DATA VISUALIZATION, MINOR

Requirements for a minor may be completed at any campus location offering the specified courses for the minor. Students may not change from a campus that offers their major to a campus that does not offer their major for the purpose of completing a minor.

Career Paths

The minor in Data Visualization is open to students in any Behrend major. Students with a major in a data-intensive field such as MIS, science, psychology, or business would benefit from a Data Visualization minor. Professionals in this field work in data analytics studios and corporate and government settings.

Careers

A Data Visualization minor can make you a more competitive job candidate. Employers will value your ability to analyze complex and abstract information and translate it into an easy-to-understand format.
