ENERGY AND SUSTAINABILITY POLICY, B.A.

Begin Campus: World Campus

End Campus: World Campus

Program Learning Objectives

- Business and Technical Knowledge: Graduates will have broad and accurate business and technical knowledge of all major sectors of the energy industry, including conventional, alternative/renewable, and emerging technologies.
- Communicating Science and Policy: Graduates will be able to
 effectively explain to diverse audiences—orally, in writing, and through
 maps and other information graphics—the intended and unintended
 consequences of energy policy and regulation.
- Global Systems Energy, Society, and Environment: Graduates
 will be able to describe how global systems of energy production,
 distribution and consumption are linked with social and
 environmental systems.
- Legislative Processes and Actors: Graduates will understand
 the legislative processes within state, federal and international
 governments, including the roles of regulators, non-governmental
 organizations and other advocacy groups.
- Policy and Regulations: Graduates will be able to find, read, understand, interpret and synthesize evolving energy policy and regulations.
- Translating Theory into Practice: Graduates will be able to bridge the gap between theory and practice, by applying the knowledge acquired through formal learning to real-world settings.
