

# WILDLIFE AND FISHERIES SCIENCE, B.S.

---

**Begin Campus:** Any Penn State Campus

**End Campus:** University Park

## Career Paths

Employment in the wildlife and fisheries professions is highly competitive. Related work experience is often required for post-graduation employment. Students get that experience from summer jobs, internships, or independent study projects. Flexibility in job location and willingness to accept seasonal or part-time work can increase employment prospects. Our curriculum can provide a firm base for graduate study, as well as the opportunity to meet certification standards established by The Wildlife Society and the American Fisheries Society, and the academic requirements set by the U.S. Office of Personnel Management for federal employment as a wildlife or fisheries biologist.

## Careers

Wildlife/fisheries technician or biologist, ecologist, conservation officer, environmental educator, habitat manager, and zookeeper are just some of the opportunities pursued by Wildlife and Fisheries Science graduates. Employers include the U.S. Fish and Wildlife Service, the National Park Service, the USDA Wildlife Service, the Pennsylvania Game Commission, and conservation districts, as well as nongovernmental organizations and private industry.
