REST 575	Quantitative Analysis for Real Estate	3
RM 875	Risk Management and Compliance	2
Culminating Experience		
FIN 880	Corporate Finance Analytical Research Projects (Capstone Course)	2
Total Credits		31

The MFIN program culminates with the capstone course, FIN 880 Corporate Finance Analytical Research Projects. FIN 880 combines multidisciplinary critical analysis and problem solving of strategy in the context of a challenging business environment. The capstone course integrates all of the essential concepts involved in financial decision making cultivated throughout the program.

The aim of the capstone is to assess students' ability to synthesize and integrate the skills they have developed throughout their course work. This course is structured to support student success in fulfilling program goals and requirements. The projects students tackle will mirror what they'll encounter on the job as a significant member of the planning strategic management team. The course integrates topics and methodologies analyzed throughout the program, leading students to understand that strategic analysis, and ultimately, the firm's ability to enhance shareholder value, is a holistic and multifaceted analytical process.
