The Department of Anthropology at Penn State integrates social, ecological, and evolutionary approaches to understand variability in the human condition through time and across space. We offer an integrated program of graduate study at both the Ph.D. and M.A. level focusing on specialized training in:

- human and behavioral ecology
- cultural anthropology
- anthropological demography
- archaeology
- archaeometry
- genetics
- human evolution
- the behavioral and evolutionary biology of human and non-human primates

Students also have the option of enrolling in dual-title Ph.D. graduate programs in Climate Science, Demography, Transdisciplinary Research on Environment and Society (TREES), and Bioethics, and dual-title M.A. programs in Demography and TREES. The Department also offers two Integrated Undergraduate/Graduate (IUG) programs (B.A./M.A. and B.S./B.A./M.A.): with the Department of Classics (CAMS). In addition, the Department of Anthropology also offers a joint M.D./Ph.D. degree program with the College of Medicine.
