

PUBLIC HEALTH

Learning Outcomes

Master of Public Health (M.P.H.)

- Demonstrate meaningful scholarship through competencies that include evidence-based approaches to public health, public health & health care systems, planning and management to promote health, policy in public health, leadership, communication, interprofessional practice and systems thinking.
- Apply effective communication skills (oral and written) to diverse audiences and with an understanding of the importance of cultural competence.
- Apply knowledge and skills learned in the classroom to real-world public health issues.
- Synthesize and integrate knowledge acquired in course work and other learning experiences and apply it to analyzing and addressing a public health practice or research challenge.
