explore commercial data analysis and mathematical models. All of these courses go beyond a question of “how do I fix this”, which is the defining question of master’s level classes, instead giving the students the ability to answer “why is this happening”, thus giving students the tools to allow them to solve new and emergent questions arising in their organizations.

The Doctor of Philosophy degree in the Business Administration program offers advanced graduate education for students focused on research careers at leading business schools. The faculty of the college views the Ph.D. as evidencing scholarship at the highest level.

The Master of Business Administration program is a professional degree designed to prepare individuals for managerial positions in business, government, and nonprofit institutions. The M.B.A. curriculum blends technical rigor, managerial theory, and integrative learning experiences through case studies and other teaching methods. A managerial communications course is fully integrated into the program.

The Master of Science in Business Administration program is highly flexible and designed for advanced study in a specialized field. The M.S. program is directed toward the development of competency within a defined area of management. Fields such as accounting and management science are examples of career opportunities requiring specialized knowledge and skill, including research.

The D.B.A. provides professionals and executives with advanced tools and research skills needed for strategic planning and decision making. It also prepares graduates for translating research into practice. The program empowers professionals to become experts, leaders, and pioneers. The program teaches students how to understand the individual and organizational factors that drive successful change initiatives as well as teaches groundbreaking process models of change and obstacles to improvement. Students are exposed to advanced corporate finance practices and theories regarding taxation, agency costs and market inefficiencies. Courses will help students better understand individual and organizational behaviors across different commercial contexts. Students become familiar with opportunity recognition and exploitation techniques. Marketing strategy courses cover resource planning, organizational behavior classes will scientifically interpret behaviors and classes concerning quantitative research methods will
