SOLAR ENERGY GRADUATE CREDIT CERTIFICATE PROGRAM

Learning Outcomes

- Evaluate solar energy systems using techno-economic, performance and/or cost/benefit analyses, including multi-parameter dynamic simulation tools.
- 2. Demonstrate fundamental understanding of the principles of solar energy science, including resource availability, resource intermittency, and options for solar energy conversion systems.
- 3. Demonstrate an appreciation for the project development and stakeholder engagement process relative to the goal of solar design:identifying stakeholder preference for solar goods and services in a given locale.
- 4. Evaluate project development and/or sustainability decisions in the broader context of society's interests.
