade of "C" or higher) as well as fulfilled general education requirements.

RHS 496 Independent Studies (1-18) Creative projects, including research and design, that are supervised on an individual basis and that fall outside the scope of formal courses.

Effective: Summer 2008

RHS 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.

Effective: Summer 2008

RHS 497A Rehabilitation in Corrections (3) An overview of rehabilitation in different correctional settings focusing on the history, classification, risk assessment, intervention strategies and community reentry.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RHS 497B Introduction to Substance Dependence (3) An overview of drugs and alcohol use in society from biological, sociological, and psychological perspectives.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

Last Import from UCM: June 16, 2011 3:00 AM

Religious Studies (RL ST)

RL ST 400 **Theories of Religion** (3) Comparative and interdisciplinary study of two or more systematic theories of religion: anthropological, psychological, sociological, philosophical/theological.
Effective: Fall 1983

Prerequisite: 6 credits in religious studies or seventh-semester standing

RL ST 407Y (IL) (HIST 409Y, J ST 409Y) **European Anti-Semitism from Antiquity to the Present** (3) Surveys the history of anti-Semitism in Europe from antiquity through the Middle Ages to the present.

Effective: Summer 2005

RL ST 408 (US;IL) **Hindu Studies** (3) Special topics in Hindu studies.

Effective: Summer 2005

Prerequisite: 3 credits in religious studies

RL ST 409 (US;IL) **Buddhist Studies** (3) Special topics in Buddhist studies.

Effective: Spring 2006

Prerequisite: 3 credits in religious studies

RL ST 410 (US;IL) (HIST 410, J ST 410) **Jews in the Medieval World** (3) Trends in medieval Jewish society under Islam and Western Christendom.

Effective: Spring 2006

RL ST 411 (US;IL) (J ST 411) **Jewish Studies** (3) Study of the life and thought of a particular period or movement in the history of Judaism.

Effective: Spring 2006

Prerequisite: 3 credits in religious studies

RL ST 412 (J ST 412) **American Judaism** (3) The development of Jewish religion and culture in America from the colonial era to the present.

Effective: Summer 1999

Prerequisite: HEBR 010 or J ST 010

RL ST 414 (PSYCH 436) **Humanistic, Existential, and Religious Approaches to Psychology** (3) Existential, humanistic, and religious approaches to the psychology of experience, consciousness, and will.

Effective: Spring 2007

Prerequisite: PSYCH 100 or RL ST 001

RL ST 420 **Major Christian Thinkers** (3) Systematic inquiry into the religious thought of one or more Christian thinkers, such as Paul, Augustine, Luther, Calvin, Kierkegaard, or Tillich.

Effective: Fall 1983

Prerequisite: 3 credits in religious studies

RL ST 422 (AM ST 422) **Religion and American Culture** (3 per semester/maximum of 6) Selected topics, problems, or historical movements in American religion. Relation between religion and American culture.

Effective: Summer 1996

RL ST 424H (HIST 424H, J ST 424H, PHIL 434H) **Monotheism and the Birth of the West** (3) The birth of monotheism and its relation to social organization, the idea of individuality, and science.

Effective: Spring 2002

Prerequisite: RL ST 004, RL ST 102, RL ST 110 or RL ST 120

RL ST 440Y (US;IL) **The Orthodox Christian Tradition** (3) History, culture, and beliefs of the Eastern Orthodox religious tradition with special reference to Russia.

Effective: Summer 2011

Prerequisite: RL ST 004, RL ST 124, RL ST 125, RUS 100 or RUS 110

RL ST 461 (US;IL) (SOC 461) **Sociology of Religion** (3) Contemporary religion in the United States: beliefs, structure, and function of major denominations and religious cults.

Effective: Spring 2006

Prerequisite: 3 credits of sociology or religious studies

RL ST 471Y (IL) (HIST 471Y) **Classical Islamic Civilization, 600-1258** (3) Pre-Islamic Arabia; Muhammad; Arab conquest; Islamic beliefs and institutions; literary, artistic, and scientific achievements; relations with Europe; breakdown of unity.

Effective: Spring 2006

RL ST 478 (J ST 478, PHIL 478) **Ethics After the Holocaust** (3) Explores the philosophical effects of the Holocaust for thinking about the primary question: Is ethics possible?

Effective: Spring 2005

Prerequisite: one course in Jewish Studies or Philosophy

RL ST 483 (IL) **Zen Buddhism** (3) The development and current state of Zen Buddhist thought and practice.

Effective: Spring 2006

Prerequisite: HIST 172, HIST 173, HIST 174, HIST 175, PHIL 111, RL ST 003, RL ST 104 or RL ST 181

RL ST 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

RL ST 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

RL ST 495 **Internship** (1-18) Supervised off-campus, non-group instruction, including field experience, practica, or internships.

Effective: Summer 2004

Prerequisite: prior approval of proposed assignment by instructor

RL ST 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

RL ST 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

RL ST 497B (HIST 497B, J ST 497B) **German Antisemitism from the Middle Ages to the Holocaust** (3) German and Jewish history are interpreted in an integrated approach which examines the fundamental problem of continuity through the lens of antisemitism.

Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

RL ST 499 (IL) **Foreign Study--Religious Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

RL ST 499C (IL) (HIST 499C, CAMS 499C, ANTH 499C) **Excavation, Survey and GIS for Archaeologists** (6) Entails excavation, intensive survey, and an introduction to GIS for archaeologists.

Effective: Summer 2011 Ending: Summer 2011

RL ST 499D (IL) (HIST 499D, ANTH 499D, CAMS 499D) **Israel Dig: Excavation, Conservation, and Public Archaeology** (6) Entails excavation, conservation, and public archaeology involved with the preservation and interpretation of Israel's archaeological sites.

Effective: Summer 2011 Ending: Summer 2011

RL ST 510 (HIST 510) **Topics in Medieval Church History** (3 per semester, maximum of 6) Institutional and doctrinal development of the Christian Church in medieval Europe.

Effective: Spring 1995

RL ST 560 (HIST 560) **Topics in American Religion** (3 per semester, maximum of 6) The social, political, and intellectual contexts of American religious thought.

Effective: Spring 1995

RL ST 561 (HIST 561) **Topics in Western Religion** (3 per semester, maximum of 6) Major issues and themes in the historical development of Christianity and Judaism.

Effective: Spring 1995

RL ST 562 (HIST 562) **Topics in Comparative Religions** (3 per semester, maximum of 6) Comparative studies of world religions.

Effective: Spring 1995

RL ST 563 (HIST 563) **Religion and Society** (3 per semester, maximum of 6) Social and political implications of religious belief and practice.

Effective: Summer 1994

RL ST 564 (HIST 564) **Topics in Asian Religions** (3 per semester, maximum of 6) Topics in Asian religions.

Effective: Spring 1995

RL ST 565 (HIST 565) **Research in Religious Studies** (3) Approaches and methodologies in the critical study of religion.

Effective: Summer 1995

RL ST 566 (HIST 566) **Islamic Studies** (3) Studies in Islamic history, historiography, theology, law, and religious life.
Effective: Spring 1997

RL ST 590 **Colloquium** (1-3) Continuing seminars which consist of a series of individual lectures by faculty, students, or outside speakers.
Effective: Spring 1987

RL ST 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

RL ST 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

RL ST 603 **Foreign Academic Experience** (1-12) Foreign study and/or research constituting progress toward the degree at a foreign university.
Effective: Spring 2002

RL ST 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

Risk Management (R M)

R M 401 Fundamentals of Private Pensions (3) Analysis of pension regulation, funding, vesting, retirement annuities under insured and self-insured plans, actuarial cost analysis, plan termination insurance.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: R M 302 or R M 320W

R M 405 Corporate Risk Management (3) Risk management for firms and organizations; loss control, risk transfer, and loss financing alternatives; Corporate employee benefit program design and financing.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: R M 302 or R M 320W

R M 410 Compound Interest and Annuities (3) Compound interest and annuity functions; equations of value; determination of yield rates; construction of tables.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: Prerequisite or concurrent: R M 301; MATH 414 or STAT 414

R M 411 Actuarial Mathematics I (3) A study of the mathematical theory of life contingencies; single-life functions and their applications.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: R M 410; STAT 414 or MATH 414

R M 412 Actuarial Mathematics II (3) Joint-life and survivor-life functions, population life tables, and multiple decrement theory, with applications to disability and retirement problems.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: R M 411

R M 415 Modeling for Actuarial Science (3) Modeling for Actuarial Science, including models of interest rates, used to price liabilities, and models of stock prices and options used to price Employee Options and Cash Balance Accounts.

Effective: Summer 2011

Prerequisite: R M 410

R M 420 Property and Casualty Insurance (3) Actuarial methods and concepts used to develop manual rates for property and casualty insurance.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: R M 320W or R M 330W

R M 424 (B LAW 424) Real Estate Law (3) Analysis of contemporary law applicable to various types of ownership interests and rights, methods of transferring ownership, and use of real property.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: B LAW 341 or B LAW 243

R M 425 (B LAW 425) Business and Environmental Regulation (3) Examines the interplay between environmental regulation and commercial activities, including property interests.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: B LAW 341 or B LAW 243

R M 430 Life and Health Insurance (3) Industrial organization of the US life-health insurance industry; economic issues related to organizational structure, operational functions, and the supply and demand for life-health products.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: R M 302 or R M 320W

R M 450 Contemporary Issues in Real Estate Markets (3) Historical performance, land use issues, market valuation, real estate development, public policy issues.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: R M 303 or R M 330W

R M 460 (FIN 460) Real Estate Financial Analysis (3) Debt and equity financing capital structure, "creative financing," risk analysis, corporate asset management.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: FIN 305W or R M 303 or R M 330W

R M 470 (FIN 470) Real Estate and Capital Markets (3) Analysis of publicly-traded real estate of both the equity, (REITs) and debt (MBSs) sides. The course also provides international perspectives.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: FIN 305W or R M 303 or R M 330W

R M 480 International Real Estate Markets (3) International perspectives on real estate as property, evaluation of land use regulations, and differences in real estate markets across countries.

Effective: Spring 2012 Future: Spring 2012

Prerequisite: R M 303 or R M 330W

R M 494 Research Project (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Spring 2012 Future: Spring 2012

R M 494H Honors Research Project (1-6) Supervised honor student research projects identified on an individual or small-group basis.

Effective: Spring 2012 Future: Spring 2012

R M 496 Independent Studies (1-18) Creative Projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Spring 2012 Future: Spring 2012

R M 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Future: Spring 2012

R M 497A Real Estate Case Competition (2) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

R M 497B Housing Markets and Housing Policy (3) This course will review the economics of housing markets, at both the local and national levels and past and current housing policies. The financial, environmental, and societal contexts of housing will be emphasized, along with housing's role in the 2007-9 crash, and policy going forward.

Effective: Spring 2012 Ending: Spring 2012 Future: Spring 2012

Prerequisite: ECON 002 or ECON 102

R M 499 (IL) Foreign Studies (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Spring 2012 Future: Spring 2012

Last Import from UCM: June 16, 2011 3:00 AM

Rural Sociology (R SOC)

R SOC 417 (CED 417) **Power, Conflict, and Community Decision Making** (3) Impact of institutions on human interdependence and behavior, the structure of power, and community decision making and public policy.

Effective: Spring 2010

Prerequisite: R SOC 011 or SOC 001

R SOC 420 (US;IL) (WMNST 420, CED 420) **Women in Developing Countries** (3) Analysis of women's work, experiences, and development policies and practices in Africa, Asia, and Latin America.

Effective: Fall 2009

R SOC 452 (CEDEV 452) **Rural Organization** (3) Social organization and change in rural communities; use of sociological principles in analysis of rural problems and rural development.

Effective: Fall 2000

Prerequisite: 6 credits in rural sociology sociology or psychology

R SOC 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

R SOC 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

R SOC 499 (IL) **Foreign Study--Rural Sociology** (1-12) Study in selected countries of rural social institutions and current rural sociological problems.

Effective: Summer 2005

R SOC 502 **Use of Theory in Rural Sociology** (3) Examine and evaluate metasociology of alternative theoretical systems applicable to rural society, with emphasis on American society.

Effective: Fall 1983

Prerequisite: 24 credits in sociology including 6 in rural sociology and 3 in sociological theory

R SOC 505 (CEDEV 505, AEE 505) **Leadership Development** (3) Exploration, understanding, and application of leadership roles, strategies, and principles in group and community settings.

Effective: Spring 2010

R SOC 508 **Sociology of Agriculture** (3) Sociological analysis of changes in the organization of agriculture and food systems in the United States and developing countries.

Effective: Summer 1992

R SOC 513 **Research Methods in Rural Social Sciences** (3) Scientific method in planning and conducting research.

Effective: Summer 2012 Future: Summer 2012

R SOC 516 (CEDEV 516) **Change in Rural Society** (3) Social change in rural society, emphasizing prediction and control of the change process. Even years.

Effective: Fall 2000

R SOC 517 (CEDEV 517) **International Rural Social Change** (3) Implications of planned change for international rural societies, considering basic structural constraints, known institutional linkages, and potential synergetic consequences.

Effective: Fall 2000

R SOC 520 (SOC 520) **Applied Sociological and Policy Research** (3) A survey of the conceptual and methodological issues in applied sociology and policy research conducted by sociologists.

Effective: Fall 2001

Prerequisite: SOC 573

R SOC 522 **Data Analysis in Rural Sociology** (1) Analysis of research data in rural sociology using computer library programs.

Effective: Fall 1987

Prerequisite: or concurrent: AG 400

R SOC 525 **Fertility, Population Change, and Development** (3) Fertility and population growth in less-developed countries; theories of fertility change, agricultural development, and population policies.

Effective: Summer 1987

Prerequisite: SOC 423 or prior work in population

R SOC 530 **Sociology and Demography of Poverty in the United States** (3) An in-depth treatment of sociological and

demographic dimensions of poverty in rural and urban areas of the United States.
Effective: Spring 1998

R SOC 552 **Theoretical Frameworks for Rural Community Research** (3) Application of community theories to the study of communities in rural areas.
Effective: Summer 2000
Prerequisite: R SOC 452

R SOC 555 (S T S 555) **Human Dimensions of Natural Resources** (3) Identification of the interrelationships and influence of human behavior and natural resources.
Effective: Spring 1999

R SOC 573 **Methods of Survey Data Analysis** (3) Use of multivariate procedures in the analysis of survey data in the rural social sciences.
Effective: Spring 1988
Prerequisite: AG 400

R SOC 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Spring 1987

R SOC 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Spring 1987

R SOC 597A **Data Analysis** (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Summer 2011 Ending: Summer 2011

R SOC 597C **Qualitative Methods** (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

R SOC 597D **Theories and Methods of Community and Natural Resources** (3) Formal courses given on a topical or special interest subject which may be offered infrequently.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

R SOC 600 **Thesis Research** (1-15) No description.
Effective: Fall 1983

R SOC 601 **Ph.D. Dissertation Full-Time** (0) No description.
Effective: Fall 1983

R SOC 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Provides advanced standing graduate students from a research oriented curriculum the opportunity to receive experience/supervision in resident instruction in higher education.
Effective: Fall 1983

R SOC 610 **Thesis Research Off Campus** (1-15) No description.
Effective: Fall 1983

R SOC 611 **Ph.D. Dissertation Part-Time** (0) No description.
Effective: Fall 1983

1 Students may take only one course for General Education credit from R SOC 011 GS or SOC 001 GS.

Last Import from UCM: June 16, 2011 3:00 AM

Russian (RUS)

RUS 400 (IL) **Senior Seminar in Russian Culture** (3) Senior seminar devoted to topics in Russian culture; conducted in Russian.

Effective: Spring 2006

Prerequisite: RUS 204, RUS 214, RUS 304

RUS 412 (IL) **Russian Translation** (3 per semester/maximum of 6) Translation from Russian into English of complex texts from the humanities, social sciences, and technical fields.

Effective: Spring 2006

Prerequisite: 9 credits of Russian at the 200 level or higher

RUS 426 (IL) **Dostoevsky** (3) Study of representative works by Dostoevsky in the original Russian.

Effective: Spring 2006

Prerequisite: 9 credits of Russian at the 200 level or higher

RUS 427 (IL) **Tolstoy** (3) Study of representative works by Tolstoy in the original Russian.

Effective: Spring 2006

Prerequisite: 9 credits of Russian at the 200 level or higher

RUS 460 (IL) **Linguistic Analysis of Contemporary Russian** (3) Detailed study of the phonology, morphology, and syntax of Modern Standard Russian and the major dialects.

Effective: Spring 2006

Prerequisite: 9 credits of Russian at the 200 level or higher

RUS 494 **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Summer 1994

RUS 494H **Research Project** (1-12) Supervised student activities on research projects identified on an individual or small-group basis.

Effective: Fall 2007

RUS 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983

RUS 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.

Effective: Fall 1983

RUS 499 (IL) **Foreign Studies** (1-12) Courses offered in foreign countries by individual or group instruction.

Effective: Summer 2005

RUS 501 **Readings in Russian Literature** (3-6) No description.

Effective: Spring 1987

Prerequisite: RUS 204

RUS 525 **Pushkin** (3) Pushkin's significance in Russian literature; his relation to other European literatures; Eugene Onegin and selected shorter works.

Effective: Winter 1978

RUS 530 **Seminar in Nineteenth-Century Russian Literature and Culture** (3 per semester/maximum of 6) Major issues in nineteenth-century literature and culture (novel and social thought, the short story, drama before Chekhov, and others).

Effective: Spring 1998

Prerequisite: RUS 304, RUS 400

RUS 540 **Eighteenth-Century Russian Literature** (3) Study of the major writers and literary developments in this period of the secularization and modernization of Russian literature.

Effective: Winter 1978

RUS 542 **Seminar in Twentieth-Century Russian Literature** (3-6) Major works and issues in Twentieth-century Russian literature and culture.

Effective: Fall 1997

Prerequisite: RUS 304 or RUS 440

RUS 560 **History of the Russian Literary Language** (3) Historical development of the Russian literary language and tradition.

Effective: Spring 1998

Prerequisite: RUS 304, RUS 360

RUS 570 **Old Russian Literature** (3) Analysis of Russian literary monuments in the original, 1100-1700.

Effective: Winter 1978

Prerequisite: SLAV 550

RUS 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, that are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 2001

RUS 600 **Thesis Research** (1-15) No description.

Effective: Fall 1983

RUS 602 **Supervised Experience in College Teaching** (1-3 per semester/maximum of 6) Teaching RUS 001, 002, or 003 under the supervision of a full-time faculty member.

Effective: Fall 1983

RUS 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Fall 1983

Last Import from UCM: June 16, 2011 3:00 AM

School Psychology (S PSY)

S PSY 496 **Independent Studies** (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.
Effective: Summer 1990

S PSY 497 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject which may be topical or of special interest.
Effective: Summer 1990

S PSY 497A (PSYCH 497A) **Child Development, Health and Education in Nepal** (3) This course will educate students about the impact of demographic factors, economic indicators, educational access, social expectations on child health, academic and social-emotional competencies.
Effective: Fall 2011 Ending: Fall 2011 Future: Fall 2011

S PSY 498 **Special Topics** (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Fall 1992

S PSY 500 **Professional Issues in School Psychology** (1-3) Orientation to the field through study of unique problems, current issues, ethical and legal matters, unique cases, and research projects.
Effective: Summer 1990

S PSY 503 **Development Across the Life Span** (3) This is a graduate level survey course on the scientific discipline of human development across the life span.
Effective: Fall 2010
Prerequisite: graduate student status with priority given to those in the professional practice areas of psychology such as clinical counseling and school psychology and other developed practice areas (e.g. counselor education)

S PSY 510 **Supervision of Pupil Service Personnel** (1-10) Program supervision and professional leadership in university clinics and school systems.
Effective: Summer 1990
Prerequisite: S PSY 595A

S PSY 530 **Psychoeducational Interventions** (3) Development of empirically validated psychoeducational interventions for academic and behavioral problems experienced in school by children and adolescents.
Effective: Fall 2003

S PSY 535 **School-Based Psychological Interventions for Children and Youth** (3) Development of empirically supported psychological and psychoeducational interventions for behavioral and emotional concerns among school-aged children.
Effective: Spring 2007
Prerequisite: EDPSY 450, EDPSY 475, PSYCH 461

S PSY 554 **Psychological and Educational Evaluation of Exceptional Children** (3) Administration and interpretation of individual tests other than the Stanford- Binet, WISC, WAIS.
Effective: Summer 1990
Prerequisite: S PSY 559

S PSY 556 **Psychological Assessment of Preschool and School-Aged Children** (2) Study of cognitive/affective tests; use of systems--analytic, multivariate statistical, actuarial methods of data combination in decision-making processes.
Effective: Summer 1990
Prerequisite: EDPSY 400, EDPSY 450;EDPSY 554 orS PSY 559

S PSY 559 (PSY 559) **The Individual Psychological Examination** (3) Demonstrations and practice in widely used ability and aptitude tests; psychological report writing.
Effective: Summer 1990
Prerequisite: 15 credits in psychology and a course in measurement

S PSY 561 **Consultation in Educational Settings** (3) Prepares students to consult with teachers, administrators, parents, and other professionals about academic, behavioral, social-emotional, and programmatic issues.
Effective: Spring 2000
Prerequisite: EDPSY 450, SPLED 401

S PSY 595A **Practicum in School Psychology** (1-6) Clinical experience with children under supervision in a variety of settings requiring service, including practice in synthesizing data and observations.
Effective: Spring 1997
Prerequisite: PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check. (Forms: 228 Chambers)

S PSY 595B **Internship in School Psychology** (1-10) Long-term placement in settings providing work for school psychologists with children, parents, teachers, administrators, and service agencies, under supervision.

Effective: Spring 1997

Prerequisite: PA Act 34 clearance required. In addition non-Pennsylvania residents must provide evidence of an FBI background information check. (Forms: 228 Chambers)

S PSY 596 **Individual Studies** (1-9) Creative projects, including nonthesis research, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Summer 1990

S PSY 597 **Special Topics** (1-9) Formal courses given on a topical or special interest subject that may be offered infrequently; several different topics may be taught in one year or semester. A specific title may be used in each instance and will be entered on the student's transcript. Multiple offerings may be accommodated by the use of suffixes, A, B, etc.

Effective: Fall 2003

S PSY 597A **Child and Adolescent Psychopathology Seminar** (3) The purpose of this course is to familiarize students with many of the child and adolescent disorders that mental health professionals encounter in working with children in schools.

Effective: Summer 2011 Ending: Summer 2011

S PSY 600 **Thesis Research** (1-15) No description.

Effective: Summer 1990

S PSY 601 **Ph.D. Dissertation Full-Time** (0) No description.

Effective: Summer 1990

S PSY 610 **Thesis Research Off Campus** (1-15) No description.

Effective: Summer 1990

S PSY 611 **Ph.D. Dissertation Part-Time** (0) No description.

Effective: Summer 1990

S PSY 843 (CN ED 843) **Prevention Strategies and Programming** (3) Addresses prevention program development, implementation, and evaluation, along with theoretical and empirical underpinnings, ethical, and multicultural issues related to prevention.

Effective: Fall 2010

Last Import from UCM: June 16, 2011 3:00 AM

School of Science, Engineering, and Technology (SSET)

SSET 495 Internship (1-18) Supervised off-campus, individual training including practical field experiences of internships where written and oral critique of the activity is required.

Effective: Summer 2003

Prerequisite: prior approval of the proposed assignment by the program

Last Import from UCM: June 16, 2011 3:00 AM

Science (SC)

SC 400 Consequences of Science (1) A series of lecture/discussions in which science faculty members show the social implications of their research specialty.
Effective: Winter 1978

SC 401 Basic Science and Disease (1) Clinical aspects of various disease and how basic scientific information contributes towards understanding and treating disease.
Effective: Summer 2008
Prerequisite: 4th semester standing or higher standing plus 3 credits in biology and 3 credits in chemistry

SC 402 Science-Related Employment: Corporate Organization, Opportunities, and Expectations (1-3 per semester/maximum of 3) Present undergraduate and graduate students with information and skills necessary for success in science-related job positions available in industry.
Effective: Spring 2011
Prerequisite: 5th semester standing or permission of program

SC 476 Human Dimensions of Health Care (3) Field experience in five or more medical settings; complementary exposure to the scientific literature; weekly discussions.
Effective: Spring 2011
Prerequisite: 5th semester standing;BIOL 230W andBIOL 240W or equivalent; approval of health sciences committee or coordinator

SC 494 Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Spring 1994

SC 494H Research Project Courses (1-12) Supervised student activities on research projects identified on an individual or small-group basis.
Effective: Fall 2007

SC 495 Science Co-op Work Experience III (1-3) A supervised work experience where the student is employed in a scientific position. To be offered for SA/UN grading.
Effective: Spring 2007
Prerequisite: SC 395

SC 497 Special Topics (1-9) Formal courses given infrequently to explore, in depth, a comparatively narrow subject that may be topical or of special interest.
Effective: Spring 1996

SC 595 Internship (1-18) Supervised off-campus, nongroup instruction, including field experiences, practicums, or internships. Written and oral critique of activity required.
Effective: Spring 1997

SC 597 Special Topics (1-9) Formal courses given on a topical or special interest subject which may be offered infrequently; several different topics may be taught in one year or semester.
Effective: Summer 1996

Last Import from UCM: June 16, 2011 3:00 AM

Science Education (SCIED)

SCIED 410 Using Technology to Enhance Science Teaching (3) This course explores contemporary practice and research associated with applications of technology to enhance science learning and teaching.

Effective: Summer 2000

Prerequisite: admission to one of the science teaching options in SECED

SCIED 411 Teaching Secondary Science I (3) Introduction to teaching secondary school science, including curriculum, learning theory, media, evaluation as they relate to student progress.

Effective: Spring 1994

Prerequisite: C I 295 ; appropriate courses for certification option and approval of department

SCIED 412 Teaching Secondary Science II (3) Implementation of science instruction using a variety of modern approaches.

Effective: Spring 2001

Prerequisite: SCIED 410, SCIED 411 Concurrent: C I 412W

SCIED 455 Field Natural History for Teachers (3) Ecologically oriented field study course to provide teachers with basic knowledge of natural science resources in school environments.

Effective: Winter 1978

Prerequisite: 3 credits in biological science

SCIED 457 Environmental Science Education (3) Philosophy, techniques, and skills for teaching environmental science, including curriculum development, fieldwork, and the use of appropriate technologies.

Effective: Fall 2003

Prerequisite: 3 credits of calculus 9 credits of sciences 400-level teaching methods course

SCIED 458 Teaching Science in the Elementary School (3) Interpreting children's science experiences and guiding development of their scientific concepts; a briefing of science content material and its use.

Effective: Spring 2007

Prerequisite: LL ED 400, LL ED 401, LL ED 402, PSYCH 212 three credits each in biological earth and physical sciences

Concurrent: C I 495A OR SS ED 430W MTHED 420 C I 495B ;

SCIED 470 Selected Studies in Science Education (1-6) Intensive work on particular issues, trends, or developments in science education for elementary and secondary school teachers.

Effective: Winter 1978

Prerequisite: Instructional I certification and teaching experience

SCIED 496 Independent Studies (1-18) Creative projects, including research and design, which are supervised on an individual basis and which fall outside the scope of formal courses.

Effective: Fall 1983
